Shaken, Not Stirred! Metin Tolan, Joachim Stolze, 2020-09-08 How do James Bond's X-ray glasses work, the ones he uses to see whether the lady at the roulette table has a pistol concealed in her underwear? Is it really possible to launch oneself into the air and catch up with a plane that is free-falling towards the earth? Or to shoot down a helicopter with a pistol? In this lively and informative book, Germany's boldest physics professor Metin Tolan analyses the stunts and gadgets of the 007 films and even answers the question of all questions: Why does Bond drink his vodka martini shaken, not stirred? So much entertaining science is a rare thing. Spiegel Online

Terje Vigen Henrik Ibsen, 2020-12-04 Henrik Ibsen is known as one of the four great Norwegian writers, and his poem Terje Vigen ranks among his notable works. The poem is believed to have been inspired by verbal accounts that Ibsen got during the time he lived in Grimstad in his youth. Verbal accounts about the hardships the people in the area had to suffer during the Napoleonic wars, when British ships sieged Norwegian ports. The blockade lasted from 1807 to 1814, and brought poverty to Norway. A poverty which caused people to start dying from starvation. The dire circumstances even compelled many impoverished Norwegians to row over to Denmark to get food, in order to save themselves and their families from starvation. Many of whom were captured and imprisoned. This forms well-known historical facts. The poem revolves around these historical facts. It tells a tale about how the common and poor Norwegians were impacted by these events. In the poem, Terje Vigen must row to Denmark in order to provide the life-saving food his family needs. But as he is about to arrive home in Norway on his way back, he is captured by a patrolling ship, and taken prisoner in England. Terje Vigen spends five years in prison, and when he gets back to Norway afterwards, he learns what has happened to his family while he was in prison. Later in the poem, Terje Vigen encounters the captain of the ship that took him captive, and Terje gets a chance to take revenge for the losses and grievances the imprisonment imposed on him. Though this poem is based on real life events, there exists no solid proof that a man named Terje Vigen ever existed who did all the things accounted for in the poem. The poem must therefore, even if it is based on knowledge of real-life events, be categorized as a fictional work of literature. But even if this work of literature remains a fictional one, it nonetheless provides an opportunity to imagine how life was for some

of the people impacted by this event in history. And if we further keep in mind that life in Norway, for the majority of the population, throughout centuries has been a life of mere subsistence, we can let ourselves be persuaded that this poem not only provides an artistic rendition of the life and events of the possibly fictitious Terje Vigen and those taking place in the poem in particular, but paints a picture of life as it historically has been for many Norwegians in general.

Being Salmon, Being Human Martin Lee Mueller,2017-10-24 Nautilus Award Silver Medal Winner, Ecology & Environment In search of a new story for our place on earth *Being Salmon, Being Human* examines Western culture's tragic alienation from nature by focusing on the relationship between people and salmon—weaving together key narratives about the Norwegian salmon industry as well as wild salmon in indigenous cultures of the Pacific Northwest. Mueller uses this lens to articulate a comprehensive critique of human exceptionalism, directly challenging the four-hundred-year-old notion that other animals are nothing but complicated machines without rich inner lives and that Earth is a passive backdrop to human experience. Being fully human, he argues, means experiencing the intersection of our horizon of understanding with that of other animals. Salmon are the test case for this. Mueller experiments, in evocative narrative passages, with imagining the world as a salmon might see it, and considering how this enriches our understanding of humanity in the process. *Being Salmon, Being Human* is both a philosophical and a narrative work, rewarding readers with insightful interpretations of major philosophers—Descartes, Heidegger, Abram, and many more—and reflections on the human-Earth relationship. It

stands alongside Abram's *Spell of the Sensuous and Becoming Animal*, as well as Andreas Weber's *The Biology of Wonder and Matter and Desire*—heralding a new “Copernican revolution” in the fields of biology, ecology, and philosophy.

Salvatore Vitale - How to Secure a Country Salvatore Vitale,2019-06 Switzerland is well-known as one of the safest countries on earth and as a prime example of efficiency and efficacy. One of the central reasons that such a country exists is the development of a culture based on protection, which is supported by the presence and production of national security. When in 2014 Swiss people voted in favour of a federal popular initiative against massive immigration, Salvatore Vitale, an immigrant living in Switzerland felt the need to research this phenomenon in order to comprehend where the motives for this constant need for security originate and how they became part of Swiss culture. In *How to Secure a Country* Vitale explores this country's national security measures by focusing on matter-of-fact types of instructions, protocols, bureaucracies, and clear-cut solutions which he visualises in photographs, diagrams, and graphical illustrations. The result is a case study that can be used to explain the global context and the functioning of contemporary societies. Essays by political scientists Jonas Hagmann (ETH Zurich) and Roland Bleiker (University of Queensland, Australia) provide an analysis of the structure of the Swiss security system and a view on the politics of photography. Lars Willumeit, curator and social anthropologist, will discuss attitudes, behaviours, and codes in 21st Century statehood. 118 illustrations

Miracle at the Litza Alf R. Jacobsen,2017-08-19 The dramatic story of the Nazis' 1941 attempt to take Murmansk, including firsthand accounts of the action on the front line. In the early summer of 1941, German mountain soldiers under

the command of General Eduard Dietl set out from northern Norway up through Finland to the Russian border. Operation Silberfuchs was underway. The northernmost section of the Eastern Front would ensure Hitler supplies of nickel from Finnish mines and bring the strategically important port city of Murmansk under German control. The roadless rocky terrain and extreme weather created major challenges for the German troop movements. Despite this, Dietl's men made quick gains on his Russian foe, and they came closer to Murmansk. Despite repeated warnings of a German attack, Stalin had failed to mobilize, and the British hesitated to come to the rescue of the Red Army. But while the weather conditions steadily worsened, the Russians' resistance increased. Three bloody efforts to force the river Litza were repulsed, and the offensive would develop into a nightmare for the inadequately equipped German soldiers. In an exciting and authoritative narrative based on previously unpublished material, Alf Reidar Jacobsen describes the heavy fighting that would lead to Hitler's first defeat on the Eastern Front. With firsthand accounts of the fighting on the front line, this is a dramatic new account of a forgotten but bloody episode of World War II.

