Dear Evaluation Panel:

The Lioce Group, Inc (“TLG”) is pleased to submit our response to the Alabama Community College System (ACCS) in response to the Printing Management Solution-Request for Bid.

Together with our leading manufacturers and partners, TLG can effectively meet or exceed all customer requirements. We are highly experienced and possess relevant past performance in many ACCS locations throughout the state.

TLG is a small business with big business capabilities. With backing from some of the industry’s leading manufacturers, we represent over a dozen product lines including DocuWare, PrinterLogic, Netaphor, Kofax, Konica Minolta, Canon, Lexmark, Toshiba, and Hewlett Packard.

TLG has performed facilities management services, fleet management, and assessments in several scenarios. We have firsthand experience providing in-house print shops and reprographics departments with production and finishing equipment, as well as on-site personnel. We also have experience with companies to perform a range of on-site services for several installations including The US Army Development Command DEVCOM and The City of Huntsville Healthcare Authority.

TLG is a unique vendor that can supply the Alabama Community College system with many commercial off the shelf hardware and software solutions that will improve your automation and workflow. TLG excels in providing our customers the ongoing support after the sale to insure customer satisfaction.

The Lioce Group, Inc accepts all terms and conditions of the SOW. TLG is capable of fulfilling all requirements and will adhere to them if awarded.

We truly appreciate your consideration.

Sincerely,

Nick Lioce, President

## Response to General Requirements and Specifications

This section contains specifications and relevant information about TLG and our offerings to the System. They are numbered according to the corresponding section of the RFP.

### 3.22 Product and Services Delivery Overview

The Lioce Group, Inc. (TLG) is a small business with big business capabilities. TLG has been in business in Huntsville, AL since 2007. However, the Lioce family has been providing copy machines and maintenance to both commercial and government customers since 1967. TLG has managed local contracts for service on Red Stone Arsenal as well as large commercial accounts: AMCOM (500+ copiers/printers), Utility Helicopter (200+ copiers/printers), and Huntsville Hospital (1,100+ copiers/printers). TLG also offers copier maintenance services under the GSA contract vehicle throughout the CONUS and Puerto Rico, to include: USUHS (HT940413FDV38) in Bethesda, MD (3 copiers), U.S. Probation Office (#155A2513) in Los Angeles (26 Copiers), Department of Veterans Affairs (VA101-12-F-0148) in DC (6 Copiers), Department of Homeland Security (HSHQDC-15-F-00102) in the DC area (25 Copiers), and Department of Health and Human Services (#HHSP233201550006A) in DC (35 Copiers), the Department of Energy (#DT0008985) in Oak Ridge, TN (40 Copiers), the Social Security Administration (#SS001640031) throughout CONUS, Puerto Rico, and Alaska (949 Copiers), and Department of Defense, Defense Security Service throughout CONUS (82 machines).

TLG has offices in Huntsville, Alabama and Birmingham, Alabama. Any product ordered from TLG can be delivered to any location in the State of Alabama, and we can service every city within the state. TLG has support personnel located throughout these sales and services office locations that can provide a variety of services.

TLG is fully responsible for delivery of all equipment ordered and will resolve any delivery issues promptly. Installation will be coordinated with the local point of contact at least one week in advance. Installation includes the delivery and setup of the equipment. Every order from TLG includes full customer training at no additional fee.

TLG currently has a Net Promotor Score of 97.22% with 11% reporting. TLG has 111 Five Star Google Reviews. Both the NPS and Google Reviews can be found on [www.liocegroup.com](http://www.liocegroup.com) home page.

TLG maintains the facilities, infrastructure, staff and financial strength to support the ACCS. TLG currently has 74 employees and facilities with 35,000 sq. ft. of office and warehouse space. TLG has maintained growth and profitability over the past 12 years. TLG will make our financials available upon request.

**TLG's primary concern is for all of our customer's to be satisfied with our service. We have dedicated account managers that report directly to our Vice President and President all customer issues.**

### 3.23 Reporting

As a minimum, TLG will provide quarterly utilization reports to the Systems based upon the schedule and minimum content as described in the bid request. The reports will be submitted to The System Office to JPA-Notification@accs.edu in PDF file format. The format below is an example of a report we currently submit to the State of Alabama for our HPE Enterprise Products contract but can be tailored to the System's specific format request.

### **Customer Service & Reporting Tools**

TLG has several ways to monitor our customer service metrics using e-Automate. This ERP system tracks our service response times, holding our teams accountable for the commitments made to our customers. Each contract can be built to include Government-specific performance standards, making it clear in reports whether or not targets have been

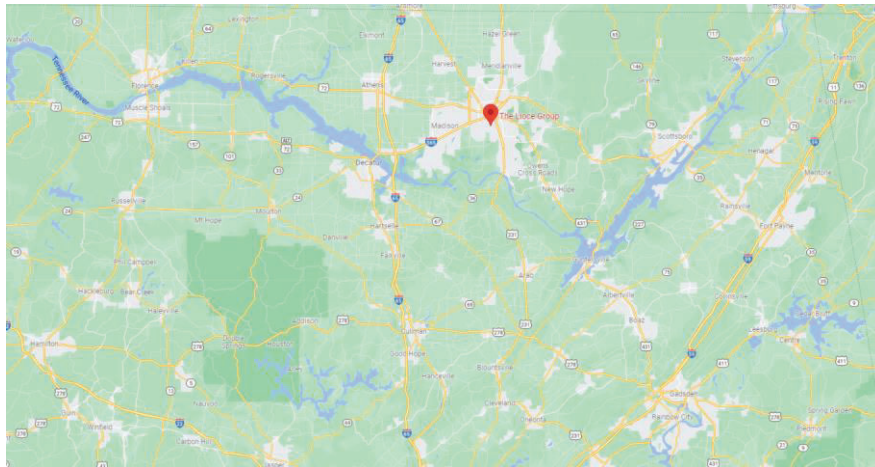

achieved. In addition to tracking service metrics, e-Automate can also send a “closed call confirmation” message, as another channel to monitor and assess customer service and technician performance.

