Hawaiian Native and Naturalized Vascular Plants Checklist (December 2012 update)

INTRODUCTION

A product of the Bishop Museum's Hawaii Biological Survey, the Hawaiian Native and Naturalized Vascular Plants Checklist is an authority file of names of accepted native and naturalized angiosperm, gymnosperm, and pteridophyte/lycophyte taxa in the Hawaiian Islands. The file is maintained as a Microsoft Access database in the Department of Natural Sciences/Botany, Bernice P. Bishop Museum. The foundation for the dicot and monocot sections of the checklist is the *Manual of the Flowering Plants of Hawai'i* (Wagner et al. 1990, 1999, hereafter referred to as the *Manual*), while that of the fern/lycophyte section is *Hawai'i's Ferns & Fern Allies* (Palmer 2003). Naturalized records of gymnosperms have been included since being first reported in 2002 (Oppenheimer 2002).

This checklist is periodically updated to incorporate newly published native and naturalized island and state records, nomenclatural and taxonomic changes, and newly described native taxa. Many of the additions are garnered from the annual Bishop Museum publication series, *Records of the Hawaii Biological Survey* (1994 and continuing). Additions of new island or state records are based on published sources supported by voucher specimens; not included are citations based on anecdotal reports or casual observations, or on unpublished checklists or manuscripts. This checklist tracks and attempts to maintain conformity with the taxonomic concepts of the Smithsonian Institution's National Museum of Natural History *Flora of the Hawaiian Islands* website (<http://botany.si.edu/pacificislandbiodiversity/hawaiianflora/index.htm>), which periodically publishes online supplements that update names and distributions since publication of the *Manual* in 1990. At this writing, the latest available supplement is dated 12 April 2012 (version 1.3, http://botany.si.edu/pacificislandbiodiversity/hawaiianflora/Hawaiian_vascular_plant_updates_1.3.pdf).

Pending nomenclatural or taxonomic changes or in-press taxa are generally excluded until they are published, although exceptions are made. Proposed additions or changes to the checklist are reviewed and evaluated by staff botanists, often with outside consultation, before acceptance. While the formal checklists in Appendix A and B list only currently accepted names, Appendices C and D provide cross-referencing for all name changes

subsequent to publication of the *Manual* in 1990. This update is through December 2012.

BACKGROUND

The initial version of this checklist was published as "Checklist of Native and Naturalized Flowering Plants of Hawai'i" (Imada et al. 1989). That checklist presented, in telegraphic format, a concise accounting of all 1,963 taxa of native and naturalized flowering plants to be treated the following year in the *Manual of the Flowering Plants of Hawai'i* (Wagner et al. 1990). Arranged alphabetically by family, each taxon was listed alphabetically by scientific name with authorship, distributional status, endangerment status (if any), and island distribution. In some cases, more specific locality data was provided, primarily for taxa with localized distribution or known from only a few collections. The intent of the checklist was to provide the user a quick-access reference for use in the field. It was hoped that the checklist would stimulate further studies of species distributions in the state, especially for undercollected weedy non-native species.

In 1992, the Hawai'i State Legislature designated the Hawaii Biological Survey (HBS) as a program of the Bishop Museum. Building upon a century of scientific studies documenting and developing reference collections of the plants and animals of Hawai'i, Bishop Museum developed a reputation as the go-to source of information on Hawaiian organisms. Among its responsibilities, HBS maintains and updates inventories of the flora and fauna of the Hawaiian Islands. The *Records of the Hawaii Biological Survey* series has been published annually since 1994 to disseminate information on new island and state records of plants and animals. As part of that mandate, the Botany unit has maintained an inventory of the native and naturalized flowering plants of Hawai'i, originally as a searchable database. However, more recent versions have been published on the Bishop Museum website as portable document format (pdf) files. The previous pdf online version is dated October 2008. The current version can be found online at <http://www.bishopmuseum.org/research/natsci/botany/botdbhome.html>. A searchable database format is also planned for the current version.

The *Manual* proved to be a tremendous reference source for stabilizing taxonomic concepts for Hawaiian plants and for catalyzing additional work in Hawaiian taxonomy, as amply attested to by the impressive list of post-*Manual* bibliographic citations included in this checklist. This checklist includes 2,983 taxa, over 1,000 more than were included in the original checklist in 1989. Partly this is due to the added inclusion of 270 native and naturalized gymnosperms and ferns/lycophytes, but also includes 60+ newly recognized native taxa (see Appendix E), 40+ resurrected native taxa (Appendix F), and 570+ newly documented naturalized taxa (Appendix G). The latter represents an annual average of 26 new naturalizations since the *Manual* was published in 1990. Grand totals for families, genera, and taxa included in this checklist can be found in Tables 1, 2, and 3 (page 5).

FORMAT

For ease of formatting, this checklist is split up into two geographic units. Appendix A covers the eight main Hawaiian Islands, listed in order geographically from northwest to southeast (Ni‘ihau, Kaua‘i, O‘ahu, Moloka‘i, Lāna‘i, Maui, Kaho‘olawe, Hawai‘i); also included as entities separate from nearby Ni‘ihau are Ka‘ula Rock and Lehua Island. Appendix B covers the Northwestern Hawaiian Islands (Papahānaumokuākea), also geographically from northwest to southeast (Kure, Midway, Pearl & Hermes, Lisianski, Laysan, Gardner Pinnacles, French Frigate Shoals, Necker, Nihoa). In each checklist, dicots are listed first, followed by gymnosperms, monocots, and pteridophytes. A nested alphabetic arrangement is followed within each group—family, genus, species, and infraspecies.

Family classifications for the dicots and monocots continue to follow the Cronquist system as adopted in the *Manual* (Wagner et al. 1990). While for now it will make navigation between the *Manual* and this checklist easier for the user, it is inevitable that the overwhelming molecular evidence for revised family concepts compiled by the Angiosperm Phylogeny Group (<http://www.mobot.org/MOBOT/research/APweb/>) will eventually be adopted by Bishop Museum’s *Herbarium Pacificum* and will be reflected in this checklist.

Likewise, family classifications for ferns and lycophytes follows that used in Palmer (2005). More modern classifications (e.g., Smith et al. 2006, Christenhusz et al. 2011) will be adopted in due time. For now, the reader can refer to the Smithsonian’s latest supplement (mentioned earlier), which

includes a listing of all the relevant family and generic changes affecting Hawaiian plants. Abbreviations of author names follows Brummitt and Powell (1992). If the author name is not included there, the author citation provided by The Plant List (<http://www.theplantlist.org>) is followed.

Checklists such as this one become outdated as soon as they are published, and error corrections, queries, or new information are much appreciated; they can be relayed to the author at cimada@bishopmuseum.org.

Distributional origin status is provided following the scientific name. The categories are as follows:

end	endemic, occurring only in the Hawaiian Islands
end?	possibly endemic, or possibly conspecific with a species occurring elsewhere
ind	indigenous, occurring naturally in the Hawaiian Islands but also elsewhere in the world
ind?	probably indigenous, but possibly introduced in the Hawaiian Islands by man
nat	naturalized, introduced by man and now established and maintaining or spreading their populations by vegetative or sexual means
nat?	probably naturalized, but possibly indigenous or a Polynesian introduction
pol	Polynesian introduction (intentional or unintentional)
pol?	possibly a Polynesian introduction, or perhaps introduced in historical times (nat)
?	species not confirmed to be truly naturalized, including present-day adventive and escaped plants, or historical collections not recently vouchered

Island abbreviation codes are compiled here and are also located at the foot of each checklist page. East Maui and West Maui were separated out if they were so listed in a publication. However, if a distribution is listed as “Maui,” it cannot be assumed that the taxon has been documented by vouchers on both East and West Maui, and no effort was made to clarify that status for this edition of the checklist. No effort was made to similarly designate distribution by region on other islands, (e.g., Ko‘olau vs. Wai‘anae on O‘ahu). Separate distribution lists were included for the small islands of Ka‘ula and Lehua. Lehua distribution records were infrequently

included in the *Manual*, and the bulk of distribution records included in this checklist were derived from Wood & LeGrande (2006). Distribution records from Ka‘ula were not included in the *Manual*, and the records listed here were included on the basis on voucher specimens stored in *Herbarium Pacificum*, Bishop Museum. Voucher records from Molokini, and islet of similar size off East Maui, were not included in this edition of the checklist.

Main Hawaiian Islands	Northwestern Hawaiian Islands
EM	East Maui
H	Hawai‘i
K	Kaua‘i
Ka	Kaho‘olawe
KI	Ka‘ula Rock
L	Lāna‘i
Le	Lehua
M	Maui
Mo	Moloka‘i
Ni	Ni‘ihau
O	O‘ahu
WM	West Maui
FF	French Frigate Shoals
GP	Gardner Pinnacles
Ku	Kure
La	Laysan
Li	Lisianski
Mi	Midway
N	Nihoa
Ne	Necker
PH	Pearl & Hermes

• Citations

The citation field provides a chronological, citation-based account of changes in island distribution and scientific names for each taxon dating back to Wagner et al. (1990 [for dicot and monocot taxa]) and Palmer (2003 [for ferns and lycophytes]), adding new island records, new naturalized records, and newly described native taxa as they become known. In most cases, a specific page number for the citation is included to aid quick access to information.

An added feature of this edition of the checklist is the inclusion of non-native taxa that are not currently considered naturalized, but that have, in the recent or distant past, been noted as such in the literature, or as displaying tendencies toward becoming naturalized. These taxa are designated by a “?” in the status column if they are not currently documented as being truly naturalized throughout their range in the state. If the taxon is naturalized on at least one island, but questionably naturalizing on others, the “?” immediately follows the island designation, followed by a parenthetical explanation for the designation [e.g., *Eucalyptus cladocalyx* (Myrtaceae, page A-122) is naturalized on Hawai‘i, but noted on O‘ahu and

Maui as forestry plantings with no vouchered record of naturalization]. By keeping these taxa in the checklist for now, the user can remain aware of them, and their status can perhaps more readily be clarified.

