

Make it simple. It's *easy* with **UniCredit.**

We UniCredit people are committed to generating value for our customers.

As a leading European bank, we are dedicated to the development of the communities in which we live, and to being a great place to work.

We aim for excellence and we consistently strive to be easy to deal with.

These commitments will allow us to create sustainable value for our shareholders.

Times change, but commitments do not. We emerged from 2009 with a renewed sense of purpose and direction. What was important to us before is even more important today. Namely, our customers.

Accordingly, we developed a new mission statement in 2009 to reinforce those principles and practices that we believe to be drivers of greater customer centricity. Emphasized in this mission is the desire to make banking as easy as possible for our customers by offering the kind of simple, straightforward solutions that can assist them in achieving their financial goals reliably and efficiently.

This is what we call “real-life banking”. It means providing our clients with more than just financial services by giving them the right support at the right time and in the right way. It is about looking our customers in the eye, working closely with them to assess their real-life needs, and then using our expertise to deliver effective solutions through smooth and easy interactions.

We believe that our rigorous dedication to simplicity and transparency will continue to advance excellence in all that we do. It will also maintain and grow the trust of our customers - a trust that is exemplified in the following pages.

This year's report features photographs and personal stories from UniCredit Group customers across Europe, highlighting the concrete role that our company has played in their lives. Each of these individuals, who represent the foundation upon which we are structuring our shared future, has told us about a time we made their life easier.

Chairman's message to the Shareholders

“ Mindful of the challenges ahead, our new Board of Directors, elected in 2009, has focused its efforts on strengthening our governance system to support strong and sustainable long-term performance. ”

Dear Shareholders,

The year ahead marks the beginning of a new cycle for the global economy, one that will bring a new set of challenges, but also opportunities for all of us. The good news is that the risk of a second Great Depression has been avoided: the global economy is back on its feet and all the major economic areas have returned to register positive growth – although a few individual countries, including some in Europe, are still in recession.

The recovery owes much to the prompt and decisive reaction of policymakers: the unprecedented stimulus of fiscal and monetary policy has played a determinant role in halting the recession. But the recovery has already begun to show important signs of self-sustainability. First and foremost, it is benefiting from the more balanced structure that the world economy has acquired over the past years. Emerging markets now constitute a large portion of the global economy, and they have been the first to regain traction, becoming the main engine of growth. In fact, the quick and robust upturn in global trade has been the most notable positive surprise, especially given the concerns, widespread only a year ago, of a surge in protectionist pressures.

Looking through the prism of our activities, the main opportunities in this new economic cycle are clear. First of all, our geographical diversification remains one of our strongest assets, especially our substantial presence as a domestic player throughout Central and Eastern Europe. Poland is the only European country that has avoided the recession and is now poised to deliver robust growth in 2010. Turkey is set to enjoy the strongest recovery in Europe this year, confirming its reputation as one of the most reactive economies in the

region. Both countries, as others in CEE, benefit from strong macroeconomic fundamentals and a robust financial system, in which UniCredit plays a key role. Second, the stronger improvement outside the Euro area favors companies that are well positioned to capitalize on foreign demand, especially in investment goods and technology. We have a responsibility and an opportunity to support their efforts and to succeed together with them in the global competition game.

The challenges ahead, however, are equally clear and concrete. The prominent role of exports reflects not only the buoyant recovery in the rest of the world, but also the sluggishness and lackluster prospects of private domestic consumption and investment in most of the Euro area. With unemployment still on the rise, consumers are understandably wary of stepping up their consumption. And corporates' investment plans are held back not only by uncertainty on future demand, but in some cases also by the higher level of debt accumulated in past years, and which now requires a gradual deleveraging effort. The still elevated corporate default rates are a reminder that the European corporate sector in general needs to keep strengthening both its balance sheets and its productivity. Supporting the corporate sector in its restructuring efforts is one of the key challenges that banks face this year.

Mindful of the challenges ahead, our new Board of Directors, elected in 2009, has focused its efforts on strengthening our governance system to support strong and sustainable long-term performance. One of the most important steps has been the development of a new compensation system, which will be submitted for approval to shareholders at this year's Annual General Meeting.

Our new executive compensation model builds on existing global best practices and incorporates the latest key recommendations of international regulatory and surveillance bodies. It combines performance incentives with safeguards to limit risk-taking and ensures that performance is measured in terms of creation of sustainable, long-term value for our stakeholders. We firmly believe it will allow us to recruit and retain talent, maximize our long-term risk-adjusted profitability in line with shareholders' interests, and bolster our reputation.

Our approach on this front has been proactive and industry leading, underscoring our full understanding of the forces shaping the financial system, as well as our readiness to take the initiative.

This same approach has underlined our reassessment of the Group's capital requirements. Thanks to the support of our shareholders, our capital increase has strengthened our financial position and afforded us the freedom and flexibility to sustain the flow of credit to the many small and medium-sized enterprises that are vital to the continued health of communities throughout Europe.

We are well aware that success springs from our reputation and business sustainability. With this in mind, we have launched the "One4C" initiative to enhance our organizational structure and to ensure that we continue to be consistently focused on our clients and their needs. In this regard, we will emphasize simplicity and transparency to improve the way we do business with our customers.

Our commitment to stakeholders is not limited solely to financial initiatives. In the aftermath of the Abruzzo earthquake in 2009, the UniCredit Group responded immediately to the human tragedy, partnering with local organizations to provide material aid and assistance to those in need. Besides, we established a current account to meet a tremendous surge of generosity, which helped raise more than four million euros in donations to support the people of Abruzzo.

I would like to express my warm thanks to our managers and employees for their dedication to our Group and for their ability to adapt to the changes we have made in response to the evolving financial environment.

I would also like to acknowledge the invaluable contributions of the members of our new Board, which includes, for the first time, two individuals selected from a list presented by minority shareholders. With a new shareholding structure, including the addition of important institutional shareholders, they have played a key role in strengthening the governance of our enterprise.

Finally, and most importantly, I wish to thank you, our shareholders, without whom we would not be where we are today.

Dieter Rampl
Chairman

HIGHLIGHTS

UniCredit Group operates in 22 countries, with over 165,000 employees and approximately 9,800 branches.

UniCredit Group benefits from a strong European identity, extensive international presence and broad customer base.

Its strategic position in Western and Eastern Europe gives the Group one of the region's highest market shares.

BRANCHES BY COUNTRY³

AUSTRIA, GERMANY AND ITALY

UniCredit Group has a strategic position in Austria, Germany and Italy. These three countries account for more than one-third of the GDP of all European Union economies combined and together comprise one of the continent's wealthiest transnational regions.

In each of these countries, GDP per capita is higher than for the European Union as a whole. And Germany is well positioned – in terms of GDP per capita – among the four largest EU economies: France, Germany, the United Kingdom and Italy.

In the wake of the unprecedented slowdown in 2009, the region's economic growth is expected to resume and continue well into the foreseeable future. Specifically, real economic growth is forecast to expand, on average, by roughly 1.6 percent in Austria, 1.6 percent in Germany and 1.2 percent in Italy on average from 2010 to 2014, representing rates in line with, or even well above, those achieved in the previous five-year period.

Exports will increasingly drive future growth. In 2009, exports in goods and services for Austria, Germany and Italy equaled 50.1, 40.8 and 24.0 percent of GDP respectively – among the highest of any EU countries. And these three nations are particularly interconnected with the expanding economies of Central and Eastern Europe (CEE).

More than half of Austrian exports and one-third of German and Italian exports outside of "Old Europe" are directed to the CEE. Furthermore, more than 100,000 Austrian, German and Italian companies are active in the CEE.

The Group's presence has grown both organically and through strategic acquisitions in these countries over the years. Ranked among the top banking network in our three core Western European countries, the Group provides access to roughly 330 branches in Austria, 780 branches in Germany and 4,700 branches in Italy.

Across Europe, UniCredit Group is refining its services by positioning its customers at the core of Group's operations. This includes the use of new client segmentation criteria designed to achieve better customer service wherever the Group operates. The first three countries to implement these changes will be Austria, Germany and Italy.

Estimated of Nominal GDP per capita within the EU27 as at December 31, 2009 (last update March 16, 2010).

2. Market Share in terms of Total Customer Loans as at December 31, 2009.

Source: Eurostat, UniCredit Research.

CENTRAL AND EASTERN EUROPE

UniCredit Group is market leader in Central and Eastern Europe, where it is one of the largest banking players, with a broad network of roughly 4,000 branches.

The Group has a long history in this region, which accounts for nearly half of all its employees. It is thus well positioned to benefit from the process of economic convergence that is generating higher living standards and a better business environment in these countries, 10 of which are already EU members and will adopt the euro in the coming years.

The CEE economies – which also include two of the five largest emerging markets in the world, Russia and Turkey, and one of the EU’s most stable and promising markets, Poland - currently account for a share of the world economy similar in size to Germany or China. This is particularly impressive considering that their combined economies amounted to roughly half the size of the German economy only a decade ago.

The Group’s footprint in this dynamic region is well diversified, with a direct presence in 19 countries. It ranks among the top 10 players in 17 countries and among the top five in 10 countries. The CEE now accounts for 13.7 percent of the Group total loans.

UniCredit Group has a proven track record of successfully integrating local CEE banks. Its market position in the CEE provides the local banks with substantial competitive advantages, including strong brand recognition, access to international markets, the sharing of best practices, and significant economies of scale. Furthermore, the Group’s diversified portfolio in this region enables modular growth and increases market penetration for its global product factories.

MARKET SHARE ON CEE³ (%)

3. Market Share in terms of Total Assets as at December 31, 2009.

BUSINESS MODEL

A model based upon four pillars:

Customer Centricity

is the focus of our Retail, Corporate & Investment Banking and Private Banking areas, which are charged with delivering specialized customer coverage to maximize long-term value and customer satisfaction.

A Multi-Local Approach

that empowers the Group's local banks to oversee our distribution networks and customer relationships.

Global Product Lines

are the value-added centers for all regions that leverage the Group's significant in-house expertise, such as Asset Management.

Global Service Lines

that supply our network coverage functions and product factories with specialized services, including Banking Back Office, ICT, Credit Collection, Procurement Services, Real Estate and Shared Service Centers.

DIVISIONAL MODEL

Strategic Business Areas

that fully leverage the Group's expertise.

CEE Divisionalization Program

that aims to achieve a "unified vision" of overall CEE business.

Business Lines

that focus on generating distinct products and services for our diversified client base.

Competence Lines

that monitor, guide and support – for their area of competence – Groupwide business activities and related risks.

OUR IDENTITY

Today's UniCredit Group is a young, multinational enterprise – the product of a number of mergers and acquisitions. Yet we benefit from the collective expertise of the banks that now comprise our Group, some of which have a long and distinguished heritage.

We have a presence in 22 countries and operate across a range of strategic business lines and customer segments. Notwithstanding this diversity, which transcends borders, cultures and markets, we aim to be one Group with no internal boundaries.

Given our size and scope, and the current era of global financial uncertainty, the core identity of our Group plays a more vital role than ever in creating sustainable value for our shareholders, serving our customers, engaging our employees, and supporting the different communities in which we live and work.

We therefore decided that it would be timely to rethink who we are and what we stand for, to redefine our mission as a Group and better express the underlying foundation of our identity.

Our Mission Statement is a public commitment – one that sets forth our goals and speaks to how we intend to grow and maintain customer loyalty while creating sustainable value for our shareholders. It is designed to guide and inspire, contributing to our corporate culture and to the shared purpose of all our colleagues.

The statement begins with “the people of UniCredit Group”, because they are the heart and soul of our company, and the ones who will carry out our commitments.

Having a sense of purpose shapes one's values, and values shape behavior.

Thus, our Mission Statement was developed to be consistent with the corporate values we set forth in our Integrity Charter: *Trust, Transparency, Respect, Reciprocity, Fairness and Freedom to act.*

These values were adopted to direct and guide each of us in the course of business, providing a framework for our conduct and supporting us to meet the challenges that arise in our daily professional lives.

The Mission Statement reinforces these values and underscores our ultimate goal of sustainability.

The promises we make and our ability to deliver on them influence how our customers and stakeholders perceive us and how they assess the depth of our integrity. And we understand that integrity is saying what you do and doing what you say.

We intend to build on our diversity and to take full advantage of what can be accomplished when all the individual components of our Group act together, with a common purpose.

Because we believe the whole can be greater than the sum of its parts.

Friedrich Frey,
Private Banking Client - Austria

«In my long experience
as a customer, decisions
at the bank have always
been made in a quick and
professional way.
I appreciate their simple
solutions for my investments,
which allow me to focus on
the important things in life.»

CEO's Letter to the Shareholders	18
2009 Highlights	20
Note to the Report on Operations and Consolidated Accounts	21

CEO's Letter to the Shareholders

“ Customer centricity can be described in two words: proximity and simplicity. Being close to our clients allows us to be attentive to their core needs and to modify our divisional business model in a way that better serves them, making it as easy as possible for customers to do business with us. ”

Dear Shareholders,

During the past year, we have made an intensive effort to transform and adapt our business to the complex and rapidly changing market. An in-depth assessment of who we are and what we do was the first step in a process to improve the way we relate to our clients. Today, we are focused on building our business around our customers.

Although the global economy is in a recovery phase, market volatility remains high as a result of the significant uncertainty that persists.

It is therefore important that we maintain our focus in managing our business in these unsettled times. Interest rates are being kept exceptionally low, as central banks continue to support liquidity. They are, however, beginning to design their exit strategies, the timing and manner of which will be crucial to the economic recovery and the profitability of a banking system that is under pressure due to the deterioration of assets and the high cost of capital.

The emerging regulatory framework, which is still a point of discussion among regulators and financial institutions, will be an important tool in reinstilling public trust in the financial system and the banking industry.

Nevertheless, stability, transparency and sustainability must be at the top of the agenda for banks and financial institutions if they are to regain credibility and their good reputations.

These are the facts. And we proactively decided to reassess our priorities, reaffirm our purpose, and rethink what it means

to be one of the most important banking groups in Europe. The result is our new Group mission statement. It sets forth our common effort on how we relate to clients in order to maintain their trust and generate sustainable value.

To us, customer centricity can be described in two words: proximity and simplicity. Being close to our clients allows us to be attentive to their core needs and to modify our divisional business model in a way that better serves them, making it as easy as possible for customers to do business with us.

This must be true for all of our clients in every country in which we operate, because we take pride in being a European bank, with European roots and a European frame of mind.

The “One4C” (“One for Clients”) initiative was our most important effort of 2009 to promote a change in our corporate culture. It was designed to channel all of our efforts to move closer to both our internal and external clients, as well as to the communities in which we operate. We will achieve these goals by investing in increased specialization and improved processes.

In addition, we will strengthen the roles of the people who daily interact with our clients, and continue to invest in their professional development.

Being closer to our customers also means assisting them when circumstances prove challenging. For this reason, in 2009, we undertook initiatives in support of families and companies in difficulty.

“Insieme 2009”, offers families the opportunity to suspend repayment of their mortgage for up to 12 months, free of charge. For companies – particularly the small and medium-sized businesses that are the engine of the economy – we have launched dedicated initiatives, including “Impresa Italia” and “SOS Impresa Italia”. The latter provides support to small business that are structurally sound but at risk of default due to the current economic situation. In the last four months of 2009, the program provided support to over 16,000 enterprises involving a general exposure of about 1.3 billion euros.

We also want to give guarantees to our stakeholders. The most important, of course, is a guarantee of our strength. We can now assure this thanks to the reduction in the weight of our non-core assets, our renewed efficiency and our capital increase, which started in 2009 and concluded in early 2010. The decision to turn to the market for this increase and the

resulting success confirmed that, even in a year of complexity and volatility, we were able to protect our reputation and retain the trust of our investors.

It is too early to expect a return to normal and we will continue to face uncertainty in 2010. However, the results we have achieved to date, thanks to the efforts of UniCredit Group colleagues and your active support as shareholders, enable me to look to the future with confidence.

We will encounter important challenges on the road ahead. But we have the determination, the capacity, the tools and, above all, the people to move forward with success.

Alessandro Profumo
CEO

2009 Highlights

UniCredit Group in 2009: strengthened capital structure, constant cost cut, net profit of €1,702 million

YEAR 2009:

- Net profit attributable to the Group: €1,702 million
- Operating income: €27,572 million, up by 2.6% y/y
- Operating profit: €12,248 million, up by 20.3% y/y
- Strengthened balance sheet structure: decreasing total assets, trading business and net interbank position, improving leverage ratio.
- Strengthened capital structure: Core Tier 1 ratio up to 7.62%, +104 bp over December 2008, post CASHES. Pro-forma Core Tier 1 ratio considering a successfully completed capital increase in February 2010: 8.47%
- Operating costs steadily improving: down by 8.2% y/y; Cost/Income ratio: 55.6%
- 2009 dividend: €0.03 per share

Q4 2009:

- Net profit attributable to the Group: €371 million (€394 million in Q3 09)
- Operating income: €6,443 million, q/q increase in net fees and commissions and reduction in the net trading, hedging and fair value income, in line with the industry trend
- Operating costs: €3,803 million, steadily down q/q
- Loan provisions: €2,068 million, cost of risk dropped for the second consecutive quarter to 146 bp
- Operating profit: €2,640 million, down from Q3 2009 due lower net trading, hedging and fair value income.
- Generation of 21bp of Core Tier 1 ratio during the quarter; capital ratios up by 7bp, also considering the effect of the dividend, which was fully recognized in the accounts in Q4.

2009

Note to the Report on Operations and Consolidated Accounts

Introduction

The **UniCredit Group's Consolidated Report and Accounts** at December 31, 2009 have been compiled under IFRS as required by Banca d'Italia Circular 262 dated December 22, 2005. These instructions lay down the Accounts tables and compilation methods, as well as the Notes to the Accounts.

On November 18, 2009 the Bank of Italy issued its first **amendment to its circular 262/2005** transposing changes to IFRS that had arisen since first publication and bringing banking financial statement schedules closer to the European harmonised IFRS-based reporting schedules required under FINREP. Please see the Notes to the consolidated accounts Part A - Accounting Principles.

The **Consolidated Report and Accounts** comprise the Balance Sheet, the Income Statement, the Statement of Changes in Shareholders' Equity, the Cash Flow Statement and the Notes to the Accounts, as well as a Report on operations, results and the Group's financial situation.

Included in this package are:

- The attestation of the consolidated accounts pursuant to art. 81-ter of Consob regulation 11971 dated May 14th 1999 as amended and supplemented.
- The external auditors' report pursuant to § 156 Law 58/1998.

UniCredit's website also contains the press releases concerning the main events of the period and the presentation to the market of the results for the period.

Within the meaning of Art. 123-bis par. 3 of Legislative Decree 58 dated February 24, 1998, the Report on Corporate Governance and Proprietary Structures is available in the "Governance" section of the UniCredit website (http://www.unicreditgroup.eu/it/Governance/corporate_governance_report.htm).

Any discrepancies between data disclosed in the Report on operations or between the Report on operations and the consolidated accounts are solely due to the effect of rounding.

General Principles Followed in the Preparation of the Report on Operations

In light of the need to ensure that in both form and content disclosure is clear, true and fair, the **Report on operations** includes information in accordance with the principles of prior-period quarterly reports including condensed balance sheet and income statement prepared following principles previously used - as required by Consob Notice 6064293 dated July 28, 2006 - a line-by-line reconciliation of these to the statutory statements is given in an annex to the Accounts - and in other interim financial statements.

The report is accompanied by a number of tables - Highlights, Condensed Accounts, Quarterly Figures, a Comparison of Q4 2009 with Q4 2008, Segment Reporting, How the Group Has Grown and the UniCredit Share - as well as a comment on Group Results.

Principles Followed for the Condensed Balance Sheet and Income Statement

The main reclassifications - of which the amounts are given in the reconciliation tables annexed to this volume were the following:

Balance Sheet

- The aggregation of Financial assets designated at fair value, Available-for-sale financial assets, Held-to-maturity financial assets and Equity investments as "Financial investments".
- Grouping under Hedging Instruments, both assets and liabilities, of Hedging derivatives and Value adjustments to macro-hedged financial assets.
- Aggregation of Deposits from customers and Debt securities in issue into a single item.
- The inclusion of Severance pay (TFR) and Technical reserves under Other liabilities.

Note to the Report on Operations and Consolidated Accounts (CONTINUED)

Income Statement

- Dividends and other income include gains (losses) on equity investments valued at net equity and do not include dividends on held-for-trading shares, which are included in trading, hedging and fair value income.
- The balance of other income/expense includes the insurance business result and other operating expense/income not including recovery of expenses which is classified under its own item.
- Payroll costs, other administrative expense, write-downs of tangible and intangible assets and provisions for risks and charges are presented net of integration costs relating to the reorganization carried out to integrate the HVB and Capitalia groups, which are shown in their own item. Write-downs of tangible assets do not include impairment losses and write-backs on investment property, which are recognized in net income from investments.
- Net income from investments includes gains (losses) and write-downs and write-backs on available-for-sale financial assets and held-to-maturity financial assets, as well as gains (losses) on equity investments and on disposals of investments.

Changes Made to Increase Comparability

In the **condensed account tables** - since the corporate transactions undertaken in 2008 made it impossible to compare the quarterly figures with those of 2007 on a like-with-like basis and in order to make comparison between the two periods significant - **balance-sheet data** for the 2008 quarters have been restated to take account of the following:

- Completion of Purchase Price Allocation (PPA) following the business combination, as disclosed in the 2008 accounts.
- Reclassification of the equity interest in Mediobanca SpA from *AfS financial assets to Equity Investments* in line with changes recognized in the governance structure of this associate.

Amounts shown at December 31, 2008 differ from those published in the 2008 consolidated accounts also due to reclassification (within Group shareholders' equity) of the "Available-for-sale asset fair value reserve ad cash-flow hedging reserve" relating to equity investments recognized using the equity method to "Capital and reserves".

With the same aim of increasing consistency and comparability, **profit and loss figures** for the quarters of 2008 have been restated following completion of PPA. Please also note that the Quarterly Figures published in the 2008 accounts already included the effects of PPA.

Starting from September 2009, the **condensed income statement** has been made consistent with accounting figures by recognizing the results of the **private equity** business as *Net Income from Investments as opposed to Net trading, hedging and fair value income*. This entailed changes in quarterly condensed profit and loss figures for Q1 and Q2 2009 and those of 2008.

In the **statutory accounts** tables under *Shareholders' Equity* starting from the opening balance as at January 1, 2008, exchange differences arising from net foreign investments in subsidiaries, associates and joint ventures have been reclassified from *Other reserves* in item 170 Reserves, to *Exchange differences* in item 140 *Revaluation Reserves*.

Consolidation Area

In 2009 there were no significant changes. Data have been restated where necessary on a comparable like-with-like basis to take account of changes in the area of consolidation, scope of operations and reclassification of assets held for disposal under IFRS 5.

Changes that occurred in 2009 refer to nineteen fully consolidated subsidiaries, which increased from 660 in 2008 to 679 in 2009, while proportionally consolidated entities decreased from 18 in 2008 to 17 in 2009.

For further details see Part A) Accounting Policies - Section 3 Consolidation Procedures and Scope and Part B) Consolidated Balance Sheet - Assets - Section 10 Investments in associates and joint ventures (item 100).

Non-Current Assets and Asset Groups Held for Disposal

The main items reclassified as per IFRS 5 under non-current assets and asset groups held for disposal at December 31, 2009 were stakes in IRFIS Mediocredito della Sicilia SpA.

For further details see Part B) Consolidated Balance Sheet - Assets Section 15.

Segment Reporting (Summary)

In late 2008 and early 2009, UniCredit Group made certain changes to its organizational model leading to three Strategic Business Areas, viz: (i) Retail Banking, (ii) Corporate & Investment Banking and Private Banking (CIB&PB), and (iii) Global Banking Services (GBS), headed by the three Deputy CEOs.

The SBAs are responsible for Business Units, which correspond to the former divisions, with the exception of Asset Management, whose Head, together with the Head of the CEE Divisionalization Program (including Poland's Markets), reports directly to the CEO.

Segment reporting is however by business division, in line with the current practice in management reporting of Group results, as follows: Retail, Corporate & Investment Banking (which consolidates the former divisions Corporate Banking and MIB), Private Banking, Asset Management, Central & Eastern Europe and Poland's Markets.

Profit and loss data are given in the items of the reclassified income statement down to operating profit, except for the CEE and Poland's Markets divisions, for which a net profit figure is given.

CIB results are reported for the first time in Q3 2009. In H1 2009 the composition of the business structures changed following transfer of the Asset Gathering business from Private Banking to Retail Banking. Prior-year profit and loss data have been restated to take these changes in scope into account.

For further information see Part L) - Segment Reporting.

Mladen Cvijetić,
Milcodoo Trn
Retail Client
Bosnia and Herzegovina

«For many years, I have been using revolving loans from UniCredit Bank Banja Luka. Last year, my company needed to provide immediate guarantees to a new supplier in Serbia. Unfortunately, at that time I was on a business trip to the Czech Republic. My bank advisor suggested that he contact my supplier and issue him a letter of intent from the bank. Thanks to our mutual trust, my business suffered no loss.»

Notes

The following conventional symbols have been used in the tables:

- a dash (-) indicates that the item/figure is inexistent;
- two stops (..) or (n.s.) when the figures do not reach the minimum considered significant or are not in any case considered significant;
- "N.A." indicates that the figure is not available.

Unless otherwise indicated, all amounts are in **millions of euros**.

Any discrepancies between data given in the report on operations, or between these data and the Accounts, are due to the effect of rounding.

1. "Full time equivalent" data (FTE): number of employees counted for the rate of presence. These figures include all employees of subsidiaries consolidated proportionately, such as Koç Financial Services Group employees.

2. These figures include all branches of subsidiaries consolidated proportionately, such as Koç Financial Services branches.

Profitability Ratios

	YEAR		CHANGE
	2009	2008	
EPS (€) ¹	0.10	0.26	-0.16
ROE ²	3.8%	9.5%	- 5.7
Cost/income ratio	55.6%	62.1%	- 6.5
EVA (€ million) ³	-1,992	-252	- 1,740

1. The 2008 EPS figure published in the consolidated report as at December 31, 2008 was €0.30 and has now been amended to €0.26 due to the increase in the number of shares following the capital increase (IAS 33 § 28). For the purposes of calculating 2009 EPS, net profit for the period of €1,702 million was changed to €1,571 million due to disbursements made in connection with the foreseen use of treasury shares agreed under the 'cashes' transaction, and charged to equity.

2. Calculated on the basis of the average shareholders' equity for the period (excluding dividends to be distributed and reserves in respect of AFS assets and cash-flow hedge), net of goodwill arising from the business combination with HVB and Capitalia, which were carried out with an exchange of shares and recorded in accordance with IFRS 3.

3. Economic Value Added, equal to the difference between NOPAT (net operating profit after taxes) and the cost of capital. 2008 figures were recasted to consider changes in computation rules.

Risk Ratios

	AS AT		CHANGE

Notes:

2008 figures published in the Consolidated Report as at December 31, 2008 were modified due to the reclassification of results of **private equity** investments from "Net trading, hedging and fair value income" to "Net income from investments".

2009 figures include the reclassification of **private equity** investments results.

1. Changes at constant foreign exchange rates and perimeter.

2. Mainly due to business combination with Capitalia.

Notes:

Interim figures of 2008 published in the reports issued during the year are modified due to the completion of PPA ("Purchase Price Allocation"). This change also modified net profit attributable to the Group in each quarter. Please note that data in the table "Quarterly figures" published in Annual Report 2008 already included the effects of this operation.

Figures published in previous interim reports (both 2008 and 2009) were also modified due to the reclassification of **private equity** investments results from "Net trading, hedging and fair value income" to "Net income from investments".

1. Mainly due to business combination with Capitalia.

Notes

Figures were adjusted, if necessary, to include changes in scope of consolidation, in scope of operations and in assets held for sale and private equity activities.

1. 2008 figures were recasted, where necessary, on a like-to-like basis to consider changes in scope of business segments and computation rules.

2. "Full time equivalent". These figures include all the employees of subsidiaries consolidated proportionately, such as Koç Financial Services.

Group Figures

UniCredit (formerly Unicredito Italiano S.p.A.) and the Group of companies with the same name which the latter heads up came about as a result of the merger, in October 1998, between the then Credito Italiano S.p.A., founded in 1870 under the name of Banca di Genova, and Unicredito S.p.A., the latter the holding company which held the controlling equity investments in Banca CRT, CRV and Cassamarca. As a result of this merger, the Credito Italiano Group and the Unicredito Group pooled the strength of their respective products and the complementary nature of the geographic coverage for the purpose of more effectively competing on the banking and financial services markets both in Italy and in Europe, thereby creating the UniCredit Group. Since its creation, the Group has continued to expand in Italy and in

Eastern European countries, both via buy-outs and via systematic growth, also consolidating its roles in sectors of important significance outside Europe, such as the asset management sector in the USA.

This expansion was recently characterized, particularly:

- by the merger with the HVB Group, achieved by means of a public exchange offer furthered by UniCredit on August 26, 2005 so as to take over control of HVB and the companies it headed up. Following this offer, finalized during 2005, UniCredit in fact acquired a holding of 93.93% in HVB's share capital;
- by the merger with the Capitalia Group, achieved by means of merger through incorporation of Capitalia within UniCredit, which became effective as from October 1, 2007.

(*) 2008 dividend was paid with cash to savings shareholders (€0,025 per share, for a total amount of €0.5m), and with newly issued shares (so called "scrip dividend").

The 2008 EPS figure published in the consolidated report as at December 31, 2008 was €0.30 and has now been amended to €0.26 due to the increase in the number of shares following the capital increase (IAS 33 § 28). For the purposes of calculating 2009 EPS, net profit for the period of €1,702 million was changed to €1,571 million due to disbursements made in connection with the foreseen use of treasury shares agreed under the 'cashes' transaction, and charged to equity.

Group Results

Macroeconomic situation, banking and financial markets

International Situation

USA/Eurozone

The end of 2009 appears to have halted the free fall in economic activity seen at the beginning of the year. In fact, the rebound in world trade helped major economies pull out of the recession. However, while on the one hand, the global recovery is under way and the risks of falling back into a recession are rather limited, in the last quarter of the year, growth seems to have lost steam, since at least a part of the temporary factors underlying recent improvement in the global economy are losing their effect. In major developed economies (USA, Eurozone, UK and Japan), signs of “endogenous” growth are still scarce, and prospects for consumption and investments remain subdued.

Despite improvement in the last two quarters, the overall situation is characterized by weak private demand: after having collapsed at the turn of the year, it impacted heavily on the growth performance for the whole 2009: in the US, GDP contracted 2.5%, and it declined 4% in the Eurozone, while Japan reported a more substantial decrease of 5.3%.

In the Eurozone, net exports and the rebuilding of inventories were the main factors that led to the recent improvement in economic growth. In fact, the summer break brought good news on the exports side: the world economy saw a rebound in global trade, which after dropping to all-time lows following the Lehman Brothers collapse was up thanks to highly expansive fiscal and monetary policies implemented by governments and central banks. Asian countries, particularly China, were the first to show signs of recovery and to provide the greatest push to the growth in trade, followed by the US and the Eurozone. In Q3 2009, eurozone exports rose by 3.1% on a quarterly basis, while imports were up by 3%. Annual changes in these components are still negative, but better than those in previous quarters (-13.5% in Q3 compared to -17.2% in Q2 for exports; -11.8% in Q3 compared to -14.3% in Q2 for imports). It should also be noted that an encouraging feature of this recovery is the high level of synchronization, increasing the chances that signs of growth will strengthen globally in succession.

The second factor that seems to have played a significant role in the recent recovery was the rebuilding of inventories: following the crisis and the unprecedented drop in demand, firms decided to slash their production and satisfy their demand out of inventories, which dropped consequently. In recent months, as a direct result of the extremely low level of inventories, it is likely that a swift upward adjustment in production occurred, aimed at satisfying further increases in external demand.

Investment remained the weak spot in this fragile economic situation, continuing the downward trend of some two years in the Eurozone

(-0.7% in 2008 and -10.8% in 2009) and in Japan (-1.6% in 2008 and -19.3% in 2009), while in the US the drop was significant, especially in 2009 (-17.8%) after moderate growth in 2008 (1.8%). Firms are still having a hard time resuming capital expenditure, and this difficulty will continue for all of 2010.

However, indicators of economic activity from business confidence surveys keep signaling a rather sustained momentum. After collapsing to historical lows at an unprecedented speed, business confidence surveys have resumed growing, and have returned to levels consistent with expansion in economic activity, following widespread improvement in all components. The most significant improvements were especially reported in new order components, which, in the Eurozone, returned to the levels prior to the economic crisis. As regards the PMI manufacturing index, in October 2009 it moved into an expansionary territory, and in December stood at 51.6, which is a long way from the low of 33.5 reported in February 2009. Similarly, in the US the ISM manufacturing index rose from 35.6 in January 2009 to 55.9 in December.

Clearly, the crisis also had a major impact on labor market conditions. The widespread reduction in manufacturing resulted in a sharp reduction in jobs. In 2009, the US economy lost a total of 4.7 million jobs (compared to 3.8 million in 2008). The decline was significant and led to a considerable increase in the unemployment rate, which hit 10%. In the Eurozone, the labor market showed greater resilience due in part to employment support schemes that limited job losses. Furthermore, even though the labor market is experiencing the first tentative signs of improvement, the major risk is that it will remain weak for most of 2010 due to the heavy underutilization of the labor force.

In terms of prices after remaining in negative territory for five months (from June to October 2009), in November inflation (the HICP index) in the Eurozone returned in positive territory figure (+0.5%) and was up by 0.9% in December due to an unfavorable base effect on energy prices (in fact, at the end of 2008, oil prices were in free fall). On the other hand, after providing a significant contribution to the decline in total inflation at the beginning of the year, in the second half of the year inflation of food products continued on a downward trend.

As for monetary policy, after bringing the refi rate to 1.00%, the European Central Bank (ECB) took several steps to provide an effective resolution of the financial crisis and to support the real economy by buying covered bonds and extending cash refinancing operations for banks in order to revitalize one of the markets most heavily hit by the financial crisis and to reopen a significant source of financing for the banking industry.

In the US, after reducing the Fed Funds rate to an all-time low (in a range of 0 to 0.25%), the Federal Reserve implemented a

“Quantitative Easing” policy by injecting liquidity into the market through the purchase of government securities, and by increasing the TALF (Term Asset-Backed Securities Loan Facility).

The first signs of improvement in economic activity brought about a euphoric reaction in equity markets, which reported increases of 20 to 30% in just over two months. At the same time, yields on the longest part of the yield curve rose significantly, hitting a level of 4% for the ten-year maturity in the US and 3.70% in the Eurozone. However, this increase in bond yields was interrupted during the summer when indications from the real economy ceased to paint a clear picture of a recovery and left the impression that the road out of the recession was still rather long.

Banking and Financial Markets

In 2009 the slowdown in lending to the private sector intensified, and at the end of the year, the growth in bank loans reached an all-time low in all major countries in the Eurozone. The sharp drop in corporate loans had a negative impact on overall lending as a result of weak demand for fixed investments and the high financial vulnerability of businesses. On the other hand, there are signs of recovery in loans to households due mainly to a reversal of the trend in loans for home purchases. The gradual decrease in lending rates had a positive impact on mortgages; this provided a boost to demand in an environment which is still uncertain from the standpoint of the supply and pricing of homes.

On the whole, loans to the private sector finished 2009 in the Eurozone with no growth, which was slightly better than the low of -0.8% y/y reported in October, but a clear deterioration from 2008 (5.7% y/y in December 2008). In all three of the Group's reference countries, positive growth rates continued to be seen in Italy and Austria, while bank loans were down by 0.4% in Germany y/y at the end of 2009. More specifically, bank loans to the private sector rose by 2.0% y/y in November 2009 in Italy (4.9% at the end of 2008) due to a steadier recovery in loans to households, which were up by 5.8% y/y in November 2009 (0.9% y/y at the end of 2008), while loans to non-financial corporations dropped by 0.5% y/y. In Austria, loans to the private sector were up by 1.4% y/y in November 2009 (8.3% y/y in December 2009) following a decrease, which, in this case, continued to affect both loans to households and loans to businesses, which rose by only 1.0% y/y (9.0% at the end of 2008).

Based on monthly statistics issued by the ECB, in Germany the growth of loans to the private sector was bolstered by a recovery in loans to households, which rose by 0.9% y/y at the end of 2009 (from -1.0% y/y in December 2008). The recovery resulted from steady consumer credit and a recovery in loans to purchase homes,

which, after being in negative territory for more than two years, rose by 0.3% y/y in December 2009 (-0.8% in December 2008). However, loans to non-financial corporations, which dropped by 3.8% y/y in Germany (7.0% y/y at the end of 2008), affected overall performance.

In terms of bank deposits, 2009 was marked by steady growth in the current account deposits of households. In general, in Italy, all deposit products remained steady with deposits from resident customers, excluding Repos, rising 12.0% in November 2009 (7.2% in December 2008). In Italy, bank bonds continued to grow although at a pace that was definitely slower than what was seen in 2007-2008 and in the first half of 2009, with an annual growth at 10.9% in November 2009 (15.6% y/y in June 2009 and 20.4% in December 2008).

On the other hand, in Germany in the second half of the year there was a gradual slowing of overall growth in customer deposits leading to an increase of just 2.8% y/y in November 2009 (7.8% at the end of 2008).

The slowdown was mainly due to a decline in time deposits (-12.7% y/y in November 2009), while current account deposits, especially those of households, continued to grow with a rise of 24.6% y/y in November 2009. Similar performance was seen in Austria where total deposits were down by 1.4% y/y in November of 2009 (6.8% y/y in December 2008) following a reduction in deposits other than current account deposits, which instead posted an increase of 13.0% y/y in November 2009 (20.0% in September 2009 and 8.4% in December 2008).

The year 2009 was also characterized by a clear reduction in rates on bank loans and deposits in keeping with the highly expansionary monetary policy implemented by the European Central Bank (-325 basis points from October 2008 to May 2009). Bank rates moved in pace with the reduction in reference rates remaining on a downward trend for all of 2009 and stood at all-time lows toward the end of the year. In Italy, the decline in interest rates on bank loans and deposits was accompanied by a gradual reduction in bank spreads (the difference between lending and deposit rates), which averaged 3.39% during the year (4.13% on average in 2008). Similarly, in Austria the bank spread declined to an average of 1.92% for the year (2.33% on average in 2008). A countertrend was seen in Germany where greater rate resistance on bank loans than on deposit rates led to a gradual increase in the bank spread (3.26% compared to an average of 2.68% in 2008).

In this situation for 2009, a bright spot was definitely seen in the recovery of equity markets after the sharp declines witnessed in 2008 at the height of the financial crisis. The Austrian stock exchange posted the greatest recovery reporting annual growth of 42.5% for all of 2009 over the year-end 2008 figure. The German market ended the year with a gain of about 24% y/y, while the Italian equity market was up by 19.5% y/y at the end of 2009. The recovery

Macroeconomic situation, banking and financial markets (CONTINUED)

in equity markets was accompanied by an upsurge in the mutual fund industry after broadly based negative performance in 2008. In this context, mutual fund assets in Italy were up by 6.8% over year-end 2008 to a level of about €430 billion; compared to year-end 2008, fund levels during the period from January to November 2009 rose by 11% in Germany and 7.7% in Austria. Since the beginning of the year, there was a net overall inflow of funds of €2.7 billion in Germany alone (excluding institutional funds). However, there was a net outflow of just €41 million in Austria, which was a major improvement over the outflow of about €15 billion in December 2008; there was also a net outflow in Italy of €3 billion in 2009, however, for the seventh month in a row, there was instead a net inflow of €1.6 billion in December alone.

CEE countries

The economies of Central and Eastern Europe (CEE) suffered significantly from the international economic crisis in 2009. In 2009, economic activity dropped by more than 6% in CEE countries (-4% in the Eurozone); at the same time, the differences in the economic performance of the various CEE countries rose substantially generally as a function of the previous overheating of the economy, the state of health of the banking industry and policies implemented to respond to the crisis. For example, the Baltic economies suffered some of the greatest GDP declines in the world, while Poland was the only country in the European Union to report GDP growth.

The tension in CEE economies increased till it peaked in March 2009: this was the most difficult period (country risk at record levels, weakness in the main currencies in the region, revisions of agency ratings), but also a significant turning point. Starting then, it appeared clear that major international institutions would use any means to support the international economy through massive stimulus programs, and if necessary, they would support any country in difficulty. The financial aid of the International Monetary Fund, in some cases provided only as a precautionary measure, supported numerous CEE countries (Ukraine, Hungary, Latvia, Bosnia, Romania, Serbia and Poland) and was in many cases combined with support provided by major international banks present in these countries (through the so-called "Vienna initiative"), and accordingly, international banks were committed to maintaining their exposure to certain countries, hence avoiding the feared "credit crunch".

Although the greatest difficulties were seen in CEE at the beginning of 2009, signs of recovery gradually started to appear in the second half: economic activity indicators rose noticeably, initially driven by rebuilding of inventories and bolstered by accommodating, growth-oriented monetary and fiscal policies. The Central European countries with the strongest ties to the German economy were those that were first to show that they were able to follow the recovery that was gaining strength in Germany and other European countries. Toward the end of 2009, country risk returned to substantially lower levels than at the beginning of the year, and several CEE currencies gradually strengthened.

Main Results and Performance for the period

2009 began in an on-going recession with continuing weakness in financial markets, but starting in the summer the first weak signs of recovery were seen.

Credit impairment required increased provisions - a further charge on banks' financials, already weakened by the reduction in traditional income.

The UniCredit Group was able to maximize the competitive advantage provided by its geographic and business diversification. In 2008 Corporate and Investment Banking had suffered under the difficult conditions of the financial markets, but this area turned in an excellent performance in 2009 and helped to offset the difficulties encountered by our commercial business lines.

The UniCredit Group closed 2009 with **net profit** of €1.7bn, €2.3bn less than 2008, but with decidedly better operating results. On a like-for-like basis, total revenues were up 7.2% and operating costs down by 5.3%.

Operating profit was up €2.1bn compared to the same period in the previous year (or by 27.5% at constant exchange rates and businesses), partly offsetting a €4.6bn increase in **net impairment losses**.

Operating profit was €12.2bn, up 20.3% (or 27.5% at constant exchange rates and businesses) over 2008. This was driven, as already mentioned, by Corporate and Investment Banking's excellent result - an increase in operating profit of €3.7bn, or 125% over 2008. Central Eastern Europe also recorded excellent operating results: its operating profit reached €2.7bn, up by 22% at constant exchange rates.

Poland was hit by a difficult macroeconomic situation (operating profit of €780m, down by 14% at constant exchange rates), as was commercial banking in Italy, Germany, and Austria, especially Retail at €2.8bn (down by 27%) and Private Banking at €236m, a fall of 35%.

By contrast, **profit before tax** declined by 39.5% (30.9% at constant exchange rates and businesses), mainly due to a sharp increase in **net impairment losses** (up by €4.6bn over 2008) resulting from a general deterioration in credit quality in the main markets. Additionally, we made higher **provisions for risks and charges** - which increased by €265m - and **integration costs** totaled €258m (up €118m over 2008).

2009 thus ended with a **net profit** of €1.7bn for the Group, down 57.6% from 2008 (or 48.7% at constant exchange rates and businesses).

Earnings per share were €0.10 cents (compared to €0.26 cents in 2008) and **ROE¹** was 3.8% compared to 9.5% in 2008.

Operating Profit Breakdown

As mentioned in the introduction, the **operating profit** for fiscal year 2009 exceeded €12bn, up 20.3% compared to 2008 (+27.5% at constant exchange rates and scopes).

Group revenues were €27.6bn, up 2.6% compared to 2008 (+7.2% at constant exchange rates and scopes). This result was driven by the positive contribution from Corporate & Investment Banking, which increased its own revenues by €3.6bn. The CEE and Poland markets recorded respective declines of 2.5% and 25.2%, although at constant exchange rates there was a positive +10.5% for the CEE and less of a decline for the Poland market (-7.3%). Among the countries of Central Eastern Europe that contributed most were Turkey (+30%), Hungary (+12%), Romania (+9%), and Kazakhstan (+7%).

Conversely, the other business sectors experienced the already mentioned weakness factors that distinguished 2008 and the first half of 2009, particularly Asset Management (-32.7% for revenues in 2009), despite the improvement in the net inflows in the second half of the year, and Retail (-14.1%), where net interest income suffered, particularly in terms of mark-down, from significantly reduced profitability due to the decline in interest rates.

1. Calculated on average shareholders' equity for the period (excluding dividends to be distributed and reserves in respect of AFS assets and cash-flow hedges), adjusted for goodwill disclosed in assets following the HVB and Capitalia acquisitions, which were carried out by means of share swaps and recognized in accordance with IFRS 3.

Main Results and Performance for the period (CONTINUED)

2009 ended with a decline of €1.4bn in **operating costs** compared to 2008, down 8.2% (-5.3% at constant exchange rates and scopes). The biggest cost reductions were realized in Retail (-7.7%), CIB (-5%), GBS (-17.1%), and in Corporate Center (-11.9%).

As a result of increasing revenues and decreasing costs, the **cost/income** ratio improved 6.5 percentage points (55.6% compared to 62.1% in 2008).

Net Interest Income

Net interest income - at €17.6bn as against €19.4bn in 2008 - for 2009 fell by €1.8bn, down 9.1% (or 5.4% at constant exchange rates and businesses), mainly due to lower mark-down in all markets.

In contrast, partly offsetting this, net interest income rose in Corporate and Investment Banking, which was able to exploit market opportunities deriving from the performance of interest rates and, more generally, of financial markets in 2009, and in the Corporate Center, due to the lower cost of funding.

Dividends and other income from equity investments, on the other hand, declined by €700m (or 69.2%), more than half of

which was due to an extraordinary dividend collected in 2008 as a result of disposal of B&C Holding GmbH profit-sharing rights. The rest was due to lower dividends and profit shares from equity investments.

Customer loans were €565bn at December 31, 2009, down by 7.8% from December 31, 2008. This contraction was mainly due to Corporate and Investment Banking customers and diminished demand for credit, especially investment finance.

At December 31, 2009 **deposits from customers and securities** were €596.4bn as against €591.3bn at December 31, 2008.

Main Results and Performance for the period (CONTINUED)

Non-Interest Income

Net non-interest income totaled €10bn at December 31, 2009, up by 32.9% (39.9% at constant exchange rates and businesses) over December 31, 2008. This item includes a shift in favor of **Net trading, hedging, and fair value income** which was €1.8bn as

against a loss of €2bn in 2008, while **net fees and commissions** declined by 14.4% (10.7% at constant exchange rates and businesses) to €7.8bn from €9.1bn in 2008. However, the quarterly changes indicate a reversal of the trend: in Q4 2009 fees and commissions were up by 9.5% over the previous quarter.

Net non-interest income

Recovery of expenses	463	557	- 94	-16.9%
Amortisation, depreciation and impairment losses on intangible and tangible assets	- 1,281	- 1,312	31	-2.4%
Operating costs	- 15,324	- 16,692	1,368	-8.2%

Payroll costs were €9.1bn, a decline of 8.3% (5.8% at constant exchange rates and businesses) compared to 2008; this drop is attributable to reductions in both staff numbers and variable compensation.

The **full-time equivalent headcount** at December 31, 2009 was 165,062 employees, with a reduction of 9,457 employees since the beginning of the year.

Reductions from December 31, 2009 were mostly concentrated in:

- Retail: a reduction of 2,756 employees, of whom 2,157 in Italy within the scope of the union agreements reached on absorbing the Capitalia Group.
- CIB: a reduction of 1,018 employees, of whom 423 in Italy.
- CEE: a reduction of 3,729 employees, mainly in the Ukraine (1,706), Kazakhstan (726), Turkey (681) and Romania (269).
- Poland's Markets: a reduction of 1,136 employees.

Other administrative expenses

Operating costs (Operating costs, € billion)

- Asset Management: a reduction of 203 employees, as a result of the restructuring of the business segment.
- GBS: a reduction of 205 employees, as a result of the synergies produced by concentrating IT and back-office activities.
- Corporate Centers: a reduction of 336 employees, as a result of the rationalization in progress.

Other administrative expenses amounted to €5.4bn - a reduction of 10.2% from 2008 (7% at constant exchange rates and businesses), due to the effect of ongoing measures taken to rationalize expenses and specific managerial initiatives implemented during 2009 to deal with the difficult economic situation.

Most of the reductions were concentrated in advertising, marketing and communications costs (cut by €151m), ICT costs (cut by €132m), indirect costs relating to personnel, including business travel, training, and leases (cut by €120m).

Miscellaneous costs and expenses % breakdown

Recharges were €463m in 2009, a reduction of 16.8% at constant exchange rates and businesses from 2008, while amortization, depreciation, and **impairment losses on intangible and tangible assets** declined 2.4% but slightly increased on a constant basis (by 1.6%).

Goodwill Impairment

No circumstances occurred that entailed **goodwill impairment losses**.

Provisions for Risks and Charges

Provisions for risks and charges amounted to €609m, mainly due to legal and tax disputes, clawback petitions, and customer disputes.

Integration Costs

Integration costs in the period amounted to €258m, compared to €140m in 2008. Besides the time value effect on the stock of existing funds, these costs were also connected with the restructuring processes involving especially Retail and Corporate and Investment Banking.

Net Impairment Losses on Loans and Provisions for Guarantees and Commitments

Despite the economy's first steps toward recovery, deterioration in the macroeconomic scenario continued to affect loan quality, resulting in the need for larger provisions for credit risks. In 2009 net impairment losses on loans plus **provisions for guarantees and commitments** amounted to €8.3bn, compared to €3.7bn at December 31, 2008. This increase involved all business sectors, particularly CIB (a rise of €2.3bn), Retail (+€520m) and CEE (+€1.2bn).

Asset quality data confirm the trend observed. The carrying value of impaired loans was €31bn, an increase of 56.6% over December 31, 2008, accounting for 5.50% of customer loans, compared to 3.24% at December 2008.

The €11.2bn increase in impaired loans included €2.2bn in non-performing loans, €5.4bn in doubtful loans, €2bn in restructured loans and €1.6bn in past-dues. The increase was mainly due to Group entities operating in Italy, which recorded an increase of some €8.5bn, and to a lesser extent to those operating in Germany (+€1.1bn) and in Central Eastern European markets (+€1.4bn).

Net Income from Investments

Net income from investments was €232m in 2009, the combined result of gains on disposals and write-downs of equity investments.

Transactions that generated profits in 2009 included:

- transfer of part of the Group's property portfolio to a closed-end real estate fund, the Core Nord Ovest fund, with the subsequent sale of a majority of the equity, generating a capital gain of €165m;
- the disposal of the equity shares held in the Omicron Plus fund, generating a capital gain of €461m;
- other disposals for a total amount of €68 million;
- Among the other principal assets disposed of in the first half of the year, gains were realized on Heidelberg Cement (€45m), Banco de Sabadell (€30m), Mastercard (€22 million), Si Holding (€15 million), DAB (€17m);

- the main write-downs made in 2009 included private equity funds (-€231m), Deutsche Schiffsbank (-€71m), Banco de Sabadell (-€52m) and Kinabalu Financial Products (-€26m).

Profit before Tax

Operating profit for 2009 of €12.2bn less **provisions for risks and charges** (-€609m), **net impairment losses on loans and provisions for guarantees and commitments** (-€8.3m), **net income from investments** (€232m), and **integration costs** (-€258m) gave **profit before tax** for 2009 of €3.3bn (as against €5.5bn in 2008).

Main Results and Performance for the period (CONTINUED)

Profit before Tax by Business Segment

The following table shows how profit before tax was generated in each business segment starting from operating profit; please see the respective sections for an analysis of individual items.

Income Tax for the Year

Income tax for the period amounted to €1bn, with a tax rate of 30.6% compared to 11.5% in 2008.

Profit (Loss) for the Period

Profit for the period of €2.3bn, less minorities (-€0.3bn) and the economic effects of Purchase Price Allocation mostly arising from the acquisition of the Capitalia Group (-€0.3bn), gives a net profit of €1.7bn attributable to the Group (as against €4bn in 2008).

Reconciliation of the Parent Company's Accounts to the Consolidated Accounts

The shareholders' equity of the Group, including profit for the period, amounted to €59.7bn at December 31, 2009, compared to €55.0bn at December 31, 2008.

The following table reconciles the Parent Company's shareholders' equity and net profit to the corresponding consolidated figures.

Capital and Value Management

Principles of Value Creation and Disciplined Capital Allocation

To create value for the shareholders, the Group's strategic guidelines are aimed at optimizing the composition of its business portfolio. This goal is pursued through a process of capital allocation to each business line in relation to its specific risk profile and ability to generate extra income measured as EVA, which is the main performance indicator related to TSR (Total Shareholder Return). The development of Group operations with a view to value creation require a process for allocating and managing capital governed by different phases in the process of planning and control, articulated as:

- Formulation of the proposed propensity for risk and capitalization targets;
- Analysis of the risks associated with the value drivers and resulting allocation of capital to the business lines and to the Business Units;
- Assignment of performance targets in line with risk;
- Analysis of the impact on the Group's value and of the creation of value for shareholders;
- Drafting and proposal of the financial plan and dividend policy.

The process of allocation is based on a "dual track" logic, i.e., the higher amount as between economic capital and regulatory capital (Core Tier 1) is allocated at the consolidated level and for each business line/Business Unit.

If economic capital is higher, this approach makes it possible to allocate the real risk capital that the Supervisory Authority does not consider yet and, if regulatory capital is higher, to allocate capital in accordance with the regulatory rules.

1. Global Banking Services, Corporate Centre, inter-segment adjustments and consolidation adjustments not attributable to individual segments.

Capital Ratios

The Group dynamically manages its capital by monitoring regulatory capital ratios, anticipating the appropriate changes necessary to achieve its targets, and optimizing the composition of its assets and equity. Planning and monitoring refer, on the one hand, to shareholders' equity and the composition of regulatory capital (Core Tier 1, Tier 1, Lower and Upper Tier 2, and Tier 3 Capital) and, on the other hand, to the Risk-Weighted Assets (RWAs).

With the introduction of Basel 2, the latter aspect assumes even greater importance. In fact, calculating the Risk-Weighted Assets for portfolios managed using the Advanced model not only depends on the nominal value of the assets but also on the relevant credit parameters. Besides volume dynamics, it also becomes crucial to monitor and forecast the change in the loan quality of the portfolio in view of the macroeconomic scenario (the so-called pro-cyclical effect).

For each fiscal year the Group sets a Core Tier 1 ratio target ensuring that its credit rating is in line with the major international banking groups.

The Core Tier 1 Ratio (Basel 2) at December 2009 was 7,62%. The Tier 1 Ratio and Total Capital Ratio, respectively, were 8,63% and 12,02%. Considering the effect of the capital increase announced on September 29, 2009, and closed on February 23, 2010 the ratios would be: Core Tier 1 Ratio 8,47%, Tier 1 Ratio 9,49%, Total Capital Ratio 12,88%.

Capital ratios (€ million)

Values restated considering the inclusion in Tier 2 Capital of the portion of the translation reserve associated with foreign net investments, re-computing the deductions for fair values changes due to differences in own credit rating, and re-calculating the intercompany components of subordinated debts.

2009 After Capital Increase figures include the capital increase announced on September 29, 2009 and concluded on February 23, 2010.

Capital and Value Management (CONTINUED)

The recent crisis, by which the financial markets were affected, has given rise to intense ongoing debate on the need to revise, in a more restrictive sense, the rules for measuring capital and the capital ratios imposed by Basel 2. In this context, the Basel Committee on Banking Supervision, implementing the recommendations approved by the **Financial Stability Board** and by the G20 leaders at the September meeting in Pittsburgh, published two advisory documents on December 17, 2009 on proposals for modifying the prudential

rules on bank capital and liquidity. Based on the comments received and the evidence gathered from an impact study recently carried out, the Basel Committee will make the necessary refinements to the proposals and issue a final version by the end of 2010. Before acceptance on a national level, the new rules will be subjected to the usual process of legislative review by European institutions. The Basel Committee intends the new rules to enter into force by the end of 2012.

Shareholders' Equity Attributable to the Group

The **shareholders' equity of the Group**, including the profits of the period (€1,702m), amounted to €59,689m at December 31, 2009, compared to €54,999m at December 31, 2008.

The statement of changes in shareholders' equity between the two fiscal years is given in notes to the accounts, Part B) – Section 15 gives further details on this matter.

The following table shows the main changes that occurred in 2009.

Results by Business Segment

The 2009 results by business segment, as shown in the following Table and commented on in subsequent sections, are presented in the form currently used for reporting Group results to Management.

Differences from 2008 segment reporting are that the former Corporate Banking and MIB divisions have been aggregated in Corporate & Investment Banking and that Asset Gathering has been transferred from Private Banking to Retail Banking. Prior-year profit and loss data have been restated to take these changes into account.

UniCredit Group's **Retail Strategic Business Area**¹ focuses primarily on meeting the financial requirements of Mass Market, Affluent and Small Business customers. The Retail SBA's fundamental role is to enable individuals, households and small business customers to satisfy their financial needs by offering a complete range of high-quality, reliable products and services at competitive prices.

In addition to the three new Italian commercial banks created on November 1, 2008 (**UniCredit Banca**, **UniCredit Banca di Roma** and **Banco di Sicilia**), the Retail SBA includes the retail business areas of **UniCredit Bank AG** in Germany and **UniCredit Bank Austria**.

Furthermore, the Retail SBA also includes **UniCredit Family Financing Bank**, established in January 2009 by the merger of UniCredit Consumer Financing, a Group company specializing in consumer credit, and UniCredit Banca per la Casa, specializing in the business of residential mortgages. The new bank Group supports the Retail banks with solutions which meet the diverse financing needs of families.

Finally, since May 2009, the Retail SBA also has also included **Asset Gathering**, the business area specializing in private retail customer deposits through the online channel and the network of financial consultants. Asset Gathering works through **FinecoBank** in Italy, **DAB Bank** in Germany and **DAT Bank** in Austria; these banks offer the banking and investment services of traditional banks, but set themselves apart by specializing in the online trading business and by an outstanding vocation focus on technological innovation.

¹ The introduction describes the main organizational changes and main business areas and/or legal entities that make up the Retail Strategic Business Area Retail, also called Retail SBA. The Financial Performance section reports the Retail SBA's overall results based on the scope of consolidation as at 2009. Results of 2008 are aligned with the new consolidation scope to ensure comparability.

Financial performance

The figures for the closing months of 2009 gave some signs of economic improvement. In the wake of the global recovery even the average economic growth of the eurozone countries should return to positive territory in 2010, albeit with more modest economic growth than in the recent past.

The 2009 results were still influenced by the effects of the financial crisis and the economic slowdown in Europe, which have generated the worst economic environment of recent years, and which have

reflected unfavorably on the solvency and demand for new credit from customers. Particularly in the period observed, the Retail SBA results were affected by the extreme conditions of market rates by the turmoil in the financial markets which impaired revenues, and by the deterioration of the credit scenario which led to a worsening of banking assets.

The Retail SBA's operating profit was affected by the trend of **operating income**, which amounted to €2,274 million in the fourth quarter of 2009, down from the fourth quarter of 2008. The progressive value of 2009 totaled 9,846 million (-14.1 % y/y).

Retail (CONTINUED)

This result was strongly affected by the negative performance of **net interest income**, due to the sharp decline in rates, which led Euribor to an all-time low (at the end of December one-month Euribor fell to 49 basis points from 310 basis point of December 2008, which means an average decrease of more than 341 basis points in 2009 compared to 2008).

This phenomenon of progressive reduction in market rates has adversely affected the profitability of the Retail SBA arising from the spread over deposits, partially mitigated by positive results stemming from hedging on interest rates.

Measures concerning the abolition in Italy of a maximum overdraft fee generated a further decline in net interest income on loans penalizing the result in the second half-year.

In 2009 the Retail SBA also registered a decline in commissions resulting from trading and assets under management and administration due to the unfavorable market trends and low risk appetite of customers following the financial market crisis.

This decline was partially offset by the positive contribution of the commitment commission which, from July as provided by the so-called "anti-crisis decree", replaced the previous calculation method commonly defined "maximum overdraft commission". The fourth quarter of 2009 showed a recovery in commission compared with the same quarter of the previous year.

This growth of commissions in the fourth quarter was generated mainly by the increase in fees related to assets under management and administration due to the recovery of financial markets concentrated in the second part of the year.

Operating costs stood at 7,026 million at the end of 2009, down 7.7% from the previous year, despite the increases due to the industry-wide agreement in Italy. The reduction is attributable to payroll costs, which decreased due to the downsizing plan especially in Italy, following the Group's integration of the former Capitalia banks. The number of **FTE**² of the Retail SBA on December 31, 2009, in fact, decreased by 2,756 units (-5.3%) compared with late 2008, concentrated mainly in Italy. Cost containment measures also applied to other administrative expenses, decreased in 2009 due to a reduction plan.

The **cost/income ratio** of December 2009 stands at 71.4% from 66.4% in 2008 due to the reduction in revenues partially offset by greater cost management efficiency.

Retail SBA's **operating profit** of EUR 2,821 million showed a decline of 26.8% compared to 2008. In terms of the contribution of the

three countries to the Retail SBA's total profit, it highlights Italy's considerable contribution, which generated 83% of the overall operating profit in 2009, while Austria and Germany contributed the remaining 17%.

