SPECIMENS OF FISH

IN

THE COLLECTION

OF THE

BRITISH MUSEUM.

PART I.—CHONDROPTERYGII.

PRINTED BY ORDER OF THE TRUSTEES.

LONDON, 1851.

LONDON :
PRINTED BY EDWARD NEWMAN,
9, DEVONSHIRE ST., BISHOPSGATE.

00120657

INTRODUCTION.

THE principal object of the present Catalogue has been to give a complete list of the specimens of Fish contained in the collection of the British Museum, indicating the peculiarities of each, as regards variation of character, locality, and the source from whence it has been derived.

The characters of the genera of Sharks and Rays, with the Synonyms, have principally been derived from the work of Professors Muller and Henle. The specimens which were not named by those Authors when engaged on their work, or by Dr. Andrew Smith, have been determined by Mr. Edward Gerrard, who has paid considerable attention to this subject, and has compared several of the specimens with the authentic types contained in the Paris collection.

The more important characters of the new genera of Lam-preys are figured.

The other parts of this List will follow as soon as they can be completed.

JOHN EDWARD GRAY.

British Museum,
July 25th, 1851.

SYSTEMATIC INDEX.

LIST OF FISH.

Order I. CHONDROPTERYGII.

Skeleton cartilaginous. Cranium without sutures.

Pisces Chondropterygii, *Gmel. Syst. Nat.* 1131, 1483.

Amphibia Nantes, part, *Linn. Syst. Nat.* i. 349. 394.

Chondropterygiens, *Cuv. Rég. Anim.* 1817, ed. ii. 376, 1829.

Pisces cartilaginei, *Raii, Syn. Pisc.* 18, 1763.

Lampetræ, *Raii, Syn. Pisc.* 38.

Chondropterygia, *Müll. Abh. Akad. Berl.* 1836. *Mag. Zool. & Bot.* i. 405.

Ichthyosia ateleosia, Eltropomia Pomachia, part, *Rafin. Anal. Nat.* 92, 1815.

Ichthyosia ateleosia, Chismopnea branchisœa, part, *Rafin. Anal. Nat.* 92, 1815.

Ichthyosia ateleosia, Tremapnea plagiostomia and cyclostomia, part, *Rafin. Anal. Nat.* 92, 1815.

Cartilaginous fishes, *Gray, Syn. B. M.*, 1842, 147.

Chondrodia and Enchelares, part, *Retzius, Anim. Piscium*, 1803.

Rasinesque, in his 'Analyse de Nature,' 1815, 8vo., divides the fish or Ichthyosia into those which have complete (*Holobranchia*) and incomplete gills (*Ateleosia*), and he separates the cartilaginous fish into three orders of that sub-class, viz.: v. *Eltropomea*, *Acipenser*. vi. *Chismopomea*, *Chimæra*. viii. *Tremapnea*, *Squalus*, *Raia*, and *Petromyzon*, &c. 92, 1845.

John Ray, in his '*Synopsis Methodicus Piscium*,' 1711, placed the cartilaginous fishes together in a group, and divided them into
 1. *Cartilaginei longi* = *Squalus* — 2. *C. plani et lati* = *Raia*. —
 3. The lampreys by themselves.

Linnæus (*Syst. Nat.* ed. 2, p. 349, 1766) arranged these animals with the *Amphibia*; forming for them and some other anomalous fish, as *Lophius*, *Cyclopterus*, *Diodon*, &c., an order designated *Nantes*. This order was divided into two divisions, as I. *Spiracles compound, or many*, as *Petromyzon*, spiracles 7. *Raja* and *Squalus*, spiracles 5. *Chimaera*, spiracle single, four cut. II. *Spiracles single*, containing *Acipenser* and the other anomalous fishes.

Gmelin, (*Syst. Nat.* i. 1131), who adopted Aristedi's arrangement, removed them and the other anomalous fish and formed them into an order, called *Chondropterygii*.

M. De Blainville, in his new distribution of the Animal Kingdom (*Bull. Soc. Phil.* 1816, 120, and *Jour. de Phys.* 1816, 260), forms the cartilaginous fish into a sub-class, which he calls *Dermodontes ou Cartilagineux*, and divides them into four orders: — 1. *Cyclostomes* — 2. *Selaques* (*Selaca*). — 3. *Esturgeons*. — 4. *Polydentes*.

Cuvier, in his '*Règne Animal*,' ii. 1817, 2 ed. 278, 1829, arranges the cartilaginous fish thus: — 1. *A branchies libres*. Fam. 1. *Sturioniens*. — 1. *Esturgeons*. — 2. *Polyodons*. — 3. *Chimeres* (*Chimeres* and *Callorhynques*). — 2. *A branchies fixes*. Fam. 2. *Selaciens*. — 1. *Squalus*. — 2. *Marteaux*. — 3. *Auges*. — 4. *Scies*. — 5. *Raies*. Fam. 3. *Suceurs ou Cyclostomes*, *Règ. Anim.* 2 ed. 278, 1829.

Professor John Müller, in his '*Anatomy of Cyclostomata*,' in the Berlin Academy for 1836, proposes the following arrangement of the Chondropterygia: — Order 1. *Brachiostega*. Fam. 1. *Cataphracta*. a. *Sturiones*. — 1. *Sturio*. a. *Huso sturio*, *sterlata*, and *Helops*. Fam. 2. *Nuda*. b. *Spathulariæ*. — 2. *Spathularia*. Order 2. *Holocephala*. 1. *Chimera*. — 2. *Callorhynchus*. Order 3. *Plagiostomata*. Fam. 1. *Squali*. 1. *Squalus*. — 2. *Zygæna*. — 3. *Squalina*. — 4. *Pristis*. Fam. 2. *Raiæ*. — 5. *Rhinobates*. — 6. *Torpedo*. — 7. *Raia*. — 8. *Prolterygia*. — 9. *Myliobates*. — 10. *Cephaloptera*. Order 4. *Cyclostomata*. Fam. 1. *Hyperoartia*. a. *Dentata*. — 1. *Petromyzon*. b. *Edentata*. — 2. *Ammocœtes*. Fam. 2. *Hyperotreta*. 3. *Myxine*. — 4. *Bodellostoma*.

Charles Buonaparte ('*Systema Ichthyologium*', 1838, 4to.) divides the cartilaginous fish among three of his sub-classes, according to the form of the gills. Sub-class 1. *Elasmobranchii*. Section 1. *Plagiostomi*. Order 1. *Selatha*. Fam. 1. *Raidæ*.—2. *Squalidæ*. Order 2. *Acanthorrini*. Fam. 3. *Chimæridæ*. Sub-class 3. *Pomatobranchii*. Section 2. *Micrognathii*. Order 6. *Sturiones*. Fam. 8. *Polyodontidæ*.—9. *Acipenseridæ*.

Professor John Müller, in his new arrangement of fishes (*Weign. Arch.* 134, 1845), divides the cartilaginous fish into three sub-classes. III. *Ganoidea*. Order 2. *Chondrostei*. Fam. 1. *Acipenserini*.—2. *Spathulariæ*. IV. *Elasmobranchii* seu *Selachii*. Order 1. *Plagiostomi*. Sub-order 1. *Squalidæ*.—2. *Rajidæ*. Order 2. *Holocephali*. Fam. 1. *Chimæræ*. Sub-class 5. *Marsipobanchii* seu *Cyclostomi*. Order 1. *Hyperoartii*. Fam. 1. *Petromyzonini*. Order 2. *Hyperotreti*. Fam. 1. *Myxinoidea*. Sub-class 6. *Leptocardii*. Order 1. *Amphioxini*. Fam. 1. *Amphioxini*.

Mr. Gray, in the '*Synopsis of the British Museum*' for 1842, arranged them as follows:—1. *Acipenseridae*.—2. *Chimæradæ*.—3. *Squalidæ*.—4. *Raidæ*.—5. *Petromyzidae*.—6. *Amphioxidae*, p. 147 and 150.

Sub-Order I. ELEUTHEROPOMI.

Gills free.

Ch. a branchies libres, *Cuv. Rég. Anim.* ii. 2 ed. 27, 378.

Ch. Branchiostega and Ch. Holocephala, *Müll. Abh. Akad. Berl.* 1816.

Ch. Eleutheropoma, *De Kay, Hist. New York*.

Eltropomia pomachia, part, *Rafin. Anal. Nat.* 92, 1815.

Elasmobranchii and *Pomatobranchii*, part, *Bonap. Syst. Ichth.* 1838, 13.

Ganoidia chondrostei, *Müll. Weign. Arch.* 134, 1848.

Section A. STURIONA.

Ch. Brachiostega, *Müll. Abh. Akad. Berl.* 1836. *Mag. Zool. & Bot.* i. 405.

Les Sturioniers ou chondropterygiens a branchies libres (part.), *Cuv. Rég. Anim.* 2 ed. ii. 378.

Sturiona, *Rafin. Anal. Nat.* 92, 1815.

Pomatobranchii Micrognathi, *Bonap. Syst. Ichth.* 1838, 13.

Sturiones, *Bonap. Syst. Ichth.* 1838, 13.

Fam. 1. ACIPENSERIDÆ.

Cartilage of cranium and skin of body covered, at intervals, with cartilaginous or bony shields.

Acipenser, Linn. *Syst. Nat.*

Sturio, Rafin. *Anal. Nat.* 1810.

Les esturgeons, Cuv. *Rég. Anim.* 2 ed. ii. 378, 1829.

Brach. cataphracta seu *Sturiones*, Müll. *Abh. Akad. Berl.* 1836.

Sturiona, part, Rafin. *Anal. Nat.* 92.

Acipenseridæ (*Acipenserini*), Bonap. *Syst. Ichth.* 1838, 13.

Acipenseridæ, Gray, *Syn. B. M.* 1840.

Acipenserini, Müll. *Weign. Arch.* 134, 1845.

1. ACIPENSER.

Nose conical, tapering. Head shielded. Mouth beneath the base of the muzzle, with four or six beards in front. Eyes and nostrils lateral. Body elongate, with longitudinal series of bony plates. Dorsal single behind the ventral and over the anal. The tail-fin produced with a short under lobe.

Rafinesque (*Ichthyologia Ohiensis*, 79, 1820) proposed to divide this genus into two, thus:—1. *Sturio*, with five. 2. *Sterletus*, with three rows of bony plates.

Professor Brandt (in *Brandt & Ratz. Med. Zool.* ii. 1830, 4to.) at first divided the sturgeons as follows:—

1. *Huso*.—Snout acute or obtuse, wholly or partly cartilaginous, more or less pellucid; shields which arm the body distant from one another. A. *Huso*, A. *dauricus*, A. *brevirostris*, A. *rubicundus*.
2. *Sturio*.—Snout obtuse or awl-shaped, covered with a bony shield not pellucid; shields distant. A. *Guldenstædtii*, A. *Sturio*, A. *Lichensteinii*, A. *Schypa*, A. *Heckelii*.
3. *Sterleta*.—Snout awl-shaped, covered with bony shields, not pellucid; shields imbricated. A. *Ruthenus*.
4. *Helops*.—Snout long (one-sixth or one-seventh of the length of the body), covered with strong bony shields; shields distant. A. *stellatus*, A. *oxyrhynchus*, A. *maculosus*.

Professor Brandt, subsequently, in the same work, p. 349, reduced the genus into three sections with the following character:—

1. *Huso*.—Beards simple, joined together, reaching to the upper lip or beyond it. A. *Huso*, A. *Schypa* = A. *Dauricus*, *Fitz.* & *Heckle*.
2. *Sturio*.—(Formed by uniting *Sturio* and *Helops*). Beards simple, roundish, scarcely united. (A. *Sturio*, A. *Guldenstaedtii*, A. *stellatus*).
3. *Sterleta*.—Beards roundish, with small nipple-shaped appendages. A. *Ruthenus*.

Drs. Fitzinger and Heckle, in their monographs of the genus (*Annalen der Wiener Museum der Naturg.* i. 270, 1836), proposed to divide them into two sections, each containing three sub-genera, thus :—

- A. Dorsal-plates in front sloping and behind highest, ending in a point and open up to the point.
 - a. The skin covered with small pectinated bony plates. Beards fimbriated.
 1. Under lip continuous. (*Lioniscus*.—A. *glaber*).
 2. Under lip not continuous, or a rudiment on each side of the mouth. (*Acipenser*.—A. *Sinensis*, A. *Gmelini*, A. *Ruthenus*, A. *Aleutensis*, A. *maculosus*, A. *oxyrhynchus*).
 - b. The skin covered with larger and smaller pectinated bony scales and larger stellated bony plates. The beards simple: the under lip not continuous, or simply a rudiment on each side of the mouth. (*Helopes*.—A. *stellatus*).
- B. Dorsal-plates on both sides sloping, highest in the middle, ending in a point.
 - a. The skin covered with smaller and larger stellated bony shields. Beards simple. Under lip not continuous, or a rudiment on each side of the mouth. (*Antacei*.—A. *Schypa*, A. *Guldenstaedtii*).
 - b. Skin chagrined, rough, with bluntnish bony knobs. The beards simple. Under lip not continuous, or a rudiment only on each side of the mouth. (*Sturiones*.—A. *Heckelii*, A. *Sturio*).
 - c. The skin rough, spotted, with pointed bony knobs. The beards flattened, ribbon-shaped. Under lip not continuous, or a rudiment on each side of the mouth (*Husones*.—A. *brevirostris*, A. *rubicundus*, A. *macrostomus*, A. *Dauricus*, A. *Huso*).

This arrangement is adopted in this Catalogue.

A. Dorsal-plates sloping in front, higher behind, ending in a point, and open up to the point.—**ACIPENSER**.

Acipenser, A. *Fitz. & Heckle, Ann. Wien. Mus.* i. 269, 1836.

1. Dorsal-shields in front sloping, behind very high, ending in a point, open up to the base of the point. Skin covered with small pectinated bony plates. Cirrhi fimbriated. Lower lip continuous.—**LIONISCUS**.

Lionisci, *Fitz. & Heckle, Ann. Wien. Mus.* i. 269.

1. **ACIPENSER GLABER**. The Tok Schipa or Belugie.

Lioniscus glaber, *Fitz. & Heckle, Ann. Wien. Mus.* p. 270, t. 25, f. 3, t. 28, f. 5—6, 1836—40.

Selacha (*Plagiostoma*), *Bonap. Selach. Fulula Analitica*, 1838, 4to.

Plagiostomi, *De Kay*, *Nat. Hist. of New York*, 348.

M. De Blainville (*Bull. Soc. Phil. & Jour. de Phys.* 260, 1816), proposed to form the flat-bodied cartilaginous fish into a sub-order, which he called *Selaca*, and divided it into three genera :—1. *Raia*.—2. *Squatina*.—3. *Squalus*.

Müller and Henle (*Mag. Nat. Hist.* ii. 1838) separate the *Plagiostomi* into two orders, 1 Skates (*Raiæ*), 2 Sharks (*Squali*) ; the former characterized by the existence of a peculiar cartilage arising from the nasal part of the skull and extending towards, and even meeting to form the anterior part of the crest of the pectoral-fin : there is no trace of this cartilage in the sharks.

SYNOPSIS OF FAMILIES.

1. *Squali*.—*Skull without any frontal cartilage ; branchial openings lateral*.

1. *SCYLLIADÆ*.—Body elongate, subcylindrical ; pectoral-fins moderate ; lateral part of the dorsal-fins over or behind the abdominal-fin.

2. *SQUALIDÆ*.—Body elongate, subcylindrical ; pectoral-fins moderate ; lateral dorsal one or two first before the abdominal-fin.

3. *SQUATINADÆ*.—Body rather depressed ; pectoral-fins very large.

2. *Raii*.—*Skull with a peculiar frontal cartilage from the nasal, extending in front and meeting, forming the front crest of the pectoral-fin ; branchial-opening inferior*.

4. *PRISTISIDÆ*.—Body elongate, gradually tapering into the tail.

5. *RAIDÆ*.—Body much depressed, broad, abruptly ending in a slender tail.

Sub-section I. SQUALI.

Gill-openings lateral; eyelids free; supplementary humeral girdle incomplete; head cartilage none.

Squalus, Linn. *Syst. Nat.*

Squatina and *Squalus*, Blain. *Bull. Soc. Phil.* 121, 1816.

Pisces Cartilaginei longi, Ray, *Syn. Pisc.* 18.

Linnæus (*Syst. Nat.* i. 397) formed the sharks into three sections:—1. Dorsal-fin spinous, anal-fin none.—*S. Acanthias*. 2. Dorsal-fin unarmed; anal-fin distinct; teeth acute.—*S. Zygaena*. 3. Teeth granulated.—*S. mustellus*.

Schueider (*Syst. Ichth.* 1801) divides them thus:—1. Spiracle and anal-fin distinct.—*S. canicula*. 2. Spiracles none; anal distinct.—*S. Zygaena*. 3. Spiracles distinct; anal none.—*S. centrina*.

Rafinesque (*Caratteri Nuovi Generi*, 1810, 8vo.) described and figured the following new genera and species of sharks:—1. *Carcharius Taurus*, 10, t. 14, f. 1.—2. *Delatias sparophagus*, 10, t. 13, f. 4.—3. *D. nocturnus*, 11, t. 14, f. 3.—4. *Tetroras angivora*, 11.—5. *Isurus oxyrinchus*, 12, t. 13, f. 1.—6. *Cerietius macrourus*, 12.—7. *Alopias macrourus*, 12.—8. *Heptranchias cinereus*, 13.—9. *Galeus melastomus*, 12.—10. *Squalus uyato*, 12, t. 14, f. 2.—11. *Hexanchus grissus*, 12.—12. *Etmopterus aculeatus*, 14, t. 13, f. 3. In his ‘*Analyse de la Nature*,’ 1815, he quoted these genera, and added the following, but without characters or quoting types:—13. *Sphyrnias*.—14. *Oxynotus*.—15. *Squalina*, Dum.—16. *Pristes*, Lath.—17: *Anodon*, Lac.

M. De Blainville (*Bull. Soc. Phil.* 121, 1816, and *Jour. de Phys.* 260, 1816) divides the Squali in nine sub-genera, thus:—1. *Scyliorhinus* (*canicula*).—2. *Echinorhinus* (*spinosus*).—3. *Monopterhinus* (*griseus*).—4. *Galeorhinus* (*mustelus*).—5. *Acanthorhinus* (*acanthetus*).—6. *Heterodontes* (*Philippii*).—7. *Carcharhinus* (*Lamia*).—8. *Cestrorhinus* (*Zygæna*).—9. *Cetorhinus* (*Gunneri*).

Cuvier (*Règ. An.* 385, 1817, and 2 ed. 1829) divides these animals in the following manner:—I. *Squalus* (*Linn.*), containing

I. (*Les Scyllies*).

II. *Les Squales*, which are sub-divided as in Schneider, thus:
 a. *without spiracles and without anal-fins.* —1. *Carcharias*. —2. *Lamna*. b. *with spiracles and anal-fins.* —3. *Galeus*. —4. *Mustelus*. —5. *Notidanus*. —6. *Selache*. —7. *Cestraciens*. c. *with spiracles, but without anals.* —8. *Spinax*. —9. *Centrina*. —10. *Scymnus*. —11. *Zygæna*.

III. *Squatina*.

IV. *Pristis*.

M. Charles Buonaparte (*Selachorum Tabula Analytica*, 1838, 4to.) divides the family Squalidæ in the following manner:—

1. Squalidæ anomalæ.—*Body depressed. Pectoral-fins very large.*
—*Squatina*.
2. Squalidæ veræ.—*Body elongate, roundish; pectoral-fins congruous.*
 - * *Anal-fins none; spiracles distinct; nictitant membrane none.*
 - 1. *Spinacini.*—*First dorsal spined; teeth compressed, sharp-edged.*—*Acanthias*.—*Spinax*.—*Centrina*.—*Centrophorus*.
 - 2. *Scymnini.*—*Dorsals armless; teeth triangular, of maxilla, in many series; of mandibles, in one or two series, and a broad base.*
Lepidorhinus.—*Scymnus*.—*Læmargus*.—*Echinorhinus*.
 - ** *Anal distinct; nictitant membrane none; spiracles none, or very small.*
 - 3. *Notidianini.*—*Dorsal, one.*—*Heptoranchias*.—*Notidianus*.
 - 4. *Trichoghidini.*—*Dorsals, two; first before, second behind the ventrals and before the anal; gill-slits very large, all before the pectoral; fins large; upper caudal-lobe elongate.*—*Triglochis*.
 - 5. *Lamnini.*—*Dorsals, two; second opposite the small anal; gill-slits very large, all before the pectorals; tail lunate.*—*Selache*.—*Carcharodon*.—*Oxyrhina*.—*Lamua*.
 - 6. *Alopiadini.*—*Dorsals, two; hinder over the pectorals; upper caudal-lobe very long; gill-slits small; teeth simple.*—*Alopias*.—*Rhinodon*.

- ** *Anal distinct; nictitant membrane distinct; hinder gill-slit over the pectorals; second dorsal opposite the anal; dorsal unarmed.*
7. *Squalini.*—*Teeth compressed, triangular, acute; spiracles none, or small.*—*Sphyrna.*—*Squalus.*—*Thalassorhinus.*—*Scoliodon.*—*Galeocerdo.*—*Physodon.*—*Loxodon.*—*Galeus.*
 8. *Triænodontini.*—*Teeth acute, denticulated on each side; spiracles small.*—*Triakis.*—*Leptocharias.*—*Triænodon.*
 9. *Mustelini.*—*Teeth small, blunt; spiracles large.*—*Mustelus.*
 10. *Cestrationini.*—*Anal distinct; nictitant membrane none; spiracles large; gill-slits small; hinder over the pectorals; dorsals armed with spines.*—*Cestraction.*
 11. *Scyllini.*—*Anal distinct; nictitant membrane none; spiracles large; dorsals both nearly over the ventrals; teeth small, acute, denticulated.*—*Stegistoma.*—*Uglismostoma.*—*Grassorhinus.*—*Hemiscyllum.*—*Orectolobus.*—*Pristidurus.*—*Scylium.*—? *Rhinodon.*

Dr. S. Müller and Henle (*Mag. Nat. Hist.* ii. 1838) published an outline of their system. He divides the sharks into five divisions, thus:—

Division I. *Scyllia*, containing 1. *Scylium.*—2. *Pristiurus.*—3. *Chiloscyllium.*—4. *Hemiscyllum.*—5. *Crossorhinus.*—6. *Ginglymostoma.*—7. *Stegostoma.*

II. subdivided thus: a. *with membrana nictitans.* a. *without spiracles.* a. *teeth flat, sharp-edged, serrated, or smooth.* 1. *Carcharias.*—2. *Scoliodon.*—3. *Zygæna.* b. *teeth pointed with a lateral denticle-like tooth of Scylium.* 1. *Triænodon.*—2. *Leptocharis.* B. *with spiracles.* a. *teeth flat, part serrated, or not serrated.* 1. *Galeocerdo.*—2. *Loxodon.*—3. *Galeus.* b. *teeth pointed, as in Scylium.* 1. *Triakis.* c. *teeth pavement-like.* 1. *Mustelus.*—2. *No nictitating membrane (Lamnoidea).* 1. *Lamna.*—2. *Oxyrhina.*—3. *Carcharodon.*—4. *Selache.*—5. *Rineodon.* b. *Trieboghis.*—c. *Alopecias.*—d. *Cestraction.*

III. *Notidanus, Cuvier.* 1. *Hexanchus.*—2. *Heptanchus.*

IV. a. *Acanthorhinus.* 1. *Acanthias.*—2. *Spinax.*—3. *Centrina.*—4. *Centrophorus.* b. *Scymnus.* 1. *Scymnus.*—2. *Læmargus.*—3. *Echinorrhinus.*

V. *Squatina.*

Fam. 1. SCYLLIDÆ.

Have spout-holes and no nictitating membrane, five gill-openings which stand either all at equal distances from each other, or the two last are so approximated that the fifth appears within the fourth. The last gill-opening is placed over the root of the breast-fin. All possess a furrow at the corner of the mouth and an upper labial cartilage. The teeth have a middle point, and from one to four radical toothlets on either side. The breast-fins are, with few exceptions, broader in proportion to their length than in the rest of the sharks. The anal-fin stands either before, beneath, or behind the second back fin. The tail-fin is extended lengthways, not forked, truncated or rounded at the end, with or without a trace of an under lobe, but provided with a notch more or less deep near the end on the under side. No fish of this species has a caudal-fin. They are all characterized by a lively colour or some peculiarity of design in their markings. The gut-valve is spinal. This family seems to contain the egg-laying or spawning sharks. The eggs are more or less like those of the rays.

Squali, § 1. *Seyllia*, Müll. & Henle, *Mag. Nat. Hist.* ii. 1838.
Plagiost.

Scyllum, *Cuv. Rég. An.* 2 ed. ii. 1817.

Scyllini, *Bonap. Selach. Tab. Anal.* 14, 1838.

a. *Anal-fin nearer the head than the second dorsal.*

1. SCYLLIUM.

The first back-fin between the belly-fin and anal: the second between the anal and tail-fin. Spiracles close behind the eyes. The gill-openings are placed all at equal distances from each other, the hindmost pair over the breast-fin. Snout short and blunt; nostril near the mouth sometimes sending a furrow to the edge of the upper lip. The upper nasal-flap surrounds the nostril in such a manner that for the most part there remains a small round opening on the outer side. The nasal-flaps of both sides are separated from each other by a larger or smaller dilating middle piece, or they pass across into one another. In some, we find in the middle of the external surface a rudimentary beard, which at times projects beyond

the under edge of the flap. On the under edge of the nostril some have a smaller flap, similar to that which borders the upper edge. The mouth is bent; the teeth have a middle point, and one or two radical toothlets on each side. In most species the back fins are attached over the claspers. Scales three-pronged. The eggs of this genus are like those of the rays.

2. PRISTIDURUS.

This genus has all the characters of *Scylium*. It is distinguished by its elongated snout, and by a row of small, flat prickles on the upper rim of the tail-fin, which represent a kind of saw. The tail as in *Scylium*, but with a trace of an under lobe. The second back-fin over the hinder part of the anal. The nostrils have a short, skinny, triangular flap. The eggs are smooth, as in *Scylium*.

3. HEMISCYLLIUM.

The nostrils reach within the mouth. The nasal flaps of both sides are dissevered from one another; the outer one is very large, and the inner one possesses a beard. Mouth oblique, transverse, nigh the fore end of the snout. Plaits exist at the corner of the mouth, and the under ones do not unite in the middle line. Teeth three-lobed. Spiracles large, longitudinal, under the hinder half of the eyes. The gill-openings are all equally distant from each other, the last one over the breast-fin. Both back-fins stand over the belly-fin and before the anal; the anal-fin close upon the tail-fin; this has the usual notch at the hinder end, and no under lobe.

