## UPWARDS OF ONE THOUSAND PRIZES AND AWARDS

 HAVE BEEN MLADE TO
## WILLIAM BULL, F.L.S.,

 At the Pbinotpal London and International Flower Seows.

Mr. W. BULL mentions this as conveying some idea of the importance of his collection.
$\qquad$

## NOTICE.

The Illustrations in Mr. W. B.'s Catalogues have been carefully drawn and engraved by eminent artists, from plants introduced at great expense from their native habitats; the Catalogue has, therefore, been registered and the copyright is reserved, and any infringement will be proceeded against.

## NEW PLANTS

## ANNOUNCED FOR THE FIRST TIME

## WILLIAM BULL, F.L.S.

## ANTHURIUM ANDREANUM ALBUM.

This charming whito-flowered variety of the well-known Anthurium Andreamum has beeu imported from Brazil. In growth and shape of flower it is a eounterpart of the type, but the spathes are of a shining ivory white, lasting a long time in perfection. A very chaste and desirable addition to our flowering stove plants. 2 guineas.

## ANTHURIUM ANDREANUM SALMONEUM.

Another very pleasing variation of Anthurium Andreanum will be found in this plant, which produces largo cordate-shaped spathes of a clear salmon eolour, the corrugations in the spathe being well marked. The basal half of the spadix is white, the apical portion ycllow. This forms a charming companion to the brilliant erimson scarlet flowered typical specics. 31 s .6 d . and 42 s .

## CRINUM MOOREI VARIEGATUM.

A beautifully variegated variety of this frec-flowering hardy bulbous plant, the leaves being ormamented with longitudinal stripes of creamy yellow of varying width, making it a most attraetive and desirable addition to decorative plants for the greenhouse and conservatory. Similar to the typical species in habit, it freely produces on erect seapes, large and handsome white flowerk, faintly tinged with blush. Tide illustration, page 5. $10 s .6 d ., 15 s$, and $21 s$.

## CYPRIPEDIUM, "CICERO."

A pretty hybrid raised from C. barbatum Warncriamum, fertilised with the pollen of C. "Argus," partaking largely of the characters of both parents. The dorsal sepal, which is large and pointed, is white with central green veins, the sides being stained with bright rose purple, veined with dark purple; petals deflexed, ciliate at the margins, the tips bright roso purple; the superior half of the basal portion is light greenish yellow with dark voins, heavily spotted with the eye-like markings peeuliar to C. "Argus." The lip is rieh purple brown, staminode horse-shoe shape, light grecn with darker markings. Leaves bright green, with cloudy maculations of dark green. Price on application.

## CYPRIPEDIUM, "EMPRESS."

A most handsome free-flowering hybrid, the result of a cross betwcen C. cardinale and C. Sedeni porphyreum. The flowers are of large size, the dorsal sepal white, petals white suffused and tinted with rose, speckled on the basal half with erimson. The pouch is bright carmine, shaded with scarlet, the infolding surface of the lobes being stained and spotted with erimson. This is one of the finest hybrids of this gronp, the bright colour of the lip being in charming contrast to the light sepals and petals. Price on application.

## CYPRIPEDIUM, "PLACIDA."

This has been raised betwcen C. insigne aureum and C. Ashburtonice. The upper sepal is large and spreading, pure white, the basal half stained with light greon and veined with a darker tint, spetted along the eourse of the veins with purplo brown ; petals spathulate, tawuy yellow at the tip, the basal portion vinons purple on the upper half with a few spots; the lower basal half apple green. Lip tawny brown, the staminode being greenish with eontral green spot. Lower sepal pale green veined with dark green. The leaves are dull grcen with a faint tesselation of dark green. Prico on application.

## CYPRIPEDIUM SIGNATUM.

A beautiful hybrid variety between C. Spicerianum magnificum and C. villosum auroum. The dorsal sepal is of large size ornamented with a median stripe of rich crimson purple, the basal portion bright green spoekled with brownish erimson, the upper portion pure white, heavily suffiused and veined in the ceutre with rich purple. Petuls spathulate with undulate margins, the superior balf brownish yellow, the lower half ochrcous yellow veined with brown. Pouch brownish yellow; staminode tawny yellow with green marking in the centre. Leaves light green. Prico on application.

## GRAPTOPHYLLUM PICTURATUM.

A very striking and effeetive stove plant of free growth, furnished with opposito lanceolate leaves, having a central variegation of rich golden yellow, maturing with age into ereamy yellow. The colouring is irregularly disposed on each side of the midrib, the dark greeu margin having blotehes of lighter green, bordering the central variegation. Tide illustration, page 4. 10s. fid.

## PTERIS SERRULATA VOLUTA.

This desirable plant is oue of the most distinet varieties of $I$. servulata yet introduced, the volute or curled appearance of the pinnse being very notieeable, not only in mature plants, but in the young state. Its clegant appearanee being aloo further enhanced by the tips of the incurved pinure being prettily crested. Vidc illustration, page 3. 10s. $6 a$.

## NEW GREENHOUSE RHODODENDRONS.

ATLAS, a very beantiful greenhouse hybrid, producing trusses of loug tubular fiowers of a delieate blush colour. 10s. $6 d$.

BRENDA, a pretty varicty with pure white flowers, the petals beautifully crisped and undulated. 10s, $6 \pi$.

CLIO, salmon-piuk flowers shaded with rose; large trusses, the individual blossoms of good shape. 10s. $6 r$. .

HERA, fine trussos of yellowish buff flowers, shaded with salmon-pink, the individual blooms being of large sizo and good shape. 15s.

IONE, a very charming variety with clear rose-eolonred petals, the throat and tube being pure white. $10 s, 6 d$.

ISIS, very free flowering variety, produeing geod trusses of milk-white flowers suffused with rose. 10 s .6 d .

MENTO, large trusses of very soft rosy salmon flewers suffused with pink. 10s. 6rl.
ORION, this handsome hybrid preduees large trusses of rich magenta-pink flowers, very bright and attractive. $10 s .6 d$.

PERA, flowers ef fine shape, sepals bright cerise pink, tube French whito, a pretty and cheerful looking eolour. 15 s.

PRIAM, very large ereany buff flowers, suffused and shaded with earmine pink. 10s. 6d.
SYLIIA, soft pink-colonred flowers, well made and borne in large trusses; tube uearly white. $10 s .6 d$.

ZAMPA, magnifieent trusses of rieh buff yollow flowers; very handsome. 15 s .

## NEW PLANTS.

## NEW CALADIUMS.

ACQUISITION, a most beautiful variety with gauze-like transparent leaves, overspread with a delieate pinkish purple sheen. 42 s .

CONQUEROR, magenta red ground radiating from tho centre, mottled with green between tho veins; green margin ; extra fino. 42 s .

DAMON, an extra fine variety with large erimson rod leaves, narrow margins, mottled with green. 31s. 6 d.

GARNET, maguifieent rosy-eximson leaves, margined with green; very striking. 31s. $6 \%$.
GENERAL, a splendid variety, with magnifieont fiery red leaves with undulating murgins : green border; very extra. 31.. 6d.

ICARUS, very fine largo red leaves with narrow green edging; a magnifieent and most striking variety. 31s. $6 \pi$.

JULIUS, red centre, with erimson veins and greenish yellow margin; extra fine. $42 s$.
PASHA, leaves greenish yellow with rosy purple spots, very distinet and striking. 21s.
RONURA, very distinet and of dwarf habit; cordate leaves, greyish white retionlated and veincd with green. 31s. 6d.

THERESA, leaves delieato roso pink, creamy yellow edging; very pretty. 31s. Gd.
VERONA, large bright red leaves with dark crimson veins and green margin. 31 s . 6 d .

## NEW FUCHSIAS.

CEAMPION, bright red tube and sepals, the latter completely refiexed; reddish violet eorolla. Flower of inmense size. 10N. 6rl.

COUNTESS OF WARWICK, short tube with short broad rosy crinson sepals ; very double corolla, blush white tinged with pink, deeper at the base of petals. 7 s .6 d .

EXCELSIOR, bright erimson sepals completely reflexed; well formed double corolla of a light blue colour. 7s. 6 rt.

FAVOURITE, deep carmine tube and sepals completely reflexed, blush white doublo corolla, marked with rose at base. $7 \mathrm{~s} .6 \mathrm{r} \%$.

The set of four, 30 s.
For General Collection vide page 119.

## NEW SPOTTED PELARGONIUMS.

ECLAT, flowers blush shaded with violet, upper petals blotched with maroon surrounded with intense purple; lower petals spotted witl maroon on a purple ground. 10s. $6 d$.

HEBE, soft salmon pink flowers, upper petals heavily bloteled with blaek maroon surrounded with bright erimsou; lower petals spotted with bright crimson. $10 s .6 \mathrm{~d}$.

For General Collection vide page 91.

## NEW SINGLE-FLOWERED IVY-LEAF PELARGONIUMS.

CYRUS, a large and finely shaped flowor of a rich rosy magenta colour, the upper petals ornamented with a crimson blotch ; large truss. 7s. $6 d$.

URANUS, large trusses of salmon scarlet flowers, the upper petals lined with erimson; a novel shade of colour. 7s. $6 \pi$.

See also page 93.

## NEW COLEUS.

The following will be found very handsomo and effeetive varieties, the colours and markings being exeeptionally bright and distinet:-

| Ariadne | Fraaro | Jupterb |
| :--- | :--- | :--- |
| Calyrso | Gerard | Niobe |
| Ceisa | Horace | Prrseus |
| Elisa | Janus | Seraph |

5s. each. The Set of 12 for $42 s$.
For General Collection vide page 120.

AGLAONEMA VERSICOLOR.
An attraetive ornamental foliage stove plant, belonging to the Aroid farnily, introdueed from the East Indies. It is of neat growth and bears on an ereet stem beautifully mottled shortly stalked spreading leaves, the petioles sheathing with mennraneons edges. The leaf blades obliquely oblong, rounded at the base, acute at the apex, irregularly blotched with patches of dark velvety green interspersed among patehes of lighter green, and some of milky white. 15 s .

