

Philips OEM LED Catalogue Asia 2023

"I am very proud to present our latest innovations on Connectivity and Health and Wellbeing."

Dear Customer,

Welcome to our 2023 Philips OEM LED Catalogue Asia! As usual, you'll find it's packed with innovative solutions that will help you to keep up to date with the latest trends and technologies in LED with our portfolios of LED Electronics, Wiz Pro and LED Lamps!

For 2023, our portfolio continues to have a strong focus on connected lighting solutions. Innovative ideas, such as Philips MasterConnect and Wiz Pro, have a hugely positive impact on energy consumption and carbon reduction. They enable us to contribute to reducing global warming at a time when there is unprecedented pressure on everyone to address climate change.

You will find meaningful innovations in each part of the portfolio, and you see that we are further pushing boundaries of size reduction, efficiency improvement, productivity improvement in your factories and more.

In case you have any questions, or need any support for design-in: we have a capable team of enthusiastic and qualified Product Managers and Design-In engineers, who are ready to help you solving any technical challenge, so that you can bring the best solutions to your end-user customers.

We are excited to be part of this next wave of opportunities, and hope that we can collaborate on speeding up the adoption of connectivity solutions together!

Bob van der Linden

Retail

Fashion and food retailers, department stores and shopping malls use every means they can to appeal to their target audiences.

This includes careful consideration of the lighting, whereby image, company identity and an appealing atmosphere play a key role in the choice of lighting design. Depending on the application, different elements come in to play, such as energy efficiency, color rendering ability, the correct color temperature, whiteness, color saturation or dynamic lighting. For all of these specific needs, we can offer a variety of LED light engines and a complementary range of electronic drivers for retail lighting, from downlights, spotlights to linear fixtures, each with their own, unique proposition and features designed around specific retail lighting applications.

Office

The office segment has been dominated for many years by linear lighting solutions.

This segment, which also includes areas such as education and hospitals, has always maintained a strong drive towards energy saving. Legislation and building regulations have driven the standards on light quality, luminance and energy efficiency in a working environment, and this has also highlighted the role of lighting controls. We address this market segment with a full, state-of-the-art, highly efficient LED linear module and drivers portfolio, in a building block format, as well as a luminaire-based and stand-alone controls range.

Industry

The industry segment covers an extensive range of applications such as warehouses, production areas, cold storage, food processing and parking areas.

This segment is moving strongly towards energy efficiency and lower maintenance while enabling high-quality, uniform lighting for optimum visual performance and visual comfort that contributes to a more efficient and productive workplace.

Our module and driver portfolio enables cost-effective and reliable systems for extreme application conditions, delivering ultimate light quality and comfort. Used with controls, our lighting solutions provide illumination only when and where it is needed for increased energy efficiency.

Outdoor

Outdoor lighting encompasses a vast range of applications, including motorways, highways, residential areas, city centers, sports and tunnel lighting.

All have their particular lighting needs and requirements. The outdoor market is transforming fast from HID light sources to LED and is also a forerunner in lighting control management systems. Here we have a diverse product portfolio available for luminaire manufacturers with a choice of several LED module families and a vast range of Xitanium outdoor drivers, with a focus on robustness, reliability, configurability and connectivity.

Hospitality

Within hospitality lighting, energy savings (sustainability), quality of light and creating an optimal guest experience are of great importance.

Within this segment, many different lighting technologies are used in various application areas. Examples are reception and lobby, corridors, guest rooms, bars, restaurants, conference centers and even outdoor areas. Whether it's replacing a halogen or fluorescent light source with a retrofit LED lamp or fully refurbishing relevant hotel areas with (controllable) LED luminaires, we have the technology components to realize this. We offer luminaire manufacturers a wide range of LED products, such as spotlighting and downlighting systems. Our linear and outdoor systems are also used in the hospitality segment.

Connectivity

Feel the potential of connected lighting

Achieve seamless connectivity

Philips MasterConnect is an innovative way to enable lighting components to work seamlessly together to deliver all the amazing benefits of lighting automation. It guarantees the reliable interoperability of luminaires, drivers, sensors, switches, and even gateways. That's because the entire solution is built around Bluetooth Low Energy (BLE) and Zigbee protocols. So, it also offers the flexibility to upgrade, enhance and expand your connected lighting at any time in the future.

Easy to use and install

The lighting network set up and configuration is designed to be quick and simple. It's easy to install, add and commission luminaires just by using the mobile app. No specific tooling or extensive training is needed. This saves time and money by enabling installers to configure a wireless connected network in the field without any IT hassles. And once it's set up, the solution works independently and requires no manual input.

One platform for all applications and configurations

With Philips MasterConnect, you can use the same system approach for every project – even when there are large groups of connected luminaires. Our Philips MasterConnect components can be used in a variety of applications including schools, offices, hospitals, retail applications and even warehouse and assembly areas. All these applications can be set up using one app – the Philips MasterConnect app.

A three-tier model

It's a completely scalable concept with wireless components that are easy to design into the lighting network to add more features and functionality whenever they are required. From simple stand-alone solutions to a sophisticated gateway solution – and anything else in between, you can create every configuration of connected system using the same suite of components.

Future-proof installations

We are continually adding new features to our products and improving the performance of our app and firmware. Thanks to the option of over-the-air (OTA) updates, you can easily upgrade the components to feature the latest firmware. Which means you can make use of any improvements you need – without the need to exchange your hardware.

Open standards, more choice

We're committed to pioneering new advances in the connected lighting industry. That's why our solutions are based on Open Source standards like BLE and Zigbee. This allows us to work with a wide range third-party products like wireless switches to extend the Philips MasterConnect system. So, you can break down the barriers to connected lighting, and take confident steps towards a brighter, connected future.

New features and products

For more flexibility our latest firmware makes it possible to use Philips MasterConnect for larger group sizes (up to 100 luminaires). And thanks to out-of-the-box behavior, sensors have basic functionalities without the need to set them up beforehand. This bridges the time between installing and commissioning connected luminaire using the Philips MasterConnect app.

We're also extending our application areas. Previously, Philips MasterConnect focused on offices, schools, hospitals, and retail applications. Now the industry segment also can profit from connected, simple, scalable lighting systems with the new EasyAir SNH 210 MC and EasyAir SNHB210 MC.

EasyAir SNHB210 MC

Philips MasterConnect use cases at a glance

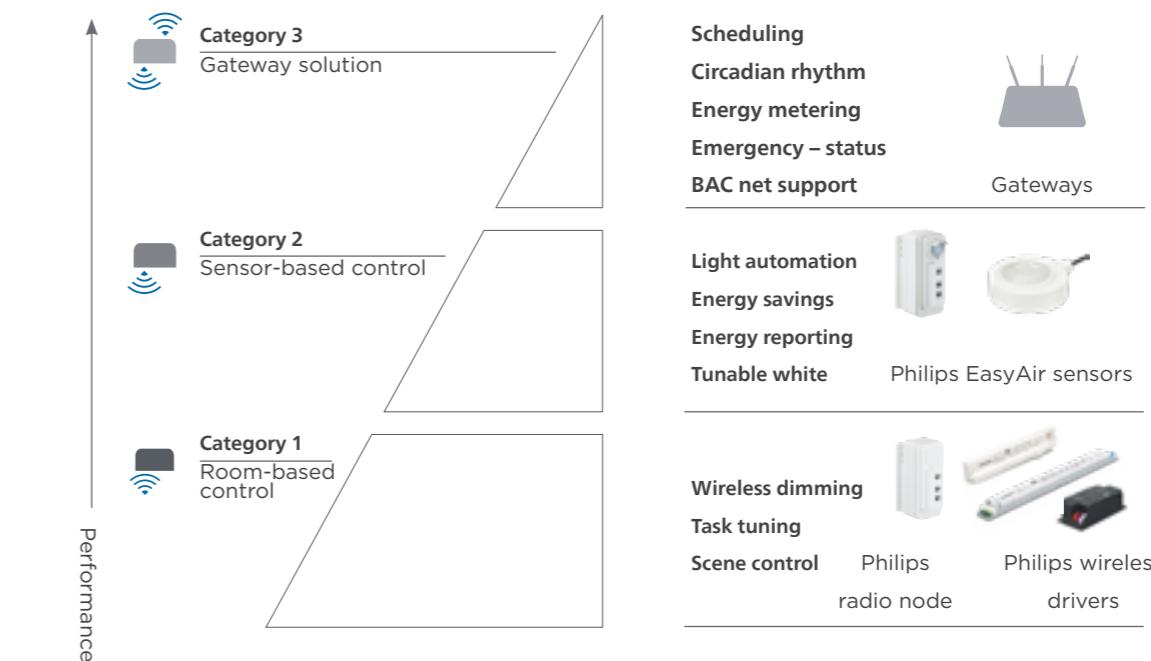

Figure 1: Three levels of lighting connectivity.

Tier model Category 1

Get started with a simple, stand-alone solution

Let's take a look at our three-tier model in more detail.

This cost-effective option uses the Philips MasterConnect app to set up a simple network with wireless drivers and manual switches to control lighting functions.

- Enjoy wireless dimming or scene setting.
- Personalize light levels to suit different tasks and needs.
- Enable energy savings with occupancy detection and daylight harvesting by adding external room-based sensors like the Philips EasyAir Occupancy Daylight ZGP sensors.

In this connected lighting network, there's no need for a gateway or hard wiring. The lighting controls and dimming functions are done by wireless switches and the network is fully functional at all times – even without the

Philips MasterConnect app.

Ideal for:

Offices (meetings rooms, corridors), schools (general areas, bathrooms, classrooms) and industry (parking spaces, storage rooms).

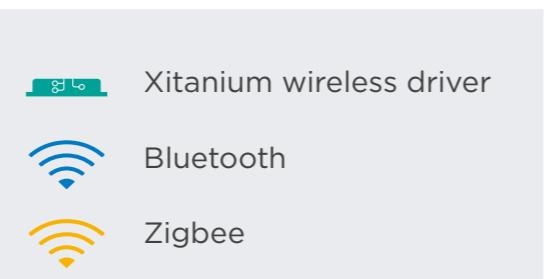

Figure 2: Want a stand-alone connected lighting network with wireless dimming? Easy. Just download the app and configure the drivers into a network.

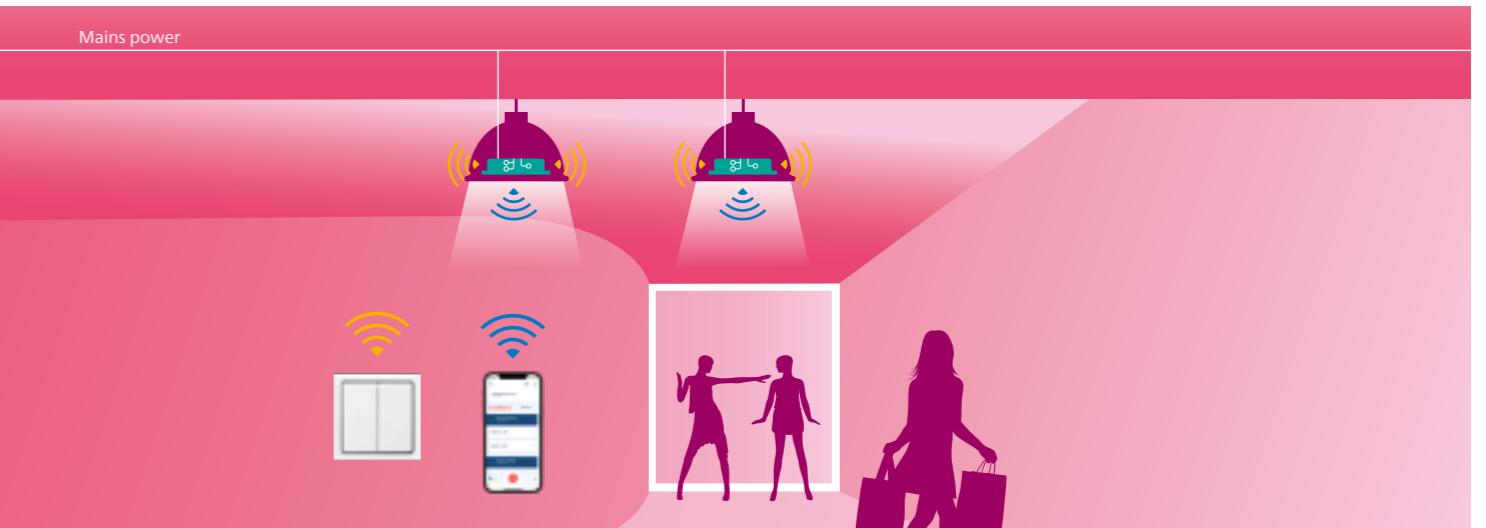

Figure 3: Need to expand the network? No problem. Use the app to add more luminaires to the existing network at any time.

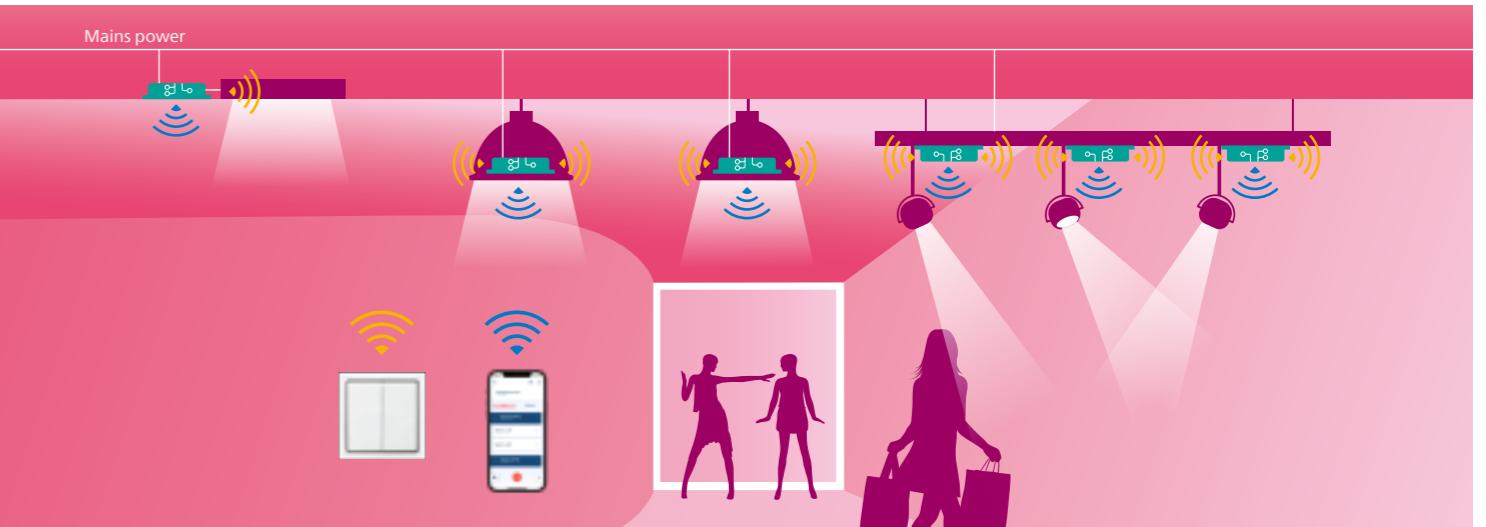

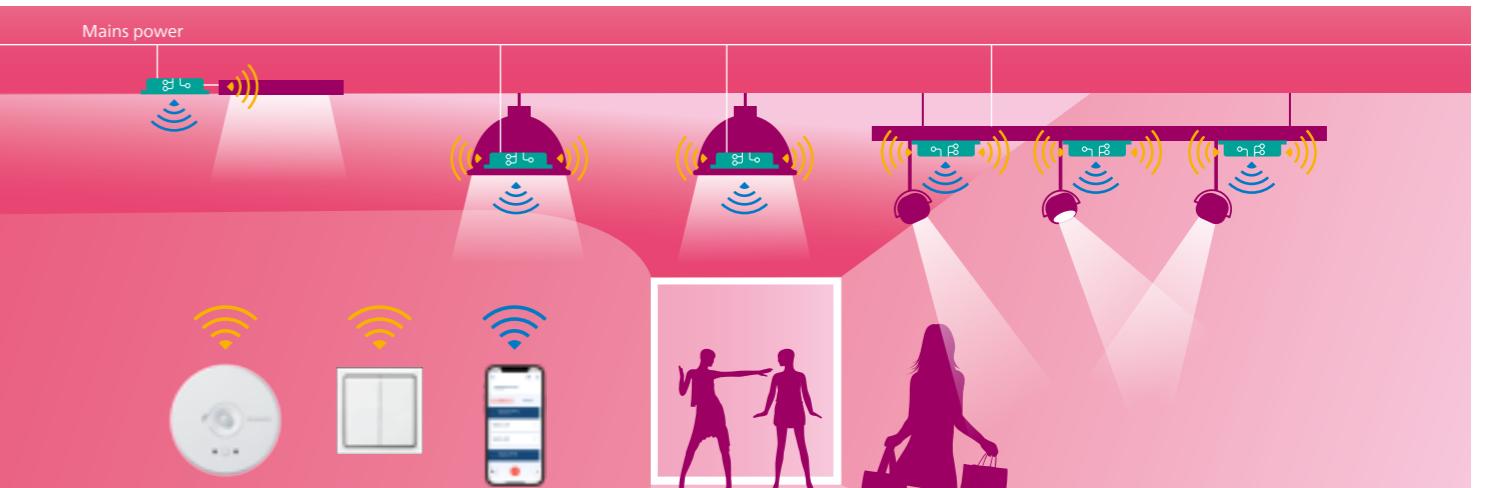

Figure 4: Want more control over areas? Simply add more functions to your lighting network by adding room-based sensors. Sensors like the Philips EasyAir Occupancy Daylight.

Tier model Category 2

Get more control with a stand-alone lighting network with granular dimming

This solution offers an extra degree of control over your lighting system for valuable energy savings and a more comfortable lighting experience.

- Use motion detection to switch lights on and off, up, or down with a Philips EasyAir SNS210 sensor in every luminaire.
- Enjoy touchless dimming control per individual, group, or subgroups for optimum comfort.
- Maximize energy savings with motion detection and daylight harvesting.
- Access energy reports via the phone app.

This wireless lighting network set up enables automated lighting without a gateway. It is a great solution for refurbishment projects offering re-use of existing DALI luminaires to maximize value for money.

Ideal for:

Offices (corridors, conference rooms), schools (classrooms, canteen, toilets) and hospitals (wards, reception).

Figure 5: Want an extra degree of control?
Just add EasyAir SNS210 sensors to every SR-powered luminaire in your network.

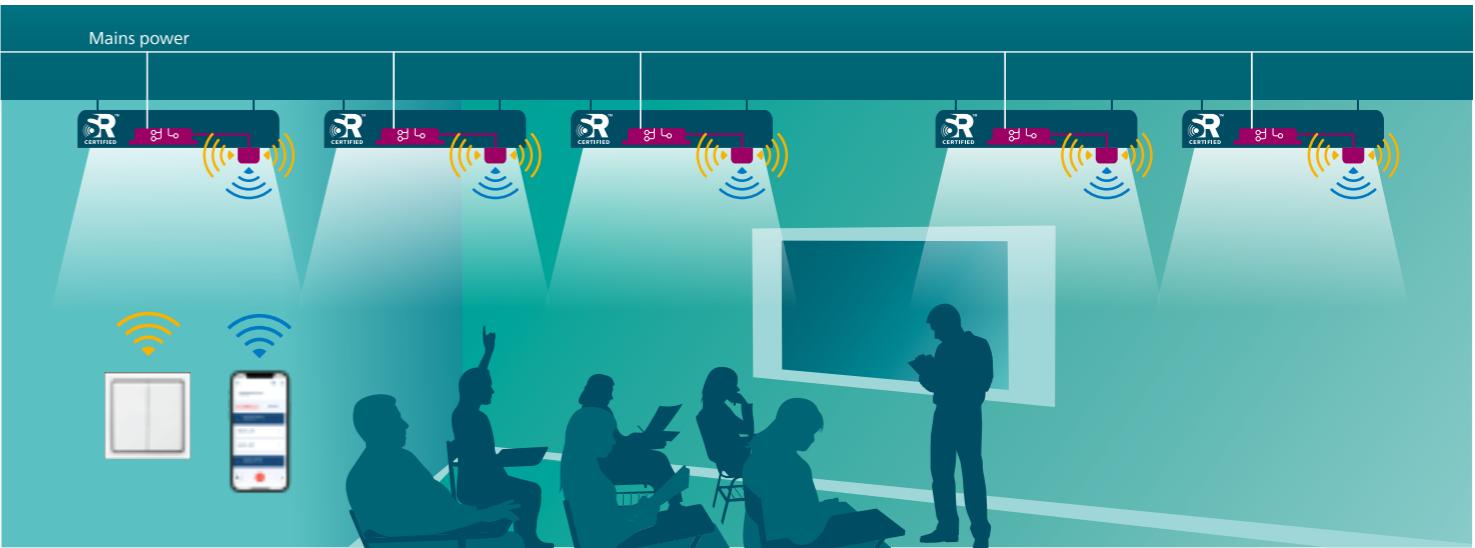

Figure 6: Using existing wired DALI luminaires?
Simple. Add them into the network at any time using an SR bridge.

