1 Overview

This document describes the procedures for setting up FXS lines using AudioCodes MP-1xx for AudioCodes SPS (SIP Phone Support).

Reader's Notes

2 Setting Up FXS Lines on MP-1xx

Before setting up the FXS lines, you need to create an SPS user in the SPS Web Admin Tool. Follow the instructions on how to create a new SPS user in the “Adding a User via the SPS Web Admin” section of *SPS for Lync Quick Start Guide*.

To set up FXS lines on the MP-1xx for the SPS, follow the steps described below.

Note: For FXS lines only create an SPS User as there is no need to define a device for this user.

2.1 Configuring the SPS as a Proxy

The procedure below describes how to configure the SPS as a Proxy.

➤ **To configure the SPS as Proxy:**

1. Click on **Configuration > VoIP > Control Network > Proxy Sets Table**; the Proxy Sets Table page opens.

Figure 2-1: Proxy Sets Table

	Proxy Address	Transport Type
1	10.21.0.194	
2		
3		
4		
5		

2. In the 'Proxy Address' field, insert the IP address of the SPS.
3. Click **Submit**.

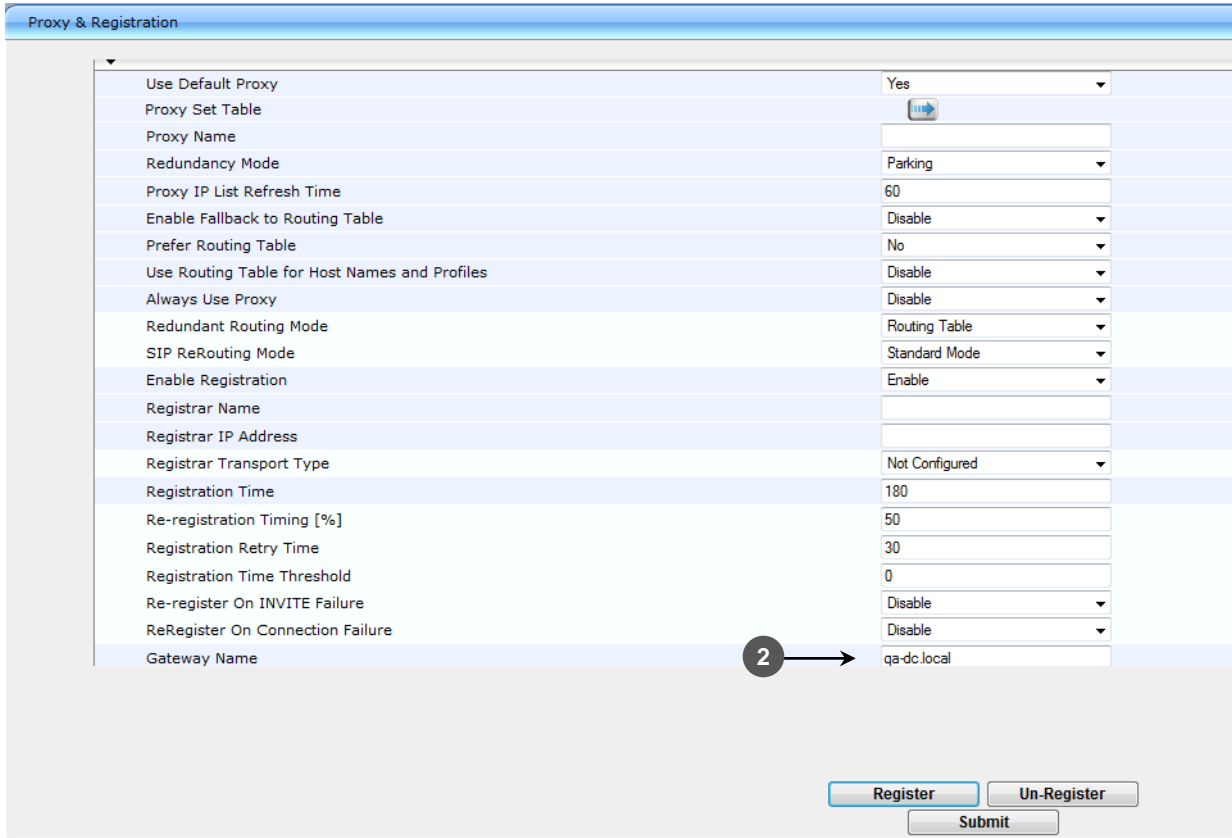

2.2 Defining the Gateway Name

The procedure below describes how to define the gateway name.