“Closed call confirmation” messages to end users that initiated maintenance or repair services include a link to provide optional feedback on the level of service received via online survey. The survey uses a Net Promoter Score<sup>1</sup> (NPS) to gauge the loyalty of a business’s customer relationships, aiming to measure the loyalty that exists between a provider and a consumer.

#### *Performance Indicators*

- Overall technician rating
- Overall experience when placing a service call
- Technician explained the problem/resolution or provided training if necessary
- Communication to keep you informed if needed
- Technician left the equipment repaired to your satisfaction

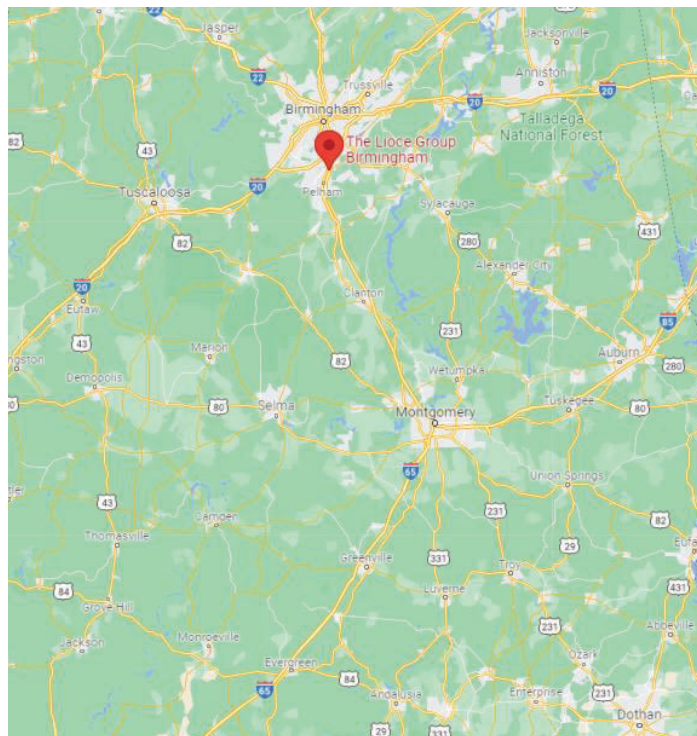

TLG’s headquarters is located in Huntsville, Alabama with our subsidiary office in Birmingham. We provide equipment and service throughout the entire state of Alabama, as well as in Southern Tennessee.

<sup>1</sup> Net Promoter, Net Promoter Score, and NPS are trademarks of Satmetrix Systems, Inc., Bain and Company, Inc., and Fred Reichheld.

### **3.24 Electronic Commerce**

TLG will maintain a website with access to the required items. TLG will make available to any enterprise users the ability to search for product, create orders using the offered pricing discounts, and track orders upon request. A webpage with the awarded products will reside on [www.liocegroup.com](http://www.liocegroup.com). Our customer portal can be used by all members to order products, ongoing services, and supplies. The customer portal can be customized to a user at no additional fees.

### **3.25 Breadth of Offering**

TLG is offering Canon, Lexmark, Sharp, Hewlett Packard, Netaphor, uniFLOW, Bamboo, DocuSign, DocuWare, Dahle Shredders, OneSpan, PowePDF, Envoy, Logitech Rally, SemaConnect, Zebra Barcode, Black Pearl, PrinterLogic, and FP Mailing Solutions.

We have attached a comprehensive product listing for each product line we are proposing. In addition to the manufacturer product listings, TLG is also offering our own services to provide the system with a turnkey solution.

All equipment will be new, unopened in the original manufacturer's packaging. All required software that comes "in the box" from the manufacturer will be included with the hardware.

### ***Printing and Duplicating Equipment***

#### **Engineering Copier/Printers**

**Canon USA and Hewlett Packard**

#### **Monochrome and Color Printers**

Canon, HP, and Lexmark

#### **Monochrome and Color Copiers, MFDs and MFPs**

Sharp, Canon, HP, and Lexmark

### ***Production Press Printing Equipment***

#### **Production Equipment: Canon**

TLG has been selling Canon Color Presses for over ten (10) years. Canon has a full range of black and white presses ranging in speed from 65 to 140 pages per minute to produce from 50,000 to 500,000 pages per month per device. Canon's unique technology improves quality and reliability.

### ***On-Demand Digital Printing Solutions***

TLG has experience with several types of software to facilitate the publication of customer facing options and for receipt of documents in the print facility. TLG has worked with EFI™ Productivity Software and Fiery Servers and Software, Canon PRISMA and Formed AI automation tools and ticketing software to address customer workflows.

While recommending on-demand software for digital printing solutions is often based on detailed information that is expected to be furnished at the Task Order level, EFI™ MarketDirect StoreFront® is an award-winning web-to-print solution that streamlines print ordering, fulfillment and business management for corporate and institutional in-plant print centers. With EFI MarketDirect StoreFront, Government customers can create and manage any number of customizable, department-branded online storefronts for print.

### ***Binding and Finishing Equipment***

#### **Canon and Intec**

TLG is fully authorized for in-line and offline finishing products to include, but not limited to professional punching, slitting, cutting, creasing, square binding, perfect binding, folding, and lamination of documents. Recommended

finishing products would be determined based on whether it is possible to use optional accessories configured on the production equipment, or if they are offline, standalone products.

## Shredding Equipment

### Dahle

TLG is capable of offering Dahle shredders to ACCS. Dahle shredders are the preferred choice of shredder of the US military and government personnel, due to their reliable function and document destruction capabilities. Please see the below information for a more detailed outline of Dahle shredders' capabilities:

# High Security Shredders

NSA/CSS 02-01 High Security Shredders

### High Security Shredders

In order to protect our National Security, destroying confidential information is a necessity. Dahle's commitment to provide innovative, reliable shredders for the U.S. Government is the reason Dahle remains the preferred choice among the branches of the military and government personnel. Dahle High Security Shredder are NSA approved for NSA/CSS Specification 02-01. These high security shredders can reduce a single sheet of paper into 15,500 tiny particles.