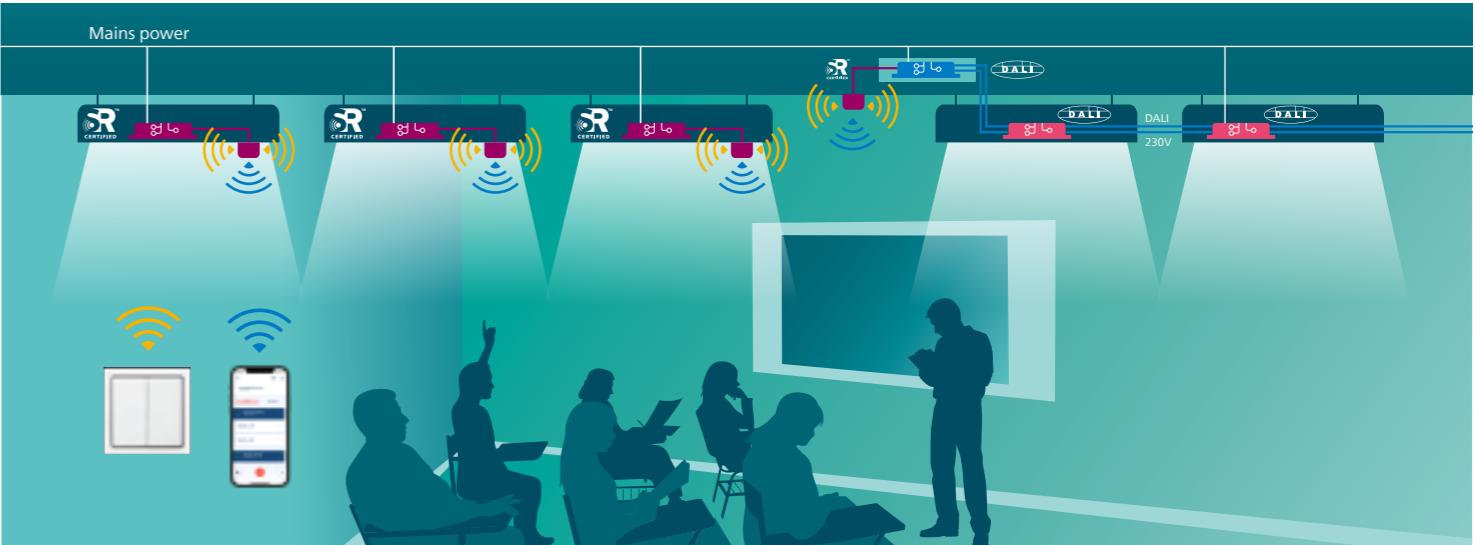

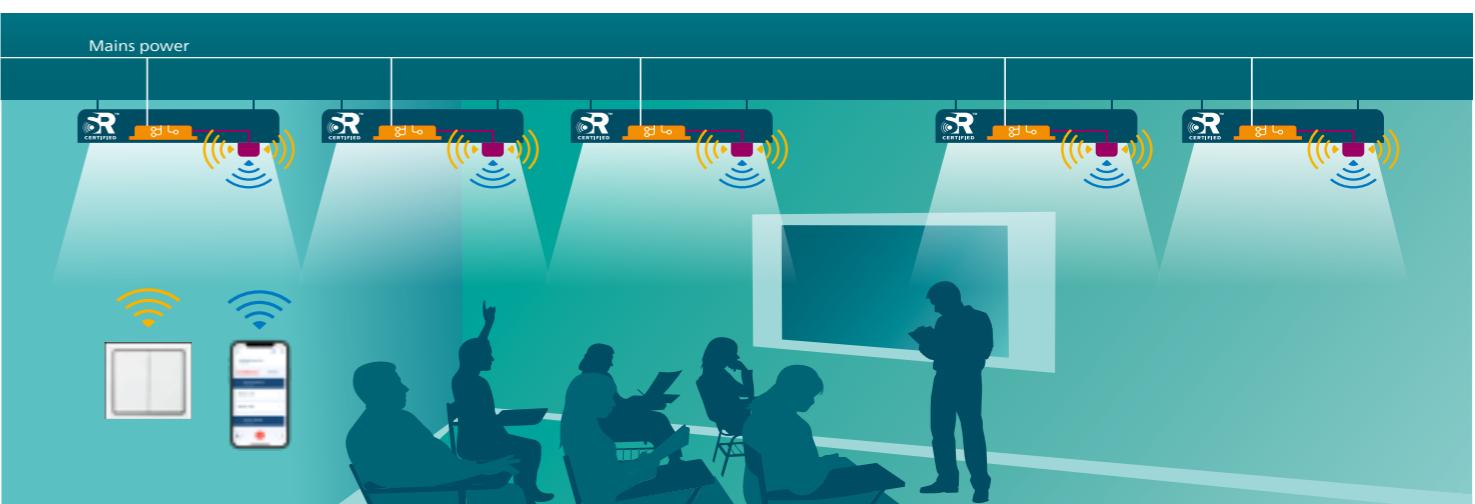

Figure 7: Need more ambience?
Create a tunable white system using a Xitanium SR FlexTune driver and EasyAir SNS210 sensor.

Tier model Category 3

Get full integration with an IoT solution with gateway

This fully integrated, connected network adds value beyond illumination to deliver significant commercial, operational, and financial advantages.

- Builds on category 1 and 2 solutions with a Zigbee gateway.
- Adds advanced features such as scheduling, monitoring, and energy reporting.
- Enables complex scenarios for different lighting behaviors.
- Includes direct reporting via the gateway dashboard to reduce costs and downtime.

This Internet of Things (IoT) category solution works with Signify-trusted gateway partners and is enabled by gateway software.

Ideal for:

Ambitious infrastructure plans in offices, schools, retail, and hospitality applications.

Figure 8: An integrated IoT solution for indoor lighting architecture.

All open standards within one connected lighting network

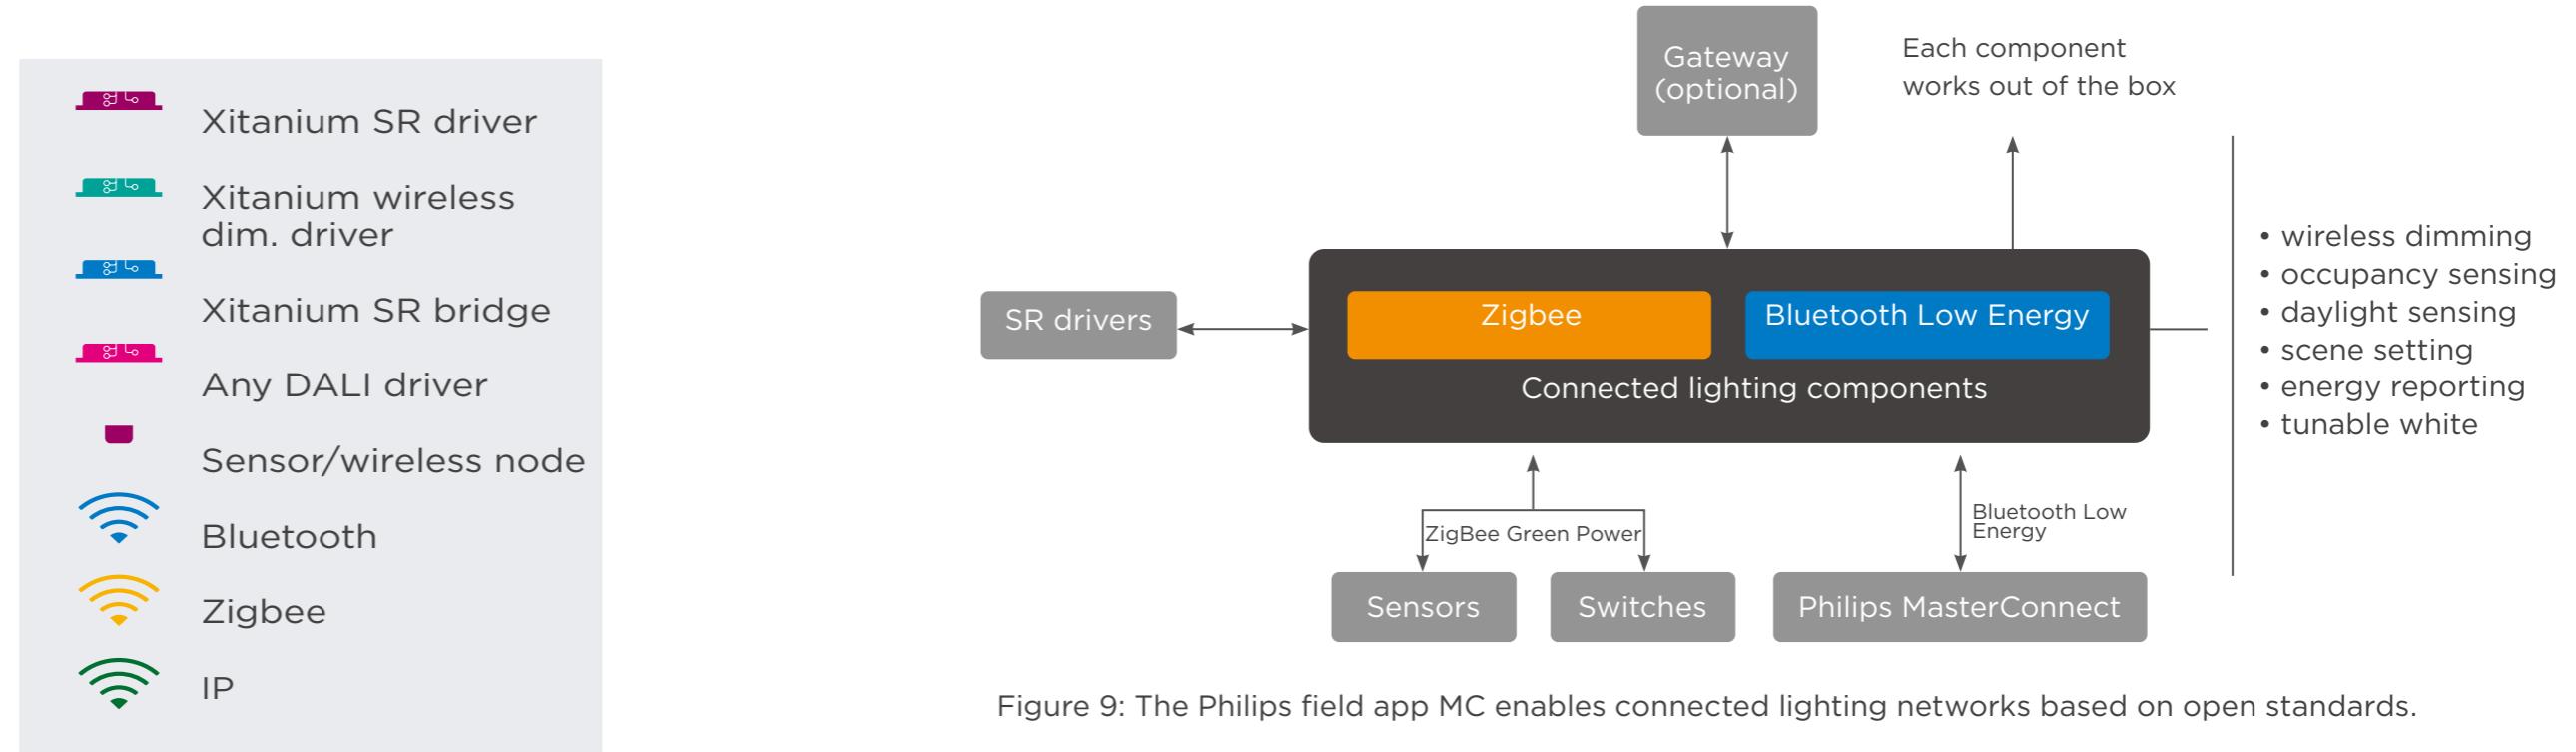

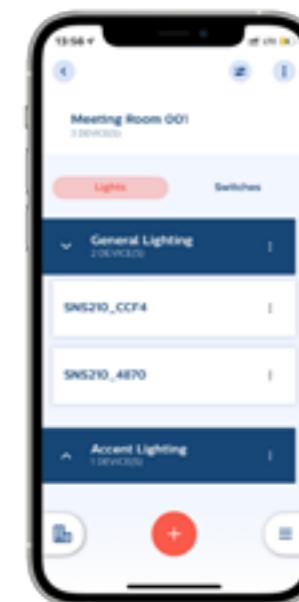

Figure 9: The Philips field app MC enables connected lighting networks based on open standards.

Download the app today

Philips MasterConnect has been rebranded from the Philips field app MC. Its new name also comes with new features and new applications.

Take the next steps towards simple, scalable, standardized connected lighting. To learn more about lighting components that work with Philips MasterConnect for a wide range of applications, access www.philips.com/masterconnectsystem. Or download the Philips MasterConnect and get connected now.

Connectivity

EasyAir sensors have a single-box, luminaire-mounting format, powered by Xitanium SR via a two-wire connection, to save time and costs when integrating them into your luminaires. The latest generation EasyAir SNS210 MC / SNH210 MC / SNHB210 MC sensors feature presence and daylight sensing together with advanced grouping and many other innovative features.

The sensors work with BLE (Bluetooth Low Energy) technology and can be set up using the Philips MasterConnect app-available for Android and iOS platforms. Not only do all our sensors bring energy savings, but they also enable human-centric lighting with color tuning or color scene recall, energy reporting, and much more. They are intended to be used across all office and industry applications, such as open plan offices, meeting rooms, schools, warehouses or assembly areas.

EasyAir sensors enable simple and valuable smart lighting use cases in a cost-effective way. For all wireless MasterConnect drivers, please check out the linear and point driver sections of this catalog.

Sensors & wireless nodes

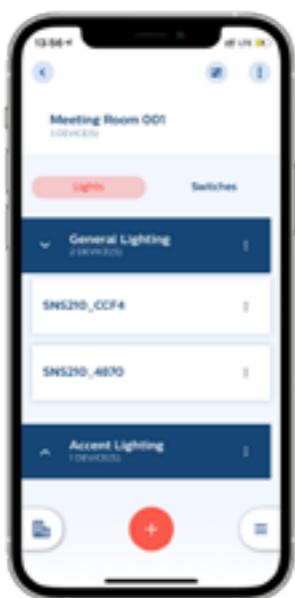

Product specification		Color	Typical dimensions	Operating ambient temp. range	Product code	New!

EasyAir 4B switch	Wireless switch for switching, dimming, and scene control	929002821906

Apps

The Philips MasterConnect app enables quick and easy configuration and commissioning of all MasterConnect products. The Philips MC Control app enables simple individual control of MasterConnect luminaires, including light level and color temperature, using a smartphone. Both apps are available for iOS and Android via the Apple App Store and the Google Play Store.

WiZ PRO

Light
Dim

BUILT FOR SMALL AND MEDIUM PROJECTS

CONNECTED LIGHTING FOR WELCOMING SPACES

Turning any application into a warm and inviting environment for guests, clients and home owners has become one of the key features that businesses look for in a connected lighting package. Now all this and more is available in one affordable turnkey solution enabling ambience creation - WiZ Pro.

Easy local and remote control of your lights

Various light scenes to fit your application

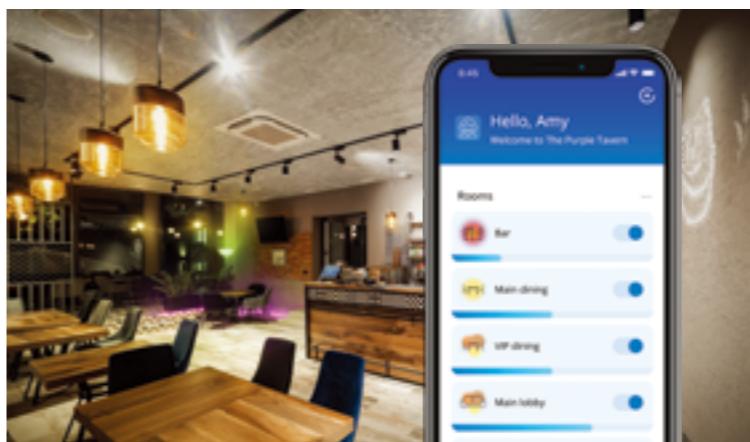

Automate lights for better energy efficiency

EASY COMMISSIONING

Complicated wiring is now a thing of the past. Save time with the WiZ Pro Setup app for direct effortless and wireless commissioning, even when on-site Wi-Fi is not installed yet.

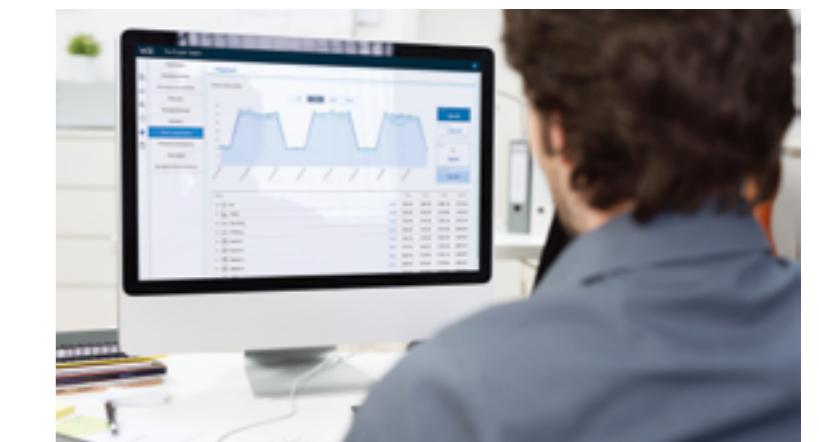

APP CONTROL

Once the lighting installation is connected to Wi-Fi, end users can control the lights from anywhere with the WiZ app. Customize your lighting to fit your application or choose between a variety of pre-designed light modes for a rich experience.

LOCAL WIRELESS CONTROL

Once you have the lights up and running, anyone can enjoy simple control via local accessories such as WiZ Pro smart switches, remotes and sensors.

ADVANCED FACILITIES MANAGEMENT

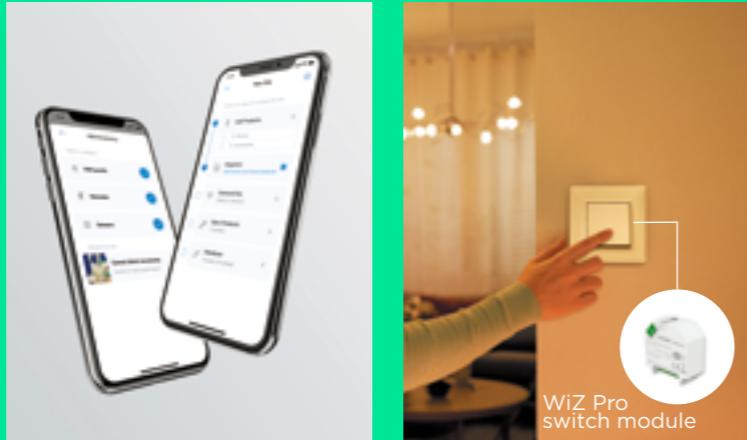

WiZ Pro Dashboard goes even further by allowing (multiple) lighting installation(s) control and remote site management. Get actionable light insights and monitoring with a clear overview of the entire installation, once it's connected to Wi-Fi.

