The History of the Brand

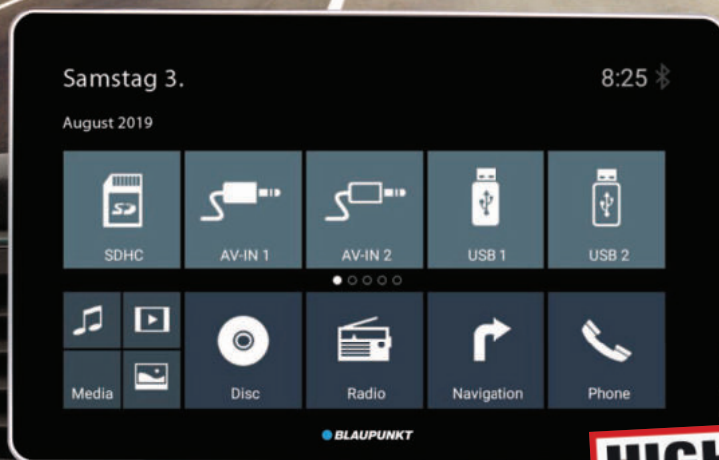

In 1923, when broadcasting was still in the starting blocks and the company „Ideal“ was founded in Berlin, the „blue dot“ was born as a symbol of quality. The product program at that time included earphones and detector receivers. These were thoroughly tested by technicians and marked with a blue dot as a seal of quality after passing the exam successfully. Soon the buyers only demanded products with the „blue dot“ and quickly became synonymous with exceptional quality. In 1938, the quality symbol became a trademark and, at the same time, the company name „Blaupunkt“, which is now known worldwide.

Even today, the blue dot stands for products with outstanding quality and technical competence, especially in radio reception as well as navigation on wheels and for first-class sound.

- 1923** — Founding of the company in Berlin
- 1932** — The first car radio developed in Europe, the Blaupunkt AS 5
- 1969** — World's first stereo car radio
- 1974** — the first car radio with ARI traffic receiver
- 1982** — prototype of the first route guidance system EVA (Electronic traffic controller for motorists)
- 1995** — Blaupunkt starts with its first DAB receiver
- 2001** — sold one million navigation systems and presented the world's first DAB car radio with MP3
- 2007** — Innovation with the first digital Plug & Play amplifier
- 2012** — New 1-DIN car radio with integrated loudspeaker
- 2014** — First Blaupunkt 2-DIN Multimedia Car Radio with Android
- 2016** — New vehicle-specific Blaupunkt 2-DIN Multimedia car radio with Android
- 2017** — Heavy Duty audio systems for professional use
- 2018** — Blaupunkt entry into the e-mobility market with two folding e-bikes.
First 2-DIN multimedia car radio with 10.1" touch screen and Android 6.0
- 2019** — First Youngtimer car radio – Blaupunkt relaunches the cult car radio „Bremen SQR 46“
- 2020** — to be continued ...

Perfect personalization – make it to your very own car radio!

The ROME 990 DAB offers all the possibilities of personalization. Based on the Android operating system, menu optics and contents can be designed according to your taste. Be it a private photo as a display background, the selection of colors for the menu icons, the deletion of unneeded functions or their grouping to personal folders. It's your choice!

THE STREET AS YOUR HOME!

Blaupunkt navigation systems

with the latest navigation solutions from Blaupunkt, you can quickly and precisely reach any destination with driver assistance at professional level on board. Europe-wide navigation with simple operation and highest comfort are not a contraction, but our claim.

Camper & truck navigation:

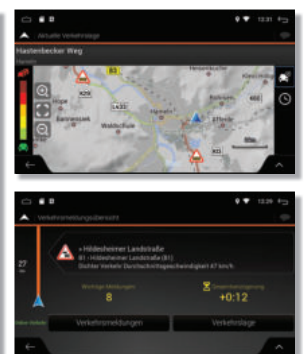

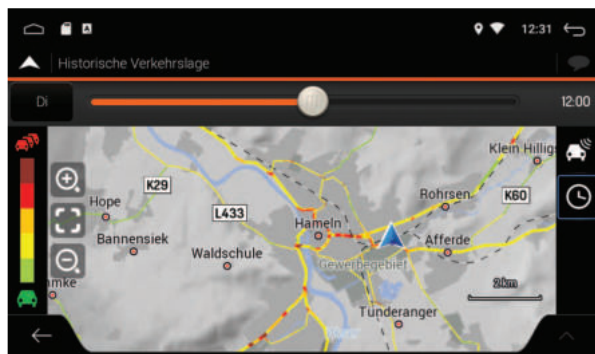

The **camper & truck navigation** software allows you to enter the dimensions of the vehicle to avoid streets that are not suitable for the vehicle. Also, driving times can be set for multiple drivers.

