SUPERIOR FERTILIZERS

For the Lawn, Garden or Farm

PRICES ON APPLICATION

Net F. O. B. Shipping Point. Local delivery by truck or express at additional charge for hauling.

CANADA UNLEACHED HARD-WOOD ASHES

Are an active fertilizer, replenishing worn-out soils, and, for the lawn or pasture, are economical and valuable. For the lawn, they are easy to handle, and the chemical properties are at once available for plant food.

Apply at the rate of 1000 to 1500 lbs. per acre for top dressing, 2000 to 2500 lbs. for new lawns.

Prices on application.

PREPARED LIME

Where soils are sour and need a fertilizer to sweeten them, lime is a valuable agent. It puts the soil in condition to assimilate plant food.

Our prepared lime is fresh from the kilns and especially prepared, so that it will go three times as far as lump lime. Use 500 lbs. per acre.

Prices on application.

PURE GROUND BONE

Used as a top dressing for the lawn at the rate of 1000 to 1500 lbs. to the acre—as a field or garden fertilizer at 3 to 4 tons per acre.

Grade A—Fine Ground

HUMUS. Bog-Peat

A splendid fertilizer. This air-dried Humus has been carefully prepared, screened fine so that it can be readily used for top dressing the lawn.

Use 1000 lbs. to the acre.

For top dressing lawns use 1000 lbs, to the acre.

For new lawns 5 to 10 tons per acre.

Prices on application.

"Upland" Humus-Flbrous Peat

A stock of carefully selected peat, suitable for planting or potting Rhododendrons and shrubs that need a peaty or fibrons soil.

Carload prices on application.

MANURE

Being large users of manure for our own Nurseries we are in a position at all times to command the market's best figures in carload lots on horse manure, cow manure, stock-yard manure.

Prices on application.

ANDORRA NURSERIES

RE extensive, covering a thousand acres, of which over six hundred are planted with trees and shrubs. They are easy of access, as Chestnut Hill is the terminus of branches of the Pennsylvania Railroad (take train at Broad Street Station) and the Philadelphia and Reading Railroad (take train at the Terminal, 12th and Market Streets). At Chestnut Hill, take the Chestnut Hill (City Line) Trolley which runs to City Line, within three minutes' walk of the Nurseries.

QUALITY.—The trees and shrubs offered are grown in open, unsheltered ground, in very exposed situations, which insure their hardiness. and on soil admirably adapted for forming robust plants having an abundance of roots. Special attention is called to the fact that our stock is grown a good distance apart in the rows, insuring heavier trees and shrubs than are generally offered.

SHIPPING INSTRUCTIONS

ORDERS.—All orders are accepted subject to the following terms and conditions. Write plainly and give explicit directions as to address and mode of shipment.

SHIPPING SEASON opens about March 1 in the spring and August

15 in the fall.

INSPECTION AND FUMIGATION.—Our stock is regularly inspected and certificate will be sent with each shipment. Stock will be fumigated when requested or when the State laws require it.

FORWARDING.—Shipments will be forwarded exactly as directed; but when without instructions, we will use our best judgment and forward by shortest and safest route. We recommend all herbaceous plants be shipped by express.

RISK.—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

CLAIMS for damage while in transit must be made to the delivering company. Have delivering agent note the damaged condition on the freight bill and present your claim through him promptly.

TERMS

PRICES in this list are for goods f. o. b. here, and are subject to hange without notice.

STOCK SELECTED by customers at the Nurseries will be charged according to the value of the trees chosen.

QUANTITY.—Lots of 5 and 50 will be furnished at the 10 and 100 rates respectively.

PACKING.—All goods are thoroughly packed, thus avoiding risk, if delayed in transit. All packing charges are included in our list prices.

GUARANTEE AND CLAIMS .- All goods are guaranteed true to name. full count, up to grade, and in good condition when shipped. Any plant proving untrue to name will be replaced. Claims to receive consideration must be made within five days after receipt of goods. We give no guarantee of the life of stock.

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility, when accounts will be due in 30 days.