Profit before taxes was affected by the negative trend of the **net write-downs on loans** which in 2009 recorded a sharp increase compared with the previous year, totaling €1,700 million compared to €1,179 million in 2008 (+44.1% y/y). This increase, entirely attributable to the Italian portfolio, is due to the progressive credit deterioration following the financial crisis, affecting both private individual and small business portfolios, which recorded default rates of around 25% higher than last year. The €314 million write-downs recorded in the last quarter of 2009 showed a significant decline in respect to the previous quarter and the fourth quarter of 2008 (nearly -20%) due to the benefits generated by the two programs of economic support launched in Italy at the end of the first quarter and due to the reduction in the cost of discounting of net impaired loans through the adjustment of the interest rates used.

The Retail SBA achieved a **profit before tax** in 2009 of €945 million, a decline on the previous year (-68.8%) closing the fourth quarter of 2009 with €217 million of profit before taxes with an increase of 30.4% compared with the previous quarter.

With regard to credit quality, in December 2009 the Retail SBA reported an **annualized cost of risk** of 98 basis points, an increase of 34 basis points compared with December 2008 as a result of increased net write-downs due to the worsening credit scenario over the last 12 months and the decrease of average credit volumes.

With the aim of creating shareholder value, the Retail SBA has continued to implement a number of actions to ensure an efficient capital allocation that has allowed it to generate positive **EVA** amounting to €130 million in 2009, although lower than 2008.

At the end of December 2009, the Retail SBA totaled nearly €168 billion of **loans and receivables with customers**, with a decrease in the fourth quarter of approximately €1 billion compared with the previous quarter which led to a decline compared to December 2008 of approximately €12 billion (-6.8%), confirming the downward trend that has characterized the entire banking system. The Retail SBA strategy in the area of credit management was to continue to provide, albeit in a context of severe downturn in the economic cycle, adequate financial support to business initiatives and the needs of households without neglecting an attentive assessment of the creditworthiness.

The stock of **deposits from customers** of the Retail SBA, representing deposits and securities in issue, at the end of December 2009 amounted to nearly €236 billion, with a decline of about €2 billion compared with the previous quarter, but increasing of €20 billion (+9.3%) from the start of the year. Not including in Italy the

2. FTE - Full Time Equivalents

bond issue of UniCredit Family Financing Bank (aimed to fund the mortgages and consumer credit stock from commercial banks), the real growth in direct deposits of the Retail SBA was €14 billion.

This is the result of stronger customer preference towards simpler and more secure products and it has contributed to the Group funding in an environment characterized by uncertainty on the interbank market. Germany and Austria recorded respectively a decrease of 3.2 and 5.7 billion from 2008, the latter influenced by the shift of customers from Retail SBA to Private Banking as a consequence of the new segmentation criteria introduced in the last quarter of 2009.

Efforts to help strengthen the Group balance sheet, allowed a reduction in RWA in December 2009 of approximately €2 billion compared with 3Q 2009 and €12 billion compared to 2008, thanks to a combination of a decline in the volume of loans, an extension of internal rating models ("Internal Rating Based" methodology) to the Ex-Capitalia banks and the refinement of methodologies for calculating the RWA.

Breakdown by business, geographic area and company

Summary projects in 2009

The two graphs show the contribution of the three countries to the composition of the Retail SBA's financial assets and loans, broken down by product. At the end of 2009, of **total financial assets** of around €377 billion, **Italy** contributed 69%, **Germany** 21% and **Austria** 10%. **Italy** registered a greater penetration of indirect deposits (61%), while in **Germany** and **Austria**, countries characterized by higher rates of savings deposits, the weighting was at 59% and 30% respectively.

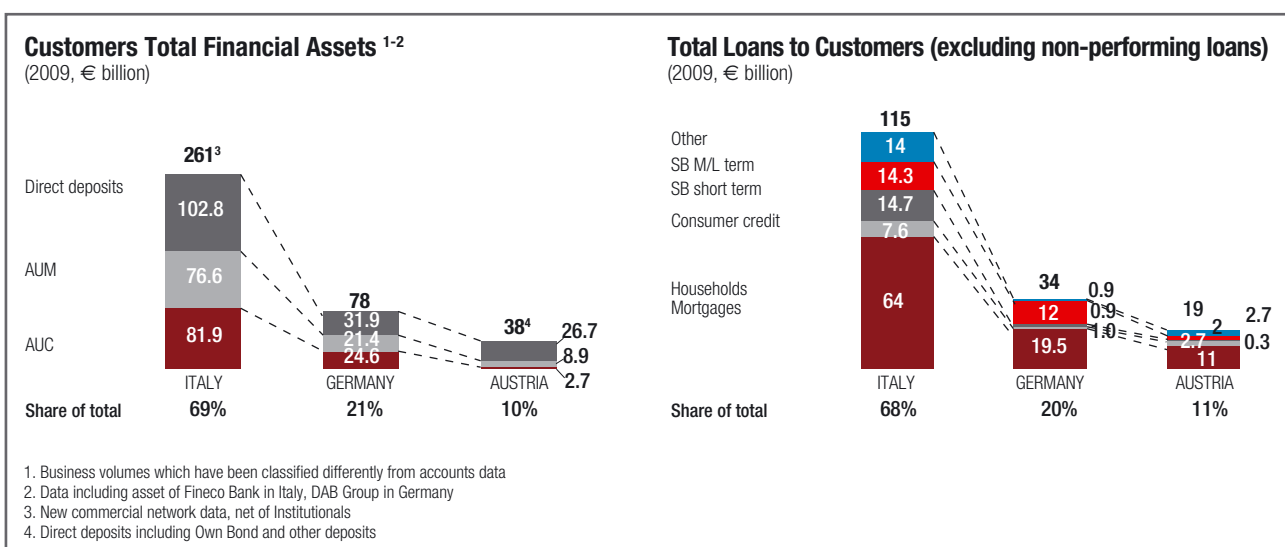

Of total **loans to customers** of about €168 billion, **Italy** contributed 68%, **Germany** 20% and **Austria** the remaining 11%. The mix was different in the three countries. The **mortgage loans** for home purchases represented in all areas the predominant product with an average penetration of approximately 56%. In Italy, **consumer credit** contributed 67% to the €11 billion of total financing. Finally, Italy contributed 92% to small business segment short-term loans of the Retail SBA.

Retail Network Italy

In Italy the process of integration of the former Capitalia network was completed in 2009. This activity has allowed Italian commercial banks to achieve important objectives in terms of the optimization of governance processes, reduction of operating costs and an extension of uniform standards of service across the whole sales network plus a single sales supply improving the quality of service.

In 2009, the Retail SBA expanded its approach to **Customer Satisfaction** to the former Capitalia network, including the measurement of customer satisfaction through the TRI*M index³ and the monitoring of the Customer Experience through Mystery Shopping. The TRI*M index in December 2009 recorded an overall improvement of 8 points compared with 2008, returning to pre-crisis values and allowing UniCredit to regain its top position compared with its principal competitors. The "Q48" project that allows customer complaints to be answered within 48 hours has been extended to the entire sales network. The main result of this project, in addition to "Instant feedback" and direct complaints to senior management, was to reduce the average response time to customer complaints.

3. The TRI*M Index measures the level of customer retention through a weighted summation of assessments that interviewees give the Company based on 4 main retention indices, two of which are related to the degree of satisfaction (overall satisfaction and likelihood to recommend), while the other two measure loyalty (likelihood of repeat purchases and competitive advantage).

Retail (CONTINUED)

SRT (Semplice Risparmiare Tempo - It's Easy to Save Time), continued with the goal of improving the quality of customer service through the use of alternative channels to the branch. In 2009, work continued on the installation of advanced "**ATM Payment**" machines and "**Spinta SRT2**" self-service areas, with 758 new facilities that brought the ATM pool nearly up to 3,400, which allow 90% of the customers on the Italian perimeter to be served. The strong growth of payments from advanced ATMs with approximately 1.8 million transactions in late November (+50% y/y) has allowed a release of agency staff (580 FTE) from low value-added activities so they can be allocated to sales-related activities. Also in 2009, the number of customers using internet banking grew to 1.1 million (+23% y/y). And finally, the optimization of the Italian sales network continued through the closure of 383 branches and the conversion of another 200 into small branches.

In the **Mass Market segment** a service model was implemented that focused on covering customer needs as measured by the "**BIS**" (Satisfied Needs) **index**. During the third quarter the **Genius Card** innovative product was launched on the market as an alternative to the current account. It is a registered prepaid card that allows major transactions to be made, designed to meet the needs of those seeking a simplified relationship with the Bank which has been bought by about 200,000 customers in a few months.

Regarding the **Personal Banking segment**, several initiatives were launched to strengthen relations with customers and provide a distinctive service able to meet their needs, especially in times of crisis. The "**First Multispecialist Agencies**" project was launched. Through restyling some agencies and focusing on specialized staff, it proposes to acquire new *Affluent* customers and increase assets under management. The extension to the entire sales network of the **Flying Advisor** model continued. The model provides an "itinerant" advisor that operates across multiple agencies by applying the logic of the *First* service model.

For the **Small Business segment**, the **Business Prime** service model was developed. It aims to develop a 360 degree satisfactory partnership relationship with "Key" customers implemented by two professionals: the business specialist, who monitors the relationship with business customers and best satisfies their financial needs by calculating the optimal financial structure, and the investment specialist, who looks after the personal financial requirements of business customers and their families. At the same time, for "microbusiness" customers, the new **Business Easy** service model has been consolidated, which is characterized by targeted distance advice and by the use of advanced alternative channels to the branch.

On the institutional level Retail Network Italy has continued organizing events dedicated to the small business segment. The sixth edition of the "**UniCredit Report on Small Businesses**", presented in Rome in

December 2009, focused on the analysis of the positioning of small businesses with regard to the current crisis.

Lending support was continued to small businesses through the "**Italy Business Project**", a sustainability project aimed at supporting the real economy, which called for the creation of an additional amount of loans to support businesses, distributed through in the area through trade associations and Confidi in order to ensure the inflow of funds in a time of liquidity crisis in the markets. A year after launching this project, which envisaged the allocation of €7 billion at Group level (including €3 billion for small businesses), 464 trade associations and Confidi were authorized to participate, which represent 46% of the market, and about €1.1 billion of new loans have been approved (including new agreements and renewals with short-term increase) for 10,500 practices, with an acceptance rate of applications for funding of 80%.

Still with a view to supporting companies that are experiencing a situation of temporary difficulty, the new **SOS Business Italy** agreement has been signed with associations of artisans and commerce, with the aim of rescuing from the crisis, structurally sound companies who are experiencing a period of difficulty, through innovative financial instruments (e.g. extension of the amortization schedule, repayment temporary suspension, etc.). At the end of December approximately 6,000 small businesses were supported for a total exposure of about €720 million through the granting of new finance.

In terms of **sales performance**, the sales network in **Italy** in 2009 generated €26 billion in investment product sales (+10% y/y), having concentrated on simple products with a low risk profile, with a daily increase in sales over the previous year. The net assets under management since the beginning of the year increased by €1.1 billion (2% of the stock of the start of the year), thanks to the positive managed net inflow of €3.4 billion in the second half-year. Assets under management were primarily sustained by the allocation of **UniGarantito**, a guaranteed principal insurance product with a minimum annual return, with €2.5 billion of sales in the second half-year and about 215,000 policies for a value of €7 billion since the beginning of the year.

The Retail Strategic Business Area was able to increase total financial assets to €9 billion compared to the beginning of the year (+4%), mainly due to the appreciation in indirect deposits following the recovery of the financial markets in the second half. The three commercial banks continued to provide support to small businesses through the provision of some €11 billion in new loans, amounting to over 165,000 loan files since the beginning of the year.

Retail Network Germany

UniCredit Bank AG in 2009 continued to serve the three strategic customer segments (mass market, affluent and small business) with three models of dedicated services which reflect their different needs. The main objective for the **Mass Market segment** in 2009 was to increase product penetration by providing requirement-based advice and expanding online banking. In this customer segment, the **"Willkommenskonto"** current account continued to be in high demand by customers. The product won several awards last year, including an award in the CHIP-Test 2009 performed by the German magazine "CHIP" and the first to test the security of online banking. UniCredit Bank AG has begun to only issue cards that include microchip in order to increase security for its customers.

In the **Personal Banking segment** due to the ongoing uncertainty in the financial markets and the significant decrease in interest rates, in 2009 UniCredit Bank AG focused consulting services on medium-term bonds and safe investment products with guaranteed principal, which have been very well received, allowing it to win new deposits in the first part of the year. Moreover the new investment product **"VermögensDepot privat Defensiv"** was added to the offering and new flows were recorded from bond funds **"F&C Stiftungsfonds"**. In terms of insurance products, in 2009 UniCredit Bank AG optimized the successful **AktivRente** insurance product, dedicated to affluent customers and designed to maximize the tax benefit on premiums paid. This product adapts the risk profile to the investor's various life stages and the market situation, and gradually decreases at the approach of maturity.

In the **Small Business segment** UniCredit Bank AG continued to support its customers in 2009 by extending them new lines of credit worth €1 billion in 2009, to provide them with the liquidity necessary to support their businesses. UniCredit Bank AG also continued to offer the new **Business Class** service model to its customers, aimed at key small business customers, through which all small businesses can count on two professionals: a dedicated business consultant and a specialist dedicated to the business customer's total personal investment requirements. UniCredit Bank AG extended the use of the **Business Dialog** consultancy tool, through which advisors analyzed the initial investments and risk propensity of clients to identify new investment opportunities. In the fourth quarter, UniCredit Bank AG launched an **"Konto4Business"** account package presenting value-added services, including access to the Deutsche Post mailing industry, specialized seminars and free marketing advice. This initiative has enabled UniCredit Bank AG to acquire thousands of new customers in a few months.

Retail Network Austria

With regard to the **Mass Market segment**, in 2009 Bank Austria implemented a web-based tool for a structured sales dialog, requested to every relationship manager to perform minimum once a year for each of approximately 200,000 high potential

Mass Market customer. In order to maximize the sales importance of the CRM (customer relationship management) support, Bank Austria has refined its Mass Market customer contact techniques through event-driven tools (e.g. due dates, customers who no longer buy products, birthdays etc). Customers of Bank Austria with foreign currency loans have been offered a dedicated information campaign: the target group has become aware of the risks of currency fluctuation and volatility of repayment tools (mutual investment funds and unit-linked insurance policies).

The range of investment products on offer has continued to be able to meet the growing need of **Personal Banking segment** customers to invest in simple, safe products including those with capital guaranteed, supported by marketing and advertising campaigns. Bank Austria has issued a substantial number of Bonds with characteristics of simplicity and transparency: 13 bonds with durations of 3 to 5 years which have reached a total volume of around €600 million. Bank Austria launched 5 USD-bonds for customers who wanted to invest in foreign currency and 1 inflation-linked bond with capital guaranteed at maturity. However, the increasing demand of customers to benefit from the growth of the stock markets in an environment characterized by very low interest rates, especially in the second half of the year, gave Bank Austria the opportunity to reintroduce the Pioneer Austria range of guarantee funds. In particular, **"PIA America Guarantee Fund"** and **"PIA Europe Guarantee Fund"** due to their 7-year term, 100% guaranteed capital and minimum return guaranteed at maturity recorded nearly €250 million of sales volume.

In the insurance area, Bank Austria has expanded its range of products. It offered the product called **S.M.I.L.E Garant II** (an index-linked single-premium, guaranteed capital and minimum return insurance product), which in 2009 recorded approximately 3,000 subscriptions. Moreover Bank Austria has continued to market two guaranteed capital insurance products launched in 2009: **The Active Capital Garantie 2019** with guaranteed repayment of 140% of capital invested at maturity and **Active Cash Garantie 2019** with guaranteed monthly repayments and a minimum guaranteed repayment of invested capital at maturity, which achieved 10,000 subscriptions at the end of December.

In the **Small Business segment**, Bank Austria has continued to invest through the extension of the Business Service Centers in three locations (Vienna, Salzburg, Carinthia). The 30% of small business customers are served in a distance channel (via telephone), with positive effects in terms of reducing the cost of service (57% lower cost of service), reactivation of low potential customers and increase in customer satisfaction.

In 2009 Bank Austria continued to pursue the goal of becoming the first bank chosen by **Affluent** and **Small Business** customers in Austria. An extensive training program was provided called **"Solutions**

Retail (CONTINUED)

4 *Affluents*” and “*Solutions 4 Small Business*” to ensure a consultancy service aimed at the diversification of investments as an appropriate response to market changes and customer needs. In collaboration with Frankfurt School of Finance and Management, Bank Austria has offered its consultants the opportunity to qualify as “certified advisors”.

UniCredit Family Financing Bank

In 2009, UniCredit Family Financing Bank launched the “**ARCA**” (Advanced credit recovery measures) project designed to implement a number of campaigns to assist families who have different earning profiles than those observed at the issue stage due to the unfavorable economic situation, in order to identify useful solutions to overcome the difficulties.

Among the main initiatives in this respect, from which approximately 25,000 customers have benefited, were:

- **Convenzione ABI-MEF [ABI-MEF Agreement]**, which provides the opportunity for some customers with variable-rate mortgages to renegotiate the loan by reducing the rate to a level equal to that prior to the increases in rates by suspending the payment of the differences originating from the renegotiation to the end of the amortization schedule;
- **Insieme 2009** project, which allows low-income families to stay free of payment of mortgage installments up to a maximum of 12 months in the event that any adverse events temporarily impair their solvency;
- **Instalment plan suspension for borrowers resident in areas officially declared to be disaster areas;**
- **Law 2/2009**, launched a loan at a variable rate indexed to the “ECB Rate” parameter. Law 2/2009 also introduced the benefit of a “rate cap” for variable-rate mortgages.

The international financial crisis has made its effects of loans and consumer credit on businesses generating a decline in demand and an increased credit risk. UniCredit Family Financing Bank in 2009 was affected by the unfavorable scenario conditions, showing weakening indicators, in particular in the new flows of disbursement.

The increased risk observed has led to a more careful assessment of the creditworthiness of customers, through innovations in the sales approach with the use of so-called “Pricing at risk”, which aims to relate the quality of the risk to the price terms offered.

UniCredit Family Financing Bank finished 2009 with a stock of loans consisting of approximately 780,000 accounts for a price of approximately €63 billion (including securitizations). Using this stock, several important securitization transactions and issuing of secured bank bonds were completed during the year allowing alternative, less expensive funding channels to be used. In 2009, the new production of loans equaled about €2.3 billion in decline from the previous year. This dynamic was in line with the context of market difficulties due to the decline in demand for loans and the effects of the financial crisis on the economic resources of families. The market share of the total

new business in the banking industry was approximately 6%. The contribution of the non-banking channel to new loans was nearly 35%.

In the consumer credit products area, compared to a stock of €7.6 billion, at the end of December new business was generated (personal loans, special-purpose loans, revolving credit cards and loans against wages) of €3.5 billion (-8% y/y), of which nearly 32% of new production from non-banking. These are positive results, in the light of the difficulties in the consumer credit market which registered a decline of 13% in 2009, should be considered positive because they allowed the Retail SBA to increase its own market share (Assofin survey) of the total loans in the industry at 9.5% compared to 7.6% in 2008.

Product innovation activity has continued with the aim of guaranteeing an offering distinguished by maximum flexibility of use, in line with the new market requirements. After the launch in the first half-year of the **UniCreditCard Extra Revolving card** and the **CreditExpress Dynamic** personal loan with “installment skipping”, “installment changing” and “reloading” features, the new **Credit Express Premium** product was launched in the fourth quarter of 2009, which rewards good behavior with an annual rate cut of 100 basis points, and was promoted in various sales channels with dedicated advertising materials.

On the mortgage loans side, the **Mutuo Opzione Sicura** [Safe Option Mortgage] was launched, which allows starting at a variable rate or a 5-year fixed rate and opting for the free renegotiation of the mortgage and extension of the duration; the **Mutuo Cap [Mortgage Cap]**, at a variable rate, was also launched, with a fixed limit (“cap”) contracted at the rate of interest payable by the customer, enabling customers to reap the benefits of variable-rate mortgages without running the risk of paying too high an installment. The **Polizza Multirischio** [Multirisk Policy]: an insurance package of different types of damage cover to match the underwriting of the loan has also been made available to customers.

During 2009, new business initiatives were developed with the aim of strengthening the company’s position in the market and maintaining a high profitability both in the banking and non-banking channels, despite a continued downturn in the market. The **Diagnostico mutui** [Mortgage diagnosis] tool was launched, aimed at critically reviewing all phases of the management process of the loan files. Finally, the “**Silver bullet**” initiative to improve the synergies with the sales network in order to optimize customer profiling and increase loan application approval rate should be mentioned.

For the foreign market, however, work has continued on the development and consolidation of international initiatives. In 2009, the Munich branch continued its operations in the credit card segment, issuing about 46,000 new cards, reaching over 185 thousand for a total of over €215 million in business volume. In addition, the distribution of personal loans continued through UniCredit Bank AG

branches with disbursements amounting to €337 million (+90% y/y). In Bulgaria, the subsidiary company UniCredit Consumer Financing AD continued its growth trend by providing €51 million in loans since the beginning of the year consisting of special-purpose and personal loans (+30% y/y). In Romania, the subsidiary UniCredit Consumer Financing IFN has continued to enhance the business of distributing personal loans through the branches of UniCredit Tiriuc Bank with total disbursements amounting to €66 million.

Asset Gathering

Fineco Bank in Italy has continued the strategy to improve products and services and to focus on quality advice to retain old customers and increase new acquisitions. The completion of the offering has helped to strengthen leadership in the relevant market and the level of customer satisfaction.

During 2009 efforts in the marketing and sales area continued: Fineco updated current accounts, by introducing the elimination of fees against the crediting of salary; advertising activities focused on a new communication concept aimed at maximizing acquisition in all channels through a mix of direct actions, word of mouth and brand awareness. Thanks to the high customer satisfaction (over 97%⁴), acquisition through word of mouth remains the most effective means for opening accounts. In particular, the two "Connect" and "Wave" campaigns have generated more than 30,000 new opened accounts.

In 2009, **Fineco** generated a net inflow of €2 billion and total assets of €33 billion (+14% compared to 2008). Due to its network of financial consultants, Fineco was ranked 3rd by Assoreti in terms of stocks and net inflow⁵. With regard to online trading Fineco is positioned in 1st place for third-party volumes traded on the major markets (MTA, TAH, S&P/MIB Futures and Mini S&P/MIB). It also secures the 1st position for number of transactions in the equity segment with 9.7%. In summary, Fineco Bank is confirmed as the market leader⁶ as a broker in Italy with a total of €26 million transactions.

DAB Group, which operates through DAB Bank in Germany and DAT Bank in Austria, expanded its trading and consultancy business by strengthening its leadership position as a broker and winning the *Brokerwahl* award as German *Best Certificate Broker* and the award for best direct bank for brokerage according to *Euro am Sonntag*. The figures at the end of 2009 confirm a growth in stocks of 20% compared with the previous year end, bringing assets to €23 billion. During 2009, DAB launched a sales campaign aimed at acquiring new retail customers (B2C), offering special terms of remuneration on account and trading commissions (12,500 new customers acquired). In terms of the number of transactions, DAB Bank in Germany completed 2009 with 5.5 million transactions and DAT in Austria with 1 million transactions.

Outlook 2010

2010 will be characterized by the entry into the perimeter of the Polish Retail SBA. The macroeconomic forecasts foresee a more difficult environment for banks in the eurozone. The analysis of external forecasting institutions⁷ estimate that, despite early signs of an improvement in the economic scenario, the profitability of the banking system will remain under pressure due to declining revenues and a worsening of credit adjustments. The interest margin will be negatively affected by the low level of spreads caused by continued low interest rates. This decline should be offset by a recovery in margin from services resulting from the recovery of the financial markets and adjustments in the pricing policies.

In the **Retail Network Mass Market** segment there will be a revision in the range of accounts dedicated to private customers in order to rationalize and improve the coverage of needs, simplify the service offering and enhance direct channels. In order to comply with the SEPA directives and to ensure security and savings to customers, it will be continued until old payment cards with a single magnetic stripe have been completely replaced with cards containing microchips. Finally, efforts will be made to increase the new production of loans through sales initiatives and direct mailing. At the same time the introduction of risk-based pricing tools to support the network will help to increase profitability.

In the **Personal Banking** segment the process of optimizing the consulting service will continue to ensure an adequate level of service to all subsegments with a balanced cost to serve. In addition, in all countries where the Retail SBA operates, it will launch sales and marketing operations with the aim of acquiring new customers and improving efficiency in sales and consultancy.

In the **Small Business** segment the ability to purchase products and services through remote channels will be developed. The restyling of loan products and current accounts will also continue and a new line of products for professionals will be launched, new insurance cover and *ad hoc* credit cards to support growth in this segment.

For 2010 the objective of the **Asset Gathering** area will be to continue to grow and innovate, extending the offering, providing simple and transparent products to our customers. There will be a major enhancement of the ability to provide high value consulting solutions through the network of financial consultants. The year 2010 will also be geared towards improving and developing synergies with DAB and DAT in view of a possible expansion into new overseas markets.

Retail (CONTINUED)

The macroeconomic environment will still be difficult for the Family Financing market: despite a slight recovery, the market should still show a restricted growth due to rising unemployment and reduced household disposable income. Despite this environment, **UniCredit Family Financing** will revive business growth, with an increase in the volume of new mortgage and consumer finance loans, particularly in the automotive and personal loans segment, with the aim of further strengthening its role in terms of generation of new customers for the Retail SBA. Particular emphasis will be placed on the containment of operating costs and the optimization of the cost

of risk through proactive management of the portfolio, especially in terms of debt recovery. Finally, specific attention will be devoted to further improving levels of customer service through the optimization of assistance activities in the after sales phase.

Corporate & Investment Banking (CIB)

Introduction

The Corporate & Investment Banking (CIB) area targets corporate and institutional customers that operate (primarily, but not exclusively) in the primary markets where the UniCredit Group has a presence.

The deterioration in the international economic situation that started in 2008 has accelerated the evolution of the Group business model with the implementation of CIB new organizational structure, which is the result of the merger of the previous Corporate and MIB divisions. In particular CIB is focused on business network in order to make it more consistent with the mission to create sustainable value over the long run through the rationalization of the governance structures of the various businesses involved, and to centralize skills in terms of:

- understanding the needs of corporate and institutional customers through a local distribution network that specializes in specific customer segments;
- creating a Group-wide skill center dedicated to product development and providing related advisory services to the sales network in the activities of providing products and services to customers;
- mitigating risks by taking a global view of a customer relationship and adopting standard risk measurement methodologies and specialized product skills.

Through a broad range of dedicated financial products and services, from traditional lending activities and services that are typical of commercial banking to more complex services with a higher added value (e.g., project finance, acquisition finance and other investment banking services and services to access/operate in international financial markets), CIB supports its customers during the various phases of the business's life by providing support in ordinary corporate activities, in growth and internationalization projects, and lastly, during any restructuring periods.

The strengthening of CIB's position as a European regional specialist in the most advanced global financial markets and investment banking services will enable it to round out the broad range of services it provides to its customers.

Corporate & Investment Banking (CIB) (CONTINUED)

Financial performance

Despite the considerable downturn in the economy and markets, the Corporate & Investment Banking area ended 2009 with **significantly better results** than the previous year, and reported a 125% increase in operating profit.

Operating income totaled €10,033m with an increase of €3,559m over the previous year (+55% y/y) with a positive impact on both **net interest income**, which was up by €478m (+7% y/y), and on **net non-interest income**, which rose by €3,081m. This increase was primarily driven by growth in income from financial transactions, and by more favorable market conditions than in 2008. At the same time,

Staff Numbers

CORPORATE & INVESTMENT BANKING	AS AT			CHANGE ON DEC '08	
	12.31.2009	09.30.2009	12.31.2008	AMOUNT	%
Full Time Equivalent 100%	14,694	14,786	15,711	-1,018	- 6.5%
Full Time Equivalent proportional	14,676	14,768	15,696	-1,020	- 6.5%

fee contribution was weak since it suffered primarily from a reduction in cash management transaction volume, which is more heavily correlated to the recessionary performance of the economic cycle.

Operating costs totaled €3,309m, a decline of €175m (-5% y/y). This decrease was driven by the reduction in **staff expenses** (due in part to the rationalization of the business following the implementation of the new operating model that resulted in a reduction of over 1,000 **FTEs**) and by the continuing tight controls over **other administrative expenses**, which were down 8%.

Impairment losses on loans rose sharply compared to 2008 and totaled -€4,464m (+108% y/y) due to the overall deterioration in many loan positions. In consideration of the intensity of the current economic crisis and increased risks, with the resulting deterioration of loan quality, the measures taken at the end of 2008 to manage and monitor credit risk were reinforced in 2009 using shared and coordinated management strategies, especially in an attempt to anticipate and manage any deterioration situations.

The **Risk Weighted Assets** dynamics showed that at the end of 2009 total RWAs were down by 9% from the end of the previous year. Specifically, **credit risks** dropped from €251.8bn in 2008 to €235.1bn at year end 2009. These results are a reflection of the selective risk reduction policy implemented by UniCredit. This decrease, which can also be seen in the volume of loans provided to customers (-12%), is in fact due to a thorough modification of the customer portfolio in the context of a broader strategy to reduce the Group's leverage. In this context, it also makes sense a selective credit approach was performed.

Thus, **profit before taxes** at year-end 2009 totaled €1,555m, up 125% over the previous year. The **cost-income ratio** (from 53.8% to 33%) also improved significantly due to the combined effect of higher revenues and lower costs.

EVA stood at -€480m, and **RARORAC** was -2.57%, an improvement over the -7.2% reported in 2008.

Breakdown by business, geographic area and company

Summary of 2009 projects

The new CIB organizational model is based on a matrix structure that is characterized by the clear separation of sales-related skills (so-called coverage), which are the purview of distribution networks in reference markets: Italy Network, Germany Network, Austria Network, Poland Network (operational since January 1, 2010) and the Financial Institution Group, and on product skills centralized in so-called Product Lines that are responsible for the entire range of products offered by CIB, in particular:

- **Financing & Advisory (F&A):** skill center specializing in all business areas related to corporate lending and advisory. It is directly responsible for lending in terms of structuring deals and pricing for more complex products and more sophisticated customers, and in collaboration with the Networks, it provides supervision and guidelines for setting pricing for plain vanilla loans and core banking customers.
- **Markets:** competence center responsible for Rates, FX, Equities, Capital Markets activities and activities tied to the credit market. In addition, the Markets area includes the operations of Global Distribution and Corporate Treasury Sales (CTS), which are mainly dedicated to corporate and institutional customers.
- **Global Transaction Banking (GTB):** skill center specializing in Cash Management & eBanking products, Supply Chain Finance, Trade Finance, in complex transactions in the area of Structured Trade & Export Finance, and, lastly, in Global Securities Services.
- **Leasing:** responsible for coordinating all activities for the structuring, pricing and sale of leasing products in the Group by leveraging its own distribution Network, which operates in close cooperation with the banking Networks. The reorganization of operations in Italy was recently completed by merging the operations of Locat S.p.A. and UniCredit Global Leasing S.p.A.

In addition to the business advantages of product specialization, full coverage of all CIB operations by the four dedicated Product Lines makes it possible to assign responsibility of a portion of CIB's entire income statement and balance sheet to each, thereby allowing for a more complete and efficient governance of the value generated by individual product and service components.

Financing & Advisory

In keeping with the new business model, the newly established F&A Product Line has the dual (and primary) role of serving as a skill center for all loan products and as advisory for corporate and business customers Group-wide.

In order to meet the needs of customers and become one of the best financing houses in Europe, F&A offers its advisory services to

Corporate & Investment Banking (CIB) (CONTINUED)

distribution networks in the area of lending in terms of both structuring transactions and pricing advanced products that target the most sophisticated customers. At the same time, in collaboration with the networks, it oversees the Group's guidelines for determining pricing for plain vanilla loan transactions targeting corporate customers.

In addition to loan-related services, the range of F&A offerings also includes more sophisticated Investment Banking products (e.g., corporate finance and advisory, syndicated loans, leveraged buy-outs, project and commodity finance, real estate financing and principal investments), which primarily target high-end customers such as large corporate, multinational and institutional customers, which in general have more complex needs and require tailor-made services.

The main units with global responsibility consist of:

- **Financial Sponsor Solution**, with coverage responsibility for all Private Equity products and all lending activities of subsidiaries of Financial Sponsors;
- **Project and Commodity Finance**, with global responsibility for the entire Group in this business;
- **Loan Syndication**, which is the center responsible for managing all syndication activities;
- **Principal Investment**, which is responsible for managing all activities related to Direct Investments, Fund Investments and Hedge Funds.

Local units are in charge of other lending activities, more sophisticated structured transactions that are not covered by the Global units (related to Mergers & Acquisitions, Real Estate and Shipping), and plain vanilla operations.

Markets

Within the Group, Markets acts as a competence center for all activities related to financial markets and is also the channel that gives UniCredit preferential access to markets.

Its current organizational structure reflects the repositioning process started in the second half of 2007, and later strengthened in 2008, with an emphasis on the following principles: focus on core customers and products, and the rationalization, optimization and improved efficiency of non-core activities.

The underlying goal of the repositioning was to strengthen Markets as one of the main European regional specialists by leveraging the broad customer base in the countries where the Group operates.

The main businesses of Markets can be broken down as follows:

- **Rates**, to execute transactions involving interest rates products (i.e., bonds, derivatives and fixed-income structured solutions); this business area also includes money market transactions and treasury operations for Group companies;
- **Capital Markets**, which is in turn broken down into following businesses:

- **Equity Capital Markets (ECM)**, which originates, structures and executes transactions for customers in relation to the primary segment of stock markets;
- **Debt Capital Markets (DCM)**, which originates, structures, executes and participates in customers' syndication and debt financing transactions in capital markets;
- **Structured Capital Markets**, which originates and structures innovative transactions linked to capital markets to meet specific customer needs;
- **Capital Market Solutions**, which is dedicated to providing highly customized solutions to meet specific customer needs, which are primarily related to accounting balance sheet and rating optimization issues.
- **Equities**, which is mainly dedicated to the negotiation, structuring, sale and dynamic risk management of products related to equity markets for the Group's customers and for outside counterparties (e.g., financial institutions, funds, etc.);
- **Forex Exchange (FX)**, which specializes in cash (spot and forward) and derivative (swaps and options) foreign currency products for transactions of its customers and for the foreign currency component of the Group's funding areas;
- **Credit-Related Business** which includes the following businesses:
 - **Credit Markets**, which typically handles the pricing and negotiation of products related to the credit market including credit default swaps and structured lending products involving companies or financial institutions with high creditworthiness;
 - **Illiquids and Special Assets**, which manages the Group's problem assets (from the lending standpoint), which, due to their unique nature, fall outside traditional loan recovery channels, and in relation to which access to capital markets is required.

Global Transaction Banking (GTB)

CIB is one of the largest operators in the Global Transaction Banking sector in terms of revenues generated in continental Europe. By combining in-depth domestic market expertise with the experience of an international bank in all aspects of transaction banking, the GTB Product Line offers a complete set of products and services in the areas of payments and eBanking, trade finance, the financial management of procurement, export finance, and custodian bank services in Central and Eastern Europe.

Starting January 1, 2010, with the organizational model recently approved within the UniCredit Group, activities related to the management of demand deposits and account maintenance also fell under the responsibility of GTB.

The main products and solutions offered to customers include:

- **Cash Management and eBanking**

The UniCredit Group has strengthened substantial experience in providing Cash Management and eBanking solutions. Using an approach tailored to the needs of customers, GTB specialists provide support for the entire Financial Value Chain. Product offerings range

from analyzing cash and payment flow management processes to the daily management of transactions using the eBanking platform, and to the most efficient solutions for the global management of cash positions for multinational groups, with a particular focus on countries in Central and Eastern Europe, where the Group has a local presence and provides the same high quality of service.

The payment services area represents over 60% of overall revenues of UniCredit's Transaction Banking unit including customer's sight deposits. This will make it possible to round out product offerings and the product catalogue and to maximize the efficiency of a single pricing management area for all products related to treasury and payment services.

Performance for 2009 in this area was affected by interest rate movements, which, compared to the past year, reduced the income generated from value days, but left the market share of commissions largely unchanged despite the global decline in the volume and number of transactions experienced throughout the market due to the crisis situation.

• Trade Finance & Services and Supply Chain Management

UniCredit's products in this business area take advantage of the broad, direct coverage of the markets in which the Group operates with the support of a network of over 4,000 correspondent banks, making it possible to broaden the coverage area to over 50 countries throughout the world. This allows customers of the UniCredit Group to support their range of products in different countries with the broad selection of banking services available.

Trade finance products and services offered to Corporate customers range from more traditional letters of credit, guarantees and documentary credits and forfaiting to highly competitive Global Trade Management solutions that support the customer along the entire "supply chain": Pre-export, post-shipment and inventory finance are just a few examples of solutions offered to customers.

This business area represents about 25% of the revenues of UniCredit's Transaction Banking area, and in 2009 it was able to largely maintain steady performance compared to the previous year due to considerable pricing adjustments for customers that more than offset the reduction in the volume and number of transactions resulting from the negative import/export situation. On the other hand, there was an increase in guarantee volume and commissions and commissions from forfaiting throughout 2009.

Leasing

As dictated by its strategy, effective 1 January 2009, UniCredit Group's Leasing Business Line completed the reorganization of Italian operations through the business combination of Locat S.p.A. with UniCredit Global Leasing S.p.A.

In keeping with the Group's recent reorganization, the Group continued its commitment to maximize cooperation with banks in individual countries, including through the modification and rationalization of distribution models, which are increasingly focused

on multiple channels in order to make the best use of synergies within the Group and increase the effectiveness and efficiency of the sales force.

In an effort to strengthen the leasing business and the Group's identity, the rebranding of companies in the European network was also completed.

Projects and initiatives

As already indicated, the main action taken by the UniCredit Group in response to the gradual deterioration of the international economic situation was to change the business model targeting corporate and institutional customers by combining and then reorganizing the previous Corporate and Markets & Investment Banking Divisions into the new CIB with the aim of having a more efficient dialog, understanding the needs of customers, improving product and service quality and mitigating risks by taking a global view of a customer relationship.

This change was combined with the repositioning of structures and operations connected with financial markets under the Markets Product Line, which started in 2008 and is being implemented on the basis of three fundamental principles: (i) a major emphasis on customers and core products; (ii) consolidation and centralized management of non-core portfolios based on downsizing and rationalization principles; (iii) optimization and efficiency improvements in all other business activities.

In particular, the main initiatives carried out by Markets in 2009 were as follows:

- completion of the process to change and/or strengthen the leadership position of sub-areas/portfolios that suffered the greatest impact from the crisis and are still managed on an interim basis after the restructuring started in 2008 (especially in FX and Rates);
- further reclassification, begun in 2008, of financial assets originally classified as "held for trading" and "available for sale" to "loans to customers" or "loans to banks" made possible by the revision introduced in IAS 39 and IFRS 7, which was approved by the International Accounting Standards Board (IASB). This was done in order to adjust reporting to reflect the low liquidity of these instruments, and at the same time, minimize the potential volatility of income statement profits that is, in fact, the result of the previously noted scarce liquidity of the instruments;
- repositioning of the portfolio and simplification of Active Credit Portfolio Management (ACPM) operations. This process started in 2008 with the resulting transfer of the entire Financing & Advisory business, with the exception of investment portfolios and hedging positions attributable to risk management needs;
- a significant reduction in non-core operations and portfolios (over €13bn), made possible in part, as noted above, by their centralized management;

Corporate & Investment Banking (CIB) (CONTINUED)

- reduction in the volume (inventory) of market making activities;
- consolidation of risks assumed in trading activities, mainly by concentrating them in two hubs in London and Munich, in order to ensure better oversight and control;
- rationalization of the international network;
- gradual alignment of IT systems to the needs of the business and the resulting reduction of gaps with resources used by the Group's main competitors;
- implementation of the plan to optimize staff (overall reduction of FTEs with the targeted hiring of highly qualified staff) with the aim of efficiently addressing a changing, competitive market.

In addition, in 2009 the strategic plans aimed at combating the crisis and the business initiatives initiated at the end of 2008 were fully implemented, and new measures to support businesses were introduced. In particular:

- **loan products with preferential terms:** Again in 2009 CIB placed its usual emphasis on these products due in part to a renewed and greater commitment on the part of governments (especially in Germany and Austria) to issue guarantees to banks that had provided loans to companies as a part of new lending programs. In Italy, the range of products offered to customers was expanded, new funds were used from the Guarantee Fund, and the Group took advantage of the new role of the *Cassa Depositi e Prestiti*. It should also be noted that Leasing continued its commitment to underwrite lending limits with the European Investment Bank (EIB) in order to provide loans to customers under finance leases with competitive conditions as a result of funding under preferential terms;
- **optimization of portfolios with negative EVA contribution:** In 2009 the Group continued the initiative to improve the return on EVA-negative portfolios, and further increased the awareness of sales networks of the need to apply pricing indicative of the customer's risk profile;
- **continued sustainability of relationships:** A project was launched in Italy for the selection of deserving customers experiencing temporary difficulties in order to provide them an opportunity to get through the critical period and eliminate the sources of tension with the aim of reducing the probability of default with a resulting benefit for RWAs. The tools available, which must be modified based on the type of customer analyzed, are the following:
 - reduction of financial charges, especially on medium and long-term loans (e.g., through the temporary restructuring of installments or deferred payments);
 - mitigation of risk by shifting credit facilities to loan categories with greater collateral, and reducing exposure where possible;
 - assessment of a possible re-pricing of facilities if conditions are not in line with the changed level of risk, or if the customer is EVA-negative;
 - assurance of compliance with any repayment plans.

Finally, the Leasing Product Line launched a number of initiatives aimed at reducing the impact of the deteriorating economic situation on its results. In particular, a special program was launched to prevent and reduce the deterioration of irregular loans through soft collection activities and payment "restructuring," and the resale of assets owned by the company on the market. In order to perform these and other credit recovery activities, Leasing set up dedicated task forces, and in 2009 the initial positive results continued for an activity that the Group believes will continue to have an impact in 2010.

Outlook 2010

Despite continued, widespread uncertainty over the actual extent of the recovery, recent changes in the macroeconomic and industrial situation seem to indicate a gradual, but modest, stabilization process, driven primarily by the rebuilding of inventories in the manufacturing sector and a renewed vitality in exports. 2010 is seen as a transition year characterized by moderate growth in the main indicators, in an environment that continues to experience substantial market difficulties and reduced competition among companies, and in which there is still a substantial focus on loan quality. Current levels of underutilization of manufacturing capacity indicate there will be a slow recovery of investments. The actual sustainability of the economic recovery will depend, to a great extent, on the performance of international trade, and especially on the dynamics of domestic demand, which to date has been bolstered by temporary tax incentives.

The growth of loans to companies is expected to reflect the overall performance of the economy with positive signs projected for the second half of 2010 due in part to the return of funding costs to levels seen prior to the crisis. Market rates are expected to remain at low levels due to abundant cash levels provided that rates realign with reference rates.

In the area of financial markets, in 2009, and especially during the first nine months of that year, operators benefited from the substantial amount of liquidity injected in the system by central banks, high levels of volatility and a renewed propensity for risk. These factors were accompanied by the recovery of stock prices and indexes in the financial sector. These positive signs slowed down at year-end due to fears of market operators over pressures on sovereign debt in Greece and the debt of a major financial operator in Dubai. The outlook for the current year is based on the normalization of market conditions and the presence of concealed risk factors that make it unlikely that the performance observed in 2009 will be repeated.

The new organizational model is being developed to be fully consistent with the changing environment described, and its aim is to strengthen CIB's position as one of the major European players in the wholesale segment by leveraging its local presence in reference markets and its excellent operational and product skills in order to contribute to the Group in terms of the creation of value that is sustainable over time.

In the context of the widespread deterioration of many loans in major reference markets, a key role is played by F&A, through which CIB is aiming to establish even more effective cooperation with the lending division (CRO Competence Line) for the assumption and monitoring of credit risk from a business standpoint. F&A has also been given responsibility for pricing, both in terms of direct involvement in structuring all the most complex loan products, and in a supervisory role by providing guidelines for setting prices for simpler products and less sophisticated customers in order to ensure a growing shift toward counterparties with a high credit standing, and to maintain a strong emphasis on value creation.

In spite of the 2010 financial markets outlook, Markets product line should post sound results for the Group, even if lower than 2009 ones that benefited of exceptional positive market condition.

The good performance should be driven by the optimization and re-positioning of Markets' activities, already in place in 2009, and by the introduction of strategic initiatives aimed at strengthening client driven business and core activities.

Proper measures to address the new, and less favorable, regulatory framework have already been taken by GTB in relation to the PSD Directive coming into full force in 2010. Again in 2010, the specific goals for this business area are still to continually upgrade technological platforms and develop high-value-added solutions for customers (e.g., integrated eBanking and Trade Finance services) with resulting high growth rates and the potential to acquire new customers.

While Leasing continues its special program aimed at preventing and reducing the deterioration of irregular loans through soft collection measures, payment "restructuring" and the selling of company-owned assets in the market, its new organizational structure emphasizes the establishment of an international leasing network to serve customers with the aim of supporting operating companies worldwide in the management of international leasing transactions and promoting the development of supranational cooperation agreements with leading industrial and commercial companies.

The Private Banking business unit primarily targets high-net-worth individuals by providing advisory services and solutions for private banking using a comprehensive approach. The business unit operates through a network of around 1,200 private bankers located in more than 250 branches in the three main countries (Italy, Germany and Austria), in addition to a selective presence in some offshore European markets (Switzerland, Luxembourg and San Marino).

Financial performance

The financial markets recovered significantly in 2009, especially in the second half - as an example, the main stock market indices showed significant growth from December 31, 2008 to December 31, 2009: the FTSE MIB was up by 19.5%, the DAX 30 by 23.8%, and the ATX by 42.5% - with a significant positive impact on financial assets under management and administration. A 6.7% yearly increase in the stock of mutual funds in Italy evidenced the positive

impact on the asset management industry. On the other hand, although market net inflows were still negative by approximately €3 billion in 2009, the result significantly improved compared to more than €100 billion net outflows in 2008.

In this context, at December 31, 2009 the business unit's total **financial assets** amounted to around **€139 billion**, a 10.7% yearly and 3.5% quarterly increase respectively.

Total Financial Assets

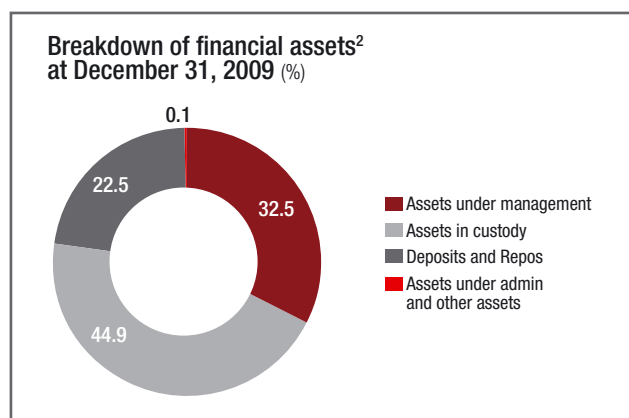

(€ billion)

PRIVATE BANKING	AMOUNTS AS AT			CHANGE ON DEC '08	
	12.31.2009	09.30.2009	12.31.2008	AMOUNT	%
Total Assets	138.8	134.2	125.4	13.4	+ 10.7%
Ordinary Assets	108.7	105.0	100.9	7.8	+ 7.8%
<i>AuM</i>	<i>35.3</i>	<i>34.6</i>	<i>33.3</i>	<i>2.0</i>	<i>+ 5.9%</i>
<i>AuC</i>	<i>48.8</i>	<i>47.1</i>	<i>44.3</i>	<i>4.6</i>	<i>+ 10.3%</i>
<i>Deposits (inc. Repos)</i>	<i>24.5</i>	<i>23.0</i>	<i>23.0</i>	<i>1.5</i>	<i>+ 6.7%</i>
<i>AuA and Other</i>	<i>0.1</i>	<i>0.3</i>	<i>0.3</i>	<i>-0.2</i>	<i>- 75.9%</i>

Net of extraordinary items¹, the annual increase was 7.8%, benefiting also from the transfer of customers from the retail business area in Austria, contributing €1.8 billion.

The **net inflows**² of new financial assets increased by around €1.7 billion in 2009, mainly driven by assets under custody (AuC). Asset growth was also boosted by positive performance, adding approximately €4 billion on a yearly basis.

The breakdown of **financial assets**² at December 31, 2009 shows a slight decrease in assets under management contribution, down from 32.9% at September 30, 2009 to 32.5%, while assets under custody (AuC) were mostly unchanged at just below 45%. Deposits, including repurchase agreements, increased to 22.5%.

The Private Banking Business Unit reported €236 million in **operating profit** at December 31, 2009, down 35% from the previous year when the market environment was completely different, especially in terms of nominal interest rates. The business unit pursued a rigorous **cost containment** policy, helping to offset a significant part of the decline in fees and interest income.

1. Extraordinary transactions mean those which due to their timing, large size and little or no profitability, are not attributable to ordinary company operations.
2. Excluding extraordinary transactions.

Revenues amounted to €779 million, a 15% decrease on a yearly basis. In detail:

- **interest income** decreased by approximately 18% due to the decline in interest rates on deposits and to the extraordinary dividend received in 2008 in Germany from the non-consolidated companies of Wealth Capital group;
- **non-interest income** declined 13%, largely due to an approximately 14% decrease in net commissions. This component was heavily influenced by the decline in recurring commissions on assets under management, in turn due to the decrease in average assets under management, which recovered only slightly in the second half of the year, and the decrease in upfront commissions.

Operating costs amounted to €544 million, down 1.8% over the previous year. **Payroll costs** were cut by around 3%, attributable to 75 staff cuts and to the reduction in the variable component, while **other administrative costs** were reduced by approximately 2%.

These cost cuts were the result of timely and effective measures to contain direct, structural and discretionary expenses with the aim of maintaining profitability in the face of highly unstable revenues.

The **cost/income ratio** increased to 69.8% in 2009, from 60.4% in the previous year.

Provisions for risks and charges amounted to around €14 million, including €19 million in provisions mainly related to legal disputes or customer claims (effective and potential) and €5 million in the release of excess reserves at the German subsidiary Wealth Capital Management.

Net write-downs to loans amounted to around €10 million, consisting of around -€14 million in net write-downs in Italy, including a big position with UniCredit Private Banking, and around +€4 million in net write-backs in Germany.

Profit and loss on investments showed a net loss of around €3 million, mainly due to write-downs made by the German subsidiary Wealth Capital Management to its private equity portfolio.

Breakdown by business, geographic area and company

Summary projects in 2009

The business unit is organised into four business lines: PB Italy (including San Marino), PB Germany, PB Austria, and PB International, which includes the operating units in Switzerland and Luxembourg. Below are key figures for each of these.

Private Banking Italy reported around **€80 billion** in total financial assets. Ordinary financial assets increased by **7.9%** on a yearly basis to **€64 billion**, driven by around **€2.8 billion** ordinary net inflows and around **€1.9 billion** increase from positive performance. Ordinary net inflows were also driven by the **€2.6 billion** increase in the administered component. **Operating profit** amounted to around **€122 million**, a decrease of approximately **37%** over the year. Revenues declined around **17%** over the year: interest income fell by approximately **20%** and net commissions by approximately **15%**. Though operating costs were reduced by around **2%**, in part attributable to specific containment actions, the cost/income ratio increased from **58.2%** in 2008 to **68.2%**. **UniCredit Private Banking** reported around **€64 million** in net profit for the year.

Private Banking Germany reported around **€27 billion** in total financial assets at year-end 2009; the ordinary component amounted to around **€24 billion**, up **3.1%** from a year earlier. Ordinary net inflows were **-€0.7 billion**, entirely due to net outflows in assets under custody (AuC). However, the company reported net inflows of **€0.1 billion** in the fourth quarter, driven by deposits. Looking at the profit and loss account, total revenues declined around **19%** on the year, as commissions dropped **22%** and interest income was down **20%**. Operating costs were reduced by around **6%**, including approximately **6%** decrease in payroll costs and around **7%** in other administrative costs. **Operating profit** amounted to around **€59 million**, around **40%** decrease compared to 2008.

Private Banking Austria reported around **€15 billion** in ordinary financial assets at year-end 2009, a **17.2%** increase over the year; excluding the transfer of customers from/to the retail business areas, the increase was **3.5%**. Positive performance contributed around **€0.8 billion** to the increase, while ordinary net inflows were **-€0.4 billion**, mainly due to net outflows on deposits. **Operating profit** amounted to around **€32 million**, a **2%** decrease on the year. Revenues were almost stable (**-0.4%**), but were down around **6%** excluding the customer transfer, and operating costs saw a light increase of **0.3%**, but were down around **4%** net of the transfer.

Private Banking International reported around **€18 billion** in total financial assets at year-end 2009, including **€5.8 billion** in ordinary assets. Ordinary financial assets increased **3.5%** over the year, driven by ordinary net inflows, amounting to **€0.1 billion**, while positive market performance added another **€0.1 billion**. **Operating profit** amounted to approximately **€36 million**, down around **16%** from approximately **€43 million** in 2008, due to a decrease of approximately **12%** in revenues across all components, only partially offset by a reduction of approximately **7%** in operating costs, the result of careful containment policies and the first positive effects of the integration of the Luxembourg companies.

Among the key projects in 2009:

- the setting up and implementation of a new European service model for private banking (customer service model or CSM) based on three pillars: i) European coverage and coordination combined with regional roots and proximity to customers; ii) comprehensive 360 degree approach in customer relations, and iii) focus on portfolio performance with appropriate balance between risk and return;
- at UniCredit, the operating start-up of Global Investment Services and Product & Advisory departments, set up in late 2008, directly reporting to the head of the business unit, and integrating some of the respective local departments. Consistently with the objectives of the European service model, these departments pursue their mission of implementing common investment and asset allocation strategies, as well as the spreading of best practices allowing for the development of a product platform suitable to satisfy customers' dynamic needs and capable of combining greater transparency and simplicity with increasingly global but integrated needs;
- the complete reorganization of the business in Austria, including: the sale of several Asset Management GmbH businesses to Pioneer Investments Austria GmbH in June; the merger of the remaining businesses and those of Bank Privat into Bank Austria on 1 October; start-up of the process to transfer retail customers with assets exceeding **€500,000** to the private banking business unit and at the same time the transfer of private customers under that threshold to the retail business area (process should be concluded in the first quarter 2010). These decisions led to the setting up of a business model similar to the one already existing in Germany (private segment within a universal bank such as Bank Austria), with management of all aspects of the customer relation and the products on offer. Meanwhile, Schoellerbank continues to do business as a separate legal entity in view of its strong brand recognition in the country;
- Finally, Private Bank International streamlining of the Luxembourg organizational structure, completed on August 1, 2009, including the transfer of private commercial businesses by UniCredit International Luxembourg to UniCredit Luxembourg SA (formerly HVB Luxembourg), generating synergies from the integration of business and operating platforms.

Private Banking (CONTINUED)

Outlook 2010

2010 will be a year of only modest expansion with cautious forecasts for the eurozone growth. It will at any rate be a difficult year and the bank will need to be very selective in its investment decisions: equity indices are expected to gain, while inflation should remain under control. Interest rates are not expected to rise significantly, so the cost of money will remain substantially low.

In this environment, in part because it has fully implemented its European customer service model focusing on customer relations in a uniform and integrated vision of investment and risk management, the Private Banking Business Unit will concentrate on strengthening its asset management operations, supporting the planned liquidity reallocation stage. This process will be accompanied by a new product pricing policy and private bankers compensation policy in view of the new market environment, highly correlated with the quality of service provided. In this environment, the profit and loss

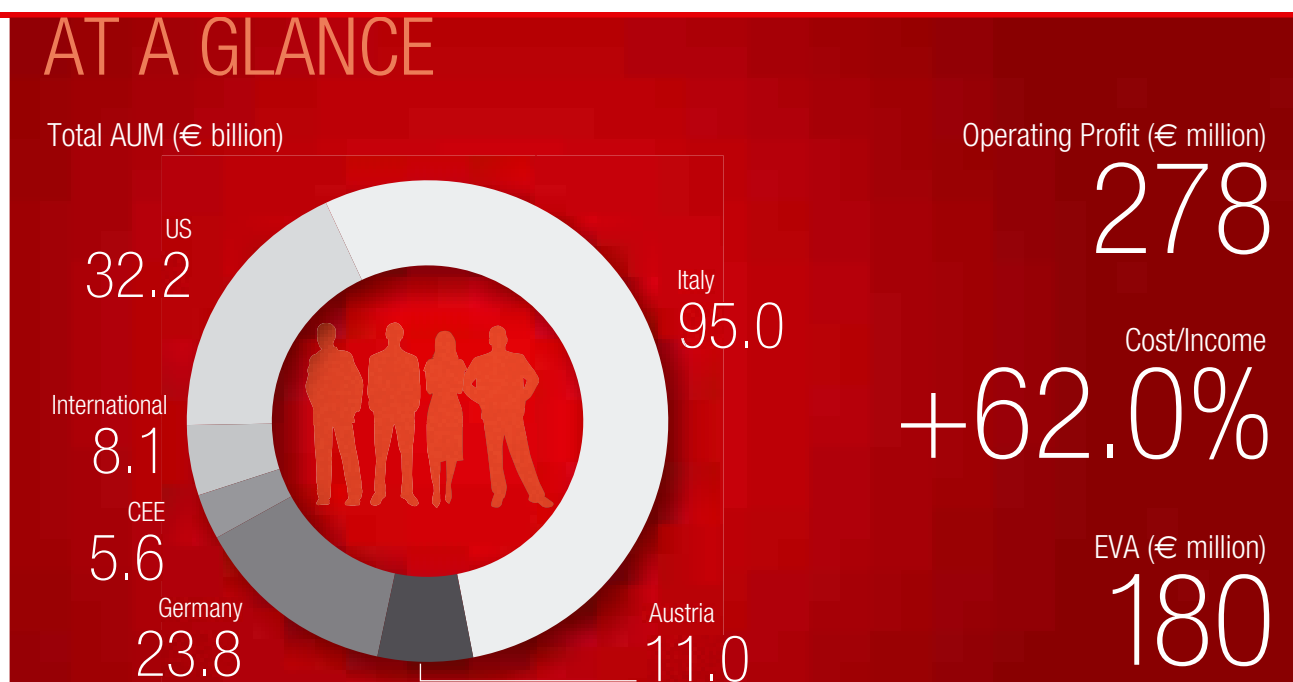

account should benefit from such actions, especially commissions, while low interest rates will continue to influence net interest income. The bank will continue to sharply focus on cost containment and improving organizational and operating efficiency.

It is also important to highlight that the private banking business in Poland, co-ordinated by the business unit as a project in 2009 in the context of the ongoing process of divisionalisation of Bank Pekao, will make its full contribution to the Private Banking Business Unit's operating performance starting from January 1, 2010, as an additional business line.

Finally, in the wake of the reorganization in Austria in 2009 and in coordination with the "One4C" Group project, the Group is planning to reallocate customers with total financial assets higher than €500,000 to the Private Banking Business Unit of HVB in the first half of 2010 and in Italy by year-end. This process will be accompanied by actions to sharpen customer perception that UniCredit Private Banking is a single international brand.

Asset Management

Introduction

Asset Management operates under the brand Pioneer Investments, the asset management company within the UniCredit Group specialising in the management of customer investments.

The business line, a partner of many leading international financial institutions, offers investors a broad range of innovative financial solutions, including mutual funds, hedge funds, assets administration, portfolios for institutional investors and structured products.

During the first half of 2009, the AM sector continued to feel the negative effects of the reduced world economic growth and the risk aversion which led customers to invest in more traditional banking deposits and money market funds.

In the second half of the year, the trend reversed following the partial rebound of the markets, and net sales were positive for Pioneer Investments at €8.4 billion.

Asset Management (CONTINUED)

Financial performance

In 2009, Pioneer Investments posted a **profit before tax** of €287 million, a decrease of €312 million (-52%) compared to 2008.

ASSET MANAGEMENT	AS AT			CHANGE ON DEC '08	
	12.31.2009	09.30.2009	12.31.2008	AMOUNT	%
Full Time Equivalent	1,962	1,967	2,165	-203	- 9.4%

Operating income was €733 million, down 33% compared to 2008, primarily due to the decrease in **management fees** associated with the lower assets managed and a more conservative asset mix with lower risk and lower margin products.

This decrease was offset in part by lower **operating expenses**, reduced by €53 million (10%) compared to 2008, primarily due to lower **personnel costs** (-6% on an annual basis) and due to lower **administrative expenses** (-14% on an annual basis). **Amortisation** and **depreciation** also decreased (-22% on an annual basis) as a result of higher intangible asset write downs made in 2008.

The reduction in operating expenses was even more marked net of extraordinary components, which had an impact in 2009 (reversal of the previous year's bonus and legal expenses). Net of such components, the decrease in operating expenses compared to 2008 was €81 million (-15% on an annual basis).

On a quarter by quarter comparison, in the fourth quarter the profit before tax was €107 million, growing 82% compared to the amount for the previous quarter.

This growth was due primarily to the increase in management fees (+16%, associated with the increase in assets under management, which was 4% on average), higher performance fees, a decrease in personnel costs (-21%) and in other administrative expenses (-3%). Lastly, there was a reduction in amortisation compared to the previous quarter of €6 million (-44%). The third quarter included accelerated write down of defined life intangible in the US segment.