These particles are so small that they have been rendered completely impossible to reassemble. In a world of uncertainty one thing is for certain, whatever you put through this shredder, we guarantee will never be read again.

Most Dahle High Security shredders are equipped with an automatic oiler. It provides slow, continuous lubrication across the entire cutting mechanism to reduce wear on the cutting cylinders and ensure peak performance.

### DAHLE CleanTEC®

Dahle High Security Shredders are also available with CleanTEC® filtration. This fully integrated system collects fine dust particles created around the cutting cylinders and forces them into a specialized filter on the back of each machine. This filter permanently traps up to 98% of the fine dust, and provides a cleaner, healthier work environment. DAHLE CleanTEC® shredders also include additional special features such as Safe Technology and ESP Protection.

### High Security Models

To meet all your customers' needs, Dahle offers a wide range of high security shredders. All Dahle shredders feature solid cutting cylinders milled from a block of German steel. The 40 Series uses the same German technology with an exciting new look and our SmartPower Energy Management System. The 41 Series (CleanTEC®) includes all the above as well as integrated fine dust filtration.

### ***Mailing, Distribution and Delivery Equipment***

#### **FP Mailing Solutions**

With our FP Mailing authorization, software and hardware, TLG has full capabilities to install, support and administer mailing distribution both in-bound and out-bound from government facilities. Software for address verification and zip code sorting allows for smooth workflow without mailing equipment.

### ***Scanning and Document Conversion Solutions***

#### **Canon Scanners, Docuware Software, and PowerPDF Software**

TLG has access to a range of scanning devices – from desktop to high volume – standalone to multifunctional – as well as scanning workflow software applications to address bottlenecks, human resources automation, PDF conversion, digital signature solutions and much more.

The scanning and document conversion software tools that TLG most frequently works with include Docuware and products but are so environment-specific that a recommendation would take place at the Task Order level.

### ***Electronic Document Storage and Digital Asset Management***

#### **Docuware Software and Netaphor Software**

TLG provides storage, tracking and streamlining of documents, organizing and automating digital storage of paper files, digital files, emails, and other correspondence.

The document workflow and archiving software tools that TLG most frequently works with include Docuware, and Microsoft products and are so environment-specific that a recommendation would take place at the Task Order level.

### ***Managed Print Services (MPS) Equipment and Solutions***

#### **HP, Lexmark, and Netaphor Software**

TLG is fully capable of providing Managed Print Services. specifically tailored to accommodate existing customer equipment, and maintenance leases, and newly purchased devices.

While specific MPS deliverables TLG would be expected to provide will be defined at the Task Order level, there are often equipment and solutions associated with an MPS solution.

### ***Equipment Maintenance Tools***

TLG is capable of providing Equipment Maintenance, with specific SOW expectations to be defined at the Task Order level. TLG uses several tools to centralize maintenance activities including e-Automate, our ERP which includes a

break/fix ticketing system, ImageWare Remote, which is a remote diagnostic system that can help with more accurate troubleshooting information on devices, and a data collection agent (i.e. Netaphor), which allow us to centrally capture volumes, monitor supply levels and more, for mixed fleets of equipment.

### **Fleet Management and Security Tools**

#### **Netaphor Software, UniFlow Software, Papercut**

Similar to the Section above, TLG uses several tools to centralize managing mixed fleets of equipment. Netaphor allows us to centrally capture volumes, monitor supply levels and more, for mixed fleets of equipment. UniFlow and Papercut are secure print release solutions to secure document delivery, failover printing and monitoring of use. All three solutions have reporting capabilities for every aspect of the equipment and user.

### **Electrical Vehicle Car Chargers – Equipment, Installation and Support**

#### **SemaConnect**

SemaConnect, the leader in smart charging solutions, makes it easy to charge your EV fleets and make sure they are ready to go. Smart charging for your fleets ensures you have all the information you need, including built-in alerts and a smart dashboard to visualize detailed reports on electricity used, carbon offset, fuel savings and more.

**Large Format Pigment Printer 60" - 1.28 inch wide Print Head**

The 8-color 60-inch imagePROGRAF PRO-6100S printer designed for the poster and signage markets exceeds expectations for speed and color consistency in a large format production printer. The use of a 1.28-inch wide 12-channel integrated compact print head, LUCIA PRO ink set, a high-precision mechanical platform and the L-COA PRO high-speed image processing engine achieves a balance between high-speed printing and exceptional print quality.

The imagePROGRAF PRO-6100S has been designed to include intelligent technology for advanced media handling, increased security features, borderless printing and improved operational design.

Take advantage of Production Refined with the new PRO S Series.

**imagePROGRAF TM-200**

[Back to Index](#)

**Large Format Pigment Printer 24" - 1.07 inch wide Print Head**

The TM Series is redefining what a Large-format printer is capable of. The TM-200 printer is not only ideal for printing technical documents, CAD drawings and GIS maps, but also posters, signage and displays with the use of Canon's LUCIA TD water resistant pigment ink. Built with Canon developed technologies the TM-200 has a 5-color LUCIA TD pigment ink, PF-06 print head, L-COA PRO image processor, along with a clear, intuitive operation panel and is nearly 60% quieter than previous models - Plus there is a host of creative workflow software included. Newly developed for this series is Free Layout Plus, a print utility that allows users to tile nest and create custom layouts before printing. Direct Print & Share, Canon's cloud portal software, has new added features as does Canon's poster creation software, PosterArtist Lite making this printer an easy choice for the architectural, engineering and construction industries as well as office environments.

