Tox Explorer Collection

An all-in-one LC-MS/MS solution for toxicology

Toxicology laboratories face many challenges, including the need to detect an ever-increasing number of substances at ever-decreasing concentrations. The Thermo Scientific™ Tox Explorer™ Collection allows the world's toxicology community to navigate with ease to solve complex analytical challenges and increase their laboratory's productivity.

- An all-in-one LC-MS/MS toxicology solution
- Analyze a wide range of drug compounds and their metabolites
- A customizable, single software solution
- HRAM and QQQ MS platforms
- Comprehensive training and support

WELCOME LETTER

Welcome to the 75th AAFS Annual Scientific Conference in Orlando, Florida. This year we are celebrating our Diamond Jubilee and will have many fun and interesting events to honor this important milestone. This will be our first in-person-only meeting since Anaheim, and I am really looking forward to greeting you as we gather at the Rosen Shingle Creek. The program is bursting with content aligned with the meeting theme, “Science Works.” I chose this theme to honor our members and other attendees who work at science every day and to focus on the importance of demonstrating that when performed and interpreted using reliable, repeatable methods, science answers questions about ourselves and can be trusted to make critical decisions at all levels of society, from the White House to your house. This meeting is a celebration of forensic science and a tangible representation of its impact in our world.

Laura C. Fulginiti, PhD

There are so many highlights this week and I encourage you to review the program (online at www.aafs.org) to start planning your activities. We kick off the week with a Sunday Super Bowl Party, the first of many celebratory events that will be capped off with the Friday evening “Not a luau” tropically themed gala. We have two additional receptions, the Welcome Reception and the Wine and Cheese Reception, as well as one for our International Attendees on Monday evening. Our keynote speaker, Scott Griffith, will discuss how successful collaborations (like AAFS) can improve reliability. He is followed by the Plenary session focused on the role of forensic medicine in forensic science. Our Interdisciplinary Symposium reviews the history of the Academy, and there will be a special session highlighting the Humanitarian and Human Rights Resource Center. Similarly, the AAFS Diversity Outreach Committee will be holding a reception and lecture featuring Rook E. Ringer, a forensic scientist-turned-attorney. We have workshops, scientific presentations, and affiliate and committee meetings—never a dull moment. Our committees have worked tirelessly to move the Academy forward, and I am indebted to them for their efforts.

We welcome high school students to our Student Academy, a great opportunity to introduce them to the wonders of forensic science, as well as to our Young Forensic Scientist Forum, a place for networking and mentorship. We have the Last Word Society and the Bring Your Own Slides forum, and don’t forget the Annual Business Meeting on Wednesday. This is where the business of the Academy takes place and where decisions regarding the future of the AAFS happen. Make sure you’re “in the room where it happened!”

When you see our staff around the convention center, please take a moment to thank them for the work they perform on behalf of the Academy membership. Truly, there would be no AAFS, no meeting, no progress, no nothing, without their dedication and commitment. We owe them a huge debt.

This meeting is an important milestone in our history. All of science continues to undergo attacks, both from within and from the outside. We need to stand up and defend our methods, our interpretations, and our results. We need to speak for forensic science because if we don’t, who will? This meeting is your opportunity to stand and be heard. Welcome to Orlando!

Media Statement: The American Academy of Forensic Sciences (AAFS) does not comment on forensic cases or medicolegal investigations. Media releases will be issued by the AAFS Board of Directors only in response to matters deemed pertinent to the business of the Academy. The sitting AAFS President is the only member of the Academy authorized to provide comment on behalf of the Academy. Comments, views, and opinions expressed by all other members of the Academy reflect the comments, views, and opinions of the individual solely.

Registrant Minimum Age: Registrants and presenters at the AAFS Annual Conference must be at least 18 years old at the time of the conference.

Lost Badge Policy: Lost, misplaced, stolen, or forgotten badges will incur a replacement fee equal to the original purchase amount of your registration. If your badge was complimentary, the fee will be the current, on-site rate.

Author Information: The *Journal of Forensic Sciences* encourages authors to submit previously unpublished reports and papers presented at the AAFS annual conference. For full instructions on manuscript preparation, consult the Information for Authors available at: <https://www.aafs.org/resources/journal-of-forensic-sciences/information-for-authors/>.

Manuscripts must be submitted electronically via the *Journal of Forensic Sciences* Manuscript Central site: <http://mc.manuscriptcentral.com/jofs>. For questions, please contact: jfs.editor@att.net.

Reminders:

- Video and/or audio recording of any session(s) or parts thereof is not permitted without prior approval from the American Academy of Forensic Sciences.
- English is the official language of the AAFS and its meetings; neither oral nor written translations will be provided.
- Although precautions are taken to prevent schedule changes, speakers and program schedules may change due to unforeseen circumstances.
- As a courtesy to others, please silence your cell phone when attending the sessions.

SEXUAL MISCONDUCT RESOURCES AND INFORMATION

AAFS takes the safety of its meeting attendees seriously and strives to promote a welcoming experience for all. In order to promote a safe environment for meeting attendees, we have resources for meeting attendees about sexual misconduct.

What is sexual misconduct?

Sexual misconduct is an umbrella term that includes different types of sexual violence, including sexual harassment and sexual assault. (<https://www.rainn.org/types-sexual-violence>)

What is sexual harassment?

Sexual harassment includes unwelcome sexual advances, requests for sexual favors, and other verbal or physical harassment of a sexual nature in the workplace or learning environment, according to the Equal Employment Opportunity Commission. (https://www.rainn.org/articles/sexual-harassment?gclid=CjwKCAjw2P-KBhByEiwADBYWCqz0g1E4mRJRxf5TN-EQ-JYXo2Q7USO-Yrtu1c9klaUmTmrEtmsaxoCbiQQAvD_BwE)

What is sexual assault?

The term sexual assault refers to sexual contact or behavior that occurs without explicit consent of the victim. (<https://www.rainn.org/articles/sexual-assault>)

What do I do if I experience sexual misconduct during the annual conference?

- Call 911.
- Call the AAFS “safe person” number below or contact another member of the AAFS staff.
- Locate security personnel at the conference venue.
- Report conduct to the AAFS Ethics Committee.
- Refer to the resources list below.

What do I do if I have witnessed sexual misconduct during the annual conference?

- Talk to the victim/survivor. Encourage them to review this resource page.
- Direct them to the AAFS ‘safe person’ or another member of the AAFS staff
- Direct them to security personnel at the conference venue.
- If the person is in immediate danger, call 911.

DISTINGUISHED FELLOW

Julie A. Howe, MBA, received her Bachelor of Science in Health Information Management from Saint Louis University in 1997. It was at this time that she was introduced to forensic science where she completed an internship at the medical examiner's office. Upon graduation, Julie started working at Saint Louis University Division of Forensic Pathology. The American Board of Medicolegal Death Investigators (ABMDI) was created at that time and as the Executive Director, Julie continued her education where she received her Masters in Business Administration in 2001. Julie also served as a Medicolegal Death Investigator for the Office of the Regional Medical Examiner from 2004-2019.

Julie A. Howe, MBA

Julie became an ABMDI Diplomate in 2008 and maintains her certification. She is currently an Associate Professor in the Department of Clinical Health Sciences at Doisy College of Health Sciences – Saint Louis University. Here, Julie transfers her skills and knowledge of medicolegal death investigation to public health and social justice where she teaches that death is an important health outcome to track and is a key indicator of public health.

Julie is a member of several professional organizations including the American Academy of Forensic Sciences (AAFS). She started her membership with the AAFS as a Trainee Affiliate in 1998, and was promoted to Fellow in 2006. Throughout her history with the AAFS, Julie has served on several committees including the Annual Program Committee, Long Term Planning Committee, Academy Standards Board, Policy and Procedure Committee, and Nominating Committee. She has been participating in the AAFS Annual Conferences since 1999, where she served as Chair of the Student Academy Program and has made multiple presentations. The first Forensic Science Educators Conference (FSEC) was held at Saint Louis University in 2002 and Julie was instrumental in the effort. Three additional FSECs were held at the university in 2004, 2006, and 2008. As a Fellow of the General Section, Julie served as the Section Chair from 2011-13 and served on the Board of Directors from 2013-17.

Julie has also donated much of her time serving on committees for the Forensic Sciences Foundation (FSF) and served as the FSF Chair in 2012.

Julie is the author of several peer-reviewed manuscripts as well as a contributor to six published books. She has been invited to present both nationally and internationally on topics related to medicolegal death investigation.

The AAFS Distinguished Fellow Award is given to someone who has given meritorious service to the AAFS, the forensic sciences, and to other professional peer group organizations. Julie's contribution to the forensic science field and the role she has served in promoting education is unsurmountable.

Our congratulations to Julie Howe, 2023 AAFS Distinguished Fellow!

AAFS HONORARY MEMBER

Anne H. Warren, BS

The American Academy of Forensic Sciences (AAFS) would like to recognize former AAFS Executive Director Anne Warren as its third Honorary Member.

Anne joined the Academy staff in 1985 as the Assistant Director. Her tremendous management skills were quickly recognized and in 1990 she assumed the Executive Director position. Under her leadership, the Academy gained its strong financial foundation and experienced a time of growth and expansion of its services to members and the public. The membership steadily grew from 2,600 to over 6,500 members and affiliates, including the addition of an 11th section—Digital & Multimedia Sciences. Anne retired as Executive Director May 31, 2020.

During Anne's tenure, the AAFS Standards Board, Forensic Science Educational Programs Accreditation Commission, the Forensic Specialties Accreditation Board, the Humanitarian and Human Rights Resource Center, and the FSF Warren-Young Scholarship for middle and high school science teachers were all established.

The Academy grew steadily in its international stature with the establishment of international educational outreach programs across the globe. She oversaw 30 highly successful annual scientific meetings for the Academy. Former Academy officers relied heavily on Anne's guidance and institutional memory in moving the Academy forward to its current success.

Please join us in celebrating Anne's contributions and service to the Academy as she is awarded the status of AAFS Honorary Member.

CONTINUING EDUCATION

General Information

All meeting sessions are lectures with one or more speakers. Continuing professional education credits will be offered for physicians, dentists, and attorneys. Continuing education credit applications will be submitted for physicians, nurses, and dentists. Attorneys may request CLE credit; please see the “Legal” section.

To register for continuing education credit, please complete the appropriate section on the meeting Registration Form. An individual must be a registrant to obtain continuing education credit. Fees charged for continuing education credits are based on projected costs of providing the various types of continuing education credit. The AAFS has adopted a user-pay approach so that those individuals who benefit from the specific continuing education program are responsible for the costs incurred.

In order to be in compliance with accrediting organizations, introductions and breaks have been deducted from the total hours. Please note that continuing education credit is not available for all sessions. All continuing education credit recipients will receive certificates with the number of continuing education hours awarded. Attendance reports are filed with the appropriate state or national agency, as required.

Learning Objectives of the AAFS Continuing Education Program

- Recognize the perspectives and roles of the various forensic science disciplines
- Assess current concepts and practices
- Discuss relevant forensic science issues related to science, evidence and the law
- Identify strategies for researching descriptive studies, technology and methods, diagnostics, interpretation and testimony
- Review administrative functions performed by forensic scientists

American Board of Criminalists Approval

The American Academy of Forensic Sciences (AAFS) is approved by the American Board of Criminalistics (ABC) to offer continuing education points for approved workshops for criminalists and forensic scientists. The ABC maintains responsibility for the program, and credit may be awarded to ABC Fellows, Diplomates, and Affiliates.

Overall Purpose and Objective Statements for Major Aspects of AAFS Programs

Workshops and Special Sessions

Purpose: To provide an opportunity for experts to present material and to lead discussion and practical exercises related to forensic science methods, procedures, diagnosis, investigation, professional relations and practices, communication, administration, and professional development.

Learning Overview: Detailed individually in each workshop and special session announcement and description.

Plenary and Keynote Sessions

Purpose: To provide a multidisciplinary presentation and discussion of issues related to the forensic science profession.

Learning Overview: Attendees will be able to: a) identify the challenges the forensic science profession has faced and will continue to face in terms of ensuring quality; b) identify ways to deal with the variances each challenge presents; and c) identify the entities which have influence over setting the quality standards in the field of forensic science.

Oral and Poster Section Scientific Sessions

Purpose: To provide an opportunity for presentation and discussion of case reports, descriptive studies, review presentations, research, administrative issues, and investigative/diagnostic methods regarding topics and issues of importance to a primary discipline among the forensic sciences.

Learning Overview: To meet the educational objectives stated by each presenter for his/her/their presentation.

Last Word Society

Purpose: To provide a retrospective forensic analysis of historical events and to provide education about the history and evolution of forensic sciences as well as the modern methods and technologies used to re-examine past events of forensic science interest. Emphasis is placed on the evaluation of the original opinions and case outcome and on the development of newer hypotheses based on the re-analysis.

Learning Overview: To meet the educational objectives stated by each presenter for his/her/their presentation.

CONTINUING EDUCATION

Guidelines For Claiming Credit

As the sponsor of Continuing Education Credit, the AAFS recognizes that the forensic science disciplines are inextricably linked and that interdisciplinary knowledge is critical to promote competence in forensic practice. As a result, the claiming of credit for various continuing education activities related to medicine, dentistry, law, and other forensic disciplines need not be limited to one's primary professional specialty. For example, a forensic pathologist from the Pathology/Biology Section may gain very useful and relevant information by attending a presentation in the Anthropology Section scientific session. It is appropriate to claim continuing medical education credit for that session. Many other examples exist where the claiming of continuing education credit is appropriate for attending sessions that cover material related to, but which lay outside of, one's primary professional area of expertise.

It is the conference attendee's responsibility to document which program sessions were attended and to determine those sessions for which continuing education credit may be claimed. The AAFS operates under the assumption that meeting attendees will, in general, be unlikely to attend sessions that will not be beneficial to their professional practice and that the claim for continuing education credit is justified if a session contains scientific or practice-related information that may bring new knowledge, may affirm current knowledge, or may provide information that could possibly modify one's professional practices.

Those who wish to receive continuing education credit must register and pay the Continuing Education Credit fee on the meeting Registration Form. CE Credit Request Forms will be available on the AAFS website. The completed forms must be returned to AAFS by the designated deadline.

Joint Accreditation Statement

JOINTLY ACCREDITED PROVIDER™
INTERPROFESSIONAL CONTINUING EDUCATION

In support of improving patient care, this activity has been planned and implemented by the Postgraduate Institute for Medicine and the American Academy of Forensic Science. Postgraduate Institute for Medicine is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Physician Continuing Medical Education Credit

The Postgraduate Institute for Medicine designates this live activity for a maximum of 45.75 AMA PRA Category 1 Credit(s)[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Dental Continuing Education Credit

This continuing education activity has been planned and implemented in accordance with the standards of the ADA Continuing Education Recognition Program (ADA CERP) through joint efforts between Postgraduate Institute for Medicine and the American Academy of Forensic Sciences.

Postgraduate Institute for Medicine is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of the credit hours by boards of dentistry. The Postgraduate Institute for Medicine designates this activity for 45.75 continuing education credits. Concerns or complaints about a CE Provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at www.ada.org/cerp.

Legal Continuing Education Credit

Continuing legal education credit will be awarded on an hour-for-hour basis. Attorneys may file the AAFS-issued CLE certificate with their respective state bars.

Non Physician Continuing Education Credit

A general non physician certificate of attendance will be available.

General Continuing Education Credit

General continuing education credit is offered for those practicing the various forensic science disciplines not represented in the aforementioned list.

