

Bray-Curtis dissimilarity analysis was used to refine the vegetation associations identified during the vegetation survey and to assist in identification of uncommon vegetation types.

#### 3.3.5.1 Species Accumulation Curve

A species-area curve based on a species accumulation analysis, was used to evaluate the adequacy of sampling (Colwell, 2005). The asymptotic value was determined using Michaelis-Menten modelling.

#### 3.3.6 Vegetation Unit and Condition Mapping

Broad vegetation and condition mapping was conducted in the field, with boundaries delineated over aerial photography, at a scale of 1:5,000. Broad vegetation units were refined based on taxonomic identification of flora collections, statistical analysis of data collected from the quadrats and mapping notes taken during the field survey. Vegetation condition mapping was refined based on site data and mapping notes. Finalised polygons were digitised and produced as electronic mapping data using GIS software.

### 3.4 Vertebrate Fauna

#### 3.4.1 Daily Survey Conditions

Survey conditions for the basic fauna survey are presented in Table 6. Daily temperature and rainfall data is from the Onslow Airport Weather Station (Station 5017) (Bureau of Meteorology, 2021). This information is important for potential detection of species diversity during a survey.

**Table 6: Detailed Fauna Survey Weather Conditions**

Date	Temperature (°C)		Rainfall (mm)
	Min	Max	
19/07/2021	13.2	27.3	0
20/07/2021	15.1	26.6	0.2

#### 3.4.2 Fauna Habitat Assessment

Fauna habitat assessments were undertaken throughout the Survey Area to identify fauna habitat values. Habitat assessment locations are shown in Figure 1. The following information was collected at each site using Fulcrum, a mobile data collection app:

- Site photo
- Landform
- Soil type and colour
- Rock types, surface stone cover and size classes
- Key habitat and microhabitat features including leaf litter, logs, burrows, rocky outcrops, rock crevices, hollows, water sources
- Habitat quality, fire history and evidence of disturbance
- General description of vegetation structure.

Fauna habitat mapping was based on a combination of field observations, fauna habitat assessment data and vegetation mapping undertaken by 360 Environmental.

#### 3.4.3      Opportunistic Observations and Active Searches

Opportunistic observations of fauna were recorded throughout the Survey Area. Observations of primary evidence (direct sightings, calls) and secondary evidence (tracks, scats, diggings etc.) were recorded. Active searches were undertaken in microhabitats likely to contain fauna. They primarily involved raking leaf litter, peeling bark, and splitting dead wood.

#### 3.4.4      Bird Surveys

Systematic bird surveys were undertaken within the Survey Area for 20 minutes in a 2 ha quadrat (Environmental Protection Authority, 2016b) at each fauna habitat assessment location. Where practicable, this was undertaken during typical peak periods of activity when birds are calling and moving about, which is typically within 3-4 hours of sunrise, particularly during warmer periods.

#### 3.4.5      Identification and Taxonomy

Terrestrial vertebrate fauna taxa were identified in the field and released on site.

Where there was doubt on a species name (through subsequent name changes or taxonomic reviews), an effort was made to determine the current scientific name for each taxon. Taxonomy and nomenclature in this report follows the 2021 WA Museum checklist (Western Australian Museum, 2021) where relevant.

## 4 Results

### 4.1 Limitations

Limitations and constraints of the flora, vegetation and fauna survey are detailed below in Table 7. No limitations were identified the assessment, as such the data is sufficient to inform impact assessment for across the Survey Area.

**Table 7: Limitations and Constraints Associated with the Survey**

Variable	Impact on assessment	Potential Constraints on Survey Outcomes
<b>Survey Scope</b>	Not a constraint	<p>Number of species recorded, number of quadrats sampled, and timing of the survey were adequate for this level of survey.</p> <p>A basic vertebrate fauna survey was undertaken. This involved fauna habitat assessments, active searches for mammal and reptile species, opportunistic records and bird surveys in accordance with EPA (2016b).</p>
<b>Availability of Data</b>	Not a constraint	All data required to complete the scope of works including regional and local contextual information was available.
<b>Site Access</b>	Not a constraint	The entire Survey Area was able to be accessed on foot.
<b>Survey Intensity and Resources</b>	Not a constraint	<p>Sufficient time was allocated to the flora and vegetation survey, given the size and complexity of the Survey Area, and the expected level of survey intensity.</p> <p>The survey effort was considered adequate to assess the flora and vegetation values of the Survey Area and provide information required to support approvals applications.</p> <p>The basic fauna survey consisted of six fauna habitat assessments, six 20 min bird surveys, three hours of active searching and opportunistic records.</p>
<b>Experience</b>	Not a constraint	<p>The Detailed Flora and Vegetation Survey and Basic Fauna Survey were undertaken by Senior Botanist Jason Webb and Ecologist Poppy Walker. Jason has 5 years' experience conducting surveys of similar scope throughout Western Australia. Poppy has worked as an environmental consultant for 1 year and has completed flora, vegetation, and fauna surveys state-wide.</p> <p>Identification of flora collections was completed by experienced taxonomist Udani Sirisena at the WAH.</p>
<b>Timing, weather, season</b>	Not a constraint	<p>The recommended primary survey period for the Eremaean Botanical Province as per the EPA Technical Guidance, i.e. 6-8 weeks post wet season (March to June) (Environmental Protection Authority, 2016a). The field assessment was conducted in July 2021 following above average rainfall in May (6-8 weeks prior to the survey), therefore timing is not considered to be a limitation of the survey. Rainfall was above average for</p>

Variable	Impact on assessment	Potential Constraints on Survey Outcomes
		the year and sufficient to allow for many genera to be in flower.
<b>Life Forms Sampled</b>	Not a constraint	<p>The Survey Area was traversed on foot and representative sites of all remnant vegetation was sampled. All flora species encountered within the Survey Area were recorded.</p> <p>The basic vertebrate fauna survey used a wide range of detection techniques to detect fauna taxa within the Survey Area. All vertebrate fauna species were readily identified in the field.</p>
<b>Mapping Reliability</b>	Not a constraint	<p>Vegetation types were described and mapped based on quadrat data taken during the field survey.</p> <p>High resolution aerial mapping current at the time of the survey was used to differentiate all vegetation greater than 1 ha in size.</p> <p>The greatest effort was expended ground truthing vegetation boundaries within and near the proposed development footprint.</p> <p>Fauna habitat mapping was based largely on vegetation mapping and there were no constraints on mapping reliability.</p>
<b>Disturbances (fire, flood etc.)</b>	Not a constraint	No disturbances to the Survey Area was observed.
<b>Completeness</b>	Not a constraint	The survey was considered complete for a Detailed Flora and Vegetation Survey, all vegetation types were surveyed and delineated within the Survey Area and a minimum of three quadrats was surveyed for each vegetation type.

## 4.2 Flora and Vegetation

### 4.2.1 Literature Review

The key findings of the flora and vegetation reports reviewed are summarised in Appendix B.

### 4.2.2 Database Searches

Database searches identified nine conservation significant flora species occurring within 50 km of the Survey Area (Appendix B), comprising:

- No Threatened species
- Three Priority 1 species
- No Priority 2 species
- Six Priority 3 species
- No Priority 4 species.

No State or Commonwealth listed TECs were identified within the Survey Area by the database searches. The State listed PEC Peedamulla (Cane River) Swamp Community occurs 24 km east of the Survey Area, however its listing category has not been evaluated (Department of Biodiversity Conservation and Attractions, 2021b) (Figure 5).

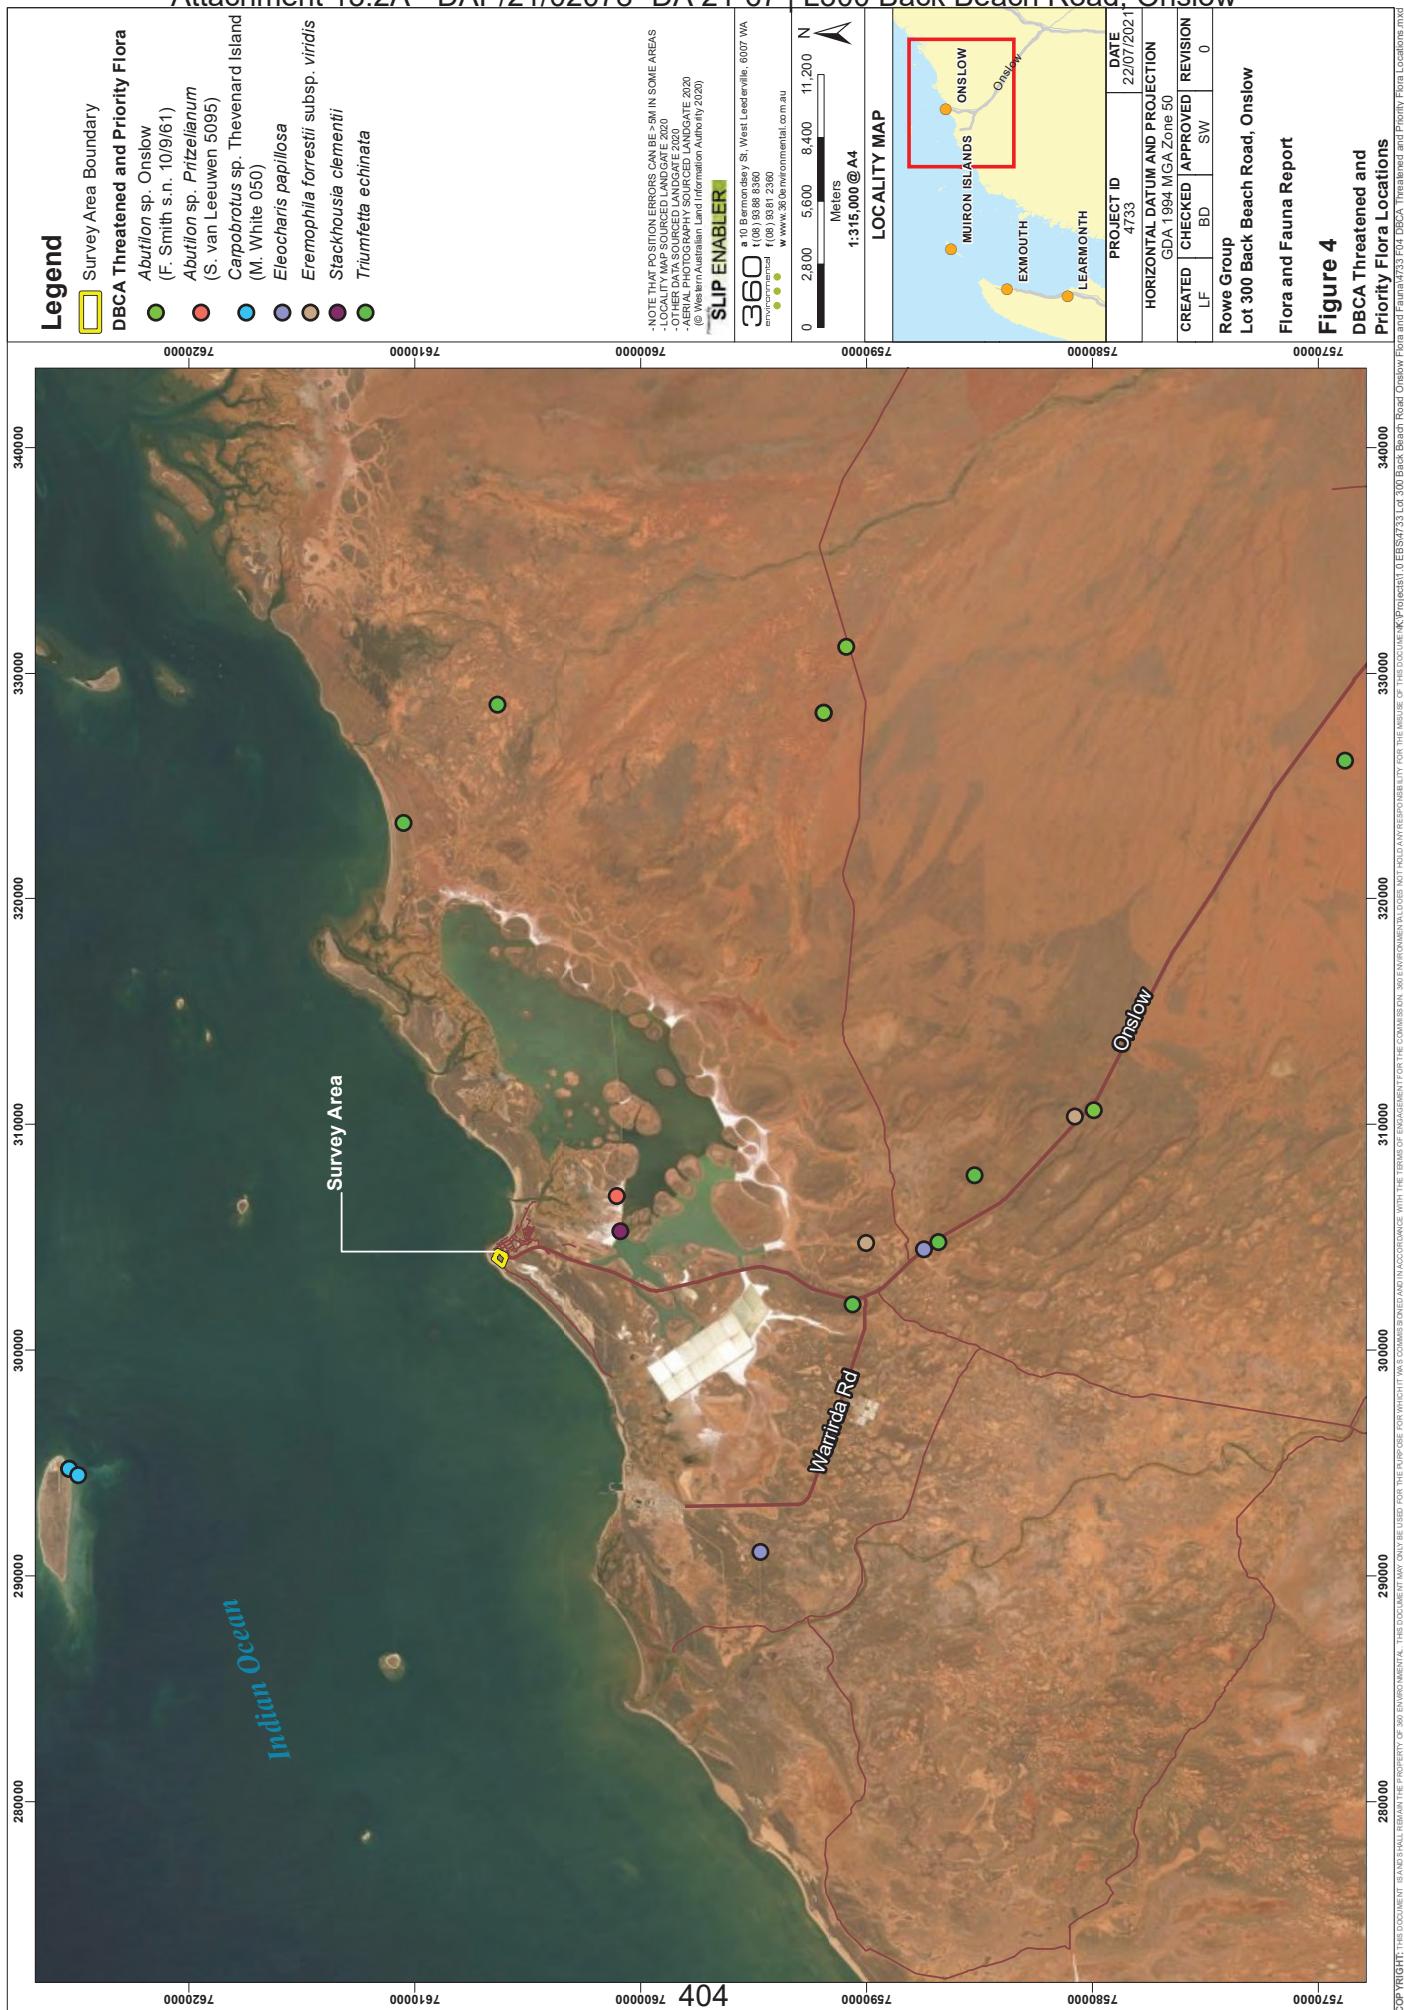

#### 4.2.3 Pre-Survey Likelihood of Occurrence

The pre-survey likelihood of occurrence assessment identified that of the nine conservation significant flora species identified by the desktop assessment:

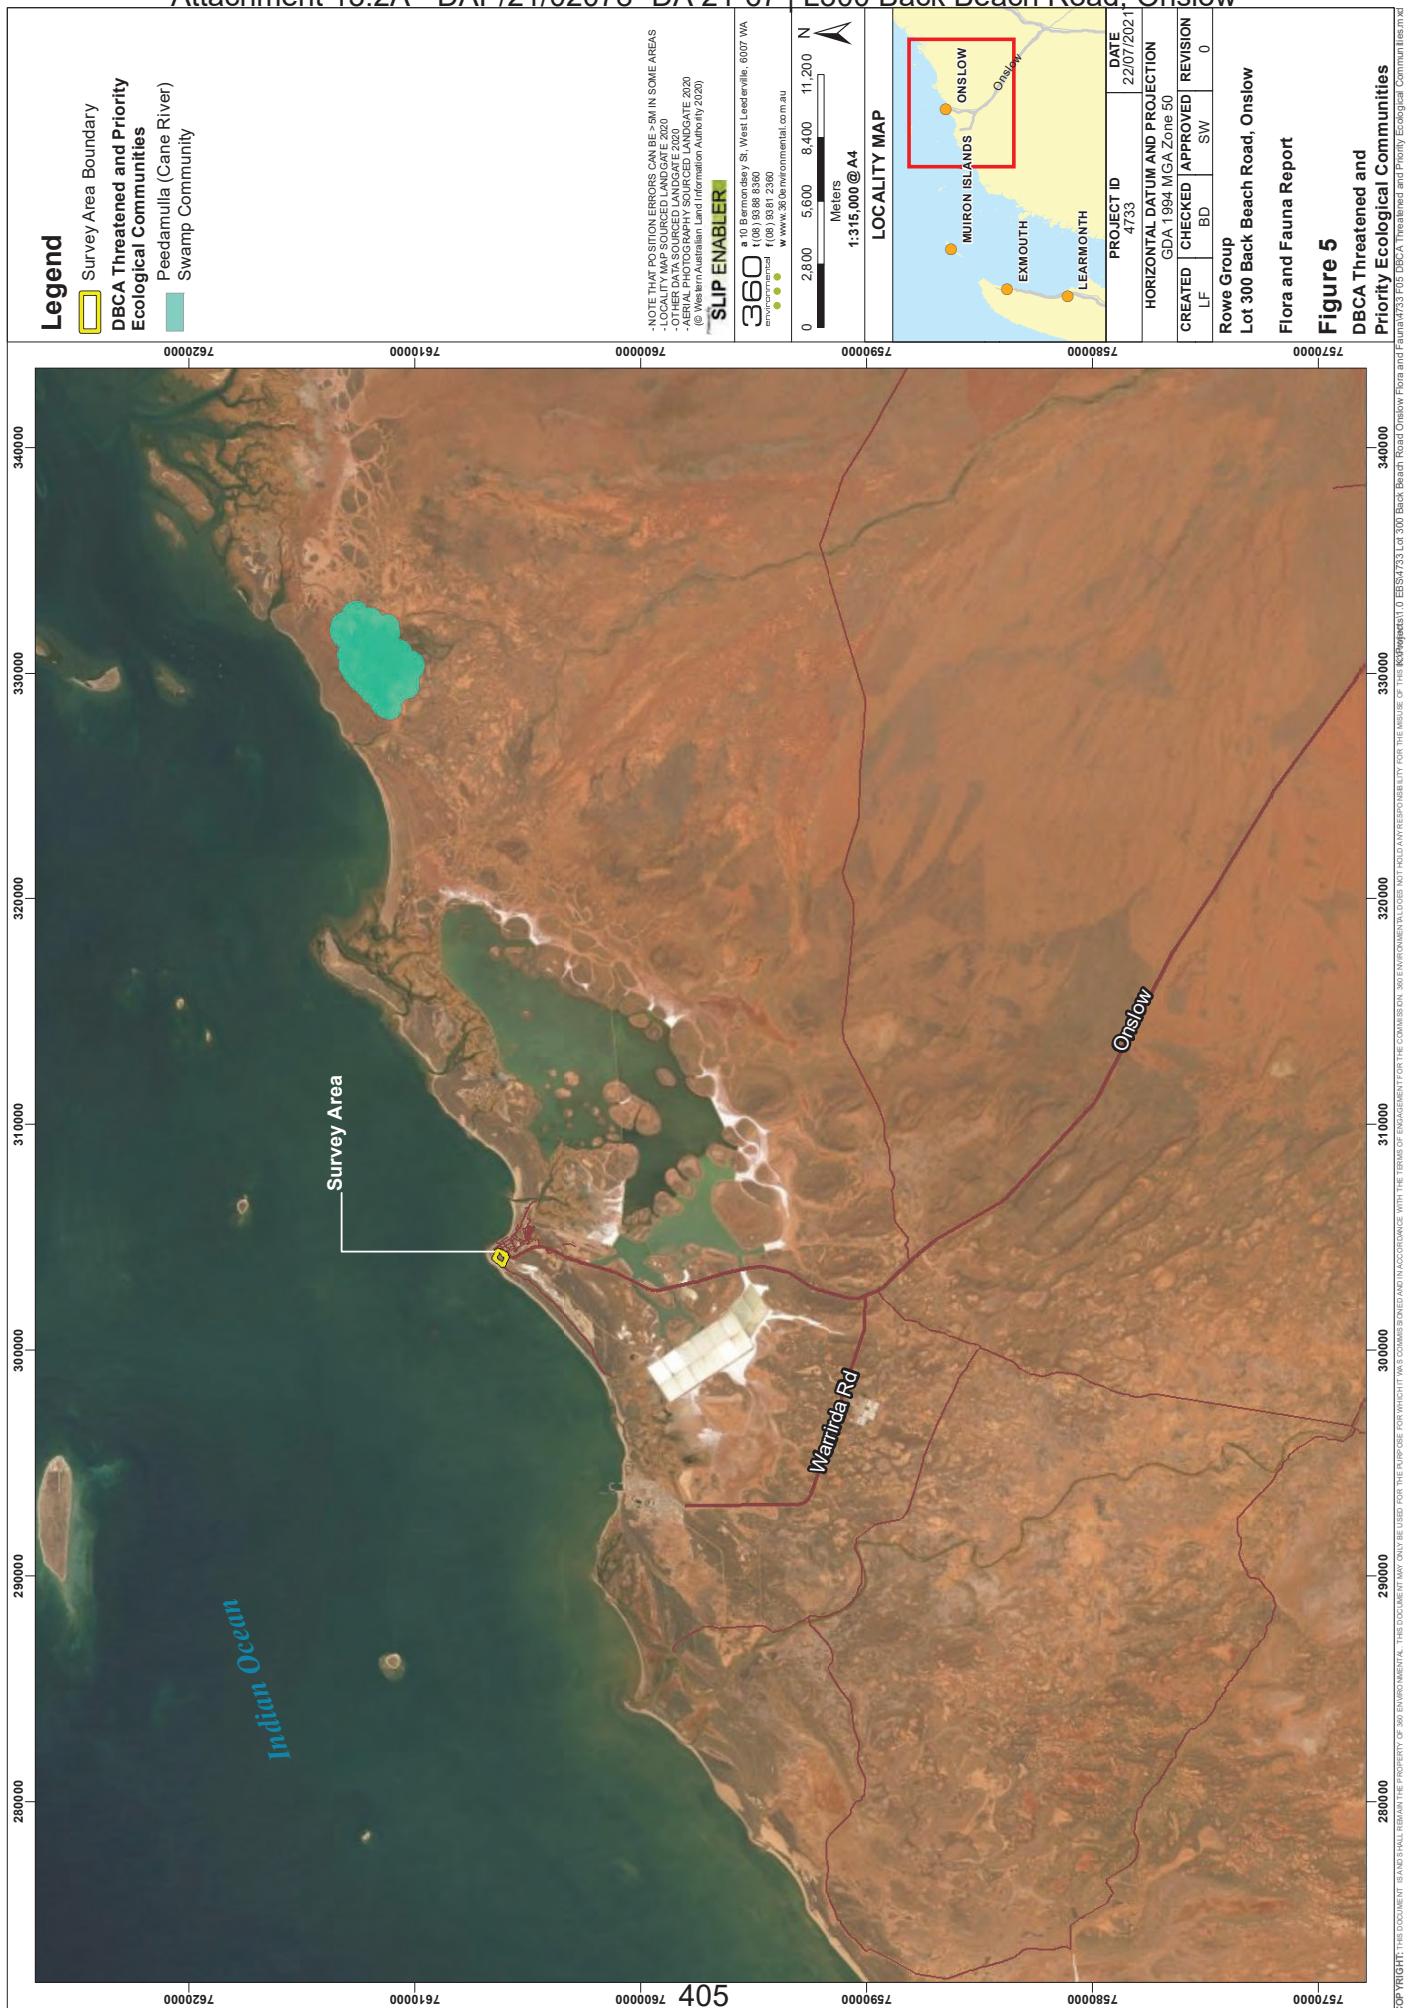

- No Threaten or Priority Listed Flora have been recorded within the Survey Area
- Two taxa were considered to have a high likelihood of occurrence based on habitat preference
- Three were considered to have a medium likelihood of occurrence based on habitat preference
- Four were considered to have a low likelihood of occurrence based on habitat preference.

An additional 30 species were identified by the literature review; however, these were not included in the flora likelihood assessment as all were considered highly unlikely to occur within the Survey Area.

The likelihood of occurrence assessment is provided in Appendix C.

COPYRIGHT: THIS DOCUMENT IS AND SHALL REMAIN THE PROPERTY OF 360 ENVIRONMENTAL. THIS DOCUMENT MAY ONLY BE USED FOR THE PURPOSE FOR WHICH IT WAS COMMISSIONED AND IN ACCORDANCE WITH THE TERMS OF ENGAGEMENT FOR THE COMMISSION. 360 ENVIRONMENTAL DOES NOT HOLD ANY RESPONSIBILITY FOR THE USE OF THIS DOCUMENT.

#### 4.2.4 Flora Composition

The survey recorded a total of 33 taxa from 15 genera across 13 families (refer to Appendix D for full species list). The dominant families were Fabaceae (seven species, 24% of all taxa,), Poaceae (five species, 17 % of all taxa) and Chenopodiaceae (three species, 10% of all taxa).

One species was not be able to be positively identified and has been tentatively listed as *?Flueggea virosa*. Additionally, two *Tephrosia* collections were not able to be positively identified due to species due to variability with the morphology based on the WAH reference collection. None of these taxa resemble any potentially occurring Threatened and Priority Flora, or flora of Conservation significance.

#### 4.2.5 Flora of Conservation Significance

##### 4.2.5.1 Threatened or Priority Flora

No Threatened flora species pursuant to the EPBC Act 1999 and/or gazetted as Threatened pursuant to the BC Act 2016 were recorded during the survey.

No DBCA listed Priority flora species were recorded within the Survey Area.

##### 4.2.5.2 Flora of Other Conservation Significance

Flora may be considered of other conservation significance if it represents a range extension, novel taxon, species that play a keystone role in a community, has relic status, is locally endemic, or represents the extent of a species range.

No taxa recorded within the Survey Area was considered to be of other conservation significance.

#### 4.2.6 Introduced Flora

Four introduced species were recorded within the Survey Area, representing 10% of the total taxa recorded (Appendix D). one of these, *\*Tamarix aphylla*, are listed as Declared Pests under the BAM Act (Department of Primary Industries and Regional Development, 2018) and WoNS (Department of Agriculture Water and the Environment, 2020b). (Table 8).

**Table 8: Introduced Flora Species within the Survey Area**

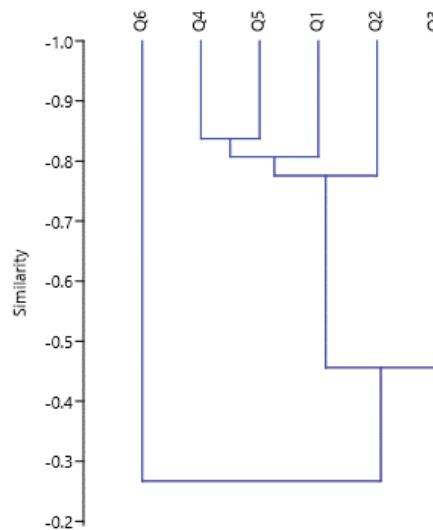

Species	Common Name	Environmental Status	WoNS
<i>*Cenchrus ciliaris</i>	Buffel Grass		Not Listed
<i>*Aerva javanica</i>	Kapok Bush		Not Listed
<i>*Tamarix aphylla</i>	Athel Pine	Declared Pest – (DPIRD)	Listed
<i>*Washingtonia filifera</i>	California Palm		Not Listed

#### 4.2.7 Vegetation Types

Within the Survey Area, one vegetation type was described and mapped across one broad landform (low coastal dune systems with mixed laterite sands) within the Survey Area. The vegetation units are described in Table 9 and mapped in Figure 7. Detailed site sheets for each quadrat are provided in Appendix E.

The vegetation within the Survey Area, VT1, was described as *Acacia coriacea* subsp. *coriacea* and *Acacia tetragonophylla* (with *Crotalaria cunninghamii* subsp. *sturtii*) mid to low sparse shrubland over *\*Cenchrus ciliaris* and *Eulalia aurea* low tussock grassland with *Triodia epactia* low sparse hummock grassland over *Euphorbia myrtoides* low sparse herland.

