VEHICLE
DATABASE

INTRODUCTION

AUTOLEADS

Autoleads is one of Europe's leading manufacturers of in-car entertainment and communication integration products. Specialising in providing and developing a range of aftermarket fitting solutions for audio, visual and cellular products designed to enable quick and easy vehicle installation.

Supplying one of the largest, most comprehensive product ranges in the industry, Autoleads remains the recognised market leader in the UK. Rigorous maintenance of our product databases and an ongoing commitment to and investment in the research and development of products at our UK based facilities has cemented us in this position.

VEHICLE DATABASE

The Autoleads vehicle database lists all products relating to vehicle fitment.

From Telemute leads and Facia panels to Replacement masts, Stalk adaptor kits and much, much more. The comprehensive Autoleads vehicle database is ordered by vehicle manufacturer and designed to make finding and selecting the correct parts for specific vehicles as simple as possible.

However, we all know that the automotive industry is constantly launching new cars and revamping existing models so if you can't find what you're looking for here always check the Autoleads Product Finder for the most up-to-date product information.

Please refer to <http://productfinder.autoleads.co.uk>

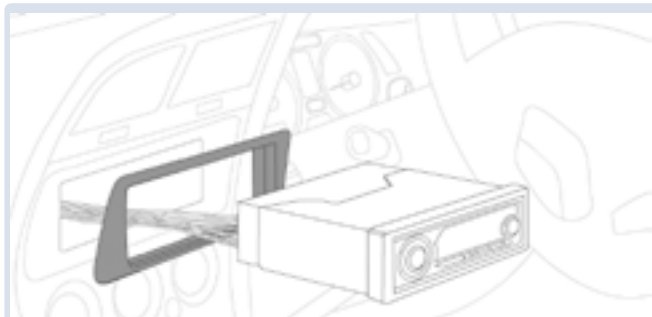

Keep a look out for this icon to highlight some last minute brand new lines.

VEHICLE DATABASE

Here is a breakdown of the product categories that you will find in this chapter, and a brief run-down as to the uses and features of these product types. Please note that this chapter is ordered by Vehicle Manufacturer, so when looking for a product, first look up the manufacturer for the vehicle in question.

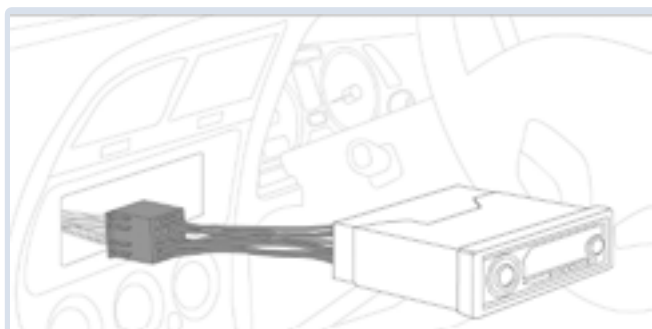

FACIA ADAPTORS:

Facia Adaptors convert the aperture left after removing the original manufacturer's head unit to suit the standard DIN (FP) and Double DIN (DFP) sizes used by the majority of aftermarket head unit manufacturers, whilst retaining the original visual appearance of the dashboard.

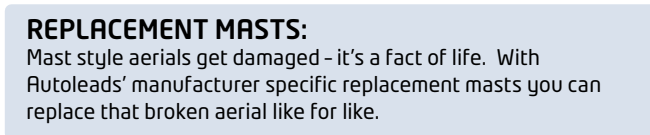

ANTENNA ADAPTORS:

An Antenna Adaptor is needed when replacing the original factory fitted head unit with an aftermarket head unit. Antenna Adaptors are available in both ISO, DIN and Fakra versions.

HARNESS ADAPTOR LEADS:

Harness adaptors connect the head unit to the original radio connector without the need to cut any of the existing wiring. PC2-xx-4 are for conventional speaker systems and PC9-4xx are for high specification cars that have an amplified speaker system fitted as standard. This product range can be purchased in either blister packs or in bulk. If you require any of these products in bulk, please replace 'PC' with 'O' when ordering (ie. PC2-85-4 will become O2-85-4 as bulk stock).

REPLACEMENT MASTS:

Mast style aerials get damaged – it's a fact of life. With Autoleads' manufacturer specific replacement masts you can replace that broken aerial like for like.

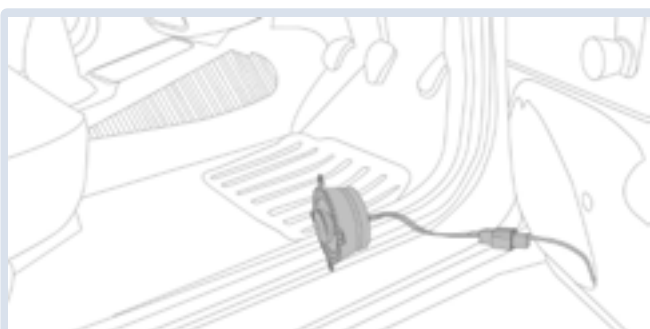

SPEAKER ADAPTOR KITS:

Autoleads' speaker adaptor kits allow standard size speakers (100mm, 130mm, 165mm and 6" x 9") to be fitted into the original apertures of your car audio system. Wiring harnesses are included in the kits where necessary.