**Large Format Pigment Printer 36" - 1.07 inch wide Print Head**

The TM Series is redefining what a Large-format printer is capable of. The TM-300 printer is not only ideal for printing technical documents, CAD drawings and GIS maps, but also posters, signage and displays with the use of Canon's LUCIA TD water resistant pigment ink. Built with Canon developed technologies the TM-300 has a 5-color LUCIA TD pigment ink, PF-06 print head, L-COA PRO image processor, along with a clear, intuitive operation panel and is nearly 60% quieter than previous models - Plus there is a host of creative workflow software included. Newly developed for this series is Free Layout Plus, a print utility that allows users to tile nest and create custom layouts before printing. Direct Print & Share, Canon's cloud portal software, has new added features as does Canon's poster creation software, PosterArtist Lite making this printer an easy choice for the architectural, engineering and construction industries as well as office environments.

**Large Format Pigment Printer 24" - 1.07 inch wide Print Head**

The imagePROGRAF GP-200 printer has a 5-Color pigment based plus Fluorescent Pink ink set, which includes Matte Black, Black, Cyan, Magenta and Yellow colors. This printer supports Radiant Infusion for in-house production of large format prints with increased appeal and visibility in various industries such as retail stores, restaurants, government offices, schools and general offices. The compact design of this printer allows it to easily fit in the small confinements of a classroom or company office without taking up too much valuable work space.

For added security, the Secure Print feature is supported, allowing users to start printing only after entering a pin code on the operation panel of the printer to help limit information leakage. Plus, users can easily print posters directly from the printer without using a PC by saving data directly to the hard disk or can print straight from a USB Thumb Drive.

**INTEC MEGABOND DIGITAL LAMINATES**

Megabond laminating films are coated with a more aggressive adhesive producing a 50% higher bonding strength than standard offset litho laminating films. Megabond adhesive will bond over digital prints and the oils/waxes. Megabond Laminates are single sided digital laminating film suitable for both litho/offset print and most digitally produced media.

**INTEC OVER PRINTABLE DIGITAL LAMINATES - SUITABLE FOR MOST TONER BASED DIGITAL PRINTERS**

Intec has manufactured a specially Corona treated digital laminate designed to be over printable - it will accept toner from most digital devices - to enable the creation of additional special effects such as the ability to overprint and spot film effects (Gloss or Holographic). This film uses Megabond Adhesive which has a more aggressive adhesive producing a 50% higher bonding strength than standard offset litho laminating films. Megabond adhesive will bond over digital prints and the oils/waxes contained within toners plus the Corona treatment enables you to reprint on to the laminate for special effects.

**INTEC FLARING FOILS and FLARING FILMS**

Flaring Foils, will bond to any toner on the sheet enabling you to add metallic or other special effects to your print - ideal for high quality brochures, wedding stationary, labelling, packaging and so much more. They do not require pretreatment and do not require the surface to be laminated. However if you wish to add spot metallic or holographic effects onto a page with CMYK then you may need to print your CMYK image first, then protect this in a digital laminate - so you can then over print the area of image that you wish to apply the foil or metallic effect.

images placed on top of Intec overprintable laminates.

\*\* Spot Gloss and Holographic films can not be over printed. These should be the last effect placed on a sheet.

\*\*\* Intec Holographic Flaring Film can be reused for at least 5 applications - making it extremely cost effective to add a sparkle to your print. Thus one roll can add sparkle to 1,500 meters of print or 3,500 SRA3 sheets.

**How To Order uniFLOW Subscription:**

**Step One:**

Online Tenant Provision: For any new account, a uniFLOW Online Customer Tenant must be created on the uniFLOW Online Portal (URL Link is emailed to the Tenant Admin). If a Customer already has a uniFLOW Online Tenant, then skip this Step.

**Step Two:**

Visit the Canon Business Services Platform: Place an order for the number of Device Licenses with the Customer Tenant Serial Number on the Canon Business Services Platform.

**Step Three:**

Annual Subscription (New & Renewals): Select the appropriate quantity of Device Licenses in accordance with 1-year end-dates.

First Time Order: Be sure to provide the correct Customer Tenant Serial Number when ordering the Device Licenses (Annual).

Renewals: Extend the End Date of the subscription by purchasing the same quantity of Licenses (Annual).

**Step Four:**

Professional Services: If required, select the Canon U.S.A. Professional Services indicated in the Statement of Work.

**Step Five:**

Mid-Term, Coterminous Add-ons: For use only when a Customer has a subscription in place and wishes to add additional devices. Monthly add-ons are ONLY to be ordered for existing Customers in the middle of their active subscription term, and the quantity of months to order is determined by the number of months remaining in the Customer's annual subscription term. The month in which the coterminous item is ordered is counted as a full month, regardless of which day in the month the order is placed. We recommend coterminous orders be placed at the start of the month.

**For Example:** 4 months into their 1-year subscription, a Customer wants to add more Device Licenses. In this example, if the coterminous order is placed early in the 5th month, it would need to be for a quantity of 8 months (multiplied by # of devices added) to be coterminous with the expiration date of the Customer's current, annual subscription.

**Step Six:**

Universal Login Manager (ULM) Is Required: Third Generation imageRUNNER ADVANCE or later systems come standard with ULM. For First and Second Generation imageRUNNER ADVANCE systems, Customers are required to install ULM free of charge

**Step Seven:**

Card Readers & Hardware Accessories: Optional MiCard Readers and hardware accessories can be purchased separately through C.N.A.

## Footnotes & Descriptions

<\*> uniFLOW Online Subscription service billing is based on calendar month. The end date of the service will always fall on the last day of the month. For example, if a PO is placed on Jan 15th for a 1 year subscription, the end date of the service will be Dec 31st ,not Jan 14th of the next year. In this example the 1st month of service is calculated from Jan 15th to Jan 31st. If additional licenses are ordered on May 20th, 8 months of subscription have to be purchased for it to be co-terminus. This is because the first month of additional licenses is calculated from May 20th to May 30th and the end date of the subscription is Dec 31st.

<1> uniFLOW Print & Scan is sold as an annual subscription. The licenses are sold per device / per month, but the initial upfront purchase requires a minimum of 1 Year per device.

<2>When ordering uniFLOW device based subscription in Canon Business Services Platform, please specify number of type 1 devices for each tenant. The \$0 item code **"3575B844AA"** will be used in Canon Business Services Platform.

