'Josephine' Pink Clematis

WELCOME

To Well-Sweep Herb Farm!

Our farm, a family endeavor, is located in the picturesque mountains of Warren County and is home to one of the largest collections of herbs and perennials in the country. Germinating from the seed of handed down tradition and hobby - to a business that has flourished, 2017 proclaims our 48th year.

From around the globe, with a breadth of Acanthus to Zatar, our selection spans from the familiar and unusual to the rare and exotic. This season we are introducing 57 intriguing new plants to our collection which now tops 1,878 varieties. Whether you're a collector, designer, dabbler, or windowsill gardener ... we hope to arouse the curiosity of all.

Our Farm

Come Visit! We invite you to bring a picnic lunch, play with your children on the swings, visit our farm animals, enjoy a leisurely stroll along our garden paths, or just relax and enjoy the beauty of the day.

The farm features a multitude of herbs and perennials, display gardens, and a gift shop. Our shop is filled with a wonderful assortment of dried flowers, wreaths, statuary, books, essential oils, hard-to-find potpourri supplies and unusual gifts for all ages.

Our butterfly, herb, medicinal, perennial and rock gardens burst forth with breathtaking displays throughout the farm and have been featured in national magazines and books. Our brick-pathed formal herb garden boasts a knot garden, as well as a display of the 35 basil, 73 lavenders, 46 rosemarys, 87 thymes, and 77 scented-leaf geranium varieties that we stock. Whether for pleasure, inspiration, or ideas ... come see the possibilities.

Our Guarantee

With 48 years in the trade, we want you to experience the same gardening rewards that we do, and for this reason we strive to provide you with high-quality robust plants.

If you are less than pleased with your order, notify us **within 10 days**; if we were in error, a full refund of the merchandise will be issued accordingly. We reserve the right to request return of the items prior to adjustment.

A few damaged leaves may occur in transit, this usually will not affect the vitality of the plant. If excess damage has occurred, however, please contact us immediately. We trust you understand that we are not responsible for loss due to improper care.

Our Plants

Our plants are grown naturally, without chemical pesticides or fungicides. All plants are shipped properly labeled and well-rooted in three inch pots or quart containers as noted in the catalog by (Qt.). Weather permitting, our widest selection of herb plants and perennials are available for purchase around May 15th.

Our News

Several distinguished plants compliment our selection this year: the rare blue and white 'Royal Stripes' Gentian, the tasty Changshou Kumquat, the unique 'Cherry Berry' Wintergreen with quarter size fruit, the stunning 'Lion King' Iris with 8" double blossoms and our own introduction - 'Well-Sweep Pink' Aster.

We have always strived to not only provide you with a listing of our plants but also a catalog that is a gardeners reference - enjoy! Don't miss our handy Gardener's Guide - helpful lists of plants by their noted uses, see page 74.

In some respect every plant known to humankind, whether common or rare, shares a useful purpose either in the aesthetic appeal of their foliage or blooms, their culinary or medicinal virtues, or their diverse variation of fragrance or flavor. By including some of this information, it is our wish that we may enlighten you, enhance your lifestyle, or broaden your horticultural interests. While it is our pleasure to share this information, ultimately you are responsible for the way that you use your plants. We encourage you to continue your own research before experimenting. It is our hope that you will be inspired to expand your collection with some of our extraordinary specimens.

The International Herb Association has chosen Cilantro - *Coriandrum* as the 2017 Herb of the Year. Join us in celebrating this herb at our Midsummer Herb Festival - Saturday, July 22nd. Come see our selection!

Our Thanks

Your patronage helps support a small family business that provides personal service, as well as, an enjoyable place for you to visit and relax. We thank you for choosing Well-Sweep Herb Farm for your gardening needs. Plants are our passion - we hope our love and fascination with them encourages you to feel the same. We look forward to your visit or order, and hope to see you soon.

Louise, Cyrus & David Hyde, and Staff

Directions to Well-Sweep

The farm is located between Hackettstown and Washington, NJ.

I-80: Take Exit 19. At the end of the ramp, turn left onto Route 517 South. Follow approximately five miles to the third light from 80 East or the fourth light from 80 West. At light in Hackettstown cross Route 46/Main Street to Grand Avenue. Follow for one mile to a one-lane train underpass. At this point, Grand Avenue becomes 629 South/Rockport Road. Continue on Rockport Road for 4.4 miles. After climbing a long hill and reaching its peak, you will make a right onto Mt. Bethel Road. The farm is one mile ahead on the left.

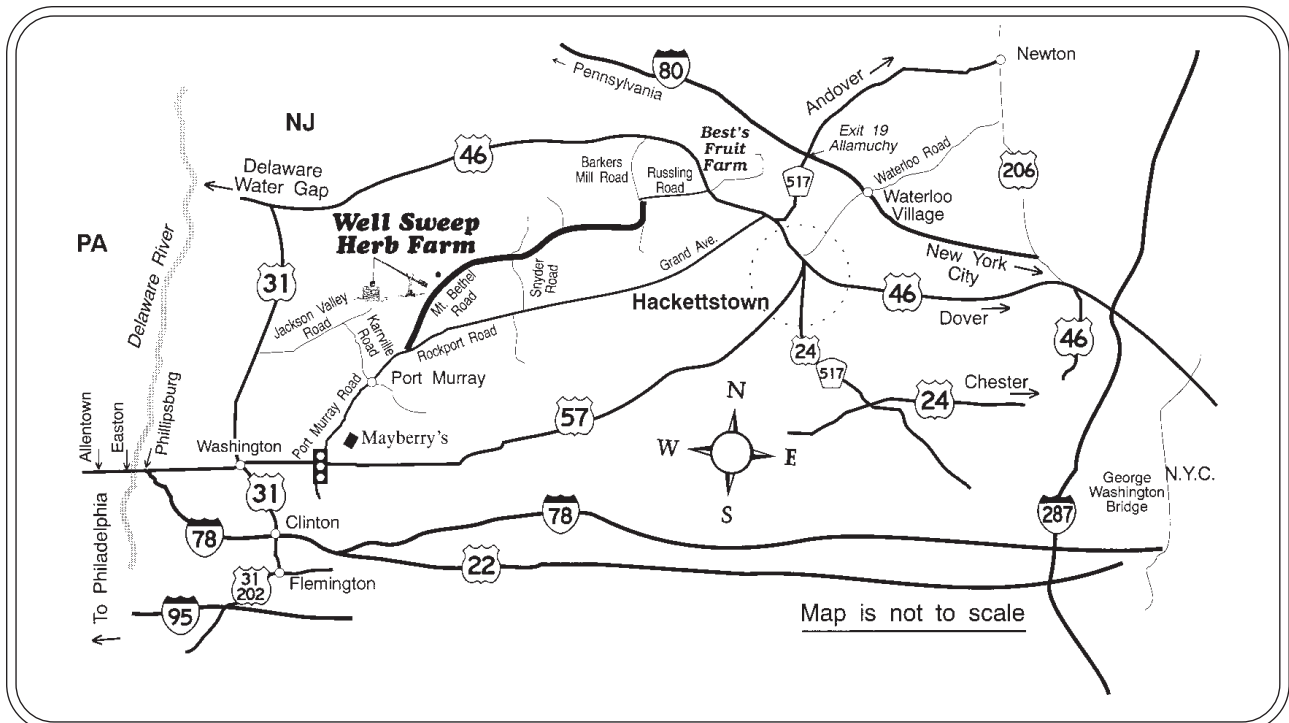

I-78 East: (Allentown, PA area.) Take Exit 6 (Warren Glen - Asbury); at end of exit make left onto Route 632 East - there are no signs. Follow for 4.5 miles, at stop sign make left, then next immediate right onto 632 East/Asbury-Anderson Road, follow for 2.7 miles to light. Cross over Route 31 onto 632 East, follow for 4.4 miles, then make right onto 57 East for .2 miles. (*-continued below)