A SOFTWARE SOLUTION FOR EACH STAKEHOLDER

Enjoy hassle-free wireless installation and local control with the WiZ app, as well as full control with cloud connectivity with WiZ Pro Setup app and WiZ Pro Dashboard. Enable a solution for each stakeholder with the WiZ Pro software suite that comes embedded within your WiZ Pro hardware.

WiZ PRO SETUP APP

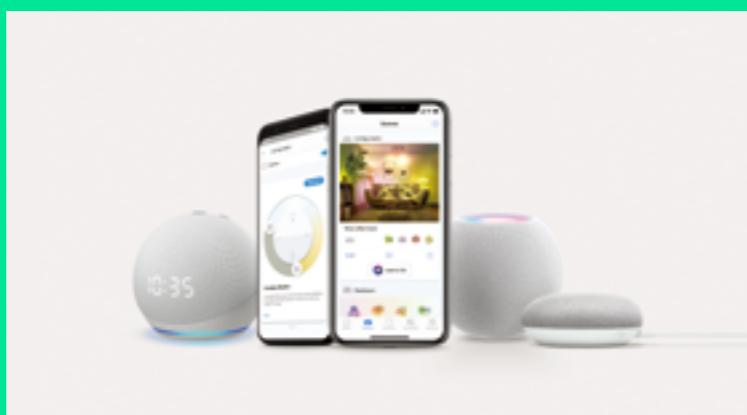

WiZ Pro is plug-and-play, so basic set up is easy with the WiZ Pro Setup app through wireless direct commissioning, no gateway or Wi-Fi needed. Follow the step-by-step instructions on screen: add your products, decide which room you want them to be in and perform tests to make sure they work before you hand it over. Wireless accessories ensure easy, local control for everyday connectivity.

WiZ APP

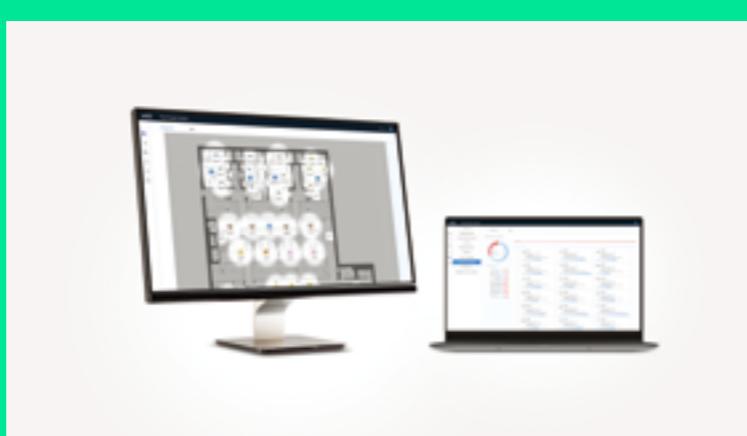

Be a lighting designer, mix and match light modes or enjoy pre-defined Scenes to create the perfect ambience - to enhance the shopping experience or to entertain clients and friends when they come and visit.

Discover the special human-centric lighting feature - Circadian Rhythm - which offers a smooth transition from cool white early in the cycle to warm white later on.

WiZ PRO DASHBOARD

Get the full picture and visualize where your lights are located within a space once you upload the area's floor plan. Set and supervise remotely the status of your lights and devices in any and all the locations you're managing. Each light's usage will be reported, including their remaining lifespan for predictive maintenance.

BRING YOUR PRODUCTS ONTO THE WiZ PLATFORM

Choose from a wide range of WiZ Pro drivers, lamps and luminaires. If you want your own WiZ Pro products, our team will work with you to create a tailor-made solution. More WiZ Pro hardware products will be coming soon.

MODULES

WiZ Pro modules are designed to fit your custom product specifications. Operating on Wi-Fi + Bluetooth standard protocols, the modules enable the wireless IoT benefits brought by the WiZ Pro smart lighting platform, as well as ease of installation and scalability. Due to their small size, you have the flexibility to integrate them in a range of luminaire designs. Enabling various dynamic light scenes with Tunable White and a variation of colors, the WiZ Pro modules cater to the needs of any application. To find out how you can benefit from integrating WiZ Pro modules into your products, please contact the WiZ team via wizconnected.com/en-us/business/pro.

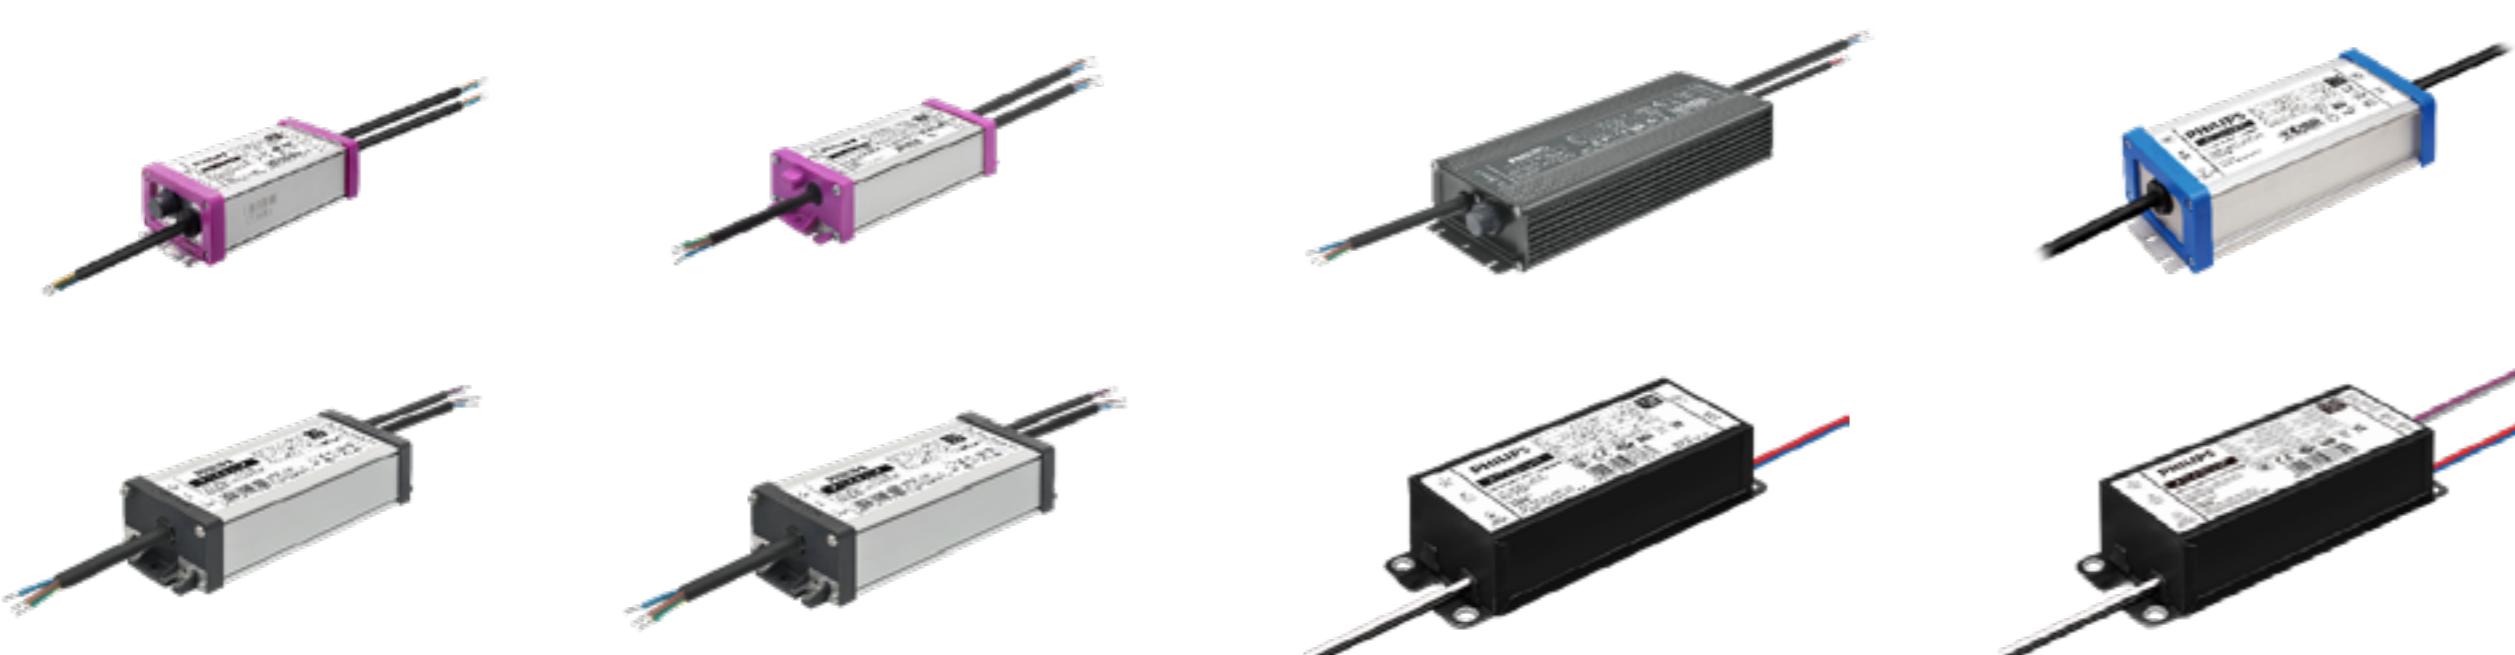

Outdoor Drivers

It's tough outdoors
But then, so are our lighting components

Outdoor Drivers Portfolio

Family	Control and Dimming				Basic Features and Performance				
	D4i	Dali Dim	1-10V Dim	SimpleSet via MultiOne	Output Current via e-set tool	Input Voltage (Vac)	Housing/Installation	Max Output Power (W)	Driver lifetime
Xitanium Sensor Ready	Yes		Yes	No	220-240	Built-in	22-165	100,000 @Tc-life	
Xitanium Full Programmable	Yes		Yes	No	220-240	Built-in	22-330	100,000 @Tc-life	
Xitanium Lite Programmable		Yes	Yes	No	220-240	Built-in	22-165	100,000 @ Tc-life	
Xitanium Lite Programmable		Yes	Yes	No	100-277	IP67	40-320	50,000 @ Tc-max	
Xitanium Essential Programmable	Yes		No	Yes	100-277	IP67/IP66/Built-in	40-250	50,000 @ Tc-max	
Xitanium Single Current	Yes		No	No	220-240	IP67/Built-in	50-250	50,000 @ Tc-max	

Outdoor Driver Naming Example

Xi LP 150W 0.3-1.05A S1 WL I175CF

LED driver family:

None = Single Current, no controllability
Dim: 1-10V dimmable, non-programmable
SR= Sensor Ready
FP= Full Programmable
LP= Lite Programmable
BP= Basic Programmable
EP= Essential Programmable (e-set tool)
LV= Low Voltage Output
AOC= Adjustable Output Current

Type of LED driver:

Xi=Xitanium

Output current:

Adjustable min-max Output Current range (AOC) in A

Output power:

Rated output power in Watt

Housing:

I###, S###, C###
I: Independent
S: Stretched
C: Compact
#: Length in mm

Others:

CF/C: Connector
L: long cable
S: short cable

Rated AC input voltage:

230V = 220-240V
GL: global line 100-277V
WL: wideline 100-277V
TWE: 110-277V

Features:

S = SimpleSet
N = NTC interface
L = LineSwitch interface
1 = 1-10V interface
D = DALI interface
A = AmpDim interface
E = DC Emergency
M = Energy Metering
P = Auxiliary Power supply
F = Flex Tune

Xitanium LED Drivers – Sensor Ready Drivers (SR)

Our Philips Xtreme Sensor Ready (SR) drivers are ideal for use in outdoor applications. These robust drivers feature the D4i interface and can be used in combination with intelligent photocells, or the many smart city management systems developed by our SR certified partners. The accurate energy metering and integrated power supply simplify the design significantly. The integration also increases system reliability. Combined with new universal SR connector (Zhaga standard), these drivers offer future-proof solution for the phased investment capabilities of municipal authorities.

Features

- Integrated 24VDC/3W auxilliary power supply with D4i interface
- Operation compatible DALI parts: 250, 251, 252, 253
- Highly accurate power metering, and diagnostics
- 100,000 hours lifetime @ Tc life with >90% survivors

Benefits

- No need extra power supply for sensor, for cost saving and system reliability
- Supports real time energy management and enables predictive maintenance
- Reliable and robust design, offers peace of mind and lower maintenance cost

Application

- Road and street lighting
- Area lighting
- Industrial lighting

Xitanium LED Drivers - Full Programmable (FP)

Our Xitanium Full Programmable (FP) drivers are designed to deliver ultimate configuration possibility, the highest performance and reliability. The portfolio offers both stand-alone and remote dimming protocols to further energy saving with the latest LED technologies. The proven Xtreme technology ensures maximum robustness and protection for a very long lifetime. These drivers are the preferred choice for demanding applications such as outdoor and industry.

Features

- Operation compatible DALI parts 251, 252 and 253
- Full control feature set such as Adjustment of Output Current, Constant Light Output, 5 step DynaDimmer, Driver Temperature Limite and DC emergency.
- 100,000 hours lifetime @ Tc life with >90% survivors

Benefits

- Add more configuration possibilities and design freedom to customers
- Reliable and robust design, offers peace of mind and lower maintenance cost

Application

- Road and street lighting
- Area lighting
- Tunnel lighting
- Industrial lighting

Xitanium LED Drivers – Lite Programmable (LP)

Our Xitanium lite programmable Xtreme LED drivers are designed to deliver a carefully selected feature set and high end performance, making them a preferred choice for many outdoor applications. The portfolio offers high flexibility with a customizable operating window, enabling differentiation in LED lighting designs via system tuning and compatibility with LED efficacy upgrades. Configuration of programmable drivers has never been easier with the integrated SimpleSet feature, a fast and wireless way to change and read-out settings.

Features

- Simpleset to enable programmable features such as Adjustment of Output Current, Constant Light Output, 5 step DynaDimmer, Driver Temperature Limit and OEM Write Protection
- 100,000 hours lifetime @ Tc life with >90% survivors

Benefits

- Provides more application possibilities to end users and helps OEMs to reduce number of SKUs
- Robust and reliable, offering peace of mind and lower maintenance costs

Application

- Road and street lighting
- Area lighting
- Tunnel lighting
- Industrial lighting

Xitanium LED Drivers – Basic Programmable (BP)

Philips Xitanium basic programmable LED drivers offer a basic feature set and high performance, making them a preferred choice for various outdoor applications. The portfolio offers flexibility with a customizable operating window, enabling differentiation in LED lighting designs via system tuning and being prepared for LED efficacy upgrades.

Features

- SimpleSet enables Adjustable Output Current (AOC) and OEM Write Protection (OWP)
- Compact form factor
- 100,000 hours lifetime @ T_c life with >90% survivors

Benefits

- Basic configurable features covering many applications
- Enabling integration in small(er) size luminaires to save design cost
- Outdoor robustness, offering peace of mind and lower maintenance costs

Application

- Road lighting
- Urban street lighting
- Residential Area lighting

Xitanium LED Drivers - Lite Programmable IP67

Xitanium Lite Programmable (LP) LED drivers are value engineered to deliver a carefully selected programming feature set and high-end performance, making it a preferred choice for outdoor applications.

One of the key features is SimpleSet®, an easy and fast way to configure the driver without the need to power the driver. The GlobalLine family can operate on input voltage 110-277Vac anywhere around the world and ensure 100% performance across the full range. The WideLine family can operate on input voltage 100-277Vac anywhere around the world and ensure 100% performance from 200-254Vac.

Features

- SimpleSet to enable programmable features such as Adjustment of Output Current, Constant Light Output, 5 step DynaDimmer, Driver Temperature Limit and OEM Write Protection
- Input voltage: 100-277Vac
- IP67 with 50,000 hours lifetime @ Tc Max

Benefits

- Easy to design-in and configure to achieve:
 - SKU reduction
 - Enables various applications such as tunnel lighting
 - Consistant light output performance over time
 - Low maintenance cost and peace of mind in extreme conditions

Application

- Residential areas
- Tunnel lighting
- Road and street lighting
- Area and flood lighting
- High-bay lighting

Xitanium LED Drivers – Essential Programmable (EP)

Xitanium Essential Programmable (EP) LED drivers are designed for maximum reliability and flexibility, making it a preferred choice for outdoor applications. The key feature is to adjust the output current with the new e-set tool, a simple and fast way to configure the driver without the need to power on the driver and without the need for any software configuration. The WideLine family can operate on input voltage 100–277Vac anywhere around the world and ensure 100% performance from 200–254Vac.

Features

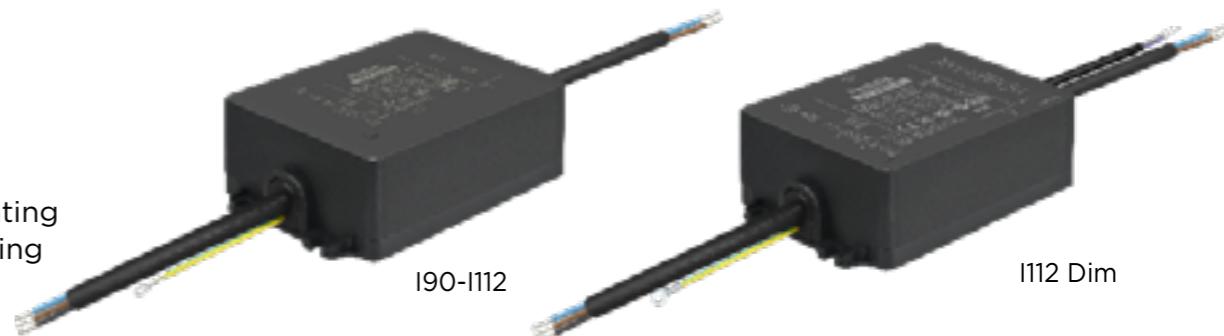

- Digital and simple Adjustable Output Current (AOC) with e-set tool, based on NFC technology
- WideLine input voltage range: 100-277Vac
- IP66/IP67 with 50,000 hours lifetime @ Tc Max
- SELV certified

Benefits

- Reliable and repeatable adjustment of output current to save labor cost and time
- Easy to design-in and reduces SKUs
- Low maintenance cost and peace of mind in extreme conditions
- Safe to use and provides luminaire design freedom

Application

- Road and street lighting
- Area and flood lighting
- High-bay lighting

Xitanium LED Drivers – Single Current (SC)

LED-based light sources are an excellent solution for outdoor environment. They are long-lasting and require low maintenance. However, to get the best out of the LEDs, these light sources require highly reliable and efficient LED Drivers. The Philips Xitanium Fixed Output LED Outdoor Drivers are specifically designed to deliver reliable performance and protection while meeting the strict performance, approbation and application requirements.

Features

- Single current output 0.7 and 1.05A
- 50,000 hours lifetime @ Tc Max

Benefits

- Robust design, capable of withstanding harsh outdoor conditions
- Highly reliable solution to offer peace of mind and lower maintenance cost

Application

- Road and street lighting
- Area and flood lighting
- High-bay lighting

Surge Protection Device (SPD)

The Philips surge protection devices are the ideal solution to the challenge of using LEDs in outdoor lighting. The SPD protects the complete system against high surges that can occur due to, for example, lightning strikes. Essential for LED systems installed in high-risk areas, the advantages of using the SPD are not limited to just LED systems. The product can be used in any new or existing lighting solution, regardless of technology. A choice can be made between parallel SPDs (if SPD is broken, light remains on) and serial SPDs (if SPD is broken, light will switch off).

Features

- Suitable for insulation Class I or II
- Provide high surge protection of up to 10kV or 20kV for all lighting technologies
- Optical failure indicator
- Long lifetime: 100,000 hours

Benefits

- Easy to apply in new or existing installations
- Maximize lifetime of outdoor lighting solutions to lower maintenance cost

Application

- Highways
- Rural roads
- Industrial zones
- Open space parking area

SPD class-I

Outdoor Modules

Lighting up harsh conditions

Fortimo FastFlex Premium light distribution Gen5

Fortimo FastFlex PR (premium) Gen5 is a true premium addition to your outdoor LED luminaire portfolio. The unique LED technology enables improved optical quality and efficiency while being extremely reliable.

