TM INTEGRATION – INTER & INTRE MISSION TRANSFERS

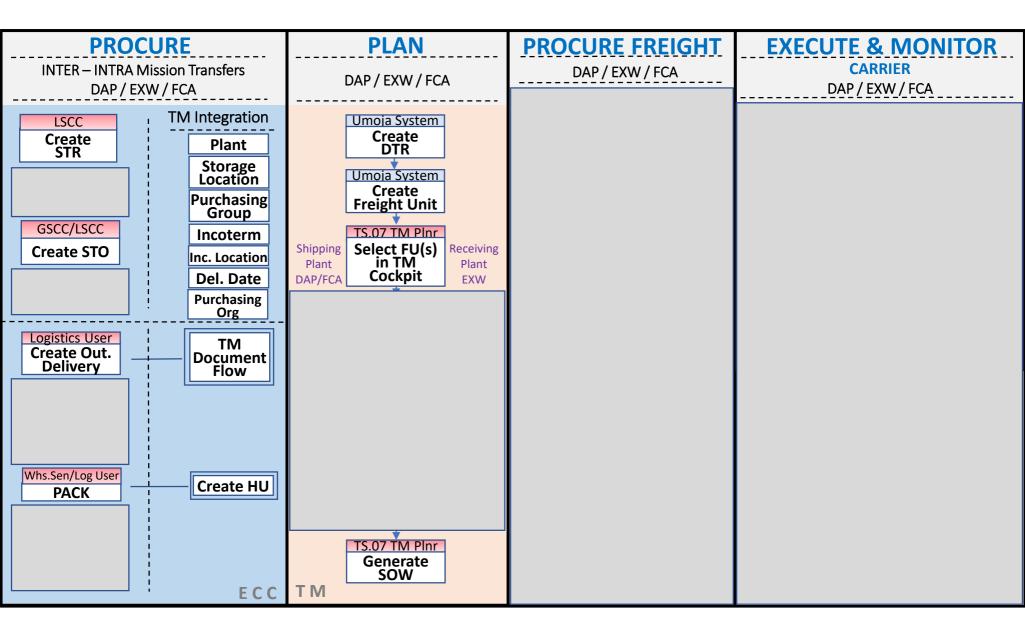

Main purpose of this presentation is:

- <u>To identify the key transactions</u> in ECC that will have a direct impact in TM when creating STRs and STOs for INTER and INTRA Mission Transfers
- <u>To show the output documents and data</u> in TM of ECC transactions when creating STRs and STOs for INTER and INTRA Mission Transfers
- <u>To understand</u> the linkage between:

ECC & TM DERIVATIONS

INTER MISSION TRANSFER – STR CREATION

LSCC		TM	
Create STR	Ľ	Plant	
		Storage Location	
	Ρ	urchasing Group	
	F	Purchasing Org	
ECC		Del. Date	

Impact in TM

The LSCC adds "Receiving Plant", "Receiving Storage Location", Purchasing Group, Delivery Date, and Purchasing Org

The Purchasing Group added in the STR will derive in TM as the Planning & Execution Group providing visibility of the DTR and FU documents in TM

The **Purchasing Organization** added in the STR will derive in TM as United Nations Sales Org

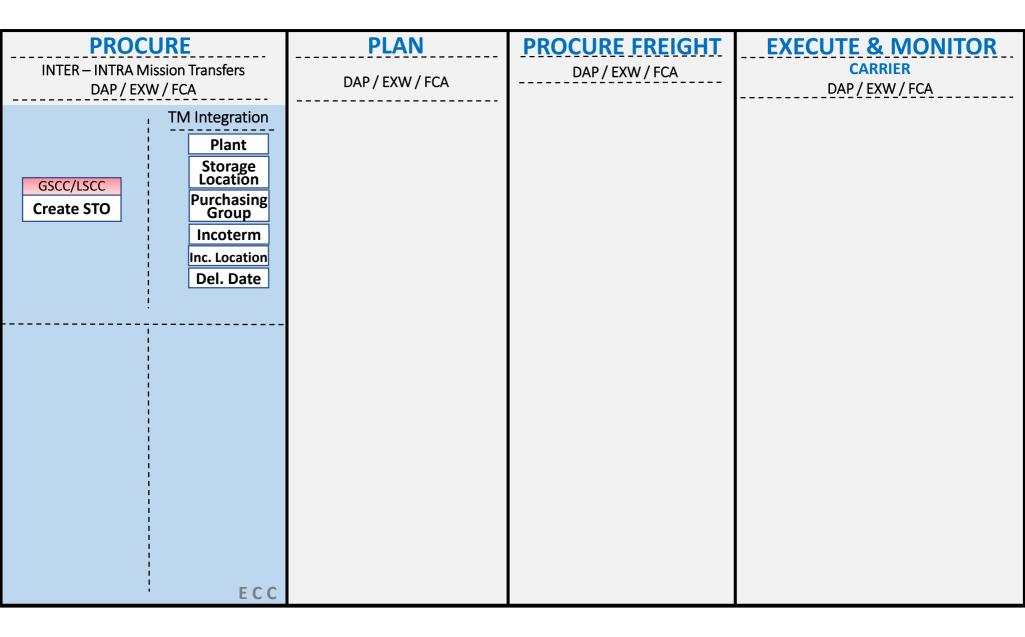

The Plant and Receiving Storage Location define the Destination Location and Address in TM.

Each **Delivery Date** added to each line will have an impact on the number of Outbound Documents, DTRs and FUs generated.

GSCC Create STO Inc. Location E C C

Impact in TM

GSCC adds relevant Incoterm and Incoterm Location

The concept of incoterm does not refer to a commercial agreement in STO scenarios

The Incoterm added at header level will have an impact on which Plant (Supplying/Receiving) <u>Plans Transportation</u> and <u>Submits Events in TM</u>

The Incoterm Location selected indicates in TM the Handover Location (FCA), Final Destination (DAP), or Pick Up Location (EXW) for the Carriers assigned.

INTRA MISSION TRANSFER – STO CREATION

Impact in TM

LSCC adds relevant Supplying Plant (Shipping Plant) determining the Source Location in TM

The Incoterm added at header level will determine in TM which Plant (Supplying/Receiving) <u>Plans Transportation</u> and <u>Submits Events</u>

***Note:** The concept of incoterm does not refer to a commercial agreement in STO scenarios

The Purchasing Group of the Shipping Plant added in the STO will derive in TM as the

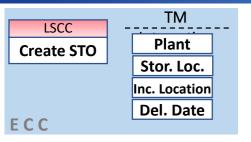

Planning & Execution Group of the Issuing Plant providing visibility of the DTR and FU documents in TM

INTRA MISSION TRANSFER – STO CREATION

Impact in TM

LSCC adds relevant Receiving Plant and Storage Location as well as Issuing Storage Location determining the Destination Location in TM as well as the Delivery Address for both the Source and Destination Locations in TM.

Each Delivery Date added to each line will have an impact on the number of Outbound Documents, DTRs and FUs generated beyond the incoterm assigned to it.

*Note: It is expected to have one shipment per each STO. If there is the need of two STOs, it needs to be split at the STO creation.

Impact in TM

The number of Outbound Deliveries/Delivery transport Requests/Freight Units generated will be directly linked to the Incoterms/Delivery Dates added in the STO.

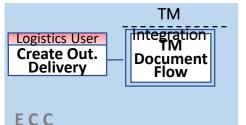

It is expected to have one Outbound Delivery per each STO. If there is the need of two STO, they need to be split at the STO creation when adopting materials from the STR.

These can be found under the TM Status tab
