**CATALOGUE 2023**

# VIDEO IP

Intelligent IP cameras and special solutions for top night vision, powerful recording solutions, network video recorders and software, video door intercoms and ABUS Link Station app

---

In our latest catalogue, we present the  
**2023 Video IP range** from ABUS Security Center.  
Detailed information for all products can be found at [abus.com](https://abus.com)

---

**ABUS | August Bremicker Söhne**  
Home security, property security, mobile security

**ABUS | Security Center**  
Alarm systems, video surveillance, electronic security systems, electronic locking systems, access control, switching devices

**ABUS | Pfaffenhain**  
Mechanical locking systems and master key systems

ABUS Security Center belongs to the ABUS Group and is part of the well-known global security brand.

The ABUS Group and its subsidiaries have stood for comprehensive security for nearly 100 years. As a traditional company with many years of experience, ABUS continues to set new standards and trends in the field of innovative security technology with a particular focus on the smart interplay between electronics and mechanics.

High-quality security solutions are the result of the interplay of various factors such as hardware and software, service and advice - and the fusion of separate technologies into a comprehensive networked solution.

ABUS Security Center brings this philosophy of integrated security solutions to life with its products. And by doing so, it pursues the goal of making the everyday lives of its customers and users extra secure and comfortable.

# 360° SOLUTIONS FOR VIDEO SURVEILLANCE

## B • BASIC

For basic applications

- High-spec cameras offering attractive value for money
- Effective solution for basic protection
- All models can be used indoors and outdoors

from  
**Winter  
2022**

## A • ADVANCED

For advanced requirements

- Camera models for use in demanding environments
- Extended functional scope
- Optimised housing design for efficient installation

## S • SPECIAL

For special applications

- High-performance cameras for special applications
- For solutions with specific requirements
- Special models, e.g. intelligent PTZ domes with robust mechanics for a full overview in any environment

## THE B • A • S MODELL

Basic, Advanced, Special: our B•A•S model! With our various price and performance categories for cameras, the ABUS video IP range always provides the ideal technical parameters for your project. Depending on your task, you can combine the basic products for basic applications, advanced products for particular challenges and complex light situations, as well as our special products for surveillance solutions in a particularly challenging environment.

Our cameras, recorders and accessories are perfectly compatible. And this applies beyond the field of video surveillance: video, alarm, access control – the interconnectivity of the entire range of electronic security products makes us a full provider of integrated security solutions.

**You can therefore enjoy a fully compatible all-round range and order everything from one source – with ABUS quality!**

# MORE INTELLIGENCE. MORE PRECISION.

## MORE PROTECTION WITH LESS EFFORT

Intelligence in the camera itself. For high-quality images day and night and at almost any distance - with thermal image sensor if needed. With automatic classification/evaluation of events for the ideal level of security with efficient use of personnel (highly precise movement alarms, quick search of incidents, triggering of automatic processes). Additional options: Camera with extended alarm functions and other models in the black colour variant.

## CLEAR ADVANTAGES

- Lower personnel costs: Thanks to object detection/classification, the camera delivers very few, highly accurate motion alarms
- Less time required: Thanks to quick search with event filter (human, vehicle), relevant recordings (on the NVR) are found much faster
- More safety: clear colour images with every detail, even at night and in absolute darkness, thanks to full-colour day/night function
- Total night vision: precise detection of intruders at long distances, even in fog, difficult terrain, etc. thanks to thermal camera

# AUTOMATIC OBJECT RECOGNITION

## AI IN THE CAMERA

All Basic and Gecko cameras automatically recognise people and vehicles by means of intelligent software (AI algorithm) and autonomously differentiate them from interfering influences (clouds, light, shadows, trees/leaves, birds, etc.).