Features

- Xtreme lifetime with >100khrs
- ESD protection (8kV contact/15kV air) & Surge protection up to 6kV
- NTC enabled at system level
- Flexible current range & Tc
- Compatible with 3rd party lenses

Benefits

- Robustness for outdoor application
- Easy to design and use

Fortimo FastFlex DA&DP HE

Fortimo FastFlex DA & DP HE is the new high efficiency family within the Outdoor LED module portfolio. By maintaining the same mechanical outlines as Fortimo FastFlex DA & DP G4/G4+/G5, an easy drop-in upgrade is enabled. This module family is compatible with third-party lenses for unlimited optical configuration. Some lenses for Fortimo FastFlex G4/G4+/G5 can also be reused for this new outdoor LED module family.

Features

- Various combinations of size, CRI and CCT available
- High efficiencies in industry familiar form factor
- Broad Fortimo FastFlex portfolio for Outdoor lighting applications
- Philips system warranty

Benefits

- Easy drop-in replacement to FastFlex DA & DP G4/G4+/G5
- Compatible with 3rd party lenses

Module driver compatibility

The Fortimo FastFlex portfolio is compatible with multiple Xitanium LED drivers such as Xitanium programmable Xtreme, Xitanium basic programmable, Xitanium lite programmable Xtreme, Xitanium full programmable Xtreme, Xitanium sensor ready Xtreme and Xitanium independent. For more information please visit our [Easy-Design-In Tool](#).

Fortimo FastFlex VO

Fortimo FastFlex VO (value offer) offers good basic features with maximized cost-effectiveness.

A wide range of optical configurations are enabled thanks to its compatibility with third-party lenses.

Fortimo FastFlex IP

Fortimo FastFlex IP Standard is an integrated module solution with IP66 protection, excellent optical and heat management that offers high energy efficacy and high quality of light. The Fortimo FastFlex IP range consists of two product categories based on their energy efficacy: "Standard" with typical energy efficacy of 140lm/W and, "Ultra High Efficacy" (UHE) with a best-in-class energy efficacy of 170lm/W. Fortimo FastFlex IP products are designed to enable optimum LED lighting in outdoor and industry applications. A range of compatible IP67 Xitanium drivers complement these modules to further differentiate your lighting solution on efficacy, lifetime and robustness under extreme temperature conditions.

Features

- Best-in-class energy efficacy up to 175 lm/W
- Best-in-class thermal and IP-rating over lifetime together with Built-in surge protection, 4kV
- Flexible lumen output via dimming drivers

Benefits

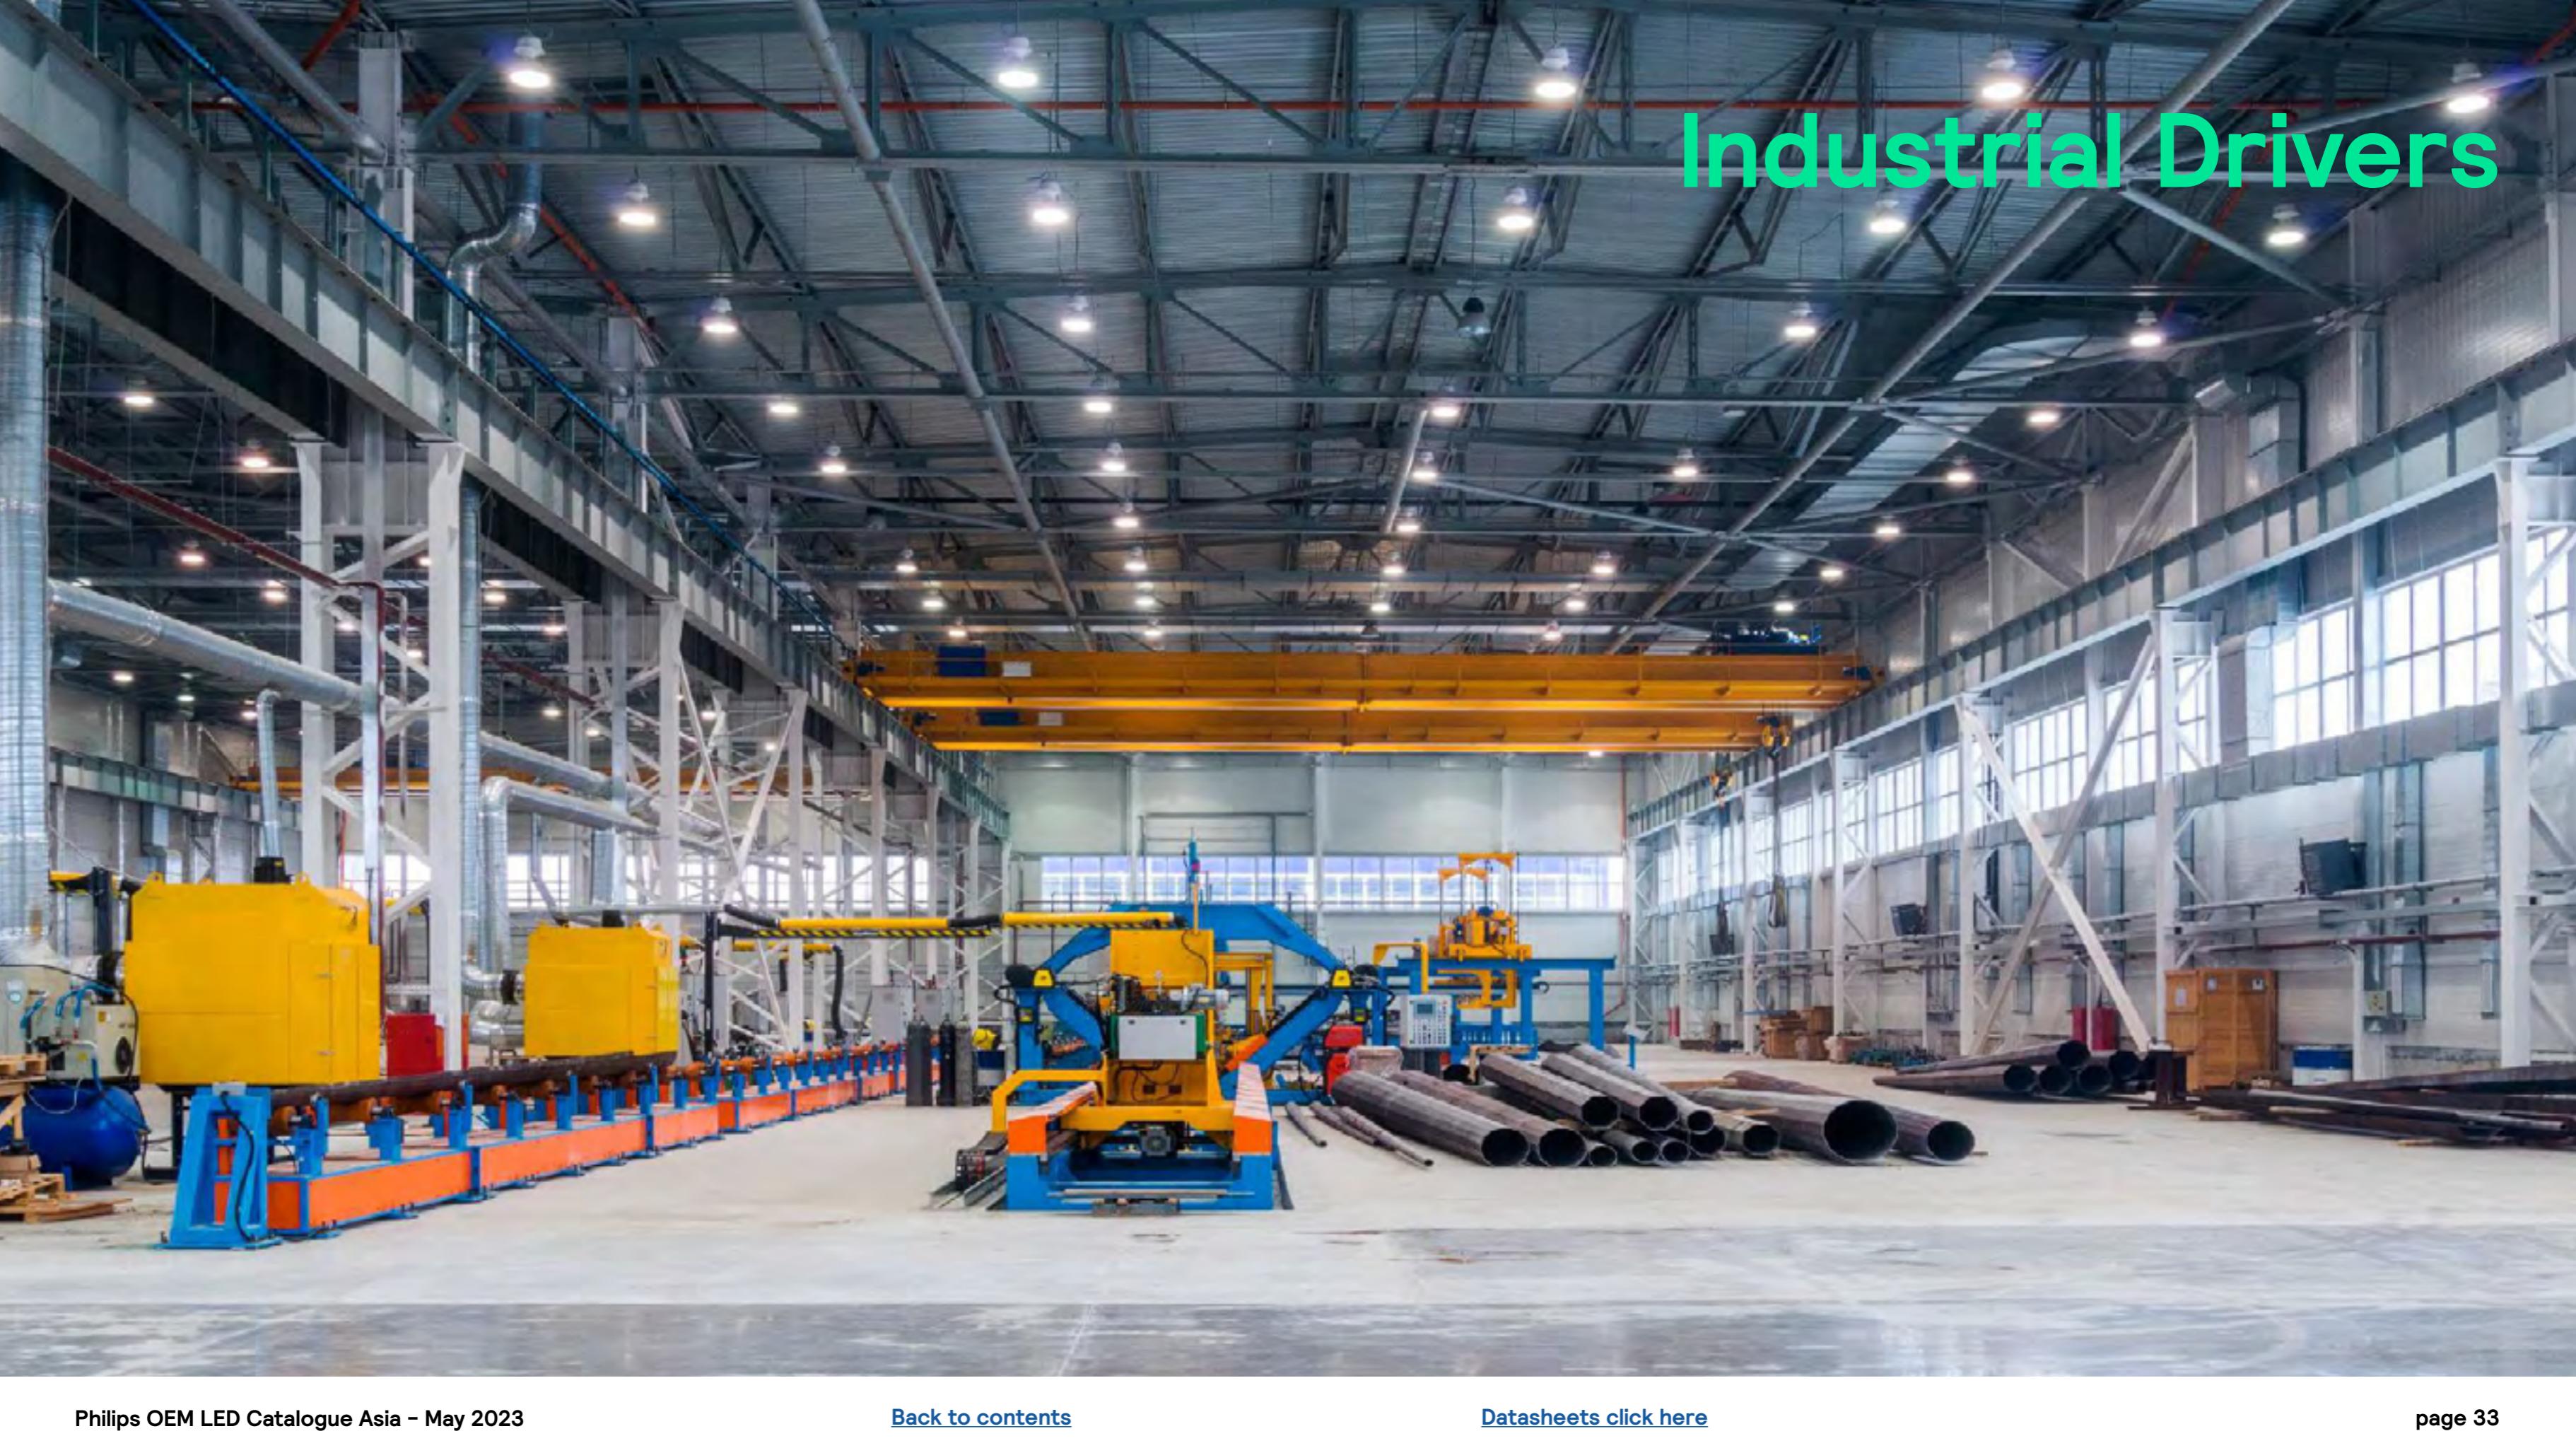

- Outstanding performance
- Maximum flexibility
- Easy installation and maintenance, minimum assembly time
- Practical portfolio offer
- System proposition with 5 year warranty

Industrial Drivers

Xitanium Round Shape Highbay

Xitanium Round Shape Highbay LED Drivers are designed to deliver reliable and efficient LED drivers in industrial applications. The WideLine family can operate on input voltage 100-277Vac anywhere around the world and ensure 100% performance from 200-254Vac.

Features

- Adjustable Output Current (AOC)
- WideLine input voltage range: 100-277Vac
- IP65 with 50,000 hours lifetime @Tc-max
- High efficiency: 94%-96%

Benefits

- Reliable and repeatable adjustment of output current to save labor cost and time
- Easy to design-in and reduces SKUs
- Low maintenance cost and peace of mind in extreme conditions

Application

- Highbay industry lighting
- Warehouse lighting
- Big-box retail store lighting

Xitanium Dimmable Single Current High Bay

LED-based light sources are an excellent solution for highbay industrial applications. They are long-lasting and require low maintenance. However, to get the best out of the LEDs, these light sources require highly reliable and efficient LED Drivers. Philips Xitanium Dimmable (1-10V) LED Outdoor Drivers are specifically designed to deliver reliable performance and protection while meeting the strict performance, approbation and application requirements.

Features

- Dimmable through 1-10V interface
- IP67 with 50,000 hours lifetime @Tc max 85

Benefits

- Provide more application possibility through its dimmable interface to achieve energy saving
- Ultimate robustness and reliability to offer peace of mind and reduce maintenance cost

Application

- Highbay industry lighting
- Warehouse lighting
- Big-box retail store lighting

Industrial Modules

Fortimo High Bay

Fortimo High Bay and Fortimo High Bay HE are integrated LED modules with IP65 protection, optics and heat management. The Fortimo HE version offers best-in-class high energy efficacy and high quality of light while, Fortimo version offers optimized value for money - with integrated lens.

The Fortimo High Bay G2 series is designed to enable LED lighting in Industry (high-bay) applications - warehouses, factories, large-format retail stores. A range of compatible IP65 Xitanium round shape high bay drivers complement this High Bay lighting solution in order to further differentiate on efficacy and lifetime under extreme temperature conditions.

Features

- LED module with heatsink, optics and IP65 rating
- High energy efficacy of 145 lm/W (standard) and 170 lm/W(HE), at module level
- Four lumen levels: 10K, 15K, 20K and 25K lumens with three CCTs: 4000K, 5700K and 6500K CRI >80
- Two light distributions: 60° and 90°, via integrated lens (standard) or external reflector(HE)
- High protection against mechanical impact, IK07

Benefits

- Reliable and robust design, capable of withstanding harsh industrial operating conditions
- Best-in-class energy savings to maximize TCOO
- Easy to design-in and assemble; simple set and forget
- Wide flexibility by adjusting light output and output current
- Extremely long lifetime, fitting with high bay industrial applications

Xitanium MasterConnect

Xitanium wireless LED drivers are designed to operate LED solutions for general lighting applications. They enable simple, cost effective wireless lighting system for energy saving and comfort. Advanced design of the wireless drivers helps to build a simple, scalable and standardized connected lighting with different functionalities from simple wireless dimming to cloud based operations and integration with gateways. The Xitanium FlexTune wireless drivers make it possible to create excellent Tunable White systems without compromising on quality of light. The unique FlexTune dimming feature ensures flicker-free dimming performance down to 1% over the full CCT range.

Features

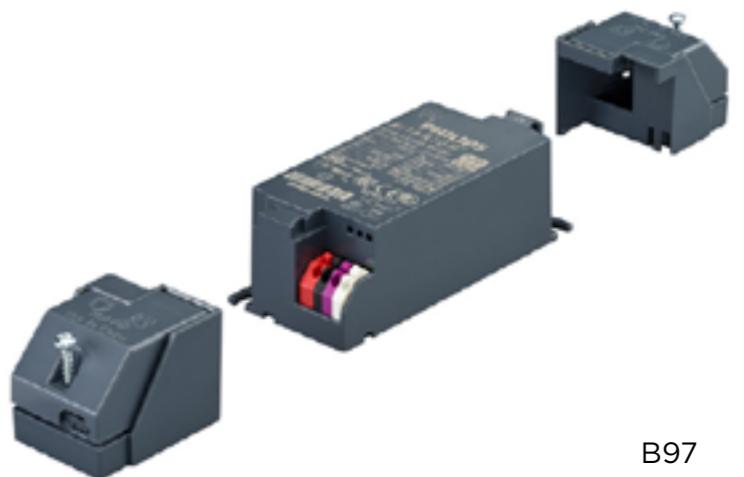

- Wireless control and Dimmable
- FlexTune features
- Adjustable output current by SimpleSet
- Low ripple current
- 50,000 hours lifetime

Benefits

- Enabling simple, scalable and standardized connected lighting system
- Excellent dimming and colour tuning quality
- Wide range of use cases from standalone to cloud based/gateway operations
- Flicker-free dimming down to 1% over the full CCT range
- High reliability underpinned by 5 year warranty

Application

- Downlight
- Tack light
- Spot light

Xitanium Dali and SR

Our Xitanium programmable window LED drivers ensure OEMs have complete flexibility and control in producing high quality luminaires. Available in application dedicated form factors, our LED point drivers provide further customization via wide operating windows. Additionally, almost all drivers feature the following specifications: SELV, temperature derating, hot wiring, providing OEMs the tools to produce, and even alter later if necessary, premium downlights and spotlights.

