STARBURST

Greetings 1968...

Never, in the more than a dozen years that we have been in Oregon have we seen Spring come so early here. As we work on our catalog during this first week of March, the Iris are already up over six inches and seem to be almost racing for the sky. The fruit trees are coming into bloom, daffodils have long been out as have the camellias and many other spring flowers. It's a most colorful time here just now and we can only hope this early rush isn't a predated April Fool, for everything looks good and the Iris look the best in years, giving an open invitation to the best bloom season ever.

We hope that all of you who attend the California Convention will be able to also drive on up the coast and visit Oregon and enjoy the season here as well.

We have complete new show gardens here at the home place in Canby so that you may easily see all of our new Introductions. Selections and Seedlings and the many Guest Iris on display. Please feel welcome to drop in at any time.

For the many of you who have kept the inquiries coming as to where we acquired our Exbury Hybrid Azaleas we give you the address herewith in hopes that it will be of benefit to you. It is Mr. Frank Henney, 9295 72nd Ave. N.E., Brooks, Oregon 97305. We have mimeographed directions available here for visitors.

In closing, I wish to thank you for your fine orders of the past and may I suggest that when you order this year, you might really beef up your list of extras as we are forced to cut our listing to a general list only, after this year.

Sincerely,

Chet Tompkins

NEW IRIS FOR 1968

CIMARRON STRIP (Tompkins 1968) M.L. 38 in. Camelot Rose x ((Ice 'n' Lime x Clarion Call) x (Clarion Call x Kin-na-zin)). Here's a seedling from the brilliant Camelot Rose that is as shocking in its "Blood and Thunder" color makeup as the Old West must have been in the actual Cimarron Strip days, for which this has been named. It is large, with very broad, rounded petals, the standards well domed and the falls huge, rounded and nearly horizontal. The stands are a vivid blend of pinkish orange-red over a basic color of Apricot Chamois and the falls are a luminescent blend of Orange Cerise, Cardinal and Fuchsia reds. All in all, this is one of the brightest things we have seen in some years. It is a good grower with nice clean foliage and strong, excellently branched stalks. It is also proving to be a fascinating and sensational parent as well as its sister Dulcey. No. 64-51 **Net \$35.00**

DULCEY (Tompkins 1968) M.L. 38 in. (Sib. to Cimarron Strip). This is so different from Cimarron Strip that we have decided to release it this year along with the other. Dulcey is somewhat larger than its sister and is more flaring, having almost perfectly horizontal falls. The standards are excellently domed and are very broad and round. The huge, round falls are very heavy of substance and there is a satiny, ice-like finish to all the petals. It is a self in color, although it is made up of blended shades, and is a color hard to describe. It seems as though it might have a basic color as of rich Maple Sugar, with a thorough blending throughout of an orange pink color called Rose Doree and another called Salmon Flesh by Ridgeways color chart. It is very, very brilliant even though it is fashioned of what we generally think of as more or less Pastel shades and a very full, Geranium red beard is still another factor that adds brilliance. Each flower is perfectly poised on well branched stalks and Dulcey is a good grower and quite hardy. No. 65-51A **Net \$30.00**

GENTILITY (Tompkins 1968) M.VL. 40 in. (South Pacific x Whole Cloth) x (Whole Cloth x South Pacific). There seems to be a great many of this type of Amoena nowadays but this one is so good that we just couldn't pass it by. It is a huge, even a mammoth flower, but it is so perfect in its styling and in its proportions and is carried on such strong, tall, widely branched stalks that it still remains a truly graceful Iris. Larger even than South Pacific, it has enormous rounded petals with well domed stands and flaring falls. The standards are pure Chalk White with a velvet like finish and the falls are a vivid shade of Chalk Blue, velvety and clean with no veining. A white, yellow tipped beard adds to its bright cleanness and a graceful fluting adds still another touch of genteel charm to its overall beauty. It is hardy and has broad foliage and huge rhizomes. No. 64-58D **Net \$25.00**