The Arctic Melt Diane Tuft, 2017 *The Arctic Melt: Images of a Disappearing Landscape* is a brilliant new monograph by universally acclaimed art and environmental photographer Diane Tuft. Following on the heels of Tuft's previous publication, *Gondwana: Images of an Ancient Land*, this new book showcases her breathtaking and visually astounding journey to capture the ice in the Arctic Circle before the constant melt renders the once-frozen landscape unrecognizable. *The Arctic Melt* features photographs of the North Pole, the mountain glaciers of Svalbard, Norway, and the icebergs and ice sheet of Greenland. In a remarkably new take on illustrating the effects of global warming, and with more than fifty stunning photographs, *The Arctic Melt* chronicles Tuft's passage through the waning tundra as millennia of ice thaw at a faster rate than ever before.--Jacket

Europe's Atlantic Coast, 2015 One motif, two photographers, two styles: Michael Pasdzior and Peter Haefcke traveled Europe's Atlantic coast in the past eight years. The result is a photographic art book that lives from its contrasts. While Haefcke takes his pictures in black and white, Pasdzior photographs in color. The Atlantic coast presents itself just as contradictory: Sometimes original, wild and rough, sometimes altered by human hands and embossed. The moody photographs and the elaborate design as a turning book make *Europe's Atlantic Coast* equally attractive for photography fans and coast-lovers.

GEO SAISON 03/2022 - Aber Sicher! Kroatien GEO SAISON Redaktion, 2022-02-15 So, die nassen, dunklen Monate haben wir einmal mehr erfolgreich hinter uns gelassen, auch wenn sie gefühlt von Jahr zu Jahr nasser und dunkler werden. Aber blicken wir nicht zurück (man sieht schließlich sowieso nichts), sondern nach vorn. Die Forschungsgemeinschaft Urlaub und Reisen (FUR) hat 2500 Deutsche nach ihrem Wunsch befragt, 2022 die Koffer zu packen. Unabhängig davon, dass in den vergangenen zwei Jahren Wunsch und Wirklichkeit nicht immer Hand in Hand gingen: Das Ergebnis ist so gut wie nie zuvor, die Urlaubslust auf einem Höchststand. 61 Prozent der Befragten steht der Sinn nach einer Reise. Ein Rekordwert, im

Vorjahr waren es lediglich 51 Prozent. Auch mangelt es offenbar nicht an Zeit und Geld. Lediglich neun Prozent gaben an, dass für sie kategorisch keine Reise in Frage käme. Ich bin mir sicher, dass sich diese Zahl noch verkleinern ließe. Sollten Sie jemanden kennen, der zu dieser übersichtlichen Gruppe Reisemuffel gehört, dem empfehlen Sie bitte dringend unsere Titelgeschichte über Kroatien. Es ist ein sonnendurchflutetes und 1777 küstenkilometerlanges Plädoyer für das Wegsein. Und als Hamburger kann ich Ihnen versichern: Es macht nicht nur Lust, es wirkt in dieser Zeit besser als jede Lichttherapie. Viel Spaß beim Lesen!

Weed Research Paul E. Hatcher, Robert J. Froud-Williams, 2017-08-07 This book presents the most up-to-date and comprehensive guide to the current and potential future state of weed science and research. Weeds have a huge effect on the world by reducing crop yield and quality, delaying or interfering with harvesting, interfering with animal feeding (including poisoning), reducing animal health and preventing water flow. They are common across the world and cost billions of dollars' worth of crop losses year on year, as well as billions of dollars in the annual expense of controlling them. An understanding of weeds is vital to their proper management and control, without which the reduction in crop yields that they would cause could lead to mass starvation across the globe. Topics covered include weed biology and ecology, control of weeds and particular issues faced in their control. Authored and edited by internationally renowned scientists in the field all of whom are actively involved in European Weed Research Society working groups, this succinct overview covers all the relevant aspects of the science of weeds. *Weed Research: Expanding Horizons* is the perfect resource for botanists, horticultural scientists, agronomists, weed scientists, plant protection specialists and agrochemical company personnel.

Designing Better Services Francesca Foglieni, 2018 This book provides accessible, comprehensive guidance on service design and enables practitioners approaching the discipline for the first time to develop the strategic mindset needed to exploit its innovation potential. The opening chapters trace the origins of service design and examine its links with service innovation, as well as its strategic role in service organizations. It then offers step-by-step guidance on tackling a service design project, explaining the main design elements and indications of various useful design tools. It also introduces the topic of evaluation as a support practice in designing or redesigning better services, and providing evidence concerning the value of service design interventions. The third chapter explores how evaluation is currently approached in service design practice through the analysis of a number of case studies. Based on these experiences it extensively discusses evaluation, with a

particular focus on service evaluation, and explains its importance in supporting service design and fostering innovation throughout the service design process. Further it describes pragmatic directions for setting up and conducting a service evaluation strategy. The concluding chapter uses an interpretive model to summarize the role evaluation could have in service design practice and focuses on interdisciplinary competences that need to be acquired by service designers in order to address the evolution of the discipline. The novel approach adopted in the book fosters the growing interest in design-driven service innovation and assists in realizing its full potential in both the private and the public sector.