4. CHILOSCYLLIUM.

Snout blunt; the nostrils are cleft up to the mouth; the nasal-flaps of both sides not connected, always carrying a beard. On the outer border of the nostrils there is a considerable skirt-like flap, which is continued into the upper corner fold of the mouth. The genus is characterized by a broad, skinny under-lip, which is separated by a transverse furrow from the outer skin of the throat; the elongated under corner fold of the mouth springs therefrom, and is attached in the middle. Mouth slightly curved. Teeth pointed, with one or two radical toothlets on each side. Spiracles longitudinal, close behind the eyes. A small knob springs forward from the hinder edge of the spout-hole. The fourth and fifth gill-opening are close together. Position of the back-fins, as in *Hemiscyllium*, both are placed before the anal; the foremost behind the belly-fin. The breast and belly-fins are always rounded. The anal and tail-fins are also rounded at the end; the anal without a fore-corner is rounded beneath and pointed behind, and they are close to each other. The under edge of the tail-fin is convex.

5. CROSSORHINUS.

Mouth large, nearer the end of the snout than in most sharks. Head broad, flat. The nasal-flap is beset with many skinny shreds. Tattered appendages hanging to the side of the head from the nose to the gill-openings. Corner folds of the mouth not connected to

each other beneath. Teeth flat, pointed, with a three-lobed root, the middle lobe being the smallest, rounded, and defined like a toothlet. Spiracles more than usually long, situated beneath and somewhat behind the eyes. Gill-openings all equally far apart from each other, decreasing in size from the first to the last; the last two over the base of the breast-fin. Both back-fins between the belly-fins and anal, the latter close to the tail-fin.

6. NEBRIUS.

. Snout blunt. Nostrils cleft up to the mouth; a short flap on the inner side, which has a long barbel that hangs over the mouth; also a short flap on the under side of the outer side. Mouth convex. The corner fold of the mouth is divided into an upper and under one by a deep furrow, the inner end of the under one is separated by a more or less deep perpendicular furrow, whence the corner fold of the mouth is rake-like; the pits very deep. Teeth very numerous, up to ten successive rows, a rhomboidal base, with a middle conical point having from two to four blunt, radical toothlets on each side,

all gradually diminishing in size. The fifth gill-opening is almost concealed within the fourth, both are over the breast-fin. Spiracles very small, straight, behind the eyes. The first back-fin stands over the belly-fins; the second back-fin sometimes before the anal, sometimes over its beginning. Anal nearer to the tail-fin than the back-fin, but not pressing immediately on the tail-fin. Tail-fin with a rudiment of an under lobe. The breast-fins are longer than in the other Scyllia.

7. STEGOSTOMA.

The mouth is small and entirely transverse. On the upper and under-jaw the skin forms two flat rolls which support the teeth: these resemble a tripartite leaflet. The middle part between the nasal-flaps is very much broader than the flaps themselves, and forms a thick, transverse roll above the mouth, forming an upper anterior cover to it: it has a rounded free border in which the fore and hinder surfaces unite; the hinder one in its usual hidden position is also concave-scooped. The nasal-flaps are reduced to an edge of skin which binds the middle roll to the sides. A stout barbel-like prolongation of the nasal-flap. No flap on the under edge of the nasal opening. The corner folds of the mouth are short; the pits deep. The head is much arched and rounded. The opening between the eyelids is very small, transversely oval, and has sharp edges. The fifth gill-opening is concealed in the fourth. The third, fourth, and fifth gill-openings over the breast-fin. The first back-fin stands over the belly-fin, and reaches directly over the same in front: the second back-fin stands between the belly-fins and anal. The anal is close before the tail-fin. The tail-fin is almost equally high throughout, and has the usual under lobe towards the end, and is very long in proportion to the body.

SYNOPSIS OF SECTIONS AND TRIBES.

I. *Nictitating membrane distinct; dorsal-fins two; anal distinct.*

a. *Spiracles none; second dorsal over the anal.*

1. **SQUALIANA.**—Teeth flat, sharp-edged, smooth, or serrated.

2. **LEPTOCHARIANA.**—Teeth pointed, with lateral denticles.

b. *Spiracles distinct.*

3. **GALIEANA.**—Teeth flat, sharp-edged, smooth, or serrated.

4. **TRIAKIANA.**—Teeth pointed, with lateral denticles.

5. **MUSTELIANA.**—Teeth pavement-like.

II. *Nictitating membrane none.*

a. *Anal distinct; dorsal-fins two.*

6. **ISURINA.**—Gill-slits all before the pectorals; second dorsal opposite the anal.

7. **ODONTASPIDIANA.**—Gill-slits all before the pectorals; second dorsal between the ventral and anal.

8. **ALOPECIANA.**—Last gill-slit over the pectoral; second dorsal opposite the anal.

9. HETERODONTINA.—Last gill-slit over the pectoral; second dorsal between the ventral and anal; dorsals spinous.

b. *Anal distinct; dorsal-fin one.*

10. HEXANCHINA.

c. *Anal none; dorsal-fins two.*

11. ACANTHIANA.—Dorsal-fins with a spine in front.

12. DALATIANA.—Dorsal-fins spineless.

1. *Nictitating membrane distinct; dorsal-fins two, first between the pectoral and ventral; anal distinct; front branchial-slits before the front edge of the pectoral-fins.*

Squali (§ 2), Müll. & Henle, Mag. Nat. Hist. ii. 1838. *Plagiost.*

A. *Spiracles none; second dorsal-fin over the anal.*

Squali (§ 2, a.), Müll. & Henle, Plag.

Tribe 1. SQUALIANA.

The head is flat. The snout pointed, blunt or elongate sideways. The nostrils have for the most part a small, three-sided flap to their upper border. The eyelids enclose an acute, oval, or roundish opening; the pupil is perpendicularly oval. The mouth is boldly convex; the corner fold of the mouth small. The teeth in this family are generally three-cornered, flat, with the cutting-edge entire or serrated, even-sided or unequal. The anal stands directly opposite the second back-fin, or close before it or behind it. The tail has always a short under lobe, and a slit in its under edge before the obliquely truncated end of the upper lobe. A small three-cornered pit may be generally found on the upper and under sides of the root of the tail. The intestinal valve is rolled lengthways, not straightways. The scales are small; the skin smooth.

Carchariæ, Müll. & Henle, Plag.

Squalini, Bonap. Selach. Tab. Anal. 10, 1838.

1. SQUALUS.

Snout flat, more or less rounded, moderately long: the nostrils in the middle between the mouth and the point of the snout. Labial cartilages very small, or wanting. The yolk-bag of the embryo is connected with a kind of uterine placenta by a curled fold; the oviduct is either smooth or clothed with villi.

Squalus, sp., Linn.

Squalus, Bonap. Selac. Tab. Anal. 10, 1838.

Carcharias, Müll. & Henle, Mag. Nat. Hist. ii. 1838. Plagiost. 28.

Carcharias, part., Cuv. Règ. An. 2 ed. ii. 387.

The form of the teeth divides the genus into five sub-genera.

1. Teeth in the upper and under-jaw equal, except that there is a single middle tooth in the upper-jaw, which is wanting in the under one, cutting with the whole outer efficient point, destitute of serratures. The outer part of the base forms a blunt ledge, with or without a slight indentation. The second back-fin stands straight over the anal or over the hinder end of the same. Tail-pit distinct above and below. Scales small, three-keeled. The oviduct of the embryo is beset with villi.—*SCOLIODON*.

HAB.—Rio de Janeiro, Martinique, Guadeloupe.
 Mus. Leyden and Paris.

2. The teeth are in all respects as in *Scoliodon*, within the upper and under-jaw an oblique point, and a ledge on the outer side, without serratures, but they are thicker and less cutting, the point more slender and longer. In the upper-jaw a straight, middle tooth ; two small straight ones in the lower-jaw. The two succeeding teeth on each side have long hook-like points upon a rounder and more prominent base, which is roundish in its cross section ; they are bigger than those which follow. First back-fin close before the belly-fins ; the second is over the space between the ventral and anal-fins.—*TRIGLOCHIS*.

2. SPHYRNIAE.

The fore part of the head is broad, flat, and elongate on the sides, with the nostrils situated on the fore-border of it. The eyes on the lateral ends. The nasal-flap is a small, three-sided lappet on the inner edge of the nostril. Small labial cartilages. Teeth equal above and below, a flat pyramid inclined outwards with a ledge on the outer side of the base, entire or serrated. A middle tooth in both jaws. The first back-fin stands higher to the pectorals than to the belly-fin; the second is smaller than the first, and stands over the anal. Tail-pits distinct. The oviduct of the embryo is set with villi. The yolk-bag is connected to the walls of the uterus.

a. Stuffed. Southern Ocean. Cabenda Bay. (The specimen described and figured by Müller and Henle).

B. *With nictitating membranes and spiracles; the last or the two last gill-openings over the pectoral-fins.*

Squali (§ 2, B), *Müll. & Henle, Plag. 37.*

3. Head flat. Snout pointed or blunt. Nostrils, openings between the eyelids. Mouth, and its corner folds as in the *Carchariæ*; but they all possess small lip-cartilages. The spiracles are small, longitudinal, or round. Teeth in both jaws alike, flat, with cutting-edges, a point inclined obliquely outwards, and a ledge on the outer border; the edges are either wholly without serratures, or they are serrated on the outer side only, or on both sides. The anal stands close before, behind or opposite to the second back-fin. The upper lobe of the tail-fin has one or two notches before its end. The tail-pit exists or is wanting. The gut-valve is either screw-formed or rolled lengthways. Scales small, three-keeled, with a middle point.
—*GALEANA.*

Galei, Müll. & Henle, Plag. 5.

Squalini, part, Bonap. Selac. Tab. Anal. 10, 1838.

I. GALEUS.

The longest spiracles about half the length of the eye-openings behind the eyes. The pupil forms an angle beneath, and is round above. The teeth have an inner smooth edge and an outer serrated one, which is set off from the upright smooth point of the tooth: in some teeth the inner edge exhibits a trace of a fine serrature. The front teeth are straight, jagged on both sides of the base, and no smaller than the side teeth. Tail-pit wanting. The upper lobe of the tail-fin has a notch. Gut-valve screw-formed.

1. ISURUS.

Snout three-sided, pyramidal, pointed. Nasal-flap short, three-sided. Spiracles very small, far behind the eyes. Teeth flat, not serrated, three-sided, with a short-pointed denticle on each side of the base of the older ones, which is sometimes doubled. The jaw end of the teeth is deeply concave towards the jaw. No middle teeth, but a space in their stead in the upper and under-jaw. The two front teeth of the upper-jaw are followed on either side by one or more smaller ones. The skin is smooth. Scales very small.

9. Mouth at the fore end of the snout. The nostrils reach to the mouth. The upper corner fold of the mouth is wanting. Spout-holes distinctly visible. The gill-openings small; the last one above the breast-fin. A spine before each back-fin. Tail short, with a notch on the under edge of the upper lobe.—**HETERODONTINA.**

Heterodontus, *Blainv. Bull. Soc. Phil.* 121, 1816.

Cestraciontes, *Müll. & Henle, Plag.* 76.

1. HETERODONTUS.

Nostril-slit within the mouth, surrounded within and without by a roll of skin; the outer one turning inwards; the inner one is separated by a furrow from the upper-lip. Spout-holes small, outside and somewhat behind the eyes. The eye under a ledge-like fold of the skin of the head, which begins close behind the snout and runs straight from before backwards. Only the under half of the corner fold of the mouth is evident, and is moreover divided towards the middle line from the skin of the under-jaw by a furrow. The upper one is barely shown by a small notch. Pavement-like teeth, in the middle small and pointed, from three to five denticles tiled from the base towards the point, of which the middle one is the biggest, and which are worn out in the old fish; also even in those which are not upright; in old individuals the radical denticles are indistinct, or wanting. The lateral teeth are pavement-like, rhomboidal, diminishing in bigness from the hindmost towards the first and back: they have a roll running in the direction of their longest diameter and a rough upper surface; altogether they remind one, by their form, of a winding spiral snail-shell. Gill-openings decreasing in size from before backwards, the last two moderately high above the breast-fin. Taiksiu short, with a distinct under lobe.

B. Dorsal-fin single; anal distinct; gill-slits six or seven.

Squali (§ 3), *Müll. & Henle*, *Mag. Nat. Hist.* ii. 1838. *Plagiost.*

11. Head flat. Nostrils with a small three-cornered flap. Upper corner fold of the mouth very large; the under one small. Nictitating membrane wanting. Tongue adhering. The spout-holes upright, small. From six to seven gill-openings, decreasing gradually in size from first to last, all before the breast-fins. A middle tooth in the under-jaw. The next five or six teeth of the under-jaw form a saw, which runs from above and within downwards and outwards; the fore and inner edges of the teeth are entire or finely serrulated throughout. The outermost jaw-teeth are low and flat. The upper-jaw teeth are longer, narrower, and more pointed: the first denticle or point is much longer than the rest; the outer edge thick, the inner one finely serrated, toothed towards the base. The foremost teeth form a heap, and are hook-formed from a broad base. The next following ones have one, or a pair of lateral denticles on the outer side. The outermost teeth as in the upper-jaw. Distinct lateral lines. The first back-fins between the belly-fins and anal, sometimes nearly over the anal. Tail-fin with a small under lobe, notched at the end, which is obliquely or directly truncated. No tail-pits. Gut-valve screw-formed.—**HEXANCHINA**.

1. ACANTHIAS.

Head flat. Large corner pits to the mouth. Two labial cartilages above, one below. The mouth forms a very flat arch. Spout-holes big, behind, and somewhat above the eyes, a roll-like flap to the spout-hole, springing from its fore edge. The eye-openings are long. Teeth above and beneath, cutting with an almost horizontal edge, and a point inclined outwards. The root of the tooth is higher on the inner part than on the outer, and has a longitudinal keel on the inner one; the outer part forms a round ledge towards the point of the tooth. First back-fin between the breast and belly-fins. Second betwixt the belly-fins and caudal. The upper lobe of the latter is the bigger one. A tail-pit exists in some. The males have on the outside of the ends of their appendages a moveable prickle or spine, with a slightly curved tip. Scales heart-shaped, with a middle point, and one or more keels.

2. SPINAX.

Head arched. Snout blunt. Nostrils at the end of the snout. Corner folds of the mouth very large, naked. The under one, in form of a naked ledge, runs lengthways round the under margin of the mouth and unites with its fellow. An upper corner cartilage of the mouth. Mouth little arched. Under-teeth as in *Acanthias*, but without the keel and apophysis of the base: the upper-teeth as in *Scyllium*, with a larger, straight, conical, middle prong, and two pointed lateral prongs on each side; the outer of which is the smaller. No tail-pits. No prickle on the male appendages. Bent hairs instead of scales.

3. OXYNOTUS.

Snout short, thick and flat.. Nostrils near the edge of the same. Nasal-flap four-sided. The corner fold of the naked labial cartilages united above and below on the mesial line with the skin of the head. Spout-holes very large behind and somewhat above the eyes, having an upward and downward direction, crescentic, with one flap. Upper-teeth slender, conical, and little cutting, straight, connected with the skin of the fore part of the jaw. The base of these teeth is notched in the middle. The under-teeth are either straight or nearly so, and the outer ones inclined very slightly outwards, broader and flatter than the upper ones, very keenly cutting, nearly equilateral, finely serrated on the edge. The middlemost tooth is single, exactly equilateral; the base of the under-jaw teeth nearly four-cornered. The spine of both back-fins is enveloped to the point in the skin. Tail-fin without an under lobe, and having no notch. The males have appendages which are wholly soft, without a spine. Scales upright, points standing on a four-sided base.

a. Stuffed. From the Chatham Museum.

4. ACANTHORHINUS.

Head flat. Nostrils near the fore end of the snout. Corner folds of the mouth naked, very large and deep. A slit of the skin proceeds backwards from the same. Spout-holes behind and above the eyes, with a flap. The fourth and fifth gill-holes are approximated to each other. Teeth in the under-jaw as in *Acanthias*, but with the edge less lying; this is either indistinctly toothed or entire. The root has a middle upright keel with a cross lobe on the outer side standing forwards. The upper teeth straight, equilateral, three-cornered on a four-sided base, with a longitudinal keel and a cross one; no denticulations and no supplementary prongs. The longitudinal keel is continued over the fore surface of the tooth, whereby it becomes thicker in the middle. No middle-tooth. No tail-pit. The males have a prickle in their appendages, which is placed on their outer side before their ends.

Scymnus, *Cuv. Rég. An.* 2 ed. ii. 393. *Müll. & Henle, Mag. Nat. Hist.* ii. 1838.

•1. DALATIAS.

Head either flat or compressed on the sides. Spout-holes far behind and somewhat above the eyes. The teeth of the upper-jaw wholly straight, or upright on the jaw, hooked, the under ones broader, with an upright or inclined edge. Gill-openings small, the fourth and fifth only a little approximated. No tail-pit.

• *Dalatias, Rafin. Caratt.*

Scymnus, part, Cuv. Rég. An. 2 ed. ii. 392.

Scymnus, Müll. & Henle, Mag. Nat. Hist. ii. 1838.

1. The upper corner fold of the mouth is connected by a skinny ledge, under which before the teeth there lies a very conspicuous skinny lip, much longer than the upper-teeth: the under corner fold of the mouth passes into a lip which is very free, but is not separated from the skin of the throat by a furrow. The skin forms beneath the eye a free border towards the large naked region of the corner of the mouth. The under-teeth are lancet-formed, convex in the middle of the anterior surface, sharp on the sides, the lancet-shaped point rising from a high base. The under mid-tooth, which is no smaller than its neighbours, has a base with both its sides equal (and a notch at the commencement of the root). The root is larger than the point; two lobes on the edge of the jaw, from which there runs a channel up to an opening in the middle of the root of the tooth. The remaining teeth in the under-jaw have an indentation on their inner sides wherein the root of the adjoining tooth lies: their root is also two-lobed and has the same channel. The upper-jaw teeth stand straight forwards, and their sides are inclined outwards. The claspers are without a spine.—*DALATIAS.*

2. The skin forms a very large slit at the corner of the mouth, and a ledge covering the dental cartilage beneath, which is wanting above. Upper corner fold of the mouth very large, and naked, under one very small. The upper teeth small, much longer than broad, conical, little cutting ; the fore ones and the adjoining ones straight ; the outer ones bent slightly, somewhat outwards ; all without serratures. An upright keel on the basal part of the anterior surface ; the root notched in the middle. Many rows stand upright together. The under teeth are much broader and longer, with a lying edge, and a point inclined outwards as in *Acanthias*, without serratures. The root long, flat, with an upright keel on the anterior surface, excavated lengthways on the sides. The outer edge of the base, which is higher than broad, is convex ; the inner one shallowly excavated ; the under one rounded, and notched in the middle. The males have a spine in their claspers.

1. SQUATINA.

Spout-holes much larger than the eyes, crescentic, convex before, concave behind, as far behind the eyes as the eyes are from the point of the snout. Above the mouth a broad lip, on whose fore border the nostrils stand, notched in the middle. On each side of the nostrils a long lappet. The nostrils with a flap at the inner corner, which is divided into many scalloped lappets; on the outer corner of the nostril a broad indented flap of skin. A ledge of skin commences at the outer corner of the nostril, and running on the side of the head, terminates at the place where the fore point of the breast-fin abuts against the head. This ledge is of the same breadth with the interval between the opposite eyes and spout-holes. Eye-openings round, in a line with the nostrils and spout-holes. Under-teeth interrupted in the middle; also above no mid-tooth, in the fore part conical teeth, little trenchant; the teeth scattered with spaces. Two upper and under corner cartilages of the mouth, above them a very deep recess under a vault of skin. Both back-fins upon the tail. This is compressed from above to beneath, broader than high, with a keel of skin on the side. The under part of the tail-fin is longer than the upper one. The upper lobe without a notch. Belly-fins large. The male claspers small and weak. Scales conical, vanishing in a terminal point.

Sub-section II. RAII.

Plagiostomi with flat bodies and spout-holes; gill-slits five before the belly-fins and under the pectorals; the eyes with an adhering upper eyelid or without an eyelid, with a complete scapular ring and naso-pectoral cartilages.

Pisces cartilaginei plani et lati, *Ray*, *Syn. Pisc.* 23.

Raia, *Linn.*:

Les Raies (*Raia*), *Cuv. Rég. An.* 2 ed. ii. 373.

Platosomia, *Rafin. Anal. Nat.* 93, 1815.

Rajæ, *Müll. Abh. Akad. Berl.* 1836. *Plagiost.* 103.

Raidæ, *Gray*, *Syn. B. M.* 148, 150, 1842.

Dumeril (*Zoologie Analytique*, 101, 1806, 8vo.) divides the *Plagiostomes* thus:—

A. Branchial holes below; body flat.

1. *Torpedo*.—Tail short; body smooth, naked.
2. *Raia*.—Tail long, narrow at the base.
3. *Rhinobatus*.—Tail long, very thick at the base.

B. Branchial holes lateral; body rounded.

4. *Squatina*.—With teeth; pectoral-fins niched.
5. *Squalus*.—With teeth; pectoral-fins entire.
6. *Aodon*.—Without teeth.

Rafinesque (*Caratteri Nuovi Generi*, 1810, 8vo.) proposes and characterizes the following genera of rays (*Raia*):—

1. *Leiobatus* (*Panduratus*).—2. *Dipturus* (*Batis*).—3. *Dasyatis* (*Ujo*). = *Uroxys* (*Ugo*), *Index*.

In his *Analyse de la Nature*, 1815, he formed the Rays into a family he called *Platysomia*, containing the following genera:—
 1. *Rhinobatus*, *Dumeril*.—2. *Platopterus* = *Raia*, *Linn.*.—3. *Leiobatus*.—4. *Epinotus*.—5. *Lymnea* (afterwards changed to *Noctius*, p. 220).—6. *Torpedo*, *Dumeril*.—7. *Dipturus*.—8. *Mobula*.—9. *Ictetus*.—10. *Cephalcitherus*.—11. *Sephenia*.—12. *Megalatus*.—13. *Dasyatis*.—14. *Uroxys*.—15. *Apturus*. The names in Italic are new, but he neither gives types nor characters, so that it is impossible to understand for what they are intended.

M. De Blainville (*Bull. Soc. Phil.* 121, 1816, and *Jour. de Phys.* 262, 1816), divides the Rays (*Raia*) into eight sub-genera, thus:—
 1. *Dasybatus* aut *R. communis*.—2. *Trigonobatus* aut *R. pastinacæ*.—3. *Ætobatus* aut *R. aquilæ*.—4. *Dicerobatus* aut *R. cornutæ*.—5. *Leiobatus* aut *R. lœvis*.—6. *Narcobatus* aut *R. torpedinus*.—7. *Rhinobatus* aut *R. squali*.—8. *Pristobatus* aut *R. serratæ*.

Cuvier (*Règne Animal*, 2 ed. ii. 394, 1829) divides these animals thus:—

- I. *Pristis*.
- II. *Raja*, subdivided thus:—1. *Rhinobatus* (* *Rhynchobatus*).
** *Rhinobatus*, *Müll. & Henle*.—2. *Rhina*.—3. *Torpedo*.—4. *Raia*.—5. *Trygon*.—6. *Anacanthus*.—7. *Myliobatis*.—8. *Rhinoptera*.—9. *Cephaloptera*.

Müller and Henle (*Mag. Nat. Hist.* 89, 1838) give the following outline of their arrangement:—

- I. *PRISTIS*.—Which should be placed next the sharks, including
 1. *Pristiophorus*.—The branchial apertures on the side of the neck before the pectoral-fins, which begin with a slender base as in the sharks; the fifth branchial opening close to the fourth, as in many *Scyllia*; teeth pointed. *P. cirratus*.
 2. *Pristis*.—The teeth pavement-like; the branchial apertures on the lower surface, as in other skates,

- II. *RHINOBATIS*.—In two divisions and five genera, thus:—
 a. *First dorsal-fin opposite to the abdominal ones; caudal-fin ending in two lobes; mouth undulated*.
 1. *Rhina*, Schneid.—The nasal-valves extending to the interior corner of the nostrils; body orbicular; teeth round.
 2. *Rhynchobatis*, Müll. & Henle.—The nasal-valve does not extend to the interior or corner of the mouth; body oval, as in *Rhinobatus*; teeth broader than long, elliptical.
 b. *The two dorsal-fins placed upon the tail; extremity of the caudal-fin cut obliquely, forming only one lobe*.
 3. *Rhinobatus*.—The nasal-valve like *Rhynchobatis*.

4. *Platyrhina*, Müll. & Henle.—The nasal-valve extends beyond the inner corner of the nostril nearly to the middle of the snout, which is obtuse, and the body orbicular, approaching to *Torpedo*.

5. *Trygonorrhina*, Müll. & Henle.—Tail of *Rhinobatus*, with nose of *Trygon*.

III. The TORPEDINES contain four genera:—1. *Torpedo*.—2 *Narcine*, Müll. & Henle.—3. *Astrape*, Müll. & Henle.—4. *Temera*, Gray.

IV. The true RAJÆ contain three genera:—

1. *Raia*, Cuv.

2. *Sympterigia*, Müll. & Henle.—Tail of *Raia*; the pectoral-fins, which do not reach the keel of the snout in the true *Raja*, in this genus extend to the mesial lines, touching each other with their interior edges; the abdominal fin is not divided into two lobes by an incision as it is in *Raja*.

3. *Uraptera*, Müll. & Henle.—Differs from *Raja* only by the want of a caudal-fin.

The genus *Proplegia*, Otto, is founded on a kind of monstrosity, which is not seldom met with in skates.

V. The TRYOONS, Cuv., contain the following genera:—

1. *Trygon* (Müll. & Henle), or Sting Rays.—The teeth are elliptical; the mouth transverse. They are divided into three sub-genera, thus:—

a. *Trygon*.—Tail with a fin above and below.

b. *Hemitrygon*.—Tail with a fin on the lower side only.

c. *Himantura*.—Tail without any fin.

2. *Pteroplatea*, Müll. & Henle.—The Sting Rays with the body broader than long; the tail shorter than the body; the teeth terminating in one or three points.

3. *Teniura*, Müll. & Henle.—Tail with no upper fin; lower one extending to the tip; teeth pointed, with an elliptical base; mouth undulated; the projecting part of the upper-jaw forms a sharp edge on each side.

4. *Hypolophus*, Müll. & Henle.—Tail very high, with lower fin not reaching to the tip; teeth hexagonal, very small in the middle of the upper-jaw, and large on the sides.