In terms of costs, the fourth quarter included a reduction of accrued 2009 bonuses of approximately €10 million.

The **cost income ratio** for 2009 stood at 62.0%, worsening from the previous year due to the deterioration in operating income. The business line's performance was reflected in the value indicators: **EVA** declined to €180 million in 2009 from €388 million in 2008 (-53.5% y/y) and **RARORAC** was 49.93%.

In late December 2009, Asset Management had 1,962 **full time equivalent** employees, a reduction of 203 FTE if compared to the end of 2008.

Breakdown by business, geographic area and company

Summary projects in 2009

In 2009, the Pioneer group's net sales were negative overall by €1.9 billion. However, positive flows were recorded among the Pioneer Group's most important divisions: the International business line showed positive net flows of €1.9 billion; similarly the US Division, net of run off of CDOs, had positive net sales of €1.3 billion, as did the Italy retail channel, which ended the year with positive net sales of €1.3 billion.

To be noted in the second half of the year, net sales were positive at €8.4 billion, due to the positive contribution of the UCG proprietary channels and the reclassification to assets under management for funds previously included in assets under administration in Germany.

Assets under management stood at €175.8 billion.

The increase of 5.5% from the beginning of the year was affected in part by the negative impact (-€4.1 billion) associated with the adjustment made in Austria to make the representation of AuM linked to multi-asset fund programs consistent with Group reporting standards.

Net of this adjustment, growth stood at around 8.0%, due to positive market effect (+ 8.3%) and the acquisition of new assets under management of €2.3 billion (+1.4%) in US and Austria.

Asset under administration	6.2	9.9	-3.7	- 37.8%	9.4	-3.2	- 34.5%

(*) Including adjustment made in Austria to make the representation of AuM consistent with Group reporting standards.

United States

The business segment USA ended the year with negative net sales of €0.2 billion and assets of € 32.2 billion (US\$ 46.4 billion), up 8.5% from the beginning of the year primarily as a result of the favourable trend of the market component (+10.7%), partially reduced by negative net sales (- 0.8%) and by the exchange effect (- 3.4%).

During 2009 the US acquired Regions Morgan Keegan funds amounting to US\$ 1.5 billion, this transaction closed in the second quarter of 2009.

Net of the run off of CDOs associated with Vanderbilt, net sales were positive at €1.3 billion. Excluding both CDOs and Regions Morgan Keegan acquisition, final AuM amounted to €25.5 billion (US\$ 36.9 billion), an increase of 20.4% compared to the end of the previous year.

Italy

The business segment Italy assets under management stood at €95.0 billion, an increase of 6.6% from the beginning of the year, primarily due to the positive market component of €6.8 billion (+7.6%), partially offset by negative net flows of €-0.9 billion (-1.0%).

In the fourth quarter, net sales were positive (+€1.7 billion) primarily due to the favourable contributor of the Mutual Fund and Traditional Insurance segments. Retail channel was the main positive contribute (+€1.9 billion). Pioneer Investments market share increased from 15.62% in the third quarter to 15.65% in the fourth quarter of 2009. Year end 2008 market share was 16.17%.

Asset Management (CONTINUED)

Germany

The German business ended the year with negative net sales of -€0.9 billion (-€2.9 billion in the first quarter of 2009), primarily due to refocusing of mandates in the Institutional channel. Assets, equal to €23.8 billion, decreased by 1.0% from the beginning of the year, primarily due to the negative effect of net sales (-3.9%)¹, partly offset by the market's positive trend (+2.9%).

In addition to the assets under management mentioned above, the business line includes assets under administration of €0.5 billion (€3.9 billion at the beginning of the year)².

International

During the year, the International business segment posted positive net sales of €0.9 billion overall, due primarily to growth in India (€300 million), Spain (€232 million), France (€336 million) and the Middle East (€306 million).

Assets, equal to €8.1 billion, were thus 38.1% higher than the amount at the beginning of the year, in part due to positive market effect (+22.7%).

CEE

The CEE business line ended the period with relatively flat net sales (-€37 million), Pioneer Pekao nevertheless confirmed its leadership among asset management companies with a market share of 16.35%.

Due to positive market effect (+19.5%) the assets under management, equal to €5.6 billion, were up 18.7% from the beginning of the year.

Austria

The Austria business segment posted negative overall net sales during the year of €0.7 billion. Total ending assets, equal to €11.0 billion, were down 16.7% compared to the beginning of the year due to a negative effect of -€4.1 billion owing to the adjustment made to make the representation of the AuM related to multi assets fund programs consistent with Group reporting standards.

Making that correction to initial assets, growth from the beginning of the year stood at approximately 20.6%, due to the acquisition of new funds under management posted from AMG (€1.2 billion) and the positive market effect (+14.8%).

In addition to the above mentioned assets under management, the division includes assets under administration of €5.7 billion.

Alternative Investments

The Alternative Investments business line showed negative net sales during the year of €1.5 billion. AuM data are already included in those for the geographic business segments reported above. PAI Single Strategy family of funds showed positive net sales (+€132 million).

Overall assets in hedge funds, equal to €2.5 billion, decreased by 29% from the beginning of the year, primarily on account of negative net flows (-42.6%) only partially offset by a positive market effect (+13.6%).

Outlook 2010

To offset the negative impact of the financial crisis, and ensure the business sustainability in the post crisis environment the following initiatives, which will have an impact on the business in the next years, were identified:

Enhancing Non Proprietary Investment and Sales Strategy: (I) focusing on core investment strategies, (II) revisiting our geographical presence in markets where Pioneer Investments has a small presence, (III) focusing on Global Strategic Partnerships with key distributors and (IV) improving margins in the institutional channel.

Defining a Service Model for the Retail Proprietary Channel which brings Pioneer Investments closer to the UCG network, allowing a better understanding of customer investment requirements, and aligning product development strategies.

Defining Investment Performance Quality Criteria and Targets which reflect clients' risk/return expectations, differentiating performance evaluation according to their preferences and by product segment.

Building a Sustainable Operational Model by enhancing Data Management through the introduction of global processes and technology, aiming for data consistency, reducing risks and increasing efficiency in the decision making process.

1. Includes €2.1 billion in flows relative to the HVB pension fund, previously included in assets under administration

2. The flows for the HVB pension fund (€2.1 billion) were reclassified under assets under management

Introduction

In an unprecedented downturn in 2009, the CEE region overall presented a highly heterogeneous picture: while many Central European countries and Turkey were less hit by the financial crisis, others - especially those with a higher dependence on capital inflows - suffered from sharp falls in GDP, which significantly impacted the performance of the banking industry.

UniCredit's CEE banks therefore had to cope with a number of negative factors in 2009: low demand for loans, increasing competition among banks for deposits as less external funding for the region was available, reduced fee income due to slowing economic activity and resulting reductions in loans, payments, documentary business as well as fund business, higher loan loss provisions as a consequence of the worsening environment and also lower results in euro terms due to the depreciation of many CEE currencies.

Given this difficult environment, the performance of UniCredit's CEE banks proved highly satisfactory, based on a bundle of measures including strict cost control and a strong focus on risk management. The CEE Region - where UniCredit is the clear market leader with some 2,800 branches in 18 countries - remained a core contributor to the overall results of the Group.

In such an environment, UniCredit Group has effectively played its role as long term strategic investor in the region. Upon request of the IMF and of local authorities, UniCredit agreed to explicitly sign specific letters to assure its long term commitment towards those countries which have been most affected by the crisis.

Letters have been requested and signed for Serbia, Romania, Bosnia and Herzegovina and for Hungary. UniCredit, as well as the other strategic banks active in those countries, committed to keep adequate capitalization of their subsidiaries, even in stress scenario and to keep exposure (in terms of cross-border lending and funding) to those countries stable in nominal term through the crisis.

Following an upward trend that lasted many years, the CEE area ("CEE") faced a number of new challenges in 2009, but again contributed positively to the Group's results. While economic conditions in the various countries differed widely, operating results in CEE continued to develop steadily over 2009. The business mix and UniCredit Group's extensive network in CEE proved a sound basis for further growth in revenues despite the difficult economic situation in 2009. Cost efficiency remained one of the focal points in the current environment. The current level of credit risk provisions, influenced by significant allocations particularly in Kazakhstan, reflects the impact of the financial crisis on customer loans and is constantly monitored and strictly managed by appropriate action taken by UniCredit Group's risk management experts.

Central Eastern Europe (CEE) (CONTINUED)

Financial performance

In 2009, the CEE area of UniCredit Group achieved an **operating profit** of €2,664 million, outpacing the respective 2008 results by 6.2% (or 22.4% at constant exchange rates). Total **operating income** reached €4,613 million in this period outperforming the same period in 2008 by 10.5% at constant rates.

Net **interest income** increased by 8.5% at constant rates, to €3,003 million, despite the increase in refinancing costs characterizing the current financial environment. **Net fee & commission income** grew only moderately at constant rates, by 1.8% to €1.055 million. Trends in the various countries differed according to the relative importance of the generally weak

securities and new issue business; commercial services such as cash management and loan fees developed favorably.

There was a particularly strong rise in Turkey, where Yapı Kredi Bank is the undisputed and innovative market leader in commercial services including credit card business, foreign trade financing, leasing and factoring. Given the current market situation with its high volatility in FX and interest rates, the trading result showed particularly strong growth in 2009 to €496 million, increasing by 72.7% at current rates and almost doubling the result of 2008 at constant rates.

Full Time Equivalent (KFS Group proportional)	42,580	42,906	45,884	-3,304	- 7.2%

The market-driven relative slowdown in business and revenue growth was very quickly and effectively counterbalanced by strict cost management: **operating costs** of €1,949 million in 2009 therefore effectively decreased by 2.9% at constant rates and by as much as 12.3% at current rates even though they now reflect the full effect of the branch expansion program implemented in 2008. Overall cost efficiency thus further improved substantially as seen in the **cost-income ratio** of only 42.3% for 2009, compared to the 47.0% reported last year.

Reflecting the adverse market conditions and, as a consequence, an even more prudent provisioning policy, loan provisions had to be increased in 2009, to €1,718 million, more than three times the amount booked in 2008. The **cost of risk** ratio (in percent of average loan volume) thus increased to 2.87%, up from 0.90% in the previous year.

Due to this rise in risk provisions, and including the effect of lower profit and loss on investments compared to the prior year (which included i.a. the proceeds from the sale of some subsidiaries), CEE **net profit** of €740 million for 2009 reached only approximately half of last year's contribution to the Group results, but still represents a solid performance in an economically challenging environment.

Breakdown by business, geographic area and company

Summary projects in 2009

In 2009 overall initiatives in **CEE Corporate Banking** included common projects with Risk Management, including a specific program to assist clients in evaluating their liquidity needs. Within this framework, the CEE banks carry out a tailor-made action plan to help their clients cope with the difficult environment. Additionally, in response to the worsening economic environment, a project for more proactive management of existing corporate loan exposures in the CEE countries was started, aiming at further enhancement of the credit risk monitoring process.

After the implementation of the Global Transaction Banking (GTB) product line across the CEE Division in 2008, results in 2009 have been positive, with a growth trend over 2008 despite the economic turmoil. Integration between local Corporate Banking and GTB units led to improved service and a wider product range for our customers.

In **CEE Retail Banking** a major activity was securing deposit stability. Significant growth in retail deposits was achieved, in spite of strong competition and lower available customer funds in the environment prevailing in 2009. In lending, a prudent risk approach within challenging environment led to slight reduction in loan volumes.

Other initiatives included action plans concerning improvements in sales force effectiveness and productivity as well as of stronger migration towards direct distribution channels. As overall, UniCredit's customer centricity approach proved to be main pillar in preserving a stable client base.

Further to the Corporate and Retail customer satisfaction surveys completed at the end of 2008, CEE banks developed specific action plans in 2009 focused on improving current customer satisfaction levels. Its main targets are the achievement of a stronger relationship between the client and the bank, together with the introduction of products and services even more tailored to client's needs. Special emphasis was put on increasing satisfaction with electronic banking services by completing the roll-out of the web banking technology "Group Web Solution" in 3 more countries, bringing the number of network banks using this state-of-the-art tool up to 8. Also measures were taken to shorten the response time for loan applications. In addition the efficiency of the complaint management was improved by introducing a periodic complaint monitoring. Specific efforts have been made to provide customers with pro-active information to support them in times of economic turbulence.

A main project of **CEE GBS** was the CEE Divisionalization Program which started in April 2009 and is being implemented in Romania, the Czech Republic, Hungary, Croatia, Bulgaria and Russia step by step. The CEE Divisionalization Program focuses on customer centricity, efficiency and the delegation of authority. The approach of the program is strictly value added, the new Group model will be implemented in the individual CEE countries under consideration of local conditions. Customer centricity is the first of the key design principles driving Divisionalization, referring to the full focus on customer relationships with the goal to maximize long-term value and customer satisfaction. Efficiency is the second design principle of the Divisionalization program in the CEE and in practice translates into the creation of a leaner organizational structure and the streamlining of key processes. To leverage the value generated by the CEE Divisionalization program, it is to be implemented in coordination with other ongoing business and operational projects. The entire program is designed to create enhanced performance and competitiveness in all CEE Banks.

Central Eastern Europe (CEE) (CONTINUED)

Important cost saving potentials was identified with the Efficiency program 2009 in the areas of ICT, Real Estate and back-office processing. Sustainable efficiencies rather than cost cutting, with the additional benefit of implementation of UniCredit Group strategies (e.g. local centralization of back-office activities) will provide further improvements in customer service.

New ICT systems were implemented in Kazakhstan and Russia, which will support the further growth of business and customer services. A number of country-specific reorganization programs were performed, e.g. reorganization of the bank in Ukraine (the Macro Region Program - the consolidation of 27 regions to 7 macro regions), reorganization of retail credit risk processes in Romania and payment processing centralization in Bulgaria and Slovakia.

HR CEE has enhanced during 2009 the concept of Leadership pipeline, building a stronger talent and executive pipeline for CEE and for the Group through fostering moves to other competence and/or business lines and increasing visibility and career opportunities for Talents, i.e. promising younger staff.

A further focus was on the enhancement of training opportunities, including leadership training according to best practices in UniCredit Group, through providing UniManagement leadership training seminars in the CEE countries as well as further improvement on technical skills, change management and coaching.

Turkey

In the difficult market environment in 2009, Koc Financial Services maintained robust profitability thanks to solid revenue growth (+29.5% y/y at constant exchange rates) and cost containment (2.2% y/y at constant exchange rates), coupled with proactive credit risk management and focus on innovation, leading to a net profit growth of 17.1% y/y at constant exchange rates driven by the performance of Yapı Kredi Bank, its main subsidiary.

Yapı Kredi bank recorded a 22.3% Return on Average Equity according to local standards, driven by both positive revenue performance and tight cost control. The cost / income ratio improved by 12pp over 2008, declining from 53.3% in 2008 to 41.3% in 2009. The bank also maintained its comfortable liquidity and funding position in 2009 with a loan to deposit ratio comfortably below 100%. Being 4th among private sector banks by total assets, the bank is market leader in credit cards in terms of issuing volume and in leasing business.

In view of asset quality deterioration, driven by unfavorable macroeconomic conditions, Yapı Kredi undertook a series of initiatives, including projects to improve its credit infrastructure, proactive restructuring to increase collections and support of customers in temporary difficulty.

Despite adverse market conditions, the bank continued its investment in strategic focus areas in order to be best positioned for growth through improvements in infrastructure, efficiency and commercial productivity. One of the most important strategic actions in 2009 was the reorganization of the internal structure aimed at improving customer service quality as well as increasing efficiency through enhancement of synergies between business units (retail banking including credit cards, individual and SME banking, corporate and commercial banking and private banking) and product factories (asset management, brokerage, leasing, factoring and international banking operations). Other major strategic projects and initiatives undertaken in 2009 included CRM (Customer Relationship Management) improvements, MIS (Management Information Systems) investments, migration of credit card operations and retail credit risk management applications and strengthening bancassurance business.

At the beginning of 2009, the branch expansion plan launched in July 2007 was put on temporary stand-by in view of the global crisis. Yapı Kredi shifted its focus towards the optimization of branch network via relocation, renovation and enlargement of 75 branches with the aim of improving service quality and customer satisfaction. With the fourth largest branch network in Turkey, 2,347 ATMs and 7.6 million credit cards issued, the bank confirmed its strong market position.

Yapı Kredi also leveraged on its alternative delivery channels to provide better customer service. As of the end of 2009, share of alternative delivery channels in total banking transactions improved to 75% from 69% in 2008. The bank further intensified its efforts to improve customer satisfaction and customer trust aimed at deepening customer relationships especially in difficult market conditions. With state of the art customer satisfaction monitoring systems, 12,000 internal and 70,000 external customers participated in a survey in 2009 with an aim to understand, measure and monitor the satisfaction and expectations of customers.

Considering employee engagement as a key enabler of customer satisfaction, Yapı Kredi continued its efforts to improve the satisfaction of employees in 2009 and invested in improving employees' qualifications so as to provide the highest quality customer service.

Yapı Kredi further enhanced its standing as innovator with the launch of new products and services tailored to meet the diverse needs of its extensive customer base, including product and service packages that offer tailored advantages for SMEs, high speed loan application for all retail customers directly through SMS or internet, a new credit card dedicated to customers who travel frequently, providing privileged travel advantages and campaigns, specifically designed ATMs offering banking services to physically impaired customers, a first in Turkey, and many others.

Despite a challenging year in 2009, Yapı Kredi's efforts for excellence in banking activities were also appreciated by many awards from prestigious institutions. Yapı Kredi received 8 awards in 2009. Furthermore, Yapı Kredi's credit card program World achieved high rankings and received many awards in the sector.

Russia

ZAO UniCredit Bank is one of Russia's leading universal banks in terms of service quality, profitability and efficiency. As of December 31st 2009 total assets equal to RUR 482 billion and the shareholders equity to RUR 60 billion. With a market share of around 1.9% (as of November 2009) the bank ranks among the country's 10 largest banks by total assets.

Despite the fierce macroeconomic environment the bank further broadened its customer base and completed during 2009 its regional expansion program through opening of another 28 offices. Thus the bank currently maintains a countrywide network of 111 outlets plus one Representative Office in Minsk, Belarus, and serves more than 710,000 individual and SME clients and about 5,000 corporate clients.

In response to the difficult economical environment, the bank reinforced its focus on adequate levels of capitalization and liquidity and put a strong emphasis on strict cost management and asset quality. Based on such measures, 2009 was a very successful year for Zao UniCredit Bank. Focused commercial efforts enabled revenues to almost reach the previous year's record level (-2% yoy at constant rates). Declining interest income due to shrinking loan volumes was compensated by higher flows of commission and strong trading gains benefiting from increased market volatility. Comprehensive cost containment measures proved highly efficient resulting in a cost/income ratio of only 33%. A very prudent approach to risk provisioning caused a more than three-fold increase of net write-downs on loans.

As a consequence of the crisis, total assets declined in the reporting period by nearly 20% at constant rates, driven by both retail and corporate loan volume contraction. Through strong emphasis on deposit-taking the bank achieved to maintain a comfortable funding position with a loan to deposit ratio of 121%.

Corporate banking remains the core business of the bank, both in terms of revenues and volumes although as a consequence of the economic downturn lending slowed down throughout the year. Thus gross loan volume decreased by 5% to RUR 286 billion. On the liability side the bank successfully increased its deposit base by more than 11% to RUR 218 billion. To cope with the difficult operational environment the business priorities during 2009 were to

devote attention to credit risk and to maintain key relationships as well as further development of business with local blue chips and multinational customers. Strong emphasis was put on non-cash risk and transactional business.

In retail banking, despite the tense situation in the retail lending market, the bank successfully completed its expansion program and increased its retail presence to 97 outlets throughout the Russian Federation. While the total retail loan portfolio decreased in 2009, customer deposits increased significantly. The bank also continued to develop fee-based products like payroll services and card products; the number of cards issued went up to 540,000.

Croatia

Despite a challenging market environment affected by recession, Zagrebačka banka Group (ZABA Group)'s 2009 performance proved its strong fundamentals by sustaining its leading market position and strong franchise and its good income-generating capacity benefiting from its well diversified business model as a universal bank.

Total revenues grew by 2% against 2008 which, combined with 8.4% reduction in operating costs, resulted in 14.3% y/y growth in gross operating profit at constant rates and improvement of the cost-income ratio to 48.4%. This performance was the result of efficient cost management and a swift change to selective lending aiming to boost liquidity in public sector and ease the downturn cycle for large corporate clients preserving asset quality from faster deterioration. Net profit fell by 19.6% at constant rates due to a notable rise in net write-downs on loans.

ZABA Group is the market leader in Croatia in terms of capital and total assets, having also the largest market share in customer loans, deposits and Assets under Management. It does business with around 1.5 million clients.

Aiming to further strengthen its regional presence in retail business, in 2009 the Bank opened seven new Retail branches and one Private corner. Total individual clients' deposits reached €5 billion (+2,3% y/y), driven by growth of term deposits (+8.8% y/y) mostly as result of wide savings product offer complemented with new savings models in order to fulfil customers' requirements. Total loans to individual clients amounted to €3.9 billion. More than half of the total loan portfolio refers to housing loans. Zagrebačka banka is a market leader providing its specialized service to the small business segment through a network of 47 business centres.

Despite the sharp decline in economic activity, exports and imports, and local corporates' tight liquidity, Zagrebačka banka achieved excellent results and re-affirmed its leading position in the sphere of

Central Eastern Europe (CEE) (CONTINUED)

corporate banking. Total loans to corporate clients grew from €3.6 billion at the end of 2008 to €4 billion at the end of 2009, while deposits at the end of 2009 amounted to €2 billion, representing an increase of over 4% in comparison to the end of 2008.

In 2009, with market share increases from 24.1% to 25.6% in loans and from 22.4% to 24.3% in deposits, the bank achieved a balanced growth in corporate banking, based also in terms of banking services rendered, which have significantly contributed to the total result. The bank continued to further strengthen its dealings with both the public sector (including significant financial support to the government and the public sector overall), and the private sector (large and mid-sized companies, and multi-national clients).

The bank's leading position as domestic investment banking services provider was recognised by the "Best Investment Bank in Croatia in 2009" award by Euromoney. Transactions arranged in the Capital Markets segment included major bond issues, including a eurobond issue for the Republic of Croatia, in which for the first time the Government of Croatia awarded a Croatian bank with the leading role in a transaction of this size and importance outside Croatia.

In the Corporate Finance segment in 2009, the bank acted, among others, as a sell-side advisor to the owner on the sale of Getro, a Croatian grocery retailer. Additionally, the Bank played a leading role in several noteworthy transactions and positioned itself as a leader in the region, including sell-side advisory to the governments of Montenegro and Albania in major privatization projects. Moreover, Treasury sales are taking an active role in advising corporate clients on hedging various market risks. Consequently, a significant increase of derivative products sales volume was recorded, primarily in interest-rate hedging instruments. In 2009 the Bank introduced an internet equity brokerage platform for retail clients, setting itself on the right track for growth of market share in the brokerage segment.

Other countries

UniCredit **Czech Republic**, the 4th largest bank in the country, managed to get successfully through the crisis in 2009 with a focus on value creation and self-financing capability. The bank maintained its leading position in the Corporate Segment in 2009 leveraging on the group's approach towards multinational and cross-border clients. International markets contributed significantly to the bank's revenues by using upcoming market opportunities in FX, interest and credit trading. In Retail, the bank further pursued its strategy for affluent and small business clients.

2009 was a challenging year for UniCredit Bank **Slovakia**. Apart from the worldwide economic downturn, euro adoption on January 1, 2009 and the application of the new SEPA rules also had a major negative impact

on the results of the bank. New products, an even more disciplined margin policy and better processes could partly offset reduced revenues.

Within the economic recession, a major focus of UniCredit Bank **Hungary** was the generation of deposits, bringing the loan/deposit ratio to below 100% compared to 137% a year before. Excellent revenues and the outperformance of business segments coupled with strict cost management ensured a 27% increase in gross operating profit y/y. Substantially higher loan loss provisions and the one-off revenues on the sale of the shares in the Budapest Stock Exchange in 2008 lead to a decline in pre-tax Profit by 47%. Efficiency remained in the forefront of the bank, which was proved by the excellent cost/income ratio of 44%.

Also in **Slovenia**, the results of UniCredit bank were influenced by the negative environment. While revenues were slightly higher than 2008, costs also increased due to higher depreciation resulting from the branch expansion in 2008. Operating profit was on the level of the previous year, but a pronounced increase in net write-downs on loans lead to profit before taxes of €11m, halving in value y/y.

In **Bosnia and Herzegovina**, UniCredit is one of leading banking groups in the country, being present with two banks. Overall, despite a difficult economic climate, revenues almost reached 2008 levels and, due to strict cost management, expenses decreased by 3%. UniCredit Bank d.d., based in Mostar, is one of the largest banks and currently operates a network of 96 branches. The Group's presence in the country is complemented by UniCredit Bank a.d. Banja Luka. Together, both banks serve more than one million customers in Bosnia and Herzegovina.

UniCredit Bank **Serbia** further improved its market position with a 6% market share. At constant exchange rates, the bank managed to reach the same result as in 2008 despite significantly higher loan loss provisions, significantly outperforming the market. The loan to deposit ratio and the cost income ratio improved as well despite the full-year impact of opening 22 branches in 2008.

Also in **Romania** the 2009 recession made its mark on banking. UniCredit Tiriac deleveraged significantly reducing its loan-to-deposit ratio to 108% from 140% at the end of the previous year through a 23% increase in customer deposits. The bank registered 14% growth in operating profit to RON 651mn (€152mn) driven by 9% increase in revenues and less than 4% growth in operational expenses. This includes also the full year impact of over 100 branches opened in 2008; the bank closed the year with 241 outlets. Nevertheless efficiency further improved to below 48% versus 50% last year as a result of optimization and consolidation actions. The number of employees was reduced by 8% to below 3,000 at the end of the year due to natural turnover, which normalized to below 8%. Net profit

reached RON 335mn (€78mn), less than 7% below 2008, a leading performance in the local market within the crisis context.

UniCredit Bulbank is **Bulgaria's** largest bank, serving over 1.1 million customers. Being a truly universal bank it offers a diverse product range to retail, affluent, corporate and institutional customers through a traditional branch network and alternative but increasingly popular channels such as electronic and mobile banking. Taking advantage of its sound standing, the bank assured its leadership position in the difficult year 2009 increasing its market share y/y by 42bp to 16.3% in total assets and by 40 bp to 14.8% on customer deposits. Increasing of market share took place simultaneously with network optimisation project, which in effect brought reduction of branches from 260 to 234. Despite the growth of volumes in 2009 (deposits +6.5%, net loans +1.9% y/y eop), due to unfavourable market interest rate decrease and the high competition for the deposit margins in the sector, the net interest income did not catch up the level of 2008. The slow down in the economy was also reflected on net fees with less transactions carried out, leading the revenues to an amount of €291 million, lower by 5.3% compared to 2008, partially compensated by the reduction of operating expenses by 6.8% y/y to €125 million. The 2009 performance of the bank was also affected by higher loan loss provisions (-64 vs. €-26 million in 2008), even if with softer impact compared to 2009 banking sector, leading to a net profit of €103 million which is 31% below 2008.

2009 was an extremely difficult year for the three Baltic states, **Estonia, Latvia and Lithuania**, with the banking systems being hit hard by the crisis. Amidst this challenging economic situation AS "UniCredit Bank" continued to provide a full range of corporate banking services for its customers. The risk strategy of the Bank was adjusted in line with the Group's risk policy, including strict limitations on financing commercial real estate. The bank also achieved strong growth in the deposit portfolio of 112%.

In the **Ukrainian market**, Ukrsotsbank is the 6th largest bank. As of the end of 2009 Ukrsotsbank held market shares of 5.5% in lending business and 3.5% in deposits. In view of the difficult situation in the Ukrainian financial market in 2009, Ukrsotsbank took a number of essential actions, such as reviewing its commercial strategy specifically focusing on customer deposit gathering and substantially limiting new lending only to the customers with excellent credit history; furthermore increasing

efficiency by implementing cost-cutting initiatives such as branch network transformation from 27 regions to 7 Macro-Regions and increasing the bank's capital by 0.5 bn Hryvnia to total 2.27bn Hryvnia. Based on these measures, the bank reached a gross operating result at 2008 levels; profit before taxes decreased to €22 million, driven by loan loss provisions which more than doubled y/y.

In Retail, a main focus lay on the implementation of the UniCredit Group business model, the segmentation of clients into Mass Market, Affluent clients and Private Banking as well as Micro business and Small business was successfully realized. The creation of MacroRegions led to a significant improvement in service quality as back-office functions were centralized and the network is more concentrated on front-office tasks allowing commercial staff to dedicate more time to the interaction with clients. The Corporate Division implemented stricter credit risk requirements for new loans as a consequence of the more risky environment, as Ukraine was hit severely by the crisis.

In **Kazakhstan**, the results of ATFBank were affected by the economic crisis. With revenues growing by 7% at constant rates within a highly difficult environment and substantial reductions in costs, the bank generated a gross operating profit 21% at constant rates above that of 2008. The bank demonstrated high efficiency in its operations, with a cost/income ratio of below 30%. However, in a banking market with non-performing loans reaching extraordinarily high levels, also ATFBank registered loan loss provisions more than four times above 2008, due to the crisis overall and partially the default of some single large corporate customers. Thus the bank suffered a significant loss in 2009.

ATF Bank successfully increased its deposit base by more than 40%, especially in retail reaching a market share of almost 14%. The card business expanded thanks to the focus on salary schemes for employees of SMEs and Corporate clients; the number of active cards reached 159,300 as of year end 2009. Activities in Corporate included a network restructuring to 5 regional corporate centers and a successful deposit generation campaign.

Central Eastern Europe (CEE) (CONTINUED)

Outlook 2010

While the economies of many CEE countries show the first signs of recovery, the financial crisis is expected to continue to affect the real economy and the banking sector in 2010. UniCredit's CEE banks plan to follow a selective growth path with a differentiated approach given the heterogeneous situation of the different countries in the region. Overall, due to the unchanged commitment of UniCredit Group to the CEE region, the Group is prepared to take existing growth opportunities and to continue to provide a full range of banking products and services to its customers throughout the region. This approach includes a plan to open up to 100 new branches focused on individual country-specific growth opportunities.

Further activities to boost revenues will include efforts to improve customer satisfaction through a simplification of processes and procedures, based on the UniCredit Group's

focus on customer centricity. The Group also aims at further enhancement of the effectiveness of the sales force and network optimization measures and at cross-selling activities including the development of new product packages.

In the still volatile economic environment, risk management will stay at the center of attention with a clear focus on risk monitoring and asset quality. The CEE banks will continue their conservative lending policy. Identified improvements in the CEE Credit Risk processes will be implemented in 2010, directed both at improving the quality of loan portfolio and reducing loan defaults as well as improving the service to the customer in reducing time to loan approval and disbursement.

The CEE banks will also seek further efficiency improvements and synergies within their organisations. Planned measures comprise the simplification of processes and efficiency programs for back office functions throughout the region.

Poland's Markets

Introduction

The Poland's Markets Business Unit manages the UniCredit Group's operations in Poland and OJSC UniCredit Bank activities in Ukraine.

Bank Pekao S.A. is one of Poland's leading banks in terms of total assets (market share of 12.0% as of December 31, 2009), loans to customers and assets under management. The bank has a nationwide network of 1,028 branches, a strong presence in all the country's major cities and Poland's biggest ATM network together with Euronet consisting of over 4,000 ATM's (where 1,854 ATMs owned by the Bank are available to customers of UCG banks free of charge), enabling the Bank's customers to have fully flexible and easy access to bank channels all over the country.

Bank Pekao S.A. controls 100% of OJSC UniCredit Bank in Ukraine with a market share of about 1% in terms of total assets and loans. Corporate Banking and Custody are the core businesses of UniCredit Bank, contributing about 67% of revenues. The bank has a network of 61 branches.

Financial performance

At December 31, 2009 the Poland's Markets Business Unit posted YTD **profit** for the period of €559 million representing a decrease of 24.0% y/y at constant exchange rates.

The Poland's Markets' YTD **operating income** totaled €1,634 million in 2009, a decrease of -7.3% y/y at constant exchange rates. The result comprised:

- **net interest income** of €895 million lower by 15.5% y/y in 2009 YTD at constant exchange rates primarily due to lower market interest rates dynamics.
- **non-interest income** of €738 million increased by 5.2% y/y at constant exchange rates mainly thanks to higher trading income.

Operating costs (including integration costs) remained under strict control and were lower by 0.4% y/y (at constant exchange rates). The cost/income ratio was 52.2% at the end of 2009, mainly due to pressure on the revenue side partially offset by cost efficiency.

At the end of December 2009 Poland's Markets' **loans to customers** amounted to €19.4 billion, decreased by -2.6% compared to December 31, 2008, at constant exchange rates.

Deposits from customers (including securities in issue) amounted to €24.1 billion and increased by 7.8% in that period (at constant exchange rates).

At the end of December 2009, there were 20,270 **FTE** employees, a reduction of 1,136 FTE staff from December 2008, without any redundancy program.

In 2009 OJSC UniCredit Bank managed to maintain positive net profit, despite the difficult market situation in Ukraine. As soon as the first signs of deterioration of the market appeared, strict measures were put in place in order to even more carefully control the operations of UniCredit Bank, especially in the risk management area. As a result, since March 2008 there has been no further expansion of the network and since Q3 2008 business activity has been limited to minimizing risks. In 2009 several actions in cost management area were undertaken aiming at achieving cost savings with focus on both HR and Non-HR expenses.

Breakdown by business, geographic area and company

Summary projects in 2009

Corporate Business

Bank Pekao maintained its leading position in Poland's corporate segment. As at December 31, 2009 deposit volume increased by 14.4% over December 31, 2008 despite the unfavorable market conditions. As Poland's business environment is affected by the

global financial crisis, Corporate Banking has continued to implement its strategy of improving the effectiveness of allocated capital by focusing on more profitable lending products and further customer relations extending through cross-selling and up-selling activities. Lower demand for external financing from corporate customers, strengthened by the deleveraging process and diminished the possibility of loan growth. As a result at December 31, 2009 loan volume decreased by 12.1 % from the end of December 2008. Bank Pekao continues to hold a leading position in the corporate banking segment. The Corporate offer was a subject of constant development during 2009 year. New products / solutions were implemented in the transactional banking area, lending activities and custody services. The strong position of the bank was confirmed by the several awards received by Corporate Banking. In 4Q Bank Pekao won the title "Best Corporate/Institutional Internet Bank in Central and Eastern Europe" in the competition sponsored by the Global Finance magazine. Moreover, the automatic procedure of foreign electronic payments in PekaoBIZNES24 was also awarded in the Innovation of the Year 2009 contest under the patronage of the Ministry of Regional Development.

Retail Business

Total savings in the Retail Business grew by 8.1% in 2009, in both deposits (up by 5.0%) and mutual fund volumes (up by 24.0%). Deposit growth was supported by the marketing campaign for the Dobry Zysk "Good Profit" savings account at the beginning of the year and successful launch of a new line-up of Eurokonto packages with a wide spectrum of accounts to suit the needs of all consumer segments. In 2H 2009 the number of Eurokonto packages increased net by 149 ths compared with 20,5 ths in first 6 months of 2009.

Since April 2009 further signs of improvement in the Mutual Funds market in Poland were observed and the following months confirmed the positive market trend. Gross sales of MF in 2H 2009 amounted to €289m and were 78% higher than in 1H 2009. Net sales in 2H 2009 amounted to €90m as against net redemptions amounting to €125m in 1H 2009.

Total loans increased by 2.0% in 2009. The continued commercial focus on consumer loans supported by the Easter and September marketing campaigns enabled an increase in the consumer loans stock of 16.4% in 2009. The stock of PLN mortgage loans increased by 14.7% with continued strong focus on the profitability of new production.

In 2009 the Retail Business successfully launched the new operational CRM - "UNISales" system. This innovative tool integrates the work environment of the sales network, successfully supports relations with customers and the coordination of the sales activity of the more than 10,000 employees of Pekao.

Outlook 2010

Bank Pekao S.A. and its subsidiaries operate predominantly on the territory of Poland. Therefore, the PMD's performance will be influenced by the economic events in Poland and international events that have an impact on Poland's economy. The year 2010 will bring a faster GDP growth, which is expected to reach 2.3%. This will fuel an overall improvement in the business environment for banking activity, albeit in the case of Poland such GDP growth might still bring a rise in the jobless rate, as well as relatively weak consumption.

The CPI inflation is expected to fall from 3.5% year on year at the end of 2009 to ca. 2.0% year on year in the first half of 2010, due to a lack of any significant increases in regulated prices (which pushed up the CPI inflation readings in 2009), a stronger zloty and slowdown in salaries growth. In the second half of the year, inflation will likely bounce back towards the target (2.5%) and the interest rates might be raised, although this will also depend on the pace of economic growth, which is likely to come under some pressure as inflation climbs up.

A potential risk factor for the economy will be the scale of the public deficit. The resulting requirement for debt financing is bound to gradually enhance yields on treasury securities.

Lending activity in the Polish market remains relatively weak, as low private investment environment will limit corporates' demand for external financing, while moderate deposit growth may decrease loans to deposit ratio in the sector, reducing pricing pressure on deposits spreads.

Global Banking Services

Introduction

The principal activities of the Global Banking Services Strategic Business Area are as follows: Information and Communication Technology (ICT), Operations (Back Office & Workout), Group Organization and Logistics (which includes Real Estate), Security, Lifelong Learning Center, Management Consultancy and Internal Customer Satisfaction.

The mission of the Global Banking Services Strategic Business Area (GBS) is to optimize costs and internal processes, ensuring operating excellence and supporting the sustainable growth of all the business lines, with a particular focus on:

- **efficiency:** optimization of the governance model and rigorous control of costs through a centralized procurement service capable of maximizing synergies, savings and operating excellence
- **specialization:** centralization of the services of the Group's Global Service Factories and Shared Service Centers in order to benefit from economies of scale and specific skills
- **customer-centered approach:** definition of guidelines for measuring, monitoring and improving the satisfaction of internal and external customers
- **quality of services:** definition of key performance indicators and Service Level Agreements by agreement with internal customers, with periodic evaluations to improve service quality and promote best practices

Financial performance

In 2009, GBS was able to continue to demonstrate its efficiency in the rationalization of costs.

	2009	2008	ABS	%
Direct Costs	3,682	3,847	-165	-4.3%

	2009	2008	ABS	%
FTE number	15,677	15,881	-205	-1.3%

The direct costs of SBA show a reduction of €165 million (-4.3%) compared with 2008. If we disregard the increase in costs arising from the centralization of activities and from discontinuity vs 2008, amount decline to €394 million (-10%), and reflects the continuing process of improving the efficiency of GBS activities in Italy, Germany and Austria. The area continued to centralize the operations of all the Business Lines, to the point of directly managing 24% of costs.

Staff numbers show a decreasing trend of 205 resources (-1.3%); this reduction is largely attributable to the synergies arising from the corporate mergers carried out with regard to both ICT and Operations. Considering the activity insourcing, such as Security insourcing from Retail and Shared Service Center, FTE reduction would amount to 500 resources (-3.1%).

Group ICT and Operations

ICT

The direct costs of ICT show a decline of €146 million compared with 2008 (-9%). If we consider the impact of activities acquired in 2009 also in 2008, this saving in direct costs amounts to 11%. In addition to the consolidation of the benefits associated with the merger with Capitalia, 2009 for Information and Communication Technology ICT was a year characterized by an intensive program of integration of processes and systems, achieved chiefly thanks to the merging of the Group's IT entities into UGIS. This allowed a rationalization of IT costs, and a consolidation of the central role of UGIS in the management of ICT affairs of the Group.

Global Operations Services

The direct costs relating to Global Operations Services are down by 8%, representing a saving of €41 million compared with 2008. If we consider, also in 2008, the operations acquired during the 2009, the reduction in direct costs would amount to 10%. This result was achieved thanks to a process of centralization and rationalization of the Back Office structures through the merging in one single legal entity UniCredit Business Partner, of the former UniCredit Produzioni Accentrate (Upa) and the Back Office structures of HVB and Baca into a single entity (UniCredit Business Partners), and, finally, through the centralization of the holdings of the Back Office companies BACA AS and BTS, operating principally in the CEE countries.

Workout

Workout saw the completion of the process of centralizing the management of the entire portfolio of non-performing loans in Italy under GBS, as well as the transfer of these activities in Germany to the GBS area. This process of centralization entailed a 13% increase in direct costs in 2009. The centralized management of the Group's NPLs made it possible to improve the recovery process, with a consequent impact in terms of efficiency: the total for problematic loans recovered, at more than €1.5 billion, is up by 4% compared

with 2008. If we consider the centralization of recovery activities, Workout shows a cost reduction of 29%.

Group Organization & Logistics

About 80% of Group Organization & Logistics costs are in Real Estate.

Real Estate

In Real Estate, the increase in direct costs compared with the previous year is 13%, and is attributable to the higher rental expenses arising from the disposal of properties. Part of the increase in rents payable was offset by cost reduction measures such as the rationalization of utilities costs and the optimization and release of spaces; in particular, the space optimization projects released 253,500 m². The disposal operations produced capital gains for the Group equal to €690 million.

Lines of business by activity, geographical area and company Summary of 2009 projects

Group ICT and Operations

The Business Unit is responsible for the strategic and managerial coordination of the Group's ICT, back office and credit recovery companies. It also concentrates on centralized administrative services for HR, Finance & Accounting, and the management of Card Processing and Global Insurance services. In 2009 the Division was divided into three Departments: ICT Governance and Strategy, Global Operation Services and Workout Services, each of these being respectively responsible for one of the UniCredit Global Factories: Global Information Services (ICT), UniCredit Business Partner (Back Office) and UniCredit Credit Management Bank (Workout).

The principal strategic objectives of the Division are to ensure a unified strategic vision among the various components of the Business Unit by providing them with guidance, support and control, and to initiate actions to improve the efficiency and effectiveness of the managed structures, with particular attention to synergies within the context of the operations of the Global Factories. These objectives were pursued by implementing important initiatives to rationalize, standardize and redesign the processes of the Global Factories by centralizing the Group structures dedicated to back office and Information Technology services, chiefly in Italy, Germany, Austria and the Czech Republic.

Special attention was paid to mitigating the effects of the international financial crisis by reinforcing the steps taken to

Global Banking Services (CONTINUED)

strengthen the management of operating risks, and particularly to the need to develop more refined risk measurement and management methodologies, in order to achieve ever-greater transparency of processes and an improved capacity for intervention in response to business developments.

UniCredit Global Information Services

The mission of UniCredit Global Information Services for 2009 was to deliver IT services to Group companies and third parties, ensuring the appropriate quality level and constant evolution of the services offered; to support the business processes by ensuring their overall organizational coherence and pursuing adequate levels of service and efficiency; to design, develop and manage the IT systems of the UniCredit Group, ensuring that their technologies and applications remain appropriate at all times in order to satisfy the needs of the Group; to ensure continuous improvement of the efficiency of IT services and constant control of the associated costs (improving on the European benchmarks for the sector) and, thus, contributing to the global efficiency strategy of the UniCredit Group.

In 2009 the UniCredit Global ICT Company was created with the merger of the Group IT companies UGIS, HVB-IS (Germany), Wave (Austria) and Kyneste (former Capitalia Group). The new multinational ICT company UGIS has almost 4,500 employees in 8 countries (Austria, Germany, Great Britain, Italy, Poland, the Czech Republic, Slovakia and Hungary). Various insourcing activities were carried out, including the integration into UGIS of the IT MIB branch of the London subsidiary of HVB AG.

Particular attention was paid to the evolutive maintenance of the Eurosfig platform, focusing on management of the new market circumstances (e.g. suspension of loan repayments for disadvantaged families), on compliance with legislative measures (e.g. abolition of overdraft commission fees, "Friends Network" program for the sale of P.A. products at bank branches, the "Scudo Fiscale" [*tax shield*]), and on new products (Genius Card, prepaid UEFA Champions League card, new mutual funds) and services (adjustment of commission fees, mitigation of the operating risks of Filiale, sale of credit products via Internet Banking).

Important synergies were obtained through a number of projects, including the EuroMIB project for the creation of a Group platform for Management & Investment Banking and the CACEIS project, involving the outsourcing of securities administration and custody services by HVB AG to CACEIS Bank Deutschland GmbH. With the same objective of greater efficiency, steps were taken to bring foreign subsidiaries in line with the technological standards of the Group, as well as initiatives relating to the GES (Global Enterprise Services) area for improving Group data quality and risk management processes. In particular, the first parts of the CFO Data Warehouse project were carried out, with a view to integrating data from various sources into a single repository to support the processes of the CFO.

Global Operations Services

The purpose of this Department is to coordinate the Group factories devoted to centralized operations/back office services. The following departments operate within the framework of Global Operations Services: "Shared Service Centers", which are responsible for managing centralized support services (HR Shared Service Center and Financial & Accounting Shared Service Center), and defining guidelines and policies for the centralization of support services; "Card Payment Solutions", responsible for supporting and verifying the operations of the Factories / Structures involved in Card Processing by defining the strategies and policies relating to these services.

In 2009, Card Payment Solutions consolidated the objective of centralizing credit card processing in Italy, completing the transfer from the portfolio associated with the former Capitalia companies to the Group's technological solution, as well as supporting the strategy of insourcing the business from cards issued through CartaSi, promoted by Retail Division Italy. Against this background, from October onwards the process was begun to convert CartaSi cards into other cards issued directly by the banks of the Retail Division Italy and managed using the centralized Group solution.

UniCredit Business Partner

UniCredit Business Partner is the Global Factory for Operations, and its objective is to quickly and efficiently integrate the Group's back office activities in a sustainable manner. The strategic goal is to provide customers with the best possible value by developing a homogeneous and innovative operating model, sharing best practices and achieving economies of scale based on independent centers of expertise for each country in accordance with local circumstances.

UniCredit Business Partner was created on January 1, 2009 (with a change in name from "UPA", UniCredit Processes & Administration) following the acquisition of the back office activities of Bayerische Hypo- und Vereinsbank ("HVB") and Bank Austria ("BA") through contribution of the back office business of HVB and of the wholly-owned BA subsidiaries BA-CA Administration Services GmbH and Banking Transaction Services S.r.o., companies specializing in back office services. A branch of UCBP was opened in Poland for transfer of activities carried out for HVB by the German subsidiary of UCBP, with another two opened by BA-CA Administration Services GmbH in Poland and Bucharest, Romania for transfer of the Austrian operations carried out for BA (the need for branches of BA-CA Administration Services GmbH to carry out the Austrian operations, separate from the UCBP branches, was dictated by the peculiarities of Austrian law regarding banking secrecy).

In 2009 the Certifications were renewed (previously done for the Italian and Romanian operations by UniCredit Processes & Administration) in accordance with the reference international standards UNI EN ISO 9001:2008, UNI EN ISO 14001:2004 and EMAS.

Workout Services

This department provides global coordination of the Group companies and structures devoted to credit recovery, encouraging centralization and the constant evolution of processes by maximizing effectiveness and efficiency, in conformity with cost/benefit thresholds and the control of recovery times and costs, as well as of any potential losses.

For 2009, the objective of the business line was to provide specialist functional coordination of the companies and structures falling to its responsibility, fulfilling a role of guidance, support and control, while respecting the responsibilities of the entities concerned, with the goal of optimizing operating processes, minimizing overall costs and maximizing the profitability of operations, even if carried out on behalf of companies outside the Group; the department manages directly the SPV companies receiving the problematic/secured credits of the Parent Company and Group entities.

It is also responsible for supporting and monitoring the application of the Department guidelines by the relevant Group companies and structures, as well as for encouraging the application, by those companies/structures, of the guidelines issued by other functions of the Parent Company and for monitoring the implementation of policies/models/processes and trends in the budget/performance figures falling within the scope of its competence. The persistence of the current economic crisis has, naturally, also affected the processes associated with Non-Performing Loans (NPLs), with a halt to the dynamism of this market that formerly made it easy to carry out securitization operations and/or engage in portfolio buying and selling transactions.

In 2009 no securitization operation was carried out on NPLs, while the average price of the mortgage portfolios has halved in the last few years, rendering particularly difficult one of the options for liquidating credits. The difficulties of extra-judicial recovery have necessarily steered recovery strategies towards favoring greater credit control through recourse to judicial procedures, with the consequent lengthening of recovery times.

UniCredit Credit Management Bank

The mission of UniCredit Credit Management Bank (UCMB) is to minimize the current net cost of managing the Group's non-performing loans and to maximize the profitability of its credit management activities, including in relation to the debts of companies outside the Group. For UCMB, 2009 was a year of operational consolidation after the wide-ranging initiatives undertaken during the previous year, concerning major growth-related structural implementations resulting from the integration of the non-performing loans of the Capitalia Group.

At the year end, UCMB held just under 1 million positions under management, with a gross value of more than €40 billion. The

main activities carried out and the main goals achieved in 2009 included successful recoveries of more than €1.5 billion from problematic loans under management, bettering the 2008 figure by 4% and the estimated total for the current year by 6%. There was an improvement in management efficiency (+35% vs. 2008), measured by the average number of affairs per manager, which had fallen progressively during the previous year as a result of the Capitalia integration and the consequent merging of personnel from disparate environments. Other measures included definition and personalization of the processes deriving from a new partnership with UniCredit Leasing (UCL) for the two new fields of business: dedicated management (UCMB Sole Servicer) of the recovery of unpaid UCL loans by UCMB, and complete management of the portfolio of UCL assets by UCMB (recovery, collection, sale of all assets).

A joint UCL/UCMB Task Force also allowed rationalization of the NPL processes, achieving an overall economic impact of approximately €30 million in terms of reduced provisions and increased write-backs. Bureaucratic and administrative procedures were completed to allow the Munich branch to begin operating in its own right, with the obtaining of Chamber of Commerce registration and the license to carry out credit recovery activities on behalf of third parties.

UCMB continued with its usual operations outside the Group, acquiring new mandates from other companies and developing agreements with numerous courts throughout Italy for the collection of bankruptcy debts, and acquired the residual portfolio of securitized non-performing loans of the SPV Breakeven, allowing early retirement of that securitization and a capital gain for UCMB, which held the residual securities and carried out servicing activities on the portfolio in recent years. There was also confirmation of the Fitch rating "RSS1-" and "CSS1-", which remains the highest rating of any European servicer, and of the UNI EN ISO 9001 certification.

Group Organization & Logistics

The Group Organization & Logistics Department is responsible for ensuring that changes in the Group's organizational and operating models are coherent with the business strategies, and for supporting and improving the quality of the services and products offered, including with regard to procurement and management costs. It defines the policies for the real estate assets of the Parent Company and the legal entities of the Group, in administrative and technical terms, either directly or via the relevant Service Factories: UniCredit Real Estate (URE) for real estate and i-Faber for Group acquisitions.

UniCredit Real Estate

The operations of URE in 2009 were chiefly characterized by an intensification of activities to rationalize the real estate assets, within the context of the Group initiatives to strengthen capital ratios. In particular, in 2009 URE was involved in sale & leaseback operations on more than 200 properties, which generated cash inflows and

Global Banking Services (CONTINUED)

capital gains for the Group. The continuation of the Exodus Project, aimed at optimizing the Group's key spaces, achieved the target of 124,000 m² released since the start of the project (of which 65,000 in 2009) and savings of approximately €16 million per annum. If we take account also of the optimization of spaces in Germany and Austria and the Network Optimization project, the total space released is 253,500 m². The implementation of the "Kill the Rent" initiative, an efficiency improvement project linked to the renegotiation of the leasing contracts signed by the Group, made it possible to exceed the target of €4 million in savings by the end of the year, thanks to the successful renegotiation of more than 700 contracts since the launch of the initiative.

2009 saw a strengthening of technological innovation initiatives, primarily aimed at reducing costs and energy consumption but also of value with regard to communication both internally (Awareness Program to raise environmental awareness in the Group) and externally (Green Network Projects, Self-Sustaining Branch and Carbon Neutral Region in Sicily). URE provided constant support to the business of its client banks/companies in the major network reorganization activities carried out during the course of the year. It handled more than 120 renovation projects, 300 moves due to space re-assignments, 4,000 miscellaneous interventions (e.g. security of equipment, machinery and networks), 760 installations of advanced ATMs, and supported the Retail business in the network optimization project (Next Project) through the closure/consolidation of around 370 branches.

i-Faber

The mission of i-Faber is to provide solutions and services to support purchasing processes, including the management of electronic markets on which private and public companies can organize their own commercial relationships so as to optimize business processes, widen their customer and supplier bases, and achieve significant efficiency improvements in terms of both time and costs. In particular, the principal activities carried out in 2009 were the continuing management of the captive market, with increasing expansion outside Italy into the countries where the UniCredit Group has a presence; there was also a strengthening of the non-captive business (almost 50% of the overall revenue of the business in 2009) and consultancy services, with a view to rationalizing the costs of the client companies, a particularly desirable goal given the current market situation.

Outlook 2010

With regard to the 2010 activities of ICT & Operations, the principal activities envisaged for ICT are technological and organizational support for the Group reorganization project, roll-out of the EuroSIG commercial banking application platform in HVB AG, as well as implementation of the program with a view to similar activities to be carried out in Austria, completion of the first integrations of the CEE countries (Hungary, Czech Republic, BAGIS IT company), completion of the project for migration to the new system by the MIB branches in Milan, Vienna, London and Munich, commencement of the implementation of UGIS "Eurosig 2.0" strategic programs, continuation of activities to improve Governance applications (Data Quality, Risk Management, CFO Data Warehouse), and implementation and improvement of the E-Collaboration and Social Networking programs.

With regard to Operations, the principal activities planned for the Global Factory UniCredit Business Partner in 2010 are: integration, as of January 1, 2010, of the "operating support" business line of UniCredit Mediocredito Centrale S.p.A., and implementation, in accordance with the general strategic principles, of specific actions for each individual Global Operations Line in order to optimize the organizational processes in the countries currently included in the scope of UCBP. With a view to improving the service provided to customers, these actions and the activities closely associated with them might be reconsidered in 2010 in relation to the One4C Project, aimed at creating a single bank to replace the segment banks. In 2010 it is proposed to continue the process of rationalizing the operating bases in Italy, with consequent consolidation of the activities carried out and development of operations in Poland and Romania.

Other objectives for 2010 are further development of the One4All Project, with particular reference to the Eastern European countries, which provides for the creation of a Service Line for Group Operations and the opening of discussions with the banks of each country in order to evaluate the possibility of integrating the respective back office activities within UCBP. It is also proposed to define a management certification system in line with the Three-Year Quality and Environment Plan. During 2010, the Quality and Environment Certifications will be implemented in Germany and Poland, to be followed in 2011 by Austria and the Czech Republic.

With regard to developments in the Workout area in 2010, it is planned to consolidate the organizational structures and management processes in the Global Factory UniCredit Credit Management Bank, in the light of the organizational review underway since January 1. In particular, further improvements in business efficiency will be sought, deriving from the networks' greater specialization in captive and special bank loans (leasing, arrearage, contribution-based) and non-captive loans.

Consideration is also being given to a proposed revision of the infra-group commission scheme that makes it possible to reward the added value obtained from increases in returns. The activity of striving to control costs in general will continue, with a particular focus on legal costs, extending the use of the Preferentiality Factor to all engaged lawyers. With regard to the Italian NPL market, the objective is to consolidate the leadership position by further increasing the acquisition of banking and non-banking portfolios, and to make a mark with the launch of specialized products. It is also expected that there will be a significant increase in the portfolios managed by the Munich branch.

For 2010, the activities of Group Organization & Logistics will be focused on three main guiding principles: support for the overall reorganization of the Italian scope of the Group, systematic re-engineering of processes (business and support), paying particular attention to the achievement of effectiveness and quality targets, including through the preparation of appropriate performance indicators to facilitate constant monitoring (with a view to "continuous improvement"), and pursuit of an organic strategy for containing the Group's costs, based around three pillars: management of the "Expense Management Process" in order to control individual expenses; management of the "Project Management Process" in order to control the achievement of operating and cost targets of project-based initiatives; and reorganization of Purchasing processes and structures (so-called "Procurement Office Turnaround").

With regard to the Global Factories, the plans for i-Faber in 2010 include, in addition to the finalization of the extraordinary operation cited above, the evaluation of further growth opportunities (both endogenous and exogenous) and a greater focus on developing the market beyond the reference partners. 2010 will also allow full advantage to be taken of the enormous potential offered by the new negotiation platform, having successfully completed in 2009 the inevitable "running-in" period. There will also be development of all the possibilities of further synergies with the UniCredit Group, as an integral part of the procurement process rather than complementary to it.

With regard to the principal structures of GBS-Other, for the Lifelong Learning Center, whose objectives are centralization of the Parent Company training budget and systematic recourse to the use of public funds for the financing of training projects in Italy, for 2010 it is planned to consolidate the activities begun in 2009, with particular regard to the processes of technological innovation, public financing of training, and reduction of costs. A process of internationalization will also be launched, based on the sharing and exploitation of the Lifelong Learning Center best practices and products/services.

With regard to the Security Business Line, whose mission is to evaluate, develop, implement, update and monitor the management and governance of security matters in the Parent Company and the various Group entities, 2010 will see the application of the Global Operations model, gradually replicating the operations management methodologies in all countries, creating cost/service synergies through the search for economies of scale and the dissemination of Group best practices. These activities will be carried out by adapting the scope of the model to the specific local circumstances in order to effect the integration taking into account the different levels of organization achieved by the security functions in different countries.

Other information

Report on corporate governance and proprietary structures

Within the meaning of Art. 123-bis par. 3 of Legislative Decree 58 dated February 24, 1998, the “Report on Corporate Governance and Proprietary Structures” is available in the “Governance” section of the UniCredit website (http://www.unicreditgroup.eu/it/Governance/corporate_governance_report.htm).

An explanatory chapter on the Corporate Governance structure is likewise included below in this document.

Transactions for rationalization of Group operations and other corporate transactions

During 2009, the Group’s operations were characterized primarily by the implementation of initiatives for the creation of the Group’s Global Factory for shared services and products, as well as the reorganization of the Group through rationalization of operations of subsidiary companies to eliminate overlapping businesses and pursue greater synergies and cost reductions.

The Group also undertook some new growth initiatives through external lines to consolidate and strengthen its leadership position in certain business sectors.

During the year, the Group also established certain asset-strengthening measures, and the end of 2009 saw the launch of the “ONE4C” project for the reorganization of the Group in order to increase customer satisfaction and proximity to the territory, which will be addressed again in the corresponding chapters.

Reorganization of the Group’s back office and ICT operations

During the report year, two separate projects were completed to reorganize the Group’s Italian and foreign back office and ICT operations in order to improve the coordination and efficiency of these business support areas and to achieve further economies of scale and scope.

Specifically, the goal of the projects was to implement two Global Factories for shared services:

- a Global Back Office Company that provides back office services at the Group level, known as UniCredit Processes & Administration S.p.A. (which changed its name and company form in the report year to “UniCredit Business Partner joint venture corporation”, hereinafter “UCBP”);

- a Global ICT Company that serves as the sole center for ICT services for the entire Group, known as UniCredit Global Information Services S.p.A. (which changed its company form in the report year to that of a joint venture corporation, hereinafter “UGIS”).

Both companies will reinforce the “customer-centric” approach that will be based on regular customer satisfaction surveys.

Global Back Office Company

In January 2009, the process of integrating all activities carried out in the “operations” area by the Group in Austria, Germany, Italy, the Czech Republic and Romania was completed.

The goal of this integration was to create a joint operating platform for the Group’s banks worldwide that will further the exchange of key expertise and professional skills. It was also aimed at establishing a model for action and a single approach with a focus on better risk controls with the proper balance between “cost and quality”.

In December 2008, UCBP undertook a capital increase totaling €131.6 million (including €129 million in additional paid-in capital) which was paid for, pursuant to Article 2441 para. 4 and Article 2343 of the Civil Code, in the amount of €50.8 million by HVB (which changed its name at the end of 2009 to “UniCredit Bank AG”) through the transfer of its “Back Office” division, and in the amount of €80.8 million by UniCredit Bank Austria (“BA”) through the transfer of its 100% stakes in UniCredit Business Partner GmbH (formerly BA-CA Administration Services GmbH) and UniCredit Business Partner s.r.o. (formerly Banking Transaction Services s.r.o.). Following the above transaction, which took effect on January 1, 2009, UniCredit Bank AG and BA became shareholders of UCBP with stakes of 18.11% and 28.81% respectively, while the parent company retains a 53.07% stake.

Global ICT Company

The project was furthered in order to bring together into a single company, known as UGIS, the ICT activities pursued by UniCredit Bank AG and BA through their respective subsidiaries, HVB Information Services GmbH (hereinafter "HVB IS") and WAVE Solutions Information Technology GmbH (hereinafter "WAVE"). The construction of a shared ICT services pole for the Group at the international level will allow the optimization of the exchange of key skills and professional expertise and will foster the creation of a "full service" model for customers at a high quality standard and competitive cost.

The additional objectives that the Group expects to achieve through the project, in keeping with those pursued in the integration of the back office operations, are to:

- facilitate governance of the ICT activities, concentrating responsibility for them under a single legal entity;
- maintain the most successful cost model, based on increased cost stability and predictability, by promoting cost consciousness and thus a greater commitment to IT efficiency;
- maintain the current level of service quality, so as to foster business processes and keep risks under control as far as possible;
- support the geographic distribution with the right level of modularity, scalability and automated supports;
- reduce the management complexity of such a broad scope, promoting standardization of assets, processes, tools and practices.

