The Rule of Law in Grenada

Key Findings from the General
Population Poll 2022

Acknowledgements

The Rule of Law in Grenada: Key Findings from the General Population Poll 2022 was produced by the World Justice Project under the research oversight of Alejandro Ponce and the executive direction of Elizabeth Andersen.

The production of this report was led by Ana María Montoya and Tanya Primiani. This report was prepared by Said Aarji, Erin Campbell, James Davis, Joshua Fuller, Skye Jacobs, Ana María Montoya, Santiago Pardo González, Enrique Paulin, Tanya Primiani, Hannah Rigazzi, Natalia Rodríguez Cajamarca, Jeison Sabogal Sánchez, Victoria Thomaides, Carlos Toruño Paniagua, and Moss Woodbury.

Mariana Lopez was the graphic design lead for this report, with support from Raquel Medina. Photo for cover provided by Elaine Brewer via UnSplash.

Sampling, fieldwork, and data processing in Barbados, Dominica, Grenada, St. Lucia, and St. Vincent and the Grenadines were conducted by DMR Insights, Ltd., based in St. Lucia. Data collection in Trinidad and Tobago was conducted by CID Gallup, based in Costa Rica. Scripting of the questionnaire in the online platform SurveyToGo was conducted by Ezekiel Agwata of Polar Solutions.

The findings in this report are taken from the General Population Poll (GPP) conducted for the World Justice Project in 2022. The GPP's conceptual framework and methodology were developed by Mark David Agrast, Juan Carlos Botero, and Alejandro Ponce. The methodology for this iteration of the GPP was developed by Lindsey Bock, Ana Cárdenas, Alicia Evangelides, Joshua Fuller, Nora Futtner, Amy Gryskiewicz, Verónica Jaso, Ana María Montoya, Alejandro Ponce, Eréndira González Portillo, Tanya Primiani, Natalia Rodríguez Cajamarca, Victoria Thomaides, and Marcelo Torres.

This report was made possible with the support of the U.S. Department of State's Bureau of International Narcotics and Law Enforcement Affairs' Office of Western Hemisphere (INL). The views expressed in this report are those of the survey respondents and do not necessarily represent the views of INL.

ABOUT THIS REPORT

EFFECTIVE RULE OF LAW reduces corruption, combats poverty and disease, and protects people from injustices large and small. Strengthening the rule of law is an important objective for governments, donors, and civil society organizations around the world. To be effective, rule of law development requires clarity about the fundamental features that define the rule of law, as well as an adequate basis for its evaluation and measurement.

The Rule of Law in Grenada: Key Findings from the General Population Poll 2022 presents question-level data drawn from the General Population Poll (GPP), an original data source designed and collected by the World Justice Project. To provide a more in-depth view of trends in perceptions of rule of law in Grenada, this report also presents select findings over time and compared to Grenada's regional peers within the Eastern Caribbean subregion of Latin America and the Caribbean.

The GPP was conducted between July and August 2022 through face-to-face interviews to a nationally representative sample of 500 Grenadian households. This poll was designed to capture data on the experiences and perceptions of ordinary people regarding a variety of themes related to the rule of law.

This report represents the voices of people in Grenada and their experiences with the rule of law in their country.

The data derived from the General Population Poll is presented in this report as thematic briefs, each one highlighting a different dimension of the rule of law from the perspective of Grenadians. These thematic briefs focus on the current rule of law ecosystem in Grenada while simultaneously illuminating changes over time and comparisons across the following peer countries in the Eastern Caribbean region: Barbados, Dominica, St. Lucia, St. Vincent and the Grenadines, and Trinidad and Tobago. Each section touches upon perceptions of and attitudes towards the following topics: authoritarianism, fundamental freedoms, corruption, trust in institutions, the criminal justice system and its actors, police performance, crime victimization, support for victims of crime, and security.