5. *Urolophus*.—Tail with a fin at the tip; teeth as in *Raja*, bearing in the middle a wreath or point.

VII. *Another family* has the tail of Trygon, but wants the sting on the tail.

1. *Anacanthus*, Ehrenb.—Tail without any fin.

2. *Urogymnus*, Müll. & Henle.—Tail with a low fin on the upper side, not reaching to the tip.

VII. The *MYLIOBATIS*, Cuv., form a family with large teeth, arranged as in a pavement or like mosaic-work ; the pectoral-fins are separated from the head ; the tail has a fin in its root, and a spine behind the fin.

1. *Myliobatis*.—The teeth large in the middle, and small on the sides of the jaw ; the nasal-valve has a smooth edge ; the fins of the head united.

2. *Aetobatis*, Müll. & Henle.—The fins of the head united by the lower-jaw project far beyond the upper one ; only one row of teeth in each jaw ; the nasal-valve deeply cut.

3. *Rhinoptera*, Kühl.—The fin on the head with a central excision ; teeth hexagonal ; plates large in the middle of the jaws, diminishing in size as they reach the sides.

VIII. The *CEPHALOPTERÆ* contain two genera :—

1. *Cephaloptera*, Dum.—Mouth on the under side of the body ; teeth small and pointed, or like tubercles in both jaws.

2. *Ceratoptera*, Müll. & Henle.—The mouth on the top of the head ; the teeth, which are distinct only in the lower-jaw, are little scales or leaves.

M. Charles Buonaparte (*Selachorum Tabula Analytica*, 1838, 4to) proposed to divide the family Raidæ into the following tribes and genera :—

I. Raidæ veri.—*Body ending abruptly in a slender tail.*

1. *Cephalopterini*.—*Head truncate, two-horned ; teeth minute, placed in series ; pectoral-fins very broad ; tail very slender, long, spine-bearing.*—Cephalopterina.

1. *CERALOPTERA*.—Mouth superior ; teeth small, scale-like.

2. *CEPHALOPTERA*.—Mouth inferior ; teeth small, acute, or tuberculate in both jaws.

2. *Myliobatini*.—*Head ovate, produced : teeth large, flattened, tessellated ; pectoral-fins very broad ; tail very slender, spine-bearing.*—Myliobatina.

3. RHINOPTERA.—Head naked; teeth six-sided; ventral larger.
4. AELOBATES.—Head entire; mandibles produced beyond the maxilla; nasal-valve deeply cut; teeth in one series.
5. MYLIOBATES.—Head entire; nasal-valve truncated; teeth central, large; lateral small, in many series.
3. *Head enclosed by the pectoral-fins; teeth small, in quincuncial order.*—Raiana.
- A. Acanthini.—*Tail slender, finless and armless.*
6. UROGYMNUS.—Lower caudal-fin narrow.
7. ANACANTHUS.—Tail finless.
- B. Trygonini.—*Tail slender, with a strong doubly serrated spine.*
8. UROLOPHUS.—Tail-fin terminal; teeth tesselliform.
9. HYPOLOPHUS.—Teeth hexagonal, in centre of maxilla very small, at the sides larger; lower caudal-fin very broad.
10. TENIURA.—Teeth acute, base elliptical; mouth waved; margin of the jaws exerted, each cultriform; lower caudal-fin sub-apical; upper none.
11. PTEROPLATEA.—Teeth one or three, cuspid; body broader than long; tail shorter than the body.
12. HIMANTURA.—Teeth elliptical, transversely keeled; dorsal-fins none.
13. HEMITRYGON.—Teeth elliptical, transversely keeled; upper dorsal-fins none.
14. TRYGON.—Teeth elliptical, transversely keeled; upper and lower dorsal-fins distinct.
- C. Raini.—*Tail elongate, with two dorsals; body rhomboidal.*
15. URAPTERA.—Caudal none; pectoral-fins hardly produced beyond the middle of the beak; ventrals two-lobed.
16. SYMPTERYGIA.—Caudal distinct; pectoral-fins produced beyond the middle of the beak, attaining the ———; ventrals one-lobed.
17. RAIA.—Caudal-fin distinct; pectoral-fin hardly produced beyond the middle of the beak; ventrals two-lobed; beak acute.

17*. **BATIS.**—Caudal-fin distinct; pectoral-fin hardly produced beyond the middle of the beak; ventrals two-lobed; beak none; tail with electric organs.

II. Raidæ anomalæ.—*Body gradually tapering to the tail.*

4. **Torpedini.**—*Body orbicular, smooth; head rounded; tail depressed; moderately long.*

18. **TEMERA.**—Dorsals none; body rounded; spiracles near the eyes; mouth slender; internal labial-valves to both jaws.

19. **ASTRAPE.**—Dorsal one; body rounded; spiracles near the eyes; mouth slender; internal labial-valves to both jaws.

20. **NARCINE.**—Dorsals two; body roundish or angular; spiracles near the eyes; mouth slender; internal labial-valves in only one jaw; teeth extended beyond the edge of the lips.

21. **TORPEDO.**—Dorsals two; body rounded, truncated in front; spiracles far from the eyes; mouth larger.

5. **Rhinobatina.**—*Body rhomboidal, elongated, beaked; tail thick, fleshy; dorsals two, far apart; caudal apical.*

* *Dorsals both opposite to the ventrals.*

22. **TRYGONORHINA.**—Body rhomboidal; beak triangular; caudal obliquely truncated, one-lobed.

23. **PLATYRHINA.**—Body orbicular; beak scarcely produced; caudal obliquely truncated, one-lobed; nasal-valve elongate.

24. **RHINOBATUS.**—Body oval; caudal obliquely truncated, one-lobed; nasal-valve scarcely produced.

** *Front dorsal opposite to the ventral.*

25. **RHYNCHOBATUS.**—Body oval; caudal two-lobed; nasal-valves scarcely produced to the inner angle; mouth waved; teeth broad, elliptical.

26. **RHINA.**—Body orbicular; caudal two-lobed; nasal-valves produced to the inner angles; mouth waved; teeth rounded.

6. **Pristidini.**—*Body elongate, depressed in front; beak very long, flat, bony, spined on each side.*

27. **PRISTIS.**—Teeth granular; gill-slits inferior.

28. **PRISTIDOPHORUS.**—Teeth acute; gill-slits lateral; nose with free beards; eyebrows free.

Mr. Swainson (*Cabinet Cyclopædia*, ii. 319, 1839) divides these animals thus:—

I. PRISTINÆ.—1. Pristis.

II. RADÆ.

Sub-fam. 1. *Trygoninæ* (String Rays).—1. Trygon.—2. Pastinaca.—3. Pteroplatea.—4. Raja.—5. Anacanthus.

Sub-fam. 2. *Pterocephalinæ* (Eagle Rays).—6. Myliobatis.—7. Rhinoptera.—8. Cephaloptera.—9. $\ddot{\text{A}}$ etobatis.—10. Pterocephala, *Swains.* = Cephaloptera, *Dum.*

Sub-fam. 3. *Torpedinæ* (Torpedo Rays).—11. Torpedo.—12. Temera.

Sub-fam. 4. *Squatinae*.—13. Squatina.

Sub-fam. 5. *Rhinobatinae*.—14. Rhinobates.—15. Rhina.

Fam. 4. PRISTISIDÆ.

The form of the body approaches most nearly to those sharks which have the breast-fin distinctly set off from the head, and not reaching to the belly-fins. The snout is prolonged into a long saw, which bears teeth implanted on the lateral edge. The first back-fin stands close behind, or some distance above the belly-fins. The cuticular keel of the tail is not continued to the sides of the tail-fin. The skin is sleek, clothed with very small, flat, roundish, or six-cornered scales, planted like paving stones.

Jour. de Phys. 262, 1816.

Pristine, *Swains. Cab. Cycl.* ii. 219, 1839.

1. PRISTIOPHORUS.

The snout is greatly lengthened, and is beset on both sides with longer and shorter hooked spines, so that it resembles the saw of Pristis; the prickles are only attached to the skin, not implanted.

A long barbel on the under surface of the snout. Mouth transverse. Teeth short prickles on a roundish base, resembling the teeth of the male rays, pavement-like. The first back-fin between the breast-fin and belly-fins. A keel on the side of the snout. The fourth and fifth gill-openings approximated to each other.

f. Rostrum. New Holland. Presented by General Hardwicke.

g. Rostrum.

2. PRISTIS.

The teeth of the saw in all respects alike, flat and cutting, pretty straight, directed outwards; they begin just before the nostrils. Nostrils far before the mouth. A long and three-cornered flap on the upper border: on the under border merely a ledge-like flap. Corner cartilages of the mouth wanting. Mouth cross and straight. Velum on the upper-jaw, with a straight edge. Teeth flat, pavement-like. The upper eyelid without projection. Spout-holes large, divided from the eyes by a broad bridge. First back-fin some way above the belly-fins. Both back-fins equally large. The tail-fin short, with or without an under lobe.

Body much depressed, broad, abruptly ending in a slender tail.

Raja, Cuv. Rég. An. 2 ed. ii. 395.

Squatinaoraiæ, part, *Müll. & Henle, Plag.*

Torpedines, Müll. & Henle, Plag.

Raidæ, Swains. Cab. Cycl. 319, 1837.

1. The fore part of the body forms, through the conjunction of the breast-fins with the snout, a disk. The breast-fins four-cornered separated from the head portion of the disk by a notch, not reaching the belly-fins. First back-fins above the belly-fins. Tail-fin two-lobed, with the upper lobe a little larger. The side keels are continued along the tail-fin. Mouth undulated. Three protuberances of the under-jaw correspond with an equal number of depressions in the upper-jaw. The teeth are longer on the summit of the undulations. Nostrils slit lengthways near the mouth, with a flap above and below. The upper one stands out in two parts, one outer, more slender, and longer rounded lobe, and one inner shorter and broader, which are separated from one another by a notch more or less deep.—RHINÆ.

Rhinæ, Müll. & Henle, Plag. 110.

Rhinobatis (§ a), Müll. & Henle, Mag. Nat. Hist. ii. 89, 1838.

Rhinobatinæ, part, Swains. Cab. Cycl. 317, 1837.

I. RHINA.

Snout rounded before. Spout-holes close behind the eyes. The upper and under nasal-flaps reach up to the inner corner of the nostril. The undulation of the mouth very bold. The teeth almost round, not broader than long.

- b. Stuffed. Young. China. Presented by J. R. Reeves, Esq.
- c. Teeth. Adult. Penang. Presented by Dr. Theodore Cantor.

2. RHYNCHOBATUS.

Snout elongated, pointed with a keel in the middle, which tapers gently forward. The space between the keel and the inner edge of the breast-fin is composed of skin. Spout-holes immediately behind the eyes. Upper eyelid with a simple projection. The upper and under nasal-flaps do not reach up to the inner corner of the nostril, but only up to half of them; on the outside of the same on the upper edge of the nostril a narrower ledge. The undulations of the mouth feeble, particularly the side ones. Teeth broader than long, with a transverse wreath. A transverse arched row of pores on the ventral side of the scapular chain.

2. The belly-fins begin immediately behind the attachment of the breast-fins; these pass imperceptibly into the snout. Both back-fins upon the hinder part of the tail of equal size. The belly-fins are four-cornered, longer than broad, rounded before, pointed behind. Tail-fin without an under lobe. The keels of the tail begin behind the belly-fins, and pass on converging to the under edge of the tail-fin. Mouth straight, transverse or gently arched forwards. Teeth pavement-like, flat, with a more or less sharp cross ledge. Spout-holes close behind the eyes. A row of pores beneath the scapular girdle.—RHINOBATINA.

3. RHINOBATUS.

The skull is prolonged forwards into a keel; the interspaces betwixt it and the inner borders of the breast-fins are cuticular. Snout more or less sharp. The upper nasal-flap consists, as in Rhinobatus, of an outer, more slender and longer, and an inner, broader and shorter lappet. The outer lappet is slender, but reaches with its rounded point up to the under margin of the nostril, and is not sharply divided from the inner lappet; the outer lappet is nearly in the middle of the upper edge of the nostril; the inner one extends more or less widely inwards. Spout-holes and eyes encompassed by a common wall of skin. The upper eyelid has a middle

adnate projection; the upper velum with its indented edge is curved inwards in the middle. The fore lateral edge of the disk is twice gently incurved.

2. The back is rounded, naked, without scales or prickles. The belly-fins stand directly behind the pectorals. The tail short, fleshy, depressed at the base, cylindrical at the end; with two, one, or no back-fin, and a terminal three-cornered tail-fin. A more or less long cuticular keel of skin on each side of the tail. The upper eyelid adnate without a projection. The nasal flaps on both sides are attached to a four-sided lobe with a free edge, which leaves only the outer angle of the nostril ungirt, and is connected by a band to the upper lip. Teeth pointed or flat. An electrical apparatus of upright little pillars, whose flat ends shine through the skin of the back and belly between the head, gills and inner edge of the breast fins.—**TORPEDININA.**

1. TORPEDO.

Disk rounded, truncated before, straight or somewhat incurved. Mouth crescentic, the teeth are pointed, attached to a jaw cartilage and not extending outwards beyond the margin of the mouth. Their base is longest transversely. The bridle of the nasal-flap springs from the middle of the edge of the upper lip. The eyes are remote from the spout-holes. A cornice of cuticular teeth on the brink of the spout-hole. The belly-fins rounded. Two back-fins, the first larger than the second; and the first above the hinder part of the belly-fins, the second in the middle between the first and tail-fin. Tail-fin three-cornered, with a straight hinder edge.

2. NARCINE.

Disk roundish, elliptical or angular, rounded before, provided with a broad keel. Mouth small, protruding forwards, surrounded by a circular fold of skin, which passes above into the bridle of the nasal flap. Nasal flat straight, with a middle projection, sometimes lengthened a little sideways, so as to become three-tipped. A labial cartilage above and below. Teeth in quincuncial order, with a middle point; and arranged on the border of the jaw so as to form outwards an elliptical plate. The skin which supports them is not adnate to the jaw, but is capable of sliding upon it. A velum behind the upper jaw. Tail longer than the disk. The first back-fin behind the belly-fin, smaller than the second. Spout-holes close behind the eyes. Margin of the spout-holes without teeth.

4. The breast-fins cohere jointly to the snout, and their attachments reach to the belly-fins. The disk is broad and rhomboidal. The tail is thinner in proportion to the body than the foregoing, the two back-fins are removed quite towards the point; the terminal-fin exists merely as a ledge at the end of the tail, or is entirely wanting. The tail is depressed, and has a keel of skin on each side throughout its whole length. The upper eyelid adnate. Eyes and spout-holes separated only by a slender bridge. Spout-holes with smooth edges. The four-sided lappet formed out of the pouting nasal-flap is adnate by its whole under edge to the dental margin of the upper jaw; only a small part of the under edge remains free on each side, which passes into the lateral margin by a rounded angle, and is more or less deeply fringed. On the outer termination of the nostril a small cuticular ledge. Mouth arched forwards, without labial cartilages, teeth pointed or pavement-like, flat, in the males pointed in spawning time. Velum in the upper jaw only, notched in the middle, with a fringed edge. The skin is either smooth, or clothed with small, curved prickles, more or less crowded, and directed backwards; among which there arise also bigger spines; the larger spines are most abundant on the ridge of the back and tail, then upon the ridge of the eyes, the keel of the snout, and upon the fore-edge of the breast-fin before the outer corner. In the males, in the spawning season, two sharp spines develope themselves on the fore-edge of the breast-fins. They are the only spawning Rays.—RAJA.

Raiæ, *Müll. & Henle, Mag. Nat. Hist.* 1838, 90. *Plagiost.* 132.

Raidæ, *Trigoninæ* part, *Swains. Cab. Cycl.* ii. 319.

1. RAJA.

The snout is prolonged into a keel, the inner edges of the breast-fins are parallel to the keel. The interspace between the keel and the inner edges of the breast-fins is cuticular. The belly-fins divide

into an inner and outer lobe by a deep notch on the hinder edge. The outer lobe is thicker than the inner one, but more slender. The tail has a low terminal fin, more conspicuous on the upper side than on the under one; it is for the most part interrupted at the point.

Uraptera Agassizii, Müll. & Henle, Plag. 155.

HAB.—Brazil.

5. The fore points of the breast-fins unite together before the head, and form the fore point of the disk. The upper eyelid is adnate. The two inner nasal-flaps are protuberant, and have a common, free, shortly fringed under border, which is fastened in the middle only by a slender bridle to the upper-jaw. The inner corners of the nostril are closely approximated to each other under the nasal-flap. Outer nasal-flap wanting. The skull is higher than in the Rays. The spout-holes are large, and close behind the eyes. Teeth transversely elliptical, with a cross roll, which is blunt or sharp, or divided into points. Belly-fins simple. The tail is thin, often much pointed and whip-like, without lateral cuticular keels: it is naked, or bears one or more long spines with barbs; it has no fin, whether it be a high or low, ledge-like fin. Skin smooth, or set with tubercles or prickles. Such spines as precede the breast-fins of the male Rays, are not extant here.—TRIGONINA.

B. *The tail with one or more spines and no fin, or merely a vertical, cuticular hem without rays.*—*Pastinacæ.*

Trygon (true), Müll. & Henle, Mag. Nat. Hist. ii. 90, 1838.

Pastinaceæ, Müll. & Henle, Plag. 158.

Trygon, Adamson. Cuv. Rég. An. 2 ed. ii. 399.

Trigoninæ, p., Swains. Cab. Cycl. ii. 319.

Pastinacas, "of the Ancients."

1. **TRYGON.**

The disk is oval or rhomboidal. The tail is of the same length or longer than the body, without a hem, or with hems which do not reach to the other point. The mouth is slightly arched. The teeth have a point or a cross-roll in the middle, which is sometimes uneven, and before and behind the same there are more or less evident transverse furrows, which become more conspicuous on the side of the tooth. The whole upper surface is more or less wrinkled

the velum of the upper-jaw has a straight, deeply fringed border, behind it a second deeply excavated velum. In the under-jaw generally behind the teeth, a papilla.

b, c. Stuffed. (Var.) Madras. Presented by T. C. Jerdon, Esq.

2. TRYGON GERRARDI.

Body rhomboidal, snout projecting, attenuated. Pectoral-fins rounded, subangular, the transverse diameter, rather greater than the distance between the tip of the snout, and the end of the anal rays; upper surface quite smooth, with the exception of three very small, and one larger, oblong, osseous, tubercles, in the centre of the dorsal line. Tail smooth, round, tapering to the end in a very fine point, about four times the length of the body, with a finely serrated spine, which is situated about three inches from its insertion. The general colour in the stuffed specimen, is a uniform pale brown with about sixty-five distinct white rings upon the tail.

	in.
Length from tip of snout to extremity of caudal	34
Length from tip of snout to base of caudal	7
Length from tip of snout to anterior edge of orbit	2
Length from tip of snout to large osseous tubercle	4
Breadth across the fins	$8\frac{1}{4}$

HAB.—North America.

4. HYPOLOPHUS.

Body formed as in Trygon. The tail with a high inferior fin, which as in Trygon does not reach the end of the tail. The upper-fin wanting. It differs from Trygon principally in the peculiar form of the mouth and the teeth. The under-jaw projects forward in the middle, and on each side of the point there is a dish-shaped concavity. The edge of the upper-jaw is much deeper in the middle; at the point of the under-jaw it bulges, and on the side is very convex. The teeth are paved, hexagonal, broader than long; in the upper-jaw in the middle small, at the side large; in the under-jaw seemingly equally large, but towards the outermost smaller.

5. TÆNIURA.

Disk roundish. Tail not much longer than the body, depressed before the spine, compressed behind the same, with a high under-fin, which begins behind the spine and reaches quite to the end. On the upper side of the tail there is often a shorter or longer, low cuticular hem up to the point of the tail. The spine shortly before the middle of the tail. Nostrils approximated to each other as in Trygon. Teeth flat, with a cross-roll or pointed. Mouth straight or undulated. The upper velum wholly straight, the under one without a papilla.

HAB.—India, Red Sea.

6. The roots of the breast-fins loose; their rays wholly on the side of the head, but the rays are again developed before the head, and form a kind of head-fin which constitutes the point of the disk. The head thereby projects from the disk up to the region of the gills; and it is more boldly arched than in the other families. The nasal-flaps of both sides are tied to a four-sided lobe, which is fringed on its under border, and reaches to the mouth. The nostrils stand close together in the middle, and are separated only by a thin fillet which passes over the dorsal surface of the nasal-flap from both angles of the mouth, and is gently pointed in the middle. Mouth transverse. The dental surface of the jaws extends far into the cavity of the mouth. Teeth large, mosaic-like, even pavement-like. The upper velum springs from the gums and cheeks, is very long, with a convex border, and is fringed in the middle. The under velum lies close to the dental border. Only one papilla behind the same. Eyes and spout-holes in the lateral edges of the skull. Spout-holes separated from the eyes by a broad bridge. Eyelids wanting. Tail long, whip-formed, with a back-fin on its root and a spine behind the same.—*MYLIOBATINA*.

Pterocephalinæ, *Swains. Cab. Cycl.* ii. 319.

1. *MYLIOBATIS.*

Snout pointed through the united foremost rays of the breast-fin. The edge of the conjoined nasal-flaps is straight. Mouth transverse. Both jaws with a straight border. Teeth six-cornered,

behind one another, and forming in the middle a row, conformable with the border, transverse crowns. On the sides smaller four-cornered, pavement-like pieces, which catch in the spaces of the middle crowns. The dental surface of the upper-jaw is convex from before, backwards and from side to side; that of the under-jaw flat, scarcely concave, neither occupy the whole breadth of the jaw.

HAB.—Canaries.

2. *AETOBATIS.*

The snout pointed, undivided. The under edge of the conjoined nasal-flaps deeply notched. The bridle of the nasal-flap is beset with papillæ, which range themselves transversely before the upper-jaw. The upper-jaw has a straight edge. The crowns of the teeth form a row on each jaw, and in the under-jaw they are arched parallel to the edge of the last ones. The crowns of the teeth do not occupy the entire breadth of the jaw.

3. RHINOPTERA.

Snout deeply divided by a mesial notch. The cranial-fin does not lie in the same plane with the breast-fin, but more beneath, and it is joined to the under root of the breast-fin. Moreover, the rays of the cranial-fin begin wider behind than the rays of the breast-fin end. The under edge of the nasal-flap straight; its outer angle pointed. On each side of their dorsal surface is a longitudinal fold. The borders of both jaws straight. The teeth stand in from three to five rows of broad six-cornered crowns, near to one another, and diminishing in size towards the sides. Moreover, on the outside is a smaller row, which is not broader than long: they occupy the whole breadth of the jaw.

Doubtful Species.

1. *Myliobatis Tremenvillii*, Lesueur, Journ. Acad. Phil. iv. 112.
2. *Myliobatis Lacép.* i. t. 6, f. 3.

7. The fore edge of the head straight, transverse. The cranial-fins spring from the under edge of the root of the breast-fins, and stand like ears on the sides of the head. The outer edge of the head-fin is curled upwards and inwards. The mouth before or beneath, very broad, reaches nearly to the ears. The under edge of the conjoined nasal-flaps straight. The nostrils wide, outwards, near the head-fins. Teeth very small. The eyes lie on the side of the skull, and the fore edge of the breast-fins begins behind them. The spout-holes, situated on the dorsal surface of the body, are separated from the eyes by a wide interspace. The tail is as long or longer than the body, and bears a back-fin behind which there is a spine.—CEPHALOPTERA.

Cephalopteræ, *Müll. & Henle*, *Mag. Nat. Hist.* ii. 91, 1838.
Plagiost. 184.

Obs.—In *C. Olfersii* the tail is short, and there is no spine behind the back-fin, nor is there any spine in Müller & Henle's figure of Cephaloptera.

1. CEPHALOPTERA.

Mouth on the ventral surface. Teeth in both jaws small, flat, pavement-like, of diverse forms. The rays of the breast-fin extend close up to the skull. The fore edge of the breast-fin describes a convex curve from the skull, behind the eyes, and up to the point.

2. CERATOPTERA.

Mouth at the end of the snout: the border of the upper-jaw concave: the under-jaw convex forwards. Teeth wanting in the upper-jaw: in the under-jaw they are small scale-like leaflets. The rays of the breast-fins do not go up to the skull, and a considerable part of the root of these fins rests between the head-fin and root-fin, without rays. The fore edge of the fin is incurved, so that in the beginning it lies on a line with the lateral edge of the skull, and seems to spread itself outwards, first at the third gill-opening.

Petromyzidae, *Gray, Syn. B. M.* 1842, 148, 150.

Rafinesque names, but does not characterize, the genera *Lampreda* and *Pricus*, (*Anal. Nat.* 94, 1815).

Müller (*Abhandl. Akad. Berlin*) divided the genera thus:—

1. *Pteromyzon*, with visible teeth.
2. *Ammocetes*, without visible teeth.

SYNOPSIS OF GENERA.

a. Petromyzonina.—*Teeth distinct; eyes visible.*

1. PETROMYZON.—Upper inner teeth two, conical, close together; lower single, crescent-shaped; labial teeth numerous, conical; lingual teeth two, pinnate, t. 1, f. 1.
2. LAMPETRA.—Upper and lower teeth transverse, crescent-shaped; labial teeth in two submarginal rows; inner lateral teeth larger, two or three-lobed, lingual teeth pectinate, t: 1, f. 2.
3. GEOTRIA.—Upper and lower teeth transverse, crescent-shaped; upper lobed; labial teeth numerous, distant, acute, innermost largest; lingual teeth elongate, conical, arched, t. 1, f. 3.
4. VELASIA.—Upper and lower teeth transverse, crescent-shaped; upper two-lobed; labial teeth numerous, crowded, truncate; innermost largest; lingual teeth elongate, arched.
5. CARAGOLA.—Upper internal teeth two, far apart, three-lobed; lower crescent-shaped, nine-lobed; labial teeth transverse, band-like, four tubercles; lingual teeth flattened, t. 1, f. 5.
6. MORDACIA.—Upper inner teeth two; lateral three-lobed; lower nine, conical, in an arched series; labial teeth conical, in a single sub-marginal series; lingual teeth elongate, conical, arched, t. 1, f. 6.

b. Ammocetina.—*Teeth none; eyes hidden.*

7. AMMOCETES.

a. Petromyzonina.—*Teeth distinct.*

1. PETROMYZON.

Upper inner teeth two, triangular, close together. Lower inner tooth single, large, crescent-shaped, many-toothed. Labial teeth conical, acute, numerous, in diverging, arched series; the inner one largest, and gradually becoming smaller near the edge. Tongue with two compressed, pectinated teeth above, and a broad, lunate, dentated tooth beneath, which is strongly bent up between the upper teeth in the centre, t. 1, f. 1.