I-78 West: Take Exit 17 for Route 31 North; follow 10.9 miles to Washington, NJ. At the light in Washington, turn right onto Route 57 East; follow for 3.4 miles. (*-continued below)

I-95: Take exit for Route 31 North; follow approximately 37 miles to Washington, NJ. At the light in Washington, turn right onto Route 57 East; follow for 3.4 miles. (*-continued below)

Route 22: (Easton, PA area.) Follow Route 22 East into Phillipsburg, NJ and take Route 57 East to Washington, NJ. At the main intersection in Washington, you will cross Route 31. From there follow Route 57 East for 3.4 miles. (*-continued below)

(*) At the first traffic light, turn left onto 629 North/Port Murray Rd; follow this for 1.5 miles. Once past the fire house, make a right onto 629 North/Rockport Road. Go 1/2 mile and then bear left onto Mt. Bethel Road. The farm is one mile ahead on the left.

❖ SPECIAL EVENTS ❖

June 3, Saturday, 9:00 to 5:00

Spring Open House

Lectures: 9:00, 10:00 & 2:30

Herb Garden Tour: 10:30

Buzzy Bees: 11:00

Thai Cooking: 11:30 & 12:45

Mushrooms & Fungi: 12:00

Backyard Medicinal Herbs: 1:00

Herb Garden Tour: 3:30

Welcome to Well-Sweep Herb Farm! Enjoy a day of free informative lectures and presentations, as well as tours of our spectacular gardens.

Lectures for the day begin at 9:00 with Growing and Using Culinary Herbs, then Perennials of Distinction at 10:00 and Shade Perennials at 2:30.

At 10:30 and 3:30 Garden Tours on the history and uses of both exotic and familiar herbs will be led by Cyrus Hyde - noted lecturer and collector, and his grandson - Patrick McDuffee.

At 11:30 and 12:45 join Jay Chai, owner of the Pandan Room and Topo, as he presents easy culinary tips for exotic flavors. Thai, Indonesian and Vietnamese dishes featuring herbs and spices from our farm will be covered. These dishes will also be available for purchase from 11 to 2. Come experience unusual herbs to enhance your cuisine and expand your palate.

At 11:00 Lorette Cheswick, skilled Apiarist, will talk about how to attract honey bees to your garden, the joys of beekeeping and honey extraction. Come sample our delicious and organic spring nectar flow.

At 12:00 step into the world of Mycology, with Olga Tzogas of Smugtown Mushrooms. Come explore the roles mushrooms and fungi play in our lives, the forest and our food systems. Learn basic concepts of mushroom biology and ecology, as well as methods for growing and incorporating mushrooms into your own kitchen and garden.

At 1:00 join Kerry Adams, a practicing herbalist of 43 years, for a lecture on backyard plants with useful medicinal properties. These wonderful weeds aid healing and prevent illness. Join us to learn simple ways of keeping yourself and your family healthy.

Our largest selection of herb plants will be available on this day. Homemade refreshments can be enjoyed by all. Feel free to bring a picnic lunch. Free admission and parking.

June 10, Saturday, 10:00 to 11:30

Herb Container Gardening

Growing herbs in containers is an enjoyable and rewarding pastime - whether on a windowsill, patio or deck. Learn about choosing plants that work well together, soil recommendations, as well as helpful care instructions. You will plant your very own 17" round planter featuring 10 plants from a selection - everything will be provided. Planter needs at least 6 hours of direct sunlight. Reservations are required. \$52.00

June 10, Saturday, 1:30 to 3:30

Hypertufa Planters

Create two of your own hypertufa trough planters with that Old English look. Choose from a variety of shapes and sizes for your project. We will be combining cement, perlite and other ingredients - so wear old clothes, bring rubber gloves and a face mask. Troughs will need to be left to dry with us for a few days. Reservations are required. \$46.00.

June 17, Saturday, 10:00 to 11:00

Kids' Sensory Garden Tour

Moms, and Dads too - come enjoy some free time as we take your children on a fun and educational sensory garden tour. We'll explore unusual textures, unique scents, delicious flavors, and also play with plants that 'come alive'. Reservations req. \$8.50.

June 17, Saturday, 1:00 to 3:00

Miniature Garden

Join us for a fun-filled afternoon creating your very own miniature garden. Start with a 14" planter and your choice of five dwarf plants. We will cover which plants work best, growing requirements and care instructions - all material supplied. Bring your creativity to life! Reservations are required. \$42.00.

❖ SPECIAL EVENTS ❖

June 23, Friday, 6:30 to 9:00

Medicinal Herb Walk & Cherokee Storytelling

David Winston, renowned herbalist and ethnobotanist, will present an educational walk to locate and identify common medicinal herbs in their native habitat. Learn about the healing properties of nature's pharmacy, perhaps just beyond your own doorstep. Following the walk, David will share a Cherokee Indian story as we gather around a campfire.

Mr. Winston is an internationally known lecturer as well as founder and president of Herbalist & Alchemist, Inc. Refreshments will be served. Reservations are required. \$43.00.

June 30, Friday, 1:00 to 3:00

July 8, Saturday, 1:30 to 3:30

Lavender Crafts

With lavender in full bloom - enjoy a relaxing afternoon creating three beautiful projects from this fragrant herb. We will make a 10" lavender swag, 6" nosegay and a lavender votive candle holder - delightful decorations for your home. Lavender refreshments will be served. Reservations are required. \$38.00.

July 1, Saturday, 11:00 to 2:00

Wonderful Lavender & Lunch

Come and enjoy a relaxing and educational day with lavender. Our day begins at 11:00 with 'Lovely Lavender,' a presentation by David Hyde on growing, enjoying and harvesting this herb. The history, best varieties, tips and tricks, as well as the many healing benefits of lavender will be covered.

A tasty lavender lunch will follow at 12:00. At 1:00 enjoy an activity creating your very own 6" heart-shaped fresh lavender wreath. Drying and care instructions will also be covered. This makes an attractive addition for your home's decor. Come experience this

wonderful fragrant herb. Reservations req. \$52.00.

July 15, Saturday, 10:00 - 12:00

Succulent Wreath

Create a living wreath made from a wide selection of succulents with different textures and colors. You will choose an 11" round or square frame then design your own artistic creation. This amazing living wreath can be displayed or mounted on a sunny door or wall. Care instructions will be covered. Reservations are required. \$58.00.

July 22, Saturday, 11:00 to 2:00

Midsummer Herb Festival

Well-Sweep's 28th annual Midsummer Herb Festival celebrates 'Cilantro', *Coriandrum*, the 2017 International Herb Association's - Herb of the Year. Enjoy a tasty luncheon prepared with both cilantro and coriander, as well as Vietnamese Coriander, Mexican Cilantro and other complimentary herbs.

Come and learn about the many virtues of this popular culinary and medicinal plant, as well as growing tips for a successful harvest. A lecture and tour through the garden will also be part of the day's activities. Reservations are required. \$36.00.

July 29, Saturday, 1:00 to 4:30

Mushroom Cultivation

Join us for a lecture on the basics of mushrooms and fungi, their biology and how they exist in nature. Learn how to use fungi to build up our soils, reduce erosion, supply us with food and even medicine.