Moderated by the AAFS Diversity Outreach Committee

The goal of the Diversity Outreach Committee (DOC) Session is to enlighten and initiate dialogue regarding diversity, equity, and inclusion initiatives within the AAFS and the greater forensic science community. Participants will hear from an invited speaker on their perspectives and experiences on issues related to diversity and inclusion. The DOC hopes that this interactive session will promote dialogue on navigating diversity, equity, and inclusion within forensic science throughout an everchanging social climate.

Prior to attending law school, Rook worked as a military intelligence analyst in the US Army, and later for many years as a private investigator. Rook attended Florida Coastal School of Law under a full scholarship, and has a bachelor's degree, cum laude, in Forensic Science. She worked throughout law school, writing motions and appellate briefs for various law firms, as well as assisting in dozens of criminal trials. She is a gifted writer who has written many appellate briefs for multiple district courts of appeal, as well as for the Florida Supreme Court.

Rook is a board member of the National Trans Bar Association, as well as being a member of The National LGBT Bar Association, National Bar Association, The National Trial Lawyers Association, the American Association of Jewish Lawyers and Jurists, the Florida Association of Women Lawyers, and the National Police Accountability Project. Rook is the recipient of the 2021 National Trial Lawyers Top 10 Civil Rights Trial Lawyers, Top 10 Women's Rights Trial Lawyers and Top 25 National Women Trial Lawyers. She was also the American Bar Association's General Practice and Solo Practitioner Division Diversity Fellow for 2022. Rook is currently serving on the Diversity Board and Programs Board.

STUDENT ACADEMY

Pre-Registration Required (\$25/Person)

Tuesday, February 14, 2023

9:00 AM - 1:00 PM

The purpose of the Student Academy of Forensic Sciences is to bring to the attention of high school students the vital importance of the application of scientific principles to the administration of justice. It acquaints the participants with the role of the forensic science disciplines in the legal system as well as the education and training required for the career in each discipline.

Learning Overview: Upon completion of this session, the participant should be able to understand the process of accreditation through the AAFS FEPAC mechanism and be able to participate in the process as a reviewer of academic programs. Participants from academic programs will also learn about the process of accreditation from different perspectives.

Program Description: This session has been developed to assist academic institutions offering undergraduate and graduate degree programs in forensic science and forensic digital evidence to prepare for the accreditation process through the FEPAC. This session will also assist future on-site evaluators (academic and practitioners) to prepare for on-site evaluations of academic programs. Successful completion of this one-day session will qualify participants for consideration to serve as on-site evaluators for FEPAC in the future (please note that participants must still meet other FEPAC requirements, such as membership in the AAFS and designation as either a practitioner or academician). This training session will highlight updates to the FEPAC Standards for Accreditation and provide valuable information for both program directors and on-site evaluators.

The FEPAC is a standing committee of the AAFS with a membership that includes five educators, five forensic science practitioners, and a public member as voting members. The mission of the FEPAC is to maintain and enhance the quality of forensic science education through a formal evaluation and recognition of college-level academic programs. The primary function of the committee is to develop and maintain standards and to administer an accreditation program that recognizes and distinguishes high-quality undergraduate and graduate forensic science programs. Forty academic programs have successfully completed the accreditation process since 2003. Additional information on FEPAC can be found on the FEPAC website: www.aafs.org/FEPAC.

Learning Overview: The Young Forensic Scientist Forum (YFSF) provides students and young professionals with less than five years of experience an opportunity to network, collaborate and learn from fellow peers and experts in the field. This session will prepare attendees for a successful career in their discipline of choice and allow them to look from the outside-in as they evaluate themselves and their future impact on forensic science. Our mission is to provide education, mentorship, and resources to students and burgeoning forensic scientists to promote interest and longevity in the field and encourage participation and advancement in the AAFS.

Impact Statement: After attending this session, attendees will better understand how forensic science has evolved over the years and how every forensic science discipline impacts and enhances the field regardless of one's experience and background. In addition, attendees will learn the importance of education, extensive training, and innovative scientific research. Finally, attendees will learn about the "science" behind job interviewing and become adept in resume building in the forensic sciences.

Program Description:

This year the American Academy of Forensic Sciences (AAFS) is celebrating 75 years of global engagement. The overall theme of the conference is Science Works. In the past few years, science and the scientific method have been under attack, denigrated, and dismissed. AAFS President Laura Fulginiti's plan is to offer scientific content demonstrating that forensic science provides trustworthy, objective data that can be relied upon by the judicial system, Congress, and the public. Our Special Session theme, *Education*,

YOUNG FORENSIC SCIENTISTS FORUM

S1 Education, Training, and Experiences: The Ingredients to Make Science Work!

Program Description cont.:

Training, and Experiences: The Ingredients to Make Science Work!, was chosen to invigorate young forensic scientists and demonstrate how education and training play a vital role in making forensic science work. This full-day session will show young forensic scientists that their contribution matters and that the decisions they make today can have a positive impact on the scientific community at large.

This year the YFSF is excited to present an outstanding group of speakers. These distinguished presenters have been carefully selected to provide exceptional mentorship to attendees through topics such as how to stay true to science, present results in a scientifically correct and neutral manner, manage high-profile cases, and interact with prosecutors and defense attorneys. The session will also include thoughtful demonstrations on assessing one's professional goals, establishing what success looks like for a young forensic scientist, and thinking about one's responsibilities as a mentor and leader as they advance into a career.

The YFSF Special Session provides an inclusive atmosphere for young forensic scientists to have the opportunity for professional growth/development and scientific engagement with esteemed colleagues. Through these presentations, attendees will hear from experienced practitioners as they discuss their extensive education, training, and experiences that have led to success in their field of study. These presentations include case-driven research, innovative methodology, scientific studies, and personal stories. Additionally, each presenter will include thoughtful discussions on their struggles and setbacks that have ultimately made "science work." Through this session, the YFSF aims to integrate young professionals into the field as they begin their journey into forensic science. The YFSF offers two additional opportunities for young professionals and students: the Bring Your Own Posters (BYOP) Session and the Bring Your Own Slides (BYOS) Session. We are excited to announce that this year we have collaborated with The Center for Forensic Science Research and Education (CFSRE) to honor and award two outstanding scientists for their contributions to forensic science. Finally, the session will end with a resume review workshop, so do not forget to update your resume and bring several printed copies with you to the session!

S2 HHRRC Symposium: The Contemporary Global Scope of Forensic Human Rights Investigations and a New AAFS Initiative

Tuesday, February 14, 2023

8:00 AM – 12:00 PM

CE Hours: 3.25

Chair:

Dawnie W. Steadman, PhD

University of Tennessee
Knoxville, TX

Co-Chair:

Luis Fondebrider, BA

Independent Forensic Consultant
Buenos Aires, ARGENTINA

Learning Overview: After attending this presentation, attendees will have a greater understanding of the role of and need for forensic science in human rights investigations as well as learn of new initiatives to involve AAFS members in such projects.

Impact Statement: This presentation will impact the forensic science community by: (1) highlighting some of the current forensic science human rights investigate efforts, and (2) providing direct access to some of the organizations and individuals currently involved in human rights investigations globally.

Program Description: The purpose of this half-day international symposium is to provide an overview of contemporary forensic science applications to human rights investigations by some of the individuals and organizations responsible for the forensic responses, including the Equipo Argentino de Antropología Forense, International Criminal Court, and the International Committee for the Red Cross. There will also be a discussion of the challenges of forensic work in these international contexts, beyond the scientific challenges. Current international protocols and standards in forensic human rights investigations will also be presented. In addition, the HH RC will introduce a new initiative to create a database of AAFS members who wish to be involved in humanitarian and human rights investigations that will serve as a subject matter expert resource for international organizations seeking forensic experts. The second of the symposium will consist of a panel of the presenters who will answer questions from the attendees.

Open to All Meeting Registrants

The Humanitarian and Human Rights Resource Center (HHRRC) of the American Academy of Forensic Sciences (AAFS), with support from the National Institute of Justice's Forensic Technology Center of Excellence, provides needed resources and support to apply modern forensic science to global humanitarian and human rights projects. This Humanitarian and Human Rights Poster Session is an open meeting where attendees can learn about the application of forensic science to investigate humanitarian and human rights injustices. Information will be available at www.forensicCOE.org.

Learning Overview: After attending this presentation, attendees will have gained insight regarding tools, training, and resources to support the implementation of standards on the Organization of Scientific Area Committees (OSAC) Registry. Specifically, attendees will understand how to access and use checklists to document objective evidence of conformance and how to use these checklists within their own organizations for gap analysis or for internal auditing purposes.

Impact Statement: Forensic science service providers will benefit from additional resources that are available to facilitate OSAC Registry implementation efforts (i.e., checklists) as part of the National Institute of Standards and Technology-American Academy of Forensic Sciences (NIST-AAFS) Collaborative Agreement.

Program Description: In this interdisciplinary symposium, checklists to document objective evidence of conformance, progress toward implementation, and auditing use will be explained. Insights regarding checklist development, beta-testing, delivery, and versioning will be presented. Collaborations with quality management personnel will be explored, and the practical use of checklists within a forensic service provider will be discussed.

During this interdisciplinary symposium, the benefits of checklist use will be presented. Free access to this resource will be provided, and the practical use of these flexible tools will be explained from the perspective of the developers, providers, and other stakeholders. This special session will include instructions regarding the use of checklists for standards on the OSAC Registry, integration in the quality management system, and practical advice regarding their use. This session will also include an interactive session and panel discussion to provide feedback, ask questions, and gain insight from FSPs that are using the checklists.

Learning Overview: The Symposium will provide a historic context for the formation of the American Academy of Forensic Sciences, describe the impetus for its formation, and examine the effects of its members on forensic science.

Impact Statement: Attendees will learn about the state of forensic science before, during, and shortly after the formation of the American Academy of Forensic Sciences through the perspective of the six founding Sections: Criminalistics, Jurisprudence, Pathology/Biology, Psychiatry & Behavioral Science, Questioned Documents, and Immunology/Toxicology

Program Description: The 2023 Interdisciplinary Symposium will examine the post-WW II state of the forensic sciences leading to the American Academy of Forensic Sciences' formation in 1948 and that defined its early years. In 1948, there were six founding AAFS Sections: Criminalistics; Jurisprudence; Pathology/Biology; Psychiatry & Behavioral Science; Questioned Documents; and Immunology/Toxicology. Speakers from each of these Sections will discuss their Section's forensic concepts, research, and applications before, during, and shortly after the Academy's founding (roughly 1945 through 1965). How the Academy's formation and its members helped advance the forensic sciences during those early years will also be addressed.

We will examine how during this era life, law, and forensic science looked so much different than today. This retrospective view of the Academy's founding will help us understand the AAFS' continued efforts today to improve the trustworthiness of forensic science through objective data that can be relied upon by the judicial system, Congress, and the public.

K. Scott Griffith

Dallas, TX

K. Scott Griffith is the founder and managing partner of SG Collaborative Solutions, LLC. He is the author of the world's first Collaborative High Reliability® and Collaborative Just Culture® improvement programs, independently audited and certified by DNV, a world-leading international accreditation organization.

Scott gained his reputation for world-class reliability and collaborative skills through success in high-consequence industries across the globe. He came to prominence as a leader in the field of aviation as an international airline captain and chief safety officer at American Airlines, and is widely recognized as the father of the airline industry's landmark Aviation Safety Action Programs (ASAP). He is the recipient of the Flight Safety Foundation's Admiral Luis de Florez Award for his outstanding contribution to aviation safety. He is the three-time recipient of the Federal Aviation Administration's Good Friend Award. Throughout his career, Scott has worked closely with government regulators in several high-consequence industries worldwide.

In 2000, the U.S. Surgeon General, David Satcher, extended a personal invitation to him to advise a Department of Health and Human Services committee on Blood Safety and Availability. From there, he applied his unique approach to focus on improving outcomes across multiple values in healthcare organizations, collaborating with hundreds of hospitals across the country. He is the recipient of the California Patient Safety Action Coalition Leadership Award.

In 2006, he retired from American Airlines and dedicated himself to just culture performance improvement integrations at several large healthcare systems, airlines, railroads, energy companies, emergency medical services, and fire and law enforcement agencies, leading many state- and nation-wide sectors. An acclaimed speaker, author, and socio-technical physicist, his experience brings insight into how the collaborative model supports a wide range of values and objectives, from patient safety and clinical outcomes to privacy, compassion, fiscal responsibility, customer satisfaction, and operational excellence.

He is the principal architect of the Sequence of Reliability® model of socio-technical improvement, bringing the science of reliability to diverse industries and organizations. He has pioneered the development of multiple predictive risk management strategies, including socio-technical probabilistic risk assessment (STPRA) and Reliability Management Systems (RMS). He has worked extensively with management, labor, and government officials and is widely recognized for his ability to help organizations achieve consensus results in support of common goals.

Scott holds a Master of Science degree in Physics from Texas A&M University and a Bachelor of Arts degree in English and Physics from Texas Christian University. His master's thesis contributed to the research and commercial development of the airborne windshear LIDAR project under grant from the Federal Aviation Administration (FAA) and the National Aeronautics and Space Administration (NASA).

His upcoming book, *The Hidden Science – Risk, Resiliency, and Reliability*, is scheduled for release November 7, 2023 by HarperCollins Leadership.

Overview: Medicine is the science or practice of the diagnosis, treatment, and prevention of disease. Although considered part of the forensic sciences, forensic pathology and forensic anthropology are medical specialties. They use history, anatomic findings, and laboratory results to make diagnoses that are used by the public health and criminal justice systems. Unlike other forensic science disciplines that rely primarily on analytical tests (e.g., toxicology, DNA, fingerprint comparison) to obtain objective results, forensic anthropologists and forensic pathologists interpret both subjective and objective information to formulate their medical opinions.

Forensic pathologists and anthropologists give unpopular opinions and can come under a great deal of criticism and pressure. The National Association of Medical Examiners (NAME) published a position paper on medical examiner independence. Their survey showed that 82% of the forensic pathologists had experienced pressure regarding their medical opinions.

They noted: “No one should be made afraid to testify to the truth of their scientific convictions, when based on their direct examination of the evidence or their knowledge of the peer-reviewed literature. It is never appropriate for an authority, whether a litigating attorney, law enforcement officer, or an elected official, to threaten a forensic pathologist with loss of a job, position, or compensation based on testimony that is perceived to be counter to the authority’s wishes or to have resulted in the loss of a case.”

This pressure risks undermining the opinions of these professionals. The criminal justice system in the United States is indeed an adversarial system. This process, however, only should occur in the courtroom. Threats and retaliations against forensic science providers risk compromising our system of justice. The day when medical professionals are unwilling to participate in this adversarial process, whether called by the prosecution or the defense, or the plaintiff or defendant, is the day that we no longer have the best system of justice in the world.

Forensic Pathology and Forensic Anthropology: An Update on Their Roles in the Criminal Justice System

Overview cont.

Questions that will be addressed include: How do these specialties fit into the Academy? How do they differ from the basic sciences? What challenges are they facing? In order to highlight the many challenges, high-profile trials, work-force shortages, social media and activism, roles in investigations, and bias will be explored.

To address these issues, there will be presentations by Dr. Joyce deJong, a forensic pathologist, and Dr. Christian Crowder, a forensic anthropologist. In addition, we will have a legal perspective from a sitting judge, the Honorable Pamela King.