Bray-Curtis dissimilarity analysis indicated one quadrat falls outside the main grouping (Figure 6). Quadrat 6 contains two unique native species; *Nicotiana occidentalis* subsp. *occidentalis* and *Salsola australis*. Additionally, Quadrat 1 contained three species that are not representative of the wider ecology. *Eucalyptus camaldulensis*, *\*Tamarix aphylla* and *\*Washingtonia filifera* were not found anywhere else with the survey area. As these taxa are not representative of the wider floristic communities, they may considered to be planted species and were therefore removed from the analysis.

**Figure 6: Results of Bray Curtis Cluster analysis ( $\beta = -0.1$ )**

#### 4.2.8 Threatened and Priority Ecological Communities

No vegetation considered representative of any Threatened Ecological Community (TEC) or Priority Ecological Community (PEC) was recorded within the Survey Area.

#### 4.2.9 Vegetation Condition

Vegetation condition within the Survey Area was determined to be Very Good (Trudgen, 1991; Table 9), comprising of 100% of the survey area.

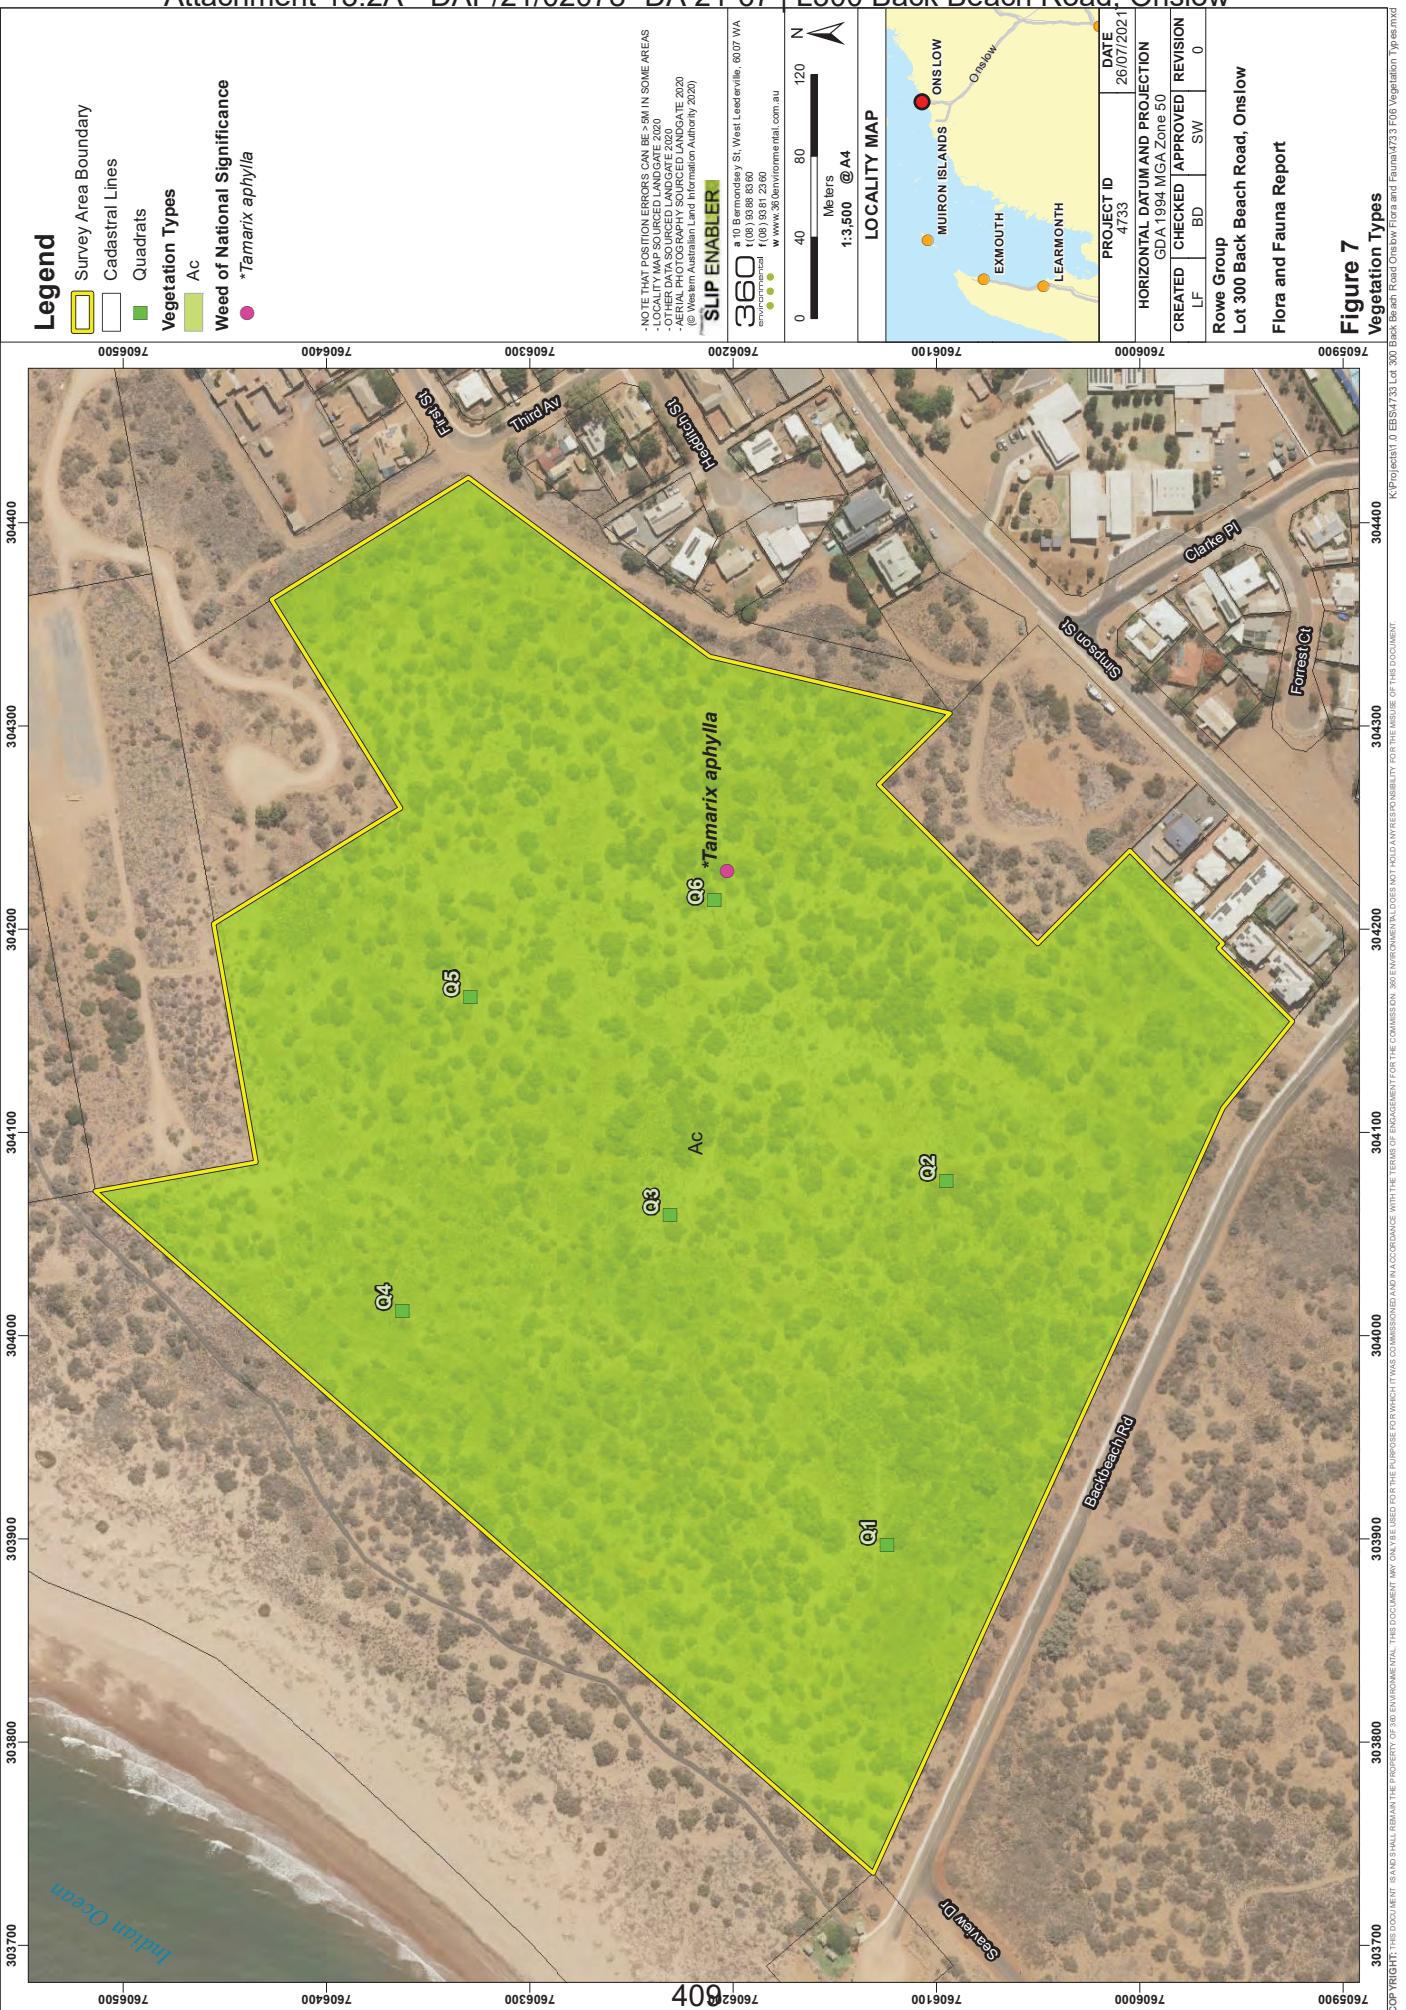

Evidence of disturbance included old vehicle tracks, littering and weeds (particularly infestations of *\*Cenchrus ciliaris*).

