# Introduction

Accreditation certifies — to other educational institutions and to the general public — that an institution meets or exceeds established standards and is achieving its own stated objectives. The Accrediting Commission for Schools, Western Association of Schools and Colleges (ACS WASC) and the other regional associations in the United States grant “institutional accreditation” after a comprehensive self-study followed by an on-site evaluation of the programs and services of the total institution. This means that all diploma or degree programs and educational activities offered by an institution are covered by the institution’s accreditation. The evaluation determines whether or not the institution qualifies for regional recognition, but more importantly, periodic self-studies and reviews promote improvement in educational quality.

Although accreditation serves as an indicator of quality for a school (PK–12 and adult), the primary goal of accreditation is school self-improvement. The process involves three steps:

1. **An in-depth study** and self-evaluation conducted by the staff and community of a school with the help of instruments developed for specific kinds of schools.
2. **On-site observation** by a visiting committee that validates the school report, evaluates its findings, and makes a recommendation to the Commission for accreditation.
3. **Commission study** and discussion of the visiting committee’s report, with subsequent action to grant, extend, or deny accreditation.

The Accrediting Commission for Schools, WASC requires the application of qualitative criteria and substantial documentation of student performance rather than mere confirmation of a school’s adherence to minimum quantitative standards. Accreditation is granted when there is compelling evidence that a school is substantially accomplishing its own stated purposes and functions identified as appropriate for an institution of its type; and that a school is meeting an acceptable philosophy, goals, and objectives; organization; student personnel services; curricular programs; co-curricular programs; staff; school plant and physical facilities; and finance.

This directory provides information about those schools currently accredited by WASC and those schools that have been granted the status of candidacy for a period of three years.

The “Accredited Schools” section serves as an excellent resource to learn about the schools currently accredited by WASC. The following information is provided for each school:

- School name, address, phone number, and ACS WASC ID number
- Grade levels except for adult education, including ROCs
- Type of school: public, Non-public; and multi-campus, if applicable
- The span of years for which a school has been accredited; years shown, i.e., 1973/2022, indicates the year that the school was first accredited and the year through which the school is currently accredited.

The “Candidate Schools” section provides information about the schools that have been granted the status of candidacy for a period of up to three years. This is an affiliation that indicates that an institution has achieved initial recognition and is progressing toward, but does not assume, accreditation. These schools are strengthening their program and operation as they move into the full evaluation process based on the WASC criteria.

## **Supplementary Education Centers/Programs**

A Supplementary Education Center/Program (SEP) is an organization that offers programs of instruction in specific areas of learning designed for elementary and/or secondary age students, who are in need of, or desire, educational development in one or more areas. Student attendance in a SEP is limited to the time required for success in the specific area(s) of learning for which the student is enrolled. Typically, students who enroll in a SEP have had, are having, or look forward to having full-time participation in a comprehensive school and attend the supplementary education program as a means of strengthening specific abilities within their comprehensive education.

A SEP may be unaffiliated, part of an identifiable network, or exist through the auspices of a corporation dedicated to the provision of supplementary education either as owned by the corporation, a franchise of the corporation, or managed under a contract with the corporation. Regardless of these alternatives it is always accredited under its own name and responsibility.

A separate listing within the directory provides information about the Supplementary Education Centers/Programs.

## **Postsecondary Title IV Schools**

WASC is pleased to partner with the Council on Occupational Education (COE) for postsecondary schools that either currently receive, or plan to receive, Title IV funds from the United States Department of Education (USDE). Postsecondary institutions that receive Title IV student financial aid are required to meet very specific standards based upon federal guidelines overseen by the United States Department of Education. Contact the COE ([www.council.org](http://www.council.org)) for more information regarding Title IV accreditation.

The directory provides information about the Title IV schools currently accredited by WASC/COE and jointly accredited by WASC.