ITSA DOOZEY (Tompkins 1968) M.L. 44 in. (((Mountain Music x Flagship) x Violet Hills x Flagship) x (Mountain Music x High Above)). This is easily one of the most brilliant Iris in our garden and can truly be called a crowd stopper. It is a self of very brilliant Reddish Violet, Fuchsia Red, Magenta, or Petunia Violet; whichever name fits your estimate of the color. It somehow reminds us of a very, very old variety called Magenta as to its coloring and I suppose it is really closer to Red Violet in our estimation than to any other shade. Certainly it is one of the most vivid of all the Iris we grow and it is also a very cleanly finished flower with no veins or marks of any kind and is a self even to the vivid reddish violet beard. The huge, broad petaled flowers are beautifully formed with broad, heavily ruffled, well domed stands and huge, ruffled semi-flaring falls. Strong, Mountain Music type stalks show off the huge flowers to perfection and the height plus this branching often allows three or four blooms to be displayed at one time. No. 64-301 **Net \$25.00**

LAS VEGAS GOLD (Tompkins 1968) M.L. 37 in. (Earlicot x Fusilier) x ((Cool Comfort x Fusilier) x Techny Chimes). A vivid golden yellow with great carrying power, this is of large size and has a very heavy, non burning, velvet like finish. A broad, full beard of burnished red-gold accents the clean coloring as do the extra broad, beautifully held petals. The stalks are strong and very well branched,

holding the large, semi-flaring flowers in graceful placement. A real beauty, this is also very hardy and has clean, broad, deep green foliage. No. 65-79 **Net \$25.00**

NIGHT LAUGHTER (Tompkins 1968) M.L. 38 in. (Deep Space x Allegiance). A very dark self of Midnight blue, this carries all the best characteristics of both parents. It has the basic color of Allegiance with the smoothness of Deep Space, even the haft being free from veins or marks of any kind. The large flowers are very heavily substandard and have extra broad petals with well domed stands and semi-flaring falls of great width. Tall, strong, well branched stalks display the flowers to fine advantage and its many buds give it an extra long season of top-notch bloom. This has been well liked here each season and has been much admired in California and in eastern gardens where it has been grown. No. 64-55 **Net \$20.00**

RADIANT BRIDE (Tompkins 1968) M.VL. 39 in. (Poet's Dream x Galilee) x Cloud Country. This lovely new white has been a great favorite in our garden the past two seasons. It is large, exquisitely formed and the thick, icy white, delicately fluted and ruffled petals have a glittering satiny finish. This is a very good grower with tall superbly branched stalks that show three to four blooms at once to perfection. A stately, gracious Iris that seems to draw all eyes with what can only be described as its look of pure radiant freshness. It has the added attribute of having a great many buds to each terminal so that even though it begins to bloom in midseason it continues until after most other Iris are gone. No. 65-151 **Net \$25.00**

SAPPHIRE SHORE (Tompkins 1968) M.L. 38 in. (Silver Song x Ribbon Round). We had planned on picturing this on the cover of our catalog this season. However a hail storm caught the whole garden just prior to the day we had set aside for taking pictures which sort of blew the whole bit. However we hope to picture it in the near future. It is a huge flower of wonderful form and finish. The standards, extra wide and delightfully ruffled, dome perfectly while the edges almost nestle together in the heavy ruffling. The beautifully flaring falls, broad and ruffled, overlap at the hafts, the ruffling there offsetting wide, thick beards and huge, ruffled styles. It is a self of light luminescent, almost Opaline, milky blue even to the full wide beards. Its shining, glossy, completely unveined finish makes it extra showy as well as its perfect placement on the tall, widely branched stalks. A good grower with wide clean foliage and large rhizomes. No. 64-4C H.C. A.I.S. '67 and '68 **Net \$35.00**