## NEW, RARE AND DESIRABLE STOVE PLANTS.

## ABROMA SINUOSA.

An interesting plant from Madagasear. The leaves, which grow on slonder petioles, are broadly ovate, with oblong obtuse lobes and broad open sinuses, and from their peculiar and remarkable oharacter, the plant is very pleasing and attractive. $5 s$.
$\triangle C A L Y P H A$ illustrata, $2 s$. $6 d$. and $3 s .6 d$. 3ACROPITYLLA, 2s. $6 d$. and $3 s .6 d$. obovata, 3 s . 6 d .

## ACALYPHA TRIUMPHANS, $38.6 d$.

 ACANTHOPANAX, vide page 33. ACANTHUS MONTANUS, $38.6 d$.
## ADANSONIA DIGITATA.

This is the colcbrated African Baobab Tree. $10 s .6 d$.

ECHMEA AMAZONIOA, 5s. and 7s. $6 d$. fuloens, vide Lamprococeus fulgens. minlata, vide Lamprococcus miniata. Marie Reonne, 10 s . 6 d . panioultoera, 10s. 6 d .

EौCHMEA VeITciII, vide Chevalliera Veitchii.
Weibachit, vide Lamprococcus Weilbachii. ESCHYNANTHUS ORANDIFLORUS, $3 s .6 d$. Lobbianus, $2 s .6 d$. and $3 s .6 d$. of sorts, 2 s .6 d . and 3s. 6 d .

## AGLAONEMA PICTUM COMPACTUM.

An ornamental and intercsting stove plant, with very short erect green stems and stalked leaves, the petioles of which are sheathing, green with a membrancous whitish margin. The leaf-blades are short, oblong-ovate, acuminate, unequal-sided, of a dark sap green, sparingly blotehed with grey, and of a pale green beneath. This plant is a native of Java. $5 s$.
AGLAONEMA COSTATUS, $3 s .6 d$.

## AMOMUM VITTATUM.

A vory remarkable plaut, on account of its striking resemblance to a Maranta. It is of dwarf habit, and produces from a creeping rootstock tufts of laneeolate coriaceous green lcavcs, having whitish bars or stripes between the nerves, of which there are six or eight principal pairs. The flowers are rosy-red, borne in densc spikes at the foot of the leafstalks. It has been figured in the Botanical Mayazine, Tab. 6832. 5 s.

- maxmmum, vide page 15.
- rubruar, 1 and $1 \frac{1}{2}$ guinea.
- splendens, $1,1 \frac{1}{\mathrm{~g}}$ and 2 guineas.
-Wardn, 1, $1 \frac{1}{2}$ and 2 guineas.
- Williaksiti, 3s. 6d.
triumpleane, $10 s .6 \mathrm{f}$. and $15 s$.

## ANTHURIUM SCHERZERIANUM ROSEUM.

An extremcly pretty variety of the well-known Flamingo Plaut, Anthurium Scherzeriamom, producing charming rosc-coloured spathes Hushed with salmon, in striking contrast to the rich searlot spathes of the type. Owing to the enduring character of the spathes, Anthurimus are most desirable plants for the decoration of Stove-houses and Conservatorics. 1 and $1 \frac{1}{2}$ guinea.

## ANTHURIUM SCHERZERIANUM SANGUINEUM.

A very handsome and distinct variety of the well known A. Scherzcrionum, differing from the type in the colour of its spathes, which, imstead of being bright scarlet, are of it deep blood-red or dark crimson eolour. This is a most desirable aequisition for exhibition, or for any decorativo purpose, its attractive spathes lasting a long time in perfection. 10s. $6 \mathrm{~d} ., 15 \mathrm{~s}$, and 21 s .

An extremely handsome hybrid between $A$. Teitchii and $A$. Andreanum, with leaves resembling those of the first named. The spathes are broadly cordate, euspidate at the apex, about 5 inehes loag by $3 \frac{1}{2}$ inehes broad, of an intense shining rich crimson colour. The spadix is about two-thirds the length of the spathe, and slightly tapering, the basal part white, the tip tinged with a yellowish shade. The beautiful spathes are freely produeed, and last a long time in perfection. 1 and $1 \frac{1}{2}$ guinea.

## ANTHURIUM SCHERZERIANUM MAXIMUM.

A magnificent variety of this attractive flowering plant, producing gigantic flower spathes, which measure about nine inches in length by four inches in breadth, and are of a most brilliant scarlet colour. As a decorative and exhibition plant, this splendid variety will always occupy a foremost place. 3, 4 and 5 guineas.

## ANTHURIUM VEITOHII.

Vicomte Ampde de la Combe, 2 guineas. Warocqueanum, $3 s, 6 d$., 5 s . and 7s. 6 d . Fine Plants, 10s. 6d. and 158.

## CROTON INSIGNIS.

A fine form with long narrow foliage. The leaves are decp, green, with tho midrib and veins beautifnlly pieked out with golden-ycllow, the margins and midril) rosy-crimsun. 5s. and 7 s . 6 d .

## CROTON JUNIUS.

A very elegant varioty, with long narrow foliage of varying character; in some instances the midrib is excmrently extended and attached to another portion of tho leat-blarle, while in others tho leaves are entire, with slightly urdulate margins. In the yomm state the low hr hlf of the leaves is bright lemon-yellow, which, as the foliage attains age, becomes sultused with crinson, the remaining portion being rich bronzy green. Fs. 6 rl .

## CROTON MAGNIFICENT

A very striking and most hamdsmo variety. In the yomin state the leaves have a central variegation of rich golden yellow; as the leaves mature, tho midrib and primary veins, with a band on each side of the eosta, ussume it bright carmiue tint. In some instuncess the bright golden colour of the young leaves becones snffinsed with bright enrmine. 5.8 , and 7 s . 6 d .
CROTON MAJESTICU, 3s. 6 d .
| CROTON Massanoeanus, 3s. Gd, and is.

## CROTON MEMPHIS.

Oue of the most handsome and ornamental varicties ever improted. It his hong awminate leaves, tho rich coloration of which in extremely effective. In the young state the leaves are pale green, irregulatly blotehed and mimmorated with yellow. As the leaves mature, the grecin becomes deep olive, the yollow variegation chamging to rich orange, marked and veined with deep crimson, at colour which eventually sulfuses the whole lear. 10 s . bid.

## HELICONIA ILLUSTRIS.

This handsomo ICliconia is undoubtedly ono of the most beautifully coloured foliage plants ever introduced. It comes from the South Sea Islands and in of Musa-like growth, the leaves being arranged in twa ranks abovo and tufted at the basc. The stalks are sheathing and of a bright rosered colour, supporting ovate-lanceolate spreading leaves, the prominent midrib of a beautiful rosepink colour, the secondary veins, of which many run to the margin and fom loops, being of the same brilliant colour. It will form, without question, a most superb adomment to our Stoves. 5 guineas.

## GRIFFINIA HYACINTHINA,

An extremely handsome and ornamental free-flowering bulbous plant from Brazil. The flower scape is about a foot high, and bears an umbel of from fifteen to twenty flowers of a beautiful bluish lilac colour, shading off to white at the base of tho segments. 5s. and 78. 6 d .

# NEW, RARE AND DESIRABLE GREENHOUSE PLANTS. 

#### Abstract

ABUTILONS. These useful greenhouso plants can be supplicd in many beantiful und distiuct varieties. They are vory desirable as pillar and roof plants, their handsome pendulous blossoms being most cffective. 12w. per dozen.

ABELIA floribunda, $2 s .6 \pi$. ACACIA AFFINIS, 2s. $6 d$. and $3 s$. $6 d$. armata, 1s. 6 d . dealbata, 2 s .6 d . and 3 s .6 d . Drummondit, 2s. $6 d$. and 3 s . $6 d$. Grandis, $2 s .6 d$. longifocta mantifica, $3 s$. 6d.  pia lopmantha, vide Albizia. RA, $2 s .6 d$ Richa, 2 . 6 . and 5 s. verticillata, $2 s .6$. of sorts, 2s. 6d., 3s. 6 d . and 5 s .

ACROPHYLLUM VENOSUA, 5s. and 7s. $6 d$.

## ACMENA OVATA.

A neat evergrcen plant, belonging to the Myrtaceous order. The stcms are clothed with opposite ovate leaves on dark purple petioles. The young foliage is of a purplish red colour, and gives the plant a striking appearance while the new growth is in course of development. $\mathrm{j}_{\mathrm{s}}$.

ADENANDRA FRAGRANs. $2 s .6 d$. and $3 s .6 d$.
agapanthus umbellatum, 1s. $6 d$.
umbellatum album, $1 s$.

AGAPANTHUS Umbeleatux amimuar, 3s. $6 d$. umbellatune minus, $3 s, 6 d$.

- folils variegatis, $2 s .6 d$. and $3 s .6 d$.

## AGAPETES BUXIFOLIA.

A very uscful plant for a cool greenhouse, doing well either in a shady or a light position. It forms a compact bush, which is completcly covered during the early summer with bright tubular scarlet flowers, haviug spreading segments. It is a native of Bhotan, and suececds with the same treatment as that given to greeuhouse Rhododendrons. 10s.6d.
agave amhrioana variegata, 2s. $6 d$. and $3 s .6 d$. | AGAVE bulboba, vide Fourcrica.

## ALBERTA MAGNA.

This desirable plant has been described as being one of the finest flowering plants of Natal, from which country it has lately been introduced. It is of shrubby growth, producing dense terminal panicles of bright red flowers, afterwards succeeded by beautiful fruits, each crowned with two enlarged calyx lobes nearly an inch long, giving the plaut a very striking appearance. This plaut may prove half-hardy in favourable situations. 10s. 6 d .

ALBIZZIA (ACACLA) LOPhaNTHA, $18.6 d$.

Coorir.
Cunnizatuaris.

## ARAUCARIA EXCELSA.

Mr. W. B. has a fine lot of this handsome conservatory plant. 3s. 6d., 5s. and 7s. $6 d$. Specimen plarts, 218, and 31s. $6 d$.
araucaria excelsa albo-8pica, 5s. and 7s. $6 d$. Goldieana.
aradja oertcupera (Pitysiantitus albene), 2s.6 $d$.
ARDUINA GRANDIFLORA, 7s. $6 d$.
arondo Donax variegata, 3s. 6d. and $5 s$.

ASPARAGUS DECOMBENE, $35.6 d$ and $5 s$. rlumosus, 3 s . 6 d . and 5 s .

