

HighPoint RocketRAID 2700 Series

Cost-Effective, High-Density SAS 6Gb/s PCI-E Gen 2 RAID HBA's

The Worlds Lowest Priced SAS 6Gb/s PCI-E Gen 2 HBA's

Workstations, Desktops, and Servers typically employ internal storage configurations with direct connection from the HBA to the storage devices. Storage upgrades and expansion can be costly.

The RocketRAID 2700 SAS 6Gb/s series is the industry's lowest priced Host RAID HBA product line, and delivers robust direct connectivity from 4-32 ports, with internal, external and hybrid port configurations. RocketRAID 2700 HBA's are ideal for any Workstation, Desktop or Server environment that requires high-density, high performance storage.

Storage capacities can scale and expand up to 96TB without losing existing storage investments. RocketRAID 2700 HBA's can deliver up to 19200MB/s throughput to fulfill the bandwidth requirements for a plethora high-performance storage-intensive applications.

RocketRAID 2700 HBA's support all major operating systems including Windows, Linux, Mac OS X and FreeBSD. A unified web management GUI maintains the health of storage devices and provides real-time monitoring and alert services for all storage related activities.