• Explanation of categories included in the Citation field:

COMBNOV (*combinatio nova*, new combination) = a new combination created when a taxon is transferred from one genus to another and the same specific epithet is used. *Ex. Canthium odoratum* (G. Forst.) Seem. = *Psydrax odorata* (G. Forst.) A. C. Sm. & S. P. Darwin; *Lobelia gaudichaudii* (A. DC.) subsp. *koolauensis* (Hosaka & Fosberg) = *L. koolauense* (Hosaka & Fosberg) Lammers [also a STATNOV, in this case].

DESCR (description) = the cited source includes a description of the taxon; the quality may range from a few essential diagnostic characters to a detailed botanical description.

EXTINCT? = published record announcing the likelihood that a taxon is extinct, either throughout its range or on a particular island. It is not a primary role of this checklist to monitor all reports of likely plant extinctions, a function more efficiently monitored locally by rare plant organizations.

KEY = the cited source includes a key that treats the taxon; the key may range in scope from a few closely related taxa in a genus to a regional key including extra-Hawaiian taxa.

misapplied = a scientific name that at some point in time is incorrectly applied in a sense different from that of the original author. Such names begin as misidentifications but can become misapplied by virtue of subsequent widespread adoption or perpetuation in publications. The misapplication can be widespread in scope (as with some popular but misidentified cultivated plants) or restricted to a small region (e.g., misidentification of the Hawaiian endemic tree fern *Cibotium menziesii* as *C. chamissoi* by Skottsberg in 1942). For simplification here, any misidentifications that are published locally (not in widely available publications) and later corrected are treated here as misapplied names, using the format *incorrect name sensu author/year citation, non author citation for authentic taxon*.

new island record = these are generally noted by island abbreviations in

parentheses following a bibliographic citation (e.g., Herbst & Wagner 1996:9 (WM) notes a new island record from West Maui on page 9 of their paper).

NEWNAT (new naturalization) = a newly documented naturalized record for the state; includes both records for taxa previously known from in Hawai‘i but not in a naturalized condition (i.e., new naturalized record), and those previously unknown in the state (i.e., new state record).

NOM = general indicator that a name change was made, usually a synonymization or correction of a misapplied name.

NOMNOV (*nomen novum*, new name) = a newly coined name necessitated for nomenclatural reasons; it is not a new taxon. *Ex.* When the genus *Rollandia* was synonymized into *Cyanea*, the binomial *Rollandia angustifolia* (Hillebr.) Rock should have become a COMBNOV as *Cyanea angustifolia*. Because the latter name had already been published for a different species [*C. angustifolia* (Cham.) Hillebr.], however, Lammers (1993) was able to coin a new epithet for the taxon, *C. koolauensis* Lammers, Givnish & Sytsma.

REDISCOVER = published record noting that a taxon thought to be extinct has been relocated; could refer to rediscovery on a single island of a multi-island taxon. However, it is not a primary role of this checklist to report on all rare plant rediscoveries, a function more comprehensively monitored locally by rare plant organizations.

RESURRECT = a taxon previously treated as a synonym is restored to recognized status; restored status may involve a COMBNOV or STATNOV. *Ex.* *Stenogyne sherffii* O. Deg., a synonym of *S. kaalae* Wawra in Wagner et al. (1990), was resurrected (Wagner & Weller 1999) as a subspecies, *S. kaalae* subsp. *sherffii* (O. Deg.) W. L. Wagner & Weller (both a COMBNOV and STATNOV).

SPNOV (*species nova*, new species) = a newly described species, based on an original type.

STATNOV (*status novus*, new status) = indicates that a name change involves a change in the rank (status) of a described taxon, such as a change from subspecific or varietal rank to full species, or vice versa. *Ex.* *Delissea*

undulata subsp. *kauaiensis* becoming *D. kauaiensis* (Lammers 2005).

SSPNOV = a newly described subspecies.

Syn. (*synonymum*, synonym) = a taxonomic name rejected in favor of another name. Two kinds: *nomenclatural* synonyms are based on the same original type material. *Ex.* *Evodia molokaiensis* (Hillebr.) Drake, *Pelea molokaiensis* Hillebr., and *Melicope molokaiensis* (Hillebr.) T. G. Hartley & B. C. Stone are all differently named combinations for the same plant originally described by Hillebrand in 1888; if any of the three is currently considered the accepted name, the other two automatically become nomenclatural synonyms. *Taxonomic* synonyms are based on different original type material, and their synonymization is based on the botanist's taxonomic judgement. By botanical code, the oldest available validly published legitimate name must be used, and all others become taxonomic synonyms. Using the previous example, *Pelea foetida* H. Lév. (published 1911) and *P. stellata* H. St. John (publ. 1944) are taxonomic synonyms of *Pelea molokaiensis* Hillebr. (publ. 1888) [which itself is now a nomenclatural synonym of *Melicope molokaiensis* (Hillebr.) T. G. Hartley & B. C. Stone].

VARNOV = a newly described variety.

- **Navigating the Citation field**

The citation field included in Appendices A & B is intended to provide a running history of a taxon in the Hawaiian Islands, focusing especially on changes in scientific names and island distribution. Because the starting point for this checklist is Wagner et al. (1990), the initial citation for most of the dicot and monocot taxa is from the *Manual*; similarly, Palmer (2005) is the first mentioned citation for most of the fern and lycophyte taxa. The first page on which the taxon is treated is given, along with its island distribution.

Ex. 1. Wagner et al. 1990:786 (K, O)

This is a standard opening citation for taxa treated in the *Manual*. This entry, for *Scaevola glabra* (Dicot, Goodeniaceae, p. A-99), indicates that the species description starts on page 786, and that it occurs on Kaua‘i and O‘ahu. No name or distributional changes have occurred since 1990.

Palmer 2003:234 (K)

Standard opening citation for taxa treated in Palmer's fern guide. This entry, for *Sadleria unisora* (Fern, Dicksoniaceae, p. A-235), is described on page 234 and occurs on Kaua'i. Again, no name or distributional changes have occurred since 1990.

All such Wagner et al. (1990) and Palmer (2003) entries are accompanied by full descriptions and relevant keys, thus those citations are not annotated with "DESCR" or "KEY." (but see Ex. 3).

Ex. 2. Wagner et al. 1990:234 (O [as *Tetraplasandra gymnocarpa*]); Lowry & Plunkett 2010:74 (COMBNOV:Syn. *T. gymnocarpa*)

This entry for *Polyscias gymnocarpa* (Dicot, Araliaceae, p. A-11) notes that this species from O'ahu was known as *Tetraplasandra gymnocarpa* in the *Manual*, but was later recombined in 2010 under the genus *Polyscias*.

Ex. 3. Wagner et al. 1990:1554 (Mo?, L? [adventive], DESCR); Wagner & Herbst 1995:24 (NEWNAT/Mo, L); Herbst & Clayton 1998:28 (KEY)

This entry, for *Hyparrhenia hirta* (Monocot, Poaceae, p. A-216), introduces a category of plants that were included in the *Manual* but not given full treatment. This situation applies when all island distributions in the *Manual* citation are accompanied by question marks, for reasons usually provided in brackets. In the case above, the species was considered to be adventive (not fully naturalized) on Moloka'i and Lāna'i. Later, in 1995, populations on those two islands were published as the first records of naturalization of *H. hirta* in the state. It was included in a species key in the 1998 Herbst & Clayton paper. If diagnostic characters are provided for these kinds of *Manual* records, they are annotated with "DESCR."

Ex. 4. Wagner et al. 1990:170 (O [as *Blechum brownei*]); Wagner & Herbst 1995:14 (H, NOM:Syn. *B. brownei* = *B. pyramidatum*); Tripp et al. 2009:900/Wagner et al. 2012:3 (NOM:Syn. *B. pyramidatum*)

This entry for *Ruellia blechum* (Dicot, Acanthaceae, p. A-2) involves multiple name changes since it was published in the *Manual* as *Blechum brownei*. The name was subsequently synonymized with *B. pyramidatum*, and the latter was yet again synonymized into *Ruellia blechum*. The formal proposal to transfer *Blechum* into *Ruellia* is made in Tripp et al. (2009); Wagner et al. (2012) verifies the acceptance of this name change for Hawaiian material.

Ex. 5. Wagner et al. 1990:451 (as *Cyanea grimesiana* var. *mauiensis*, syn. of *C. grimesiana* subsp. *grimesiana*); Lammers 1998:31 (RESURRECT/M, COMBNOV & STATNOV:Syn. *C. grimesiana* var. *mauiensis*)

In this entry, the currently accepted species (*Cyanea mauiensis*, Dicot, Campanulaceae, p. A-48), was originally a synonym in the *Manual* under a different name (*C. grimesiana* var. *mauiensis*). When Lammers resurrected the taxon in 1998, he elevated it to full species status under a new combination.

Ex. 6. Oppenheimer 2003:5 (NEWNAT/H, DESCR); Staples & Herbst 2005:99 (KEY), 101 (DESCR)

Celosia argentea (Dicot, Amaranthaceae, p. A-5), was published as a new naturalization record for the Big Island and the state in 2003, accompanied by a description. The species was later treated in *A Tropical Garden Flora* (Staples & Herbst 2005), in which a key and description were included. The latter citation is a good indicator that the taxon is cultivated in the Hawaiian Islands.

Ex. 7. Wagner & Lorence 1998:311 (SPNOV/K, DESCR)/Herbst & Wagner 1999:31 [as *Hedyotis flynnii*]; Terrell et al. 2005:833/Kennedy et al. 2010:24 (COMBNOV:Syn. *H. flynnii*)

Hedyotis flynnii (Dicot, Rubiaceae, p. A-149) was described as a new species from Kaua'i in 1998 (secondarily reported by Herbst & Wagner in 1999). In 2005, the species was transferred to *Kadua* (secondarily reported by Kennedy et al. in 2010).