- Nanus, $2 s .6 d ., 3 s .6 d$. and $5 s$.
tenurssmus, $2 s .6 d$. and $3 s .6 d$. virgatus, $3 s$ s. $6 d$. and $5 s$.

## AZALEA BALSAMIN EFLORA.

## Syn. :-A. rosfflora, A. Roltrssonit.

This distinet species has been imported from Japan. In general charactor it is quite unique; its flowers are bright salmony red, beautifully doublo, rosette-like, and regalarly imbricated, suilar to those of a Camellia-flowered Balsam. Being very double, it lasts in perfeetion a loug timo, and is invaluable for bouqucts as well as for general decoration. $2 s .6 d ., 3 s .6 \mathrm{~d}$. and 5 s .

## AZALEA INDICA.

The great valne of Indian Azaleas for decorative purposes can hardly be over-estimated. The varioties of this effectivo plant can be had in blosson for four months of the year; well seleeted plants affording such a magnificent display of colour and wealth of bloom, that tho low price at which beatiful kiuds are now offered, slould ensture a place for then in every greenhouse and eouservatory.

Good scleetions can be mude by Mr. W. B. at 18s., 30 s. and $42 s$. per dozen.
Niew varieties, ös., 7s. 6d. aud 10s. 6d. cach.

## HYBRID AZALEAS.

Tho following Azaleas are hybrids between $A$. amena and some of the Indian varieties. Combined with the well-known proliferousness and early blooming habit of $A$. amana, they have fine well-shaped attractive tlowers, which, borne in such profusion, are most effective for every deseription of decorative work, being eipecially useful for carly forcing whoro eut flowers are required, as with little trouble they may be had in bloom in November.
ILLUMINATOR, bright rosy mageuta-pink flower, the upper portion of the throat faintly speekled erimson, the base of throat vemilion. Awarded a Fu'st-class Certificato. 5s.
MAGNET, produees a profnsion of soft rosy-pink flowers, the centre bright pink, whieh extends through the centre of each petal to the tips, upper petals speekled at base with rose. 58.
ORACLE, large well-formed flowers of a benutiful bright rosy-pink colour shaded with magenta, rendered additionally attractive by their lnstrous satiny appoarance. is.
STARLIGHT, a medium-sized semi-double flower of a beautiful soft rosy-pink colour, faintly shaded with pale magenta. 5 s.
SYBIL, a pretty bright rosy-magenta flower of medium size, and semi-donble; very floriferous aud of excellent habit. 5 s .
VICTORY, soft magenta-pink flowere, the upper divisions of the flowers faintly xarked and spockled with carmine; very attractive. js.

## BOWKERIA TRIPHYLLA.

A handsome ormanental flowering plant, with lanceolate eorrugated leaves, arranged in threes ou reddish stems. The flowers are white, nearly one inch long, inflated aud bi-labiate, suggesting Serophectaria, to which the genus is allied; these are bome in subterminal cymes, usnally mine flowers on each cyme. The plant is a native of Natal, where it flowers in December, so that it will doubtless prove a very useful winter-flowering plant for the greenhouse. 3s. $6 d$. and $\bar{s}$.

## BREDIA HIRSUTA.

A pretly neat-growiur MLelastomaceous plaut, native of Japan, producing erect panieled eymes of chmming rose-colonred flowers, individually ubout half an inch in diameter. Tho plant has slender spreading branches, furnished with ovate acute dark green leaves. It has becu figured in the Botenical Maguzzuc, Tab. 6617 . Ts. 6al.

## BLANDFORDIA PRINCEPS.

A very handsome greenhouse perennial. The scape is a foot high, bearing a corymb of many flowers, which are $2 \frac{1}{2}$ inches long, pendent, regularly funnel-shaped, with a bright crimson tube and deep golden yellow limb. It must be regarded as the most beantiful of the Blandfordias yet known. It has been figured in the Botawical Magazine, Tab, 6209. 2 and 3 guineas.

## CAMELLIAS

Good sclections can be made by Mr. Williax Bell at 30s. and 42s. per dozen.

## CYCAS REVOLUTA.

This exceedingly haudsome decorative plant can be supplied in various sizes; small plants of it are pretty, but large specimous are extremely ornamental and well adapted for decorating either greenhouses or conservatories. It is known as the Chineso Sago Plant. $7 \times 6 \mathrm{c}$. ., 10s. 6d. and 15 s . : fine specimons, 3 , 4 and 5 guineas cach.

## CYCLAMEN PERSICUM.

Too much can searcely be said iu favour of the superb varicties of this plant, of which the old C. persicum is the type, whether they are vegarded as ohjects for the omamentation of the grecuhouse or conservatory, or for table decoration, for which their compact floriferous character emiuently fits thom. Tho flowers aro also extremely useful for bouquets, and when plucked, if kept in water, they will last in froshness and bemity for some wecks. Plants full of buds and flowers ean be supplied during the winter season, and are then charmingly pretty. $18 s ., 30 s$, and $42 s$, per dozen.

CYCLAMEN PERSIOUN AL3itM, $2 s .6 d$. and $3 s .6 d$.
persicum rubrum, 2s. 6d. and 3s. $6 d$.

- Grandiflorum, 3s. 6 l . and 5 s .
—— of various choice sorts, $3 s$. Gd.and $5 s$.

CYPRIPEDIUM, ride Orchids.
CYRTANTHUS ANOUSTIFOLiUM, red, is.
Mackenir, white, 28. $6 d$.
OBLIUCUM, 5s.

## CYRTANTHUS INTERMEDIUM.

A pretty hybrid varicty raised between C. Mc Fennii and C. angustifolium. It has neat strapshaped leaves, and bears on an erect two-edged seape a truss of many flowers, which are orangepink, and abont $1 \frac{3}{1}$ inch long, being curved and tubular trumpet-shaped; the three outer segments or lobes are rose coloured with a green midrib, the iuncr three being of a uniform rose colour. 3 s .6 d . and 5 s .
CYTISUS FILAPES, $38.6 d$ and $5 s$.
rackmosus, $1 s$, and $1 s .6 d$.

- Everestlanus, 3s. $6 d$.

## DAHLIA miperialis, 3 s. $6 \%$.

imperialis roged, 3s. 6 d .
of sorts, vide Bedding Plants.

## DAIS COTINIFOLIA.

A pretty decidnous grecnhonso shrub, native of South $A$ frica. It has acute leaves, and broadish heads of flowers, which consist of a reddish four-leaved involuere outside, aud numerous rosy like calyces, which have a slender tube abont an inch long, and a spreading limb of five negments. Ds.
DAPHNE LNDICA RUBRA, 2s. 6 6 d , and 3 s .6 d .
DASYLIRION LONGIFORIUM, 5 .
DESFONTAINEA SIINOSA, $2 s$ s. $6 d$. and 38 . $6 d$.
DEUTZIA, vide page 18.

## DEYEUXIA ELEGANS VARIEGATA.

A very elegant varicgated greenhouse plant, introduced from New South Wales. It has a thick rootstock, from which spring mmmerous leaves, about a quarter of an inch in breadth, the colour a deep bright green, with a broud clear edge of creany yellow. $3 s$. $6 d$. and 5 s.

## DIANELLA INTERMEDIA.

A freo-growing plant, inhabiting the northern and middle islands of New Zealand. It has linear-cnsiform leaves, and much branched panicles, ten to eightcen inches long, bearing numerous whitish flowers, which are sinceeded by bunches of pretty dark blue berrios. 5s.

## DIANELLA TASMANICA VARIEGATA.

A very striking and desirable wariegated greenhonse plant introdnced from Tasmania. The loaves are handsomely striated with creany yellow, forming a very effective variogation. The pato blue flowers aro prodnced on a loose, many-branchod panicle, and are followed in due comse by large and handsone bright bhe herries. These hang on hair-like polieels, am for many weeks form a highly ormmeutal and conspicuous adorment to the couservatory. 21s.

DION 压A musctputa, 2s. 6id. and 3s. $6 d$. DORYANTHES EXCELSA.

## DORYANTHES GUILNOYLFi.

Pajmeri, 3s. 6d. and $5 s$.

## DIPLARRHENA MORE压.

An Iridacoous greenhouse plant allied to Libertia, a native of North Anstralia and Tasmania, producing its large and handsome flowers in a terminal spike or chaster. The outer segments are white, obovate, the npper onc concave; tho imer segments white tinged with violet. 10 s .6 d .

## DRACENA AUSTRALIS.

This handsome ornamental plaut is exceedingly useful for tho decoratiou of the greenhouse or consorvatory, whero its effectivo habit nlways imparts a tropical aspeet to the houso. It is also well adapted for the purposes of sub-tropical gardening, either in gronps or as single specimens, its graceful mode of growth being very effectivo. $3 s .6 d$. to $10 s$. $6 d$.; fine plants, $15 s ., 1,1 \frac{1}{8} \& 2$ guineas.

## DRACÆNA AUSTRALIS LINEATA.

Au exceedingly handsome and ornamental plant, with fino broad foliage, gracefully recurving. It is strikingly effective for couservatory and greenhouse decoration. 10 s . fid., 15 s . and 21 s .

EPACRIS ONOSM $\mathbb{E}$ FLORA FLORE-PLENO NIVALIS.
This exceedingly desirable and attractive plant is a native of Australia. The flowers have a tubular base ending in the five usnal acutc corolla lobes, while the interior organs are transformed inte a rosette of white petals, foming a fine rosette-shaped flower. These flowers are pure white and very beantiful, the spikes being often as much as a foot long. It has received a First Clasa Certificate from the Royal Botanic Society. $3 s .6 d$. and $5 s$.

Draceena australis Veitohif, 3s. 6d., 5s. and 7s. 6 d .
lentiginosa, liss. and 21s.

## HIBISCUS CALYCINUS (CHRYSANTHUS).

A free-growing shrubby plant introdneed from Natal. It has hairy stems and ronndish subtrilobate pale green serrated leaves. The flowers are of large size, campunnlate, with broad obovate petals, yellow with a pmple-erimson spot at the base, forming a dark-coloured eye. This, from its largo sized golden flowers and free habit, will prove a plant of very omamental charaeter. 5s.