MENTORSHIP PROGRAM BREAKFAST

RSVP Required by Jan. 13–No Charge

Thursday, February 16, 2023

7:30 AM – 8:30 PM

Are you interested in mentoring a colleague or would you like to have a mentor to help guide your professional growth in your discipline? If so, please join the AAFS Mentorship Program Breakfast. We will discuss the program, solicit participation, and begin the matching process for those ready to commit.

Many in the Academy have already notified the committee of their interest in the program and are on the Mentorship Program roster. This breakfast will mark the official beginning of hopefully numerous productive relationships. If you have already agreed to participate, definitely plan on joining us for breakfast.

Orlando conference registrants interested in attending, please complete the survey found [HERE](#). You must RSVP by January 13.

For those unable to make it to Orlando, or have a conflict that morning but are interested in the Mentorship Program, please let us know by contacting mentorship@aafs.org.

CASE BREAK SESSIONS

Case Break Sessions are modified sessions where interesting case presentations—typically of entertainment value—are made during a time when attendees can sit in on a session during what would normally be their breakfast time while learning at the same time.

CB1 Judicial Misconduct or Judicial Discretion: A Historical Perspective and Case Analyses

Wednesday, February 15, 2023

7:15 AM – 7:45 AM

.CE Hour: .5

Patricia Smith, MSL, ACP

Harris County District Attorney's Office
Houston, TX

Betsy Adelizzi, PhD

Missouri Southern State University
Joplin, MO

Learning Overview: The goal of this presentation is to create an open and honest dialogue about the criminal justice system and those taxed with the responsibility of ensuring a fair and just system through inclusion, diversity, and with public safety in mind. Attendees will learn about local, state, federal, and international cases and will be afforded an opportunity to be the “trier of fact” and play a role in sanctioning the sanctioners.

Impact Statement: This presentation will impact the forensic science community by reminding all attendees of their role in making positive and effective changes to the criminal justice system by focusing on fairness to all parties and accountability for all people involved, through collaborative research and practice with multiple disciplines.

The judiciary is a system of courts and judges interpreting the laws passed by the legislature. The judiciary has evolved over the past thousand years and continues to change in an attempt to meet the needs of society. The makeup of the judiciary originated with a Lord or his stewards and continued to evolve to the elected and appointed judges today. “The very first judges . . . were court officials who had particular experience in advising the King . . .”¹ The earliest days of the judiciary, prior to the 12th century, was barbaric at best and based on a type of divine justice.

Divine justice could involve the accused being forced to sink or swim as a way of proving their innocence. One’s guilt or innocence was not based on law, judicial discretion, or witnesses, but on chance, strength of the accused trying to force himself to sink to show innocence or remain on top, floating, to show his guilt.¹ Another example is a “medicine man” holding two hairs from an accused in his tent and the accused’s guilt or innocence was based on if those hairs remained in place the next day.²

The judiciary is arguably a system built around those people with legal expertise, ethical behavior, and fairness. As the judiciary’s evolution continued, the need for codes of conduct and constitutional clarity increased. There are times when the judiciary, or more specifically, certain judges argue judicial independence as a justification for unpopular or sometimes inappropriate conduct. According to Cynthia Gray, “A federal judge argued that the principles of judicial independence incorporated in the United States Constitution barred any sanction for “anything to do with anything that happened when the judge . . . was acting and deciding cases or in any phase of the decisional function,” including “anything that the judge does verbally or physically in the course of adjudication.”²

We will review the judiciaries of Canada, California, Texas, the United Kingdom, and Asia. Also, we will discuss specific Harris County cases and engage the audience through polling.

CASE BREAK SESSIONS

CB2 Not Always What It Looks Like: Death Due to Tricyclic Antidepressant Overdose

Thursday, February 16, 2023

7:15 AM – 7:45 AM

CE Hour: .5

Marie E. Lasater, MSN
Texas County Coroner's Office
Houston, MO

Learning Overview: The goal of this presentation is to aid attendees in distinguishing forensic countermeasures used by suicidal persons who do not want to be ruled a suicide.

Impact Statement: This presentation will impact the forensic science community by exploring the use of a psychological autopsy when determining manner of death in a possible suicide.

This presentation describes a case study involving possible forensic countermeasures in a suicidal death involving grief, alcoholism, gabapentinoids, and nortriptyline and the process of accurately determining cause and manner of death. Toxicity of tricyclic antidepressants and their role in suicide is discussed, including cardiotoxicity and seizures. Aspects of the case, including investigation and differential diagnosis, are outlined.

As part of the death investigation, a psychological autopsy was performed, with the decedent's prescribing physician and only remaining relative (and heir) interviewed. Of note, the decedent had spent several years in her medical career in a urology clinic and was likely aware of drug toxicity. Her physician stated she specifically requested nortriptyline as an antidepressant. He was unaware of literature available on the internet promoting its use in the process of suicide. The decedent's heir was shocked to hear the death was ruled suicide. She was not aware of any suicidal ideation, but had been requested to relocate to live with the decedent, which she was unable to do at the time. Taking into consideration the decedent's history of alcohol abuse, empty bottles of alcohol at the scene, her knowledge of toxicology, and the location of the three empty bottles of medication found on the floor with their caps on, attempted forensic countermeasures (to preclude suicide) on the part of the decedent cannot be ruled out.

Performed by certified professionals, a psychological autopsy is a best practice postmortem data collection procedure performed in addition to any other official death examination. A psychological autopsy helps to reconstruct the proximate and distal contributing factors of an individual's death by suicide and document the most likely manner of death where that manner of death is equivocal and left undetermined by a medical examiner or coroner. Suicidology is an important methodology in the role of any death investigator.

CASE BREAK SESSIONS

CB3 Postmortem Assessment of Anaphylactic Shock Due to Hymenoptera Stings (Yellow Jacket *Vespula*)

Friday, February 17, 2023

7:15 AM – 7:45 AM

CE Hour: .5

Elena Forzese, MD
Messina University
Messina, ITALY

Claudina Pitrone, MD
Messina University
Messina, ITALY

Learning Overview: After attending this presentation, attendees will understand that Hymenoptera stings (bees, wasps) are among the most common causes of anaphylaxis, defined as a severe, rapid onset of a systemic allergic reaction which, if not promptly treated, can be fatal.

Impact Statement: This presentation will impact the forensic science community by highlighting the role of ancillary postmortem investigations in the diagnosis of anaphylactic shock caused by bee stings when no macroscopically evident signs are detected during either on-spot examination and autopsy.

To this regard, we here present the case of a 45-year-old man who, according to the circumstantial data collected, was hit by a swarm of bees while opening a shed at work, dying shortly thereafter. No signs of bee stings were macroscopically evident during the survey, nor was any sign of anaphylactic shock (angioedema, pharyngeal/laryngeal oedema, petechial hemorrhages) observed during autopsy. The only macroscopic findings consisted of mild pulmonary edema with mild swelling of the upper lip; heart and coronary arteries were macroscopically undamaged.

Considering that the absence of postmortem findings does not necessarily exclude the diagnosis of anaphylaxis (since macroscopic signs can resolve during the postmortem period), to clarify the possible cause of death, histological and biochemical investigations were performed, especially in light of the available circumstantial data. Biochemical assays included serum sampling for Radioallergosorbent testing (RAST) for bee venom specific IgE, which showed positive for the venom of the yellow jacket (type of *Vespula*); other biochemical tests highlighted an increase in tryptase and troponin; samples of heart, larynx, trachea, lungs, and spleen were also collected for immunohistochemical tests in order to evaluate the mast cells infiltrate using anti-tryptase antibodies.

Therefore, based on anamnestic (absence of any other pathology worthy of note), circumstantial (exposure to bee sting), histological, and biochemical data, the diagnosis of death was stated as due to anaphylactic shock although there was an absence of macroscopic signs at autopsy.

The case showed the importance of second-level investigations for the postmortem diagnosis of anaphylactic shock, highlighting the usefulness of biochemical and immunohistochemical analysis. In complex cases, a multidisciplinary approach, such a criteria exclusion cause of death, represents an important method of investigation. Moreover, in such cases, the circumstantial data can provide important data to perform specific postmortem investigations aimed at finding the substance responsible for the anaphylaxis.

LUNCHEON SEMINARS

Pre-Registration Required

LS1 The Lindbergh Kidnapping Suspect No. 1—The Man Who Got Away

Thursday, February 16, 2023

12:00 PM – 1:30 PM

CE Hours: 1.0

Hon. Lise A. Pearlman, JD* (Ret.)

First Presiding Judge of the CA State Bar Court
Oakland, CA

Learning Overview: Attendees will gain insight into how key forensic evidence was suppressed and physical evidence altered to convict an innocent man of “the crime of the century.”

Impact Statement: The anticipated impact on the forensic science community is greater awareness of ways in which members’ forensic analysis and testimony can be misused (e.g., suppression of pretrial notes, overstating conclusiveness of findings, denial of a fair opportunity to the other side to test physical evidence) to cause a miscarriage of justice. This talk will also provide an example of how forensic scientists can play an important role in revealing the truth and exonerating the wrongly convicted.

Program Description: This luncheon talk by retired judge and award-winning author Lise Pearlman will discuss a proposed shocking solution to the 90-year-old mystery of the 1932 kidnap/murder of Charles Lindbergh, Jr. based on the best-selling 2020 true crime book, *The Lindbergh Kidnapping Suspect No. 1—The Man Who Got Away*. The talk will describe the framing of Bruno Richard Hauptmann for the murder of Charles Lindbergh, Jr. and the revelation of Suspect No. 1 whom the New Jersey State Police let get away with the crime. The talk will focus on wood evidence, fingerprints, and handwriting analysis, and address disparities between the “evidence” presented at trial and related contradictory evidence that was concealed by the prosecution and consequently not presented to the jury.

LS2 Forensic Sciences and Popular Poetry: A Lighter Way of Teaching People How Science Works

Friday, February 17, 2023

12:00 PM – 1:30 PM

CE Hours: 1.0

Jose A. Medeiros, PhD

Brazilian Federal Police
Cabedelo, PB, Brazil

Learning Overview: Upon completion of this luncheon seminar, the participant should be able to know how the dissemination of forensic sciences among people can be efficient and lighter through popular poetry, based on this Brazilian testimony.

Impact Statement: Showing the international forensic community how the dissemination of forensic sciences through popular poetry is effective among the general public and has encouraged Brazilian forensic scientists to identify themselves with their labor as well as with a literature genre (including woodcutting illustrations) that has become essentially Brazilian and that today is an example of national intangible cultural heritage.

Program Description: This work is about an initiative that has been developed since 2012: to bring together Forensic Science and popular poetry in a simple and accessible format and share it with the lay public. The path used was “Literatura de Cordel”, a form of literature originally European, but which found fertile ground in the Northeast of Brazil, especially from the 19th century onwards. Like a Limerick, the cordel booklet presents a story usually in a humorous tone and in colloquial language. Today there are already 14 stories about CSI, Forensic Engineering, Genetics, Jurisprudence, Environmental, Toxicology, Children’s History, etc. and more than 18 thousand copies distributed free of charge to people from all Brazilian regions at forensic events, criminalistics units, schools and institutions.

LS3 Junk Science and the American Criminal Justice System: An Inside Perspective

Friday, February 17, 2023

12:00 PM – 1:30 PM

CE Hours: 1.0

M. Chris Fabricant, JD
The Innocence Project
New York, NY

Learning Overview: After attending this presentation, attendees will have gained insight from an insider's perspective into the heart of a broken American criminal justice system where junk science is just one piece in maintaining the status quo, including insight from the author's recently released, award-winning book, *Junk Science and the American Criminal Justice System*.

Impact Statement: This presentation will impact the forensic science community by demonstrating the perspective of the Innocence Project's Director of Strategic Litigation, one of nation's leading junk science wrongful conviction litigators, on the era that saw statements such as "one-in-a-million chance" as acceptable science and a new era of reliability, validation, and, most of all, the accountability we expect to see today.

Program Description: In 2012, the Innocence Project began searching for prisoners convicted by junk science, and three men, each convicted of capital murder, became the author's clients. In his book, *Junk Science and the American Criminal Justice System*, the author chronicles his fight to overturn their wrongful convictions and end the use of the bad science that destroyed these men's lives. The quest took many turns and the story weaves together courtroom battles over faulty forensics from Mississippi to Texas to New York City and beyond. The book describes a journey into the heart of a broken, racist system of justice and the role forensic science plays in maintaining that broken system.

In addition to some of the interesting case studies demonstrated in the book, the author's career documents the slow but steady evolution of the field of forensics as a whole and the difficult challenges and barriers that the Innocence Project, lawyers, judges, other stakeholders, and forensic scientists themselves have faced in evolving and moving forward from duplicitous times.

W1 Investigating Publishing: How to Disseminate Your Work

Monday February 13, 2023

8:30 AM – 4:00 PM

CE Hours: 5.5

Learning Overview: After attending this workshop, attendees will be able to review and prepare their own work for a scientific publication; determine the best publication venue for specific educational work; develop case work experiences for publication; and create self-promotion through various means on social media.

Impact Statement: This workshop will impact the forensic science community by increasing awareness of the importance of dissemination through educational publications. People within the forensic science community will be able to learn how to best share their work through textbooks, journals, open resources, and social media.

Program Description: It is important for practitioners and educators to share the work done both in the field and in the classroom. Knowing the best ways to publish various types of research and practice can be a challenging task. This workshop will share best practices in scientific publishing. This will include an introduction to scientific publishing, building a strong foundation for your publication, identifying where to publish, working with the peer-review process, transitioning casework into publications, and promoting your work via social media. There will also be a hands-on session to allow participants to bring questions and examples of work for publication.

W2 Implementing Magnetic Flux Measurements for Forensic Document Examinations

Monday February 13, 2023

8:30 AM – 5:00 PM

CE Hours: 5.75

Learning Overview: After attending this workshop, attendees will be able to recall and discuss the scientific theory which underlies the instrumentation involved with magnetic flux measurements. They will be able to explain what magnetic properties toner has, and how they can be measured. Attendees will be able to prepare a laboratory setup with a magneto-optical imaging device and identify critical variables in the laboratory design which could impact instrument function. They will be able to follow the methodology provided and operate the instrument to collect magnetic flux measurements from different toner samples. Attendees will be able to evaluate the results that they obtain to determine if there has been any type of error or if there is bias. Attendees will be able to interpret the significance of the results.

Impact Statement: This workshop will impact the forensic science community by providing Questioned Document examiners with the knowledge, skills, and abilities necessary to deploy a new methodology for examination of toner printed documents in their laboratories. This methodology has been found to meet the needs of the community as stated, being rapid, non-destructive, and cost-effective.

Program Description: In this program, attendees will learn about the foundational theory behind magneto-optical imaging devices (MOIDs) and magnetic flux measurements of toners, as well as the variables which must be considered when developing a method for forensic laboratory use, and afterwards will get hands-on experience with instrumentation. During the hands-on portion of the program, attendees will learn how to set up the workspace and instrument, how to operate the software associated with the MOID, and how to conduct magnetic flux measurements of different toner samples (including text samples, point samples, and text insertion samples). The attendees will then be able to independently conduct measurements on provided samples to demonstrate their proficiency with the instrumentation and methodology that they have learned. Finally, as a group, the attendees and instructors will evaluate the results of the independent measurements. At this stage, the attendees will learn how to evaluate and interpret the significance of the results which they obtain from the instrument, and how to assess if the data has been affected by any of the variables discussed during the theoretical session.