 1. *Supp. to Petromyzon. Shaw, Gen. Zool.* v. pt. 2, p. 261,
 1804.

Petromyzon planeri, var. *Cuv. Règ. An.* ii. 118.

HAB.—Europe, Seine.

A very doubtful species; Cuvier says it is the same as the former.

4. LAMPETRA LAMOTTENII. American Lampern.

Petromyzon Lamottenii, *Lesueur, Hist. N. A. De Kay, Nat. Hist. of New York*, 382, pl. 79, f. 249 (mouth), pt. 1. *Zool. 1842.*

HAB.—N. America, New York.

a. ? In spirits. North America. From the Paris Museum. *P. fluviatilis, Mus. Paris.*

3. GEOTRIA.

Upper internal tooth large, transverse, crescent-like, divided into four lobes; the two inner lobes small, acute; outer truncated. The lower internal tooth transverse, narrow, slightly sinuous. The labial teeth numerous, far apart, conical, acute, in arched series, diverging from the throat; the innermost one larger, rest small; the innermost one of the lower part on each side, small, elongate, transverse, with two small, rudimentary tubercles. Tongue with two elongate, conical, arched teeth, with a triangular plate on the lower side of the base. Throat with a very large dilatable pouch, t. 1, f. 3. Dorsal-fins two, far apart. Mouth very large, surrounded with rather large, transverse, torn leaves.

This genus chiefly differs from *Velasia* in the rudimentary state of the lower internal tooth, and in the form of the labial teeth, and in the large size of the oral disk, and the extraordinary development of the throat-pouch, which is found in a rudimentary state in the *Petromyzon marinus*. This development of the pouch, is perhaps to adapt the animal to the long drought of the Australian rivers.

1. GEOTRIA AUSTRALIS. Pouched Lamprey. Tab. 2.

Geotria australis, *Gray, Proc. Zool. Soc. 1851.*

HAB.—South Australia. Fresh-water.

a. In spirits. River Inkar pinki, South Australia. Presented by R. A. Pain, Esq.

4. VELASIA.

Upper internal teeth large, transverse, crescent-like, divided into four flat, elongated lobes; the outer lobes largest. The lower internal teeth large, transverse, crescent-like, convex, denticulated on the edge. The labial teeth very numerous, truncated, in crowded, arched series, diverging from the throat; the inner ones large, and gradually diminishing in size to the edge. Tongue with two very large, long, curved teeth, with a triangular plate beneath at their base, t. 1, f. 4. Dorsal-fins two, far apart. Mouth moderate, edged with transverse foliations.

Velasia, Gray, Proc. Zool. Soc. 1851.

1. VELASIA CHILENSIS. Chilian Lampern.

HAB.—Chili. In fresh-water.

a. In spirits. Chili. Fresh-water.

5. CARAGOLA.

Upper inner teeth, two, large, separate, lateral, submarginal, each with three acute tubercles. Lower inner teeth large, crescent-shaped, nine-lobed; the central and two lateral lobes on each side larger. The labial teeth in a subcircular, submarginal series, large, transverse, band-like, with three or four tubercles. Tongue with two flattened teeth, and a triangular, transverse plate below, with an acute process between the teeth on the upper edge, t. 1, f. 5. Dorsal-fins two, far apart.

Caragola, Gray, Proc. Zool. Soc. 1851.

1. CARAGOLA LAPICIDA. Caragol.

Silvery.

HAB.—West Coast of America.

a. In spirits. Bay of Valparaiso.

6. MORDACIA.

Upper inner teeth two, separate, lateral, subtrigonal, each with three tubercles. The lower nine, conical, acute, in an arched series; the five central smaller. Labial teeth small, conical, in a

single, circular, submarginal series, with a single, additional, odd tooth in the centre above. Tongue with two conical, arched teeth.

PRINTED IN U.S.A. BY THE AMERICAN BANK NOTE COMPANY

L I S T

OF THE

OSTEOLOGICAL SPECIMENS

IN

THE COLLECTION

OF THE

BRITISH MUSEUM.

PRINTED BY ORDER OF THE TRUSTEES.
LONDON, 1847.

LONDON:

PRINTED BY E. NEWMAN, DEVONSHIRE STREET,
BISHOPSGATE

P R E F A C E .

THE Osteological specimens which were formerly contained in the British Museum were transferred to the College of Surgeons shortly after the Government purchased the Hunterian Museum and the establishment of that collection.

My predecessor, friend, and first teacher in Zoology, Dr. W. E. Leach, collected and exhibited the skulls, sterna, and tracheæ of some British Mammalia and Birds, and also the skulls of a few exotic Bats, which he described in the 'Linnean Transactions,' for the purpose of showing the characters of the genera and species. Since he left the Museum, a few skeletons and skulls, which have been kindly presented by various donors, have been added to the collection. About two years ago, when Mr. B. H. Hodgson returned from Nepal with his very extensive collection of Indian animals, he offered them to the Museum, on condition that the Osteological specimens should be received with the skins, &c.

•

These specimens, with the others before referred to, form the nucleus of the present collection, which have been increased by,

A large collection of the skulls and sterna of British Mammalia and Birds, presented by John Ray, Esq., of Epping, and other British specimens, presented by Lord Willoughby D'Eresby, H. Doubleday, Esq., Rev. C. Bury, J. S. Bowerbank, Esq., J. P. Selby, Esq., Mr. Baker, and Mr. E. Gerrard.

The skeleton of *Bison Ursus*, from Lithuania, presented by the Emperor of Russia.

The skulls and skeletons of animals from Northern Europe and North America, presented by the Earl of Selkirk, Sir Thomas Maryon Wilson, Bart., the Hudson's Bay Company, R. King, Esq., J. Gould, Esq., Capt. Sir Edward Belcher, R.N., C. Pentland, Esq., Capt. Sir John Franklin, R.N., Edward Cayley, Esq.

Some skulls from Xanthus, presented by Sir Charles Fel lowes, and G. Scharf, Jun., Esq.

Skulls and skeletons of African animals, presented by the Earl of Derby, J. Burton, Esq., Dr. Christie, Dr. John Lee, Sir J. Gardiner Wilkinson, Dr. W. Burchell, Captain Clapperton, R.N., Major Denham, and T. Thompson, Esq.

Skeletons and skulls of South American animals, presented by Reginald Graham, Esq., J. P. G. Smith, Esq., J. Wright, Esq., and J. Mijers, Esq.

Skeletons and skulls of Seals and Cetacea, collected during the Antarctic Expedition, presented by the Lords of the

Admiralty, Captain Sir James Ross, R.N., Lieutenant Alexander Smith, R.N.

Skeletons and skulls from India, China, and Borneo, presented by B. H. Hodgson, Esq., General T. Hardwicke, Walter Elliott, Esq., Gibson Rowe, Esq., Jacob Bell, Esq., the East India Company, Major Honeywood, John Reeves, Esq., J. Russell Reeves, Esq., Col. Sykes, H. Lacon, Esq., A. Charlton, Esq., S. Sotheby, Esq., T. Ingall, Esq., R. Ewing, Esq., H. Falconer, M.D.

Skulls and skeletons from Australia, New Zealand, &c., presented by the Earl of Derby, Dr. Frederick Knox, Capt. Stokes, R.N., Capt. P. P. King, R.N., Capt. W. Chambers, R.N., J. B. Jukes, Esq., Allan Cunningham, Esq., Capt. George Grey, Sir John Richardson, M.D. and C. D. Fortnum, Esq.

Specimens have also been purchased from the Leyden Museum of the animals found in the Dutch Colonial possessions, as Java, Amboina, &c.

From the Stockholm Museum, of the animals collected by Dr. Wahlberg at the Cape of Good Hope.

From Mr. Gould and Mr. Bridges, of the specimens collected by them during their visits to Australia, Chili, and Bolivia.

From Dr. Moller and Professor Eschricht and the Copenhagen Museum, of Seals and Cetacea from Greenland.

The collection has been made primarily with the view of illustrating the characters of the orders, genera, and species of the specimens of the recent vertebrated animals contained in the British Museum collection, and with this

view they are arranged in the same systematic order; and secondly, to furnish the palæontologist with the means of determining the systematic position of the genera and species of extinct Vertebrata.

For the purpose of showing the disposition of the bones in the different classes and orders, a few examples of each have been mounted, and for the purpose of illustrating the genera and specimens in the collection, and facilitating their comparison, a series of the skulls have been arranged on separate tablets. The bones of the greater number of the skeletons are kept separate in boxes, to admit of the various bones of the different recent species being compared together, and with their fossil analogues, which cannot so easily and completely be accomplished when they are mounted, especially if the leg-bones are pierced, as is the common English practice, for part of the articulating surfaces must then be removed to make room for the iron supports.

To prevent the bones being mis-matched, each bone of each specimen is marked with the number of the species and specimen used in the Catalogue.

The greater part of the specimens have been cleaned and mounted by Mr. Edward Gerrard, who has devoted much care to the preservation of the more minute parts.

The great value of a collection of this kind depending on the accuracy with which the specimens are determined, every attention has been given to this subject; and it is hoped that in this particular, the present collection has many advantages over those not so lately formed, for the greater part of the specimens presented have been received direct from the person who prepared them, and often when the bones, part of the skull, and skins were still adhering

together, and those purchased have been almost all procured from collections received direct from their native habitats, and from persons whose authority gives additional importance to the specimens; and a large proportion of the skulls, &c. have been extracted from the skins which form part of the zoological series in the Museum collection; these skulls are marked with an asterisk (*), and the skulls and specimens are marked with the same MS. number.

To give some idea of the extent of the collection, the following table, exhibiting the number of specimens and species contained in different European collections is added.

	Mammalia.		Birds.		Reptiles.		Fishes.	
	Specimens.	Species.	Specimens.	Species.	Specimens.	Species.	Specimens.	Species.
British Museum	1766	742	961	523	309	137	59	33
Paris Collection	3178	636	1358	493	572	261	649	742
Leyden Collection	1000		500		200		300	
Coll. of Surgeons	1055	249	247	158	157	49	336	82

The number given for the College of Surgeons is taken from the Catalogue published in 1831; of the Paris Museum from the account of the collection published in the 'Nouvelles Annales du Museum' for 1833; and of the Leyden collection from notes communicated by M. Schlegel in 1836. The last published estimate of each collection.

The Museum is most imperfect as regards fishes and reptiles, but it is to be hoped this will shortly be remedied.

JOHN EDWARD GRAY.

British Museum,
Feb. 12th, 1847.

LIST

OF

OSTEOLOGICAL SPECIMENS.

Class. MAMMALIA.

Order I. PRIMATES.

Fam. 1. HOMINIDÆ.

Homo, Linn.

- MAN. *Homo sapiens*, Linn. S. N. i. 28.
Skulls of Hillmen, probably Cisheimayan or Thibetan, procured at Symbunath, in the valley of Nepal.
Skulls of Hillmen, probably of the Newar tribe, procured at Sankhmul, in the valley of Nepal.
Skull of a man and woman of the tribe of Newars, called Jyapoo, from Nepal proper.
Skulls of men of the tribe of Newar called Bandya, executed for forgery in Nepal proper.
Skulls of Hillmen, tribe unknown, from the banks of the Bagnath, in Nepal proper.
Skulls of man and boy, natives of the plains, procured on the Ganges.
Skull. Australia. Presented by Captain Stokes, R.N.
Skull. Greenland.
Skull. Ceylon. Presented by Dr. Davy.
Skull (Negro). Africa.

Fam. 2. SIMIADÆ.

TROGLODYTES, *Geoff.*

The CHIMPANZEE. *Troglodytes niger.*
Skeleton. Western Africa.

SIMIA, *Linn.*

The OURAN OUTAN. *Simia Satyrus.*
Skeleton, adult. Borneo. Presented by H. Brooks, Esq.
Skeleton, adult. Borneo. Presented by H. Brooks, Esq.
Skeleton, adult. Borneo. Presented by H. Brooks, Esq.
Skull, adult.
Skull, young. Borneo.
Skull, young. Borneo.

SIAMANGA, *Gray.*

The SIAMANG. *Siamanga Syndactyla.*
Skeleton. Sumatra. Presented by G. Bennett, Esq.

HYLOBATES, *Illiger.*

The SILVERY GIBBON, or Wōu-Wou. *Hylobates leuciscus.*
Skull. Java.

NASALIS, *Geoff.*

The PROBOSCIS MONKEY. *Nasalis larvatus.*
Skull. Borneo. Presented by Captain Sir Edward Belcher, R.N.

PRESBYTES, *Eschsch.*

The CHINGKAU. *Presbytes cristata.*
Skull. Java.

DUSKY PRESBYTES. *Presbytes obscura.*
Skull. Singapore?

* THE NEGRO MONKEY. *Presbytes maura.*
* Skull.

HOODED PRESBYTES. *Presbytes Johnii.*
* Skull. Neilgherries.

* THE CRESTED PRESBYTES. *Presbytes mitrat.*
* Skull. Java.

* THE CINEREOUS PRESBYTES. *Presbytes cinerea.*
* Skull. Malacca.

* THE LANGUR. *Presbytes entellus.*
Skull of an adult. Nepal. Presented by B. H. Hodgson, Esq.
Skull of a middle-aged specimen. Nepal. Presented by B. H. Hodgson, Esq.

- Bones of body and limbs. Nepal. Presented by B. H. Hodgson, Esq.
 Bones of body. Nepal. Presented by B. H. Hodgson, Esq.
 Skull, half grown. Nepal. Presented by B. H. Hodgson, Esq.
 Skull, young. Sumatra. Presented by B. H. Hodgson, Esq.
 Teeth, adult. Nepal. Presented by B. H. Hodgson, Esq.

CERCOPITHECUS, *Buffon.*

- The SAMANGO. *Cercopithecus Samango.*
 * Skull. South Africa. From the Stockholm Museum.
 The RED MONKEY. *Cercopithecus ruber.*
 Skull. Western Africa.
 MONKEY. *Cercopithecus* — ?
 Skull. — ? From Dr. Mantell's collection.
 The WHITE-THROATED MONKEY. *Cercopithecus albogularis.*
 * Skull. India.
 The GRIVET or TOTA. *Cercopithecus engythithia.*
 * Skull. South Africa.
 MALBROUCK MONKEY. *Cercopithecus cynosurus.*
 * Skull. India. Presented by Edward Cross, Esq.
 * Skull. India.
 CALLITHRIX. *Cercopithecus sabaeus.*
 * Skull. West Africa.
 MONKEY. *Cercopithecus* — ?
 Skeleton. Africa.
 The MONA. *Cercopithecus mona.*
 * Skull, young. Western Africa.
 * Skull. Western Africa.
 The BLACK-CHEEKED ASCAGNE. *Cercopithecus melanogenys.*
 * Skull. Western Africa.
 The WHITE-NOSED OR VAULTING MONKEY. *Cercopithecus Petaurista.*
 * Skull. West Africa.
 * Skull. West Africa.

CERCOCEBUS, *Geoff.*

- The SOOTY MANGABEY. *Cercocebus fuliginosus.*
 * Skull. Africa.
 The WHITE-CROWNED MANGABEY. *Cercocebus Aethiops.*
 * Skull.

MACACUS, Lacep.

The BRUCH. *Macacus nemestrinus.*
Skeleton. India.

The MACAQUE. *Macacus cynomolgus.*
* Skull. India.
* Skull. ———
* Skull. ———
* Skull. ———
Skull. ———
Skull. ———

The RHESUS. *Macacus Rhesus.*
Skull of an adult. Nepal. Presented by B. H. Hodgson,
Esq.
* Skeleton of young. Nepal. Presented by B. H. Hodgson,
Esq.
Skeleton of female. Nepal. Presented by B. H. Hodgson,
Esq.
* Skull. India.

The BLACK MACAQUE. *Macacus niger.*
* Skull of adult. Celebes.
* Skull of young. Philippines.

The MAGOT. *Macacus Iuus.*
* Skull. North Africa.

CYNOCEPHALUS, Brisson.

The ANUBIS. *Cynocephalus Anubis.*
* Skull. Africa.
The PAPION. *Cynocephalus Sphinx.*
* Skull. Guinea.

The CHACMA. *Cynocephalus porcarius.*
Skull. South Africa.

The BABOON. *Cynocephalus babouim.*
Skull. West Africa.

PAPIO, Brisson.

The MANDRILL. *Papio maimon, Latr.*
Skull of adult.
Skull of adult.
* Cast of skull.

Fam. 3. *CEBIDÆ.**ATELES, Geoff.*

The CHAMECK. *Ateles Chameck.*
* Skull. Guinea.

- The MARIMONDA. *Ateles Belzebuth.*
 * Skull. Brazils. Presented by Edward Cross, Esq.
 * Skull. Brazils.

- The BROWN SPIDER MONKEY. *Ateles hybridus.*
 * Skull. South America.

BRACHYTELES, *Spix.*

- The MIRKI. *Brachyteles hypoxanthus.*
 Skeleton. From Mr. Brandt's collection.

- The THUMBED MIRKI. *Brachyteles hemidactylus.*
 * Skull. South America.

- The MIRKI. *Brachyteles* — ?
 Skull.

LAGOTHRIX, *Geoff.*

- The CAPARRO or NEGRO MONKEY. *Lagothrix Humboldtii.*
 * Skull. Brazils.

MYCETES, *Illiger.*

- GOLDEN HOWLER. *Mycetes seniculus.*
 * Skeleton. South America.

- ARAGUATA or BROWN HOWLER. *Mycetes ursinus.*
 * Skull. Brazils.
 * Skull.

- The SILKY HOWLER. *Mycetes laniger.*
 * Skull. Columbia.
 * Skull. Brazils.

- The BLACK and YELLOW HOWLER. *Mycetes bicolor.*
 * Skull. South America.
 Hyoid bone. South America.

- The GUARIBA or YELLOW-HANDED HOWLER. *Mycetes Beelzebul.*
 Skull. Para, South America. Presented by R. Graham, Esq.
 Skull. Para, South America. Presented by R. Graham Esq.

CEBUS, *Erxl.*

- The CAPUCIN. *Cebus monachus.*
 * Skull. South America.
 * Skull. Paraguay.

- The CAPUCIN. *Cebus* — ?
 Skull. Para, South America. Presented by R. Graham, Esq.
 Skull.

CALLITHRIX, Erxl:

The SAHUASSU or MARKED TEE TEE. *Callithrix personatus.*

* Skull. South America.

* Skull.

* Skull.

The SAHAUSSU ? *Callithrix* ———?
Skull. Para, South America. Presented by J. P. G. Smith, Esq.

JACCHUS, Geoff.

The PINCHE. *Jacchus Edipus.*
Skull. Brazils.

RED-BELLIED MARMOSET. *Jacchus rufiventer.*
* Skull. South America.

The GNICK or BLACK-EARED MARMOSET. *Jacchus penicillatus.*

* Skull. Brazils.

The WHITE-EARED MARMOSET. *Jacchus auritus.*
* Skull. Brazils.
* Skull. South America.

NYCTIPITHECUS, Spix.

The VITOE. *Nyctipithecus felinus.*
* Skull. Santa Fé de Bogota.

The HAIRY VITTOE. *Nyctipithecus villosus.*
* Skull. Santa Fé de Bogota.

Fam. 4. LEMURIDÆ.**LEMUR, Linn.**

The RING-TAILED MACAGO. *Lemur catta.*
Skeleton. Madagascar.

PROSIMIA, Brisson.

BLACK-FRONTED LEMUR. *Prosimia nigrifrons, Geoff.*
* Skull. Madagascar.
Skull. Madagascar.

LEMUR. *Prosimia* ———?
* Skull. Madagascar.

LEMUR. *Prosimia* ———?
* Skull. Madagascar.

INDRI, Geoff.

The INDRI. *Indris brevicaudata.*

* Skull. Madagascar.

* Bones of body. Madagascar.

NYCTICEBUS, Geoff.

* The KUKANG. *Nycticebus Javanicus.*
Skull. Madagascar.

LORIS, Geoff.

The LORIS. *Loris gracilis, Geoff.*

* Skull. Ceylon.

BLACK GALAGO. *Galago Alleni.*

Skull. Fernando Po. Presented by Thomas Thomson, Esq.,
R.N.

GALAGO, Geoff.

The MAHOLI. *Galago Maholi.*

* Skull. South Africa.

Fam. 5. *GALEOPITHECIDÆ.*

GALEOPITHECUS. Pallas.

The COLUGO. *Galeopithecus volans.*

Skeleton. Malacca.

Skull. Malacca.

Skull. Malacca.

Skull, young.

Fam. 6. *VESPERTILIONIDÆ.*

RHINOPOMA, Geoff.

The INDIAN RHINOPOMA. *Rhinopoma Hardwickii.*

Skull. India. Presented by Walter Elliott, Esq.

ARCTIBEUS, Leach.

The JAMAICA ARCTIBEUS. *Arctibeus Jamaicensis.*

Skull. Jamaica. Presented by J. S. Redman, Esq.

VAMPYRUS, Geoff.

The PALE VAMPIRE. *Vampyrus spectrum.*

Skull. Jamaica. Presented by J. S. Redman, Esq.

MONOPHYLLUS, Leach.

REDMAN'S LEAF-NOSED BAT. *Monophyllus Redmani.*

Skull. Jamaica. Presented by J. S. Redman, Esq.

MEGADERMA, Geoff.

The CORDATE BAT. *Megaderma Spasma.*

Skeleton. From the Leyden Museum.

LYRE-NOSED BROAD-WINGED BAT. *Megaderma Lyra.*
Five Skulls. Madras. Presented by Walter Elliott, Esq.

LAVIA, Gray.

AFRICAN LEAF BAT. *Lavia frons.*
Skull. West Africa, Cape Coast Castle. Presented by J. William, Esq.

RHINOLOPHUS, Geoff.

THE NOBLE HORSESHOE BAT. *Rhinolophus nobilis.*
Skeleton. From the Leyden Museum.

LARGER HORSESHOE BAT. *Rhinolophus ferrum-equinum?*
Skull, male. —? Presented by W. E. Leach, M.D.
Skull, female. —? Presented by W. E. Leach, M.D.
Skull. —?

THE NEPAL HORSESHOE BAT. *Rhinolophus tragatus.*
Three Skulls. Nepal. Presented by B. H. Hodgson, Esq.

HIPPOSIDEROS, Gray.

MOUSE-COLOURED HORSESHOE BAT. *Hipposideros murinus.*
Skull. India, Madras. Presented by Walter Elliott, Esq.

FOXY HORSESHOE BAT. *Hipposideros fulvus.*
Skull. India, Madras. Presented by Walter Elliott, Esq.

APICILLATED HORSESHOE BAT. *Hipposideros apiculatus.*
Skull. India, Madras. Presented by Walter Elliott, Esq.

ASELLIA, Gray.

THE THREE-TOOTHED ASELLIA. *Asellia tridens.*
Four Skulls. Egypt. Presented by Dr. Turubull Christie.

NYCTERIS, Geoff.

THE TWO-COLOURED NYCTERIS. *Nycteris discolor.*
* Skull. South Africa. From the Stockholm Museum.

VESPERTILIO, Linn.

INDIAN BAT. *Vespertilio* —?
Two Skulls. India, Madras. Presented by Walter Elliott, Esq.

BAT. *Vespertilio* —?
Skull, without lower-jaw. —?
Skull, divided in half longitudinally. —? Presented by W. E. Leach, M.D.
Skull. —?

BAT. *Vespertilio* —?
Three Skulls. India. Presented by General Hardwicke.

PLECOTUS, Geoff.

The COMMON LONG-EARED BAT. *Plecotus communis.*
Skull. England. Presented by W. E. Leach, M.D.

NOCTULINIA, Gray.

The NOCTULE. *Noctulinia altivolans.*
Skull. Cambridgeshire. Presented by the Rev. J. Henslow.
Skull, without lower-jaw. —?

The INDIAN NOCTULE? *Noctulinia* —?
Skeleton. India. Presented by General Hardwicke.

SCOTOPIHLUS, Leach.

"SMITH'S BAT," (Leach). *Scotophilus*? —?
Skull. —? Presented by W. E. Leach, M.D.

TEMMINCK'S NOCTULE. *Scotophilus Temminckii?*
Skull, and bones of arms and legs. Penang. Presented by
General Hardwicke.

The MADRAS BAT. *Scotophilus Maderaspatanus.*
Skull. India, Madras. Presented by Walter Elliott, Esq.

The INDIAN BAT. *Scotophilus* —?
Two Skulls (not in good state). India, Madras. Presented by
Walter Elliott, Esq.

The AUSTRALIAN BAT. *Scotophilus Morio.*
Two Skulls. West Australia. From Mr. Gould's collection.
Two Skulls. West Australia. From Mr. Gould's collection.

The BAT. *Scotophilus murinus.*
Skeleton. England.

The MINUTE SCOTOPHILUS. *Scotophilus minutus.*
* Skull. South Africa. From the Stockholm Museum.

MYSTACINA, Gray.

The MYSTACINA. *Mystacina tuberculata.*
Bones of body. New Zealand.

TAPHOZOUS, Geoff.

The INDIAN TAPHOZOUS. *Taphozous* —?
Skull (wanting upper canine and cutting teeth) India, Madras.
Presented by Walter Elliott, Esq.

NOCTILIO, Linn.

The BULL-DOG BAT. *Noctilio americanus?*
Skull (without lower-jaw). South America.

NYCTINOMUS. Geoff.

The GROOVED-CHEEK BAT. *Nyctinomus plicatus.*
Skeleton. From the Leyden Museum.

The MIDAS GROOVED-CHEEK BAT. *Nyctinomus Midas.*
* Skull. Senaar. From the Stockholm Museum.

XANTHARPYIA, Gray.

The EGYPTIAN XANTHARPYE. *Xantharpyia Ægyptiaca.*
Skulls. Egypt. Presented by Dr. Turnbull Christie.

PTEROPUS, Brisson.

The RED-NAPED KALONG. *Pteropus funereus.*
Skull. Australia.

The WURLAGZOOLOL. *Pteropus Edwardsii, Geoff.*
Skull, adult. Nepal. Presented by B. H. Hodgson, Esq.
Skeleton? India.
Skull. Madras. Presented by Walter Elliott, Esq.
Skull. India. Presented by General T. Hardwicke.
Skull. India.
Skull. Madras. Presented by Walter Elliott, Esq.
Two Skulls. India.
Skull (imperfect behind). India. Presented by General T. Hardwicke.
Skull. India, Bengal. Presented by General T. Hardwicke.

The FLYING BAT. *Pteropus* — ?
Skull. — ?

CYNOPTERUS, Temm.

The WARTY LIPPED CYNOPTERE. *Cynopterus Titthæcheilus.*
Skeleton. Sumatra. From the Leyden collection.
Skull (imperfect). Presented by Walter Elliott, Esq.

The MARGINED EARED CYNOPTERE. *Cynopterus marginatus.*
Skull. India. Presented by Walter Elliott, Esq.
Skull. India. Presented by Walter Elliott, Esq.

CEPHALOTES, Geoff.

The CEPHALOTE. *Cephalotis Peronii.*
Skull. From the Leyden Museum.

Order II. FERÆ.

Fam. 1. FELIDÆ.

LEO, Leach.

The LION. *Leo barbarus.*

Skeleton. Africa.

Skull. Africa.

Skull. Africa. From Dr. Mantell's collection.

Skull. Africa. From Dr. Mantell's collection.

Skull, young. Africa.

Skull. Africa.

GAMBIAN LION. *Leo Gambianus.*

* Skull. West Africa.

TIGRIS, Gray.

The TIGER. *Tigris regalis.*

Two Skulls. India. Presented by General Hardwicke.

Skull, adult. Nepal. Presented by B. H. Hodgson, Esq.

Skull. India. Presented by H. Lacon, Esq.

Skull. India.

Skull? India.

Skull, young. India.

Skull, young. India.

LEOPARDUS, Gray.

The LEOPARD. *Leopardus varius.*

Skull, adult. Nepal. Presented by B. H. Hodgson, Esq.

Skull, young. Nepal. Presented by B. H. Hodgson, Esq.

Skull. Nepal.

Skull. (imperfect) Africa. Presented by W. Burchell, Esq.,
L.L.D.

Skull. Africa.

Skull. India.

The CHITTRA GILLON. *Leopardus celidogaster.*

Skull. Nepal. Presented by B. H. Hodgson, Esq.

Skull, adult, much elongated behind. Nepal. Presented by
B. H. Hodgson, Esq.

Skull, adult, less elongated behind. Nepal. Presented by B.
H. Hodgson, Esq.

Skeleton, imperfect. Nepal. Presented by B. H. Hodgson,
Esq.

The JAGUAR. *Leopardus Onca.*

* Skull, small. -South America.

Skull, large. Para, Brazils. Presented by R. Graham, Esq.

Skull, large, Para, Brazils. Presented by R. Graham, Esq.

Skull, large. Para, Brazils. Presented by R. Graham, Esq.

The MURMI. *Leopardus moormensis.*

Skull. Nepal. Presented by B. H. Hodgson, Esq.

The WAGATI CAT. *Leopardus viverrinus.*

Skull. Nepal. Presented by B. H. Hodgson, Esq.

Skull. Nepal. Presented by B. H. Hodgson, Esq.
 Skull. Nepal. Presented by B. H. Hodgson, Esq.

WARWICK'S CAT. *Leopardus Himalayanus.*
 * Himalaya. Presented by Edward Cross, Esq.

ELLIOT'S CAT. *Leopardus Ellioti.*
 Skull, orbit complete behind. Nepal. Presented by B. H. Hodgson, Esq.
 Skull, orbit interrupted behind. Nepal. Presented by B. H. Hodgson, Esq.

The **BULU.** *Leopardus Sumatrana..*
 * Skull. Malacca.

The **OCELOT.** *Leopardus pardalis.*
 * Skull. South America.

Skeleton. South America. From Mr. Brandt's collection.

The **MARLED CAT.** *Leopardus marmoratus.*
 * Skull. Dardagellan. Presented by Andrew Charlton, Esq.
 Skull. Borneo. Presented by J. Brooks, Esq.

The **YAGOUARONDI.** *Leopardus Yagouarondi.*
 Skull. South America.

FELIS, Linn.

The **PAMPAS CAT.** *Felis Payeros.*
 * Skull. Chili.

The **CAT.** *Felis domesticus.*
 Skull. Nepal. Presented by B. H. Hodgson, Esq.
 * Skull. Isle of Man. Presented by Mrs. Col. Thompson.
 Skull. England. Presented by Mr. J. Baker.
 Skeleton, adult. England.
 Skeleton of fetus. England. Presented by J. E. Gray, Esq.
 Skulls. England. Presented by John Ray, Esq.
 Skull. England.

CAT. *Felis —?*
 Skull.

CAT. *Felis —?*
 Skull. From Dr. Mantel's collection.

CHAUS, Gray.

FLAT-HEADED CAT. *Chaus planiceps.*
 Skull.

Skull. Malacca. Presented by Andrew Charlton, Esq.

The **CHAUS.** *Chaus Libycus.*
 Skull, adult. Nepal. Presented by B. H. Hodgson, Esq.
 Skull, adult, imperfect. Nepal. Presented by B. H. Hodgson, Esq.

The SERVALINE CHAUS. *Chaus servalinus.*

Skull. Senegal.

Skull. Senegal.

Skeleton. Sierra Leone. Presented by W. Whitfield, Esq.

* Skull.

LYNCHUS, Gray.

The PEESHOO or CANADA LYNX. *Lynxus Canadensis.*

Skull. Canada.

Skull. Hudson's Bay. Presented by the Hudson's Bay Company.

GUEPARDA, Gray.

The YOUSE or CHETAH. *Gueparda jubata.*

* Skull. Cape of Good Hope. Presented by W. Burchell, Esq.

HYAENA, Briss.

The STRIPED HYAENA. *Hyæna striata.*

Skull. Cape of Good Hope. Presented by Edward Cross, Esq.

* Skull. Cape of Good Hope. Presented by Edward Cross, Esq.

Skull. Northern Circar.

Skull. Cape of Good Hope?

PROTELES, Geoff.

The AARD WOLF. *Proteles cristatus.*

* Skull. South Africa.

VIVERRA, Linn.

The CIVET. *Viverra Civetta.*

* Skull. Tropical America. Presented by Edward Cross, Esq.

The ZIBETH. *Viverra Zibetha, Linn.*

Skull, imperfect. Nepal. Presented by B. H. Hodgson, Esq.

Skeleton of trunk. Nepal. Presented by B. H. Hodgson, Esq.

The RASSE. *Viverra Malaccensis, Gmelin.*

Skeleton, nearly perfect. Nepal. Presented by B. H. Hodgson, Esq.

Skull. Nepal. Presented by B. H. Hodgson, Esq.

Skull. Nepal. Presented by B. H. Hodgson, Esq.

Skull. Nepal. Presented by B. H. Hodgson, Esq.

* Skull, lower-jaw wanting.

GENETTA, Cuv.

The BLOTTCHED GENET. *Genetta tigrina.*

* Skull. Cape of Good Hope.

BASARIS, *Licht.*

The CACOMIXLE. *Basaris astuta.*
 * Skull. Mexico. Presented by J. Phillips, Esq.

MUNGOS, *Ogilby.*

MUNGOS VITTICOLLIS.
 * Skull. Tranancore, India.

URVA, *Hodgson.*

The URVA. *Urva Cancrivora, Hodgson.*
 Skull. Nepal. Presented by B. H. Hodgson, Esq.
 * Skull. Nepal. Presented by B. H. Hodgson, Esq.

HERPESTES, *Illig.*

The NYULA. *Herpestes Nyula, Hodgson.*
 Skull. Nepal. Presented by B. H. Hodgson, Esq.
 Skeleton, imperfect. Nepal. Presented by B. H. Hodgson, Esq.

The HIGHLAND NYULA. *Herpestes Nipalensis.*
 Skeleton, imperfect. Nepal. Presented by B. H. Hodgson, Esq.
 Skull, imperfect. Nepal. Presented by B. H. Hodgson, Esq.
 Skull. India. Presented by S. Sotheby, Esq.
 Skull. India. Presented by T. Ingall, Esq.
 Skull. India.

OPOSSUM. *Didelphis*—?

- Skull. Presented by Captain Sutch.

AZARA'S OPOSSUM. *Didelphis Azaræ.*

- * Skull, young. Bolivia. From Mr. Bridge's collection.

CRAB-EATING OPOSSUM. *Didelphis cancrivora.*

- * Skull. Brazils.

PHILANDER, Brisson.

CINEREOUS OPOSSUM. *Philander cinereus.*

- Skull. South America.

The NAKED-TAILED OPOSSUM. *Philander nudicaudata.*

- * Skull. Brazils. From Mr. Brandt's collection.

* The QUICA. *Philander Quica.*

- Skull. Coban, Tropical America.

* The CRABEATER. *Philander Marsupialis.*
 * Skull. Tropical America.

THYLMYS, Gray.

The ELEGANT PAINTED MOUSE. *Thylamys elegans.*
 Skull. Chili. From Mr. Bridge's collection.

- * Skull. Chili. From Mr. Bridge's collection.
- * Skull. Chili. From Mr. Bridge's collection.

Fam. 5. *PHOCIDÆ.*

LEPTONYX, Gray.

- The FALSE SEA LEOPARD. *Leptonyx Weddellii.*
- * Skull. River Santa Cruz, East Coast of Patagonia. Presented by Captain Fitzroy.
 - * Skull. River Santa Cruz, East Coast of Patagonia. Presented by Captain Fitzroy.
 - * Skull. Antarctic Seas. Antarctic Expedition. Presented by the Admiralty. The specimen figured in the 'Voyage of the Erebus and Terror.'
 - * Skull. Antarctic Seas. Antarctic Expedition. Presented by the Admiralty.

OMMATOPHOCA, Gray.

- Ross's ANTARCTIC SEAL. *Ommatophoca Rossii.*
 Skeleton. Antarctic Seas, Antarctic Expedition. Presented by the Admiralty.
- * Skull. Antarctic Seas, Antarctic Expedition. Presented by the Admiralty. The specimen figured in the 'Voyage of the Erebus and Terror.'

STENORHYNCHUS, Cuv.

- The SEA LEOPARD. *Stenorhynchus Leptonyx.*
- Skull. Antarctic Seas, Antarctic Expedition. Presented by the Admiralty. The specimen figured in the 'Voyage of the Erebus and Terror.'
 - Skull. Antarctic Expedition. Presented by the Admiralty.
 - Skeleton. Port Nicholson, New Zealand. Presented by Dr. Frederick Knox.
 - Skull. Antarctic Seas. Antarctic Expedition. Presented by the Admiralty.
 - Skull and bones of body. Antarctic Seas, Antarctic Expedition. Presented by the Admiralty.

LOBODON, Gray.

- The ANTARCTIC SEAL. *Lobodon carcinophaga.*
 * Skull, three parts grown. Antarctic Seas, Antarctic Expedition.
 Presented by the Admiralty. The specimen figured in the
 ‘Voyage of the Erebus and Terror.’
 Skull, adult. Antarctic Seas, Antarctic Expedition. Presented
 by the Admiralty.
 Skull, adult. Antarctic Seas, Antarctic Expedition. Presented
 Lieutenant Smith, R.N.
 Skull, adult. Antarctic Seas, Antarctic Expedition. Presented
 by Lieutenant Smith, R.N.
 Skull, adult. Antarctic Seas, Antarctic Expedition. Presented
 by Lieutenant Smith, R.N.
 Skull, young. Antarctic Seas, Antarctic Expedition. Presented
 by the Admiralty.

PHOCA, Linn.

- BEARDED SEAL. *Phoca barbata.*
 Skeleton, length 8 feet. North Sea. From Mr. Brandt’s collection.
 The ATAK or HARP SEAL. *Phoca Grænlandica.*
 Skull, adult. Greenland. From Dr. Moller’s collection.
 * Skull, adult. Greenland. From Dr. Moller’s collection.

CALOCEPHALUS, Cuv.

- The SEAL. *Calocephalus vitulina.*
 Skeleton. From Dr. Mantell’s collection.
 Skull. Greenland.
 * Skull.

HALICHÆRUS, Horchs.

- The GRAY SEAL. *Halichoerus gryphus.*
 * Skull, adult. Fern Island.
 * Skull, young. Fern Island. Presented by J. P. Selby, Esq.

TRICHECHUS, Linn.

- The MORSE or WALRUS. *Trichechus Rosmarus.*
 Skull.
 Skull. Presented by General T. Hardwicke.
 Skull, young.
 Tooth, longitudinally divided.

CYSTOPHORA, Nilson.

- The CLAPNUTZ or CRESTED SEAL. *Cystophora cristata.*
 Skull, adult. Greenland.

- * Skull, adult. Greenland.
- * Skull, adult. Greenland.
- Skull, lower-jaw wanting.
- Skull, half-grown.
- Skull, very young.

MORUNGA, Gray.

- The SEA ELEPHANT. *Morunga Elephantina.*
- Skull, very young.
 - * Skull and Skeleton. Antarctic Seas, Antarctic Expedition. Presented by the Admiralty. The specimen figured in the 'Voyage of Erebus and Terror.'
 - Skull. Antarctic Seas, Antarctic Expedition. Presented by the Admiralty.

OTARIA, Peron.

- The SEA LION. *Otaria jubata.*
- * Teeth of lower-jaw. South America. Presented by Captain Fitzroy, R.N.
 - * Skull. South Australia. Presented by Captain Grey.

ARCTOCEPHALUS, Cuv.

- Dr. HOOKER'S EARED SEAL. *Arctocephalus Hookerii.*
- Skull and Skeleton, adult. Falkland Islands, Antarctic Expedition. Presented by the Admiralty. The specimen figured in the 'Voyage of the Erebus and Terror.'
 - Skull and Skeleton. Antarctic Expedition. Presented by the Admiralty.
 - * Skull, imperfect. Antarctic Expedition. Presented by the Admiralty.
 - * Skull, imperfect. Antarctic Expedition. Presented by the Admiralty.

The AUSTRALIAN EARED SEAL. *Arctocephalus lobatus.*

- * Teeth, adult. Houtman's Abrolhos, Australia. From Mr. Gould's collection. The specimen figured in the 'Voyage of the Erebus and Terror.'
- * Lower-jaw. Houtman's Abrolhos, Australia. From Mr. Gould's collection.
- * Teeth, very young. Houtman's Abrolhos, Australia. From Mr. Gould's collection.
- * Teeth, very young. Houtman's Abrolhos, Australia. From Mr. Gould's collection.

Order III. CETE.

Fam. 1. BALÆNIDÆ.

BALÆNA, *Ray.*

The NORTHERN WHALE. *Balaena mysticetus.*
Skull and lower jaw, fig. Cuv. Oss. v. t. 25. fig. 9—11. North Sea.

The CAPE WHALE. *Balaena australis.*
Bone of fore-arm. Cape of Good Hope.

BALÆNOPTERA, *Lacep.*

The SMALL-HEADED FINNER. *Balaenoptera microcephalus.*
Skeleton. South Greenland. From Mr. Brandt's collection.

Fam. 2. CATODONTIDÆ.

CATODON, *Arred.*

The SPERM WHALE. *Catodon macrocephalus.*
Skull, fig. Cuv. Oss. v. 6, 24. fig. 1—5. North Sea.
Lower-jaw. Presented by Colonel Cobb.
Lower-jaw of young.
Ear-bones. Presented by H. H. Russell, Esq.
Teeth, various.
Section of a tooth.

Fam. 3. DELPHINIDÆ.

HYPEROODON, *Illiger.*

The THICK-HEAD HYPEROODON. *Hyperoodon latifrons.*
Skull and Skeleton, imperfect. Orkney.

PLATANISTA, *Gray.*

The SUSUE. *Platanista Gangetica.*
Skull, end of nose nearly straight, young. India. (Ganges).
Skull, end of nose, recurved. India. Presented by Gibson Rowe, Esq.

STENO, *Gray.*

The LARGE-TOOTHED DOLPHIN. *Steno frontatus.*
Part of the upper-jaw, teeth large.
Bones of the ear. India. Presented by General Thomas Hardwicke.
Skull. India.
Skull.
Skull.

The COMPRESSED-BEAKED DOLPHIN. *Steno compressus.*
 Skull. The specimen figured in the 'Voyage of the Erebus and Terror.'
 Two Skulls.
 Skull. South Sea. Antarctic Expedition. Presented by the Admiralty.

The SHARP-BEAKED DOLPHIN. *Steno attenuatus.*
 Skull. India? Presented by Mrs. Ince.
 Skull. The specimen figured in the 'Voyage of the Erebus and Terror.'
 Skull. 9° N. Lat. Presented by A. Pearson, Esq.

DELPHINUS, Linn.

The DOLPHIN. *Delphinus Delphis.*
 Skull, large.
 Skull, smaller. Presented by Allan Cunningham, Esq., F.L.S.
 Skull. St. Helena. Presented by A. Pearson, Esq.
 Skull. Presented by John Joseph Bennett, Esq., F.R.S.
 Twelve Skulls.—

The SMALL-HEADED DOLPHIN. *Delphinus microps.*
 Skull.—? From the Haslar Museum. The specimen figured in the 'Voyage of the Erebus and Terror.'

The CLYMENE. *Delphinus Clymene.*
 Skull.—?

The STYX. *Delphinus Styx.*
 Skull, not in good state.—? —?

The DORIS. *Delphinus Doris.*
 Skull.—? The specimen figured in the 'Voyage of the Erebus and Terror.'
 Skull. From Haslar Hospital.

The BOTTLE-NOSED WHALE. *Delphinus Tursio.*
 Skull and teeth, bad state. From the Montague Museum.
 Skull, bad state. From Dr. Mantell's collection.
 Skull, bad state, semi-fossil, the cliff, Herne Bay. Presented by J. S. Bowerbank, Esq.

The DUSKY DOLPHIN. *Delphinus obscurus, Gray.*
 Skull. Cape of Good Hope?
 Skull. Cape of Good Hope.

The CYMOPOCE. *Delphinus Cymodoce.*
 Skull.—? The specimen figured in the 'Voyage of the Erebus and Terror.'

The EURYNOME. *Delphinus Eurynome.*
 Skull. North Sea? The specimen figured in the 'Voyage of the Erebus and Terror.'

The METIS. *Delphinus Metis.*

Skull. The specimen figured in the 'Voyage of the Erebus and Terror.'

LAGENORHYNCHUS, Gray.

The ASIA. *Lagenorhynchus Asia.*

Skull, wanting teeth.

The ELECTRA. *Lagenorhynchus Electra.*

Skull. The specimen figured in the 'Voyage of the Erebus and Terror.'

The WHITE-SIDED BOTTLENOSE. *Lagenorhynchus leucopleurus.*

Skeleton. Greenland. From Mr. Brandt's collection. The specimen figured in the 'Voyage of the Frebus and Terror.'

ORCA, Randal.

The KILLER. *Orca gladiator.*

Skull. Coast of Essex. From Mr. Cross's collection.

The SMALL KILLER. *Orca intermedia.*

Skull. —? The specimen figured in the 'Voyage of the Erebus and Terror.'

GLOBIOCEPHALUS, Lesson.

The PILOT DOLPHIN. *Globiocephalus melas.*

Skull. Orkneys. Presented by Professor Traill.

Lower-jaw, half-grown —?

GRAMPUS, Gray.

The RAM DOLPHIN. *Grampus Cuvieri.*

Skull. Isle of Wight. Presented by the Rev. C. Bury.

Lower-jaw. Presented by the Haslar Hospital Museum.

PHOCÆNA, Gray.

The PORPESSE. *Phocæna communis.*

Skull. From Dr. Mantell's collection.

Four vertebræ.

NEOMERIS, Gray.

The FINLESS PORPESSE. *Meomeris Phocænoides.*

Skull. Indian Ocean. From the Paris Museum.

BELUGA, Gray.

The BELUGA. *Beluga catodon.*

Skeleton, length 15 feet. Greenland.

Skull. Greenland.

KING'S BELUGA. *Beluga Kingii.*

Skull. 'New Holland.' Presented by Capt. P. P. King, R.N.

MONODON, Fab.

The NARWHAL. *Monodon Monoceros.*
 The Tooth. North Sea.
 Skull, female, not in good state. North Sea.

Fam. 3. MANATIDÆ.**MANATUS, Rond.**

The MANATEE. *Manatus australis.*
 Skull. South America?

Fam. 4. HALICORIDÆ.**HALICORE, Illiger.**

The DUGONG. *Halicore Dugung.*
 Skull, adult. India. Presented by Walter Elliott, Esq.
 Two upper-jaws. North-east Coast of New Holland. Presented
 by J. B. Jukes, Esq.

Order IV. GLIRES.**Fam. 1. MURIDÆ.**

The BANDICOOT or PIG RAT. *Mus Bandicota.*
 Skull. Madras. Presented by Walter Elliott, Esq.
 Four Skulls. India.
 Skull. Nepal. Presented by B. H. Hodgson, Esq. .

The NORWAY RAT. *Mus decumanus.*
 Three Skulls. India. Presented by B. H. Hodgson, Esq.
 Skull. England. Presented by G. R. Gray, Esq.
 Skull. From Dr Mantell's collection.
 Skull.

The RAT. *Mus. ——*
 Skull. Chili. From Mr. Bridge's collection.

The CAPE RAT. *Mus Vereauxii.*
 Skull. South Africa. From the Stockholm Museum.

ALEXANDRINE RAT. *Mus Alexandrinus.*
 * Skull. Port Natal, South Africa. From the Stockholm
 Museum.

The LONG-TAILED RAT. *Mus. ——*
 Skull. Egypt. Presented by Dr. Christie.
 Skull. India?
 Skull. Cape of Good Hope.
 Skull. India.
 Skull. India.

- The INDIAN RAT. *Mus Indicus.*
 Three Skulls. India. Presented by B. H. Hodgson, Esq.
 Skull. Cape of Good Hope.
 Skull. India. Presented by the East India Company.
 Skeleton. Presented by General T. Hardwicke.
 * Skull.
 RAT. *Mus.*——?
 Skull.——?
- The BLACK RAT. *Mus Rattus.*
 Two Skulls, female.
 * Skull, female. Cambridgeshire.
 Skull. Presented by Mr. J. Baker.
 Skull. Epping. Presented by H. Doubleday, Esq.
 Skeleton. Epping. Presented by H. Doubleday, Esq.
- The RAT. *Mus Rattus?*
 Skull. Chili. From Mr. Bridge's collection.
- The MOUSE. *Mus musculus.*
 Skeleton.
 Skull. London. Presented by Mr. J. Baker.
 Skull. Epping. Presented by John Ray, Esq.
 Skull.
- The AUSTRALIAN MOUSE. *Mus musculus.*
 * Skull. South Australia. Presented by Captain G. Grey.
- The WOOD MOUSE. *Mus sylvaticus.*
 Skull. England. Presented by J. Ray, Esq.
- WATERHOUSE'S MOUSE. *Mus Novæ Hollandiæ.*
 Skull. From Mr. Gould's collection.
- The WHITE-FOOTED MOUSE. *Mus albipes.*
 Skull. Abyssinia. From Dr. Ruppell's collection.
- The ORIENTAL MOUSE. *Mus orientalis.*
 * Skull. Egypt. From the Stockholm Museum.
- The MINUTE MOUSE. *Mus minutoides.*
 Skull. South Africa. From the Stockholm Museum.
- The NATAL MOUSE. *Mus Natalensis.*
 Skull. Port Natal. From the Stockholm Museum.
- The JAPAN MOUSE. *Mus speciosus.*
 * Skull. Japan.
- The GAMBIAN MOUSE. *Mus Gambianus.*
 Skull. Gambia. Presented by the Earl of Derby.
- The DELICATE MOUSE. *Mus delicatulus.*
 * Skull. Port Essington. From Mr. Gould's collection.

The WHITISH MOUSE. *Mus albo-cinereus.*

- * Skull. Perth, West Australia.
- * Skull. Perth, West Australia.
- * Skull. Swan River. Presented by Dr. Richardson.
- Skull. West Australia. From Mr. Gould's collection.
- Skull. West Australia. From Mr. Gould's collection.
- Skull. West Australia. From Mr. Gould's collection.

The MOUSE. *Mus.*

- * Skull. Victoria Plains, West Australia.
- * Skull. Victoria Plains, West Australia.
- Four Skulls. West Australia. From Mr. Gould's collection.
- Skull. West Australia. From Mr. Gould's collection.
- * Two Skulls. West Australia. From Mr. Gould's collection.

The LAKE ALBERT MOUSE. *Mus* ____?

- Skull. Lake Albert. From Mr. Gould's collection.

The MOUSE. *Mus* ____?

- Skull. King George's Sound. From Mr. Gould's collection.
- Skull. King George's Sound. From Mr. Gould's collection.

The MOUSE. *Mus* ____?

- * Skull. Victoria Plains, West Australia.
- * Skull. Victoria Plains, West Australia.

The MOUSE. *Mus* ____?

- * Skull. Swan River. Presented by Dr. Richardson.

LINEOLATED MOUSE. *Mus lineolatus.*

- Skull. Darling Downs. From Mr. Gould's collection.

The MOUSE. *Mus* ____?

- * Skull. Victoria Plains, West Australia.
- * Skull. Victoria Plains, West Australia.
- * Skull. Swan River. Presented by Dr. Richardson.
- * Skull. South Australia. Presented by Captain G. Grey.
- Skull. West Australia. From Mr. Gould's collection.

The PENCILLED RAT. *Mus penicillatus.*

- * Skull. New Holland. From Mr. Gould's collection.

The BROWN-FOOTED MOUSE. *Mus fuscipes.*

- * Skull, var. South Australia. Presented by Captain G. Grey.
- * Skull, var. South Australia. Presented by Captain G. Grey.
- Skull. Darling Downs. From Mr. Gould's collection.
- Skull, imperfect? Australia.

The MOUSE. *Mus* ____?

- Skull. India. Presented by W. Elliot, Esq.
- Skull. India. Presented by W. Elliot, Esq.

LAGGADE, Gray.

The BUDUGA. Laggade Buduga.

- Skull. India. Presented by W. Elliot, Esq.
Skull. India. Presented by W. Elliot, Esq.

GOLUNDA, Gray.

The MELTADA. Golunda meltada.

- Skull. India. Presented by W. Elliot, Esq.
Skull. India. Presented by W. Elliot, Esq.

The GOLUNDA. Golunda Ellioti.

- Skull. India. Presented by W. Elliot, Esq.

The SMALL-TOOTHED MOUSE. Golunda microdonta.

- Skull. India. Presented by W. Elliot, Esq.
Skull. India. Presented by W. Elliot, Esq.
* Skull. Cape of Good Hope.

The BARBARY MOUSE. Golunda Barbara.

- * Skull. North Africa.

NESOKIA, Gray.

The Kok. Nesokia Kok.

- Skull. Nepal. Presented by B. H. Hodgson, Esq.
Skull. India.
Skull. India.
* Skull. India.

The WATER NESOKIA. Nesokia hydrophila.

- Skull, imperfect. India. Presented by B. H. Hodgson, Esq.
Skull, imperfect. India. Presented by B. H. Hodgson, Esq.

HODGSON'S MOUSE, Nesokia Hodgsonii.

- * Skull, young. Nepal. Presented by B. H. Hodgson, Esq.

HARDWICKE'S NESOKIA. Nesokia Hardwickii.

- Lower-jaws. India. Presented by General T. Hardwicke.

HAPALOTIS, Licht.

The LARGE-EARED HAPALOTIS. Hapalotis macrotis.

- * Skull. Australia.
* Skull. Moore's River, West Australia.
Skull. South Australia. Presented by Captain G. Grey.

MITCHELL'S HAPALOTIS. Hapalotis Mitchellii.

- Skull. West Australia. From Mr. Gould's collection.

The LONG-TAILED HAPALOTIS. *Hapalotis longicaudata.*

* Skull. Victoria Plains.

* Skull.

The RABBIT RAT. *Hapalotis albipes.*

Skull. Adelaide. Presented by C. D. E. Fortnum, Esq.

Skull. South Australia. Presented by Captain G. Grey.

Skull. South Australia. From Mr. Gould's collection.

RICHARDSON'S HAPALOTIS. *Hapalotis Richardsonii.*

* Skull. Swan River. Presented by S. Richardson, M.D.

The MURINE HAPALOTIS. *Hapalotis murinus.*

Skull. Lake Albert, South Australia. From Mr. Gould's collection.

GOULD'S RABBIT RAT. *Hapalotis Gouldii.*

Skeleton. Port Essington. From Mr. Gould's collection.

HAPALOTIS. *Hapalotis* —?

* Skull. South Australia. Presented by Captain G. Grey.

Skull. Darling Downs. From Mr. Gould's collection.

PHYLLOTIS, Waterh.

DARWIN'S MOUSE. *Mus (Phyllotis) Darwinii.*

* Skull. Chili. From Mr. Bridge's collection.

* Skull. Chili. From Mr. Bridge's collection.

* Skull. Chili. From Mr. Bridge's collection.

* Teeth. Chili. From Mr. Bridge's collection.

Skull. Chili. From Mr. Bridge's collection.

The BOLIVIAN MOUSE. *Mus (Phyllotis) Boliviensis.*

* Skull. Bolivia. From Mr. Bridge's collection.

The MOUSE. *Mus (Phyllotis)* —?

* Skull. Bolivia. From Mr. Bridge's collection.

* Skull. Bolivia. From Mr. Bridge's collection.

The MOUSE. *Mus* —?

* Skull. Bolivia. From Mr. Bridge's collection.

The MOUSE. *Mus* —

Skull. Chili. From Mr. Bridge's collection.

ABROTHRIX, Waterh.

The LONG-HAIRED MOUSE. *Mus (Abrothrix) longipilis.*

Skull. Chili. From Mr. Bridge's collection.

Skull. Chili. From Mr. Bridge's collection.

Skull. Chili. From Mr. Bridge's collection.

The LONG-HAIRED MOUSE. var. *Mus (Abrothrix) longipilis?*

Skull. Chili. From Mr. Bridge's collection.

RENGERI'S MOUSE. *Mus (Abrothrix) Rengeri.*

Skull. Chili. From Mr. Bridge's collection.

Skull. Chili. From Mr. Bridge's collection.

The SAND MOUSE. *Mus (Abrothrix) arenicola?*

Skull. Bolivia. From Mr. Bridge's collection.

Skull. Bolivia. From Mr. Bridge's collection.

Skull. Bolivia. From Mr. Bridge's collection.

The LONG-TAILED MOUSE. *Mus longicaudatus.*

Skull. Chili. From Mr. Bridge's collection.

The TAZAMACA. *Mus Tazamaca.*

Skull. Coban, Tropical America.

HESPEROMYS.**The GREAT-NAILED MOUSE.** *Mus (Hesperomys) megalonyx.*

* Skull. Chili. From Mr. Bridge's collection.

* Skull. Chili. From Mr. Bridge's collection.

HOLOCILUS, Brandt.**The SHARP-NOSED RAT.** *Holochilus nasutus.*

* Skull, imperfect. Bahia, South America.

The BRAZILIAN RAT. *Holochilus Braziliensis.*

* Skull and bones of body. Bahia.

* Skull and bones of body. Bahia.

CRICETUS, Cuv.**The KATUGUNA.** *Cricetus Songarus.*

* Skull. Siberia.

The HAMSTER. *Cricetus frumentarius.*

* Skull. Europe.

DENDROMYS, A. Smith.**The TREE MOUSE.** *Dendromys typicus.*

Skull. South Africa.

MERIONES, F. Cuv.**The KATSE.** *Meriones Labradorius.*

Skull. North America.

EURYOTIS, Brandt.**The VLEY MIRIS.** *Euryotis irrorata.*

* Skull. Cafraria, South Africa.

NEOTOMA, Say.

The **NEOTOMA**. *Neotoma floridana*.
Teeth of right lower-jaw.

SIGMODON, Say.

The **SIGMODON**. *Sigmodon* —?
* Skull.

ARVICOLA, Lacep.

The **WATER RAT**. *Arvicola amphibius*.
* Skull. Altai Mountains.
Skull ?
Skull ?
Skull ?

The **GROUND RAT**. *Arvicola terrestris*.
* Skull. Italy.

The **BANK CAMPAGNOL**. *Arvicola glareolus*.
* Skull. Isle of Wight. Presented by the Rev. C. Bury.
Skull. Epping. Presented by John Ray, Esq.

The **CAMPAGNOL**. *Arvicola arvalis*.
Skeleton. England ?
Skull. England ?
Skull. Epping. Presented by J. Ray, Esq.

The **SAXIN**. *Arvicola saxatilis*.
Skull. Siberia.

The **CAMPAGNOL**. *Arvicola* —?
* Skull. Europe? North America?

The **MOUNTAIN ARVICOLE**. *Arvicola monticola*.
Skull. Pyrenees.

The **REDDISH CAMPAGNOL**. *Arvicola rufescens*.
Skull. St. Gothard.

The **ALPINE ARVICOLE**. *Arvicola nivalis*.
* Skull. St. Gothard. From the Stockholm Museum.
Skull. St. Gothard. From the Stockholm Museum.
Skull. St. Gothard. From the Stockholm Museum.

The **REDDISH-GRAY ARVICOLE**. *Arvicola rufocaninus*.
* Skull. Sweden. From the Stockholm Museum.

MYODES, Pallas.

The **HUDSON'S BAY LEMMING**. *Myodes Hudsonius*.
* Skull. Hudson's Bay. Presented by the Hudson's Bay Company.

CTENOMYS, Blanv.

- The COMB-CLAWED LEMMING. *Ctenomys Braziliensis.*
 Skull. Bolivia. From Mr. Bridge's collection.
 Skull. Bolivia. From Mr. Bridge's collection.
 Skull. Chili. From Mr. Bridge's collection.

CASTOR, Linn.

- The BEAVER. *Castor fiber.*
 Lower-jaw, right side. Europe.

MYOPOTAMUS, Comm.

- The COYPU. *Myopotamus Coypus.*
 Skull, adult. North America?
 * Skull, half-grown. North America?

FIBER, Cuv.

- The ONDATRA. *Fiber zibethicus.*
 * Skull, imperfect. North America.

HYDROMYS, Geoff.

- The HYDROMYS. *Hydromys chrysogaster.*
 Skull. Australia.

SCHIZODON, Waterh.

- The BROWN SCHIZODON. *Schizodon fuscus.*
 * Skull. Chili. From Mr. Bridge's collection.
 * Skull, imperfect. Chili. From Mr. Bridge's collection.

ABROCOMA, Waterh.

- BENNETT'S ABROCOMA. *Abrocoma Bennettii.*
 * Skull. Chili. From Mr. Bridge's collection.
 * Skull. Chili. From Mr. Bridge's collection.

PSAMMORYCTES, Poep.

- The BLACK-SAND RAT. *Psammoryctes ater.*
 Skull. Chili. From Mr. Bridge's collection.

OCTODON, Bennett.

- BRIDGE'S OCTODON. *Octodon Bridgesii.*
 * Skull. Chili. From Mr. Bridge's collection.
 * Skull. Chili. From Mr. Bridge's collection.
 * Skull. Chili. From Mr. Bridge's collection.

- The CUCURRITO or the DEGUS. *Octodon Degus.*
 Skeleton. Chili. From Mr. Bridge's collection.

Skull. Chili. From Mr. Bridge's collection.

* Skull. (white var.) Chili. From Mr. Bridge's collection.

* Skull. Chili. From Mr. Bridge's collection.

ECHIMYS, Geoff.

The RED-TAILED ECHIMYS. *Echimys myosuros.*
Skull. Tropical America, Bahia.

ASCOMYS, Geoff.

The EGYPTIAN ASCOMYS. *Ascomys dimidiatus.*
* Skull. Egypt. From the Stockholm Museum.

PETROMYS, A. Smith.

The ROCK MOUSE. *Petromys typicus.*
Skull. South Africa. From the South African Museum.

HYSTRIX, Linn.

The PORCUPINE. *Hystrix cristata.*
Skull. Xanthus. Presented by G. Scharf, Jun., Esq.
Skull, adult.

The SAYAL. *Hystrix leucurus.*
Two Skulls. India. Presented by B. H. Hodgson, Esq.
Bones of the body, without limbs.

ERETHIZON, F. Cuv.

The CAWQUAW or URSON. *Erethizon dorsatum.*
* Skull. Central America.

SPIGGURUS, F. Cuv.

The ORICO. *Spiggurus insidiosa.*
* Skull, young. Brazils. From Mr. Brandt's collection.
Skull, young. Brazils.

CHÆTOMYS, Gray.

The QUILLED RAT. *Chætomys subspinosis.*
* Skull. Brazils. From Mr. Brandt's collection. The specimen
described in the Proc. Zool. Soc. for 1843, p. 21, and figured
in the 'Voyage of the Sulphur,' pl. fig.
* Skull. Brazils. From Mr. Brandt's collection.

CERCOLABES, Brandt.

The COENDOO. *Cercolabes prehensilis.*
Skeleton. Brazils.
* Skull, young.

DASYPROCTA, Illiger.

The AGOUTI. *Dasyprocta Aguti.*
Skeleton. From Mr. Brandt's collection.

DOLICHOTIS, Desm.

The MARA. *Dolichotis Patachonicus.*
* Skull and imperfect Skeleton. South America. Presented by
the Earl of Derby.
* Skull, young. Chili. From Mr. Bridge's collection.

CÆLOGENYS, F. Cuv.

The YELLOW PACA. *Cælogenys fulvus.*
Skull. Trinidad. Presented by Joseph Wright, Esq.

The SOOTY PACA. *Cælogenys Paca.*
Skull. South America.
Skull. Tropical America.
* Skull. Tropical America.
Skeleton. From Mr. Brandt's collection.

HYDROCHÆRUS, Brisson.

The CAPYBARA. *Hydrochærus Capybara.*
Skull, imperfect. Tropical America.
* Skull, adult. Tropical America.

CAVIA, Klein.

The CAVY or GUINEA PIG. *Cavia Aperœa.*
Skeleton. From Mr. Brandt's collection.
Skull, female. London. Presented by Mr. J. Baker.
* Skull.

KERODON, F. Cuv.

The GRAY ROCK CAVY. *Kerodon Kingii.*
* Skull. Bolivia. From Mr. Bridge's collection.
* Skull. Chili. From Mr. Bridge's collection.

LEPUS, Linn.

The RABBIT. *Lepus cuniculus.*
Two Skulls, (tame var.) Nearly double the size of the wild ones.
London. Presented by Mr. George.
Skull, wild. England. Presented by Mr. J. Baker.
Skull.
Skull.
Skull. Angora Var. Presented by Miss Inglis.

The REKALEK or POLAR HARE. *Lepus Arcticus.*
 Skull. Greenland.
 Skull. Greenland.

The BLACK HARE. *Lepus Altaicus?*
 Skull. Russia. From Mr. Brandt's collection.

The EGYPTIAN HARE. *Lepus Aegyptius.*
 Skull. Egypt.
 * Skull. Sennaar.

LAGOMYS, *Geoff.*

The OGOTONA. *Lagomys ogotona.*
 * Skull. Russia. From Mr. Brandt's collection.

The SADAJAC. *Lagomys alpinus.*
 * Skull. Siberia. From Mr. Brandt's collection.

The CALLING HARE. *Lagomys pusillus.*
 * Skull. Siberia. From Mr. Brandt's collection.

The REDDISH SULGAN. *Lagomys rufescens.*
 * Skull. India, Rocky Hills, Cabul. Presented by the Hon.
 East India Company.
 * Skull, imperfect. India, Rocky Hills, Cabul. Presented by
 the Hon. East India Company.

The INDIAN SULGAN. *Lagomys nipalensis.*
 Skull, in a bad state. Nepal. Presented by B. H. Hodgson,
 Esq.
 Skull. Nepal. Presented by B. H. Hodgson, Esq.

LAGOTIS, *Bennett.*

CUVIER'S LAGOTIS. *Lagotis Cuvieri.*
 * Skull. Chili. From Mr. Bridge's collection.
 * Skull, imperfect. Chili. From Mr. Bridge's collection.

The CHINCHILLA. *Chinchilla laniger.*
 Skull. Peru. Presented by W. Watson, Esq.
 Skull. Peru.

LAGOSTOMUS, *Brookes.*

The VISCACHA. *Lagostomus trichodactylus.*
 * Skull. Chili. From Mr. Bridge's collection.

HELAMYS, *F. Cuv.*

The SPRING HAAS. *Helamys Capensis.*
 Teeth. Cape of Good Hope.

DIPUS, Linn.

The ROUGH-FOOTED GERBOA. *Dipus hirtipes.*
Skull. Sennaar. From the Stockholm Collection.

Skull and horns of male. Nepal. Presented by B. H. Hodgson, Esq.

Skull and horns of male. Nepal.

Skull of a female. Presented by B. H. Hodgson, Esq.

Skull and horns of adult. Presented by B. H. Hodgson, Esq.

Skull and horns of adult. Presented by B. H. Hodgson, Esq.

Separate horns. Presented by B. H. Hodgson, Esq.
 Separate horns. Presented by B. H. Hodgson, Esq.

PANOLIA, Gray.

The ROUND-HORNED *PANOLIA* OR *SUNGNAI*. *Panolia Eedii.*
 Horns. India.
 A large pair of horns, cylindrical, and with two small snags near the tip. India. Presented by B. H. Hodgson, Esq.
 A smaller pair of horns, rather compressed, and with one large and two short snags near the tip. India. Presented by B. H. Hodgson, Esq.
 Skull and horns, with one large and one small snag near the tip. India.
 Skull and horns, with one large and two small snags near the tip. India.
 Skull and horns, with one small snag near the tip. India.

The BROAD-HORNED *PANOLIA*. *Panolia platyceros.*
 Horns. India.

AXIS, H. Smith.

The *AXIS*, *CHITTRA* OR *CHAATUL*. *Axis maculata.*
 Horns on frontal bone, slender, elongate, warty. India.
 Horns on frontal bone, slender, elongate. India.
 Horns on frontal bone, slender, elongate, simple. India.
 Skull and horns of the normal state. Nepal. Presented by B. H. Hodgson, Esq.
 Horns of the usual form, with two snags near the base of the right and one on the left side. Nepal. Presented by B. H. Hodgson, Esq.
 Horns, with three small snags near the base and a short terminal beam. Nepal. Presented by B. H. Hodgson, Esq.
 Horns on frontal bone, elongate, and very warty. Nepal. Presented by B. H. Hodgson, Esq.
 Skull and horns. India.
 Horns on frontal. India. "
 Horns on frontal. India.
 Horns on frontal. India.
 Horns on frontal, smooth. India.
 Horns on frontal, very warty. India.
 Horns on frontal bone, with two snags near the base of the left and one on the right side. Nepal. Presented by B. H. Hodgson, Esq.
 Horns on frontal bone.

HYELAPHUS, Sundev.

The LUGNA, PARR or SHGARIAH. *Hyelaphus porcinus.*
Skull of the female. Nepal. Presented by B. H. Hodgson, Esq.

Skull, with horns. Nepal. Presented by B. H. Hodgson, Esq.
Horns, separate. Nepal. Presented by B. H. Hodgson, Esq.
Skull, with horns.

Skull, with horns. India.

Horns on frontal bone. India.

Horns, separate. India. Presented by General Hardwicke.

Horns, separate. India. Presented by General Hardwicke.

Horns, separate. India. Presented by General Hardwicke.

Two horns, single, not forked at the tip.

Skull and horns, var. frontal snag elongated and thick.

RUSA, H. Smith.

The SAMBUR DEER. *Rusa Aristotelis.*
Single horn. India. Exeter Change Menagerie. Presented by Edward Cross, Esq.

Horns on frontal bone. India.

Two single horns, upper branches more equal. India.

Horns on frontal bone, like the last but thicker, heavier and more granular.

Horns on frontal bone, like the last, but the left horn has a large posterior branch at the fork.

Horns on frontal bone, like the last, but rather smaller, hinder branch of fork longest, the left one with a posterior branch in the middle. India. Presented by Mrs. Wright.

Horns on frontal bone, like the last, but larger and without posterior branch.

Horn of frontal bone, one-third smaller.

Single horn, simple, from a castrated animal?

Head and horns with skin. India. Presented by E. Cross, Esq.

Head of a female. Himalaya.

Skull of young male. Nepal. Presented by B. H. Hodgson, Esq.

Skull of adult female. Nepal. Presented by B. H. Hodgson, Esq.

Skull of young female. Nepal. Presented by B. H. Hodgson, Esq.

Brocket horns on frontal. Nepal. Presented by B. H. Hodgson, Esq.

Three pairs of horns, second year. Nepal. Presented by B. H. Hodgson, Esq.

- Single horn of the first year.
 Horns on frontal bone, hinder upper branch turned back.
 Horns, very long, thick, with very short thick frontal and submedian branch on one.
 Horns, apex forked. Himalaya. Presented by the Rev R. Everest.
 Horns on frontal bone, apex simple. India.
 A pair of horns. India. Presented by B. H. Hodgson, Esq.
 A pair of very large thick horns, with rather long frontal snag, the left with a large posterior process. India. Presented by B. H. Hodgson, Esq.
 A pair of very large thick horns, with rather long frontal snag. India. Presented by B. H. Hodgson, Esq.
 Three pair of large horns, with moderate frontal, small, the hinder upper snag rather the longest. India. Presented by B. H. Hodgson, Esq.
 A pair of similar, but rather slenderer and more elongate horns. India. Presented by B. H. Hodgson, Esq.
 A pair of large horns, with rather elongated front snag, the front upper snag rather longest, the horns rather close together. India. Presented by B. H. Hodgson, Esq.
 A pair of large horns, with very long frontal snags, the upper snag rather the longest. India. Presented by B. H. Hodgson, Esq.
 A pair of horns, the right like the former, the left quite simple, subulate. India. Presented by B. H. Hodgson, Esq.
 A pair of horns, one with a moderate and the other with a long frontal snag, the upper snag nearly equal. India. Presented by B. H. Hodgson, Esq.
 A pair of rather slender more elongate horns, with moderate frontal and short upper snags. India. Presented by B. H. Hodgson, Esq.
 A pair of horns, the beam not branched.
 Var. 4. Kalo Jarai. *Cervus heterocerus*.
 A pair of the horns. India. Presented by B. H. Hodgson, Esq.
 KUHL'S STAG. *Rusa Kuhlii*.
 Femur and Tibia. Java.
- MUNTJACUS, Gray.
- The KIJANG OR MUNTJAC, KAKER OR BARKING DEER. *Muntjacus vaginalis*.
 Head of male and horns. Northern Circars.
 Head and horns of male. Deccan. Presented by Colonel Sykes, F.R.S.
 Skull and horns. Nepal. Northern Circars.

- Skull and horns. Nepal. Presented by B. H. Hodgson, Esq.
 Base of skull and horns. Nepal.
 Skull.
 Two skulls of a male, with horns, differently developed. Presented
 by B. H. Hodgson, Esq.
 Skull, female. Presented by B. H. Hodgson, Esq.
 A pair of large horns on shortish peduncles. Presented by B.
 H. Hodgson, Esq.
 A pair of small horns on very long slender peduncles. Presented
 by B. H. Hodgson, Esq.
 Vertebra, pelvis, and leg bones. Presented by B. H. Hodgson,
 Esq.

RANGIFER, H. Smith.

- The REIN DEER. *Rangifer Tarandus.*
- Skeleton. Presented by Sir T. M. Wilson, Bart.
- Skull, large, horns small, slender branches small subulate, middle branch largest.
- Skull and horns large, long, slender (*Cuv. Oss. Foss. t. 4, f. 20*) ; no basal branch to right horn.
- Skull and horns ; horns, large, long, slender, apex broad, branched behind, no basal branch to right horn.
- Horns, middle sized, the lower branch of left elongate, forked ; of right horn very broad, palmated. North America. Presented by Captain Sir John Franklin, R.N.
- Horns small, the lower and middle branch of right horn, confluent palmated. North America. Presented by Captain Sir John Franklin, R.N.
- Horns, large (*Cuv. Oss. Foss. t. 4. f. 17*), basal branch of left horn large palmated ; of right smaller, lobed.
- Horns, large (*Cuv. Oss. Foss. t. 4, f. 9*), basal branch of left horn very large, palmated ; of right, simple subulate. Siberia ?
- Horns, long, elongated, slender, erect, lower branches elongate lobed, top broad lobed.
- Horn, middle sized (*Cuv. Oss. Foss. t. 4, f. 8*), lower branch of left horn simple ; of right broad, palmated. North America. Presented by Captain Sir John Franklin, R.N.
- Horns, large, long, slender, upper back branches recurved. North America. Presented by Captain Sir John Franklin, R.N.
- Horns, large, long, slender (*Cuv. Oss. Foss. t. 4, f. 13*). Presented by Captain Sir John Franklin, R.N.
- Horns, very small, basal branch subulate, upper and medial branch bifid.
- Horns, large, with the basal branch of each horn dilated, palmated (*Cuv. Oss. Foss. t. 4, f. 17*). From Mr. Brooke's Museum.

Horns of the year. (*Cuv. Oss. Foss. t. 4, f. 1.*) Knowsley. Presented by the Earl of Derby.

Horns of the year.

Horns, very large, with the head stuffed. Newfoundland.

ALCES, H. Smith.

The ELK. *Alces palmatus.*

Hoofs. Labrador.

Several pair of horns.

Hoof and shank bones.

Two single horns of young.

Horns, with the head stuffed. Russia. Presented by Edward Caley, Esq.

Single horn. Udoholm, Sweden. Presented by the Earl of Selkirk.

Fam. 2. EQUIDÆ.

EQUUS, Linn.

The HORSE. *Equus Caballus.*

Skull.

Skull, larger.

Skull of an English horse. Presented by B. H. Hodgson, Esq.

Pelvis. From Dr. Mantell's collection.

ASINUS, Gray.

The DSHIKKETEI or WILD Ass. *Asinus Hemionus.*

* Skull and bones of body. Asia. Presented by the Earl of Derby.

The ZEBRA. *Asinus Zebra.*

* Skeleton. South Africa.

Skull. South Africa.

Skull of male. Between Zebra and Ass.

Fam. 3. ELEPHANTIDÆ.

ELEPHAS, Linn.

The ELEPHANT. *Elephas Indicus.*

Skulls of Dauntelah and Mooknah varieties. Presented by J. Corse Scott, Esq. The specimens described by Mr. Corse, *Phil. Trans. 1799*, ii. 205.

Skeleton. India. Presented by Sir Jasper Nichols and General Thomas Hardwicke.

Tusks. Ceylon. Presented by H. R. H. the Duke of Sussex.

The base of two tusks of the skeleton. India.

LOXODONTA, F. Cuv.

The AFRICAN ELEPHANT. *Loxodonta Africana.*
 Tooth. South Africa. Presented by John Lee, L.L.D.
 * Skull, young.

TAPIRUS, Brisson.

The MBOREBI or TAPIR. *Tapirus terrestris.*
 Skull. South America.
 Skull. South America.
 Skull. South America. Presented by J. Miers, Esq.

The KUDA, AYER or TENNU. *Tapirus Malayanus.*
 Skeleton. Sumatra.

SUS, Linn.

The BOAR. *Sus scrofa.*
 Skull. Xauthus. Presented by Sir Charles Fellowes.
 The NEILGHERRY HOG. *Sus affinis.*
 Skull. India, Neilgheries. From Mr. Turner's collection.
 The CAPE BOAR. *Sus capensis.*
 Skull. South Africa.
 The INDIAN WILD BOAR. *Sus Indicus.*
 Skull. India.
 Skull. Presented by General Hardwicke.
 Skull of the Wild Boar of the Plain, or Taray. Presented by B. H. Hodgson, Esq.
 Skull of the Wild Boar of the Plain, or Taray. Presented by B. H. Hodgson, Esq.
 Skull of adult. Presented by B. H. Hodgson, Esq.
 Skull of adult. Presented by B. H. Hodgson, Esq.
 A half-grown skull and three young specimens of the Wild Boar of the hills. Presented by B. H. Hodgson, Esq.
 Skull of adult. Malabar.
 The GAMBIAN HOG. *Sus Gambianus.*
 Skull. Gambia.

BABIRUSSA, F. Cuv.

The BABIRUSSA. *Babirussa alfurus.*
 Skull. Malacca.
 Skull. Malacca.
 Skull. Malacca. Presented by General Hardwicke.
 Skull. Tusks very much developed.

PHACOCHÆRUS, Cuv.

The VALKE VARK or ENGAALO. *Phacochoerus Africanus.*
 Skull, small, female? South Africa. Presented by J. C. Taunton,
 Esq.
 Skull, large, male? Cape de Verd. Presented by Thomas
 Tatum, Esq.

DICOTYLES, Cuv.

The PECARI or TAJACU. *Dicotyles Tajacu.*
 Skull of adult. Brazils.
 Skull of adult. Organ Mountains, Brazils.

The TAGNICOTE. *Dicotyles labiatus.*
 * Skull. Brazils.
 Skull, young.

RHINOCEROS, Linn.

The RHINOCEROS. *Rhinoceros unicornis.*
 Skull. India. Presented by C. Gascoin, Esq.
 Skull of a just-born specimen. Nepal. Presented by B. H.
 Hodgson, Esq.
 Left side of a lower-jaw. Nepal. Presented by B. H. Hodgson,
 Esq.
 Skull. India?
 Skull. India?

