# ASUS – In Search of Incredible

ASUS is passionate about technology and driven by innovation. We dream, we dare, and we strive to create an effortless and joyful digital life for everyone. We are always in search of incredible ideas and experiences and we aspire to deliver the incredible in everything we do.

ASUS is a top-three global consumer notebook vendor and maker of the world's best-selling, most award-winning motherboards. A leading enterprise in the new digital era, ASUS creates products that meet the needs of today's digital home and office, with a broad portfolio that includes motherboards, graphics cards, optical drives, displays, desktop and all-in-one PCs, notebooks, netbooks, servers, multimedia devices, wireless solutions, networking devices, tablets, smartphones and wearables. Driven by innovation and committed to quality, ASUS won 4,368 awards in 2015. The company is widely credited with revolutionising the PC industry in 2008, when it launched the Eee PC™. More than 13,600 global employees, including a world-class R&D team of 4,500 engineers, comprise ASUS. Company revenue for 2015 was approximately US\$14 billion.

# No. 1 Consumer Notebook Brand in APAC

In 2015, ASUS continued to exhibit exponential growth in the consumer notebook category and was a preferred brand for consumers across Asia Pacific and Europe.

- ▶ **No.1 consumer notebook brand in Asia Pacific**
  - 2015 Q2 IDC Report\* (excluding China and Japan)
- ▶ **No.1 13-inch ultra-slim Windows laptop worldwide**
  - 2015 GFK and NPD Report\* (excluding convertible laptops)
- ▶ **Top 2 consumer notebook brand in China**
  - 2015 Q2 IDC Report
- ▶ **Top 2 consumer notebook brand in Central and Eastern Europe**
  - 2015 Q2 IDC Report
- ▶ **Top 3 consumer notebook brand in the world**
  - 2015 Q2 IDC Report

## No. 1 Motherboard Brand in the World

ASUS has shipped more than 500 million motherboards globally since 1989. ASUS puts the best motherboards in every ASUS notebook, ensuring incredible quality and reliability.

## Ranked Among World's Most Admired Companies

In the computer industry, ASUS was named among the top 10 World's Most Admired Companies by Fortune Magazine in 2015.

## Ranked Among Top Global IT Company

ASUS was recognised among the top 10 global IT brands in the Consumer Electronics category of The World's Most Innovative Companies 2010, compiled by Fast Company, a leading progressive business media brand.

## No.1 in Quality and Service

ASUS ranked first in quality and innovation in The Wall Street Journal Asia survey in 2009.

## 4,368 Awards in 2015

In 2015, ASUS won a total of 4,368 awards from leading organisations and media groups, worldwide.

## ASUS Green Technology

ASUS was the first global IT company in the world to achieve EU Flower Eco certification. It was also the first to receive EuP certification for notebook PCs. Today, ASUS continues to build on a long-standing tradition of developing the world's most reliable and advanced green technologies.

ASUS PCs are Powered by Intel® Core™ Processors.  
Intel Inside®. Extraordinary Performance Outside.

ASUS Products are Now Available at all ASUS Brand Stores and ASUS Authorised Retailers.

Intel, the Intel Logo, Intel Inside, Intel Core, and Core Inside are trademarks of Intel Corporation in the U.S. and/or other countries. # ASUS Won 4,368 Awards in 2015

ASUS is dedicated to pursuing the highest level of innovation and quality in everything we do. We aspire to become one of the world's most admired leading enterprises in the new digital era. Our ongoing efforts continue to garner worldwide recognition in every aspect of product development, including design, innovation, technology, quality, service, and energy-efficiency. In 2015, ASUS earned 4,368 awards from some of the most prestigious international organisations and media groups around the world. Each award is a testament to our relentless quest and commitment to creating technology that is designed for everyone to joy.

## iF Design Awards

ASUS products have won numerous international industrial design awards and have once again demonstrated their outstanding design quality and innovation by taking home no less than 10 accolades at the iF Design Awards 2012.

## Good Design Awards 2014

ASUS products have won a total of 17 Good Design Awards, one of the four major design awards recognised by the International Design Alliance, demonstrating ASUS' outstanding product design quality and engineering.

## Innovation International CES Awards 2015

Seven ASUS products have been awarded for the CES 2015 Innovations Design and Engineering Awards honoree program. The awards have become a hallmark for the best-designed products in consumer technology and our brand promise of Inspiring Innovation • Persistent Perfection has resulted in such wide recognition for our products.