➤ **To define the gateway name:**

1. Click **Configuration > VoIP > SIP Definitions > Proxy & Registration**; the Proxy & Registration page opens.

Figure 2-2: Proxy & Registration

Use Default Proxy	Yes
Proxy Set Table	
Proxy Name	
Redundancy Mode	Parking
Proxy IP List Refresh Time	60
Enable Fallback to Routing Table	Disable
Prefer Routing Table	No
Use Routing Table for Host Names and Profiles	Disable
Always Use Proxy	Disable
Redundant Routing Mode	Routing Table
SIP ReRouting Mode	Standard Mode
Enable Registration	Enable
Registrar Name	
Registrar IP Address	
Registrar Transport Type	Not Configured
Registration Time	180
Re-registration Timing [%]	50
Registration Retry Time	30
Registration Time Threshold	0
Re-register On INVITE Failure	Disable
ReRegister On Connection Failure	Disable
Gateway Name	qa-dc.local

2. Insert the Domain Name in the **Gateway name** field.
3. Click **Register**.
4. Click **Submit**.

2.3 Enabling the G.711 Codec

The procedure below describes how to enable the G.711 codec.

➤ **To enable the G.711 codec:**

1. Click **Configuration > VoIP > Coders and Profiles > Coders**; the Coders Table page opens:

Figure 2-3: Coders Table

	Coder Name	Packetization Time	Rate	Payload Type	Silence Suppression
2	G.711U-law	20	64	0	Disabled
3	G.711A-law	20	64	8	Disabled

2. On the first line, from the 'Coder name' drop-down list, select **G.711U-law**.
 - From the 'Packetization Time' drop-down list, select **20**.
 - From the 'Rate' drop-down list, select **64**.
 - From the 'Silence Suppression', select **Disabled**.
3. On the second line, from the 'Coder name' drop-down list, select **G.711A-law**.
 - From the 'Packetization Time' drop-down list, select **20**.
 - From the 'Rate' drop-down list, select **64**.
 - From the 'Silence Suppression', select **Disabled**.
4. Click **Submit**.

2.4 Assigning User Name to FXS Port

The procedure below describes how to assign a User Name to the FXS Port.

➤ **To assign user name to FXS port:**

1. Click **Configuration > VoIP > GW and IP to IP > Hunt Group > Endpoint Phone Number**; the Endpoint Phone Number Table page opens.

Figure 2-4: Endpoint Phone Number Table

Endpoint Phone Number Table				
	Channel(s)	Phone Number	Hunt Group ID	Tel Profile ID
2 →	1	User1	1	0
2				
3				
4				
5				
6				

2. For each FXS line, do the following.
 - In the 'Channel(s)' field, enter the FXS port number.
 - In the 'Phone Number' field, enter the User Name in the SPS that you want to assign to this FXS port.
3. Click **Submit**.

2.5 Configuring the Hunt Group

The procedure below describes how to configure the Hunt Group.

➤ **To configure the Hunt Group:**

1. Click **Configuration > VoIP > GW and IP to IP > Hunt Group > Hunt Group Settings**; the Hunt Group Settings page opens.

Figure 2-5: Hunt Group Settings

Hunt Group ID	Channel Select Mode	Registration Mode	Serving IP Group ID	Gateway Name	Contact User
1	By Dest Phone Number				
2					
3					
4					

2. In the 'Hunt Group' field, enter "1".
3. From the 'Channel Select Mode' drop-down list, select **By Dest Phone Number**.
4. Click **Submit**.