HYRAX, Herm.

The KLIP-DAS. *Hyrax capensis.*
 Skull.
 The ASHKOKO. *Hyrax Abyssinicus.*
 Skull. Abyssinia. Presented by J. Reid, Esq.
 Skull. Abyssinia. Presented by J. Burton, Esq.

HIPPOPOTAMUS, Linn.

The ZEEKOE or RIVER HORSE. *Hippopotamus amphibius.*
 Skull, adult. South Africa.
 The front of the lower-jaw of adult. South Africa.
 Tusk, very much elongated and curved.

Fam .4. *DASIPODÆ.**MANIS, Linn.*

The MANY-SHIELDED PHATOGON. *Manis multiscutata.*
 * Skull. West Africa.

The BADGERIT or BAJJERKEIT. *Manis pentadactyla.*
Some bones of half-grown animal. Nepal. Presented by B. H.
Hodgson, Esq.

DASYPUS, Linn.

The ARMADILLO. *Dasypus sexcinctus.*
* Skull. South America.
* Skull. South America.

TATUSIA, F. Cuv.

The APARA. *Tatusia tricincta.*
Skull. Bolivia. From Mr. Bridges' collection.

The PEBA. *Tatusia septemcincta.*
Skeleton. From Mr. Brandt's collection.
Skeleton. South America.
Skeleton, adult. South America.

The PITCHEY. *Tatusia minuta.*
* Skull. From Mr. Bridges' collection.

XENURUS, Wagler.

The TATOUAY. *Xenurus unicinctus.*
* Skull. South America.
* Skull. South America.
* Skull, young. South America.

PRIODONTES, F. Cuv.

The TATOU. *Priodontes gigas.*
Skeleton. From Mr. Brandt's collection.

TAMANDUA, Gray.

The TAMANDUA. *Tamandua tetradactyla.*
Skeleton. From Mr. Brandt's collection.

CYCLOTHURUS, Gray.

The ANT-EATER. *Cyclothurus didactylus.*
Skeleton, imperfect. Pernambuco. Presented by J. P. G.
Smith, Esq.

PLATYPUS, Shaw.

The MULLINGANG. *Platypus anatinus.*
Skeleton. From Dr. Mantell's collection.
Skull, male. Shoalaven, Australia. Presented by J. Macgillivray, Esq.

CHOLÆPUS, Illiger.

The UNAU. *Cholæpus didactylus.*

* Skull, adult. Columbia.

* Skull, half-grown.

* Teeth.

BRADYPUS, Linn.

The GIPAKEIOU. *Bradypus torquatus.*

Skeleton. From Mr. Brandt's collection.

The SLOTH or ATI. *Bradypus tridactylus.*

Skull and imperfect skeleton. Pernambuco. Presented by J. P. G. Smith, Esq.

AVES.

Order I. ACCIPITRES.

Fam. 1. GYPOETIDÆ.

GYPÆTOS, Storr.

The BEARDED VULTURE. *Gypætos barbatus.*

Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

Fam. 2. SARCORAMPHIDÆ.

SARCORAMPHUS, Dum.

The CONDOR VULTURE. *Sarcoramus gryphus.*

Skull. From Mr. Warwick's collection.

Fam. 3. VULTURIDÆ.

GYPS, Sav.

The FULVOUS VULTURE. *Gyps fulvus.*

Skeleton. Presented by B. H. Hodgson, Esq.

Sternum. Nepal. Presented by B. H. Hodgson, Esq.

Two Skulls. Nepal. Presented by B. H. Hodgson, Esq.

Sternum. Europe. From M. Lefèvre's collection.

VULTUR, Linn.

The ARABIAN VULTURE. *Vultur monachus.*

Sternum. Nepal. Presented by B. H. Hodgson, Esq.

Two Skulls. Nepal. Presented by B. H. Hodgson, Esq.

Fam. 4. FALCONIDÆ.

BUTEO, *Cuv.*

The COMMON BUZZARD. *Buteo vulgaris.*

Sternum. England.

Sternum. England. Presented by John Ray, Esq.

Four Sternæ. Europe. From M. Lefèvre's collection.

Sternum. (*F. mutans*). Europe. From M. Lefèvre's collection.

The LONG-LEGGED BUZZARD. *Buteo rufinus.*

Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

ARCHIBUTEO, *Brehm.*

The WHITE-BREASTED BUZZARD. *Archibuteo strophiatus.*

Sternum. Nepal. Presented by B. H. Hodgson, Esq.

· AQUILA, *Mähr.*

The GOLDEN EAGLE. *Aquila chrysaetos.*

Trachea. England.

Skeleton. England.

The IMPERIAL EAGLE. *Aquila imperialis.*

Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

BONELLI'S EAGLE. *Aquila Bonelli.*

Three Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

HALIASTUR, *Selby.*

The PONDICHERRY EAGLE. *Haliastur indus.*

Sternum. Nepal. Presented by B. H. Hodgson, Esq.

SPIZAETUS, *Vieill.*

The CRESTED EAGLE. *Spizaetus lymnætus.*

Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The BEAUTIFUL-CRESTED EAGLE. *Spizaetus nipalensis.*

Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

CIRCAETUS, *Vieill.*

The UNDULATED BACHA. *Circaetus undulatus.*

Sternum. Nepal. Presented by B. H. Hodgson, Esq.

PANDION, Sav.

The OSPREY. *Pandion haliaetus.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.
 Three Sternæ. Europe. From M. Léfeuvre's collection.

PONTOAETUS, Kaup.

The MARINE EAGLE. *Pontoaetus ichthyaetus.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

HAIETUS, Sav.

MACE'S EAGLE. *Haliætus Maceii.*
 Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

FALCO, Linn.

The LANNER FALCON. *Falco lanarius.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The JUGGER FALCON. *Falco jugger.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The PEREGRINE FALCON. *Falco peregrinus.*
 Sternum. England. Presented by T. Ingall, Esq.
 Sternum. England. Purchased.
 Sternum. England. Presented by John Ray, Esq.
 Three Sternæ. Europe. From M. Léfeuvre's collection.
 Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

The RED-NAPED FALCON. *Falco peregrinoides.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The MERLIN. *Falco æsolon.*
 Sternum. England. Presented by T. Ingall, Esq.
 Sternum. England.
 Sternum. England. Presented by John Ray, Esq.
 Two Sternæ. Europe. From M. Léfeuvre's collection.

The HOBBY FALCON. *Falco subbuteo.*
 Sternum. England. Presented by John Ray, Esq.
 Skull. England. Presented by John Ray, Esq.

TINNUNCULUS, Vieill.

The KESTREL FALCON. *Tinnunculus alaudarius.* *Falco tinnunculus, Linn.*
 Sternum. England. Presented by T. Ingall, Esq.
 Skull. Egypt. Presented by Dr. Turnbull Christie.
 Sternum. England. Presented by John Ray, Esq.
 Sternum. Europe. From M. Léfeuvre's collection.
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The LESSER KESTREL. *Falco tinnunculoides?*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

JERAX, Vigors.

The WHITE-NAPED FALCON. *Jerax bengalensis.*
Two Sterna. Nepal. Presented by B. H. Hodgson, Esq.

BAZA, Hodgs.

The COHY FALCON. *Baza lophotes.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

PERNIS, Cuv.

The HONEY BUZZARD. *Pernis apivorus.*
Sternum. Europe. From M. Lefevre's collection.

The CRESTED HONEY BUZZARD. *Pernis cristata.*
Sternum. Presented by B. H. Hodgson, Esq.

MILVUS, Cuv.

The CHEELA KITE. *Milvus cheela.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The KITE. *Milvus regalis.*
Sternum. England. Presented by John Ray, Esq.
Sternum. Europe. From M. Lefevre's collection.

ELANUS, Sav.

The BLACK-WINGED FALCON. *Elanus melanopterus.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

ASTUR, Lacep.

The GOSHAWK. *Astur palumbarius.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.
Sternum. Europe. From M. Lefevre's collection.

The THREE-STREAKED HAWK. *Astur trivirgatus.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

POLIORNIS, Kaup.

The TEESA HAWK. *Poliornis teesa.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

ACCIPITER, Briss.

The SPARROW-HAWK. *Accipiter nisus.*
Sternum, male. England. Presented by T. Ingall, Esq.
Sternum, female. England. Presented by T. Ingall Esq.

- Sternum. Nepal. Presented by B. H. Hodgson, Esq.
 Sternum. England.
 Sternum. England. Presented by John Ray, Esq.
 Sternum. Europe. From M. Lefevre's collection.

MICRONISUS, Gray.

- BROWN'S HAWK. *Micronisus badius.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

- The HEN HARRIER. *Circus cyaneus.*
 Two Sternæ. England.
 Sternum. England. Presented by John Ray, Esq.
 Sternum. Europe. From M. Lefevre's collection.
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

- The ASH-COLOURED FALCON. *Circus cinerascens.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.
 Sternum. England. Presented by John Ray, Esq.
 Sternum. Europe. From M. Lefevre's collection.

- The MOOR BUZZARD. *Circus aeruginosus.*
 Sternum. England.
 Sternum. England. Presented by John Ray, Esq.
 Skull. England. Presented by John Ray, Esq.
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.
 Sternum. Europe. From M. Lefevre's collection.

Fam. 5. STRIGIDÆ.

ATHENE, Boie.

- The *Athene connivens?*
 Skeleton (without head). South Australia. From Mr. Warwick's collection.

- The INDIAN OWL. *Athene brama.*
 Sternum. Presented by B. H. Hodgson, Esq.

- The HIMALAYAH OWL... *Athene ceculoides.*
 Sternum. Presented by B. H. Hodgson, Esq.

BUBO, Sibb.

- The ORIENTAL OWL. *Bubo orientalis.*
 Sternum. Presented by B. H. Hodgson, Esq.
 The COROMANDEL EARED OWL. *Bubo coromander.*
 Sternum. Presented by B. H. Hodgson, Esq.

EPHALTES, Keys. & Bl.

The SCOPS-EARED OWL. *Ephialtes scops.*
Sternum. From M. Lefevre's collection.

The LEMPIJI OWL. *Ephialtes lempiji.*
Sternum. Presented by B. H. Hodgson, Esq.

The CUSIAL EARED OWL. *Ephialtes sunia.*
Sternum. Presented by B. H. Hodgson, Esq.

KETUPU, Less.

The YELLOW-FOOTED KETUPA. *Ketupu flavipes.*
Sternum. Presented by B. H. Hodgson, Esq..

SYRNİUM, Sav.

The BROWN OWL. *Syrnium aluco.*
Sternum. England. Presented by T. Ingall, Esq.
Sternum. England. Presented by John Ray, Esq.

OTUS, Cuv.

The LONG-EARED OWL. *Otus vulgaris.*
Sternum. England. Presented by T. Ingall, Esq.
Sternum. England. Presented by John Ray, Esq.

The SHORT-EARED OWL. *Otus brachyotus.*
Sternum. England. Presented by T. Ingall, Esq.
Trachea. England.
Sternum. England. Presented by John Ray, Esq.
Sternum. Europe. From M. Lefevre's collection.

STRIX, Linn.

The BARN OWL. *Strix flammea.*
Sternum. England. Presented by T. Ingall, Esq.
Skull. Egypt. Presented by Dr. Turnbull Christie.
Sternum. England. Presented by John Ray, Esq.
Sternum. Europe. From M. Lefevre's collection.
Sternum. Presented by B. H. Hodgson, Esq.

The *Strix* — ?
Skeleton. Chili. From Mr. Warwick's collection.

Order II. PASSERES.

Tribe 1. FISSIROSTRES.

Sub-tribe. 1. FISSIROSTRES NOCTURNÆ.

Fam. 1. CAPRIMULGIDÆ.

PODARGUS, *Cuv.*

The COLD-RIVER GOATSUCKER. *Podargus humeralis.*
Skull. South Australia. From Mr. Warwick's collection.

The AZURE KINGFISHER. *Alcyone azurea.*
 Skeleton. Port Essington. From Mr. Warwick's collection.

Fam. 6. MEROPIDÆ.

MEROPS, *Linn.*

The COMMON BEE-EATER. *Merops apiaster.*
 Sternum. Europe. From M. Lefevre's collection.
 Skull. Egypt. Presented by Dr. Turnbull Christie.

NYCTIORNIS, *Swains.*

ATHERTON'S NYCTIORNIS. *Nyctiornis Atherstoni.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

Tribe 2. TENUIROSTRES.

Fam. 1. UPUPIDÆ.

UPUPA, *Linn.*

The COMMON HOOPOE. *Upupa epops.*
 Skeleton. Egypt. From Mr. Warwick's collection.
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

Fam. 2. NECTARINIDÆ.

NECTARINIA, Ill.

The GOULPOURAL SUN BIRD. *Nectarinia goalpariensis.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The RED-TAILED SUN BIRD. *Nectarinia ignicauda.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

ARACHNOTHERA, Temm.

The LONG-BILLED SPIDER-HUNTER. *Arachnothera longirostris.*
Skeleton. From M. Frank's collection.

The GREAT SPIDER-HUNTER. *Arachnothera magna.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

DICÆUM, Cuv.

The YELLOW DICÆUM. *Dicæum flavum.*
Skeleton. From M. Frank's collection.

Fam. 4. MELEPHAGIDÆ.

PROSTHEMADERA, Gray.

The POE HONEYEATER. *Prosthemadera novæ zealandiæ.*
Imperfect skeletons. New Zealand. Presented by the Admiralty.

MELIPHAGA, Lewin.

The NEW HOLLAND HONEYEATER. *Meliphaga novæ hollandiæ.*
Skull. New South Wales.

ANTHOCHÆRA, Vig. & Horsf.

LEWIN'S ANTHOCHÆRA. *Anthochæra Lewini.*
Skull. New South Wales.

TROPIDORHYNCHUS, Vig. & Horsf.

The SILVER-HEADED TROPIDORHYNCHUS. *Tropidorhynchus argenticeps.*
Skeleton. Port Essington. From Mr. Warwick's collection.

PHYLLORNIS, Boie.

The GOLDEN-BELLIED PHYLLORNIS. *Phyllornis Hardwickii.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The GOLDEN-FRONTED PHYLLORNIS. *Phyllornis aurifrons.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

Fam. 5. CERTHIDÆ.**CERTHIA, Linn.**

The COMMON CREEPER. *Certhia familiaris.*
Skull. England. Presented by John Ray, Esq.

SITTA, Linn.

The EUROPEAN NUTHATCH. *Sitta europaea.*
Sternum. England. Presented by John Ray, Esq.
Skull. England. Presented by John Ray, Esq.

The NEPAL NUTHATCH. *Sitta nipalensis, Hodgs.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The SOCIAL NUTHATCH. *Sitta frontalis.*
Skeleton. From M. Frank's collection.

TROGLODYTES, Vieill.

The EUROPEAN WEEV. *Troglodytes europaeus.*
Sternum. England. Presented by John Ray, Esq.
Skull. England. Presented by John Ray, Esq.

Tribe 3. DENTIROSTRES.**Fam. 1. LUSCINIDÆ.****PRINIA, Horsf.**

The LONG-TAILED PRINIA. *Prinia criniger.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

CALAMODYTA, Meyer.

The SEDGE WARBLER. *Calamodryta phragmitis.*
Sternum. England. Presented by John Ray, Esq.

REGULUS, Cuv.

The GOLDEN-CRESTED WREN. *Regulus cristatus.*
Sternum. England. Presented by T. Ingall, Esq.

PHYLLOPNEUSTE, Meyer.

- The CHIFFCHAFF. *Phyllopneuste hippolais.*
 Sternum. England. Presented by T. Ingall, Esq.
 Sternum. England. Presented by John Ray, Esq.
 Skull. England. Presented by John Ray, Esq.

SYLVIA, Lath.

- The BLACK CAP. *Sylvia atricapilla.*
 Sternum. England. Presented by T. Ingall, Esq.

CULICIPETA, Blyth.

- The STRIPED-HEADED CULICIPETA. *Culicipeta Burkii.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

COPSYCHUS, Wagl.

- The DIAL BIRD. *Copsychus saularis.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

RUTICILLA, Brehm.

- The SOOTY RUTICILLA. *Ruticilla fuliginosa.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

MUSCISYLVIA, Hodgs.

- The WHITE-TAILED MUSCISYLVIA. *Muscisylvia leucura.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

GRANDALA, Hodgs.

- The CELESTIAL GRANDALA. *Grandala caelicolor.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

CYANECULA, Brehm.

- The BLUE-NECKED WARBLER. *Cyanecula suecica.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

BRADYPTERUS, Hodgs.

- The RED-TAILED SHORT-WING. *Bradypterus phænicuroides.*
 Two Sternae. Nepal. Presented by B. H. Hodgson, Esq.

ERYTHACUS, Cuv.

- The RED-BREASTED WARBLER. *Erythacus rubecula.*
 Sternum. England. Presented by T. Ingall, Esq.

SAXICOLA, Bechst.

- The WHEATEAR. *Saxicola oenanthe.*
 Sternum. England. Presented by T. Ingall, Esq.
 Sternum. England. Presented by John Ray, Esq.
 Skull. England. Presented by John Ray, Esq.
- The BLACK AND WHITE STONECHAT. *Saxicola caprata.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The STOUT STONECHAT. *Saxicola ferrea.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The STONECHAT. *Saxicola rubicola.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The WHINCHAT. *Saxicola rubetra.*
 Sternum. England. Presented by T. Ingall, Esq.

PETROICA, Swains.

- The HOODED FLYCATCHER. *Petroica cucullata.*
 Sternum. South Australia.

ACCENTOR, Bechst.

- The HEDGE SPARROW. *Accentor modularis.*
 Sternum. England. Presented by T. Ingall, Esq.

PARUS, Linn.

- The SULTAN TITMOUSE. *Parus sultaneus.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The NEPAL TITMOUSE. *Parus nipalensis.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The BLUE TITMOUSE. *Parus cœruleus.*
 Skull. England. Presented by John Ray, Esq.

The MARSH TITMOUSE. *Parus palustris.*
 Skull. England.

The GREAT TITMOUSE." *Parus major?*
 Sternum. England. Presented by T. Ingall, Esq.

The COLE TITMOUSE. *Parus atter.*
 Skull. England.

ORITES, Maehr.

- The LONG-TAILED TITMOUSE. *Orites caudata.*
 Sternum. England. Presented by T. Ingall, Esq.

CALAMOPHILUS, Leach.

The BEARDED TITMOUSE. *Calamophilus biarmicus.*
 Three Sternæ. England. Presented by T. Ingall, Esq.
 Sternum. England. Presented by John Ray, Esq.
 Skull. England. Presented by John Ray, Esq.

ZOSTEROPS, Vig. & Horsf.

The WHITE-EYED WARBLER. *Zosterops madraspatana.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

YUHINA, Hodgs.

The RUSTY-NAPED YUHIN. *Yuhina occipitalis.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

MYZORNIS, Hodgs.

The FIRE-TAILED MYZORNIS. *Myzornis pyrrhura.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

STRACHYRIS, Hodgs.

The RED-EYED STRACHYRIS. *Strachyris pyrrhops.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

MOTACILLA, Linn.

HODGSON'S WAGTAIL. *Motacilla luzoniensis.*
 Sterni. Nepal. Presented by B. H. Hodgson, Esq.

The COMMON WAGTAIL. *Motacilla alba.*
 Sternum. England. Presented by T. Ingall, Esq.
 Skull. England. Presented by John Ray, Esq.

The SKULL. *Motacilla* ____?
 Skull. Egypt. Presented by Dr. Turnbull Christie.

The GRAY WAGTAIL. *Motacilla boarula.*
 Sternum. England. Presented by John Ray, Esq.

BUDYTES, Cuv.

The YELLOW WAGTAIL. *Budytes flava.*
 Sternum. England. Presented by T. Ingall, Esq.
 Sternum. England. Presented by John Ray, Esq.

The LONG-LEGGED WAGTAIL. *Budytes calcarata.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

ENICURUS, Temm.

The SPOTTED ENICURUS. *Enicurus maculatus.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The SLATY ENICURUS. *Enicurus schistaceus.*
 Imperfect sternum. Nepal. Presented by B. H. Hodgson, Esq.

The RED-NAPED ENICURUS. *Enicurus velatus.*
Skeleton. From M. Frank's collection.

ANTHUS, Bechst.

The SKYLARK. *Anthus arvensis.*
Sternum. England. Presented by T. Ingall, Esq.

The WOODLARK. *Anthus arboreus.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

Fam. 2. TURDIDÆ.

PITTA, Vieill.

The SHORT-TAILED PITTA. *Pitta brachyura.*
Skeleton. From M. Frank's collection.

The NEPAL PITTA. *Pitta nipalensis.*
Skull and Sternum. Nepal. Presented by B. H. Hodgson,
Esq.

MYIOPHONUS, Temm.

TEMMINCK'S MYIOPHONUS. *Myiophonus Temminckii.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The BLUE MYIOPHONUS. *Myiophonus cyaneus.*
Skeleton. From M. Frank's collection.

CINCLUS, Bechst.

PALLAS'S CINCLUS. *Cinclus Pallasii.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

PETROCOSYPHUS, Boie.

The ORANGE-HEADED PETROCOSYPHUS. *Petrocossyphus citrinus.*

Two Sternæ. Presented by B. H. Hodgson, Esq.

The THRUSH-BILLED PETROCOSYPHUS. *Petrocossyphus cinclorhynchus.*

Sternum. Nepal. Presented by B. H. Hodgson, Esq.

ZOOTHERA, Vigors.

The MOUNTAIN ZOOTHERA. *Zootera monticola.*
Skull. Nepal. Presented by B. H. Hodgson, Esq.

TURDUS, Linn.

The MISSEL THRUSH. *Turdus viscivorus.*
Sternum. England. Presented by T. Ingall, Esq.

The FIELDFARE. *Turdus pilaris.*
Sternum. England. Presented by T. Ingall, Esq.
Sternum. England. Presented by John Ray, Esq.

The SONG THRUSH. *Turdus musicus.*
Sternum. England. Presented by T. Ingall, Esq.

The REDWING THRUSH. *Turdus iliacus.*
Sternum. England. Presented by T. Ingall, Esq.

WHITE'S THRUSH. *Turdus Whiteii.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

The BLACK-BREASTED THRUSH. *Turdus atrogularis.*
Sternum. Presented by B. H. Hodgson, Esq.

The BLACKBIRD. *Turdus merula.*
Sternum. England. Presented by T. Ingall, Esq.
Skull. England.

The GRAY-WINGED THRUSH. *Turdus pæcilopterus.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The RED-BELLIED THRUSH. *Turdus erythrogaster.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

MIMUS, Boie.

The MOCKING BIRD. *Mimus Orpheus.*
Sternum. America.

GARRULAX, Less.

The WHITE-HEADED GARRULAX. *Garrulax leucolophus.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

The WHITE-THROATED GARRULAX. *Garrulax albicularis.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The NECKLACED GARRULAX. *Garrulax moniligera.*
Sternum? Nepal. Presented by B. H. Hodgson, Esq.

The BLACK-GORGET GARRULAX. *Garrulax pectoralis.*
Imperfect skeleton. Nepal. Presented by B. H. Hodgson, Esq.
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

TROCHALOPTERON, Hodgs.

The RED-THROATED TROCHALOPTERON. *Trochalopteron rufiangularis.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The SPINE-BEARING TROCHALOPTERON. *Trochalopteron? setafer.*
Skeleton. Nepal. Presented by B. H. Hodgson, Esq.

ACTINODURA, Gould.

The NEPAL ACTINODURA. *Actinodura nipalensis.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

PELLORNEUM, Swains.

The RUFOUS-HEADED PELLORNEUM. *Pellorneum ruficeps.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

TIMALIA, Horsf.

The HOODED TIMALIA. *Timalia mitrata.*
Skeleton. From M. Frank's collection.

MALACOCERCUS, Swains.

The GRAY MALACOCERCUS. *Malacocercus griseus.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

POMATORHINUS, Horsf.

The MOUNTAIN POMATORHINUS. *Pomatorhinus montanus.*
Skeleton. From M. Frank's collection.

The RUFOUS-CHEEKED POMATORHINUS. *Pomatorhinus erythrogenys.*

Two Imperfect Skeletons. Nepal. Presented by B. H. Hodgson, Esq.

ORIOLUS, Linn.

HODGSON'S ORIOLE. *Oriolus Hodgsonii.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

TRAILL'S ORIOLE. *Oriolus Traillii.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

HYPsipetes, Vigors.

The NEPAL HYPsipetes. *Hypsipetes psaroides.*
Imperfect skeleton. Nepal. Presented by B. H. Hodgson, Esq.

The GREEN HYPsipetes. *Hypsipetes viridis.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

SIBIA, Hods.

The LONG-TAILED SIBIA. *Sibia picaoides.*
Sternum. Presented by B. H. Hodgson, Esq.

TRICHOPHORUS, Temm.

The YELLOW-BELLIED TRICHOPHORUS. *Trichophorus flaveolus.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

HÆMATORNIS, Swains.

The WHITE HÆMATORNIS. *Hæmatornis caser.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The JOCOSE HÆMATORNIS. *Hæmatornis jocosus.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The WHITE-CHEEKED HÆMATORNIS. *Hæmatornis leucogenys.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The BLACK-HEADED HÆMATORNIS. *Hæmatornis melanochroa.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

HEMIPUS, *Hodgs.*

The YELLOW-WINGED HEMIPUS. *Hemipus flavula.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

Fam. 3. MUSCICAPIDÆ.

MUSCICAPA, *Linn.*

The SPOTTED FLYCATCHER. *Muscicapa griseola.*
Sternum. England. Presented by John Ray, Esq.
Skull. England. Presented by John Ray, Esq.

NILTAVA, *Hodgs.*

The BLACK-COLLARED NILTAVA. *Niltava sundara.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

SIPHIA, *Hodgs.*

The ORANGE-GORGET SIPHIA. *Siphia strophiata.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

Fam. 4. AMPHIDÆ.

MESIA, *Hodgs.*

The SILVER-EARED MESIA. *Mesia argentauris.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

PTERUTHIUS, *Swains.*

The RED-WINGED PTERUTHIUS. *Pteruthius erythropterus.*
Three Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

COCHOA, *Hodgs.*

The GREEN COCHOA. *Cochoa viridis.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

PERICROCOTUS, Boie.

The BLACK AND SCARLET PERICROCOTUS. *Pericrocotus speciosus.*

Three Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

The SHORT-BILLED PERICROCOTUS. *Pericrocotus brevirostris.*

Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

The Two Imperfect sternæ. Nepal. *Pericrocotus* — — —
Esq.

CAMPEPHAGA, Vieill.

