Catalogue of Woody Plants
Arboretum Wespelaar
and garden of
Herkenrode

Arboretum Wespelaar vzw, a non profit organisation, was set up in 2001 to manage the botanical collections of some 19 ha of the estate of Philippe de Spoelberch in Wespelaar situated to the North of the garden of Herkenrode. Since 2005 this task is now the responsibility of **Foundation Arboretum Wespelaar**. The present Catalogue of Woody Plants, lists the plants growing in Herkenrode and the Arboretum Wespelaar, both of which are open to the public, from time to time, to groups on request or to members of asbl Jardins Ouverts de Belgique – Open Tuinen van België vzw. In this printed version of the catalogue, several fields have been truncated in order to reduce to one line the relevant data. The digital database is available on the website.

In 2001 werd de vereniging **Arboretum Wespelaar vzw** opgericht met als voornaamste doelstelling de verdere uitbouw en het onderhoud van de dendrologische verzamelingen van het arboretum van Wespelaar. Dit Arboretum is gelegen op het domein van Philippe de Spoelberch net ten noorden van de tuin “Herkenrode” en is ongeveer 19 ha groot. Sedert 2005 werd deze taak overgenomen door **Stichting Arboretum Wespelaar**. De raad van bestuur van de vereniging heeft tot doel gesteld het Arboretum op regelmatige tijdstippen open te stellen voor een geïnteresseerd publiek van zodra de nodige faciliteiten beschikbaar zijn. Deze ‘Catalogue of Woody Plants’ bevat de inventaris van alle houtachtige planten die men kan terugvinden te Herkenrode of het Arboretum Wespelaar. Beide domeinen zijn op welbepaalde data toegankelijk voor de leden van de vzw Open Tuinen van België. Ook groepen zijn welkom maar enkel op aanvraag. Verschillende velden van het originele gegevensbestand zijn afgekort of weggelaten in deze gedrukte versie van de catalogus. De digitale versie van de databank kan geraadpleegd worden op de website.

L’association sans but lucratif **Arboretum Wespelaar** fut constituée en 2001 pour assurer la gestion de quelques 19 ha de collections botaniques situées sur la propriété de Philippe de Spoelberch, à Wespelaar. Depuis 2005, cette tâche a été reprise par la **Fondation Arboretum Wespelaar**. Le conseil d’administration de la société a décidé d’ouvrir l’Arboretum pour un public intéressé, à des moments réguliers, dès que toutes les facilités sont en place. Le présent catalogue reprend l’ensemble des plantes ligneuses vivantes, dans le jardin de Herkenrode et l’Arboretum Wespelaar. Ceux-ci sont ouverts au public, aux groupes sur demande et, occasionnellement, dans le cadre des journées portes ouvertes organisées par Jardins Ouverts de Belgique asbl. La version imprimée de l’inventaire a volontairement tronqué certains champs pour permettre de ne présenter qu’une ligne par spécimen. La version numérique de la base de données peut être consultée sur le site.

KEY TO CODES USED IN THE INVENTORY OF PLANTS AT HERKENRODE AND ARBORETUM

Evaluation: Evaluation from good to low interest in Belgium (**, *, ,o)

Num: ACCESSION NUMBER

This 5-digit figure is composed of two digits for the year of entry into the collection and 3 additional digits for individual plants. Such entries can originate through purchase or transplanting from own nursery. The plant may have been growing for several years already (as seedlings, cuttings, etc.) in the various nurseries at Herkenrode. Plants will only receive an accession number when they definitely enter the collection.

Name: THE PLANT'S BOTANICAL NAME

This field contains the name for genus, species, subspecies, variety, form and cultivar, in that order. For practical reasons, it was decided to avoid splitting the denomination over several computer fields. The result is that one has a condensed listing with all relevant information in one computer field. Nomenclature has been very much simplified. Abbreviations have therefore been necessary, mostly for the named cultivars. For plants of wild origin provenance data are included and take following form: collector and number, location, country, altitude.

Loc: LOCATION

This 3-digit code relates to the overall plan of "Herkenrode + Arboretum Wespelaar", Garden (A - Z, 1-100, and 300 to 500), Arboretum (100 to 299).
The numbering of the locations is by natural boundaries.

D: DATE OF PLANTATION

These 2 digits indicate the year of plantation in the stated location ("Loc"). If plants are moved within the collection after their introduction, this date will be changed accordingly.

Src: SOURCE OF PLANT

This 3-digit code relates to the appendix of sources.

"WLD" stands for plants collected in the wild, directly or indirectly, location of collection will be found under DATA.

S: STATUS

This field has been expanded to describe the growth condition of living plants:

"0" The plant is dead: see under data for reason, date, etc. It could have been moved to another collection or given away (dead plants are not included in this Catalogue)

"1" The plant is in poor condition at the time of inventory. This may be eventually corrected in later inventories if the plant's condition improves.

"2" Damaged, cut back (storms, diseases, frost etc...).

"3" Lack of vigour, poorly adapted, die back.

"4" Normal growth.

"6" Is used for synonyms

H: HARDINESS RATING AT HERKENRODE AND ARBORETUM WESPELAAR

A: hardy

B: leaf damage

C: branch damage

D: cut to the ground, recovering since

E: killed outright

V: VERIFICATION OF TAXONOMY

T: typical

V: verified

C: close to the type (minor deviations)

H: hybrid of the type (50 % deviation)

K: hybrid of known parentage

?: requires further determination

X: error to be determined and changed

DATA: One may find further refinements:

A+: leaf and flower bud hardy at Herkenrode and/or Arboretum

A-: flower-buds frozen

B+: light leaf damage (to evergreen plants)

B-: heavy leaf damage, total defoliation

C+: light wood damage

C-: major branches die back
