

Science-based Targets initiative (SBTi) validates ALTEN's greenhouse gas emissions reduction targets

Press release
January 05, 2024

ALTEN announced that its greenhouse gas emissions reduction targets have been approved by the SBTi (Science-based Targets initiative), considered to be in line with the levels required to achieve the objectives of the Paris Agreement and the 1.5°C trajectory by 2050.

The ALTEN group is committed to reduce by 2050 and compared to 2019:

- Greenhouse gas emissions from scopes 1 (*direct emissions*) and 2 (*indirect emissions*) by 59.8% in absolute value
- Scope 3 greenhouse gas emissions by 55% in intensity

By also validating its long-term environmental approach with SBTi, ALTEN is committed to achieving the Net-Zero Emissions target by 2050.

"We are honored to receive this validation, which further strengthens our environmental strategy. It reinforces our ambitions and the objectives we have set, particularly as a committed player in the environmental transition," says Bruno Benoliel, Deputy CEO of the ALTEN Group.