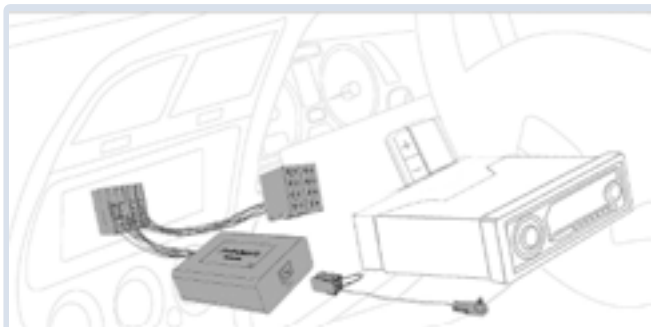

STEREO REMOVAL:

Many manufacturers incorporate special locking mechanisms into their head units in an attempt to prevent stereo theft. This means that to remove one of these units you will require a manufacturer specific stereo removal key to prevent damage to the head unit or the surrounding facia and cage.

SPEAKER ADAPTOR LEADS:

The Speaker Adaptor Leads connect the aftermarket speakers to the original speaker connector without the need to cut any of the existing wiring. All Speaker Adaptor Leads come in pairs.

STALK ADAPTORS:

These will enable the customer to use existing OEM steering wheel controls with an aftermarket head unit. The range of connectivity products allow data to be taken from an internal BUS system of the vehicle to allow information such as speed sense, ignition sense and telemute input to be used, and consists of PC99, PC29, PC30 and PC31 stalk adaptors.

PC99 & PC29:

These stalk control modules work on resistive BUS system vehicles, though some CAN BUS systems will be supported.

PC30:

These are designed to integrate with complex CAN BUS systems and will also multimedia outputs such as ignition, speed pulse, handbrake and illumination (dependant on vehicle).

PC31:

SARB only stalk control adaptors.

CAN BUS INTERFACING:

This is a range of connectivity products to allow data to be taken from an internal BUS system of the vehicle to allow you to utilise the following information:

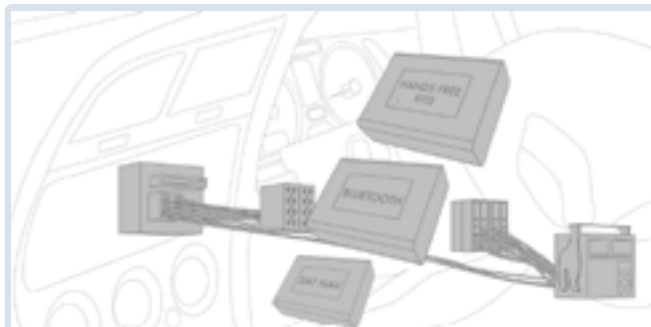

- Hand break ground trigger (for use with in car DVD, up front screen solutions)
- Reverse gear trigger (for use with rear view camera solutions)
- Speed sense (for use with some navigation devices)
- Ignition sense (for use with vehicles such as CAN/MOST with no ignition supply at head unit)
- Telemute input (a trigger which will mute the audio from the head unit/amplifier)
- Steering wheel controls (to use existing OEM steering wheel controls with an aftermarket head unit)

These will connect to the following makes of head unit.

CLARION	KENWOOD	JVC	BLAUPUNKT
PIONEER	ALPINE	CLARION	PANASONIC

SPECIAL NOTE:

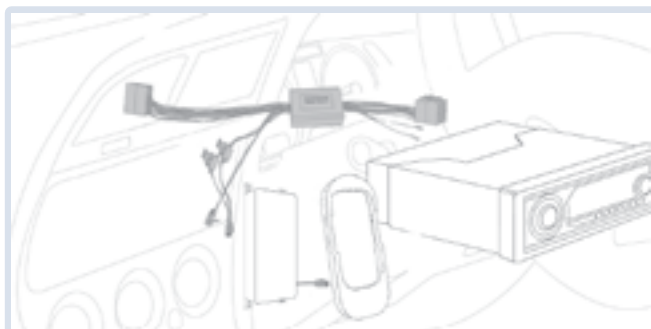

Stalk Adaptors & Can Bus Interfacing require BOTH a vehicle specific AND Head Unit Specific lead. Please see the Head Unit Database catalogue for the appropriate Head Unit adaptor lead.

SOT LEADS:

SOT Leads allow aftermarket products that are supplied with standard ISO blocks to be installed into vehicles with different connectors. Male to female conversions are ideal for satellite navigation units, hands free kits, amplifiers, tracking systems, Bluetooth devices, etc.

