Firm Overview - Quarter View

Second Quarter 2008

- Continued write-downs in our Securitized Products, Real Estate, and Leveraged Loan portfolio, coupled with weak hedging and prop & principal trading in the quarter lead the Firm to quarterly losses of revenues (\$ (668)mm), net income (\$ (2,774)mm) and EPS ((\$5.14)) versus Street expectations of (\$2,352 mm), (\$245) mm) and ((\$0.38)).
 - Versus Q1 '08 revenues of (\$ 3,507 mm), net income of (\$ 489 mm) and EPS of (\$0.81)

Investment Banking Revenues

- Revenues of (\$ 858 mm) decreased -1% and -25% versus Q1 '08 and Q2 '07 respectively.
- Advisory revenues of (\$ 240 mm) decreased -27% versus Q1 '08 and -13% versus Q2 '07 as the decrease in M&A announcements since August 2007 impacted deal completion activity.
 - Top Lehman transactions announced in the quarter (\$Deal size): Altria spin-off of Philip Morris \$113bn, Hewlett Packard (acq of EDS) \$13.bn, and Liberty Mutual (Acq of Safeco) \$6bn.
- Debt Origination revenues of (\$ 288 mm), decreased -11% versus Q1 '08 and decreased -47% versus Q2 '07 as the number of Financial Sponsor related transactions, as well as corporate derivative transactions were minimal.
- Equity Origination revenues of (\$ 330 mm) increased 54% versus Q1 '08 but fell -1% versus Q2 '07, as Lehman volumes were particularly strong in secondary issuance and convertibles, bolstered by balance sheet repair transactions for financial institution clients.
 - Top Q2 '08 transactions: Washington Mutual PIPE \$72mm, Sovereign Bancorp follow-on \$41mm, FannieMae follow-on and Convertible Pfd \$41mm, and Carlsberg A/S rights offering \$14mm.

Capital Markets Revenues

- Revenue loss of (\$ (2,374)mm) decreased significantly versus Q1 '08 and Q2 '07 mainly due to continued writedowns in Securitized Products, Real Estate, and Leveraged Loans, as well as losses in Proprietary and Principal Investing. Weak hedging strategies in the quarter compared to significant hedging gains in Q1.
 - Lowest revenues since Lehman IPO.
 - Gross MTM adjustments of (\$4.0bn), and net adjustments of (\$3.7bn) including \$0.4bn of gains on structured note liabilities.
- Fixed Income loss of (\$ (2,975)mm), decreased versus Q1 '08 and Q2 '07. Lowest revenues on record.
 - Strong customer flow activity in the quarter (2nd highest ever).
- Equities revenues of (\$ 601 mm) decreased versus Q1 '08 and Q2 '07. Revenues were lower in the quarter mainly due to unprofitable trading strategies, proprietary and principal related investments amid the highly volatile equity markets this quarter. Weak results out of Volatility amid a decreased investor appetite for derivative instruments, especially Internationally.
 - Record Prime Services revenues in the quarter mainly due to the Structured Arbitrage Dividend season out of Europe.
 - Continued solid customer activity in the quarter across all regions
 - Please note Q1 '08 included a gain on KSK of \$550mm while Q2 '08 included a loss of -\$115mm.

Investment Management Revenues

- Revenues of (\$ 848 mm) declined versus previous record Q1 '08 by -12% but surpassed Q2 '07 by 10%.
- Asset Management revenues declined versus record revenues as both Traditional and Alternative Asset Management (mainly due to lower revenues on minority investments in hedge fund managers) declined this quarter.
- AUM of (\$277bn) increased \$0.4bn over the prior quarter, due to net outflows of \$8.9bn (mostly in liquidity products) offset by positive market performance of \$9.3bn.
- Record Private Investment Management revenues of \$352mm increased \$1mm versus Q1 '08, on record Fixed Income revenues and strong results within Equities.

Losses in the Regions amid writedowns and principal losses

- Non-US accounted for 57% of Q2 '08 total Firm losses, versus 62% of the revenues in Q1 '08.
- Europe & the Middle East loss of (\$ (499)mm) mainly due to losses in trading and principal investments, as well as asset writedowns and valuation adjustments.
 - Europe recorded a loss of approximately -\$150mm related to our investment in GLG, as the stock declined almost 40% in the quarter, amid the resignation of their top portfolio manager.
- Weak Asia-Pacific revenues of (\$ 57 mm) decreased versus both Q1 '08 and Q2 '07, mainly due to lower Capital Markets performance.
 - In the quarter Asia recorded a loss of -\$115mm related to the KSK position versus a gain of \$550mm in Q1.
 - Equities Volatility was weak in the quarter amid a decreased client demand for derivative products.