## HIBISCUS PEDUNCULATUS.

A very pretty Hibiscus of ereet branehed habit, the stems hairy and the leaves three-lobed, with toothed margins. The campanulate flowers are showy, the petals blush or rose-culoured, with an involucel of about cight linear segments. It has been inported from Natal. 5 s .

## HYDRANGEA STELLATA FIMBRIATA.

The flowers of this handsomo new Hydrangea are bome in immense trusses, sometimes nine inches in diameter; the bracts are of the purest white, most elegantly fringed in a very striking and attractive manner, giving it a most distiuct appearance. is.

For Now Varieties, ville page 7.
ALBESCENS, an cxtremely handsome swect-sconted greenhonse variety, producing very large and beantiful glistening white flowers, slightly undulated on the margins, the upper segments being marked at the base witb sulphur yellow. 7s. $6 d$.
ANDERSONI, a handsome introduction fron the Himalayas, giving very large and fine trusses of blossons, which aro of a bright rich carmine colour. 3s. 6d. and 5 s .
ARBOREUM, $3 s .6 d$.
ARGENTEUM, vile grande.
ASSAMICUM, flowers about $3 \frac{1}{2}$ incbes broad, pure milk-white, with a cream-coloured stain at the base of the upper lobe near the month of the tube. 5 .
BARBATUM, bright searlet flowers, distinet and effective. $5 s$.
BLANDFORDIEFLORUM. 3s. $6 d$. and 5 s .
CALOPHYLLUM, a handsome species, prolucing large funnel-slanped pure whito flowers. 3 s .6 d . CINNABARINUM, $3 s .6 \mathrm{~d}$. and 5 s .
CLARINDA, flowers of a very delicate bluslr-pink, the petals being prettily crimped. 10 s .6 cl .
COUNTESS OF DERBY, bell-shaped flowers of great substance and large size ; pure white and most deliciously fragrant; a very frec-blooming varicty. is. $6 d$.
COUNTESS OF HADDINGTON, large blush-whito flowers; exceedingly beautiful. 3 s . 6 d . and bs.
COUNTESS OF SEFTON, large eup-shaped flowers, with fringed edges; pure white, slightly shaded with rosy-purple; tho trinsses are large, ofteu equalling in size and fulness those of a hardy Rhododendron. 5 s . and is. 6 d .
DAVIESII, a freo-growing lybrid of bushy habit, producing freely its trusses of beautiful flowers of a lustrons orange-red colour. $5 s ., 7 s, 6 d$. and $10 s .6 d$.
DIADEM, fine trisses of irregularly shaped flowers of a pleasing soft rosy pink colour. 10 s .6 d .
DIANA, an extremely free flowering hylrid, producing fine lieads of bloom even on small plants. The individual flowers have long tubes, aud are of a delicate blush pink colour, the petals being somewhat crimped and wavy. 10s. $6 d$.
DUCHESS OF CONNAUGHT, bright vernilion-red flowers of great suhstance. 7 s .6 d . and 10 s .6 d . DUCHESS OF EDINBURGH, largo searlet flowers, very beantiful. 7s. 6 d . and 10 s .6 d .
DUCHESS OF TECK, buff-yellow, shaded with scarlet, very fine. $5 s$. and $7 s .6 d$.

## RHODODENDRON, PINK BEAUTY.

A remarkably beantiful hybrid, produoing immonse trusses of fine largo flowers, of a dolicate soft pink colour, with long blush-white tube. This handsomo hybrid belongs to tho perpetual-blooming section of greenhouse Rhododendrons. 5 s . and 7 s .6 d .

## GREENHOUSE RHODODENDRONS-continued.

EMBLEM, this produces immense heads of long-tubed flowers; the tube blush and the segments of a beautiful rich bright pink colour; exceedingly hanrlsome and attractive. 5s. and 7s. 6 d .
EXONIENSE, 3 s . 6 d .
FAIR ROSAMOND, fiuc trusses of delicate blush tinted flowers of large size, the petals being of good shape and substance, prettily crimped and undulated on the margins. 10 s .6 d .
FALCONERI, magniticently ornamental; this species has the largest leaves in the genus. 5s. \& 7s. 6d.
FRAGRANTISSIMOM, deliciously fragrant flowers, of the purest white, lightly spotted with ochre on the upper segment; the back of the flower pencilled and shaded with rose. $3 s .6 d$.
FULGENS, rech fiery crimson; extremely showy and effective; compact habit. 38.6 d . and 5 s .
GRANDE (ARGENTEUM), immense heads of large ivory-white flowers deeply stained with crimson at the base. Ts. $6 d$.
HIMALAICUM, this variety produces fine large handsome trusscs of bright carmine flowers. 3s. 6 d .
JAMESONI, this variet, produces large terminal trusses of handsome bright red flowers. $3 s .6 d$. and 58 .
JASMINIFLORUM, an elegant free-blooming specics, with fragrant white flowers, borne successionally in chasters. $3 x$. Gul. and 5 s.
JAVANICUM, a beautifully grolden-yellow flowering species. $3 s .6 d$., $5 s$. and 7 s .6 d .
JENKINSII, flowers exccedingly large, funnel-shaped, and of snowy whiteness: the handsome waxlike attractive blossoms render it a most benutiful plant for conservatory decoration. $5 s$.
JUNO, a very pretty and distinct hybrid with orange-buff flowers, borne in large heads. 10s. 6 d .
LADY ALICE FITZWILLIAM, clusters of white blooms, each flower three and a half to four inches across. $3 s .6 d$. and $5 s$.
LADY SKELMERSDALE, pure white trumpet-shaped fragrant flowers; very handsome. 5 .
LEPIDOTUM, flowers of medium size, of a rosy purple colour. 7s. $6 d$.
MRS. JAMES SHAWE, a variety of bushy habit, producing in profusion pure white sweet-scented flowers, which are cup-shaped and of great substance. 5. .
MULTIFLOROM, bears a profusion of beautiful white flowers; of dwarf habit. 28.6 an and $3 s .6 d$.
MYRA, this chaste und pretty hybrid is a most desirable addition to the handsome and perpetual flowering section of Rhododendrons, and blooming as they do from almost every growth, too much ean hardly be said iu their favour. The varicty now offered produces in the freest manner large trusses of well-shaped pure white flowers, the petals being erisped and uudulated. 10s. $6 d$.
PINK BEAOTY, vide page $4 t$.
PLATO, large flowers of a light shade of salmon-pink, the throat gradually expanding from base of tube. 10 s .6 c .
PRINCE LEOPOLD, bright carmine, very handsome ; a richly coloured variety. 7s. 6 d . and 10 s .6 d .
PRINCESS ALEXANDRA, a pretty hybrid variety, of compact growth, with similar flowers to those of $R$. jasminiflorum, but larger and longer tubed, pure white, with pink stamens. 3s. $6 d$. and is.
PRINCESS ALICE, a neat dwarf bushy-growing variety of the ailiatum type, producing clusters of deliciously-scented bell-shaped white flowers, flushed with pink. 3s. 6d. and 5s.
PRINCESS ROYAL, a handsone and distinct variety of neat compact growth, with clusters of richly-shaded, rose-coloured, funnel-shaped flower tubes. $38.6 d$. and 5 .
QUEEN OF DWARFS, bears large well-expanded snow-white flowers of great substance ; it is of bushy habit, and very floriferous. $5 s$.
RETUSUM, this distinct species produces clusters of tubular orange-coloured flowers. 5s. and 7e. 6d.
RO8ALIND, a oharming hybrid of neat compaet habit, and very free blooming; it produces fine clusters of beautiful long-tubed flowers of a delicate soft pink shade; a most pleasing and effective variety. $5 s$, and $7 s .6 d$.
ROSY GEM, a charmingly attractive hybrid, producing large heads of long-tubed flowers of a rich rose colour, the edges of the segments deep pink, the extorior of the tube blush-white. This will be found a most desirable acquisition for the greenhouse. 7s. $6 \mathrm{~d} ., 10 \mathrm{~s} .6 \mathrm{~d}$. and 15 s .
8ESTERIAN UM, fine large fragrant white flowers. $38.6 a^{\circ}$. and 58.
SMIRNOWII, introduced from Armenia; produces corymbs of pretty campanulate reddish-crimson flowers, of medium size. 10 s .6 d .
TAYLORI, rich bright pink flowers with white tube; a splendid variety producing fine large trusses. 3s. $6 d$. and 5 s .
THIBAUDIENSE, this remarkable Rhododendron has been introduced from Bhotan; its bright red tubular flowers are produced in terminal trusses, in form somewhat resembling those of the Correas and Thibaudias, and having the same alabaster-like translucent lustre, hence its name. $3 s .6 d$. and 5 .
UNGERNII, introduced from Armenia; the flowers, which are borne in umbellate corymbs, are pure white and of medinm size. 10 3 .6 d .
VEITCHIANUM, a beautiful species, with very large white flowers, relieved by a yellow centre or base, and elegantly fringed or frilled on the margin. 5s. and 7s. $6 \mathrm{c}^{\circ}$.
VIRGINALE, the pure white flowers of this beautiful variety are large and funnel-shaped; it has leathery dark green foliage, and forms a splendid plant for conservatory decoration, the great size and snowy whiteness of its blossoms rendering it extremely attraetive. 5s.
WIGETII, a fine species of neat habit, producing clusters of large aud elegaut bell-shaped flowers of a golden-ycllow colour, the expanding lobes being marked with blotches of reddish-crimson surmounted by pink dots. 7s. $6 d$.

## HYPERICUM MOSERIANUM.

A handsomo evergreen shrub, attaining a height of 3 to 5 feet, of great floriferousness, being covored from May till late in Autumn with magnificent deep yellow flowers, having a diameter of nearly 3 inches. It has obtained a First-Class Certificate. 2s. $6 d$.

## HYPERICUM MOSERIANUM TRICOLOR.

A most charming variety of the preceding, the leaves being splashed and irregularly variegated with bright rose, white, light and dark green.

IRIS KeMPFERI.

IRIS LORTETII.

## IRIS GERMANICA.

The handsoms hybrids of this heautiful section are of the greatest use for the adornment of beds and borders; the flowers are of rich and varied colours, striped or blotched with purple and violet, on a white or yellow ground. 6s., 9s. and $12 s$. per dozen; choice mixed varieties, $2 s$. $6 d$. per dozeu.