Maps for all over Europa:

With our navigation solutions you get **all of Europe on a small memory chip**, a cross-border navigation including the use of ferry connections is hereby possible.

LIVE TRAFFIC:

With the **online real-time traffic data**, the new iGo primo navigation software can help you to better manage traffic congestion, it even considers slow-moving traffic. The data is as up-to-date and accurate as you know it from navigation apps on your mobile phone. Simply connect the device via Wi-Fi with your mobile phone or a hotspot and the navigation software will automatically download the traffic data.

Want to know how the **weather** is on your route or the destination location? No problem with the online services!

TMC:

Avoid traffic jam with **TMC** (Traffic Message Channel) und **historical traffic data**. To avoid traffic congestion along the route, latest traffic information from FM radio stations and in map data included historical traffic data can taken into account.

Destination selection via taken pictures (Geotags):

Do you have photos of your last vacation, but do not remember exactly where you were? You can enter the destination using your **geotagged pictures** of your last visit to a place. Simply insert a USB stick with the photos into the device and browse the pictures.

POI (Points Of Interest):

With **several million POIs** from all over Europe, you'll find every sight, a gas station on the route, a parking lot near the finish or a restaurant on your route.

Destination selection via coordinates:

No destination address available? If you do not know the exact address of a destination or if it is offroad, you can also set it with the help of **coordinates** or select it directly on map.

Blaupunkt Promobil POI:

With the extensive **promobil POI parking database** you will find RV sites throughout Europe with additional information from promobil.

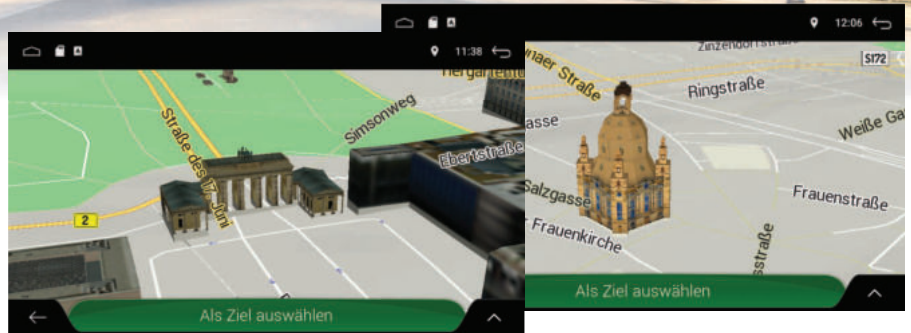

Auto zoom:

Depending on the speed and upcoming maneuvers, the zoom level will be adjusted automatically. If you cover a long distance on a road and no turning maneuvers are necessary, the map view is automatically zoomed out to give you a better overview of the route.

3D-VIEW OF ATTRACTIONS:

Ever seen the sights before a planned trip? No problem! **Buildings** can be shown **photorealistic in the 3D-view** for a better orientation.

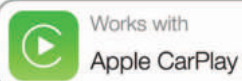

TTS announcements:

With the new **TTS announcements** you can have the complete route read to you and receive information about traffic congestion. Of course, street names can also be read aloud, as well as announcements they are based on obvious points – „**turn right at the traffic light**“ or „**turn left in front of the petrol station**“. Gone are the days when the navigation announced only „turn left in 100 meters“. Alternatively, you can of course also change the voice, so no names are announced and the announcements are shorter.

Latest map guarantee:

Get **free updates** of your maps within the first **12 months**. To be prepared for the future updates and additional data, the software will be provided on a minimum **8 GB large memory card**. Other content that goes beyond the scope of delivery, can be purchased separately. A new purchase of the navigation memory card is not necessary for this. You can easily manage and update the map content on your Windows™ PC.