W3 Forensic Postmortem Radiology: Crossing the Border Between Radiology and Pathology

Monday February 13, 2023

8:30 AM – 4:00 PM

CE Hours: 6.25

Learning Overview: After attending this workshop, attendees will: (1) learn the basics in how to get started in the field of forensic radiology, (2) understand the current state of the art and levels of evidence in forensic radiology, (3) learn about applications to assist forensic pathologists and practitioners in medical death investigation, and (4) be made aware of potential resources available to interested practitioners.

Impact Statement: This presentation will impact the forensic science community by providing attendees with expertise from around the world on the use of, best practices and the evidence base of forensic postmortem radiology.

Program Description: This workshop will give an overview of the current state of forensic imaging in the world, the logistics on how to start a forensic imaging program, and how future technologies may impact the field of forensics.

W4 Just Communications: Providing Clear and Accurate Reports and Testimony on Forensic DNA Results

Monday February 13, 2023

8:00 AM – 5:00 PM

CE Hours: 7.75

Learning Overview: DNA experts are asked in court to translate hours of chemistry and complex statistical analysis into yes or no answers. We learn to do this from previous experts who teach us the terms of art, metaphorical examples, and boundaries of permissible expert opinion. Like all human communication this is an evolving art that adjusts to changes in science, computation, law and culture. After attending this presentation, DNA analysts, lawyers, judges, and other criminal justice stakeholders will be better able to evaluate and communicate laboratory procedures and findings. They will be encouraged to adopt agile practices for clear and accurate testimony on the witness stand, and will be familiar with tips and tricks for guarding against common pitfalls. Participants will also learn from examples that have led to wrongful convictions, including bias in DNA mixture interpretation.

Impact Statement: This presentation impacts the scientific community by discussing the critical consequences that can result from false or misleading testimony that is anecdotal rather than based on empirical data and ways labs and individual analysts may mitigate some of these consequences through technical training, testimony oversight and quality management.

Program Description: It is essential that forensic scientists are able to clearly and accurately communicate their work, whether it is casework results or new research. This includes talking to other scientists, investigators, attorneys, judges or jury members, all of which present their own challenges. The presenters will discuss language choice and the impact of certain words and phrases in Forensic DNA reports and testimony and methods for resisting pressures from criminal justice stakeholders to stretch testimony beyond the limits of what science can support. Presenters will discuss best practice for communicating scientific results in reports and courtroom testimony to ensure results are being understood and not misunderstood. Topics that will be covered in the presentation are DNA transfer, persistence, prevalence and recovery; the hierarchy of propositions; evaluating findings given activity level propositions; and human factors and cognitive bias.

W5 Diversity, Equity, and Inclusion in the World of Forensic Practice: Lessons and Actions

Monday February 13, 2023

8:30 AM – 5:00 PM

CE Hours: 6.5

Learning Overview: Upon completing this workshop, the attendee should be able to acknowledge the need to address historic and ongoing issues of diversity, equity, and inclusion as they impact the forensics community at all levels. With this understanding of the need for action, the participant will be armed with a potential path to light the spark of productive change within their own organization in order to move towards parity for all.

Impact Statement: This workshop will impact the Forensic Science Community by addressing many issues encountered impacted by failure to recognize diversity, equity, and inclusion, thus allowing them to see the scope of the problem from a historical and present-day view. This recognition of the breadth and depth of the problem - along with a primer on working within organizations to make changes for the better, will lead the community towards unity and fairness.

Program Description: This workshop will focus on social justice in the forms of diversity, equity, and inclusion (DEI). E pluribus unum. From many one. From it's founding, the United States has been seen a celebration of strength through diversity, although that lesson that can be too easily forgotten, lost, or worse. Diversity, equity, and inclusion (DEI) can be viewed as a means to that lofty ideal – that all people are created equal. Efforts toward social justice attempt to level the playing field for all members of society at local, regional, national, and international levels. Targeted sessions on general forensic practice, medicolegal forensics, representing the hated, and humanitarian efforts will illustrate the need for DEI to strive for parity. The story of the tragic “Pulse shooting” illustrates the depths of depths of depravity but also tells the success that can be achieved by embracing unity through diversity. Finally a primer to ignite organizational efforts will provide a roadmap to a path forward for all.

W6 How Science Works to Identify Unknown Decedents Decades After Death

Monday February 13, 2023

8:30 AM – 5:15 PM

CE Hours: 7.0

Learning Overview: After attending this workshop, attendees will better understand how science works in a multidisciplinary approach to identify unknown decedents decades after death via multiple lines of evidence and objective data.

Impact Statement: The presentations in this workshop will impact the forensic science community by illustrating a trustworthy process that uses anthropology alongside historical research, archaeology, material evidence analysis, odontology, and biological/chemical analyses—underpinned by a comprehensive quality assurance program and case management system—to make identifications.

Program Description: This workshop will highlight the case resolution process at the Defense POW/MIA Accounting Agency where identifying decedents decades after death is the norm. The presenters will demonstrate the need for objective data from the disciplines of Forensic Archaeology, Forensic Anthropology, Forensic Odontology, Material Evidence Analysis, Chest Radiograph Comparison, Isotope Analysis, and DNA Analysis to support forensic identification using case examples. Participants will learn how a robust surety, or quality assurance, program ensures all scientific work is trustworthy and above reproach in an ASI National Accreditation Board (ANAB) -accredited laboratory. A special emphasis will be included at the end of the workshop to bring all the methods/evidence together to make a complete case for an identification. This integrated portion of the workshop is designed to help the practitioner understand why a multidisciplinary approach is necessary for cold case resolution.

The Seven Habits for Highly Effective Standards Development

Monday February 13, 2023

8:30 AM – 12:00 PM

CE Hours: 3.25

Learning Overview: After attending this presentation, attendees will (1) gain a better understanding of the role and importance of consensus-based standards in strengthening forensic science in the United States and internationally; (2) gain a greater awareness of their own individual role in the development of consensus-based standards, and (3) learn how to provide input and get involved.

Impact Statement: The 2009 National Academy of Sciences (NAS) Report emphasized the need for standards in forensic science. Since this Report was issued, more than 140 forensic science standards have been published, and more than 100 of those have been placed on the Organization of Scientific Area Committees (OSAC) Registry. Still, many more discipline-specific standards are needed to continue to strengthen the field. Standards development is a long and sometimes contentious process. To be successful, those involved must be able to lead themselves and influence, engage, and collaborate with others. This workshop will provide attendees with information on how they can become more effective in the standards development process.

Program Description: Attendees will hear updates about forensic science standards development efforts in the United States and internationally. They will also gain a better understanding of ways to become more effective in participating in the development of consensus-based standards, including how to write documents, submit public and committee comments, and adjudicate those comments. Attendees will also learn the various ways they can get involved in forensic science standards development.

W8 Postmortem Interval Estimation Using a Novel Data Set and Methods

Monday February 13, 2023

8:30 AM – 12:00 PM

CE Hours: 3.25

Learning Overview: Attendees of this workshop will learn how to use geoFOR application to record decomposition characteristics and estimate the Postmortem Interval (PMI) using the available machine-learning models.

Impact Statement: This workshop will impact the forensic science community's practice by demonstrating a procedure for recording scene and decomposition information and machine learning models to estimate PMI.

This workshop will introduce a data repository and associated machine learning models to provide a novel method of estimating the PMI in the geoFOR application. The lack of a large reference dataset for developing reliable and accurate models has been a major barrier for improving methods for determining the time since death.

Since 2019, data from forensic cases and observations from anthropological research facilities have been collected in a reference dataset that contains over 1,500 cases from locations across the United States. This reference dataset is representative of forensic casework; it is geographically diverse and encompasses the various scenarios in which human remains are discovered in forensic casework. Along with decomposition characteristics, the application records location, which allows environmental data from existing databases from the National Oceanic and Atmospheric Administration (NOAA), such as temperature, humidity, and precipitation, to be tied to the location of death to model variables important in the decomposition process. The availability of this reference dataset allows for machine learning models to be employed to provide a robust estimate of PMI with an associated prediction interval.

This workshop will first demonstrate the application, reference data set, and the data entry process. Secondly, Geographic Information Systems (GIS) methods and spatial coding will be introduced to demonstrate how environmental datasets are automatically populated and used in the statistical models and how ArcGIS® is used to store and manage data for collaborators. Third, machine learning models that are used in the predictions of PMI from both observed decomposition variables and integrated environmental variables will be explained. Next, Bayesian generative models will be discussed. These methods are useful for improving research design for future studies of decomposition. For example, using expert knowledge and a priori knowledge, this information can be integrated to provide data-informed stages of decomposition or how decomposition variables are associated with body size or age. Finally, this workshop will provide an overview of how this project aims to follow an Open Science model from the National Institutes of Health with the goal of sharing scientific data to accelerate research discovery, enhance research rigor and reproducibility, provide accessibility to high-value datasets, and promote data reuse for future research studies. Participants will gain experience using the geoFOR application to input data, manage their data in ArcGIS®, and make predictions of PMI.

W9 Inside the Black Box: Forensic Psychiatry for Lawyers

Monday February 13, 2023

9:00 AM – 5:00 PM

CE Hours: 6.5

Learning Overview: After attending this workshop, attendees will: (1) have an expanded understanding of mental illness; (2) learn how to effectively utilize an expert psychiatric witness in criminal and civil cases; (3) understand the difference between appropriate and inappropriate consult questions for the expert; (4) learn about unethical expert witnesses (how to spot them, why to avoid them, and effectively crossing them); and (5) understand the ethical obligations of an expert witness and anticipate when these can conflict with an attorney's ethical duties.

Impact Statement: This workshop will have a positive impact on the forensic science community in terms of helping attorneys work more effectively and ethically with experts in the mental health field. The skill and knowledge acquired will also help inform members of the forensic mental health field to avoid some of the pitfalls that can occur in the midst of complex legal cases. Some of the ethical issues examined will be generalizable to other expert witnesses.

Program Description: This workshop will cover the history of forensic psychiatry, the use and types of experts, and the clinical and ethical guidelines followed. Discussion will include the crucial differences between a treating clinician and an expert, the use and misuse of psychological testing, and the application of case law and statutes to appropriately answer psychiatric-legal questions. This workshop will be interactive, with case debates prepared by the presenters and invited submissions from attendants. This workshop is designed to help inform attorneys how to work more effectively with mental health experts, as well as confidently navigate the ethical waters when doing so.

W10 Reefer Madness: The History of THC Psychosis and Modern Adverse Events

Monday February 13, 2023

1:00 PM – 4:00 PM

CE Hours: 3.25

Learning Overview: After attending this workshop, attendees will have a better understanding of the state of cannabis legalization and regulations, the history of cannabis psychosis and adverse events, gaps in the scientific knowledge and promulgated mythology, modern incidents of adverse effects and potential mechanisms, and cases in which evidence and circumstances indicate THC-related psychosis. Content will enable attendees to influence, educate, and collaborate with stakeholders in their communities regarding threats to public health and public safety.

Impact Statement: This workshop will impact the forensic science community by increasing attendees' understanding of the complexities of the impacts of cannabis and THC analogs in our communities and the need for a multidisciplinary collaboration to know the incidents of adverse events and importance of appropriately and thoroughly describing the etiology of adverse events.

In many jurisdictions across the United States, alternative cannabimimetic products have erupted and proliferated. Due to knowledge gaps, confusion, and lack of enforcement, new products that are claimed to be legal and safe derivatives of hemp have been propagated. The pervasiveness of products containing synthetic (i.e., unnatural) THC isomers is well known in communities, as they are commonly sold in vape shops, Cannabidiol (CBD) stores, gas stations, and convenience stores. These synthetic THC isomers and derivatives include, but are not limited to, $\Delta 8$ -THC, $\Delta 10$ -THC, $\Delta 6a$ -10a-THC, THC-acetate (THC-O), CBD-di-acetate (CBD-di-O), Tetrahydrocannabiphorol (THC-P), exo-THC, Hexahydrocannabinol (HHC), Tetrahydrocannabitol (THC-B), and halogenated THC. Unknown internet sources have misinterpreted the scientific literature, perpetuating falsehoods and misinformation, and consumers have a false sense of security in the quality and efficacy of these products. A current and significant challenge facing the United States is that the population of persons taking traditional THC products as well as these THC analogs is exponentially more than those who would consume the "older" synthetic cannabinoids. The incidence of reported adverse effects is on the rise, as demonstrated by the increase in calls to poison control centers. However, attribution of the adverse event to a defined drug rarely happens because the product consumed by the person is not analyzed for chemical content and toxicology testing is often limited. Conversely, symptomology and general health of persons is also rarely recorded in the event that products are tested from the self-reporting individual.

W14 Transfer and Persistence of Physical Evidence: Deciphering Implications

Tuesday February 14, 2023

8:30 PM – 4:30 PM

CE Hours: 6.0

Learning Overview: After attending this workshop, attendees will appreciate the various forms of physical evidence transfer and how they apply to a diverse range of traces (e.g., DNA, hairs, fibers, paint, gunshot residue, DNA, blood, ignitable liquids, patterns), their implications in the assessment and interpretation of analytical results, and their impact on the possible reconstruction of events.

Impact Statement: This workshop will impact the forensic science community by increasing attendees' overall evidence awareness and their comprehension of how the concepts of transfer and persistence profoundly affect both the assessment and interpretation of physical evidence.

Program Description: Through a series of lectures and hands-on experiments, attendees will gain an appreciation of the nuances of transfer and persistence of various types of traces, as well as the interrelationships between them that support a holistic interpretation.

W16 Practical Cardiovascular Pathology for Medical Examiners: Basic Concepts and Advanced Principles

Tuesday February 14, 2023

8:30 PM – 5:00 PM

CE Hours: 6.75

Learning Overview: After attending this workshop, attendees will have an enhanced knowledge base of cardiovascular pathology, as seen in a busy forensic autopsy practice. An approach to dissection techniques and microscopic sampling will also be emphasized. Molecular testing, and an overview of congenital heart disease, will additionally be discussed. Attendees will build skills to identify challenges in cardiac assessments at autopsy and develop techniques to address both common and unusual pathologies. Attendees will be exposed to various specimens through didactic presentations, case-based discussions, and real-time commentary on previously recorded videos.

Impact Statement: This workshop will impact the forensic science community by emphasizing the multifaceted nature of cardiovascular pathology in the setting of forensic autopsy. Didactic lectures, as well as practical instruction by use of detailed anatomical images, will be given to advance autopsy performance and competency, with an additional focus on improving awareness of potentially heritable conditions that may require notification of decedent relatives. This workshop's target audience includes forensic pathologists/medical examiners, pathology fellows and residents, physician assistants, and medical students.

Program Description: This workshop will discuss several topics related to basic and advanced knowledge pertaining to cardiac pathology at forensic autopsy. Topics will range from basic heart anatomy to special dissection techniques and microscopic examination of uncommon entities. Recommendations on how to handle heart specimens in challenging cases will also be provided. Didactic presentations, case-based discussions, videos of heart pathologies detailing traditional and special dissection techniques, and interesting heart histology cases will be shown and commented on by forensic and cardiac pathologists on-site. Interaction with attendees will also be encouraged during the workshop session.

W17 First Look at the Draft Recommendations in the Report of the NIST/NIJ Expert Working Group on Human Factors in Forensic DNA Interpretation

Tuesday February 14, 2023

8:30 AM – 5:00 PM

CE Hours: 6.0

Learning Overview: After attending this workshop, participants will have a deeper understanding of human factors. They will be familiar with the findings and recommendations presented in the report of the NIST/NIJ Expert Working Group on Human Factors in Forensic DNA Interpretation. Participants will understand the purpose and implications of these recommendations for their own practice (i.e., individual-, team-, and organization-level) and how the recommendations serve to improve the practice of DNA interpretation. Participants will be invited to critique the recommendations and discuss how relevant and feasible they are to their practice and the wider forensic DNA community.

