## Tree Shelters

Brand name: Tubex standard Tree tube: 2 feet tall and PVC stake: 4 feet tall A tree shelter provides a micro-climate for trees to improve establishment and survival rates. Provides protection against animals and herbicides. Higher air moisture within the tree tubes reduces water stress and enables the plant to survive in dry or drought conditions.

Product specs:

- UV stabilised polypropylene, harmless to the environment
- Flared rim to minimize stem abrasion
- Pre-fitted releasable ratchet ties for ease of installation and maintenance
- Tubex Laserline - a line of laser generated perforations forming a controlled line of weakness along the shelter, designed to burst as the tree fills the shelter
- Built-in strengthening rods, which prevent ties tearing away from shelter in strong winds (unique to Tubex)
- Durable twin-wall construction for the best possible strength-to-weight ratio
- UV stabilized to provide a minimum estimated lifespan of 5-7 years (can vary beyond this range depending on site conditions)
- Comes as a nest of 5 with a diameter range of 2.8" – 4.13"

1/2" diameter PVC stakes have the flexibility to bend with the wind and deer rubbing and will return to their upright position. Trees allowed to sway in the wind will build stronger root

systems than trees in tubes supported with rigid stakes. Will not rot. \$48 for set of 5 tree shelters and 5 stakes

## Buttonbush

Also known as buttonball, button willow, riverbush. This Semi-aquatic native shrub is one of the latest to leaf out in spring. It has distinctive balls, or buttons, about the size of a gumball, of white to cream colored flowers that bloom in June. The flowers are fragrant and last about 1 month. Flowers are followed by seedheads that turn red and eventually dark brown. The seedheads last and provide winter interest. Grows 5'-12', tall, 4'-8' wide. Grows in full sun to partial sun. Grows in wet soils, even flooded conditions and standing water. Native to eastern US and Canada, and Mexico. Scattered populations in southwestern US. Both nectar and pollen are important. Special value to Honeybees, Native bees including bumblebees Also attracts butterflies, insects, moths including Titan Sphinx, Hydrangea sphinx. Fruits are eaten by waterfowl, and birds. 18"-24" 2-year seedlings \$25 for 5 bareroot seedlings.

## Serviceberry *Amelanchier canadensis*

Also known as Canadian or eastern Serviceberry, Shadbush, Shadblow, Juneberry, Junebush Large shrubs or small understory tree. Blooms in early spring, March, with proliferation of fragrant white flowers. In the summer it has crimson to purple colored fruit which are attractive to wildlife and edible by humans. In fall the leaves turn showy red and orange. It grows 6'-20' tall. Good for woodland gardens, native gardens, along stream banks and ponds. Colony-forming, spreading by sucker growth. Prune to control size. It gets its name shadbush or shadberry because the berries coincide with the annual shad run upstreams in New England. Grows in sun, partial sun and shade. Best in part shade condition, tolerant of sun with adequate soil moisture. Tolerant of many soil conditions, prefers in wet locations, often found in swamps. Tolerant of black walnut toxicity, salt. Native to eastern North America. Native Habitat: Wood borders; moist, upland woods. Special value to Native Bees and attracts birds. Larval host for striped hairstreak butterfly. 12"-18" 2 year seedlings \$15 for 4

## Eastern Redbud

Beautiful spring flowering tree. The eye-catching pink flowers appear in clusters that nearly cover the bare branches of the tree. They remain for two to three weeks. They usually appear in early spring after the white flowers of serviceberry. Grows 20' to 30' in height and 15' to 35' wide. Redbuds growing in the sun will be compact and rounded; when grown in shade, their form is loose, open and tall. Grows in Part Sun or Shade, prefers moist soils. Native range is eastern US up to southern New England. So Massachusetts is just north of its native range. Native Habitat: Woods; stream banks; limestone bluffs. Special Value to Native Bees and to Bumble Bees. Provides Nesting Materials/Structure for Native Bees. The flowers are pollinated by long-tongued bees such as blueberry bees and carpenter bees. 18"-24" 2 year seedlings \$15 for 4 bareroot seedlings