EXECUTIVE FINDINGS

The Rule of Law in Grenada: Key Findings from the General Population Poll 2022 provides a comprehensive overview of how citizens perceive and experience the rule of law in Grenada alongside comparative findings across the Eastern Caribbean region. The findings in this report indicate a number of positive trends in the general public's perspective on the rule of law in Grenada, including improvement in perceptions of fundamental freedoms, relatively low perceptions of corruption, and improvement in perceptions of personal safety. Despite these positive developments, however, these findings highlight the fact that many challenges—including low rates of crime reporting and negative views on police corruption and accountability—persist. At the regional level, prominent trends include worsening perceptions of corruption, weakened confidence in criminal justice system performance, and low confidence in victim support practices.

SECTION 1

Authoritarianism and Fundamental Freedoms

1. Authoritarianism

Across the region, however, most respondents felt that top government officials resort to misinformation to shape public opinion in their favor. Among respondents in the Eastern Caribbean region, on average, Trinidadians and Tobagonians most often felt that top government officials engage in authoritarian behavior and Barbadians least often felt that top government officials engage in authoritarian behavior.

- When asked about authoritarian tendencies in Grenada, respondents most often felt that top government officials **attack or attempt to discredit opposition parties** (82%), **resort to misinformation to shape public opinion in their favor** (72%), and **attack or attempt to discredit the media and civil society organizations that criticize them** (71%).
- Compared to their regional counterparts, respondents in Grenada most often felt that top government officials **attack or attempt to discredit opposition parties** (82%) and **censor information that comes from abroad** (61%).

2. Fundamental Freedoms

On average, fewer respondents believe that their freedoms of expression, political participation, election, and religion are guaranteed in Dominica, St. Lucia, St. Vincent and the Grenadines, and Trinidad and Tobago compared to the last year of data collection. In contrast, the average percentage of respondents who believe that these freedoms are guaranteed increased in Barbados and Grenada. Within the region, Barbadians, on average, most often felt that fundamental freedoms are guaranteed by the state, while Vincentians least often felt the same.

- When asked about respect for fundamental freedoms in Grenada, respondents had more favorable views on freedoms of political participation, with 93% of respondents agreeing that **people can organize around an issue or petition**. Conversely, Grenadians had less favorable views on freedoms of expression, with 56% of respondents agreeing that **the media can expose cases of corruption**.
- Between 2018 and 2022, Grenada's most significant trends in public opinions on freedoms include improvements in the perceptions that **local government officials are elected through a clean process** (up 36 percentage points), **people can express opinions against the government** (up 18 percentage points), and **people can organize around an issue or petition** (up 17 percentage points).

SECTION 2

Corruption and Trust

3. Corruption

Public views on the pervasiveness of corruption within the legislature, the executive, and the judiciary deteriorated, on average, in four out of six countries in the Eastern Caribbean. Meanwhile, perceptions of corruption within law enforcement deteriorated in every country in the Eastern Caribbean. Public views on corruption across all of these institutions improved only in Grenada and St. Lucia. Within the region, on average, more Trinidadian and Tobagonian respondents reported perceptions of corruption across all actors than their regional peers, whereas Barbadian respondents reported the same least frequently.

- **Political parties** are considered the most corrupt institution in Grenada. More than half (54%) of all respondents believe that most or all members of Grenadian political parties are involved in corrupt practices.
- **Land registry officers** are considered the least corrupt actors in Grenada, with 8% of respondents reporting that they believe most or all land registry officers are involved in corrupt practices.

4. Attitudes Towards Corrupt Behaviors

Acceptance of corrupt behaviors in the Eastern Caribbean is relatively rare compared to in the rest of Latin America and the Caribbean.

Throughout the Eastern Caribbean, respondents, on average, most often found a public officer recruited on the basis of family ties and friendship networks to be acceptable. Company officials asking for a bribe from a job applicant was tolerated the least often. On average, respondents in St. Lucia most often found certain cases of bribery, nepotism, and embezzlement always or usually acceptable, whereas respondents in St. Vincent and the Grenadines least often found these behaviors acceptable.

