Statement of Need

Urology practitioners need thorough knowledge of the most recent developments and techniques, as well as established guidelines in urology, to ensure the highest standards of patient care and safety.

Learning Objectives

At the conclusion of the 2022 Annual Meeting, participants should be able to:

- Describe recent developments in the medical and surgical management of urology patients.
- Identify new technologies for the treatment of urological conditions.
- Integrate the latest guidelines on the management of urological diseases into their practice.
- Incorporate evidence-based research and literature into the shared decision-making process.

Method of Participation

Learners will participate by attending the in-person session(s), logging into the live virtual session(s), or logging into the on-demand (enduring) activity(ies) beginning May 12, 2022 through August 31, 2022. After completing selected sessions/activities, learners will complete the credit claim attestation and activity evaluation.

Accreditation Statement

The American Urological Association (AUA) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education (CME) for physicians.

Credit Designation*

The AUA designates this other activity (live and enduring materials) for a maximum of 457.5 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity. (*Note, the maximum credits is subject to change if sessions are added or canceled prior to the activity start date.)

Other Learners

The AUA is not accredited to offer credit to participants who are not MDs or DOs. However, the AUA will issue documentation of participation that states that the activity was certified for *AMA PRA Category 1 Credit™*.

Evidence-Based Content

It is the policy of the AUA to ensure that the content contained in this CME activity is valid, fair, balanced, scientifically rigorous, and free of commercial bias.

AUA Disclosure Policy

All persons in a position to control the content of an educational activity (i.e., activity planners, presenters, authors, reviewers) are required to disclose to the provider any relevant financial relationships with any commercial interest during the previous 24 months. The AUA must determine if the individual's relationships may influence the educational content and mitigate any conflicts of interest prior to the commencement of the educational activity. The intent of this disclosure is not to prevent individuals with relevant financial relationships from participating, but rather to provide learners with information so they can make their own judgments.

Disclosures are posted online at www.auanet.org/annualmeeting/speakers/disclosures.

Mitigation of Identified Conflict of Interest

All disclosures will be reviewed by the AUA Conflict of Interest (COI) Review Work Group Chair and/or Vice Chair for identification of conflicts of interest. The AUA COI Review Work Group, working with Office of Education staff, will document the mechanism(s) for management and mitigation of the conflict of interest, and final approval of the activity will be documented prior to implementation. Any of the mechanisms below can/will be used to mitigate conflict of interest:

- Peer review for valid, evidence-based content by the AUA COI Review Work Group.
- Attestation that clinical recommendations are evidence based and free of commercial bias.
- Introduction of a debate format (point-counterpoint).
- Inclusion of moderated panel discussion with unbiased moderator.
- Publication of a parallel or rebuttal article for an article that is felt to be biased.
- Divestiture of the relationship by faculty.
- Recusal from controlling relevant aspects of planning.
- Selection of alternative faculty for specific topic.

Off-Label or Unapproved Use of Drugs or Devices

The audience is advised that this CME activity may contain reference(s) to off-label or unapproved uses of drugs or devices. Please consult the prescribing information for full disclosure of approved uses.