Ex. 8. St. John 1987b:344 (SPNOV/K [as *Delissea kolekoleensis*], DESCR); Lammers 1992:130 (COMBNOV:Syn. *D. kolekoleensis*, KEY, DESCR)/ Herbst & Wagner 1999:16; Wood 2012:92 (EXTINCT?, DESCR)

This citation, for *Cyanea kolekoleensis* (Dicot, Campanulaceae, p. A-46), showcases one of Harold St. John's newly published species from 1987, too late for the *Manual* to pass judgement on the taxon. Lammers in 1992 accepted the species, but transferred it from *Delissea* to *Cyanea*. In 2012, Wood speculated that the species might be extinct.

Ex. 9. Wagner et al. 1990:1080 (K); St. John 1987g:44 (SPNOV/K [as *Lysimachia kahiliensis*], DESCR); Marr & Bohm 1997:265 ([as *L.*

daphnoides] KEY, DESCRIPTOR, 272 [as *L. kahiliensis*] KEY, DESCRIPTOR); Herbst & Wagner 1999:30 (NOM:Syn. *L. kahiliensis*)

In a variation of Ex. 8, *Lysimachia daphnoides* (Dicot, Primulaceae, p. A-140) was treated in the *Manual*. One of St. John's new species from 1987 was *L. kahiliensis*, published too late for consideration in the *Manual* treatment. In a 1997 revision of Hawaiian *Lysimachia*, Marr & Bohm accepted *L. kahiliensis* as a good species. Herbst & Wagner (1999) disagreed, considering *L. kahiliensis* a synonym of *L. daphnoides*.

Ex. 10. Herbst & Clayton 1998:36 (NEWNAT/L [as *Sporobolus elongatus*], KEY; NEWNAT/H [as *S. pyramidalis*], KEY); Snow 2008:41 (O [NOM: *S. pyramidatus* misapplied, in part], H [NOM: *S. pyramidalis* misapplied])

This entry for *Sporobolus elongatus* (Monocot, Poaceae, p. A-226) includes misapplied names. In 1998, *Sporobolus elongatus* (on Lāna‘i) and *S. pyramidalis* (on Hawai‘i) were both treated as new naturalizations in the state. In 2008, Snow added O‘ahu to the distribution of *S. elongatus*, based on a specimen collected on the University of Hawai‘i, Mānoa campus, previously misidentified as *S. pyramidatus* (authentic *S. pyramidatus* remaining a part of the naturalized Hawaiian flora). Snow also added Hawai‘i island to the distribution of *S. elongatus*, based on reidentification of the specimen misidentified as *S. pyramidalis* earlier in the entry. *Sporobolus pyramidalis* was thus removed as a naturalized element in the Hawaiian flora. Associated entries in Appendices C and D provide more details for the misapplied names.

- Additional abbreviations

coll(s.) = collection(s)

ex. = example

f. = filius

fma. = forma

hwy = highway

incl. = including

sp. = species (singular)

spm(s.) = specimen(s)

spp. = species (plural)

subsp. = subspecies (singular)

subssp. = subspecies (plural)

var. = variety

Owing to the sorting routines used, hybrid taxa with an “x” immediately preceding the specific epithet have sorted ahead of all non-hybrid species, and in no particular alphabetical sequence (e.g., *Asplenium*, p. A-230–231). An index to accepted families and species is provided, beginning on page 16, preceding the appendices. Pagination is provided for the first page on which an accepted family or genus is treated in Appendices A and B, the main body of checklist, which may assist the user in navigating the checklist.

Table 1. Numbers of families, genera, and taxa by major group

	Dicots	Monocots	Gymno-sperms	Ferns/ Lycophtyes	Total
Families	134	33	5	29	201
Genera	695	227	10	71	1003
Total taxa	2130	583	19	251	2983

Table 2. Origin status of included taxa by major group

	Dicots	Monocots	Gymno-sperms	Ferns/ Lycophtyes	Total
end/end? taxa	963	113	0	168	1244
ind/ind? taxa	61	38	0	43	142
nat/nat? taxa	1010	375	16	41	1442
pol/pol? taxa	14	13	0	0	27*
? taxa	81	44	3	0	128
Total taxa	2130	583	19	251	2983

*Total includes 3 species that have yet to be documented as naturalizing: *Artocarpus altilis*, *Dioscorea alata*, and *Lagenaria siceraria*.

Table 3. Numbers of native vs. non-native taxa by major group

	Dicots	Monocots	Gymno-sperms	Ferns/ Lycophtyes	Total
native taxa	1024	151	0	211	1386
non-native taxa	1106	432	19	40	1597
Total taxa	2130	583	19	251	2983

ACKNOWLEDGMENTS

Work on this checklist update and revision was supported by National Science Foundation Biological Research Collections grant DEB-1057453 and by the Elizabeth Loy McCandless Marks Endowment Fund. Warren L. Wagner, Smithsonian Institution, is thanked for continuing to maintain the excellent *Flora of the Hawaiian Islands* website, the source for many of the updates included in this checklist. George Staples and Derral Herbst provided much-appreciated botanical mentoring over the years. In-house support from the hard-working *Herbarium Pacificum* staff, led by Barbara Kennedy, Shelley James, and Napua Harbottle was invaluable, as was front office support from Tracie Mackenzie and Leslie Santos. Bishop Museum Research Associates Alex Lau and Danielle Frohlich are thanked for reviewing the manuscript. Special thanks to Neal Evenhuis, co-editor of Hawaii Biological Survey publications, for encouraging publication of this checklist.

This checklist update was made possible only because of the outstanding fieldwork, research, and taxonomic interpretation provided by the list of authors included in the bibliography. All are here acknowledged in appreciation for helping to advance understanding of the unique and fragile Hawaiian flora. Locally, much fieldwork has been conducted statewide on the distribution of naturalized plants subsequent to publication of the *Manual*. The past and present list of field biologists most busily documenting them include Randy Bartlett, Keali'i Bio, Pat Conant, Curt Daehler, Tim Flynn, Danielle Frohlich, Derral Herbst, Guy Hughes, Shelley James, Barbara Kennedy, Alex Lau, Lloyd Loope, Dave Lorence, J. Scott Meidell, Ken Nagata, Hank Oppenheimer, James Parker, Bobby Parsons, Linda Pratt, Neil Snow, George Staples, Forest & Kim Starr, Warren L. Wagner, Ken Wood, and Mike Wysong. The staffs of the O'ahu Invasive Species Committee, O'ahu Army Natural Resources Program, and the Plant Pest Control Branch of the Hawai'i State Department of Agriculture are thanked for bringing to light many new naturalizing plant taxa.

Bibliographic citations

The author-year citations in the “Citation” field are linked to the following alphabetical list (by author) of full bibliographic citations. Many of the papers appearing in the *Bishop Museum Occasional Papers* series are available as pdfs at <http://hbs.bishopmuseum.org/hbspubs.html>, in the *Records of the Hawaii Biological Survey* section.

Hawaiian Native & Naturalized Vascular Plant Checklist

- Wood, K. R., W. L. Wagner and T. J. Motley. 2007. *Labordia lorenciana* (Loganiaceae): a new critically endangered species from Kaua‘i, Hawaiian Islands with comments on its conservation. *Systematic Botany* 32(1): 195–199.
- Wysong, M., G. Hughes and K. R. Wood. 2007. New Hawaiian plant records for the island of Moloka‘i. *Bishop Museum Occasional Papers* 96: 1–8.
- Yang, Y. and P. E. Berry. 2011. Phylogenetics of the *Chamaesyce* clade (*Euphorbia*, Euphorbiaceae): reticulate evolution and long-distance dispersal in a prominent c₄ lineage. *American Journal of Botany* 98: 1486–1503.
- Yesilyurt, J. C. 2005. The fern genus *Doryopteris* (Cheilanthoideae-Pteridaceae) in the Hawaiian Islands. *Kew Bulletin* 60: 547–558.

Index of accepted families and genera

This index is a finding tool for locating the initial mention of family and accepted generic names in Appendices A and B, where complete listings of accepted native and naturalized vascular plant taxa are presented for the main Hawaiian Islands (Appendix A) and the Northwestern Hawaiian Islands (Appendix B). Generic names are followed by their family

Abelmoschus (Malvaceae) A-110
Abrus (Fabaceae) A-78
Abutilon (Malvaceae) A-110, B-9
Acacia (Fabaceae) A-78
Acaena (Rosaceae) A-143
Acanthaceae A-1, B-1
Acanthocereus (Cactaceae) A-40
Acanthospermum (Asteraceae) A-14
Achillea (Asteraceae) A-14
Achyranthes (Amaranthaceae) A-4, B-1
Adenanthera (Fabaceae) A-79
Adenophorus (Grammitidaceae) A-239
Adenostemma (Asteraceae) A-14
Adiantum (Pteridaceae) A-246
Aechmea (Bromeliaceae) A-184
Aeschynomene (Fabaceae) A-79
Afrocarpus (Podocarpaceae) A-177
Agavaceae A-178
Agave (Agavaceae) A-178
Ageratina (Asteraceae) A-14
Ageratum (Asteraceae) A-14
Aglaonema (Araceae) A-180
Agrostis (Poaceae) A-202
Ailanthis (Simaroubaceae) A-163
Aira (Poaceae) A-202
Aizoaceae A-3, B-1
Albizia (Fabaceae) A-79, B-7
Alectryon (Sapindaceae) A-160
Aleurites (Euphorbiaceae) A-70

Alismataceae A-179
Allamanda (Apocynaceae) A-8
Allophylus (Sapindaceae) A-160
Alnus (Betulaceae) A-35
Alocasia (Araceae) A-180
Aloe (Aloeaceae) A-179
Aloeaceae A-179
Alpinia (Zingiberaceae) A-230
Alstonia (Apocynaceae) A-8
Alternanthera (Amaranthaceae) A-4
Alysicarpus (Fabaceae) A-80
Alyxia (Apocynaceae) A-8
Amaranthaceae A-4, B-1
Amaranthus (Amaranthaceae) A-4, B-1
Ambrosia (Asteraceae) A-14
Ammannia (Lythraceae) A-109
Ammophila (Poaceae) A-202, B-13
Amsinckia (Boraginaceae) A-36
Anacardiaceae A-6, B-1
Anacardium (Anacardiaceae) A-6
Anagallis (Primulaceae) A-140, B-11
Andropogon (Poaceae) A-202, B-13
Anemone (Ranunculaceae) A-142
Anethum (Apiaceae) A-7, B-2
Angiopteris (Marattiaceae) A-243
Angophora (Myrtaceae) A-121
Annona (Annonaceae) A-6
Annonaceae A-6

designation. If you cannot find a generic name here that you are familiar with from the *Manual of the Flowering Plants of Hawai‘i* (Wagner et al. 1990), refer to Appendix D, where the alphabetical list of synonyms can clarify the present disposition of the name in question.