TREES

OF

UNUSUAL CHARACTER AND SIZE

The individuality of a tree can never be expressed by any listing of height or breadth, nor do such figures indicate form or worth; the following notes are of rare pieces.

BOX BUSH. Specimens	\$75	00	to	\$500	00	Each
Grown and transplanted for many years						
in our nurseries, these rare old Box Bush range in height from four to seven feet, and						
to six feet in breadth. See also pages 19						
and 21.						1

SPRUCE.	Specimens	50 00 to	150 00 Each
	Oriental Spruce with its deep green		
foliage,	and the popular Colorado Blue		

Spruce in sizes up to 15 feet in height, and in many cases of double the average breadth. Scc also pages 9 and 10.

Over twenty years' growth is represented in many of these choice pieces which are trained into pyramid, broad pyramid, oval pyramid, and columnar shapes. Pieces of twelve to eighteen feet in height and of a breadth of four to ten feet according to the form. See also pages 12 and 13.

Our common Red Cedar and its types, the Blue Virginiana glauca and the dark green Virginiana Schotti, in heavily trimmed, nursery specimens with a weight of body and a denseness of branch and foliage that is unusual. See also pages 8 and 9.

Between ten and fourteen feet in height having a spread of from six to ten feet, and are furnished with fibrons roots insuring quick results. See also page 11.

ARBORVITAES.

In sizes up to eight to nine feet of the finest specimen character. The trees have been repeatedly transplanted, they lift with splendid roots and will carry a ball of soil for protection in transplanting. One of the most useful evergreens for hedges and for formal work of all kinds. It grows readily under trying conditions and should be more generally used.

Nursery Entrance and Office.

EVERGREEN TREES

For many years we have made a specialty of growing Evergreen Trees. Our Nursery soils are particularly well adapted to the formation of the fine fibrous feeding roots, and, at the same time; the soil is of such a consistency that our frequently transplanted trees, with their masses of fiber, retain the soil in compact balls when the trees are lifted for transplanting, and they do this without the soil packing hard as is often the case when evergreens are lifted from heavy clay land.

We want to especially emphasize the importance of the transplanted tree and the frequency with which our evergreens are transplanted in the Nursery. In no other way can the proper system of fibrous roots be obtained, and they are the all-important item when transplanting the trees you purchase, to secure a satisfactory growth.

	TIVIL OICE MAIN TO CONCLAIN CINDINGS.	IZC LIIC

IMPORTANT—We want to especially emphasize the importance of the transplanted tree and the frequency with which our evergreens are transplanted in the Nursery. In no other way can the proper system of fibrous roots be obtained, and this is the all-important item to secure a satisfactory growth when transplanting the trees you purchase.

PLANTING FOR QUICK SCREENS AND WINDBREAKS

Many inquiries come to us from Park and Municipal Officers, Superintendents of Cemeteries, large Private Estates and from Country Clubs with regard to trees and shrubs for extensive planting for purposes of Screens and Windbreaks. In some cases the question of expense enforces the use of smaller sizes of stock than would really be most desirable; in those instances we can obviate the difficulty by furnishing stock that is strong and well rooted but by reason of crooked stems or one-sided tops does not come up to the standard which we list in this Price List.

Your inquiry giving us the details of your problem—size, character of the soil, exposure, etc., will give us an opportunity to quote you prices as much as 50% off our regular list on trees up to 20 feet in height and on strong, tall shrubs for underplanting and facing off the plantations.

Please refer in your inquiries to this heading—Planting for Quick Screens and Windbreaks.

A Block of Box Bush and Evergreens.

REAL VALUE—NOT THE PRICE BUT THE PLANT

The universal practice of listing growing plants by a simple statement of name, height and price gives in reality only a meagre guide as to the real quality and worth of nursery stock. The buyer must take into consideration the difference in breadth of top, quality of root system and general vigor of stock as grown at Andorra as against that ordinarily offered.

Our Trees, Evergreens and Shrubs are grown in rows of ample width, the plants are set at wide spaces and frequently transplanted and root-pruned; thus we produce bushy, well-furnished plants with a compact, vigorous root-system which assures their success, in striking comparison to the poor results obtained by planting cheaper plants grown closely together and infrequently transplanted.