Navigation with Apple CarPlay:

Use your Apple phone and the Apple CarPlay feature on your Blaupunkt car radio to view available apps on the radio's display. Operate your phone over the Apple CarPlay interface on the radio or control it by voice.

Navigation with Android Auto:

Use your Android phone and the Android Auto feature on your Blaupunkt car radio to view available apps on the radio's display. Operate your phone over the Android Auto interface on the radio or control it by voice.

Navigation via mirroring of your mobile phone display:

Use your Blaupunkt car radio to mirror the navigation app for your smartphone on the display. The availability and possibility of the function depends on the mobile phone and the software installed on it.

androidauto

With Android Auto™ you have the perfect connection between your multimedia system and your smartphone. The intuitive interface, powerful voice control and built-in Android Auto Control minimize distractions while driving so you can focus on traffic. Compatible with Android Auto are smartphones with Android OS 5.0 (Lollipop) and higher.

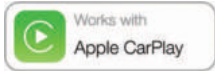

Works with
Apple CarPlay

With Apple CarPlay™ iPhone users can easily, safely and intuitively use their smartphone. Simply connect your iPhone to the USB port of your CarPlay-enabled Blaupunkt device and you can navigate, make calls, send and receive messages (even via WhatsApp), play music or listen to podcasts - simply via the voice control or via the touch screen of your multimedia device.

Safe operation thanks to steering wheel remote control!

If your vehicle is equipped with a remote control on the steering wheel, you can use it together with the Blaupunkt Las Vegas 690 DAB via the SWC (steering wheel control) function. Thanks to the SWC function, the steering wheel remote control takes over the most important functions such as volume, mute or Bluetooth of the radio.

Highest sound quality with FLAC!

FLAC stands for „Free Lossless Audio Codec“ and allows the compression of audio files to half amount of data without loss of quality. With FLAC you can store your music collection in the highest sound quality and play it on the Las Vegas 690 DAB.

AMSTERDAM 290 BT

Highlights

Variocolor

Thanks to Variocolor you can set the lighting and the display of the Palma 190 BT individually to your taste. There are 7 colors available.

Back to the future:

The newly relaunched cult car radio „Bremen SQR 46“ with many new features!

Over the years, some models have become true cult objects. Like the legendary Blaupunkt „Bremen SQR 46“ from the year 1986. Now we present the reinterpretation of the popular 1-DIN car radio and unite the USPs of the 80s model with new technologies and functions. The result is the Blaupunkt „Bremen SQR 46 DAB“.

Its operating concept, the simple design and the crystal clear reception contributed significantly to the popularity of the original Bremen car radio. So we have taken over the

styling of the original model in the new edition, but at the same time added a modern Variocolour illumination for the buttons and the display. Thanks to Blaupunkt Codem FM RDS tuner and DAB + digital tuner, the first-class reception remains one of the strengths of the new Youngtimer Car radio. New are the numerous serial interfaces, including two USB ports, an aux port and an SDHC slot - even audio streaming via Bluetooth is not a future piece for the returning legend. The radio carries the „Made for iPhone / iPod“ and ensures appropriate compatibili-

ty. All settings are permanently saved even when disconnected from the battery. An active DAB + screen antenna is also included.

The new „Bremen SQR 46 DAB“ has a short installation depth - ideal for classic cars with shortened installation slots. But not only the car radio itself takes the user on a journey through time, the packaging of the device has been elaborately designed and modeled on the original.

BREMEN SQR 46 DAB

Highlights

- CODEM High-End AM/FM (RDS) tuner
- Built-In DAB/DAB+ tuner
- Bluetooth for hands-free calling with phone book upload and audio streaming
- Internal and external hands-free microphone
- Audio playback from USB/SDHC (up to 32 GB)
- Audio playback formats: MP3, WMA
- Front USB, front SDHC slot, front Aux-In, 1 x rear USB
- Steering wheel control input (SWC, programmable)
- 3-Band semi-parametric equalizer
- 4-channel preamp-out (4 V) and subwoofer-out
- 4 x 50 watt max. power
- Permanent memory
- Variocolor illumination
- External hands-free microphone, DAB+ on-glass antenna and IR-remote control included in delivery

From the cassette compartment to modern media

The Mediaport's serial ports allow you to comfortably play your music collection via USB, SDHC memory card, audio input or even with an iPod / iPhone.