To push the project forward, the UGIS extraordinary shareholders' meeting of April 3, 2009 passed resolutions in favor of two different capital increases reserved for UniCredit Bank AG and BA for a total of €135.3 million (including €52.8 million in additional paid-in capital) which was paid for, pursuant to Article 2441 para. 4 and Article 2343 of the Civil Code, in the amount of:

- €96.3 million (including €37.6 million as additional paid-in capital) by UniCredit Bank AG through the transfer of its 100% stake in HVB IS, the capital base of which UniCredit Bank AG had previously increased through transfers of own IT assets and cash contributions of approximately €12.0 million;
- €39.0 million (including €15.2 million as additional paid-in capital) by BA through the transfer of its 100% stake in WAVE, to which BA had previously transferred 100% of the capital of Bank Austria Aktiengesellschaft & Co EDV Leasing OHG (a company that owns IT hardware assets in Austria used in leasing by UGIS), to which BA itself had in turn made a cash contribution of approximately €16.1 million.

Following the above transaction, which took effect on May 1, 2009, UniCredit Bank AG and BA became shareholders of UGIS with stakes

of 24.72% and 10.02% respectively, while the parent company retains a 65.26% stake.

On the same date, HVB IS and WAVE were split off and their respective activities were concentrated at the UGIS branch offices in Munich and Vienna. Subsequently, UGIS also acquired direct control of Bank Austria Aktiengesellschaft & Co EDV Leasing OHG, formerly held by WAVE.

Moreover, in order to fully effect the rationalization of the ICT activities of the former Capitalia, the merger by incorporation into UGIS of its own wholly-owned subsidiary Kyneste S.p.A. was brought to completion, also effective May 1, 2009, before carrying out the aforementioned integration of the ICT activities of UniCredit Bank AG and BA.

Reorganization of banking and specialized financial operations

Combination of the individual mortgage and consumer loan businesses at the Group level

On January 1, 2009, in order to ensure optimal management and coordination of the medium/long-term individual home mortgage and consumer loan "production" activities, UniCredit Consumer Financing ("UCFin") integrated UniCredit Banca per la Casa ("UBCasa"), a wholly owned subsidiary already specializing in the "residential mortgage" business, directly from UniCredit through a merger by incorporation as UCFin, constituting the pan-European competence center within the Group for the area of family financing.

The combination is consistent with the new integrated management model for the mortgage and consumer loan businesses; this model was launched with the creation of a "household financing department" at the parent company.

This approach will encourage the cross-selling of the products concerned and would make it possible to achieve operating synergies, especially in governance functions, as well as greater efficiency than the previous organizational/distribution model with the consequent rationalization of cost structures and simplification of corporate structures.

Since April 1, 2009, UCFin has therefore taken the new name of "UniCredit Family Financing Bank" to better represent the full range of its offering to the market and to strengthen its internal identity.

Transactions for rationalization of Group operations and other corporate transactions (CONTINUED)

Rationalization of the activity of granting salary guaranteed loans in UCFin

In order to give effect to the integration of the activities of granting salary guaranteed loans and pensions with delegation of payment, currently carried out both by UCFin and by its wholly-owned subsidiary Family Credit Network (formerly Fineco Prestiti), and to enable better management of risks and pursuit of cost synergies, the partial split-off to UCFin of the “salary guaranteed loans” business line of Family Credit Network was brought to completion on November 9, 2009. This business line is substantially represented by the assets, liabilities, resources, rights, obligations and, in general, all the subjective situations of a substantive nature involved in the investigation, disbursement and management of salary guaranteed loans and pensions with delegation of payment.

After the transaction in question, Family Credit Network will maintain not only the management of its own distribution network of 40 agents and 80 brokers and the related marketing support activities, but also the business of managing personal loans against pensions to non-retired persons from the agent companies who are receiving pension treatment from the INPS.

Implementation of a new management model for Group leasing operations

The project to implement a new management model for leasing operations, launched in June 2008 to ensure better management and coordination of leasing activities at the global level, was brought to completion in January 2009.

This project concluded with the business combination – effective January 1, 2009 – of UniCredit Global Leasing with Locat (which then changed its name to “UniCredit Leasing”), and the allocation to the latter (as the operating sub-holding company) of the activities of guiding, coordinating and controlling the business concerned at the Group level in accordance with the parent company’s guidelines, as well as directly managing the business in Italy.

This structure will allow for a quicker and easier transition from the organization/distribution model (characterized by a “non-homogenous” mix of companies located in different countries and overlapping structures) to the new business management model focused on the creation of a global company that is charged with managing the business in a uniform manner, optimizing the allocation of resources, and at the same time leveraging the unique features of each country and/or specific business area.

In addition, this approach has laid the foundation for:

- a significant simplification in organization;
- the simplification of governance and key processes;
- a reduction in the number of legal entities (using, where possible, the model of the sub-holding company’s foreign branches), thereby

making the organizational structure more streamlined and “flat,” and shortening reporting lines;

- a better transfer of best practices to facilitate the exchange of skills in the Group’s complex leasing operations (including through the establishment of dedicated “competence centers” managed in a uniform and coordinated manner).
- the ability to take advantage of a commercial strategy based on the “one face to customers” model, which is specifically intended for the segment of vendor agreements and cross-border leasing.

Integration of the Group’s leasing operations in Russia

In order to optimize and strengthen the leasing business in the Russian Federation market - particularly with regard to the capital goods and motor vehicles sectors - the project of integrating the Group’s two leasing companies operating in Russia, OOO UniCredit Leasing (“ULR”), a wholly-owned subsidiary of ZAO UniCredit Bank (“UBR”), and ZAO Locat Leasing Russia (“LLR”), a wholly-owned subsidiary of UniCredit Leasing (“UCL”), was completed last November.

The integration was realized through a capital increase of ULR for RUR 1.5 billion (approximately €34 million) set aside for UCL and paid for by the latter through the in-kind transfer of 100% of LLR and the cash payment of approximately RUR 1.2 billion (approximately €28 million).

The transaction thus launched enabled UCL to achieve the target ownership structure of 60% (consistent with the model adopted by the Group in the EEC zone countries which provides for the combined presence of UCL, as majority shareholder, and the local banks, as minority shareholders, in the shareholder structure of the leasing companies) and at the same time furnished ULR with an adequate level of capitalization.

Following the described operation, ULR operates as the Group’s sole leasing company in the Russian Federation market, while LLR will manage the portfolio of currently existing contracts that are to be liquidated later, until they are all exhausted, which is expected to be completed by 2011.

Project for transformation of the Group’s auxiliary companies in Italy to stock corporations (società consortili)

In July 2009, the transformation of the Group’s Italian auxiliary companies to consortium companies was completed (in particular, UGIS, UCBP, UniCredit Audit (“Audit”), UniCredit Real Estate (“URE”) and UniCredit Bancassurance Management and Administration Srl (“UBMA”)), with which are associated the Group companies that benefit from services supplied by the aforementioned companies.

Reorganization of the Austrian Private Banking activities

In order to align the Austrian Private Banking activities of BA with UniCredit's pan-European onshore model and reorganize the circle of BA-held companies operating in the sector on the basis of the Group's guidelines on equity investments, BankPrivat ("BP") and Asset Management GmbH ("AMG") - both wholly-owned by BA - were incorporated into BA effective October 28, 2009.

At the same time, in the last months of the year, the Group completed the process of reorganizing the service model of BA's Private Banking Division to align it with the Group's Private Banking model through:

- the transfer of the fund management and asset management activities of AMG to Pioneer Investments Austria, a company indirectly held by the parent company through Pioneer Global Investments;
- the allocation of full control of the customers currently served by BP to BA's Private Banking Division, moving the related activities currently conducted by BA's Retail Division to the Private Banking Division.

Reorganization of UniCredit Bank Austria (BA)'s Markets and Investment Banking (MIB) operations

In 2008 a reorganization project was begun in relation to the activities of the former MIB Division of BA, aimed at centralizing these in a single legal entity, the German subsidiary UniCredit Bank AG.

In the course of 2009, the project continued in line with the Group's new organizational and business model, as well as in accordance with the new guidelines given by local and international regulatory authorities.

This project envisages the final transfer to HVB of the majority of BA's former MIB activities, which are conducted through its fully owned subsidiary CAIB UniCredit AG ("CAIB", former UniCredit CA IB Beteiligungs AG), through the following steps:

- the transfer to BA (or companies directly controlled by BA) of CAIB's subsidiaries and the spin off of selected activities to BA;
- the subsequent transfer of CAIB and its subsidiary UniCredit CAIB Securities UK to UniCredit Bank AG;
- the subsequent merger of CAIB into UniCredit Bank AG.

Upon completion of the phases described herein, UniCredit Bank AG will continue to operate in Austria through the opening a branch in Vienna. The initial part of this project was completed in the first quarter 2010. The next steps - the transfer of CAIB to UniCredit Bank AG and its subsequent merger into the latter - are expected to be completed by the end of 2010, subject to receipt of the necessary regulatory approvals.

New external growth initiatives for the Group

The Pioneer conglomerate

Partnership with the Fortress Group in the real estate sector

In order to capitalize on the closed-end real estate fund management activity of Pioneer Investment Management SGR S.p.A. ("PIM SGR") - a wholly-owned subsidiary of Pioneer Global Asset Management S.p.A. ("PGAM") - in April 2009 PIM SGR acquired an equity stake of 37.5% in Torre SGR S.p.A. (a real estate fund management company attributable to Fortress Investment Group LLC, which in turn is an alternative management company listed on the New York Stock Exchange) as part of a capital increase of the aforementioned company reserved for PIM SGR and subscribed by the latter by transferring its own "real estate funds" business line (essentially made up of six real estate funds: "UniCredito Immobiliare Uno", "Pioneer RE Brixia", "Pioneer RE Turin", "Pioneer RE STAR", "Pioneer RE Capital Fund" and "Pioneer RE AMG").

The transaction was carried out, together with a strategic partner in the real estate asset management sector, as part of the project aimed at capitalizing on the real estate management activities of the Pioneer Group in Italy, with the intention of (i) creating a partnership with a leading international operator in the real estate sector, in order to combine the sector expertise of this player with the capacity of Pioneer and the Group to which it belongs, in terms of distribution and access to institutional and retail capital, and consequently (ii) meeting the needs of the UniCredit Group network in terms of management of its existing activities, product innovation, expansion of the product range offered to its own retail and institutional customers, and generation of new business and resulting commission income, as well as (iii) creating value for investors.

The UniCredit Bank AG conglomerate

Agreement with NewSmith Capital Partners

In October 2009, UniCredit Bank AG acquired from NewSmith Capital Partners LLP a 100% stake in NewSmith Financial Products LLP (name changed in November to "Kinabalu Financial Products LLP") and NewSmith Financial Solutions Ltd (name changed in November to "Kinabalu Financial Solution Ltd"), companies specializing in the credit advisory business, for a total amount of £50.9 million (approximately €60 million).

Transactions for rationalization of Group operations and other corporate transactions (CONTINUED)

Other transactions affecting subsidiaries and affiliates

JSCB Ukrsotsbank

The subsidiary JSCB Ukrsotsbank ("USB"), of which BA directly or indirectly holds 94.47% of the share capital, undertook a capital increase in May 2009 for the amount of UAH 500 million (approximately €53 million) in order to comply with the request of Ukraine's central bank related to the country's financial situation. BA's outlay in relation to the above transaction totaled about €50 million, and the total stake held (directly and indirectly) in USB is 95.34% of share capital.

JSC ATF Bank

In April 2009, JSC ATF Bank, a 99.70%-held subsidiary of BA, undertook a capital increase of KZT 18 billion (equivalent to approximately €89 million) to comply with the request of Kazakhstan's supervisory authority related to the country's financial situation. BA's outlay in relation to the aforementioned transaction totaled about €89 million.

UniCredit Consumer Financing IFN SA

In order to support the growth of UniCredit Consumer Financing IFN SA ("UCCF") – a Romanian company established in 2008 as a joint venture between UCFin (65%) and UniCredit Tiriuc Bank "UCT" (35%) which is active in the supply of consumer credit products for the Romanian market – the two partners UCFin and UCT participated in a capital increase by UCCF of RON 43 million (equivalent to approximately €10 million) last May, in proportion to their respective equity stakes. This strengthening of capital enabled the subsidiary to comply with the capitalization requirements of Romanian regulations.

CNP UniCredit Vita S.p.A.

In April 2009, CNP UniCredit Vita, an insurance joint venture with the French group CNP in which the Group has a 38.80% stake, decided in favor of a capital increase of €134 million aimed at providing itself with adequate capital resources to meet the capitalization requirements of the regulations in effect.

The Group participated in the transaction for the share appropriate to its stake, incurring a total charge of €52 million.

With the aim of concentrating within a single entity the entire stake held by the Group in the aforementioned equity holding, last June the parent company (which directly held 16.92% of CNP UniCredit Vita) acquired from its subsidiary Finco Verwaltung the stake that the latter held (equivalent to 21.88%).

Transactions to dispose of non-strategic equity investments/operations

Below we supply details of the main disinvestments made in the year. More information of their impact on profit and loss may be found in Part C of the Notes to the Accounts.

In Italy

Finaosta S.p.A.

In November 2008, UniCredit, together with other minority shareholders of Finaosta, agreed to the proposal of the Valle d'Aosta Autonomous Region to purchase the stakes held by other shareholders of the above company.

The price for 100% of Finaosta was set at €187 million, and the sale of the stake held by UniCredit (10.7%) resulted in a consolidated capital gain of €9.7 million. The sale was completed in March 2009.

Si Holding S.p.A.

UniCredit together with the major shareholders of Si Holding, including Intesa Sanpaolo (42.2% of the capital) and MPS (24.5%), completed the sale of its equity stake in Si Holding (totaling 9.2%) to Istituto Centrale delle Banche Popolari Italiani (for 9.1%) and Banca Mediolanum (for 0.1%) for a total price of €184 million for 100% of Si Holding.

The transaction resulted in a consolidated capital gain of €15 million.

Caricese Srl

Last June, the Group sold 33.684% of CARICESE (of its entire holding of 33.687%) for proceeds of €3.7 million and a capital gain of €1.2 million; in particular the subsidiaries UniCredit Corporate Banking, UniCredit Private Banking, UniCredit Banca, Banco di Sicilia, UniCredit Banca di Roma, FincoBank, UCFin and Banca Agricola Commerciale RSM sold their stakes in the company, while the parent company remained a shareholder of CARICESE with a stake of 0.003%.

Outside Italy

BodeHewitt AG & Co. KG and BodeHewitt Beteiligungs AG

In June, UniCredit Bank AG sold 72.25% of BodeHewitt AG & Co. KG and 72.25% of BodeHewitt Beteiligungs AG to Hewitt Associates, which already held 27.75% of the two companies, for the price of €50 million. The sale of the stakes held by UniCredit Bank AG resulted in a consolidated capital gain of €3 million.

Vereinsbank Victoria Bauspar AG

In May, UniCredit Bank AG and Ergo Group signed an agreement to sell their respective 70% and 30% stakes in Vereinsbank Victoria Bauspar to Wüstenrot & Württembergische AG, for a total price of approximately €79 million for 100% of Vereinsbank Victoria Bauspar. Following the classification of the equity investments under assets held for sale, a capital loss of approximately €12 million was recognized in the first half of the year. The sale, which was completed in July, did not have any further impact on the income statement.

Schwäbische Bank AG and Invesco Real Estate GmbH

Also in the first half of the year, UniCredit Bank AG sold its minority stakes in Schwäbische Bank (25.50% - a German universal bank) and Invesco Real Estate (24.90% - a company offering real estate investment products and services to institutional clients) for a total consolidated capital gain of approximately €12.3 million.

Mastercard Inc.

During the year, several UniCredit Group companies sold shares held in Mastercard Inc., generating a total consolidated capital gain of about €22 million.

Bank BPH SA

In September the parent company participated in the public purchase offer conducted by DRB Holding (GE Group) on the remaining shares outstanding in Bank BPH, handing over all shares held in the aforementioned Polish bank (equivalent to 5.13% of the share capital).

Banco de Sabadell SA

In the last part of the financial year, the parent company sold its entire equity stake in Banco de Sabadell (4.08%) in two successive stages.

Rationalization of the Group's real estate assets

Fondo Core Nord Ovest

Consistent with the aim of rationalizing the Group's real estate assets, URE on September 29, 2009 transferred a real estate portfolio held by the Group to a closed-end real estate fund reserved for qualified investors, called Core Nord Ovest and managed by REAM SGR S.p.A. ("REAM"). URE later sold the majority of the shares issued against the aforementioned contribution to qualified investors identified by REAM.

The portfolio that was contributed consists of 13 historical and high-value real estate properties (including the properties at Via XX Settembre in Turin, Via Dante in Genoa and Piazza Edison in Milan) for a total contribution value of approximately €574 million, the fund's purchase of which was financed to 60% by a consortium of banks.

The fund will have a term of 15 years. The majority of the real estate properties transferred to the fund will be the object of leasing agreements in favor of the Group with terms of 6 to 18 years, according to the specific requirements of the Group, renewable for an additional 6 years, with characteristics so as to enable the Group to have the necessary flexibility in the management of its commercial network.

The sale of the majority of the shares to qualified investors identified by REAM, including the Fondazione Cassa di Risparmio di Torino and the other banking foundations that are shareholders of REAM, generated in 2009 a total capital gain of approximately €133 million, net of tax effects and transaction costs, of which approximately €110 million in the third quarter of 2009.

Fondo Omicron Plus Immobiliare

On December 30, 2008, URE completed the contribution to Fondo Omicron Plus Immobiliare ("Fondo Omicron Plus"), a fund managed by Fondi Immobiliari Italiani SGR S.p.A. ("Fimit"), of a portfolio of 72 business properties for a total value of approximately €800 million, against which shares had been issued, some of which were later placed with qualified investors and some of which were held by URE itself. In the third quarter of 2009, URE completed the sale to qualified investors of the shares held in Fondo Omicron Plus.

In particular, on September 22, 2009, URE completed the sale of 3,200 of these shares to an affiliate of GIC Real Estate ("GIC RE"), a real estate business of the Government of Singapore Investment Corporation, for total proceeds of approximately €78 million.

Transactions for rationalization of Group operations and other corporate transactions (CONTINUED)

The sale of shares to GIC RE enabled URE to complete the sale of all of the shares held in Fondo Omicron Plus following the December 2008 contribution, with a capital gain of approximately €163 million in 2009 (including approximately €131 million in the third quarter of 2009) net of tax effects and transaction costs, which is added to the approximately €282 million already realized in 2008.

In addition, still within the scope of the plan to rationalize the Group's real estate assets, URE made a contribution of an additional portfolio on September 30, 2009, consisting of 179 business properties for a total contribution value of approximately €530 million to

Fondo Omicron Plus, against which new shares were issued. This additional contribution to the fund generated a total capital gain of approximately €198 million, net of tax effects and placement costs, including approximately €134 million in the fourth quarter following the sale of a number of shares for proceeds of approximately €127 million.

The real estate properties that were the object of the second contribution were entirely leased to the Group companies by means of lease agreements with terms of 18 years, renewable for an additional 6 years, with characteristics so as to enable the Group to have the necessary flexibility in the management of its commercial network.

Capital Strengthening

In the early months of 2009, the following measures - approved by the Board of Directors in October 2008 - were taken to strengthen company capital:

- The capital increase authorized by UniCredit's Shareholders' Meeting on 14 November 2008 was carried out: in the period January 5-23, 2009 972,225,376 new ordinary shares were offered to holders of UniCredit ordinary and savings shares, in the ratio of 4 ordinary shares for every 55 ordinary or savings shares held, at a unit issue price of €3.083 per share, with a premium of €2.583.
- On February 23, 2009 - on conclusion of the period of offering of unexercised rights in the Bourse - the capital increase was completed with the subscription by Mediobanca of 967,578,184 UniCredit ordinary shares, as per the guarantee agreement entered into by it whereby it undertook to subscribe all the newly issued shares for which rights had not been exercised. Almost all the shares subscribed by Mediobanca were used for an issue of financial instruments known as CASHES.
- The capital increase of €2,997,370,834.21 - of which €486,112,688 was capital and €2,511,258,146.21 share premium - was thus completed.
- Subsequently, on March 17, 2009, UniCredit's Board of Directors resolved to submit a new issue in the form of a scrip dividend pursuant to Article 2442 Italian Civil Code, using the reserve set aside for the purpose when the appropriation of 2008 net profit was resolved.

- Consequently, on April 29, 2009 the Shareholders resolved in EGM to authorize a rights issue of 2,435,097,842 ordinary shares and 2,532,431 savings shares with a par value of €0.50 for a total amount of €1,218,815,136.50, whereby 29 new ordinary shares were allotted for every 159 ordinary shares held and seven new savings shares every 60 savings shares held. These shares were made available to shareholders on May 21, 2009 (listed ex-dividend as from May 18, 2009).

In order to keep our capital ratios in line with those of our peers in Europe and elsewhere, thus ensuring that the Group is favorably positioned in the market and able to take advantage of economic growth in the future, on November 16, 2009 the Shareholders' resolved in EGM

- to increase company capital by a maximum of €4 billion including any share premium by issuing ordinary shares cum dividend with a par value of €0.50 in the form of a rights issue to holders of ordinary and savings shares pursuant to Art. 2441 Italian Civil Code and
- to vest in the Board of Directors all necessary powers for setting the methods and terms of the rights issue, including specifically - shortly before the public offering and on the basis of then current market conditions - the subscription price including the share premium and thus the number of shares to be issued and the ratio whereby the rights would be allotted to shareholders.

The ONE 4 C Program

In order to be able to respond to changing customer expectations and the requirement of staying close to local needs which have arisen in the new situation of international banking, last December the Group initiated the development of a new organizational and business model specifically for UniCredit's markets in Italy, Germany and Austria: the One 4 C Program.

The Program's objectives are summarized as follows:

- To improve customer satisfaction in all customer segments by changing the current business model and corporate culture
- To further enhance the Group's closeness to local communities in Italy by improving our dialogue with them through the use of tools that enable us to understand regional and local needs better
- To change the structure of our Italian entities in line with the new business model.

As a result of the review and as part of it, in March it was considered the opportunity to change the Group's corporate structure in Italy by bringing all the business carried on by the main Group's banks in Italy under UniCredit SpA.

In line with the objectives of the One 4 C Program, UniCredit SpA will therefore serve the Italian market as a whole and all its customer segments, and to this end it will be organized in four specialized business segments, viz.:

1. Households, dedicated to private individuals.
2. SMEs, i.e. businesses with annual turnover of up to €50 million.
3. Corporate Banking, for businesses with annual turnover in excess of €50 million.
4. Private Banking, for clients with assets in excess of €500,000.

These changes will, we think, strengthen the Group's present divisional model and further increase customer satisfaction, by promoting more highly specialized skill-sets, greater simplicity and faster response times, and closer ties to the local communities in which the Group operates, driven by more effective organization and greater autonomy in the branches.

The One 4 C Program also provides for UniCredit's organizational structure to be redesigned in line with the new business model by appointing cross-divisional Regional Chairmen to interface with key figures in their region and act as a single reference point for the needs of all local stakeholders, whether external or internal.

Subsequent Events and Outlook

Subsequent Events

On January 7, 2010 UniCredit's Board of Directors approved the final terms and conditions of the rights issue resolved on by the shareholders in EGM on November 16, 2009. The new ordinary shares were offered from January 11 to January 29, 2010 in Italy and Germany and from January 14 to January 29, 2010 in Poland. 98.23% of the shares offered i.e. 2,472,338,679 new UniCredit ordinary shares were subscribed [and no subscriptions were revoked in the Polish and German public offerings]. Rights not exercised during the offer period were 297,005,168 valid for the subscription of 44,550,771 UniCredit ordinary shares and were all sold in the *Mercato Telematico Azionario* (screen-based stock market) organized and managed by Borsa Italiana SpA pursuant to Article 2441 (3) Italian Civil Code, through UniCredit Bank AG, Milan Branch, on the trading days from February 8 to 12, 2010. On February 24, 2010 the capital increase resolved on by the mentioned EGM held on November 16, 2009 was thus completed.

In March 2010 UniCredit Bank Austria AG completed a capital increase of €2 billion in order to align itself with its main Austrian competitors in terms of capital ratios and be adequately prepared to take the opportunities arising from future economic growth in Austria and Central Eastern Europe.

With a view to rationalizing the Group's business consistent with its divisional business model, while avoiding overlapping activities, a project has been launched to focus the business of UniCredit Mediocredito Centrale SpA in the management of subsidies and subsidized lending and to continue centralizing its IT and back-office operations. Accordingly, effective January 1, 2010 the operational support business has been transferred to UniCredit Business Partner. Studies are proceeding for the transfer of its back-office to UniCredit Business Partner, thus completing the transfer of its administrative activities that began with operational support, and the transfer of its IT sector to UniCredit Global Information Services.

On February 3, 2010 the Board of Directors approved the initiation of a study of the feasibility of repositioning UniCredit Mediocredito Centrale SpA as a bank dedicated to public-sector business - providing subsidized loans and managing government incentives - and of the advisability of transferring its 'corporate' business to UniCredit Corporate Banking.

Subsequent Events and Outlook (CONTINUED)

Outlook

The second half of 2009 was marked by relatively robust growth in both the US and the euro zone, but the recovery could lose some of its initial impetus in mid-2010. Without some important temporary factors that helped to sustain the recovery in previous quarters - especially restocking and the strong fiscal stimulus - growth will be more moderate.

We expect that both the euro zone and the US will grow below their potential in 2010 and will return to more sustainable recovery only in 2011. In the CEE countries 2010 began with better prospects. On the back of global recovery, average growth in the region will be positive, possibly 2.3%. In this regard Turkey and Poland appear to be the best-equipped countries for a more decided recovery. By contrast we cannot rule out the Baltic and Balkan countries, together with Hungary, growing more slowly. Looking further ahead, beyond 2011, CEE economies' growth will be strong, on average, but will in any case be slower than before the crisis: this reflects not only more modest growth in the world economy, but also the fact that the credit boom, which was fed by foreign money, will not be repeated with as intensely as in the past. Given strong economic growth that will however be more modest than that of the recent past, the CEE countries will follow the path of much more sustainable and balanced growth, while limiting the growth of foreign and government debt.

Despite the encouraging signs of recover in the economic cycle, European banks' profits will continue to be under pressure in 2010 as well, due to weaker revenue and deteriorating credit quality. Net interest income will tend to suffer from the reduction in business volumes and narrowing banking spreads. Lower net interest income and the still rather high cost of risk will hamper profit growth this year. However, this effect will be attenuated by an expected recovery in non-interest income, given the stock markets' recovery. CEE banks' profitability will also improve sharply in 2010. However, in some countries deteriorating credit quality will reduce profits again in 2010 (non-performing loans should peak in the first half of the year. Therefore, while on the one hand the banks in some countries - Ukraine, Kazakhstan and the Baltics - will inevitably stay under pressure again in 2010, on the other the more solid countries from a macroeconomic standpoint - Poland, Turkey and the Czech Republic - will see an improvement in the banking industry's prospects.

In 2009 we further strengthened company capital both organically and through recourse to the market, improved our balance-sheet structure by sharply reducing leverage, maintained a solid liquidity position and strong discipline in cost control. The Group is now ready to exploit all growth opportunities as they arise in its markets. They will be taken through a redesigned organizational and business model, particularly in Austria, Germany and Italy, with a view to increasing our closeness to our customers and to the regions and communities in which we operate.

Governance organizational structure

Introduction

UniCredit's overall corporate governance framework, i.e. the system of rules and procedures that its governing bodies refer to steer their principles of behaviour and fulfil the various responsibilities towards the group's stakeholders, has been defined in the light of current provisions and the recommendations contained in the Corporate Governance Code issued by Borsa Italiana S.p.A. on March 2006 (the "Code"). One of the Code's goals is that of increasing the clarity and concreteness of several people and roles, such as those of independent directors and the board's internal committees, the contents of which have been enriched over the years as a result of acquired experience. Moreover, as a bank, UniCredit, is subject to Supervisory Provisions issued by Banca d'Italia and, with regards to the corporate governance issues, into the specific rules prescribed by "Supervisory Provisions concerning bank's organization and corporate governance" issued on 2008. Since 2001 UniCredit has annually drawn up and submitted a Corporate Governance Report to its shareholders, by drafting a special report (based on the "comply or explain" principle) for distribution to its shareholders, institutional and non-institutional investors and Borsa Italiana. The report supplies suitable information on UniCredit's own Corporate Governance system.

Due to continuing changes to the regulatory scenario both at the European and Italian level, and to international best practices in general, in 2006 Borsa Italiana decided to revise the corporate governance principles; accordingly, on March 2006 it issued a new version of the Corporate Governance Code, with which UniCredit complied with its adoption of the relevant Board resolution on 19 December 2006. In light of the provisions contained in the Code and based on the format of "Corporate Governance Report" supplied by Borsa Italiana, UniCredit drafted its Report on corporate governance and ownership structures pursuant to article 123-bis of the Legislative decree nr. 58 dated 24 February 1998 (the "TUF") and articles 89-bis and 144-decies of the Consob Issuer Rules.

The "Report on corporate governance and ownership structures" approved by the Board of Directors (on 16 March 2010) is published at the same time with the Report on Operations on the website of the Issuer (http://www.unicreditgroup.eu/en/Governance/corporate_governance_report.htm). UniCredit is an issuer of stocks listed on the regulated markets of Milan, Frankfurt and Warsaw, and therefore fulfils the legal and regulatory obligations related to listings on these markets.

The information provided, unless otherwise specified, refers to the financial year from 1° January 2009 to 31 December 2009.

Since its establishment, UniCredit has adopted the administration system, so-called, "traditional".

The distinctive feature of this model is that the management of the company, the overseeing on the board and the accounting audit are separated. The Board of Directors is solely responsible for the strategic supervision and management of the enterprise, while the Board of Statutory Auditors is entrusted with overseeing the Board. The auditing on the company's accounts is entrusted to an external audit firm by the Shareholders' Meeting on the basis of a proposal from the Board of Statutory Auditors.

This governance model was chosen because it has been proven, over time, to make it possible to manage the business efficiently, while ensuring effective controls. That is, it creates the necessary conditions for the Holding Company to be able to guarantee the sound and prudent management of a complex and global banking group, namely the UniCredit Group.

In the traditional system certain aspects are the sole competence of the Shareholders' Meeting. This creates an effective opportunity for dialogue and debate between management and the shareholders about various elements of governance, including the appointment and dismissal of directors, approval of the financial statements, allocation of profits, compensation policies for management and so on.

Shareholders' Meeting

An Ordinary Shareholders' Meeting is convened at least one a year within the terms of law, in order to resolve upon the issues that the law and the Articles of Association make it responsible for. An Extraordinary Shareholders' Meeting is convened whenever it is necessary to resolve upon any of the matters that are exclusively attributed to it by law.

The Agenda of the Shareholders' Meeting is established by whoever exercises the power to call a meeting, pursuant to legal requirements and the UniCredit's Articles of Association, in keeping - where the Meeting is convened further to a request from shareholders - with the comments contained in said request.

The Ordinary Shareholders' Meeting has adopted the Regulations governing the Meetings in a functional and regular way. The Regulations is available on the Governance section of UniCredit website.

Board of Directors

The Board of Directors of UniCredit may be comprised of between a minimum of 9 up to a maximum of 24 members. As at 16 March 2010, UniCredit has 23 directors.

The duration of their mandate is three financial years, unless a shorter term is decided upon their appointment and the mandate expires on the date of the Shareholders' Meeting called to approve the financial statements for the last year in office.

The mandate of the current Board of Directors, which was appointed by the Shareholders' Meeting of April 29, 2009, will expire on the date of the Shareholders' Meeting called to approve the 2011 financial statements.

Directors shall be elected on the basis of a slate mechanism pursuant to the procedures specified in Article 20 of UniCredit's Articles of Association.

The Board of Directors has adopted its own Regulations governing its powers, functioning and jurisdiction. These Regulations also include the decisions made by the Board of Directors concerning requirements that UniCredit Directors shall possess, in addition to the requirements as set forth by the current laws and regulations, assuring the good functioning of the Board of Directors and concerning the number of offices in supervisory, managerial and controlling bodies that UniCredit Directors can hold in companies not belonging to UniCredit Group as well as the procedure to be followed in case of appointment and whenever the threshold is exceeded.

Independence of Directors

In accordance with the Criteria set forth in the Code and pursuant to Article 148 of TUF, the Directors' independence is periodically assessed by the Board of Directors on the basis of the information provided by the same director or, however, available to the Issuer. The results of the assessments of the Board shall be communicated to the market.

On March 16, 2010 the Company's Board of Directors – also on the basis of the information provided by the interested party – assessed the independence requirements of all its members. The result of such controls notified to the market was the following:

- Independent directors pursuant to Article 3 of the Code: Mr. Castelletti, Mr. Calandra Buonauro, Mr. Belluzzi, Mr. Bischoff, Mr. Fontanesi, Mr. Giacomini, Mr. Gnudi, Mr. Kadnoska, Ms. Li Calzi, Mr. Ligresti, Mr. Maramotti, Mr. Marocco, Mr. Pesenti, Ms. Reichlin, Mr. Schinzler, Mr. Waigel, Mr. Wyand and Mr. Zwickl;
- Non-independent directors pursuant to Article 3 of the Code: Mr. Rampl (Chairman), Mr. Bengdara, Mr. Palenzona, Mr. Profumo (CEO) and Mr. Cucchiani;
- Independent directors pursuant to Article 148 of the TUF: Mr. Rampl (Chairman), Mr. Castelletti, Mr. Bengdara, Mr.

Calandra Buonauro, Mr. Palenzona, Mr. Belluzzi, Mr. Bischoff, Mr. Fontanesi, Mr. Giacomini, Mr. Gnudi, Mr. Kadnoska, Ms. Li Calzi, Mr. Ligresti, Mr. Maramotti, Mr. Marocco, Mr. Pesenti, Ms. Reichlin, Mr. Schinzler, Mr. Waigel, Mr. Wyand and Mr. Zwickl;

- Non-independent directors pursuant to Article 148 of the TUF: Mr. Profumo (CEO) and Mr. Cucchiani.

On March 16, 2010 the Board of Statutory Auditors confirmed the proper application of the assessment criteria and procedures adopted by the Board of Directors to evaluate the independence of its own members.

Committees appointed by the Board of Directors

In order to support the Directors with an efficient information and consultancy system, able to assure the capability of the Board to properly assess all the specific matters falling within its jurisdiction, in accordance with the provisions of the Code four committees have been created with the power to provide advice and make proposals; the committees feature limited membership and focus on separate issues: Permanent Strategic Committee; Internal Control & Risks Committee; Corporate Governance, HR and Nomination Committee and Remuneration Committee.

Permanent Strategic Committee

The Permanent Strategic Committee is comprised of 10 members, the majority of whom shall be non-executive. The Chairman of the Board and Chief Executive Officer are members by right. The other members shall be chosen based upon their expertise and willingness to accept the office. The Chairman of the Committee is the Chairman of the Board. In principle, the meetings of the Permanent Strategic Committee shall be scheduled on a monthly basis but could be convened whenever necessary to discuss a topic that fall within the scope of the Committee's duties. The meetings will normally be called by the Chairman; however, any two or more Members or two Statutory Auditors can also call a meeting. In this latter case, all the Statutory Auditors are entitled to attend.

In 2009, the Permanent Strategic Committee held nr. 9 meetings.

Duties

The Committee's role is to provide advice and make proposals. The main task of the Permanent Strategic Committee is to provide the Board of Directors with opinions concerning proposals formulated by the CEO to the Board concerning:

- a) the Group 3 Year Plan;

Governance organizational structure (CONTINUED)

- b) Group yearly budget;
- c) Group yearly capital allocation;
- d) Group yearly strategy related to transactions involving shareholdings (M&A/reorganizations);
- e) approval of transactions on shareholdings above a certain limit (300 million Euro for transactions in high-risk countries, and 500 million Euro for transactions in low-risk countries);
- f) extraordinary capital allocations and dividend policy, both for the Holding Company and the Group Companies, unless already included in the annual general Capital Allocation guidelines indicated under para. c) above;
- g) other transactions/initiatives of strategic relevance to the Group, such as: decisions to enter new geographical and business markets, high-profile joint ventures with industrial and/or financial Groups.

Internal Control & Risks Committee

The Internal Control & Risks Committee is comprised of 7 members (5 members until May 12, 2009), all independent pursuant to Sect. 148, paragraph 3, of TUF. The majority of the members (6 out of 7) meets the independence requirements prescribed by the Code. The Chairman of the Board of Directors and Deputy Vice Chairman are members by right. The other members are chosen based upon their expertise and willingness to accept the office and at least one member of the Committee has an adequate experience in accounting and finance. The Committee shall elect a Chairman from among the members who do not belong to the Committee by right. The Committee shall schedule its meetings at least quarterly. The meetings of the Internal Control & Risks Committee will normally be called by the Chairman; however, any two or more Members or two Statutory Auditors can also call a meeting. In this latter case, all the Statutory Auditors are entitled to attend.

The Chairman of the Board of Statutory Auditors or another Statutory Auditor designated by the aforesaid Chairman shall attend the meetings of the Internal Control & Risks Committee. Other Statutory Auditors may be invited to attend, along with members of the Accounting firm.

In 2009, the Internal Control & Risks Committee held n. 12 meetings.

Duties

The Committee's role is to provide advice and make proposals. In particular, the Internal Control & Risks Committee shall:

- A. support the Board in defining guidelines for the internal audit system and at least once a year inspecting the adequacy, efficiency and effectiveness of the system, ensuring that all principal corporate risks are being correctly identified and adequately measured, managed and monitored; also support the Board in determining criteria for ensuring the compatibility of such risks with the sound and proper management of the Company (i.e. risk appetite), overseeing the Compliance function to ensure that it implements the risk and non-compliance management policies defined by the Board, and that the Audit function implements the Board's guidelines in respect of conducting third level inspections;
- B. analyse periodical reports on the audit system. In particular, at least once a year, analyse the periodical report on the adequacy of the non-compliance risk management system and any relevant compliance breaches; examine the annual report on investment services, and also the half-yearly overall report on UniCredit's complaints, based on data supplied by the complaints function;
- C. analyse the Group guidelines for Audit activities and assess the annual audit plan prepared by the Head of the Internal Audit Department, receive periodical reports, and if necessary ask for specific audits to be conducted outside of the annual audit plan;
- D. examine the information received by the Manager in charge of preparing company's financial reports to verify the proper application and consistency of accounting standards for the purposes of the consolidated financial statements;
- E. in accordance with the responsibilities assigned by Italian regulations to the Audit function, examine the criteria and methods to be used for choosing the accounting firm, and the criteria for choosing which Group companies to exempt from auditing; also monitor relations with accounting firms, also based on consultancy agreements that may be in place with the Holding Company and the Companies belonging to the Group;
- F. assess the work carried out by the Group's external auditor(s) and the results set out in the report(s) and letter(s) of recommendation; supervise the effectiveness of the audit process;
- G. examine the quarterly and half-yearly situations and the annual accounts, based on the reports received from the Executive in charge of drafting the corporate and financial statements;
- H. assess any remarks contained in the audit reports received from UniCredit's Audit Department, or from the Board of Statutory Auditors of the companies belonging to the Group, or from third party investigations and/or analyses;
- I. examine the qualitative and quantitative adequacy of the organizations regarding the Compliance and Internal Audit Functions, inviting the Head of each function to formulate proposals for ensuring their adequacy, and in respect of these proposals concerning the Internal Audit Function, ask for the Chief Executive Officer's non-binding opinion;
- J. express its views on the proposal formulated by the Chairman of the Board concerning the appointment or replacement of the Head of the Internal Audit Function, and the variable portion of the latter's compensation package;
- K. support the Board in formalizing policies for governing risks that the Group may be exposed to, periodically reviewing them to ensure their effectiveness and supervising the actual functioning of risk management and control processes in compliance with current legal and regulatory requirements;
- L. express its views on the procedures in place for approving and implementing transactions undertaken by UniCredit and Companies belonging to the Group with related parties.

The Internal Control & Risks Committee shall also report to the Board at least every six months on its activities and the adequacy of the internal

audit process, when it meets to approve the financial statements and interim report.

Corporate Governance, HR and Nomination Committee

The Corporate Governance, HR and Nomination Committee consists of 7 members, the majority of whom shall be non-executive and independent. The Chairman of the Board and Chief Executive Officer are members by right. The other members shall be chosen based upon their expertise and willingness to accept the office. The Chairman of the Committee is the Chairman of the Board. In principle, Committee meetings shall be scheduled on a monthly basis but may be called whenever it is necessary to discuss a topic that falls within the scope of the Committee's duties. Committee meetings shall be called by the Chairman.

In 2009, the Corporate Governance, HR and Nomination Committee held n. 10 meetings.

Duties

The Committee's role is to provide advice and make proposals. In particular, the Committee shall provide the Board of Directors with opinions concerning proposals formulated by the Chairman/CEO to the Board concerning:

- A. the definition of UniCredit's corporate governance system, the corporate structure and governance models/guidelines of the Group;
- B. the definition of policies for appointing UniCredit Directors and policies for evaluating the Board of Directors;
- C. the appointment of the CEO office members and other members of the Management Committee (Senior Executive Vice Presidents, Senior Head Office Executives and Heads of Department reporting directly to the Chief Executive Officer);
- D. the definition of policies concerning the appointment and succession planning of the CEO office members, the members of the Management Committee (Senior Executive Vice Presidents), Group Management Team (Executive Vice Presidents) and Leadership Team (Senior Vice Presidents);
- E. the definition of policies for appointing corporate officers (members of the Board of Directors, Board of Statutory Auditors, and Supervisory Board of Group Companies);
- F. the appointment of corporate officers (members of the Board of Directors, Board of Statutory Auditors, and Supervisory Board) of the Main Group Companies (UniCredit Banca, UniCredit Corporate Banking, UniCredit Private Banking, Pioneer Global Asset Management, UniCredit Leasing, UniCredit Bank A.G., UniCredit Bank Austria, UniCredit Banca di Roma, Banco di Sicilia, UniCredit Mediocredito Centrale, FinecoBank, UniCredit Family Financing Bank, Koc Financial Hizmetler AS, Bank Pekao, UniCredit Business Partner and UniCredit Global Information Services);
- G. the designation of candidates to the position of director of UniCredit in the event of cooptation, and of candidates to the position of independent director to be submitted to the approval of the UniCredit

shareholders' meeting, based also on recommendations received from shareholders;

- H. the appointment of members of the UniCredit Board Committees, upon the proposal of the Chairman.

The Corporate Governance, HR and Nomination Committee shall also provide its advice on the compatibility of an appointment of a Director of UniCredit as director, manager or member of controlling bodies in a banking, insurance or financial company (outside UniCredit Group) with his/her office held in UniCredit, also when the fix threshold to the maximum number of office determined by the Board of Directors is exceeded.

Remuneration Committee

The Remuneration Committee consists of 7 members, the majority of whom shall be independent. The Chairman of the Board and Deputy Vice Chairman are members by right. The other members shall be chosen based upon their expertise and willingness to accept the office. The Chairman of the Committee is the Chairman of the Board. In principle, Committee meetings shall be scheduled on a quarterly basis, but may be called whenever it is necessary to discuss a topic that falls within the scope of the Committee's duties. Committee meetings shall be called by the Chairman.

In 2009, the Remuneration Committee held n. 7 meetings.

Duties

The Committee's role is to provide advice and make proposals. The main task of the Remuneration Committee is to provide the Board of Directors with opinions concerning proposals formulated by the CEO to the Board concerning:

- A. the remuneration of UniCredit Directors who hold specific duties, and especially the remuneration of the CEO;
- B. the remuneration of UniCredit's Managing Director, in the event that the Managing Director is also the CEO;
- C. the remuneration structure of the CEO Office Members;
- D. the remuneration policy for the members of the Management Committee (Senior Executive Vice Presidents), Group Management Team (Executive Vice Presidents), Leadership Team (Senior Vice Presidents) and Heads of Department reporting directly to the Chief Executive Officer;
- E. approval of Group incentive plans based on financial instruments;
- F. the remuneration policy for corporate officers (members of the Board of Directors, Board of Statutory Auditors, and Supervisory Board of Group Companies).

In the cases specified under letters A) and B), the proposals that the Committee will be called upon to express its opinion on will be formulated by the Chairman.

The Committee members about whose remuneration the Chairman must express his opinion in respect of their specific positions, shall not attend meetings scheduled to discuss the proposal concerning the aforesaid remuneration.

NOTES:

* This column shows the percentage of the Director's participation in the meetings of the Board of Directors and Committees respectively (number of attendances / number of meetings held by the interested party during the term of office with regard to the Period).

** This column shows the number of positions as director or auditor held by the interested party in other companies listed on regulated markets (both in Italy and abroad), including financial services companies, banks, insurance companies or other large companies. There is a list of such companies for each director attached to the Report on Corporate Governance and ownership structures, specifying whether the company that the position is held in belongs to the group that the Issuer is related to.

*** A "C" (Chairman) or a "M" (Member) in this column shows that the member of the Board of Directors belongs to the Committee and also indicates his/her position.

(1) position held in the whole Period.

(2) position held until April 29, 2009.

(3) position held since April 29, 2009.

(4) position held since May 12, 2009.

(5) number of positions changed during the 2009 financial year.

(6) number of positions changed during 2009 financial year and after the closing of the 2009 financial year.

Appointed by the Shareholders' Meeting of December 16, 2005 and in office since January 11, 2006.

Co-opted on August 3, 2007 and appointed by the Shareholders' Meeting of May 8, 2008.

- The Board of Directors of UniCredit held on April 29, 2009 appointed the members of the Corporate Governance, HR and Nomination Committee; on the next May 12, 2009, taking into account the opinion expressed by the aforesaid Committee, the Board appointed the members of the Permanent Strategic Committee, Remuneration Committee and Internal Control & Risks Committee and also increased the number of the members of the Internal Control & Risks Committee from 5 to 7.

Governance organizational structure (CONTINUED)

Board of Statutory Auditors

The Ordinary Shareholders' Meeting appoints 5 standing Statutory Auditors and 2 substitute Auditors. The standing and substitute Auditors may be re-elected.

Standing and substitute members of the Board of Statutory Auditors are appointed on the basis of slates in compliance with the UniCredit's Articles of Association, and pursuant to current legal provisions. The Chairman of the Board of Statutory Auditors is appointed by the Shareholders' Meeting among the standing Auditors elected from the slate submitted by minority shareholders that obtained the highest number of votes.

The duration of their mandate is three operating years and the mandate expires on the date of the Shareholders' Meeting called to approve the financial statements for the third year in office.

Members of the Board of Statutory Auditors shall meet the experience, integrity and independence requirements laid down by law and they can held administrative and control appointments with other companies within the limits set by current laws and regulations.

The Board of Statutory Auditors appointed by the Shareholders' Meeting on May 2007 an in office until the Shareholders' Meeting called to approve the 2009 financial statements consists of Mr. Giorgio Loli (Chairman), Mr. Gian Luigi Francardo, Mr. Siegfried Mayr, Mr. Aldo Milanese and Mr. Vincenzo Nicastro (standing Auditors). Mr. Massimo Livatino and Mr. Giuseppe Verrascina are substitute Auditors.

Participation Rights

The Meeting may be attended by those holders of ordinary shares who provide a copy of the notice sent to the Company by the broker holding their accounts, at least two days prior to the date set for the first call of the Meeting. The notice of meeting may specify that the above advance notice of two days is also applicable to any subsequent calls.

Those entitled to attend the Meeting may arrange to be represented by third parties that are not necessarily Shareholders, in compliance with Article 13 of UniCredit's Articles of Association, Article 2372 of the Italian Civil Code and current laws.

Shareholders' rights are clearly defined by Italian law and Articles of Association.

UniCredit has always encouraged its shareholders to exercise their participation and voting rights at shareholders' meetings; for this reason, it has adopted the Regulations governing shareholders' meetings to ensure their regular conduct.

310.	Total profit or loss after tax from discontinued operations	-	-
320.	Net Profit or Loss for the year	2,034,620	4,529,302
330.	Minorities	(332,295)	(517,514)
340.	HOLDINGS INCOME (LOSS) OF THE YEAR	1,702,325	4,011,788

Earnings per share (€)	0.099	0.256
Diluted earnings per share (€)	0.099	0.256

Notes:

In respect of the calculation of the "Earnings Per Share", the main data used are given below (see also the Notes to the Consolidated Accounts – Part C) Consolidated Income Statement, Section 24).

€ 131,078 thousand was deducted from 2009 net profit of €1,702,325 thousand due to disbursements charged to equity made in connection with the contract of usufruct on treasury shares agreed under the 'cashes' transaction.

The number of outstanding shares is net of the average number of treasury shares (and, only for 2009, of further 967,564,061 shares held under a contract of usufruct) and increased by the number of new shares issued as a consequence of the bonus issue approved by the Extraordinary Shareholders' Meeting on April 29, 2009, pursuant to Section 2442 of the Italian Civil Code. Following the bonus issue, the number of ordinary shares outstanding before the event is adjusted for the proportionate change in the number of ordinary shares outstanding as if the event had occurred at the beginning of the earliest period presented (IAS 33 §28).

Consolidated Statement of Comprehensive Income		(€ '000)	
Items	Year		
	2009	2008	
10. Net Profit or loss for the year	2,034,620	4,529,302	
Other comprehensive income after tax			
20. Available-for-sale financial assets	787,168	(2,617,968)	
30. Property plant and equipment	-	-	
40. Intangible assets	-	-	
50. Hedges of foreign investments	-	-	
60. Cash flow hedges	154,386	1,046,218	
70. Exchange differences	(471,662)	(1,883,281)	
80. Non current assets classified as held for sale	-	-	
90. Actuarial gains (losses) on defined benefits plans	-	-	
100. Valuation reserves from investments accounted for using the equity method	(4,186)	(45,233)	
110. Total of other comprehensive income after tax	465,706	(3,500,264)	
120. Comprehensive income after taxes (10+110)	2,500,326	1,029,038	
130. Consolidated comprehensive income attributable to minorities	(341,464)	(309,799)	
140. Consolidated comprehensive income attributable to Parent Company	2,158,862	719,239	

The "Consolidated Comprehensive Income attributable to minorities" (item 130) is different from "Net profit for the period attributable to minorities" (item 330 of Consolidated income statement), as it includes the effect arising from "other comprehensive income" of minorities.

Statement of Changes in Shareholders' Equity include Group portion and minorities

	STATEMENT OF CHANGES IN SHAREHOLDERS' EQUITY											(€'000)

Part A – Accounting Policies

A.1 – General

Section 1 – Statement of Compliance with IFRSs

These consolidated Accounts have been compiled according to the accounting principles issued as at 31 December 2009 by the International Accounting Standards Board (IASB), including all interpretations of SIC and IFRIC, endorsed by the European Commission, as provided for by the European Union Regulation no. 1606/2002, which was transposed in Italian law by the Legislative Decree no. 38 dated 28 February 2005 (see Section 5 – Other matters).

This report is part and parcel of the Annual Financial Statements under section 154-ter, paragraph 1 of the Single Finance Act (TUF, Leg. Decree no. 58 dated 24/2/1998).

Banca d'Italia, whose powers as per LD #87/92 in relation to banks' and regulated financial companies' Accounts were confirmed in the above-mentioned LD, laid down the formats for the Accounts and the Notes to the Accounts in its circular #262 dated 22 December 2005. On 18 November 2009 Banca d'Italia issued a first amendment to this Circular, which implemented the amendments to IAS/IFRS and aligned Italian banks' financial statements to the FINREP framework. In this respect, see Section 2 – Preparation Criteria below, as well as Part A2 concerning the main items in the accounts.

Section 2 – Preparation Criteria

As mentioned above, these Accounts have been prepared in accordance with the IFRS endorsed by the European Commission. The following documents were used to interpret and support the application of IFRS (albeit not endorsed by the EC):

- Framework for the Preparation and Presentation of Financial Statements issued by the IASB in 2001;
- Implementation Guidance, Basis for Conclusions, IFRIC and any other documents prepared by the IASB or IFRIC (International Financial Reporting Interpretations Committee) supplementing IFRS;
- Interpretative documents on the application of IFRS in Italy prepared by the Organismo Italiano di Contabilità (OIC) and Associazione Bancaria Italiana (ABI).

The consolidated accounts comprise the Balance Sheet, the Income Statement, the Statement of Comprehensive Income (introduced in June 2009 following the implementation of the new IAS 1 "Presentation of Financial Statements" through the EC Regulation 1274/2008), the Statement of Changes in Shareholders' Equity, the Cash Flow Statement (compiled using the indirect method), the Notes to the Accounts and Annexes, accompanied by the Directors' Report on Operations.

As noted in the Report on Operations, the Report on Corporate Governance and Proprietary Structures is available in the "Governance" section of the UniCredit website (http://www.unicreditgroup.eu/it/Governance/corporate_governance_report.htm).

Figures, if not specified in the tables, are given in **thousands of euros**.

These Accounts were compiled on the assumption that they should present a continuing business. At present there is no uncertainty as to the Company's ability to continue its business operations as envisaged by IAS 1. Measurement criteria are therefore in accordance with this assumption and with the principles of competence, relevance and materiality in financial statements and the priority of economic substance over juridical form. These principles are unchanged from 2008.

First amendment dated November 18, 2009 to Banca d'Italia Circular 262/2005

Following the above-mentioned first amendment to Banca d'Italia Circular 262/2005 the following changes were applied to the financial statements and the tables included in the notes to the accounts:

Statement of Comprehensive Income

Under the new version of IAS 1, the Statement of Comprehensive Income, starting from profit (loss) for the period, presents items of income and expense which were not recognized in the net profit or loss, in compliance with international financial reporting standards. These items are changes in evaluation for the period contra valuation reserves (after tax) and relate to: available-for-sale financial assets; property, plant and equipment; intangible assets; hedges of foreign investments; cash-flow hedges; exchange differences; actuarial gains (losses) on employee defined-benefit plans.

They also include reclassification adjustments, i.e. amounts reclassified in profit or loss for the period, which were recognised in other comprehensive income in the current or previous periods.

The above mentioned changes in evaluation are indicated separately if they refer to non-current assets classified as held for sale and to associates valued at equity.

In addition, Part D of the Notes to the Consolidated Accounts, which was previously dedicated to "Segment Reporting" is now called "Consolidated Statement of Comprehensive Income," and in fact, contains a table showing the income components.

Segment Reporting is now covered in the new Part L of the Notes to Accounts.

Introduction of the new Part A3)

The newly introduced *Part A.3) Information on fair value* presents a disclosure of reclassified financial instruments according to IAS 39 and information on fair value hierarchy as required by IFRS 7.

Elimination of the breakdown into operational segments

The presentation of a breakdown of consolidated data into operational segments (banking group, insurance company and other businesses) was eliminated, except when a detailed disclosure was deemed significant.

Disclosure of Impaired assets and Assets sold but not derecognized

The disclosure of financial assets does not include the sub-items previously presented in respect of "impaired assets" and "assets sold but not derecognized".

Balances as at 31 December 2008 for these two asset types were reclassified according to a breakdown based on the type of product.

Similarly, the items "Deposits from banks" and "Deposits from customers" do not include the sub-items concerning "liabilities for assets sold but not derecognized", whose balances as at 31 December 2008 were included in "Other liabilities", except for liabilities associated with reverse repos, which are still disclosed separately.

The income statement was also changed by eliminating the sub-item "Financial assets sold but not derecognized" from item 10 "Interest income," and the sub-item "Financial liabilities for assets sold but not derecognized" from item 20 "Interest expense." The balances of these sub-items at December 31, 2008 were then reclassified in the applicable classification portfolios.

Review of the disclosure concerning derivative instruments

The disclosure on derivative instruments presented in Part E – Risks and related risk management policies was reorganized in order to align it to the FINREP regulatory reporting framework under IAS/IFRS.

Introduction of a table on the capital adequacy of financial conglomerates

In Part F, Consolidated Shareholders' Equity, a new table has been established in Section 4 to detail the capital adequacy of financial conglomerates subject to supplementary regulatory procedures.

Risk and uncertainty due to use of estimated figures

The IFRSs require that management provide valuations, estimates and projections with a bearing on the application of accounting principles and the carrying amount of assets, liabilities, expenses and revenue. Estimates and related projections based on experience and other factors judged to be reasonably included were used to estimate the carrying value of assets and liabilities not readily obtainable from other sources.

Estimated figures have been used for the recognition of some of the largest value-based items in the consolidated Accounts at December 31, 2009, as required by the accounting standards and regulations detailed in Section 2 above. These estimates are largely based on calculations of future recoverability of the values recognized in the Accounts under the rules contained in current legislation and were made assuming the continuity of the business, i.e. without considering the possibility of the forced sale of the items so valued.

The processes adopted support the values recognized at December 31, 2009. Valuation was particularly complex given the continuing macro-economic and market situation which was characterized by the volatility of financial indicators used in the valuation process and by credit impairment.

The parameters and information used to check the mentioned values were therefore significantly affected by the above factors, which could change rapidly in ways that cannot currently be foreseen, such that further effects on future balance-sheet values cannot be ruled out.

Estimates and projections are regularly reviewed. Any changes arising from these reviews are recognized in the period in which they are carried out, provided that they concern that period. If the reappraisal concerns both current and future periods it is recognized in both current and future periods as appropriate.

Section 3 – Consolidation Procedures and Scope

The following were the consolidation procedures and principles adopted in drawing up the consolidated accounts as at December 31, 2009.

Consolidated Accounts

For the preparation of the consolidated accounts the following sources were used:

- UniCredit SpA Accounts (draft) as at 31 December 2009.
- The draft Accounts as at 31 December 2009 of other fully consolidated subsidiaries (excluding those indicated in the next bullet point) duly condensed and adjusted in order to take account of consolidation needs and, where necessary, to align them to the IAS/IFRS. If the drafts had not been approved yet at the date of preparation of the Accounts, the Q4 results authorized by the appropriate corporate bodies were used, and then they were checked against the relevant accounts subsequently approved.
- For the companies belonging to the Leasing Sub-Group and reporting to UniCredit Leasing S.p.A. (the company created from the merger of UniCredit Global Leasing S.p.A. into Locat S.p.A. on January 1, 2009):
 - the draft financial statements of UniCredit Leasing S.p.A.;
 - The sub-consolidated accounts of Austrian subsidiaries, i.e. UniCredit Leasing (Austria) GMBH (former Bank Austria Creditanstalt Leasing GMBH) and its subsidiaries.
 - The sub-consolidated accounts of the CEE subsidiaries, i.e. all direct and indirect subsidiaries of the Parent Company UniCredit Leasing SpA located in CEE countries.

Balance Sheet items in foreign currencies are converted at closing exchange rates; the average exchange rate for the year is used for the profit and loss account, which is considered a valid approximation of the rate of exchange at the date of the transaction.

The accounts and explanatory notes of the main fully consolidated subsidiaries prepared under IFRS are subject to audit by leading audit companies.

Subsidiaries

Subsidiaries are entities of which:

- The Parent owns, directly or indirectly through subsidiaries, more than half of the voting power unless, in exceptional circumstances, it can be clearly demonstrated that such ownership does not constitute control.
- The Parent owns half or less of the voting power and has:
 - power over more than half of the voting rights by virtue of an agreement with other investors;
 - power to govern the financial and operating policies of the entity under a statute or an agreement;
 - power to appoint or remove the majority of the members of the board of directors or equivalent governing body and control of the entity is by that board or body; or
 - power to cast the majority of votes at meetings of the board of directors or equivalent governing body and control of the entity is by that board or body.

The existence and effect of potential voting rights that are currently exercisable or convertible, are considered when assessing whether an entity has the power to govern the financial and operating policies of another entity.

The list of subsidiaries also includes any special purpose entities as required by SIC 12. SIC 12 requires UniCredit to consolidate special purpose entities, provided that, in substance, the majority of the risks and rewards incident to the activities of these special purpose entities is attributable to the Bank or, in substance, the Bank controls the special purpose entities. An interest in the equity capital of the special purpose entities is immaterial in this regard.

Thus the consolidation of special purpose entities in accordance with SIC 12 has the same effect as full consolidation. Equity interests held by third parties in a special purpose entity consolidated by the Bank in accordance with SIC 12 are recognized under minority interest.

The carrying amount of an investment in a fully or proportionately consolidated entity held by the Parent or another Group company is eliminated against the recognition of the subsidiary's assets and liabilities as well as the Group's portion of equity of the subsidiary.

Intragroup balances, off-balance sheet transactions, income and expenses and gain/losses between consolidated companies are eliminated in full or proportionately, in accordance with the consolidation procedures adopted.

A subsidiary's income and expenses are included in consolidation from the date the Parent acquires control. On disposal of a subsidiary, its income and expenses are consolidated up to the date of disposal, i.e., when the Parent ceases to control the subsidiary. The difference between the proceeds from the disposal of the subsidiary and the carrying amount of its net assets is recognised in item 270 "Gains (Losses) on disposal of investments" in profit and loss.

Minority interests are recognised in the consolidated balance sheet item 210 "Minorities" separately from liabilities and Parent shareholders' equity. Minority interests in the profit or loss of the Group are separately disclosed under item 330 of the consolidated profit and loss account.

On first-time consolidation, subsidiaries are measured at fair value as at the acquisition date, i.e. at the cost of obtaining control of the subsidiary inclusive of ancillary costs.

