## About Us

ALP OZ are leaders in the manufacture of auto glass rubbers and tools, body shop tools, and industrial rubber products.

We are an Australian family owned company with over 60 years of hands on professional experience in the Automotive industry. Oz Auto Moulds began in 2001 focusing on supplying universal moulds to the windscreen industry. In 2018 BTB Auto Glass and Body Shop Tools was incorporated into our business growing our unique range of quality hand and power tools, as well as adding the BTB manufactured flexible adhesive cutting tools and blades which are exported worldwide.

## Our Mission, Vision & Values

Our mission is to help, educate, and problem solve by listening to and understanding our customers' requirements, finding out what the industry needs most whilst delivering quality products at affordable prices.

## ISO 9001 Certification

We are proud to have been accredited with the world's most recognised Quality Management standard – ISO 9001:2015. This ensures our products and services meet the needs of our customers, helping to improve the overall performance, maintain a high level of quality and provide strong customer service.

The benefits and advantages that flow to our customers as a result of our successful implementation of ISO 9001 include:

- ✦ better quality products and service
- ✦ More reliable delivery scheduling
- ✦ Mistake Proofing
- ✦ Improved communications
- ✦ Constantly improving on current processes
- ✦ Standards maintained by annual assessments.

## Our Quality Policy

At ALP OZ Auto Moulds quality is an integral part of our business. We strive to achieve sustainable growth through consistently satisfying the diverse needs and expectations of our customers. Our aim is to provide products and services that meet or exceed expectations, deliver more value to our clients, responding to customers needs. We embrace new ideas, technology and innovation and strive for continuous improvement setting the bar high to maintain our strong reputation within the industry.

## Industry Knowledge

With over 60 years hands on professional experience in the Auto Glass industry we are qualified industry experts providing training and technical support for the products we sell.

## Extensive Product Range And Stock

Offering a comprehensive range of moulds, rubbers, specialised hand tools, power tools and accessory products, our warehouse carries over 2000 line items dedicated to Auto Glass specialists.

## New Products & Continuous Improvement

ALP OZ Auto Moulds continuously review our range, working with our partners on new products to improve both our business and our customers' businesses.

With the growing relationships internationally we are regularly exposed to new technology, product improvements and new products. We have access to Australian and overseas facilities where we can design, test and create unique products to suit your business. Our sales team can work with you from beginning to end on your new product development projects.

## Prompt Service & Delivery

We pride ourselves on our high level of customer service and prompt response to all product enquiries. We aim to send all orders out on a same day service if received by 3:00pm AEST.

To place orders please contact our customer service department on 03 9703 1522, fax orders to 03 9703 1514 or email orders to sales@alpoz.com.au.

**The BTB Auto Glass & Body Shop Removal System**

BTB's versatile, precise, efficient and user friendly system safely removes any adhesive bonded auto glasses, body panels or decorative mouldings without damage to component or painted panel while avoiding operator injury. This small, compact and powerful air tool operates blades to cut with precision from inside or outside of the vehicle, against the glass surface, or in the case of an encapsulated glass, the blades will safely cut away from the encapsulation and against the pinchweld or body panel.

Nylon control head & adjustable arms regulate cutting depth of all blades

**PATENTED DESIGN**

The short & fast in-line stroke of the BTB air tool gives unequalled, gentle & balanced cutting action

Registered and Pending Patents and/or Designs Extending Worldwide.

**AUTO GLASS REMOVAL**

BTB Long blades easily cut urethane below any dashboard.

Remove excess adhesive easily and safely.

Cut from outside the vehicle with BTB's Powered Cold Knife blades.

Short blades cut from inside the vehicle with precise depth control.

For curved glasses, thin flexible blades follow the contour of the glass.

Excellent for removal of small and encapsulated glasses.

Save and reuse any undamaged glass or encapsulated glasses.

**BODY PANEL & BADGE REMOVAL**

Powerful tool & strong blades cut tough adhesive to remove bonded body panels.

Recycle adhesive & tape fitted badges, mouldings & bump strips.

The BTB System range includes our **AIR-TOOL** 12V **E-TOOL** plus an array of General-Purpose and Application-Specific blades sold separately or in kits.

**BUS, TRAIN & COMMERCIAL VEHICLE**

Cut from inside or outside to reduce effort and removal times for large glasses.

Special blades remove backfill adhesive between glass edges and / or panels.

Safely remove adhesive bonded panels from buses and trains.

## BTB Blades Explained

### BLADE COLOUR CODING

**Yellow** Blades are designed to cut with the flat side of the blade hugging the glass surface.

**Orange** reverse blades are designed to cut with the flat side of the blade hugging the pinchweld and saving encapsulated glasses.

### CUTTING BELOW DASHBOARD & HARD TO REACH AREAS

Long **Straight Blades** easily reach hard and wide adhesive on any vehicle make or model.

### CUTTING FROM INSIDE VEHICLES

Short **Z Blades** are used for precise cutting along top / sides of glasses and easily accessible adhesive areas. Use **Orange** blades for encapsulated glass removal.

### CUTTING FROM OUTSIDE VEHICLES

**Powered Cold Knife Blades** allow easy removal of glasses from outside the vehicle. They are safer and easier than manual cold / pull knives.

### CURVED / CONTOURED GLASS REMOVAL

**Flexible Blades** cut while following the contour of curved glasses.

### ENCAPSULATED GLASS REMOVAL

**Orange Reverse Blades** hug the pinchweld to remove and save undamaged encapsulated glasses for reuse.

### PINCHWELD TRIMMING

WK6 winged non-scratch **Pinchweld Scraper Blades** allow easy and safe removal of excess adhesive. These are uniquely sharpened with a special wing on each side which leaves 1 to 2mm thickness of adhesive for re-bonding and eliminates damage to paintwork and vertical pinchweld walls.

### SERRATED vs NON-SERRATED

Standard **Non-Serrated** blades can be used in all glass and panel applications. Special **Serrated** blades provide a faster more aggressive cut for glass removal by more proficient users.

### CUTTING DEPTH CONTROL

BTB's fully adjustable cutting depth control arms ensure precise cutting depth to avoid contacting painted panels.

### Why a Cord & Wire Cut-Out Tool?

The auto glass in today's modern vehicles have tighter tolerances between the glass and the body. It is becoming quite impossible on

some vehicles to avoid damage to the pinchweld when removing the glass. Many technicians have started using cut-out wire or cord in an effort to save the pinchweld from possible damage. This will save valuable time in priming and

will prevent rust from forming on missed areas of damage.

Also, cord /wire removal tools reduce physical strain on technician's body compared to other removal tools.