Impact Statement: The study of human factors in forensic science is essential to inform our understanding of the interaction between humans and the systems they use. Understanding human factor issues can identify and mitigate the potential for error and bias. Furthermore, we can develop ways to shape positive laboratory culture, improve staff morale, and increase work productivity. This workshop presents three years' worth of effort to understand human factors as they apply to forensic DNA interpretation. This workshop will impact the forensic science community by guiding DNA analysts, laboratory leadership, researchers, educators, and legal practitioners on how to recognize and address human factors influences within DNA analysis and interpretation and, as a result, aid in mitigating the effects of these human factors in justice outcomes.

Program Description: In this workshop, we will walk participants through the NIST/NIJ Expert Working Group on Human Factors in Forensic DNA Interpretation process to develop the report, highlight key findings, discuss some of the more controversial topics, and present a “first look” at the draft recommendations.

W18 Identification, Analysis, and Interpretation of Blunt Force Skeletal Trauma

Tuesday February 14, 2023

8:30 AM – 5:00 PM

CE Hours: 6.5

Learning Overview: Upon completion of this workshop, attendees should be able to: (1) provide an overview of current methods across disciplines for identification and analysis of blunt force skeletal trauma; (2) identify and analyze blunt force skeletal trauma utilizing X-rays, Computed Tomography (CT) scans, photographs, and 3D virtual models; and (3) collaborate with experts across disciplines for a multidisciplinary approach to skeletal trauma interpretation

Impact Statement: This workshop will impact the forensic science community by providing attendees the unique and informative opportunity to identify, analyze, and interpret blunt force skeletal trauma in cases with known loading conditions and event data, including instrumentation output, high-speed video, and post-test imaging.

Program Description: This workshop presents an overview of current methods in blunt force skeletal trauma analysis with a hands-on opportunity for attendees to gain a unique experience and to put these methods to practice. Attendees will gain hands-on experience in identifying, analyzing, and interpreting known skeletal trauma, which is a rare occurrence in forensic sciences. They will also have the distinct opportunity to see exactly how the trauma occurred. All cases included in this workshop are experimental cases of blunt force trauma; therefore, attendees will have access to data collected throughout the entire research design. Specifically, beyond the bone itself, they will be able to evaluate fracture timing, high-speed videos to visualize the response during the event, post-test photographs and radiographs of documented injuries, and 3D models to assist in visualizing skeletal trauma and re-creating the traumatic event.

Foundational concepts will be discussed first in a single element situation, then will transition to the complex whole body situation. This workshop is designed for a broad, multidisciplinary audience and the intention is for the participants to work with colleagues in varying fields to expand their experiences and evaluations. Forensic science is inherently multidisciplinary, but trauma analysis in particular requires a variety of experts. Therefore, this opportunity facilitates communication among colleagues and subsequently substantiates the importance of an interdisciplinary approach to trauma analysis. This novel workshop provides attendees with a hands-on experience in identifying and analyzing skeletal trauma from known loading mechanisms to facilitate an increased understanding of the relationship between trauma mechanism and fracture characteristics, ultimately improving interpretations in

W19 Forensic Photography: Photography Basics to Imaging Beyond the Visible Spectrum With Alternate Light Sources (ALS) and Infrared (IR)

Tuesday February 14, 2023

8:30 AM – 6:00 PM

CE Hours: 7.5

Learning Overview: After attending this presentation, attendees will understand how to properly utilize a Digital Single-Lens Reflex (DSLR) camera in the manual mode. Attendees will also learn how to visualize and image evidence requiring the use of ALS, Ultra-violet (UV), and IR energy. Common types of evidence requiring the use of ALS for visualization and imaging include semen, saliva, urine, gunshot and explosive residue, fluorescent fingerprint powders, hairs/fibers, inks utilized in fraudulent document cases, and other trace evidence. Attendees will learn how to utilize their cell phone cameras to scan evidence for traces of blood and Gunshot Residue (GSR). Attendees will also be exposed to utilizing ALS, including IR energy, to scan for subcutaneous bruising, obliterated tattoos, and obliterated writing with multiple inks.

Impact Statement: This presentation will impact the forensic science community by informing attendees that whatever the level of understanding of photography may be in the visible spectrum, the crime scene professionals' understanding of photography in the UV and IR spectrums, or spectra outside the visible, remains an elusive concept. With this lack of understanding comes missed opportunities to locate, visualize, and properly capture photographically, evidence that is likely crucial in verifying that a reported crime occurred or to refute a false allegation.

Program Description: Crime scene and forensic photography within the visible spectrum of light remains the most utilized and thorough means of documenting crime scenes, autopsy findings, physical injury, and forensic evidence. Despite being the most utilized method of documentation, the lack of proper understanding, training, experience and equipment results in photography being underutilized, or at least not utilized to its fullest potential.

W20 A Gentle Introduction to the Likelihood Ratio: Basic Ideas, Implementation, Limitations

Tuesday February 14, 2023

8:30 AM – 12:00 PM

CE Hours: 3.25

Learning Overview: Participants in this workshop will understand the basic idea behind the LLR and how to correctly interpret results from an LR analysis. They will also understand some of the challenges that must still be resolved before the LR can be used in a wide range of forensic disciplines.

Impact Statement: Forensic scientists are increasingly expected to provide a quantitative, data-based assessment of the strength of the evidence in favor of a proposition. The LR approach has emerged as a plausible approach to do so. Yet, correctly arriving at and interpreting those assessments requires some understanding of the statistical foundations of the LR approach. This presentation will impact the forensic science community by presenting foundations and best practices in an accessible, easy to follow format, aiming to increase the statistical and quantitative literacy of forensic practitioners and provide them with the background they need to more confidently work with LRs.

Program Description: This workshop will focus on the LR approach to evaluating evidence. The LR is a one-number summary that quantifies the weight of the evidence in favor of the prosecution's or the defense's propositions. While the basic idea behind the LR is simple and intuitive, the challenges arise when trying to implement the approach on different types of evidence. Presenters will discuss the statistical foundations of the LR, but will spend significant time on examples, applications in different forensic disciplines, best practices, and limitations.

W21 Implementing FIGG: How to put Forensic Investigative Genetic Genealogy Into Practice (Without Messing it up for Everyone Else)

Tuesday February 14, 2023

9:00 AM – 12:30 PM

CE Hours: 3.0

Learning Overview: After attending this workshop, attendees will better understand: (1) the standards and policies being created for and by the forensic community; (2) a comparative study of the different technologies available and data-driven guidance on when to use each; (3) database hygiene and best practices for using FIGG databases in alignment with the Interim Department Of Justice (DOJ) policy and evolving terms of services; (4) how to prepare and what to consider when bringing FIGG in-house; and (5) case studies and practical guidance for learning investigative techniques from the perspective of law enforcement.

Impact Statement: This workshop will impact the forensic science community by providing the most up-to-date information on the policies, procedures, and best practices associated with putting FIGG into practice in an operational forensic environment. Attendees will receive summaries of all standards and policies presented. Example checklists for implementation, data evaluations, and comparisons will be made available. By sharing experiences and knowledge, the community can build a framework for a system that works together on a wider, coordinated scale.

Program Description: This workshop will provide scientific, experiential, and collaborative guidance on the critical aspects of a FIGG workflow, namely, emerging standards and policy, DNA technologies and limitations, genealogical databases and terms of use, investigative genealogical skill-building, and laboratory implementation planning. Practical experience and implementation options will be focused by a discussion of how real world cases are solved, which will guide operational and policy choices. Experts from forensic laboratories, law enforcement, and industry will present their consensus, data, and guidance to provide a toolkit for the forensic community to apply to their own investigations.

W22 An Introduction to Document Security

Tuesday February 14, 2023

1:00 PM – 4:30 PM

CE Hours: 3.0

Learning Overview: After attending this workshop, attendees will have a better understanding of what constitutes a “secure document,” including the features that comprise those documents, and how those different features and elements function and interact.

Impact Statement: This workshop will impact the forensic science community, particularly law enforcement personnel and document examiners, by helping attendees to better understand what they are looking at when handling and examining a variety of documents, and be better able to recognize the variety of production and design features that make documents secure, thereby enhancing that security.

Program Description: This workshop will provide attendees with an overview of the fundamentals and methods of document security, with an emphasis on securing items such as identification documents, financial instruments, and commercial products. This workshop will introduce participants to the printing methods used in the production of secure documents as well as the types of substrates used for various documents. Additional elements covered will include security features such as optically variable devices and digital elements (barcodes and chips) as well as issues related to design and production.

W23 Report Writing in a New Rule 702 World—Handwriting Comparison Examination

Tuesday February 14, 2023

8:30 AM – 12:30 PM

CE Hours: 3.75

Learning Overview: Upon completion of this workshop, participants will be able to understand the potential impact on admissibility of expert testimony under a proposed new Rule 702. Participants will also be introduced to new ideas in report writing and, more importantly, the reasoning behind these changes. The contents of reports will hold added importance under the new Rule 702. Participants will also have begun the process of gaining foundational experience in making these changes to their reports so that the reaction by the forensic community can be proactive rather than reactive. In addition, laboratory management will be aware of the potential to all forensic disciplines and proactively engage all disciplines in the necessary report modifications with sufficient time to develop foundational experience.

Impact Statement: Changes in Rules of Evidence pertaining to the admissibility of expert testimony have historically been accompanied by wide-ranging and diverse rulings from courts across the country as the judiciary struggles with the impact of these changes. It should be anticipated that non-uniform rulings will also accompany changes to Rule 702 of the Federal Rules of Evidence and any corresponding changes to state rules of evidence. This workshop will impact the forensic science community by providing an increased understanding of the likely results of the rule changes, which will allow forensic scientists to proactively address the coming challenges by answering questions before they are asked. As a result, proactive responses to the rule changes will decrease rulings of unnecessary exclusions or limitations.

Program Description: Recently, an advisory committee for the Judicial Conference of the United States' Committee on Rules of Practice and Procedure recommended significant changes to Federal Rules of Evidence Rule 702, pertaining to the admissibility of expert witness testimony. While this specific recommendation is for federal jurisdiction, such changes commonly trickle down to state jurisdictions, and no exception can be expected for this matter. As such, it is important for forensic scientists to be aware of the changes and how they may impact testimony in the near future. It is anticipated that the new rule, if passed as expected, will take effect around December 2023. One of the main changes is the added emphasis for a judge's gatekeeping role for each individual proffer of expert testimony, and it is anticipated that judges will become active in that responsibility under the new rule. So how will that affect forensic science testimony? When the United States Supreme Court changed the basic admissibility requirements for expert testimony based on Frye to what is now called the Daubert Guidelines, the judiciary responded with less-than-uniform rulings. The results were a marked increase in exclusions in spite of the overall statement that Daubert was suppose to be a "lower" bar than Frye. While we cannot predict the future under any modified Rule 702, we can certainly look to bolster our report writing in order to proactively minimize any potential negative impacts that could occur. This workshop will explore the potentials and provide recommendations for writing reports that will help stand the test of future Rule 702 scrutiny.

Tuesday February 14, 2023

1:30 PM – 5:00 PM

CE Hours: 3.75

Learning Overview: After attending this workshop, attendees will be more aware of how forensic science standards are being implemented in laboratories and the impact of these standards in court.

Impact Statement: The use of forensic science standards is increasing exponentially in laboratories and the court system. This workshop will impact the forensic science community by informing attendees about how these standards are being used, and why standards should be adopted in laboratories.

Program Description: This workshop will present the views and experiences of laboratory practitioners, accreditation experts, attorneys, and judges pertaining to the use of forensic science standards in court.

W26 Taming the Wild West of Workflows for Opioids, Emerging and Controversial Drug Threats

Tuesday February 14, 2023

1:30 PM – 5:00 PM

CE Hours: 3.25

Learning Overview: After attending this workshop, attendees will have: a greater awareness of forensic workflows and how they may impact test results; a greater understanding of the challenges in adjusting standardized workflows to address opioids and emerging drugs; and a better appreciation for the importance of accurate substance data and how stakeholders rely on that accuracy.

Impact Statement: This workshop will impact the forensic science community by providing information about technological developments and improved workflows for various types of drug testing (toxicology and seized drugs) by discussing the components of a standardized forensic workflow, by showing the effects of deviations or preemptive testing on comprehensiveness, sensitivity and specificity of the test, and by discussing the compliance of test results with emerging standards in forensic science and the acceptance of those results in court and by other pertinent stakeholders.

Program Description: After attending this presentation, attendees will be able to discuss standardized workflows that are being adopted to better meet regulatory requirements, safety, efficiency, and timeliness in the fields of forensic drug testing, whether in a traditional lab setting, in the autopsy suite, or in the field.

- 3:15 PM – 3:45 PM **The Pathology Perspective—Testing Complexities and Interpreting Re-sults**
James L. Caruso, MD
- 3:45 PM – 4:15 PM **Importance of Accurate Substance Data for Poison Control Center Case Management and Prevention Activities**
Wendy B. Stephan, PhD
- 4:15 PM – 4:45 PM **Legal Questions Arising from Changes to Forensic Workflows Involving New Technologies**
MJ Menendez, JD
- 4:45 PM – 5:00 PM **Questions and Answers**

NATIONAL INSTITUTE OF JUSTICE

Forensic Science Research and Development Symposium

The National Institute of Justice (NIJ) Forensic Science Research and Development (R&D) Symposium is an open meeting where attendees can learn about NIJ-funded research across a variety of forensic science areas. You can register to attend the Symposium in person or virtually; however, American Academy of Forensic Sciences (AAFS) meeting registration is not necessary to attend. Feel free to stop by to listen to specific presentations and view posters, or stay all day and learn about the diverse NIJ forensic science R&D portfolio.

More details and registration information can be found here: <http://ow.ly/Z9yc50LWOAb>.

Tentative Agenda—Tuesday, February 14, 2023

The podium presentations will take place from 8:30 AM to 5:00 PM. A Q&A session for each presenter will directly follow their presentation.

8:30 AM - 8:40 AM **Welcome and Opening Remarks**
Lucas Zarwell, Office of Investigative and Forensic Sciences, NIJ

Session I – Impression and Pattern Evidence/Trace Evidence

Moderated by NIJ Program Manager Gregory Dutton

8:40 AM - 9:05 AM **Applying the NIST Footwear Impression Comparison System to Comparisons Involving Realistic Crime Scene Impressions**
Steve Lund, National Institute of Standards and Technology (NIST)

9:05 AM - 9:30 AM **Novel Ambient Oxidation Trends in Fingerprint Aging Discovered by High-Resolution Mass Spectrometry**
Andrew E. Paulson, Iowa State University

9:30 AM - 9:55 AM **Surface-Enhanced Raman Spectroscopy Enables Highly Accurate Identification of Different Brands, Types, and Colors of Hair Dyes**
Dmitry Kurouski, Texas A&M University

9:55 AM - 10:20 AM **Application of Particle Correlated Raman Spectroscopy (PCRS) for the Forensic Examination of Soils**
Brooke W. Kammrath, University of New Haven

10:20 AM - 10:35 AM **Break**

Session II – Forensic Anthropology and Forensic Pathology

Moderated by NIJ Program Manager, Danielle McLeod-Henning

10:35 AM - 11:00 AM **GIS Application for Building a Nationally Representative Forensic Taphonomy Database**
Katherine Weisensee, Clemson University

11:00 AM - 11:25 AM **Germ-Line Transformation of Forensically Important Flies**
Amber MacInnis, Florida International University

11:25 AM - 11:50 AM **Bone Trauma and Thermal Alteration of Human Remains**
Giovanna M. Vidoli, University of Tennessee, Knoxville

11:50 AM - 12:15 PM **Development of the Forensic Anthropology Skeletal Trauma (FAST) Database**
Angela L. Harden, The Ohio State University

12:15 PM - 1:25 PM **Lunch Break - On Your Own**

NATIONAL INSTITUTE OF JUSTICE

Session III – Seized Drugs and Toxicology

Moderated by NIJ Program Manager, Frances Scott

- 1:25 PM - 1:50 PM **Detectability of Δ 10-THC's Chiral Analogs in Urine by Six Commercially Available Homogeneous Immunoassays**
Carl E. Wolf, Virginia Commonwealth University
- 1:50 PM - 2:15 PM **Assessment of the Contribution to Drug-Impaired Driving from Emerging and Undertested Drugs**
Amanda L.A. Mohr, Center for Forensic Science Research and Education
- 2:15 PM - 2:40 PM **A Molecular Networking Approach to Processing Untargeted High Resolution Mass Spectrometry Data in Forensic Toxicology**
Heather Barkholtz, University of Wisconsin–Madison
- 2:40 PM - 3:05 PM **High-Resolution Mass Spectrometry Screening in Forensic Toxicology: Cost Benefit Analysis**
Sarah Kerrigan, Houston Forensic Science Center
Jessica Ayala, Sam Houston State University
- 3:05 PM - 3:20 PM **Break**

Session IV – Forensic Biology/DNA

Moderated by NIJ Program Manager, Tracey Johnson

- 3:20 PM - 3:45 PM **Validation of a Confirmatory Proteomic Mass Spectrometry Body Fluid Assay for Use in Publicly Funded Forensic Laboratories**
Erin Butler, New York City Office of the Chief Medical Examiner
- 3:45 PM - 4:10 PM **Biological Sample Analysis Using Prediction Modeling for Early Mixture Detection**
Tracey Dawson Green, Virginia Commonwealth University
- 4:10 PM - 4:35 PM **DNA Analysis Findings from Male Sexual Assault Victims: Multidisciplinary Practice Implications**
Julie L. Valentine, Brigham Young University
- 4:35 PM - 5:00 PM **Selectively Analyzing and Interpreting DNA from Multiple Donors with a Full Single-cell Strategy**
Nidhi Sheth, Rutgers University–Camden

NIJ FTCOE PUBLIC FORUM

Research to Impact Forum: Anything Goes!

Friday

February 17, 2023

8:00 AM – 12:00 PM

Development and subsequent adoption of technology is critical to addressing forensic community needs and improving just outcomes. However, researchers and practitioner end users operate in realities that make transition of research to practice challenging. The National Institute of Justice's Forensic Laboratory Needs Working Group, in partnership with the Forensic Technology Center of Excellence, created this effort to improve stakeholder alignment and enhance success of technology transition. The output of this study is a living document that will introduce the concept of the forensic innovation ecosystem and its players, share researcher and practitioner perspectives, and identify short and long term priorities to improve transition.

This public forum will inform participants on the goals, methodology, and initial insights from this study, and enable participants to provide input on approaches. Have an idea for lowering barriers, overcoming obstacles, or enhancing researcher-practitioner relationships? There will be four one-hour sessions available to attend. Drop by and add your thoughts—anything goes! Feel free to stay as long as you like.

- 4:45 PM – 5:00 PM **B150** **The Impact of Key Factors Absent in Forensic DNA Analysis in South Africa**
*Antonel Olckers, PhD**

Friday—Session II

Drugs II

Moderator: Thaddeus Mostowtt

Co-Moderator: Carmen Masters

- 8:30 AM – 8:45 AM **B151** **Gas Chromatography-Vacuum Ultraviolet (GC-VUV) Detection of JWH-18 Positional Isomers and Select Diastereomeric Synthetic Cannabinoids**
*Diana Le, BS**; *Ira Lurie, PhD*
- 8:45 AM – 9:00 AM **B152** **The Investigation of Analytical Methods Using Real-Time Mass Spectrometry for the Rapid Analysis of Seized Drugs**
*Madeline Bloom, BS**; *Edward Sisco, PhD*; *Ira Lurie, PhD*
- 9:00 AM – 9:15 AM **B153** **The Investigation of Cannabidiol Conversion Into Delta-9-Tetrahydrocannabinol in Electronic Cigarettes**
*Laerissa Reveil, MS**; *Justin Poklis, BS*; *Matthew S. Halquist, PhD*; *Michelle Peace, PhD*
- 9:15 AM – 9:30 AM **B154** **The Nanogram Level Detection of Five Illicit Drugs Using the Ion Mobility Spectrometer: A Field-Testing Report**
*John Wang, PhD**; *Rong Zhang, PhD*

CRIMINALISTICS

- 9:30 AM – 9:45 AM **B155** **A Quantitative Determination of Four Designer Benzodiazepines by High-Performance Thin-Layer Chromatography (HPTLC)**
Isabella Iorio, BS; Thomas Brettell, PhD; Marianne Staretz, PhD; Matthew Wood, PhD*
- 9:45 AM – 10:00 AM **B156** **The Separation of Lysergic Acid Diethylamide (LSD) and its Analogs by High-Performance Thin-Layer Chromatography (HPTLC)**
Tori Schaffer, BS; Sandra Rodriguez-Cruz, PhD; Jeanne Berk, PhD; Thomas Brettell, PhD*
- 10:00 AM – 10:15 AM **B157** **The Conversion of Cannabidiol to Delta-9-Tetrahydrocannabinol (delta-9-THC) During Gas Chromatography/Mass Spectrometry (GC/MS) Analysis**
Sarah Shuda, MSFS; Barry Logan, PhD*
- 10:15 AM – 10:30 AM **B158** **The Utility of Flip-Flop Chromatography Employing Silica Hydride Stationary Phases With Diode Array Ultraviolet and Single Quadrupole Mass Spectrometric Detection for the Analysis of Seized Drugs**
Volda Appia-Kusi, BS; Ira Lurie, PhD*
- 10:30 AM – 10:45 AM **B159** **The Evaluation of Fentanyl and Fentanyl-Related Compounds on United States Paper Currency**
Matthew Hewes, MS; Alex Krotulski, PhD; Donna Papsun, MS; Barry Logan, PhD*
- 10:45 AM – 11:00 AM **BREAK**

Canines and Guns

Moderator: Ann Geisendorfer

Co-Moderator: Carolyn Hudson

- 11:00 AM – 11:15 AM **B160** **The Chemical Analysis of the Surface Building Collapse Samples: Updating Decontamination Protocols for Search and Rescue Canines**
Michelle Karpinsky, BS; Lauryn DeGreeff, PhD; Erin Perry, MS, PhD*
- 11:15 AM – 11:30 AM **B161** **The Development of a Safe Canine Training Aid Mimic for Fentanyl**
Leann Forte, MS; Howard Holness, PhD; Kenneth Furton, PhD; Lauryn DeGreeff, PhD*
- 11:30 AM – 11:45 AM **B162** **A Two-Step Method for the Identification and Highly Specific Analysis of Organic Gunshot Residue Using Raman and Laser-Induced Breakdown Spectroscopies**
Igor Lednev, PhD; Shelby Khandasammy, BS; Lenka Halamkova, PhD; Matthieu Baudelet, PhD*
- 11:45 AM – 12:00 PM **B163** **Sourcing Glass Traces on Bullets as Additional Evidence for Shooting Reconstruction**
Crystal Rosales, BS; Gwyneth Gordon, PhD; Kyle Mueller, MS; Maia Nguyen, MPS; Shirly Montero, PhD*
- 12:00 PM – 1:00 PM **BREAK**

Frictin Ridge

Moderator: Claudine Pereira

Co-Moderator: Robin Ruth

- 1:00 PM – 1:15 PM **B164** **The Critical Evaluation of Various Classification Systems of Lip Prints**
Mukesh Thakar, PhD; Jagmeet Kaur, MSc*
- 1:15 PM – 1:30 PM **B165** **The Development of Latent Fingerprints on a Cigarette Using Ruthenium Tetroxide**
Young-Il Seo, MS; Jiho Seo, MS; Byung-sun Moon, PhD; Nam-Kyu Park, PhD*
- 1:30 PM – 1:45 PM **B166** **Quantitative Measurements for Fingerprint Quality Determination**
Hoyong Yie, ME; Byung-sun Moon, PhD; Nam-Kyu Park, PhD; Young-Il Seo, MS*
- 1:45 PM – 2:00 PM **B167** **The Standardization Process of the Fingerprint Profession: The European Approach**
*Aldo Mattei, PhD, MSc**
- 2:00 PM – 2:15 PM **B168** **The Effect of Smoking, Tobacco Chewing, and Various Pathological Conditions on Lip Prints**
Jagmeet Kaur, MSc; Mukesh Thakar, PhD*
- 2:15 PM – 2:30 PM **B169** **The Discrimination of Smokers and Non-Smokers Based on the Analysis of Fingermarks Using Attenuated Total Reflectance/Fourier Transform Infrared (ATR/FTIR) Spectroscopy and Chemometrics**
Mohamed Amin, MSc; Entesar Al-Hetlani, PhD; Igor Lednev, PhD*
- 2:30 PM – 3:00 PM **BREAK**

Paint, Hair, Fibers, and Tires

Moderator: Agnes Winoker

Co-Moderator: Vincent Villena

- 3:00 PM – 3:15 PM **B170** **The Effect of Elevated Temperatures on the Microscopical Identification of Vegetable Fibers**
*Walter Rowe, PhD**
- 3:15 PM – 3:30 PM **B171** **Optimal Machine Learning Model Selection on Tire Classification**
Amir Alipour Yengejeh, PhD; Larry Tang, PhD; John Lucchi, MS; Matthieu Baudelet, PhD*
- 3:30 PM – 3:45 PM **B172** **Wrestling With the Evaluation of Fiber Evidence: Transfer and Persistence Modeled Through Jiu-Jitsu Activities**
Victoria Lau, MSc; Claude Roux, PhD; Xanthe Spindler, PhD*
- 3:45 PM – 4:00 PM **B173** **A Chemical Approach to Tire Mark Analysis**
John Lucchi, MS; Matthieu Baudelet, PhD*
- 4:00 PM – 4:15 PM **B174** **Image Analysis and Neural Networks Techniques for Hair Examinations**
David H. Funes, MS; Candice Bridge, PhD*
- 4:15 PM – 4:30 PM **B175** **The Microscopical Recognition and Characterization of Pigmented Fibers**
*Kelly Brinsko Beckert, BS, MS; Otyllia Abraham, BS, MS; Ethan Groves, BS; Skip Palenik, BS; Christopher Palenik, MS, PhD**

CRIMINALISTICS

- 4:30 PM – 4:45 PM **B176** **An Analysis of Automotive Paint Layers on Plastic Substrates Using Chemical Imaging Fourier Transform Infrared (FTIR) Microscopy**
James Cizdziel, PhD; Kendall Wontor, MPharm; Carly Clisham, BS*
- 4:45 PM – 5:00 PM **B177** **Combatting Illegal Logging Through the Use of Direct Analysis in Real-Time High Resolution Mass Spectrometry (DART®-HRMS) and Statistical Logarithms**
Mónica Ventura, BS; Samira Beyramysoltan, PhD; Benedetta Garosi, BS; Meghan Appley, PhD; Edgard Espinoza, PhD; Rabi Musah, PhD*
- 5:00 PM – 5:15 PM **B178** **Electrochemical Characterization of Common Cutting Agents in Illicit Drugs**
George Hedlund, BS, Frederique T. Deiss, PhD*

| 7:30 PM – 9:00 PM | L3 | The Quantitation of Fentanyl, P-Fluorofentanyl, and Xylazine in Postmortem Blood by Using Liquid Chromatography/Tandem Mass Spectrometry (LC/MS/MS) <i>Michael Truver, PhD*; Sara Brogan, BS; Amy Kinsey, MS; Jennifer Hoyer, MS; Chris Chronister, PhD; Bruce Goldberger, PhD</i> |
| 7:30 PM – 9:00 PM | L4 | A New Approach for Identifying the Postmortem Formation of Ethanol: The Development and Validation of a Salt-Assisted Headspace/Gas Chromatograph/Flame Ionization Detector (HS/GC/FID) Method for the Determination of Ethanol in Vitreous Humor <i>Giacomo Musile, PhD*; Nicola Pigaiani, MD; Emma Pasetto, BSc; Marco Ballotari, MSc; Federica Bortolotti, PhD; Franco Tagliaro, MD</i> |
| 7:30 PM – 9:00 PM | L5 | Comparing Density Functional Theory (DFT) Calculations and Surface-Enhanced Raman Spectroscopy (SERS) Results to Differentiate Structurally Similar Fentanyl Analogs <i>Sevde Dogruer Erkok, PhDc*; Emily Hernandez, BS*; Bruce McCord, PhD</i> |
| 7:30 PM – 9:00 PM | L6 | The Simultaneous Determination of 24 Designer Benzodiazepines in Hair Using Liquid Chromatography/Tandem Mass Spectrometry (LC/MS/MS) <i>Jongsook Rhee, PhD*; Byungsook Cho, MS; Hyewon Baik, MS; Yujin Park, PhD; Ilchung Shin, PhD; Jihyun Kim, PhD; Sanggil Choe, PhD; Suncheun Kim, PhD; Eunmi Kim, PhD</i> |
| 7:30 PM – 9:00 PM | L7 | Evaluating Cannabinoid Stability in Different Conditions and Validating THC-O and THC-P for Oral Fluid Analysis <i>Cody Passeur, MSFS*; Curt Harper, PhD; Elizabeth Gardner, BS, PhD</i> |
| 7:30 PM – 9:00 PM | L8 | Substance-Related Pediatric Deaths Examined at the West Tennessee Regional Forensic Center: An Analysis of the Past 16 Years <i>Ibrahim Ortanca, MD*; Danielle Harrell, DO</i> |
| 7:30 PM – 9:00 PM | L9 | Is a Subdural a Time Capsule? <i>Brianna Smyth, BS*; Dina Swanson, MS; Julia Pearson, PhD</i> |
| 7:30 PM – 9:00 PM | L10 | The Detection of Ethanol Consumption Markers and Drugs in Urine Samples From Inmates of Two German Prisons <i>Vanessa Thoma, MD*; Anette Franz, MD; Laura Huppertz, BS; Volker Auwärter, MD; Annette Thierauf-Emberger, MD</i> |
| 7:30 PM – 9:00 PM | L11 | Quantitative and Qualitative Analysis of Fentanyl and Its Analogs in Urine Using Disposable Pipette Extraction <i>Dominic Minasi-Tapia, MS*; Ihouma Igwilo, MBBS, MSFS; G. Brent Dawson, PhD; Tara Arends, MS; Michael Baldwin, BA</i> |

TOXICOLOGY

- 7:30 PM – 9:00 PM **L12** **Machine Learning Approaches to Make Data Driven Decisions in Forensic Science Application by Using Fourier Transform Infrared (FTIR) Spectroscopy**
*Bilkis Mitu, PhD**; *Lenka Halamkova, PhD*
- 7:30 PM – 9:00 PM **L13** **The Analysis of Depressants and Psychedelic Drugs From Vitreous Humor Using Liquid-Liquid Extraction (LLE) and High-Performance Thin-Layer Chromatography (HTPLC) Plates**
*Neha Afaria, PhD**; *Ashok Kumar Jaiswal, PhD*
- 7:30 PM – 9:00 PM **L14** **Comparing the Performance of Liquid Chromatography/Triple Quadrupole/Mass Spectrometry (LC/QqQ/MS) vs. Liquid Chromatography/Quadrupole Time-Of-Flight/Mass Spectrometry (LC/QTOF/MS) for Targeted Analysis of NPS With a Test Mixture of 40 New Psychoactive**
*Rebecca Smith, MS**; *Anthony DeCaprio, PhD*; *Anamary Tarifa, PhD*
- 7:30 PM – 9:00 PM **L15** **Evaluating Cannabidiol (CBD) for Potential Interference in Six Commercial Homogeneous Cannabinoid Urine Screening Kits**
*Ashley Pokhai, BA**; *Justin Poklis, BS*; *Grace Williams, PhD*; *Carl Wolf, PhD, MS*
- 7:30 PM – 9:00 PM **L16** **The Revival of Opioids Among Young People: An Overview on Toxicological, Epidemiological, and Social Aspects**
Simona Nicoli, MD; *Cristina Caterino, MD*; *Marcello Benevento, MD*; *Giampiero Bottari, MD*; *Francesco Clemente, MD*; *Francesco Carravetta, MD*; *Biagio Solarino, PhD**
- 7:30 PM – 9:00 PM **L17** **A Combined Death by Food Aspiration and Acute Citalopram Intoxication**
*Pietro Zuccarello, PhD**; *Giulia Carnazza, Msc*; *Francesco Sessa, MS, PhD*; *Monica Salerno, MD, PhD*; *Cristoforo Pomara, MD*; *Nunziata Barbera, MD*
- 7:30 PM – 9:00 PM **L18** **Donepezil Concentrations in Postmortem Toxicology**
*Jolene Bierly, MSFS**
- 7:30 PM – 9:00 PM **L19** **The Development of an Extraction Method for the Analysis of Synthetic Opioids in Bone Samples Using the Bead Ruptor**
*Kala Babb, BS**; *David Cohen, MD*; *Justin Poklis, BS*; *Emanuele Alves, PhD*
- 7:30 PM – 9:00 PM **L20** **The Chemical Characterization of Cannabidiol-Based Products Using Attenuated Total Reflectance/Fourier Transform Infrared (ATR/FTIR), Gas Chromatography/Mass Spectrometry (GC/MS) and Gas Chromatography/Tandem Mass Spectrometry (GC/MS/MS)**
*Eduardo De Campos, PhD**; *Dehlia Lang, BS**
- 7:30 PM – 9:00 PM **L21** **A Report of Isolated Para-Fluorofentanyl Deaths in Allegheny County, Pennsylvania**
*Courtney Healy, DO**; *Todd Luckasevic, DO*; *Jennifer Janssen, BS, MS*; *Ariel Goldschmidt, MD*; *Karl Williams, MD, NPH*
- 7:30 PM – 9:00 PM **L22** **Color Me Stable: Choosing an Adequate Blood Collection Tube for Venous Blood Toxicological Analyses**
Gabrielle Daigneault; *Anabelle Carbonneau, BSc*; *Elizabeth Charron, BSc*; *Genevieve Dube, BSc*; *Stephanie Savard*; *Brigitte Desharnais, PhD*; *Edith Viel, BSc*; *Alexandra Doyon, MSc**; *Souryvanh Nirasay, PhD*; *Pascal Mireault, MSc*
- 7:30 PM – 9:00 PM **L23** **Solid Phase Extraction of Novel Synthetic 2-Benzylbenzimidazole Opioid Compounds: "Nitazenes"**
*Emily Eng, MSFS**; *Stephanie Reichardt, MSFS**

TOXICOLOGY

- 7:30 PM – 9:00 PM **L24** **The Quantitative Analysis of Cadmium in Blood Using Flame Atomic Absorption Spectrometry (FAAS)**
*Jatin Kumar Drall**; Ashok Kumar Jaiswal, PhD; Ajay Kumar Kataria, MTech
- 7:30 PM – 9:00 PM **L25** **The Evaluation of Spontaneous Overtime Methaemoglobin Production in Postmortem Blood Samples From Real Cases in Critical Storage Conditions for an Application in Cases of Suspected Nitrate Poisoning**
*Sara Gariglio, BS**; Maria Chiara David, PhD; Alessandro Mattia, MS; Matteo Scopetti, MD; Alessandro Santurro, MD, PhD; Stefano D’Errico, MD, PhD
- 7:30 PM – 9:00 PM **L26** **A New Assay for Phosphatidylethanol (PEth) in Blood Via Gas Chromatography/Electron Impact/Mass Spectrometry (GC/EI/MS)**
*James DeFrancesco, PhD**
- 7:30 PM – 9:00 PM **L27** **Death Following the Accidental Ingestion of E-liquid**
*Mihaela Georgieva, MD**; Martin Angelov, MD; Kamen Peev, MD; Iliana Brainova, MD, PhD; Verzhiniya Stefanova, MD; Alexandar Alexandrov, MD, PhD; Metodi Goshev, MD, PhD; Biliana Mileva, MD; Lorenzo Gitto, MD; Vesela Ivanova, MD, PhD; Tihomir Dikov, MD; Vasil Atanasov, MD, PhD
- 7:30 PM – 9:00 PM **L28** **The Evaluation of the Cross-Reactivity of Cannabidiol (CBD), Delta-Tetrahydrocannabinols (Delta-THCs), Olivetol, and Metabolites in Whole Blood Using a THC Enzyme-Linked Immuno-Sorbent Assay (ELISA) Kit**
*Carl E. Wolf, PhD**; Jade Smith, BS; Grace Williams, PhD; Emanuele Alves, PhD; Justin Poklis, BS
- 7:30 PM – 9:00 PM **L29** **A Review of Illicit Substances Detected in Homicidal Deaths in Memphis, Tennessee, Over a Three-Year Period**
*Latifah Ahmad, BS**; Danielle Harrell, DO
- 7:30 PM – 9:00 PM **L30** **WITHDRAWN**
- 7:30 PM – 9:00 PM **L31** **The Development of New Solvent Systems for the Analysis of Clonazepam in Blood Using High-Performance Thin-Layer Chromatography (HPTLC) Plates**
*Naagar Sunil, MD**; Rohit Kanojia, PhDc
- 7:30 PM – 9:00 PM **L32** **The Analysis of Vitreous Humor: Enhanced Toxicological Testing Potential in Postmortem Examination**
*Jennifer Vosters, BS**; Noelle Fukuda, BS*; Tiffany Hangse, BA*; Rubie Villela, BS; Prentiss Jones, Jr., PhD
- 7:30 PM – 9:00 PM **L33** **The Generation of Methamphetamine From Amphetamine by N-Methyltransferase in Human Cytosol: Implications for Therapeutic Amphetamine Patients**
*Abby Veaser, MSFS**; Robert Powers, PhD
- 7:30 PM – 9:00 PM **L34** **Molecular Dynamics Simulations of Novel Synthetic Opiates Binding to the Opioid Receptors (ORs)**
*Uzoma Okafor, PhD**
- 7:30 PM – 9:00 PM **L35** **The Detection of Δ^9 -Tetrahydrocannabinol (THC) in Oral Fluid Using the Fast Blue BB (FBBB) Test**
*Roberta Gorziza, PhD**; Nicole Valdes, MS; Marilyn Tinoco, MS; Jose Almirall, PhD

TOXICOLOGY

- 7:30 PM – 9:00 PM **L36** **The Elution and Recovery of Cannabinoids From an Impaction Filter Device**
*Jennifer Berry, PhD**; *Kavita Jeerage, PhD*; *Mary Gregg, PhD*; *Cheryle Beuning, PhD*
- 7:30 PM – 9:00 PM **L37** **The Characterization of Spice Products: Barely Legal, Voodoo Child, Brainstorm and Their Effects on Human A549 Lung Cells**
*Oluseyi Vanderpuye, PhD**; *Miron Gilbert, PhD*
- 7:30 PM – 9:00 PM **L38** **A Sip of Blue Wine: Fatal Intoxication by Dimethoate**
*Andrea Costantino, MD**; *Giacomo Visi, MD*; *Julia Lazzari, MD*; *Fabio Stefanelli, PhD*; *Silvio Chericoni, PhD*; *Marco Di Paolo, MD*

Thursday

Annual Lectureship in Toxicology

8:15 AM – 8:30 AM **Welcome and Introductions**

8:30 AM – 9:30 AM **Annual Lectureship in Toxicology**
Karen McDonald, MS
Lead for Toronto's Drug Checking Service
Centre on Drug Policy and Evaluation

Moderator: Diane Boland

Co-Moderator: Dayong Lee

9:30 AM – 10:00 AM **L39** **Standards Development Activities in Forensic Toxicology**
*Marc LeBeau, PhD**

10:00 AM – 10:15 AM **L40** **2021 National Forensic Laboratory Information System (NFLIS) Toxicology Laboratory Survey Findings**
*DeMia Pressley, MS**; *BeLinda Weimer, MS*; *David Heller, BS*; *Jeffrey Ancheta, BS*; *Neelima Kunta, BS*; *Kelly Keyes, BS*; *Megan Grabenauer, PhD*; *Katherine Bollinger, MS*; *Hope Smiley-McDonald, PhD*; *Jeri Roper-Miller, PhD*

10:15 AM – 10:30 AM **BREAK**

Novel Psychoactive Substances

Moderator: Alex Krotulski

Co-Moderator: Donna Papsun

10:30 AM – 10:45 AM **L41** **The Continually Expanding World of Designer Benzodiazepines**
*Donna Papsun, MS**; *Alex Krotulski, PhD*; *Barry Logan, PhD*

10:45 AM – 11:00 AM **L42** **Mixed Intoxications Involving the Novel Synthetic Opioids Methoxyacetylfentanyl and U-47700: A Study of Three Cases**
*Arianna Giorgetti, MD**; *Giorgia Franchetti, MD*; *Rebecca Pircher-Berchtold, MD*; *Markus Große Perdekamp, MD*; *Stefan Pollak, MD*; *Susi Pelotti, MD*; *Volker Auwärter, MD*

11:00 AM – 11:15 AM **L43** **Phase I Metabolism of New Psychoactive Substances Via Alternative In Vitro Methods**
*Leonardo Maya, MS**; *Anthony DeCaprio, PhD*

TOXICOLOGY

- 11:15 AM – 11:30 AM **L44** **N-Pyrrolidino Etonitazene: A Newly Emerging Nitazene Compound in the Synthetic Opioid Landscape**
*Amanda Hersh, MD**; *Meredith Frank, MD*; *James Caruso, MD*; *Ian Puffenberger, MD*;
Sterling McLaren, MD; *Daniel Anderson, MS*
- 11:30 AM – 11:45 AM **L45** **Temperature and pH-Dependent Stability: Identifying Fentanyl Degradation Pathways**
*Madison Schackmuth, BS**; *Sarah Kerrigan, PhD*
- 11:45 AM – 1:00 PM **BREAK**

Multidisciplinary Session: Pathology/Biology and Toxicology

Moderator: *Tracy Halvorson*

Co-Moderator: *Kristin Kahl*

- 1:00 PM – 1:15 PM **L46** **An Unusual Case of Misrepresented Cocaine Powder That Resulted in Fatal and Non-Fatal Intoxications Involving the Novel Synthetic Opioid Etodesnitazene**
*Alex Krotulski, PhD**; *Stephany Fiore, MD*; *Daniel Anderson, MS*; *Sara Walton, MS*;
Brianna Peterson, PhD; *Donna Papsun, MS*; *Joshua DeBord, PhD*; *Barry Logan, PhD*
- 1:15 PM – 1:30 PM **L47** **I Believe I Can Fly: Hallucinogenic/Psychedelic Drugs Found in Fall-From-Height Cases in Miami-Dade County, Florida**
*Marissa Finkelstein, MS**; *George Hime, MS*; *Diane Boland, PhD*
- 1:30 PM – 1:45 PM **L48** **Synthetic Cannabinoids Adulterated With Brodifacoum—Part II: The Florida Experience**
*Robert Middleberg, PhD**; *Justin Arnold, DO, MPH*; *Alexandra Funk, PharmD*
- 1:45 PM – 2:00 PM **L49** **Adverse Effects of Veterinary Pharmaceuticals as Toxic Adulterating Agents in Illicit Drug Deaths**
*Barry Logan, PhD**; *Alex Krotulski, PhD*; *Amanda Mohr, MS*; *Thom Browne, Jr., MA*
- 2:00 PM – 2:15 PM **L50** **A Compilation of Postmortem Vitreous Fluid Data for Pediatric Cases**
*Breanne Vance, BA**; *Kari Midthun, PhD*; *Jennifer Swatek, MS*; *Fabio Oldoni, PhD*
- 2:15 PM – 2:30 PM **L51** **Postmortem Formation of Ethanol: Is N-Propanol a Reliable Marker? A Proof-of-Concept Study Using a Real-Environment Experimental Set-Up**
*Nicola Pigaiani, MD**; *Giacomo Musile, PhD*; *Francesco Ausania, MD, PhD*; *Daniel Dye, MD*;
Gregory Davis, MD; *Franco Tagliaro, MD*; *Antonio Oliva, MD, PhD*; *Federica Bortolotti, PhD*
- 2:30 PM – 2:45 PM **L52** **A Quantitative Analysis of Fentanyl and Major Metabolites From Empty Puparia and Adult Blow Flies Via QuEChERS Extraction and Liquid Chromatography/Tandem Mass Spectrometry (LC/MS/MS) Analysis**
*Joseph Cox, PhD**; *Katherine Davis*; *Kylea Morris, BS*; *Rachel Mohr, PhD*; *Joseph DeTondo, DO*;
Luis Arroyo, PhD
- 2:45 PM – 3:00 PM **L53** **Toxicology Laboratory Findings From the 2018 Census of Medical Examiner and Coroner Offices**
*Jeri Ropero-Miller, PhD**; *Hope Smiley-McDonald, PhD*; *Katherine Bollinger, MS*
- 3:00 PM – 3:15 PM **BREAK**

TOXICOLOGY

Moderator: Marissa Finkelstein

Co-Moderator: Susan Ely

- 3:15 PM – 3:30 PM **I71** **An Alleged Patricide by Americium-241 Poisoning**
*Wendy Gunther, MD**
- 3:30 PM – 3:45 PM **I72** **Fatal Butane Acute Intoxication in Custody—Pitfalls and Recommendations: An Analysis of Six Cases**
Michela Peruch, BS; Luigi Cipolloni, MD; Stefania De Simone, MD; Maria Chiara David, PhD; Monica Concato, BS; Martina Zanon, BS; Riccardo Addobbati, BS*
- 3:45 PM – 4:00 PM **I73** **Death as a Consequence of Cardiorespiratory Arrest Caused by a Cocaine-Induced Generalized Seizure: Toxicological Data in a Case Report**
Isabella Mercurio, MD; Laura Panata, MD; Michela Ferrara, MD; Mauro Bacci, MD; Cristina Gambelunghe, MD; Massimo Lancia, MD*
- 4:00 PM – 4:15 PM **I74** **Sodium Nitrite Poisoning: A Case Series of an Emerging Suicide Mechanism**
Ethan Blocher-Smith, MS, DO; Elizabeth Douglas, MD; Joseph Prahlow, MD*
- 4:15 PM – 4:30 PM **I75** **The Use of Over-the-Counter Tests to Detect Pregnancy in Postmortem Urine and Vitreous Fluid**
Marianne Hamel, MD, PhD; Andrew Falzon, DM*