A growing trend, cultivating mushrooms on logs and wood chips is becoming a standard for gardeners, woodlot owners, farmers and homesteaders. Come learn the principles of incorporating these permaculture practices. Additionally, you will create and take home your own inoculated log featuring Oyster Mushrooms. Reservations are required. \$52.00

❖ SPECIAL EVENTS ❖

August 21 - 26, Mon. - Sat., 9:00 to 5:00

Customer Appreciation Week

Our customers are what make Well-Sweep Herb Farm successful. To show our thanks, we invite you to visit us during this week and receive a 20% discount on all purchases. On Saturday, August 26, come and experience our farm with a Native Plant Lecture at 11:00, as well as Herb Garden Tours at 12:00 and 2:00. On this day complimentary herbal refreshments will be served. Free admission and parking.

September 2, Saturday, 10:30 to 12:00

Worm Composting

Workshop

Linda Conrad will give a presentation on the advantages and techniques of vermiculture - worm composting. Each participant will make a mini-compost bin with worms included - to take home.

Linda will cover what to feed your worms and how to maintain your worm bin. Worm castings increase the amount of nutrients to plants and increase the level of essential microbial activity in the soil. Reservations are required. \$25.00.

September 2, Saturday, 1:30 to 3:00

Mad Tea Party

Join Patrick of Well-Sweep for a delicious afternoon tea. Enjoy samples of his favorite fresh-cut herbal teas, from common to unusual, as he lectures on their benefits and lore. Windowsill and garden growing tips will be covered as well as harvesting, drying and brewing. Crazy hats encouraged. Reservations req. \$32.00.

September 9, Saturday, 1:30 to 3:00

Herbal Spice Blends

Come spend a pleasurable afternoon creating several tasty herbal blends. We will make homemade vanilla extract, meat rubs, herbal salts and herb infused oil. Everyone will participate in the preparation of these

delicious treats, and take home a container of each to enjoy. Reservations are required. \$38.00.

September 23, Saturday, 10:00 to 12:00

Pressed Flower Workshop

Dorothy Kovak & Linda Conrad, experienced artists, will teach you how to use pressed flowers and botanicals to create a 5" x 7" picture or two greeting cards of your own. Important techniques will be demonstrated. Reservations are required. \$34.00.

September 23, Saturday, 1:00 to 3:00

Pressed Flower Design

This workshop is a more advanced step in flower pressing. Dorothy and Linda will give you step by step instructions on how to create an 8" x 10" flower basket picture using layers of pressed flowers. A beautiful project to display in your home! Reservations are required. \$40.00

September 30, Saturday, 10:00 to 12:00

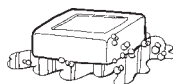

Herbal Medicine Basics

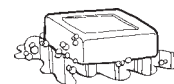

What is Herbal Medicine? Why use herbs? How does an herbalist decide which plants are appropriate for a person? Come join Kerry Adams, a practicing herbalist for 43 years, to gain an understanding of plant energetics and herbal medicine. A presentation of traditional knowledge you can use for your own health and wellness. Reservations are required. \$24.00

October 7, Saturday, 1:00 to 3:00

Soap Making

Learn how to make all-natural, homemade soap. Various methods and ingredients will be covered. Choose from a varied selection of fragrant essential oils and herbs - to create your own specialty soap. Wear old clothes. Reservations are required. \$35.00.

❖ SPECIAL EVENTS ❖

October 21, Saturday, 6:00 to 9:00

Fall Harvest Celebration &

Franklin D. Roosevelt

Join us for our 17th annual fall harvest gathering with honored guest, Franklin Delano Roosevelt, an American statesman and political leader who served as our 32nd president. He won a record four presidential elections and emerged as a central figure in world events during his presidency.

Acclaimed actor Neill Hartley, from the American Historical Theatre, will portray Roosevelt in a captivating presentation of 'A New Deal'. Come enjoy a delicious feast and entertaining evening. Reservations are required. \$70.00.

October 28, Saturday, 6:00 to 9:00

Masquerade Murder Mystery Dinner

Come enjoy an evening of murder, mystery and intrigue. Witness and interact in this mystery game as the drama unfolds - you'll help uncover clues and crack the case. Presented by the Murder Mystery Company. A three course dinner will feature Thai food - catered by the Pandan Room. Reservations required. \$58.00.

November 4th - December 23rd

Dried Flower Supplies

Our dried flowers are sold by the individual bunch or in set-ups. A set-up is a pre-selected and color-coordinated mixture of individual bunches that are wrapped in cellophane, ready for you to arrange or to give as a gift. Please specify whether you would like your bouquet in shades of pink, burgundy, gold, or red with touches of blue, purple, rose, or yellow. These flowers are all natural colors; none have been dyed.

🌿 Gift Certificates 🌿

Well-Sweep Herb Farm Gift Certificates are the perfect gift for a special occasion. We'll send a Gift Certificate in the amount you choose along with a copy of our catalog. Use the order form to indicate where it is to be sent, how you would like it signed, and the date it should arrive. Please include \$2.95 for postage and handling.

Topiaries

Rosemary, Myrtle, Lemon Verbena, and Scented Geranium topiaries are available at the farm.

Herb Plants & Perennials

✿ Code Explanation ✿

We have endeavored to provide as much valuable information as possible in a concise useable format. Understanding the following codes will allow you to utilize our catalog to the fullest.

Abbreviations:

Stock# Column:

★ = On end designates a new plant for 2017.

***** = Designates a cross reference for locating plants that are known by more than one name.

Common Name Column:

Underlined headings denote a genus.

(3") = Not a listed code but designates a plant grown in a square 3" size container, 3 1/4" L x 3 1/4" W x 3 7/8" H, 14.3 fl. oz., 423 ml; the stock # will not have an "X" after it or (Qt.) following the common name.

(Qt.) = Designates a plant grown in a square quart size container, 4 3/8" L x 4 3/8" W x 4 3/4" H, 32 fl. oz., 946 ml; the stock # will also have an "X" after it.

(2Q) = Designates a plant grown in a round two quart container, 5 1/2" D x 6" H, 59 fl. oz., 1,744 ml; extra shipping & handling charges apply.

(3Q) = Designates a plant grown in a round three quart container, 6 1/8" D x 6 7/8" H, 83 fl. oz., 2,454 ml; extra shipping & handling charges apply.

(PPA) = Designates the Perennial Plant Association, Plant of the Year. The numbers preceding designate which year; i.e., 94 PPA = 1994.

Hardiness/Habit Code:

(For Northwest New Jersey, Zone 6(a): -5 to -10 F)

Zone information is provided for the following plant categories followed by a #. Stating that a plant is hardy to a specific zone basically means that it should survive through the winter in this location. Zones are based on the average low winter temperatures for a region, however many additional factors may be involved. These rating are based on our best judgement through research and experience.

A = Annual: This plant will grow for one season. Seed collection is necessary for the following season's propagation.

B# = Biennial: This plant produces leaves the first year and flowers the second. After blooming it will reseed itself.

HA = Hardy Annual: This plant will reseed itself each fall after blooming.

P# = Perennial: This plant is a hardy perennial and will live through the winter.

P#* = Perennial With Protection: This plant is a hardy perennial with protection. Depending on the severity of the winter some protection, such as mulch or cover, may be needed for it to survive.

TP = Tender Perennial: This plant is a perennial but cannot withstand frost or freezing in zone 6.

Sun Requirement Code:

FS = Full Sun: This plant prefers full sun all day.

