

AXIS M1034-W Network Camera

Small, smart and wireless HDTV camera

AXIS M1034-W uses progressive scan to provide HDTV video, and offers the choice of either a wireless or a wired network connection. It features Wi-Fi Protected Setup™ protocol that simplifies security configuration on wireless networks. Together with the 802.11b/g/n standard, the protocol assures user-friendliness and network security, while enabling streaming of HDTV video over a wireless network. AXIS M1034-W features an integrated PIR sensor for detecting movement even in the dark, and a white LED for illuminating the scene at an event. It also provides two-way audio support, allowing remote listening in on an area, and communication with individuals directly or using uploaded or recorded audio clips.