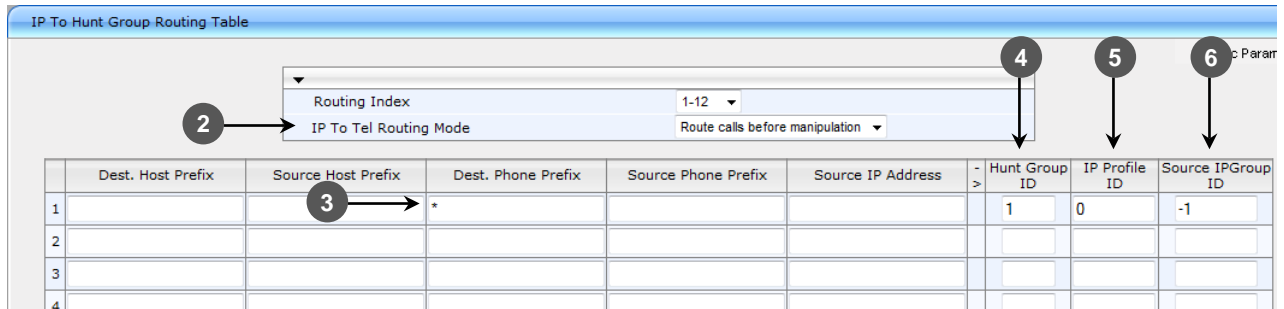

2.6 Configuring IP to Hunt Group Routing

The procedure below describes how to configure IP to Hunt Group Routing.

➤ **To configure IP to Hunt group routing:**

1. Click **Configuration > VoIP > GW and IP to IP > Routing > IP to Trunk Group Routing**; the IP to Hunt Group Routing Table page opens.

Figure 2-6: IP to Hunt Group Routing Table

	Dest. Host Prefix	Source Host Prefix	Dest. Phone Prefix	Source Phone Prefix	Source IP Address	- >	Hunt Group ID	IP Profile ID	Source IPGroup ID
1			*				1	0	-1
2									
3									
4									

2. From the **IP to Tel Routing Mode** drop-down list, select **Route calls before manipulation**.
3. In the 'Dest Phone Prefix' field, enter "*".
4. In the 'Hunt Group ID' field, enter "1".
5. In the 'IP Profile ID' field, enter "0".
6. In the 'Source IPGroup ID' field, enter "-1".
7. Click **Submit**.

2.7 Configuring Port Authentication

The procedure below describes how to configure Port Authentication.

➤ **To set port authentication:**

1. Click **Configuration > VoIP > GW and IP to IP > Analog Gateway > Authentication**; the Authentication page opens.

Figure 2-7: Authentication

Authentication		
Gateway Port	User Name	Password
Port 1 FXS	<input type="text" value="User6"/>	<input type="password" value="*****"/>
Port 2 FXS	<input type="text"/>	<input type="password"/>
Port 3 FXS	<input type="text"/>	<input type="password"/>
Port 4 FXS	<input type="text"/>	<input type="password"/>
Port 5 FXS	<input type="text"/>	<input type="password"/>
Port 6 FXS	<input type="text"/>	<input type="password"/>

2. For each of the FXS ports do the following:
 - In the **User Name** field, enter the User Name in the SPS that you want to assign to this FXS port.

Note: The user name is case sensitive and must be the same as the user name that was created in the SPS Admin.

- In the **Password** field, type the SIP Password that was defined in the SPS.
3. Click **Submit**.