Features

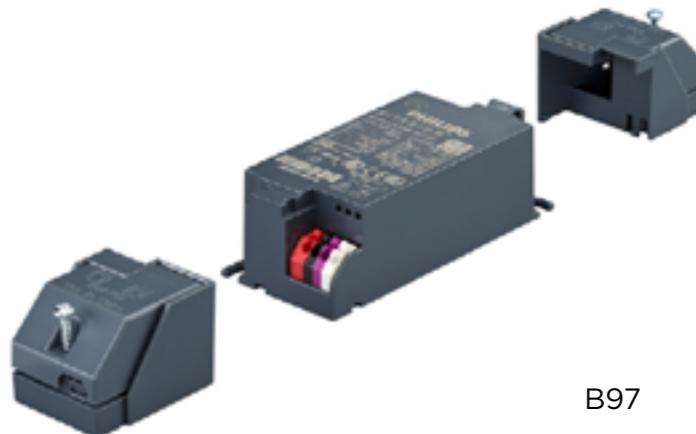

- Dali and Touch Dim Dimmable
- Adjustable output current by SimpleSet
- Low ripple
- 50,000 hours lifetime

Benefits

- Drivers designed based on Philips experience and knowledge in conventional fluorescent and HID technologies
- Dali 2.0 and Philips SR compatible which provide reliable line control lighting system
- Future-proof flexibility: application-oriented operating windows enable LED generation and complexity management
- High reliability underpinned by 5 year warranty

Application

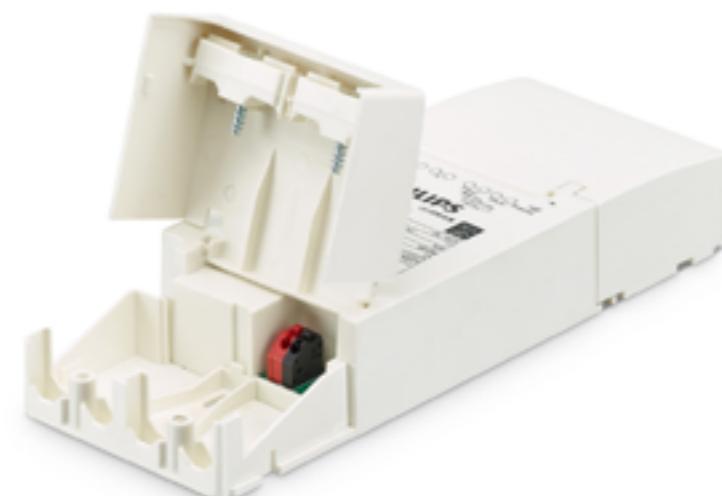

- Downlight
- Tack light
- Spot light

Xitanium Mini Dali Slim

Philips Xitanium LED Point drivers are designed to operate with LED COB solutions used both in built-in and independent applications such as down light, spot light and track light. Xitanium drivers have common features such as low ripple output current, adjustable output current by dip switch and 50,000 hours lifetime. They are specifically designed to ensure great EMI performance, high robustness and safe usage.

Features

- Dali 2.0 with 1-100% dimming
- Low Ripple less than 4%
- Adjustable output currents by SimpleSet
- Super slim with 21.2mm height
- 50,000 hours lifetime

Benefits

- Dali 2.0 enables wired digital controls
- Great EMI performance for easy design-in
- Selectable output current enables flexibility
- Super slim design for extreme small space
- Peace of mind with proven reliability

Application

- Down lighting
- Spot lighting
- Track lighting

Xitanium Mini Dali DS

Philips Xitanium LED Point drivers are designed to operate with LED COB solutions used both in built-in and independent applications such as down light, spot light and track light. Xitanium drivers have common features such as low ripple output current, adjustable output current by dip switch and 50,000 hours lifetime. They are specifically designed to ensure great EMI performance, high robustness and safe usage.

Features

- Dali 2.0 with 1-100% dimming
- Class I and II application
- Low Ripple less than 4%
- 4 output currents by Dip switch
- 50,000 hours lifetime

Benefits

- Dali 2.0 enables wired digital controls
- Provides options for different luminaire designs
- Enables minimization of luminaire
- Selectable output current enables flexibility
- Peace of mind with proven reliability

Application

- Downlight
- Tack light
- Spot light

Xitanium Mini SC

Xitanium Mini driver have the same form of conventional HID-Prima vision driver which is widely used in downlight and spot light.
The single current mini family product most affordable small size driver within Mini family

Features

- HID-Prima vision mini form with small size
- Low ripple current
- +/-8% output current tolerance
- 50,000 hours lifetime

Benefits

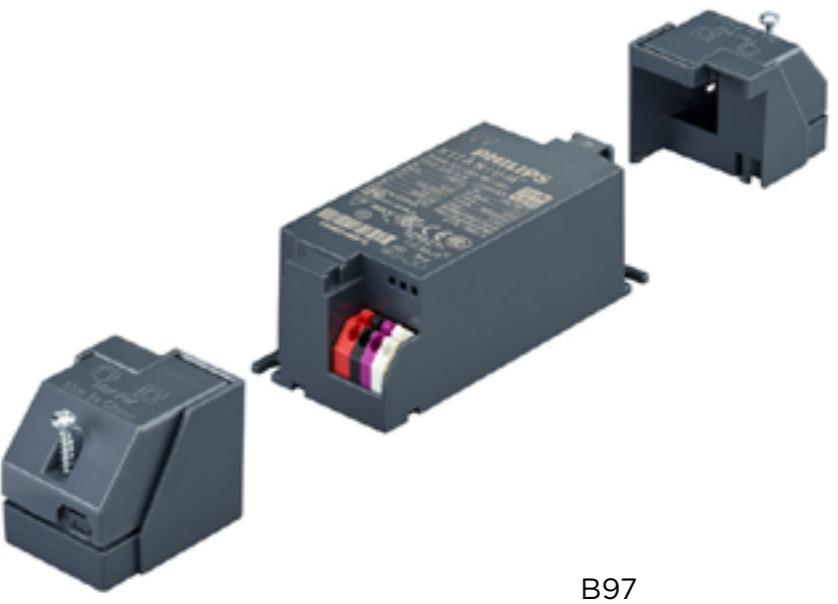

- Drivers designed based on Philips experience and knowledge in conventional fluorescent and HID technologies
- Very small size which is easy to be designed in luminaire
- Resolve flickering issue in certain applications

Application

- Downlight
- Tack light
- Spot light

Xitanium Mini DS

Xitanium Mini driver have the same form of conventional HID-Prima vision driver which is widely used in downlight and spot light. The Dip switch family product can provide upto 8 selection output.

Features

- HID-Prima vision mini form with small size
- 8 Selectable output currents by dip switch
- Low ripple current
- +/-5% output current tolerance
- 50,000 hours lifetime

Benefits

- Drivers designed based on Philips experience and knowledge in converntional fluorescent and HID technologies
- Very small size which is easy to be designed in luminaire
- Resolve flickering issue in certain applications
- Provide both independent and built-in version for easy usage

Application

- Down light
- Tack light
- Spot light

Xitanium DS G3

Philips Xitanium LED Point drivers are designed to operate with LED COB solutions used both in built-in and independent applications such as down light, spot light and track light. Xitanium drivers have common features such as low ripple output current, adjustable output current by dip switch and 50,000 hours lifetime. They are specifically designed to ensure great EMI performance, high robustness and safe usage.

Features

- Class I and II application
- Built in and independent
- Low Ripple less than 1%
- 4 output currents by Dip switch (G3)
- 50,000 hours lifetime

Benefits

- Provides options for different luminaire designs
- Great EMI performance for easy design-in
- Selectable output current enables flexibility
- Peace of mind with proven reliability

Application

- Down lighting
- Spot lighting
- Track lighting

Xitanium TE

This range provides an affordable selection of point drivers which have 50,000 hours lifetime. The driver provide trailing-edge dimmable features which is popular dimming method.

Features

- Dual current output for 24W/32W/42W
- Low ripple current
- +/- 8% output current tolerance
- 50,000 hours lifetime

Benefits

- Drivers designed based on Philips experience and knowledge in conventional fluorescent and HID technologies
- Various power wattage drivers that are related to the lumen packages/applications
- Independent version housing design for stand-alone installations
- Very small size which is easy to be designed in lumanire

Application

- Downlight
- Tack light
- Spot light

Xitanium Track Adaptor Driver G2

Track adaptor driver 3 circuits G2 provide current selection by dipswitch with smaller housing size which give custome more flexibility.

Features

- Selectable output current by dip switch
- White/Black/Grey colour available
- Low ripple current
- +/- 8% output current tolerance
- 50,000 hours lifetime

Benefits

- Drivers designed based on Philips experience and knowledge in converntional fluorescent and HID technologies
- Various power wattage drivers that are related to the lumen packages/applications
- Track adaptor housing design for minimization of track light luminaire
- Standard nipples as accessory for easy usage

Application

- Tack light (3 Circuits 4 Wires system)

CertaDrive Mini G2/G3

Philips CertaDrive LED Point drivers are designed to operate with LED COB solutions used both in built-in and independent applications such as down light, spot light and track light. CertaDrive drivers have common features such as low ripple output current, single output current and 30,000 hours lifetime. They are specifically designed to ensure great EMI performance, high robustness and safe usage.

Features

- Class II application
- Built in and independent
- Low Ripple less than 4% (G3)
- Small size with Mini Shape
- 30,000 hours lifetime

Benefits

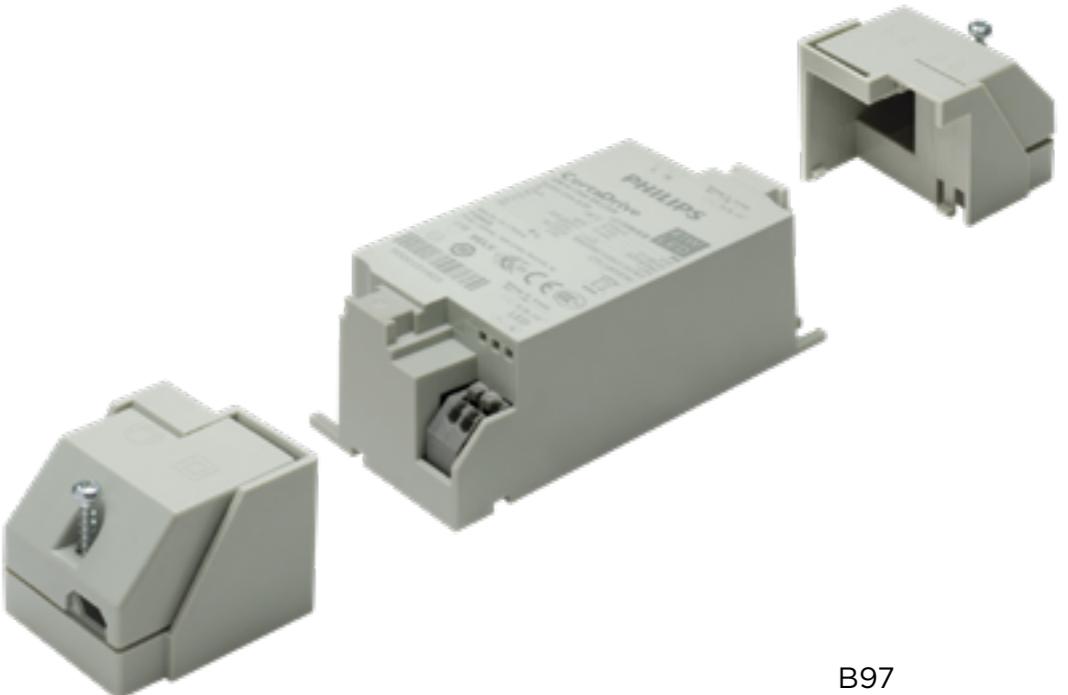

- Provides options for different luminaire designs
- Great EMI performance for easy design-in
- Enables minimization of luminaire
- Peace of mind with proven reliability

Application

- Down lighting
- Spot lighting
- Track lighting

CertaDrive Track Adaptor Driver (1 circuit)

Track adaptor driver is a great innovation to minimize the track light luminaire in a most reliable and cost effect way.

Features

- White/Black/Grey colour available
- Low ripple current
- +/- 8% output current tolerance
- - 30,000 hours lifetime

Benefits

- Drivers designed based on Philips experience and knowledge in conventional fluorescent and HID technologies
- Various power wattage drivers that are related to the lumen packages/applications
- Track adaptor housing design for minimization of track light luminaire
- Standard nipples as accessory for easy usage

Application

- Tack light (1 circuit 3 Wires system)

CertaDrive Round LPF

Philips CertaDrive LED Point drivers are designed to operate with LED COB solutions used both in built-in and independent applications such as down light, spot light and track light. CertaDrive drivers have common features such as low ripple output current, single output current and 30,000 hours lifetime. They are specifically designed to ensure great EMI performance, high robustness and safe usage

Features

- Class II application and built in only
- Low Power Factor
- Low Ripple less than 3%
- Round shape
- 30,000 hours lifetime

Benefits

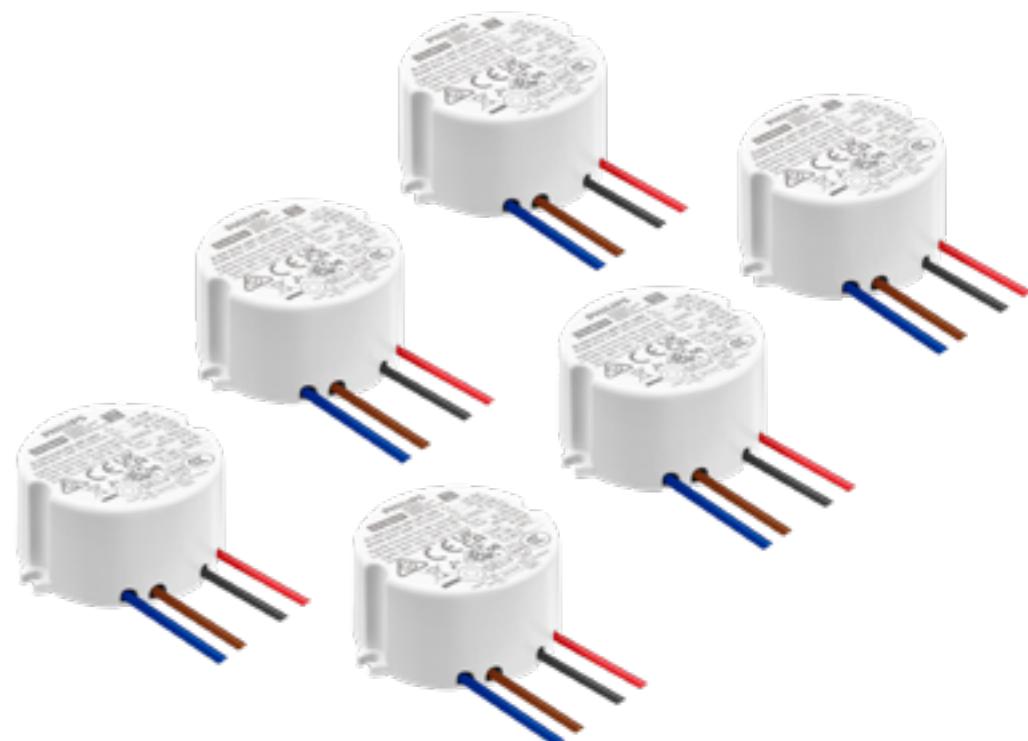

- Great EMI performance for easy design-in
- Optimized cost/performance ratio
- Suitable for Pendant light applications
- Peace of mind with proven reliability

Application

- Down lighting
- Spot lighting
- Pendant lighting

SLM New Products

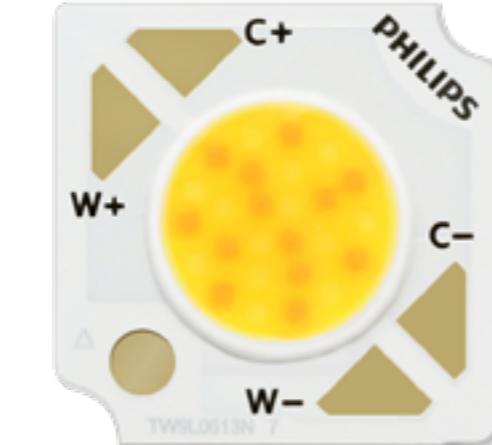

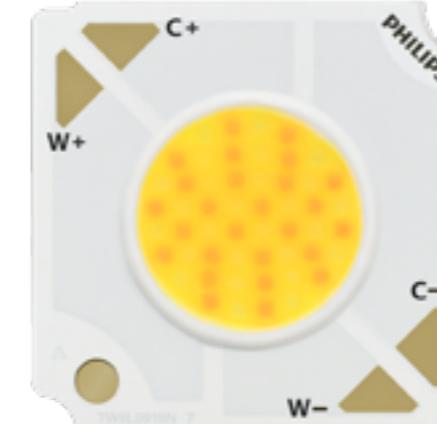

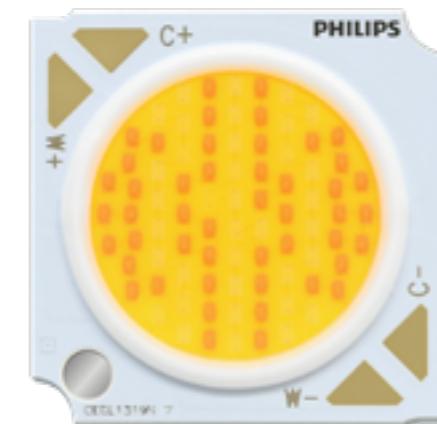

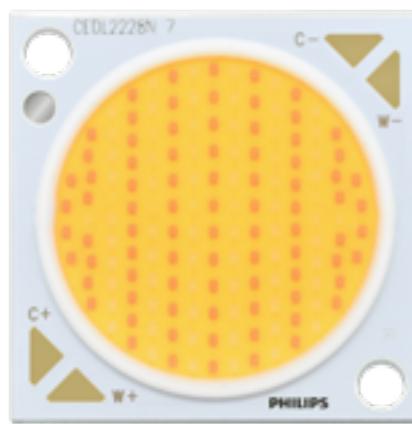

Coming soon!

Fortimo SLM Tunable White COB

- can be tuned from CCT 2700K -6500K with always good color mixture performance and color difference management.

Fortimo SLM CED COB

- To combine FlexTune tunable white technology with high MDER spectra in COB, as the complement of the launched linear CED solution.

Fortimo SLM HE+ Gen7

With significant improvement of efficiency in CRI90 range, the new introduced Fortimo SLM HE+ Gen 7 provides the 15%+ efficacy Vs current main runners in the market without sacrifice on Quality of Light performance such as vivid white color etc, and with improvement of color consistency to 2 SDCM. Please also check the online [Easy Design-in Tool](#) for your perfect system combination.

Features

- Right trade off between key performance
- Higher efficay
- Better color consistency management with 2 SDCM

Benefits

- Best quality of light for applications
- Easy for customers to design
- Most reliable solution

Applications

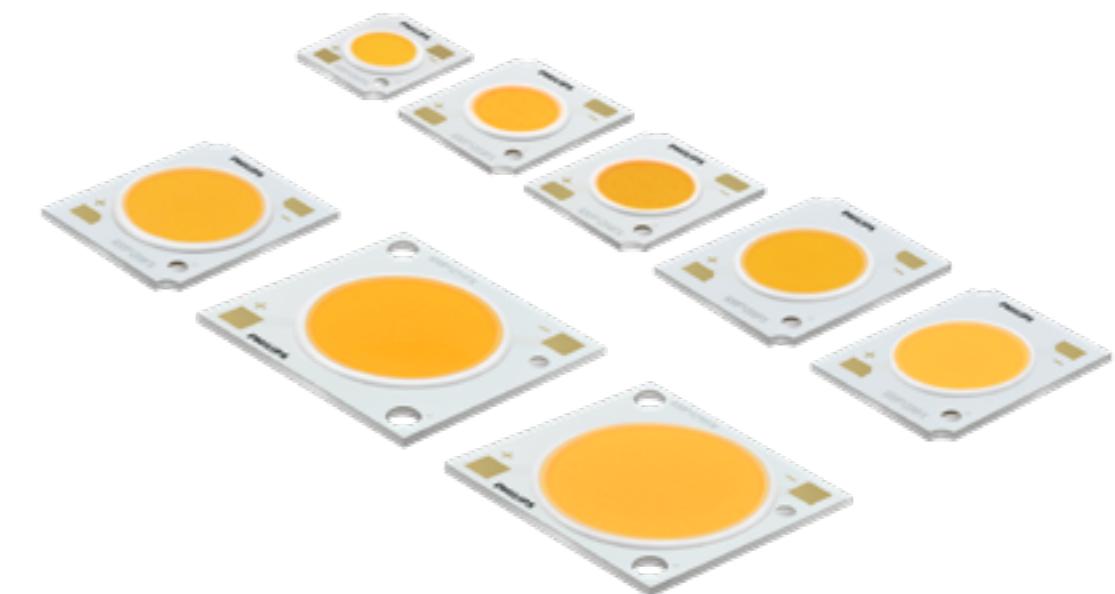

- Retail

Fortimo SLM HE+ Gen7

With significant improvement of efficiency in CRI90 range, the new introduced Fortimo SLM HE+ Gen 7 provides the 15%+ efficacy Vs current main runners in the market without sacrifice on Quality of Light performance such as vivid white color etc, and with improvement of color consistency to 2 SDCM. Please also check the online [Easy Design-in Tool](#) for your perfect system combination.