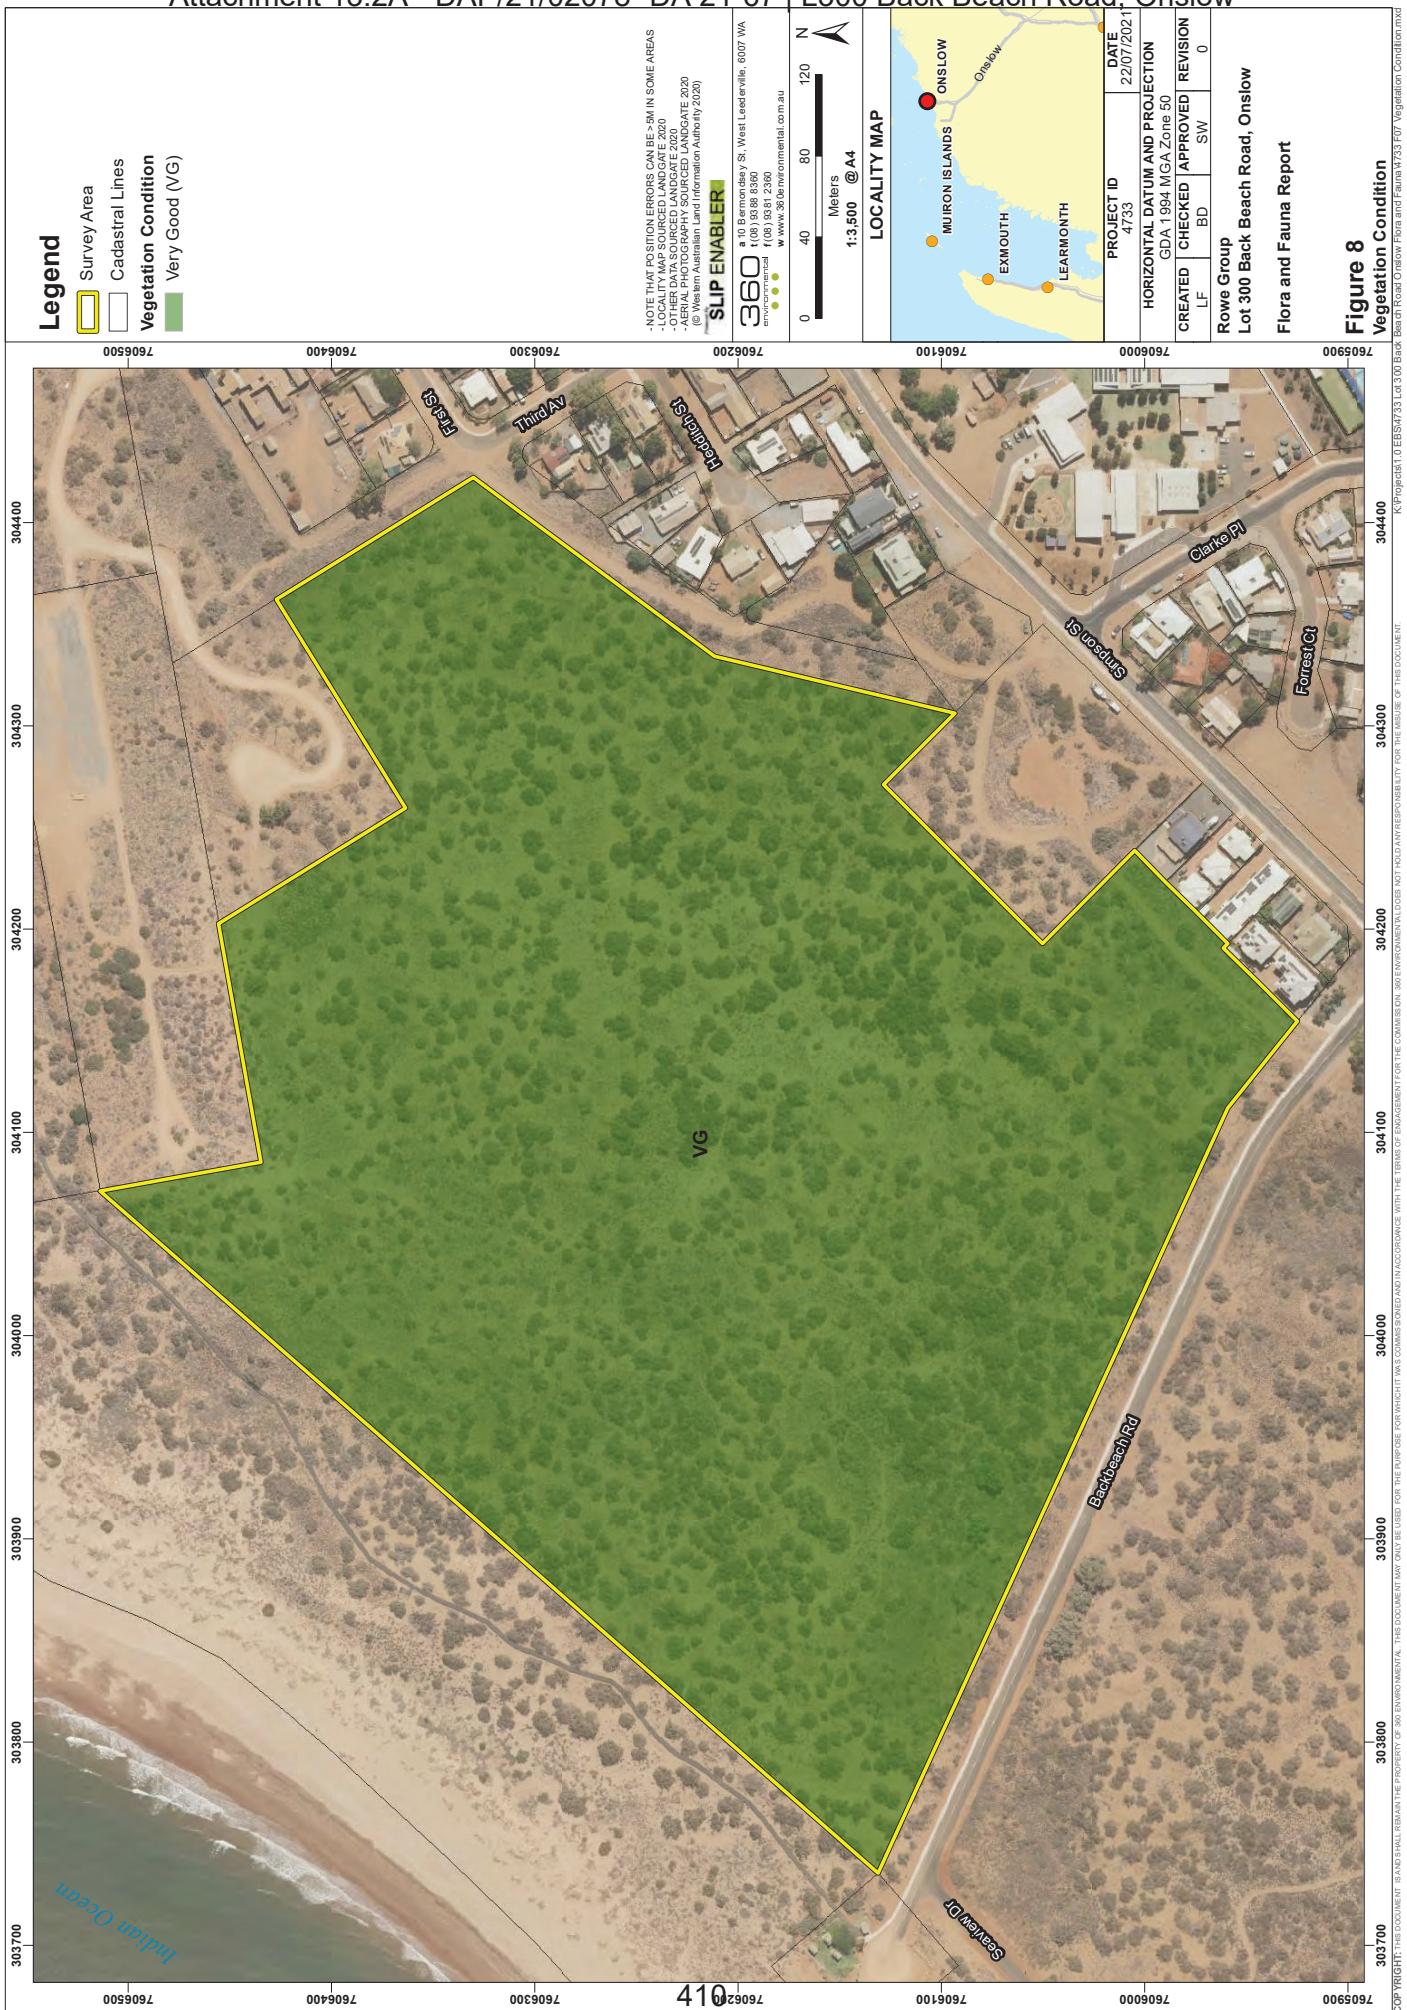

**Table 9: Vegetation Types Occurring within the Survey Area**

Vegetation Unit and Description*	Local Landform	Total Area, Proportion of the Survey Area	Vegetation Condition	Photograph
Coastal Dunes	Dunes	25 ha, 100 %	Very Good	

**VT1:** *Acacia coriacea* subsp. *coriacea* and *Acacia tetragonophylla* (with *Crotalaria cunninghamii* subsp. *sturtii*) mid to low sparse shrubland over \**Cenchrus ciliaris* and *Eulalia aurea* low tussock grassland with *Triodia epactia* low sparse hummock grassland over *Euphorbia myrsoides* low sparse herbland.

**Sites:** Q1, Q2, Q3, Q4, Q5, Q6

#### 4.2.10 Vegetation of Conservation Significance

No vegetation representative of any Commonwealth or State listed TECs, DBCA listed PECs was recorded within the Survey Area.

##### 4.2.10.1 Vegetation of Other Conservation Significance

Vegetation may be of significance for a range of reasons, other than a listing as a TEC or a PEC, including (Environmental Protection Authority, 2016a):

- Vegetation extent being below a threshold level
- Scarcity
- Unusual species
- Novel combinations of species
- A role as a refuge
- A role as a key habitat for threatened species or large populations representing a significant proportion of the local to regional total population of a species
- Being representative of the range of a unit (particularly a good local and/or regional example of a unit in ‘prime’ habitat, at the extremes of range, recently discovered range extensions, or isolated outliers of the main range); and/or
- A restricted distribution
- Culturally significant to the Traditional Owners of the land.

None of the vegetation within the Survey Area is considered to be of other conservation or cultural significance.

#### 4.2.11 Groundwater Dependent Ecosystems

Groundwater dependant vegetation is wholly or partially dependant on permanent or intermittent access to groundwater to meet their water requirements. Groundwater dependant vegetation in the semi-arid and arid bioregions is typically associated with riparian and floodplain vegetation that includes facultative phreatophytes, which are partially dependant on groundwater and/or obligative phreatophytes, which are wholly dependent on groundwater.

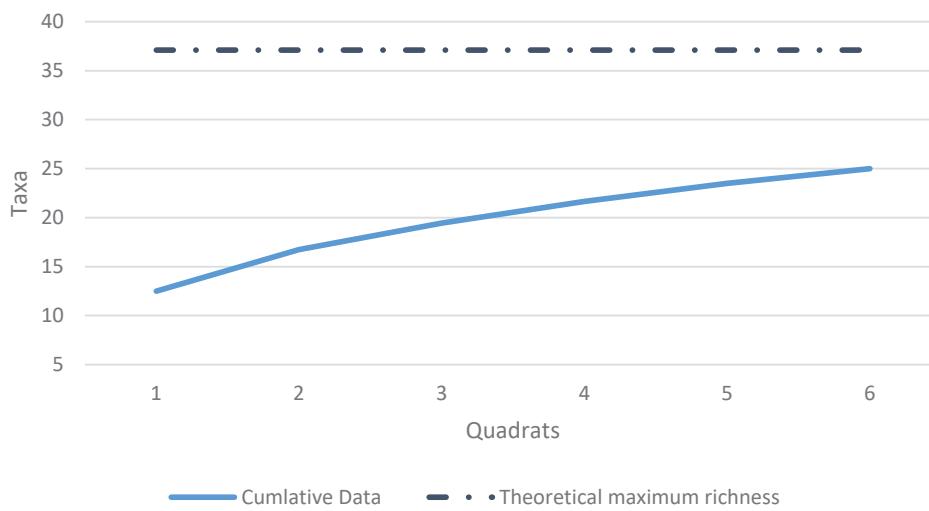

None of the vegetation within the Survey Area is considered to be groundwater dependent.

#### 4.2.12 Survey Adequacy

Six flora quadrats were sampled across the Survey Area, with approximately 4.1 quadrats per hectare. This was adequate to ensure three flora sites were sampled in each vegetation type, and that coverage across the Survey Area was sufficient.

A species-area curve (Figure 9), based on a species accumulation analysis, was used to evaluate the adequacy of sampling (Colwell, 2005). The asymptotic value was determined using Michaelis-Menten modelling. Using this analysis, the incidence-based coverage estimator of species richness (ICE) was calculated to be 37.1 native species (Chao, 1984). Based on this value, and the total of 30 native species recorded from six quadrats during the survey, approximately 81% of the flora species potentially present within the Survey area were recorded within

quadrats. An additional two native species were recorded opportunistically, further increasing the total native species count.

**Figure 9: Flora Species Accumulation Curve**

## 4.3 Vertebrate Fauna

### 4.3.1 Literature Review

The key findings of the literature review are summarised in Appendix B and a list of fauna taxa identified during the literature review is presented in Appendix D.