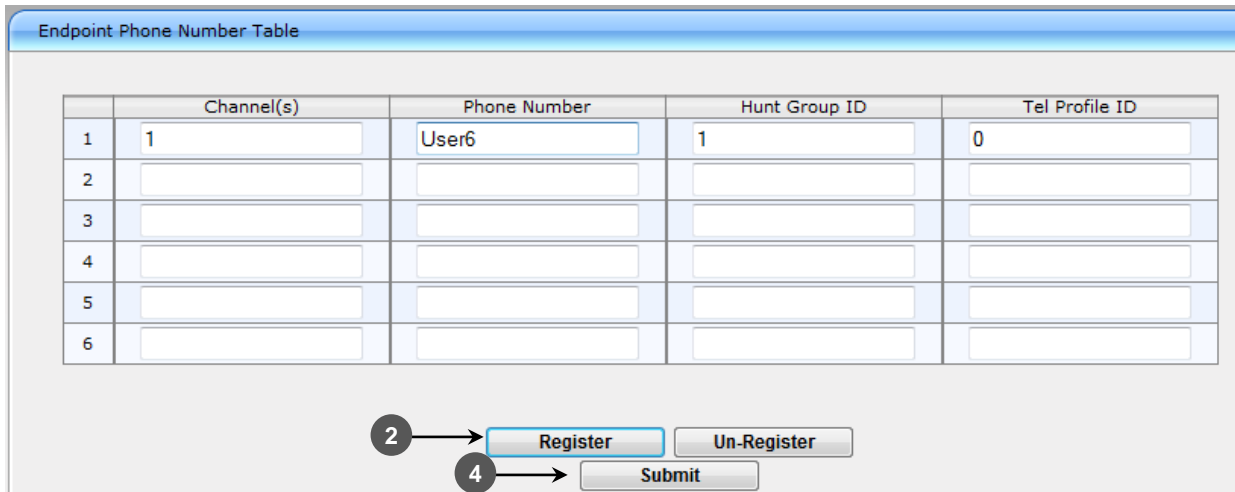

2.8 Registering the FXS Port

The procedure below describes how to register the FXS port.

➤ **To register the user name to FXS port:**

1. Click **Configuration > VoIP > GW and IP to IP > Hunt Group > Endpoint Phone Number**; the Endpoint Phone Number Table page opens.

Figure 2-8: Endpoint Phone Number Table

	Channel(s)	Phone Number	Hunt Group ID	Tel Profile ID
1	1	User6	1	0
2				
3				
4				
5				
6				

2 →
4 →

2. Click **Register**.
3. Verify in the SPS Web interface that the FXS port was registered.
4. Click **Submit**.

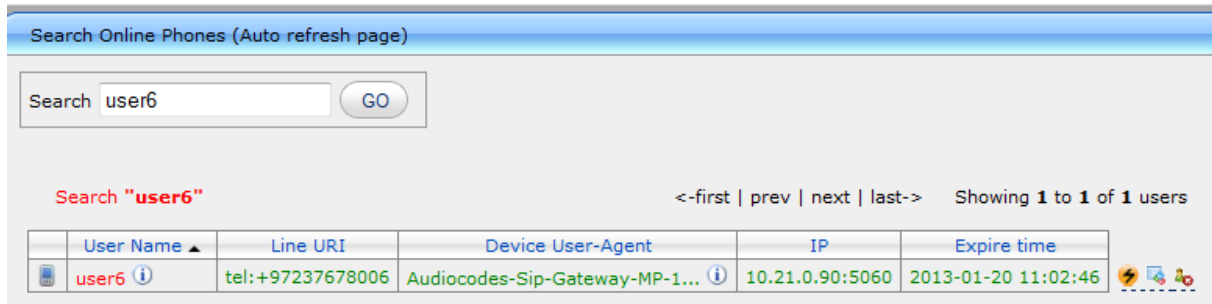

2.9 Verifying FXS Port Registration in the SPS

The procedure below describes how to verify FXS port registration in the SPS.

➤ **To verify FXS port registration in the SPS:**

1. In the SPS Web Admin, click **Status & Diagnostics > System Status > Phones Status**; the Search Online Phones page opens.

Figure 2-9: Search Online Phones

User Name	Line URI	Device User-Agent	IP	Expire time
user6	tel:+97237678006	Audiocodes-Sip-Gateway-MP-1...	10.21.0.90:5060	2013-01-20 11:02:46

2. In the 'Search' field, enter the user name and click **GO**. The search results show that the user is registered and displays the user's online status.