Associates

These are entities over which an investor has significant influence, and which is neither a subsidiary nor an interest in a joint venture. It is presumed that the investor has significant influence if the investor holds, directly or indirectly, at least 20 per cent of the voting power of an investee.

Investments in associates are recognised using the equity method. The carrying amount includes goodwill (less any impairment loss). The investor's share of the profit and loss of the investee after the date of acquisition is recognised in item 240 "Profit (Loss) of associates" in profit or loss. Distributions received from an investee reduce the carrying amount of the investment.

If the investor's share of an associate's losses is equal to or more than its carrying amount, no further losses are recognised, unless the investor has incurred legal or constructive obligations or made payments on behalf of the associate.

Unrealised profits on transactions with associates are eliminated to the extent of the Group's interest. Unrealised losses are likewise eliminated, unless the transactions show evidence of impairment of the assets exchanged.

The revaluation reserves of associates, which are recorded as a contra item to changes in value of items that are relevant for this purpose (see Section 2 above - General Principles), are reported separately in the Statement of Comprehensive Income.

Joint ventures

A joint venture is a contractual arrangement whereby two or more parties undertake an economic activity that is subject to joint control. Joint control exists only when financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control.

Interests in joint ventures are recognised using proportionate consolidation.

The following table shows the companies included in the scope of consolidation.

Investments in Subsidiaries and interests in joint ventures (recognized using proportionate consolidation)

Notes to the table that shows the companies included in the scope of consolidation (line by line and proportional).

(1) Type of relationship:

- 1 = majority of voting rights at ordinary shareholders' meeting
- 2 = dominant influence at ordinary shareholders' meeting
- 3 = agreements with other shareholders
- 4 = other types of control
- 5 = centralised management pursuant to paragraph 1 of art. 26 of "Legislative decree 87/92"
- 6 = centralised management pursuant to paragraph 2 of art. 26 of "Legislative decree 87/92"
- 7 = joint control
- 8 = associate company

(2) Voting rights available in general meeting. Voting rights are disclosed only if different from the percentage of ownership.

(3) Compliant with SIC 12 the company is fully consolidated by.

Changes in the scope of consolidation

Fully consolidated entities, including the Parent Company, increased from 660 at December 31, 2008 to 679 in 2009 (+19 entities), while **proportionately** consolidated entities, totaling 18 in 2008, were 17 at December 31, 2009 (-1 entity: TLX Spa, Milano).

The following table shows the changes in equity investments in wholly-owned subsidiaries.

Equity investments in wholly-owned subsidiaries (consolidated line by line): annual changes	
	Number of companies
A. Opening Balance	660
B. Increased by	55
B1. Newly established companies	10
B2. Change of the consolidation method	31
B3. Entities consolidated for the first time in 2009	14
C. Reduced by	36
C1. Disposals	16
C2. Change of the consolidation method	7
C3. Absorption by other Group entities	13
D. Closing balance	679

Details of 2009 increases or reductions are presented below:

Increases

Newly established companies			
COMPANY NAME	MAIN OFFICE	COMPANY NAME	MAIN OFFICE

Section 4 – Subsequent Events

No material events have occurred after the balance sheet date that would make it necessary to change any of the information given in the Consolidated Accounts. See the Report on Operations for a description of significant events after year end.

Section 5 – Other Matters

Since 2009 the following principles or accounting interpretations have become effective:

- Improvements to IFRSs (EC regulation 70/2009) (excluding revisions to IFRS1 and IFRS5);
- IAS 1: Presentation of Financial Statements (transposed into EC regulation 1274/2008);
- IAS 23: Borrowing costs (EC regulation 1260/2008);
- Amendments to IAS 32: Financial Instruments – Disclosure and Presentation and IAS1: Presentation of Financial Statements – Puttable Financial Instruments and Obligation Arising on Liquidation (EC regulation 53/2009);
- Amendments to IFRS 1: First-time Adoption of International Financial Reporting Standards and to IAS 27: Consolidated and Separate Financial Statements – Cost of an Investment in a Subsidiary, Jointly-controlled Entity or Associate (EC regulation 69/2009);
- Amendments to IFRS 2: Share-Based Payment (EC regulation 1261/2008);
- Amendments to IFRS 4: Insurance contracts and to IFRS 7 Improving Disclosures about Financial Instruments (EC regulation 1165/2009);
- IFRS 8: Operating Segments (EC regulation 1358/2007);
- Amendments to IAS 39 and to IFRS 7: Reclassification of Financial Assets – Effective Date and Transition (CE regulation 824/2009);
- Amendments to IFRIC 9: Reassessment of Embedded Derivatives and to IAS 39: Financial Instruments: Recognition and Measurement (EC regulation 1171/2009);
- IFRIC 13: Customer Loyalty Programmes (EC regulation 1262/2008);
- IFRIC 14: The limit of a Defined Benefit Assets, Minimum Funding Requirements and their Interaction (EC regulation 1263/2008).

As regards the new version of IAS 1 "Presentation of Financial Statements" and the adoption of the statement of comprehensive income, see Section 2 above - General Principles.

In addition, it should be noted that the revisions to IFRS 7 include the requirement that valuations at fair value be classified on the basis of a hierarchy of levels that reflects the significance of the inputs used in the valuations.

Both these revisions are included in those incorporated in the referenced first amendment to Circular 262/2005 of Banca d'Italia (see Section 1).

The entry into force of IFRS 8 "Operating Segments" had no impact on segment reporting (Part L of the Notes to Accounts) since the criteria used to prepare the segment reporting, as determined on the basis of the previous IAS 14 which has now been replaced, are the same as those used to provide information to the highest operational decision-making level as required by the new standard.

The adoption of the other standards and interpretations cited also had no effect on the balance sheet or income statement of the consolidated financial statements.

The European Commission also transposed some accounting principles which have become effective after 31 December 2009, for which the Group did not avail itself of the possibility to implement them in advance. These principles are:

- Improvements to IFRSs (EC regulation 70/2009) (only for revisions to IFRS1 and IFRS5);
- IAS 27: Consolidated and Separate Financial Statements (EC regulation 494/2009);
- Revised IFRS 1: First Time Adoption of IFRSs (EC regulation CE 1136/2009);
- IFRS 3: Business Combination (EC regulation 495/2009);
- IFRIC 12: Service Concession Arrangements (EC regulation 254/2009);
- IFRIC 15: Agreements for the Construction of Real Estate (Reg. CE 636/2009);
- IFRIC 16: Hedges of a Net Investment in a Foreign Operation (EC regulation 460/2009);
- IFRIC 17: Distribution of Non-Cash Assets to Owners (EC regulation 1142/2009);
- IFRIC 18: Transfers of Assets from Customers (EC regulation 1164/2009);
- Amendments to IAS 32: Financial Instruments – Presentation – Classification of Rights issues (EC regulation 1293/2009);
- Amendments to IAS 39 Financial Instruments: Recognition and Measurement – Eligible Hedged Items (EC regulation 839/2009).

It should also be noted that the new IFRS 3: Business Combinations, introduces the option of measuring minority interests at fair value, with the result that the entire goodwill of the company acquired is reported.

In addition, this standard:

- specifies, that in the event control is acquired by purchasing interests in the company in successive phases, these must be measured at fair value on the date control is acquired, with any differences in valuation posted to the income statement;
- indicates that transaction costs incurred as a part of business combination transactions must be recorded in the income statement;
- provides further clarifications concerning the valuation, on the purchase date, of assets and liabilities acquired;
- introduces the requirement to measure at fair value any amounts that the purchaser must pay to the seller upon the occurrence of predetermined circumstances following the acquisition date.

In keeping with the revision of IFRS 3, the IASB also revised IAS 27 indicating, among other things, that:

- purchases of minority equity investments or the sale of a portion of shares held that does not result in the loss of control of the associate must be recorded under shareholders' equity;
- if there is a loss of control over a subsidiary, the seller must record any remaining interest at fair value with differences posted to the income statement.

The required changes are under examination. We do not in any case believe that these standards will have any significant impact on our income statement or balance sheet.

As at 31 December 2009 the IASB had issued or reviewed the following accounting principles:

- Amendments to IFRSs;
- Amendments to IFRS 2: Group Cash-settled Share-Based Payment Transactions;
- Amendments to IFRS 1: Additional Exemptions for First-Time Adopters;
- Revised IAS 24: Related Party Disclosures;
- Amendments to IFRIC 14 – Prepayments of a Minimum Funding Requirement;
- IFRIC 19: Extinguishing Financial Liabilities with Equity Instruments;
- IFRS 9: Financial Instruments.

However, the adoption of these principles by the Group is subject to transposition thereof by the European Union.

Starting from opening balances as at January 1st, 2008, exchange differences relating to net foreign investments (subsidiaries, associates or joint ventures) have been reclassified in Group equity as 'exchange differences' in item 140 Valuation Reserves. These exchange differences were previously recognized as 'other retained profit' in item 170 Reserves.

For the sake of comparability we have therefore restated the December 2008 balance-sheet figures, the notes to the accounts and the statement of changes to shareholders' equity to take these effects into account.

The consolidated accounts are audited by KPMG S.p.A. pursuant to LD 58/98 dated February 24, 1998 and the resolution passed by the Shareholders' Meeting on 10 May 2007, as are the accounts of UniCredit SpA, the Parent Company.

The UniCredit Group published its consolidated financial half-year report as at June 30, 2009, its consolidated interim reports at 31 March and 30 September 2009 within the legal time limits and as prescribed by CONSOB, and the Consolidated Interim Report as at September 30, 2009 on which a limited audit was performed, included in the Prospectus filed with Consob at January 8, 2010.

The Board of Directors approved these Accounts on March 16, 2010 and authorized the publication of the essential figures.

The whole document is lodged with the competent offices and entities as required by law.

A.2 – The Main Items of the Accounts

1 – Held-for-Trading Financial Assets (HfT)

A financial asset is classified as held for trading if it is:

- acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking;
- a derivative (except for derivatives which constitute financial guarantees, see Section 18, and derivatives designated as hedging instruments - see Section 6).

On initial recognition an HfT financial asset is measured at its fair value excluding transaction costs and income which are directly recognized in profit and loss even when directly attributable to the acquisition or issue of the financial asset.

After initial recognition these financial assets are measured at their fair value through profit or loss.

A gain or loss arising from sale or redemption or a change in the fair value of a HfT financial asset is recognised in profit or loss in item 80 "Gains (losses) on financial assets and liabilities held for trading", with the exception of financial derivatives relating to a fair value option of which gains and losses, whether realised or measured, are booked in item 110. "Gains (losses) on financial assets/liabilities at fair value through profit and loss" (please see Ch. 5). If the fair value of a financial asset falls below zero it is recognised in item 40 "Financial liabilities held for trading".

A derivative is a financial instrument or other contract with all three of the following characteristics:

- its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable (usually called the 'underlying');
- it requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors;
- it is settled at a future date.

An embedded derivative is a component of a hybrid (combined) instrument that also includes a non-derivative host contract, with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. A derivative that is attached to a financial instrument but is contractually transferable independently of that instrument, or has a different counterparty from that instrument, is not an embedded derivative, but a separate financial instrument.

An embedded derivative is separated from the host contract and recognised as a derivative if:

- the economic characteristics and risks of the embedded derivative are not closely related to those of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative;
- the hybrid (combined) instrument is not measured at fair value through profit or loss.

If it is necessary to separate an embedded derivative from its host contract, but it is not possible to measure the embedded derivative separately either at acquisition or at a subsequent financial reporting date, the entire combined contract is treated as a financial asset or financial liability at fair value through profit or loss.

When an embedded derivative is separated, the host contract is recognised according to its category.

2 - Available-for-sale Financial Assets (AfS)

Available-for-sale financial assets are those non-derivative financial assets that are designated as available for sale or are not classified as loans and receivables, held-to-maturity investments, financial assets held for trading or financial assets at fair value through profit or loss. These assets are held for an indefinite period of time and for the purpose of ensuring liquidity and responding to changes in interest rates, exchange rates and prices.

AfS financial assets are money market instruments, other debt instruments or equity instruments.

On initial recognition, an AfS financial asset is measured at fair value plus transaction costs and income directly attributable to the instrument, less fees and commissions.

Interest on interest-bearing instruments is recognised at amortised cost using the effective interest rate method.

In subsequent periods available-for-sale financial assets are measured at fair value, the interest at amortized cost being recognized in the income statement. Gains or losses arising out of changes in fair value are recognised in equity item 140 "Revaluation reserves" – except losses due to impairment and exchange rate gains or losses on monetary items (debt instruments) which are recognised under item 130.b) "Impairment losses on AfS available for sale financial assets" and item 80 "Gains (losses) on financial assets and liabilities held for trading" respectively - until the financial asset is sold, at which time cumulative gains and losses are recognised in profit or loss in item 100(b) "Gains (losses) on disposal or repurchase of AfS financial assets".

The fair value changes recorded in item 140 "Revaluation reserves" are also reported in the Statement of Comprehensive Income.

Equity instruments (shares) not listed in an active market and whose fair value cannot be reliably determined are valued at cost.

If there is objective evidence of an impairment loss on an available-for-sale financial asset, the cumulative loss that had been recognised directly in equity item 140 "Revaluation reserves", is removed from equity and recognised in profit or loss under item 130 b) "Impairment losses (b) Available for sale financial assets".

In respect of debt instruments, any circumstances indicating that the borrower is experiencing financial difficulties which could prejudice the collection of the principal or interest, represent an impairment loss.

Lasting loss of value of equity instruments is assessed on the basis of indicators such as fair value below cost and adverse changes in the environment in which the company operates, as well as the issuer's debt service difficulties.

If the fall in fair value below cost is more than 50% or lasts for more than 18 months, the loss of value is considered lasting.

If however the fall in the fair value of the instrument is over 20% but less than or equal to 50% or continues for no less than 9 but no longer than 18 months, the Group analyses further income and market indicators.

If the results of the analysis are such as to prejudice the recovery of the amount originally invested, a lasting loss of value is recognized.

The amount taken to profit and loss is the difference between the carrying amount (acquisition cost less any impairment loss already recognized in profit or loss) and current fair value.

Where instruments are valued at cost, the amount of the loss is determined as the difference between their carrying value and the present value of estimated future cash flows, discounted at the current market yield on similar financial assets.

If, in a subsequent period, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed and the amount of the reversal is recognised in the same profit or loss item. The reversal cannot result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised.

Impairment losses recognised in profit or loss for an investment in an equity instrument classified as available for sale are not reversed through profit or loss, but recognised at equity, even when the reasons for impairment no longer obtain.

3 - Held to Maturity Investments (HtM)

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity for which there is the positive intention and ability to hold to maturity.

If, during the financial year, more than an insignificant amount of held-to-maturity investments are sold or reclassified before maturity, the remaining HtM financial assets are reclassified as available-for-sale and no financial assets are classified as HtM investments for the two following financial years, unless the sales or reclassifications:

- are so close to maturity or the financial asset's call date that changes in the market rate of interest would not have a significant effect on the financial asset's fair value;
- occur after substantially all of the financial asset's original principal has been collected through scheduled payments or prepayments;
- are attributable to an isolated event that is beyond the reporting entity's control, is non-recurring and could not have been reasonably anticipated.

After initial recognition at its fair value, which will usually be the price paid including transaction costs and income directly attributable to the acquisition or provision of the financial asset (even if not yet settled), a held-to-maturity financial asset is measured at amortised cost using the effective interest method. A gain or loss is recognised in profit or loss in item 100 c) "Gains (losses) on disposal of HtM financial assets" when the financial asset is derecognised.

If there is objective evidence that a held-to-maturity investment is impaired, the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted using the original effective interest rate of the financial asset. The carrying amount of the asset is reduced accordingly and the loss is recognised in profit or loss under item 130(c) "Impairment losses (c) held-to-maturity investments".

If, in a subsequent period, the amount of an impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed. The reversal cannot result in a carrying amount of the financial asset in excess of what the amortised cost would have been had the impairment not been recognised. The amount of the reversal is recognised in the same profit or loss item.

4 - Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables are recognised on the date of contract signing, which normally coincides with the date of disbursement to the borrower.

These items include debt instruments with the same characteristics or that are subject to portfolio reclassification in accordance with the rules of IAS 39 (see Part A.3.1 below - Transfers between portfolios) and the net value of finance leases of assets under construction or awaiting lease, provided the leases have the characteristics of contracts entailing the transfer of risk.

After initial recognition at fair value, which usually is the price paid including transaction costs and income which are directly attributable to the acquisition or issuance of the financial asset (even if not paid), a loan or receivable is measured at amortised cost using the effective interest method, allowances or reversals of allowances being made where necessary on remeasuring.

A gain or loss on loans and receivables that are not part of a hedging relationship is recognised in profit or loss:

- when a loan or receivable is derecognised: in item 100 (a) "Gains (losses) on disposal";

or:

- when a loan or receivable is impaired: in item 130 (a) "Impairment losses (a) loans and receivables".

Interest on loans and receivables is recognised in profit or loss on an accrual basis under item 10 "Interest income and similar revenue".

Delay interest is taken to the income statement on collection or receipt.

A loan or receivable is deemed impaired when it is considered that it will probably not be possible to recover all the amounts due according to the contractual terms, or equivalent value.

Allowances for impairment of loans and receivables are based on the present value of expected net cash flows of principal and interest; in determining the present value of future cash flows, the basic requirement is the identification of estimated collections, the timing of payments and the rate used.

The amount of the loss on impaired exposure classified as non-performing, doubtful or restructured according to the categories specified below, is the difference between the carrying value and the present value of estimated cash flows discounted at the original interest rate of the financial asset.

In the first year of the transition to IAS/IFRS (2005) and subsequently, if the original interest rate of a financial asset being discounted cannot be found, or if finding it would be excessively onerous, the average rate was applied that was recorded for positions with similar characteristics, which had not deteriorated in the year in which the original deterioration of the asset concerned occurred. For all fixed-rate positions, the rate determined in this manner was also held constant in future years.

Recovery times are estimated on the basis of any repayment schedules agreed with the borrower or included in a business plan or reasonably predicted, based on historical recovery experience observed for similar classes of loans, taking into account the type of loan, the geographical location, the type of security and any other factors considered relevant.

Loans and receivables are reviewed to identify those that, following events occurring after initial recognition, display objective evidence of possible impairment. These problem loans are reviewed and analysed periodically at least once a year. Any subsequent change vis-à-vis initial expectations of the amount or timing of expected cash flows of principal and interest causes a change in allowances for impairment and is recognised in profit or loss in item 130(a) "Impairment losses (a) loans and receivables".

In the Notes to the Accounts, write-downs of impaired loans are classified as specific in the relevant income statement item even when the calculation is flat-rate or statistical, as indicated below.

If the quality of the loan or receivable has improved and there is reasonable certainty that principal and interest will be recovered in a timely manner according to contractual terms, a reversal is made in the same profit or loss item, within the amount of the amortised cost that there would have been if there had been no impairments.

Derecognition of a loan or receivable in its entirety is made when the loan or receivable is deemed to be irrecoverable or is written off. Write-offs are recognised directly in profit or loss under item 130(a) "Impairment losses (a) loans and receivables" and reduce the amount of the principal of the loan or receivable. Reversals of all or part of previous impairment losses are recognised in the same item.

Loans under renegotiation involving a debt/equity swap are valued, pending swap finalization, on the basis of the conversion agreements entered into on the balance-sheet date.

Please see Section A.3 below for the method used to calculate the fair value of shares arising from these transactions. Any negative differences between the value of the loans and that of the shares are taken to profit and loss as write-downs.

Impaired loans and receivables are divided into the following categories:

- **Non-performing loans** – formally impaired loans, being exposure to insolvent borrowers, even if the insolvency has not been recognised in a court of law, or borrowers in a similar situation: measurement is on a loan-by-loan or portfolio basis;
- **Doubtful loans** – exposure to borrowers experiencing temporary difficulties, which the Group believes may be overcome within a reasonable period of time. Doubtful loans also include loans not classified as non-performing granted to borrowers other than government entities where the following conditions are met:
 - They have fallen due and remained unpaid for more than 270 days (or for more than 150 or 180 days for consumer credit exposure with an original term of less than 36 months, or 36 months or over, respectively);
 - The amount of the above exposure to the same borrower and other defaulted payments that are less than 270 days overdue, is at least 10% of the total exposure to that borrower.

Doubtful loans are valued analytically when special elements make this advisable or by applying analytically flat percentages on a historical or stochastic basis in the remaining cases.

- **Restructured loans** – exposure to borrowers with whom a rescheduling agreement has been entered into including renegotiated pricing at interest rates below market, the conversion of part of a loan into shares and/or reduction of principal: measurement is on a loan-by-loan basis, including discounted cost due to renegotiation of the interest rate at a rate lower than the original contractual rate.
- **Past-due loans** – total exposure to any borrower not included in the other categories, who at the balance-sheet date has expired facilities or unauthorised overdrafts that are more than 90 days past due. Retail loans to public-sector entities and companies resident or established in Italy are considered impaired where there are overdue or unauthorised exposures for more than 180 instead of 90 days. Total exposure is recognised in this category if, at the balance-sheet date, either:
 - the expired or unauthorised borrowing;
 - or:
 - the average daily amount of expired or unauthorised borrowings during the last preceding quarter are equal to or exceed 5% of total exposure.

Overdue exposures are valued at a flat rate on a historical or stochastic basis by applying where available the risk rating referred to LGD – Loss given Default under Basel 2.

Collective assessment is used for groups of loans for which individually there are no indicators of impairment, but to which latent impairment can be attributed, inter alia on the basis of the risk factors in use under Basel 2.

Each loan with similar characteristics in terms of credit risk – in relation to loan type, the borrower's sector of economic activity, geographical location, type of security or other relevant factors – is assessed in terms of its PD (Probability of Default) and LGD (Loss Given Default); these are uniform for each class of loan.

The procedure adopted supplements Basel 2 directives with IFRS, which do not include future losses on loans and receivables which have not been sustained, but do take into account losses already sustained but not manifest at the time of measurement, on the basis of past experience of losses on assets having a similar credit risk to the assets being measured.

The average time elapsed from deterioration of borrowers' financial condition to the recognition of impairment losses, in relation to any homogeneous group of exposures, is the *Loss Confirmation Period*.

The portfolio valuation is the product of the risk factors used under Basel 2 (with a one-year time horizon) and the above loss confirmation periods expressed as part of a year and diversified according to asset class on the basis of the characteristics and development level of the credit processes.

If these indicators are not available, estimated value and standard loss percentages, based on internal historical series and sectoral studies, shall be used.

Allowances for unsecured loans to residents of countries experiencing debt service difficulties, where the transfer risk is not included in the rating system applied, are generally determined, country by country, with the aim of attributing latent impairment on the basis of shared parameters.

Allowances for impairment reduce the loan or receivable's carrying amount. The risk inherent in off-balance-sheet items, such as loan commitments, is recognised in profit or loss under item 130(d) "Impairment losses (d) other financial assets" offsetting the liability item 120(b) "Provisions: other provisions" (except for losses due to impairment of guarantees and comparable credit derivatives under IAS 39, offsetting item 100 "Other liabilities").

Loans and receivables also include according to the applicable product breakdown, loans securitised after 1 January 2002 which cannot be derecognised under IAS 39 (see Section 18 – Other Information - Derecognition).

Corresponding amounts received for securitised loans net of the amount of any retained risk (issued securities retained in the portfolio) are recognised in liability items 10 "Deposits from banks" and 20 "Deposits from customers".

Both assets and liabilities are measured at amortised cost and interest received is recognised through profit or loss.

Impairment losses on retained risk securities (arising out of securitisation transactions carried out by the entity) are recognised in item 130(a) "Impairment losses (a) loans and receivables".

5 - Financial Instruments at Fair Value through Profit and Loss (FiaFV)

Any financial asset may be designated as a financial instrument measured at fair value through profit and loss on initial recognition, except for the following:

- investments in equity instruments for which there is no price quoted in active markets and whose fair value cannot be reliably determined;
- derivatives.

FiaFV include non-HfT financial assets, but whose risk is:

- connected with debt positions measured at fair value (see also item 15 "Financial liabilities at fair value through profit and loss");
- and managed by the use of derivatives not treatable as hedges.

FiaFV are accounted for in a similar manner to HfT financial assets (see Section 1), however gains and losses, whether realised or not, are recognised in item 110 "Gains (losses) on financial assets and liabilities measured at fair value".

6 - Hedge Accounting

Derivative hedging instruments are of three types:

- Fair value hedge: a hedge of the exposure to changes in fair value of a recognised asset or liability, or an identifiable portion of such an asset or liability;
- Cash flow hedge: a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction which could affect profit or loss;
- Hedge of a net investment in a foreign operation.

A hedging relationship qualifies for hedge accounting if there is formal designation and documentation of the hedging relationship including the risk management objective, the strategy for undertaking the hedge, and how the hedging instrument's effectiveness will be assessed. It is necessary to assess the hedge's effectiveness, at inception and in subsequent periods, in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk.

A hedge is regarded as highly effective if, at the inception of the hedge and in subsequent periods, it is determined prospectively to remain highly effective, i.e. that the hedge ratio is within a range of 80-125 per cent. The hedge is assessed on an ongoing basis and thus must prospectively remain highly effective throughout the financial reporting periods for which the hedge was designated.

The assessment of effectiveness is made at each balance-sheet date or other reporting date. If the assessment does not confirm the effectiveness of the hedge, from that time on hedge accounting is discontinued in respect of the hedge and the hedging derivative is reclassified as a held-for-trading instrument.

In addition, the hedging relationship ceases when the hedging instrument expires or is sold, terminated or exercised; the hedged item is sold, expires or is repaid; or it is no longer highly probable that the forecast transaction will occur.

Hedging instruments are so designated when identifiable with an ultimate counterparty outside the Group.

Hedging derivatives are measured at fair value. Specifically:

- **Fair Value Hedging** – an effective fair value hedge is accounted for as follows: the gain or loss from remeasuring the hedging instrument at fair value is recognised through profit or loss in item 90 "Fair value adjustments in hedge accounting"; the gain or loss on the hedged item attributable to the hedged risk adjusts the carrying amount of the hedged item and is recognised through profit or loss in the same item. If the hedging relationship is terminated for reasons other than the sale of the hedged item, this is measured according to the original criterion dictated by the accounting standard applied to the relevant portfolio. In the case of interest-bearing instruments, the difference between the carrying amount of the hedged item on termination of the hedging and the carrying amount it would have had if the hedge had never existed, is recognised through profit or loss in interest receivable or payable over the residual life of the original hedge. The difference in fair value of the hedging derivative since the latest effectiveness testing date is recognised in profit or loss under item 90 "Fair value adjustments in hedge accounting". If the hedged item is sold or repaid, the unamortised portion of fair value is at once recognised through profit or loss in the item 100. "Gains (losses) on disposal or repurchase";
- **Cash Flow Hedging** – the portion of the gain or loss on a cash flow hedging instrument that is determined to be an effective hedge is recognised initially in equity item 140 "Revaluation reserves". The ineffective portion of the gain or loss is recognised through profit or loss in item 90 "Fair value adjustments in hedge accounting". If a cash flow hedge is determined to be no longer effective or the hedging relationship is terminated, the cumulative gain or loss on the hedging instrument that remains recognised in "Revaluation reserves" from the period when the hedge was effective remains separately recognised in "Revaluation reserves" until the forecast transaction occurs or is determined to be no longer possible; in the latter case gains or losses are

transferred through profit or loss to 80 "Gains and losses on financial assets/liabilities held for trading".

The fair value changes recorded in item 140 "Revaluation reserves" are also disclosed in the Statement of Comprehensive Income;

- Hedging a Net Investment in a Foreign Operation – hedges of a net investment in a foreign operation are accounted for similarly to cash flow hedges:
 - the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised directly in item 140 "Revaluation reserves" through the statement of changes in equity;
 - the ineffective portion is however recognised through profit or loss in item 90 "Fair value adjustments in hedge accounting".

The gain or loss on the hedging instrument relating to the effective portion of the hedge that has been recognised directly in equity is recognised through profit or loss on disposal of the foreign operation;

The fair value changes recorded in item 140 "Revaluation reserves" are also disclosed in the Statement of Comprehensive Income;

- Macro-hedged Financial Assets (Liabilities) – IAS 39 allows a fair-value item hedged against interest rate fluctuations to be not only a single asset or liability but also a monetary position contained in a number of financial assets or liabilities (or parts of them); accordingly, a group of derivatives can be used to offset fair-value fluctuations in hedged items due to changes in market rates. Macrohedging may not be used for net positions resulting from the offsetting of assets and liabilities. As for fair value hedges, macrohedging is considered highly effective if, at the inception of the hedge and in subsequent periods, changes in the fair value attributable to the hedged position are offset by changes in fair value of the hedging instrument and if the hedge ratio is within the range of 80-125 per cent. Net changes – gains or losses – in the fair value of macrohedged assets and liabilities are recognised in asset item 90 and liability item 70 respectively and offset the profit and loss item 90 "Fair value adjustments in hedge accounting".

The ineffectiveness of the hedging arises to the extent that the change in the fair value of the hedging item differs from the change in the fair value of the hedged monetary position. The extent of hedge ineffectiveness is in any case recognised in profit and loss item 90 "Fair value adjustments in hedge accounting".

If the hedging relationship is terminated, for reasons other than the sale of the hedged items, the remeasurement of these items is recognised through profit or loss in interest payable or receivable, for the residual life of the hedged financial assets or liabilities.

If the latter are sold or repaid, unamortised fair value is at once recognised through profit and loss in item 100 "Gains (losses) on disposal or repurchase".

7 - Equity Investments

The principles governing the recognition and measurement of equity investments under IAS 27 Consolidated and Separate Financial Statements, IAS 28 Investments in Associates, and IAS 31 Interests in Joint Ventures, are given in detail in Part A.1, Section 3 – Consolidation Procedures and Scope.

Remaining interests other than subsidiaries, associates and joint ventures, and interests recognised in items 150 “Non-current assets and disposal groups held for sale” and 90 “Liabilities included in disposal groups classified as held for sale” (see Section 10) – are classified as AfS financial assets or financial assets at fair value through profit and loss and treated accordingly (see Sections 2 and 5).

8 - Property, Plant and Equipment (Tangible Assets)

The item includes:

- Land;
- Buildings;
- furniture and fixtures;
- plant and machinery;
- other machinery and equipment;
- leasehold improvements;

and is divided between:

- assets used in the business;
- assets held as investments.

Assets used in the business are held for use in the production or supply of goods or services or for administrative purposes and are expected to be used during more than one period. This category also (conventionally) includes assets to be let or under construction and to be leased under a finance lease, only for those finance leases which provide for retention of risk by the lessor until the acceptance of the asset by the lessee and the start of rentals under the finance lease, (see also section 4 for finance leases with risk transfer).

The item includes assets used by the Group as lessee under a finance lease, or let/hired out by the Group as lessor under an operating lease.

Leasehold improvements (included in the above items) are leasehold improvements and costs relating to property, plant and equipment which can be separately identified, usually borne in order to make leased premises fit for the expected use.

Improvements and additional expenses relating to property, plant and equipment which cannot be separately identified, are recognised in item 160 “Other assets”.

Assets held for investment purposes are properties covered by IAS 40, i.e. properties held (owned or under a finance lease) in order to derive rentals and/or a capital gain.

Property, plant and equipment are initially recognised at cost including all costs directly attributable to bringing the asset into use (transaction costs, professional fees, direct transport costs incurred in bringing the asset to the desired location. installation costs and dismantling costs).

Subsequent costs are added to the carrying amount or recognised as a separate asset only when it is probable that there will be future economic benefits in excess of those initially foreseen and the cost can be reliably measured.

All other expenses borne at a later time (e.g. normal maintenance costs) are recognised in the year they are incurred in profit and loss items:

- 180 b) "General and administrative expenses", if they refer to assets used in the business;
- or:
- 220 "Other net operating income", if they refer to property held for investment.

After being recognised as an asset, an item of property, plant and equipment is carried at cost less any accumulated depreciation and any cumulative impairment losses.

Exceptions are made for property investments underlying liabilities whose yield is linked to their fair value. For these latter assets the fair value model as per IAS 40 paragraph 32A is used.

An item with a finite useful life is subject to straight-line depreciation.

Residual useful life is usually assessed as follows:

Buildings	max. 50 years;
Movables	max. 25 years;
Electronic equipment	max. 15 years;
Other	max. 10 years;
Leasehold Improvements	max. 25 years.

An item with an indefinite useful life is not depreciated, nor is an asset the residual value of which is equal to or greater than its carrying amount.

Land and buildings are recognised separately, even if acquired together. Land is not depreciated since it usually has an indefinite useful life. Buildings, conversely, have a finite useful life and are therefore subject to depreciation.

The useful life of an asset is reviewed at each accounting period-end at least and, if expectations differ from previous estimates, the depreciation amount for the current and subsequent financial years is adjusted accordingly.

If there is objective evidence that an asset has been impaired, the carrying amount of the asset is compared with its recoverable value, equal to the greater of its fair value less selling cost and its value in use, i.e., the present value of future cash flow expected to originate from the asset. Any value adjustment is recognised in profit and loss item 200 "Impairment/ write-backs on property, plant and equipment".

If the value of a previously impaired asset is restored, its increased carrying amount cannot exceed the net carrying amount it would have had if there had been no losses recognised on the prior-year impairment.

An item of property, plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use or sale in the future and any difference between sale proceeds and carrying value is recognised in profit and loss item 270 "Gains (losses) on disposal of investments".

9 - Intangible Assets

An intangible asset is an identifiable non-monetary asset without physical substance, controlled by the Group and from which future economic benefits are probable.

Intangible assets are principally goodwill, software, brands and patents.

This item also includes intangible assets used by the Group as lessee under finance leases or as lessor under operating leases (rental/hire).

Intangible assets other than goodwill are recognised at purchase cost, i.e. including any cost incurred to bring the asset into use, less accumulated amortisation and impairment losses.

An intangible asset with a finite life is subject to straight-line amortisation over its estimated useful life.

Residual useful life is usually assessed as follows:

Software	max. 10 years;
Other intangible assets	max. 20 years.

Intangible assets with an indefinite life are not amortized.

If there is objective evidence that an asset has been impaired, the carrying amount of the asset is compared with its recoverable value, equal to the greater of its fair value less selling cost and its value in use, i.e. the present value of future cash flows expected to originate from the asset. Any impairment loss is recognised in profit and loss item 210 "Impairment/ write-backs on intangible assets".

For an intangible asset with indefinite life even if there are no indications of impairment, the carrying amount is compared annually with its recoverable value. If the carrying amount is greater than the recoverable value, the difference is recognised in profit and loss item 210 "Impairment/write-backs on intangible assets".

If the value of a previously impaired intangible asset, other than goodwill is restored, its increased carrying amount cannot exceed the net carrying amount it would have had if there were no losses recognised on the prior-year impairment.

An intangible asset is derecognised on disposal or when no future economic benefits are expected from its use or sale in the future and any difference between sale proceeds and carrying value is recognised in the profit and loss item 270 "Gains (losses) on disposal of investments".

Goodwill

Goodwill is the excess of the cost of a business combination over the net fair value of the identifiable assets and other items acquired at the acquisition date.

Goodwill arising on the acquisition of a subsidiary or a proportionately consolidated joint-venture is recognised as an intangible asset. Goodwill arising from the acquisition of non-controlling interests is recognised through investments in associates.

Goodwill is recognised at cost less any cumulative impairment losses and is not amortised.

Goodwill is impairment tested annually, as for other intangible assets with an indefinite useful life. To this end it is allocated to the Group's business areas identified as the Cash Generating Units (CGUs). Goodwill is monitored by the CGUs at the lowest level in line with its business model.

Impairment losses on goodwill are recognised in profit and loss item 260 "Impairment losses on goodwill". In respect of goodwill, no write-backs are allowed.

Please see Section B 13.3 Intangible Assets – Further Information below for further information on intangibles, goodwill, the CGUs and impairment testing for these.

10 - Non-Current Assets Held for Sale

Non-current assets and the group of associated liabilities (i.e. a group of units generating financial cash flow) whose sale is highly probable, are recognised in item 150 "Non-current assets and disposal groups held for sale" and item 90 "Liabilities associated with held-for-sale assets" respectively at the lesser of the carrying amount and fair value net of disposal costs.

The balance of revenue and expense relating to discontinued assets and liabilities (dividends, interest, etc.) and of their measurement as determined above, net of current and deferred tax, is recognised in the item 310 "Gains (losses) on groups of assets held for sale net of tax".

The revaluation reserves relating to Non-current assets held for sale, which are recorded as a contra item to changes in value relevant for this purpose (see A.1 – General, Section 2 General Principles), are reported separately in the Statement of Comprehensive Income.

11 - Current and Deferred Tax

Income tax, calculated in accordance with local tax regulations, is recognised as a cost in relation to the taxable profit for the same period.

A deferred tax asset (item 140 b) is recognised for all deductible temporary differences to the extent that it is probable that in the future taxable profit will be available against which the asset can be utilised, unless it arises from the initial recognition of an asset or a liability in a transaction which:

- is not a business combination; and
- at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax liability is recognised for all taxable temporary differences, unless the deferred tax liability arises from:

- the initial recognition of goodwill; or
- the initial recognition of an asset or liability in a transaction which:
 - is not a business combination; and
 - at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

Deferred tax assets and liabilities are recognised at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the time of recognition.

A deferred tax liability is recognised for all taxable temporary differences associated with investments in subsidiaries or associates, and interests in joint ventures, except to the extent that both of the following conditions are satisfied:

- the Parent, investor or venturer is able to control the timing of the reversal of the temporary difference; and
- it is probable that the temporary difference will not reverse in the foreseeable future.

A deferred tax asset is recognised for all deductible temporary differences arising from investments in subsidiaries and associates, and interests in joint ventures, to the extent that, and only to the extent that, it is probable that:

- the temporary difference will reverse in the foreseeable future; and
- taxable profit will be available against which the temporary difference can be utilised.

Deferred tax assets and liabilities are offset when owed to (or by) the same tax authority and the right to offset is recognised in law.

Current and deferred tax is recognised in profit and loss item 290 “Tax expense (income) related to profit or loss from continuing operations”, except tax referred to items debited or credited directly to equity, in the same or another year, such as those relating to AfS financial assets or to changes in the fair value of cash flow hedging instruments, the changes in value of which are recognised directly in the revaluation reserves net of tax.

12 - Provisions for Risks and Charges

Retirement Payments and Similar Obligations

Retirement provisions – i.e. provisions for employee benefits paid after leaving employment – are classified as defined contribution plans or defined-benefit plans according to the economic nature of the plan.

In detail:

- Defined-benefit plans provide a series of benefits depending on factors such as age, years of service and compensation needs. Under this type of plan actuarial and investment risks are borne by the company.
- Defined-contribution plans are plans under which the company makes fixed contributions. Benefits are the result of the amount of contributions paid and return on contributions invested. The employer has no risk under this type of plan. since it has no legal or implicit obligation to make further contributions, should the plan assets not be sufficient to provide benefit to all employees. Therefore, under this type of plan actuarial and investment risks are borne by the employee.

Defined-benefit plans are present-valued by an external actuary using the unit credit projection method.

This method distributes the cost of benefits uniformly over the employee's working life. Obligations are the present value of average future benefits pro rata to the ratio of years of service to seniority at the time of benefit payment.

The amount recognised as a liability in item 120(a) is the present value of the obligation at the Balance Sheet Date, plus or minus any actuarial gains or losses not recognised in the Accounts under the 'corridor' method, which permits non-recognition of these when they do not exceed 10% of the present value of the obligation and 10% of the fair value of any plan asset, less any pension charges relating to benefits already provided but not recognised, less the fair value at the Balance Sheet Date of plan assets due to settle the obligations directly.

The discount rate used to present-value obligations (whether financed or not) relating to benefits to be provided after retirement varies according to the country where the liabilities are allocated and is determined on the basis of market yield at the Balance Sheet Date of prime issuers' bonds with an average life in keeping with that of the relevant liability.

Other Provisions

Provisions for risks and charges are recognised when:

- The entity has a present obligation (legal or constructive) as a result of a past event;
- It is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation.

If these conditions are not met, no liability is recognised.

The amounts recognised as provisions are the best estimate of the expenditure required to settle the present obligation. The risks and uncertainties that inevitably surround the relevant events and circumstances are taken into account in reaching the best estimate of a provision.

Where the effect of the temporary value of money is material, the amount of a provision should be the present value of the expenditure expected to be required to settle the obligation. The discount rate used is a pre-tax rate that reflects current market assessments of the temporary value of money and the risks specific to the liability.

Provisions are reviewed periodically and adjusted to reflect the current best estimate. If it becomes clear that it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

A provision is used only for expenditures for which the provision was originally recognised.

Allocations made in the year are recognised in profit and loss item 190 "Provisions for risks and charges" and include increases due to the passage of time; they are also net of any re-attributions.

"Other provisions" also include obligations relating to benefits due to agents, specifically supplementary customer portfolio payments, merit payments, contractual payments and payments under non-competition agreements, which are measured as per defined benefit plans; accordingly these obligations are calculated using the unit credit projection method (see above under Retirement Payments and Similar Obligations).

13 - Liabilities, Securities in Issue and Subordinated Loans

Liabilities, securities in issue and subordinated loans are initially recognised at fair value, which is normally the consideration received less transaction costs directly attributable to the financial liability. Subsequently these instruments are measured at amortised cost using the effective interest method.

Hybrid debt instruments relating to equity instruments, foreign exchange, credit instruments or indexes, are treated as structured instruments. The embedded derivative is separated from the host contract and recognised as a derivative, provided that separation requirements are met, and recognised at fair value. Any subsequent changes in fair value are recognised in profit and loss item 80 "Gains (losses) on financial assets and liabilities held for trading".

The difference between the total amount received and the fair value of the embedded derivative is attributed to the host contract.

Instruments convertible into treasury shares imply recognition, at the issuing date, of a financial liability and of the equity part, recognised in item 160 "Equity instruments", if a physical delivery settles the contract.

The equity part is measured at the residual value, i.e., the overall value of the instrument less the separately determined value of a financial liability with no conversion clause and the same cash flow.

The financial liability is recognised at amortised cost using the effective interest method.

Securities in issue are recognized net of repurchased amounts; the difference between the carrying value of the liability and the amount paid to buy it in is taken to profit and loss under item 100.d "Gains (losses) on buy-ins of financial liabilities". Subsequent replacement by the issuer is considered as a new issue and generates no gains or losses.

Group debts do not include covenants (q.v. in the appended Glossary) that would cause default or restructuring events. There are no debt instruments involving convertibility to equity instruments (under IASB IFRIC 19 Extinguishing Financial Liabilities with Equity Instruments, as issued by the IASB but not yet endorsed by the EU).

14 - Financial Liabilities Held for Trading

Financial liabilities held for trading include:

- derivatives that are not recognised as hedging instruments;
- obligations to deliver financial assets sold short;
- financial liabilities issued with an intention to repurchase them in the near term;
- financial liabilities that are part of a portfolio of financial instruments considered as a unit and for which there is evidence of a recent pattern of trading.

A HfT liability, including a derivative, is measured at fair value initially and for the life of the transaction, except for a derivative liability settled by delivery of an unlisted equity instrument whose fair value cannot reliably be measured, which is measured at cost.

15 - Financial Liabilities at Fair Value through Profit and Loss

Financial liabilities, as well as financial assets, could also be designated on initial recognition as measured at fair value, provided that:

- this designation eliminates or considerably reduces a lack of uniformity as between different methods of measurement of assets and liabilities and related gains or losses;
- or
- a group of financial assets, financial liabilities or both are managed and measured at fair value under risk management or investment strategy which is internally documented with the entity's Board of Directors or equivalent body.

These transactions are recognised as per HfT financial liabilities, gains and losses, whether realised or not, being recognised in item 110 "Gains (losses) on financial assets and liabilities at fair value through profit and loss".

16 - Foreign Currency Transactions

A foreign currency transaction is recognised at the spot exchange rate of the transaction date.

Foreign currency monetary assets and liabilities are translated at the closing rate of the period.

Exchange differences arising from settlement of monetary items at rates different from those of the transaction date and unrealised exchange rate differences on foreign currency assets and liabilities not yet settled, other than assets and liabilities designated as measured at fair value and hedging instruments, are recognised in profit and loss item 80 "Gains and losses on financial assets and liabilities held for trading".

Exchange rate differences arising on a monetary item that forms part of an entity's net investment in a foreign operation whose assets are located or managed in a country or currency other than the euro are initially recognised in the entity's equity, and recognised in profit or loss on disposal of the net investment.

Non-monetary assets and liabilities recognised at historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary items that are measured at fair value in a foreign currency are translated at the closing rate. The exchange differences are recognised:

- in profit and loss if the asset is HfT; or
- in revaluation reserves if the asset is AfS.

Hedges of a net investment in a foreign operation are recognised similarly to cash flow hedges:

- the portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised directly in revaluation reserves;
- the ineffective portion is however recognised in profit and loss item 90 "Fair value adjustments in hedge accounting".

The assets and liabilities of fully consolidated foreign entities are translated at the closing exchange rate of each period. Gains and losses are translated at the average exchange rate for the period. Differences arising from the use of spot and weighted average exchange rates and from the remeasurement of a foreign operation's assets at the closing rate of the period are recognised in the revaluation reserves.

Any goodwill arising on the acquisition of a foreign operation whose assets are located or managed in a currency other than the euro, and any fair value adjustments of the carrying amounts of assets and liabilities are treated as assets and liabilities of the foreign operation, expressed in the functional currency of the foreign operation and translated at the closing rate.

On the disposal of a foreign operation, the cumulative amount of the exchange rate differences relating to the foreign operation are recognised in profit or loss when the gain or loss on disposal is recognised.

All exchange differences recorded under revaluation reserves in shareholders' equity are also reported in the Statement of Comprehensive Income.

17 - Insurance Assets and Liabilities

IFRS 4 defines an insurance contract as a contract under which one party (the insurer) accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder.

These policies are recognised briefly as follows:

- in profit and loss item 160 "Other income (net) from insurance activities": gross premium including all amounts due during the year under insurance contracts, net of cancellations. Premium transferred to reinsurers during the year is also recognised in this item;
- in the liability item 130 "Insurance reserves": contractual obligations to policyholders, calculated analytically contract by contract using the prospective method, on the basis of demographic and financial projections currently used by the market;
- in the asset item 110 "Insurance reserves attributable to reinsurers": reinsurers' liabilities.

18 - Other Information

Business Combinations

A business combination is the bringing together of separate entities or businesses into one reporting entity.

A business combination may result in a Parent-subsidary relationship in which the acquirer is the Parent and the acquiree a subsidiary of the acquirer.

A business combination may involve the purchase of the net assets, including any goodwill, of another entity rather than the purchase of the equity of the other entity (mergers).

IFRS 3 requires that all business combinations shall be accounted for by applying the purchase method, that involves the following steps:

- identifying an acquirer;
 - measuring the cost of the business combination;
- and
- allocating, at the acquisition date, the cost of the business combination to the assets acquired and liabilities and contingent liabilities assumed.

The cost of a business combination is the aggregate of the fair value, at the date of exchange, of assets given, liabilities incurred or assumed and equity instruments issued by the acquirer, in exchange for control of the acquiree, plus any costs directly attributable to the business combination.

The acquisition date is the date on which the acquirer effectively obtains control of the acquiree. When this is achieved through a single exchange transaction, the date of exchange coincides with the acquisition date.

However, a business combination may involve more than one exchange transaction, for example when it is achieved in stages by successive share purchases. When this occurs:

- the cost of the combination is the aggregate cost of the individual transactions; and
- the date of exchange is the date of each exchange transaction (i.e. the date that each individual investment is recognised in the financial statements of the acquirer), whereas the acquisition date is the date on which the acquirer obtains control of the acquiree.

The acquirer shall, at the acquisition date, allocate the cost of a business combination by recognising the acquiree's identifiable assets, liabilities and contingent liabilities that satisfy the recognition criteria.

The acquirer shall recognise the acquiree's identifiable assets, liabilities and contingent liabilities separately at the acquisition date only if they satisfy the following criteria at that date:

- in the case of an asset other than an intangible asset, it is probable that any associated future economic benefits will flow to the acquirer, and its fair value can be measured reliably;
- in the case of a liability other than a contingent liability, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and its fair value can be measured reliably;
- in the case of an intangible asset or a contingent liability, its fair value can be measured reliably.

Positive difference between the cost of the business combination and the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities so recognised is accounted for as goodwill.

After initial recognition, goodwill is measured at cost and tested for impairment at least annually.

If the acquirer's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities exceeds the cost of the business combination, the acquirer shall reassess the fair values and recognise immediately any excess remaining after that reassessment in profit or loss.

Derecognition

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's balance sheet.

Before evaluating whether, and to what extent, derecognition is appropriate, under IAS 39 an entity should determine whether the relevant conditions apply to a financial asset in its entirety or to a part of a financial asset. The standard is applied to a part of financial assets being transferred if, and only if, the part being considered for derecognition meets one of the following conditions:

- the part comprises only specifically identified cash flows from a financial asset (or a group of assets), e.g. interest cash flows from an asset;
- the part comprises a clearly identified percentage of the cash flows from a financial asset, e.g., a 90 per cent share of all cash flows from an asset;
- the part comprises only a fully proportionate (pro rata) share of specifically identified cash flow, e.g. 90 per cent share of interest cash flows from an asset.

In all other cases, the standard is applied to the financial asset in its entirety (or to the group of similar financial assets in their entirety).

An entity shall derecognise a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the contractual rights to receive the cash flows of the financial asset to a non-Group counterparty.

Rights to cash flow are considered to be transferred even if contractual rights to receive the asset's cash flow are retained but there is an obligation to pay this cash flow to one or more entities and all the following conditions are fulfilled (pass-through agreement):

- there is no obligation on the Group to pay amounts not received from the original asset;
- sale or pledge of the original asset is not allowed, unless it secures the obligation to pay cash flow;
- the Group is obliged to transfer forthwith all cash flows received and may not invest them, except for liquidity invested for the short period between the date of receipt and that of payment, provided that the interest accrued in that period is paid on.

Recognition is also subject to verification of effective transfer of all the risks and rewards of ownership of the financial asset (true sale). If the entity transfers substantially all the risks and rewards of ownership of the financial asset, the entity shall derecognise the asset (or group of assets) and recognise separately as assets or liabilities any rights and obligations created or retained in the transfer.

Conversely, if the entity substantially retains all the risks and rewards of ownership of the asset (or group of assets), the entity shall continue to recognise the transferred asset(s). In this case it is necessary to recognise a liability corresponding to the amount received under the transfer and subsequently recognise all income accruing on the asset or expense accruing on the liability.

The main transactions that do not allow, under the above rules, total derecognition of a financial asset are securitisations, repurchase transactions (buy-ins) and stock lending.

In the case of securitisations the Group does not derecognise the financial asset on purchase of the equity tranche or provision of other forms of support of the structure which result in the Group retaining the credit risk of the securitised portfolio.

In the case of repurchase transactions and stock lending, the assets transacted are not derecognised since the terms of the transaction entail the retention of all their risks and rewards.

Treasury Shares

Changes in treasury shares are reported as a direct contra item to shareholders' equity, i.e. as a reduction to the latter in the amount of any purchases, and as an increase in the amount of any sales.

If, that is, treasury shares are subsequently sold, the difference between the sale price of treasury shares and the related post-tax repurchase cost is also recognized directly as a contra item to shareholders' equity.

Finance Leases

Finance leases effectively transfer all the risks and benefits of ownership of an asset to the lessee. Ownership of the asset is transferred to the lessee, however not necessarily at contract maturity.

The lessee acquires the economic benefit of the use of the leased asset for most of its useful life, in exchange for a commitment to pay an amount approximately equivalent to the fair value of the asset and related finance costs. Recognition in the lessor's accounts is as follows:

- in assets, the value of the loan, less the principal of lease payments due and paid by the lessee;
- in profit or loss, interest received.

See Sections 8 – Property, Plant and Equipment and 9 - Intangible Assets below for treatment of the lessee's assets.

Factoring

Loans acquired in factoring transactions with recourse are recognised to the extent of the advances granted to customers on their consideration. Loans acquired without recourse are recognised as such once it has been established that there are no contractual clauses that would invalidate the transfer of all risks and benefits to the factor.

Repo Transactions

Securities received in a transaction that entails a contractual obligation to sell them at a later date or delivered under a contractual obligation to repurchase are neither recognised nor derecognised. In respect of securities purchased under an agreement to resell, the consideration is recognised as a loan to customers or banks, or as an asset held for trading. In respect of securities held in a repurchase agreement, the liability is recognised as due to banks or customers, or as a HfT financial liability. Revenue from these loans, being the coupons accrued on the securities and the difference between the sale/purchase and resale/repurchase prices, is recognised in profit or loss through interest income and expenses on an accruals basis.

These transactions can only be offset if, and only if, they are carried out with the same counterparty and provided that such offset is provided for in the underlying contracts.

Italian Staff Severance Pay (Trattamento di fine rapporto – “TFR”)

The “TFR” provision for Italy-based employee benefits is to be construed as a “post-retirement defined benefit”. It is therefore recognised on the basis of an actuarial estimate of the amount of benefit accrued by employees discounted to present value. This benefit is calculated by an external actuary using the unit credit projection method (see Section 12 under Retirement Payments and Similar Obligations).

Following pension reform by Law December 5, 2005 n.252/2005, TFR installments accrued to 12.31.2006 stay in the employer and are considered a post-employment defined benefit plan therefore incurring actuarial valuation, though with simplified actuarial assumptions, i.e., forecast future pay rises are not considered.

TFR installments accrued since 01.01.2007 (date of Law 252's coming into effect) are, at the employee's discretion, either paid into a pension fund or left in the company and (where the company has in excess of 50 employees) paid into an INPS Treasury fund by the employer, and are considered a defined-contribution plan.

Costs relating to TFR accruing in the year are taken to income statement item 180.a) "Payroll" and include interest accrued in the year (interest cost) on the obligation already existing at the date of the reform and the accrued installments for the year paid into the complementary pension scheme or to the Treasury fund of INPS.

Actuarial gains (losses), i.e., the difference between the liabilities' carrying value and the present value of the obligation at the end of the period are recognised according to the 'corridor' method, i.e., only when they exceed 10% of the present value of the obligation at the period-end. Any surplus is taken to the income statement and amortized over the residual working life of the employees who are members of the plan, as from the following financial year.

Share-Based Payment

Equity-settled payments made to employees in consideration of services rendered, using equity instruments comprise:

- Stock options
- Performance shares (i.e. awarded on attainment of certain objectives)
- Restricted shares (i.e. subject to a lock-up period).

Considering the difficulty of reliably measuring the fair value of the services acquired against equity-settled payments, reference is made to the fair value of the instruments themselves, measured at the date of the allocation.

This fair value is recognised as cost in profit and loss item 180 "Administrative costs" offsetting the liability item 170 "Reserves", on an accruals basis over the period in which the services are acquired.

The fair value of a cash-settled share-based payment, the services acquired and the liability incurred are measured at the fair value of the liability, recognised in item 100 "Other liabilities". The fair value of the liability, as long as it remains unsettled, is remeasured at each balance sheet date and all changes in fair value are recognised in profit and loss item 180 "Administrative costs".

Other Long-term Employee Benefits

Long-term employee benefits – e.g. long-service bonuses, paid on reaching a predefined number of years' service – are recognised in item 100 "Other liabilities" on the basis of the measurement at the Balance Sheet Date of the liability, also in this case determined by an external actuary using the unit credit projection method (see Section 12 – Provisions for risks and charges – retirement payments and similar obligations). Gains (losses) on this type of benefit are recognised at once through profit or loss, without using the 'corridor' method.

Guarantees and Credit Derivatives in the Same Class

On first recognition guarantees given are recognized at fair value, which usually corresponds to the amount received when the guarantee is issued.

Guarantees and credit derivatives in the same class measured under IAS 39 (i.e. contracts under which the issuer makes pre-established payments in order to compensate the guaranteed party or buyer of protection for losses sustained due to default by a debtor on the maturity of a debt instrument) are initially and subsequently (on remeasurement following impairment losses) recognised in item 100 "Other liabilities".

After initial recognition, guarantees given are recognized at the greater of the initially recognized value, net of any amortized portion, and the estimated amount required to meet the obligation.

The effects of valuation, related to any impairment of the underlying, are recognized in the same balance-sheet item contra item 130.d "Write-downs and write-backs due to impairment of other financial transactions" in the income statement.

INCOME STATEMENT

Interest Income and Expense

Interest income and expense and similar income and expense items relate to liquid assets, as well as financial instruments of a monetary nature (held for trading, measured at fair value through profit or loss or available for sale), HtM financial assets, loans and receivables, deposits, and securities in issue.

Interest income and expense are recognised through profit or loss with respect to all instruments measured at amortised cost, using the effective interest method.

Interest also includes the net credit or debit balance of differentials and margins on financial derivatives:

- hedging interest-bearing assets and liabilities;
- HfT but linked for business purposes to assets and liabilities designated as measured at fair value (fair value option);
- linked for business purposes to HfT assets and liabilities paying differentials or margins on several maturities.

Fees and Commissions

Fees and commissions are recognised on an accruals basis.

Securities trading commission is recognised at the time the service is rendered. Investment portfolio management fees, advisory fees and investment fund management fees are recognised on a pro-rata temporis basis.

Fees included in amortised cost used to calculate effective interest rates are not included under fees and commissions, since they are part of the effective interest rate.

Dividends

Dividends are recognised in profit or loss in the financial year in which their distribution has been approved.

Relevant IFRS definitions

The main definitions introduced by IFRS are described below, other than those dealt with in previous sections.

Amortised cost

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

The effective interest method is a method of allocating the interest income or interest expense over the life of a financial asset or liability. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the net carrying amount of the financial asset or financial liability. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts.

Commissions forming an integral part of the effective interest rate include loan drawdown fees or underwriting fees relating to a financial asset not designated at fair value, e.g., fees received as compensation for the assessment of the issuer's or borrower's financial situation, for valuation and registration of security, and generally for the completion of the transaction (management fees).

Transaction costs include fees and commissions paid to agents (including employees acting as selling agents), advisers, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs.

Impairment of financial assets

At each balance sheet date an entity assesses whether there is any objective evidence that a financial asset or group of financial assets is impaired.

A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

It may not be possible to identify a single, discrete event that caused the impairment. Rather the combined effect of several events may have caused the impairment.

Losses expected as a result of future events, no matter how likely, are not recognised.

Objective evidence that a financial asset or group of assets is impaired includes observable data that comes to our attention about the following loss events:

- significant financial difficulty of the issuer or obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- the lender, for economic or legal reasons relating to the borrower's financial difficulty, granting a concession to the borrower which the lender would not otherwise consider;
- it becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- the disappearance of an active market for that financial asset because of financial difficulties; however, the disappearance of an active market due to the fact that a company's financial instruments are no longer traded publicly is no evidence of impairment; or
- observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group, including:
 - adverse changes in the payment status of borrowers in the group; or
 - national or local economic conditions that correlate with defaults on the assets in the group.

Objective evidence of impairment for an investment in an equity instrument includes information about significant changes with an adverse effect that have taken place in the technological, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment may not be recovered. A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost is also objective evidence of impairment.

If there is objective evidence that an impairment loss on loans and receivables or held-to-maturity investments carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset shall be reduced either directly or through use of an allowance account. The amount of the loss is recognised in profit and loss item 130 "Impairment losses" and the asset's carrying value is reduced.

If the terms of a loan, receivable or held-to-maturity investment are renegotiated or otherwise modified because of financial difficulties of the borrower or issuer, impairment is measured using the original effective interest rate before the modification of terms. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial. If a loan, receivable or held-to-maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

A reduction in the fair value of a financial asset below its cost or amortised cost is not necessarily an indication of impairment (e.g. reduction in the fair value of an investment in a debt instrument resulting from an increase in the riskfree interest rate).

Objective evidence of impairment is initially assessed individually; however, if it is determined that there is no objective evidence of individual impairment, the asset is included in a group of financial assets with similar credit risk characteristics and assessed collectively.

Formula-based approaches and statistical methods may be used to assess impairment losses on a group of financial assets. Models used incorporate the time value of money, and consider cash flows over the entire residual life of the asset (not just the following year) and do not give rise to an impairment loss on initial recognition of a financial asset. They take into account losses already sustained but not manifest in the group of financial assets at the time of measurement, on the basis of past experience of losses on assets having a similar credit risk to the group of assets being measured..

The process of estimating impairment losses considers all credit exposures, not only those of low credit quality, which reflect a serious impairment.

Reversals of impairment losses

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed and the amount of the reversal is recognised in profit and loss item 130 "Impairment losses" except in the case of AfS equity instruments (see Section 2 above).

The reversal shall not result – at the date the impairment is reversed – in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised.

A.3 – Information on fair value

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The fair value of a financial liability with a demand feature (e.g. a demand deposit) is not less than the amount payable on demand, discounted from the first date that the amount could be required to be paid.

For financial instruments listed in active markets, fair value is determined on the basis of official prices in the most advantageous market to which the Group has access (Mark to Market).

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from a pricing service, dealer, broker, agency that determines prices or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. If a published price quotation in an active market does not exist for a financial instrument in its entirety, but active markets exist for its component parts, fair value is determined on the basis of the relevant market prices for the component parts.

If market quotations are not available, the Group uses valuation models (Mark to Model) in keeping with generally accepted methods used by the market. Valuation models include techniques based on the discounting of future cash flows and on volatility estimates, and they are subject to revision both during their development and periodically in order to ensure they remain valid over time.