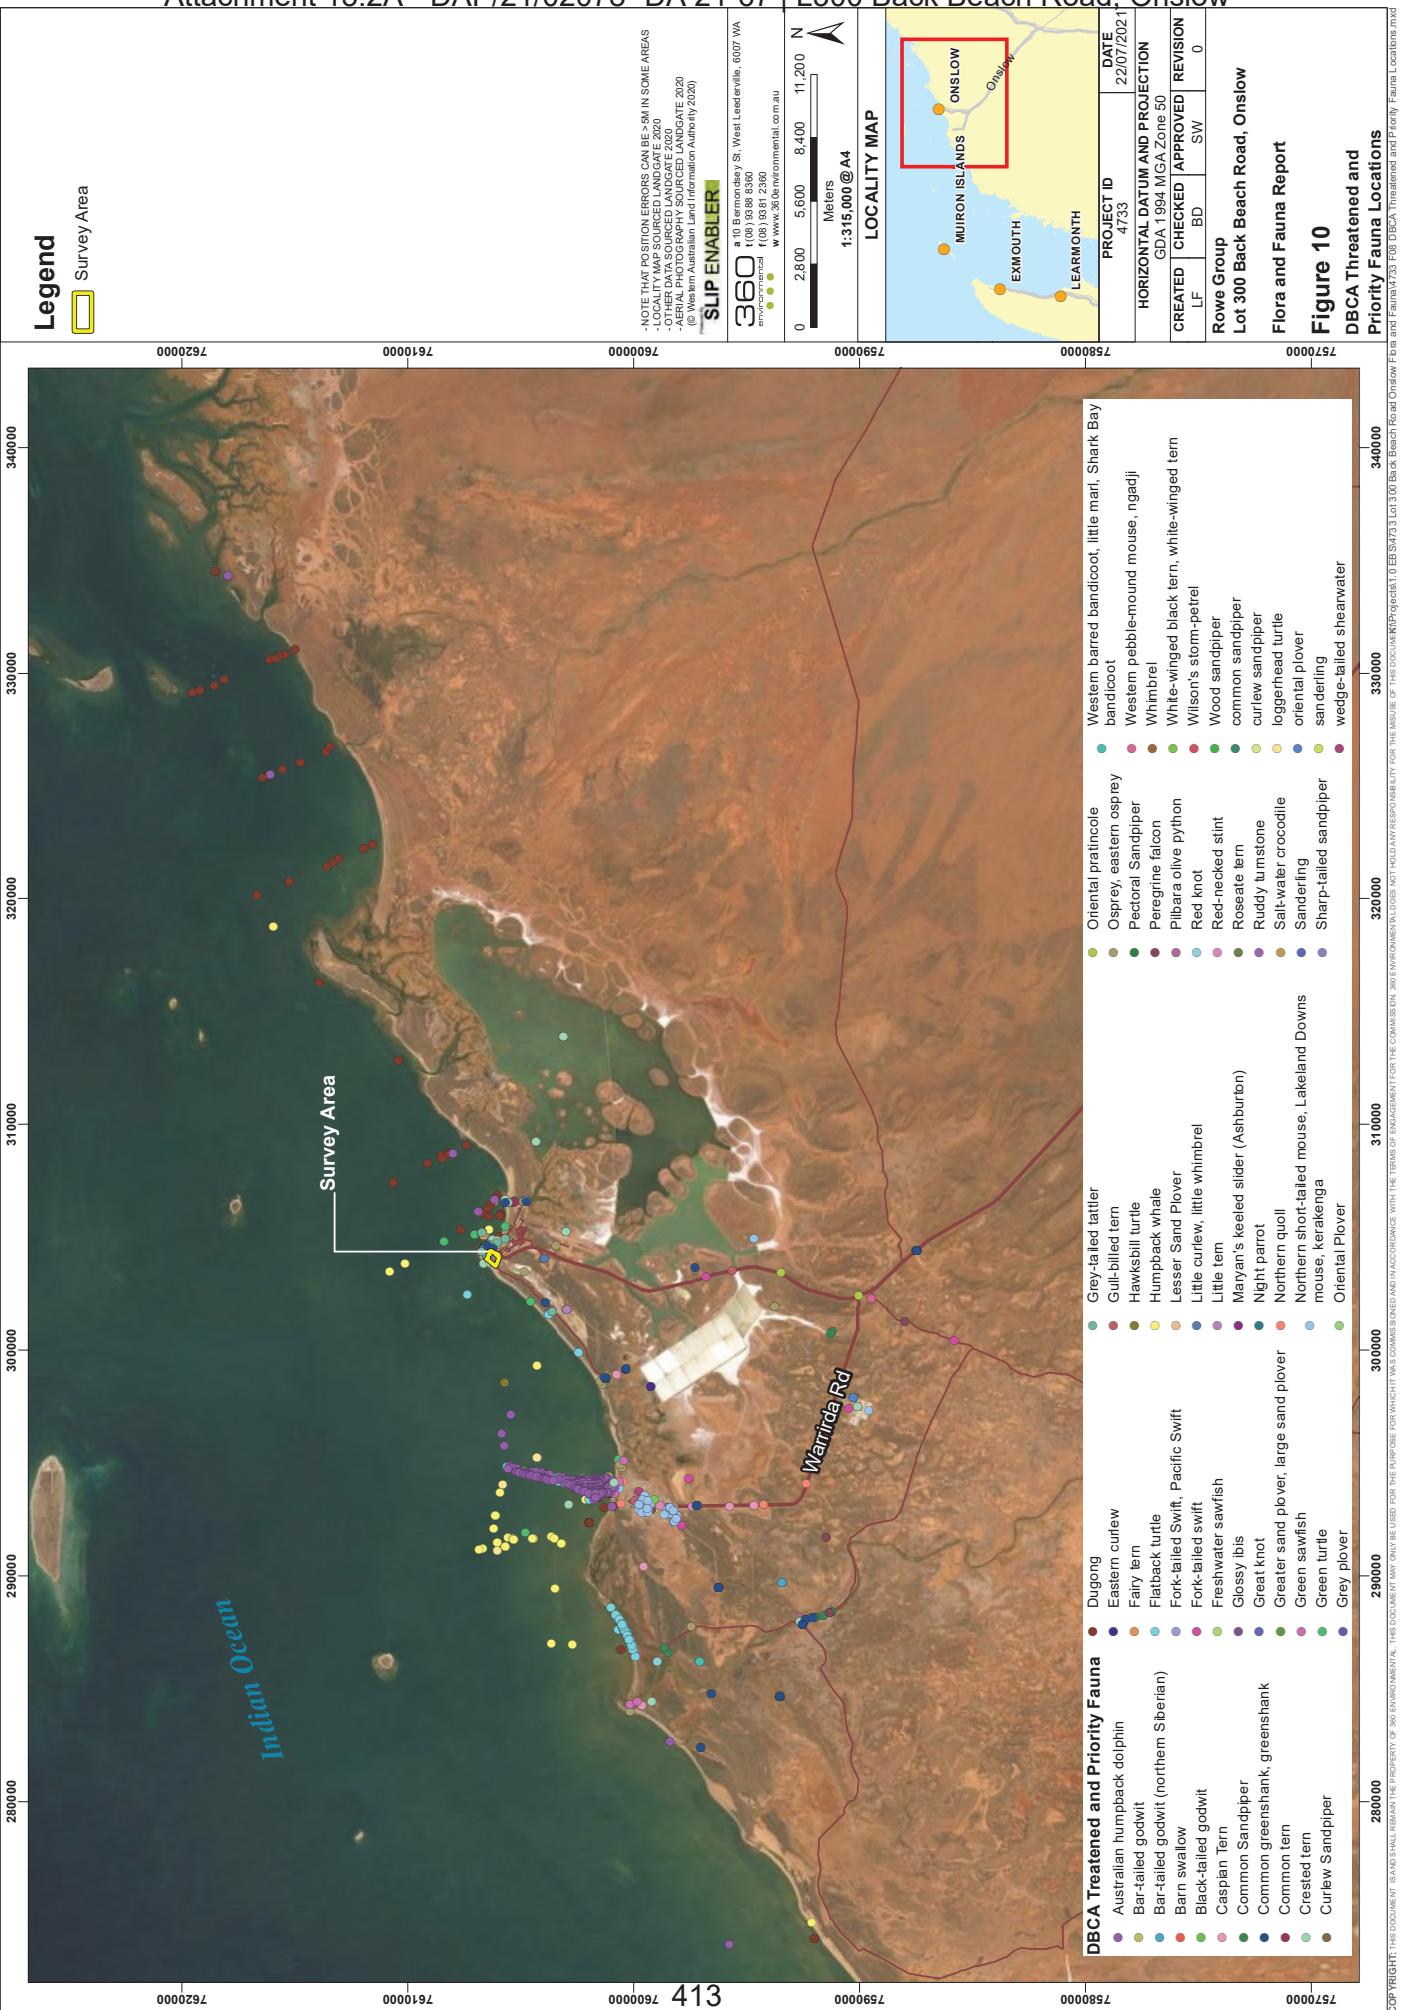

### 4.3.2 Database Searches

Database searches identified 59 conservation significant terrestrial vertebrate fauna species potentially occurring within the Survey Area, comprising:

- 47 bird species
- Four mammal species
- Eight reptile species (includes five turtle species known to breed in the Pilbara region)
- No amphibian species.

The results of the DBCA Threatened and Priority Fauna database search are mapped in Figure 10. Database searches are displayed in their entirety in Appendix A.

Species listed as Marine only under the EPBC Act, such as the Little Egret (*Egretta garzetta*), White-bellied Sea-Eagle (*Haliaeetus leucogaster*), Silver Gull (*Larus novaehollandiae*), as well as marine dependent species including sea snakes, whales and dolphins have been excluded from the likelihood of occurrence list as there is no marine habitat present within the Survey Area.

#### 4.3.3 Conservation Significant Fauna Likelihood of Occurrence

The likelihood of occurrence assessment within the Survey Area for conservation significant fauna species identified by the databases searches found that:

- No species had a high likelihood of occurrence
- 20 species had a medium likelihood of occurrence (19 bird species, one reptile species)
- 39 species had a low likelihood of occurrence (28 bird species, four mammal species, seven reptile species).

The results of the likelihood of occurrence assessment are presented in Appendix C.

#### 4.3.4 Fauna Habitat

One broad fauna habitat was identified and mapped within the Survey Area (Figure 7). The coastal dune Fauna Habitat was continuous throughout the Survey Area and is analogous with the Coastal Dune (VT1) vegetation type. The habitat quality was found to be good throughout the Survey Area.

A description, extent within the Survey Area and a representative photo is provided for each fauna habitat in Table 10. Fauna habitat Site sheets for each habitat assessment are shown in Appendix F.

**Table 10: Fauna Habitat Type Descriptions with the Survey Area**

Fauna Habitat	Total Area, Proportion of the Survey Area	Sites	Representative Photo
<b>Coastal Dunes:</b> <i>Acacia coriacea</i> subsp. <i>coriacea</i> and <i>Acacia tetragonophylla</i> (with <i>Crotalaria cunninghamii</i> subsp. <i>sturtii</i> ) mid to low sparse shrubland over * <i>Cenchrus ciliaris</i> and <i>Eulalia aurea</i> low tussock grassland with <i>Triodia epactia</i> low sparse hummock grassland over <i>Euphorbia myrsoides</i> low sparse herland.	25 ha, 100%	HA1, HA2, HA3, HA4, HA5, HA6	

#### 4.3.5 Fauna Assemblage

The terrestrial vertebrate fauna survey recorded a total of 18 fauna species from 13 families, summarised in Table 11. A full inventory of fauna species recorded during the field survey is provided in Appendix D.

**Table 11: Overview of Vertebrate Fauna Species Recorded**

Fauna Group	Number of Species	Number of Families
Birds	14	9
Mammals	3	3
Reptiles	1	1
Amphibians	0	0
<b>Total</b>	<b>18</b>	<b>13</b>

##### 4.3.5.1 Sightings

A total of 14 bird species from nine families were recorded throughout the Survey Area (all birds heard calling were also sighted within the Survey Area). The most recorded species was the Zebra Finch (*Taeniopygia guttata*) followed by the White-plumed Honeyeater (*Ptilotula penicillata*) and the White-breasted Woodswallow (*Artamus leucorynchus*). The most speciose avifauna family was Meliphagidae (three taxa).

One reptile species was tentatively identified, the Dune Dragon (*Ctenophorus femoralis*), with other dragon sightings representing the same genus, but the fast nature of these animals made positive identification difficult.

##### 4.3.5.2 Tracks

Bird tracks were observed throughout the Survey Area, as were cat tracks. Small mammal and reptile tracks were also found, most often occurring between clumps of thicker vegetation.

#### 4.3.6 Conservation Significant Fauna

No fauna species of conservation significance (Threatened or Priority), or evidence of these species such as tracks, scats, nest, diggings, burrows, or direct sightings were recorded within or directly surrounding the Survey Area.

## 5 Discussion

### 5.1 Flora and Vegetation

The overall vegetation condition within the survey area was considered to be Very Good (Trudgen, 1991). The species diversity and abundance is consistent with the ecology and diversity of the Cape Range IBRA Subregion, and previous surveys of this level within the local area. \**Tamarix aphylla* was recorded with one quadrat. This species is a weed of conservation significance, being listed as both a Declared Pest and a Weed of National Significance. No PECs or TECs were recorded with the Survey Area.

#### 5.1.1 Flora of Conservation Significance

No Threatened or Priority listed Flora were recorded within the Survey Area.

Of the nine potentially occurring flora of Conservation Significance identified by the desktop assessment, three had the potential to occur within the Survey Area:

- *Eleocharis papillosa* (P3) is an annual herb that occurs in brown, Nov. Red clay over granite, open clay flats. Claypans. The survey was undertaken outside the known flowering period for the species it may not have been present at the time of the survey.
- *Abutilon sp. pritzelianum* (P3) is an erect annual shrub no habitat data is available for this taxon (WA Herb). However, based on habit types from the closest record (approximately 11.5 km from the Survey Area) it is unlikely that this species is present within the Survey Area.
- *Stackhousia clementii* (P3) is a dense broom-like perennial, herb, to 0.45 m high. Fl. green/yellow/brown. Habitat preference is Skeletal soils and Sandstone hills. Based on soil type within the Survey Area (fine laterite sands), it is unlikely that this species will be found within the survey area.

Based on soil type and habit recorded during the survey, *Eleocharis papillosa* (P3) and *Abutilon sp. pritzelianum* (P2) and *Stackhousia clementii* (P3) were considered to have a low likelihood of occurrence and are unlikely to occur within the proposed clearing area.

#### 5.1.2 Introduced Flora

Four weed species were recorded in the Survey Area; \**Tamarix aphylla* (Declared Pest, WoNS) was recorded in only one quadrat. Based on the location relevant to the prosed clearing sites and population extent (only one mature tree was recorded) no addition action would be required.

Two additional weed species \**Cenchrus ciliaris*, \**Washingtonia filifera* were also present, with \**Cenchrus ciliaris* covering approximately 70% of the Survey Area.

#### 5.1.3 Vegetation Types

The vegetation type described in the Survey Area is consistent with the Beard (1976) and Shepherd et al. (2002) broad vegetation systems associations. Vegetation mapping within the Survey Area was representative of existing broad scale vegetation and soil and land system mapping for the locality.

The vegetation of the Coastal Dunes (VT1) is broadly representative of Cape Yannare Coastal Plain 117, described as grass-steppe hummock grassland *Triodia* spp. The vegetation type described in this report is not representative any listed PEC or TEC.

## 5.2 Vertebrate Fauna

### 5.2.1 Fauna Habitat

One broad fauna habitat was observed within the Survey Area comprising Coastal Dunes. The coastal dune habitat contains limited microhabitat opportunities and is of low value to most conservation significant fauna species and overall fauna assemblages that occur in the broader area.

One conservation significant fauna species, *Lerista planiventralis maryani* (P1), utilises dune habitat in the bioregion and records indicate that it historically occurred within 1 km of the Survey Area. A targeted terrestrial vertebrate survey utilising pitfall traps would be needed to assess its presence or absence in the Survey area with greater certainty.

Shorebirds, including conservation significant species, may use coastal dune areas within the Survey Area, however, these species are highly mobile and would not be reliant on the habitats within the Survey Area.

The level of survey detail undertaken is consistent with the requirements of a Detailed Flora Vegetation Survey. The expected low diversity and relatively uniform landform means that the findings of the report are sufficient to inform impact assessment across the project area.

Clearing of vegetation within the Survey Area is unlikely to significantly impact most fauna species due to the abundance of similar habitat south of the Survey Area. However, if *Lerista planiventralis maryani* (P1) are inhabiting the Survey Area, clearing will have a significant impact on the local population.

## 6 Conclusion

The key findings of the survey within the Survey Area were:

- No Threatened flora species pursuant to the EPBC Act and/or gazetted as Threatened pursuant to the BC Act, or DBCA listed Priority flora were recorded during the surveys.
- Four introduced species were recorded during the survey, one of these *\*Tamarix aphylla* listed as a declared pest and a Weed of National significance under the BAM act.
- One vegetation type, VT1, coastal dunes was mapped within the Survey Area.
- No TECs or PECs were recorded within the Survey Area.
- One broad fauna habitat was observed within the Survey Area comprising coastal dunes.
- One conservation significant fauna species, *Lerista planiventralis maryani* (P1), utilises dune habitat in the bioregion, and records indicate that it historically occurred within 1 km of the Survey Area. A targeted terrestrial vertebrate survey would be needed to confirm its presence or absence.
- Shorebirds may use the coastal dune areas within the Survey Area; however, these species are highly mobile and would not be reliant on the habitats within the Survey Area.

## **8 Report Disclaimer**

This report is produced strictly in accordance with the scope of services set out in the contract or otherwise agreed in accordance with the contract. 360 Environmental makes no representations or warranties in relation to the nature and quality of soil and water other than the visual observation and analytical data in this report.

In the preparation of this report, 360 Environmental has relied upon documents, information, data, and analyses ('client's information') provided by the client and other individuals and entities. In most cases where client's information has been relied upon, such reliance has been indicated in this report. Unless expressly set out in this report, 360 Environmental has not verified that the client's information is accurate, exhaustive, or current and the validity and accuracy of any aspect of the report including, or based upon, any part of the client's information is contingent upon the accuracy, exhaustiveness, and currency of the client's information. 360 Environmental shall not be liable to the client or any other person in connection with any invalid or inaccurate aspect of this report where that invalidity or inaccuracy arose because the client's information was not accurate, exhaustive, and current or arose because of any information or condition that was concealed, withheld, misrepresented, or otherwise not fully disclosed or available to 360 Environmental.

Aspects of this report, including the opinions, conclusions, and recommendations it contains, are based on the results of the investigation, sampling and testing set out in the contract and otherwise in accordance with normal practices and standards. The investigation, sampling and testing are designed to produce results that represent a reasonable interpretation of the general conditions of the site that is the subject of this report. However, due to the characteristics of the site, including natural variations in site conditions, the results of the investigation, sampling and testing may not accurately represent the actual state of the whole site at all points.

It is important to recognise that site conditions, including the extent and concentration of contaminants, can change with time. This is particularly relevant if this report, including the data, opinions, conclusions, and recommendations it contains, are to be used a considerable time after it was prepared. In these circumstances, further investigation of the site may be necessary.

Subject to the terms of the contract between the Client and 360 Environmental Pty Ltd, copying, reproducing, disclosing, or disseminating parts of this report is prohibited (except to the extent required by law) unless the report is produced in its entirety including this page, without the prior written consent of 360 Environmental Pty Ltd.