Best reception quality thanks to CODEM high-end RDS tuner

Best possible reception quality thanks to the Codem high-end RDS tuner developed by Blaupunkt. Full transmission bandwidth even with weak transmitter signal, low noise even at low field strength, optimized large-signal behavior and optimal AF behavior distinguish this Blaupunkt development.

CRYSTAL CLEAR RECEPTION

no matter where you are!

WORK HARD & PLAY HARD!

Car radios not only for commercial vehicles!

Functional infotainment in a new dimension!

Resilient, easy to use and uncompromising in terms of quality: features that are currently requested by drivers of commercial vehicles on a radio. The new Blaupunkt Heavy Duty Line fulfills these requirements, be it in the 12 Volt or the 24 Volt segment. A CD drive protected

against shocks and vibrations allows unrestricted enjoyment of music even off the streets. All modern USB media can be conveniently connected and played. And thanks to fewer and larger rubberized station buttons, operation is always intuitive and easy. Our well-thought-

out concept goes into every detail: stored radio stations are retained, even if the vehicle battery is disconnected during maintenance work.

Work hard & play hard!

- Ignition logic and protection of the vehicle battery
- Rubberized station buttons and rubberized device frame
- Short installation depth
- IR-remote control included in delivery

TAKE IT EASY!

DAB`N`PLAY 370

Plug'n'Play car DAB+ digitalradio / Bluetooth adapter

Highlights

- DAB+ digitalradio receiver
- 3" TFT color display
- Bluetooth handsfree system integrated incl. A2DP
- Music / voice playback via AUX connection or wirelessly via integrated FM transmitter
- Simple power supply via 12 V cigarette lighter
- „Plug and Play“ installation
- Compatible with almost any factory or retrofit car radio

DAB equipment

- DAB+ station name display
- Channel search and storage
- Station list with selection function

Bluetooth equipment

- Answer and end calls via the display
- Integrated microphone
- Musicstreaming of Bluetooth enabled mobile devices (A2DP)
- Voice / music playback via the vehicle speakers

With the new DAB`N`PLAY 370, the existing car radio will be easily updated with the feature „digital-radio“. Now it is possible to have tuner reception in perfect quality without any interference.

The DAB`N`PLAY 370 is equipped with a very readable 3" display

showing all important information, such as the DAB+ station list or station name, artist, track name etc.. The adapter is very easy to use via push buttons and rotary control.

The connection or signal transmission to the car radio is realised

either via the integrated FM transmitter or via AUX connection. As a further highlight, the adapter includes handsfree phone use, in which the telephone calls are transmitted through the vehicle speakers. Or course, music transmission from the smartphone via audiostreaming (A2DP) is as well

possible. Our very compact device can be easily attached with a suction cup holder on the cockpit or on the windscreen. For the power supply, the vehicle 12V socket (or alternatively the cigarette lighter) can be used.

SAFE DRIVE SDC 2.0

Highlights

- High grade, ergonomic design
- OEM look & feel
- For compatible Blaupunkt car radios with SWC input
- Intuitive operation by own assignment of the keys
- Universally configurable
- Ultra lightweight design
- Battery and 12 V electrical system operation, mobile use (if battery installed)
- Installation without drilling wholes, variable mounting options
- Easy installation and connection
- Compact wireless receiver, concealed, requires no visual contact

SMALL CONTROLLER FOR MORE SECURITY!

With the Blaupunkt Safe Drive SDC 2.0 you get a universal remote controller for your Blaupunkt car radio. In the high-grade, black matte design with silver buttons and chrome-plated knob, the controller unobtrusively integrated in your vehicle and lets you operate your radio without having to look away from the road. The controller can retained for storage or use in the mounting plate, for mobile use, it can be removed with a small turn and use thanks to the integrated battery anytime, anywhere.

Wether you mount the remote controller on the console in your car or motorhome, store it in the glove compartment, place it next to your rest area in the motorhome or have it in front of your motorhome on the table beside you, there are almost no limits.

You can program the key functions simply via the SWC setup of your Blaupunkt car radio, the controller itself does not require any setup.