<3> Tier pricing is based on the total number of devices purchased for uniFLOW Print & Scan Type 1 devices, existing subscription plus new order, but not the number of device licenses for Type 2 or Image Processing Subscription. Canon Business Services Platform will apply the item code and tier price accordingly.

<4>When ordering uniFLOW device based subscription in Canon Business Services Platform, please specify number of type 2 devices for each tenant. The \$0 item code **"3575B845AA"** will be used in Canon Business Services Platform.

<5> Tier pricing is based on the total number of devices purchased for uniFLOW Print & Scan Type 2 devices, existing subscription plus new order, but not the number of device licenses for Type 1 or Image Processing Subscription. Canon Business Services Platform will apply the item code and tier price accordingly.

<6> uniFLOW Image Processing is sold as an annual subscription. The licenses are sold per device / per month, but the initial upfront purchase requires a minimum of 1 Year per device.

## Opening a MINDR Ticket

A MINDR Ticket is required for replacement of any defective NT-ware Hardware, such as a MI Card reader, a micro MIND, or a uniFLOW Release Station. Of course, the Hardware must be under warranty. Please check the NT-ware Hardware Warranty Guide located on the ISG Marketing website for more information.

**A MINDR Ticket can only be opened by a uniFLOW Certified Technician.**

To open a MINDR Ticket, please visit the NT-ware Issue Tracking System (ITS) website: <https://web.nt-ware.net/its>, and click Create Issue. When the Create Issue screen pops up, please fill in as much detail as possible, and click Create.

The screenshot shows the 'Create Issue' form in the NT-ware ITS system. The form is titled 'Create Issue' and includes a 'Configure Fields' button in the top right corner. The form fields are as follows:

- Project:** MIND Retour
- Issue Type:** Question
- Region:** USA
- Summary:** Defective MiCard PLUS (need replacement)
- Serial Number (HW):** 3F123456
- Priority:** Minor (D)
- Product and Version (HW):** MiCard PLUS
- Description:** Card reader is powered on after plugging into the iR device. But there is no card read out. Tried using pcPROX utility to change card frequency, but no success. Can you please issue RMA and replace card reader?
- Shipping Address:** (Empty field)

At the bottom right of the form, there are three buttons: 'Create another', 'Create', and 'Cancel'.

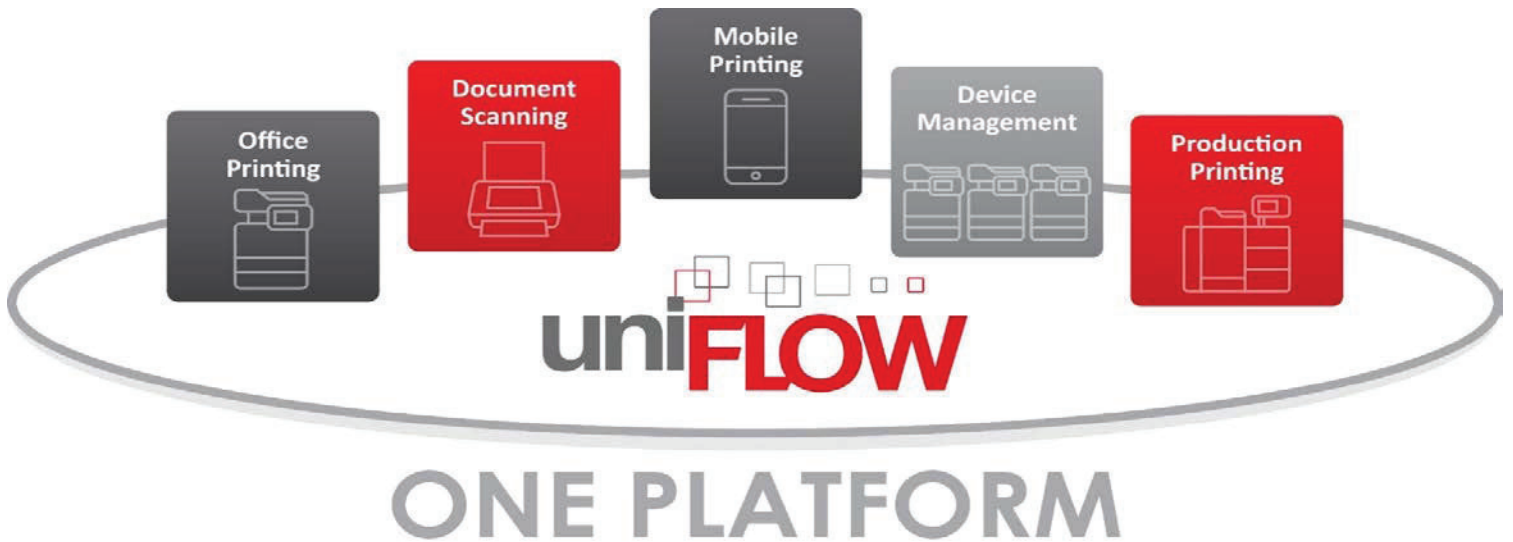

<\*> uniFLOW includes 1 year of Maintenance & Support (Software Assurance - SA Points) in the base price of the product.

Software Assurance for uniFLOW is defined by a point system. The SA Points column indicates the number of SA Points required for 1 additional year of Maintenance & Support. More information is available on the ISG Marketing website.

For upfront purchases of SA Points (during the initial order), the uniFLOW Base Serial # is not required.

However, for later purchases of SA Points, the uniFLOW Base Serial # is required.

<#> These items can be ordered by any Dealership without engaging Canon U.S.A. Professional Services (CIIS), as long as at least one Systems Engineer from the Dealership has completed the uniFLOW Technical Training course, and passed the certification test.

<16> File Format conversion is suggested when performing MS Office, or other file format conversions for Mobile Printing.

<17> JCI's provide a variety of different functions. JCI's are required to be purchased for each server and/or RPS where the functionality is required. Servers with multiple processors or processor cores can have multiple JCI licenses to improve processing time. Functions provided by JCI's include: Conversion of Postscript jobs to PCL for use with the Universal Driver, Page level color analysis of Postscript print jobs for accurate cost calculation, and Conversion of PDF jobs to Postscript. It is recommended to add 2 JCI's when the CRD Workflow is being implemented.

