

Presenter Mouse PM1200

The must have all-rounder 4 devices in 1

Issue October 2007

Pages 2

How do you manage your important presentations and how many devices do you need for a professional performance? The Presenter Mouse PM1200 combines four professional input devices in one: Optical Mouse, Presenter, Laser pointer and Media remote control.

The Optical Mouse is useful for quick last minute corrections and with the presenter it is easy and convenient to leaf in the slides. With the laser pointer you can highlight and mark some very important issues e.g. on a chart. Why not importing a video clip to underline your speech? Just use the remote control for perfect presentation.

Switch seamless and uncomplicated between 3 different modes by actuating only one button: The mouse mode, the presenter mode and the media control mode. All current functions are controlled with the two buttons and the wheel.

Reliability

- Reliable wireless 2.4 GHz technology
- Precise resolution: 1200 dpi
- Range up to 10 m

Ergonomics

- Functional design for right- and lefthand user