5. Trust

Respondents in the Eastern Caribbean, on average, trust people living in their country more than any other public actor and trust prosecutors the least. On average, respondents in St. Vincent and the Grenadines least often reported having some or a lot of trust across all institutions. In contrast, respondents in Barbados reported the highest overall levels of trust.

- Levels of trust in Grenada increased across every institution between 2018 and 2022. Trust in **public defense attorneys** improved the most between 2018 and 2022, with 52% of respondents reporting some or a lot of trust in 2022, compared to 45% in 2018.
- In 2022, respondents in Grenada most often reported having some or a lot of trust in **people living in their country** (56%) and least often reported having some or a lot of trust in **national government officers** (43%).

SECTION 3

Security and Criminal Justice

6. Crime Victimization

On average, 18% of all respondents surveyed in the Eastern Caribbean reported experiencing a crime in the last 12 months. On average, half (50%) of those respondents reported their crime experience to an authority.

- Nineteen percent (19%) of Grenadians reported experiencing a crime in the last 12 months, a figure just above the regional average (18%).
- Most (67%) Grenadian respondents who were victims of a crime did not report the crime to an authority, with those respondents most often citing the belief that reporting would not help as their reason for not reporting (65%).

7. Security

The majority of respondents in the Eastern Caribbean feel safe or very safe when walking in their neighborhood at night. Perceptions of safety improved in almost every country between the previous round of data collection and 2022. Perceptions of safety declined only in St. Vincent and the Grenadines, where 76% of respondents reported feeling safe in their neighborhood at night, compared to 77% in 2018. Compared to respondents in regional peer countries, Barbadians most often reported feeling safe in their neighborhood at night (92%), while roughly two-thirds of Trinidadians and Tobagonians (67%) reported the same.

- In Grenada, approximately 4 in 5 (82%) respondents reported feeling safe walking in their neighborhood at night in 2022, marking an improvement from 76% of respondents in 2018.
- Grenadians under the age of 35, Grenadians who had previously been a victim of a crime, and Grenadians who do not have a high school diploma were less likely to feel safe walking in their neighborhood at night than respondents with other sociodemographic characteristics.

8. Criminal Justice

Across the Eastern Caribbean, respondents are, on average, most confident that the criminal justice system ensures equal treatment of victims and least confident that the criminal justice system ensures timeliness. On average, respondents in Barbados reported the highest levels of confidence in the criminal justice system overall, while respondents in St. Lucia reported the lowest levels of confidence. Average perceptions of the criminal justice system's overall performance deteriorated in four out of six countries within the region, with average perceptions improving only in Barbados and Grenada.

- Grenadians were most confident that the criminal justice system **ensures equal treatment of victims** (65%) and **is effective in delivering justice** (65%). Grenadians were least confident that the criminal justice system **gives appropriate punishments** (44%) and **ensures uniform quality of service** (47%).
- Between 2018 and 2022, Grenada's most significant trends in public opinions on criminal justice system performance include improvements in the perceptions that the criminal justice system **is effective in delivering justice** (up 13 percentage points) and **ensures equal treatment of victims** (up 10 percentage points) and a decline in the perception that the criminal justice system **ensures uniform quality of service** (down 11 percentage points).

9. Police Performance

When asked about their impressions of police performance, respondents in the Eastern Caribbean had the most negative views on accountability, corruption, and due process and the most positive views on absence of discrimination and public service, on average.

- When asked about their impressions of police performance, respondents in Grenada were most confident that:
 - Police resolve security problems in the community (87%).
 - Police do not serve the interests of gangs (84%).
 - Police help them feel safe (81%).
- Respondents in Grenada were least confident that:
 - Police do not serve the interests of politicians (8%).
 - Police are held accountable for seeking bribes (32%).
 - Police are held accountable for violating laws (41%).
- In Grenada, respondents most often indicated that younger suspects would most likely be at a disadvantage in a criminal investigation.

10. Victim Support

In almost every country surveyed in the Eastern Caribbean, less than half of all respondents, on average, believed that victims of crime receive adequate support and protection, with the exception of Barbados. In five out of six countries surveyed in the region, respondents were least confident that victims of sexual crimes and victims of domestic violence receive adequate care and protection. Respondents in Barbados reported the highest average levels of confidence in victim support practices overall, while respondents in Dominica reported the lowest average levels of confidence in the victim support practices overall.

