What's the difference between USB 3.1/3.0?

The USB connection is one of the most used ports on your PC or laptop to connect devices. With the release of the USB 3.1 standard, there is a lot of confusion, because there is a USB 3.1 generation 1 and 2 available.

USB 3.1 Gen1 is 100 percent the same as USB 3.0 in speed and application! The USB 3.1 Generation 1 supports transfer speeds up to 5Gbps (Super Speed). USB 3.1 Generation 2 has a maximum transfer rate of 10 Gbps (SuperSpeed Plus). USB 3.1 is compatible with USB 2.0 and 1.1.

USB chargers

More and more devices can be charged via a USB connection. With an Ewent USB charger you can charge a tablet, smartphone, bluetooth speaker, camera and more. Do you need a USB charger for charging a device in your car? Ewent also has a suitable solution for this.

Tips for choosing a USB charger:

Output current: 1A (1000mAh) Suitable for charging most smartphones

Output current: 2.1A (2100mAh) Suitable for charging a tablet or smartphone

Output current: > 2.1A. Suitable for charging multiple smartphones or tablets

Intelligent USB chargers with SMART IC technology

Ewent SMART USB chargers are equipped with a chip that continuously is monitoring the connected devices.

The smart charger will distribute the available power and provides the connected devices with the exact and correct charging current.

Fast chargers

If you have little time but you want to recharge the battery of your smartphone or tablet? Thanks to the fast Ewent USB chargers, your smartphone or tablet is quickly ready for use again. **Quick Charging Function:** This allows one of the connected devices to charge faster, even if there are several connected smartphones or tablets. Is your device is equipped with a **quick charge 3.0 chip?** Then, your smartphone or tablet charges up to 4x faster. The battery is charged from 0 to 80 percent in just 35 minutes!

Did you know?

Our Apple cables are officially certified, so they always keep working. Even after a software update.

All chargers are tested and inspected by a notified body organisation (Notified bodies such as TUV and SGS). As a result, our products meet the safety requirements of the relevant standard that is set within Europe. In addition, every new batch that we receive is tested by us in our testing room.

Laptop chargers

To find out what Ewent laptop adapter is suitable for your notebook, you can calculate the wattage of your notebook. First, check the original laptop adapter and specifications of your notebook. For example, your current laptop AC adapter has an output of 15V 3A. Multiply these values: you need a charger at least 45 watts (15V x 3A).

All Ewent laptop chargers come with a quadruple safety system that protects against overheating, over voltage, over current and short circuit. If the battery of your netbook or notebook is full, the Ewent charger automatically stops charging.

Free tips service!

Always the right tip for your laptop! Ewent offers several tips with the charger. Is your tip missing? You can easily apply through: www.ewent-online.com/spareparts. The tip will be sent for free. Due to a different loading technology, it is not possible to provide traditional laptop chargers with a Type-C tip.

Charging via the Type C port

Modern laptops are equipped with a Type-C port. If the laptop supports this, charging via the USB Type-C port is possible. This requires special laptop chargers that are equipped with USB-PD (Power Delivery).

Office supplies - Wall mounts

Create a convenient and functional solution for your TV and monitor with the **Ewent Wall Mounts**. The sturdy black wall supports are made of aluminum and steel and are finished with a powder coating.

The Ewent wall mounts are the ideal solution for mounting your TV close to the wall. All wall supports are suitable for multiple VESA mounting standards. Thanks to the supplied water level, you can always install your TV straight. The Ewent wall mounts are equipped with a security system that ensures that your TV stays securely in place.

The **Easy Tilt TV wall supports** are tiltable and the **Easy Turn TV wall supports** are also rotatable. Model numbers EW1521, EW1522 and EW1525 are equipped with a cable management system to keep all cables out of sight.

Conceptually selling ICT accessoires works

Intronics has many years of experience in selling ICT accessories in stores. We have seen a lot of trends come and go. Our sales consultants and product specialists know the market and have a good understanding of the accessories which products sell well in which channel.

Intronics is brand owner of Eminent and Ewent and exclusive distributor of Samsonite

As a brand owner of Eminent and Ewent, we closely follow market developments. The short lines between brands and Intronics enable us to quickly respond to market developments. The Eminent and Ewent product specialists communicate directly with the Intronics sales teams.

For Samsonite, the market approach and personal contact with the customer was reason to choose Intronics as its exclusive partner for the sale of ICT bags in the Benelux.

Over 200 shops went ahead with our concepts

- ✓ Slick store presentation
- ✓ Always the right products
- ✓ High efficiency through low maintenance
- ✓ Great margins
- ✓ More sales in accessories through focus

Intronics has made sales of ICT accessories its expertise. Every store is different, but yet the same. Intronics collects and analyzes sales data of accessories in over 200 stores. This enables us to exactly see in which channels we which type of accessory will sell well. We are using this expertise to create standard concepts for independent store owners, retailers and system integrators' showrooms.

Customized assortment for specialized retail chains

Every store is different. Together with our sales consultants and product specialists we will create a customized proposal. We have developed successful displays to sell the products.

System integrator with a showroom?