MACE'S CAMPEPHAGA. *Campephaga Macei.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

The Sternum. South Australia. *Campephaga* — — ?
Presented by His Excellency Captain G. Grey.

The SOOTY CAMPEPHAGA. *Campephaga lugubris.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

ARTAMUS, Vieill.

The WHITE-BILLED ARTAMUS. *Artamus leucorhynchus.*
Skeleton. From M. Frank's collection.

The RUFOUS-BELLIED ARTAMUS. *Artamus fuscus.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

DICRURUS, Vieill.

The RACKET-TAILED DICRURUS. *Dicrurus grandis.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The GREAT-TAILED DICRURUS. *Dicrurus macrocercus.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

BRINGA, Hodgs.

The RACKET-TAILED BRINGA. *Bringa remifer.*
Skeleton. From M. Frank's collection.

CHIBIA, Hodgs.

The CRISHNA CROW. *Chibia hottentottus.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

CHAPTIA, Hodgs.

The BRONZE CHAPTIA. *Chaptia ænea.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

IRENA, Horsf.

The FAIRY IRENA. *Irena puella.*
Skeleton. From M. Frank's collection.

Fam. 5. LANIIDÆ.**TEPHRODORNIS, Swains.**

The JUNGLE-WOOD SHRIKE. *Tephrodornis pelvica.*
Three Sterna. Nepal. Presented by B. H. Hodgson, Esq.

LANIUS, Linn.

The RED-BACKED SHRIKE. *Lanius collurio.*
Sternum. England. Presented by T. Ingall, Esq.
Sternum. England. Presented by John Ray, Esq.

The BAGAH SHRIKE. *Lanius tephronotus.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The BAY-BACKED SHRIKE. *Lanius Hardwickii.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The BLACK-HEADED SHRIKE. *Lanius nigriceps.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

OREICA, Gould.

The CRESTED OREICA. *Oreica cristata.*
Skeleton. Western Australia. From Mr. Warwick's collection.

Tribe 4. CONIROSTRES.**Fam. 1. CORVIDÆ.****GARRULUS, Briss.**

The COMMON JAY. *Garrulus glandarius.*
Skull. England.
Sternum. England. Presented by John Ray, Esq.
Skull. England. Presented by John Ray, Esq.

The HIMALAYAH JAY. *Garrulus bispecularis.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

CISSA, Boie.

The RUFOUS-WINGED CISSA. *Cissa thalassina.*
Skeleton. Indian Archipelago. From M. Frank's collection.

PSILORHINUS, Rupp.

The RED-BILLED PSILORHINUS. *Psilorhinus sinensis.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

CRYPSIRINA, Vieill.

The CHANGEABLE CROW. *Crypsirina varians.*
Skeleton. From M. Frank's collection.

CONOSTOMA, Hodgs.

The HIMALAYAH CONOSTOMA. *Conostoma æmodium.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

DENDROCITTA, Gould.

The MACAO TREE CROW. *Dendrocitta sinensis.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

NUCIFRAGA, Briss.

The HIMALAYAH NUTCRACKER. *Nucifraga hemispila.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

PICA, Briss.

The MAGPIE. *Pica caudata.*
Sternum. England. Presented by T. Ingall, Esq.
Sternum. England.

CORVUS, Linn.

The RAVEN. *Corvus corax.*
Sternum. England. Presented by John Ray, Esq.

The ROOK. *Corvus frugilegus.*
Sternum. England. Presented by T. Ingall, Esq.

The CARRION CROW. *Corvus corone.*
Sternum. England. Presented by John Ray, Esq.

The JACKDAW. *Corvus monedula.*
Skull. England. Presented by John Ray, Esq.

The HOODED Crow. *Corvus cornix.*
Sternum. England. Presented by John Ray, Esq.
Sternum. Europe. From M. Lefevre's collection.

The INDIAN HOODED CROW. *Corvus splendens.*
 Sterna. Nepal. Presented by B. H. Hodgson, Esq.
 Skulls. Nepal. Presented by B. H. Hodgson, Esq.

Fam. 2. *STURNIDÆ.*

CALORNIS, G. R. Gray.

The SONGSTER. *Calornis panayensis.*
 Skeleton. From M. Frank's collection.

GRACULA, Linn.

The MINOR GRAKLE. *Gracula religiosa.*
 Two Sterna. Nepal. Presented by B. H. Hodgson, Esq.

STURNUS, Linn.

The COMMON STARLING. *Sturnus vulgaris.*
 Sternum. England. Presented by T. Ingall, Esq.
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

PASTOR, Temm.

The ROSE-COLOURED PASTOR. *Pastor roseus.*
 Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The MAHRATTA GRAKLE. *Pastor mahrattensis.*
 Two Sterna. Nepal. Presented by B. H. Hodgson, Esq.

The PARADISE GRAKLE. *Pastor tristis.*
 Three Sterna. Nepal. Presented by B. H. Hodgson, Esq.

The GINGI GRAKLE. *Pastor ginginianus.*
 Two Sterna. Nepal. Presented by B. H. Hodgson, Esq.

The GOSALIC GRAKLE. *Pastor contra.*
 Two Sterna. Presented by B. H. Hodgson, Esq.
 Skeleton. From M. Frank's collection.

Fam. 3. *FRINGILLIDÆ.*

COCCOTHRAUSTES, Briss.

The HAWFINCH. *Coccothraustes vulgaris.*
 Sternum. England. Presented by T. Ingall, Esq.
 Two Skulls. England. Presented by John Ray, Esq.

The BLACK AND YELLOW HAWFINCH. *Coccothraustes melanoxanthus.*
 Three Sterna. Nepal. Presented by B. H. Hodgson, Esq.

MUNIA, Hodgs.

The Cowry Grosbeak. *Munia punctularia.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

PLOCEUS, Cuv.

The Red-headed Weaver. *Ploceus flammiceps.*
Skeleton. Presented by the Earl of Derby.

VIDUA, Cuv.

The PANAYAN BUNTING. *Vidua ardens.*
Skeleton. Presented by the Earl of Derby.

PASSER, Briss.

The COMMON SPARROW. *Passer domesticus.*
Sternum. England. Presented by T. Ingall, Esq.

The TREE SPARROW. *Passer montanus.*
Sternum. England. Presented by John Ray, Esq.

CANNABINA, Brehm.

The COMMON LINNET. *Cannabina linota.*
Sternum. England. Presented by John Ray, Esq.

The LESSER REDPOLE. *Cannabina linaria.*
Sternum. England. Presented by T. Ingall, Esq.

MONTIFRINGILLA, Brehm.

The WOOD FINCH. *Montifringilla nemoricola.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

FRINGILLA, Linn.

The CHAFFINCH. *Fringilla coelebs.*
Sternum. England. Presented by T. Ingall, Esq.
Skull. England. Presented by John Ray, Esq.

The BRAMBLING. *Fringilla montifringilla.*
Sternum. England. Presented by T. Ingall, Esq.
Sternum. England. Presented by John Ray, Esq.
Skull. England. Presented by John Ray, Esq.

CARDUELIS, Briss.

The GOLDFINCH. *Carduelis elegans.*
Sternum. England. Presented by T. Ingall, Esq.

LIGURINUS, Briss.

- The GREENFINCH. *Ligurinus chloris.*
 Sternum. England. Presented by T. Ingall Esq.
 Sternum. England. Presented by John Ray, Esq.

CHRYSMITRIS, Boie.

- The HIMALAYAH SISKIN. *Chrysomitris spinoides.*
 Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

EMBERIZA, Linn.

- The COMMON BUNTING. *Emberiza miliaria.*
 Sternum. England. Presented by T. Ingall, Esq.
 Sternum. England. Presented by John Ray, Esq.

- The
Skeleton. Chili. From Mr. Warwick's collection.

PLECTROPHANES, Meyer.

- The SNOW BUNTING. *Plectrophanes nivalis.*
 Two Sternæ. England. Presented by T. Ingall, Esq.
 Sternum. England. Presented by John Ray, Esq.
 Skull. England. Presented by John Ray, Esq.

ALAUDA, Linn.

- The SHORT-TOED LARK. *Alauda brachydactyla.*
 Three Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

- The SKYLARK. *Alauda arvensis.*
 Sternum. England. Presented by John Ray, Esq.
 Skull. England. Presented by John Ray, Esq.

- The WOODLARK. *Alauda arborea.*
 Sternum. England. Presented by John Ray, Esq.

CARPODACUS, Kaup.

- The EGYPTIAN BULLFINCH. *Carpodacus Payraudæi.*
 Two Skulls. Egypt. Presented by Dr. Turnbull Christie.

PYRRHULA, Mæhr.

- The BULLFINCH. *Pyrrhula vulgaris.*
 Sternum. England. Presented by T. Ingall, Esq.
 Two Skulls. England.

LOXIA, Linn.

- The COMMON CROSSBILL. *Loxia curvirostra.*
 Sternum. England. Presented by John Ray, Esq.
 Skull. England. Presented by John Ray, Esq.

The HIMALAYAN CROSSBILL. *Loxia hemalayana.*
Sterna. Nepal. Presented by B. H. Hodgson, Esq.

Fam. 4 BUCEROTIDÆ.

BUCEROS, Linn.

The HOMRAI HORNBILL. *Buceros Homrai.*
Skeleton. Nepal. Presented by B. H. Hodgson, Esq.
Head. Nepal. Presented by B. H. Hodgson, Esq.

The *Buceros plicatus.*
Skeleton. From M. Frank's collection.

The BLACK-SPOTTED HORNBILL. *Buceros albirostris.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.
Head. Nepal. Presented by B. H. Hodgson, Esq.
Head, young. Nepal. Presented by B. H. Hodgson, Esq.

Tribę 5. SCANSORES.

Fam. 1. PSITTACIDÆ.

PLATYCERCUS, Vigors.

The *Platycercus* —? —?
Skull. South Australia. Presented by His Excellency Captain G. Grey.

PALEORNIS, Vigors.

The ALEXANDRINE PARRAKEET. *Palæornis Alexandri.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

The ROSE-HEADED PARRAKEET. *Palæornis bengalensis.*
Three Sterna. Nepal. Presented by B. H. Hodgson, Esq.

The ROSE-RINGED PARRAKEET. *Palæornis torquatus.*
Two Sterna. Nepal. Presented by B. H. Hodgson, Esq.

The MUSTACHE PARRAKEET. *Palæornis pondicerianus.*
Four Sterna. Nepal. Presented by B. H. Hodgson, Esq.

ARA, Briss.

The BLUE MACAW. *Ara hyacinthinus.*
Skull. From Mr. Warwick's collection.

The *Ara* —? —?
Sternum.

ENICOGNATHUS, G. R. Gray.

The SLENDER-BILLED PARROT. *Enicognathus leptorhynchus.*
Skeleton. Chili. From Mr. Warwick's collection.

TRICHOGLOSSUS, Vig. & Horsf.

SWAINSON'S TRICHOGLOSSUS. *Trichoglossus Swainsonii.*
Skull, imperfect. New South Wales.

PSITTACUS, Linn.

The EAST INDIAN PARROT. *Psittacus* ——?
Sternum. East India.

The Psittacus ——?
Sternum. From M. Lefevre's collection.

PSITTACULA, Briss.

The LATHAN PARROT. *Psittacula vernalis.*
Sternum. Nepal. Presented by B. H. Hodgson, Esq.

CACATUA, Briss.

The SULPHUR-CRESTED COCKATOO. *Cacatua sulphurea.*
Skeleton.

Fam. 2. PICIDE.**MEGALAIMA, G. R. Gray.**

The CORVINE BARBET. *Megalaima corvinus.*
Skeleton. From M. Frank's collection.

FRANKLIN'S BARBET. *Megalaima Franklinii.*
Two Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

The BLUE-CHEEKED BARBET. *Megalaima asiatica.*
Sternæ. Nepal. Presented by B. H. Hodgson, Esq.

The BROWN-HEADED BARBET. *Megalaima caniceps.*
Skeleton.

Three Sternæ. Népal. Presented by B. H. Hodgson, Esq.

PICUS, Linn.

The SPOTTED WOODPECKER. *Picus minor.*
Sternum. England.

HODGSON'S WOODPECKER. *Picus majoroides.*

 Skull of young, weighed 66 pounds. From Dr. Mantell's collection.
 Head with the shield.
 Skull of adult, weighed 375 pounds. Ascension. Presented by — Wauds, Esq.
 Skull of adult, imperfect, discoloured.

Order IV. EMYDOSAURI.**Fam. I. CROCODILIDÆ.****The GARIAL OR NAKOO. *Gavialis Gangeticus.***

Skull, adult, length 29 inches. India. Presented by Captain Oriel.
 Skull, half-grown animal, length 18 inches. India. Presented by J. E. Gray, Esq.
 Skull, adult. India. Mus. Sloane.

The INDIAN CROCODILE. *Crocodilus porosus.*

Skull. —?

The LARGE-HEADED INDIAN CROCODILE. *Crocodilus bombifrons.*

Skull, length 20 inches. India. Presented by Captain Oriel.
 Skull, length 18 inches. India. From the Museum of the Royal Asiatic Society of Bengal.

- The AMERICAN CROCODILE. *Crocodus Americanus.*
 Skull and front part of back of adult. West Coast of America.
 Presented by Captain Sir E. Belcher, R.N., C.B.
 Skull, young. From Dr. Mantell's collection.
 Skull. Jamaica. From Mr. Gosse's collection.
- The MUGGAR OR GOA. *Crocodus palustris.*
 Skull, half-grown animal, length 12 inches. India.
 Skull, adult, length 26 inches ("animal 33 feet"). Presented by
 Gibson Reeve, Esq.
 Skull, adult, length 23 inches. India.
 Skull, adult, length 21 inches. North Coast of Australia. Pre-
 sented by Captain Stokes, R.N.

Fam. 2. ALLIGATORIDÆ.

- The BLACK JACARE. *Jacare nigra.*
 Skull. Para. Presented by R. Graham, Esq.

- The ALLIGATOR. *Alligator Mississipensis.*
 Skeleton, young. North America. From Dr. Mantell's col-
 lection.

Class IV. PISCES.

Order I. ACANTHOPTERYGIA.

Fam. SPARIDÆ.

- Upper and lower-jaw. *Chrysophrys* ——

Fam. LABRIDÆ.

- The PARROT FISH. *Scarus muricatus.*
 Pharyngeal bones and teeth.

- Scarus* ——
 Skull. North West Coast of New Holland. Presented by
 Charles Darwin, Esq.

Fam. ZEIDÆ.

- The DOLPHIN OR CORYPHENE. *Coryphaena hippurus.*
 Skull.

Fam. FISTULARIADÆ.

- The TOBACCO-PIPE FISH. *Fistularia tabacaria.*
 Skull.

Fam. SYNGNATHIDÆ.

The SEA HORSE. *Hippocampus brevirostris*?
 Skeleton. West Indies. From Mr. Scrivener's collection.
 Skeleton.

Fam. BLENNIIDÆ.

The WOLF FISH. *Anarrichus lupus*.
 Skull.

Fam. LOPHIADÆ.

The ANGLER. *Lophius piscatorius*.
 Teeth. From Dr. Mantell's collection.

Order II. MALACOPTERYGIA.

Fam. CYPRINIDÆ.

The CARP. *Cyprinus carpio*.
 Skeleton.

Fam. SALMONIDÆ.

SALMON. *Salmo* —?—?
 Lower-jaw. China. Presented by S. Lay, Esq.

Fam. CLUPEIDÆ.

The SUDIS. *Sudis gigas*.
 Skeleton. Para, South America. Presented by J. P. G. Smith,
 Esq.
 Palate.

Fam. GADIDÆ.

The HADDOCK. *Gadus Eglefinus*.
 Skeleton.
 Skull.

Fam. PLEURONECTIDÆ.

The TURBOT. *Rhombus maximus*.
 Skeleton.

The HOLIBUT. *Hippoglossus vulgaris*.
 Skeleton. English Coast.
 Skull. English Coast.

Fam. MURÆNIDÆ.

The CONGER. *Conger vulgaris.*
Skull. English Coast.

Skull. China. Presented by J. R. Reeves, Esq.
Muræna —?

Order III. PLECTOGNATHI.

Fam. BALISTIDÆ.

The FORK-TAILED FILE FISH. *Balistes forcipatus.*
Intermaxillary bones. Owen's Odontography, ii. t. 40, f. 3.

Order IV. CHONDROPTERYGIA.

Fam. ACCIPENSERIDÆ.

The PADDLE FISH. *Spatularia spatula.*
Skull. North America.

Fam. SQUALIDÆ.

The SMALL-SPOTTED DOG-FISH. *Scylium canicula.*
Teeth. English Coast.
Teeth. English Coast.

The BLUE SHARK. *Carcharias (Prionodon) glaucus.*
Skeleton.

Teeth.

Teeth ?

Skeleton.

Skeleton.

Teeth. From Dr. Mantell's collection.

Teeth.

Teeth.

Teeth.

Teeth.

Teeth. From Dr. Mantell's collection.

Teeth, half-grown.

Teeth, very young.

The BLACK-FINNED SHARK. *Carcharias (Prionodon) melanopterus?*

Teeth. Malta. Presented by Miss E. Attersoll.

Teeth. Coast of Hindostan.

The GALEOCERDO. *Galeocerdo arcticus.*

Teeth.

Teeth.

The MALTA LAMNA. *Lamna?*

Portion of under-jaw. Malta. Presented by Miss E. Attersoll.

The PORBEAGLE. *Lamna cornubica.*

Teeth.

Teeth. (*Squalus selanonus*, *Leach*, *Wern. Mem. t. xi. p. 64. Muller and Henle Plagiostomer*, 67).

Teeth, very young. England.

The ODONTASPIS. *Odontaspis* ——?

Teeth.

The GRISSET. *Hexanchus griseus.*

* Teeth. Isle of Wight. Presented by Capt. Swinburn, R.N.

Part of a lower-jaw.

* Fam. RAIDE.

The SEA EAGLE. *Myliobates aquila?*

Palate. Brazils. From Dr. Mantell's collection.

The NARINARI. *Aetobates Narinari.*

Palate.

The MARGINED TYGOBATE. *Ty gobates (Rhinoptera) marginata.*

A portion of the dental series of the upper-jaw. Owen's Odontology, ii. t. 25, f. 2.

The STING RAY. *Trygon pastinaca.*

Teeth. Malta. Presented by Miss E. Attersoll.

The STRONG RAY. *Trygon* ——?

Teeth.

The THORNBREAK. *Raia clavata.*

Teeth, male.

Teeth, female.

Teeth.

Teeth. From Dr. Mantell's collection.

Teeth, young.

The THORNBREAK. *Raia* ——?

Jaws. Presented by General Hardwicke.

APPENDIX

Of the Specimens added during the printing of the List.

Fam. 1. HOMINIDÆ.

- MAN. *Homo sapiens.*
Two Skulls, adult and young. Darnley Island, Torres Straits.
Presented by the Earl of Derby.
Skull, adult, idiotic. Darnley Island, Torres Straits. Presented
by the Earl of Derby.
Skull. Darnley Island. Torres Straits. Presented by Joseph
Bete Jukes, Esq.
Skull. Pasadama, N. Lima.

Captain Evans Nepean, R.N.
Skull.
Seven Skulls, imperfect. New Zealand. Presented by W.
Brown, Esq.

Fam. SIMIADÆ.

- The CHIMPANZEE. *Troglodytes niger.*
Skeleton, half-grown. West Africa.

Fam. CEBIDÆ.

- The BLACK HOWLER. *Mycetes niger.*
* Skull, male. Bolivia. From Mr. Bridge's collection.
* Skull, female. Bolivia. From Mr. Bridge's collection.
The REED TEE-TEE. *Callithrix donacophilus.*
* Skull. Bolivia. From Mr. Bridge's collection.

- The TEE-TEE. *Callithrix entomophagus*.
 * Skull. Bolivia. From Mr. Bridge's collection.
 * Skull. Bolivia. From Mr. Bridge's collection.
 The BLACK-TAILED JACCHUS. *Jacchus melanurus*.
 * Skull. Bolivia. From Mr. Bridge's collection.

Fam. LEMURIDÆ.

- The POTTO. *Perodicticus Potto*.
 Skeleton (toes imperfect). East Africa. From Mr. Warwick's collection.

Fam. VESPERTILIONIDÆ.

- The GRAY KALONG. *Pteropus griseus*.
 Skull. Timor.

Fam. FELIDÆ.

- The RED LYNX. *Lynx rufus*.
 Skull. North America?

- The RASSE. *Viverra Malacensis*.
 Skull. India.

LINGSANG, *Muller*.

- The DELUNGUNG. *Lingsang gracilis*.
 Skull. India.

- The ICHNEUMON. *Herpestes* ——?
 Three Skulls. India.

- The RED-NECKED ICHEUMON. *Herpestes semitorquatus*.
 * Skull. Borneo.

CYNICTIS, *Ogilby*.

- The MEERKAT. *Cynictis Levaillantii*.
 * Skull. South Africa.
 * Skull. South Africa.

- The KIT FOX. *Vulpes cinereo-argentatus*.
 Skull. North America.

- The CULPEO. *Vulpes Magellanicus*.
 Skeleton. Chili? From Mr. Bridge's collection.
 Skull. Chili? From Mr. Bridge's collection.

- The AGOUARACHAY. *Vulpes Azaræ*.
 * Skull. Chili.

The BLACK-FACED WEASEL. *Mustela frenata.*
 * Skull. Mexico.

The BADGER. *Meles taxus.*
 * Skull. England.
 Skull. England. Presented by Mr. J. Baker.

The WEST AFRICAN OTTER. *Lutra Gambianus.*
 *Skull. Gambia. Presented by the Earl of Derby.

Fam. URSIDÆ.

The CRABEATER. *Procyon cancrivorus.*
 * Skull.

The COATI. *Nasua rufa.*
 Skull. Central America.

The NARICA OR QUASJE. *Nasua narica.*
 Skeleton. Central America.

The WAH. *Ailurus fulgens.* (Page 22, for *Storr* read *F. Cuv.*)
 Skull, adult. Nepal?

Fam. TALPYDÆ.

CORSIRA, Gray.

The ALPINE SHREW. *Corsira alpina.*
 Skull. St. Gothard. Presented by M. de Selys Longchamp.

Fam. MACROPIDÆ.

CUSCUS, Lesson.

The YELLOW-RUMPED CUSCUS. *Cuscus chrysorrhæsus.*
 * Skull. E. C. N. Guinea. Presented by Joseph Beete Jukes,
 Esq.

GRAY'S BETTONGIA. *Bettongia Grayii.*
 * Skull. Australia.

DIABOLUS, Gray.

The TASMANIAN DEVIL. *Diabolus ursinus.*
 Lower-jaw. Australia. Presented by Joseph Beete Jukes, Esq.

Order CETE.

Fam. BALÆNIDÆ.

The NORTHERN WHALE. *Balaena mysticetus*.

Two plates of Whalebone. (The specimens figured in the 'Voyage of the Erebus and Terror,' p. 47, tab. 1, fig. 11). Greenland. Presented by Messrs. Smith & Simmonds.

* Skull. India. Presented by the Hon. East India Company.

* Teeth. India. Presented by the Hon. East India Company.

- The Swiss. *Tamias striatus.*
 * Skull. Russia, Altai Mountains.

Fam. ASPALACIDÆ.

- The BAY BAMBOO RAT. *Rhizomys badius.*
 Skull. Nepal.

Order V. UNGULATA.

Fam. BOVIDÆ.

- The Ox. *Bos taurus.*
 Skull, female. England.

- The JAVAN Ox. *Bos Bantiger.*
 Skeleton, male. Java. From the Leyden Museum.
 * Skeleton, female. Java. From the Leyden Museum.

- The TAMOUSE. *Bubalis brachycerus.*
 Skeleton. Gambia. Presented by the Earl of Derby.

- The IMPOPHOO OR ELAND. *Boselaphus oreas.*
 Horns, separate. Gambia. Presented by the Earl of Derby.
 Horns, single horn. Gambia. Presented by the Earl of Derby.

- The LICAMA OR HARTEBEEST. *Acronotus Caama.*
 Skull. Gambia. Presented by the Earl of Derby.

- The BLANO BOCK. *Ægocerus leucophæus.*
 Horns. Gambia. Presented by the Earl of Derby.
 Horns. Gambia. Presented by the Earl of Derby.

- The KORRIGUM. *Damalis korrigum.*
 Skull and horns with skin of face. Gambia. Presented by the Earl of Derby.

- The SING-SING. *Kolus sing-sing.*
 * Skull, adult female. Gambia. Presented by the Earl of Derby.
 Skeleton. Gambia. Presented by the Earl of Derby.
 Skull, young male. Gambia. Presented by the Earl of Derby.

- The JUNGLI-BURKA. *Tetracerus subquadricornis.*
 * Skull. Madras. Presented by — Jerdon, M.D.

- The RED-FRONTED GAZELLE. *Gazella rufifrons.*
 * Skull.

- The SPRING BOCK OR ISEBE. *Gazella euchore.*
 * Skull, female. South Africa.

- The DUYKER BOCK. *Cephalophorus mergens.*
 * Skull, female. South Africa.

The BLACK-STREAKED BUSH BUCK. *Cephalophus dorsalis.*
 * Skull. Gambia. Presented by the Earl of Derby.

The CROWNED BUSH BUCK. *Cephalophus coronatus.*
 Skull and bones of feet. Gambia. Presented by the Earl of Derby.

WHITFIELD'S BUSH BUCK. *Cephalophus Whitfieldii.*
 * Skull. Gambia. Presented by the Earl of Derby.

The GRIMME. *Cephalophus grimmia.*
 * Skull. Gambia. Presented by the Earl of Derby.

The STEEN BOCK. *Oreotragus Tragulus.*
 Skull, young. South Africa.
 Skull, female. South Africa.

The OUREBI. *Oreotragus scoparius.*
 * Skull. South Africa.
 * Skull. South Africa.

The KOB. *Adenota Kob.*
 * Skull. Gambia. Presented by the Earl of Derby.

The BOSCH BOCK. *Tragelaphus scriptus.*
 Skull. Gambia. Presented by the Earl of Derby.
 Skull. Gambia. Presented by the Earl of Derby.

The BOSCH BOCK. *Tragelaphus sylvaticus.*
 Single horn. Gambia. Presented by W. Whitfield, Esq.

The CHAMOIS OR GEMS. *Rupicapra Tragus.*
 Skeleton. Alps, Europe. From Mr. Brandt's collection.
 Three pairs of horns, of different ages. Alps, Europe. Presented
 by J. E. Gray, Esq.

The BOOMORAH. *Hyemoschus aquaticus.*
 Skeleton. West Africa. From Mr. Whitfield's collection.