<18> This module is used to convert PCL to PDF. For example, if, due to aspects of size or costs, a print job is re-routed from an office printer to a print room.

3575B485AA	Additional Scan Workflow License <*><#><12>	9	\$ 1,240

<12> This license allows scanning to a Scan-to-DMS/ECM destination, such as HP Worksite, FileNet, Content Server, and more. For each DMS/ECM destination, an Additional Scan Workflow License is required. The Scan Device License for MEAP or the uniFLOW Capture Device License for MEAP is a prerequisite.

For a list of Additional Scan Workflows, please see page 22. A MOMPS # is required at the time of order. Please see page 26 for a guide on how to open a MOMPS #.

<32> Basic uniFLOW Server license including Scanning functionality. Limited to 500 users, floating (for 1 MEAP-Enabled device).

<33> Use this license to add uniFLOW for SMB - Print Device License for MEAP when uniFLOW Capture - Scan Device License for MEAP is already purchased.

**uniFLOW Scanning Device License for imageFORMULA Scanners**

Item Code	Description	SA Points	MSRP
3575B518AA	Scan Device License for ScanFront & ScanKiosk <*><#><49>	4	\$ 380
3575B677AA	uniFLOW Desktop Scan Client License <60>	4	\$ 250

<49> For enabling the scan interface on a scanner, the uniFLOW Scan Device License is required on each device where scanning will take place.

Authorization to sell and service the imageFORMULA scanners is obtained separately from uniFLOW products.

<60> A uniFLOW Desktop Scan Client License enables one client application to connect one desktop scanner to one workstation.

3575B413AA	PCL Job Conversion <*><#><18>	16	\$ 1,270

<16> File Format conversion is suggested when performing MS Office, or other file format conversions for Mobile Printing.

<17> JCI's provide a variety of different functions. JCI's are required to be purchased for each server and/or RPS where the functionality is required. Servers with multiple processors or processor cores can have multiple JCI licenses to improve processing time. Functions provided by JCI's include: Conversion of Postscript jobs to PCL for use with the Universal Driver, Page level color analysis of Postscript print jobs for accurate cost calculation, and Conversion of PDF jobs to Postscript. It is recommended to add 2 JCI's when the CRD Workflow is being implemented.

<18> This module is used to convert PCL to PDF. For example, if, due to aspects of size or costs, a print job is re-routed from an office printer to a print room.

<4> Basic server license, with which you can activate one of the following modules: Statistics, Secure Public Printing, Desktop Accounting, Rules & Routing,

External Budget Connector, CRD Printing, Web Submission, and Application Connector (No user limitation).

<5> With one "Standard Module, Server-based Edition," you can activate one of the following modules: Statistics, Secure Public Printing, Desktop Accounting,

Rules & Routing, External Budget Connector, CRD Printing, Web Submission, and Application Connector. For Module Dependencies, please see page 21.

<6> The CMFP license will activate embedded uniFLOW functionality on the imageRUNNER 2500 Series & 1700 Series, and the Color imageRUNNER C1030 Series.

<7> The SFP license will activate embedded uniFLOW functionality on the imageRUNNER LBP3480 & LBP3580, and the Color imageRUNNER LBP5280 & LBP5480.

<8> Please check the NT-ware Partner website for a list of supported Multi-Vendor Devices.

<9> CIIS Professional Services must be engaged in all projects involving CAC/PIV integration with uniFLOW.

<10> Prices are stated per single unit.

<11> For enabling the scan interface on a MEAP enabled MFP, the uniFLOW Scan Device License for MEAP is required on each device where scanning will take place.

<12> This license allows scanning to a Scan-to-DMS/ECM destination, such as HP Worksite, FileNet, Content Server, and more. For each DMS/ECM destination, an Additional Scan Workflow License is required. The Scan Device License for MEAP or the uniFLOW Capture Device License for MEAP is a prerequisite.

For a list of Additional Scan Workflows, please see page 22. A MOMPS # is required at the time of order. Please see page 26 for a guide on how to open a MOMPS #.

<13> The Scan Processing Server license provides the I.R.I.S. iDRS TM tools, and needs to be licensed and installed on each server where scan processing will take place.

This can either be the uniFLOW Server, the RPS, or a different server.

<14> This plug-in supports the integration with Blackboard or CardSmith. A MOMPS # is required at the time of order. Please see page 24 for a guide on how to open a MOMPS #.

<16> File Format conversion is suggested when performing MS Office, or other file format conversions for Mobile Printing.

<17> JCI's provide a variety of different functions. JCI's are required to be purchased for each server and/or RPS where the functionality is required. Servers with multiple

processors or processor cores can have multiple JCI licenses to improve processing time. Functions provided by JCI's include: Conversion of Postscript jobs to PCL

for use with the Universal Driver, Page level color analysis of Postscript print jobs for accurate cost calculation, and Conversion of PDF jobs to Postscript.

It is recommended to add 2 JCI's when the CRD Workflow is being implemented.

<18> This module is used to convert PCL to PDF. For example, if, due to aspects of size or costs, a print job is re-routed from an office printer to a print room.

<19> Required for uniFLOW integration with iWSAM Express.

<20> The VDP Module allows corporate print rooms to integrate variable data printing applications into the product offering of their web shop. The module includes

3 licenses, namely the actual VDP license, and the 2 licenses of the FusionPro Software Package (FP Designer and FP Server). It also supports the open standard

markup language, PPML (Personalized Print Markup Language). With the help of PPML, all reusable contents of a print job can be marked as such. For an interaction

of VDP and PPML, a VDP Enablement Kit needs to be installed on the controller of the print device.

<21> MiCard PLUS supports 35 different card frequencies. For more information, please visit the ISG Marketing website. Also, please see back page.

<22> This cable is needed to connect an RFIdeas card reader with RS-232 port to the microMIND unit. RFIdeas' card reader with USB connection will NOT connect directly to a microMIND unit.