NPE of \$ 1,094 mm increased 9% versus Q1 '08 and 20% versus Q2 '07 (Results included approx. \$20mm of charges related to the mortgage platform restructuring and approx. \$80mm related to the depreciation of Real Estate positions).

The Firm's tax rate increased in Q2 '08 to 32.1% versus 26.3% in Q1 '08.

Second Quarter 2008 (Quarterly)

Q2 was a bit of "a tale of two quarters". The first part was the weeks surrounding the collapse of BSC in March when issuance markets virtually came to a standstill as appetite to add risk was non-existent. The second part was the aftermath of the BSC situation when the Fed's backing of investment banks allowed markets to breathe easier which in turn created a type of buying frenzy from investors resulting in significant amounts of bond issuance in April and May.

In terms of high grade bonds issuance, February saw 56bil and March had 49bil. The change in April and May was dramatic as those months saw 92bil and 121bil respectively.

Not surprisingly, our peer group was very active in this time period, despite the fact the spreads remained at historically wide levels, albeit tighter than the wide we saw in mid-March.

With respect to volume, MER and MS were the most active in our sector as they issued appx. 16bil and 14.3bil respectively of senior and subordinated debt (GS issued 7.2bil and LEH issued 5.5bil). In addition, MER issued a Perp nc 5 DRD preferred for 2.55bil and LEH issued a Perp nc 5 convertible preferred for 4bil.

Highlight LEH deals of the quarter:

- o \$4bil Perp nc 5y convertible preferred, more than 3 times oversubscribed
- o \$2.5bil 10y fixed senior deal at 1ml + 250

Q2'08 versus Q1'08 and Q2'07

- ❖ Banking segment revenues of \$858mm for Q2'08 was \$9mm or 1% below revenue of \$867mm recorded in Q1'08, and \$292mm or 25% below record Q2'07. Despite very turbulent credit and equity markets, this was the fourth highest revenue quarter ever for Investment Banking due to strength in Equity Origination.

Global pipeline fees of \$536mm fell 28% vs. Q1'08 and 66% vs. Q2'07.

Global pipeline value of \$282bn fell 16% vs. Q1'08 and 64% vs. Q2'07.

All products are down vs. both periods with the exception of Equity, which is higher due to some large rights offerings mandated in Europe.

- ❖ Debt Origination revenue of \$288mm fell 11% from Q1'08 and was down 47% versus Q2'07
Leveraged Finance continued to fall significantly versus record levels in the first half of 2007, as the number of Financial Sponsor related transactions were minimal. Stronger Investment grade issuance from a number of European clients as well as financial institutions helped offset minimal ABS issuance and slower client solutions revenue.
- ❖ Equity Origination revenue of \$330mm nearly represented a record quarter, up 54% from Q1'08 and essentially flat to record Q2'07.
A number of very large fees earned on Financial Institutions balance sheet repair transactions resulted in most of the quarter's revenue, with private Placement activity also strong, offsetting very weak IPO and non-financial company secondary activity.
- ❖ Advisory revenue of \$240mm decreased \$90mm or 27% vs. strong Q1'08 and fell 13% vs. Q2'07, as the decrease in M&A announcements since August 2007 impacted deal completion activity.

Lehman M&A announced transaction volume in Q2'08 of \$171bn rose 127% from the prior quarter but was 48% below robust Q2'07. However \$113bn or 66% of the quarter's volume was attributed to one transaction, the Altria spin-off of Philip Morris International. YTD rank did rise to #6 from #9 in CY 2007. Lehman completed volume rose 95% from Q1'08 and 1% from Q2'07, again though substantially impacted by the \$113bn Altria spin-off which was completed in the same quarter it was announced.

Q2 '08 vs. Q1 '08 and Q2 '07:

Capital Markets (-\$2,374mm vs. \$1,672mm and \$3,593mm):