Rhododendrons at Andorra.

RHODODENDRONS

HYBRID VARIETIES—ANDORRA-GROWN

Our offering of Rhododendrons consists of many thousand plants, in fifty varieties, and in a range of sizes from one to five feet. These are acclimated—Andorra-grown stock—in the hardiest varieties. They are grown in open, unsheltered ground, with northern exposure, and the wind-swept hills of Andorra are not kind to anything of a tender nature, so that you may depend upon Andorra-grown Rhododendrons.

RHODODENDRONS

Rhododendrons, to secure the best effects, should be planted in combination with other things. If along the woodland or in heavy boundary plantings, the Hemlock, the White Pine, the Dogwood, native Viburnums and plants of like character tend to break up the monotony of heavy masses of Rhododendrons of the same form and texture; and, where the plantings are more confined, as about the base line of buildings, and in nooks and corners of the garden, the Dogwood, the Cornus mascula, Kalmia, ferns of different varieties, stronger-growing perennials, and last, but not least, the hardy little shrub, Abelia rupestris, all can be used to secure most pleasing effects.

Deciduous Trees

Scarce in these Large Sizes

						47
This offering is of large trees grown and transplanted at Andorra and now ready to give the shade you need, trees with large, wide-spreading tops and roots to support them. See also page 30.	\$50	00	to	\$150	00	Each
Real trees in every sense, our own growing and so offered with confidence that they have the right tops and roots, trees from twenty to thirty feet in height, branched to the ground, with a spread of ten to twenty feet. See also page 35.	. 100	00	to	250	00	Each
Few flowering trees equal these in their display of Spring flower, and their quick growth and shade-giving qualities are well-known. Also see page 31.	50	00	to	150	00	Each
Neat growth, rich foliage, and superb fall color, three points of merit for this most desirable variety which we offer up to twenty-five feet in height with large well-balanced tops. See also page 36.	50	00	to	100	00	Each
This Spring we offer most interesting sizes of this scarce variety, eight to ten feet in height, and with a spread of from six to eight feet, low branched, with full, broad, dense heads; handled with a ball of earth for safe shipment. See also page 33.	15	00	to	25	00	Each
The words "Spring" and "Apple-blossoms" are almost synonymous, and how much finer the bloom of these new horticultural sorts than that of the fruiting apples. We have a very few fine pieces of the Pink variety Floribunda. See also page 39.	10	00	to	15	00	Each
CORK-BARKED EUONYMUS. Specimens The unusual always appeals to us and this unique shrub with its corky bark, salmon pink autumn foliage, and its carmine berries, together with a neat habit appeals to us as a most desirable specimen. See also page 50.	7 :	50	to	15	00	Each

Specimen Norway Maples in Wide Rows.

DECIDUOUS TREES

Large trees have been in demand for many years as purchasers wish quick results. In a great measure the difficulty has been to secure a large tree that would grow as satisfactorily as those of smaller size.

Appreciating the demand for a perfect tree in a large size we have for years devoted great care and large sums of money transplanting trees in unusually large nursery grades, and our customers can depend absolutely upon receiving, with any of the large sizes offered in this list, a root system which makes it practical and desirable to secure the large sizes and get immediate results.

Measurements are given as follows: Height is taken before digging, from the surface of the ground to the top branches, where they round off to form the top; diameter of stem, or caliper, is taken 6 inches above the ground, above the collar. Measurements are expressed thus: 10 to 12 ft. (height), $2\frac{1}{2}$ to $2\frac{3}{4}$ in. (caliper).

glound, above the conar. Measurements are expressed	thus:	10 to 12
ft. (height), $2\frac{1}{2}$ to $2\frac{3}{4}$ in. (caliper).	10	100

BECHTEL'S DOUBLE FLOWERING CRAB APPLE

One of the most ornamental of recent introductions and a flowering Apple deserving of a place in every garden. Planted as a specimen or in the border with other strong-growing shrubs, it makes an ideal tree. It is of good growth, with dark, rather glossy, foliage and beautiful double flowers of delicate blush, or shell-pink color and highly fragrant. See page 39.