## MANY ADVANTAGES

- Higher level of security, more application possibilities and programmable scenarios (in conjunction with VCA events)
- False alarms are significantly reduced (very high real alarm precision), the number of push messages for motion alarms (VCA event) is minimised
- Storage space and write accesses on the SD card are reduced as only relevant scenes are saved
- Quick search and easy finding of incidents/events in the central recording (NVR, CMS), as it is possible to filter directly by person or vehicle
- 2x security: All events are stored on the recording device (NVR) (no recordings are lost if an incident is investigated without a person/vehicle)
- Less working time and costs (e.g. security staff) due to automated monitoring
- The all-in-one alarm camera with 2WAY audio: Intercom, address perpetrators and sound the alarm (warning tone, speech, flashing light). Set up precise VCA scenarios for alarms or for more efficient operations (e.g. goods receiving, sales room)
- NEW NOW: Thermal cameras for extremely precise detection of people and vehicles (object detection with high alarm accuracy) - at up to 150 m, at night and in fog as well as other disturbing influences

# DISCOVER NOW: THE NEW DREAM TEAM

## FOR EFFECTIVE 24/7 PROTECTION!

In this updated edition of our catalogue, we are pleased to present exciting new products again. All camera lines have been strengthened: Basic, Advanced and Special. In addition to updating the product range, our new camera solutions for monitoring large areas during the day and especially at night stand out. In addition, new colour variants are available.

## BEST PICTURES EVEN AT NIGHT AND IN FOG

The special solution for 24/7 protection of company premises, large areas and sensitive areas: the new ABUS dual thermal cameras with thermal image sensor plus optical image sensor. For reliable detection (human, vehicle) under the most adverse conditions. **Details of the thermal cameras can be found on page 33.**

Night shot without thermal technology

Night shot with thermal technology

## FARSIGHTED WATCHMAN

Ultra-large surveillance area and max. image detail at long distance. Thanks to telephoto lens with up to 118 mm focal length, 25x optical zoom and IR LEDs with up to 200 m range. **Details of the telephoto motorised zoom camera can be found on page 48.**

## BLACK AS THE NIGHT

All cats grey at night? Not when using a Gecko camera. Both these Special models and the affordable Mini Domes from the Basic Line are now available in elegant matt black. For façades and rooms where only black really brings colour into play. **All details on the Black Line models can be found on page 35.**

# VIDEO IP OVERVIEW

**IPCB44611A + TVAC32420X**  
 Example camera: IP Mini Dome 4 MPx Black (2.8mm)      Example mount: Mini Dome Wall Mount, black

# IP CAMERAS

ABUS IP cameras protect your property with powerful surveillance and support the user in daily business with intelligent image analysis.

This means that the user does not always have to have a direct view of their commercial space. For example, if a person enters a defined area, an alarm is triggered as a pop-up or signal tone and a push message is sent to the app. Professional optical and AI functions ensure precise alarms and maximum efficiency even in unmanned operation.

In addition to pure surveillance, intelligent cameras can also be used to optimise work processes. For example, service staff in the retail sector can serve customers immediately or security staff can be trained to intervene directly in the event of suspicious behaviour.

## THE TOP ADVANTAGES AT A GLANCE

- Less time required: Thanks to event filters (human, vehicle), relevant recordings (on the NVR or internal microSD card) are found much faster
- Lower personnel costs: Very few, highly accurate motion alarms are triggered thanks to object detection/classification in the camera
- More safety: clear colour images with every detail, even at night and in absolute darkness, thanks to full-colour day/night function
- Top product innovations in this catalogue: Thermal cameras for precise detection of intruders (high alarm accuracy) over wide areas and long distances (efficient camera use). As well as in night and fog and other adverse environmental factors (where optical cameras miss details or are prone to error)
- Reinforcement for the Special Line: Tele-motorised zoom tube camera with ultra-large zoom factor (up to 118 mm focal length) for very large surveillance areas and detail detection
- Optimal for automated processes or buildings with party traffic: the 'alarm camera' with acoustic as well as optical deterrent function and intercom (incl. microphone, loudspeaker, flashing light)
- Extra chic and suitable for special façades or room designs: further Black Line models in classic anthracite black

# THERMAL CAMERAS WITH HEAT IMAGE SENSOR

## HIGH-PRECISION ALARM UNDER THE MOST ADVERSE CONDITIONS

Thermal imaging cameras complement optical cameras in perimeter protection, i.e. the protection of areas from intruders. ABUS thermal security cameras are equipped with state-of-the-art technologies especially for outdoor use. Thanks to dual-sensor (bi-spectral technology), they have a thermal image sensor and additional optical image sensor with high resolution to provide the best image in every situation. In addition, the cameras can perform tasks such as temperature measurement or early fire detection in designated areas as well as indoors.