PS = Partial Sun: This plant prefers to grow where it will have at least half a day of sun.

S = Shade: This plant prefers shady conditions or indirect sunlight.

Use Code:

❖❖ **Please note:** *Plant uses that correspond to all plants in a group are found to the right of the heading and are bold and underlined.*

B = Border: This plant can be used to edge a garden.

BF = Butterfly Plant: This plant attracts butterflies as a host plant or nectar source.

C = Culinary: Parts of this plant are used in cooking or for making tea.

CF = Cut Flower: The flowers of this plant are attractive and long-lasting in fresh arrangements.

D = Dye Plant: Certain part(s) of this plant are used to prepare dyes.

DF = Dried Flower: The flowers or foliage of this plant dry nicely and are used in arrangements.

DR = Deer Resistant: This plant in normal conditions will not be eaten by deer or rabbits.

DT = Drought Tolerant: This plant, once established, will tolerate drought conditions.

EG = Evergreen: The leaves of these plants retain their color year-round.

F = Fragrance: The leaves, flowers or roots of this plant are fragrant.

FA = Flowering Annual: This plant is a showy annual.

FP = Flowering Perennial: This plant is a showy perennial.

Herb Plants & Perennials

GC = Ground Cover: This plant spreads into a nice ground cover.

HB = Hummingbird Plant: This plant is known to attract hummingbirds.

IU = Interesting or Unusual Use: This plant has unusual characteristics or uses that make it remarkable.

LB = Long Blooming: This plant has an extended bloom period that is noteworthy.

M = Medicinal Plant: Some part(s) of this plant are believed to have useful properties for medicine or healing.

MR = Mildew Resistant: This species, cultivar, or hybrid has better resistance to powdery mildew.

MT = Moisture Tolerant: This plant will tolerate or thrive in damp or moist conditions.

NP = Native Plant: A native or nativar of North America. A nativar is a cultivar or subspecies of a native plant.

O = Ornamental: An interesting and showy plant.

RG = Rock Garden: This plant will thrive in full intense sun, extremely well-drained soil and with ample space for growth.

VN = Vine: Given support this plant will either lean, twine or cling in an upright manner; usually producing prolific growth throughout the season.

WG = Woodland Garden: This plant will thrive in a rich moisture retentive soil with good drainage where there is filtered sunlight or some shade. All of these conditions need not be present.

Height: (Column Heading = HT)

Plant heights are given in inches. Please bear in mind that there are many factors that will influence a plants performance; sun, moisture and soil quality to mention just a few. For example, our 'Taplow Blue' Echinops in bloom, grown in full sun reaches 36" tall while those growing in a shady area have topped 60".

TP = Height represents one season of growth.

A, B#, HA, P#, & P#* = Height given represents flower height when in bloom.

AD = Age Dependent

VN = Vine Habit

Bloom Time: (Column Heading = BL TM)

Bloom time will usually fall within the period listed. Several conditions can affect this time frame, such as whether it is an early, normal or late season, as well

as moisture and sunlight conditions.

Month Abbreviations:

JA = January

FB = February

MR = March

AP = April

MY = May

JN = June

JL = July

AG = August

SP = September

OC = October

NV = November

DC = December

Other Abbreviations:

EVB = Everblooming

ADP = Age Dependent

PRD = Periodically Blooms

SLD = Seldom Blooms

Successful Transplanting

- 1) Choose a site according to the plant's sun requirement - as listed in the catalog.
- 2) Prepare the garden by turning the soil with a cultivator, garden fork or rototiller; add amendments such as compost as needed.
- 3) Dig out an area slightly larger than the transplant rootball.
- 4) Don't pull plants out of their pots, instead turn the pot upside down and gently knock a corner on a hard surface. The plant should come out easily. If not, cut off the pot.
- 5) Place the rootball into the planting hole so that its top edge is even with the soil surface. Surround and slightly cover the rootball with loose soil. Gently firm down the soil with your fingers around the roots, trying to remove all air pockets. Create a shallow soil basin around the plant to aid watering.
- 6) Water the soil thoroughly so that it penetrates deeply. Remember not to drown them or let them dry out to the point of wilting; water until established.
- 7) To help retain moisture, protect roots and prevent weeds - give the transplants a healthy 2" layer of mulch. They'll thank you for it.

ART285X	French Tarragon (Qt.) (True)	<i>A. dracunculus</i> 'Sativa'	P3	FS - PS	BF, C		30		7.95
Tarragon's bittersweet peppery taste has anise undertones and is a popular flavor in salad dressings and poultry dishes. Its tea is known to stimulate digestion, settle an upset stomach and can be used as a general tonic. This clump forming perennial likes well-drained, rich soil and full-sun; it requires a period of winter dormancy for lush spring growth. This plant can only be cutting or root propagated, as it is sterile. The leaves should mildly numb your tongue.

Asclepias: Butterfly Weed, ...

This neglected beauty is ranked as one of the top 10 showiest North American wildflowers. It attracts bees, butterflies and beneficial insects and enlivens the garden with its long-lasting summertime color.

A favorite plant of the beautiful orange & black Monarch butterfly which is one of the best known threatened butterfly species in North America. According to the latest surveys over 90% of the population has disappeared in the last decade - mostly due to loss of habitat. Promoting the plight of this beautiful insect is probably the only thing that can lead to saving it. It is commonly agreed that one solution is for all aspects of our society to plant more Asclepias; all varieties of both Butterfly Weed, as well as Milkweed. Help save our beloved Monarch Butterfly from extinction!

Calamintha:									
COL045X	Nepitella (Qt.)	<i>C. nepeta</i> (nepetoides)	P5	FS - PS	C, F, FP	Lilac, Light-	18	JL - AG	7.25
A pretty perennial that likes full to partial sun and rich well-draining soil. Nepitella, also know as Mentuccia, is a popular spice in Italian Cuisine used for flavoring vegetable dishes and is especially delicious cooked with mushrooms. Its flavor can best be described as a cross between mint and oregano; use judiciously as its flavor can easily overpower a dish. Buon appetito!

CAM555X	Tea Plant, Large-Leaf (Qt.)	<i>Camellia sinensis</i>	P7	FS - PS	C, FP, M	White & Yllw	60	SP - OC	15.95
Enjoy a mild-flavored delicious "Green Tea" from your own tea plant. One way to process is to pick tender young growth, with 2 - 3 leaves, then allow them to wilt. Next bruise the leaves by rolling between your hands until they darken and become crinkled - this begins the fermentation. Then dry in an oven set at 250°F for 20 minutes - this removes moisture and stops the fermentation. After this process they are ready to use; store in an airtight container.

Celastrus: Bittersweet, Climbing, American, ...					CF				
<p>These twining vines are known for their showy clusters of orange-red berries that remain decorative for many months. The fruit is popular in fall bouquets and attracts birds. Easy to grow, they prefer good drainage in rich to poor soil and do nicely on fences. This native grows wild in our area and will climb up shrubs and trees, sometimes exceeding 30' in height. To ensure berries, only produced on the female, plant at least one male within 30 feet.</p>

Clematis: Clematis, ...									
BF, DR, HB									

A popular climbing species with abundant flowers over a long blooming period, Clematis are valued for their delightful variety of shape and color. Requiring at least six hours of sunlight, their roots need to be protected from drying out and excessive heat. This can be accomplished by mulching thickly around the base of the plant. Clematis are an excellent plant for walls, arbors or trellises.

It is a fallacy that clematis need to be pruned regularly. Even if never pruned, they would grow and bloom. General Rules: prune out all dead and misdirected growth. Direct the growth of strong stems onto support systems, gently tying growth to structures if necessary.