SINGAPORE  
OCT 2016  
STRAITS  
TIMES

This dark blue shade gives the ZenBook a classy demeanour, complemented perfectly by the gold trim along the laptop edges. The ZenBook may be inspired by the MacBook's design, but it has a more powerful processor and longer battery life.

SINGAPORE  
OCT 2016  
HARDWARE  
ZONE

The display is quite gorgeous to look at despite the 1080p resolution that may not seem as impressive on paper. ASUS' notebook bears more than a passing resemblance to the MacBook, but it trumps it in almost every conceivable way, from faster hardware to a lighter and thinner design.

SINGAPORE  
OCT 2016  
LIANHE ZAOBAO

My first trial with the latest ultra-thin ZenBook 3, the most impressive feature is its beautiful body design. After a week of testing, I found that it not only has external beauty but its internal performance is impressive as well.

SINGAPORE  
JULY 2016  
AUGUSTMAN

The Zen AiO Pro has a gorgeous 4K display option, plenty of processing power for your heavy-duty hard work and discrete graphics in case you want to indulge in a bit of gaming.

SINGAPORE  
MAY 2016  
STUFF TV

A top affordable tablet for those who fancy a nice display but aren't willing to pay through the nose for it.

SINGAPORE  
MAY 2016  
ASIA ONE

The ZenBook UX305 was nominated for one of the AsiaOne People's Choice Award 2016 for the best laptop.

SINGAPORE  
MAY 2016  
CLEO

The annual CLEO Guy Stuff Awards 2016, with ZenBook UX305 being awarded the most stylish laptop with its ultra-thin profile and stylish features.

SINGAPORE  
MAY 2016  
HARDWARE  
ZONE

Also note that the ZenFone 2 Laser is available in a 5-inch variant - the ZE500KL - for just S\$239 and it shares all of the attributes of the 5.5-inch reviewed version, making it a more value for money counterpart if price is a strong consideration. Furthermore, its smaller screen size would allow it to have a higher pixel density.

SINGAPORE  
APRIL 2016  
STUFF TV

The ASUS Zen AiO Pro Z240IC is an excellent all-in-one desktop PC that not only looks sleek, but also holds the performance you need for your day-to-day application. Whether it's family movie time or solo gaming, this desktop system gets the job done without much complaints.

SINGAPORE  
APRIL 2016  
HARDWARE  
ZONE

The ZenFone Zoom on the other hand has an actual optical zoom lens, the same kind you would find in a DSLR or compact digital camera. Zoom lens are far more complicated and bulkier than their fixed focal length counterparts, which is why we haven't seen one in a slim smartphone until now.

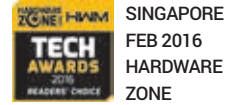

ASUS' ZenFone Zoom breaks new ground with a built-in optical zoom camera. The ASUS ZenFone Zoom puts cool new camera tech to work.

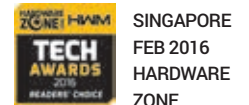

The ZenBook UX305 was awarded the best Ultrabook by their readers in the ST Digital Awards 2016. Their readers chose the ASUS ZenBook UX305 as their favourite likely because of its excellent value, which is probably matched only by the HP Envy 13.

The ROG G752 was awarded the best gaming laptop in the ST Digital Awards 2016. The ASUS ROG G752 impressed us the most with its snappy orange highlights standing out from its rivals. More importantly, the G752 was a very reasonably priced for its high-end machine.

The ASUS ZenFone 2 was awarded for the best mainstream smartphone. The ZenFone 2's Intel Atom Z3560 quad-core processor easily beat the rest of the field, with performance on par with Qualcomm's Snapdragon 801. We also loved its beautiful 5.5-inch Full HD display, and great rear and front camera. While the phone is entirely plastic, its brushed metallic finish is quite convincing, and we liked its ergonomic curved shape, rear volume buttons and quick launch features. At this price, the ZenFone 2 ZE551ML can't be beaten.

ASUS was awarded for the Best 2-in-1 Notebook Brand by the Hardware Zone readers. A new category we created last year to reflect the latest trend, the inaugural winner was ASUS. This year, our readers have once again voted for ASUS (30%), maker of fine machines like the Transformer Book T300 Chi, Transformer Book Flip TP200, and T100HA.

The ASUS G752 is a little slimmer than its predecessor, and its new design lightens up the previous black slab look. Performance is excellent, and a backlit keyboard with macro keys makes for comfortable gaming.

It's a 17-inch gaming notebook that features the latest Skylake processor and a GeForce GTX 980 GPU with 8GB of framebuffer. That wasn't a typo, the ROG GX700 is in fact one of the few gaming notebooks running a desktop-class GeForce GTX 980 GPU. But more than that, its piece de résistance is its liquid-cooling dock.