European Linden.

Few trees are as deserving of their popularity as the small-leaved European Linden. While not the most rapid it is a good grower—very symmetrical—clean stems, and most attractive dark foliage.

Planting for Immediate Effect

See pages 4 and 28.

In these days when the planting problem is usually one of quick results, the question is not only one of large size of stock, but the vital question is high quality in stock, without which large size is worse than useless.

To this end we have developed our large stock through years of Nursery Training—by frequent transplantings to produce fibrous-feeding roots—by constant, intelligent cultivation and pruning to instill the utmost vigor.

Thus we have produced Andorra Quality—large sizes that thrive after transplanting. You have our interest in your problems at all times. Consult us freely

DECIDUOUS SHRUBS

As the public are requiring larger specimen Shrubs from year to year, our stocks are grown in wide rows, the individual shrubs set well apart in the row, as by this method we secure a substantial bush in proportion to its height and one which carries its branches and foliage close to the ground.

AZALEAS, ANDORRA-GROWN

For Evergreen varieties see page 18.

A CALENDAR OF HARDY PERENNIALS

In planning a garden or hardy border, it is most essential to know exactly the period of bloom of each plant, the color and height. Our "Calendar" will give you this information together with special lists of Iris, Phlox, Peonies and Chrysanthemums.

HARDY HERBACEOUS PLANTS

Size of Plants. We aim to send out only extra-strong plants of the different sorts—plants that will give a fair return of bloom the first season. These cost but little more than the small plants so widely offered, and our customers find it more satisfactory to use Andorra-grown stock, which gives results. It has been well said, "The lowest prices are not always the cheapest, as cheapness does not consist in what you pay, but in what you get for what you pay."

FERNS

- ADIANTUM pedatum (Maidenhair Fern). 1 to 2 ft. Moist, shaded positions.
- ASPIDIUM acrostichoides (Christmas Fern). 1 to 2 ft. Evergreen. Dry or moist soils in shady places.
 - Felix-mas (Male Fern). 2 ft. Semi-shaded positions, dry or moist soils.
 - Goldianum. 2 to 4 ft. Semi-shaded positions, dry or moist soils.
 - marginale. Evergreen. 1 to 2 ft. Shaded positions, dry or moist soils.
- ASPLENIUM Filix-femina (Lady Fern). 2 to 3 ft. Open or shaded positions, in moist or dry soils.
- BOTRYCHIUM Virginianum (Moonwort). 6 to 12 in. Shaded positions, moist or dry soils.
- DICKSONIA punctilobula (Boulder Fern). 2 to 3 ft. For open positions; forms large plantations.
- **ONOCLEA** sensibilis (Sensitive Fern). 1 to 2 ft. For open planting and wet soils.
 - Struthiopteris (Ostrich Fern). 2 to 4 ft. For open positions, dry or moist soils.
- OSMUNDA gracilis (Flowering Fern). 2 to 4 ft. Open or shaded positions, and moist soils.

 - Claytoniana. 2 to 5 ft. For open plantings, dry or moist soils. cinnamomea (Cinnamon Fern). 2 to 5 ft. For open or shaded positions, in wet soils.
- WOODSIA obtusa. 6 to 12 in. Shady places, in moist soil.
- WOODWARDIA angustifolia (Chain Fern). 1 ft. Open or shaded positions, in moist soils.
- The above varieties, 25 cts. each, \$2 per 10, \$15 per 100.
- The above, 15 varieties, \$3.50, or 100 in 5 varieties, our selection, \$13.50.

TREES AND SHRUBS FOR HEDGES

We shall be pleased to name special prices for plants in large quantity for hedging purposes. Prices per hundred are given on pages indicated.

EVERGREEN TREES

The following are only a few of the varieties that may be used for the purpose, but the list covers the most popular. We ask particular attention to the Hemlock, Tsuga Canadensis, which is one of the most popular and at the same time one of the most satisfactory evergreens for hedging purposes.