These methods use inputs based on prices set in recent transactions for the instrument being valued and/or prices/quotations for instruments having similar characteristics in terms of risk profile.

In fact, these prices/quotations are relevant for determining significant parameters in terms of the credit risk, liquidity risk and price risk of the instrument being valued.

Reference to these "market" parameters makes it possible to limit the discretionary nature of the valuation, and ensures that the resulting fair value can be verified.

If, for one or more risk factors it is not possible to refer to market data, the valuation models employed use estimates based on historical data as inputs.

As a further guarantee of the objectivity of valuations derived from valuation models, the Group employs:

- independent price verifications (IPVs);
- fair value adjustments (FVAs).

Independent price verification requires that the prices for trading positions be verified monthly by Risk Management units that are independent from the units that assume the risk exposure.

This verification calls for comparing and adjusting the daily price in line with valuations obtained from independent market participants.

For instruments not quoted in active markets, the above verification process uses prices contributed by infoproviders as a reference, and assigns a greater weighting to those prices that are considered representative of the instrument being valued.

This valuation includes the "executability" of the transaction at the price observed, the number of contributors, the degree of similarity of the financial instruments, the consistency of prices from different sources, and the process followed by the infoproducer to obtain the information.

Independent price verification is supplemented by the calculation of further regulatory fair-value adjustments, which are also recognized for accounting purposes, to take into account risks associated with both the limited liquidity of the positions and the valuation models used.

A.3.1 Transfers between Portfolios

In Regulation No. 1004 of October 15, 2008, the European Commission transposed the changes to IAS 39 and IFRS 7 "Reclassification of financial assets" approved by the IASB. These changes, which apply retroactively starting July 1, 2008, make it possible to reclassify certain financial assets, after their initial recognition, out of the HfT and AfS portfolios.

In particular, the following may be reclassified:

- those HfT or AfS financial assets that would have satisfied the definition specified by international accounting standards for the loan portfolio (if such assets were not classified as HfT or AfS respectively on initial recognition) if the entity intends, and is able, to hold them for the foreseeable future or until maturity;
- "only in rare circumstances" those HfT financial assets, which, at the time of their recording, did not satisfy the definition of loans.

The following tables (which are broken down by type of underlying asset and portfolio) provide the book value and fair value as at December 31, 2009 of assets which had been reclassified in H2 2008 and H1 2009.

The income/expenses that would have been recognized if such reclassifications had not occurred, as well as those effectively recognized through profit or loss or at equity are also provided.

These income/expenses before taxes are broken down into two categories: those arising "from measurement" (including any write-downs) and "other" (including interest and gains/losses on the disposal of the transferred assets).

As a result the overall impact before taxes that would have been recognized in the income statement as of December 31, 2009, if these assets had not been reclassified, would have been a gain of €1,574,604 thousand, while the impact actually recognized was a gain of €580,550 thousand.

			Total	20,144,812	18,803,321	1,054,156	520,448	(64,840)	645,390

Debt securities reclassified in the loan with customers portfolio include structured credit products (other than derivative contracts and financial instruments with incorporated derivatives) for an amount of €7,412,829 thousand at December 31, 2009.

Additionally, in respect of assets reclassified in H1 2009, mainly including Covered Bonds, *Pfandbriefe* and to a lesser extent debt securities issued by public entities, for a total carrying amount of €7,743,979 thousand at end of 2009, the following table shows capital gains/losses before tax, recognized respectively in the profit and loss account and in shareholders' equity of 2009 and 2008 up to the date of transfer.

A.3.1.3. Transfer of financial assets held for trading

In application of the provisions of Article 2 of referenced EC Regulation 1004/2008, pursuant to which "the current financial crisis is considered to be such a rare circumstance which would justify the use of this possibility [reclassification] by companies" during the second half of 2008 and first half of 2009, the Group reclassified HfT financial assets consisting of structured credit products (other than derivatives) and other debt securities issued by governments, public entities, companies and financial institutions and covered bonds and *Pfandbriefe* other than derivative contracts and financial instruments containing embedded derivatives, for a total book value of €19,375,786 thousand as at December 31, 2009.

A.3.1.4. Effective interest rate and cash flows expected from reclassified assets

At the reclassification date, cash flows expected until their maturity from assets reclassified during 2009 totalled €9,605,840 thousand, with an average implicit effective interest rate of 2.4%

A.3.2 Fair Value Hierarchy

IFRS 7 calls for classifying instruments being measured at fair value as a function of the ability to observe the inputs used for pricing.

To be specific, three levels are specified:

- Level 1: the fair value of instruments classified in this level is determined based on quotation prices observed in active markets;
- Level 2: the fair value of instruments classified in this level is determined based on valuation models that use inputs that can be observed in the market;
- Level 3: the fair value of instruments classified in this level is determined based on valuation models that primarily use inputs that cannot be observed in the market;

The following tables show a breakdown of financial assets and liabilities designated at fair value according to the above-mentioned levels, as well as the annual changes of Level 3 assets or liabilities.

A.3.2.1 Accounting portfolios - breakdown by fair value levels (€'000)						
Financial Assets/Liabilities measured at fair value	Amounts as at 12.31.2009			Amounts as at 12.31.2008		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
1. Financial assets held for Trading	40,685,267	90,037,265	3,171,569	67,222,293	131,073,654	6,593,941
2. Financial assets at fair value through P&L	8,883,431	5,594,560	541,694	11,745,499	3,599,998	290,325
3. Available for sale financial assets	20,598,846	9,065,775	5,059,334	20,019,643	2,911,723	5,768,924
4. Hedging derivative assets	196,252	11,464,852	1,006	18,044	7,032,656	115
Total	70,363,796	116,162,452	8,773,603	99,005,479	144,618,031	12,653,305
1. Financial liabilities held for Trading	14,813,614	96,632,056	2,599,545	29,757,976	127,595,172	7,982,030
2. Financial liabilities at fair value through P&L	-	1,560,578	51,897	162,036	1,434,087	63,021
3. Hedging derivative liabilities	49,661	9,859,787	9,499	1,453,972	6,289,927	7,371
Total	14,863,275	108,052,421	2,660,941	31,373,984	135,319,186	8,052,422

All three fair-value levels show a fall in the stock at end 2009 from end 2008, greatest in percentage terms in level 3 assets and liabilities.

3.5 Other decreases	93,963	-	6,234	
4. Closing balances	2,599,545	51,897	9,499	

The non-observable market parameters used for the valuation of Level 3 instruments (already subject to FVA to price the estimate limits) are:

- (i) determination of the credit standing of the issuer or the underlying portfolios for ABS-type exposures
- (ii) the assumptions (distribution of cashflow, sum of parts) contained in the models used to measure equities and UCITS
- (iii) volatility, correlation and credit spread parameters used to measure certain types of structured derivatives.

Sensitivity to a simultaneous variation of 1% of the above risk factors is less than 2% of the carrying value of Level 3 assets and mainly refers to parameters used to assess credit standing.

A.3.3 Day One Profit/Loss

The value at which financial instruments are recognized is equal to their fair value on the same date.

The fair value of financial instruments, other than those designated at fair value through profit or loss, at their recognition date is usually assumed to be equal to the amount collected or paid.

For financial instruments held for trading (see sections 1 and 14 of Part A.2 above) and instruments designated at fair value (see sections 5 and 15 of Part A.2 above), any difference from the amount collected or paid is posted under the appropriate items of the income statement.

The use of conservative valuation models, the processes described above for revising the models used and related parameters and value adjustments to reflect model risk ensure that the amount recognized in the income statement is not derived from the use of valuation parameters that cannot be observed.

More specifically, the calculation of value adjustments to reflect model risk ensures that the fair value portion of these instruments relating to the use of subjective parameters is not recognized in the profit and loss account, but changes the balance sheet value of these instruments.

Recognition of this portion in the profit and loss account is then made only when objective parameters are applied and therefore the adjustments are derecognized.

The balance of value adjustments to reflect model risk changed from €48,559 thousand at December 31, 2008 to €144,674 thousand at December 31, 2009.

Part B) Consolidated Balance Sheet

Section 16 – Minorities – Item 210	261
Other information	262

Part B – Consolidated Balance Sheet

On November 18, 2009 the Bank of Italy issued its first amendment to its Circular 262/2005, which modified some reporting schedules and therefore led to the reclassification of some 2008 amounts. For further information please see Part A – Accounting Principles.

Assets

Section 1 – Cash and cash balances – Item 10

The item **10 – Cash and cash balances** showed a decrease in sub-item **a) Cash** (-€794m) and a strong increase in sub-item **b) Demand deposits with Central banks** (€5,128m, of which €5,000m attributable to the Parent Company).

1.1 Cash and cash balances: breakdown		(€'000)	
	Amounts as at		
	12.31.2009	12.31.2008	
a) Cash	4,007,990	4,801,849	
b) Demand deposits with Central banks	7,978,807	2,850,597	
Total	11,986,797	7,652,446	

Section 2 – Financial assets held for trading – Item 20

Financial assets held for trading, following changes in IAS 39 and IFRS7 were reclassified in the second half of 2008 and in the first six months of 2009; the amount of assets reclassified is €19,376 million at December 31, 2009.

In particular, these assets were reclassified in the following items:

- 40 Available for sale financial assets €118 million;
- 50 Held-to-maturity investments €196 million;
- 60 Loans and receivables with banks €8,088 million;
- 70 Loans and receivables with customers €10,974 million.

Financial assets held for trading totaled €133,894m, which translates into a 34.7% reduction (or € 70,996m) over 2008.

In **average terms**¹, this item amounted to €166,299m in 2009 and €189,451m in 2008.

The average yield of these assets was 1.12% in 2009, down by 1.29% over the 2.40% recorded in 2008.

Financial liabilities held for trading decreased from €165,335m at end 2008 to €114,045m at December 31, 2009.

In **average terms**, this item amounted to €143,321m in 2009 and €127,165m in 2008.

The average cost of these assets was 0.95% in 2009, down by 0.07% over the 1.02% recorded in 2008.

¹ The average balances and related ratios (yield/costs) were calculated by considering the assets/liabilities balances at the end of each quarter in 2009 and at end 2008.

Financial Assets Held for Trading		(€ million)		
	Amounts as at		Change	
	12.31.2009	12.31.2008	Amount	%
Financial Assets Held for Trading	133,894	204,890	(70,996)	-34.7%
Financial Liabilities Held for Trading	(114,045)	(165,335)	51,290	-31.0%
Change	19,849	39,555	(19,706)	-49.8%

The €70,996m decrease in item 20 can be broken down as follows (as shown in table 2.2 Financial assets held for trading: breakdown by issuer/borrower or in table 2.3 Annual changes of financial assets (non derivatives):

- Financial assets (non-derivatives) down by €25,544m, from €84,352m in 2008 to €58,808 in 2009;
- Derivative instruments down by €45,451m, from €120,537m in 2008 to €75,086 in 2009.

In respect of **financial assets (non-derivatives)** the €25,544m decrease is attributable to:

- A €22,939m reduction in Debt Securities, also attributable to the reclassification of financial assets;
- A €4,448m decrease in loans (of which €4,930m million concerning banks)

Offset by:

- Units in investment funds by €16m;
- Equity instruments by €1,827m.

The **derivatives item** decrease by €45,451m was mainly due to the fluctuations in market prices (e.g. interest rates, exchange rates, share prices, etc.) especially in Q2 2009.

In details, the changes were attributable to:

- Banks for €38,464 million;
- Customers for €6,987 million.

- fair value	21,620,020	28,607,474
Total B	75,086,312	120,537,640
Total (A+B)	133,894,101	204,889,888

2.3 Financial assets held for trading: annual changes (€'000)

	Changes in 2009				
	Debt securities	Equity securities	Units in investment funds	Loans	Total
A. Opening balance	63,114,974	4,828,399	2,561,564	13,847,311	84,352,248
B. Increases	259,053,195	29,443,750	1,523,587	443,994,199	734,014,731
B.1 Purchases	254,508,237	27,106,389	309,713	443,036,401	724,960,740
B.2 Positive changes in fair value	3,104,745	1,985,425	365,443	206,769	5,662,382
B.3 Other changes	1,440,213	351,936	848,431	751,029	3,391,609
C. Decreases	281,991,889	27,617,200	1,508,017	448,442,084	759,559,190
C.1 Sales	259,902,675	27,256,480	1,434,807	1,286,438	289,880,400
C.2 Redemptions	9,723,393	46,113	21,044	445,920,114	455,710,664
C.3 Negative changes in fair value	749,543	46,179	8,353	322,103	1,126,178
C.4 Transfers to other portfolios	9,436,854	-	-	-	9,436,854
C.5 Other changes	2,179,424	268,428	43,813	913,429	3,405,094
D. Closing balance	40,176,280	6,654,949	2,577,134	9,399,426	58,807,789

Item C.4 "Transfers to other portfolios" shows the carrying amount of financial assets transferred to the portfolios "Loans and receivables" and "Financial assets available for sale" at the date of their reclassification.

The other increases in UCITS (investment funds) were due to first-time consolidation of subsidiaries in 2009. Other increases and reductions in debt securities were due to the same effect.

Section 3 – Financial assets at fair value through profit or loss – Item 30

As at December 31, 2009 **Financial assets at fair value** showed a slight decrease (down by €616m) to €15,020m, from the €15,636m at end 2008.

The classification of investments into this portfolio is made to reduce the accounting mismatch connected to financial instruments measured (with changes in fair value) in the income statement in order to manage the risk profile.

3.1 Financial assets at fair value through profit or loss: product breakdown							(€'000)
Items/Values	Amounts as at			Amounts as at

Section 4 – Available for sale financial assets – Item 40

Available for sale financial assets amounted to €34,724m, up by 21% over December 31, 2008. The sub-item Debt securities, which accounted for 86% of AFS financial assets, increased by €7,541m from €22,231m to €29,772m.

In **average terms**², this item amounted to €31,127m in 2009 and €32,545m in 2008.

The average yield of these assets was 2.15% in 2009, down by 0.07% over the 2.22% recorded in 2008.

4.1 Available-for-sale financial assets: product breakdown (€ '000)						
Items/Values	Amounts as at			Amounts as at		
	12.31.2009			12.31.2008		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
1. Debt securities	18,869,126	8,394,258	2,508,679	18,006,907	1,429,345	2,795,069

D. Closing balance	29,772,063	3,221,192	1,635,505	95,195	34,723,955	

Item B.4 "Transfers to other portfolios" includes the reclassification of financial assets held for trading.

Item C.5 "Transfers to other portfolios" includes also the reclassification of financial assets transferred to the "Loans and receivables" portfolio.

Other reductions in equity instruments and increases in UCITS (investment funds) were mainly due to the reclassification of private equity funds.

Section 5 – Held-to-maturity investments – Item 50

Held-to-maturity investments decreased from €16,882m in 2008 to €10,662m in 2009, i.e. by €6,220m, of which €2,625 attributable to the repayment of debt securities held by UniCredit S.p.A. due to the end of the loan contract.

5.1 Held-to-maturity investments: product breakdown (€'000)

	Amounts as at				Amounts as at			
	12.31.2009				12.31.2008

Section 6 – Loans and receivables with banks – Item 60

As at December 31, 2009 **Loans and receivables with banks** include financial assets reclassified following the amendments of IAS 39 and IFRS 7 issued in October 2008 for a total carrying amount of €8,399m at December 31, 2009 and mainly consisting of Other debt instruments including Covered Bonds and *Pfandbriefe*).

These assets were reclassified from items 20 Financial assets held for trading (of which €7,377m debt securities and €711m loans) and 40 Available-for-sale financial assets (€311 million debt securities).

Loans and receivables with banks amounted to €78,269m, down by €2,558m.

In **average terms**³, the item loan to banks amounted to €88,211m in 2009 and €107,446m in 2008.

The average yield of these assets was 1.78%, down by 5.42% over the 7.20% recorded in 2008.

Deposits from banks decreased from €177,677m at end 2008 to €106,800m at December 31, 2009.

In **average terms**, the item deposits from banks amounted to €143,191m in 2009 and €176,336m in 2008.

The average cost was 1.55% in 2009, down by 3.80% over the 5.35% recorded in 2008.

Loans to banks / deposits from banks					(€ million)
	Amounts as at		Change		
	12.31.2009	12.31.2008	Amount	%	
Loans to to banks	78,269	80,827	(2,558)	-3.2%	
Deposits from banks	(106,800)	(177,677)	70,877	-39.9%	
Change (negative balance)	(28,531)	(96,850)	68,319	-70.5%	

The **net inter-bank position** (negative balance) amounted to €28,531m at December 31, 2009 and significantly reduced by €68,319m since the beginning of the year, due to disposals in financial portfolios and to the reduction of loans with customers.

The decrease in **Loans and receivables with banks** (€2,558m) was attributable to:

- A reduction in **Loans to Central Banks** by €6,133m (of which €4,575m due to Compulsory reserves);
- which was offset by an increase in **Loans to Banks** by €3,576m also attributable to financial assets reclassified

³ The average balances and related ratios (yield/costs) were calculated by considering the assets/liabilities balances at the end of each quarter in 2009 and at end 2008. Loans to banks and loans to customers include total impairment losses.

Section 7 – Loans and receivables with customers – Item 70

As at December 31, 2009 **Loans and receivables with customers** include financial assets reclassified following the amendments of IAS 39 and IFRS 7 issued in October 2008 for a total carrying amount of €11,432m at December 31, 2009 and mainly consisting of non-derivative asset-backed securities and government, public sector, corporate and financial institutions' bonds.

These assets were reclassified from item 20 "Financial assets held for trading" for a carrying value of €10,974m (of which €10,094m debt securities and €880m loans) and from item 40 Available-for-sale financial assets (€458m debt securities).

Loans and receivables with customers amounted to €564,986m, down by €47,494m (or 7.8%) over 2008.

In **average terms**⁴, this item amounted to €616,539m in 2009 and €637,541m in 2008.

The average yield of these assets was 4.35%, down by 1.72% over the 6.05% recorded in 2008.

As shown in the following table and in table 7.2 Breakdown by debtors/issuers, the €47,494m reduction was mainly attributable to loans to other counterparties (non-financial companies), which decreased from €355,506m (of which €13,394m were impaired loans) at end December 2008 to €312,143m (of which €22,639 were impaired loans) at end 2009.

The following table shows the amounts of performing loans, impaired loans, total loans in 2008 and 2009, as well as the related changes in value.

⁴ The average balances and related ratios (yield/costs) were calculated by considering the assets/liabilities balances at the end of each quarter in 2009 and at end 2008. In particular, loans to customers include non-current assets and disposal groups classified as held for sale, assets sold but not derecognized, as well as the total impairment losses.

The following table shows the percentage of impaired loans on total loans to customers broken down by asset type.

Loans and receivables with customers: impaired loans as a percentage of total loans (€ million)				
Type of transactions/Values	Amounts as at 12.31.2009			Impaired loans to total loans
	Performing	Impaired	Total

8.1 Structured securities	3,946,322	3,682	400,267	11,221
8.2 Other debt securities	11,022,088	198,174	16,194,269	95,306
Total (carrying amount)	533,936,857	31,049,158	592,652,328	19,828,085
Total (Fair value)	545,159,619	31,049,158	596,082,731	19,828,085

The €4,313m increase in item 6. Factoring is almost entirely attributable to advances to sellers, pursuant to new Banca d'Italia regulations concerning financial intermediaries' accounts (Italian Consolidated Banking Act, Section 107) and further clarification received. As at December 2008 these items had been recognized under item 1. Current Accounts (in the amount of €3,872m).

The sub-item 7. Other transactions includes:

- €24,754m for advances to ordinary customers;
- €27,316m for pooled transactions;
- €66,907m for other non-current account loans

Sub-items 7. "Other transactions" and 8.2 "Other Debt Securities" include €623m and €421m respectively arising from the "Trevi Finance", "Trevi Finance 2" and "Trevi Finance 3" securitization transactions, in respect of which the underlying assets were not re-recognized in the accounts, since the transactions were performed before January 1, 2002. An Italian Government bond partly guarantees the securities of item 8.2 for €170m.

The assets underlying these securitization transactions are non-performing loans, whose carrying amount was €1,005m at December 31, 2009, as against a face value of €4,578m.

7.2 Loans and receivables with customers: breakdown by issuer/borrower (€'000)

Notes to the table 10.1 - Equity investments in joint ventures (valued at equity) and in companies under significant influence:

(1) Type of relationship:

- 1: majority of voting rights at the ordinary shareholders' meeting;
- 2: dominant influence at the ordinary shareholders' meeting;
- 3: agreements with other shareholders;
- 4: other types of control;
- 5: centralized management pursuant to Legislative Decree 87/92, Section 26 para. 1;
- 6: centralized management pursuant to Legislative Decree 87/92, Section 26 para. 2;
- 7: joint control
- 8: associates

(2) Voting rights available at the general meeting. Voting rights are disclosed only if different from the percentage of ownership

(3) According to shareholders' agreements, the "control" of Credit Ras Assicurazioni and Credit Ras Vita is assigned to the other shareholder. As regards other companies, control is not contractually assigned to any shareholder (financial and strategic management decisions are not subject to shareholders' unanimity). Therefore the conditions defined by IAS 31, § 3 for common control are not satisfied.

(4) Subsidiaries See table 10.2 for accounting information.

(5) Consolidated following SIC.12

See "Part A – Accounting Policies. Section 3 – Consolidation procedures and scope" for a description of the criteria for determining the consolidation scope and methods, as well as for an indication of the reasons why a company is subject to joint control or significant influence.

The number of companies valued at equity rose from 39 at end 2008 to 42 at end 2009, which was the result of the following:

New companies valued at equity:

NAME	Main Office
AIRPLUS AIR TRAVEL CARD VERTRIEBSGESELLSCHAFT M.B.H.	WIEN
MOLL HOLDING GESELLSCHAFT MBH	MUNICH
PAYLIFE BANK GMBH	WIEN
RAMIUS LLC (ora RCG HOLDINGS LLC)	NEW YORK
TORRE SGR S.P.A.	ROME

Companies which are not valued at equity any more:

NAME	Main Office
CARICESE SRL (ex CONSORZIO CARICESE)	BOLOGNA
RAMIUS FUND OF FUNDS GROUP LLC	NEW YORK

INVESTMENTS VALUED AT COST	431,905
N.189 - UniCredit Bank AG Subsidiaries and Associates (HVB)	92,238
N. 87 - UniCredit Bank Austria AG Subsidiaries and Associates	176,431
N. 31 - Other Subsidiaries and Associates	163,236
TOTAL	3,866,437

Notes to the table 10.2 - Equity investments in companies under joint control and in companies under significant influence:

1. Includes "positive differences in net equity".
2. Under IFRS, investments in associates with a fair value lower than carrying value should be impairment tested by calculating recoverable value, i.e. the greater of fair value net of cost of sales and value in use, and an impairment loss/write-down be recognized when the recoverable value is lower than carrying value.
3. Data taken from the draft accounts for 2009 approved by the company's governing bodies. If not available, they were taken from the latest approved financial statements or balance sheets.

For the entities whose 2009 accounts were not approved at the time of consolidation, revenues and gains/losses are not indicated. Please see above Part A) Accounting policies – Section 3 Consolidation Procedures and Scope.

10.4 and 10.5 and 10.6 Commitments relating to equity investments in subsidiaries / joint ventures / companies under significant influence

The following commitments were outstanding as at December 31, 2009:

- Undertakings to pay: (i) €1.5 million to our subsidiary UniManagement S.r.l. to cover losses foreseen for 2010 and (ii) fresh capital of €0.9 million to our subsidiary Sicilia Convention Bureau S.r.l. to cover start-up costs.
- An undertaking to take a minority stake in Grameen Italia S.p.A. (a company newly formed in partnership with the Grameen Trust; it will offer microcredit to small businesses with the aim of promoting social development in the less privileged sections of the population) for some €0.5 million plus a further financial contribution of €4.5 million to cover start-up costs.
- An undertaking to set up a subsidiary in Brazil in support of the activity of UniCredit's São Paulo representative office within the overall restructuring of the Group's foreign network. The new company will have capital of some €0.2 million.

A. Contractual commitments	15,570	20,565	

Outstanding commitments refer to the purchase of property, plant and equipment.

Section 13 – Intangible assets – Item 130

An intangible asset is an identifiable non-monetary asset without physical substance, to be used for several years. Intangible assets include goodwill and, among “other intangible assets”, brands, core deposits, customer relationships and software. Goodwill is the excess of the cost of a business combination over the net fair value of the assets and liabilities of companies or businesses at the acquisition date. As at December 31, 2009 intangible assets fell from €26,482m in 2008 to €25,823m. substantially for the effect of the amortization related to intangible assets with finite life.

13.1 Intangible assets: breakdown (€'000)				
Assets/Values	Amounts as at 12.31.2009		Amounts as at 12.31.2008	
	Finite Life	Indefinite Life	Finite Life	Indefinite Life

• The Group does not use the revaluation model (fair value) to measure intangible assets.

The other Intangible Assets: Other Indefinite Life represents the Trademark. The other Intangible Assets: Other definite Life include Customer Relationship and Core Deposits for €2,901m

13.3 Other information

Information on intangible assets and goodwill

The application of IFRS 3 in the accounting of business combination operations has resulted in the recording of significant amounts for intangible assets and goodwill. The following table shows changes occurring in the financial year to the values entered for the various intangible asset items identified, including the evaluative effects described below.

Intangible assets (except software)	TOTAL 2008	Amortization	Impairment	(*) Other changes	(€million)
					TOTAL 2009
Trademarks	1,079			(14)	1,065
Core deposits	1,454	(75)			1,379
Customer relationship	1,706	(160)		(24)	1,522
Goodwill	20,889			(398)	20,491
TOTAL	25,128	(235)		(436)	24,457

(*) Mainly due to the exchange rate effect

The **trademarks and goodwill** are intangible assets considered as having an indefinite term. The assumption is that they will contribute to the income flows for an indefinite period.

The **other intangible assets** have a finite term, originally valued by discounting financial flows over a period that expresses the remaining term of the relationships existing at the date of the business combination operation from which they are derived. Intangible assets with a finite useful life are amortized based on the related useful life of such assets.

An outline is provided below of the types of intangible assets recognized through business combinations and the methods used to set the relative fair value as at the acquisition date.

Trademarks

The fair value of the trademarks was determined using the relief from royalty method which estimates their value on the basis of the proceeds from transferring their use to third parties. Royalties are calculated by applying royalty rates to earnings (operating income, adjusted for non-trademark related items).

In summary, this method is divided into three steps:

- determination of the royalty rate (inferred by comparison with similar cases or determined analytically)
- application of the royalty rate to the income flows
- determination of the present value of royalties: net of taxes, calculated by applying a discount rate that accounts for the contextual risk of the trademark being valued.

During the financial year, the carrying amount of trademarks was also supported by an expert opinion provided by a primary consulting group, which confirmed the carrying amounts for the principal trademarks which appear as assets on the consolidated Balance Sheet.

Core Deposits

The value of the relationship connected to Core Deposits depends on the fact that part of a bank's short-term deposits (current accounts and savings deposits) and current account overdrafts remains on these accounts for significant periods of time.

The economic life of the relationship is longer than their contractual term. The spread between the actual cost of the deposits included in the Core Deposits and the cost of the deposits at interbank market rates (so-called mark-down) represents the most significant value component associated with this intangible asset. The income levels used to determine the fair value of Core Deposits, a commission component that contributes to the total income generated by the relationship, is also considered.

The fair value of this asset is determined by discounting the flows representing the income margins generated by the deposits for a term that expresses the remaining life of the relationships existing at the date of acquisition. As finite term assets, the relative value is amortized at constant rates in relation to the period associated with the asset's expected economic benefits.

The average residual useful life of Core Deposits is 22 years.

Customer Relationships

Assets Under Management (AUM)

The value of this intangible derives mainly from the Company's ability to obtain a return from the placement of asset management products with its customers.

The income flows used for the first recording of the valuation of this asset are:

- for the placing banks, commission retrocessions from the product issuers
- for the product issuers, commissions received from customers net of commission expenses, retroceded mainly to the placing banks.

Such commissions were considered recurrent because they are linked to Assets Under Management held by customers.

The average residual useful life of these intangible assets is 22 years.

Asset Under Custody (AUC)

The value of this intangible derives mainly from the Company's ability to obtain a return from deposits administered on behalf of customers.

Income flows used for the first recording of the valuation of this item were the commissions received for managing assets under administration. Such commissions were classified as recurrent because they are generated by the ordinary business of customers regarding their portfolios.

The average residual useful life of these intangible assets is 11 years.

Life Insurance

The value of this intangible derives mainly from the Company's ability to obtain a return from the placement of Bancassurance products with its customers.

The income flows used for the first recording of the valuation of this asset were the commissions received for conducting Bancassurance business. These commissions were considered recurrent as comparable, from the viewpoint of the investor, to management or custody of assets.

The average residual useful life of these intangible assets is 27 years.

Products

The value of this intangible asset is derived from income generated by trading conducted on behalf of the SGR of the Group. The income flows used for the first recording of the valuation were the commissions received for brokerage on behalf of the SGR. These were considered recurrent because they are generated by the ordinary operating of the funds in which customer savings are invested.

Also, in some cases, the asset value is attributable to the commissions received for disbursement of regional incentives.

The average residual useful life of these intangible assets is 6 years.

Other

This intangible asset includes all other types of identified so-called customer relationships, including, without limitation, those derived from the company's ability to obtain commissions from the placement of third party bonds and activities related to securities auctions.

The average residual useful life of these intangible assets is 11 years.

The Group does not hold intangible assets acquired by way of public contributions and intangible assets pledged as collateral for liabilities.

The impairment test of intangible assets recognized through business combination transactions

Pursuant to IAS 36, all intangible assets having an indefinite useful life, including goodwill, must be subjected, at least annually, to impairment tests to verify the recoverability of their indicated values. For those intangible assets having a finite useful life, one is required to calculate any potential losses each time loss indicators are triggered.

Recoverable value is the greater amount between the utility value (current value of future financial cash flows generated by the assets being considered) and related fair value net of selling costs.

The recoverable value of the intangible assets subject to the impairment test must be calculated for each individual asset, unless both of the following conditions are met:

- The utility value for the asset is not estimated to be close to the fair value net of selling costs;
- The asset does not generate financial flows that are comfortably independent of those connected with other assets.

When such conditions are met, the impairment test is carried out on a Cash Generating Unit (CGU) level, as required under the above-mentioned accounting principle.

It should be noted that the impairment tests carried out by the UniCredit Group in calculating the utility value of the Cash Generating Units (CGU), as described herein, includes both intangible assets having an indefinite useful life (goodwill and trademarks), as well as intangible assets having a finite useful life (core deposits and customer relationships), where the loss indicators noted in the accounting principle are used.

In fact, core deposits and customer relationships are considered as not capable of being the focus of independent impairment tests, since these assets do not generate financial flows independent of those connected with other assets.

In order to calculate the utility value of intangible assets subject to **impairment tests**, accounting principle IAS 36 provides that one must refer to cash flows related to such assets upon the conditions applicable as at the date of the test, not making any distinction between cash flows connected to the assets originally considered with the application of IFRS 3 and those based on subsequent changes.

In order to carry out the impairment tests, the utility value of the so-called "Cash Generating Units" ("CGUs") to which such intangible assets have been allocated must be calculated taking into account cash flows for all the assets and liabilities included in the CGUs, and not only those for which goodwill and/or intangible assets have been identified under IFRS 3.

Definition of Cash Generating Units (CGU)

The estimated utility value for the purposes of verifying any impairment of intangible assets, including goodwill, which do not generate cash flows except as accessories to other company business, requires that these assets be first attributed to relatively independent operating units in terms of management (from the viewpoint of generating independent cash flows, planning and internal reporting). These operating units are specifically defined as Cash Generating Units (CGU).

In accordance with the provisions of IFRS 3 and IAS 36, for the purposes of impairment testing, goodwill was allocated to the following operational Divisions of the Group, identified as CGUs:

- **Retail** which focuses on Mass Market, Affluent and Small Business customers, regardless of their geographical location;
- **Corporate & Investment Banking** (formerly Corporate and Markets & Investment Banking) which includes the following:
 - businesses with minimum annual turnover of €3 million;
 - Group activities on the financial markets and in the Investment Banking sector (e.g. trading, distribution, structured derivatives, financing and loan syndication, mergers and acquisitions, private equity portfolio management, direct investments in the capital of both listed and unlisted companies, etc.);
- **Private Banking** which targets private customers with medium to high financial assets, providing them with advisory and asset management services. Uses both traditional channels typical of the customer segment (private bankers) as well as innovative distribution models (networks of financial advisors and banking services, and online trading);
- **Asset Management** specializes in preserving and increasing the value of customers' investments through a number of innovative financial solutions (mutual funds, asset management, portfolio for institutional investors, etc.);
- **Central Eastern Europe (CEE)** includes the Group's activities in the countries of Central Eastern Europe (excluding Poland); includes the activities in Kazakhstan and Ukraine which are subject to specific valuation;
- **Poland's Markets** includes the Group's activities in Poland;
- **Group parent** and other companies.

The CGU represent the lowest point at which goodwill is monitored at Group level. The identified CGU correspond to the organizational business units through which the Group develops its business and provides information about the sector. With regard to the Central Eastern Europe (CEE) CGU, additional tests were carried out with reference to the individual countries where the Group operates. The allocation methodology adopted accounted for the synergies and the expected results of those organizational units.

Goodwill is allocated to the different CGU in two distinct steps:

- The first identifies the goodwill as the difference between the fair value of the acquisition recorded in the balance of the individual buyer and the net assets at fair value, resulting from application of the purchase price method to the assets, liabilities and estimated contingent liabilities evaluated at fair value of the acquired entity (excluding minority interests). This step also accounts for all the fair values resulting from transfers of companies or branches occurring within the Group as long as the purchase price agreement remains provisional.
- The second allocates the weighted residual goodwill to the CGU depending on the relative fair values.

The entire amount of goodwill has been allocated to the various CGU.

Book value of the CGU

The book value of the CGU is determined in a manner consistent with the criterion by which the recoverable amount of the latter is determined. The recoverable amount of the CGU includes cash flows from related assets and liabilities, therefore the book value must also include the financial assets and liabilities that are generating these flows.

The carrying value of each CGU is determined based on its contribution to consolidated net assets, including the portion pertaining to minority interests. Specifically, the book value of the CEE and Poland's Markets CGU was determined by summing the individual book values of each company on the consolidated financial statements (corresponding to their shareholders' equity), including any intangibles recorded at the time of acquisition (net of amortization and successive impairments) and the consolidation entries.

As it would be too difficult to determine the carry value of the other CGU based on book values, management factors, determined by the Capital Management unit of the Planning, Finance and Administration Department, had to be used instead to make the proper sub-division. In each case, the intangible assets were attributed to the CGU in accordance with the accounting information available.

The following are the book values of the CGU at 31 December 2009, calculated as described above, and the shares of goodwill and other intangible assets allocated to each of these; the values refer to the situation before impairment testing.

Cash Generating Unit CGU	Value at 12.31.2009	(€ million)	
		of which goodwill (Group share)	of which other intangible assets(*)
Retail	10,739	5,974	201
Private Banking	655	264	48
Asset Management	1,859	1,719	
Corporate & Investment Banking (CIB)	23,745	6,703	292
Central Eastern Europe (CEE)	15,128	4,289	220
<i>of which:</i>			
<i>Ukraine</i>	<i>943</i>	<i>457</i>	<i>19</i>
<i>Kazakhstan</i>	<i>1,146</i>	<i>762</i>	<i>36</i>

Group parent and other companies	4,147	40	2,033
Total	63,093	20,491	2,794

(*) Stated amounts are net of taxes.

Estimation of financial flows in determining utility value of CGU

As stated, in accordance with the provisions of IAS36, the impairment test of intangibles having an indefinite term must be performed at least once a year and whenever there is objective evidence of events that may have reduced its value. The accounting standards require that the impairment test compares the book value of each CGU with its recoverable value. Where the latter is less than the book value, a value adjustment must be recorded in the financial statements. The recoverable amount of a CGU is the greater of its fair value (net of selling costs) and its relative utility value.

The recoverable amount of the Group's CGU is represented by the utility value, determined on the basis of future financial flows generated by each CGU to which the goodwill has been allocated. These flows are estimated on the basis of:

- the 2010 budget approved by the Board of Directors on 9 February 2010;
- growth estimates prepared in accordance with the latest medium- to long-term Group Plan previously approved by the Board of Directors.

In formulating its forecasts, management has also taken into account the recent macroeconomic and market environment.

The projections of future profits have been extended until 2019 (confirmed forecast) with the aim of obtaining an assessment of the Group's income capacity and the capacity to create value over time, regardless of the current macroeconomic situation. These projections were developed for all the CGU and for the individual countries in the region of Central and Eastern Europe.

The cash flow expected for 2019 represents the basis for calculating Terminal Value, which indicates the capacity of the CGU to generate future financial flows beyond that year. According to the most widely used methodology, Terminal Value is calculated as the value of a perpetuity valued on the basis of a standardized, economically viable flow that is consistent with the long-term growth rate, so-called "g", which may be fixed or digressive, as required by IAS/IFRS accounting principles.

Utility value is determined by discounting financial flows at a rate that accounts for current valuations of the time value of money and the risks specific to the asset. For each CGU, given the varying levels of risk of the respective fields of operation, specific, risk-differentiated premiums were used for each individual entity or operational area. The discount rates include a country risk component.

Estimates used to determine cash flows and their growth rates are particularly complex because of the uncertainties which surrounded and still surround the current and prospective macroeconomic scenario and the situation of the financial markets and the real economy.

This scenario was defined with an appropriate level of caution on account of the continuing tensions in the real economy and financial markets. In fact, the recession and extreme weakness of the major economies in which the Group operates began in 2008 and continued throughout 2009. As for the CEE countries, the economic environment remained difficult, with negative GDP growth rates in almost all countries of the region.

From the second half of 2009 some positive signs, such as a lower foreign deficit, suggest that the most critical situation is now over, even if conservative estimates lead us to believe that a return to significant growth rates may only be possible from 2011.

The impact of the recession in the Euro Area on the credit market intensified during 2009. Bank lending and borrowing rates declined sharply throughout 2009, reflecting the reduction of the official rates by the ECB. The forecast is positive for direct deposits, reflecting the policy of the banks to strengthen their liquidity profile and the persistence of high-risk aversion by households, while loans are expected to weaken gradually (both in the private and business sectors).

Due to the instability that continued to affect the financial environment, the asset management and custody sector, already under great pressure during 2008, recorded further declines though at a slower pace than the negative peaks of the fourth quarter 2008.

The Board of Directors has approved the valuation procedure (impairment test) based on the financial flow estimates and additional assumptions, developed by the Management.

The following tables summarize the estimates of the main macroeconomic indicators, relative to the markets where the Group operates, used to validate the estimates of future financial flows.

Compound Annual Growth Rate 2009-2012	Real GDP	Rate of inflation	Growth rate loans	Growth rate deposits
Italy	0.9%	1.8%	3.5%	6.0%
Germany	1.6%	1.4%	2.2%	4.5%
Austria	1.5%	1.7%	2.5%	2.8%
Bosnia and Herzegovina	0.8%	2.6%	4.8%	5.3%

Deposits	1.27%	1.63%	2.52%	3.26%
Short-term loans	3.51%	3.95%	4.91%	5.52%
Medium- to long-term loans	3.27%	3.65%	4.59%	5.13%

The calculation of the utility value for impairment testing purposes was conducted using a Discounted Cash Flow model (DCF). The cash flows were determined by subtracting from net profit (net of minority interests) the annual capital requirement generated by changes in risk-weighted assets. This capital requirement is defined as the level of capitalization that the Group aspires to achieve in the long term.

The Discounted Cash Flow model used by the Group is based on three stages:

- for the first period (2010), the Group Budget figures approved by the Board of Directors were used. These forecasts, though considering the difficult macro-economic scenario, take account of the Group's capacity to generate income due to its strong franchise and well-diversified revenue, strong local roots and traditional commercial banking activities.

For certain CGU, the comparison between the cash flow for 2010 (determined using budget data) and that of 2011 may potentially show significant growth. Notwithstanding this, the development of the principal determinants for calculating profitability of the CGU (mainly volumes, rates and credit cycle) confirms that cash flow projections used for the years following 2011 are reasonable, and in some cases are conservative.

For JSC ATF Bank, the first period runs from 2010 to 2013. Unlike the other CGU, a detailed plan has been used for the referenced period, which was approved by the Board of Directors of the subsidiary bank. With respect to previous valuations, the plan used for the 31 December 2009 valuation takes into account a transaction (the guarantee transaction scheme) which transferred a portion of its own credit portfolio risk (and consequently of profitability) to Bank Austria AG.

- for the period from 2011 to 2019, the financial flow projections are based on a growth rate of profits and decrease in risk-weighted assets, starting from the Compound Annual Growth Rate (CAGR) of net profits estimated in the Strategic Plan and arriving at the Terminal Values. The growth rates thus determined were corrected in some cases, where the result produced was not consistent with the profitability prospects of the CGU.

- the Terminal Value was determined using nominal growth rates of 2%. The nominal growth rate of GDP in the eurozone from 1995 to today is equal to 3.8% (1.8% real growth and 2% inflation). The choice of 2% as the nominal rate, corresponding to approx. 0% real growth, was dictated by prudence. For JSC Ukrspotsbank and JSC ATF Bank, the Terminal Value was calculated from 2014 and 2015 respectively, applying a nominal growth rate of 2%.

Goods destined for auxiliary and shared assets (corporate assets) were allocated to the CGU to which they refer, where applicable. For the indivisible portion of these assets, the recoverable value was verified at overall Group level.

Noting that the sustainability of cash flow projections used in the impairment test was valued in light of the updated macroeconomic situation as at the approval date of the impairment test, the following assumptions in relation to the principal profitability determinants adopted for the various CGU are outlined below:

- **Retail:** The assumptions regarding projected cash flows for the Retail CGU reflect the macroeconomic environment and development prospects of the main countries where the Group operates in this segment, in particular Italy, Germany and Austria. The improvement of growth rates in volumes of loans and deposits expected in the coming years and the rise in interest rates were therefore taken into account. The latter (as shown in the tables above), in particular through the markdown component, is expected to significantly improve the Group's margins.
- **Corporate & Investment Banking:** The forecasts made by CIB, like those for the Retail Division, take into account the improved economic environment. The increase in the growth rate of loans and the progressive reduction of risk in the loans portfolio were reflected in the cash flow forecasts prepared for the corporate business line. For the Markets & Investment Banking business line, forecasts reflect the expected reduction of volumes of the trading portfolio and, as a result, lower revenues. This phenomenon was partially countered by leverage from reduced personnel costs.
- **Private Banking:** The assumptions made for Private Banking, in particular, for rising interest rates and the stimulus to volumes produced by the effects of the tax shield on capital invested abroad approved in 2009 by the Italian Parliament.
- **Asset Management:** The assumptions used for Asset Management were influenced by the moderate growth of volumes expected over the coming years and the relative stability of margins.
- **Central Eastern Europe (CEE):** The recovery of economic growth expected in the CEE starting from 2011 was taken into account in the assumptions used, together with an expected moderate reduction of risk in the loans portfolio. The deep-seated commercial standing of the Group is expected to continue to fuel revenue growth in the CEE area.
As regards **JSC ATF Bank**, the profits and risk-adjusted assets used have been calculated taking into account the consistent recovery foreseen in the growth rate of lending in Kazakhstan (as evidenced in the tables above), of the bank's as yet unrealized potential profitability, and of the profit in terms of risk cost arising from the transaction (the guarantee transaction scheme), under which a significant portion of credit portfolio risk was transferred to BA AG.
For **Ukrspotsbank**, the assumptions adopted to assess sustainability of future cash flows used in the impairment test take into account a moderate recovery of volume, the normalization of risk costs and the reduction of operating expenses compared to the 2010 budget (this last item is affected by significant investments in information technology). In addition, the difficulties being experienced by primary competitors (some of the large banks having difficulties have been nationalized, whilst other smaller institutions are undergoing liquidation proceedings) have created notable opportunities to increase market share.
- **Poland's Markets:** The forecasts for Poland's Markets also take into account the changing economic environment in Central and Eastern Europe. The positive effects of economic recovery, however, are partly mitigated by the contraction of margins (determined by the convergence of the Polish economy toward the standards of the eurozone). In this regard, more conservative macroeconomic assumptions were taken into account for the cash flow projections than for the previous impairment test.

Discount rates of flows

The table below summarizes the key assumptions adopted by management in calculating the recoverable amount of CGU:

CGU	Initial discount rate after taxes (Ke)	Final discount rate after taxes (Ke)	Nominal growth rate for the calculation of Terminal Value
Retail	8.70%	10.55%	2.00%
CIB	9.94%	10.55%	2.00%
Private Banking	8.90%	10.55%	2.00%
Asset Management	10.18%	10.55%	2.00%
Central Eastern Europe ⁽¹⁾	16.35%	12.18%	2.00%
<i>of which: JSC Ukrspotsbank (USB)</i>	26.67%	12.50%	2.00%
<i>of which: JSC ATF Bank (ATF)</i>	15.37%	12.50%	2.00%
Poland's Markets	12.27%	11.00%	2.00%

(1) The discount rate for the Central Eastern Europe CGU is the weighted arithmetic mean of the discount rates used for individual countries belonging to the individual sector.

As can be seen from the table above, future financial flows were discounted using a conservative estimate of the discount rate, incorporating the various risk factors linked to the business sector into the equity cost (Ke). The discount rate is a nominal rate, net of taxes.

In particular, the cost of share capital for the Group and the differentiated cost for each of the sectors are the sum of:

- Risk-free rate: swap rate of the eurozone at 5 years, average of the last 6 years. The horizon of 6 years was chosen to reflect the average length of the economic cycle in the eurozone;
- Debt risk premium: average Credit Default Swap for the last 6 years paid by UniCredit;
- Equity risk premium: determined using the option-based model, based on the volatility of UniCredit shares over the last 6 years. For the sectors, the average volatility over the last 6 years for banks operating mainly in the same area was used, also taking into account the benefits of diversification. The latter was also determined by considering the variance-covariance matrix of quotations for the groups of banks used for the determination of the risk premium.

The cost of share capital, differentiated by each CEE country, is given by the sum of:

- Risk-free rate: local currency swap rate at 5 years, average of the last 6 years. Absent when the interbank rate was considered more liquid and representative;
- Country risk premium: average Credit Default Swap paid by the country over the past 6 years (or a shorter period in the absence of a sufficiently long time series);
- Own equity risk premium: determined using the option-based model and based on the volatility of UniCredit shares over the last 6 years.

The cost of capital used in the discounting of cash flows results in a defined value for each CGU. This value is calculated as an average of the cost of capital in a sampling of European banks based on the same methodology used for the cost of the initial capital of the Group, extending the expiration of the risk-free rate and the 5 to 10 year CDS. The cost of terminal value capital utilized varies depending on whether the CGU is located in a Western European country, in an Eastern European country that will become part of the euro zone by 2013, or in another country.

The Group's total utility value used in the impairment test is higher than the current market capitalization. This situation is common to most European banks: the price-to-book multiple of the banks in the S&P 600 is about 40% lower than the historical average. For UniCredit, the difference is largely explained by the short-term prospects implicit in the current market price, which is influenced by expectations of moderate profit for 2010 and the continuing uncertainty surrounding the outlook for GDP growth in the global economy.

This differs to the total utility value which includes mid- to long-term revenue prospects that are considered reasonable by the directors.

Since, as mentioned above, this assessment is made particularly complex by the current macroeconomic and market environment affecting the financial sector and the resulting difficulty in making predictions about future long-term profitability, sensitivity analyses were conducted, assuming changes to the main parameters used in the impairment test.

The table below summarizes the percentage deviations of the basic assumptions adopted for the different CGU needed to make the recoverable value of the CGU equal to its value in the financial statements:

CGU	Increase of the discount rate after taxes (Ke) (pp)	Increase of the core tier 1 ratio target (pp)	Decrease of the nominal growth rate for the calculation of Terminal Value (pp)	Decrease of annual earnings (pp)
Retail	2.4%	6.6%	-10.9%	-22.3%
CIB	0.9%	1.5%	-4.5%	-8.5%
Asset Management	7.4%	98.8%	-76.4%	-47.9%
Private Banking ¹	19.6%	42.8%	n.s.	-71.4%
Poland's Markets	2.9%	12.0%	-13.9%	-27.1%
Central Eastern Europe (CEE, Kazakhstan and Ukraine excluded)	0.3%	0.8%	-1.0%	-2.9%

(1) In view of the sector's high profitability level, the results of the sensitivity analysis are not significant.

It should be noted that aligning a CGU's utility value to its book value, although it does not require devaluation of the goodwill of the specific CGU, could entail a devaluation of the goodwill at Group level. This is because the positive difference between utility value and book value of each CGU may compensate the negative value of auxiliary and shared assets not directly allocated to each CGU.

The total utility value is largely in line with the total carrying amount. Therefore, negative changes of the measurements used and the information contained in the impairment tests could lead to reduction in value in future financial years.

Supplementing the sensitivity analysis, the table below indicates the variation of the total utility value of the Group resulting from a variation of one percentage point of the main parameters used in the DCF model.

	1% increase of the discount rate after taxes (Ke)	1% increase of core tier 1 ratio target	1% decrease of the nominal growth rate for the calculation of Terminal Value	1% decrease of annual earnings
Change of Group utility value	-12.1%	-6.1%	-3.7%	-1.2%

It must also be emphasized that the parameters and information used to verify the recoverability of goodwill (in particular the expected cash flows for the various CGU, and the discount rates used) are significantly influenced by the macroeconomic and market situation, which may be subject, to currently unpredictable changes. The effect that these changes may have on the estimated cash flows of the different CGU, as well as on the main assumptions made, could therefore lead to different results in the coming financial years with respect to those reported in these consolidated financial statements.

The results of the impairment test

The impairment test has confirmed the book value of goodwill in the financial statements at 31 December 2009. Consequently no value adjustments were recorded under that item.

For intangibles other than goodwill, the impairment test confirmed that their recoverable value exceeded the amount written in the consolidated financial statements, less amortization already recorded. It was therefore not necessary to record any impairment on the income statement.

Section 14 – Tax assets and tax liabilities – Item 140 (assets) and 80 (liabilities)

At 31 December 2009 **tax assets** (item 140 of assets) amounted to €12,577m and comprise “**current tax assets**” in the amount of €2,416m (up by €488m yoy) and “**deferred tax assets**” in the amount of €10,161m (down by €303m yoy).

As required by regulations, the sub-item “Deferred tax assets” is detailed in table 14.1 below, whose amounts totally refer to the banking group portion.

At December 31, 2009 **tax liabilities** (item 80 of liabilities) amounted to €6,451m and comprise “**current tax liabilities**” in the amount of €1,988m (down by €839m yoy) and “**deferred tax liabilities**” in the amount of €4,463m (down by €939m yoy).

As required by regulations, the sub-item “Deferred tax liabilities” is detailed in table 14.2 below, whose amounts totally refer to the banking group portion.

14.1 Deferred tax assets: breakdown		(€'000)	
	Amounts as at		
	12.31.2009	12.31.2008	
Deferred tax assets related to:			
Assets/liabilities held for trading	408,285	471,970	
Other financial instruments	817,361	1,086,069	
Property, plant and equipment / Intangible assets	2,562,507	2,572,074

3.3 Other decreases	198,339	16,466	
4. Final amount	480,591	602,236	

14.7 Other information

Under IAS 12, no deferred tax assets due to tax losses carried forward were recognized, where no taxable income against which losses can be used appeared to be likely. At Group level unused tax losses for which no deferred tax assets had been recognized amounted to €7,460m, of which €1,176m attributable to UniCredit SpA's foreign branches, €5,814m to UniCredit Bank AG subsidiaries and €470m to Bank Austria subsidiaries. The portion attributable to UniCredit SpA's foreign branches concerned losses which might be recovered only in respect of future taxable income generated by the Branches in their respective country.

Section 15 – Non-current assets and disposal groups classified as held for sale – Item 150 (assets) and 90 (liabilities)

These items include non-current assets and the group of associated assets and liabilities (i.e. a group of units generating financial cash flow) whose sale is highly probable.

They are recognized at the lesser of the carrying amount and fair value net of disposal costs.

Balance sheet data at December 31, 2009 mainly refer to the equity investment in IRFIS Mediocredito della Sicilia SpA.

15.1 Non-current assets and disposal groups classified as held for sale: breakdown by type assets		(€ '000)	
	Amounts as at		
	12.31.2009	12.31.2008

Following the changes to the table introduced by the first update to Circular 262, assets and liabilities belonging to disposal groups that are not discontinued operations are presented in sections A. Individual assets and C. Liabilities associated with assets classified as held for sale. Accordingly, also comparatives for 2008, previously reported in sections B. Asset groups classified as held for sale and D. Liabilities included in disposal groups classified as held for sale have been presented in the mentioned sections.

15.2 Other information

There is no significant information to be reported.

15.3 Details of investments in companies subject to significant influence not valued at net equity

At December 31, 2009 the Group does not hold any equity investment subject to significant influence not valued at equity, classified as held for sale.

Section 16 – Other assets – Item 160

The change in Other Assets from €13,990m at December 31, 2008 to €10,454m at December 31, 2009 was mainly due to definitive items not attributable to other item, decreased from €4,377m at end 2008 to €2,203m at and 2009.

16.1 Other assets: breakdown		(€'000)	
Items/Values	Amounts as at		
	12.31.2009	12.31.2008	
Margin with derivatives clearers (non-interest bearing)	100,001	207,544

Liabilities

Section 1 – Deposits from banks – Item 10

As already described in Section 6 of Assets (Loans and receivables with banks), **Deposits from banks** decreased from €177,677m at end 2008 to €106,800 million at end 2009.

In **average terms**⁵, these items were €143,191m in 2009 and €176,336m in 2008.

The average cost of these deposits fell by 3.80%, from 5.35% in 2008 to 1.55% in 2009.

The €70,877m decrease in “**Deposits from banks**” was attributable to:

- a decrease in Deposits from Central banks by €53,086m, of which €20,001m relating to UniCredit SpA, €19,564m to UniCredit Bank AG and €6,124m to UniCredit Bank Austria AG.
- a reduction in Deposits from banks by €17,791m, of which €12,092m concerning time deposits.

1.1 Deposits from banks: product breakdown (€'000)		
Type of transactions/Values	Amounts as at	
	12.31.2009	12.31.2008
1. Deposits from central banks	19,684,972	72,770,915
2. Deposits from banks	87,115,180	104,905,789
2.1 Current accounts and demand deposits	18,300,255	14,548,866
2.2 Time deposits	27,610,170	39,701,991
2.3 Loans	34,623,268	43,819,781
2.3.1 repos	11,881,982	19,689,312
2.3.2 other	22,741,286	24,130,469
2.4 Liabilities in respect of commitments to repurchase treasury shares	-	-
2.5 Other liabilities	6,581,487	6,835,151
Total	106,800,152	177,676,704
Fair value	106,989,042	177,850,724

The sub-item 2.3 Loans includes repos executed using proprietary securities issued by Group companies, which were eliminated from assets on consolidation.

1.2 Breakdown of item 10 "Deposits from banks": subordinated debts (€'000)		
	Amounts as at	
	12.31.2009	12.31.2008
Deposits from banks: subordinated debts	231,317	185,852

1.3 Breakdown of item 10 "Deposits from banks": structured debts

There were no deposits from banks: structured debts.

⁵ The average balances and related ratios (yield/costs) were calculated by considering the assets/liabilities balances at the end of each quarter in 2009 and at end 2008.

1.4 Deposit from banks: liability items subject to micro-hedging (€'000)		
Type of transactions/Values	Amounts as at	
	12.31.2009	12.31.2008
1. Liability items subject to micro-hedging of fair value	155,261	598,364
a) Interest rate risk	-	485,956
b) Currency risk	-	-
c) Multiple risks	155,261	112,408
2. Liability items subject to micro-hedging of cash flows	206,649	536,943
a) Interest rate risk	179,296	274,166
b) Currency risk	-	-
c) Other	27,353	262,777
Total	361,910	1,135,307

1.5 Amounts payable under finance leases

There are no amounts payable to banks under finance leases.

Section 2 – Deposits from customers – Item 20

Deposits from customers decreased by €7,208m (or 2%), from €388,831m at end 2008 to €381,623m at end 2009.

In **average terms**⁶ this item was down by 4%, from €402,522m in 2008 to €384,977m in 2009.

The average cost of these deposits was 1.50% in 2009, down from 3.08% in 2008.

2.1 Deposits from customers: product breakdown (€'000)		
Type of transactions/Values	Amounts as at	
	12.31.2009	12.31.2008
1. Current accounts and demand deposits	217,353,447	197,010,486
2. Time deposits	111,557,776	121,471,020
3. Loans	29,726,942	44,831,199
3.1 repos	20,471,063	30,169,624
3.2 other	9,255,879	14,661,575
4. Liabilities in respect of commitments to repurchase treasury shares	528,773	-
5. Other liabilities	22,456,352	25,518,061
Total	381,623,290	388,830,766
Fair Value	381,390,731	388,639,132

Loans also include liabilities relating to repos executed using proprietary securities issued by Group companies, which were eliminated from assets on consolidation.

2.2 Breakdown of item 20 "Deposits from customers": subordinated debts (€'000)		
	Amounts as at	
	12.31.2009	12.31.2008
Deposits from customers: subordinated debts	561,781	651,768

⁶ The average balances and related ratios (yield/costs) were calculated by considering the assets/liabilities balances at the end of each quarter in 2009 and at end 2008. In particular, loans to customers and banks include total impairment losses.

2.3 Breakdown of item 20 "Deposits from customers": structured debts (€'000)

	Amounts as at	
	12.31.2009	12.31.2008
	Carrying value	Carrying value
Deposits from customers: structured debts	36,141	33,002

2.4 Deposits from customers: liability items subject to micro-hedging (€'000)

Type of transactions/Values	Amounts as at	
	12.31.2009	12.31.2008
1. Liability items subject to micro-hedging of fair value	-	438,318
a) Interest rate risk	-	407,182
b) Currency risk	-	-
c) Other	-	31,136
2. Liability items subject to micro-hedging of cash flows	871,730	2,413,068
a) Interest rate risk	771,684	2,322,019
b) Currency risk	-	-
c) Other	100,046	91,049
Total	871,730	2,851,386

2.5 Amounts payable under finance leases (€'000)

	Amounts as at	
	12.31.2009	12.31.2008
	Minimum lease payments	Present value of minimum lease payments
Amounts payable under finance leases:		
Up to twelve months	4,180	3,718
From one to five years	5,824	4,373
Over five years	-	-
Total value of minimum lease payments	10,004	8,091
Less: time value effect	(1,324)	X
Present value of minimum payment obligations	8,680	8,091

Section 3 – Debt securities in issue – Item 30

“Debt securities” were €214,773m at end 2009. The €12,314m increase over 2008 was entirely attributable to other securities.

In **average terms**⁷, this item was down by 12%, from €230,993m in 2008 to €204,396m in 2009.

The average cost of these deposits fell by 1.09%, from 4.85% in 2008 to 3.76% in 2009.

Total Level 1, Level 2 and Level 3			216,512,727				201,411,070	

Valuations at fair value were classified according to a hierarchy of levels reflecting the significance of the valuations input. For further information see Part A) Accounting Policies – A3) Information on fair value.

The sum of the sub-items 1.1 “Structured bonds” and 2.1 “Other structured securities” was equal to €12,960m and accounted for 6% of total debt securities. They mainly refer to equity-linked instruments (approximately 68%) and, to a lesser extent, to interest-rate linked instruments (approximately 30%). UniCredit S.p.A. is nearly the sole contributor to such instruments.

The fair value of derivatives embedded in structured securities, presented in Line 20 of Assets and Line 40 of Liabilities and included in Trading derivatives – Others, amounted to a net balance of €662 million negative.

3.2 Breakdown of item 30 "Debt securities in issue": subordinated securities (€'000)		
	Amounts as at	
	12.31.2009	12.31.2008
Debt securities in issue: subordinated securities	27,145,805	31,134,069

3.3 Breakdown of item 30 "Debt securities in issue": securities subject to micro-hedging (€'000)		
Type of transactions/Values	Amounts as at	
	12.31.2009	12.31.2008
1. Securities subject to micro-hedging of fair value	1,360,783	14,836,230
a) Interest rate risk	1,360,783	14,836,230
b) Currency risk	-	-
c) Multiple risks	-	-
2. Securities subject to micro-hedging of cash flows	4,756,433	6,133,879
a) Interest rate risk	4,756,433	6,133,879
b) Currency risk	-	-
c) Other	-	-
Total	6,117,216	20,970,109

⁷ The average balances and related ratios (yield/costs) were calculated by considering the assets/liabilities balances at the end of each quarter in 2009 and at end 2008.

Section 4 – Financial liabilities held for trading – Item 40

As already specified in Section 2 of Assets, **Financial liabilities held for trading** decreased from €165,335m at end 2008 to €114,045m at December 31, 2009. The decrease of financial liabilities is connected to the overall deleveraging, while the derivatives item decrease was mainly due to the fluctuations in market prices (e.g. interest rates, exchange rates, share prices, etc.) especially in Q2 2009.

In **average terms**⁸, this item amounted to €143,321m in 2009 and €127,165m in 2008.

The average cost of these liabilities was 0.95% in 2009, down by 0.07% over the 1.02% recorded in 2008.

Section 8 – Tax liabilities – Item 80

See Section 14 of Assets.

Section 9 – Liabilities included in disposal groups classified as held for sale – Item 90

See Section 15 of Assets.