Prune Groups: (N/Group 1) - no pruning, remove all dead and weak stems after blooming. (M/Group 2) - moderate pruning should be done in late winter or early spring and consists of removing all dead and weak stems. Trim the remaining stems just enough to keep it under control. (H/Group 3) - hard pruning should be done in late winter or early spring. Remove old top growth to about 12 - 18" above ground level; this will give the plant a fresh start each year.

<p>An international favorite, this herb's pungent parsley-like leaves are used to flavor rice, curry, fish, bean, salad and soup dishes. The seeds, with a slight citrus flavor are used in pickles, desserts and many other recipes. 'Calypso' is slower to bolt than any other variety and will provide more leaves to harvest during the growing season.</p>

Cypripedium: Lady's Slipper, ... (Spring & Fall Shipment Only) (Nursery Propagated)

Beautiful to behold, these rare orchids are becoming increasingly scarce in the wild. They are relatively easy to grow and prefer a location out of the midday sun in rich humus. Requiring vernalization - freezing during the winter months, they will not do well in warmer climates - above zone 7. Generally the Cypripediums will begin blooming in their 5th season: time of transplant, moisture levels and temperature can be a factor. We are offering blooming size plants in their 6th year - (XL) and 8th year - (XXL). The foliage may cause an allergic reaction to those with sensitive skin. Beware: deer are known to nibble on them - so protect accordingly.

Dianthus: Dianthus, ... (Flower petals edible on listed cultivars; remove petal ends.) **BF, FP, HB, LB**

Varieties listed with a ☆ afterwards are compact mound forming species referred to as Moss Pinks - with growth that actually looks like moss. While those with a ° after their name are clump forming dwarf specimens with silvery blue foliage and covered with masses of 6 - 8" flowers in bloom - some extremely fragrant. All dianthus benefit by cutting back spent flowers which promotes reblooming. They prefer well-drained soil; some tolerating less than a full day of sun.

EQU055X	Common (Qt.) (Used like sandpaper)	<i>Equisetum hyemale</i>	P3	FS - S	IU, M, NP, O	Brown	30	JN - JL	7.25
<p>Considered a living fossil - in prehistoric days this plant grew to tree heights, but today only reaches a few feet tall. Horsetail's unusual reed stems contain silica crystals which give them an abrasive quality, similar to emery cloth. This plant is superb for fine sanding of wood and metal and can even be used to file fingernails. Early cabinetmakers used horsetail grass to put a finish on their prized works which gave the wood a fine luster and patina. Irish women discovered that sanding their famous meerschaum pipes with horsetail grass under water produced a glass-like finish. From dry sand to swampy land, this plant thrives in any soil type and is not particular about light conditions.</p>

Eryngium:									
ERY160	Cilantro, Mexican; Culantro; Recao	<i>Eryngium foetidum</i>	TP	FS	C	Green	10	JL - AG	6.50
<p>A highly esteemed Mexican herb that grows like a low thistle with long serrated leaves and prickly flowers. A tender perennial, it prefers full sun and rich, well-drained soil and must be protected from freezing. Cutting off the seed heads will ensure a bounty of leaves - the prized part of this herb. Mexican Cilantro's leaves are stronger and more pungent in flavor than regular Slow Bolting Coriander, <i>Coriandrum sativum</i>, but not as potent or productive as the Vietnamese Coriander, <i>Polygonum odoratum</i>. The fresh or dried leaves of this cilantro are used for making soups, curries, bean and rice dishes.</p>

A selected cultivar of the Ostrich Fern, 'Jumbo' has enormous feathery fronds that can reach up to 7' given the right conditions. Easy to grow, it does best in rich, moist, shaded sites and is good for naturalizing, foliage backdrop and foundation plantings. The fiddleheads are edible and considered a delicacy on both varieties.

GRA110X	Lemon (Qt.)	<i>Cymbopogon citratus</i>	TP	FS	C, F, M, MT	Green, Lht-	30	JL - AG	7.25
<p>Particularly popular in Indian and Thai cuisine, this native perennial of Southern India and Ceylon is a culinary jewel - with a distinct and refreshing taste of lemon. The lower six inches of the fresh succulent stalks offer the best flavor. To harvest, remove the side shoots which allow the main plant to continue growing. The hearts are eaten as a vegetable with rice, and the chopped stalks are used for sauces, curries and pastes, as well as in fish, poultry and pork dishes. A refreshing hot or cold tea is made from the leaves and is recognized for its antiseptic properties.</p>

Helleborus:									

Heralding in the season, these attractive early-spring bloomers are a welcome sight to the gardener. Dark-green shiny leaves are topped with masses of long-lasting blooms offered in a kaleidoscope of colors - great in fresh arrangements. These tough deer resistant perennials prefer a moderately shady location with rich, well-drained, sweet soil.

Laurus: Bay, ...									

Native to the Mediterranean, Sweet Bay also known as Sweet Laurel or Bay Leaf, is one of the most widely known culinary herbs. With a very pungent and distinctive flavor; Bay Leaf is added to many meat, sauce and soup dishes - usually removed before serving. Medicinally the tea is known to aid digestion. Golden Bay with similar growth and uses is more decorative - new and fall growth having a spectacular golden tinge. They work great in containers, providing flavor and decoration year round; especially as a topiary. Larger sizes are available.

Lavandula: Lavender, ... : (Hardy Varieties)

BF, DF, DR, DT, LB

The traditional scent of lavender has been savored for centuries and it is valued in the home as well as commercially. Potpourris, sachets, perfumes, bath products, and flavoring are just a few of its myriad uses. An herb that was once woven into hats in order to ease tension, today it is used in aromatherapy as a relaxant.

Well-Sweep offers an enormous selection of lavenders in various flower sizes and colors. Bloom time, height and type of plant growth make them an interesting and attractive perennial. Most varieties have purple flowers with silvery-gray foliage, but there are exceptions. The lavenders thrive in full sun and well-drained soil, and mulching

Lavandula: Lavender, ... : (Hardy Varieties) (Continued)

BF, DF, DR, DT, LB

with sand will promote healthy growth. A sweet soil, accomplished by adding pulverized or granulated lime, will increase plant vigor and oil production - which creates a stronger scent and helps to produce an abundance of flowers. Since these plants nearly double in size each year, they should be spaced two or more feet apart for optimum growth. Note that all our lavender cultivars are cutting propagated, therefore ensuring that they are true to type.

The Lavandins are natural and bred hybrids of *Lavandula angustifolia* and *Lavandula latifolia*, including some of their subspecies; all indicated in the lavender listing. These lavenders are great for the novice gardener because they are noted for vigorous growth, high oil yield and are easy to grow. It was recently brought to our attention that the Lavandins should not be used for culinary purposes. Some popular Lavandins are: 'Provence,' with its strong scent and robust growth; and 'Fat Spike,' with large spiked flower heads which is great for weaving lavender wands.

Over the past several years we have conducted an evaluation of lavender hardiness and wintering reliability. Though results may vary depending on location and weather conditions, in the list below, the **lavenders followed by a *** indicate varieties that have been consistently reliable here at the farm - zone 6(a). **Lavenders followed by ♦** indicate varieties that, when spent flowers are removed, have consistently bloomed twice per year for us.