- Capital Markets revenues declined versus both Q1 '08 and Q2 '07 due to continued challenging market conditions.
- Lower Fixed Income revenues due to significant write-downs in Securitized Products, Real Estate, and Leveraged Loans, as well as proprietary losses in Interest Rate Products and Credit Products, partially offset by record revenues in Municipals and Commodities Trading.
 - Despite poor results in hedging and Franchise trading, customer activity was at near record levels.
 - Asset Management Principal losses incurred from providing support to several funds.
 - Credit spreads tightened in the quarter, the Lehman Global HY index spread tightened 78bps & the Leh Global IG Grade spread tightened 9bps.
- Equities revenues slowed and were down significantly versus the comparable periods.
 - Execution Services and Prime Services were up in Q2 while Volatility and Convertibles were lower for the quarter.
 - The equity market environment was weak for a large part of the quarter, leading to unprofitable trading strategies throughout the majority of the segment, especially Internationally.
 - Significant Principal Investment losses were recognized in the quarter, including \$(150)mm on our GLG investment as the stock price declined 38% and \$(115)mm on the KSK (India Power Plant) position.
 - Record Prime Services revenues in the quarter as we are currently in the European dividend season (Structured Arb).
- Strong Total Capital Markets sales credits in the quarter, with great performance in Convertibles, Commodities, High Grade Credit and Municipals.

EQUITY DIVISIONAL REVENUES BY PRODUCT

Q2 '08 vs. Q1 '08 and Q2 '07:**Equities Segment**

- Q2 '08 segment revenues of \$601mm are down significantly versus Q1 '08 (\$1,410mm) and Q2 '07 (\$1,692mm).
- Execution Services and Prime Services were strong in Q2 while Volatility and Convertibles were weak in the quarter, as well as prop and principal related items (GLG and KSK).
- The equity market environment was weak for a large part of the quarter, leading to unprofitable trading strategies throughout the majority of the segment.
- Stable customer flow in Q2 '08, down slightly versus Q1 '08 (-3%), with strong performance in Prime Services and Convertibles.
- Global equity markets were up slightly in the quarter. The DJIA was up 3%, the S&P 500 5%, the FTSE 100 3%, the DAX 5% and the Hang Seng was up 1% in the quarter.
- Global equity trading volumes in Q2 '08 are lower by 10% versus Q1 '08 and 14% versus Q2 '07.

Execution Services (includes Flow Volatility Americas): Second highest quarter

- Strong revenues in Europe and Americas.
- Positive results due to strong customer activity, strong commissions, and profitable trading strategies.
- Europe revenues were strong driven by the Cash and Portfolio business lines.
- In the Americas Execution Services business, Cash and Flow Volatility revenues were very strong this quarter.

Convertibles:

- Despite strong client activity, Q2 '08 revenues were weak due to unprofitable trading strategies in a difficult credit market.

Equity Derivatives (Volatility):

- Revenues were down versus the comparable quarters due in large part to losses out of Europe, and less significantly, out of Asia.
- Europe suffered significant losses due to losses in structured trading, valuation adjustments, and slower than expected corporate derivatives.
- In Asia, client appetite for structured products have declined in the quarter and key clients are limiting their business with Lehman, mainly due to our supposed "credit concerns".
- The VIX index (average) dropped to 20.80 versus a volatile Q1 '08 (24.33).

Equity Strategies:

- Improved performance compared to Q1 '08 due mainly to trading strategies in Europe and Asia.

Q2 '08 vs. Q1 '08 and Q2 '07:

Equity Capital Markets Prime Services:

- Record Prime Services revenues in the quarter as we are currently in the Dividend season (Europe).
- Prime Broker balances of \$165bn were down approximately 15% versus Q1 '08 and Q2 '07.
- Although Prime Broker client balance is down quite a bit versus Q1 (\$194bn in Q1 and \$165bn in Q2), much of the decline was seen in the first few weeks of March as a result of the Bear Stearns collapse where clients were trying to either deleverage or diversify their exposure to U.S. Prime Broker.
 - In addition, due to our own effort on balance sheet deleveraging, we have reduced Prime Broker balance where we see inefficient use of balance sheet.

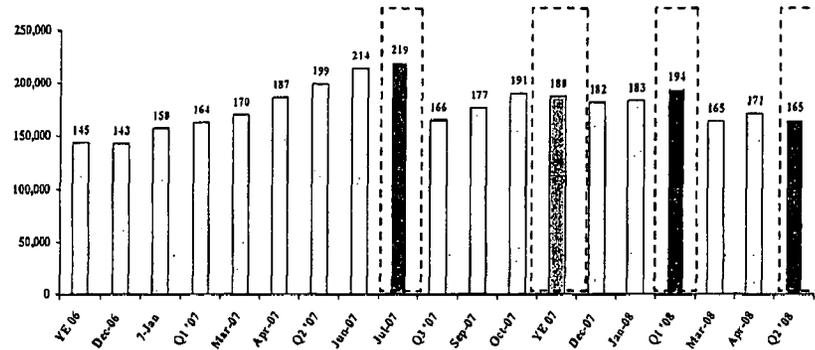

Note: Balances shown are month ending balances; Prior quarters' number of clients have been restated to consolidate affiliated clients.