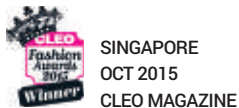

ASUS gets almost everything right with the new Republic of Gamers (ROG) G752 gaming laptop. A powerful gaming laptop that runs quieter than expected. The price is very competitive, too.

And as befits a premium gaming notebook from ASUS' much vaunted ROG collection, the ROG G752's chassis is constructed mainly out of aluminum. It feels sturdy and well put together. However, the ROG G752 is no ballerina. It measures 51mm thick at its bulkiest point and tips the scales at a hefty 4.4kg. Though the thickness is pretty alarming, the weight, however, is pretty standard fare for most 17-inch gaming machines, so there's no surprises there.

Finally, knocking S\$70 off the original price is pretty much unheard of, and its new price of S\$229 is fantastic value, especially when smartwatches seem to be getting more and more expensive. If you've been looking for a safe entry into the world of smartwatches without having to spend too much, you can't go wrong with the ZenWatch 2.

ASUS was awarded for having the Best Tech for Style Savvy Girls in the CLEO Fashion awards 2015. With the ZenBook range that combines performance and beauty, it would be the best choice for those style-conscious looking for a laptop.

The ASUS ZenFone Selfie is a moderately priced phone that lets you take good front-facing shots in 13-megapixel high resolution. Battery life is great as well.

While the ZenBook may not wow with innovative features, it does everything well. More importantly, it is priced competitively and great value for money. If you don't need a touchscreen, the ZenBook is one of the best ultrabooks for its price.

One of the key highlights of the ASUS ROG G501 is its svelte design and slim chassis. The chassis is mostly aluminum and exudes a premium look and feel. It measures just 20.6mm thick and weighs only 2kg, which makes about as thick and lighter than the GX500 unit that we saw at Computex last year. The aluminum is black and ASUS has employed different finishings on the panels to give the ROG G501 more visual pizzazz. The external panels are all brushed, whereas the internal panels such as the palm rests have a matte finish.

Battery life was excellent, lasting 7hr 6min while playing a video. This is about 30 minutes longer than on the Dell XPS 13. But I expect the MacBook Air to outlast the ZenBook, given that the 2013 MacBook Air clocked nine hours. While the ZenBook may not wow with innovative features, it does everything well. More importantly, it is priced competitively and great value for money. If you don't need a touchscreen, the ZenBook is one of the best ultrabooks for its price.

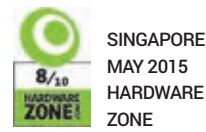

Awesome performance, a good screen and highly effective fans that keep the ASUS G751 pretty quiet under pressure make this one of the best gaming laptops around.

The winner of our shootout is the ASUS ZenFone 2, not only for its overall excellent benchmark scores, but also for its ergonomic, premium design and top notch Full HD display. If you're in the market for something a little more powerful, you can opt for the \$429 4GB ZenFone 2, which also has a slightly faster processor.

The ASUS G751 is for the loud and proud PC gamer. Awesome performance, a good screen and highly effective fans that keep the ASUS G751 pretty quiet under pressure make this one of the best gaming laptops around.

Excellent design, small and attractive, quiet and powerful processing, customised lighting control, pre-built with warranty and support, and it comes with everything but a monitor. For a slightly higher price tag of S\$2,699, the ASUS ROG G20 offers you the chance to do away with the hassles of installation and troubleshooting, and the peace of mind knowing that you can simply take it to the service center if you run into any problems.

But interestingly, the \$299 price for the 4GB does put it in an interesting position, since the focus recently has been on either great low-value phones and high-end handsets. The ZenFone 2 could still be attractive for those who want near high-end performance without being tied to a contract.

# Top Notch Quality Notebooks with Rigorous Tests Assurance

Durability is a hallmark of ASUS design. With each project, ASUS engineers strive to create devices that exceed expectations in any environment—be it commuting to work or travelling in Arctic. To achieve the goal of incredible performance and reliability, ASUS notebooks undergo a series of rigorous tests.

## Keyboard Test

Specially designed ASUS mechanisms perform tests to ensure durability and responsiveness over millions of keystrokes, with special emphasis on keys that are most often used.

## Abrasion Resistance Test

Rear and front panels are exposed to friction tests to ensure that surfaces can resist scrapes or scratches.

## Noise and Audio Test

Designed with high-quality component seals for quiet cooling, notebooks undergo fan, hard drive, and power source noise tests, as well as an audio tuning process—all to ensure the quietest performance possible.