## IRIS K厈MPFERI.

Many magnificent varieties of this handsome and attractive plant have been imported from Japan: indeed, scarcely any plants in the flower garden can compare for gorgeous beauty with this section of Iris. Varying in colour from pure white to rich maroon-crimson, there are few flowers surpassing them in size and the brightness of their colouring. Some are pure white with delicate reticulations of lavender, others are beautifully inaculated with rosy-purple on a light ground, while many beatiful shades of dark crimson, blue, purple, and violet will be found amongst them. They sueceed admirably planted ou the margin of a lake or pond, or in any situation where pleuty of moisture can be given. Tide illustration. 2 s . $6 d$. and $3 s .6 d$. each; choice varieties, 5 s . and 7 s .6 d . each. Mixed Seedlings, 7s. 6d, and 10s. $6 d$. per dozen.

IRIS alata, lovely blue flowers, $9 d$.
ATrofusoa, large rosy-purple flowers, 1 s .6 d . atropurpurea, very dark blaekish-purple flowers, $6 d$.

## RUBUS CRATEGIFOLIUS．

Introduced from Mandchuria．It is erect in growth，with large shining dark－groen leaves， turning red in autumn．It gives a quantity of transparent scarlet fruits of a sugary and agreeable taste，very ornameutal．1s．6d．each；15s．per dozen．

## RUBUS FRUTICOSUS DENTATUS．

A very peculiar variety of our native Bramble；the stems are purple，and furnished with red thorms；the leaves are small，trifoliolate，with the leaflets decply inciso－dentate．It is of compara－ tively slender growth，and will form a hardy elimber of a very elegant character． $3 s$ ． $6 d$ ．

RUBUS piemicolasius， 5 s．
salvias，vide Bedding Plauts．
SAUROMATUM，vide Arisæma．
8AXIFRAGA ciliata， $1 s, 6 d$ ．
peltata， $18.6 d$ ．
SCHIZOPHRAGMA HYDRANOEOIDES，vide Hy． drangea volubilis．

SCIRPUS（Juncus）Taberneratontani zebrinus， 3s． $6 d$ ．and 58.
SEDUM spuriuar spiendens， 1 f .6 d ．
SENECLO PULCHER．1s． $6 \mu$ ．
See also page 42.
SPIREA AKURENSIS， $1 s .6 d$ ．
Anthony Waterer，7s，6d．

## SPIR⿸A ASTILBOIDES．

One of tho most handsome of hardy herbaceous perennials，which eannot be too highly appreciated as a decorative plant for early forcing．Certificated both by the Royal Horticultural and Royal Botanic Societics．The inflorescenco consists of compound feathery brauches of elegant white flowers．It is a charming plant for pot culture，its beautiful flowers being produced in the greatest profusion．Tide ilhnstration．1s． $6 d$ ．and $2 s$ ． $6 d$ ．each； $15 s$ ．and $24 s$ ．per dozen．

SPIREA ASTILBOIDES．

## SPIREA ASTILBOIDES FLORIBUNDA．

Produces thyrsoid spikes of bloom crowded with flowers．1s， $6 d$ ．

## SPIR厌A BUMALDA RUBERRIMA．

A dwarf hybrid variety，raised betweer $S$ ．bromalda and S．crispifolia． The flowers，which are borne in corymbs，are dark earmine－iose，with bright camiue centre，the long tufts of ruse stamens giving the flowers a phmose appearance． $3 s .6 d$ ．

## SPIR届A（HOTEIA） JAPONICA．

Strong chomps in the ruttomn．5s． per dozen．

## SPIR压A JAPONICA AUREO－ RETICULATA．

Pretty variegated foliage，added to which it bears a profusiou of hand－ some compact spikes of pure whito flowers． $1 s$ ．and $1 s, 6 d$ ．

## SPIREA JAPONICA COMPACTA MULTIFLORA．

This most desirable variety is a sreat improvement on the old $S$ ．Joponica，as it produces a profusion of large and deuse spikes of phre white flowers，in telling contrast to the dark greeu foliage of the plaut，tho habit of which is dwarf aud compact． 1 s ．

## SPIR間A KAMTSCHATIKA（GIGANTEA）．

A very remarkable species imported from Asia．It grows from 6 to 7 feet high，well furnished with large Aralia－like leaves．The flowers are produced in large cynues and are pure white． $3 s .6 d$ ．

> SPIREA PALMATA.

The bright pink Spirrea，ono of the most bcautiful hardy plants in cultivation，producing lovely broad corymbs of pink tlowers．It is a native of Japan．ls．

## SPIREA PALMATA ALBA．

A counterpart of $S$ ．palmata，except in the colour of the flowers，which are pure white；a very beantiful and elegant variety． 1 s ． $6 d$ ．
STAPHYLEA COLCHICA，2s． $6 \dot{a}$ ．and $3 s .6 d$ ．
statice lattrolia， $1 s$ ．
STAUNTONIA LATHFOLIA，2s． $6 d$.
STYRAX JAPONIOA， $3 s .6 d$ ．

SYRINGA japonioa， $3 s .6 d$ ．
pulgaris fl．－pl．Alipionse Lapalleet，2s， $6 d$. Compe Horace de Chorseul．2s． $6 d$ ．
－hyacinthipiora plena，1s． $6 d$ ．

## SYRINGA VULGARIS FLORE-PLENO LEMOINEI.

A beantiful variety of the Litac, producing large branehed spikcs, well furnished with deuble rosette-like flowers; the buds before cpening are rose-eoloured, and the fully cxpanded flowers aro of a soft lilac shade: but tho plant is more particularly charming when forced, in which state the blossoms are pure white; exceedingly useful for all kinds of decoration. 2s.6d. each; 248. per dozen.

## SYRINGA VULGARIS FL.-PL. EMILE LEMOINE.

A very fine variety, producing immense eompound bunehes of large well-shaped globular flowers, the colour being a very soft shade of rosy-lilac. 58 .

## SYRINGA VULGARIS FL.-PL. JEAN BART.

A very floriferous variety, the inflorescence being eomposed of very long thyrses of very donble flowers, irregular iu form, of a vinous rose colour: the buds carnine. 3s. $6 d$.

SYRINGA vUl.garib fl.-pl. La Tour
d'Autergne, 38. 6 d .
vulgaris fl--pl. Leon Sision, $3 s .6 d$.

- Le Gaulois, 1s. 6d.
- Matuieu de Dombasle, 2s. 6 d .

-- Renoncule, 2s. 6d.
-- rubella, $2 s, 6 d$.
-- - Senatedr Volland, 3s. 6 d .

## SYRINGA VULGARIS FL.PL. VIRGINITE.

Fowers very double, petals long, of a most pleasing shade of soft rose ; the colour of the Rose Souvenir de la Malmaison. Quite a new tiut in double lilacs. 3s. 6d.

TIGRIDIA CONCHFLORA, 18. $6 d$. per dozen.
orandiflora, ls. $6 d$. per dozen.

- alba, 18. бd. per dozen.
- aurantiaca, 1s. gd. per dozel.

TRITOMA, ride Kniphofia.
TRITONIA aurea, vide Crocosmia aturea. TROPEOLUM SPECIOSUN, handsoine crimson Howers, $1 s$. each, 9s. per dozeu.

These can be supplied, when dormant, by the dozeu or hundred at the proper season.
TROPROLUM tuberosom, flowers scarlet and yellow, a very attractive and dceorative species, 3 s. per dozen.
See also page 43.

## VERONICAS.

Where the climate is mild these make handsome decorative shrubs for the open border, and produce freely an abundance of showy flowers. They are well adapted for training against low walls or trelliscs. 18s. per dozen.
VITIS Japonica, vide Ampelopsis tricuspidata. vinifera purpurea, 58.
WEIGELA AMABILIS LOOYMANBII AUREA, 18. 6 d . longifolla argenteo-marginata, $3 s .6 d$. Sieboldit foliis argenteo-marainatis, $2 s .6 d$.
weigela abel Carbiere, very free flowering, 18. 6 d.; 10ิ. per dozen.

Auo. Wilhelas, $2 s .6 d$.
Conoo, 1s. 6d.
Diderot, 18.6 d .

## WEIGELA CANDIDA.

An extremely distinct varicty, of vigorous habit and very free-blooming, producing fine large pure white flowers. 1s. 6 d . each; 15s. pcr dozen.
weigela Emile Gallè, 1s. $6 \pi$.
Weigela Eta Ratbchee, 2s. 6 6 .

## WEIGELA JEAN MACE.

A distinct and frec-blooming varioty, producing fine large purple flowers; the buds are of a very dark crimson-purple colour; it is the darkest Wcigela in cultivation. 1s. $6 \pi$.

## WEIGELA MONTESQUIEU.

Fine reddish-crimson flowers of perfect shape Wistaria (Glyoine) mulituga, a magnifieent species, bearing bunches of bloom from two and a half to three feet long, exceedingly handsome. 28. 6d. and 3s. $6 d$.
multijuas albs, a white-flowered variety of the preceding, $2 s .6 d$. and $38.6 d$.
snensis, 28 . $6 d$. and $3 s .6 d$.
a very handsome and distinct variety. $1 s .6 d$. Wistaria ginensis alba, $2 s .6 \mathrm{~d}$. and 3 s .6 d . SINENS1S FLORE-PLENO, $3 s .6 d$.
XANTHOCERAS SORBIFOLIA, a handsome flowering shrub, 3s. $6 d$.
YUCCA recurva, $3 \pi .6 d$. and $5 s$.

## OFFICINAL AND MEDICINAL PLANTS, TROPICAL FRUITS, \&c.

Mr. William Bull's collection of living economic plants contains specimens of nearly all the spices and condiments in domestic use, many of the most highly esteemed tropical esculent fruits, many of those from which furniture and other woods are obtained, the principal gums and medicinal products, the poison trees from Java, Brazil, and Madagascar, at one time only heard of in tales of fiction, and plants which supply our daily beverages and food, as well as many of historical interest.

The individual prices of the following depend upon the size of the plants and rarity of the species, particulars of which can $b_{\theta}$ furnished on application.

Purchasers of Officinal and Medicinal Plants, Tropical Fruits, \&c., can have collections made at $\overline{5}, 7$ and 10 guineas. The difference in price principally depends upon the size of the plants, and the rarity of the species.