## FUNCTION AND ADVANTAGES

- High-sensitivity thermal image sensor: All objects (including living beings) emit invisible infrared radiation. The warmer the object, the higher its IR radiation. A thermal image with visible heat zones is generated from the radiation differences of the objects.
- High alarm accuracy: ABUS thermal cameras sound the alarm via precise, AI-supported VCA analysis. Intelligent object detection distinguishes people and vehicles from other influences and minimises the false alarms triggered, for example, by the camera shaking, leaves in the wind, etc.
- Best pictures around the clock: Thermal images provide clear details in almost all light, weather and environmental conditions such as light intensity, contrast, shadows, fog, etc. People and vehicles are reliably classified - even when they overlap, such as a person in front of a car, hidden by bushes or in a group.
- Large monitoring area: Humans and vehicles can be detected from a distance of up to 80 m or 200 m. Thus, a few thermal cameras are sufficient to monitor a wide area.
- Temperature measurement and early fire detection: Thermal cameras see heat and thus fluctuations in the maximum or average temperature in their field of view. Like optical thermal differential detectors, they detect unwanted heat development (e.g. in a hazardous goods warehouse, production process, at an e-filling station in a multi-storey car park), pockets of embers (e.g. at a landfill site) and other signs of an incipient fire.

## COLOUR PICTURES AT NIGHT

### FULL COLOUR DAY/NIGHT TECHNOLOGY

All Gecko models\* deliver rich, detailed colour images (instead of IR B/W images) when used at night. Even in near absolute darkness (indoors, without outdoor lighting/moonlight) - thanks to the special lens with large, extra light-sensitive image sensor (1/1.8") and automatic readjustment of exposure time. Discreet white light LEDs (up to 50 m) switch on automatically when needed - for minimum light use. Particularly suitable for indoor and entrance areas or enclosed areas.

### HIGHLIGHTS & ADVANTAGES

- More effective surveillance: natural images in live view and recording, just as the human eye is used to. The user interprets the image more easily, tires less and recognises incidents better than with the black/white image
- Better clarity: Thanks to maximum image detail, key features for identifying offenders or vehicles are more easily recognised, e.g. hair/clothing colours, logos on jackets, paint colours
- Any reflections, as can be caused by IR LEDs, are reduced - and important features (e.g. lettering on the vehicle, number plate) are thus better detected.

\*The Gecko turns night into day: The helmethead gecko is the only vertebrate species that has been found to see in colour in the dark. Our Gecko cameras follow this example from nature.

Night shot with commercially available infrared camera

Night shot with Gecko technology

# MOUNTS & BRACKETS

Professional video surveillance: Expert installation, mounting and wiring make all the difference.

In ABUS's extensive range of brackets, you will find the right mounting solution for every application and installation location.

- Flexible bracket for mounting the camera on wall, ceiling, corner, pole, etc.
- Robust, weather-protected installation boxes for optimal cabling
- Ceiling installation frame for suspended ceilings, tinted dome for discreet surveillance and much more.

## MOUNTS & BRACKETS

# RECORDERS

The monitoring centre: Live viewing, recording and playback of up to 64 IP cameras.

An ABUS network video recorder (NVR) records the high-resolution video streams of the cameras steadily and reliably. In addition to its performance in data throughput and the large storage volume (hard disk not included in the scope of delivery), the ABUS NVR is a winning choice thanks to its simple and flexible operation, among other things. It comes in different versions (number of channels, PoE), so that a scalable recording solution is available for each specific project.

Cameras can be set up in the recorder in no time thanks to the intuitive installation assistant. The clear menu allows for easy and quick programming. All ABUS cameras are depth-integrated per protocol and thus offer maximum compatibility with full functionality.

- Best images: for recording video streams in 4K resolution on all channels
- Perfect connection: available with or without PoE interface
- Efficient storage: no compromise on storage time for multiple cameras - thanks to strong compression of the video data
- Perfect connection: mobile remote access via ABUS Link Station app
- Extensive monitoring: display and operate several NVRs combined on one control centre PC (with ABUS CMS software)

## RECORDERS

Item number	NVR10010
<b>Description</b>	<b>5-Channel Network Video Recorder (NVR)</b>
	<ul style="list-style-type: none"> <li>• Live view and recording of up to 5 IP cameras @ 8 MPx (4K)</li> <li>• High-performance network data throughput with up to 316 MBit/s (60 MBit/s in / 256 MBit/s out)</li> <li>• Easy operation locally on the device, via web browser, ABUS CMS software or app</li> <li>• Local monitor output supports up to 8 MPx (4K) resolution</li> <li>• Manual or controlled recording according to time plan, motion detection, alarm input or VCA</li> <li>• Supports H.264 and H.265 (incl. dynamic GOP)</li> <li>• Recording on up to 2 SATA hard drives</li> </ul>
<b>Total network throughput (input/output)</b>	316MBit/s (60 MBit/s/256 MBit/s)
<b>Total frame rate (PAL)</b>	125 fps
<b>Storage medium</b>	2 x S-ATA HDD (up to 16 TB per HDD)
<b>Recording modes</b>	Manual, time schedule, motion detection, alarm input, VCA
<b>Storage</b>	1 x USB 2.0, 1 x USB 3.0
<b>Search modes</b>	Event, date and time, Smart Search, VCA
<b>Alarming</b>	Acoustic warning signal, on screen display signal, email, CMS, Alarm output
<b>Monitor outputs</b>	1 x VGA, 1 x HDMI

**Item number** IPCV10000

**Description** ABUS IP Camera Viewer (1-channel)\*

- Live image display of 2 MPx network cameras on one monitor
- Display expandable up to 4 cameras (IPCV10010)
- Practical solution for numerous customer needs
- Ideal for sales rooms, for example as a confrontation monitor
- Comfortable solution for private end customers, e.g. more security at the front door
- Low installation costs
- Network integration via LAN or WiFi
- Monitor connection via HDMI
- Silent operation
- Without the use of an additional PC or recorder

<b>Resolution modes</b>	1920 x 1080
<b>Network access</b>	RJ45
<b>Wi-Fi network access</b>	2,4 GHz & 5 GHz WLAN IEEE 802.11 b/g/n/ac
<b>Connections</b>	1 x HDMI, 1 x RJ45, 1 x Micro-USB Typ B
<b>Max. operating temperature</b>	50° C
<b>Min. operating temperature</b>	0° C
<b>DC voltage supply</b>	5 V
<b>Power consumption</b>	2500 mA
<b>Resolution</b>	2 MP
<b>Dimensions (W x H x D)</b>	75 x 110 x 35 mm
<b>Scope of delivery</b>	ABUS IP Camera Viewer (1-channel)

\*not available in Switzerland

**Item number** IPCV10010

**Item number** IPCV10020

**Description** ABUS Quad View Add-on for ABUS IP Camera Viewer

- Extension from 1 to 4 channels for the ABUS IP Camera Viewer (1-channel) IPCV10000
- Software extension via activation code
- No further installation or infrastructure needed

- Software extension to display logo and text
- Video stream optimization for the POS and adaptation to the corporate design
- Integration of customized data for targeted customer information
- Software extension using activation code
- No further installation or infrastructure necessary

<b>Dimensions (W x H x D)</b>	115 x 2 x 160 mm	115 x 2 x 160 mm
<b>Scope of delivery</b>	License	License

**Item number** TVAC35100

**Description** Micro-USB power supply 3 A

- Plug-in power supply with micro USB output
- Recommended for powering the ABUS IP Camera Viewer IPCV10000
- Suitable for a variety of devices
- Powerful with 3.1 A suitable for every application
- 1.1 m charging cable for sufficient freedom of movement
- With 100 - 240 V AC input voltage can also be used abroad

<b>Dimensions (W x H x D)</b>	48 x 28 x 89 mm
<b>Scope of delivery</b>	USB power supply 3 A

# MODUVIS DOOR-INTERCOM

From a private single-family home with one bell and monitor to a multi-family building with 49 bells and several monitors - ModuVis always offers the right solution.

In addition to the camera in the video module, ABUS outdoor cameras can also be displayed on the indoor monitor and the app. This makes it easy to adapt the system to new customer wishes and requirements. In addition, all data and recordings can be stored locally in the monitor (SD card).

TVHS20000

## VIDEO MODULE

Heart of the door intercom system

- 2 MPx Full HD camera (viewing angle: horizontal: 180°, vertical: 96°)
- Very good voice quality with noise cancellation (noise cancelling and anti-echo function)
- With 2-wire connection or optional RJ45 connection for network cable with PoE supply.

TVHS20040

## INFO MODULE

- Customisable display of street, house number or name (transparent paper enclosed, print template for download)
- Backlighting for good visibility in the dark (brightness sensor)

TVHS20020

## BELL EXTENSION

- Lighting for good visibility in the dark (brightness sensor)
- Up to 6 parties per extension, up to 8 extensions per system (max. 49 bells per system)
- Incl. PDF print template and material for name badges

TVHS20030

## CODE BUTTON MODULE

- For controlling door buzzer or motorised lock by means of 6-digit user code
- In addition to an individual code for each apartment, up to 3 additional central codes can be assigned, e.g. for the property management.

TVHS20050

## EMPTY MODULE

- Cover as placeholder for later system extensions
  - Additional module (e.g. more bells)
  - Simply insert without changing the frame

## EXEMPLARY SYSTEM STRUCTURE

Variant: mixed operation

# ACCESSORIES

For optimal performance and maximum utility, ABUS IP cameras and network recorders are complemented by intuitive control centre software, mobile app and innovative video management software to create a comprehensive surveillance system.

With ABUS, you also receive all the accessories for installation and operation of the video system, such as monitors, switches, hard disks, power supply units, etc., directly from a single source. For your easy ordering and logistics, so that everything fits on site at the installation date.

# RECORDING & VIDEO MANAGEMENT

To gain maximum benefit from video surveillance, video images must be stored efficiently and evaluated effectively. In this way, the user can draw the right conclusions for targeted measures from the image material. In addition to the NVR as a surveillance centre, ABUS recording solutions offer suitable software tools for professional analysis

## RECORD AND MANAGE

Intelligent recording and evaluation of up to 64 video cameras. This is achieved with the ABUS network video recorders (NVR) with high data throughput, long-term recording and integrated VCA functions. Details on this can be found in the "Combination Outputs" chapter, **page 60**. In addition, the free ABUS CMS software is used to manage up to 256 NVRs and 1,024 video channels on a control centre PC. More on this: right here below!

## ABUS CMS SOFTWARE: THE MONITORING CENTRE

All surveillance at a glance on one PC: The free Central Monitor Station (CMS) software combines the video data from up to 1,024 cameras and 256 recorders (NVR) on up to 4 monitors. The PC becomes the control centre and is easy to operate thanks to intuitive CMS software, even with changing staff (e.g. shop detectives).

## CONTROL VIA APP

Direct access to ABUS cameras and recorders via mobile phone and tablet? Quick and easy with the ABUS Link Station app! Whether for live image display, Playback, control of PT(Z) cameras or for switching alarm outputs.

Try it out:  
the free app  
in the LITE version!

Apple iOS

Google Play

## HIGH-PERFORMANCE VMS: ABUS + AXSONSOFT

As an official distributor/integration partner of AxxonSoft, a leading global developer of VMS and PSIM platforms, ABUS offers a comprehensive solution for video management.

With a wide range of intelligent and individual functions for projects of any size: from commercial and retail to banking and the public sector.

For an unlimited number of cameras and servers - clearly arranged in one software.  
All ABUS camera models are directly integrated.

## AXXON ONE:

3 software packages for standard projects with features such as motion and number plate recognition, forensic search, interactive site plan, failsafe, facial recognition, etc.

## AXXON INTELLECT:

The open, freely programmable platform for the specific configuration of large-scale projects.

# SERVICE & CONTACT

## INTERNAL AND FIELD SERVICE

As a specialist dealer partner, you can benefit from your own, dedicated team of representatives for your region. Our team will be available to support you with comprehensive, specialist expertise no matter what you need. This also covers any questions relating to your project, so you can count on both our internal support office and our on-site field service.

## THE ONLINE STORE

Take advantage of the quick and easy ordering process at [www.abus.com](http://www.abus.com)

The Partner Lounge is where you can conveniently carry out all of your orders and track your order status in real time. This is also where we provide comprehensive information and sales support documents for your convenience.

## TECHNICAL SUPPORT (TS)

If problems occur with our products, our technical support team is ready to take your call to find the source of the issue and work with you to find a solution.

## QUALITY ASSURANCE – SERVICE – PRODUCTION (QSP)

In the event of a technical defect, our QSP department will perform a thorough check of your device and repair it immediately if possible.

## PLANNING SUPPORT

Are you planning a new building or a larger property? We offer you knowledgeable planning support incl. tender data, calculation tools, etc.