<p>A woodland native that colonizes into large patches, it is a joy to behold with its large umbrella-like foliage achieving 18" in height. White flowers are followed by edible yellowish-green fruit beneath its leaves. When ripe, it is eaten raw or made into jams, jellies and pies. Used by the American Indians as a medicine, all parts except for the ripe fruit are considered toxic. Well known as a laxative, the rhizome is antiviral, and extracts are now used in drugs for warts and certain cancers.</p>

MUR620X	Curry-Leaf (Qt.) (15-18" Tall)	<i>Murraya koenigii</i>	TP	FS	C, F, IU	White; Frgrt	60	ADP	27.95

An evergreen shrub in both its native countries India and Ceylon, this plant has pungent aromatic leaves that are used in curries, chutneys, stews, vegetables and yogurt. The fresh leaves are an essential ingredient in many Indian dishes and dried leaves are used in curry powder.

Curry-Leaf needs full sun, temperatures above 60 degrees and its soil should be allowed to dry out between waterings. It is also used medicinally to promote digestion and circulation.

Ocimum: Basil, ... (Continued)

spaghetti sauce. Medicinally, it is known for its ability to relieve intestinal gas and its antibacterial properties. Fresh leaves are a good source of calcium and high in vitamin A. An oil extracted from the leaves is used in perfumes. These plants prefer full sun and as long as the seed heads are removed, they will produce an abundance of leaves.

OCI100 **'Cuban'** *Ocimum basilicum 'Cuban'* TP FS C White 18 JL - SP 4.75
 Best for growing indoors on the windowsill, it has a strong growth habit and ability to withstand cooler temperatures. The flavor of the leaves is similar to Sweet Basil, though spicier, and its fresh leaves are great to have all year round.

OCI150 **'Purple, Miniature, Well-Sweep'** *O. basilicum 'W.-S. M. P.'* TP FS C, O Pink 10 JL - SP 4.75
 This treasure was developed at Well-Sweep Herb Farm in 1974 when Cyrus Hyde, the proprietor, crossed a large-leaved purple basil with a tiny, green-leaved miniature basil. Over a period of three to four years, crosses were made, seeds were kept, and the best offspring of each of these crosses was selected. The end result was a miniature basil with tiny purple leaves. To ensure the unique traits of this plant are preserved all propagation is done here by cuttings.

Olea: Olive, Common, ... ; Tree Olive

OLE810X **'Arbequina' (Qt.)** (Compact & Self-Pollinating) *O. europaea 'A.'* **TP** FS C, F, M, O White AD MY - JN **18.95**

Native to the Mediterranean, the olive tree is one of the oldest living trees on earth and has been cultivated since man's earliest history. Traditionally the olive branch is known as a symbol of peace. Valued economically for its important fruit and the oil extracted from it, all parts of the tree are used medicinally and the oil is known for lowering cholesterol.

Fragrant creamy-white flowers cover the plant and by late summer fruits will begin to ripen. The tree produces both olives of commerce - the green are picked when fully grown but not ripe; while black are fully ripe. Once picked, they are treated to remove the bitter flavor and then pickled. They prefer full sun and well-drained soil. Fruit are produced mainly on one-year-old wood and as the tree ages it is advantageous to remove old branches to encourage growth. Easy to grow Spanish cultivar - 'Arbequina' is self-pollinating, has a compact growth habit and produces abundant small fruits with excellent flavor; considered one of the best varieties. Hand pollinate if not set outdoors.

OLI015 **Olive, Sweet** *Osmanthus fragrans* **TP** FS - PS F, O White, Crm- AD PRD **9.25**

OLI020X **Olive, Sweet (Qt.)** *Osmanthus fragrans* **TP** FS - PS F, O White, Crm- AD PRD **12.95**

Known also as Tea Olive or Kwai by the Chinese, Sweet Olive is an herb you will enjoy all year-round. Named for its wonderfully sweet blossoms, this East Asian native has small creamy-white flowers with a fragrance similar to orange blossoms. It is superb as a houseplant, for when it blooms, it will scent an entire room.

In its native environment, Sweet Olive can reach 30 feet in height; in the Eastern United States, kept pruned, it does well as a house plant with its shrubby dark-green leaves. Requiring five hours to a full day of sun and temperatures above 45 degrees, it will bloom all winter and occasionally throughout the remainder of the year. The flowers are used in China to add flavor and scent to both tea and wine, and also for flavoring desserts much like we use vanilla. Try some flowers for an excellent addition to your next cup of cappuccino or tea.

Origanum: Oregano, ... : (Culinary)

A favorite in the herb garden, oregano has been widely used in both cooking and folk remedies. Its powerful antiseptic properties make it an excellent treatment for mouth conditions and it is used for colds, flus and headaches. A great source of antioxidants - the leaves contain calcium and vitamin A and also hold their flavor well when dried.

The following oreganos are our most popular culinary varieties. 'Italian': a tender perennial with an excellent refined taste, used for delicate flavoring. 'Culinary': similar to 'Italian', but sweeter and more floral in flavor. Greek: a

One of our favorites - this Victorian variety has a distinctive rose scent and can be used in all types of desserts, jams, syrups, teas and punch for its unusual flavor and fragrance. The essential oil is used in aromatherapy, perfumery, cosmetics and in health tonics. It is added to face creams as it balances skin sebum - helping to relieve acne. Medicinally, it is used as an antifungal, antidepressant, antiseptic and for hormonal problems.

---------	---------------------------------------	----------------------	----	---------	-------	-------	----	---------	------

A tropical plant with unusual and attractive growth; its swollen jointed canes and large heart-shaped leaves are imbued with a sassafras flavor and scent. A tender perennial, it needs temperatures above 50°F and likes full or preferably partial sun in rich soil.

Also known as Hoja Santa it is an essential ingredient in a popular Mexican sauce called mole verde - a mixture of fresh herbs usually used with meat dishes. In Central America, its leaves are added to soups, meat or fish dishes. Its tasty leaf is also cooked and eaten as a green or used for meat or bean rolls. We've tried it as a wrap on chicken on the grill and it does impart its unusual flavor - delicious! The leaves contain safrole and there is some debate on its health safety in the United States; it is advised that if used - do so only in small amounts.

Rosmarinus: Rosemary, ...									

A familiar name, rosemary usually evokes thoughts of an attractive garden herb, marinated grilled meats, or even Simon & Garfunkel's song, Scarborough Fair ... "Parsley, Sage, Rosemary, & Thyme."

A Mediterranean native, rosemary grows wild on hilly slopes by the ocean. This attributes to its genus name, the Latin word *Rosmarinus*, which translates into "dew of the sea." These herbs enjoy rich, well-drained soil and moderate watering with at the minimum a half day of sun. The best advice for care is - "don't overwater." Rosemary will thrive in a container as long as it is faithfully fed with a good organic fertilizer - we like Neptune's Harvest. If planted in the ground, to successfully survive the transition into your home, here are some good tips to follow. Prior to heavy frost, carefully cut an adequate size root ball for the appropriate top growth with a sharp trowel. Trim any exposed roots closely - remember the less you disturb the roots the better. Gently but firmly press soil into the pot around the root ball, working in the soil so that all the roots are covered and no air pockets remain. Water and place

Rosmarinus: Rosemary, ... (Continued)

in partial sun; allow to acclimate to the pot by leaving it outside for two weeks prior to moving inside - light frost will not hurt it. Rosemary responds well to pruning and as a potted plant provides a constant supply for your kitchen. It performs superbly for formal topiary art and when in bloom it is beautiful in fresh flower arrangements.

An essential oil obtained from rosemary's flowering tips is used in perfume and cosmetic products, and even flavors some toothpastes. It has traditionally been used to relieve acne, dandruff, eczema, and fungal infections.