Features

- Right trade off between key performance
- Higher efficay
- Better color consistency management with 2 SDCM

Benefits

- Best quality of light for applications
- Easy for customers to design
- Most reliable solution

Applications

- Retail

Fortimo SLM Gen7 new footprint

With the introduction of Fortimo SLM G7 new family, the leading efficacy and quality of light of Fortimo SLM latest platform now served in most industry-proven footprint. On top of adaption to most widely used footprint, Fortimo SLM G7 new footprint covers Super efficacy, premium white color platform. Continuous to unlock the potential of light and make ease of use to our OEM customers.

Features

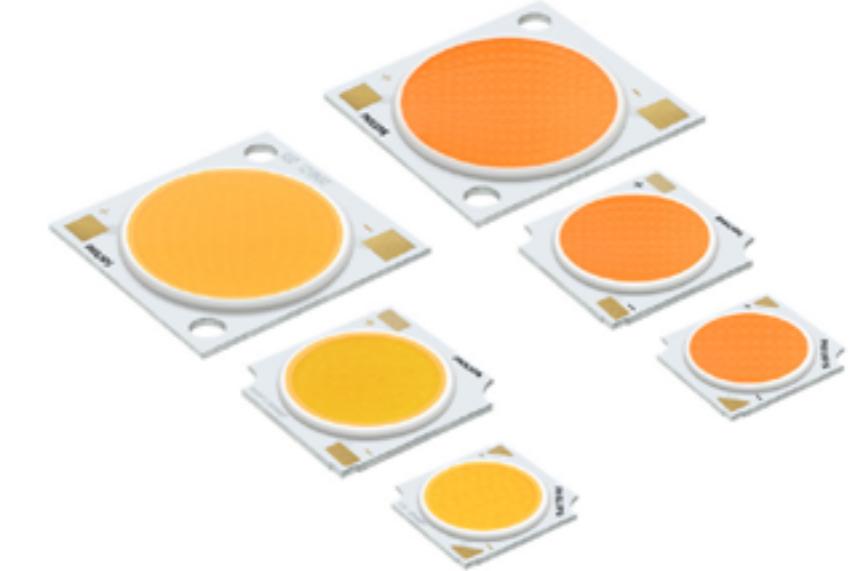

- Most industry-proven footprint
- Standard / Premium White / High Efficacy sub family included
- System Proposition (CoB+Holder+Driver)
- Pre-configured system propositions both in high lm/W and lm/\$
- Large choice of drivers available, including DALI dimming,Xitanium,Certaflux

Benefits

- Best quality of light for all applications
- Flexibility to optimize luminaire performance
- A reliable & flexible system approach
- Philips Standard warranty applies.

Applications

- Retail

Fortimo SLM Food Gen7

The pleasure of a well-stocked and beautifully presented produce department is highly appreciated by the customers and can't be replaced by online sales. Therefore, fresh food area is one of the main reasons for shopper to make a trip to the retail and further set up a loyalty of the shopper to a specific retail. With the new Fortimo SLM Food Gen7 range introduction, we will help our customers create a perfect ambience in food area with an optimized light solution(module) to differentiate from other retailers and enhance loyalty of their customers. The new Fortimo SLM Food Gen7 range extend from previous Meat & Bakery application to Life Sea Food, Iced Sea Food and Fresh Vegetables.

Fortimo SLM Gen7+ High Density

The latest generation of Fortimo LED SLM High Density (G7+) enables higher light output of small CoB sizes. The Fortimo High Density(HD) portfolio is perfect for narrow beam high power applications, but can also be used for miniaturized downlights or spotlight when used with optimized lens optics.

Features

- Improved efficacy up to 8% Vs previous generation
- Extensive ranges of CCTs
- Small LES size for narrow beam angles and small reflector design
- System Proposition (CoB+Holder+Driver)
- Large choice of drivers available, including DALI dimming,Xitanium,Certaflux

Benefits

- Best quality of light for all applications
- Excellent beam control and small reflector design
- Flexibility to optimize luminaire performance
- A reliable & flexible system approach
- Philips Standard warranty applies.

Applications

- Retail
- Hospitality

Fortimo SLM Gen7+ High Density

Compatible LED Drivers

The Fortimo LED SLM portfolio is compatible with multiple Xitanium & Certa LED drivers. For a detailed overview of all available indoor point drivers, pls go to the xitanium indoor point driver section at pages 41-49 or the certa indoor point driver section at pages . To find the best driver module combination for your application, the Easy Design-in Tool is available via philips.com/technology. Below table shows which Xitanium and Certa LED driver window is compatible by default with Fortimo LED SLM.

Fortimo SLM Gen7

Fortimo SLM Gen7 continues to focus on the combination of Quality of Light and , Energy efficacy and miniaturization in a future proof and backwards compatible portfolio. This results in an extensive portfolio of lumen ranges, CCts and spectra. In parallel, +8% efficacy is achieved in average Vs Gen 6. Please also check the online [Easy Design-in Tool](#) for your perfect system combination.

Features

- Broad portfolio in terms of CCT 2700K, 3000K, 3500K, 4000K, 5000K, 5700K & CRI 80, 90 available
- Flexibility to select a different lumen output between 800 and 10000lm
- Small LES size for narrow beam angles and small reflector design
- Separation of CoB and holders to increase reactivity and speed improved understandability of the portfolio
- System Proposition (CoB+Holder+Driver)

Benefits

- Best quality of light for all applications
- Standard/Permium White/ available
- Excellent beam control and small reflector design
- Flexibility to optimize luminaire performance
- A reliable & flexible system approach

Applications

- Retail
- Industry & Outdoor

Fortimo SLM Gen7

Compatible LED Drivers

The Fortimo LED SLM portfolio is compatible with multiple Xitanium & Certa LED drivers. For a detailed overview of all available indoor point drivers, pls go to the xitanium indoor point driver section at pages 41-49 or the certa indoor point driver section at pages . To find the best driver module combination for your application, the Easy Design-in Tool is available via philips.com/technology. Below table shows which Xitanium and Certa LED driver window is compatible by default with Fortimo LED SLM.

Fortimo SLM Holders

Fortimo LED SLM Gen7 CoBs and holders can be ordered separately. This results in even more flexibility and a more extensive product portfolio. Optimized holders are available for spot and downlight applications. For pre-cabled luminaire designs, holders with Poke-in connectors can be ordered. Every holder type is available for every CoB size. CoB compatibility is defined by the CoB size. New Zhaga Poke in holder and 35mm Poke in holder are introduced.

Certaflux SLM Gen 2

CertaFlux LED SLM is a most cost effective and affordable CoB family from Philips. With upgrade from Gen 1 to Gen 2, 8% efficacy improvement is achieved. On top of this, we extend to 2 new product lines within the family - High Density range and Vivid white range, which can help our OEM customers with more flexibility to develop their luminaires with more extensive portfolio. Flux range from 500lm – 5800m, available in 2700K, 3000K, 3500K, 4000K, 5000K with CRI 80 and CRI90, and fully compatible with our Philips Drivers.

Please also check the online [Easy Design-in Tool](#) for your perfect system combination.

Features

- Lumen packages from 500lm to 5800lm
- Broad portfolio in terms of CCT 2700K, 3000K, 3500K, 4000K, 5000K & CRI 80, 90 available
- Up to >140lm/W at 85°C Tc
- Extend with Vivid White as more choices for retail application
- Extend with small LES size to enable compact luminaire design
- Pre-configured system propositions both in high lm/W and lm/\$
- Large choice of drivers available, including DALI dimming
- Philips standard systems warranty applies

Benefits

- Good quality of light for all applications
- Flexibility to optimize luminaire performance
- A reliable & flexible system proposition

Applications

- Retail
- Hospitality
- Office

Compatible LED Drivers

The Fortimo LED SLM portfolio is compatible with multiple Xitanium LED drivers. Xitanium LED drivers are available as a built-in or independent driver, dimmable or with a fixed output. For a detailed overview of all available Xitanium indoor point drivers, please go to the Xitanium indoor point driver section at pages 41-49. To find the best driver module combination for your application, the Easy Design-in Tool is available via philips.com/technology. Below table shows which Xitanium LED driver window is compatible by default with Fortimo LED SLM.

Downlight Modules

Fortimo DLM Flex Gen2

Being the trend setter in high performance LED downlighting with the Fortimo DLM range, Philips introduced the next generation of the Fortimo LED DLM Flex family. Being backwards compatible with the previous generation, Fortimo LED DLM Flex Gen2 enables further optimization of existing as well as new flexible downlight luminair designs.

Features

- Range of 1100 to 5000lm
- Offer includes PCB only version, shallow housing and high housing
- Compatible with both high performance, full flexibility window drivers and high value-for-money CertaDrive drivers
- Backwards compatibility and up to 162lm/W at an improved Tc of 75°C
- Better glare performance vs CoB solutions

Benefits

- Full flexibility and design freedom based on a full portfolio
- Easy design-in based on outstanding efficiencies & high robustness
- High quality of light
- A reliable & flexible system proposition offering peace of mind

Applications

- Offices
- Public buildings
- Hospitality
- Retail

Fortimo DLM Flex Gen2

Compatible LED Drivers

The Fortimo LED DLM portfolio is compatible with multiple Xitanium LED drivers. Xitanium LED drivers are available as a builtin or independent driver, dimmable or with a fixed output. For a detailed overview of all available Xitanium indoor point drivers, please go to the Xitanium indoor point driver section at pages 41-49. To find the best driver module combination for your application, the Easy Design-in Tool is available via philips.com/technology. Below table shows which Xitanium LED driver window is compatible by default with Fortimo LED DLM.

Fortimo DLM Ease Select Gen2

Fortimo DLM EaseSelect is a high performance driver on board (DoB) solution, delivering an excellent quality of light with low flicker. Having an integrated driver and the same mechanical footprint as existing DLM solutions (DLM Flex), enables easy and hassle free design-in. The Fortimo brand promise brings with it the assurance of quality, reliability and performance. **Comparing to Gen1, Fortimo DLM ES Gen2 has improved in Output current ripple (Max 4%)**

Features

- Low flicker (Max 4% for output current Ripple)
- Ease of design – in
- Cost-effective solution
- High system Lm/W of 116 for high end project needs
- Long life-time: 50,000 hours
- Excellent color consistency of 3 SDCM
- Full portfolio with all typical downlight lumen packages (1100 lm, 2000 lm, 3000 lm) and different CCTs (3000K, 4000K)

Benefits

- Excellent cost-performance
- Suitable for compact heat sink designs
- Long lasting
- Covers all downlight applications and ambiance needs
- Simple and easy to maintain

Applications

- Offices
- Public buildings
- Retail

Certaflux DLM Slim

Certaflux DLM Slim module provides a very easy to use solution for downlight application with affordable cost but no sacrifice on light quality. The module is integrated with optical and heatsink which help to make the product extremely easy to use. Optimized diffuser gives uniform light. Whole portfolio is fully compatible with Philips Drivers and with high flexibility in lm/w and \$/W. 6500K is added in the family.

Features

- Provides 600lm/1000lm/2000lm lum package
- Optimized diffuser provides good uniformity
- Up to 130lm/W @ module level
- CRI >80 and good colour stability over lifetime
- Fully compatible with Philips Certa Drivers
- Color temperatures: 3000K, 4000K, 5000K, 6500K

Benefits

- Easy to Use
- Flexible in Flux package with different combination with different drivers
- Good light of Quality

Applications

- Offices
- Public buildings
- Hospitality
- Retail

Linear Drivers

Create the office of the future

Xitanium Programmable SR

Xitanium SR drivers are at the heart of any connected indoor lighting system. These intelligent, SR drivers standardize the connection between driver and sensor, eliminating the need for separate components or modules and ensuring compatibility. Our Xitanium LED linear LED SR drivers not only provide power conversion for LED lighting, but they also feature integrated power supplies and energy metering, enabling users to deliver actionable operational data such as energy consumption. Equally beneficial are the integrated sensor controllers, which provide daylight harvesting and occupancy patterns to a building management system, without the need for additional external components. Collectively they help bring connectivity and expanded functionality to luminaires.

Xitanium Programmable

Xitanium linear Programmable drivers are ideal for professional general lighting applications. The range includes MasterConnect, DALI dimmable and programmable, non-dimmable Simple set (NFC) versions. They offer high efficiency, good quality of light and full flexibility. The new generation of 16mm DALI drivers offer ultimate performance. They comply with the latest DiiA standards, including implementation of the new DALI parts related to data. Configuring the drivers can be done quickly and wirelessly withSimpleSet. The new 21 mm DALI drivers and Simple set G2 offer the best value for money.

Features

- Dimmable and Programmable
- MC drivers can work standalone or with sensor, switch and MC app and is upgradable to cloud solutions (IoT) with a gateway
- Latest DiiA standards, including implementation of standardized memory banks (DALI parts 251, 252 and 253).
- iXt (Industry Extreme) LED-drivers have a Longer life time (100khrs), improved surge and burst (4kV) and Tambient (-40°C to +60°C) specifications

Benefits

- Dali 2.0 enables wired digital controls
- Provides options for different luminaire designs
- Energy saving
- Confortable for the eyes
- Selectable output current enables flexibility and SKU reduction
- Peace of mind with proven reliability

Applications

- Trunking lighting
- Waterproof lighting
- Recessed, surface and suspended linear lighting

Xitanium Adjustable Output Current

Xitanium Adjustable Output Current LED drivers are designed to operate LED solutions for professional general lighting applications. The range includes LEDset and Dip-switch versions, with non-isolated and isolated drivers to support HV and LV linear systems. New Xitanium isolated and non-isolated Dip Switch Linear LED drivers have 4 output currents, offer industry leading performance and reliability at optimized cost. These drivers offer the same level of performance as Xitanium adjustable output current linear drivers to ensure high quality of light. Xitanium drivers have common features such as low ripple output current, adjustable output current by dip switch and 50,000 hours lifetime. They are specifically designed to ensure great EMI performance, high robustness and safe usage.

Features

- Multiple versions: 1-10V dimmable and fixed output
- Adjustable output current via a resistor outside the driver or dip-switch

Benefits

- Provides options for different luminaire designs
- Comfortable for the eyes
- Selectable output current enables flexibility and SKU reduction
- Energy saving
- Peace of mind with proven reliability

Applications

- Trunking lighting
- Waterproof lighting
- Recessed, surface and suspended linear lighting

CertaDrive

CertaDrive LED drivers come with single current output and offer industry leading performance and reliability at optimized cost. New CertaDrive linear driver have an Emergency Lighting function, which means that they can operate normally on DC input voltage. CertaDrive LED panel drivers offering an attractive combination of features and benefits for a wide range of Panel applications for Office, Schools & Hospitals environments. CertaDrive LED panel drivers are designed to fulfill the market need for high quality of light without visual flicker and stroboscopic effects, offering industry leading performance.

Features

- Multiple versions: 1-10V dimmable and fixed output
- Adjustable output current via a resistor outside the driver or dip-switch

Benefits

- Provides options for different luminaire designs
- Comfortable for the eyes
- Energy saving
- Peace of mind with proven reliability

Applications

- Panel lighting
- Trunking lighting
- Waterproof lighting
- Recessed, surface and suspended linear lighting

Linear Modules

Quality of light to brighten up spaces

Fortimo LED strip

One of the key benefits of the Fortimo LED strip portfolio is that once you design it into your systems, you can easily upgrade to high efficiency solutions, FlexTune (tunable white), high flux and HCL solutions. Besides that, the portfolio is extremely wide to cover all your needs in luminaire designs: from 0.5 ft to 5 ft, high voltage or low voltage, a wide range of CCTs in CRI80 and CRI90, connectors on the front or back and different lumen output versions. The CRI90 products are all equipped with our unique high efficient CRI90 technology, closing the lm/W gap to CRI80 to a minimum.

Fortimo LED strip

One of the key benefits of the Fortimo LED strip portfolio is that once you design it into your systems, you can easily upgrade to high efficiency solutions, FlexTune (tunable white), high flux and HCL solutions. Besides that, the portfolio is extremely wide to cover all your needs in luminaire designs: from 0.5 ft to 5 ft, high voltage or low voltage, a wide range of CCTs in CRI80 and CRI90, connectors on the front or back and different lumen output versions. The CRI90 products are all equipped with our unique high efficient CRI90 technology, closing the lm/W gap to CRI80 to a minimum.

Module driver compatibility

The Fortimo LED linear portfolio is compatible with multiple Xitanium LED drivers. Xitanium window drivers offer the freedom to adjust current settings and to differentiate in terms of lumen output, efficacy and lifetime. The corresponding linear Xitanium driver portfolio includes isolated and non-isolated drivers, in fixed light output, 1-10 V and DALI versions.

Fortimo LED strip CES

More applications require the use of human centric lighting elements (HCL). One of those elements is to improve people's circadian rhythm by using a different spectrum of light. With the Fortimo LED strip CES (Cyan Enhanced Static) we create a specific spectrum to achieve the highest MDER at a regular light level of 500 lux. This is done in a static 4000 K solution with CRI80. The product is based on the Fortimo LED strip platform, which makes luminaires designed with the standard Fortimo LED strip gen 5 easily upgradable to a HCL solution. The Fortimo LED strip CES is perfectly suitable when conditions ask from high MDER solutions (e.g. WELL Building certification).

Fortimo LED strip FlexTune

The Fortimo LED strip FlexTune modules in system combination with the Xitanium FlexTune driver can build high performing and unique tunable white lighting systems. The drivers and modules are designed together to be a perfect match and together provide great specifications and ease of use. The Fortimo LED strip FlexTune modules are available in two versions: The ST version has a unique 2-in-1 LED, which does the CCT mixing inside the LED. Therefore, all LEDs on the module always have the same CCT. The PR version is based on the traditional tunable white concept of two individual LEDs (2700 K and 6500 K) and combined they tune the module's CCT. This version is equipped with our high efficiency CRI90 technology.

Fortimo LED strip BioUp CED

A new concept to our HCL range: BioUp Cyan Enhanced Dynamic. Now integrated in our Fortimo LED Strip platform, BioUp CED is designed to work together with our Xitanium FlexTune drivers. The system provides a correlated color temperature (CCT) tunable module (from 2700 K to 5000 K) with enhanced melanopic-DER (up to 0.95 at 5000 K).

Fortimo Edge lit BioUp CED

The Fortimo LED square CED BioUp is combining the best of two worlds: a high MDER light spectrum and a tunable white solution. The modules are tunable from 2700 K to 5000 K are designed as such so they perfectly match our Xitanium FlexTune drivers. This enables an easy design-in for a tunable CCT solution with a high MDER. The MDER value at 5000 K is 0.95 which helps to achieve WELL Building certification. Based on the square platform it's a perfect module to be used in regular office luminaires.

Fortimo LED-R

The Fortimo LED-R modules are designed together with BJB's OptiLine Louvres. Together they make a high efficient and low-glare lighting solution. The system is extremely easy to install due to the one-click-fixation system which enables screw-less installation, even for high voltage applications. The Fortimo LED-R modules are available in a full range serving all different needs from different application. There are standard CRI80 modules, CRI90 High Efficiency versions, FlexTune tunable white and BioUp Cyan Enhanced Dynamic versions. Basically covering all the needs for office, retail and hospitality applications.

Module driver compatibility

The Fortimo LED linear portfolio is compatible with multiple Xitanium LED drivers. Xitanium window drivers offer the freedom to adjust current settings and to differentiate in terms of lumen output, efficacy and lifetime. The corresponding linear Xitanium driver portfolio includes isolated and non-isolated drivers, in fixed light output, 1-10 V and DALI versions.

Fortimo LED panel

The Fortimo LED panels are designed for office applications and the range consists of different dimensions for different ceiling sizes. With their ultra-slim design, they can be installed easily. The panels are office compliant and have a long lifetime. Use these panels in combination with Xitanium drivers for the best performance.

CertaFlux LED strip 12

CertaFlux LED strip 12 is a small linear LED strip of only 12mm wide and available in 1 ft, 2 ft, 4 ft and 5 ft. Without compromising lifetime, the CertaFlux LED strip 12 has a good lm/W performance and is very accessible. Perfect for combining with CertaDrive or Xitanium single current drivers and fitted for waterproof or batten applications.

