

Lydia Connector for SAP®

Lydia Connector for SAP allows native integration of Lydia voice solutions into SAP without the use of expensive, unnecessary middleware. Globally unique, the 100% on-line native integration provides real-time access to inventory and optimizes managing and performing logistics tasks – maximizing overall warehouse performance as each work step is confirmed by voice input.

SAP® Certified
Integration with SAP NetWeaver®

Benefits

- **Application logic in SAP**
Complete application logic implemented in the SAP system results in maximum control and flexibility.
- **Native data exchange**
Assignment and optimization of all processes by SAP-WM / LES / EWM.
- **Based on SAP voice properties**
Independent of a specific business module as the voice properties are integral components of the SAP core system.
- **Development completely in SAP**
Modifications in the voice application require only changes to the SAP voice properties.

Requirements

- ITS Connector usable from SAP V4.7+
- ITS Speech generator available from:

R/3 Enterprise	SAP Basis 6.20 SP 65	ITS Patch 28
NetWeaver 04	SAP Basis 6.40 SP 23	Kernel Patch 210
NetWeaver 7.0	SAP Basis 7.00 SP 16	Kernel Patch 132
NetWeaver 7.1	SAP Basis 7.10 SP7	Kernel Patch 81 as well as previous versions

- **Area-wide WLAN coverage**
Operating the voice application requires a complete area- wide redundant WLAN coverage in the warehouse.