- Grenadians were most often confident that victims **are addressed by the police using accessible language** (68%) and **receive a clear explanation of the crime reporting process** (58%).
- Grenadians were least often confident that **victims of domestic violence receive adequate care and protection** (14%), **victims of sexual crimes receive adequate care and protection** (29%), and **crime victims receive protection from the police if their safety is in danger** (29%).

Note: In addition to the data found in regional charts included in this report, comparative data for regional peer countries referenced in the Executive Findings can be found in each country's respective report.

PROJECT DESIGN

31 Methodology

METHODOLOGY

To present an image that accurately portrays the rule of law as experienced by ordinary people, data in this report is drawn from the General Population Poll (GPP), an original data source designed and collected by the World Justice Project (WJP). The GPP captures the experiences and perceptions of ordinary citizens concerning the performance of the state and its agents and the actual operation of the legal framework in their country.

The General Population Poll used to collect data in Grenada in 2022 features several new questions that highlight perceptions on issues salient to the region, including corruption, authoritarian behaviors, police performance, criminal justice, and security. In total, the General Population Poll questionnaire includes 172 perception-based questions and 122 experience-based questions, along with sociodemographic information on all respondents. Additionally, the GPP in Grenada was administered to a sample of 500 respondents.

Data Collection

The GPP in Grenada was conducted for the WJP's *The Rule of Law in Grenada: Key Findings from the General Population Poll 2022* with sampling, fieldwork, and data processing by DMR Insights Ltd., based in St. Lucia. DMR Insights Ltd. administered the surveys between July and August 2022, conducting face-to-face interviews using a multi-stage stratified random sampling design. The target population group for this survey included Grenadians aged 18 years or older residing across all six parishes throughout the country.

SAMPLE SIZE AND SAMPLE FRAME

The General Population Poll in Grenada represents an achieved total sample size of 500 interviews distributed proportionally across six regions. DMR Insights Ltd. based the sampling frame on 2011 census figures, acquiring a proportionally stratified sample by region, age, gender, socioeconomic status, and level of urbanization.

In order to address all relevant topics while controlling the questionnaire length, the World Justice Project split three of the survey modules into two versions (Option A and Option B) and randomly assigned one option to each respondent for each module. These modules included: Hypothetical Situations, Civic Participation, and Institutional Performance. Aside from these modules, the questionnaires are identical. A link to the complete survey instrument, in English, can be found in the Appendix of this report.

SAMPLING

Given Grenada's population size, regions served as the primary sampling unit. Interviewers were assigned a starting point within each primary sampling unit and performed a systemic random route, while paying close attention to target quotas for gender, age, and income. Interviewers used a Kish grid to select respondents. If the selected respondent declined to be interviewed or otherwise did not meet the characteristics of the target quota, the interviewer moved on to the next household.

DESCRIPTION OF THE SAMPLE

COVERAGE: Interviews were distributed across regions to create a nationally representative sample. Thirty-eight percent (38%) of the interviews took place in Saint George, followed by 26% in Saint Andrew, 13% in Saint David, 10% in Saint Patrick, and the remaining 13% in other regions.

GEOGRAPHY: Twenty-two percent (22%) of respondents resided in rural areas and municipalities, while 78% of respondents resided in metro areas or cities.

RACIAL AND ETHNIC BACKGROUND: Most respondents (63%) identified themselves as Afro-Grenadian, followed by Mixed Race (32%).

GENDER: Fifty-one percent (51%) of respondents were female and 49% were male.

EDUCATION: Most respondents (70%) reported that they had received at least a high school diploma or vocational degree and the remaining 30% of respondents received up to a middle school diploma.

RESPONSE RATES

Eligible household, non-interview	405
Refusals	248
Break-off	76
Non-contact	81

INTERVIEWING AND QUALITY CONTROL

In total, 20 interviewers worked on this project, including 12 female interviewers. Enumerators worked in five groups of four interviewers. Interviews were conducted in English.