THE NEW

SOUND FREEDOM!

First-class sound for your vehicle!

Blaupunkt Sound Upgrade

Subwoofer from the finest!

GTb 8200 A

GTb 8200 A

System	Active subwoofer system
Diameter/ membrane material	200 mm / coated paper
Amplifier technology	Class D
RMS/Max. power	75 / 200 watt
Sensitivity 2,83 V/m	> 92 dB
Frequency range	30 - 200 Hz
Low pass filter	70 - 190 Hz
Gain/Phase/BassBoost	0.3 - 8 V/O - 180°/-
Automatic On/Off	Highlevel, cinch, remote-signal
Dimensions	255 x 260 x 272/202 mm

Automatic switching on and off via both the cinch and highlevel inputs.

Extremely low power consumption, easy connection to the electrical system.

XLf 200 A

XLf 200 A

System	Active subwoofer system / Blue Magic-Series
Diameter/ membran material	200 mm / 8" / Aluminium compound
Amplifier technology	Class-D
RMS/Max. power	150 / 300 watt
Sensitivity 2,83 V/m	> 92 dB
Frequency range	30 - 150 Hz
Low pass filter	50 - 150 Hz
Gain/Phase/BassBoost	0.1 - 9 V/O - 180°
Automatic On/Off	Highlevel, cinch
Dimensions	340 x 225 x 71/79 mm • 13.4 x 8.9 x 2.8/3.1"

The powerful Class D amplifier has a power of 150 watts (RMS). Enough power for a clean and crisp bass sound.

The protection bars of the solid die-cast aluminium housing protect the blue aluminium membrane and ensure a cool look.

Automatic switching on and off both via Chinch as well as via high-level input.

The

EAGLE EYE

for your car!

BP 3.0 FHD GPS

Highlights

- Plug & Play dashcam
- Integrated GPS tracking function
- 2.7" HD TFT LCD color display
- 140 degree ultra-wide-angle lens
- Video resolution adjustable (1920x1080/1280x720/640x480)
- Integrated G-sensor with motion detection
- Parking monitoring
- SOS function
- Loop recording 1 min./3 min./5 min./off
- Video playback and photo recording
- Integrated microphone and speaker
- Memory card: microSDHC up to 32 GB
- Accessories: vehicle owner, USB cable, vehicle charging cable, user manual

BP 2.5 FHD

Highlights

- Small and compact dashcam
- 2.0" HD TFT display
- Full HD 1080 P
- 170° ultra wide viewing lens
- G-sensor and motion detection
- Superior day & night view
- Loop recording
- Video playback and photo taking
- Real time and date display
- Built-in microphone and speaker
- Memory card (not included) up to 64 GB
- Output: USB 2.0 & HDMI
- Modern design with rubber finish
- Easy installation and thanks to 3M adhesive mounting

BP 2.1 FHD

Highlights

- Small and compact dashcam
- "Plug and Play" – Very easy to use
- 2.0" TFT display
- 120 degree ultra wide viewing angle
- Full HD 1080 P
- Loop recording
- G-Sensor
- Built-in microphone and speaker
- Motion detection
- External memory: memory card (not included) up to 32 GB
- Accessories: car charger, USB cable, user manual, 2 Mounts: suction cup and 3M sticker mount

Perfectly

EQUIPPED!

RVC 2.0

- 12 V automotive rear view camera
- PAL
- High-performance CCD sensor
- IR LED Low Light Optimization
- Waterproof (IP69K)
- Wide viewing angle 95 (H), 80 (V), 120 (D)
- Resolution: 480 TV lines
- Min. Lighting: 1.0 lux at F2.0, 9 lux with IR on
- Dimensions: 77 (W), 44.6 (H), 55 (D) mm
- Working temperature: -30 C ~ +70 C
- Weight: approx. 0.50 kg
- White housing

RVC 3.0

- 12 V automotive rear view camera
- PAL
- High performance CCD sensor
- IR LED Low Light Optimization
- Waterproof (IP69K)
- Wide viewing angle 95 (H), 80 (V), 120 (D)
- Audio Microphone & Heating
- Signal-to-noise ratio: better than 48 dB
- Auto white balance
- Electronic shutter
- Resolution: 700 TV lines
- Min. Lighting: 1.0 lux at F2.0, 0 lux with IR on
- Dimensions: 77 (W), 44.6 (H), 55 (D) mm
- Working temperature: -30 C ~ +70 C
- Weight: approx. 0.50 kg
- White housing