Anoectochilus (Orchidaceae) A-200
Anredera (Basellaceae) A-34
Anthemis (Asteraceae) A-14
Anthephora (Poaceae) A-203
Anthoxanthum (Poaceae) A-203
Anthurium (Araceae) A-180
Antiaris (Moraceae) A-117
Antidesma (Euphorbiaceae) A-70
Antigonon (Polygonaceae) A-137, B-10
Antirrhinum (Scrophulariaceae) A-161
Aphelandra (Acanthaceae) A-1
Apiaceae A-7, B-2
Apocynaceae A-8, B-2
Aptenia (Aizoaceae) A-3
Aquifoliaceae A-10
Araceae A-180
Arachniodes (Dryopteridaceae) A-236
Araliaceae A-10
Araucaria (Araucariaceae) A-176
Araucariaceae A-176
Archontophoenix (Arecaceae) A-181
Arctium (Asteraceae) A-14
Arctotheca (Asteraceae) A-15
Ardisia (Myrsinaceae) A-119
Arecaceae A-181, B-12
Arenaria (Caryophyllaceae) A-55
Arena (Arecaceae) A-181
Argemone (Papaveraceae) A-131
Argyreia (Convolvulaceae) A-63

Tetrastigma (Vitaceae) A-176
Tetrazygia (Melastomataceae) A-116
Theaceae A-167
Thelypteridaceae A-248
Thelypteris (Thelypteridaceae) A-249
Themeda (Poaceae) A-226
Thespisia (Malvaceae) A-115
Thevetia (Apocynaceae) A-10, B-2
Thunbergia (Acanthaceae) A-3
Thymelaeaceae A-167
Thysanolaena (Poaceae) A-226
Tibouchina (Melastomataceae) A-116
Tiliaceae A-168
Tillandsia (Bromeliaceae) A-185
Tithonia (Asteraceae) A-33
Toona (Meliaceae) A-117
Torenia (Scrophulariaceae) A-163
Torilis (Apiaceae) A-8
Touchardia (Urticaceae) A-170
Tournefortia (Boraginaceae) A-37, B-4
Tradescantia (Commelinaceae) A-186
Tragopogon (Asteraceae) A-33

Tragus (Poaceae) A-227
Trema (Ulmaceae) A-169
Trematolobelia (Campanulaceae) A-54
Trembleya (Melastomataceae) A-116
Trianthema (Aizoaceae) A-3
Tribulus (Zygophyllaceae) A-176, B-12
Trichospermum (Tiliaceae) A-168
Tridax (Asteraceae) A-33, B-3
Trifolium (Fabaceae) A-91
Trimezia (Iridaceae) A-196
Triodanis (Campanulaceae) A-54
Triphasia (Rutaceae) A-158
Triplaris (Polygonaceae) A-139
Trisetum (Poaceae) A-227
Triticum (Poaceae) A-227
Triumphetta (Tiliaceae) A-169
Tropaeolaceae A-169
Tropaeolum (Tropaeolaceae) A-169
Turnera (Turneraceae) A-169
Turneraceae A-169
Typha (Typhaceae) A-229
Typhaceae A-229
Ulex (Fabaceae) A-92
Ulmaceae A-169
Uncinia (Cyperaceae) A-195
Urena (Malvaceae) A-115
Urera (Urticaceae) A-170
Urochloa (Poaceae) A-227, B-16
Urtica (Urticaceae) A-170
Urticaceae A-169, B-12
Utricularia (Lentibulariaceae) A-107
Vaccaria (Caryophyllaceae) A-59
Vaccinium (Ericaceae) A-70
Vachellia (Fabaceae) A-92, B-8
Valerianaceae A-170
Vallisneria (Hydrocharitaceae) A-196
Vanda (Orchidaceae) A-201

Vandenboschia (Hymenophyllaceae) A-241
Vanilla (Orchidaceae) A-201
Verbascum (Scrophulariaceae) A-163
Verbena (Verbenaceae) A-172, B-12
Verbenaceae A-171, B-12
Verbesina (Asteraceae) A-33, B-3
Vernonia (Asteraceae) A-33
Veronica (Scrophulariaceae) A-163
Vicia (Fabaceae) A-92
Vigna (Fabaceae) A-92
Vinca (Apocynaceae) A-10
Viola (Violaceae) A-173
Violaceae A-173
Viscaceae A-174
Vitaceae A-175
Vitex (Verbenaceae) A-173
Vitis (Vitaceae) A-176
Vittariaceae A-249
Wahlenbergia (Campanulaceae) A-54
Waltheria (Sterculiaceae) A-167, B-11
Washingtonia (Arecaceae) A-184
Watsonia (Iridaceae) A-197
Werauhia (Bromeliaceae) A-185
Wikstroemia (Thymelaeaceae) A-167
Wilkesia (Asteraceae) A-33
Wolfenia (Lemnaceae) A-198
Xanthium (Asteraceae) A-33, B-3
Xanthosoma (Araceae) A-181
Xylosma (Flacourtiaceae) A-93
Xyridaceae A-229
Xyris (Xyridaceae) A-229
Youngia (Asteraceae) A-33
Zantedeschia (Araceae) A-181
Zanthoxylum (Rutaceae) A-158
Zephyranthes (Liliaceae) A-199
Zeuxine (Orchidaceae) A-201
Zingiber (Zingiberaceae) A-230

Hawaiian Native & Naturalized Vascular Plant Checklist

Zingiberaceae A-230
Zinnia (Asteraceae) A-33
Zizania (Poaceae) A-228
Ziziphus (Rhamnaceae) A-143
Zornia (Fabaceae) A-93
Zoysia (Poaceae) A-228
Zygophyllaceae A-176, B-12

APPENDIX A. Main Hawaiian Islands Native and Naturalized Vascular Plants

Scientific Name	Status	Kl	Le	Ni	K	O	Mo	L	M	Ka	H	Citation
Dicot												
Acanthaceae												
Aphelandra aurantiaca (Scheidw.) Lindl.												
	nat					O						Staples & Herbst 2005:81 (KEY, DESCRIPTOR [as var. aurantiaca]); Daehler & Baker 2006:4 (NEWNAT/O, DESCRIPTOR)
Asystasia gangetica (L.) T.Anderson	nat				K	O	Mo	L	M	H		Wagner et al. 1990:168 (K, O, Mo, M); Oppenheimer & Bartlett 2000:1 (H); Staples & Herbst 2005:81 (KEY), 82 (DESCRIPTOR); Oppenheimer 2007:18 (L)
Barleria cristata L.	nat				K	O	Mo		M	H		Wagner et al. 1990:168 (K, O, H); Oppenheimer & Bartlett 2002:1 (WM); Staples & Herbst 2005:81 (KEY), 82 (DESCRIPTOR); Starr et al. 2006:31 (Mo)
Barleria lupulina Lindl.	?				O?							Wagner et al. 1990:170 (O? [cultivated, perhaps escaping at Hālawa Beach Park], DESCRIPTOR); Staples & Herbst 2005:81 (KEY), 83 (DESCRIPTOR)
Barleria repens Nees	nat				O		L	M				Staples et al. 2002:3 (NEWNAT/O, DESCRIPTOR); Oppenheimer 2003:3 (L, EM, WM, DESCRIPTOR); Staples & Herbst 2005:81 (KEY), 83 (DESCRIPTOR)
Dicliptera chinensis (L.) Juss.	nat				K	O	Mo		M	H		Wagner et al. 1990:171 (K, O); Staples et al. 2002:3 (H); Oppenheimer 2003:3 (WM); Oppenheimer 2004:8 (EM); Oppenheimer 2007:18 (Mo)
Hemigraphis alternata (Burm.f.) T.Anderson	nat				O							Wagner et al. 1990:171 (O); Staples & Herbst 2005:80 (KEY), 85 (DESCRIPTOR)
Hemigraphis reptans (G.Forst.) T.Anderson	nat				K	O	Mo		M	H		Wagner et al. 1990:171 (K, O, H); Oppenheimer et al. 1999:7 (EM); Oppenheimer & Bartlett 2002:1 (WM); Staples et al. 2002:3 (Mo); Staples & Herbst 2005:80 (KEY), 86 (DESCRIPTOR)
Hypoestes phyllostachya Baker	nat									H		Herbst & Wagner 1999:12 (NEWNAT/H); Staples & Herbst 2005:80 (KEY), 86 (DESCRIPTOR)
Justicia betonica L.	nat				K	O	Mo	L	M	H		Wagner et al. 1990:172 (K, O, Mo, L, M, H); Staples & Herbst 2005:81, 87 (KEY), 87 (DESCRIPTOR)
Justicia carnea Lindl.	nat								M	H		Oppenheimer 2004:8 (NEWNAT/EM, DESCRIPTOR); Staples & Herbst 2005:81, 87 (KEY), 87 (DESCRIPTOR); Parker & Parsons 2012b:65 (H)

Islands: Kl=Ka'ula Rock; Le=Lehua; Ni=Ni'ihiu; K=Kaua'i; O=O'ahu; Mo=Moloka'i; L=Lāna'i; M=Maui; Ka=Kaho'olawe; H=Hawai'i

Status: end=endemic; ind=indigenous; nat=naturalized; pol=Polynesian

Scientific Name	Status	Kl	Le	Ni	K	O	Mo	L	M	Ka	H	Citation
Dicot												
Acanthaceae												
<i>Justicia spicigera</i> Schltdl.	nat				O	Mo						Wagner et al. 1990:172 (Mo? [possibly sparingly naturalized in Hālawa Valley]); Staples et al. 2002:4 (NEWNAT/O, Mo, DESCRIPTOR); Staples & Herbst 2005:81, 87 (KEY), 87 (DESCR)
<i>Megaskepasma erythrochlamys</i> Lindau	nat				K	O			H			Staples & Herbst 2005:81 (KEY), 88 (DESCR); Frohlich & Lau 2010:3 (NEWNAT/O, DESCRIPTOR); Frohlich & Lau 2012:27 (K); Parker & Parsons 2012a:55 (H)
<i>Odontonema cuspidatum</i> (Nees) Kuntze	nat				K	O		M	H			Wagner et al. 1990:167 (K?, O?, H? [as <i>Odontonema strictum</i> ; non-cultivated plants not appearing to set fruit, thus not truly naturalized]); Lorence et al. 1995:20 (NEWNAT/K, DESCRIPTOR, NOM: <i>O. strictum</i> misapplied); Oppenheimer & Bartlett 2002:2 (EM); Staples et al. 2002:4 (H); Staples & Herbst 2005:81 (KEY), 88 (DESCR); Frohlich & Lau 2007:9 (O)
<i>Pseuderanthemum variable</i> (R.Br.) Radlk.	nat				K	O						Herbarium Pacificum Staff 1998:8 (NEWNAT/O [as <i>Pseuderanthemum fasciculatum</i>], DESCRIPTOR); Herbst & Wagner 1999:12 (NOM: <i>P. fasciculatum</i> misapplied); Staples et al. 2003:7 (K)
<i>Ruellia blechum</i> L.	nat				O			H				Wagner et al. 1990:170 (O [as <i>Blechum brownei</i>]); Wagner & Herbst 1995:14 (H, NOM:Syn. <i>Blechum brownei</i> = <i>B. pyramidatum</i>); Tripp et al. 2009:900/Wagner et al. 2012:3 (NOM:Syn. <i>B. pyramidatum</i>)
<i>Ruellia brevifolia</i> (Pohl) C.Ezcurra	nat				K	O	Mo	L	M			Wagner et al. 1990:174 (K, O [as <i>Ruellia graecizans</i>]); Ezcurra 1993:802/Herbst & Wagner 1999:13 (NOM:Syn. <i>R. graecizans</i>); Oppenheimer 2003:4 (Mo, EM); Staples & Herbst 2005:80, 81, 91 (KEY), 91 (DESCR); Starr et al. 2010:61 (L)
<i>Ruellia brittoniana</i> Leonard	nat				K	O		M				Wagner et al. 1990:174 (K, O); Oppenheimer & Bartlett 2002:2 (WM); Staples & Herbst 2005:80, 81, 91 (KEY), 91 (DESCR)
<i>Ruellia devosiana</i> E.Morren	nat				K							Lorence et al. 1995:20 (NEWNAT/K, DESCRIPTOR); Staples & Herbst 2005:80, 81, 91 (KEY), 91 (DESCR)
<i>Ruellia prostrata</i> Poir.	nat				O	Mo		M				Wagner et al. 1990:174 (O); Oppenheimer 2003:4 (Mo, WM)

Islands: Kl=Ka'ula Rock; Le=Lehua; Ni=Ni'ihiu; K=Kaua'i; O=O'ahu; Mo=Moloka'i; L=Lāna'i; M=Maui; Ka=Kaho'olawe; H=Hawai'i

Amaranthaceae												
Achyranthes aspera L. var. aspera												
	nat				O	Mo				H		Wagner et al. 1990:181 (O, H); Staples et al. 2002:4 (Mo)
Achyranthes aspera L. var. pubescens (Moq.) C.C.Towns.	?						L?					Wagner et al. 1990:181 (L? [single coll. in 1850s, likely no longer present], DESCRIPTOR)
Achyranthes atollensis H.St.John	end											Only in Northwestern Hawaiian Islands; see NWHI checklist
Achyranthes mutica A.Gray	end				K					H		Wagner et al. 1990:181 (K, H? [presumed location for 1779 coll.]); Hawley & Pyle 1995:1 (REDISCOVER/H)
Achyranthes splendens Mart. ex Moq. var. rotundata Hillebr.	end				O	Mo	L					Wagner et al. 1990:182 (O, Mo, L); Staples & Herbst 2005:99 (KEY), 103 (DESCR)
Achyranthes splendens Mart. ex Moq. var. splendens	end						L	M				Wagner et al. 1990:182 (L, M)
Alternanthera brasiliiana (L.) Kuntze	nat				O	Mo		M?				Wagner et al. 1990:183 (Mo); Wagner & Herbst 1995:14 (O); Starr & Starr 2011:23 (EM); Wagner et al. 2012:5 (EM record adventive)
Alternanthera caracasana Kunth	nat				K	O	Mo	L	M			Wagner et al. 1990:183 (K, O, Mo, L, M)
Alternanthera pungens Kunth	nat				K	O	Mo	L	M	H		Wagner et al. 1990:183 (O, Mo, H); Lorence & Flynn 1999:3 (K); Oppenheimer & Bartlett 2000:1 (WM); Oppenheimer & Bartlett 2002:2 (L); Starr et al. 2002:17 (EM)
Alternanthera sessilis (L.) R.Br. ex DC.	nat				K	O	Mo	L	M	H		Wagner et al. 1990:185 (O, Mo, M, H); Lorence et al. 1995:21 (K); Staples & Herbst 2005:99, 100 (KEY), 101 (DESCR); Imada 2007:34 (L)
Alternanthera tenella Colla	nat				O							Wagner et al. 1990:185 (O); Staples & Herbst 2005:99, 100 (KEY), 100 (DESCR)
Amaranthus brownii Christoph. & Caum	end											Only in Northwestern Hawaiian Islands; see NWHI checklist
Amaranthus dubius Mart. ex Thell.	nat				K	O		L	M	H		Wagner et al. 1990:186 (K, O, L, H); Staples & Herbst 2005:99 (KEY), 101 (DESCR); Starr et al. 2006:32 (EM)

Islands: Kl=Ka'ula Rock; Le=Lehua; Ni=Ni'ihiu; K=Kaua'i; O=O'ahu; Mo=Moloka'i; L=Lāna'i; M=Maui; Ka=Kaho'olawe; H=Hawai'i

Synonymy List Arranged By Family

Appendix C. Synonymy list for Hawaiian native and naturalized vascular plant checklist, arranged alphabetically by major group and family

This appendix compiles scientific names that have changed for native and naturalized vascular plant subsequent to publication of the *Manual of the Flowering Plants of Hawai‘i* (Wagner et al. 1990) and *Hawai‘i’s Ferns and Fern Allies* (Palmer 2003). The list includes both taxonomic and nomenclatural synonyms, misapplied names, and corrected misspellings. It is arranged in a nested alphabetical sequence by major group, family, and currently accepted scientific name.

The literature citation provides a source for the name change; while primary sources were preferred, secondary sources are often cited. In some cases, both

primary and secondary sources are cited; these are denoted by a slash symbol between the two citations. Occasionally, a name has been changed, and later changed again [e.g., *Blechum brownei* (Acanthaceae) became a synonym of *B. pyramidatum*, which later was synonymized into *Ruellia blechum*]. In such cases, the connection between the oldest and currently accepted names may not be apparent, and citations, separated by a semicolon, are provided for the name change to an intermediate name, followed by one for the current disposition.

Group	Family	Current disposition	Old name (synonym, misapplied name)	Literature source
Dicot	Acanthaceae	Odontonema cuspidatum (Nees) Kuntze	Odontonema strictum sensu Wagner et al. (1990), non (Nees) Kuntze	Lorenz et al. 1995:20
Dicot	Acanthaceae	Pseuderanthemum variabile (R.Br.) Radlk.	Pseuderanthemum fasciculatum sensu Herbarium Pacificum Staff (1998), non (Oerst.) Leonard	Herbst & Wagner 1999:12
Dicot	Acanthaceae	Ruellia blechum L.	Blechum brownnei Juss.	Wagner & Herbst 1995:14; Tripp et al. 2009:900/Wagner et al. 2012:3
Dicot	Acanthaceae	Ruellia blechum L.	Blechum pyramidatum (Lam.) Urb.	Tripp et al. 2009:900/Wagner et al. 2012:3
Dicot	Acanthaceae	Ruellia brevifolia (Pohl) C.Ezcurra	Ruellia graecizans Backer	Ezcurra 1993:802/Herbst & Wagner 1999:13
Dicot	Apocynaceae	Alyxia stellata (J.R.Forst. & G.Forst.) Roem. & Schult.	Alyxia oliviformis Gaudich.	Middleton 2002:56
Dicot	Apocynaceae	Thevetia peruviana (Pers.) K.Schum.	Cascabela peruviana (Pers.) Raf.	Wagner & Herbst 1999:1858
Dicot	Araliaceae	Polyscias bisattenuata (Sherff) Lowry & G.M.Plunkett	Tetraplasandra bisattenuata Sherff	Lowry & Plunkett 2010:73
Dicot	Araliaceae	Polyscias flynnii (Lowry & K.R.Wood) Lowry & G.M.Plunkett	Tetraplasandra flynnii Lowry & K.R.Wood	Lowry & Plunkett 2010:74
Dicot	Araliaceae	Polyscias gymnocarpa (Hillebr.) Lowry & G.M.Plunkett	Tetraplasandra gymnocarpa (Hillebr.) Sherff	Lowry & Plunkett 2010:74
Dicot	Araliaceae	Polyscias hawaiiensis (A.Gray) Lowry & G.M.Plunkett	Tetraplasandra hawaiiensis A.Gray	Lowry & Plunkett 2010:74
Dicot	Araliaceae	Polyscias kavaiensis (H.Mann) Lowry & G.M.Plunkett	Tetraplasandra kavaiensis (H.Mann) Sherff	Lowry & Plunkett 2010:74
Dicot	Araliaceae	Polyscias lydgatei (Hillebr.) Lowry & G.M.Plunkett	Tetraplasandra lydgatei (Hillebr.) Harms	Lowry & Plunkett 2010:74
Dicot	Araliaceae	Polyscias oahuensis (A.Gray) Lowry & G.M.Plunkett	Tetraplasandra oahuensis (A.Gray) Harms	Lowry & Plunkett 2010:74
Dicot	Araliaceae	Polyscias racemosa (C.N.Forbes) Lowry & G.M.Plunkett	Munroidendron racemosum (C.N.Forbes) Sherff	Lowry & Plunkett 2010:74

Synonymy List Arranged By Family

Group	Family	Current disposition	Old name (synonym, misapplied name)	Literature source
Dicot	Araliaceae	<i>Polyscias sandwicensis</i> (A.Gray) Lowry & G.M.Plunkett	<i>Reynoldsia sandwicensis</i> A.Gray	Lowry & Plunkett 2010:74
Dicot	Araliaceae	<i>Polyscias waialealae</i> (Rock) Lowry & G.M.Plunkett	<i>Tetraplasandra waialealae</i> Rock	Lowry & Plunkett 2010:75
Dicot	Araliaceae	<i>Polyscias waimeae</i> (Wawra) Lowry & G.M.Plunkett	<i>Tetraplasandra waimeae</i> Wawra	Lowry & Plunkett 2010:75
Dicot	Araliaceae	<i>Schefflera heptaphylla</i> (L.) Frodin	<i>Schefflera taiwaniana</i> sensu Daehler & Baker (2006), non (Nakai) Kaneh.	Frohlich & Lau 2012:28
Dicot	Asclepiadaceae	<i>Calotropis procera</i> (Aiton) W.T.Aiton	<i>Calotropis gigantea</i> sensu Starr et al. (2003, 2004), in part, non (L.) W.T.Aiton	Starr & Starr 2012:87
Dicot	Asclepiadaceae	<i>Stapelia gigantea</i> N.E.Br.	<i>Stapelia nobilis</i> N.E.Br.	Staples & Herbst 2005:144
Dicot	Asteraceae	<i>Adenostemma viscosum</i> J.R.Forst. & G.Forst.	<i>Adenostemma lavenia</i> sensu Wagner et al. (1990), non (L.) Kuntze	King & Robinson 1987:60/ Herbst & Wagner 1999:14
Dicot	Asteraceae	<i>Cyanthillium cinereum</i> (L.) H.Rob.	<i>Vernonia cinerea</i> (L.) Less. var. <i>parviflora</i> (Reinw.) DC.	Wagner et al. 1997:52
Dicot	Asteraceae	<i>Delairea odorata</i> Lem.	<i>Senecio mikanioides</i> Otto ex Walp.	Jeffrey 1986:933/Herbst & Wagner 1999:14
Dicot	Asteraceae	<i>Dubautia waianapanapaensis</i> G.D.Carr	<i>Dubautia dolosa</i> (O.Deg. & Sherff) G.D.Carr	Carr 1995:1580/Wagner & Herbst 2003:7
Dicot	Asteraceae	<i>Eclipta prostrata</i> (L.) L.	<i>Eclipta alba</i> (L.) Hassk.	Wagner & Herbst 1995:16
Dicot	Asteraceae	<i>Euchiton japonicus</i> (Thunb.) A.Anderb.	<i>Gnaphalium japonicum</i> Thunb.	Wagner et al. 1997:54
Dicot	Asteraceae	<i>Euchiton sphaericus</i> (Willd.) A.Anderb.	<i>Gnaphalium japonicum</i> sensu Wagner et al. (1990), non <i>Euchiton japonicus</i> (Thunb.) A.Anderb.	Wagner et al. 1997:54
Dicot	Asteraceae	<i>Gamochaeta purpurea</i> (L.) Cabrera	<i>Gnaphalium purpureum</i> L.	Wagner et al. 1997:54
Dicot	Asteraceae	<i>Kalimeris indica</i> (L.) Sch.Bip. subsp. <i>indica</i>	<i>Boltonia indica</i> (L.) Benth.	Gu & Hoch 1997:785/Herbst & Wagner 1999:14
Dicot	Asteraceae	<i>Keysseria erici</i> (C.N.Forbes) Cabrera	<i>Lagenifera</i> [<i>Lagenophora</i>] <i>erici</i> C.N.Forbes	Nicolson 1996:341; Nesom 2000:58/Nesom 2001b:514
Dicot	Asteraceae	<i>Keysseria helenae</i> (C.N.Forbes & Lydgate) Cabrera	<i>Lagenifera</i> [<i>Lagenophora</i>] <i>helenae</i> C.N.Forbes & Lydgate	Nicolson 1996:341; Nesom 2000:58/Nesom 2001b:514
Dicot	Asteraceae	<i>Keysseria maviensis</i> (H.Mann) Cabrera	<i>Lagenifera</i> [<i>Lagenophora</i>] <i>maviensis</i> H.Mann	Nicolson 1996:341; Nesom 2000:58/Nesom 2001b:514
Dicot	Asteraceae	<i>Lactuca sativa</i> L.	<i>Lactuca serriola</i> L.	Koopman et al. 2001
Dicot	Asteraceae	<i>Leucanthemum vulgare</i> Lam.	<i>Chrysanthemum leucanthemum</i> L.	Soreng & Cope 1991:162/Herbst & Wagner 1999:15
Dicot	Asteraceae	<i>Lipochaeta connata</i> (Gaudich.) DC. subsp. <i>acris</i> (Sherff) W.L.Wagner & H.Rob.	<i>Lipochaeta connata</i> (Gaudich.) DC. var. <i>acris</i> (Sherff) R.C.Gardner	Wagner & Robinson 2002:545

Synonymy List Arranged By Family

Dicot	Myrtaceae	<i>Leptospermum morrisonii</i> Joy Thoms.	<i>Leptospermum laevigatum</i> sensu Wagner et al. (1990), in part, non (Gaertn.) F.Muell.	Herbarium Pacificum Staff 1999:5
Dicot	Myrtaceae	<i>Leptospermum petersonii</i> F.M.Bailey	<i>Leptospermum flavescens</i> sensu Wagner et al. (1990), in part, non Sm.	Herbarium Pacificum Staff 1999:5
Dicot	Myrtaceae	<i>Leptospermum polygalifolium</i> Salisb. subsp. <i>polygalifolium</i>	<i>Leptospermum flavescens</i> Sm.	Herbarium Pacificum Staff 1999:6
Dicot	Myrtaceae	<i>Syzygium sandwicense</i> (A.Gray) Müll.Berol.	<i>Syzygium sandwicensis</i> (A.Gray) Nied.	Wagner et al. 2012:55
Dicot	Nyctaginaceae	<i>Boerhavia acutifolia</i> (Choisy) J.W.Moore	<i>Boerhavia glabrata</i> sensu Wagner et al. (1990), non Blume	Herbst & Wagner 1999:24
Dicot	Ochnaceae	<i>Ochna thomasiana</i> Engl. & Gilg	<i>Ochna kirkii</i> sensu Wagner et al. (1990), non Oliv.	Herbarium Pacificum Staff 1998:12
Dicot	Oleaceae	<i>Olea europaea</i> L. subsp. <i>cuspidata</i> (Wall. ex G.Don) Cif.	<i>Olea europaea</i> L. subsp. <i>africana</i> (P.Mill.) P.Green	Green & Wickens 1989:295/ Herbst & Wagner 1999:24
Dicot	Onagraceae	<i>Fuchsia xhybrida</i> Vilm.	<i>Fuchsia hybrida</i> Hort. ex Siebold & Voss	Staples & Herbst 2005:445
Dicot	Oxalidaceae	<i>Oxalis debilis</i> Kunth var. <i>corymbosa</i> (DC.) Lourteig	<i>Oxalis corymbosa</i> DC.	Herbst & Wagner 1999:25; Staples & Herbst 2005:447
Dicot	Passifloraceae	<i>Passiflora tarminiana</i> Coppens & Barney	<i>Passiflora mollissima</i> sensu Wagner et al. (1990), non (Kunth) Bailey	Coppens d'Eeckenbrugge et. al. 2001/Staples et al. 2003:17
Dicot	Passifloraceae	<i>Passiflora xviolacea</i> Loisel.	<i>Passiflora xcaerulea</i> sensu Wagner et al. (1990), non L.	Starr et al. 1999:13
Dicot	Piperaceae	<i>Peperomia blanda</i> (Jacq.) Kunth var. <i>floribunda</i> (Miq.) H.Huber	<i>Peperomia leptostachya</i> Hook. & Arn., non (Nutt.) Chapman	Huber 1987:293/Florence 1997:173/Herbst & Wagner 1999:25
Dicot	Piperaceae	<i>Peperomia eekana</i> C.DC.	<i>Peperomia nahikuensis</i> H.St.John	Wagner et al. 2012:58