Rosemary's applications are impressive. When consumed, it helps promote digestion and when applied externally it has mild analgesic and anti-inflammatory effects. In addition to antiviral properties, it strengthens blood vessels and stimulates circulation, especially to the head - boosting memory and concentration. Rosemary's constitution contains more than a dozen antioxidants as well as four known components that help prevent cataracts.

The leaves of rosemary add a crisp and pungent taste that is delicious on baked or grilled lamb, poultry, pork and beef. Chopped leaves also add a nice accent to breads, stuffings and vegetable dishes. The flowers have a sweet flavor, though lighter in essence than the leaves, and can be candied or added to a tossed salad, vinegar or wine.

The three rosemaries touted as hardy in the herb trade are 'Arp' to -10°, 'Hill Hardy' to -10° and 'Salem' to 0°F. Our experience here in zone 6(a), is that without extensive protection these rosemaries will not withstand the severity of our winters. However, local customers have grown them in sheltered areas with some success. Since outdoor survival for these herbs is not guaranteed, we don't promote them as winter hardy.

Our findings differed on hardiness in a test we ran in the winter of 2001 - 2002, with the lowest recorded temperature in our area of 7°F. We found that 'Blue Gem', 'Blue Spears', 'Blue Spire', 'Dutch Mill', 'Logee Blue' - in a slightly protected area, and 'Sissinghurst Blue' had all over-wintered in excellent condition. While Heavy-Leaf Alba had over-wintered but with slight to moderate damage. 'Arp', Common, and 'Constance DeBaggio' showed noticeable winter damage, while the remainder of our collection did not over-winter.

Our favorite for its flavor and growth! This upright variety is a robust grower with dense-foliaged forest-green leaves of rich fragrance and taste. When flowering, 'Logee Blue' is splendid, for it is blessed with abundant deep-blue blossoms. Grown indoors, we have found that it is less prone to powdery mildew than other varieties. It is our favorite for culinary flavor, growth and topiary as you can see with nine 2 1/2' standards in our formal herb garden.

Cyrus Hyde, with his keen eye for the unusual, discovered this cultivar in Connecticut in 1972. Several large unidentified rosemary plants had been removed from an estate by Country Greenhouse, and noticing a difference from the others in the trade, Cy purchased some cuttings. After confirming its different traits, he named it 'Logee Blue' Rosemary for the greenhouse owner, Roger Logee. In 1986, Art Tucker, a professor and fellow herbalist who has been irreplaceable to the herb trade, established 'Logee Blue' as a new cultivar of Common Rosemary, *Rosmarinus officinalis*. In layman's terms 'Logee Blue' is an improved variety of the familiar Common Rosemary and it's one of the best performers we have encountered.

<p>Pineapple Sage's invigorating aroma is a treasure to be found. Just brushing the leaves of this herb seems to uplift the spirit with its pleasurable sweet pineapple fragrance. If planted outdoors, this tender perennial can reach 3 - 4 feet in one growing season. Its slender vibrant-red flowers form on 8" spikes and provide a wonderful display from late-summer until frost. Though it prefers a full day of sun, it will tolerate half that; let dry out between waterings.</p> <p>The fresh leaves of Pineapple Sage add interest to cold drinks, desserts and fruit salads; unfortunately its essence is lost when heated. The flowers can be used as an attractive garnish for drinks and like honeysuckle flowers, they have a sweet nectar on their stem ends, though they lack the pineapple flavor.</p>

Used as a sweetener, Stevia is also known as 'Sweet Herb of Paraguay.' The plant's sweetening agent, the glycoside stevioside, is 300 times sweeter than granulated sugar and is also non-caloric. The herb reduces blood sugar levels as it sweetens, making it a good sugar substitute for diabetics. The Indian women of Paraguay have used this plant as a tea for contraceptive purposes. Laboratory tests have confirmed that Stevia does reduce fertility. This plant thrives in rich, well-drained soil, full to partial-sun and prefers temperatures above 45 degrees.

*****	Strawberry Blite see Chenopodium:								
Strawberry, ...									
A good rule of thumb with strawberries is to not allow the beds to get overgrown. Maintaining 4 - 6 inches between plants will yield bigger and juicer berries. In the Fall - we set our lawn mower on high and trim them down. Our varieties have been rated as 'Firm' fruit, 'Large' berry and 'Excellent' flavor. Additionally freezing quality is 'Good' on 'Brunswick', and 'Excellent' on 'Cavendish' and 'Jewel' - 'Cavendish' has the best disease resistance.

Thymus: Thyme, (Upright), ...									

With such a vast collection of thymes, we are often asked which are the best for cooking. In our opinion, the varieties that have the strongest flavor either fresh or dried and verified by popularity are: **English** - spicy floral fragrance and strong biting flavor; **French** - sweet floral fragrance with a strong biting flavor, a clam chowder seasoning; **German French** - strong fragrance and mild spicy flavor; **German Winter** - sweet strong fragrance and mild flavor; and, **Lemon** - strong lemon fragrance and flavor with a mild bite, it is often added to salads. Basically it comes down to your taste preference.

One of our favorite herbs - Lemon Verbena is known for its refreshing lemon-scented foliage and white spike-like flowers. Several sprigs added to a pitcher of water and ice make a refreshing summertime drink. Our Formal Herb Garden features four 46 year old, six-foot Lemon Verbena topiaries, which exhibits their elegance.

VIO090X **Labrador (Qt.)** *Viola labradorica* **P3** FS - S FP, GC, NP, WG Blue 4 MY & AG **7.25**
 Sparkling lavender-blue blossoms float above dark-purple, heart-shaped leaves on this gorgeous groundcover in the spring and fall, as well as occasionally throughout the year. This woodland native of our northeast is extremely hardy, zone 3 - 8, and prefers a cool well-drained soil. It is adaptable to most light levels, but prefers a shadier location - producing a darker leaf. In the heat of summer leaves turn almost a bronze color, then revert back. It's a nectar source for butterflies and food source for their larvae; while Cardinals and other songbirds eat the seeds. It's fantastic under shade perennials and brings charming color to difficult spots - enliven your shade garden today.

A charming evergreen ground cover with glossy dark-green leaves that turn burgundy-red in the fall. An abundance of white early-summer flowers are followed by bright red berries, which are edible and used in pies and jellies. The foliage is aromatic when bruised; the essential oil is used in the food industry for flavoring and externally in balms for muscular aches. A native plant that prefers humusy acidic soil and partial shade - perfect for the woodland garden.

The following two cultivars were selected for exceptionally heavy berry count. 'Cherry Berry' features compact and uniform growth, more abundant flowers and much larger berries - as large as a nickel. This cultivar has also received multiple awards. While 'Berry Cascade' is known for its eye catching berries that grow along the entire length of the stem creating a cascade-like effect. New growth is a striking orange-red that retains its color for months and it works great as a cascading plant over hardscape features.

ZAT005	Zatar	<i>Thymbra spicata</i>	TP	FS	C, F	Pink, Lav.-	10	JN - JL	7.50
--------	--------------	------------------------	----	----	------	-------------	----	---------	-------------

An exotic herb for your collection, this unusual spice is native to Greece, Syria, Lebanon and Israel. Zatar's unique taste and smell have been described as a blend of savory, oregano and thyme; its culinary uses are many. The dried leaves are used to season meat, fish, and vegetables, as well as in rice, cracked wheat, and couscous dishes. They are also used in yogurt sauces and soups. In Turkey, the fresh leaves and flowering shoots are added to herbal cheese. Popular in Lebanon, it is combined with olive oil as a delicious spread. The term 'zatar' also defines the spread, a spicy mixture which contains ground sumac berries, roasted sesame seeds, salt and Zatar leaves which may be *Thymbra spicata* or similar herbs from the region. This mixture can be used as a tasty dip or spread on bread and then toasted.