Module driver compatibility

CertaDrive LED drivers are designed to fulfill the market need for essential lighting. The CertaDrive LED drivers offer basic specifications such as specific current and voltage settings, optimized for operating CertaFlux LED modules.

CertaFlux LED panel gen 2

CertaFlux LED gen 2 side-lit panels are ideal for general lighting applications where a good, even light surface is needed. There are versions that can comply to UGR <19 and versions for UGR <22. The range includes different dimensions to match the ceiling of your application. This CertaFlux solution is a reliable product with specifications that are good enough to ensure we can provide you with an attractive product that easily complements your portfolio. The panels are a good match with CertaDrive drivers.

LED Transformer

LED Transformer Dali

Philips DALI LED Transformers are designed to driver 24VDC LED strips. It can control though either via the digital DALI protocol or via TD dim. Those LED transformers are specifically designed to ensure the highest performance with maximum robustness combined with a long lifetime.

Features

- 1%-100% Dali 2 and TD dimming
- Independent use for class II application
- 50,000 hours lifetime

Benefits

- Energy savings through Dali control and high efficiency
- Easy to design-in and install
- High reliability underpinned by 5 years warranty

Applications

- Linear accent lighting
- Façade accent lighting
- Shelf/Cove lighting

Product specifications

Product type	Product code	Nominal voltage	Dimensions HxWxL	Nominal output voltage	Nominal output power	IP rated	Dimming	Lifetime

Xitanium LED Transformer 1-10V

Philips 1-10V LED Transformers are designed to driver 24VDC LED strips. It can control through 1-10V dimming with dim to off features. Those LED transformers are specifically designed to ensure the highest performance with maximum robustness combined with a long lifetime.

Features

- 1% to 100% 1-10V dimming with dim to off
- Super slim design, 16mm to 22mm height
- Independent use for class I/II application
- 50,000 hours lifetime

Benefits

- Energy savings through 1-10V dimming and high efficiency
- Easy to design-in and install
- High reliability underpinned by 5 years warranty

Applications

- Linear accent lighting
- Façade accent lighting
- Shelf/Cove lighting

Standard LED Transformer

Philips standard LED Transformers are designed to drive non-dimmable 24VDC LED strips, which are specifically designed to ensure the highest performance with maximum robustness combined with 50,000 hours lifetime.

Features

- Global approbations and certifications
- Independent use for class I/II application
- 50,000 hours lifetime

Benefits

- Suitable for global markets
- Easy to design-in and install
- High reliability underpinned by 5 years warranty

Applications

- Linear accent lighting
- Façade accent lighting
- Shelf/Cove lighting

CertaDrive LED Transformer G2

Philips CertaDrive LED Transformers are designed to drive non-dimmable 24VDC LED strips, which are specifically designed to ensure the highest performance with maximum robustness combined with 30,000 hours lifetime.

Features

- Class II application
- Built in and independent
- Open Load/Short-circuit/Overpower Protection
- 10% output power at minimal operation range (excluding: 30W)
- 30,000 hours lifetime

Benefits

- Provides options for different luminaire designs
- Great EMI performance for easy design-in
- Guaranteed reliable operations
- Wide output range enables flexibility
- Peace of mind with proven reliability

Applications

- Linear accent lighting
- Façade accent lighting
- Shelf/Cove lighting

Economic LED Transformer

Philips CertaDrive LED Transformers are designed to drive non-dimmable 24VDC LED strips, which are specifically designed to ensure the highest performance with maximum robustness combined with 20,000 hours lifetime.

Features

- IEC approbations and certifications
- Suitable for class I/II application
- 20,000 hours lifetime

Benefits

- Suitable for IEC markets
- Easy to design-in and install
- Reliability underpinned by 2 years warranty

Applications

- Linear accent lighting
- Façade accent lighting
- Shelf/Cove lighting

LED Flex

Fortimo LEDFlex Continous

The new Fortimo LEDFlex Continous Gen1 is designed for built-in applications to deliver continous display lighting without any visible dots in shelf lighting, cove lighting and various decorative lighting applications including ceiling integration and accent lighting. With mainstream flux levels (500lm/m- 2000lm/m) as well as various Color temperatures, Tunable White and RGBW, the new CertaFlux LEDFlex family can meet different application requirements and brings maximum design flexibility. Together with PhilipConstant Voltage drivers and easy to use accessories, we offer a reliable system to our OEM customers to unlock the full potential of stylish lighting designs.

Features

- Chip on Board Technology applied
- Flux ranges covers 500lm/m 1000lm/m with 2700K 3000K 3500K 4000K and 6500K with CRI90
- Cuttable length with 4.5cm
- Two connetors - PCB-PCB and PCB-wire connectors
- System approach

Benefits

- Continous light output without dottish
- Extensive portfolio for different application
- Short cuttable length enables easily design
- Easy to use
- Reliable and Robust

Fortimo LEDFlex

Fortimo LEDFlex system Gen1

The Fortimo LEDFlex is designed for built-in applications to provide a sleek look and feel in stores for the ultimate shopping experience. Fortimo LEDFlex combines an optimized color spectrum for enhanced white performance and astonishingly lively rich colors to deliver an outstanding shopping experience. Create the ultimate look and feel for your store in combination with Philips premium white spotlighting solutions. What's more, Fortimo LEDFlex offers state-of-art efficacy up to 152 lm/W for low energy consumption, and the 50,000 hours lifetime offers peace of mind and lower maintenance costs. Fortimo LEDFlex provides high design freedom through cut options every 5 and 10 cms, and plug and play simplicity thanks to Fortimo LEDFlex accessories for no-tool handling and connection. Mounting is made simple, reliable and robust thanks to the best self-adhesive 3M tape, providing a sturdy mount to any surface.

Features

- Superior light quality featuring an optimized color spectrum for enhanced white performance and astonishing lively rich colors
- High efficacy Up to 152 lm/W with CRI >80 and 132 lm/W with CRI>90
- Extensive Range of lumen output, color temperatures and accessories
- High design freedom by cut-options every 5 cm and 10 cm
- System solution in combination with Philips 24V Constant voltage drivers with 5 year warranty

Benefits

- The best quality with an excellent performance
- Maximum design flexibility
- True system proposition

- Extensive Range of lumen output, color temperatures and accessories
- High design freedom by cut-options every 5 cm and 10 cm
- System solution in combination with Philips 24V Constant voltage drivers with 5 year warranty

Benefits

- The best quality with an excellent performance
- Maximum design flexibility
- True system proposition

Fortimo LEDFlex 50 m C5 Gen1

Certaflux LEDFlex Gen1

The CertaFlux LEDFlex Gen1 are dedicated designed for built-in applications for retail display lighting applications such as shelf lighting, and various decorative lighting applications such as cove lighting, ceiling integration, accent lighting. With mainstream flux level (500lm/m-2000lm/m) as well as various Color temperature, Tunable White and RGBW, the new CertaFlux LEDFlex family can meet different application requirements and maximum the design flexibility. Together with Philips constant voltage driver and easy to use accessories, we offer a reliable system to our OEM customers to unlock the full potential of stylish lighting designs.

Features

- Flux ranges covers 500lm/m 1000lm/m 1500lm/m 2000lm/m with efficacy up to 110lm/W
- Available in 2400K 2700K 3000KPW 3500KPW 4000KPW and 6500K with CRI90
- Premium White color, tunable White and RGB (WW/CW) included
- Short cuttable length
- Two connectors - PCB-PCB and PCB-wire connectors

Benefits

- Extensive portfolio for different application
- Easy to design
- Easy to use
- Reliable and Robust
- System approach

LEDFlex & SLM COB Color-matching Table

With more and more creative light applications emerging everywhere, the demand of flexible light solutions keeps on growing.

With the continuous improvement of LED efficacy, Constant Voltage light solutions keep on expanding into new areas, from ambient lighting, cove lighting to general lighting.

Among them, one of the key segmentations is retail lighting, for which the color consistency between LEDFlex and Tracklight becomes crucial.

We offer both LEDFlex and SLM COB which deliver one look-and-feel lighting solutions in stores for a supreme shopping experience.

Portfolio color matching tables below give a clear overview of matching colors between different lighting technologies.

Real pros choose

new connections for new opportunities.

**Take the first step into connected lighting
with Philips MasterConnect LEDlamps.**

Philips MasterConnect LEDlamps.

Big news for businesses that want to switch to connected lighting.

Who says you have to spend a lot of money to have smart lighting? Take your first step with Philips MasterConnect LEDlamps: smart retrofit LED lamps that give you an easy and seamless way to upgrade and embrace all benefits of connected lighting.

Thanks to the proven wireless connected technology, MasterConnect LEDlamps maximize energy savings, while providing wireless and automated light for your comfort and convenience.

Simply set up with an intuitive app (such as the Interact or Philips MasterConnect app), your lighting system can be programmed to deliver automated occupancy and daylight detection, zone control, wireless dimming, and scenes. Once the basics are defined, it just works automatically, allowing for an 'install and forget' experience.

With MasterConnect LEDlamps, your system is fully scalable and upgradable. If you want to enjoy further benefits such as remote control or management dashboard, you can simply keep the currently installed lamps and add a gateway to experience all the advantages of a cloud-based system.

There's no better way to take lighting solutions to the next level.

Philips MasterConnect LEDlamps

MasterConnect LEDtube

- Retrofit to T8 lamps on EM ballast or mains
- Safe and hassle-free installation
- 55% energy savings compared with fluorescent lamps
- Extra-long lifetime of 60,000 hrs
- Perfect for office, school, retail, healthcare, parking and warehouse

MasterConnect LEDspot

- Perfect fit design to retrofit halogen lamps
- 90% energy savings compared with halogen lamps
- Color spectrum that replicates halogen, CRI 90
- Lifetime of up to 25,000 hrs
- Perfect for hospitality, restaurant and retail

Add switches for wireless lighting

- Wireless dimming and scenes
- No control wires for cost effective installation

Add sensors for automated lighting

- Automated lighting through occupancy detection
- Daylight harvesting

Add a gateway for connected lighting

- Preventive maintenance of light
- Remote and personal control of lighting
- Management dashboard

Tap the full potential of energy savings

Wireless dimming: **10-15%**

Occupancy sensing: **10-40%**

Daylight harvesting: **20-40%**

Total solution: **Up to 80%**

*Savings based on published articles and Signify internal study. Total solution means utilizing all available control strategies such as occupancy sensing, daylight harvesting, high-end trim, scheduling, personal control, demand response etc. All savings are compared with non-controlled LED lighting system. Actual savings may vary depending on the application and usage.

MasterConnect LEDtube – lighting possibilities

Occupancy sensor

Occupancy and daylight sensor

4-button switch

IP65 sensor

Meeting rooms

Optimize energy savings by automatically switching on/off the light when entering/leaving the room.

Classrooms

Optimize comfort by adjusting the light level to the amount of natural light in the room.

Conference rooms

Group the lamps and adjust the level of light depending on the activity (e.g. presentation mode, focus time)

Storage/parking garages

Maximize energy savings by automatically boosting or dimming the lights depending on presence in the area.

MasterConnect LEDspot – lighting possibilities

Meeting rooms

Group the lamps and optimize lighting for various tasks. Adjust natural/artificial light level in a balanced way.

Occupancy and daylight sensor

4-button switch

4-button switch

Simple. Scalable. Standardized.

Discover how Philips MasterConnect LEDlamps are a win-win for you and your customers.

Truly easy installation

- ✓ Wireless retrofits – minimum renovation
- ✓ No additional wiring and gateway needed
- ✓ Intuitive mobile app set up – ‘install and forget’

More convenient than ever before

- ✓ Lighting automation enhances comfort
- ✓ Wireless dimming
- ✓ Easily set up scenes

Reliable quality

- ✓ Wide selection of high-quality LED lamps
- ✓ Minimal maintenance thanks to guaranteed product lifetime and system reliability

Improved energy savings

- ✓ Various lighting control strategies available to improve energy efficiency and maximize savings

Future-proof solution

- ✓ Become a trusted advisor and set up service contracts for recurring business

Grow your business, grow your light

- ✓ Upgradable to a cloud-based solution without reinvesting in hardware

LED Spot

Master LED MR16 ExpertColor

Master ExpertColor LED MR16 creates a warm and comfortable ambience for hospitality venues, homes and restaurants. It creates such an ambience with superior lighting that has a customized spectrum, high CRI, and deep dimming feature.

The result? A beautiful lighting experience. The innovative, trimless lens design will also suit almost any interior decor with its clean and neat look. The Master ExpertColor LED MR16 is well designed and robust, offering a variety of beam angles to manage a clearly defined beam spread suitable across various applications. There is no UV or IR in the beam, making it suitable for illuminating heat-sensitive objects (food, organic materials, paintings, etc.). The patented intelligent driver enables broad compatibility with existing electromagnetic and electronic halogen transformers.

Applications: Hospitality: hotel guest room, corridors, lobby, reception area, restaurants, bars, cafes; Home: living room, bedrooms, hall Way; Retail: exhibitions, display cabinets, shops, dressing rooms; Perfect for hospitality suites and guest room requiring adjustable settings

Features

- Customized color spectrum replicates halogen light color
- Deep and smooth dimming
- Best-in-class color realization, CRI97
- Innovative, trimless design with V-groove lens
- Lifetime of 40,000 hours

Benefits

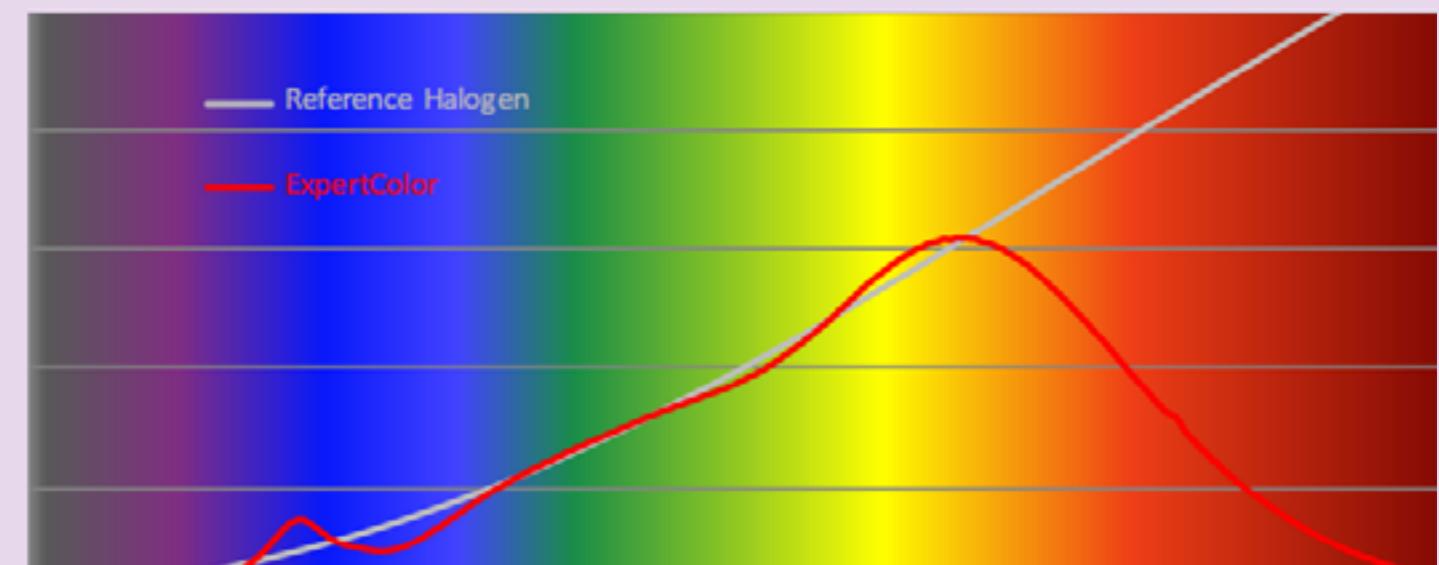

- Furnishings and fabrics look great
- Creates integrated look with minimal design to suit every application
- Efficient and sustainable, up to 85% energy savings compared to halogen lamp
- Broad compatibility with transformers
- Hassle-free retrofit solution, Retrofits into vast majority of GU5.3 based fixtures & EZ10 based fixtures

Experience perfect color with our new LED technology

The ExpertColor technology offers superb light quality with **halogen-like color realization**. The advanced phosphor technology provides high color fidelity, with **a color rendering index of 97**, and high color saturation (**close to 100%**) with great rendering of reds (**R9 >85**). So you can bring out the true colors in furnishings and interior decors to add even more appeal.

MASTER LED MR16 ExpertColor features an optimized light spectrum to create a warm ambience

ExpertColor replicates halogen light color. ExpertColor offers 93.9% close to halogen light color, standard LED offers around 60%.

Master LED MR16

Delivering intense accent beam, MASTER LED MR16 is an ideal retrofit solution for spot light. Thanks to its high CRI, it realize more natural colors, enabling cozy and comfortable ambience for residential, hospitality and emphasize the beauty of merchandise in retail. MASTER LED MR16 is compatible with most existing fixtures with a MR16 GU 5.3 holder and designed as a retrofit replacement for halogen or incandescent spots. Not only it employ Philips' patented solution to guarantee the broadest possible compatibility with standard 12V halogen electronic transformers, it also delivers high beam intensity which equivalent to halogen MR16 spots. The dimming function enables to create the desired atmosphere and it works with broad selection of dimmers. MASTER LED MR16 delivers huge energy savings and minimizes maintenance cost without any compromise on brightness, enabling residential owners and business owners to achieve a return on their investment within short period time with its efficiency energy use and long life time. There is no UV or IR in the beam, making it suitable for illuminating heat-sensitive objects (food, organic materials, paintings, etc.).

Applications: Ideal for accent lighting in hotels, hospitals, shops and museums (e.g. floors, elevators, displays); Dimmable versions are perfect for hospitality suites and guest rooms requiring adjustable settings

Features

- Dimmable (6.5W and 7.5W versions)
- Patented intelligent driver
- Air movement mechanism
- Lifetime of 25,000-40,000 hours
- CRI80-90

Benefits

- High intensity of beam equivalent to halogen spots
- Better color realization with high CRI value
- Clearly defined beam spread for accent lighting
- Compatible with an extensive range of transformers and smooth dimming for dimmable products
- Can be retrofitted with low-voltage MR16 halogen lamps with GU5.3 sockets

High Lumen MR16

Philips high lumen LED MR16 brings out the true beauty of the merchandise by intense light with small form factor. It provides the right light to emphasize the merchandise and create bright and refreshing shopping environment. Not only its superior light quality, its innovative, trim-less V-groove lens will suit any kind of store interior without creating techy look. It is a hasslefree retrofit solution. It fits most of luminaires to make re-lamping and renovation projects as easy as possible.

Applications: Retail stores: Fashion retail, Cosmetics retail, Jewelry; Store's display area. Window display area, dressing; Rooms; Museum: display area for artworks; Exhibition

Features

- High lumen output
- Strong punch effect in light beam
- Trimless design with V-groove lens
- High efficiency with 50,000 hr lifetime
- No UV and Cool Beam(no IR)

Benefits

- Emphasize merchandise display with strong intensive light
- Trimless design enables integrated look with luminaires to suit any kind of store interior style
- Strong performance of color realization and light effect stays over time
- Working with dimmable LED driver to enable dimmability
- Hassle free retrofit solution with GU5.3 luminaires

Master GU10

Essential GU10

MASTER LEDspot ExpertColor AR111

MASTER LEDspot LV ExpertColor creates a warm and comfortable ambience for hospitality venues, homes and restaurants. It creates such an ambience with superior lighting that has a customized spectrum, high CRI, and deep dimming feature. The results a beautiful lighting experience. What's more, the innovative, trimless lens design will suit almost any interior decor with its clean and neat look.

Features

- Customized color spectrum replicates halogen light color
- Trimless design with beautiful V-groove lens
- Best-in-class color realization CRI97
- Deep and smooth dimming with broad transformer compatibility
- Retrofittable with G53 luminaires

Benefits

- Create warm and comfortable ambience
- Hassle-free retrofit solution for greater energy efficiency and sustainability
- Interior decor, furnishings and fabrics look great

Master LED PAR & Essential LED PAR

With its robust design and warm-white beam of light, these new-generation PAR lamps are ideal for general lighting and spot lighting in the hospitality industry. Dimmable and non-dimmable models are available for your careful selection to meet various application needs. They are especially suitable for public areas such as lobbies, corridors, stairwells, where the light is always on. Compatible with existing fixtures with an E27 holder and designed for retrofit replacement of halogen or incandescent lamps.