Don't forget the accessories for additional margin

Selling an accessory is usually not the first thing a system integrator, installer or automation thinks about.

Showing accessories in a store concept attracts the attention of visitors in the showroom. Imperceptibly you will notice you are realizing additional revenue with an attractive margin.

Web store product data, images and video

With the rise of online stores, Intronics is making printed data suitable for the online channel as well. The Intronics website uses data, standardized by ourselves. The big online content platforms are asking for a lot of content.

Our product specialists recommend

We are always there for you if you want to discuss possibilities. Before, as well as during and after commissioning.

Improving WiFi signal

Wireless Internet is almost taken for granted. Nowadays, households use multiple smartphones, tablets and laptops, all connected to the WiFi network. To optimally make use of WiFi, it's recommended to have a good look at your wireless network. You'll soon find out you can optimize it by a few simple changes.

- Use Dual Band: 2.4GHz and 5GHz
- Good router for the right bandwidth
- Use a WiFi repeater
- Use a WiFi powerline adapter

Routers

Less interference by Dual Band

A solution to improving your WiFi signal can be Dual Band. Dual Band means using two different frequencies: the 2.4GHz and 5GHz frequency.

The 2.4GHz frequency is busy and used by many other devices, including microwave ovens, cell phones and baby monitors, making your wireless network prone to disruptions. By making use of the less crowded 5GHz band, your WiFi signal will be considerably more stable.

WiFi repeater

When the range of the wireless network is just insufficient to reach every spot in your house or garden, you can use a WiFi repeater. A WiFi repeater amplifies the wireless signal from a router. When there is a lot of interference on the 2.4GHz frequency in a home environment, it is convenient to use a 5GHz connection. The EM4597 Concurrent AC1200 Dual Band WiFi repeater gives the Single Band network an upgrade to Dual Band.

Switch

An Eminent network switch enables you to quickly and easily build a network. Each port of the switch can operate independently in full or half speed. Thanks to the N-Way auto-negotiation function the network switch delivers optimal performance. The networking switch can automatically choose the correct speed. The cross-over-detection ensures that any port can be connected to a different switch or hub, without having to make use of a crossover cable. Perfect for setting up or expanding a network!

IP-camera

Eminent IP cameras are ready for use in just three steps:

1. Connect the camera to the Internet.
2. Install the free Android / Apple smartphone app.
3. Scan the unique camera code and enter the password.

From now on the IP camera can be controlled with the free app.

The advantages of an Eminent IP camera:

- Great image quality day and night
- View live camera images
- No subscription required
- Easy installation: no networking knowledge required
- Receive an immediate notification upon an alarm
- Synology Surveillance Station, QNAP and Asustor Support
- Recording on Micro SD card
- Free app

Did you know?

The Eminent outdoor IP cameras are powered by a passive Power over Ethernet (PoE) solution. This means that power and data are flowing through a thin UTP cable, for which you only have to drill a small hole for the cable entry. In contrast to other outdoor IP camera brands that need a large hole for numerous cables.

Secure your home

During dark winter days and sunny holidays, it is often easy for burglars to break into your house. It's easy to think that only others are being broken into, but unfortunately the reality is different. Material things are (often) replaceable, but the feeling of insecurity and having had a stranger in your house who went through your belongings, is often the most damage.

Eminent alarm systems are easy to install and use.

- Works via the reliable GSM network (EM8617 also via WiFi)
- Adjustable and controlled with free iOS and Android app over WiFi and SMS
- No subscription needed and no fixed costs
- Send a push notification (via the internet), SMS and calls upon alarm

Eminent USB Type-C videoconverters

With the Eminent Type-C video converters it is possible to connect monitors, beamers and televisions to the USB Type-C port. This USB Type-C port, for example, of your laptop, needs to support the DisplayPort Alternate Mode (DP Alt Mode). The DP Alt Mode makes it possible to send video images via the USB port. Check if your laptop supports this.

The Eminent Type-C HDMI and DisplayPort converters support 4K (4096 x 1260) @ 60Hz. Ideal to display presentations in the sharpest resolution and to easily connect your laptop to a monitor.

The stylish Eminent Business Line Type-C products are equipped with a solid aluminum housing and made for daily use, on the road, in meeting rooms or just on your desk.

Laptop docking stations

Docking stations are being used more and more within companies to create flexible work spots. The monitors, network connection, keyboard and mouse stay on the desk and are connected to the docking station. The laptop should be connected with just one cable via the USB port to the docking station. This makes your own laptop a complete work area.

USB Converters and USB Boosters

Not all devices are equipped with a USB port. In particular, the serial connection is still widely used in business and industrial peripherals. A reliable USB converter is necessary. In a business environment, USB peripherals such as a printer or scanner are often further away from the computer. To make the USB signal work reliable over a longer distance the USB cable has to be extended and a USB booster cable is needed.

AV Extenders, Switches and Splitters

AV solutions are used in meeting rooms, waiting rooms and in companies to show presentations and information on screens. These screens are often placed from a distance of the source so that they use extenders or want to switch between multiple sources on one screen with a switch. With a splitter it is possible to display the same information on multiple screens. With the Eminent products you choose reliability in daily use.

AV Extenders

Extenders are used to send image and sound over a longer distance to a screen. For example, in a meeting room an extender is used to show a presentation on the screen. The Eminent extenders extend the signal by using a network cable (also called UTP, CAT or Patch cable). Extenders use a direct connection or via the existing IP network.

UPS

A UPS supplies the connected equipment with an uninterrupted voltage server, router or computer continues to function for a while in the event of a power failure. This allows the equipment to be securely shut down. A UPS provides a more stable voltage and frequency, and offers better protection against voltage drop, short circuit, overload, voltage fluctuations and voltage peaks.

PowerCube

The ideal tool when there are not enough power outlets available! At home, the office, during a meeting, or wherever it is often difficult to find a free power outlet to, for example, charge your laptop, tablet or smartphone. The compact design makes the available power sockets easy to reach. The PowerCube extended range allows you to place a power socket wherever you want.

Remote control your devices at home from anywhere

All devices can be controlled with the Allocacoc Smart app (available at Apple and Android stores). This app can be used to control multiple PowerCube SmartHome simultaneously from a WiFi or mobile network environment.

Create a custom power-saving plan by using the countdown and timing switches within the app. You can easily share the smart socket with family members and friends. Add multiple devices to a scenario, and execute these scenarios with the click of a button.

You can switch the PowerCube SmartHome on or off by giving a command to an Alexa, Google Assistant or Tmall Genie compatible speaker.

To protect valuable electrical equipment against over-voltage and high current surges.

Overvoltages

Overvoltages are all voltages, which briefly exceed the limit of the AC network. Overvoltages can not only enter via the 230V mains, but also through devices connected via phone or antenna cables. Without an effective protection, these overvoltages can destroy sensitive electronic elements in the circuit area of the device. For example, switching pulses, strong motors, welding equipment or large electrical devices are able to cause surges. Indirect lightning can be even more dangerous by causing a huge power surge. For unsecured electrical appliances, this definitely means the end.

Power surge filter

With a power surge filter, you are protecting devices against destruction by overvoltage and high current surges, from indirect lightning or power surges in our mains. That means protection for sensitive electronics in PC, HIFI, TV and video equipment and also prevents the loss of valuable data in PCs, hardware and software.

Anti-interference filter

By using an anti-interference filter, you can protect connected equipment against current pulses from the power network. You also prevent interference from these devices in the network. High frequency current pulses can result in data loss or result in error messages at PCs, or create tone or visual disturbances in HIFI or TV and video equipment.

The banner features three red circular icons with white lightning bolts and plug symbols, labeled '1,5 m', '1,8 m', and '3 m'. To the right are four gold shield-shaped icons with black text: '13.500 A', '19.500 A', '30.000 A', and '60.000 A'. On the far right is a white rectangular box with black text: 'Versicherungsschutz bis zu 5 Millionen Euro für Personen- und Sachschäden im Rahmen unserer Produkthaftpflichtversicherung. Insurance cover for up to 5 million Euros for personal injury and material damage within the framework of our product liability insurance.'

Desk mounts

Optimize your workspace by using an ergonomic desk support (also called a monitor arm). With a desk mount you are saving desk space and reduce the risk of neck, back and shoulder pain because of the adjustability of the height and position of the monitor. In addition, the use of a desk mount is a nice looking solution. With a NewStar desk mount, a screen is easily adjustable and also able to rotate, swivel or tilt.

The desk mount can be installed on a desk clamp, through the desk itself or placed on a desk base. It is easily adjustable in height and depth. The NewStar desk mount is available in different colors and for a single or multiple screens.

In order to fully enjoy the potential of a monitor or flat screen TV, using a wall support is essential. A wall support allows for space saving and optimal adjustability. Placing a flat screen monitor on the wall is stylish and makes it harder to steal. In short, ideal at home as well as for corporate installations. NewStar offers plenty of choice, with a wide range of wall mounts: for small to large format flat screens and from simple, flat supports to retractable tilting and swiveling mounts.

Ewent: attractive priced patch cables

Ewent patch cables offer a good price/quality ratio. By using Copper Clad Aluminium (CCA), wherein the AWG26 wires are made of aluminum and the surface of copper, it is possible to realize a competitive price for CAT5E and CAT6 patch cables.

Patch cables CAT6 ACT

Category 6

Category 6, with a bandwidth of 250 MHz, can be used for 100 Mbps and 1000 Mbps Ethernet networks, up to a maximum length of 100 meters. 10 Gigabit Ethernet can be used for a maximum length of 55 metres. When the cables are bundled, because of alien crosstalk, the maximum length is only 37 metres. Besides Ethernet, these cables are also suitable for many other protocols, such as analog telephony, ISDN, ATM, Token Ring and RS-232 up to a distance of 100 meters.

Lockable power cords IEClock

Lockable power cords, how does it work?

- 1 - Plug the connector into the standard IEC inlet and it is locked in position.
- 2 - The connector cannot accidentally be pulled or vibrated out of the inlet.
- 3 - Slide back the red tab to release and remove the connector from the inlet.