Section 10 – Other liabilities – Item 100

The decrease in “**Other liabilities**” (from €23,701m at end 2008 to €18,110m at end 2009) was mainly attributable to:

- a €2,511m decrease in items deemed definitive but not attributable to other lines (accounts payable – suppliers, provisions for tax withholding on accrued interest, bond coupon payments, dividends or other entries);
- a €1,181m contraction in items in processing;
- a €1,062m reduction in other entries.

10.1 Other liabilities: breakdown		(€ '000)	
Items/Vaues	Amounts as at		
	12.31.2009	12.31.2008	
Liabilities in respect of financial guarantees issued	18,141	16,389

Entries related to securities transactions	164,116	13,320	
Items deemed definitive but not attributable to other lines:	3,116,130	5,627,614	
- accounts payable - suppliers	1,324,065	2,346,764	
- provisions for tax withholding on accrued interest, bond coupon payments or dividends	3,218	3,252	
- other entries	1,788,847	3,277,598	
Liabilities for miscellaneous entries related to tax collection service	11,756	18,712	
Adjustments for unpaid portfolio entries	719,591	741,458	
Tax items different from those included in item 80	1,165,246	1,450,081	
Other entries	4,209,523	5,271,872	
Total	18,110,367	23,701,333	

Section 11 – Provision for employee severance pay– Item 110

The “TFR” provision for Italy-based employee benefits is to be construed as a “post-retirement defined benefit”. It is therefore recognised on the basis of an actuarial estimate of the amount of benefit accrued by employees discounted to present value. This benefit is calculated by an external actuary using the unit credit projection method (see Part A2 – The Main Items of the Accounts).

11.1 Provision for employee severance pay: annual changes			(€ '000)
	Changes in		
	2009	2008	
A. Opening balances	1,415,023	1,528,111	
B. Increases	133,806	123,242	
B.1 Provisions for the year	75,813	83,671	
B.2 Other increases	57,993	39,571	
C. Reductions	231,306	236,330	
C.1 Severance payments	174,786	168,384	
C.2 Other decreases	56,520	67,946	
D. Closing balance	1,317,523	1,415,023	

Section 12 – Provisions for risks and charges – Item 120

At end 2009 “Provisions for risks and charges” amounted to €7,982m, which is aligned to the 2008 amount of €8,049m.

The sub-item **1. Pensions and other post-retirement benefit obligations**, which essentially contains defined-benefit funds described in 12.3 below, amounted to €4,591m at 31 December 2009, as against €4,553m in 2008.

The sub-item **2. Other provisions for risks and charges**, which amounted to €3,392m at end 2009, contains:

- 2.1 Legal disputes: provisions for legal disputes, cases in which the Group is a defendant and post-insolvency clawback petitions. See Part E – Section 4 “Operational Risk” – item B – “Legal risk” for further information concerning legal disputes.
- 2.2 Staff expenses: sundry HR costs;
- 2.3 Other: provisions for risks and charges not attributable to the above items. See the table 12.4 below for details.

12.1 Provisions for risks and charges: breakdown			(€ '000)
Items/Components	Amounts as at		
	12.31.2009	12.31.2008	
1. Pensions and other post retirement benefit obligations	4,590,628	4,553,022	
2. Other provisions for risks and charges	3,391,803	3,495,534	
2.1 Legal disputes	1,350,196	1,272,586

* o/w: Defined-benefit Pension Funds in the amount €4,513,206.

12.3 Pensions and other post-retirement defined-benefit obligations (€'000)

1. Introduction to the funds

There are several defined-benefit plans within the Group, i.e., plans whose benefit is linked to salary and employee length of service both inside and outside Italy. The Austrian, German and Italian plans account for over 90% of the Group's pension obligations.

Most of the Group's plans are not financed, with the exception of the contractual trust arrangement or CTA (an external fund managed by independent trustees), the HVB Trust Pensionfonds AG and the Pensionskasse der HypoVereinsbank WaG, which are set up by HVB AG for defined benefit plans in Germany, and the UK defined benefit plans. The HVB Trust Pensionfonds AG was consolidated for the first time in 2009 by means of a transfer of the pension obligations (and related assets) attributable to retirees with the so-called "direct undertaking" in Germany.

Most of the Group's defined benefit plans are closed to new recruits, for example in Austria, Germany and Italy, where most new recruits join defined contribution plans or plans considered such. The contributions for defined contribution plans are charged to the income statement.

The obligations arising from defined benefit plans are determined using the projected unit credit method. The assets of financed plans are valued at their fair value on the balance sheet date. The balance sheet comprises the deficit or surplus (i.e., the difference between obligations and assets) net of unrecognized actuarial gains and losses. Actuarial gains and losses are recognized in the income statement only if they exceed the 10% corridor.

The actuarial assumptions used to determine obligations vary from country to country and from plan to plan in line with IAS 19. Each country's discount rate is fixed at the balance sheet date on the basis of the market yields of blue chip stocks in the same currency and with the same average life as the liabilities.

2. Changes in provisions	12.31.2009	12.31.2008
Opening net defined-benefit obligations	4,475,084	4,741,834
Service cost	84,783	83,766
Cost of defined-benefit plans relating to previous employment	-	3,159
Finance cost	242,590	226,583
Actuarial (gains) losses recognised in the year	2,067	(11,681)
(Gains) losses on curtailments	6,131	(3,321)
Benefit paid	(454,379)	(493,588)

Section 14 – Redeemable shares - Item 150

There are no amounts to be shown.

Section 15 – Group Shareholders' Equity– Items 140, 170, 180, 190, 200 and 220

As explained in Section 5 – Other Matters in Part A1) Accounting Policies – General, end 2008 data differ from published figures due to the reclassifications of exchange differences relating to net foreign investments (subsidiaries, associates or joint ventures), which were transferred from item 170 Reserves to item 140 Revaluation reserves.

For the sake of comparability we have therefore restated the December 2008 figures to take these effects into account.

At December 31, 2009 **Group Shareholders' Equity**, including profit for the period of €1,702m, amounted to €59,689m, as against €54,999m at end 2008.

The table below shows the breakdown of Group equity and changes versus previous year

Group Capital: breakdown		(€ million)		
	Amounts as at		Changes	
	12.31.2009	12.31.2008	Amount	%
1. Share capital	8,390	6,684	1,706	25.5%
2. Share premium reserve	36,582	34,070	2,512	7.4%
3. Reserves	14,271	11,979	2,292	19.1%
4. Treasury shares	(6)	(6)	-	-
5. Revaluation reserve	(1,250)	(1,740)	490	-28.2%
6. Equity instruments	-	-	-	-
7. Net profits (loss)	1,702	4,012	(2,310)	-57.6%
Total	59,689	54,999	4,690	8.5%

The €4,690m increase in Group equity is the result of:

- A €1,706m increase in **share capital** due to:
 - The capital increase (scrip issue) resolved by the Shareholders' meeting on November 14, 2008, which was fully underwritten €486m
 - The capital increase (bonus issue) resolved by the extraordinary Shareholders' meeting on April 29, 2009 by using the ad-hoc reserve created when the allocation of profit was approved €1,220m
- An increase in **share premiums** attributable to the scrip issue resolved by the Shareholders' meeting on November 14, 2008, which was fully underwritten; €2,512m
- An increase in **reserves** due to:
 - The allocation to the reserve fund of the 2008 profit (€4,012m), net of the dividends paid in respect of savings shares (-€7m) €4,005m
 - The use of the reserve for capitalized costs following the capital increase resolved by the Shareholders' meeting on November 4, 2008. (€198m)
 - The use of the reserve created when the allocation of profits was approved, as resolved by the extraordinary shareholders' meeting on April 29, 2009 (€1,220m)
 - The use of the reserve for costs related to stock option(€57m), the use of the reserve for put options (€233m) and other changes (€295m)
- An increase in the **revaluation reserve** due to:
 - An increase in the value of financial assets available for sale: €807m
 - An increase in financial risk hedging (€168m) and an increase in valuation reserve of equity investment valued at equity method (5m) €173m
 - A reduction in exchange-rate differences (€490m)
- **Profit for the year** lower than in 2008 (€2,310m)

15.1 "Share capital" and "treasury shares": breakdown (€ '000)				
	12.31.2009		12.31.2008	
	Issued Shares	Underwritten Shares	Issued Shares	Underwritten Shares
A. Share Capital				
A.1 ordinary shares	8,377,750	-	6,673,434	-
A.2 savings shares	12,120	-	10,853	-
Total (A)	8,389,870	-	6,684,287	-
B. Treasury Shares	(5,714)	-	(5,993)	-

The sub-item Treasury Shares includes UniCredit SpA shares (-€2,440 thousand) and shares of subsidiary companies bought by the same companies (-€3,274 thousand).

In 2009 Share Capital – which at December 31, 2008 was represented by 13,346,868,372 ordinary shares and 21,706,552 savings shares, each with a par value of €0.50 – was subject to various changes, as described in detail in the Report on Operations in the chapter Other information – Steps to Strengthen Capital, following the issue of 3,408,631,673 ordinary shares (of which 1,308,455 performance share) and 2,532,431 savings shares.

Capital thus increased by €1,705,583 thousand (€486,113 thousand as scrip issue and €1,219,470 thousand as bonus issue with the simultaneous use of reserves) from €6,684,287 thousand at end 2008 to €8,389,870 thousand at end 2009, and consists of 16,755,500,045 ordinary shares with a par value of €0.50 and 24,238,983 savings shares with a par value of €0.50.

The subscription of the scrip issue resolved by the Extraordinary Shareholders' Meeting held on November 14, 2008 led to the recognition of €2,511,258 thousand as share premium reserve.

At end 2009 treasury shares held were 476,000.

Part C – Consolidated Income Statement

Following the amendment to Banca d'Italia Circular 262/2005, some tables were changed and 2008 figures were reclassified accordingly.

For further information see Part A) Accounting Policies.

Section 1 – Interest income and expense – Items 10 and 20

In 2009 Interest income and similar revenues totaled €34,746m, down by €19,4bn (or 36%) over 2008 (€54,113m); Interest income from financial assets denominated in currency, which accounted for 26% of the total item (24% in 2008), similarly fell by €4bn (down by 31%), from €13,198m at end 2008 to €9,198m at end 2009.

The decreasing **interest income** (€19.4bn) was:

- Mainly attributable (91%, or €17.6bn) to a contraction in the average yield on assets, which fell from 5.00% in 2008 to 3.37% in 2009; and
- To a lesser extent (9%, or €1.8bn) to a reduction in the **average balance of total assets**¹, which decreased from €1,082.7bn in 2008 to €1,030bn at end 2009. The €52bn reduction was the result of decreasing loans to customers (down by €21bn), loans to banks (down by €19.2bn) and financial assets (down by €12.4bn), which were slightly offset by increasing “other assets” (up by €0.6bn), which include total value adjustments on other assets (property, plant and equipment, intangible assets, etc.), while value adjustments on loans to customers and banks and on equity investments were recognized in the respective items.

One of the reasons for the reduction in interest income is the abolition of the commission on the highest overdrawn amount (commissione di massimo scoperto), which penalized Q3 2009 results.

See the Report on Operations for a more detailed description of Group and divisional results.

1.1 Interest income and similar revenues: breakdown					(€'000)
Items/Type	2009				2008
	Debt securities	Loans	Other transactions	Total	Total
1. Financial assets held for trading	1,576,788	150,192	132,237	1,859,217	4,546,526
2. Financial assets at <i>fair value</i> through profit or loss	240,566	116,922	-	357,488	770,656
3. Available-for-sale financial assets	1,070,068	2,804	-	1,072,872	1,324,898
4. Held-to-maturity investments	669,998	10	-	670,008	723,857
5. Loans and receivables with banks	350,030	1,281,998	-	1,632,028	7,736,182
6. Loans and receivables with customers	1,347,072	25,471,178	-	26,818,250	38,589,095
7. Hedging derivatives	X	X	1,923,819	1,923,819	-
8. Other assets	X	X	412,305	412,305	421,300
Total	5,254,522	27,023,104	2,468,361	34,745,987	54,112,514

The columns “Debt Securities” and “Loans” include interest income from impaired positions, other than income recognised under “write-backs”, amounting to €192,237 thousand and €1,039,499 thousand respectively.

¹ The average balances and related ratios (yield/costs) were calculated by considering the assets/liabilities balances at the end of each quarter in 2009 and at end 2008.

1.2 and 1.5 Interest income/expense and similar revenues/charges: hedging differentials (€'000)		
Items	2009	2008
A. Positive differentials relating to hedging operations	13,503,051	4,051,767
B. Negative differentials relating to hedging operations	(11,579,232)	(4,694,436)
C. Net differentials (A - B)	1,923,819	(642,669)

For the sake of comparability, the table 1.2 "Interest income and similar revenues" also includes the figures of the table 1.5 "Interest expense and similar costs".

1.3 Interest income and similar revenues: other information

1.3.1 Interest income from financial assets denominated in currency (€'000)		
Items	2009	2008
a) Assets denominated in currency	9,198,315	13,197,696

1.3.2 Interest income from finance leases (€'000)		
Items	2009	2008
a) Financial leasing transactions: contingent rents recognised as income in the period	745,619	653,615

In 2009 **Interest expense and similar costs** totaled €17,712m, down by €18.4bn (or 51%) over 2008 (€36,069m); Interest expense on liabilities denominated in currency, which accounted for 27% of the total item (25% in 2008), similarly fell by €4.7bn (down by 50%), from €9,420m at end 2008 to €4,736m at end 2009.

As already detailed in respect of interest income, the decreasing trend of **interest expense** (down by €18.4bn) was:

- Mainly attributable (95%, or €17.4bn) to a contraction in the **average cost of liabilities**, which fell from 3.53% in 2008 to 1.83% in 2009; and
- To a lesser extent (5%, or €1.0bn) to a reduction in the **average balance of total liabilities²** (net of the shareholders' equity), which decreased from €1,021.8bn in 2008 to €969.6bn at end 2009. The €52.2bn reduction was the result of decreasing deposits from customers (down by €17.5bn), securities in issue (down by €26.6bn), deposits from banks (down by €33.1bn), financial liabilities (up by 21.5bn) which were slightly offset by increasing "other liabilities" (up by €3.6bn), which include total value adjustments on loans to customers and banks and on equity investments etc.

See the Report on Operations for a more detailed description of Group and divisional results.

² The average balances and related ratios (yield/costs) were calculated by considering the assets/liabilities balances at the end of each quarter in 2009 and at end 2008.

1.4 Interest expense and similar charges: breakdown					(€'000)
Items/Type	2009				2008
	Debts	Securities	Other transactions	Total	Total
1. Deposits from Central banks	(400,268)	X	-	(400,268)	(1,227,151)
2. Deposits from banks	(1,815,749)	X	-	(1,815,749)	(8,207,417)
3. Deposits from customers	(5,792,384)	X	-	(5,792,384)	(12,404,409)
4. Debt securities in issue	X	(7,693,158)	-	(7,693,158)	(11,203,218)
5. Financial liabilities held for trading	(119,597)	(184,962)	(1,055,040)	(1,359,599)	(1,300,164)
6. Financial liabilities at <i>fair value</i> through profit or loss	-	(31,261)	-	(31,261)	(34,444)
7. Other liabilities and funds	X	X	(620,052)	(620,052)	(1,049,167)
8. Hedging derivatives	X	X	-	-	(642,669)
Total	(8,127,998)	(7,909,381)	(1,675,092)	(17,712,471)	(36,068,639)

1.5 Interest expense and similar charges: hedging differentials

For the sake of comparability, information on hedging differentials is provided in Table 1.2.

1.6 Interest expense and similar charges: other information

1.6.1 Interest expense on liabilities denominated in currency			(€'000)
Items	2009	2008	
a) Liabilities denominated in currency	(4,735,622)	(9,419,892)	

1.6.2 Interest expense on finance leases			(€'000)
Items	2009	2008	
a) Financial leasing transaction: contingent rents recognised as expense in the period	(80,309)	(1,020)	

Section 2 – Fee and commission income and expense – Items 40 and 50

In 2009 **Fee and commission income** totaled €9,548m, down by 14% over 2008. This downward trend was mainly attributable to the €1,209m decrease (down by 22.2%) in sub-item c) management, brokerage and consultancy services, which in turn was largely the result of the following components:

- segregated accounts down by €610m (or 29%);
- placement of securities down by €298m (or 33%);
- distribution of third-party services down by €148m (or 17%).

2.1 Fee and commission income: breakdown		(€'000)
Type of services/Values	2009	2008
a) guarantees given	554,687	535,734
b) credit derivatives	2,067	9,827
c) management, brokerage and consultancy services:	4,237,676	5,446,502
1. securities trading	495,616	505,064
2. currency trading	393,044	483,485
3. portfolio management	1,486,255	2,182,691
3.1. individual	323,776	470,854
3.2. collective	1,162,479	1,711,837
4. custody and administration of securities	265,580	330,059
5. custodian bank	44,894	57,884
6. placement of securities	607,491	818,684
7. reception and transmission of orders	161,953	140,457
8. advisory services	81,376	78,621
8.1 Related to investments	34,888	25,370
8.2 Related to financial structure	46,488	53,251
9. distribution of third party services	701,467	849,557
9.1 portfolio management	18,420	39,508
9.1.1. individual	12,409	29,488
9.1.2. collective	6,011	10,020
9.2. insurance products	546,565	614,717
9.3. Other products	136,482	195,332
d) collection and payment services	1,853,964	2,000,845
e) securitization servicing	46,124	45,081
f) factoring services	90,075	95,136
g) tax collection services	-	-
h) management of multilateral trading facilities	-	-
i) management of current accounts	1,427,417	1,352,052
j) other services	1,336,468	1,639,728
Total	9,548,478	11,124,905

Under "management, brokerage and consultancy services", the sub-item 3.1 "individual segregated accounts" includes some commission items which were previously recognized under the sub-item "6. placement of securities". 2008 figures were restated accordingly.
Item j) Other services mainly includes commissions for loans amounting to €715m, commissions for foreign operations and services totaling €130m, commissions for other services to customers (e.g. treasury, merchant banking, etc.) of €207m, commissions for ATM and credit card services – which are not included in item "collection and payment services" – amounting to €57m.

Fee and commission expense fell from €2,032m in 2008 to €1,768m in 2009. The €264m (or 13%) decrease was mainly attributable to the sub-item c) management, brokerage and consultancy services (down by €271m, or 26%), which includes the following components:

- Custody and administration of securities down by €81m (or 28%) over 2008;
- Placement of financial instruments down by €84m (or 38%) over 2008;

See the Report on Operations for a more detailed description of Group and divisional results.

2.2 Fee and commission expense: breakdown		(€'000)	
Type of services/Values	2009	2008	
a) guarantees received	(185,939)	(137,732)	
b) credit derivatives	(116,809)	(44,309)

2. currency trading	(17,883)	(19,150)	
3. portfolio management:	(72,458)	(98,979)	
3.1. own portfolio	(9,966)	(20,750)	
3.2. third party portfolio	(62,492)	(78,229)	
4. custody and administration of securities	(208,148)	(289,358)	
5. placement of financial instruments	(138,415)	(222,653)	
6. off-site distribution of financial instruments, products and services	(221,592)	(265,913)	
d) collection and payment services	(429,459)	(458,818)	
e) other services	(272,077)	(356,226)	
Total	(1,767,925)	(2,032,201)	

Section 3 – Dividend income and similar revenue – Item 70

In 2009 **Dividend income**, which is recognized in the accounts in the year in which their distribution is approved, totaled €514m, or €574m if **Income from units in investment funds** is also considered, as against €1,666m in 2008. 2008 dividends relating to available for sale financial assets, which amounted to €721,393m, included €415m of rights to a share of the profits of B&C Holding GmbH.

See the Report on Operations for a more detailed description of Group and divisional results.

3.1 Dividend income and similar revenue: breakdown					(€'000)	
Items/Revenues	2009		2008			
	Dividends	Income from units in investment funds	Dividends	Income from units in investment funds		
A. Financial assets held for trading	369,352	29,360	709,599	42,499		
B. Available for sale financial assets	112,824	20,826	721,393	110,415		
C. Financial assets at <i>fair value</i> thought profit or loss	242	9,904	133	10,637		
D. Investments	31,136	X	71,264	X		
Total	513,554	60,090	1,502,389	163,551		

Total income from units in investment funds

573,644

1,665.940

Section 4 – Gains and losses on financial assets and liabilities held for trading – Item 80

In 2009 **Gains and losses on financial assets and liabilities held for trading**, which comprised the result of the disposal and evaluation of assets and liabilities held for trading, trading profits/losses from derivatives and due to exchange differences, amounted to €1,283m. This represented a sharp increase over the €2,522m loss of 2008, which was mainly attributable to the €2,587m loss generated by the trading business of the former MIB division (now part of CIB: Corporate & Investment Banking) in almost all business segments, particularly in the Markets area.

The table below shows a breakdown of item 80 in 2009 and 2008, as well as the related changes.

Gains and losses on financial assets and liabilities held for trading				(€ million)
	2009	2008	Change	
Financial assets held for trading	3,401	(7,972)	11,373	
Financial liabilities held for trading	(2,972)	5,159	(8,131)	
Exchange differences	(1,088)	625	(1,713)	
Derivatives	1,942	(334)	2,276	
Total	1,283	(2,522)	3,805	

The breakdown of 2008 results by transaction/P&L item was restated from the previous financial year as both losses on financial assets and gains on financial liabilities were reduced by €3,000m due to the incorrect recognition of the result associated with the repurchase of liabilities held for trading. The overall balance remained unchanged.

See the Report on Operations for a more detailed description of Group and divisional results.

4.1 Gains and losses on financial assets and liabilities held for trading: breakdown						(€'000)
Transactions/P&L Items	2009					Net Profit (A+B)-(C+D)
	Capital Gains (A)	Trading profits (B)	Capital losses (C)	Trading losses (D)

Total	74,849,498	60,158,710	(74,815,290)	(59,604,063)	1,282,864	

Section 5 – Fair value adjustments in hedge accounting – Item 90

In 2009 the item **Fair value adjustments in hedge accounting** amounted to €24m (€17m in 2008), which was the result of €5,002m gains and €4,978m losses.

5.1 Fair value adjustments in hedge accounting: breakdown (€'000)		
Profit Component/Values	2009	2008
A. Gains on:		
A.1 Fair value hedging instruments	2,728,175	4,534,386
A.2 Hedged asset items (in fair value hedge relationship)	585,703	1,839,300
A.3 Hedged liability items (in fair value hedge relationship)	1,685,332	500,896
A.4 Cash-flow hedging derivatives	1,403	3,156
A.5 Assets and liabilities denominated in currency	1,749	1,227
Total gains on hedging activities (A)	5,002,362	6,878,965
B. Losses on:		
B.1 Fair value hedging instruments	(2,140,029)	(3,517,899)
B.2 Hedged asset items (in fair value hedge relationship)	(194,372)	(537,616)
B.3 Hedged liability items (in fair value hedge relationship)	(2,641,380)	(2,799,193)
B.4 Cash-flow hedging derivatives	(1,839)	(4,034)
B.5 Assets and liabilities denominated in currency	(981)	(3,538)
Total losses on hedging activities (B)	(4,978,601)	(6,862,280)
C. Net hedging result (A - B)	23,761	16,685

Section 6 – Gains (losses) on disposals/repurchases – Item 100

In 2009 the **disposal/repurchase of financial assets/liabilities** generated net gains in the amount of €411m (€198m in 2008).

6.1 Gains and losses on disposals/repurchases: breakdown (€'000)						
Items /P&L Items	2009			2008		
	Gains	Losses	Net profit	Gains	Losses	Net profit
Financial assets						
1. Loans and receivables with banks	73,836	(46,197)	27,639	2,626	(198)	2,428
2. Loans and receivables with customers	95,109	(41,265)	53,844	38,130	(47,295)	(9,165)
3. Available-for-sale financial assets	386,111	(191,266)	194,845	611,176	(441,573)	169,603
3.1 Debt securities	84,608	(87,013)	(2,405)	58,119	(120,742)	(62,623)
3.2 Equity instruments	280,427	(77,689)	202,738	532,034	(296,727)	235,307
3.3 Units in investment funds	21,076	(26,545)	(5,469)	21,023	(23,993)	(2,970)

4. Held-to-maturity investments	11,511	(5,186)	6,325	610	(846)	(236)
Total assets	566,567	(283,914)	282,653	652,542	(489,912)	162,630
Financial liabilities						
1. Deposits with banks	-	-	-	-	-	-
2. Deposits with customers	16,028	(19)	16,009	55,669	(12)	55,657
3. Debt securities in issue	187,310	(74,482)	112,828	19,833	(39,985)	(20,152)
Total liabilities	203,338	(74,501)	128,837	75,502	(39,997)	35,505
Total financial assets and liabilities			411,490			198,135

2008 gains concerning the sub-item "3. Available-for-sale financial assets – 3.2 Equity instruments", which amounted to €532m, include net gains on disposal of shares of €372m, of which the main components are: Atlantia (€156m), Attijariwafa Bank (€33m), Mastercard (€42m), Speed SpA (€19m), Visa (€20m) and Euroclear (€19m).

2009 gains recognized in the same sub-item 3.2 Equity instruments (€280m) include gains on the disposal of shares included in AFS portfolio for a total amount of €121m, of which the main components are: Banco Sabadell (€30 m), Mastercard (€22m), SI Holding (€15m), BPH Bank (€10m), Visa Inc. (€10m) and Finaosta (€10m). Referred to other equity instruments there is a gain recognized for Heidelberg Cement (€45m).

Section 7 – Gains and losses on financial assets/liabilities at fair value through profit or loss – Item 110

Gains and losses on financial assets/liabilities at fair value comprise net gains arising from the valuation of financial assets and liabilities recognized in the accounts, as well as credit and financial derivatives economically associated to them and already recognized under Financial assets/liabilities held for trading (sub-item Derivatives connected to the fair value option).

At end 2009 this item showed a loss of €31m (€350m in 2008).

The table below summarizes the breakdown of item 110 in 2009 and 2008, as well as the related annual changes.

Gains and losses in financial assets and liabilities at fair value through profit or loss: breakdown				(€ million)
Transactions/P&L Items	2009	2008	Change	
Financial assets	31	331	(300)	
Financial liabilities	(189)	175	(364)	
Exchange rate differences	-	5	(5)	
Financial and credit derivatives	127	(861)	988	
Total	(31)	(350)	319	

See the Report on Operations for a more detailed description of Group and divisional results.

7.1 Net change in financial assets and liabilities at fair value through profit or loss: breakdown						(€'000)
Transactions/P&L Items	2009					
	Capital gains (A)	Gains on transfer (B)	Capital losses (C)	Losses on transfer (D)	Net profit [(A+B)-(C+D)]

Section 8 – Impairment losses – Item 130

The weak macroeconomic environment continued to impact the quality of assets, which resulted in the need to increase write-downs of loans and receivables. In 2009 impairment losses on loans and provisions for guarantees and commitments amounted to €8,152m, as against €3,582m in 2008.

8.1 Impairment losses on loans and receivables: breakdown								(€'000)	
Transactions/P&L Items	2009							Total (1)-(2)	2008 Total
	Write-downs (1)			Write-backs (2)					
	Specific		Portfolio	Specific		Portfolio			
	Write-offs	Other		Interest	Other	Interest	Other		
A. Loans and receivables with banks	(3,110)	(89,550)	(24,938)	-	42,482	-	5,729	(69,387)	(269,199)
- Loans	(3,110)	(89,550)	(16,233)	-	42,482	-	5,729	(60,682)	(269,199)
- Debt securities	-	-	(8,705)	-	-	-	-	(8,705)	-
B. Loans and receivables with customers	(1,204,943)	(8,884,277)	(713,313)	372,260	2,069,403	-	278,105	(8,082,765)	(3,312,754)
- Loans	(1,173,235)	(8,818,141)	(708,020)	372,260	2,068,846	-	277,357	(7,980,933)	(3,238,103)
- Debt securities	(31,708)	(66,136)	(5,293)	-	557	-	748	(101,832)	(74,651)
C. Total	(1,208,053)	(8,973,827)	(738,251)	372,260	2,111,885	-	283,834	(8,152,152)	(3,581,953)

The columns "Write-backs: interest" disclose any increase in the presumed recovery value of impaired positions arising from interest accrued in the year on the basis of the original effective interest rate used to calculate write-downs.

The amounts of write downs in 2009 on B. "Equity Instruments" is €338m. The main components of it are Deutsche Schiffsbank AG (€71m), Banco Sabadell (€52m), Bank of Valletta (€26m), Burgo Group S.p.a (€11m), Colony Sardegna (€11m), BPH Bank (€10m) e Investimenti Infrastrutture S.p.a (€6m).

The amounts of write downs on Units in Investment Funds in 2009 are mainly referred to Private Equity Funds.

In 2008 the amount of item B. "Equity instruments" was €751m. of which the main components were: London Stock Exchange (€308m), Banco Sabadell (€182m), Babcock and Brown (€124m) and Gemina (€34m).

8.2 Impairment losses on available for sale financial assets: breakdown						(€'000)	
Transactions/P&L Items	2009					Total (1)-(2)	2008 Total

C. Total net premiums	86,623	729	87,352	111,745

Section 10 – Other income (net) from insurance activities – Item 160

The item **Other income (net) from insurance activities**, which mainly consists of claims paid (€93m in both years under review) showed a loss of €80m, which was fairly in line with the 2008 figure (€86m),

10.1 Other income (net) from insurance business: breakdown			(€'000)
Items	2009	2008	
1. Net change in insurance provisions	6,552	(15,139)	
2. Claims paid pertaining to the year	(93,166)	(92,807)	
3. Other income and expense from insurance business	6,589	21,759	
Total	(80,025)	(86,187)	

10.2 Net change in insurance provisions: breakdown			(€'000)
Items	2009	2008	
1. Life business			
A. Actuarial provisions	6,552	(15,139)	
A.1 Gross amount for the year	6,552	(15,139)	
A.2 (-) Amount attributable to reinsurers	-	-	
B. Other insurance provisions	-	-	
B.1 Gross amount for the year	-	-	
B.2 (-) Amount attributable to reinsurers	-	-	
C. Insurance reserves when investments risk is borne by the insured party	-	-	
C.1 Gross amount for the year	-	-	
C.2 (-) Amount attributable to reinsurers	-	-	
Total "Life business provisions"	6,552	(15,139)	
2. Non-life business			
Change in provisions for non-life business other than claim provisions, net of amounts ceded to reinsurers	-	-	

10.3 Claims settled during the year: breakdown (€'000)		
Claims Expense	2009	2008
Life business: expense relating to claims, net of reinsurers' portions		
A. Amounts paid out	(23,454)	(22,811)
A.1 Gross annual amount	(23,933)	(23,345)
A.2 (-) Amount attributable to reinsurers	479	534
B. Change in provisions for amounts payable	(260)	(870)
B.1 Gross annual amount	(453)	(1,081)
B.2 (-) Amount attributable to reinsurers	193	211
Total life business claims	(23,714)	(23,681)
Non-life business: expense relating to claims, net of amounts recovered from reinsurers		
C. Claims paid	(67,388)	(67,721)
C.1 Gross annual amount	(79,068)	(81,851)
C.2 (-) Amount attributable to reinsurers	11,680	14,130
D. Change in recoveries net of reinsurers' portion	-	-
E. Change in claims reserve	(2,064)	(1,405)
E.1 Gross annual amount	(2,931)	(2,455)
E.2 (-) Amount attributable to reinsurers	867	1,050
Total non-life business claims	(69,452)	(69,126)
Total claims of the year	(93,166)	(92,807)

10.4 "Other income and expense from insurance activities" : breakdown (€'000)			
	2009		
	Other incomes	Other expenses	Total
10.4.1 Life business	10,393	(1,525)	8,868
10.4.2 Property business	67	(2,346)	(2,279)
Total	10,460	(3,871)	6,589

Net result of the insurance business

The **net result of the insurance business**, attributable to two Koç sub-group subsidiaries (Yapi Kredi Sigorta AS and Yapi Kredi Emeklilik AS) and made up of items "150 – Premiums earned" and "160 – Other income from insurance activities", was €7m as against €26m in 2008.

Net result of the insurance business (€'000)		
Items	2009	2008
Item 150 - Net Premiums	87,352	111,745
Item 160 - Other income from insurance business	(80,025)	(86,187)
Total	7,327	25,558

Section 11 – Administrative costs – Item 180

In 2009 **Administrative costs** amounted to €14,761m, down by €1,323m (or 8%) over 2008, thanks to the decrease in the main cost components.

In particular:

- **“payroll”**, which includes the cost of staff leaving incentives paid following the business combinations with HVB and Capitalia and related restructuring programs in the amount of €247m (€107m in 2008) reclassified as “integration costs” in the condensed income statement, amounted to €9,344m in 2009, down by €681m (or 7%) over 2008 and were mainly attributable to the item “wages and salaries”.
- **“other administrative expenses”**, which similarly include the costs of the business combinations with HVB and Capitalia and related restructuring programs in the amount of €8m (€40m in 2008) reclassified as “integration costs” in the condensed income statement, amounted to €5,416m in 2009, down by €642m (or 11%) over 2008, and were mainly attributable to the following components:
 - indirect taxes and duties -€74m (or 14%);
 - advertising, marketing and communication -€157m (or 32%);
 - indirect expenses related to personnel -€120m (or 27%);
 - information & communication technology expense -€138m (or 10%);
 - other functioning costs -€115m (or 9%);

See the Report on Operations for a more detailed description of Group and divisional results.

11.1 Payroll: breakdown			(€'000)

Section 12 – Provisions – Item 190

Provisions for risks and charges, which amounted to €607m as against the €254m in 2008, were due to expected charges deriving from post-insolvency clawback petitions, claims for damages, litigation and disputes of other nature. This item is updated according to litigation undergoing and its expected outcome.

In particular, in 2009 **provisions** (€917m) were around 10% higher than in 2008 (€829m), while the **reallocation surplus** amounted to €310m, as against €575m in 2008.

12.1 Net provisions for risks and charges: breakdown				(€'000)
Assets/P&L Items	2009			2008
	Provisions (A)	Reallocation surplus (B)	Total (A-B)	Total
1. Other provisions				
1.1 legal disputes	(380,152)	176,755	(203,397)	(99,693)
1.2 staff costs	(168)	1,500	1,332	(1,336)
1.3 other	(536,314)	131,562	(404,752)	(153,396)
Total	(916,634)	309,817	(606,817)	(254,425)

The sub-item "1.3 other" mainly refers to costs deriving from contract obligations (€123m), out-of-court disputes and legal expenses (€94m), disputes concerning financial instruments/derivatives (€38m), customer loyalty programmes (€31m), costs for restructuring plans (€9m) and risks associated to real estate assets (€9m).

Section 13 – Impairments/write-backs on property, plant and equipment – Item 200

In 2009 **Impairment/write-backs on property, plant and equipment** amounted to €867m, as against €819m in 2008.

13.1 Impairment on property, plant and equipment: breakdown				(€'000)
Assets/P&L Items	2009			Net profit (A+B-C)
	Depreciation (A)	Impairment losses (B)	Write-backs (C)	
A. Property, plant and equipment				
A.1 Owned	(834,761)	(34,742)	8,878	(860,625)
- used in the business	(732,501)	(12,611)	3,854	(741,258)
- held for investment	(102,260)	(22,131)	5,024	(119,367)
A.2 Finance lease	(6,288)	-	1	(6,287)
- used in the business	(6,270)	-	-	(6,270)
- held for investment	(18)	-	1	(17)
Total	(841,049)	(34,742)	8,879	(866,912)

Section 14 – Impairments/write backs on intangible assets– Item 210

In 2009 Impairment/write-backs on intangible assets amounted to €651m, as against €715m in 2008.

14.1 Impairment on intangible assets: breakdown (€'000)				
Assets/P&L Items	2009			
	Amortisation (A)	Impairment losses (B)	Write-backs (C)	Net profit (A+B–C)
A. Intangible assets				
A.1 Owned	(642,265)	(8,758)	213	(650,810)
- generated internally by the company	(88,502)	(306)	-	(88,808)
- other	(553,763)	(8,452)	213	(562,002)
A.2 Finance leases	(294)	-	-	(294)
Total	(642,559)	(8,758)	213	(651,104)

Section 15 – Other operating net income– Item 220

Other operating net income is a residual item comprising sundry gains and expenses not attributable to other income statement items.

Other operating net income: breakdown (€'000)		
P&L Items/Values	2009	2008
Total other operating expense	(644,789)	(602,553)
Total other operating revenues	1,485,932	1,597,785
Other operating net income	841,143	995,232

15.1 Other operating expense: breakdown (€'000)		
Type of expense/Values	2009	2008
Costs for operating leases	(1,014)	(651)
Non-deductible tax and other fiscal charges	(2,933)	(6,771)
Writedowns on improvements of goods third parties	(62,925)	(52,616)
Costs related to the specific service of financial leasing	(94,869)	(88,605)
Other	(483,048)	(453,910)
Total other operating expense	(644,789)	(602,553)

The item "other" includes: costs for sundry transactions/damages of €102m, first-consolidation costs of €115m, costs associated to the leasing business of €63m, sundry costs concerning previous years of €29m, costs associated to the non-banking business of €22m, costs associated to real estate assets of €11m, ancillary costs connected to customer relationships of €11m.

15.2 Other operating revenues: breakdown (€'000)		
Type of revenue/Values	2009	2008
A) Recovery of costs	463,034	556,842
B) Other revenues	1,022,898	1,040,943
Revenue from administrative services	152,048	179,565
Revenues on rentals Real Estate investments (net of operating direct costs)	148,469	178,657
Revenues from operating leases	162,541	156,426
Recovery of miscellaneous costs paid in previous years	43,011	19,947
Revenues on Financial Leases activities	158,465	155,697
Others	358,364	350,651
Total operating revenues (A+B)	1,485,932	1,597,785

The item "other" includes: ancillary revenues associated to the leasing business of €70m, revenues associated to the non-banking business of €61m, reimbursement and compensation for damages of €48m, sundry revenues associated to real estate assets of €23m

Section 16 – Profit (loss) of associates – Item 240

The net result of companies subject to significant influence, which is part of item 240 Profit (loss) of associates, amounted to €84m (€416m in 2008), which is the difference between **A. Income** of €218m and **B. Expense** of €134m. In particular:

- the sub-item **A. Income** includes:
 - €206m **revaluations** related to gains on companies valued at Equity method concerning Oesterreichische KontrollBank (€42m), Aviva (€37 m), Bank fur Tirol und Voralberg (€24m), Oberbank (€23m), CreditRas Vita (€20m), BKS Bank (€12m), CNP Unicredit Vita (€10m)
 - €11m **gains on disposal** concerning Schwabische Bank AG (€6m), Centrale dei Bilanci (€2m), Caricese (€1m).
- the sub-item **B. Expense** includes:
 - €70m **writedowns** related to losses on companies valued at Equity method Ca Immobilien Anlagen (€39m), Ramiuscap (€17m), Da Vinci (€6m)
 - €57m **impairment** Kinabalu Financial Products (€26m), Vereinsbank Victoria Bauspar (€12m), Malgara (6 milioni), Ramius HVB (€6m), Unicredit Advisory Limited (€3 m)
 - €6m **losses on disposal** for Ramius HVB

16.1 Profit (Loss) of associates: breakdown		(€'000)	
P&L Items/Sectors	2009	2008	
1) Jointly owned companies - Equity			
A. Income	-	-	
1. Revaluations	-	-	
2. Gains on disposal	-	-	
3. Writebacks	-	-	
4. Other gains	-	-	
B. Expense	-	-	
1. Writedowns	-	-	
2. Impairment losses	-	-	
3. Losses on disposal	-	-	
4. Other expenses	-	-	
Net profit	-	-	
2) Companies subject to significant influence			
A. Income	217,935	558,690	
1. Revaluations	206,406	193,970	
2. Gains on disposal	11,446	364,720	
3. Writebacks	83	-	
4. Other gains	-	-	
B. Expense	(133,930)	(142,778)	
1. Writedowns	(69,999)	(96,607)	
2. Impairment losses	(57,438)	(29,122)	
3. Losses on disposal	(6,493)	(17,049)	
4. Other expenses	-	-	
Net profit	84,005	415,912	
Total	84,005	415,912	

In 2008 the results were:

A. Income

- **Gains** were €193,970 thousand. This amount principally includes Mediobanca (€41,081 k), Oberbank (€37,088 k), CreditRas Vita (€29,142 k), Bank Fur Tirol und Voralberg (€23,017 k), BKS Bank (€16,448 k), Aviva (€14,805 k), Osterreichische Kontroll Bank (€10,369 k).
- **Gains on disposal** of companies subject to significant influence totaled €364,720 thousand, comprising inter alia gains on disposal of Centrale dei Bilanci (€93,697 k), Ganymed Immobilien M.B.H. (€56,822 k), Hypo Stavebni Sporitelna (€46,302 k), Budapesti Ertektozsde (€41,221 k).

B. Expense

- **Charges relating to companies subject to significant influence** include write-downs of associates valued at equity amounting to €96,607 k, mainly attributable to CNP UniCredit Vita (€60,140 k), and Ca Immobilien Anlagen (€5,847 k).
- **Impairment losses** of companies subject to significant influence totaled €29,122 k. This amount principally includes UniCredit Factoring S.r.o. (€10,022 k), HVB Banca Pentru Locuinte (€7,587 k), and Weilburg Grundstück M.B.H. (€4,000 k).

Section 17 – Gains and losses on tangible and intangible assets measured at fair value - Item 250

In 2009 the item “Gains and losses on tangible and intangible assets measured at fair value” recorded a loss of €38m, as against €84m in 2008.

17.1 Net gains (losses) on property, plant and equipment and intangible assets measured at fair value: breakdown					(€'000)
Assets/P&L Components	2009				Net profit (A-B+C-D)
	Revaluations (A)	Writedowns (B)	Exchange Differences		
			Positive (C)	Negative (D)	
A. Property, plant and equipment	-	(38,491)	-	-	(38,491)
A.1 Owned:	-	(38,491)	-	-	(38,491)
- Used in the business	-	-	-	-	-
- Held for investment	-	(38,491)	-	-	(38,491)
A.2 Held by finance leases:	-	-	-	-	-
- Used in the business	-	-	-	-	-
- Held for investment	-	-	-	-	-
B. Intangible assets	-	-	-	-	-
B.1 Owned:	-	-	-	-	-
B.1.1 generated internally by the company	-	-	-	-	-
B.1.2 Other	-	-	-	-	-
B.2 Held by financial leases	-	-	-	-	-
Total	-	(38,491)	-	-	(38,491)

The amount refers to the valuation of real estate assets carried out during the year before the transfer and their consequent reclassification (see note below table 12.2 of Balance Sheet Assets).

Section 18 – Impairment of goodwill - Item 260

There was no impairment on goodwill in 2009.

18.1 Impairment of goodwill: breakdowns			(€'000)
Components	2009	2008	
Impairment of goodwill	-	(750,000)	

In 2008 impairment of goodwill was attributable to JSC ATF Bank (€417m) and JSC Ukrsofsbank (€333m). See Part A) Accounting Policies for a description of the methods to measure impairment of goodwill. See Part B) Balance Sheet for a description of goodwill impairment procedures.

Section 19 – Gains (losses) on disposals of investments – Item 270

Item 270 concerned **Gains (losses) on disposal of:**

A. Property: mainly relating to UniCredit Real Estate's rationalization of Group property (€692m).

In particular, **gains on the disposal** of UniCredit Real Estate property concerned transactions with the Fondo Core Nord Ovest (€165m) and the Fondo Omicron Plus Immobiliare (€461m), as well as other disposal transactions with third parties (€68m);

B. Other assets in respect of the disposal of Hyperion immobilienvermietungsgesellschaft m.b.h. (€9m), Bodehewitt ag & co. Kg (€3m).

Disposal of other assets by Dab Bank ag (€17m) and Pioneer Investment Management S.G.R. (€18m).

19.1 Gains and losses on disposal of investments: breakdown (€'000)		
P&L Items	2009	2008
A. Property		
- Gains on disposal	725,254	405,063
- Losses on disposal	(1,878)	(3,530)
B. Other assets		
- Gains on disposal	71,920	500,625
- Losses on disposal	(21,311)	(116,879)
Net Profit	773,985	785,279

In 2008 Gains on disposal were:

- **Property** were produced by UniCredit Real Estate (€362.8 million);
- **Other assets** refers to the sale of branches as instructed by the Italian competition and market authority (AGCM), on which there was a capital gain of €304 million, and the sale of no longer strategic equity interests and assets: Bank BPH SA (€107.4 million) and FIMIT – Fondi immobiliari italiani SGR SpA (€25.2 million).

Section 20 – Tax expense (income) related to profit or loss from continuing operations – Item 290

"Income tax applies only at the domestic level in that there is no tax or category of taxes applicable outside the tax systems of each individual country, and there is no tax applicable to consolidated transnational income. When reference is made to consolidated income, the reference in any case is always to income consolidated on a purely domestic basis.

Out of the main countries where the UniCredit Group operates, there are domestic consolidated tax schemes in Italy, Germany, Austria and the UK, but no such structures exist in Ireland, Poland, Bulgaria, Turkey or other CEE countries.

Consolidated tax scheme regulations also differ from one country to another, sometimes substantially. Nonetheless, the main benefit common to national consolidated tax schemes is the right to offset algebraically the income and losses of companies belonging to the same group.

It should also be noted that the requirements for participating in a national consolidated tax scheme do not always coincide with the requirements for participating in a banking or other group for the purposes of accounting consolidation based on international accounting standards (IFRS).

Each individual country has an autonomous tax system in which both the determination of the tax basis and the applicable tax rates differ. Especially in the area of income tax, to this day rather significant differences still exist between national tax systems, even within the European Union itself.

With regard to tax rates, corporate income is taxed at a rate of 10% in Bulgaria, 16% in Hungary and Romania, 25% in Austria, 27.5% in Italy, – where, however, the regional tax on productive activities (IRAP) must be added, the nominal rate of which (3.9%) applies to a rather broad tax base – 19% in Poland, 20% in Turkey and 28% in the UK.

This framework makes it essentially impossible to compare the consolidated tax position with the position of the individual companies that make up the Group.

Furthermore, the typical elimination of intragroup items in accounting consolidation does not make any reference to income tax, which is limited to each individual company.

Bearing in mind that there were no major changes in tax rates in any of the countries where the Group operates, the most significant tax aspect that distinguishes 2009 from 2008 is the absence of extraordinary items comparable to the exemption for goodwill that occurred in Italy in 2008, based on paragraphs 10 and 11 of Article 15 of Decree Law No. 185 of November 29, 2008, which essentially resulted in the 2008 consolidated tax rate of 9.3%.

Conversely, the tax rate of 30.4% in 2009 is a normal tax rate for the Group in the absence of any such extraordinary events.

The decision to exempt goodwill in the 2008 budget also produced an extraordinary tax payment of €1,384,307,604.00 in Italy on June 16, 2009.

In 2009 **Income tax** for the period amounts to €888 million (an increase with respect to the €465 million recorded in the prior year, which benefited from the positive effects of goodwill deductions), with a tax rate of 30.4% versus 9.3% of prior year.

20.1 Tax expense (income) related to profit or loss from continuing operations: breakdown (€'000)		
P&L Items/Sectors	2009	2008
1. Current tax (-)	(1,837,643)	(3,302,102)
2. Adjustment to current tax of prior years (+/-)	218,597	185,893
3. Reduction of current tax for the year (+)	8,505	49,617
4. Changes to deferred tax assets (+/-)	(307,481)	2,719,710
5. Changes to deferred tax liabilities (+/-)	1,029,715	(118,552)
6. Tax expense for the year(-) (-1+/-2+3+/-4+/-5)	(888,307)	(465,434)

20.2 Reconciliation of theoretical tax charge to actual tax charge (€'000)	
	2009
Total profit or loss before tax from continuing operations (item 280)	2,922,927
Theoretical tax rate	27.5%
Theoretical computed taxes on income	(803,805)
1. Different tax rates	286,601
2. Non-taxable income - permanent differences	629,929
3. Non-deductible expenses - permanent differences	(397,992)
4. Different fiscal laws/IRAP	(589,164)
a) IRAP (italian companies)	(408,891)
b) other taxes (foreign companies)	(180,273)
5. Prior years and changes in tax rates	253,995
a) effects on current taxes	90,545
- tax loss carryforward/unused tax credit	8,324
- other effects of previous periods	82,221
b) effects on deferred taxes	163,450
- changes in tax rates	2,080
- new taxes incurred (+) previous taxes revocation (-)	26,971
- true-ups/ adjustments of the calculated deferred taxes	134,399
6. Valuation adjustments and non-recognition of deferred taxes	(243,265)
a) deferred tax assets write-down	(30,199)
b) deferred tax assets recognition	68,824
c) deferred tax assets non recognition	(39,577)
d) deferred taxes non-recognition according to IAS 12.39 and 12.44	(230,895)
e) other	(11,418)
7. Amortization of goodwill	2,307
8. Non-taxable foreign income	(85,740)
9. Other differences	58,827
Recognized taxes on income	(888,307)

Section 21 – Gains (losses) on non-current assets and disposal groups held for sale net of taxes- Item 310

There were no gains (losses) on non-current assets and disposal groups held for sale during 2009.

Section 22 – Minorities – Item 330

In 2009 **Minorities** recorded gains in the amount of €332m (which was the result of profits of €342m and losses of €3m, as well as other consolidation adjustments of €7m). The main contributions came from the minority shareholders of Bank Pekao and Bank Austria groups.

In 2008 Minorities recorded gains in the amount of €518m (profits of €521 offset by losses of €2m and consolidation adjustments of €1m).

22.1 and 22.2 Breakdown of item 330 "Minority gains (losses)" (€'000)		
	2009	2008
Profit (loss) of:	339,154	518,137
Bank Pekao S.A. Group	222,720	358,763
BA-CA Group	50,328	137,957
HVB Group	61,884	18,071
Unicredit Global Leasing Group	(321)	(999)
Banca Agr. Comm. Rep. S. Marino S.A.	2,876	3,207
FIMIT	-	589
Xelion Doradcy Finansow	(403)	(882)
IRFIS	(2,152)	17
I-FABER	1,301	945
Other	2,921	469
Other consolidation adjustments	(6,859)	(623)
Total	332,295	517,514

Section 23 – Other information

There is no information to be disclosed in this section.

Section 24 – Earnings per share

Earnings per share		
	2009	2008
Net profit for the period attributable to the Group (<i>thousands of euros</i>) ¹	1,571,247	4,011,788
Average number of outstanding shares ²	15,810,771,546	15,642,228,959
Average number of potential dilutive shares	8,579,747	10,058,850
Average number of diluted shares	15,819,351,293	15,652,287,809
Earnings per share €	0.099	0.256
Diluted earnings per share €	0.099	0.256

1. € 131,078 thousand was deducted from 2009 net profit of €1,702,325 thousand due to disbursements charged to equity made in connection with the contract of usufruct on treasury shares agreed under the 'cashes' transaction.

2. Net of the average number of treasury shares (and, only for 2009, of further 967,564,061 shares held under a contract of usufruct) and increased by the number of new shares issued as a consequence of the bonus issue approved by the Extraordinary Shareholders' Meeting on April 29, 2009, pursuant to Section 2442 of the Italian Civil Code. Following the bonus issue, the number of ordinary shares outstanding before the event is adjusted for the proportionate change in the number of ordinary shares outstanding as if the event had occurred at the beginning of the earliest period presented (IAS 33 §28).

Part D - Consolidated Comprehensive Income

Part D – Consolidated Comprehensive Income	293
Consolidated Analytical Statement of Comprehensive Income.....	293

Part D – Consolidated Comprehensive Income

Following the first amendment to Banca d'Italia Circular 262/2005 and under the new version of IAS 1, the Statement of Comprehensive Income, was introduced. It starts from profit (loss) for the period and shows items of income and expense which were not recognized in the net profit or loss, in compliance with international financial reporting standards. These items are changes in evaluation for the period contra valuation reserves (after tax) and relate to: available-for-sale financial assets; property, plant and equipment; intangible assets; hedges of foreign investments; cash-flow hedges; exchange differences; actuarial gains (losses) on employee defined-benefit plans. They also include reclassification adjustments, i.e. amounts reclassified in profit or loss for the period, which were recognized in other comprehensive income in the current or previous periods. The above mentioned changes in evaluation are indicated separately if they refer to non-current assets classified as held for sale and to associates valued at equity.

In addition, Part D of the Notes to the Consolidated Accounts, which was previously dedicated to "Segment Reporting" is now called "Consolidated Statement of Comprehensive Income," and in fact, contains a table showing the income components.

Consolidated Analytical Statement of Comprehensive Income

Consolidated Analytical Statement of Comprehensive Income (€'000)			
Items	2009		
	Before tax Effect	Tax Effect	After tax effect
10. Net profit (loss)	X	X	2,034,620
Other comprehensive income			
20. Available for sale financial assets	902,267	(115,099)	787,168
a) <i>fair value</i> changes	696,893	(87,793)	609,100

100. Valuation reserves from investments accounted for using the equity method	(4,186)	-	(4,186)
a) <i>fair value</i> changes	32,964	-	32,964
b) reclassifications through profit or loss	9,725	-	9,725
- due to impairment	-	-	-
- gains/losses on disposals	9,725	-	9,725
c) other variations	(46,875)	-	(46,875)
110. Total of other comprehensive income after tax	642,539	(176,833)	465,706
120. Comprehensive income after tax (10+110)	642,539	(176,833)	2,500,326
130. Consolidated comprehensive income attributable to minorities	(7,484)	(1,685)	(341,464)
140. Consolidated comprehensive income attributable to Parent Company	635,055	(178,518)	2,158,862

The "Consolidated Comprehensive Income attributable to minorities" (item 130) is different from "Net profit for the period attributable to minorities" (item 330 of Consolidated income statement), as it includes the effect arising from "other comprehensive income" of minorities.

Part E – Risks and related risk management policies

Part E – Risks ad related risk management policies	296
Section 1 – Credit Risk.....	299
Section 2 – Market Risk	388
Section 3 – Liquidity Risk	414
Section 4 – Operational Risk.....	423
Section 5 – Other Risks	444

Note:

As required by regulations (Banca d'Italia Circular letter n.263 issued on December 27th , 2006, Title 4), the disclosure (3rd Pillar of Basel II) is published on UniCredit Group's website (www.unicreditgroup.eu).

Part E – Risks and related risk management policies

Following the above-mentioned first amendment to Banca d'Italia Circular 262/2005 the disclosure on derivative instruments presented in Part E – Risks and related risk management policies was reorganized in order to align it to the FINREP regulatory reporting framework under IAS/IFRS.

Part E - Risks and related risk management policies only refers to the banking group.

Since insurance companies and other companies don't represent a significant business - if compared to banking group - there is no specific section of this document on their risks and related risk management policies.

Risk Management in UniCredit Group

UniCredit Group monitors and manages its risks through rigorous methodologies and procedures proving to be effective through all phases of the economic cycle. The control and steering of the Group risks are exerted by the Holding Company Risk Management function (Group CRO), to which have been assigned the following tasks:

- optimizing asset quality of the Group and minimizing the cost of the relevant risks, in line with the risk / return targets assigned to each business area;
- determining, in concert with the CFO, the Group's risk appetite and evaluating its capital adequacy, and cascading it to the Business Areas / Legal Entities, consistently with Basel II Pillar II requirements;
- defining - in compliance with Basel II standards and Bank of Italy requirements – the Group rules, methodologies, guidelines, policies and strategies for risk management, and, in cooperation with the Organisation department, the relevant processes and their implementation;
- setting up a credit and concentration risk control system both of single counterpart / economic groups and significant clusters (e.g. as geographical areas / economic sectors), monitoring and reporting the previously established limits;
- defining and providing to the Business Areas and to the Legal Entities the valuation, managerial, measuring, monitoring and reporting criteria of the risks and ensuring the consistency of systems and control procedures both at Group and Legal Entity level;
- supporting the Business Areas to achieve their targets, contributing to products and to business development;
- verifying, by means of the initial and ongoing validation process, the adequacy of the risk measurement systems adopted throughout the Group, steering the methodological choices towards higher and homogeneous qualitative standards and controlling the coherence of the usage of the above systems within the processes;
- setting up an adequate system of preventive risk analysis, in order to quantify the impacts of a quick worsening of the economic cycle or of other shock factors (i.e. Stress Test) on the Group's economic - financial structure. This holds for single risk types as well as their integration and comparison to available capital;
- creating a risk culture across the whole Group.

Credit market turmoil has affected the global banking system since the second half of 2007, contributing to a sharp slowing of the world economy. This macroeconomic scenario has entailed an increase in the cost of credit risk, a decrease in asset values, as well as higher costs deriving from write-downs and depreciation of some assets combined with a decrease in profitability. Although the Group has an adequate level of portfolio diversification, it is nevertheless exposed to risks if loan counterparties become insolvent or are unable to meet their obligations. Difficulties could arise in the recovery process of asset

values proving inconsistent with current appraisals.

In light of the still challenging macroeconomic environment, a sound and effective risk management has highest priority within the Group.

Therefore the Group CRO has implemented in 2009 a new risk governance model emphasizing this guiding principle and aimed to:

- strengthen the capacity of steering, coordination and control activities of some aggregated risks (so called “Portfolio Risks”), through dedicated responsibility centres (“Portfolio Risk Managers”) totally focused and specialized on such risks, from a Group and cross – divisional perspective;
- enhance coherence with the Group business model, ensuring clear specialization and focus – from a purely transactional perspective - of specific centres of responsibility on risks originated by the Group “risk taking” functions, at the same time keeping these “centres of responsibility” (“Transactional Risk Managers”) totally independent from the “risk taking” functions (i.e. Business units, Treasury, Asset Management, CEE countries).

Consistently with the Risk Management architecture redesign, the set-up, role and rules of the Group Committees responsible for risk topics have been revised. In order to strengthen the capacity of independent steering, coordination and control of Group risks, to improve the efficiency and the flexibility on the risk decision process and to address the interaction between the relevant risk stakeholders three distinct levels of Risk Committees have been set-up:

- the "Group Risk Committee" being responsible for the Group strategic risk decisions;
- the "Group Portfolio Risks Committees", tasked with addressing, controlling and managing the portfolio risks;
- the "Group Transactional Committees" that will be in charge of evaluating the single counterparts / transactions impacting the overall portfolio risk profile.

In accordance with the roll-out plan for the Advanced Internal Rating Based (A-IRB) criteria, communicated to Bank of Italy in September 2008, the Group has either implemented or is in the process to extend the A-IRB approach to further Subsidiaries of the Group that are yet to adopt this approach. Regarding the compliance with the Pillar II of the New Capital Accord (Basel II), a specific capital adequacy valuation process was developed in 2009, based on existing approaches. It envisages a general framework as well as a set of specific guidelines aimed at setting out a common approach at Group level in the areas of capital planning, the definition of risk appetite and the measurement, management, control and governance of risks. In addition, synthesis elements concerning risks measurement were introduced to better support processes such as capital planning and capital adequacy. The Group’s risk profile is represented by internal capital that is calculated by aggregating risks, net of diversification benefits, plus a “cushion” which incorporates model risk and the variability of the economic cycle. Capital adequacy is evaluated either on the basis of Pillar I metrics or using best practices, by comparing internal capital to available financial resources (AFR) through their ratio, named risk-taking capacity. The achievement of capital adequacy also implies proper risk management based on the involvement of senior management by identifying the appropriate decision-making Bodies, properly assigning duties and responsibilities and reviewing the overall process.

With regard to the use of the AMA (Advanced Measurement Approach) model for the calculation of capital for operational risks, this method, which is determined centrally by the Parent Company, in 2009 was extended to further Group entities on the basis of the implementation plan.

In 2009 relevant enhancements to the Credit Portfolio Model, used for estimating Economic Capital on credit risk, have been introduced. A revision of the global correlation framework was implemented and combined with a more granular description of Central and Eastern European Countries' dependence on macroeconomic variables. At the same time, the correlation between retail and corporate exposures was reviewed, producing overall a more robust design of the dependence in the light of the recent financial turmoil. A new IT architecture for Credit VaR and stress testing has been developed. It is currently in the testing phase and deployment to production is planned for the first half of 2010. Among other benefits, it will allow a better access to risk measures and robustness checks on input data.

Further enhancements of the framework, e.g. introducing a methodology for risk appetite regarding Country risks, are either ongoing or planned in the course of 2010.

During the same period, the Group also introduced statistical models to study retail customers' behavior in connection with assets and liabilities with unspecified maturities (sight deposits) or with a prepayment option (residential mortgages). The risk associated with changes in interest rates is therefore complemented by an assessment of the likely statistical error of forecast models.

In order to ensure that product and portfolio valuations are as conservative as possible, specific guidelines were issued concerning the evaluation of derivatives and the identification of model reserves. These guidelines focus in particular on structured credit derivatives; however the relevant calculations have been extended to cover all types of financial products, and thus all asset classes.

In the reporting period the liquidity limits were revised in alignment with the reduced risk appetite. Due to improvement in the markets, this risk reduction was achieved relatively easy. Thus strengthening the resilience of the Group to future liquidity shocks.

The experience of the turmoil in last quarter of 2008, was used in the regular update of the Group's Liquidity Policy. The Contingency Liquidity Policy was also revised and the set of stress test scenarios recalibrated and extended.

