IEC 62024-1 (Second edition – 2008)

High frequency inductive components – Electrical characteristics and measuring methods Part 1: Nanohenry range chip inductor

CORRIGENDUM 1

Page 18

5.4 Measuring temperature

Instead of:

$$R_{20} = \frac{R_{Te}}{0.92 + 0.04 T_e}; T_e \text{ in } ^{\circ}\text{C}$$

read:

$$R_{20} = \frac{R_{Te}}{0.92 + 0.004 T_e}; T_e \text{ in °C}$$