PAGE		PAGE
Picea excelsa 9	Thuya occidentalis	
Retinospora plumosa 13	Thuya occidentalis	
Retinospora plumosa aurea 13	Tsuga Canadensis	17

DECIDUOUS TREES

A few of the most desirable trees adapted for close planting for hedges are as follows: We call particular attention to the Cockspur Thorn, Cratægus Crus-galli, which makes a magnificent defensive hedge. Strong growth, beautiful foliage and adaptability to trimming place it in the front rank of trees for hedges.

PAGE	PAGE
Carpinus Americana 32	Cratægus Cordata 34
Carpinus Betulus 32	Cratagus Oxyacantha 34
Cratægus Crus-galli 34	Fagus sylvatica 34

EVERGREEN SHRUBS

There is no doubt that the Boxwood stands first among evergreen shrubs for hedge purposes. The plants we are offcring are home-grown, therefore thoroughly acclimated, and will give excellent results. They should not be compared with the freshly imported Box upon which you have to take the risk until it is acclimated.

PAGE	PAGE
Azalca amoena 18	Ilex crenata microphylla 21
Buxus sempcrvirens 19	Mahonia aquifolia
Buxus sempervirens suffruticosa 21	Mahonia Japonica

DECIDUOUS SHRUBS

Of the following the Berberis Thunbergii will make the lowest and closest hedge. Next would be the Ligustrum Regelianum, but both of these sorts will carry their branches and foliage right down to the ground. Of the other varieties the Ligustrums lend themselves readily to shearing for formal hedges, while the Hibiscus should be planted where the freer growing hedge is desired and the other sorts should be used where free-growing, untrimmed hedges are wanted.

PAGE	Page
Berberis Thunbergii and vulgaris 45 Elæagnus longipes	Ligustrum Ibota, Regelianum. 52 Ligustrum ovalifolium, vulgare. 52 Lonicera Tartarica 53 Rhamnus cathartica 54

INDEX

The following very complete Index will serve for a ready reference to the Trees, Shrubs and Plants, not only by their Botanical names but by the Common or Local names as well.

This list comprises a collection of over 300 species, and nearly 2,000 varieties, to which might be added our large lists of Paconics, Iris, Chrysanthemums and Phloxes, bringing the total to nearly 3,000 varieties. From this vast array of plant material you may select almost everything required for a complete planting.

In addition to the items given in this list, we have many varieties of Trees, Shrubs and Plants in small quantities, quantities too small to offer in a general list, but eovering a stock quite large enough to supply your wants, and, therefore, if you do not find in this list the particular item you require, write us about it.

OUR CATALOGUES

SUGGESTIONS FOR EFFECTIVE PLANTING.

This Catalog embodies an original and distinctive idea. For the convenience of those interested in any of the many varied planting problems we have arranged our catalog of Evergreens, Trees. Shrubs and Plants, by grouping together those plants best adapted for particular uses, as for instance, evergreens for formal effects; trees for screens and windbreaks, flowering shrubs for mid-summer effects, and so on. We believe it will prove a valuable aid to our patrons.

DISTINCTIVE TREES AND PLANTS.

An attractive booklet beautifully illustrated and descriptive of a number of charming Evergreens, Trees and Shrubs that are worthy of your better acquaintance.

THE ANDORRA HANDBOOK.

A beautifully illustrated descriptive guide to Trees and Shrubs with articles on their culture, pruning and place in planting. Price, 50 cents; and we are pleased to credit the amount on the first purchase amounting to \$5.

A RE-PRINT FROM THE "NATIONAL ARCHITECT."

This is of special interest to owner, architect or landscape architect who may be interested in the planting of large Evergreens and Trees for immediate effect.

PLANTING INSTRUCTIONS.

The finest plant grown will fail unless properly planted and given good after care when it reaches your hands. To secure the best results these instructions will prove invaluable. A copy is sent with every order.

SPRING AND FALL PRICE LISTS.

This Price List is revised semi-annually so as to conform to our actual stock records and is published for the convenience of large users of nursery stock. We are not jobbers but the largest nursery growing high-class stock for discriminating buyers.