SATIN SOUND (Tompkins 1968) M.VL. 40 in. (Deep Space x Mt. Music) x (Salem x Fleet Admiral). This is a stunning new Violet Blue that fully lives up to and even far exceeds the wonderful qualities found in each of its parents. The perfectly formed flowers are very large with extra broad, gently waved, beautifully rounded petals. Its broad, rounded standards being perfectly domed and its wide falls flaring to almost a full horizontal position. A medium toned violet blue, this appears to lean more to the blue side than to the violet. A smooth self, even to the beard, it is a color that literally flaunts its brilliance to the world and is an Iris that once seen will not soon be forgotten. Its tall, strong, perfectly branched stalks show off the beautiful flowers to perfection and I must confess, I consider this one of my finest originations. No. 64-68C **Net \$35.00**

STAR TREK (Tompkins 1968) M.L. 40 in. (Arpeggio x Buttercup Bower). This is undoubtedly the best of this type we have so far grown or seen. A recessive on the Buttercup Bower or Golden Fleece type, this is the richest and largest as well. It is brilliant Gilt Yellow with a large velvety white area on the fall. The huge flowers are very, very broad and it is one of the most heavily and beautifully ruffled Iris we know. It is exceedingly broad of petal and has perfectly domed stands and flaring, heavily fluted falls. It is so heavily substandard and long lasting and has so many buds that it is usually, along with Radiant Bride, one of the last to cease bloom. As large as it is, it is still a most graceful Iris as it has very tall, widely branched stalks. The plants are hardy with wide, clean, purple based foliage. No. 64-137 **Net \$25.00**

OTHER 1968 INTRODUCTIONS

BALLET BABE (D. Smith 1968) E.M. (BORDER BEARDED—24 in.). (Lavender Mist x Dreamcastle) x Sib. A delightful little version of the lovely old Ballet Dancer, this clean, shining rosy-mauve self is offset by rich coppery style arms and a touch of copper veining at the throat. The stalks are well branched and quite in keeping with its height and size of flowers. It has well domed, heavily ruffled stands and round, heavily ruffled falls of flat flaring form. It is a real delight. No. 62DS34 **Net \$10.00**

SEAFOAM GREEN (Framke 1968) M.L. 38 in. ((Char-Maize x Emerald Echo) x (Emerald Echo x Woodland Sprite)) x Aqualette. A lovely, large flower of exquisite form with very broad petals, extra heavy substance and a glittering foamy or frosty looking finish. A heavy lime green over greenish gold beard and a lovely fluting on the petals adds to its overall charm. It has strong, well branched stalks and many buds which lead to a long bloom season. No. 65-F42 **Net \$25.00**

Its tremendous value we have found lies in its wonderful breeding qualities. Possesses tall, excellently branched stalks. A good grower **3.50**

Immaculately clean, it seems to be cut from snowy white velvet upon which a beautifully stitched edge of bright blue has been carefully applied. A delicate touch of the same blue repeated just at the tip of the thick creamy beard further accents its purity and beauty. While it is not really a black, it is assuredly one of the darkest of the blackish-toned blue class. - VELVET BRASS** (Tompkins '65) EM.VL. 38 in. (Allaglow x Top Dollar) x Hermit Thrush x Bronze Bell). This appears at times to be a reverse bi-color. The broadly formed, well domed, gently fluted standards are of smoothly blended Topaz gold and Argus brown, subtly undertoned with hints of French lilac and the broad roundly flaring, flat falls are of rich Argus brown, blended Byzantine gold and tinted with the same hazy undertone of French lilac around their ruffled edges. When fully opened and expanded this blending in the falls turns to a smooth, brilliantly burnished Byzantine gold, giving each petal the appearance of being a huge golden medallion. Pictured on page 9 **10.00**
- WANDERING RAINBOW** (Tompkins '65) M.VVL. 39 in. Allaglow x 55-349. The most beautiful blend we have produced. The huge, well formed flowers have thick, lustrously finished petals of ultra heavy substance which tends to make it one of the longest lasting of all our iris. Blazingly bright, it appears to be fashioned of glittering orange toned, brassy gold dust over which an equally bright dusting of glittery brown, blue and rose clings and shimmers producing an ever changing, taffeta-like iridescence that is heightened by the clean, solidly colored hafts of brightly glowing chocolate-red undertoned orange-copper and set off by thick beards of deep chrome gold.
