

## List of Freshwater Fishes from Argentina - Update 10.

Stefan Koerber

Friesenstr. 11, 45476 Muelheim, Germany, pecescrilloos@koerber-germany.de

The aim of this list of species of freshwater fishes from Argentina is to provide an updated supplement to the 'Lista comentada de los peces continentales de la Argentina' published by López, Miquelarena and Menni in 2003. Only those species are listed here that have not been included in that paper or that have undergone systematical changes since then.

This list is not a publication in the sense of the 'Code' (IRZN) and expressions as 'new species', 'new combination' etc. are only used to highlight changes in comparison with López et al. 2003.

'NEW' after species names indicates that this record has not been included in previous updates published by www.pecescrilloos.de.

***Tridentopsis pearsoni*** Myers, 1925 > [details](#)

Of course I am highly interested in getting separata, copies or pdf's of any work that has been published on freshwater fishes from Argentina, being of systematic relevance or not.

Authors of new species are kindly asked to send by email a photograph of an alive animal or the photo of the dead Holotype as usually published within the papers.

I try to keep both, the above mentioned homepage and the present list as updated as possible. I invite all members of the ichthyological community to cooperate and keep me informed about works that contain related information.

If you are interested to be notified when new updates are available please let me know.

www.pecescrilloos.de and [Ichthyological Contributions of PecesCriollos](#) have been made possible by financial and technical support of [lwd e-solutions](#) and [GfI - Gesellschaft für Ichthyologie](#) (German Society of Ichthyology).
