WELCOME to JAM 2011!

**Jim Linn,
ADSA President**

**Ronnie Green,
ASAS President**

Welcome to the Big Easy and world's leading scientific meeting on animal agriculture and animal food products, the Joint Annual Meeting (JAM) between the American Dairy Science Association® (ADSA®) and the American Society of Animal Science (ASAS). A record number of abstracts (2171) for a two-society meeting await you, as do a total of 47 symposia, pre-conference events, and workshops. Add in the networking with colleagues and scientists from more than 55 countries and the opportunity to visit with close to a hundred exhibitors displaying the most current technologies and products, and you have the most comprehensive educational experience possible. Take advantage of the professional development and opportunities for cross-pollination of ideas while you renew old friendships and establish new ones. Activities start with the American Society for Nutrition (ASN)-ASAS-ADSA full-day symposium on Saturday, followed

by the Triennial Lactation Symposium, the late-breaking research session, student events, and the opening session and reception on Sunday. Then, be sure to take time out to savor and enjoy what many feel is the most unique city in America, as we do our part to help support the city and the people of New Orleans.

The opening session will feature an introduction to the culture and agriculture of Louisiana and a special performance by the iconic Preservation Hall Jazz Band. Information in this program book highlights some of what awaits you in New Orleans and the infamous French Quarter and Bourbon Street areas.

The program committees have worked hard to assemble an outstanding set of symposia and presentations. Thank you to the chairs and members of the program committees for their diligent work to review abstracts and plan sessions for a unique and timely scientific program. We especially thank the Overall Program Committee—Dave Casper (chair), Clint Krehbiel (vice-chair), Tony Capuco (vice-chair), and Jack Whittier (vice-chair)—for their leadership and contributions to the success of this meeting. The scientific program will commence on Monday morning and conclude by noon on Thursday. Monday, Tuesday, and Wednesday sessions kick off at 7:30 am with 2 hours of posters before the oral presentations begin.

Be sure to attend the award programs recognizing members of our societies for excellence in teaching, research, outreach, and service. The ASAS awards program will take place on Monday evening at 7:00 pm and the ADSA awards program will take place on Tuesday at 7:00 pm. Following the awards program on Tuesday is an ice cream social for all attendees and their families to visit together and congratulate both ADSA and ASAS award winners.

The JAM is a major undertaking that requires continuous yearlong planning. It would not be possible without the dedicated work of many people. In addition to the program committees, we thank the FASS staff, with a special thanks to Jennifer Gavel, the JAM Program Coordinator, for making this event happen. However, the event would not be possible without the participation of you and the thousands of animal and dairy scientists who contribute to the scientific content of this meeting. We thank you for sharing your research and advancing our knowledge in the field of animal and dairy sciences.

We hope you enjoy this meeting and the many opportunities for scientific and social interaction it affords. Please be sure to attend the Global Networking Reception on Wednesday afternoon—open to all JAM attendees—to visit with friends and attendees from around the world. Catherine Woteki, Under Secretary for Research, Education, and Economics at the USDA, will speak at the reception. The JAM is a great manifestation of what it means to be a member of our societies. If you are not a member, please consider joining ADSA, ASAS, or both.

Thank you for your cooperation.

The one-way taxi fare from the airport will be \$33.00 (current as of the time of printing). Many people choose to walk the area, but three streetcar lines can help you get around if you prefer. Each trip on the streetcar costs \$1.25. Pick up a visitor guide or French Quarter walking brochure at the convention center for more information on ways to get around New Orleans.

Introducing

AgriNIR™

PORTABLE ANALYZER FOR FORAGES

the forage analyzer that goes
wherever you go.

Now you can test forages for variations in dry matter and nutrient value quickly and efficiently on the farm with the new portable AgriNIR™ Portable Forage Analyzer from dinamica generale®!

- ⚡ AgriNIR's portability makes it fast and easy to take samples from multiple locations.
- ⚡ Adjust rations the same day and more accurately match nutritionist recommendations.
- ⚡ No more "guessing" how much dry matter has changed since the sample was sent for analysis to a lab.

TAKE CONTROL & INCREASE FEED EFFICIENCY WITH THE AgriNIR PORTABLE FORAGE ANALYZER

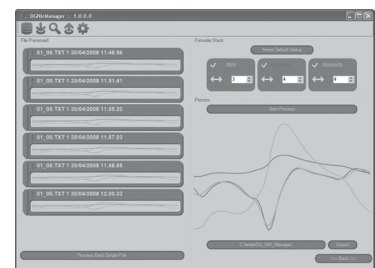

Research by the U.S. Dairy Forage Research Center shows that variations in stored forage dry matter after rain or snow can decrease milk production by 4 to 6 lbs per head per day.

Their study also shows that forage variability can be managed through rapid, on-farm NIR analysis of dry matter content and making daily ration adjustments to account for added moisture.

Why risk a drop in milk production? Adjust rations in real time.

The **dg NIR Manager Software Suite** that comes with the unit is designed to create or update calibration curves involving new NIR crop families or new chemical parameters of existing NIR crop families.

For more information on the AgriNIR, call **715-781-7134** or email dg-usa@dinamicagenerale.com to set up an appointment for a demo today!

Mixed Models
390
8:30 AM - 11:30 AM

The Mixed Models workshop provides a comprehensive exposition of proper statistical data analysis and power determinations of commonly used experimental designs in the animal sciences; our approach is example-driven and primarily based on the various mixed model analysis procedures available in SAS software.

Author Index

Numbers following names refer to abstract numbers; a number alone indicates an oral presentation, an M prior to the number indicates a Monday poster, a T indicates a Tuesday poster, and a W indicates a Wednesday poster.

The author index is created directly and automatically from the submitted abstracts. If an author's name is typed differently on multiple abstracts, the entries in this index will reflect those discrepancies. Efforts have been made to make this index consistent; however, error from author entry contributes to inaccuracies.