**Footnotes & Descriptions (continued)**

- <23> The Copy Control Cable is used to connect most of the Canon iRs to microMIND, and offers a secure lock of the device for copy cost accounting.
- <24> The iR1600/2000 Copy Cable set is used for connecting the iR1600/2000 type of devices to microMIND, and offers a secure lock of the device for copy cost accounting.
- <25> When ordering the copy control cable for any non-Canon devices, please open a MOMPS # with NT-ware to ensure the appropriate cable is delivered.  
Please see page 26 for a guide on how to open a MOMPS #.
- <26> Can be used with select Ricoh, Toshiba, and Xerox WorkCentre MFPs. Please check the NT-ware Partner site for a complete list of supported devices.

- <45> This consists of 10 licenses of uniFLOW - 45 day trial. Each trial license includes uniFLOW Enterprise Edition, all uniFLOW Modules, 5-MEAP licenses, and 5-RPS'. Dealerships are advised to manage the licenses. A trial license will not be allowed to be transferred.
- <46> This is a 180-day trial (single license). Each trial license includes uniFLOW Enterprise Edition, plus all Modules, plus 200 MEAP, plus 50 RPS', and 2 JCI licenses.
- <47> Only 1 order of a quantity of 1 is permitted for each Dealer Showroom.
- <48> The Systems Engineer 5-Day In-Class Training Course is required for uniFLOW Dealer Authorization. Place one purchase order for each uniFLOW training course.  
Each additional training course must be placed separately.
- <49> For enabling the scan interface on a scanner, the uniFLOW Scan Device License is required on each device where scanning will take place.☐  
Authorization to sell and service the imageFORMULA scanners is obtained separately from uniFLOW products.
- <50> Can be used with select Kyocera MFPs. Please check the NT-ware Partner site for a complete list of supported devices.
- <51> Can be used with select Samsung MFPs. Please check the NT-ware Partner site for a complete list of supported devices.
- <52> The MiCard PLUS-2 SC additionally supports the HID iCLASS® ID and the HID iCLASS® SE/SR ID.
- <53> Please check the NT-ware Partner website for a list of supported Océ Devices.
- <54> For detail information and differences between uniFLOW Release Station Extended Warranty Program and the Full Insurance Program, please visit  
ISG Central or NT-Ware Partner Site.
- <55> With the purchase of the ULM items above, a uniFLOW Login Manager license is included for use if and when a customer adds devices on the uniFLOW Server.
- <56> The above multiple Device License tiers (5, 10, 25, 50, 75, 100, and 250) can be used on all MEAP enabled devices, including 3rd Generation imageRUNNER ADVANCE.
- <57> This Upgrade license can be used on 2nd Generation imageRUNNER ADVANCE, and previous MEAP enabled devices, which have the purchased ULM installed.
- <58> This license is designed for government organization and requires preapproval via MOMPS. A MOMPS # is required at the time of order.  
Please see page 26 for a guide on how to open a MOMPS #.

**Footnotes & Descriptions** (continued)

## uniFLOW Software Assurance (SA Points) Information

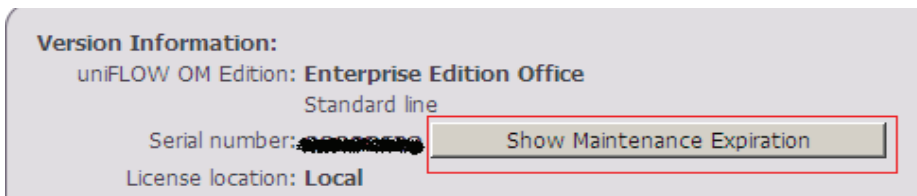

uniFLOW is bundled with the 1st year of Software Assurance, which entitles customers to telephone support through their authorized dealer, major and minor version upgrades, and bug fixes and patches. Product updates are vital in maintaining the on-going operation of uniFLOW and in delivering new functional capabilities. In addition, access to phone-based technical support is also important to ensure rapid resolution to problems that may be encountered in configuring or using the software.

All customers running uniFLOW v4.0.x and higher can check their Software Assurance status within their uniFLOW server by following the steps below:

**Step 1:** Access the uniFLOW Server by typing `http://<IP_AddressOfuniFLOWServer>/pwserver`

**Step 2:** Enter required login/password

**Step 3:** On the "INFO" page  click on the "Show Maintenance Expiration" button

**Step 4:** uniFLOW will display a new window with the information on Software Maintenance Expiration

## uniFLOW Software Assurance (SA Points) Information (Continued)

**Step 5:** Alternatively, Software Assurance can be checked at the following website: <http://web.nt-ware.net/license/serialinfo.php>

**Note:** The uniFLOW Base serial number is required to obtain the Software Assurance information.

The base serial number is an 8 character code (alphanumeric). **Example: 0000AB8A**

The screenshot shows the uniFLOW License portal interface. At the top, it displays the Serial Number (partially obscured), the activation/upgraded date (04.09.2009), the SA expiration date (05.09.2010), and the days remaining (-89). Below this, there is a progress bar for the SA term, with markers at 0, 3M, 6M, 9M, 12M, 15M, 18M, and 21M+. A table titled 'SAP Purchase history' shows no extra SAP purchased yet. The main table lists the following modules and their SA points:

Amount	Module	SA per Module	Total SA per Module
1	uniFLOW Basic License, Enterprise Edition / UFEEOFF	104	104
1	uniFLOW SPP Device License for MEAP 100 Device	167	167
5	uniFLOW SPP Device License for MEAP 1 Device	3	15
2	uniFLOW Enterprise Edition - Module Remote Print Server / MMRPE	24	48
2	uniFLOW Standard Module, Enterprise Edition / AMEEOFF	46	92
4	Job Conversion Instance / JCI	16	64
		<b>Total SA per Year</b>	<b>490</b>

Don't risk missing out on your ability to access technical support or the new improvements NT-ware has made to uniFLOW by becoming ineligible for maintenance.