Common Name	Genus/C. Code	Plant Type	Description	Location	Frequency	Notes	
<i>Thlaspi australe</i>	3	Poisonous annual herb, semi-annual to 25 cm diameter.	State of land disturbed and cleared.	Ca 35 km NW from Peedimullal Homestead and 10.5 km back from mts. Peedimullal Station	09/11/1990		
<i>Thlaspi australe</i>	3	Ridge. Red brown sand dune.	Ridge. Red brown sand dune.	ca 25 km S of Onslow, Dunc Ridge, Cane River Conservation Reserve	14/11/2008		
<i>Thlaspi australe</i>	3	Flat. Red brown sand dune.	Flat. Red brown sand dune.	ca 50 km SE of Onslow, Aluwah Plain, Cane River Conservation Reserve	14/11/2008		
<i>Thlaspi australe</i>	3 (2) tall annual	Grows on sand dunes.	Grows on sand dunes.	Xlm S of Onslow	12 miles S of Onslow		
<i>Thlaspi australe</i>	3	Wet soil soils.	Wet soil soils.	Ca 16 km SW of Onslow	28/05/1980		
<i>Thlaspi australe</i>	3	Stems 0.5 m high.	Stems 0.5 m high.	Ca 16 km SW of Onslow	01/11/1992		
<i>Stockwellia ciliolata</i>	3	40 cm tall.	Costal blt. 30 cm tall red brown sand/clay.	5.4 km S of Onslow, 35.4 km NNE of Manderoo Homestead and 29.6 km W of Yarrabubba Homestead	30/08/2011		
<i>Eremophila laevigata</i>	3	Stems more or less 1.1 m. Flowers pink cream.	Red sand - red brown sandy loam of the interdunal swales (not within dunes). Generally occurs on the flats where the highest dunes is between blind dunes.	10 miles S of Onslow	18/08/1960		
<i>Eremophila laevigata</i>	3	Medium sized shrubs 0.8 - 1.5 m tall.	Acacia tetragonophylla, A. strobliana, T. multiflora.	Ca 30 km SW of Onslow, Wiluna	19/08/2009		
<i>Eremophila laevigata</i>	3	Perennial.	Tall shrubland.	Onslow	02/09/2011		
<i>Eremophila laevigata</i>	3	3 cm high.	Occurs in coastal scrub, heath, & low sand dunes. Associated species (20 recorded) form a complex alliance on AWA herbarium database.	2-20 places. Use reg. tritiae. Reproductive method: seeds.	04/04/2009		
<i>Eremophila laevigata</i>	3	Broad shallow drainage areas. Red-brown clay.	Associated species (20 recorded) form a complex alliance on AWA herbarium database.	Condition: Good. ID: +ve. Previous floras individuals.	Site: 497_B18/22_17.5SE of Onslow, 102 km W of Naturae Roadhouse and 124 km NW of Barndale Roadhouse	14/03/2011	
<i>Eremophila laevigata</i>	3	Broad orange through sandy drainage gns. on vehicle track. Red brown clay.	Moist ac. terrenum by drainbank with moist hummock grassland with mixed hummock grassland. Franchise bench and E. laevis areas.	Condition: Excellent to Very Good. No sign of recent fire.	Site: 497_B18/22_17.5SE of Onslow, 102 km W of Naturae Roadhouse and 124 km NW of Barndale Roadhouse	14/03/2011	
<i>Carpobrotus edulis</i> (M. White 950)	3	Proteaceae glabrous plant with stems to 2.5 m long. 3 roots & nodes. dull green leaves about 2 cm long. 3-5 cm long, on thick peduncles 1-5 cm long. Petioles 1-3 cm long.	Low open area, medium to coarse sand with fine grit.	Theewin Island, 500 m from lough beach 250 m SW of west dock.	2/06/1988		
<i>Carpobrotus edulis</i> (M. White 950)	3	Proteaceae, glabrous plant. leaves sessile in pairs to 2 cm long, often with a small petiole. However, large, elliptic, often small fruit umbellate.	Coarse white sand top of dune. Disturbed area.	Theewin Island between Saldin's 4 and Jetty area	2/08/1990		
<i>Abutilon sp. Pritchardianum</i> (van Geemert 5059)	3	Leaves alternate. Petioles 1-2 cm long.	Leaves alternate. Petioles 1-2 cm long.	Site No. 260	1 km S of Onslow		
<i>Abutilon sp. Onslow</i> (F. Smith s.n. 109/1981)	1.5 cm high.	Bracts lvs between its stipules. Petioles 1-2 cm long.	Leaves alternate. Petioles 1-2 cm long.	Condition: Excellent.	Site: 497_17 km SSE of Onslow	03/08/1985	
<i>Abutilon sp. Onslow</i> (F. Smith s.n. 109/1981)	1	Petioles 6-9 mm long. stipules with grey collage and spined pubes.	Leaves alternate. Petioles 1-2 cm long.	Abundance: common.	Davis Brook ca 30 km SW of Peedimullal Homestead.	04/04/2009	
<i>Abutilon sp. Onslow</i> (F. Smith s.n. 109/1981)	1	Growing up to 1 m tall.	Hgt: Open shrubland of Acacia acutissima over Open Hummock Grassland of T. multiflora. If soils so over scattered rock. Galls of Cestrum calycinum over Sooted Dunes, grass very Open in patches.	Depth: 0.5-1 m.	Site: Onslow 2. A side of road 1.10 m off road, 4.3 km W of Cate River crossing on Peedimullal Road, 3.3 km NW of Meekin Hill, 3.1 km S of Onslow. Peedimullal Station, Pilbara (WA).	13/09/1996

<b>Non-conservation taxon</b>				
10.	Abutilon sp. Onslow (F. Smith s.n. 10/9/61)			
11.	9080 <i>Abutilon cunninghamii</i>			
12.	4895 <i>Abutilon lepidum</i>			
13.	4899 <i>Abutilon malifolium</i> ( <i>Bastard Marshmallow</i> )			
14.	4901 <i>Abutilon otocarpum</i> ( <i>Desert Chinese Lantern</i> )			
15.	<i>Abutilon</i> sp.			
16.	42920 <i>Abutilon</i> sp. <i>Dioicum</i> (A.A. Mitchell PRP 1618)			
17.	<i>Acacia</i> <i>Airlie Island</i> (V. Long VL163)			
18.	3209 <i>Acacia ampliceps</i>			
19.	3214 <i>Acacia ancistrocarpa</i> ( <i>Fitzroy Wattle</i> )			
20.	3241 <i>Acacia bivenosa</i>			
21.	3260 <i>Acacia citrinoviridis</i>			
22.	17013 <i>Acacia colei</i> var. <i>colei</i>			
23.	3270 <i>Acacia coriacea</i> ( <i>Wirewood</i> )			
24.	13500 <i>Acacia coriacea</i> subsp. <i>coriacea</i>			
25.	14088 <i>Acacia cyperophylla</i> var. <i>cyperophylla</i>			
26.	3356 <i>Acacia gregorii</i> ( <i>Gregory's Wattle</i> )			
27.	3419 <i>Acacia ligulata</i> ( <i>Umbrella Bush, Watarka</i> )			
28.	3506 <i>Acacia pyrifolia</i> ( <i>Ranji Bush, Kandji</i> )			
29.	3534 <i>Acacia sclerosperma</i> ( <i>Limestone Wattle</i> )			
30.	13078 <i>Acacia sclerosperma</i> subsp. <i>sclerosperma</i>			
31.	29135 <i>Acacia sericophylla</i>			
32.	29102 <i>Acacia</i> sp. <i>Airlie Island</i> (V. Long VL 163)			
33.	20819 <i>Acacia</i> sp. <i>Ripon Hills</i> (B.R. Maslin 8460)			
34.	3551 <i>Acacia sphaerostachya</i>			
35.	19456 <i>Acacia stellaticeps</i>			
36.	13070 <i>Acacia synchronia</i>			
37.	3577 <i>Acacia tetragonophylla</i> ( <i>Kurara, Wakalpuka</i> )			
38.	3579 <i>Acacia trachycarpa</i> ( <i>Minni Ritchi, Balgali</i> )			
39.	3595 <i>Acacia victoriae</i> ( <i>Bramble Wattle, Ngatunpa</i> )			

Name ID	Species Name	Naturalised	Conservation Code	<sup>1</sup> Endemic To Query Area
40.	3603 <i>Acacia wiseana</i>			
41.	3606 <i>Acacia xiphophylla</i>			
42.	26441 <i>Acanthophora spicifera</i>			
43.	35868 <i>Acrocystis nana</i>			
44.	4583 <i>Adriana tomentosa</i>			
45.	17422 <i>Adriana tomentosa var. tomentosa</i>			
46.	6486 <i>Aegialitis annulata</i> (Club Mangrove)			
47.	6478 <i>Aegiceras corniculatum</i> (River Mangrove)			
48.	39780 <i>Aenictophytion reconditum</i> subsp. <i>reconditum</i>			
49.	2646 <i>Aerva javanica</i> (Kapok Bush)	Y		
50.	3680 <i>Aeschynomene indica</i> (Budda Pea)			
51.	4739 <i>Alectryon oleifolius</i>			
52.	11487 <i>Alectryon oleifolius</i> subsp. <i>oleifolius</i>			
53.	2652 <i>Alternanthera nodiflora</i> (Common Joyweed)			
54.	4907 <i>Alyogyne pinoniana</i> (Sand Hibiscus)			
55.	17147 <i>Alysicarpus muelleri</i>			
56.	2666 <i>Amaranthus mitchellii</i> (Boggabri Weed)			
57.	20018 <i>Amaranthus undulatus</i>			
58.	5278 <i>Armannia multiflora</i>			
59.	126 <i>Amphibolis antarctica</i> (Sea Nymph)			
60.	26462 <i>Amphiroa fragilissima</i>			
61.	11874 <i>Amyema sanguinea</i> var. <i>sanguinea</i>			
62.	14307 <i>Amyema</i> sp. <i>Fortescue</i> (M.E. Trudgen 5358)			
63.	35872 <i>Anadyomene plicata</i>			
64.	7822 <i>Angianthus acrorhynchinus</i> (Hook-leaf Angianthus)			
65.	7827 <i>Angianthus cunninghamii</i> (Coast Angianthus)			
66.	7832 <i>Angianthus milnei</i> (Cone-spike Angianthus)			
67.	26469 <i>Anotrichium tenue</i>			
68.	207 <i>Aristida contorta</i> (Bunched Kerosene Grass)			
69.	210 <i>Aristida holathera</i>			
70.	12063 <i>Aristida holathera</i> var. <i>holathera</i>			
71.	215 <i>Aristida latifolia</i> (Feathertop Wiregrass)			
72.	26486 <i>Asparagopsis taxiformis</i>			
73.	2451 <i>Atriplex bunburyana</i> (Silver Saltbush)			
74.	2453 <i>Atriplex codonocarpa</i> (Flat-topped Saltbush)			
75.	2463 <i>Atriplex isatidea</i> (Coast Saltbush)			
76.	2476 <i>Atriplex semilunaris</i> (Annual Saltbush)			
77.	233 <i>Avena barbata</i> (Bearded Oat)	Y		
78.	6828 <i>Avicennia marina</i> (White Mangrove)			
79.	26498 <i>Avrainvillea obscura</i>			
80.	5183 <i>Bergia ammannioides</i>			
81.	5184 <i>Bergia pedicellaris</i>			
82.	5185 <i>Bergia perennis</i>			
83.	11726 <i>Bergia perennis</i> subsp. <i>exigua</i>			
84.	5186 <i>Bergia trimera</i>			
85.	48503 <i>Betaphycus speciosus</i>			
86.	7866 <i>Blumea tenella</i>			
87.	26507 <i>Boergesenia forbesii</i>			
88.	2769 <i>Boerhavia burbridgeana</i>			
89.	2770 <i>Boerhavia coccinea</i> (Tar Vine, Wituka)			
90.	8357 <i>Boerhavia diffusa</i>			
91.	2774 <i>Boerhavia repelta</i>			
92.	2775 <i>Boerhavia schomburgkiana</i>			
93.	<i>Boerhavia</i> sp.			
94.	11167 <i>Bonamia erecta</i>			
95.	6605 <i>Bonamia linearis</i>			
96.	26508 <i>Boodlea composita</i>			
97.	26509 <i>Bornetella oligospora</i>			
98.	3000 <i>Brassica tournefortii</i> (Mediterranean Turnip)	Y		
99.	<i>Bryonia desorii</i>			
100.	5291 <i>Bruguiera exaristata</i> (Ribbed Mangrove)			
101.	7047 <i>Buchnera linearis</i> (Blackrod)			
102.	750 <i>Bulbostylis barbata</i>			
103.	2860 <i>Calandrinia polyandra</i> (Parakeelya)			
104.	2864 <i>Calandrinia ptychosperma</i>			
105.	7893 <i>Calocephalus knappii</i>			
106.	7903 <i>Calotis hispidula</i> (Bindy Eye)			
107.	7906 <i>Calotis plumulifera</i>			
108.	3749 <i>Canavalia rosea</i> (Wild Jack Bean)			
109.	2981 <i>Capparis spinosa</i>			

Name ID	Species Name	Naturalised	Conservation Code	<sup>1</sup> Endemic To Query Area
110.	<i>Carpobrotus</i> sp. subsp. <i>Thevenard Island</i> (M. White 050)			
111.	2798 <i>Carpobrotus virescens</i> (Coastal Pigface, Kolboko, Bain)			
112.	2948 <i>Cassytha aurea</i>			
113.	12073 <i>Cassytha aurea</i> var. <i>aurea</i>			
114.	2949 <i>Cassytha capillaris</i>			
115.	2950 <i>Cassytha filiformis</i> (Love Vine, Jirawan)			
116.	19842 <i>Casuarina equisetifolia</i>	Y		
117.	42620 <i>Caulerpa chemnitzia</i>			
118.	35158 <i>Caulerpa corynephora</i>			
119.	26559 <i>Caulerpa cupressoides</i>			
120.	27378 <i>Caulerpa cupressoides</i> var. <i>lycopodium</i>			
121.	42783 <i>Caulerpa delicatula</i>

123.	44547 <i>Caulerpa lamourouxii</i>			
124.	26567 <i>Caulerpa lanuginosa</i>			
125.	26568 <i>Caulerpa lentillifera</i>			
126.	26573 <i>Caulerpa racemosa</i>			
127.	26576 <i>Caulerpa serrulata</i>			
128.	26577 <i>Caulerpa sertularioides</i>			
129.	26579 <i>Caulerpa taxifolia</i>			
130.	258 <i>Cenchrus ciliaris</i> (Buffel Grass)	Y		
131.	41568 <i>Cenchrus setaceus</i> (Fountain Grass)	Y		
132.	7919 <i>Centipeda minima</i> (Spreading Sneezewood, Kanjirralaa, Inteng-inteng, Karengkal, Kata-palkalpa, Munyu-parnti-parnti)			
133.	19762 <i>Centipeda minima</i> subsp. <i>macrocephala</i>			
134.	26587 <i>Centroceras clavulatum</i>			
135.	26606 <i>Ceratodictyon spongiosum</i>			
136.	26618 <i>Champia parvula</i>			
137.	269 <i>Chloris pectinata</i> (Comb Chloris)			
138.	270 <i>Chloris pumilio</i>			
139.	26628 <i>Chondria armata</i>			
140.	273 <i>Chrysopogon fallax</i> (Golden Beard Grass)			
141.	35865 <i>Cladophora catenata</i>			
142.	36316 <i>Cladophora herpestica</i>			
143.	26658 <i>Cladophora vagabunda</i>			
144.	29101 <i>Cleome uncifera</i> subsp. <i>uncifera</i>			
145.	2988 <i>Cleome viscosa</i> (Tickweed, Tjinduwadhu)			
146.	26673 <i>Codium geppiorum</i>			
147.	2778 <i>Codonocarpus cotinifolius</i> (Native Poplar, Kundurang)			
148.	26686 <i>Coelarthrum opuntia</i>			
149.	2776 <i>Commicarpus australis</i> (Perennial Tar Vine)			
150.	19880 <i>Convolvulus angustissimus</i>			
151.	7939 <i>Conzya bonariensis</i> (Flaxleaf Fleabane)	Y		
152.	25847 <i>Corchorus incanus</i> subsp. <i>incanus</i>			
153.	18414 <i>Corchorus sidoides</i> subsp. <i>vermicularis</i>			
154.	17093 <i>Corymbia hamersleyana</i>			
155.	17092 <i>Corymbia opaca</i>			
156.	17084 <i>Corymbia zygophylla</i>			
157.	1284 <i>Corynotheca flexuosissima</i>			
158.	1285 <i>Corynotheca micrantha</i> (Sand Lily)			
159.	1286 <i>Corynotheca pungens</i>			
160.	20268 <i>Crassula tetramera</i>			
161.	19565 <i>Cressa australis</i>			
162.	3774 <i>Crotalaria cunninghamii</i> (Green Birdflower, Bilbung)			
163.	20175 <i>Crotalaria cunninghamii</i> subsp. <i>sturtii</i>			
164.	20179 <i>Crotalaria medicaginea</i> var. <i>neglecta</i>			
165.	17117 <i>Cullen cinereum</i>			
166.	17436 <i>Cullen graveolens</i>			
167.	17116 <i>Cullen martinii</i>			
168.	17120 <i>Cullen pogonocarpum</i>			
169.	6662 <i>Cuscuta australis</i> (Australian Dodder)			
170.	13733 <i>Cuscuta victoriana</i>			
171.	129 <i>Cymodocea serrulata</i>			
172.	6584 <i>Cynanchum floribundum</i> (Dumara Bush, Tjipa)			
173.	48280 <i>Cynanchum viminale</i> subsp. <i>australe</i>			
174.	283 <i>Cynodon dactylon</i> (Couch)	Y		
175.	46555 <i>Cynodon prostratus</i>			
176.	777 <i>Cyperus bulbosus</i> (Bush Onion, Tjanmata)			
177.	798 <i>Cyperus iria</i>			
178.	808 <i>Cyperus pygmaeus</i>			