## ORCHIDS

In Mr. William Bull's Establishment will be found the largest and best stock in Europe of good established plants-tens of thousands of plants to select from. His Orchid Houses are always quite a sight, from the large number of plants in flower, and he will be pleased to show them to anyone interested in this beautiful class.

Mr. W. B. recommends those desirous of having their houses gay with Orchid flowers, to purchase good established well-cultivated plants, which bloom well, are more satisfactory, and comparatively cheaper than newlyimported or semi-established plants.

Besides plants at the prices enumerated, Mr. W. B. has a large quantity of very fine specimens (some of them unique), at $2,3,5,7$ and 10 guineas each, and upwards.
$S$, distinguishes the stove kinds; $I$, intermediate house; $C$, cool house.
Those marked thus (*) are winter-blooming kinds.

CHOICE ORCHIDS.
EAST INDIAN | MEXICAN | WEST INDIAN | PERUVIAN | COLOMBIAN | BRAZILIAN
Collections made at $3,4,6,9$, and 12 guineas per dozen.

## ORCHIDS FOR COOL HOUSES.

It being well known that many Orchids can be easily and successfully enltivated in a cool temperature, with scarcely any artificial heat during a great part of tho year, Mr. W. B. has devoted several bouses to this beautiful and desirable class, and will bo pleased to nake good selcetions of them at $3,4,6,9$, and 12 guineas per dozen.

SPHAGNUM MOSS FOR ORCHIDS, 3s. 6d. per bushel, 12s. per sack. BEST FIBROUS PEAT FOR ORCHIDS, 3s. 6d. per bushel, 12s. per sack.

## EUCODONIAS.

A free-flowering and dwarf-growing section of Gesneraceous plants, with attractive flowers intormediate between Tydæas and Gloxinias. $1 s$. and 18.6 d. . each.
Ehrenberox
NRGELHOLDES
nhegelioides duamantina - hilacinella

NFOELIOTDES NANA MULTLFLORA Van Houtter.

## GESNERAS (NFGELIAS).

The value of Gesneras as decorative plants can scarcoly be over-ostimated. Most of them have rich velvet-like foliage, which, in the respective kinds, varies from green to crimson. If only grown for the foliage they are very attractive, but they produce splondid pyranidal spikes of blossom, which are extremely handsome. Originally the principal colour was orange-scarlet; now, as the result of fertilisation, there are various colours and shades, added to which the spotting on the flowers of some of the varieties is oxtremely pretty.

Selections of good varieties at 30s. and 42s. per dozen, according to sorts.

## HYBRID GESNERAS.

PYRAMIDAL, a vigorons growing varicty, frecly developing numerous blateral branches, which become covered with rose-coloured flowers, shaded with purplo; tho throat is golden-yellow with small erimson spots. $3 s .6 d$.
SOUVENIR DE MADAME JOIGNOT ; this varieiy has handsome bronze-green leaves, the Achi-menc-like flowers, which are abundantly produced, being of a rich carmine-purple colour. $3 s .6 \mathrm{~d}$.

## CHOICE GLOXINIAS.

## CHOICE SINGLE FLOWERING IVY-LEAVED PELARGONIUMS.

For New Varicties vide page s.
Ivy-leaved Polargoniums, on account of their graceful drooping growth, are extremely useful for vases, and rustic or suspended baskets; the rich wax-like foliage alone is ornamental, but added to that, they lave pretty flowers, and the different varietics present a contrast and charm obtained by fow other plants.

Selections, 12s. and 18s. per dozen.

## NEW AND CHOICE NOSEGAY PELARGONIUMS.

This section is admirably adapted for bedding, as the flowers are borne in the greatest profusion and in immense trusses, and hence produce great effect.

REINE BLANCEE, immeuse trinses of pure white flowers. 1 s .6 d .
RENOWN, large trinses of orange-searlet flowers. Ss. $6 d$.
SOLFERINO, amaranth solfcrino colour, mixed with scarlct, large' white centre. 3s. 6 $\mathrm{l} \%$.
TIBER, rieh orauge-vernilion flowers; grood truss. $3 s .6 \mathrm{~d}$.
TOULON, large trusses of chormons ficry orange flowers. 3s. 64 .
VICTOR FOURNEL, very large round flowers, very bright earmine-vermilion. 5s.
ZELINDA, flowers of grood shape, lower petals reddish-scarlet, shaded with magenta; upper petals fiery-scarlet. 3s. 6d.
Many other Choice Varieties can be supplied from Mr. W. B.'s General Collection at 9s. and 12s. per dozen.

## NEW AND CHOICE DOUBLE-FLOWERED ZONAL PELARCONIUMS.

ARMAND SILVESTRE, large trussos of rosy-lilac flowers, shading to camine. 2s. 6 d . BERANGER, globular trusses of magenta-red flowers; dwat habit. 2s. $6 \pi$.
BOUGEREAU, large trisses of beantiful rose flowers, the upper petals maculated with white. 18.
BOULE DE NEIGE, enomous trusses of pure white flow ress. 1s. 6 d .
CATULLE MENDES, rosy-purple, upper petals marked with white, very floriferous. 18 ,
CHARLES JOLY, of good habit and very floriferous; very bright orange-red. $1 s$.
CHELSEA GEM, of compact and free growth, a most profuse bloomer, and an excellent bedder ; the foliage is bright grech, with a broad marginal variegation of pure white; large trasses ;
full double flowers of a charming rose-pink colour. ls . ; Is. per dozer.
COLOSSUS, splendid trusses of large rich reddish-crimson Howers. is.
DAUBRAY, large semi-double ochreous-red flowers. 2s. $6 d$.
DR. BEHRING, large tmsses of magenta-carmine Howers, shaded salmon. is.
DR. BLANCHE, hrige bright capucine orange flowers. 3s. (id.
DR. ROUX, large double manve-violet flowers; white centre. 5 s.
DR. YERAIN, flowery rose mauve, passing to carmine rose. 5 s.
FRANCISQUE SARCEY, fine trusses of rosy-inauve flowers, maculated orange. is.
F. V. RASPAIL, Improved, fine trusses of inmense rich dazaling searlet flowers; good habit. 1 s .

GAMBETTA, erect trusses of large bright rosy nagenta Howers. $3 x$. Gid.
GRINGOIRE, fine round trusses of clear sahmon flowers, Inight centre. is.
HEDWIGE BUCHNER, well shaped snow-white flowers, very floriferons, $\overline{5}$ s.
HENRI CHABRILLAT, large trusses of rosy-manve flowers. $\overline{3}$.
HENRI DE BORNIER, large trusses of bhish white flowers; dwaff habit and very floriferous. 1 s .
JULES FERRY, very large orange-salinon flowers: a new shade. 3s. Gn.
LA FAVORITE, large trusses of woll-made pure white flowers. is.
LE CID, fine trusses of very bright urimson flowers; vigorous habit. $1 s$.
LUCIFER, large trusaes of a peculiar shado of red, very floriferous. $1 s$.
MADAME BRANDES, globular trusses of shaded white flowers; dwarf and rery floriferons. $3 \mathrm{~s}, 6 \mathrm{~d}$.
MADAME ROZAIN, very large puro white double flowers, exterior petals of excellont shape. $1 s$.
MADEMOISELLE DEA-DIEUDONNE, whito shaded with rose, fine trusses. 28. $6 d$.
MAURICE BOUCHOR, large trisses of blush flowers, of perfect shape. 1 s .6 d .
MELCHIOR DE VOGUE, large trasees soft rose flowers, shaded lilac. is.
M. JOVIS, centro bright salmon, margins yellowish-white. is.
M. LOCKROY, large irnsses of bright minitur red flowers. $3 s .6 d$.

PASTEUR, largo trusses of beautiful rose flowers. 5s.
PIERRE LOTI, very large trusses of silvery rosy-hilae flowers; a new colour. $1 s$.
PRESIDENT CARNOT, bright vermilion, shaded cardinal. is.
REINE NATHALIE, large trusses of whito flowers: plant of grood habit. is.
RUY BLAS, centre bright salmon, the rest of the flower peach-rose. $1 s$.
SACHER-MASOCH, innnense trusses of dark rose-coloured flowers. is.
SAINT-SAENS, large trusses of bright red Howers, margined with salmon. 1 s
SCHELCHER, fine trusses of velvety-crinson flowers. as.
SULLY-PRUDHONME, large trasses of bright cinmine flowers. in.
TOLSTOI, clear rose carmine ; grood trusses. $2 s, 6 \pi /$.
TOURGUENIEFF, large soft rose flowers with silmon centre. 2 s , 6 ir.
Many other good varieties can be supplied from Mr. W. B.'s General Collection at 9 s . and 12 s . per dozen.

## SWEET-SCENTED LEAVED PELARCONIUMS.

Selections made by Mr. W. B. at 18 s. and 24 s . per dozen, according to sorts.

## NEW HYBRID PELARCONIUM.

LUCINDA, a pretty new hybrid variety with sented leaves, producing trusses of medium sized, well shaped white flowers, the upper petals being marked and feathered with purplish erinson. is.

## NEW AND CHOICE VARIEGATED, COLD AND SILVER TRICOLOR PELARCONIUMS.

Selections made by Mr. W. B. at 12s., 18s. and 24s. per dozen, according to sorts.
NEW AND CHOICE BRONZE, GOLD, AND SHADED YELLOW PELARCONIUMS.
Solections made by Mr. W. B. at 12s. and 18s. per dozen, according to sorts.

## TREE FERNS.

Of these majestic plants the stock is very large. They have stems varying in height from one foot to twelve feet, and having becn imported from Australia and New Zcaland, they are such as will succeed well in any ordinary greenhouse. Their fine yraceful habit and singularly distinct appcarance reuder them peculiarly adapted for the decoration of conservatories. They range in price according to sorts, sizes, and strength of the specimens. It may, however, be as well to remark that they are not merely nowly imported trunks, but well-cstablished plants, many of them having been grown in this country several years.

## Prices on application, or an inspection invited.

## CHOICE STOVE FERNS.

Mr. William Bull's general collection of these elegant decorative plants is of considerable extent, and comprises kinds that are moderate in price, as well as many that are extremely rare and unique.

Solections for the Stove can be supplied at 24s., 30 s. and 42 s . per dozen.

## DAVALLIA EPIPHYLLA.

A specially elegant Fern in tho way of $D$. fijiensis, but quite distinct from it. The rootstock is ereeping and covered with brown scales from which aseend wiry purple stipes as thick as a crow-quill, glabrous and deeply channelled. The fronds are subcoriacoous, deltoid in outline, three to four times pinnately divided, the larger pinnæ deltoid-lanceolate, tho pinnules nurrow, wedgeshaped and deeply pimately divided. It has been introduced from New South Wales. 58. and 7s. 6d.

## GYMNOGRAMMA ELEGANTISSIMUM.

A very elegant new Stove Fern, with beatifully arching fincly cut fronds of a pleasing green colour and firm texture. The rachides are of a dark reddish brown colour, the pinnre being divided and subdivided into numberless miuute emarginate segments, the whole plant presenting a most attractive appearance.

From its graceful habit of growth, and its long, elegantly recurving fronds, this variety is admirably adapted for cultivation in suspended baskets, as well as for other decorative and ornamental purposes. 5s., $7 s .6 d$. and $10 s .6 d$.

ASPLENIUM NIDUs, $2 s, 6 d$. nodile, $2 s .6 d$. and 3s. $6 d$. prolongatum, 3s. 6d. and 5s. Shepierdir, 2s. 6d. and 3s. $6 d$. viviparum, $2 s .6 d$. and $3 s$. $6 d$. zeylanicum, $2 s .6 \mathrm{~d}$.

## PTERIS TREMULA GRANDICEPS.

This handsome grecuhouse Fern, which is well adapted to become a very useful one for decorative purposes, is a hybrid between Pteris bremula and $P$. sermilata cristata. The plant forms a dense tuft of evergrcen fronds of an elegant semi-dcpendent character, an appoarance which is chiefly induced by the gracefnl manner in which the cnds of the pimmules are crested and tasselled. 7s. 6 d .
TODEA Africana, $2 s .6 d$, and $38.6 d$. TODEA alborea, 1s. 6 $d$. and $2 s$. . $6 d$.

## TODEA (LEPTOPTERIS) HYMENOPHYLLOIDES.

This pretty New Zealand Filmy Fern, commonly called Todea pellucida, can be supplied in nioe plants at $2 \mathrm{~s} .6 d ., 3 \mathrm{~s} .6 d$. aud 5 s.

## TODEA MOOREI.

A distinct and attractive new Filmy Fern introduced from Lord Howe's Island. It bears a crown of handsome glabrous fronds, broadly lanceolate and thrice pinnately divided, the primary pinme lanceolate and spreading horizontally, ceutrul ones abont 4 inches loug by $1 \frac{1}{1}$ wide, those at the base and apex shorter; secondary pinnules oblong, decurcut along the winged rachis, the lower pinnule of each pinma turned dowuwards, appressed against the main rachis, and overlapping the corresponding pinnule of the neighbouring pinna: ultimate or tertiary segments linear oblong, obtise erenately toothed. The sori are cireular, and placed at the base of some of the lowermost segments near the midrib. 21s.

TODEA (LEPTOPTERIS) SUPERBA.
Any attempt at description must fall far short of eonveying an adequate notion of the exquisite beauty of this lovely Fern, whieh should be seen to be justly appreeinted. The fronds, whieh are fifteen to eighteen inches in length, are of a bright green, spreading, beautifully arehing and feathered down to the very base; the pinme are crowded and ent into narrow segments, which are turned upwards, giving the fronds a frilled surface, and produeing an effect distinet from that of any Fern in eultivation. This is probably the most beautifnl of all the dwarf-growing New Zealand Ferns. Strong imported plants, 21s., 31s. $6 \%$ and 42 s .

## TRICHOMANES RADICANS.

## (THE KILLARNEY OR IRISH BRISTLE FERN).

This is a British speeies, but it must, as far as culture is eoncerned, be included among the greenhouse kinds, as it is thmost impossible to sueceed with it if treated as an ordinary hardy Ferm. $58 ., 78.6 d$. and 10 s. $6 d$.
WOODWARDIA ORIENTALIs, $2 s .6 d$. and $3 s .6 d$. | WOODWARDIA RADICANs, $2 s .6 d$, and $38.6 d$.

## CHOICE HARDY FERNS.

Selections of good kinds cau be supplied at 18 s. . 30s. and 42 s . per dozen.

# PALMS, CYCLANTHS \& CYCADS, 

Including ENCEPHALARTOS, MACROZAMIA, \&c.

The Palms constitute tho most noble family in the vegetable kingdom, and afford sufficient diversity of aspect to allow of selections being made from them for the greonhouso, stove, or conservatory, to either of which Palms impart a richer tropical charactor than any other plants. Some of the miniature dwarf-growing kinds are, from their light and graceful forms, admirably adapted for table decoration, for vases, and for almost every purposo in which ornamentation is desired. The more hardy and larger kinds can be used for sub-tropical gardoning, to which they impart a most luxuriant grandeur, ovidence of which has been given in Battersea Park, and in other places whero Palms have been thus used.

> Selections of Stove Palms, 6,9 and 12 guineas per dozen.
> Selections for the Greenhouse, at 6,8 and 12 guineas per dozen.
> Larger specimens, from 2, 3, 4 and 5 to 10 guineas each.

Those marked with an asterisk (") are kinds that will succeed in a greenhouse.

[^0]

## GEONOMA ACAULIS.

A dwarf, nearly stemless Brazilian Palm, with short, dilated, sheathing leaf stalks, destitute of spines, the young leaves roundish, deeply two-lobed at the upex, plicated erose, adult leaves deeply pinnately divided, pinnæ lanceolate. It is a native of Northern Brazil, and should be grown in the stove. 4 and 5 guineas.

SINGLE-FLOWERED BEGONIA.

DOUBLE-FLOWERED BEGONIA.

## BEGONIAS.

HANDSOME FLOWERED
TUBEROUS-ROOTED SECCION.
The immense size to which the flowers of this popular race of plants have nuw attained considerably enhances their value for decorative and beddiug purposus. Of nearly every shade of colour, from deepest erimsonscarlet to white, the blooms are produced in the utmost profusion, thus renderiug them extremely showy and attratetive.

## SINGLE-FLOWERED.

Selections of good singleflowering named varieties can be made by Mr. W. B. at 12 s ., 18 s . and 30 s . per dozen.

Single-flowered unnamed Seedlings of various colours can be supplied when dormant, $4 \mathrm{~s} ., 6 \mathrm{~s}$. \& 9 s . per dozen; $1 \frac{1}{2}, 2$ and 3 guineas per 100 .

## DOUBLE-FLOWERED.

Named Varieties with double flowers, at 30 s ., 42 s . and 60 s . per dozen.

Double-flowered unnamed Seedlings of various colours, when dormant, 6s., 9s. and 12s. per dozen.
$35 \mathrm{~s} ., 50 \mathrm{~s}$. and 75 s . per 100.

## BEGONIAS, <br> VARIEGATED.FOLIAGED SECTION.

These are remarkable for their variegated and beautifully coloured ornamental foliage.

## CHRYSANTHEMUMS.

These popular plants have now become so numerous that to give detailed particulars of each they would of themselves form a catalogue, and by giving descriptions purchasers could form but little idea of the comparative merit of varieties; it has therefore been thought best to give simply a list of the most select of the newer kinds in the various soctions. Besides those named, Mr. W. B. has a very large colloction comprising many hundreds of varioties, which can be supplicd at $6 d$. each, 48 . per dozen, or $28 s$. per 100 . When the selection is left to Mr. W. B., the utmost care will be takon to send only varieties of the greatest merit.

> For New kinds see next page.

Choice Exhibition Varieties, Fancy Flowers, 98., 12s. and 18 s . per dezen.
Dwarf Bed̉ding Varieties, 98 . and 12s. per dozen. Single-Flowered Dahlias, 6s., 9 s . \& 12s. per dozen

ECHEVERIAS.<br>ECHEVERIA gCAPIYLLA, 2s. 6d. Scheideckeri, 18. 6d.<br>secunda, $9 d$. each; 6s. per dozen.<br>——olauca, 9d. each; 68. per dozen.

## IBERIS SEMPERVIRENS FLORE-PLENO.

This pretty double variety of the well-known perennial Candytuft will be found a most desirable and welcome addition. Its beautiful white flowers are borne in the greatest profusion, and being most persistent, will be found of the greatest value for cut purposes. 9d. cach.

LANTANAS, of sorts, 18 s . per dozen.

## LOBELIA, BARNARD'S PERPETUAL.

This distinct novelty is no doubt one of the most useful and best of Lobelias. The flowors are of the most brilliant ultramarine blue, strikingly ornamonted with a pure white marking at the base of each of the two lower petals. It is of compact habit, and aliko useful for bedding or growing in pots, its brightness and perpetual blooming character making it exceptionally useful for parterres and ribbon borders. It was arrarded a Certificate of Merit by the Royal Horticultural Society, when exhibited in May, 1892, at the Temple Show. 6s. per dozeu. Seed 18.6d. per packet.

## MIMULUS.

The new and improved varieties of this showy flower are very handsome, many of them blotched or freckled and spotted, on white, sulphur and yellow grounds; the lobes margined with crimson and maroon. Selections at $9 s ., 12 s$. and $18 \%$. per dozen.

## PENTSTEMONS.

The modern varieties of Pentstemons are exceedingly attractive as decorative plants, either for flower-beds or borders, their cultivation being of the easiest description, while they are suitable to alnost any soil, and thoir large and showy flowers are given with a remarkable reduadancy from June to September. Choice sorte, 12s. and 18s. per dozen.

## PETUNIA SNOWDRIFT.

A very beautiful double varicty, producing in the freest possible manner an abundance of pure suow-white flowers of medium size, most elegantly friaged and fimbriated. The blossoms are borne on unusually loug stalks, thus making this variety of special value where cut flowers are in request. $3 s .6 d$.

## PETUNIAS.

For Greenlouso and Couservatory decoration these lovely plants can hardly bo surpassed, affording as they do, all through the summer and autumn, a wealth of bloom of the most diversified character, combiued with a delicious fragrance. Both double and single varieties can be supplied as under.

Choice Selections of Doable-flowered kinds, including blotched, fringed and variegated varieties, $12 s$. and $18 s$. per dozen.
Choice Selections of Single-flowered kinds, including striped and blotched varieties, 12s. \& 188 . per doz.

## PHLOXES (HERBACEOUS).

Selections of good and choice kinds at $12 s$. and $18 s$. per dozen.

## PYRETHRUMS.-SINGLE AND DOUBLE-FLOWERING.

Solections of good kinds, 6 s ., 9 s . and 12s. per dozen.
salvia Bertelifi, 1 s.
Geenermflolis, $1 s$.
M. Issanozoo, 1 s.

Inoénieur Clavenad, 2s.6d.

SALVIA Patens, 9 d . patene alba, 1 s . Piroilert, $1 s$. rutilans, 1 s .

SALVIA splendens, 18.
splendens Breantit, 1 s.
SEMPERVIVUM HAWORTHI,
$1 s$.

## PLANTS FOR SUB-TROPICAL GARDENS.

These have either mrnamental and attractive foliage, or are of gracoful habit and growth, such as Baniboos, Cannas, Musas. \&e., and are very effective when planted in groups; many of them forming striking objects as single specimens. Good Selections made at 30 s . and 42s. per dozon.

## B U L L'S FOOD FOR PLANTS.

Contains in a concentrated form all the essential elements of plant life. It is of immense beneft applied as a top-dressing to plants and bulbs of all sorts grown in pots, especially when pot-bound, completely restoring exhausted energy, a few applications ensuring vigorous healthy growth, the flowers being produced in a most luxurious manner, combined with great richness of colouring. It can also be mixed with ordinary soil in potting, or may be used with most beneflial effect for Chrysanthemums, Shrubs, Vines, and all kinds of Fruits, whether in pots or planted in the open air.

## FOR TEGTMMONIALS see next page.

## ANALYSTS' REPORT.

The analysis shows this to be a complete Plant Food, and of the highest quality. The material not only contains an abundance of all the constituents necespary for plant growth, but the analysis showes also that the four chicf constituents are each in that combination which renders them in the most beneficial and availuble form for the healthy development of plants.

For these reasons, users of this Plant Food in the proper quantities cannot fail to produce the very best results within the capability of their plants.

## CANNON \& NEWTON,

Analytical and Consulting Chemists, 39, Mincing Lane, Loudon, E.C.

## DIRECTIONS FOR USE.

For POT PLANTS AND BULBS.-Sprinkle on the surface of the soil, about every three weeks, at the rate of a small teaspoonful to a 5 -inch pot, so that when the plants are watered, the Plant Food will be gradually absorbed into the soil.

For CHRYSANTHEMUMS.-At the time of potting, some of the Plant Food should be thoroughly mixed with the compost, and afterwards, when the buds begin to swell, frequent top-dressings should be given, the quantity used being estimated according to the size of the pots and vigour of the plants.

For ROSES, SHRUBS, VINES, \&c., in Pots.-Uso about a tablespoonful to a 12 -inch pot several times during the season.

For PLANTS, FRUITS, ROSES, and all Plants in Borders and the Open Ground.-Apply about 2 ozs. to the square yard as often as occasion may require, raking and watering it in.

For LAWNS.-Scatter broadcast at tho rate of 2 ozs. to tho square yard, and well water.
Sold in Tins, containing about $1 \frac{1}{2} \mathrm{lbs}$., price 1 s . each. Larger Size, containing about 5 lbs., 2 s .6 d . each.
Also in Bags, 14 lbs., 4s. 6d. ; 28 lbs., 7s. 6d. ; 56 lbs., 12s. 6d. ; 112 lbs., 20s.

The Garness, Modnt Menrion, Booteristown, Dublin, 4th December, 1894.
Sir,-I am well ploased with your llant Food. I grew my Chrysauthemuuts this year with it, and won four First Prizos, oue £20 Cup, and ono £10 Cup at tho Dublin Show. Yours truly, HUGH ClRAWEORD, Gardener to the Rt. Hou. Earl of Pembrokr. Crorton, Agabijati, Liverpool, 20th February, 1894.
Dear Sir,-After glving your Food for Plants a falr trial for over two jears, I must say that like it lettor than any Artificial Manure I have ever used. In 1892 I grew my Chrysanthemums with $t$, whleh weu the 10. Guinea Cup at Grassendale and Aigburth Shows, also the First Prize at Liverpeol. In 1893 I was again snceessfnl in earrying of like honours. I have used it ou hard add soft weoded plante, and tho reaults were overything that could be deslred. It has no unpleasant odeur, so that, unliko mauy Manures, is net offeusive In tho Conservatory.

Yours truly, DONALD FORBES.
ILarketean Rectory, near Ipswich, May 10th, 1894.
Dear Sir, -Having nged your Plant Food on Chrysanthemums with such good results, I have no hesitatlen in saying that it ls the host Artificial Manure I have over used, produching flowers of great slze and depth, indeed, it is invalnable te those who have to exhibit blooms of the fluest quality. One thing greatly in its favour is, that if applied in moderation, anyono may use it without running the risk of injurlng the reots or the flewers damping, which is often the caso with other Manures.

I am, Sir, yours respectifly, GEORGE JORDAN, Gardener to the Rev, Hugh Bernens.
Impney ILale, Droitwich, 18th February, 1898.
Dear Sir, I am very pleased with the results from using your Plant Food. I grew any Chrysanthemunas with it last season, which won tho City of Edinburgh Silver Cup, alse the three First Prizes for cut-bloems in the large Open Chasses at Birniugham, and the First Prizes at Sheitield. I have alse uscd it with excellent results for Strawberries, Molons, Pines, \&e. I am now using it on Vino and Poach Borders with every conflence of its prodncing geed results. I shall be glad if you will kindly forward another 5 cwt. and oblige,

Yours truly, HICHARD PARKER, Gardener to J, Corbett, Esq.
Croswoon Pank, Abeurstwith, 17th March, 1894.
Dear Sir,-1 am delighted with jour Food for Plants. I find it is excellent for Chrysanthemums, Pelargoniums, Fnehsias, Cinerarias, \&e., in fact for all soft wooded phants, I alse nsed it out my Vine horders and it enabled jeung Vines to cary remarkably heavy crops that ripend up well, while the flavenr was everythiug that could be desired, A great advautage is that it has no unplensant. sinell, so can he nsed in the Conservatory.

I ma, yours faithfully, R. C. WiLhiAMS, Gavdener to Rt. Hon. Farl of Lisberne.
Oaklanns, Alobutith, Liverpool, 12 hh March, 1894.
Dear' Sir,-I have uuch pleasure in stating that 1 havo used yeur Feod for I'hats with great success on Vines, Peaches, loses, \&c., in fact I never had better results. For hari and soft wooded plants I can confidently recommond it as a safo and excellent Fertilizer. Yours truly, JOTHN BOUNDS, Gardeuer to Alfred L. Jones, Fsq.

The Nursher, Hammond Stheet, Cneshuwt, July 18th, 1891.
Dear Sir,-Will you sond me 1 cwt. momo of your flant lioed, and quote price for quarter ton, as Ifind my Tomatoes havo grently improved since nsing it on them, aceording to tho directions. Yours truly, B. SEARING, tue Gainess, Keir, Dinblane, Bridge of Allan, N.iB, 8 th September, 1899.
Doar Sir,-Yonr Plant Food ls the hest I have ever used. I have tried it ou varions plants with excellent effect, and for stimulating and impartiug colour to Crotons and other foliage plants, it is all that can be desired. I tried it on Cyolamens, and the resnlts were marvellous. Itook First Prizo with these at Edinhurgh last year. Kindly send we doublo the quantity, obliging

Yours truly, TIIOMAS LUNT, Gardener to Archibald Stirling, Esq. Manor Ifouse, Stratton Audley, licesster, 9th November, 1895.
Dear Sir,-I havo nsed your Food for Plants for ncarly twe years, nad like it better than any artificial Manure I havo over had. I havo used it en my Vines aud dover had such a geod crop. It is excellent for Chrsantheumms, Primulas, Ferna, \&e. Plense forward mo another ewt., and oblige,

Yours faithfully, W. PARliER, Gardener te the Right Hon. Lady Rose Leigh.
St. Anne's, Clontarf, Dubhin, 2nd March, 1898.
Dear Sir,-I have nsed many Artificial Manures for plants iu the past 96 years, but none that I like so well as your "Plaut Food." Not only is it $n$ quicl Fertilizer, but it has ne unpleasant odour-a great desideratnm.

Yours faithfully, CHARLES SMITH, Gardener to the Right Hon, Lord Ahdilaun.
The Den, Belfast, 27 th Jantary, 1898.
Dear Sir,-You will douhtless be interested to know that last season I won twenty-three First aul teu Second Prizes for plants and fruit grown with your Foed for Plants, which has proved a most excellent stimnlant, and is cortaiuly the best Xanure I have ever used. It is clennly to use, creates uo fungus, and has no unpleasant odour; in fact, no gardenor should bo withont it. Please soud me another ewt. and eblige,

Yours truly, WM. MCLLROY, Gardener to G. W. Wolrfy, Esq.
Leionton Garnens, Wrisupool, 7th Jamary, 1892.
Now that I have used Mr. William Bull's Fond for l'lants over twelve months, I have very great plensure in statiug that I believe it to bo the hest Plant Mannre in the market. It produces Hine foliage, lange flowers, and glves a goed healthy appearanco to Stove and Greculeuse Plants in general. I have also used it ou Melous, Cueumbers, Tomatoes and Vines with good results, and it is excellent for Chryanthomums.

Widhiam Rothwell, Gardeuer to Mrs, Naylob.
The Nunsehy, Lowton, Newton-le-WikLows, 15th December, 1899.
Dear Sir,-Please sond me 5 ewt . of your Plant Fool at your omrliest convenience. I must say' it is tho best Fortilizer I have tried on soft-wooded Plants, especially for Chrysauthemums aud Pchargoniuns.

Yours truly, JOSEPH LEIGH.
Forde Abrex, Chahd, 27 th January, 1894.
Dear Sir,-I think most highly of your Plant Food. It is splendid for all kinds of pot-8tuff, and especially that which needs a strong Mauro. It is graud for Chrysanthemmms aud all kinds of Winter-liooming plauts.

Yours truly, JOHN CROOK, Gardener to W. II. Evans, Esq.

For Full Paxticulars sce pleceding paime.