## Panel Resistance Test

Panel resistance tests ensure that even the LCD display screen—the most vulnerable surface of any notebook—can endure unexpected bumps or pressure.

## Enhanced Hinge Test

As a known point of vulnerability in any notebook, hinges undergo vigorous testing, consisting of tens of thousands of open-close cycles, to help ensure strength for the life of the device.

## Vibration Test

Extensive vibration testing ensures that the notebook chassis assembly and all internal components remain securely attached and maintain integrity under even the most extreme travel conditions.

## Shock Test

Tests simulating incidents that may occur during shipping help ensure that notebooks can withstand unexpected impacts.

## Twist Test

Twist tests ensure that the notebook chassis retains structural integrity when uneven pressure or weight is applied.

## Acceleration Test

Highly Accelerated Life Tests (HALT) simulate long-term effects of notebook use, allowing engineers to identify any possible design or component vulnerabilities.

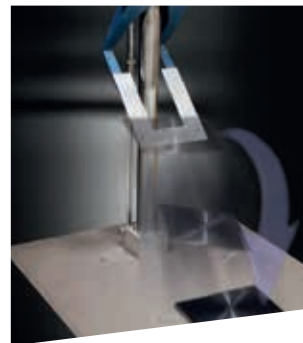

## Port Test

Port tests ensure that contacts and plugs provide durable, smooth connections and data transfer—even in environments where ports are frequently used for connecting and disconnecting devices.

## Extreme Environment Test

Extreme environment tests ensure consistent performance in any condition, including extremely high or low temperatures and humidity.

## Drop Test

Drop tests remove ensure that the chassis and internal components of each ASUS notebook are resistant to damage from unexpected drops.

# 5 Reasons to Love ASUS

In recent years, ASUS has developed a Customer Happiness 2.0 program that seeks to achieve unparalleled customer satisfaction. The program specifies five exclusive feature categories to be included with every ASUS notebook.

				
<b>Authentic Beauty</b>	<b>Incredible Sound</b>	<b>Intuitive Touch</b>	<b>Quick Response</b>	<b>Ubiquitous Access</b>

## 1. Authentic Beauty

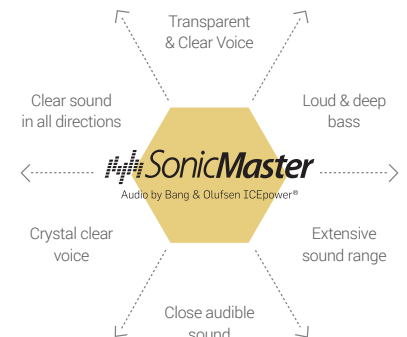

NTSC (CIE1931)  
sRGB (Microsoft and HP, 1996)  
ASUS Colour Management  
Pursuing more accurate  
colours with sRGB

ASUS Splendid technology ensures accurate, vivid, life-like colour reproduction. Special Vivid and Manual modes allow users to add extra vibrancy to images, or to adjust colour settings manually to suit individual preferences.

## 2. Incredible Sound

ASUS SonicMaster, an exclusive ASUS audio technology, combines specially designed hardware and software developed by the ASUS Golden Ear team. SonicMaster delivers incredible sound quality, with deep, rich bass and crystal-clear vocals—even at high volume levels. Integrated Audio Wizard software provides five one-click preset modes optimised for any kind of audio source, as well as manual control over advanced settings.

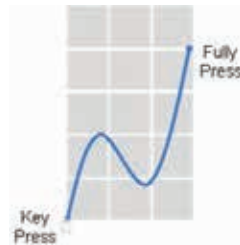

### 3. Intuitive Touch

Responsive multi-touch displays use touch sensors that are smaller than the industry standard, providing smooth, incredibly precise interaction.

Ergonomic keyboards are carefully designed with optimum key travel and pressure to ensure comfort and accuracy.

Larger touch pads enable easier and more intuitive navigation and control.

### 4. Quick Response

#### 2-Second Instant On

ASUS laptops are designed to wake almost instantly from sleep mode, providing a smartphone-like experience.

#### 2 Weeks Standby

Super Hybrid Engine II technology allows ASUS notebooks to remain in standby for up to two weeks, which helps to avoid work or data loss.

#### Automatic Backup

ASUS notebooks automatically save data when battery capacity reaches less than 5%.

### 5. Ubiquitous Access

ASUS WebStorage offers the freedom and power to access and share important files and data with ease, while also allowing for universal file synchronisation from any device.

ASUS PCs are Powered by Intel® Core™ Processors. Intel Inside®. Extraordinary Performance Outside.