Synonymy List Arranged By Family

Group	Family	Current disposition	Old name (synonym, misapplied name)	Literature source
Dicot	Polygonaceae	<i>Emex spinosa</i> (L.) Campd.	<i>Emex australis</i> sensu Wagner et al. (1990), in part, non Steinh.	Parker & Parsons 2012b:71
Dicot	Polygonaceae	<i>Fallopia convolvulus</i> (L.) Á.Löve	<i>Polygonum convolvulus</i> L.	Ronse Decraene & Akeroyd 1988:369/Herbst & Wagner 1999:29
Dicot	Polygonaceae	<i>Muehlenbeckia complexa</i> (A.Cunn.) Meisn.	<i>Muehlenbeckia axillaris</i> sensu Wagner et al. (1990), non (Hook.f.) Walp.	Staples & Herbst 2005:464
Dicot	Polygonaceae	<i>Persicaria capitata</i> (Buch.-Ham. ex D.Don) Masam.	<i>Polygonum capitatum</i> Buch.-Ham. ex D. Don	Ronse Decraene & Akeroyd 1988:367/Herbst & Wagner 1999:29
Dicot	Polygonaceae	<i>Persicaria chinense</i> (L.) Nakai	<i>Polygonum chinense</i> L.	Ronse Decraene & Akeroyd 1988:367/Herbst & Wagner 1999:29
Dicot	Polygonaceae	<i>Persicaria glabra</i> (Willd.) M.Gómez	<i>Polygonum glabrum</i> Willd.	Wilson 1990:632/Herbst & Wagner 1999:30
Dicot	Polygonaceae	<i>Persicaria punctata</i> (Elliott) Small	<i>Polygonum punctatum</i> Elliott	Herbst & Wagner 1999:30/ Hinds & Freeman 2005:586
Dicot	Polygonaceae	<i>Rumex crispus</i> L. subsp. <i>crispus</i>	<i>Rumex crispus</i> L.	Mosyakin & Wagner 1998:42
Dicot	Portulacaceae	<i>Talinum fruticosum</i> (L.) Juss.	<i>Talinum triangulare</i> (Jacq.) Willd.	Wagner & Herbst 1995:25
Dicot	Primulaceae	<i>Lysimachia daphnoides</i> (A.Gray) Hillebr.	<i>Lysimachia kahiliensis</i> H.St.John	Herbst & Wagner 1999:30
Dicot	Primulaceae	<i>Lysimachia hillebrandii</i> Hook.f. ex A.Gray	<i>Lysimachia haupuensis</i> H.St.John	Herbst & Wagner 1999:30
Dicot	Primulaceae	<i>Lysimachia hillebrandii</i> Hook.f. ex A.Gray	<i>Lysimachia ovoidea</i> H.St.John	Herbst & Wagner 1999:30
Dicot	Primulaceae	<i>Lysimachia hillebrandii</i> Hook.f. ex A.Gray	<i>Lysimachia waianaeensis</i> H.St.John	Herbst & Wagner 1999:30
Dicot	Primulaceae	<i>Lysimachia remyi</i> Hillebr.	<i>Lysimachia caliginis</i> H.St.John	Herbst & Wagner 1999:31
Dicot	Primulaceae	<i>Lysimachia remyi</i> Hillebr.	<i>Lysimachia remyi</i> Hillebr. subsp. <i>caliginis</i> (H.St.John) K.L.Marr	Herbst & Wagner 1999:31
Dicot	Primulaceae	<i>Lysimachia remyi</i> Hillebr.	<i>Lysimachia remyi</i> Hillebr. subsp. <i>subherbacea</i> (H.St.John) K.L.Marr	Herbst & Wagner 1999:31
Dicot	Primulaceae	<i>Lysimachia remyi</i> Hillebr.	<i>Lysimachia subherbacea</i> (Hillebr.) H.St.John	Herbst & Wagner 1999:31
Dicot	Rhizophoraceae	<i>Bruguiera sexangula</i> (Lour.) Poir.	<i>Bruguiera gymnorhiza</i> sensu Wagner et al. (1990), non (L.) Savigny	Herbst & Wagner 1999:31
Dicot	Rosaceae	<i>Pyracantha crenatoserrata</i> (Hance) Rehder	<i>Pyracantha angustifolia</i> sensu Wagner et al. (1990), in part, non (Franch.) C.K.Schneid.	Herbarium Pacificum Staff 1999:9
Dicot	Rosaceae	<i>Pyracantha koidzumii</i> Rehder	<i>Pyracantha angustifolia</i> sensu Wagner et al. (1990), in part, non (Franch.) C.K.Schneid.	Herbarium Pacificum Staff 1999:9

Synonymy List Arranged By Family

Group	Family	Current disposition	Old name (synonym, misapplied name)	Literature source
Dicot	Rubiaceae	<i>Atractocarpus fitzalanii</i> (F.Muell.) Puttock	<i>Randia fitzalanii</i> (F.Muell.) F.Muell. ex Benth.	Puttock 1999:285
Dicot	Rubiaceae	<i>Galium aparine</i> L.	<i>Sherardia arvensis</i> sensu Oppenheimer (2008), non L.	Frohlich & Lau 2012:45
Dicot	Rubiaceae	<i>Gynochthodes trimera</i> (Hillebr.) Razafim. & B.Bremer	<i>Morinda trimera</i> Hillebr.	Razafimandimbison & Bremer 2011:295/Wagner et al. 2012:65
Dicot	Rubiaceae	<i>Kadua acuminata</i> Cham. & Schltdl.	<i>Hedyotis acuminata</i> (Cham. & Schltdl.) Steud.	Terrell et al. 2005:832/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua affinis</i> DC.	<i>Hedyotis terminalis</i> (Hook. & Arn.) W.L.Wagner & D.R.Herbst	Terrell et al. 2005:832/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua axillaris</i> (Wawra) W.L.Wagner & Lorence	<i>Hedyotis hillebrandii</i> (Fosberg) W.L.Wagner & D.R.Herbst	Terrell et al. 2005:832/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua centranthoides</i> Hook. & Arn.	<i>Hedyotis centranthoides</i> (Hook. & Arn.) Steud.	Terrell et al. 2005:832/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua cookiana</i> Cham. & Schltdl.	<i>Hedyotis cookiana</i> (Cham. & Schltdl.) Steud.	Terrell et al. 2005:833/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua cordata</i> Cham. & Schltdl. subsp. <i>cordata</i>	<i>Hedyotis schlechtendahliana</i> Steud. subsp. <i>schlechtendahliana</i>	Terrell et al. 2005:833/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua cordata</i> Cham. & Schltdl. subsp. <i>remyi</i> (Hillebr.) W.L.Wagner & Lorence	<i>Hedyotis schlechtendahliana</i> Steud. subsp. <i>remyi</i> (Hillebr.) Fosberg	Terrell et al. 2005:833/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua cordata</i> Cham. & Schltdl. subsp. <i>remyi</i> (Hillebr.) W.L.Wagner & Lorence	<i>Hedyotis schlechtendahliana</i> Steud. var. <i>remyi</i> (Hillebr.) Fosberg	Terrell et al. 2005:833/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua cordata</i> Cham. & Schltdl. subsp. <i>waimeae</i> (Wawra) W.L.Wagner & Lorence	<i>Hedyotis glaucifolia</i> (A.Gray) Fosberg var. <i>waimeae</i> (Wawra) Fosberg	Terrell et al. 2005:833/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua cordata</i> Cham. & Schltdl. subsp. <i>waimeae</i> (Wawra) W.L.Wagner & Lorence	<i>Hedyotis schlechtendahliana</i> Steud. subsp. <i>waimeae</i> (Wawra) W.L.Wagner & D.H.Lorence	Terrell et al. 2005:833/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua coriacea</i> (Sm.) W.L.Wagner & Lorence	<i>Hedyotis coriacea</i> Sm.	Terrell et al. 2005:832/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua degeneri</i> (Fosberg) W.L.Wagner & Lorence subsp. <i>coprosmifolia</i> (Fosberg) W.L.Wagner & Lorence	<i>Hedyotis degeneri</i> Fosberg var. <i>coprosmifolia</i> Fosberg	Terrell et al. 2005:833/ Kennedy et al. 2010:23
Dicot	Rubiaceae	<i>Kadua degeneri</i> (Fosberg) W.L.Wagner & Lorence subsp. <i>degeneri</i>	<i>Hedyotis degeneri</i> Fosberg var. <i>degeneri</i>	Terrell et al. 2005:833/ Kennedy et al. 2010:24
Dicot	Rubiaceae	<i>Kadua elatior</i> (H.Mann) W.L.Wagner & Lorence	<i>Hedyotis elatior</i> (H.Mann) Fosberg	Terrell et al. 2005:833/ Kennedy et al. 2010:24
Dicot	Rubiaceae	<i>Kadua fluviatilis</i> C.N.Forbes	<i>Hedyotis fluviatilis</i> (C.N.Forbes) Fosberg	Terrell et al. 2005:832/ Kennedy et al. 2010:24
Dicot	Rubiaceae	<i>Kadua flynnii</i> (W.L.Wagner & Lorence) W.L.Wagner & Lorence	<i>Hedyotis flynnii</i> W.L.Wagner & Lorence	Terrell et al. 2005:833/ Kennedy et al. 2010:24

Synonymy List Arranged By Old Name

Appendix D. Synonymy list for Hawaiian native and naturalized vascular plant checklist, arranged alphabetically by old scientific name

This appendix is provided as a user-friendly alternative to the synonymy list presented in Appendix A. While identical in content, this list reassembles the fields, presenting old scientific names first in strictly alphabetical sequence, without regard to their major group or family classification, followed by their current disposition.

The literature citation provides a source for the name change; while primary sources were preferred, secondary sources are often cited. In some cases, both primary and secondary sources are cited; these are denoted by a slash symbol

between the two citations. Occasionally, a name has been changed, and later changed again [e.g., *Blechum brownei* (Acanthaceae) became a synonym of *B. pyramidatum*, which later was synonymized into *Ruellia blechum*]. In such cases, the connection between the oldest and currently accepted names may not be apparent, and citations, separated by a semicolon, are provided for the name change to an intermediate name, followed by one for the current disposition.

Old name (synonym, misapplied name)	Current disposition	Group	Family	Literature source
<i>Acacia farnesiana</i> (L.) Willd.	<i>Vachellia farnesiana</i> (L.) Wight & Arn.	Dicot	Fabaceae	Mabberley 2008:890/Wagner et al. 2012:36
<i>Adenophorus hymenophylloides</i> (Kaulf.) Hook. & Grev. x <i>A. tamariscinus</i> (Kaulf.) Hook. & Grev.	<i>Adenophorus xabbottiae</i> W.H.Wagner	Pteridophyte	Grammitidaceae	Palmer 2003:36
<i>Adenophorus hymenophylloides</i> (Kaulf.) Hook. & Grev. x <i>A. tripinnatifidus</i> Gaudich.	<i>Adenophorus xcansonii</i> Ranker	Pteridophyte	Grammitidaceae	Palmer 2003:36
<i>Adenophorus oahuensis</i> (Copel.) L.E.Bishop x <i>A. pinnatifidus</i> Gaudich.	<i>Adenophorus xbishopii</i> (W.H.Wagner) xxxxx	Pteridophyte	Grammitidaceae	Palmer 2003:41
<i>Adenostemma lavenia</i> sensu Wagner et al. (1990), non (L.) Kuntze	<i>Adenostemma viscosum</i> J.R.Forst. & G.Forst.	Dicot	Asteraceae	King & Robinson 1987:60/ Herbst & Wagner 1999:14

Appendix E. Newly described taxa since 1990 in the Hawaiian Islands

This list compiles all newly described species and infraspecific taxa following publication of *Manual of the Flowering Plants of Hawai‘i* (Wagner et al. 1990) and *Hawai‘i’s Ferns and Fern Allies* (Palmer 2003), and treated as recognized taxa in this publication. This list is arranged in a nested alphabetical sequence by major group, family, and basionym. In some cases, the original name has since changed, and these new combinations are noted. The original citation describing the taxon is provided, along with its island distribution. Two of the novelties are non-native taxa in *Passiflora* and *Ceratopteris*.