Name ID	Species Name	Naturalised	Conservation Code	<sup>1</sup> Endemic To Query Area
179.	809 <i>Cyperus rigidellus</i>			
180.	814 <i>Cyperus squarrosus</i>			
181.	290 <i>Dactyloctenium radulans</i> ( <i>Button Grass</i> )			
182.	7958 <i>Decazesia hecatocephala</i>			
183.	3853 <i>Desmodium filiforme</i>			
184.	29616 <i>Dichotomaria marginata</i>			
185.	29615 <i>Dichotomaria obtusata</i>			
186.	6754 <i>Dicrastylis cordifolia</i>			
187.	26762 <i>Dictyomenia sonderi</i>			
188.	26769 <i>Dictyosphaeria cavernosa</i>			
189.	26771 <i>Dictyosphaeria versluyssii</i>			
190.	26782 <i>Digenea simplex</i>			
191.	311 <i>Digitaria ciliaris</i> ( <i>Summer Grass</i> )		Y	
192.	48378 <i>Diplachne fusca</i> subsp. <i>fusca</i>			
193.	4745 <i>Diplolepis eriocarpa</i> ( <i>Hairy Pepperflower</i> )			
194.	2499 <i>Dissocarpus paradoxus</i> ( <i>Curious Saltbush</i> )			
195.	2502 <i>Dysphania kalpari</i> ( <i>Rat's Tail, Kalpari</i> )			
196.	33596 <i>Dysphania melanocarpa</i> forma <i>leucocarpa</i>			
197.	2504 <i>Dysphania plantaginea</i>			
198.	2505 <i>Dysphania platycarpa</i>			
199.	11890 <i>Dysphania rhadinostachya</i> subsp. <i>rhadinostachya</i>			
200.	340 <i>Echinopogon ovatus</i> ( <i>Hedgehog Grass</i> )			
201.	14301 <i>Ehretia saligna</i> var. <i>saligna</i>			
202.	2511 <i>Enchylaena tomentosa</i> ( <i>Barrier Saltbush</i> )			
203.	357 <i>Enneapogon caeruleescens</i> ( <i>Limestone Grass</i> )			
204.	365 <i>Enneapogon polypillus</i> ( <i>Leafy Nineawn</i> )			
205.	368 <i>Enteropogon ramosus</i> ( <i>Windmill Grass, Curly Windmill Grass</i> )			
206.	369 <i>Eragrostis australasica</i> ( <i>Canegrass</i> )			
207.	370 <i>Eragrostis barrelieri</i>		Y	
208.	375 <i>Eragrostis cumingii</i> ( <i>Cuming's Love Grass</i> )			
209.	378 <i>Eragrostis dielsii</i> ( <i>Mallee Lovegrass</i> )			
210.	380 <i>Eragrostis eriopoda</i> ( <i>Woollybutt Grass, Wangurnu</i> )			
211.	381 <i>Eragrostis falcata</i> ( <i>Sickle Lovegrass</i> )			
212.	388 <i>Eragrostis leptocarpa</i> ( <i>Drooping Lovegrass</i> )			
213.	389 <i>Eragrostis minor</i> ( <i>Smaller Stinkgrass</i> )		Y	
214.	392 <i>Eragrostis pergracilis</i>			
215.	393 <i>Eragrostis setifolia</i> ( <i>Neverfail Grass</i> )			
216.	398 <i>Eragrostis tenellula</i> ( <i>Delicate Lovegrass</i> )			
217.	7189 <i>Eremophila clarkei</i> ( <i>Turpentine Bush</i> )			
218.	7208 <i>Eremophila forrestii</i> ( <i>Wilcox Bush</i> )			
219.	16696 <i>Eremophila fraseri</i> subsp. <i>fraseri</i>			
220.	17175 <i>Eremophila glabra</i> subsp. <i>albicans</i>			
221.	16363 <i>Eremophila maculata</i> subsp. <i>brevifolia</i> ( <i>Native Fuchsia</i> )			
222.	400 <i>Eriachne aristidea</i>			
223.	403 <i>Eriachne benthamii</i> ( <i>Swamp Wanderrie</i> )			
224.	408 <i>Eriachne flaccida</i> ( <i>Claypan Grass</i> )			
225.	409 <i>Eriachne gardneri</i>			
226.	414 <i>Eriachne obtusa</i> ( <i>Northern Wandarrie Grass</i> )			
227.	426 <i>Eriochloa pseudoacrotricha</i> ( <i>Perennial Cupgrass</i> )			
228.	4334 <i>Erodium crinitum</i> ( <i>Corkscrew</i> )			
229.	4335 <i>Erodium cygnorum</i> ( <i>Blue Heronsbill</i> )			
230.	3871 <i>Erythrina vespertilio</i> ( <i>Yulbah</i> )			
231.	35343 <i>Eucalyptus camaldulensis</i> subsp. <i>refulgens</i>			
232.	14548 <i>Eucalyptus viminalis</i>			
233.	15592 <i>Eucalyptus xerothermica</i>			
234.	11011 <i>Eulalia aurea</i>			
235.	4617 <i>Euphorbia australis</i> ( <i>Namana</i> )			
236.	35307 <i>Euphorbia australis</i> var. <i>australis</i>			
237.	35303 <i>Euphorbia australis</i> var. <i>subtomentosa</i>			
238.	4620 <i>Euphorbia boopthorna</i> ( <i>Gascoyne Spurge</i> )			
239.	4623 <i>Euphorbia coghlanii</i> ( <i>Namana</i> )			
240.	4626 <i>Euphorbia drummondii</i> ( <i>Caustic Weed, Piwi</i> )			
241.	4629 <i>Euphorbia hirta</i> ( <i>Asthma Plant</i> )		Y	
242.	4635 <i>Euphorbia myrtoides</i>			
243.	4644 <i>Euphorbia sharkoensis</i>			
244.	4647 <i>Euphorbia tannensis</i>			
245.	12097 <i>Euphorbia tannensis</i> subsp. <i>eremophila</i> ( <i>Desert Spurge</i> )			
246.	42879 <i>Euphorbia trigonosperma</i>			
247.	11200 <i>Evolvulus alsinoides</i> var. <i>vilosicalyx</i>

**Conservation Codes**

- I - Rare or likely to become extinct
- X - Extinct
- IA - Protected under international agreement
- S - Other specially protected fauna
- 1 - Priority 1
- 2 - Priority 2
- 3 - Priority 3
- 4 - Priority 4
- 5 - Priority 5

<sup>1</sup> For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.

**Conservation Codes**  
T - Rare or likely to become extinct  
X - Presumed extinct  
IA - Protected under international agreement

Name ID	Species Name	Naturalised	Conservation Code	<sup>1</sup> Endemic To Query Area
S	Other specially protected fauna			
1	Priority 1			
2	Priority 2			
3	Priority 3			
4	Priority 4			
5	Priority 5			

<sup>1</sup> For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.

# EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected.

Information on the coverage of this report and qualifications on data supporting this report are contained in the caveat at the end of the report.

Information is available about [Environment Assessments](#) and the EPBC Act including significance guidelines, forms and application process details.

Report created: 14/07/21 15:43:19

# Summary

## Matters of National Environmental Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

<a href="#">World Heritage Properties:</a>	None
<a href="#">National Heritage Places:</a>	None
<a href="#">Wetlands of International Importance:</a>	None
<a href="#">Great Barrier Reef Marine Park:</a>	None
<a href="#">Commonwealth Marine Area:</a>	None
<a href="#">Listed Threatened Ecological Communities:</a>	None
<a href="#">Listed Threatened Species:</a>	26
<a href="#">Listed Migratory Species:</a>	42

## Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

## Details

### Matters of National Environmental Significance

Listed Threatened Species	[ Resource Information ]	
Name	Status	Type of Presence
<b>Birds</b>		
<u><a href="#">Calidris canutus</a></u> Red Knot, Knot [855]	Endangered	Species or species habitat may occur within area
<u><a href="#">Calidris ferruginea</a></u> Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
<u><a href="#">Falco hypoleucus</a></u> Grey Falcon [929]	Vulnerable	Species or species habitat likely to occur within area
<u><a href="#">Limosa lapponica menzbieri</a></u> Northern Siberian Bar-tailed Godwit, Russkoye Bar-tailed Godwit [86432]	Critically Endangered	Species or species habitat known to occur within area
<u><a href="#">Macronectes giganteus</a></u> Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
<u><a href="#">Numenius madagascariensis</a></u> Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
<u><a href="#">Pezoporus occidentalis</a></u> Night Parrot [59350]	Endangered	Species or species habitat may occur within area
<u><a href="#">Rostratula australis</a></u> Australian Painted Snipe [77037]	Endangered	Species or species habitat may occur within area
<u><a href="#">Sternula nereis nereis</a></u> Australian Fairy Tern [82950]	Vulnerable	Breeding known to occur within area
<b>Mammals</b>		
<u><a href="#">Balaenoptera musculus</a></u> Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
<u><a href="#">Dasyurus hallucatus</a></u> Northern Quoll, Digul [Gogo-Yimidir], Wijingadda [Dambimangari], Wiminji [Martu] [331]	Endangered	Species or species habitat known to occur within area
<u><a href="#">Eubalaena australis</a></u> Southern Right Whale [40]	Endangered	Species or species habitat may occur within area
<u><a href="#">Megaptera novaeangliae</a></u> Humpback Whale [38]	Vulnerable	Species or species

Name	Status	Type of Presence
<a href="#"><u>Rhinonicteris aurantia (Pilbara form)</u></a> Pilbara Leaf-nosed Bat [82790]	Vulnerable	Species or species habitat may occur within area
<b>Reptiles</b>		
<a href="#"><u>Aipysurus praefrontalis</u></a> Short-nosed Seasnake [1115]	Critically Endangered	Species or species habitat likely to occur within area

## Extra Information

Invasive Species	[ Resource Information ]
Weeds reported here are the 20 species of national significance (WoNS), along with other introduced plants that are considered by the States and Territories to pose a particularly significant threat to biodiversity. The following feral animals are reported: Goat, Red Fox, Cat, Rabbit, Pig, Water Buffalo and Cane Toad. Maps from Landscape Health Project, National Land and Water Resources Audit, 2001.	

Name	Status	Type of Presence
Birds <i>Columba livia</i> Rock Pigeon, Rock Dove, Domestic Pigeon [803]		Species or species habitat likely to occur within area
<b>Mammals</b>		

Name	Status	Type of Presence
Canis lupus familiaris Domestic Dog [82654]		Species or species habitat likely to occur within area
Capra hircus Goat [2]		Species or species habitat likely to occur within area
Equus asinus Donkey, Ass [4]		Species or species habitat likely to occur within area
Felis catus Cat, House Cat, Domestic Cat [19]		Species or species habitat likely to occur within area
Mus musculus House Mouse [120]		Species or species habitat likely to occur within area
Oryctolagus cuniculus Rabbit, European Rabbit [128]		Species or species habitat likely to occur within area
Vulpes vulpes Red Fox, Fox [18]		Species or species habitat likely to occur within area
<b>Plants</b>		
Cenchrus ciliaris Buffel-grass, Black Buffel-grass [20213]		Species or species habitat likely to occur within area
Parkinsonia aculeata Parkinsonia, Jerusalem Thorn, Jelly Bean Tree, Horse Bean [12301]		Species or species habitat likely to occur within area
Prosopis spp. Mesquite, Algaroba [68407]		Species or species habitat likely to occur within area
<b>Reptiles</b>		
Ramphotyphlops braminus Flowerpot Blind Snake, Brahminy Blind Snake, Cacing Besi [1258]		Species or species habitat may occur within area

## Caveat

The information presented in this report has been provided by a range of data sources as acknowledged at the end of the report.

This report is designed to assist in identifying the locations of places which may be relevant in determining obligations under the Environment Protection and Biodiversity Conservation Act 1999. It holds mapped locations of World and National Heritage properties, Wetlands of International and National Importance, Commonwealth and State/Territory reserves, listed threatened, migratory and marine species and listed threatened ecological communities. Mapping of Commonwealth land is not complete at this stage. Maps have been collated from a range of sources at various resolutions.

Not all species listed under the EPBC Act have been mapped (see below) and therefore a report is a general guide only. Where available data supports mapping, the type of presence that can be determined from the data is indicated in general terms. People using this information in making a referral may need to consider the qualifications below and may need to seek and consider other information sources.

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species distributions have been derived through a variety of methods. Where distributions are well known and if time permits, maps are derived using either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc) together with point locations and described habitat; or environmental modelling (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where very little information is available for species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc). In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More reliable distribution mapping methods are used to update these distributions as time permits.

Only selected species covered by the following provisions of the EPBC Act have been mapped:

- migratory and
- marine

The following species and ecological communities have not been mapped and do not appear in reports produced from this database:

- threatened species listed as extinct or considered as vagrants
- some species and ecological communities that have only recently been listed
- some terrestrial species that overfly the Commonwealth marine area
- migratory species that are very widespread, vagrant, or only occur in small numbers

The following groups have been mapped, but may not cover the complete distribution of the species:

- non-threatened seabirds which have only been mapped for recorded breeding sites
- seals which have only been mapped for breeding sites near the Australian continent

Such breeding sites may be important for the protection of the Commonwealth Marine environment.