# Incredible ASUS Stories

ASUS devices have proven themselves in some of the harshest environments across the planet—and beyond! Below are just a few incredible stories highlighting the reliability of ASUS notebooks.

## ▶ Outperforming Competitors Through 600 Days In Outer Space

R & K, a major supplier of computers and electronic equipment for aeronautical missions to outer space, provided MIR Space Station astronauts with two ASUS notebooks for their 600-day stint in space.

"The ASUS notebooks never overheated like some of the devices made by other companies," said Russian cosmonaut Sergei Avdeev. "Thermal flow in space and on Earth is completely different. Only notebooks with the best heat dissipation solutions can survive continuous operation. We turned the ASUS notebooks on in the morning and left them on all day and never experienced any problems."

## ▶ Helping Emergency Responders Quickly Get The Information They Need

NRMA CareFlight, an emergency medical and rescue helicopter unit operating in New South Wales, Australia, uses ASUS notebooks in several of its departments. For example, ASUS notebooks provide navigation support for the CareFlight program designed to improve survival rates among accident victims suffering from severe head trauma. By supplying the information that helps CareFlight medical teams arrive at accident scenes faster, ASUS technology plays a direct role in significantly improving response times and timely treatment of severe head trauma victims.

"All of our pilots have been very impressed with the ASUS M5 laptops and amazed at their ability to withstand the vibration of the aircraft," explains Mark Lees, CareFlight Community Relations Manager. "We are now ready to install ASUS M5 laptops in all of our aircraft and link them to the onboard navigation computers."

## ▶ First To Reach The Tallest Peak In Antarctica

On December 16, 2003, acclaimed mountaineers Shi Wang and Jian Liu embarked on an expedition to the summit of Mount Vinson—the tallest peak in Antarctica—where temperatures are known to drop below minus 100 degrees Fahrenheit. The device they chose to take with them was an ASUS S200N notebook.

"The ASUS S200N worked without a glitch under the extreme conditions and severe weather," said Wang. "It was nice to have a notebook I could count on in situations where dependability is critical."

## ▶ First To Reach The Top Of Mount Everest

For a Mount Everest expedition, a mountaineering team selected a series of ASUS notebooks—the ASUS U5, ASUS S6, ASUS W7 and ASUS U1—as their devices of choice. At the base camp elevation of 5,000m above sea level, other notebooks failed to boot up, due to extremely low ambient temperature; however, the ASUS notebooks functioned without incident. Expedition team leader, Captain Wang Yongfong, took an ASUS U5 notebook with him to the peak: At 8,848m above sea level, an ASUS notebook became the first in the world to reach the top of Mount Everest.

## ▶ Tough Enough For A Rally Race

Traversing scorching deserts and snow-covered mountains during the Patagonia 2000 race, ASUS notebooks performed admirably. The integrated GPS functionality of the ASUS notebooks provided reliable navigation throughout the journey, and the notebooks also provided key communication support, including video conferencing.

"Each ASUS computer survived even the most severe conditions of this strenuous voyage, without a single flaw," said race organiser Aviv Shweky.

# ASUS 2 Years International Warranty\*

ASUS guarantees you with no repair and component charges within your 2 years warranty period for notebooks. For tablets, 1 year international or local warranty is offered depending on the models. ASUS international warranty makes sure that you are protected even if you are stationed abroad, with our centres established across 55 countries.

This is ASUS' commitment to deliver quality and customer satisfaction to you, wherever you might be.

## EXTENDED WARRANTY\*

# ASUS ZenBook 3

The Thinnest, Lightest Ultrabook™ Yet.

- 7th Gen Intel® Core™ i7/i5 Processors
- 11.9mm Ultra-Sleek
- 910g Ultra-Light
- Type-C USB Ports
- Supreme Audio Experience with Harman Kardon
- Fingerprint Sensor
- PCIe4 SSD (Only for UX390UA-GS048T)
- Corning® Gorilla® Glass 4 Display

## The World's Most Prestigious Laptop

To say that the ZenBook 3 is a new generation of the ZenBook series is a huge understatement. It is reimagined for the next era of mobile computing. Every single precised component and detail has been completely re-engineered and redesigned to make the ZenBook 3 sophisticated. It is lighter, thinner, stronger, incredibly powerful and elegantly beautiful. It is the world's most incredible laptop. Say hello to the ZenBook 3.

## Thinner. Lighter. Tougher.

The ZenBook series has always been the benchmark for thin and light design, and with the ZenBook 3 we have taken it to a whole new level. Using premium aerospace-grade aluminum, we reduced the weight to only 910g and honed the profile to an amazing thickness of just 11.9mm. To keep the display lightweight and ultra-slim yet durable, we covered it with a 0.4mm thin yet strong Corning® Gorilla® Glass 4, which is twice as thin as the standard cover glass.

# ASUS Transformer 3 Pro

Mobile. Convenient. Expandable.

Up to Intel® Core™ i7 Processor

2-in-1 Detachable PC

2,880 x 1,920 Display

8.35mm Ultra-Thin

Bundled with ASUS Pen

Supreme Audio Experience with Harman Kardon

## The World's Most Versatile PC

The ASUS Transformer 3 Pro was designed with one purpose in mind: to give you supreme performance in a 2-in-1 PC. It is incredibly powerful, amazingly convenient and expandable. Connect ROG XG Station 2\* for gaming-grade graphics and experience awesome audio with the Audio Pod\*. You could also be productive with the Universal Dock and be creative with the ASUS Pen. The ASUS Transformer 3 Pro is much more than just a 2-in-1 PC – it is a mobile powerhouse.

## The Ultimate Mobile Performance

The ASUS Transformer 3 Pro is packed with everything you need to maximise your productivity and make creativity effortless. The 6th Gen up to Intel® Core™ i7 processor and 16GB RAM allows you to blast through the most tough tasks and the 512GB PCIe SSD gives you lightning-quick app load and boot times. The Thunderbolt™ 3 interface offers unbelievably fast data transfers via the Type-C USB ports which is 80 times faster and also supports external 4K UHD displays. The versatile Type-C USB connector also supports USB 3.1 Gen 2 devices at a speed that is 20 times faster than the usual USB 2.0!

## 360° of Freedom & Versatility

The ZenBook Flip combines the elegant sophistication of ZenBook with the convenience and versatility of a 360°-rotatable display. This ultra-thin, ultra-light convertible is a stylish laptop, a handy tablet, or anything in between — and it is designed to be with you everywhere, all the time. Its Intel® Core™ processor allows you sail through all your everyday computing with ease, while its amazing battery lasts up to 12 hours\* between charges!

## Slim, Stylish and Sophisticated

The ZenBook Flip is a timelessly elegant masterpiece, exquisitely crafted from solid aluminum. The chassis is forged from a single block of metal, carefully honed until it's a mere 13.9mm thin, and weighing just 1.3kg to make it effortlessly portable. The spun-metal finish, with its iconic Zen-inspired pattern of concentric circles, is anodised in an exclusive new Icicle Gold colour to match any style.

## Built for All-Day People

The ZenBook Flip is built for on-the-go lifestyles, with a power-efficient Intel® Core™ processor, a high-capacity lithium-polymer battery that can last for up to 12 hours\* between charges. So even on that long intercontinental flight, the ZenBook Flip can go the distance with ease.

Option (Only  
for K401UQ-  
FA074T)

## Thin and Light Design

ASUS K Series packs all the features of notebook into a lightweight, thin design. With a thickness of just 21mm and weighing less than 2kg, this full-featured notebook combines exceptional performance with high mobility. And when you're out and about, the K Series' well-rounded edges and sleek, minimalist lines set it apart from other mundane notebooks in the market.

## Premium Brushed Metal Finish and Tactile surfaces

The K Series turns heads with its simple minimalist lines and a premium brushed metal finish, and is equally ideal for use at home or in the workplace. If you look a little closer, you'll notice exquisite touches like sand-blasted surfaces around the keyboard, a spun-finished power button, and diamond-cut detailing around the touch pad.

## Protect Your Eyes with ASUS Eye Care

Most LED panels emit blue light - the main cause of macular degeneration and retinal problems. ASUS Splendid Eye Care mode effectively reduces blue light levels to ensure the right settings for reading, and protecting you from potential eye fatigue and injuries.

# ASUSPRO B8430

Ruggedness Redefined – Productive, Mobile & Reliable

Supreme Performance with Intel® vPro™ Technology (selected models only)

Indestructible Quality with MIL-SPEC

Stunning Full HD Display

Carbon Fibre Chassis

Uncompromised Security

Anti-Shock HDD (selected models only)

4G/LTE Supported (selected models only)

## Military-grade Reliability

As a professional in demanding working environments, a business notebook that is rugged yet armed with all the necessities and more for all your computing needs is critical. With its professional reliability and durability which exceeds the demanding MIL-STD 810G military standard, the ASUSPRO B8430 notebook is the must have notebook for every business professional in demanding working environments be it large enterprises and government or organisational data management centres.

## Proven to Exceed Demanding Standards

The ASUSPRO B8430 notebook went through thousands of rigorous and stringent tests to ensure that its durability exceeds the usual standards. They are strictly tested to much higher industry standards than mainstream notebooks to satisfy the reliability and durability demands of business and institutional users.

## Anti-glare Display for Comfortable Viewing

The matte screen surface used in the ASUSPRO B8430 notebook prevents unwanted reflections and reduces eye fatigue. It also prevents unsightly fingerprints from spoiling presentations you would like to display on the screen.

## Increased Productivity and Comfortability

Notebook keyboards are of great concern to the professionals as they are essential for comfortable user experience. The ASUS engineers have fine-tuned the B Series keyboard, providing optimum key feel and long key travel to maintain comfort during long hours of typing. The keyboard also provides a full dedicated numeric keypad complete with navigation keys to increase efficiency for data entry or document navigation.

Ultra Portable

1,920 x 1,080 Anti-Glare Panel (P5430 & P2530 only)

LED-Backlit Anti-Glare Panel

Uncompromised Security

## Style and Comfort

The P series notebooks have a professional look with brushed-hairline texture and scratch-resistant coating LCD. They are ergonomically-designed and feature a seamless one-piece Chiclet keyboard with precise key alignment for ultimate comfort. The anti-glare display has a matte screen surface that prevents unwanted reflections and helps to reduce eye fatigue.

## Increased Productivity With Comfortable Keyboard and Dedicated Numeric Keypad

The ASUSPRO P series uses a one-piece build to create a professional yet subtle look. The simplicity of the design extends to the underside with no unnecessary clutter. A premium look and feel is achieved by the use of the brushed-hairline aluminium texture.

## Work Efficiently

The ASUSPRO P2430 notebooks are extremely productive. Each one comes with a replaceable battery for extended computing or maintenance reasons. It also supports four USB ports – three USB 3.0 and one USB 2.0.

## Anti-Glare Display For Comfortable Viewing

The matte screen surface used in ASUSPRO notebooks prevents unwanted reflections thus reducing eye fatigue. It also prevents unsightly fingerprint smudges from spoiling presentations. Ergonomically-angled and textured palm rest areas provide a comfortable and solid feel for optimum productivity.

# ROG G752

## WORLD DOMINATION. EVOLVED.

Powered by Quad-Core Intel® Core™ i7 Processors

High End Graphics

Windows 10 Home

3,840 x 2,160 Display (G752VS only)

Intelligent Cooling

Anti-Ghosting Key

Up to 64GB DDR RAM

## Extremely High Performance Gaming Laptop

The latest ROG gaming laptop – the G752 – showcases the evolution of the brand, with a revolutionary design finished in a new Armour Titanium and Plasma Copper colour scheme. With Windows 10, the latest 6th generation Intel® Core™ i7 processor, up to 64GB DDR4 RAM, and the latest discrete graphics GTX™ graphics, ROG G752 delivers exceptional gaming performance. It features ROG-exclusive dust-released thermal solution for increased system stability and longevity, and even has the ROG-exclusive mobile 3D Vapour Chamber for increased cooling performance. The G752 also comes with a backlit anti-ghosting gaming keyboard with 30-key rollover for precise command and control in battle.

## Cooling Without Compromising

The ROG G752VS has a unique thermal design which directs dust into a dust-release tunnel to keep it away from internal components. This prolongs the lifespan of the internal components and enhances overall stability of the notebook by preventing dust from clogging the radiator and thus reducing the effectiveness of the cooling system.

# ROG GT51

## THE POWER. AND THE GLORY.

ASUS Desktops – Most Recommended Windows Desktop Brand  
Based on 2015 PCMag Readers' Choice Award

Powered by Intel® Core™ i7 Processor

8 Million Dynamic Lighting Effects

High End Graphics

32GB DDR4 RAM

Liquid-Cooled Solution

USB 3.0 Ports

Blu-Ray Disc Combo

### The Power. And The Glory

The ROG GT51 is no ordinary gaming machine. It is engineered with the ROG gaming DNA to give you mind-blowing gaming experiences you would not find elsewhere. Pump up the Intel® Core™ i7-6700K CPU to a full-core overclocked 4.6GHz without rebooting while you enjoy the eye-popping 8-million-colour dynamic 4-zone LED lighting effects. Presenting the latest ROG GT51 - be prepared for awesome performance!