Please contact your Canon Sales Rep for information about uniFLOW Software Assurance, and for instructions on how to purchase this important on-going coverage.

**Note:** When ordering Software Assurance Points, the uniFLOW base serial number is required. It can be entered into the "Special Instructions" field on the Canon Ordering screen. More details can be obtained from your Regional Admin group.

Please visit the Canon U.S.A., Inc. Extranet at [www.isgcentral.cusa.canon.com](http://www.isgcentral.cusa.canon.com) to download the uniFLOW v5 Software Maintenance and Support Guide.

## Opening a MOMPS #

A MOMPS # is required when placing an order for a Copy Control Cable for Multi-Vendor Devices, RIAS, Customization Units, Upgrades, and the uniFLOW Release Station Exchange Program.

**A MOMPS # can only be opened by a uniFLOW Certified Technician.**

To open a MOMPS #, please visit the NT-ware Issue Tracking System (ITS) website: <https://web.nt-ware.net/its>, and click Create Issue. When the Create Issue screen pops up, please fill in as much detail as possible, and click Create.

**Create Issue**

## Opening a MINDR Ticket

A MINDR Ticket is required for replacement of any defective NT-ware Hardware, such as a MiCard reader, a microMIND, or a uniFLOW Release Station. Of course, the Hardware must be under warranty. Please check the NT-ware Hardware Warranty Guide located on the ISG Marketing website for more information.

**A MINDR Ticket can only be opened by a uniFLOW Certified Technician.**

To open a MINDR Ticket, please visit the NT-ware Issue Tracking System (ITS) website: <https://web.nt-ware.net/its>, and click Create Issue. When the Create Issue screen pops up, please fill in as much detail as possible, and click Create.

The screenshot shows the 'Create Issue' form in the NT-ware ITS system. The form is filled out with the following information:

- Project:** MIND Retour
- Issue Type:** Question
- Region:** USA
- Summary:** Defective MiCard PLUS (need replacement)
- Serial Number (HW):** 3F123456
- Priority:** Minor (D)

## DATA SECURITY PRICING GUIDE

**DAHLE**

# Why Choose Dahle?

Recent events have made shredding confidential information a necessity. Documents found in the trash are not legally protected so they're fair game to individuals looking to find out more information about you and your business. This explains the rapid increase in identity theft and industrial espionage. Federal security laws require that medical and financial institutions as well as business owners must prop-

erly safeguard their client's personal information. What's the best way to dispose of this information? Shred it with a Dahle Professional Shredder.

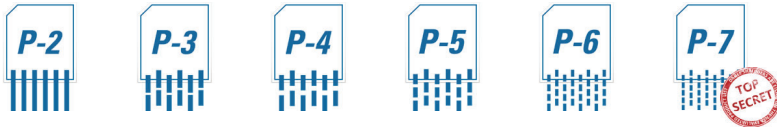

Dahle shredders are carefully engineered in Germany by Novus Dahle GmbH using the latest technology and finest materials. Each component is manufactured and assembled with precision from 90 years of experi-

ence. Dahle shredders feature cutting cylinders that are guaranteed to last a lifetime. Other components such as rubber shock mounts, electronic sensors, and a thermally protected motor produce a quality machine and peace of mind in knowing your Dahle shredder will provide many years of trouble-free operation.

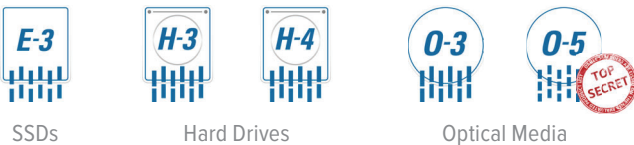

## Security Levels

Under the international DIN 66399 standard, Dahle offers six security levels for document destruction. Each increase in security level represents a smaller particle (shred) size. A shredder with a greater security level will offer a lower sheet capacity compared to a lesser security model. Be sure to understand your company's security requirements before making a selection.

### Document Security Levels

### Digital Media Security Levels

Desktop — Auto-Feed — Small Office — Office — Department — High Capacity — Digital Media — High Security

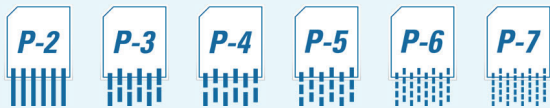

# Dahle Shredders

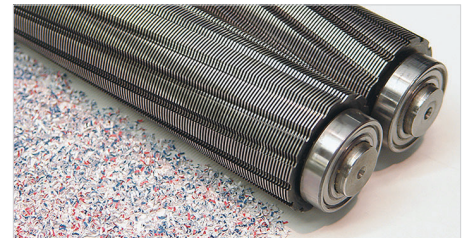

## Professional Shredders for Document Destruction

Secure information should never fall into the wrong hands. Dahle shredders are your best line of defense in preventing unauthorized access to secure information. Whether it's personal credit card statements or Top Secret government documents, Dahle has a shredder that will meet your needs.

# Company profile

The history of the emco Group based in Lingen, Emsland, began when Erwin Müller founded the company in 1945. From humble beginnings grew a global company with a multi-layered range of products. In the reporting year, we can look back over a 73-year history of the company. At the end of 2018, the company had around 1,290 employees worldwide. In addition to the parent company Erwin Müller GmbH, the emco Group comprises a total of 23 branches. As the parent company, Erwin Müller GmbH is responsible for setting and pursuing the corporate goals for the entire group. It is also responsible for the management, control

and monitoring functions, including risk management and the allocation of resources. However, the subsidiary companies retain legal independence. Operational control is the responsibility of the management board of the holding company, which consists of the managing partner, Christian Gnaß (CEO), and Daniel Sobhan-Sarbandi (CFO). An advisory board acts as a supervisory body.

## Products

We strive to provide our customers with high-quality and innovative products. At the same time, we are aware of the environmental responsibility associated with our products from development to disposal. Our products' long service lives make a demonstrable contribution to minimising burdens on the environment. We require of our suppliers that they structure their own operations in manner that is responsible and socially beneficial.