## Coordinates

-21.63589 115.10761

### **Flora and Fauna Literature Reviews**

Report	Project Area	Survey Timing	Survey Effort	Conservation Significant Ecological Communities	Conservation Significant Flora	Introduced Flora
Onslow Townsite Strategy Flora, Vegetation and Fauna Assessment (ENV Australia Pty Ltd, 2011)	Overlapping with the Survey Area	May 2011	• Detailed flora and vegetation survey	No TECs or PECs were identified as occurring in the Survey Area	• Two Priority 1 species • Five Priority 3 species	• * <i>Aerva javanica</i> • * <i>Cenchrus ciliaris</i> • * <i>Prosopis glandulosa</i> (WoNS, Declared Pest)  • * <i>Stylosanthes hamata</i> • * <i>Tamarix aphylla</i> (WoNS, Declared Pest)  • * <i>Tribulus terrestris</i>
Pilbara Ports Authority - Port of Ashburton - Eastern Port Precinct - Additional Clearing Areas Flora Survey (Vicki Long & Associates, 2020)	Approximately 10 km southwest of the Survey Area	February 2020	• Detailed flora and vegetation survey	No TECs or PECs were identified as occurring in the Survey Area	• One Priority 3 species	• * <i>Cenchrus ciliaris</i>
Flora and vegetation assessment – Ashburton North Strategic Industrial Area (ANSIA) Phase 2 Area (RPS Australia West Pty Ltd, 2019)	Approximately 14 km south of the Survey Area	July – August 2018	• Desktop assessment • Reconnaissance flora and vegetation survey  • Targeted flora search	No TECs or PECs were identified as occurring in the Survey Area	• One Priority 3 species	• * <i>Cenchrus ciliaris</i> • * <i>Cenchrus setiger</i> • * <i>Cucumis melo</i> • * <i>Flaveria trinervia</i> • * <i>Indigofera sessiliflora</i> • * <i>Portulaca oleracea</i>  • * <i>Prosopis pallida</i> (WoNS, Declared Pest)  • * <i>Vachellia farnesiana</i>
West Pilbara Project Ashburton East Rail Route Flora and Vegetation Scoping Study (Astron Environmental Services, 2008a)	Approximately 17 km south of the Survey Area	N/A	• Desktop review	No TECs or PECs were identified as occurring in the Survey Area	• One Threatened species • Three Priority 1 species • Two Priority 2 species • Sixteen Priority 3 species • Five Priority 4 species	• * <i>Aerva javanica</i> • * <i>Argemone ochroleuca</i> subsp. <i>ochroleuca</i> • * <i>Cenchrus ciliaris</i> • * <i>Datura leichhardtii</i> • * <i>Malvostrum americanum</i>  • * <i>Parkinsonia aculeata</i> (Declared Pest, WoNS) • * <i>Prosopis spp.</i> (Declared Pest, WoNS)  • * <i>Setaria verticillata</i> • * <i>Ricinus communis</i> • * <i>Vachellia farnesiana</i>

Report	Project Area	Survey Timing	Survey Effort	Conservation Significant Ecological Communities	Conservation Significant Flora	Introduced Flora
West Pilbara Project Onslow Rail Route Flora and Vegetation Survey (Astron Environmental Services, 2008b)	Approximately 17 km south of the Survey Area	Four site visits between August and mid November 2008	<ul style="list-style-type: none"> <li>• Desktop survey</li> <li>• Detailed flora and vegetation survey</li> </ul>	No TECs or PECs were identified as occurring in the Survey Area	<ul style="list-style-type: none"> <li>• Two Priority 3 species</li> <li>• One Priority 4 species</li> </ul>	<ul style="list-style-type: none"> <li>• *<i>Aerva javanica</i></li> <li>• *<i>Argemone ochroleuca</i></li> <li>• *<i>Cenchrus ciliaris</i></li> <li>• *<i>Cenchrus setiger</i></li> <li>• *<i>Cucumis melo</i></li> <li>• *<i>Cynodon dactylon</i></li> <li>• *<i>Echinachla colonia</i></li> <li>• *<i>Euphorbia hirta</i></li> <li>• *<i>Helichrysum luteoalbum</i></li> <li>• *<i>Malvastrum americanum</i></li> <li>• *<i>Parkinsonia aculeata</i> (WoNS, Declared Pest)</li> <li>• *<i>Prosopis spp.</i> (WoNS, Declared Pest)</li> <li>• *<i>Setaria verticillata</i></li> <li>• *<i>Sonchus oleraceus</i></li> <li>• *<i>Vachellia farnesiana</i></li> </ul>
Flora and Vegetation of the CS2 – Tuberidge – Wheatstone Gas Pipeline Project Area (Matiske Consulting Pty Ltd, 2013)	Approximately 18 km southwest of the Survey Area	April 2013	<ul style="list-style-type: none"> <li>• Desktop survey</li> <li>• Level 1 flora and vegetation assessment</li> </ul>	No TECs or PECs were identified as occurring in the Survey Area	<ul style="list-style-type: none"> <li>• Two Priority 3 species</li> </ul>	<ul style="list-style-type: none"> <li>• *<i>Aerva javanica</i></li> <li>• *<i>Cenchrus ciliaris</i></li> <li>• *<i>Cynodon dactylon</i></li> <li>• *<i>Malvastrum americanum</i></li> <li>• *<i>Parkinsonia aculeata</i> (WoNS, Declared Pest)</li> <li>• *<i>Portulaca oleracea</i></li> <li>• *<i>Vachellia farnesiana</i></li> </ul>
Flora and vegetation survey and terrestrial fauna survey for the Pilbara Regional Waste Management Facility (Phoenix Environmental Sciences, 2017)	Approximately 33 km south of the Survey Area	September 2017	<ul style="list-style-type: none"> <li>• Desktop review</li> <li>• Single season reconnaissance flora and vegetation survey</li> </ul>	No TECs or PECs were identified as occurring in the Survey Area	<ul style="list-style-type: none"> <li>• Two Priority 3 species</li> </ul>	<ul style="list-style-type: none"> <li>• *<i>Cenchrus ciliaris</i></li> </ul>
Detailed flora and vegetation survey for the Pilbara Waste Management Facility	Approximately 33 km south of the Survey Area	February – March 2018	<ul style="list-style-type: none"> <li>• Detailed flora and vegetation survey</li> </ul>	No TECs or PECs were identified as occurring in the Survey Area	<ul style="list-style-type: none"> <li>• Two Priority 3 species</li> </ul>	<ul style="list-style-type: none"> <li>• *<i>Cenchrus ciliaris</i></li> </ul>

Report	Project Area	Survey Timing and limitations	Survey Effort	Conservation Significant Fauna	Fauna Habitats
A Level 1 Vertebrate Fauna Assessment of the Proposed Turbridge to Wheatstone Gas Pipeline, Western Australia (Ninox Wildlife Consulting, 2013)	Approximately 14 km southwest of the Survey Area	April 2013	Basic fauna survey	<p><i>Pseudomys chapmani</i> (Western Pebble-mound Mouse), <i>Leggadina lakepowensis</i> (Short-tailed Mouse), <i>Macroderma gigas</i> (Ghost Bat)</p> <ul style="list-style-type: none"> <li>• Recorded species: <i>Ardea modesta</i> (Eastern Great Egret), <i>Merops ornatus</i> (Rainbow Bee-eater), <i>Ardeotis australis</i> (Australian Bustard)</li> <li>• Could potentially occur: <i>Apus pacificus</i> (Fork-tailed Swift), <i>Hirundo rustica</i> (Barn Swallow), <i>Glaucostola maldivarum</i> (Oriental Pratincole), <i>Charadrius veredus</i> (Oriental Plover), <i>Ardea ibis</i> (Cattle Egret), <i>Haliaeetus leucocephalus</i> (White-bellied Sea-eagle), 19 species of migratory wading and shorebirds, <i>Falco peregrinus</i> (Peregrine Falcon), <i>Burhinus grallarius</i> (Bush Stone-curlew), <i>Phaps hispanica</i> (Flock Bronzewing), <i>Dasyurus hallucatus</i> (Northern Quoll), <i>Macrotis lagotis</i> (Greater Bilby), <i>Rhinonicteris aurantia</i> (Pilbara Leaf-nosed Bat), <i>Pseudomys chapmani</i> (Western Pebble-mound Mouse), <i>Leggadina lakepowensis</i> (Lakeland Downs Mouse), <i>Liosis olivaceus barroni</i> (Pilbara Olive Python), <i>Crocodylus porosus</i> (Salt-water Crocodile), <i>Aspidites ramsayi</i> (Woma)</li> </ul>	Mangrove habitat was identified.
Flora and vegetation survey and terrestrial fauna survey for the Pilbara Regional Waste Management Facility (Phoenix Environmental Sciences, 2017)	Approximately 33 km south of the Survey Area	September 2017	Desktop review Targeted terrestrial fauna survey	<ul style="list-style-type: none"> <li>• No Threatened or Priority fauna were recorded during the field survey.</li> <li>• The Migratory <i>Merops ornatus</i> (Rainbow Bee-eater) was recorded twice from direct observation and call in shrubland on sand dune habitat.</li> <li>• Suitable habitat was identified for a further eight conservation significant species: <i>Lerista planiventris maryani</i> (Maryan's keeled Slider), <i>Apus pacificus</i> (Fork-tailed Swift), <i>Falco peregrinus</i> (Peregrine Falcon), <i>Pezoporus occidentalis</i> (Night Parrot), <i>Falco hypoleucus</i> (Grey Falcon), <i>Leggadina lakepowensis</i> (Short-tailed Mouse), <i>Pseudomys chapmani</i> (Western Pebble-mound Mouse), <i>Macrotis lagotis</i> (Greater Bilby)</li> </ul>	<p>Two habitats were identified and described.</p> <ul style="list-style-type: none"> <li>• Mosaic of hummock grassland and shrubland on plain</li> <li>• Shrubland on sand dune</li> </ul>

## **Appendix C**

### **Flora and Fauna Likelihood of Occurrences**

**Threatened and Priority Flora Likelihood of Occurrence as per Desktop Assessment Database Searches Surrounding the Survey Area**

Distance to Nearest Record from the Survey Area is based on a distance analysis undertaken against 2020 DBCA database. High = Suitable habitat present and records less than 10 km from the Survey Area, Medium = Suitable habitat present and records between 10 km and 20 km from the Survey Area or there is suitable habitat in the Survey Area but the species is recorded infrequently in the locality, and Low = No suitable habitat present and/or records greater than 20 km from the Survey Area. Unknown = Insufficient information available to classify. CR= Listed as Critically Endangered under the EPBC Act, EN = Listed as Endangered under the EPBC Act, VU = listed as Vulnerable under the EPBC Act. T = Threatened under the BC Act, P = Priority Listed, Ranked and Listed by the DBCA. Likelihoods are assessed both pre and post survey based on knowledge of the Survey Area, nearest known records, known flowering period of flora taxa and knowledge gained from the survey effort during ground truthing.

Species	Conservation Status	Source	Distance to Nearest Record (km)	Flowering Period	Preferred Habitat	Habitat occurs within the Survey Area	Pre-Survey Likelihood of Occurrence	Post-Survey Likelihood of Occurrence			
							Federal	NM	PMSI	DBCA	
<i>Abutilon</i> sp. Onslow ( <i>F. Smith s.n.</i> [10/9/61])	P1	x	x	27.8	May-Oct	Flat hummock grassland with red-brown silt, clay loam or loamy sandplain. <sup>2</sup>	No	Low	Low		
<i>Isotropis forrestii</i>	P1	x		21.4	Apr - Sep or Dec	Stony clay loam, sandy alluvium. Along drainage lines. <sup>2</sup>	No	Low	Low		
<i>Mnioccephalus scalpellus</i>	P1	x		37.1	-	Clay. Depression on flood plain. <sup>2</sup>	No	Low	Low		
<i>Abutilon</i> sp. Prützelianum ( <i>S. van Leeuwen 5095</i> )	P3	x	x	5.8	Jun, Aug - Sep	Sandy plains. <sup>2</sup>	No	High	Low		
<i>Carpobrotus</i> sp. Threvenard Island ( <i>M. White 050</i> )	P3	x	x	21	Aug	Coarse white sand. Dune tops, disturbed areas. <sup>2</sup>	No	Medium	Low		
<i>Eleocharis papillosa</i>	P3	x	x	17.7	Nov	Red clay over granite, open clay flats. Claypans. <sup>2</sup>	No	Low	Low		
<i>Eremophila forrestii</i> subsp. <i>viridis</i>	P3	x	x	16.6	Aug	Red sand, rocky gully. <sup>2</sup>	No	Medium	Low		
<i>Stackhousia clementii</i>	P3	x	x	5.5	Nov- Mar	Skeletal soils. Sandstone hills. <sup>2</sup>	No	High	Low		
<i>Triumfetta echinata</i>	P3	x	x	15.9	Aug	Red sandy soils. Sand dunes <sup>2</sup>	Yes	Medium	Medium		

**Fauna likelihood of Occurrence**

Conservation status: State - Conservation status under BC Act or DBCA priority list, Federal - Conservation status under EPBC Act, CR - Critically Endangered, EN - Endangered, VU - Vulnerable, MI - Migratory, OS - Other specially protected fauna, MA - Marine, P - Listed as priority by DBCA.

**Appendix C**  
**Onslow Township Resort Bushfire**  
**Management Plan**

## Bushfire management plan/Statement addressing the Bushfire Protection Criteria coversheet

Site address: Lot 300 Back Beach Road, Onslow

Site visit: Yes  No

Date of site visit (if applicable): Day 20 Month July Year 2021

Report author or reviewer: Linden Wears

WA BPAD accreditation level (please circle):

Not accredited  Level 1 BAL assessor  Level 2 practitioner  Level 3 practitioner

If accredited please provide the following.

BPAD accreditation number: 19809 Accreditation expiry: Month June Year 2022

Bushfire management plan version number: Rev 1

Bushfire management plan date: Day 25 Month August Year 2021

Client/business name: Mineral Resources

	Yes	No
Has the BAL been calculated by a method other than method 1 as outlined in AS3959 (tick no if AS3959 method 1 has been used to calculate the BAL)?		<input checked="" type="checkbox"/>
Have any of the bushfire protection criteria elements been addressed through the use of a performance principle (tick no if only acceptable solutions have been used to address all of the bushfire protection criteria elements)?		<input checked="" type="checkbox"/>

	Yes	No
Is the proposal any of the following (see <a href="#">SPP 3.7 for definitions</a> )?		
Unavoidable development (in BAL-40 or BAL-FZ)		<input checked="" type="checkbox"/>
Strategic planning proposal (including rezoning applications)		<input checked="" type="checkbox"/>
High risk land-use		<input checked="" type="checkbox"/>
Vulnerable land-use	<input checked="" type="checkbox"/>	

None of the above

**Note:** Only if one (or more) of the above answers in the tables is yes should the decision maker (e.g. local government or the WAPC) refer the proposal to DFES for comment.

Why has it been given one of the above listed classifications (E.g. Considered vulnerable land-use as the development is for accommodation of the elderly, etc.)?

Proposed resort with short-term accommodation

The information provided within this bushfire management plan to the best of my knowledge is true and correct:
