

# Introduction to the Canon imagePROGRAF GP Series

---

# Expanding the imagePROGRAF Line

A NEW series of printers: The GP Series are the *World's First Large Format Printers with Fluorescent **Pink** Aqueous Pigment Ink!*

The imagePROGRAF GP Series offers high value-added output for graphics applications

Color that **pops** like never before!

10-color plus Fluorescent Pink Ink

- 24" GP-2000
- 44" GP-4000

5-color plus Fluorescent Pink Ink

- 24" GP-200
- 36" GP-300

**Canon**

# GP-2000/4000 Ink Configuration

The newly developed **Red, Orange, Green & Violet** ink combination helps expand the range of color reproduction to achieve the largest color gamut in the history of the imagePROGRAF line-up

**Black, Matte Black, Cyan, Magenta, Yellow, Gray**

Fluorescent **Pink** Ink  
Increase Color Gamut + Fluorescent Pink Color

- ✓ 10-Color Plus Pigment Based Fluorescent Pink Ink
- ✓ These printers support *Radiant Infusion* for Vibrant, Eye-Popping Output
- ✓ Widest Color Gamut of any imagePROGRAF Printer
- ✓ Available Ink Tank Sizes of 160ml, 330m, and 700ml

# GP-200/300 Ink Configuration

Black, Matte Black, Cyan, Magenta, Yellow

Fluorescent **Pink** Ink

- ✓ 5-Color Pigment Based Plus Fluorescent Pink Ink
- ✓ These printers support *Radiant Infusion* for in-house production of large format prints with increased appeal and visibility
- ✓ Available Ink Tank Sizes of 130ml and 300ml

# Radiant Infusion Technology

**“Radiant Infusion”, a unique Canon technology, layers the **Fluorescent Pink Ink** with other inks on the paper surface during printing, to create bright and soft color reproduction.**

- ✓ This allows for the printing of high color graphics that support the expansion of a business’s printing capabilities.
- ✓ These GP Series inks can replicate the colors that represent one’s corporate brand that can be difficult to reproduce on a conventional inkjet printer.
- ✓ The Radiant Infusion technology is integrated into PosterArtist Lite software to allow users to create high impact posters easily.

# Positioning of the New GP Series

## PRO Series

Innovative photo quality.  
Highest level of black and glossiness required for photo art.

**11 Color +  
Chroma Optimizer**

Highest image quality  
achieved with  
imagePROGRAF

**Best Photo Quality  
Model**

**8 Color**

Achieves high-speed  
printing while  
maintaining high  
image quality

**High Productivity  
Model**

## GP Series

New standard for graphic posters.  
Unique ink set in the marketplace.

**10 Color +  
Fluorescent Pink Ink**

High PANTONE coverage  
has been achieved  
with Fluorescent Pink Ink

**Ultra Wide Color Gamut,  
largest in  
imagePROGRAF line**

**5 Color +  
Fluorescent Pink Ink**

Compact units with  
Fluorescent Pink Ink

**Premium  
Poster Model**

## TZ/TX/TM/TA Series

Achieving both high productivity  
and usability required for CAD and  
high color poster output.

**5 Color**

Offering production to entry level devices for  
optimal performance

**TZ TX TM TA**

**CAD  
Production  
Model**

**CAD  
High-End  
Model**

**CAD  
Mid-Range  
Model**

**CAD  
Entry Level  
Model**

# Market Opportunities

		General companies Office Schools Government offices 	In-House Poster (For announcement)	In-House Designer General user		

# Market Trends

## Environment surrounding posters and graphics - U.S. consumer actions influenced by poster ads

- ✓ 40% of people who see a poster goes to the product's website

## Color is a key determinant of people when making purchasing decisions:

- ✓ Approx. 85% of people choose products based on color\*
- ✓ Consumers unconsciously make judgments in the first 90 seconds when they see a product

## Poster Creation Sites/Software:

- ✓ Increasing in popularity as more people are choosing to bring these services in-house. The demand for a simple poster creation software is high.

## New Resurgence of Fluorescent Colors:

- ✓ Number of vertical graphics applications have the need for fluorescent colors. (pop art, wall décor, fashion/apparel, celebrations, influencers/Gen Z, etc.)

# Color In Our Daily Lives

Color is very much prevalent in print design, to create décor such as:

- ✓ Colorful Birthday Cards
- ✓ Party Themes
- ✓ Sweet 16 Parties
- ✓ T-Shirt Designs
- ✓ Badges
- ✓ Calendars
- ✓ Posters
- ✓ Canvas
- ✓ Packaging

# Features

The new GP-2000 and GP-4000 large-format printers are developed with proven Canon technologies. These models are versatile production printing devices equipped with the high productivity features you've come to expect from imagePROGRAF including:

## Hardware

- ✓ Intelligent Media Handling
- ✓ Color Calibration
- ✓ High Capacity 500 GB Hard Drive
- ✓ USB Thumb Drive Printing
- ✓ Wi-Fi Connectivity
- ✓ Sub-Ink Tank System
- ✓ Optional Multifunction Roll Unit

## Suite of Creative and Workflow Software

- ✓ Professional Print & Layout
- ✓ PosterArtist Lite (PC only)
- ✓ Device Management Console
- ✓ Free Layout Plus (PC Only)
- ✓ Accounting Manager
- ✓ Third Party RIP Support

# Calibrated for Pantone Color

The GP-2000/4000 models can achieve 99% coverage of “PANTONE FORMULA GUIDE Solid Coated” and can achieve 97% coverage of “PANTONE PASTELS & NEONS GUIDE Coated.”

*The colors that the designer intended are reproduced in the output.*

**GP-2000**

**GP-4000**

# Color Calibration

The built-in color density sensor calibrates the printer to the optimal color settings. This reduces color differences resulting from print head replacement and environmental factors such as humidity.

- ✓ Minimizes color differences between multiple printers
- ✓ A calibration for one media type is reflected in adjustments for other Canon media
- ✓ Calibration process is complete within 10-15 minutes

Built-in Multisensor

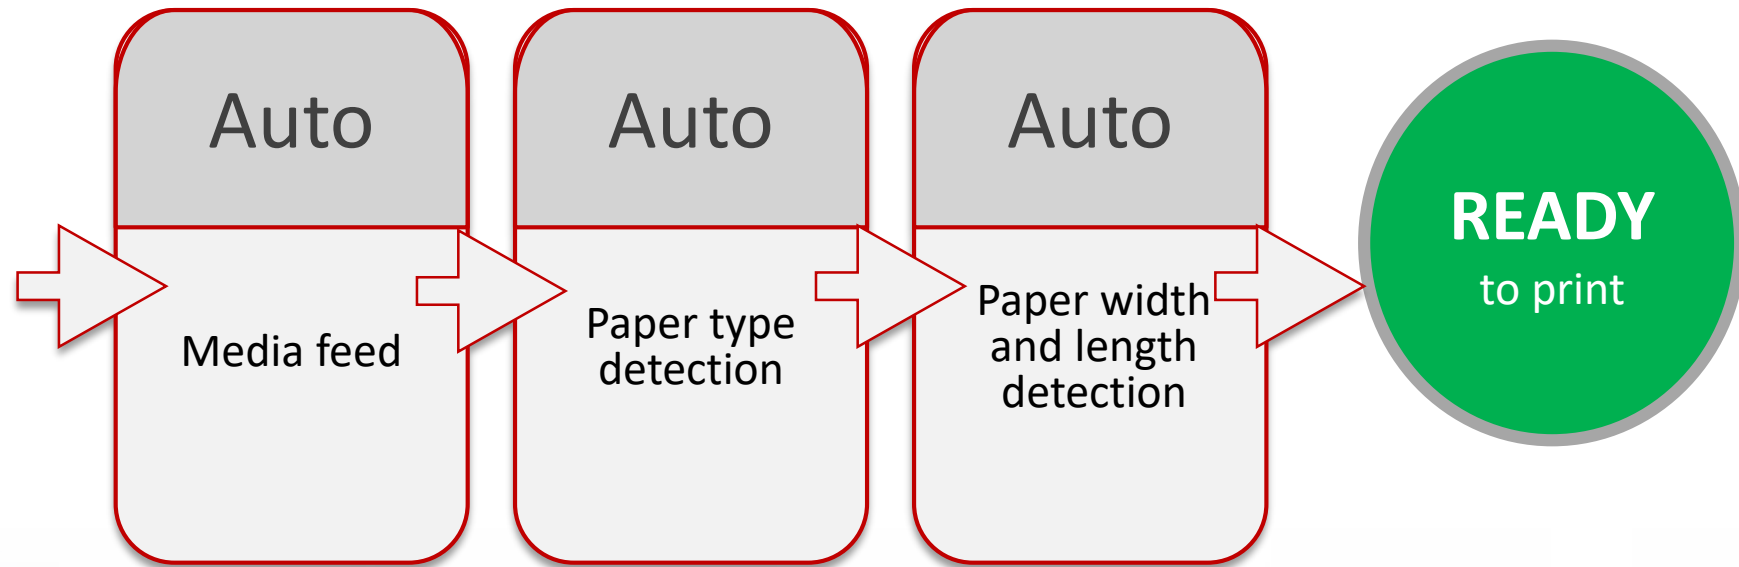

- ✓ Easy operation, Less time consuming
- ✓ Stable color reproduction
- ✓ Compatible with network environment

# Intelligent Media Handling

- ✓ Automatic media loading after sliding roll into printer.
- ✓ Automatic type, width, and length detection.
- ✓ Reduces operator intervention.

# Optional Multifunction Roll System

## Dual Roll Media Handling

- ✓ Auto switches depending on media type and size
- ✓ High-volume continuous printing with the same media type

## Can be used as a Take up unit

- ✓ Media can be rolled image in or out
- ✓ Streamlines printing workflow

Print surface inside  
→ Cutting

Print surface outside  
→ Lamination

*No  
Weight  
Needed!*

# Borderless Printing Capabilities

Easily create borderless prints in a variety of sizes; 3 sided borderless printing as well for smaller images on wider roll sizes

*Borderless printing can be achieved on all roll widths*

By improving margin accuracy  
**Print just inside the edge of the paper**  
(“Slightly-outside” printing is also possible)

# USB Thumb Drive Printing

## USB Thumb Drive Printing

Easy direct printing in large sizes without use of a PC.

Supported file formats

Multipage PDF also supported

# RIP Support

## Printing workflow with RIPs that suit different needs and purposes

Support for major software RIPs in the fields of graphics such as poster, color, and proof output

# GP-200 & GP-300 Models

## 5-Color Plus Fluorescent Pink Ink Models

### GP-200

24 inch

Compact Design

Fully-front operation for  
flush wall installation

Built-in hard drive enables  
direct printing from USB drive

### GP-300

36 inch

Calibrated for PANTONE PASTELS & NEONS GUIDE coated

Calibrated for PANTONE FORMULA GUIDE solid coated

# Features

The new GP-200 and GP-300 large-format printers are configured upon proven Canon technologies. These models are versatile printing devices equipped with the high productivity features you've come to expect from imagePROGRAF including:

- ✓ Compact Design
- ✓ A High Capacity 500 GB Hard Drive
- ✓ USB Thumb Drive Printing
- ✓ Suite of Creative and Workflow Software
- ✓ Wi-Fi Connectivity
- ✓ Sub-Ink Tank System
- ✓ Touch Screen Operation Panel
- ✓ Borderless Printing

## Suite of creative and workflow software

- ✓ PosterArtist Lite (PC only)
- ✓ Device Management Console
- ✓ Free Layout Plus (PC Only)
- ✓ Accounting Manager

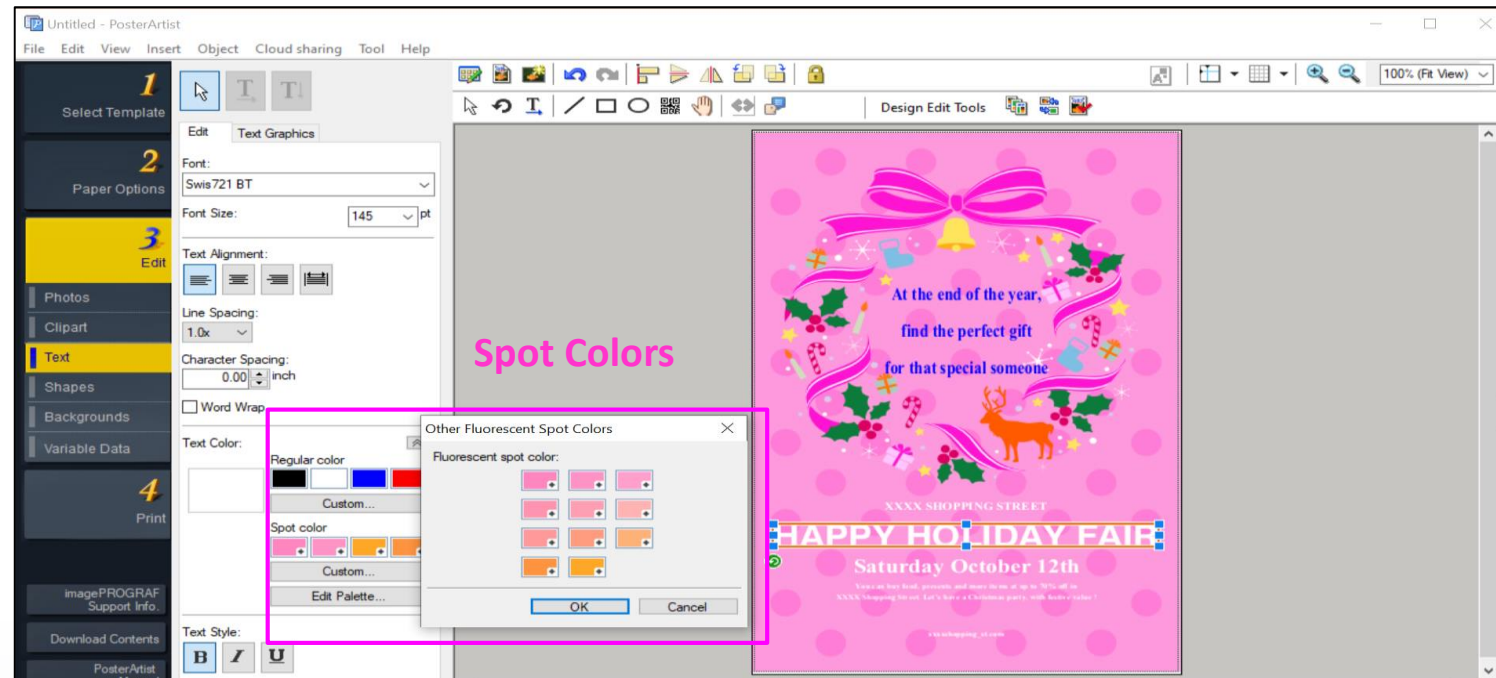

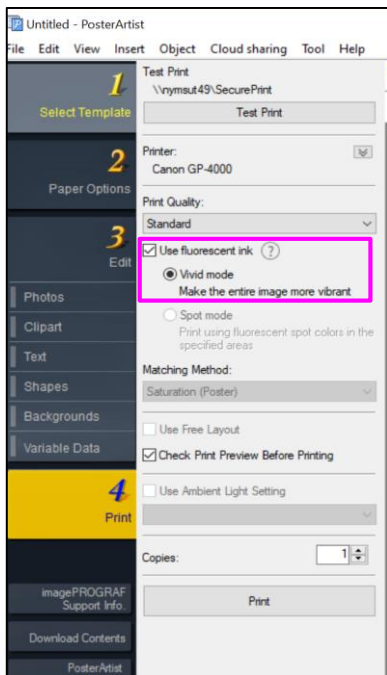

# PosterArtist: Vivid and Spot Color Modes

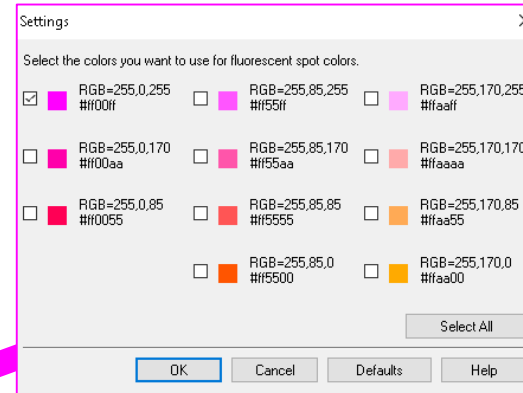

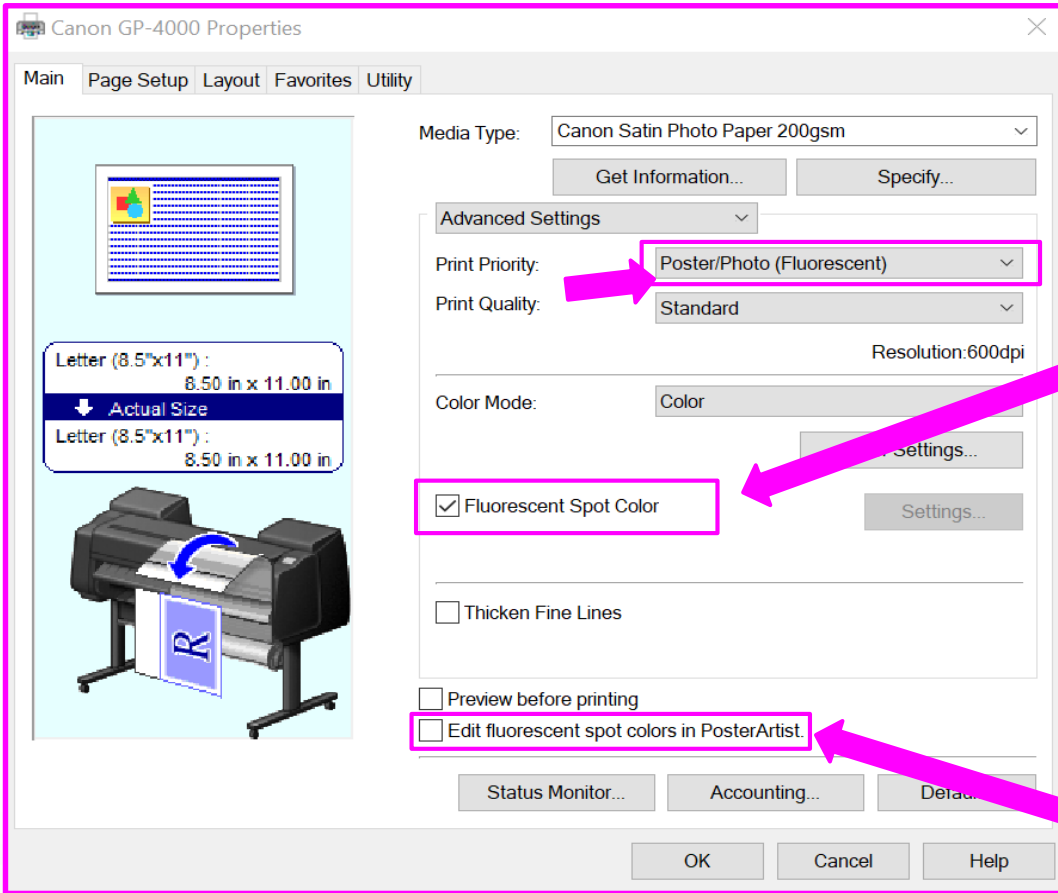

Easily create professional eye-popping poster using Vivid mode to make the entire image more vibrant or Spot Color mode, to produce colors in specified areas within the poster design these will enable the use of the Fluorescent Pink ink for high-quality poster output.

Vivid  
Mode

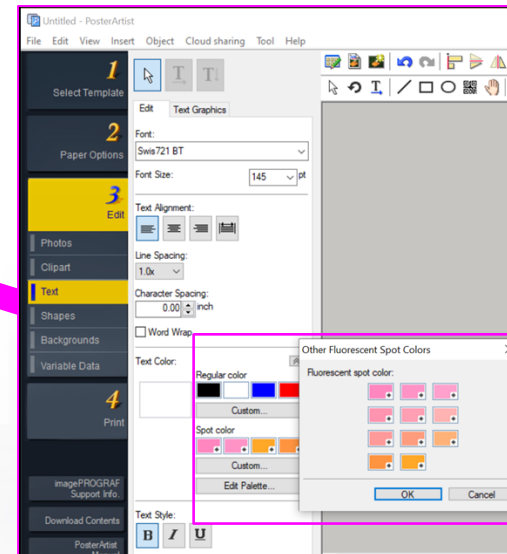

By differentiating the contrast between the fluorescent color and the background, you can create a neon-like light that cannot be expressed with normal colors, for vibrant expressive color.

# Printer Driver

The Printer Driver has the ability to choose between using the Fluorescent Pink Ink or not to use it.

You can also use the “Spot Color” mode by checking the “Edit Fluorescent spot color” box.

The user can also edit Spot Colors using PosterArtist software (version 3.4 must be loaded on your PC).