LBAIM and MAP were moved from Traditional Asset Management to Private Equity in Q1 '08. History has been revised.

Q2 '08 vs. Q1 '08

❖ Private Equity revenues increased from \$93mm in Q1 '08 to \$99mm in Q2 '08, up 6%.

❖ Management and Other Fees increased by \$12mm primarily due to increase in revenues associated with Real Estate III and Secondary Opportunities II. Real Estate management fees increased by 141%, from \$9mm in Q1 '08 to \$23mm in Q2 '08.

❖ GP carry decreased by \$6mm primarily resulting from a lack of incentive fees on LBAIM, which had negligible realizations in Q2 '08.

Q2 '08 vs. Q2 '07

❖ Private Equity revenues of \$99mm increase \$5mm, or 5%, versus Q2 '07.

❖ Management Fees increased 76%, or \$36mm, versus the same quarter last year, primarily due to Real Estate (+\$23mm), Private Funds Investment Group (+\$11mm), and Merchant Banking (+\$11mm).

❖ GP Carry declined by \$28mm versus Q2 '07. The GP carry gains in Q2 '07 were primarily attributable to Infrastructure and Partnership Account/DPEF/Pre-Tax Plan.

ASSETS UNDER MANAGEMENT

6/12/2008 4:00 PM

AUM BY ASSET CLASS

- **Fixed Income** is down \$1bn versus Q1 '08, but has grown 17% over the past year, led by the Light Point CLO acquisition and deal of \$3.7bn and the Ceago & Wicker Park CDO Securitization for \$2bn.
- **Equities** increased 8% versus Q1 '08 due to positive market performance seen during the quarter.
- **Alternative Investments** assets increased 14% versus Q1 '08 and 43% over the past year, as products such as Strategic Commodity Fund and Quant funds continue to gain assets. Private Equity has also launched new funds in the last year, such as the Co-Investment Fund, CDO Opportunities and Crossroads XVIII, Merchant Banking IV, IPO, Real Estate III and Loan Opportunity Fund.
- **Money market** assets have decreased by 17% since Q1 '08 and 16% since prior year due to cash needs resulting from difficult markets.

AUM BY BUSINESS

- **HNW (PAM)** AUM of \$63bn increased \$4.2bn versus the prior quarter, due to \$0.8bn of net flows and \$3.4bn of market appreciation. PAM AUM increased 8% over the past year, due to market performance of over 1.7%, while S&P total for twelve months ended was -6.7%. PAM net flows were \$4.6bn for the year. As of 05/31/08, in the aggregate, the equity weighting of HNW portfolios decreased from the prior year of 83% to 79%.
- **Equities** AUM of \$57bn reflects a 7% increase from last quarter, as \$1bn of net out flows was offset by market appreciation of \$4.7bn. Net out flows include lost account Met Investor Series Real Estate for \$1.2bn. Equity AUM decreased 1% over the past year.
- **Fixed Income** AUM decreased 8%, or \$10bn, versus the prior quarter. The decrease is primarily due to significant outflows in all liquidity products driven by negative press around potential issues at the firm. These outflows occurred early in the quarter, but May saw a recapture of these outflows.
- **PIM** decreased \$2bn over the last quarter due to decreases in cash management associated with liquidity needs, as well as cyclical customer needs associated with tax payments and stock buy-backs. PIM decreased \$14.9bn over the last year due to decreases in cash management associated with liquidity needs. In addition, \$2.5bn PIM assets transferred from AUM to AUS in Q1 '08 due to a change in account status from discretionary to transactional.
- **AM Alternatives** surpassed Q1 '08 by 5% and Q2 '07 by 58% due to increases in SCF, Quant, and Commodity Fund, among other products.
- **Private Equity** AUM increased \$4.5bn or 17% versus Q1 '08. AUM increased \$9.5bn, or 46%, versus Q2 '07, primarily resulting from new Fund closings. Real Estate Opportunity Fund III completed several closings for \$3.2bn. Real Estate Mezzanine Fund II closed \$0.6bn. Secondary Opportunity Fund II closed \$1.7bn. Loan Opportunity Fund closed \$0.7bn. MLP Opportunity Fund I closed in June 2007 for \$0.7bn. FRR separate account (French Gov't mandate) closed in July 2007 for \$0.7bn. Venture Capital Fund V closed at a total of \$0.4bn. The inflows were partially offset by distributions.
- **As of April 2008, over 81% of Neuberger Berman mutual funds AUM carry a Morningstar 4/5-star rating.**