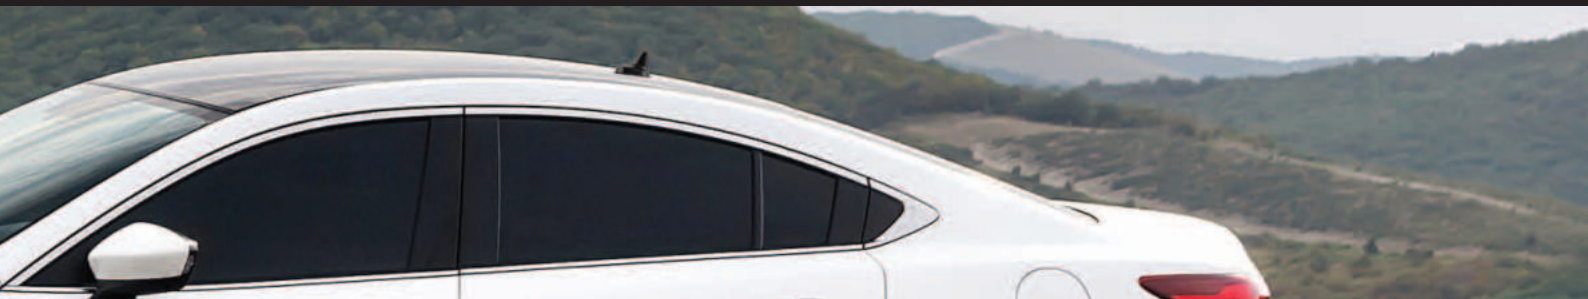

10 M EXTENSION CABLE

High-quality 10 meter shielded connection cable, very flexible for easy installation in the vehicle. Suitable for Blaupunkt cameras RVC 2.0 & RVC 3.0.

The guarantee for

BEST RECEPTION!

FUNLINE

RADIO A-R G 01-E

- AM/FM
- Active on-glass antenna with integrated blue switchable lighting ring
- Illumination indicates amplifier function
- Excellent channel separation of the AM/FM signal through state-of-the-art amplifier
- Easy adhesive mounting, no drilling necessary
- Optimal reception quality
- Maintenance-free and theft-proof

KOMBIFLEX

DAB-A-A

- Active roof antenna
- DAB+- and AM/FM reception
- 12 V power supply to the amplifiers
- Low noise antenna rod
- Low installation depth (15 mm)
- Low installation effort

CLUB T38.1

- Passive short -rod antenna
- AM/FM radio reception
- Rear or front mounting
- Installation angle 0° - 90°
- Recommended for FM reception
- Easy installation
- Optimal reception characteristics
- Optimal price/quality ratio

MAGNETFUSS-ANTENNE

A-D T 01 E

- Roof antenna
- Magnetic base antenna for DAB reception
- Simple magnetic attachment
- Stainless
- Optimal reception characteristics

DAB KOMBIFLEX-DACHANTENNE

DAB-A-GSM-GPS-A 3766 03

- DAB reception, active and low noise in area B III
- Radio reception, active and low noise for AM/FM
- Mobile GSM900/1800, UMTS
- Active GPS antenna (phantom power supply)
- Low noise antenna rod
- Low installation depth (15 mm)

DAB DACHANTENNE

DAB-A-GPS-A „SHARK“

- DAB reception, active and low noise in Volume III
- Radio reception, active and low noise for AM/FM
- Active GPS antenna (phantom power supply)
- Installation possible with new hole patterns from Mercedes and Audi/VW
- Low installation depth (16,5 mm)

DAB ANTENNEN-SPLITTER

DAB-S-32A (FAKRA/DIN)

- Active broadcasting distributor for the vehicle sector
- Sharing of analog radio and DAB, DAB+ frequency ranges
- Improving the reception quality of passive broadcast antennas
- Easy and fast installation
- The splitter is designed for typical roof and fender antennas
- Different antenna plug variants available (DIN/DIN, ISO/ISO, FAKRA/FAKRA etc.)
