

Schreiber Foods International, Inc.

Direct Importer of **Ambrosía** Brand

IMPORTED FOOD • GREAT SERVICE • GLOBAL EXPERIENCE

Schreiber Foods International, Inc.

As a direct importer of canned foodservice items, **Schreiber Foods International (SFI)** has been supplying distributors with the highest quality imported foods since 1980. Our **Ambrosia**® brand has developed a name for exceptional quality and that's a reputation we take very seriously. Our customers know that when they buy **Ambrosia**®, they're guaranteed a high quality, consistent ingredient each and every time they open one of our products.

We have two company-owned warehouses in the US, one in New Jersey and the other in Southern California. Those anchor facilities help to support our multiple third-party distribution centers, located in strategic markets around the country. **SFI** has a distribution footprint to ensure effective and efficient supply of its goods, regardless of your location!

As a family-run business, **SFI** puts the relationships it has with its customers front and center. We focus on the independent foodservice distributor/manufacturer and are not beholden to any corporate entity. Our customers need a partner to navigate the world of imported foods and we are happy to provide that level of service.

Visit our website at www.ambrosia-foods.com to learn more.

Let Schreiber Foods International put its expertise to work for your company!

** Ambrosia® Canned Tuna

A Delicious and Highly Nutritious Addition to Any Menu!

Whether you're mixing up a batch of traditional tuna salad, serving it Nicoise-style, or including it as an ingredient in a finished dish, **Ambrosia® Canned Tuna** sets the highest standard for quality and taste. Take a moment to learn about the different species of fish we offer.

Chunk Light/Skipjack: Has the darkest color meat with a sometimes slightly pink hue. Relatively tender texture with the strongest flavor profile of any offering. Small loins and chunks. Highly economical product, often sold to schools, institutions, or large-scale manufacturing.

Yellowfin: A dark meat tuna with a very light brown color. Firm texture, with a mild taste – not too strong. In Yellowfin, the smaller fish yield lighter meat, which is typically more desirable. Economically priced item with uses in schools or institutions as well as on the 'street'.

Tongol: The lightest of the "dark meat" tuna, with an off white color. Firm texture and a very mild but flavorful taste. Tongol can be a great alternative to the pricier Albacore, offering a high-end item at reasonable prices. Can be used in any application.

Albacore: The only tuna that can be called "white". Extremely light in color and very firm in texture. Very mild flavor with a taste closely resembling that of chicken. Albacore Tuna comes in both Chunk and Solid packs. Chunk Albacore is mostly pieces or loins, while Solid Albacore is typically 2 large loin segments in the can. By far the most expensive foodservice tuna offering – a premium product!

“Times have changed, but values have not. Everything we’ve done for years has been a continual pursuit of the highest industry standards. It is no longer sufficient to promise good quality, we are proactive to assure a safe food supply chain according to international standards. We strive to do that every day, and to meet the demands of our customers as well.”

Howard Schreiber

President