For lasting enjoyment this plant grows best in fertile well-drained soil. It should have full sun and be kept on the dry side. In bloom it's a showy plant with tubular-shaped lavender-pink flowers. A tender perennial in our area, Zatar should be brought in for the winter and kept above 50 degrees. For a unique flavor - nibble on a leaf.

Caring For Your New Herbs & Perennials

Although care may vary, it is important to remember that most plants:

- ☛ need full sun;
- ☛ like well-drained soil; and
- ☛ should be watered when the soil feels dry on top. Do not keep them wet.

When you receive shipped plants, unpack them at once, water any that are dry, and place them in moderate sunlight for a day or two so that they can adjust to their new home.

If you plan to keep these plants in pots, give them some growing room by transplanting them into larger containers. Use any good potting soil.

Potted plants require fertilizing to keep their leaves green and their growth vigorous. For best results, feed your plants every two to three weeks. Choose a sunny morning when the weather forecast predicts that two sunny days will follow; allowing for absorp-

tion of the nutrients.

Once spring arrives and there is no danger of frost, your plants can be moved outside. Refer to our catalog's key for perennials, tender perennials and annuals to check your plant's hardiness. Remember: tender perennials must be brought inside in the fall when the temperature drops. Use the catalog's sun key as a guide for choosing the area where your plants will flourish.

Take time to properly prepare your soil before planting. Clay soil will need some sand, compost and decayed manure. Most herbs, as well as perennials are sturdy and will thrive in any soil as long as they have good drainage. This can be accomplished by mixing gravel or sand in your soil, or by using raised beds.

If you have any questions about the care of a specific plant, please call during regular farm hours.

The Gardener's Guide

Our experience and research indicate that the following herbs and perennials fall into the categories below; please note - varying environmental conditions may influence these attributes. As our lists are far from complete, we would appreciate any positive feedback you have to offer.

The following plants are listed as you would find them in our catalog, which varies between common name and botanical genus. In some cases exceptions may exist for those listed, for better accuracy check the specific plant's use code. For example, if you're researching Butterfly Plants and see that the genus *Origanum* is listed, further research in the 'Herb Plants & Perennials' section under the 'Uses' column will show that only selected plants from this genus are considered (BF).

Butterfly Plants

This plant attracts butterflies as a host plant or nectar source. Uses Code = **BF**

Deer Resistant Plants

This plant in normal conditions will not be eaten by deer (or rabbits). Uses Code = **DR**

The following plants are not preferred and are usually left alone by the deer in our area - considered a "High Deer Area." To give you an idea of the resident population, it is unusual not to see deer on a walk through the woods or on a ride into town.

Keep in mind that various factors will influence deer browsing; deer density, time of year, and available forage - to mention just a few. As conditions change, what plants are considered safe may not remain so.

Date Palm	Kumquat, ...	Plectranthus:	Vietnamese Celery
Ephedra, ...	Lavandula: Lavender, ...	Oregano, Cuban	Yerba Mate
Eryngium: Cilantro, Mex.	Leptospermum:	Oregano, Puerto R.	Ylang-Ylang
Fern, Cinnamon	Tea Rose & Tea Tree	Polygonum: Coriander, Viet.	Zatar; <i>Thymbra spicata</i>

Vines

These plants, given support, will either lean, twine, or cling in an upright manner; usually producing prolific growth throughout the season. Uses Code = **VN**

Celastrus: Bittersweet, C.	Grape, 'Concord'	Jasmine, ...	Passion Flower,
Clematis:	Hops, ...	Kiwi, Hardy, ...	American

✿ Shipping Instructions ✿

We thank you for choosing Well-Sweep Herb Farm for your gardening needs. Our shipping season for plants extends from April through October, weather permitting. All other items are available and shipped year-round. Due to state regulations, we cannot ship live plants to AZ, CA, OR or WA. Phone orders are accepted Monday - Friday, 9:00 - 3:00 pm. Prices are subject to change.

Our Guarantee

With 48 years in the trade, we want you to experience the same gardening rewards that we do, and for this reason we strive to provide you with high-quality robust plants. If you are less than pleased with your order, notify us **within 10 days**; if we were in error, a full refund of the merchandise will be issued accordingly. We reserve the right to request return of the items prior to adjustment.

A few damaged leaves may occur in transit, this usually will not affect the vitality of the plant. If excess damage has occurred, however, please contact us immediately. We trust you understand that we are not responsible for loss due to improper care.

Shipped Plants

Plants are shipped properly labeled and well-rooted in 3" pots or quart containers, noted in the catalog by (Qt.). Please note: unless you request a particular service, your order will be shipped either UPS or USPS. However, if you specify a service, you will be obligated to assume the additional charges if they apply.

Ground Delivery:

Ground delivery time in transit for **live plants** is sufficient to the following states:

CT, DE, DC, IN, KY, MA, MD, ME, NC, NH, NJ, NY, OH, PA, RI, TN, VA & VT.

Shipping and handling is computed as follows for live plants: \$11.25 basic charge for the **first \$20.00** of your order's subtotal; then add 23% of the remaining subtotal.

For example: on a \$25.00 order, shipping charges are calculated by subtracting \$20.00 from your total, then multiplying the remainder by .23; $\$5.00 \times .23 = \1.15 plus $\$11.25 = \12.40 , your total shipping charges.

Express Delivery:

Express delivery is required for **live plants** to the following states:

AL, AR, CO, FL, GA, IA, ID, IL, KS, LA, MI, MN, MO, MS, MT, ND, NE, NM, NV, OK, SC, SD, TX, UT, WI, WV & WY.

Shipping and handling is computed as follows for live plants: \$12.25 basic charge plus 25% of your order's subtotal.

For example: on a \$50.00 order, shipping charges are calculated by multiplying by .25; $\$50.00 \times .25 = \12.50 plus $\$12.25 = \24.75 ; total shipping.

Not Ordering Plants

If you are **not ordering plants**, shipping and handling is computed as follows: \$9.75 basic charge for the **first \$20.00** of your order's subtotal; then add 15% of the remaining subtotal. These items will ship Ground Delivery unless you request otherwise.

The Well-Sweep Logo

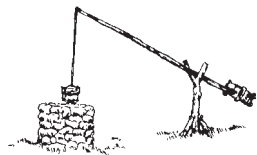

Well-Sweep, Well-Swept. Which is correct and how did you come up with this name for your farm?

It's Well-Sweep, although we have mistakenly been called "Well-Swept" and other variations. A well-sweep is an old-time farming implement. In olden times a family depended on hand-drawn well water to fill its drinking and bathing needs. The well-sweep was designed to lighten the load, so to speak.

A tall, sturdy tree is used as the base of a well-sweep. It must be y-shaped at one end. A second, longer tree, the "sweep," is placed in the "Y" of the base at an angle to the well, forming a lever.

To retrieve water from the well, the bucket was lowered - raising the sweep. Once filled, the bucket was raised by allowing the heavy sweep to slowly lower to the ground. In using the well-sweep, the sweep did most of the work. With a well-sweep on the farm, even children could assist with water-fetching chores.

When Cyrus and Louise first started their business, they debated a long time before selecting this piece of history for the farm's name and logo. The well-sweep is a good representation of their simple, back-to-basics way of life.