The supervisory team directly oversaw 10% of all interviews in the field. During data processing, 150 interviews (30% of the sample) were backchecked via telephone by the central office. After quality control, 14 interviews were rejected from the final sample due to abnormal interview length. Interviews averaged 49 minutes in length and ranged from 48 to 88 minutes.

DATA REVIEW AND JUSTIFICATION

As part of the data analysis process, the team consulted several third-party sources in order to contextualize and validate perception-based data captured by the General Population Poll and compare it with the objective rule of law situation in-country. Peer data sources consulted include select indicators measured by the Latin American Public Opinion Project (LAPOP)'s *AmericasBarometer*, *Latinobarómetro*, Varieties of Democracy (V-Dem), Transparency International's *Corruption Perceptions Index*, the Bertelsmann Stiftung's *Transformation Index (BTI)*, and Freedom House's *Freedom in the World*. While certain trends captured by the 2022 General Population Poll in Grenada are comparable to trends in perceptions data measured by other indices, the experiences and perceptions presented in this report may not always coincide with the reality of Grenada's rule of law performance as measured by other sources.

HISTORICAL DATA

Historical data in this report derives from the *WJP Rule of Law Index®*'s General Population Poll that is typically administered every two to three years using a nationally representative probability sample ranging from 500 to 1,000 respondents. These household surveys were administered in the three largest cities of most countries until 2018, when the World Justice Project transitioned to nationally representative coverage as the preferred methodology for polling. The historical polling data used in this year's reports was collected in the following intervals: Data for Barbados, Dominica, Grenada, St. Lucia, St. Vincent and the Grenadines, and Trinidad and Tobago was collected in 2016, 2018, and 2022.

ADDITIONAL COUNTRIES

The Rule of Law in Grenada: Key Findings from the General Population Poll 2022 includes comparisons to the following Eastern Caribbean countries surveyed by the World Justice Project during the same period: Barbados, Dominica, St. Lucia, St. Vincent and the Grenadines, and Trinidad and Tobago. This report is additionally part of a series that presents findings from the following five sub-regions within Latin America and the Caribbean: Andes (Bolivia, Colombia, Ecuador, Peru); Southern Cone (Argentina, Brazil, Paraguay); Eastern Caribbean (Barbados, Dominica, Grenada, St. Lucia, St. Vincent and the Grenadines, Trinidad and Tobago); Greater Antilles, The Bahamas, and the Guianas (The Bahamas, the Dominican Republic, Guyana, Haiti, Jamaica, Suriname); and Central America (Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama). Together, these 26 countries are a portion of the 140 countries and jurisdictions included in the *WJP Rule of Law Index 2022* report. Detailed information regarding the methodology of the *Rule of Law Index* is available at: www.worldjusticeproject.org.

GENERAL POPULATION POLL (GPP)

The General Population Poll in the Caribbean was designed to capture high-quality data on the realities and concerns of ordinary people on a variety of themes related to the rule of law, including authoritarianism, corruption, police performance, and crime and security.

[*World Justice Project General Population Poll 2022 – Caribbean Survey Instrument \(English Versions A & B\)*](#)

ABOUT THE WORLD JUSTICE PROJECT

The World Justice Project (WJP) is an independent, multidisciplinary organization working to create knowledge, build awareness, and stimulate action to advance the rule of law worldwide. Effective rule of law is the foundation for communities of justice, opportunity, and peace—underpinning development, accountable government, and respect for fundamental rights.

The WJP builds and supports a global, multidisciplinary movement for the rule of law through three lines of work: collecting, organizing, and analyzing original, independent rule of law data, including the World Justice Project Rule of Law Index; supporting research, scholarship, and teaching about the importance of the rule of law, its relationship to development, and effective strategies to strengthen it; and connecting and building an engaged global network of policymakers and advocates to advance the rule of law through strategic partnerships, convenings, coordinated advocacy, and support for locally led initiatives.