Philips Master LEDspot PAR brings you huge energy savings while minimizing maintenance costs without any reduction in brightness.

Applications: Retail, Hospitality

Features

- Lifetime of 15,000 to 25,000 hours
- Dim & Non Dimmable
- UV and IR-free, ideal for lighting heat-sensitive objects
- Free of mercury and hazardous materials

Benefits

- Up to 80% energy savings compared to halogen lamp
- Easy retrofit and compatible with existing fixtures with E27 holder
- Lower maintenance costs

High Lumen PAR30L

Philips 220-240V High Lumen PAR30L integrates a leading COB LED light source and a compact high efficiency driver into a traditional CDM PAR30L form-factor. It brings out the beauty in merchandise with brighter, high performance lighting.

Applications: Retail, Hospitality

Features

- Lifetime 25,000 hours (B50, L70)
- Emits virtually no heat and will not fade colors
- Discharges virtually no UV/IR light
- Environmental friendly, RoHS compliant, contains no Mercury or other hazardous substances

Benefits

- Up to 54% energy savings compared to standard CDM lamps
- Lower initial investment for LED CDM replacement PAR30
- Easy retrofit and compatible with existing fixtures with E27 holder
- High efficiency solution >100lm/W
- Safe design with over temperature protection (OTP)

LED Capsules

The LED capsules deliver a high quality light to make themselves to be a true replacement of halogen Capsule lamp. It is particularly suit for task lighting in hotel and restaurants, and ideal for decorative and ambient application. LED capsule products deliver huge energy saving and minimize maintenance costs, without any compromise on light quality.

Applications: Retail (exhibitions, display cabinets); Hospitality/ Museums (reception areas); Residential

Features

- Easy retrofit
- Lifetime of 10,000- 15,000 hours
- UV- and IR-free light
- Free of mercury and hazardous materials - RoHS compliant

Benefits

- Up to 90% energy saving compared with halogen lamps
- Lower maintenance costs
- Broad compatibility with transformers

LED Tube

MASTER LEDtube T8

The Philips MASTER LEDtube cleverly integrates LED light sources into a traditional fluorescent form factor. Its unique design creates a perfectly familiar and uniform visual appearance which cannot be distinguished from its traditional fluorescent equivalent. For volume usage, and wide-scale applications, the MASTER LEDtube is great value-for-money, actualizing your projects within limited budgets and easy re-lamping works can be done to achieve better light effects and lifetime.

Features

- Fit-and-forget LED tube, a direct replacement for T8 fluorescent tube
- Energy consumption >50% lower than fluorescent tubes
- Lifetime up to 100,000hours: up to 5 times longer than fluorescent lamps
- Full safety features and EM Protector safety device; completely safe installation process
- No mercury

Benefits

- Reduced operational costs due to lower need for maintenance
- Energy savings and a long life time
- Fastest and easiest way to upgrade existing luminaire to LED technology without a need for re-wiring
- Comfort to the eye, and minimal heat

Applications

- Retail, industry, offices, schools, hospitals,
- Indoor public spaces, parking lots, covered car parks,
- Warehouses, coldrooms, signages, transport and distribution areas

CorePro LEDtube T8

Philips CorePro LEDtube is an affordable LED tube suitable for T8 fluorescent replacements. The product delivers a natural lighting effect that is needed across a wide range of general lighting applications. It also brings instant energy savings and cost savings, when applied to projects of substantial scale, making this a much more environmentally-friendly and superior solution to replace fluorescents.

Features

- Affordable LED replacement for T8 fluorescent tubes
- Energy consumption >50% lower than fluorescent tubes
- 30,000 hours lifetime, twice the length of normal fluorescents
- No mercury

Benefits

- Reduced electricity costs thanks to significant energy savings
- Longer lifetime equates to reduced maintenance costs
- A better choice for the environment
- Comfort to the eye, and minimal heat

Applications

- Retail, offices
- Industry, warehouses,
- Public places, schools, hospitals, car parks

CorePro LEDtube T5 Mains

Philips CorePro LEDtube T5 is a reliable value-for-money LED lamp out of Philips Lighting portfolio, incorporated with frontier LED chips and other advanced technologies. The product helps customers to achieve up to 50% energy savings and significant maintenance cost reduction by comparing to fluorescent lamps. It also helps generate natural and comfortable lighting effect, and to build up green and environmental friendly image for our customers.

Features

- Protection circuit inside ensuring people's safety in case of misuse, complying with IEC safety requirements
- Advanced optical design ensures a uniform light output and superior optical efficiency

Benefits

- Reliable operation between -20°C to 45°C ambient temperature
- 50,000 switching cycles
- Energy savings up to 40%

Applications

- Retail, offices
- Industry, warehouses,
- Public places, schools, hospitals, car parks

Master LED SON-T

Philips Master LED SON-T road lamps offer an easy and short payback LED solution to replace High Intensity Discharge (HID) lamps. The products bring the energy efficiency and long lifetime benefits of LED to HID replacement and provide instant saving and low initial investment. With the right lamp size and light distribution, you can easily retrofit TrueForce LED road lamps into the existing systems without changing the luminaire's ballast or reflector while enhancing the lighting quality.

Features

- High energy efficiency
- Lifetime 50,000hrs
- Right lamp size and lighting distribution for direct retrofit
- Direct LED replacement solution without changing the luminaire
- Pleasant white light with CRI 70

Benefits

- Cost saving with short payback time
- Low initial investment
- Enhance lighting quality with easy adoption

Applications

- Public urban streets, parks, squares
- Public road, area, streets

TrueForce Core LED Road SON-T

The new Philips TrueForce Core LED can fit into the standard E27/E40 fixture and replicate a similar light effect to conventional street lighting. Philips TrueForce Core LED Road reduces the time needed to maintain, replace and fit each street light, including the knock-on time required for road closures. In addition, its longer lifespan of more than five years plus energy savings of up to 63% compared to conventional HID help save on running costs.

Features

- Omni-directional light source compatible with the original reector and generate similar bat-wing light distribution
- High energy efficiency up to 187lm/W
- Pleasant white light with CRI 70

Benefits

- Energy saving up to 63%
- Easy to install, retrofit EM/mains solution, save installation cost
- Lower maintenance cost, 25000 hrs lifetime

Application

- Outdoor street lighting

TrueForce LED Public

Philips TrueForce LED Public lamps provide an easy LED solution with a fast payback to replace High-Intensity Discharge (HID) lamps. These lamps bring the energy efficiency and long lifetime benefits of LED to HID replacement, with a low initial investment delivering instant savings. With the right lamp size and light distribution, customers can easily retrofit TrueForce LED lamps into their existing system, thereby enhancing the light quality without having to change the fixtures or sacrifice the light effect.

Features

- High energy efficiency
- Long lifetime 50,000hrs
- Same/right lamp size and lighting distribution for direct retrofit
- 2 beam angles selection
- Pleasant white light with CRI 80

Benefits

- Cost saving with short payback time
- Low initial investment
- Enhance lighting quality with easy adoption

Application

- Public urban - streets, parks, squares;
- Public road/area -streets, area

TrueForce Core LED HPI

The new Philips Trueforce Core LED HPL lamps offer you an easy, short-payback LED solution to replace High Intensity Discharge (HID) lamps. This new generation of products brings all the energy-efficiency and long-lifetime benefits of LED to HID replacement, while providing instant saving with a low initial investment. Furthermore, they're designed to have the same lamp size and light distribution as other HID lamps, so you will never know the difference. All thanks to our High-Power LED filament technology. Plus, its unique IP65 design means it can be used for outdoor applications as well as indoors.

Features

- High-power LED filament technology
- Frosted glass finish, uniform light distribution
- Compact size
- IP65 design
- 2KV surge protection

Benefits

- Similar look & feel as conventional HID SON/HPL lamps
- Perfect fit in HID luminaires on existing EM ballast or mains connection
- IP65 design suitable for indoor and outdoor applications

TrueForce LED Highbay

Philips TrueForce LED Industrial and Retail (Highbay – HPI/SON/HPL) lamps give you a quick and easy payback solution to replace HID lamps in Highbay application. The solution gives you the LED benefits of energy-efficiency and long-lifetime, plus they come for a low initial investment. Lamp design allows retrofit HID lamps with TrueForce LED lamps with no gear loss and high power factor. Multiple beam angle options and high colour rendering index enhance the lighting distribution while creating a comfortable, safe and high productivity environment.

Features

- High energy efficiency with directional light and no gear loss
- Long lifetime 25,000hrs
- Direct lamp replacement solution with high power factor
- 2 beam angles selection
- Pleasant white light with CRI 80

Benefits

- Cost saving with quick payback
- Easy adoption
- Low initial investment

LED candles and lusters

MASTER LED Candles and Lusters

Featuring a classic heritage design, Classic filament LED Lamps combine the familiar shapes of incandescent candles and lusters with the benefits of the long-lasting LED technology. It is an idea product to provide customers with cozy atmosphere. The MASTER LED candles and lusters can be dimmed for different lumen level and also for the different color temperature. MASTER Glass Led Bulbs deliver significant energy savings, offering even 30% more compared to normal LED and provides excellent quality of light. By offering a lifetime of 25,000 hours it reduces maintenance costs.

Features

- Heritage design with classic shapes
- Very good light quality with super high color rendering (CRI>95)
- Environmentally friendly: contains no mercury or other hazardous substances
- Designed to be seen, they look good on and off

Benefits

- Energy saving, 30% less energy compared with standard Philips LED candle and luster
- Very long lifetime that reduces the need for replacement
- Easy replacement of conventional lamps

Application

- Domestic application
- Hospitality: restaurants and hotels

LED Bulb

MyCare LED Bulb

Our Philips signature entry-level LED bulb provides an instant-on, retrofit lighting solution, perfect for use in large volumes across multiple application areas. It delivers energy savings, reduces the need for regular bulb replacement, without compromising on the quality of your warm or white light. Available in E27 lamp base, and two color temperatures. Comfortable to the eye with minimal glare.

Applications: Shops, Hotels, Restaurants, Bars, Cafés, Galleries, Museums, Exhibitions, Lobbies, Corridors, Stairwells, Wash rooms, Reception areas

Features

- Instant start
- Simple replacement with existing sockets and fixtures
- Manufactured without any hazardous materials, making them a safe and sustainable choice
- Interlaced optic
- CRI90

Benefits

- Minimal heat, and comfort to the eye
- No UV and IR, safe for fabric and light sensitive materials
- Easy retrofit
- Long lifetime of up to 15 years, reducing the need for maintenance

MyCare LEDStick

MyCare LEDStick deliver high quality light in a compact design ideal for downlights and slim luminaire applications. The compact and bright light makes it ideal for general lighting applications in the retail and hospitality industry by offering their guests a differentiating ambiance and unique experience in public areas.

Applications: Elite shops, Corridors, Stairways, Washrooms, Lobby, Reception areas, Hotel rooms, Bars, Home

Features

- All around illumination
- Up to 70% less glare*
- No visible flickering
- Eye safety of lamps compliance**

Benefits

- Over 85% energy saving
- Last up to 15 years
- Low Carbon Footprint
- Environmental friendly, no Mercury

Philips LEDstick

* Comparing the bulb surface brightness between Philips LEDstick and CFLi Genie.

** Compliance with IEC62471 photobiological safety of lamps and lamps systems.

Scene Switch LED Bulb

The Scene Switch bulb is a revolutionary bulb that truly surprises by giving out not one but two color temperatures within a single E27 bulb form. It allows spaces to be personalized for ease and comfort by using the existing wall switch with no need of re-wiring, to simply toggle the light color from warm white at 3000K to cool daylight at 6500K at your finger tips. The result is a uniformly lit bulb that delivers glare-free light that is easy on the eyes. A hassle-free retrofit that turns on instantly, adding flexibility and more value to any luminaire with an E27 base.

Applications: Homes, Offices and Cafés, Hotel guest rooms, Spa, Modern or classical luminaires, Wall sconces, open fixtures

Features

- Retrofit bulb with an E27 base
- 806 lumen, CCT 3000K/6500K
- CRI 80
- Lifetime 15000 hours

Benefits

- Warm white and cool day light, switchable instantly
- Unique bulb shape that gives light all around
- No hazardous material
- Versatile for all spaces

High Lumen LED Bulb

High Lumen LED Bulb in indoor application, even designed for a wide range of applications including damp areas. Under 220-240V, the product can deliver the best performance. And even under 90V, the bulb can be lit up, which makes it work in some unstable line voltage. LEDbulb offers up to 89% energy saving when replacing GLS and 50% when replacing a CFLi. It also has a longer lifetime of 15,000 hours (equivalent to 15 years if lit 2.7 hours per day across 365 days) conditions.

Applications: Logic center, Factor, Car parking, Convenience store, Public space, Garden lighting, Wet market

Features

- Form factor is designed as a direct retrofit into high lumen LED bulbs at A75, A95, A110 and A125 shapes
- Rugged plastic design

Benefits

- Long lifetime of 15,000 hours (F50L70)
- Up to 89% energy savings when replacing a GLS (50% when replacing a CFLi)
- Lit up under 90V line voltage. And best performance is delivered under 220V-240V
- Designed for a wide range of applications including damp areas

Retail Display Lighting

Lighting products, brightening faces

CertaFlux RDL

Philips CertaFlux RDL LED system gen 1

Discount and price-fighter retail chains focus on costs. They leverage purchasing power to deliver value, and the customer expects affordable prices and a functional shopping experience. The lighting must support this image, which is where our CertaFlux RDL portfolio comes in. It has established itself as an energy-efficient way to deliver the quality of light this cost-sensitive retail sector is looking for, especially in cooler and shelf applications.

The CertaFlux RDL portfolio is optimized for standard applications lengths with options for main cooler applications. A carefully selected range of accessories is also available including glare shields, mounting clips and cables.

The quality of light and performance are everything a retail discounter needs. With a CRI of >80 and a lumen efficacy up to 120 lm/W, CertaFlux RDL illuminates products with a uniform, attractive light. What's more, the LEDs have minimal output.

InteGrade S

Philips InteGrade S LED system gen 1

InteGrade S is a symmetric modular platform offering quality of light and performance that retail stores need for serve-over counters. With a CRI of >95 and a lumen efficacy of up to 125 lm/W, it illuminates the merchandise on display with an attractive, uniform light. Thanks to its minimalized, slim design, the InteGrade S system enables transparent serve-overs attracting customers' attention towards merchandise.

Constant Voltage LED

Our constant voltage LED drivers are designed as 24 VDC LED solutions for use in applications such as refrigerator display lighting, retail display lighting and linear accent lighting. They are specifically designed to ensure the highest performance with maximum robustness combined with a long lifetime for operation with 24 VDC LED modules, flexible LED strips and other LED applications that require 24 VDC constant voltage.

PrimeSet RDL500 / 510

Philips PrimeSet RDL 500/510 LED system gen 1

Our LED lighting for freezer cases is a sustainable and energy-efficient way to create an enjoyable shopping experience for customers – while at the same time supporting retailers' brand values. RDL500 and RDL510 modules can be vertically integrated in full-height, glass-door refrigeration cabinets.

InteGrade LED gen 4

InteGrade LED system high flux gen 4

The InteGrade LED high flux system takes the very successful InteGrade range to a whole new level of specifications.

InteGrade LED high flux system has been designed for ultimate product visibility and superior visual display of merchandise. The outstanding bright light distribution, combined with a miniaturized unobtrusive design, directs the customer's focus onto the products on display.

This new range offers breathtaking performance, with superb lumen and lux levels and an exceptional uniform light distribution. Revolutionary optics bring light right down to the lowest shelf at the canopy application. The InteGrade high flux is now available in premium white to combine the best of both worlds: high flux with premium white takes the product attractiveness to the ultimate level, and stimulates the desire to buy.

InteGrade LED engines have been designed to match the most common application lengths, reducing the number of components needed per installation. Yet they maintain outstanding flexibility through their modular design, so it is possible to create odd-size lighting solutions to match every project specification. Thanks to a range of engine lengths, accessories and Xitanium constant voltage LED power drivers, the InteGrade LED high flux system offers maximum design flexibility and plug and play simplicity. So you can create a vast variety of innovative systems with style, modernity and functionality. Note that InteGrade high flux engines are not stand-alone engines, and they may need to be integrated with a heatsink for thermal management to achieve 50,000 hours lifetime. The cabinet framework can be used for that. Our design-in service is available to support you.

Complementary partners

We are keen to bring the latest LED innovations to the market in a way that helps you design luminaires that meet your customers' needs. During this process, you might be faced with challenges that are not necessarily your speciality, but can easily be solved with the help of the right complementary partner.

Our complementary partners develop parts that are a perfect match with the LED systems we design. We have regular contact with these partners and keep them informed at the early stages of the development road

map. This means they can tailor their products to ensure perfect matches with the LED lighting components we bring to the market. Support for cooling, reflectors, lampholders and optics can be found via the complementary partners listed here. Please visit the websites for more product information or contact them directly if you have any specific requests.

Cooling

Asia Vital Components (AVC) CO. Ltd
7F-3, No.24, Wucyuan 2 Rd.
Sinchuang District
New Taipei City 24892
Taiwan

Lighting definitions explained

Legend technical specifications	Symbol	Definition	Legend technical specifications	Symbol	Definition
Backwards compatible		It can work with an older product or technology	Backwards compatible		It can work with an older product or technology
Beam angle	(°)	Exit angle of the light beam	Inrush current peak		Highest current the capacitative components operate at start up
Central beam candela		Power emitted by a light source in a particular direction. A common candle emits light with a luminous intensity of roughly one candela	Lifetime	hrs	Lifetime in hours, associated with specific conditions (e.g. lumen maintenance, Tc, failure)
Chip on board	CoB	Refers to the semiconductor assembly technology wherein the microchip or die is directly mounted on and electrically interconnected to its final circuit board, instead of undergoing traditional assembly or packaging as an individual IC	Lifetime 10% failure	hrs	Lifetime in hours, defined by reaching 10% failures (i.e. 90% survivors) for a population
Correlated color temperature	K	CCT; describes whether white light appears warm (reddish), neutral or cool (bluish)	Light output	lm	Output of luminous flux
Color rendering index	CRI	The ability to reproduce the colors of various objects faithfully in reference to an ideal light source	Lumen maintenance @ 50,000 hrs		% of the original lumen flux remaining after indicated (life-)time for a defined population; e.g. B50/L70 indicates 50% of the population retaining 70% of the original light output
Color consistency (initial)	SDCM	Standard Deviation of Color Matching; describing the difference between two colors. e.g. a difference of 1-3 SDCM is virtually imperceptible; a difference of 4 or more is readily visible	Luminous flux	lm	Total energy emitted by a light source across the visible wavelengths of light
Connectivity		The capacity to be connected to other appliances, facilities and the internet	Module efficacy	lm/W	Efficiency module; lumen output per Watt input
Digital		A collection of evolving technologies that enables generation, collection, analysis, storage in real-time and data exchange	Module power	W	Energy required to operate the module
Dimmable average lifetime 10% failure	hrs	Lifetime in hours, defined by reaching 10% failures (i.e. 90% survivors) when dimmed	Module temperature control		Protective feature with which the driver regulates the module power when a certain critical temperature of the module is passed
Dimming range		Dimming range in which the system will perform as specified	Passive cooling		Cooling without power consumption
Driver power factor		Indicating how effective the driver converts electric current to useful power output	Power factor	Pf	See: driver power factor
Efficiency range max load		Efficiency when operated at maximum power (not dimmed)	Relative humidity	%	Portion of water vapor in a mixture of air and water vapor
I2NC code		Product code	Smart fixture		Lighting fixtures that are enabled for connectivity become a node in the network by containing one or more sensors and have the ability to change behavior as a response to a stimulus
Frequency	Hz	See line frequency	System efficacy	lm/W	Efficiency module + driver
Housing color		Color of housing	System power	W	Energy required to operate the system
Input Voltage	V	Voltage required as input for the product	Tc life driver	°C	Temperature of indicated point on the product on which the lifetime is based
IP classification		Ingress protection defined in terms of object size and water beam protected against	Tc life module	°C	Temperature of indicated point on the product on which the lifetime is based
			Zhaga		An industry-wide cooperation between companies aimed at enabling the interchangeability of LED light sources made by different manufacturers