Friday

Drugs and Driving Special Session

Moderator: Jennifer Limoges

Co-Moderator: Tim Rohrig

- 8:30 AM – 8:45 AM **L54** **Acute Psychotic Episodes in Impaired Driving Cases Involving Tetrahydrocannabinols ($\Delta 8$ and $\Delta 9$)**
*Nicholas Tiscione, MS**
- 8:45 AM – 9:00 AM **L55** **Drug Testing and Traffic Safety: What You Need to Know**
Amy Berning, MA, PhDc; Ryan Smith, PhD; Kathryn Wochinger; Morgan Drexler, MPH*
- 9:00 AM – 9:15 AM **L56** **1,1-Difluoroethane in Driving Under the Influence (DUI) Cases—Intoximeter® DMT Dual Sensor and Draeger Alcotest 7110 Aiding Officers in Inhalant Cases**
Jasmine Maxwell, MSFS; Greg Turner, PhD; Curt Harper, PhD*
- 9:15 AM – 9:30 AM **L57** **A Standardized Method for Analyzing Toxicology Data in Drugged Driving Research**
Ryan Smith, PhD; Mary Pat McKay, MD, MPH; Jana Price, PhD*
- 9:30 AM – 9:45 AM **L58** **Impaired Driving Drug Trends and Stop Limit Testing Evaluation**
Grace Cieri, BS; Amanda Mohr, MS; Melissa Fogarty, MSFS; Barry Logan, PhD*
- 9:45 AM – 10:00 AM **L59** **α -Pyrrolidinoisohexanophenone (α -PiHP) in Driving Under the Influence (DUI) Cases**
Kristin Kahl, MS; Lisa Reidy, PhD*
- 10:00 AM – 10:15 AM **L60** **Blood Alcohol Concentration and Road Accidents—A Significant Underestimation Due to Delay in Blood Sampling: A Four-Year Retrospective Study in Rome**
Giovanni Aulino, MD; Nadia De Giovanni, PhD; Gianluca Lentini, MD; Giuseppe Vetrugno, MD; Sabina Strano-Rossi, MD; Marcello Covino, MD; Francesca Cittadini, MD*
- 10:15 AM – 10:30 AM **BREAK**

TOXICOLOGY

General Toxicology

Moderator: *Jasmine Maxwell*

Co-Moderator: *Michael Wagner*

- 10:30 AM – 10:45 AM **L61** **Oxycodone Pharmacokinetics in Whole Blood After a Single Dose of Immediate and Controlled Release Formulations**
*Gerd Jakobsson, MSc**; *Michael Truver, PhD*; *Maria Cherma, PhD*; *Madeleine Swortwood, PhD*; *Henrik Green, PhD*; *Robert Kronstrand, PhD*
- 10:45 AM – 11:00 AM **L62** **The Extraction and Quantification of Toxic Heavy Metals From Calliphoridae Larvae**
*Daniela Bermeo Grajales**; *Stephanie Urias*; *Cathleen Doherty, PhD*; *Denise Gemmellaro, PhD**
- 11:00 AM – 11:15 AM **L63** **A Cost Benefit Analysis of High Resolution Mass Spectrometry (HRMS) -Based Drug Screening in Forensic Toxicology**
*Jessica Ayala, PhD**; *Sarah Kerrigan, PhD*
- 11:15 AM – 11:30 AM **L64** **Assessing Relative Levels of Ionic and Non-Ionic Binding of Drugs and Metabolites in Authentic Hair Reference Material (HRM)**
*Brianna Spear, MS**; *Anthony DeCaprio, PhD*
- 11:30 AM – 11:45 AM **L65** **Toxicological Surveillance of Clinical Patients Presenting to the Emergency Department After Suspected Opioid Overdoses: Geographical Trends and Impacts on Forensic Toxicology**
*Sara Walton, MS**; *Alex Krotulski, PhD*; *Alex Manini, MD, MS*; *Lindsey Domonoski, BS*; *Alyssa Reyes, BS*; *Barry Logan, PhD*
- 11:45 AM – 1:00 PM **BREAK**

Special Session—Pediatric Toxicology

Moderator: *Robert Middleberg*

Co-Moderator: *Nikolas Lemos*

- 1:00 PM – 5:00 PM **L66** **The 22nd Annual Postmortem Pediatric Forensic Toxicology Session**
*Robbert A. Middleberg, PhD**; *Nikolas Lemos, PhD**; *Andrew Baker, MD**; *Christopher Milroy, MD, LLB**; *Brianna Peterson, PhD**; *Kari Midthun, PhD**; *Jennifer Swatek, MS**

LAST WORD SOCIETY

Thursday

Moderator: *Kenneth E. Melson*

Co-Moderator: *Barry A.J. Fisher, MS, MBA*

YFSF POSTER SESSION

Friday

Anthropology

- 11:30 AM – 1:00 PM **Y1** **A Test of a Newly Revised Age-at-Death Method for the Auricular Surface of the Ilium**
*Frankey Leggio**; *Krista Bennett, MA*
- 11:30 AM – 1:00 PM **Y2** **Growth of the Juvenile Talus: A Pilot Study in Age-at-Death Estimation**
*Rebecca Reid, MSc**

Criminalistics

- 11:30 AM – 1:00 PM **Y3** **Accuracy of DNA Phenotyping Using Next Generation Sequencing**
*Paige Aymar, BA**; *Lisa Ludvico, PhD*; *Pamela Marshall, PhD*
- 11:30 AM – 1:00 PM **Y4** **Analysis Methods of Ephedra and Related Compounds in Web of Science (WOS) Between 1980-2022: A Systematic Review and Meta-Analysis**
*Nurdan Sandikci, MSc**; *Sevil Atasoy, PhD*
- 11:30 AM – 1:00 PM **Y5** **Analysis of the Inorganic Components of Eyeshadows by XRD and SEM-EDS**
*Alexandra Mahler**; *Anna Duggar, PhD*
- 11:30 AM – 1:00 PM **Y6** **Biometrics From Human Hair Using Gas Chromatography-Isotope Ratio Mass Spectrometry of Ethyl Chloroformate Derivatives of Amino Acids**
*Erica Maney, MS**; *Glen Jackson, PhD*
- 11:30 AM – 1:00 PM **Y7** **Detection of Ignitable Liquid Residues Using Crime-lite® AUTO**
*Kaylee Morton, BS**; *Kimberly Kunkler, PhD*; *Lauren Richards-Waugh, PhD*; *Mathew Winters, AS*
- 11:30 AM – 1:00 PM **Y8** **The Use of Portable Capillary Liquid Chromatography With Dual Silica Hydride Stationary Phases and Dual Ultraviolet Wavelength Detection for the Analysis of Synthetic Cathinone Positional Isomers**
*Wyonna Tran, BS**; *Ira Lurie, PhD*

General

- 11:30 AM – 1:00 PM **Y9** **Assessing Genetic Diversity Between Wild and Captive Turkeys (*Meleagris gallopavo*) in Pennsylvania**
*Savannah Nguyen, BA**; *Lyndsie Ferrara, PhD*; *Lisa Ludvico, PhD*
- 11:30 AM – 1:00 PM **Y10** **Comparative Extraction and Identification of Illicit Compounds From Baked Edibles Using Paper Spray Ionization–Tandem Mass Spectrometry and Liquid Chromatography–Triple Quadrupole–Mass Spectrometry**
*Isabella Haberstock, BS**; *Lyndsie Ferrara, PhD*; *Michael Van Stipdonk, PhD*; *Hannah Zimmerman-Federle, MS*
- 11:30 AM – 1:00 PM **Y11** **Development of a Conserved Semenogelin I and II Epitope for Semen Identification With Respect to Allelic Variation**
*William Gibbs, BS**; *Michael Jensen-Seaman, PhD*; *Pamela Marshall, PhD*; *Elizabeth Wisbon, BS, MS*

YFSF POSTER SESSION

- 11:30 AM – 1:00 PM **Y12** **eDNA Detection of *Lycorma Delicatula* Using Multiple Types of Forensic Swabs via STR Analysis**
*Maeve Picariello, BA**; *Bryan Delius, PhD*; *Jay Losiewicz, MA*; *Lisa Ludvico, PhD*
- 11:30 AM – 1:00 PM **Y13** **Examining Differences in Exonerations Across the United States**
*Alexys Karl, BA**; *Joshua Ellsworth, PhD*; *Lyndsie Ferrara, PhD*; *Stephanie Wetzel, PhD*
- 11:30 AM – 1:00 PM **Y14** **Identification of Race Through Chemical Analysis of Latent Fingerprints**
*Brynn Myers, BS**; *Mark McCoy, EdD*; *Caitlin Porterfield, MS*
- 11:30 AM – 1:00 PM **Y15** **Revisiting the CSI Effect: Has the Popularity of Crime Media Changed Anything?**
*Elizabeth Diltz, BA**; *Lyndsie Ferrara, PhD*; *Bobbi Jo Wagner, JD*; *Sara Walker, MSFS*
- 11:30 AM – 1:00 PM **Y16** **Streamlining the Extraction and Quantification of Synthetic Cathinone in Oral Fluid by Means of Solid-Phase Extraction (SPE) and LC-MS/MS Analysis**
*Jacob Katsafanas, BA**; *Pamela Marshall, PhD*; *Mandy Tinkey, MS*; *Stephanie Wetzel, PhD*
- 11:30 AM – 1:00 PM **Y17** **The Development of a Central Mammalian Fur Database**
*Hailey Adamik, BS**
- 11:30 AM – 1:00 PM **Y18** **Visual Diagnostics for Cartridge Case Impression Evidence**
*Joseph Zemmels, MS**; *Heike Hofmann, PhD*; *Susan VanderPlas, PhD*

Jurisprudence

- 11:30 AM – 1:00 PM **Y19** **America's Court System Through the Lens of a Pandemic: The Past, Present, and Future Adaptations**
*Julianna Firek, BA**; *Lyndsie Ferrara, PhD*
- 11:30 AM – 1:00 PM **Y20** **Understanding the Use of Forensic Evidence at Trial: A Case Study of Criminal Trials in Ohio**
*Philip O'Sullivan, MS**; *Emily Hughes, JD, MA*; *Kori Khan, PhD, JD*

Pathology/Biology

- 11:30 AM – 1:00 PM **Y21** **Internal Validation of a Modified Procedure for the DNA Collection From Fired Cartridge Casings**
*Jordan Bowman, BS**; *Kelly Beatty, MSFS*; *Jessica Skillman, BS*
- 11:30 AM – 1:00 PM **Y22** **Splenic Rupture: An Unusual Presentation of Ehlers-Danlos Syndrome With Genetic Confirmation**
*Megan Schultz**; *Daniel Schultz, MD*
- 11:30 AM – 1:00 PM **Y23** **The Effect of Motor Oil on the Attraction of Forensically Important Diptera in Toco, Trinidad**
*Alyssa Teixeira**; *Adrienne Brundage, PhD*; *Kevin Conway, PhD*; *Ryan Mohammed, PhD*
- 11:30 AM – 1:00 PM **Y24** **The Impact of Sunscreen on the Attractancy of Forensically Important Flies in Toco, Trinidad**
*Macy Strain**; *Adrienne Brundage, PhD*; *Kevin Conway, PhD*; *Ryan Mohammed, PhD*
- 11:30 AM – 1:00 PM **Y25** **The Value of the Autopsy: Considerations on Questions Regarding Drug Toxicity**
*Victoria Sanchez, MS**; *Daniel Schultz, MD*

YFSF POSTER SESSION

- 11:30 AM – 1:00 PM **Y26** **Validation for Plate Setup on the QIAgility Instrument Using the Plexor HY Quantitation Kit and GlobalFiler™ Amplification Kit**
*Madison Davenport, BS**; *Kelly Beatty, MSFS*; *Jessica Skillman, BS*
- 11:30 AM – 1:00 PM **Y27** **Comparing Insanity Defense Evidence: Psychiatric Assessments vs Neuroimaging**
*Kaitlyn Svencer**; *Lyndsie Ferrara, PhD*; *Jane Moriarty, JD, MA*

Toxicology

- 11:30 AM – 1:00 PM **Y28** **The Determination of Hair Growth Rates in Various Anatomical Regions From a Student Campus Population**
*Samantha Deibel, BS**; *Heather Harris, MFS, JD*; *Sherri Kacinko, PhD*; *Karen Scott, PhD*
- 11:30 AM – 1:00 PM **Y29** **The Evaluation of Novel Psychoactive Substance Drug Loss From Storage in Serum Separator Tubes**
*Devin Kress, BS**; *Melissa Fogarty, MSFS*; *Heather Harris, MFS, JD*; *Barry Logan, PhD*

FINANCIAL DISCLOSURE

As a sponsor of continuing education, the American Academy of Forensic Sciences (AAFS) must ensure balance, independence, objectivity, and scientific rigor in all its educational activities. All faculty participating in a sponsoring activity are expected to disclose any significant financial interest or other relationship: (1) with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services discussed in an educational presentation; and (2) with any commercial supporters of the activity. (Significant financial interest or other relationships can include such things as grants or research support, employee, consultant, major stockholder, member of speaker's bureaus, etc.) AAFS has an established policy regarding conflicts of interest that includes decisions the Program Committee members may make in selecting content for the Annual Scientific Meeting Program. By serving on the committee, regardless of the role, each member has agreed to comply with Section 1.4.7. of the AAFS *Policy and Procedure Manual*.

To serve on the 2022–23 Program Committees, it is required that relevant AAFS staff members, program committee members, and/or reviewers complete a Financial Disclosure Form before being provided access to review submissions for the program. For continuing education accreditation purposes, the disclosed relationships are published below so learners are aware of the nature of any relationships that may impact the selection of presentations for the program. If a committee member failed to provide complete disclosure of a relevant financial interest or relationship, the committee member or reviewer was not allowed to serve. The executed Faculty Disclosure Forms are on file in the AAFS Office.

AUTHOR FINANCIAL DISCLOSURE

As an accredited provider of Continuing Medical Education, the American Academy of Forensic Sciences requires speakers to disclose any real or apparent conflict of interest they may have related to the content of their presentation(s). The existence of commercial or financial interest of authors related to the subject matter of their presentation(s) should not be construed as implying bias or decreasing the value of their presentation(s). However, disclosure should help participants form their own judgments. AAFS and the Program Committee review the submissions to ensure that the content is educational and not a commercial presentation for companies and their products. Participants may notify AAFS by email (abstracts@aafs.org) should any presentation be considered solely a commercial endorsement presentation. Notification should include presentation number/ID (e.g., BS10, E100, W30) and speaker name.

If an author failed to provide complete disclosure of the discussion of commercial products, a relationship with the manufacturer including employee/employer relationship, sources of support for the research project, and/or the discussion of unlabeled or unapproved uses of pharmaceuticals/medical devices, the presentation was not accepted. Authors are required to disclose at the beginning of each presentation any information disclosed and listed below. Copies of the executed disclosure forms are kept on file in the AAFS office.

The following presenting authors have disclosed financial relationships with commercial entities.

PRESENTING AUTHOR INDEX

The presenting author index can provide a quick reference to find when and in what section presenting authors are scheduled to present at the 2022 Annual Scientific Conference. The reference table below assists you in finding the section in which the presentation will be given. Letters correspond to the scientific discipline/section in which the presentation is being made while the number corresponds to the numerical sequence of the presentation within the section.