*New for 2010, all SOT leads are now available as retail packed product. Please add 'P' to the end of an SOT part number when ordering.

TELEMUTE LEADS:

Telemute Leads are used when installing an aftermarket hands free kit. The telemute lead will mute your head unit and redirect all calls through the vehicle's front speakers. The advantages of using a telemute lead are:

- The lead uses existing power wiring
- There is no need to install a hands-free speaker
- There is an automatic mute facility
- Reduced installation time
- The vehicle's warranty will not be invalidated.

TELEMUTE DIRECT INPUT LEADS:

Telemute Direct Input leads are required when the vehicle's stereo is going to be used to handle the audio from the handsfree kit. These leads can plug directly into the stereo or plug into an existing harness located in the vehicle. These leads will only handle the audio form the car kit and not any other operational functions.

SPECIAL NOTE:

With vehicle manufacturers making continuous changes to vehicle ranges always check the on-line **Autoleads Product Finder** to ensure you are ordering the correct parts for your vehicle.

Ignition supply needed

WARNING

Citroen Cars can use ISO connectors on their audio systems, however extreme care should be taken as these connectors DO NOT follow the standard UK connection used in many ISO harnesses. **If the supplied lead is plugged directly into the vehicle dashboard various faults may occur.** Faults may range from inaccurate dashboard readings to complete failure of the BSI unit - resulting in a costly repair.

When sourcing an ignition supply the first option should be the cigarette lighter socket. If this is unavailable or inconvenient then seek a suitable supply at the fuse box. Do not expect an ignition source at the ISO connector. The multiplexed wiring found on these vehicles do show a 12v feed at ignition on the ISO connector but this is normally a CAN wire and not ignition.

Connection to this wire is not advised as it may cause damage to the vehicles BSI unit. Please refer to the owners manual for wiring detail.

WARNING

Peugeot Cars can use ISO connectors on their audio systems, however extreme care should be taken as these connectors DO NOT follow the standard UK connection used in many ISO harnesses. **If the supplied lead is plugged directly into the vehicle dashboard various faults may occur.** Faults may range from inaccurate dashboard readings to complete failure of the BSI unit - resulting in a costly repair.

When sourcing an ignition supply the first option should be the cigarette lighter socket. If this is unavailable or inconvenient then seek a suitable supply at the fuse box. Do not expect an ignition source at the ISO connector. The multiplexed wiring found on these vehicles do show a 12v feed at ignition on the ISO connector but this is normally a CAN wire and not ignition.

Connection to this wire is not advised as it may cause damage to the vehicles BSI unit. Please refer to the owners manual for wiring detail.

Economy Electric Wing Mount Aerial

- Mast Colour: Stainless Steel
- Mast Sections: 4
- Mast Length: 960mm
- Mounting Dia.: 22mm
- Cable Length: 515mm
- Underhang Length: 310mm

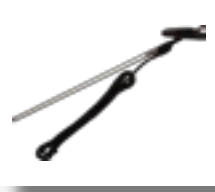

PILLAR MOUNTED AERIALS

RMA864

A-Pillar Aerial

- Mast Colour: Stainless Steel
- Mast Sections: 3
- Mast Length: 780mm
- Mounting Hole.: 20mm + 12mm
- Cable Length: 2000mm
- Underhang Length: 450mm

RMA202

3 Section Chrome Pillar Aerial

- Mast Colour: Chrome
- Mast Sections: 3
- Mast Length: 1200mm
- Cable Length: 2000mm

ROOF MOUNTED AERIALS

RMA305

Single Section Chrome-Base Aerial

- Mast Colour: Black
- Mast Sections: 1
- Mast Length: 360mm
- Mounting Dia.: 10mm
- Cable Length: 1400mm
- Underhang Length: 30mm

RMA315

Single Section Black-Base Aerial

- Mast Colour: Black
- Mast Sections: 1
- Mast Length: 360mm
- Mounting Dia.: 10mm
- Cable Length: 1400mm
- Underhang Length: 25mm

RMA807

Single Section Round Base Aerial

- Mast Colour: Black
- Mast Sections: 1
- Mast Length: 400mm
- Mounting Dia.: 10mm
- Cable Length: 1200mm
- Underhang Length: 20mm

RMA808

Roof Mount Coil Spring Aerial

- Mast Colour: Black
- Mast Sections: 1
- Mast Length: 400mm
- Mounting Dia.: 10mm
- Cable Length: 1200mm
- Underhang Length: 20mm

RMA826

Single Section Square Base Aerial

- Mast Colour: Black
- Mast Sections: 1
- Mast Length: 480mm
- Mounting Dia.: 8mm
- Cable Length: 1400mm
- Underhang Length: 20mm

RMA868

Single Section Amplified Aerial

- Mast Colour: Black
- Mast Sections: 1
- Mast Length: 380mm
- Mounting Dia.: 13mm
- Underhang Length: 15mm