## American Elm, *Ulmus americana*

Known as a beautiful American shade tree that lined many city streets. The arrival of Dutch Elm Disease (DED) in the 1930s killed most of the them during the mid 20th century. Their popularity may have contributed to their vulnerability to DED, as they were over planted and cultivars used for landscaping were limited and led to a lack of genetic diversity. Many of the surviving trees are from natural locations. They do not grow in pure stands in nature. This is a relatively fast-growing tree can get to be 100 feet. It has small purple/brown flowers that are wind pollinated. The seedlings for sale are not a specific variety or hybrid. They are grown by open pollination, which means that the seeds are produced by natural pollination. This method results in more genetic diversity. But we do not know if they will be resistant to DED.

There is claim that they will be resistant to DED. For more on cultivars/hybrids check this out:

<https://ourhabitatgarden.org/home/plants/cultivars/> Native to Central and Eastern US and Central and Maritime Canada. Its native habitat is stream banks; lowland areas. Water Use: High Grow in full sun, and partial Shade, and in moist areas. Attracts: Birds , Butterflies provides nesting site and shelter. Larval Host: Mourning Cloak, Columbia silkmoth, Question Mark butterfly, Painted Lady butterfly, Comma butterfly. \$12 for 4: 2'-3' bareroot seedlings

## Black Walnut, *Juglans nigra*

Also known as Eastern Black Walnut, American Black Walnut A beautiful shade tree and food source for humans and wildlife. Black walnuts grow 50-75 ft. The nuts are edible but are not the grocery store variety of walnut, which comes from the English walnut. The tree will provide edible nuts at ages 12 -15 years. The wood is highly valued for lumber and furniture making. Over-harvesting has depleted native populations. But care must be taken when choosing a location for this plant. The tree releases juglone, a toxic substance found in the leaves, bark, nut husks, and roots. This is an example of allelopathy, Allelopathy is the chemical inhibition of one plant (or other organism) by another, due to the release into the environment of biochemicals acting as germination or growth inhibitors. Many garden vegetables, fruits and conifers are susceptible to juglone. These include serviceberries, chestnuts, pines, arborvitae, apples, cherries, tomatoes, potatoes, peas, peppers, cabbages, alfalfa, blueberries, blackberries, azaleas, rhododendron, lilacs, hydrangeas, privets and plants in the heath family--if planted too close. Grows in Sun, Part Shade, Moist, rich soils. Native range is eastern US, Massachusetts south but not northern New England. Hosts over 20 types of caterpillars and many insects. Nuts are eaten by squirrels and chipmunks. \$11 for 3, 2'- 3' seedlings Use coupon code SRINGISHERE for 15% discount.

## American Sweetgum

Liquidambar styraciflua Also known as Sweetgum, American Sweetgum, Red Gum, White Gum, Star-leaved Gum, Starleaf Gum, Alligator Tree, Satin Walnut, Bilsted, Liquidambar Tall fast growing tree that gets 75 to 120 feet at maturity. Star shaped glossy green leaves that are aromatic when crushed.

Leaves turn yellow-purple-red in the fall. It has a sweet sap that has been used for many things including chewing gum. It is an earlier colonizer of open sites can be used for wind breaks; it is important tree for lumber, veneer and plywood industries. The tree has both male and female flowers, bloom time March, April and May. This tree has seed balls that are great for birds but problematic for people. Eastern goldfinches, purple finches, sparrows, mourning doves, northern bobwhites and wild turkeys eat the seeds. Small mammals such as chipmunks, red squirrels and gray squirrels also enjoy the fruits and seeds. The seed pods are spiny dark brown balls, and fall during the winter. They will require spring clean up if you mow or walk under the tree. Grows Full Sun, in swamps, at edges of wetlands and upland areas too, just cannot be in very dry locations. Known as a southern tree, the sweetgum is native to eastern and southeastern US from east TX to north Florida, to Missouri and north to Connecticut. It also grows in Central America in rainforests. Worcester County is just outside of the northern edge of its native range. It is hardy to Zone 5a. One of the reasons it can grow 14 -24 feet per year is because it is a nitrogen fixer. \$20 for 3 seedlings, 3'-4' 4 yr