### Full-Core CPU Overclocking

The ROG GT51 is armed for victory with a 6th-generation Intel® Core™ i7 processor for unprecedented gaming performance. ASUS selects the CPUs, ages them for 40 hours and finetunes performance to make them 14% faster than anything on the market. Combined with Turbo Gear, this gives you a one-click full-core CPU overclocking to 4.6GHz without having the need to reboot! The Hydro Overclocking System on the CPU ensures rock-solid stability during overclocking.

### Advanced Liquid Cooling System

The ROG GT51 boasts a multi-zone thermal solution to ensure efficient heat management by decreasing system temperature up to 31%, even under the heavy load of marathon gaming sessions. The processor is liquid-cooled while the graphics processing unit has a dedicated air channel. The power supply unit found in the bottom corner of the chassis features its own isolated airflow design for efficient cooling system.

# ROG G11 & G20

## GAMING WITHOUT LIMITS

ASUS Desktops – Most Recommended Windows Desktop Brand  
Based on 2015 PCMag Readers' Choice Award

- Up to Intel® Core™ i7 Processor
- Windows 10 Home
- High End GTX-10 Series Graphics
- Customisable LED Effects (G11 Desktop PC models only)
- 32GB DDR4 RAM
- Quiet Performance
- USB 3.0 Ports

### Deceptively Powerful

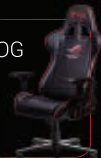

The ROG G20 is designed to dominate the small form factor gaming desktop segment; and already it has received critical acclaim with the 2015 CES Innovation and iF Design awards. The ROG G20 sports a bold design - boasting a matte-black finish, aggressive lines, Mayan-inspired markings, and dynamic 8 million colour LED effects.

Its compact 9.5 litre case houses the latest 6th Gen Intel® Core™ i7 processor and up to Discrete Graphics GTX™ 980 graphics for 4K/UHD gaming and entertainment. The ROG G20 has exceptional heat management to ensure sufficient cooling during marathon gaming sessions. On top of that, it runs silently at just 22dB at idle. The exclusive Aegis II application helps you track system parameters via an intuitive interface.

### Performance You Can Trust

The ASUS G11 is designed for casual gamers who want a high performance gaming platform that does not break the bank. You will be in awe of its futuristic outer space-inspired design with Mayan-inspired elements. It has numerous LEDs spread across four areas of the chassis, including a Centrepiece with customisable light effects that can showcase up to 8 million colours so you can adjust the ambient lighting to suit the game you are currently playing.

Virtual 7.1 Surround  
Audio Experience

## World's 1st Tablet with DTS-HD Premium Sound

The ZenPad 3 8.0 is equipped with DTS-HD Premium Sound to transform stereo audio into virtual surround sound, allowing you to enjoy incredibly immersive entertainment experiences with it at home or on-the-go. Indulge in 360-degree surround sound experience when listening with headphones.

## Cinematic Entertainment with 2K IPS Display

The ZenPad 3 8.0 brings harmony to tablets with its elegant design, visual enhancement technologies and effortless connectivity. The powerful and premium 7.9-inch tablet with vivid 2,048 x 1,536 resolution visuals and cinematic audio for is in game for real immersive entertainment.

## Fashion-Inspired Design

The ZenPad 3 8.0 has a modern contemporary design. Its forged aluminum body weighs just 320g and has premium leather-patterned rear cover which feels great to touch.

## Brand New Interface Design

ASUS ZenUI has more than 1,000 features that improve upon the standard Android interface. You will enjoy a simpler and smarter experience, with a stylish new layout that expands white space for a cleaner design, placing the information you need front and Centre. The brand new ZenUI is brighter, smarter, simpler and even more beautiful. It knows what you need, expresses your thoughts and feelings, and connects you wherever you go.

## Purity. Precision. Perfection.

Around the world, we gather only the purest raw materials. In the centre, forged in precise watchmaking, the ZenWatch 3 comes into perfect design. It exudes sophisticated style and delivers a new level of powerful functionality. Our engineers have done many anti-sensitive tests in the lab to find the best metallic material for the skin and that is why we use the jewellery-grade 316L stainless steel. With the meticulous craftsmanship and timeless design of a fine mechanical watch, the ZenWatch 3 is a timepiece you will want to wear every day.

## Smartwatch, Redesigned.

Smaller and smoother cuts translates to a diamond-cut bezel for a lighter, more elegant watch experience. The ZenWatch 3 is the world's first 3-buttons designed Android Wear smartwatch for a more intuitive functionality and deliver better user experience.

## Express Yourself

No matter who you are, the ZenWatch 3 comes with 6 custom design themes and more than 50 exclusive watch faces to allow you to create a watch that matches your style. The exclusive FaceDesigner app allows you to create your own watch face that is perfectly tailored for you.