The reader will note that some of the new taxa were actually published prior to the *Manual* publication date in 1990. These were taxa described by prominent Hawaiian botanist Dr. Harold St. John, who, in a flurry of publication activity between 1987 and 1989, described over 750 new taxa of Hawaiian vascular plants (Wagner et al. 1990). Because St. John’s novelties were published so close to the *Manual* publication deadline schedule, however, there was not enough time to examine most of the type specimens and accept or synonymize them in the *Manual*; thus, most of the St. John names are not included there.

St. John novelties that were included in the *Manual* included 12 new species of *Touchardia* (all synonymized under *T. latifolia*) and 13 new species of *Clermontia* (all synonymized, although one, *Clermontia waikoluensis*, was soon resurrected as

C. arborescens subsp. *waikoluensis* [Lammers 1991]). Six species were accepted in the *Manual* as described: *Cyrtandra hematos*, *Geranium hanaense*, *Panicum lineale*, *Phyllostegia warshaueri*, *Sicyos erostratus*, and *S. waimanaloensis*, and another (*Cyrtandra kamoolaensis*) was accepted but not treated. Two species were accepted under new combinations: *Sicyos hillebrandii* var. *anunu* [=*Sicyos anunu*] and *Cladocarpa herbstii* [=*Sicyos herbstii*]. Finally, one species, *Cyrtandra limahuliensis*, was treated in the *Manual* but later synonymized into *C. kealiae* subsp. *kealiae* (Wagner & Lorence 2000). Except for *Cyrtandra kamoolaensis*, none of these taxa are included in this appendix.

Most of the new St. John names have since been dealt with in a variety of taxonomic papers [Lammers 1991 (*Clermontia*); Marr & Bohm 1997 (*Lysimachia*); Herbst & Wagner 1999; Wagner & Shannon 1999 (*Sicyos*); Wagner 1999a (*Phyllostegia*); Wagner & Lorence 2000; Wagner et al. 2005 (*Schiedea*); Lammers 2005 (*Delissea*)] and in the Smithsonian Institution’s *Flora of the Hawaiian Islands* website (<http://botany.si.edu/pacificislandbiodiversity/hawaiianflora/index.htm>). In this appendix, we include only those St. John novelties published between 1987 and 1989 that have been accepted by subsequent workers (either as originally published or as a new combination), as a full accounting of all names published during this period was not within the scope of this checklist.

Group	Family	Scientific name	Status	Literature source
Dicot	Amaranthaceae	Nototrichium divaricatum Lorence	end	Lorence 1996:64 (SPNOV/K)

Appendix F. Taxa resurrected since 1990 in the Hawaiian Islands

This list compiles all taxa that were treated as taxonomic synonyms in the *Manual of the Flowering Plants of Hawai‘i* (Wagner et al. 1990) or *Hawai‘i’s Ferns and Fern Allies* (Palmer 2003), and have subsequently been resurrected as recognized entities. This list is arranged in a nested alphabetical sequence by major group, family, and scientific name.

In the literature source column, the disposition of the taxon in Wagner et al. (1990) [or in one case, Palmer (2003)] is provided first, followed by a citation for the source of the resurrection. In two examples in the genus *Pritchardia*, species were resurrected and once again synonymized.

Group	Family	Scientific name	Status	Literature source
Dicot	Araliaceae	<i>Polyscias bisattenuata</i> (Sherff) Lowry & G.M.Plunkett	end	Wagner et al. 1990:235 (as <i>Tetraplasandra bisattenuata</i> , syn. of <i>T. oahuensis</i>); Lowry & Plunkett 2010:73 (RESURRECT/K, COMBNOV:Syn. <i>T. bisattenuata</i>)

Appendix G. New naturalized taxa since 1990 in the Hawaiian Islands

This list compiles all newly naturalized vascular plant taxa in the Hawaiian Islands since publication of the *Manual of the Flowering Plants of Hawai‘i* (Wagner et al. 1990) and *Hawai‘i’s Ferns and Fern Allies* (Palmer 2003). It is arranged in a nested alphabetical sequence by major group, family, and scientific name.

The literature citation for the first recorded documentation of naturalization is also provided, along with the island(s) on which it was first collected. Some taxa have undergone name changes since being published, and the old name is so noted following the citation. Records preceded by an asterisk (*) have been subsequently judged to be not truly naturalized.

Group	Family	Scientific name	Literature source
Dicot	Acanthaceae	<i>Aphelandra aurantiaca</i> (Scheidw.) Lindl.	Daehler & Baker 2006:4 (NEWNAT/O)

Monocot	Poaceae	<i>Sporobolus elongatus</i> R.Br.	Herbst & Clayton 1998:36 (NEWNAT/L)
Monocot	Poaceae	<i>Sporobolus piliferus</i> (Trin.) Kunth	Herbst & Clayton 1998:35, 36 (NEWNAT/H); [Note: this first record was later reidentified as <i>Sporobolus pyramidatus</i> [Snow & Lau 2010:56], but authentic piliferus has also been documented from O'ahu [Snow 2008:41]]
Monocot	Poaceae	<i>Sporobolus pyramidatus</i> (Lam.) Hitchc.	Wagner & Herbst 1995:24 (NEWNAT/O)
Monocot	Poaceae	<i>Trisetum flavescens</i> (L.) P.Beauv.	Herbst & Clayton 1998:36 (NEWNAT/EM)
Monocot	Poaceae	<i>Triticum aestivum</i> L.	Wagner & Herbst 2003:57 (NEWNAT/K, O, Mo, L, M, H)
Monocot	Poaceae	<i>Urochloa brizantha</i> (Hochst. ex A.Rich.) R.D.Webster	Starr et al. 2006:39 (NEWNAT/Ka [as <i>Brachiaria brizantha</i>]) [Note: this first record was later reidentified as <i>B. decumbens</i> [Snow & Lau 2010:49], but authentic brizantha has also been documented from East Maui [Oppenheimer 2008:31]]
Monocot	Poaceae	<i>Urochloa decumbens</i> (Stapf) R.D.Webster	Snow & Lau 2010:49 (NEWNAT/K, Mo?, Ka, H [as <i>Brachiaria decumbens</i>])
Monocot	Poaceae	<i>Urochloa distachya</i> (L.) T.Q.Nguyen	Lorence et al. 1995:44 (NEWNAT/K [as <i>Brachiaria subquadripala</i>])
Monocot	Poaceae	<i>Urochloa mollis</i> (Sw.) Morrone & Zuloaga	Staples et al. 2002:13 (NEWNAT/O [as <i>Brachiaria mollis</i>])
Monocot	Poaceae	<i>Urochloa plantaginea</i> (Link) R.D.Webster	Wagner & Herbst 1995:23 (NEWNAT/O, Mo [as <i>Brachiaria plantaginea</i>])
Monocot	Poaceae	<i>Urochloa reptans</i> (L.) Stapf	Herbst & Clayton 1998:20 (NEWNAT/O [as <i>Brachiaria reptans</i>])
Monocot	Poaceae	<i>Zizania latifolia</i> (Griseb.) Turcz. ex Stapf	Lorence & Flynn 1999:6 (NEWNAT/K)
Monocot	Poaceae	<i>Zoysia matrella</i> (L.) Merr. var. <i>pacifica</i> Goudsw.	Flynn & Lorence 1998:5 (NEWNAT/K)
Monocot	Potamogetonaceae	<i>Potamogeton tricarinatus</i> A.Benn.	Wagner et al. 2012:102 (NEWNAT/EM)
Monocot	Zingiberaceae	<i>Alpinia zerumbet</i> (Pers.) B.L.Burtt & R.M.Sm.	Flynn & Lorence 2002:16 (NEWNAT/K)
Pteridophyte	Blechnaceae	<i>Blechnum orientale</i> L.	Lau & Frohlich 2012:10 (NEWNAT/O)
Pteridophyte	Davalliaceae	<i>Davallia fejeensis</i> Hook.	Frohlich & Lau 2008:5 (NEWNAT/O)
Pteridophyte	Dicksoniaceae	<i>Dicksonia fibrosa</i> Colenso	Lorence & Flynn 2006:1 (NEWNAT/H)

New Naturalized Taxa

Group	Family	Scientific name	Literature source
Pteridophyte	Marsileaceae	<i>Marsilea crenata</i> C.Presl	Wilson 2003:5 (NEWNAT/O)
Pteridophyte	Polypodiaceae	<i>Phymatosorus scolopendria</i> (Burm.f.) Pic.Serm.	Oppenheimer 2006:13 (NEWNAT/WM)
Pteridophyte	Polypodiaceae	<i>Pyrrosia piloselloides</i> (L.) M.G.Price	Lau & Frohlich 2012:21 (NEWNAT/O)
Pteridophyte	Pteridaceae	<i>Pteris tremula</i> R.Br.	Oppenheimer 2007:30 (NEWNAT/EM)
Pteridophyte	Salviniaceae	<i>Salvinia molesta</i> D.S.Mitch.	Wilson 2003:6 (NEWNAT/O, H)
Pteridophyte	Selaginellaceae	<i>Selaginella umbrosa</i> Lem. ex Hieron.	Wilson 2003:6 (NEWNAT/H)