## Tulip Tree

Liriodendron tulipifera. Also known as tulip poplar or yellow poplar. One of the largest native trees growing over 100 feet tall. Distinctive 4 lobed leaves are waxy. Large tulip-like flowers are 2 inches tall, yellow, green and orange. Blooms May- June after leaves fill out. Leaves turn yellow in autumn. Sun, partial shade, shade moist rich soils. This large tree needs lots of space to grow fully. It can also be pruned every 2-3 years to keep it shrub sized. Nesting tree for birds. Nectar

attracts hummingbirds, bees, butterflies, birds, including cedar waxwings. Flowers, seeds, buds eaten by squirrel and deer. Special value to honeybees. Larval host for Tuliptree Silkmoth and Eastern Tiger Swallowtail. Native to low rich woodlands, stream banks in most of Eastern US. Intolerant of salt, compaction, drought and wetness. 18"- 24" tall, 2 year old, bare root seedling. \$16.00 for 4 seedlings.

## Trumpet Honeysuckle

Trumpet Honeysuckle, *Lonicera sempervirens* Also called Coral Honeysuckle, Woodbine Climbing vine with long tubular red flowers. Can climb up to 20 feet, also can be used as a groundcover. Its flowers are special for attracting hummingbirds and butterflies. The red berries that follow attract birds, including purple finches, goldfinches, hermit thrush and American robins. Grows best in sun with a support structure and good airflow, as it is vulnerable to powdery mildew. Will tolerate some shade, but will have fewer blooms. Native from Connecticut to Texas. Sempervirens means evergreen, however it has semi evergreen leaves which means it is evergreen in its more southern habitats, here in Massachusetts the leaves may not last through winter. Other species this native plant supports are beneficial insects: Spring Azure moth and snowberry clearwing larvae (caterpillar). \$20 for a single plant in a gallon sized container.

### Sugar Maple, *Acer saccharum*

Shade, syrup and fall color are worth the wait for this medium to slow growing native. Fall foliage of yellow orange and red. Mature height 60' -100'. Male flowers have some pollen, female flowers have neither pollen or nectar, in April - May. Grows in Partial Sun/Sun/Shade. Prefers moist deep, fertile soil. Native to Eastern US and native habitats are Moist bottomlands; rich, wooded slopes Sugar maples support many native animals, birds and insects. Deer and porcupines rely on it for food. Moose and snowshoe hares browse on the twigs and foliage. Red and grey squirrels, chipmunks and flying squirrels feed on its seeds, buds, twigs, and leaves. Several insect species and honeybees use the early-produced pollen. The Sugar Maple is a caterpillar host for the Cecropia Silkmoth and the Rosy Maple Moth. Yellow-bellied Sapsuckers use Sugar Maples as a source of sap. Sugar Maples are also important for birds, both year-round residents

and summer migrants. Gamebirds. and song birds: including the [Ruffed Grouse](#) and Wild Turkey. Songbirds include Purple Finch, American Goldfinch, and Red-breasted Nuthatch, Evening Grosbeak. A number of birds build nests in Sugar Maples, including American Redstart, Black-capped Chickadee, Evening Grosbeak, Least Flycatcher, Philadelphia Vireo. For several species –Mourning Warbler, Pileated Woodpecker, Brown Creeper Hermit Thrush, and Hairy Woodpecker– the Sugar Maple is one of the preferred trees for foraging for insects. 2' - 3' bareroot Liners \$15 for 3 [Read More](#)