Section 1 – Credit Risk

Qualitative Information

1. General

Within the framework of the Holding Company risk management model redesign, the “Global Transactions Team Leader” role (“GTTL”) was introduced leveraging on the expertise of risk managers specialized in products / transactions such as “Acquisition & Leverage Finance”, “Project Finance”, “Commodities Trade Finance” and “Special Products”, similar to the model in place for the evaluation of counterpart credit risk performed by the “Global Industry Team Leaders” (“GITLs”), specialized in sectorial analysis. A dedicated project focusing on further improvements in Banks and other Financial Institutions as well as Country risk optimization has been launched. For the risk management of these counterparts, the concept of “Group Competence Teams” has been introduced, managing the credit activity for all the Legal Entities at UniCredit Group level.

With the objective of providing best in class service to large multinational clients, increasing value creation, defining an effective and consistent credit appetite at UniCredit Group level towards customers and/or economic groups, which have relationship with several Legal Entities, minimizing the cost of risk and implementing an efficient credit process, UniCredit Group redesigned the global approach to serve (both from a commercial and a credit point of view) the above mentioned segment of customers. The new service model (the GAM, “Global Account Management”) provides for a global coordination of commercial strategy and definition of global credit risk appetite towards the managed counterparts. Dedicated relationship and risk managers have been identified as unique reference points for client group’s global commercial and credit strategy coordination, for the global credit position evaluation and its risk profile monitoring.

The Group continues to strongly invest in the extension of Basel II to the entire perimeter. By the end of 2009 UniCredit Group asked for IRB authorization for ten additional Legal Entities and five additional rating systems for the A-IRB Legal Entities.

In the second half of 2009, the Group also reviewed the Group wide IRB rating systems for multinational companies and for Banks, in order to overcome some weaknesses characterizing previous versions. Furthermore, the scope of application has been extended to the Securities Industries and to the Corporate Treasury / Funding Vehicles by introducing adjustments based on these segments peculiarities. Additionally, a new module to evaluate ship mortgages in UniCredit Bank AG (former HVB) has been recently introduced.

With reference to the functional measures for the “compliance” with Basel II requirements, an assessment of the activities related to the eligibility check of credit risk mitigants was carried on, adapting processes and policies. In particular, for the Italian Legal Entities, specific processes to meet the legal certainty and the regulatory requirements have been implemented for mutual guarantees (“*garanzie consortili*”).

According to the Supervisory Authorities’ instructions, Credit risk stress testing activities were carried out on the basis of common stress scenarios at international level, with a special focus on Central Eastern Europe (CEE) Countries. In particular, stress tests have been performed on Bank of Italy and ECOFIN (coordinated by the Committee of European Banking Supervisors (CEBS)) requests. The simulation impacts have been assessed both at profit / loss level, considering the effects on provisions and profit / loss for the period, and at balance sheet level, where effects on the Pillar I capital requirement targets and on economic capital occurred.

During the first quarter of 2009, compliant with Pillar II framework, an update on concentration risk has been performed for Single Name Concentration Limits (so called Bulk Risk Limits) and for Sectorial Limits (so called Industry Limits).

With reference to restructuring and workout activities, a new specialized Committee – dedicated to the evaluation of counterparts under restructuring / workout – has been established, while the Group Transactional Credit Committee focuses on credit underwriting.

With specific focus on the Retail Strategic Business Area and in light of the present economic situation, actions aiming at strengthening and optimizing processes and IT tools concerning monitoring and work out activities have been developed with emphasis on the reshaping of the credit framework and on the “friendly collection”. In order to continue to adequately ensure a support to the economy, two ad hoc initiatives have been launched for the Italian market, “SOS Impresa Italia” and “Insieme 2009”, together with the ones coordinated by the Italian Banking Association, supporting Small Business and consumers respectively.

Within the framework of the “General Group Credit Policy”, special guidelines concerning “Structured Trade and Export Finance (STEF)”, aiming at guaranteeing a standard approach governing this business at Group level were developed, as well as specific instructions to be followed for “Commodity Trade Finance”, “Receivables Finance” and “Export Finance”.

Monitoring and reporting activities for the Group credit risk portfolio were further developed, widening the consolidated disclosure to the other important risk categories.

2. Credit Risk Management Policy

2.1 Organization

The new Group Risk Management framework aims at ensuring the right balance between “risk type” and “transactional specialization” by adopting a matrix approach. Group portfolios will be clustered by risk type (“credit and cross-border risks”, “market risks” and “operational & reputational risks”) and will intersect with transactions grouped on a divisional level (CIB & PB, CEE, Retail, Treasury, Asset Management). The matrix approach will lead to the set-up of two different responsibility centres on credit risk. On the one side the “Credit and Cross Border Risks Portfolio Management” department, which oversees and manages the overall credit and cross-border risk profile of the Group defining all the relevant strategies, methodologies and limits. On the other side, the “Transactional Risk Managers” will be the responsibility centres for the credit risks originated by the Group “risk taking” functions.

Besides the Group Portfolio and Transactional Risk Managers, the new Risk Management set-up comprises the “Strategic Risk Management and Control” department, responsible for, among the others, the management of Basel II activities (including measurement of internal capital according to Pillar II, definition of the risk appetite and the “ICAAP” coordination), the Group internal validation of both Pillar I systems and Pillar II models, as well as centralized risk reporting and risk policies functions for all the risks at Group level, and a specialized department (“Special Credit”), responsible for coordinating, addressing, supporting and – with reference to relevant files - managing restructuring and workout activities.

In order to strengthen the capacity of independent steering, coordination and control of Group risks, to improve the efficiency and the flexibility on the risk decisional process and to address the interaction between the relevant risk stakeholders, dedicated Risk Committees have been set-up:

- the "Group Risk Committee" being responsible for the Group strategic risk decisions;
- the "Group Credit and Cross-Border Risk Committee", responsible for controlling and monitoring credit and cross-border risks, including approval of risk strategies, policies, methodologies and limits as well as regular reporting;
- the "Group Transactional Credit Committee", in charge of evaluating the single counterparts / transactions impacting the overall portfolio risk profile;
- the "Group Special Credit Committee", in charge of evaluating restructuring or workout files and monitoring the overall restructuring and workout portfolio development.

2.2 Factors that generate Credit Risk

In the course of its credit business activities the Group is exposed to the risk that its loans may, due to the deterioration of the debtor's financial condition, not be repaid at maturity, and thus resulting in a partial or full write-off. This risk is always inherent in traditional lending operations regardless of the form of the credit facility (whether cash or credit commitments, secured or unsecured, etc).

The main reasons for default lie in the borrower's lacking the autonomous ability to service and repay the debt (due to a lack of liquidity, insolvency, etc.), as well as the occurrence of events that are unrelated to the debtor's operating and financial condition, such as Country risk or the impact of operational risk. Other banking operations, in addition to traditional lending and deposit activities, can expose the Group to other credit risks. For example, 'non-traditional' credit risk may arise from:

- entering into derivative contracts;
- purchasing and selling securities, futures, currencies or commodities;
- holding third-party securities.

The counterparties in these transactions or issuers of securities held by Group Legal Entities could default as a result of insolvency, political and economic events, lack of liquidity, operating problems or other reasons. Defaults in relation to a large number of transactions, or one or more large transactions, could have a material adverse impact on the Group's operations, financial condition and operating results. The Group monitors and manages the specific risk of each counterparty and the overall risk of loan portfolios through procedures, structures and rules, that steer, govern and standardize the assessment and management of credit risk, in line with the Group principles and best practice, and which are capable of extending their effectiveness to all phases of the economic cycle.

With particular reference to the current scenario, characterized by worsening of some economic and financial fundamentals in an already problematic phase of the cycle, the Group, maintaining existing rationales and procedures, has strengthened the control and management of credit risk through ongoing and rigorous respect of the rules for granting loans and by enhancing monitoring procedures. In addition, the existing relevant structures have been strengthened, and new ones have been created specifically dedicated to more sensitive areas, for purposes of timely detection of any critical signs.

2.2.1 Country risk

Country risk is defined as the risk of losses of exposures caused by events in a specific Country which may be under the control of the government but not under the control of a private enterprise or individuals. This may imply that the repayment of assets within a specific Country will be ultimately prevented by actions of the Country's government (e.g. transfer risk, expropriation risk, legal risk, tax risk, security risk, delivery risk) or by a deterioration of the economic and / or political environment (e.g. a sharp recession, currency and / or banking crisis, disaster, war, civil war, social unrest) of a Country. Country risk is managed by determining the appropriate maximum operational risk levels, whether in the banking or financial business, that can be assumed by the various Legal Entities belonging to the Group vis-à-vis all counterparties (sovereigns, government entities, banks, financial institutions, corporate customers, small businesses, individuals, project finance, etc.) residing in or related to the Country, for cross-border transactions (from the standpoint of the Entity providing the loan) in foreign and local currency (from the standpoint of the borrower).

Country risk management processes are mainly concentrated at Holding Company in terms of both methodological aspects and the decision-making process, in order to ensure a uniform assessment and monitoring approach, particularly for the rating assignment – PD (probability of default) and LGD (loss given default) – as well as control of risk concentration.

A new methodology for defining the risk appetite is planned to be introduced in 2010 to set plafond limits for individual Countries in a top-down / bottom-up process considering the risk of the Country, the size, regulatory capital limits, domestic corporate customer requests, business opportunities, actual exposure, earning targets and strategic targets, including the target risk profile.

2.3 Credit Risk Management, Measurement and Control

2.3.1 Reporting and Monitoring

The fundamental objective of the reporting and monitoring activities performed by the CRO function is the analysis of the main drivers and parameters of credit risk (exposure at default (“EAD”), expected loss (“EL”), migration, cost of risk etc.) in order to promptly initiate any counter-measures on portfolios, sub-portfolios or individual counterparties.

Group CRO function performs the reporting for credit risk at portfolio and individual counterparty level, producing reports at Group level, both recurring and specific (on demand of Senior Management or external entities, e.g., regulators or rating agencies) with the objective of analyzing the main risk components and their development over time, and thus to detect any signals of deterioration at an early stage and, subsequently, to put in place the appropriate corrective initiatives. The performance of the credit portfolio is analyzed with reference to its main risk drivers – such as growth and risk indicators - customer segments, industrial sectors, regions and the performance of credits in default and the relevant coverage.

Portfolio reporting activities at Group level are carried out in close collaboration with the Transactional Risk Managers and the Credit & Cross-Border Risk Portfolio Managers that, within their respective perimeters, implement their specific reporting activities.

In the first half of 2009, reporting activities developed considerably thanks to the gradual improvement in the quality of data and processes supporting the consolidated reporting (i.e. development of a report on Enterprise Risk Management, the “ERM Report”). The Group Risk Reporting function, at central level, also uses the “Credit Tableau de Boards”, a quarterly instrument which contains detailed information on the trends in the risks of the Strategic Business Area, to support the production of the aforementioned reports.

In addition, Credit & Cross-Border Risk Portfolio Management is responsible for monitoring and providing independent evaluations of customers and individual transactions that present a high level of credit risk. Credit monitoring activities focus on the early disclosure and management of exposures considered inhering "increased risks", in order to promptly detect and react to a possible deterioration of the credit quality (redemption ability or creditworthiness) of a counterparty. The timely identification and consistent management of exposures with increased risk allow to intervene at a phase preceding potential default, when there is still the capability for repayment.

2.3.2 Governance and policies

Relations between the Holding Company and Group Legal Entities carrying out credit business are defined by specific governance rules, assigning the role of guidance, support and control to the Holding Company, in the following areas: credit policies, credit strategies, models development, rating systems validation, credit concentration risk, issuance of credit products, monitoring and reporting portfolio credit risk.

In particular, Group Legal Entities have to request the Group CRO department's opinion before granting or reviewing credit lines to individual borrowers or economic groups, whenever they exceed defined thresholds, also with reference to the obligation of compliance with the credit risk concentration limits that has to be measured with the supervisory capital.

According to the role given to the Holding Company, specifically to the Group CRO's department under Group governance, "General Group Credit Policies" have been issued to define group-wide rules and principles that should guide, govern and standardise the credit risk assessment and management, in line with Group principles and best practice.

The general rules are supplemented by specific rules governing defined counterparts (e.g., Banks and Countries), process stages (e.g. classification and management of risky positions and recovery process, management of general provisions using the "Incurred But Not Reported Losses" (IBNR) method, aging of the counterpart / transaction rating), industrial sectors (e.g. the "Commercial Real Estate Financing" Policy, which gives common standards and methods as well as specific parameters for business in the various regions in which the Group operates), specific products / transactions (e.g. the "Structured Trade and Export Finance (STEF)" policy, aiming at granting a standard approach governing this business at Group level as well as specific instructions to be followed for "Commodity trade finance", "Receivables finance" and "Export finance").

2.3.3 Management and Measurement Methods

Credit Risk generally represents the risk of losses of the value of a credit exposure arising from an unexpected change of the counterparty's credit quality.

For the purpose of credit risk measurement, credit risk is defined as the risk of incurring losses arising from the possibility that a borrower, counterparty or an issuer of a financial obligation (bond, note, lease, and instalment debt) is not able to repay interest and/or principal or any other amount due (Default Risk). In a wider sense, credit risk can also be defined as potential losses arising either from a default of the borrower / issuer or a decrease of the market value of a financial obligation due to a deterioration in its credit quality (migration risk). The latter one includes not only the default risk but also the risk of rating migrations or credit spread change. For the time being for credit risk measurement the Group is focusing only on default risk; the market based approach to credit risk measurement might be applied in the future. Credit risk is measured by individual borrower and for the whole portfolio. The tools and processes used for lending to individual borrowers during both the approval and monitoring phases include a credit rating process, which is differentiated by customer segment to ensure maximum effectiveness.

The assessment of a counterpart's creditworthiness, within the credit proposal evaluation, begins with an analysis of the financial statements and the qualitative data (competitive positioning, corporate and organisational structure, etc.), regional and industry factors and counterpart behaviour within the Legal Entity and the banking system (e.g., "Centrale dei rischi"), and results in a rating, i.e. the counterpart's probability of default (PD) on a one-year time horizon.

Regular monthly monitoring focuses on the borrower's performance management, using all available internal and external information in order to arrive at a score representing a synthetic assessment of the risk associated. This score is obtained using a statistical function that summarizes available information using a set of proven significant variables that are predictors of an event of default within a 12 months horizon.

All information is statistically summarized in an internal rating that takes quantitative and qualitative elements into account, as well as information on the borrower's behaviour, if available, which is taken from the loan management scoring procedures described above.

When applicable, the internal rating, or risk level assigned to the customer / transaction, forms a part of the lending decision calculation. In other words, at a constant credit amount the approval powers granted to the competent Bodies are gradually reduced in proportion to an increased borrower-related risk level. The organizational model in use includes also a dedicated function, which is separated from loan approval and business functions and is responsible for the management of the so-called rating overrides, i.e. any changes to the automatic rating calculated by the model.

Each borrower's credit rating is reviewed at least annually on the basis of new information acquired. Each borrower is also assessed in the context of any economic group with which it is affiliated by, as a general rule, taking into account the theoretical maximum risk for the entire economic group.

Besides the methodologies summarized in the rating systems, the risk management function uses portfolio models enabled to measure credit risk on an aggregated portfolio basis and at the same time to be able to identify sub-portfolio, or single obligor contributions to the overall risk position.

There are three fundamental portfolio credit risk measures that are calculated and are evaluated on a one year time horizon and on a non discounted basis:

- Expected Loss (EL),
- Credit Value at Risk (Credit VaR) and
- Expected Shortfall (ES).

In order to derive the Credit VaR of the portfolio, the portfolio loss distribution is specified; it is represented by the probabilities of getting different values of the portfolio loss on the given time horizon (discrete loss case). The specification of such a distribution is obtained combining single obligors default probabilities (PD), losses given default (LGD) and exposures at default (EAD) considering the correlations among the defaults.

The Expected Loss (EL) represents the aggregated average expected loss of the portfolio due to potential defaults of the obligors. The EL of the portfolio is just the sum of the single obligor ones, which can be evaluated as the product of $PD \times LGD \times EAD$, and is independent from the default correlations in the portfolio. EL is typically charged as a cost component in the margin.

Value at Risk represents the maximum amount by which, at a given probability, the expected loss might be exceeded (= Value at Risk at α confidence level which for UniCredit is defined at 99.97%). Such value, also named Economic Capital, is an input for the definition of the amount of the capital to cover the potential losses.

VaR is a widely used measure of portfolio risk but it has some intrinsic limitations. In particular it does not provide information on potential losses in case the VaR limit is exceeded. Such information is provided by the Expected Shortfall (ES) that represents the expected value of losses that exceed the VaR threshold. Portfolio Credit VaR and ES strongly depend on default correlation and can be reduced by portfolio diversification.

The credit portfolio models produce also measures of economic capital reallocated by individual borrowers within each portfolio and are the basis for risk-adjusted performance measures.

The measures of economic capital (Credit VaR) are also a fundamental input for the design and application of credit strategies, the analysis of credit limits and risk concentration. The economic capital calculation engine is also used for the analysis of stress tests of the credit portfolio, starting from macro-economic variables that affect the various customer segments, by Country, size, etc.

All the above mentioned risk parameters are subject to a regular monitoring and validation process for each rating system in all its components: models, processes, IT architecture and data quality. On an annual basis, a final validation report, which summarizes the outcomes of the validation activities performed by the Group CRO function, also focusing on the comparison of the different rating systems within the same segment, is brought to the Board of Directors' attention.

The aim is to give evidence of the systems compliance even though highlighting improvement areas as well as possible misalignments in the methodologies, which could limit the full comparability among the resulting risk measures.

The internal Credit VaR model is also subject to assessment in the context of Pillar II validation.

2.3.4 Credit Risk Strategies

According to Pillar II provisions, credit risk strategies for the Group's credit portfolio are an advanced credit risk management tool. Consistent both with the budget process and with Pillar II / Risk Appetite framework, they are aimed to provide the concrete deployment of risk appetite targets by Strategic Business Area and Legal Entity, considering the expected vulnerability of the Group credit portfolios to adverse economic downturns as well as the quantification of the sectorial concentration risk.

Credit risk strategies aim to obtain a threefold goal:

- to define the optimal credit portfolio risk profile by minimizing the overall credit risk impact, starting from the risk appetite framework, in line with the Group's capital allocation and value creation criteria;
- to provide support to the responsible functions and Strategic Business Areas at Holding Company and Legal Entities level when the latter take measures to optimise the portfolio reshaping through strategic plans and business initiatives;
- to provide a set of guidelines and support when drafting business and credit risk budgets, in line with the Group's strategic vision.

Credit risk strategies are defined by synthesizing the top-down risk analysis with the portfolio view of the business functions, through a strict cooperation among the centralized and divisional Risk Management Departments and the industry / product specialists at Holding Company level.

Credit risk strategies are implemented by using all available credit risk measures, especially the credit VaR model, which enables correct and prudent management of portfolio risk, using advanced methodologies and tools. In parallel a set of qualitative information, taking into account the different divisional / territorial characteristics, are incorporated and transformed in input variables for the credit portfolio optimization models.

More generally, as part of credit risk strategy, vulnerability and Capital Adequacy support analysis are performed through the credit risk stress (Pillar I and Pillar II). Portfolio risk management pays special attention to credit risk concentration in light of its importance within total assets.

Such concentration risk, according to the Basel II definition, consists of a single exposure or of a group of correlated exposures with the potential to generate losses of such magnitude as to prejudice the Group's ability to carry on its normal business.

In order to identify, manage, measure and monitor concentration risk, the Holding Company competent functions defines and monitors credit limits to cover two different types of concentration risk:

- significant amount credit exposures to a single counterpart or to a set of counterparts economically connected ("bulk risk");
- credit exposures to counterparts belonging to the same economic sector ("sectorial risk").

Stress test simulations are a comprehensive part of credit risk strategies definition. With stress test procedure it is possible to re-estimate some risk parameters like PD, Expected Loss, economic capital and RWA under the assumption of "extreme but plausible" macroeconomic and financial stressed scenario. Stressed parameters are used not only for regulatory purposes (Pillar I and Pillar II requirements), but also as managerial indicators about the portfolio vulnerability of single Legal Entities, business lines, industries / regional areas, customer groups and other relevant clusters, conditioned to a downturn of economic cycle.

In compliance with regulatory requirements, stress tests are performed on an on-going basis on updated stressed scenarios and are communicated to the senior management as well as to the Supervisory Authority. In addition to the regular stress test, ad hoc stress test simulations are performed on specific request from the Supervisory Authority.

2.4 Credit Risk Mitigation Techniques

UniCredit Group, consistently with the Revised Framework of International Convergence of Capital Measures and Rules (Basel II), is firmly committed to satisfy the requirements for recognition of Credit Risk Mitigation (CRM) techniques for regulatory capital purposes, according to the different approaches adopted (Standardized, or A-IRB).

In this regard specific projects have been completed and actions have been realized for embedding the CRM techniques in the Group internal regulations and for alignment of processes and supporting IT systems. Considering the international location of UniCredit Group, implementations have been realized in accordance with each Country's domestic legal system and all local supervisory requirements.

In particular the requirements set out by the “International Convergence of Capital Measurement and Capital Standards” and “Directive 2006/48/EC of the European Parliament and of the Council”, the Bank of Italy circular letter n. 263/2006 and following updates, have been translated into internal guidelines, pursuing several objectives:

- ensuring that CRM practices are consistent throughout the Group;
- encouraging collateral and guarantees optimal management within the Group;
- fully exploiting the mitigating effect on credit losses of collaterals and guarantees;
- attaining positive effect on Group Capital Requirements ensuring that local CRM practices meet minimum Basel II requirements.

In particular, general rules for eligibility, valuation, monitoring and management of collaterals and guarantees are defined. Special rules and requirements for certain types of collaterals are detailed as well.

Collaterals or guarantees are accepted only to support loans and they cannot serve as a substitute for the borrower’s ability to meet obligations. For this reason they have to be evaluated in the credit application along with the assessment of the creditworthiness and the repayment capacity of the borrower.

In the CRM technique assessment, UniCredit Group emphasizes the importance of the legal certainty requirements for all the funded and unfunded credit protection techniques, as well as their suitability. Legal Entities put in place all necessary actions in order to:

- fulfil any contractual and legal requirements in respect of, and take all steps necessary to ensure the enforceability of the collateral / guarantee arrangements under the applicable law;
- conduct sufficient legal review confirming the enforceability of the collateral / guarantee arrangements on all parties and in all relevant jurisdictions.

During the first half of 2009, the main Legal Entities within the Italian perimeter have extended to unfunded mutual guarantees the severe legal certification processes and checks of regulatory requirements, already in place for other guarantees and for financial/physical collateral. The Legal Entities have implemented a clear and robust system for managing the credit risk mitigation techniques, governing the entire process for evaluation, monitoring and management. They are required to set up controls ensuring that collaterals and guarantees are effective for the entire maturity of the underlying exposure. Collaterals and guarantees can be considered adequate if they are consistent with the underlying credit exposure and, valid for guarantees, when there are no relevant risks towards the protection provider.

The Group has developed a collateral management system ensuring that the process of valuation, monitoring and management of all types of security is clear and effective. The general and specific eligibility requirements shall be met at the time the credit protection is established and compliance shall continue over its maturity. In this respect, collaterals need to be valued accurately and regularly and haircuts must be applied when accepting the collateral to ensure that, in case of liquidation, there are no unexpected losses. The collateral value is based on the current market price or the estimated amount which the underlying asset could reasonably be liquidated for (i.e. Fair Value); market price of pledged securities are adjusted by applying haircuts for market price and foreign exchange volatility according to Basel II regulation requirements. In case of currency mismatch between the credit facility and the collateral, an additional haircut is applied. Possible mismatches between the maturity of the exposure and that of the collateral are also considered in the adjusted collateral value.

The current models in place within the Group are mainly based on pre-defined prudential haircuts. Internally estimated haircuts, based on the Value at Risk methodology for the assessment of the riskiness concerning financial collaterals, are under adoption throughout the Group. They are already in use in some Legal Entities. The methodological approach provides that the hedging value has to be estimated for each financial instrument on the basis of its market value (mark-to-market) adjusted with a haircut that has to consider the intrinsic riskiness according to the different factors (price riskiness, time of ownership and liquidity risk).

The main Legal Entities of the Group are also provided with tools for the automatic evaluation of the mark-to-market of the pledged securities, granting the constant monitoring of the financial collateral values.

For the valuation of real estate collateral, specific processes and procedures ensure that the property is valued by an independent expert at or less than the market value. For the Legal Entities operating in Austria, Germany and Italy, systems for the periodic monitoring and revaluation of the real estate serving as collateral, based on statistical methods and internal databases or provided by external info-providers, are in place.

Funded credit protection instruments can be considered eligible as credit risk mitigants when they meet the general requirements according to Supervisory Regulations and the specific requirements differing among the approaches adopted for Supervisory capital purposes for single counterpart / exposure (Standardized, A-IRB), in accordance with the Country's domestic legal framework. The list of the eligible providers depends on the specific approach adopted by each Legal Entity. Specifically, Legal Entities adopting A-IRB may recognize guarantees provided that the relevant minimum requirements are satisfied and, particularly, provided that the Legal Entity can evaluate the protection provider risk profile at the time the guarantee is established and during its entire maturity.

2.5 Impaired Loans

The Group's activities for the "non-performing" portfolio are based on the following basic steps:

- prompt action. Based on a solid and effective monitoring and reporting process the early identification of possible credit quality deterioration allows the Group to perform the necessary restrictive measures before default is declared;
- proper assessment of impaired loans in order to determine what action should be taken and how the loan should be classified in terms of default categories;
- initiating recovery procedures on the basis of the type and amount of exposure and the specific borrower involved;
- appropriate provisioning through profit and loss in proportion to counterparty risk and type of exposure. Provisioning is carried out in line with the principles of IAS 39 and Basel II rules;
- accurate and regular reporting in order to monitor aggregate portfolio risk over time.

Each Legal Entity's classification of positions into the various default categories must comply with local legal and regulatory provisions issued by the Supervisory Authority.

Since UniCredit, in its role as Holding Company, is required to comply with instructions issued by the Italian Supervisory Authority, suitable measures are taken vis-à-vis the Group's foreign Legal Entities to link and align classifications which would otherwise not be consistent with the appropriate default categories.

Since 2008 Aspra Finance, a wholly-owned subsidiary of UniCredit, gradually bought the Group's non-performing loans, starting with those held by former Capitalia Legal Entities and then including the whole portfolio.

In addition and in order to strengthen governance and independent control over credit risk management processes, a function dedicated to the management of restructuring and workout files has been set up in Holding Company, reporting directly to the Group CRO.

In general, the main goal of managing the non-performing portfolio is to recover all, or as much exposure as possible, by identifying the best strategy for maximizing the net present value (NPV) of the exposure, or minimizing LGD (loss given default).

This activity is managed internally by specially qualified staff or externally through a mandate given to a specialized company - the Group includes UniCredit Credit Management Bank, an Entity specialized in workout activities which operates as a servicer for most of the Group's Italian Legal Entities -, or through sale of non-performing assets to external companies.

The methodology is based on the calculation of the NPV of amounts recovered as a result of alternative recovery strategies, with assumptions made for recoveries, related costs and likelihood of failure for any strategy. These results are compared with the Group Entity's average LGD for positions with the same characteristics. If data series are not available, the comparison is based on estimates.

In order to determine provisions, an exercise that is performed at least quarterly, specialized units use an analytical approach to assess the loss projections for the non-performing portfolio on the basis of the Group's accounting policies, which are consistent with the rules of IAS 39 and Basel II. If an analytical approach is not possible (e.g., if there are numerous small positions), a Group Legal Entity may make provisions on a lump sum basis by regrouping these positions into aggregates with similar risk and exposure profiles. The percentage used for such provisions is based on historical data series.

With regard to the powers to be granted in the area of classifying files as default positions and calculating loss projections, Group Legal Entities designate several decision-making levels that have been appropriately tailored to the amount of exposure and the provision. In the light of the impact that these decisions have on earnings and tax payments, these decision-making processes involve the Group CRO function as well as the Group Entity's Senior Management.

The Group's business and solidity in terms of profitability, capital and finance depend *inter alia* on the creditworthiness of its borrowers. The Group has adopted procedures, rules and principles that steer, govern and standardize the assessment and management of credit risk, in line with principles and best practice. Increasingly difficult access to the credit and capital markets – together with ongoing difficult economic conditions – could in 2010 continue to prejudice corporate borrowers' ability to meet their payment obligations, to some extent limiting the Group's ability to improve its credit quality. We can reasonably expect a partial reduction in non-performing loans and consequently a prudential level of loan loss provisions.

Quantitative Information

A. Credit quality

A.1 Impaired and performing loans: amounts, writedowns, changes, distribution by business activity/region

Information contained in Part A1 does not include equity instruments and units in investment funds. For the sake of comparison 2008 figures are restated accordingly.

A.1.1 Breakdown of financial assets by portfolio and credit quality (carrying amount) (€ '000)								
Portfolio/Quality	Banking group					Other companies		Total
	Non-performing loans	Doubtful assets	Restructured exposures	Past-due	Other assets	Impaired	Others	
1. Financial assets held for trading	5,932	71,985	20,661	49,867	124,504,734	-	8,839	124,662,018

3. Held-to-maturity financial instruments	-	-	-	-	10,519,776	-	142,696	10,662,472
4. Loans and receivables with banks	171,610	31,052	241,155	-	77,652,726	-	172,894	78,269,437
5. Loans and receivables with customers	12,503,151	11,547,192	3,305,945	3,503,987	529,665,577	188,884	4,271,279	564,986,015
6. Financial assets at fair value through profit or loss	37,502	-	-	-	14,021,289	-	380,109	14,438,900
7. Financial instruments classified as held for sale	58,722	45,432	-	1,886	427,425	-	-	533,465
8. Hedging instruments	-	-	-	-	11,662,110	-	-	11,662,110
Total 12.31.2009	12,816,988	11,695,661	3,568,166	3,555,894	797,454,016	188,884	5,802,066	835,081,675
Total 12.31.2008	10,656,533	6,283,470	1,278,125	1,959,833	926,276,399	220	6,520,038	952,974,618

The banking group portion does not include intercompany accounts (including those with companies which are not consolidated).

Figures provided in line "5. Loans and receivables with customers" correspond to the table "Loans and receivables with customers – Asset quality" in the Report on Operations.

The amount of item 7 corresponds to total financial assets of the table 15.1 "Non-current assets and disposal groups classified as held for sale" in part B) – Consolidated Balance Sheet - Assets.

Data relating to the Banking Group include positions with the other entities included in the scope of consolidation. This table includes also exposures to customers classified in financial assets portfolios other than Loans and Receivables.

A.1.7 Banking group - Balance-sheet credit exposures to customers: gross change in impaired exposures (€ '000)

Source/Categories	Changes in 2009			
	Non-performing loans	Doubtful loans	Restructured exposures	Past due exposures
A. Opening balance - gross exposure	29,049,105	8,993,457	1,856,437	2,234,448
- Sold but not derecognised	192,426	127,363	5,558	145,805
B. Increases	11,852,710	17,623,381	4,836,245	8,919,733
B.1 transfers from performing loans	5,943,693	10,957,766	2,591,938	8,328,026
B.2 transfers from other impaired exposure	5,027,469	4,510,292	648,555	245,890
B.3 other increases	881,548	2,155,323	1,595,752	345,817
C. Reductions	7,969,013	10,133,478	2,256,023	7,217,705
C.1 transfers to performing loans	768,367	1,635,081	416,179	3,016,382
C.2 derecognised items	2,469,580	239,049	85,573	2,408
C.3 recoveries	1,946,381	2,352,580	899,550	371,844
C.4 sales proceeds	278,829	72,932	39,131	17,676
C.5 transfers to other impaired exposure	603,645	5,487,337	796,152	3,545,072
C.6 other reductions	1,902,211	346,499	19,438	264,323
D. Closing balance-gross exposure	32,932,802	16,483,360	4,436,659	3,936,476
- Sold but not derecognised	376,108	905,865	14,696	286,169

The Opening balance – gross exposure differs from the 2008 Closing balance – gross exposure since equity instruments and units in investment funds are not included, in compliance with the new provisions of the first update to Banca d'Italia Circular 262..

A.1.8 Banking group - Balance-sheet credit exposures to customers: changes in overall impairment (€ '000)

Source/Categories	Changes in 2009			
	Non-performing loans	Doubtful loans	Restructured exposures	Past due exposures
A. Total opening writedowns	18,380,721	2,778,937	593,218	284,577
- Sold but not derecognised	63,266	33,351	809	21,826
B. Increases	7,496,398	4,149,962	1,092,502	555,369
B.1 writedowns	6,272,303	3,211,261	413,759	332,602
B.2 transfers from other impaired exposure	1,087,865	596,183	135,555	22,034
B.3 other increases	136,230	342,518	543,188	200,733
C. Reductions	5,625,199	2,038,163	555,411	409,850
C.1 write-backs from assessments	726,076	348,287	69,388	47,068
C.2 write-backs from recoveries	791,055	151,029	107,093	13,356
C.3 write-offs	2,469,580	239,049	85,573	2,408
C.4 transfers to other impaired exposure	266,703	1,089,477	211,010	274,447
C.5 other reductions	1,371,785	210,321	82,347	72,571
D. Final gross writedowns	20,251,920	4,890,736	1,130,309	430,096
- Sold but not derecognised	102,358	185,197	1,904	33,446

Total opening writedowns differ from 2008 consolidated final gross writedowns, since equity instruments and units in investment funds are not included, in compliance with the new provisions of the first update to Banca d'Italia Circular 262.

A.2 Internal and external ratings

A.2.1 Banking Group- Balance Sheet and off-Balance Sheet credit exposure by external rating class (book values) (€ '000)

Exposures	Amounts as at 12.31.2009							No Rating	Total
	External rating classes								
	Class 1	Class 2	Class 3	Class 4	Class 5	Class 6			
A. On-balance-sheet exposures	56,290,888	66,474,048	31,493,111	23,118,452	8,071,847	33,399,512	541,382,293	760,230,151	
B. Derivative contracts	28,717,111	32,900,616	11,210,391	2,019,548	195,752	265,346	49,007,151	124,315,915	
B.1 Financial derivative contracts	24,799,615	28,896,655	11,104,805	1,873,225	195,752	265,346	47,716,830	114,852,228	
B.2 Credit derivative contracts	3,917,496	4,003,961	105,586	146,323	-	-	1,290,321	9,463,687	
C. Guarantees given	2,713,795	5,790,219	6,028,472	3,456,552	1,044,145	1,213,244	42,711,843	62,958,270	
D. Other commitments to disburse funds	2,492,355	6,254,558	5,091,249	1,908,067	526,260	493,098	94,888,593	111,654,180	
Total	90,214,149	111,419,441	53,823,223	30,502,619	9,838,004	35,371,200	727,989,880	1,059,158,516	

Impaired exposures are included in class "6".

The table details on- and off-balance sheet credits granted to counterparties rated by external rating agencies, which provide brief assessments of the creditworthiness of different classes of borrowers such as Sovereigns, Banks, Public-Sector Entities, Insurance Companies and (usually large) Enterprises.

The table refers to classification of 262/2005 Bank of Italy Circular – 1st update of 18th November 2009; then it provides, for external ratings, 6 classes of creditworthiness. Rating Agency utilized for compile the table are: Moody's, S&P's e Fitch.

Where more than one agency rating is available, the most prudential rating is assigned.

77% of rated counterparties were investment grade (from Class 1 to Class 3) and 61% were highly-rated borrowers (Class 1 and Class 2).

Unrated exposures, i.e. those with no external rating, were 69% of the portfolio, due to the fact that a considerable proportion of borrowers were private individuals or SMEs, which are not externally rated.

Details of securitized exposures not derecognized for accounting purposes (but derecognized for prudential purposes) are provided below.

Securitization name	Originator	Asset class	Amounts as at 12.31.2009 (€ millions)
Cordusio RMBS 1	UniCredit Family Financing Bank SpA	RMBS	1,289
Geldilux TS 2005	UniCredit Bank AG	SME	1,999
Geldilux TS 2007	UniCredit Bank AG	SME	2,099
Success 2005	UniCredit Leasing GmbH	Leasing	192
Total			5,579

The table contains on- and off-balance sheet exposures grouped according to the counterparties' internal rating.

Ratings are assigned to individual counterparties using Group banks' internally-developed models included in their credit risk management processes. The internal models validated by the regulators are either 'Group-wide' (e.g. for banks, multinationals and sovereigns) or bank-specific, by segment (e.g. retail or corporate).

The various rating scales of these models are mapped onto a single master-scale of 10 classes (illustrated in the table above) based on Probability of Default (PD).

59% of internally-rated exposures were investment grade (classes 1 to 4), while exposures towards unrated counterparties were 22% of the total. No rating is assigned to these counterparties as either they belong to a segment not yet covered by the models, or the appropriate model is still in the roll-out phase.

Internal Ratings are used for Capital Requirements calculation by the Legal Entities / portfolios that were authorized for the IRB approach from Central bank. Legal Entities currently authorized are: UniCredit S.p.A., UniCredit Corporate Banking S.p.A., UniCredit Banca S.p.A., UniCredit Banca di Roma S.p.A., Banco di Sicilia S.p.A., UniCredit Family Financing Bank S.p.A., Aspra Finance S.p.A., UniCredit Bank Austria AG, UniCredit Bank AG, UniCredit MedioCredito Centrale S.p.A. (for the Global Project Finance part of portfolio).

A.3 Distribution of secured credit exposures by type of security

A.3.1 Banking group - Secured credit exposures with banks														(€ '000)
Amounts as at 12.31.2009														
	Net exposures	Collaterals (1)			Guarantees (2)									Total (1)+(2)
		Property	Securities	Other assets	Credit Link Notes	Credit derivatives				Signature Loans (loans guarantees)				
						Other Credit derivatives				Governments and Central Banks	Other public entities	Banks	Other entities	
					Governments and Central Banks	Other public entities	Banks	Other entities	Governments and Central Banks					Other public entities
1. Secured balance sheet credit exposures:														
1.1. totally secured	5,875,654	7,975	1,944,913	1,374,634	-	-	-	-	-	2,611,072	480,864	5,537,640	251,518	12,208,616
- of which impaired	9,755	-	-	-	-	-	-	-	-	-	4,032	-	-	4,032
1.2. partially secured	44,480,124	63,842	7,263,793	650,781	-	-	-	-	-	1,078,495	864,500	169,552	57,637	10,148,600
- of which impaired	303,742	-	-	-	-	-	-	-	-	4,887	239,904	20,967	6,136	271,894
2. Secured off balance sheet credit exposures:														
2.1. totally secured	411,147	-	32,860	125,615	-	-	-	-	-	-	-	186,944	98,757	444,176
- of which impaired	-	-	-	-	-	-	-	-	-	-	-	-	-	-
2.2. partially secured	26,756,554	-	909	98,361	-	-	-	-	-	4,941	-	210,142	57,019	371,372
- of which impaired	781	-	-	-	-	-	-	-	-	-	-	-	-	-

Classification of exposures as "totally secured" or "partially secured" is made by comparing the gross exposure with the amount of the contractually agreed security.

A.3.2 Banking group - Secured credit exposures with customers														(€'000)
	Amounts as at 12.31.2009													
	Net exposures	Collaterals (1)			Guarantees (2)									Total (1)+(2)
		Property	Securities	Other assets	Credit Link Notes	Credit derivatives				Signature Loans (loans guarantees)				
						Other Credit derivatives				Governments and Central Banks	Other public entities	Banks	Other entities	
Governments and Central Banks	Other public entities	Banks	Other entities	Governments and Central Banks	Other public entities	Banks	Other entities							
1. Secured balance sheet credit exposures:														
1.1. totally secured	213,027,633	182,372,677	4,923,042	45,959,099	-	-	-	75,412	-	5,137,001	3,178,953	6,814,238	60,190,290	308,650,712

B4 Large exposures (according to supervisory regulations)

There are no large exposures to be reported.

C. Securitisation and sale transactions

C.1 Securitisation transactions

Qualitative Information

The Group's main objectives in its securitization transactions (whether traditional or synthetic) are the optimization of the loan portfolio by freeing up regulatory and economic capital and obtaining fresh liquidity together with greater diversification of its sources of funding.

The difficulties in the markets experienced in the last two years made it advisable to use securitization as a means of increasing counterbalancing capacity, i.e. the availability of assets that can readily be used to create liquidity, by retaining the securities issued by the vehicle within the Group.

Analysis and realization of securitization transactions are carried out within the Parent in close cooperation with the Group entities involved and the Markets & Investment Banking Division. This process requires an economic feasibility study to assess the impact of transactions (according to their nature and aims), on regulatory and economic capital, on risk-adjusted profitability measures and on the level of Group's liquidity. If this initial phase produces a positive result, a technical and operational feasibility study is carried out to identify the assets to be securitized and design the structure of the transaction. Once technical feasibility has been established, the transaction is realized.

In 2009 the Group carried out three traditional transactions:

Fineco Leasing S.p.A.	- F-E RED
UniCredit Family Financing Bank S.p.A	- Cordusio RMBS UCFin – Serie 2009
UniCredit Bank AG	- Geldilux – TS - 2009

Securities issued by SPVs for the above transactions were fully underwritten by the Group (self-securitizations). Securities relating to the Geldilux – TS – 2009 transaction were repaid on November 9, 2009 and the transaction was closed, considering the good counterbalancing capacity achieved by the Group.

Details of the other two transactions are given in the following charts, which also describe transactions carried out in previous accounting periods.

Additionally, on January 25, 2010 UniCredit S.p.A. launched an international invitation for offers to sell several Group asset backed securities, with limitations *inter alia* for Italian investors. The invitation deadline was February 5, 2010 and on February 12, 2010 1,352m securities were purchased. These purchases are not included in the following quantitative tables, since they were completed in 2010.

The Group is also an investor, sponsor and lead manager, mainly through its Markets and Investment Banking Division; when it has the lead-manager role it concentrates on deals where it is bookrunner, since in this case information on the transaction is more complete and accessible.

Starting from H2 2007 market conditions influenced sponsor and investor transactions, in that stricter monitoring of exposures was required.

In particular, in its role as sponsor the Group purchased *Asset-Backed Commercial Paper* issued by sponsored conduits. This meant that these vehicles were consolidated as from 2007.

With regard to investment in other parties' securitizations, i.e. structured credit products, these instruments were ring-fenced in a separate portfolio managed with a view to maximizing future cash flow.

Given the asset quality of the underlyings, the best business strategy was considered to be retention in the bank's books.

In this regard, in H2 2008 it is noted that managerial strategy was transposed for accounting purposes by reclassifying structured credit products from Held for trading financial assets to Loans and receivables with customers (See also Part A.3.1 Transfers between portfolios).

In line with the above management principles, risk monitoring and maximizing profit on securitization transactions is achieved by:

analyzing the monthly or quarterly investor reports produced by the Trustee, paying special attention to the performance of the collateral

monitoring similar transactions' collateral performance and issues of similar paper

watching the market fundamentals of the underlying credit and

staying in constant contact with the investors and, where collateral is managed, with the managers and analysts of the Collateral Manager.

Furthermore each portfolio is assigned a VaR limit by Risk Management. This is monitored bearing in mind the correlations. The Group has spread curves for each rating and product (asset backed securities, mortgage backed securities, etc.) and uses them to calculate risk, in the same way as other instruments in its portfolio. The method used is in line with other sources of market risk, and enables us to estimate the possible effects of diversification and to aggregate the VaR with other sections of the trading portfolio.

Further details are given in the following section "Information on structured credit products and trading derivatives with customers".

ORIGINATOR: UniCredit S.p.A. (ex Capitalia S.p.A., ex Banca di Roma S.p.A.)

STRATEGIES, PROCESSES AND GOALS:	The goal of the transactions was largely to finance non-performing loan portfolios, diversify sources of funding, improve asset quality and enhance the portfolio with management focused on recovery transactions.
INTERNAL MEASUREMENT AND RISK MONITORING SYSTEMS:	The securitization portfolio is monitored on an ongoing basis as a part of servicing activities and is recorded in quarterly reports with a breakdown of loan status and the trend of recoveries.
ORGANISATIONAL STRUCTURE AND SYSTEM FOR REPORTING TO SENIOR MANAGEMENT:	Reporting related to the monitoring of portfolio collections takes the form of a report to senior management and the Board of Directors.
HEDGING POLICIES:	Special purpose vehicles enter into IRS and interest rate cap contracts in order to hedge structure-related risk and risk due to the difference between the variable-rate return for the securities issued and the return anticipated from recoveries from the portfolio acquired.
OPERATING RESULTS:	At year-end 2009 profits from existing transactions largely reflected the impact of cash flows from collections for the original defaulting loan portfolio. To be specific, collections for the year totaled € 165.374 million (€ 62.817 million for Trevi Finance, € 51.085 million for Trevi 2 and € 51.472 million for Trevi 3).

ORIGINATOR: UniCredit S.p.A. (ex Capitalia S.p.A., ex Banca di Roma S.p.A.)

STRATEGIES, PROCESSES AND GOALS:	The goal of the transactions was largely to finance portfolios, diversify sources of funding and improve asset quality.
INTERNAL MEASUREMENT AND RISK MONITORING SYSTEMS:	The securitization portfolio is monitored on an ongoing basis by the servicing company and is recorded in quarterly reports with a breakdown of security status and the trend of repayments.
ORGANISATIONAL STRUCTURE AND SYSTEM FOR REPORTING TO SENIOR MANAGEMENT:	Reporting produced by servicing companies on the monitoring of portfolio collections is forwarded to senior management and the Board of Directors.
HEDGING POLICIES:	Special purpose vehicles enter into IRS contracts in order to hedge rate risk related to the structure of underlying securities.
OPERATING RESULTS:	The results achieved up to the present are broadly in line with expectations; payments received from the portfolio acquired ensured punctual and full payment to security holders and other parties to the transaction.

ORIGINATOR: UniCredit Family Financing Bank S.p.A.

STRATEGIES, PROCESSES AND GOALS:	The main goals of the Strategic Instructions are competitive rate funding and for large amounts the development of long term loans, with structured freeing up of capital for new investments. The main benefits are: - better matching of maturities; - diversification of funding sources; - freeing up capital under current rules; - widening of investor base with lower funding costs.
INTERNAL MEASUREMENT AND RISK MONITORING SYSTEMS:	All accounting matters and repayments are monitored on an ongoing basis as part of the Servicer Activity of UniCredit Family Financing Bank SpA or through Unicredit Banca SpA with the help of other companies of Group (specially for collecting impaired loans UniCredit Credit Management Bank SpA, and defaulting loans Cu.Re. division of UniCredit Banca SpA. Both of them are Subsidiary Servicer provided for specific contract).
ORGANISATIONAL STRUCTURE AND SYSTEM FOR REPORTING TO SENIOR MANAGEMENT:	UniCredit Family Financing Bank SpA set up a Coordination Structure (Staff Securitisation) in its Accounts Department which manages, with help of Specific staff, all accounting matters, repayments and loans. It also draws up quarterly reports, as required by the agreements with the SPV and transaction counterparties. The Board of UniCredit Family Financing Bank SpA is provided with a report with a break down of repayments and the status of loans.
HEDGING POLICIES:	The Special Purpose Vehicle bought IRSs as a fair value hedge and Basis Swaps as a cash flow hedge (and related back to back between Originator and Counterparty).
OPERATING RESULTS:	At end-2009 the operating results of securitization transactions reflect the underlying collateral's cash flow. They depend on the amount of defaults and prepayments, which were in line with non-securitized mortgages.

ORIGINATOR: UniCredit Leasing S.p.A. (ex Locat S.p.A.)

STRATEGIES, PROCESSES AND GOALS:	The main reasons for these transactions are: improved asset allocation, diversification of funding sources and improved Regulatory Ratios.
INTERNAL MEASUREMENT AND RISK MONITORING SYSTEMS:	Each portfolio is monitored on an ongoing basis and is described in monthly and quarterly reports (required by the agreements) with a break down of loans by status and the trend of repayments.
ORGANISATIONAL STRUCTURE AND SYSTEM FOR REPORTING TO SENIOR MANAGEMENT:	Coordination Structure was set up in the Accounts Department. The Board of is provided with a report with a break down of repayments and the status of loans.
HEDGING POLICIES:	The Special Purpose Vehicle bought IRSs as fair value hedge and Basis Swaps as Cash flow hedge (and related back to back between Originator and Counterparty).
OPERATING RESULTS:	The results of securitized loans were impacted by the particular macroeconomic situation and showed an increase in default positions. However, this trend is in line with other loans of the company, as well as with the yield of investments having a similar level of risk.

ORIGINATOR: UniCredit Corporate Banking S.p.A.

STRATEGIES, PROCESSES AND GOALS:	The main goals of synthetic securitizations are: credit risk management and reduction of the economic and/or regulatory capital.
INTERNAL MEASUREMENT AND RISK MONITORING SYSTEMS:	Securitized portfolios are monitored on an ongoing basis and are subject to quarterly reporting by the Originator, which provides a description of the loan situation.
ORGANISATIONAL STRUCTURE AND SYSTEM FOR REPORTING TO SENIOR MANAGEMENT:	Securitizations, which are performed with the support of the Parent Company, are authorized by the Board of Directors. The Top Management receives regular updates on the situation of these transactions (e.g. residual volumes, risk reduction etc.)
HEDGING POLICIES:	As regards synthetic transactions, the issuer does not enter IRS contracts to hedge the interest rate risk.
OPERATING RESULTS:	As at December 31, 2009 the securitized portfolio had recorded various default events, against which specific provisions had been made besides the generic provisions already made, as the work-out process concerning default events had not been completed yet and the coverage of the mezzanine tranche had not been activated yet. The transaction's economic results are based on hedging costs and the accrued fixed structuring costs.

ORIGINATOR: Fineco Leasing S.p.A.

STRATEGIES, PROCESSES AND GOALS:	The main goals of these transactions are: better asset allocation, diversification of funding sources and better Regulatory Ratios.
INTERNAL MEASUREMENT AND RISK MONITORING SYSTEMS:	Each portfolio is monitored on an ongoing basis and is described in quarterly reports (required by the agreements) with a breakdown of loans by status and the trend of repayments, as well as an ad hoc analysis of details of significant aspects of the transactions.
ORGANISATIONAL STRUCTURE AND SYSTEM FOR REPORTING TO SENIOR MANAGEMENT:	The company established an appropriate structure to monitor the transactions (the Treasury and Securitization Area), which prepares periodic (quarterly) reports and provides an accurate, semi-annual update to senior management. The board of directors receives (semi-annual) reports as required by laws on securitization.
HEDGING POLICIES:	The Special Purpose Vehicle bought IRSs as fair value hedge and Basis Swap as cash flow hedge (and related back to back between Originator and counterparty).
OPERATING RESULTS:	At year-end, the profits from existing securitization transactions largely reflect the trends of similar portfolios at the bank in terms of defaults and prepayments .

ORIGINATOR: UNICREDIT BANK AG (ex HVB AG)

STRATEGIES, PROCESSES AND GOALS:	The main motivation for the Bank's securitization programs is the Capital relief and Funding for True Sale Transactions.
INTERNAL MEASUREMENT AND RISK MONITORING SYSTEMS:	Each portfolio is monitored by the servicing department on an ongoing basis and it is illustrated in the form of a monthly or quarterly report (investor report), which provides a break down of the status of loans.
ORGANISATIONAL STRUCTURE AND SYSTEM FOR REPORTING TO SENIOR MANAGEMENT:	The Board Members approve each new transactions and any other related decision. The bank's annual / interim report contain information on the bank's own ABS transactions. The Board member are provided with planning forecast figures and annual performance.
HEDGING POLICIES:	For true sale transactions the issuer hedged portfolio's interest rate risks through Interest Rate Swaps.
OPERATING RESULTS:	The results achieved up to the present are broadly in line with expectations; payments received from the portfolio ensured punctual and full payment to security holders and other parties to the transaction.

(*) Synthetic securitizations carried out used the Supervisory Formula Approach as required under Basel II.

Where there is no eligible external rating, this approach requires the calculation of the regulatory capital requirement for each tranche of a securitization should use the following five elements:

1. The capital requirement on the securitized assets calculated using the IRB approach (KIRB); 2. The level of credit support of the tranche in question; 3. The thickness of the tranche; 4. The number of securitized assets; 5. Average LGD.

Using the Supervisory Formula Approach it is possible to calculate the amount of risk equivalent to the rating of a senior tranche, the remainder being subordinated and classified as junior.

Following a number of reviews currently underway, we decided not to recognize the associated benefits on regulatory capital in the consolidated accounts.

Where there is no eligible external rating, this approach requires the calculation of the regulatory capital requirement for each tranche of a securitization should use the following five elements:

1. The capital requirement on the securitized assets calculated using the IRB approach (kIRB);
2. The level of credit support of the tranche in question;
3. The thickness of the tranche;
4. The number of securitized assets;
5. Average LGD.

Using the Supervisory Formula Approach it is possible to calculate the amount of risk equivalent to the rating of a senior tranche, the remainder being subordinated and classified as junior.

Following a number of reviews currently underway, we decided not to recognize the associated benefits on regulatory capital in the consolidated accounts.

Quantitative Information

The tables below do not include information on the so-called “self-securitizations”, i.e. securitization transactions in which the Group has acquired all the liabilities issued by the SPVs.

C.1.1 Banking Group - Exposure resulting from securitisation transactions broken down by quality of underlying assets

Quality of underlying assets / Exposures	Balance-sheet exposure						Guarantees given						Credit Facilities					
	Senior		Mezzanine		Junior		Senior		Mezzanine		Junior		Senior		Mezzanine		Junior	
	Gross exposure	Net exposure	Gross exposure	Net exposure	Gross exposure	Net exposure	Gross exposure	Net exposure	Gross exposure	Net exposure	Gross exposure	Net exposure	Gross exposure	Net exposure	Gross exposure	Net exposure	Gross exposure	Net exposure
A.	With own underlying assets:																	
	41,954,345	41,210,225	2,408,239	2,194,426	1,081,821	1,320,334	-	-	613,495	77,956	-	-	-	-	720,918	626,812	30,220	30,220
a) Impaired	-	-	903,044	842,104	448,166	201,862	-	-	613,495	77,956	-	-	-	-	720,918	626,812	-	-
b) Other	41,954,345	41,210,225	1,505,195	1,352,322	633,655	1,118,472	-	-	-	-	-	-	-	-	-	-	30,220	30,220
B.	With third-party underlying assets:																	
	9,335,659	9,155,358	1,818,937	1,806,873	108,565	55,864	-	-	-	-	-	-	2,004,563	2,004,563	76,431	76,431	-	-
a) Impaired	-	-	4,778	64	900	44	-	-	-	-	-	-	-	-	-	-	-	-
b) Other	9,335,659	9,155,358	1,814,159	1,806,809	107,665	55,820	-	-	-	-	-	-	2,004,563	2,004,563	76,431	76,431	-	-

In-house securitizations not involving derecognition of the assets are accounted for as retained risk, i.e. the difference between sold assets and the corresponding liabilities recognized under IAS 39.

C.1.2 Banking Group - Exposure from the main "in-house" securitisation transaction broken down by type of securitised asset and by type of exposure

(*) list of details for exposures over € 50 million.

(§) exposure of subsidiaries included in the scope of consolidation, but not belonging to the banking group.

The carrying value is the net exposure shown in Table C.1.1. Write-downs and write-backs, including depreciations and revaluations posted on the income statement or to reserves, refer to financial year 2009 only.

(C.1.3 Banking Group - Exposure resulting from the main third-party securitisation transactions broken down by type of securitised asset and by type of exposure continued (*))

C.3 Covered Bond Transactions

Qualitative Information

In October 2008 the Group initiated a Covered Bond (OBG or Obbligazioni Bancarie Garantite) Program with residential mortgage loans as the underlying assets, in line with Banca d'Italia instructions dated May 17, the MEF decree dated December 14, 2006 and 2007 Law 130/99.

Under this program UniCredit S.p.A. is issuer, UniCredit Family Financing Bank S.p.A. is originator and servicer, UniCredit BpC Mortgage s.r.l. (a special purpose vehicle set up within the banking group as expressly authorized by Banca d'Italia) is guarantor of the OBG holders, within the limits of the cover pool and the auditing firm Mazars & Guerard S.p.A. is Asset Monitor.

The Group's main aims in issuing OBGs are to diversify its funding sources and fund at competitive rates. As with the securitizations, the difficulties in the markets made it advisable to use securitization as a means of increasing the Group's counterbalancing capacity by retaining the securities issued by the vehicle with the Group.

An integral feature of OBG Program management is maintaining a balance between the characteristics of the assets sold and the issues. This is necessary to maintain the efficacy of the guarantee given by the SPV to the bondholders.

Given the complexity of the transaction, a system of first- and second-level controls and procedures has been set up, as required by Banca d'Italia instructions, to identify units, functions, duties and responsibilities, and specific policies have been issued to this end. The policies were as approved by the competent committees, the Statutory Auditors and the Board of Directors of UniCredit and UniCredit Family Financing Bank.

As required by Banca d'Italia instructions on controls:

- a) UniCredit's Risk Management function is charged with the management of the issuer's risks and checks:
 - the quality, suitability and integrity of the assets sold to guarantee the OBGs
 - that the maximum ratio of OBGs issued to assets sold to guarantee them is adhered to
 - that limits on sales and supplementary sales procedures are followed
 - the effectiveness and adequacy of the hedges provided by any derivatives contracts entered into in relation to the Program and
 - the trend in the balance between the cash flow arising from the cover pool and that absorbed by the OBGs in issue.
- b) The Asset Monitor is an outside independent entity charged with checking at least annually the regularity of the transactions and the integrity of the guarantee to the bondholders.
- c) UniCredit's internal audit department is responsible for a complete audit (to be conducted at least once a year of the adequacy of the controls performed).
- d) The results of the audits performed by the Asset Monitor and the issuer's internal audit department are submitted to the governing bodies.

At December 2009 eight covered bond tranches had been issued for a total amount of €8.5bn, of which €5bn within the Group.

Information on Structured Credit Products and Trading Derivatives with customers

The deterioration of US subprime loans was one of the main factors behind the financial markets turmoil which started in H2 2007 and showed the first recovery signals only during 2009 thereby reducing the risk of a recessionary relapse.

This deterioration caused a general widening of credit spreads and a gradual transformation of the securitized credits market into an illiquid market characterized by forced sales.

Given this situation the market's need for information on the exposures held by banks increased with structured credit products being traded directly or through SPVs.

Already in 2007 the Group provided ample information on these products, on the operations of the sponsored conduits and on derivatives with customers, together with the principles followed to measure and manage risk.

In 2008, additionally, several international and Italian organisms and regulators (viz., the Financial Stability Forum, the CEBS – Committee of European Banking Supervisors, Banca d'Italia and CONSOB) published documents requiring banks to increase disclosure of their investments in consolidated SPEs (Special Purpose Entities), structured credit products, trading derivatives with customers and fair value measurement policies, in accordance with a proposal based on current best practice for financial information.

Starting with its First Half 2008 Report, the Group has therefore provided this information, which is here updated to December 31, 2009. This is an addition to the compulsory disclosure required by Banca d'Italia in Section 1.C Securitizations and sale transactions, whereas information on liquidity risk, sensitivity analysis and stress testing of the trading book, is given in Sections 2 and 3 below.

A glossary of terms and acronyms is included in the annexes hereto.

1. Structured Credit Products

A detailed description of the Group's business in structured credit products is provided below. We firstly analyze the Group's activity as "originator" (through SPVs) of the assets underlying securitization transactions and then the activity of other consolidated and non-consolidated SPVs, which have different underlying assets.

Information on the exposures to monoline insurers and leveraged finance, as well as details on the methods to calculate the fair value of structured credit products are also given below.

1.1 The Group as Originator

The Group's origination consists of the sale of on-balance sheet receivables portfolios to vehicles set up as securitization companies under Law 130/1999 or similar non-Italian legislation.

The buyer finances the purchase of the receivables portfolios by issuing bonds of varying seniority and transfers its issue proceeds to the Group.

The yield and maturity of the bonds issued by the buyer therefore mainly depend on the cash flow expected from the assets being sold.

As a further form of security to bondholders, these transactions may include special types of credit enhancement, e.g., subordinated loans, financial guarantees, standby letters of credit or over-collateralization.

The Group's objectives when carrying out these transactions are usually the following:

- to free up economic and regulatory capital by carrying out transactions that reduce capital requirements under current rules by reducing credit risk
- to reduce funding costs given the opportunity to issue higher-rated bonds with lower interest rates than ordinary senior bonds and
- to originate securities that can be used to secure repos with Banca d'Italia and the ECB (i.e. counterbalancing capacity).

The Group carries out both traditional securitizations whereby the receivables portfolio is sold to the SPV and synthetic securitizations which use credit default swaps to purchase protection over all or part of the underlying risk of the portfolio.

The Group makes limited use of this type of transactions. The amount of securitized loans¹, net of the transactions in which the Group has acquired all the liabilities issued by the SPVs (the so-called self-securitizations), accounts for approximately 10.59% of the Group's credit portfolio. Self-securitizations in turn account for 6.46% of the loan portfolio.

In 2008 the Group also initiated a Covered Bond (OBG – Obbligazioni Bancarie Garantite) Program under the provisions of Italian Law 130/99. The underlying residential mortgage loans were transferred to an SPE set up for this purpose and included in the Banking Group. Eight tranches of OBG totaling €8.5bn were issued, of which 5bn retained in the Group.

As at 31 December 2009 similar covered bonds under German law (Pfandbriefe) amounted to €36,929,700 thousand, of which €29,873,900 thousand were backed by mortgage loans and €7,055,800 thousand by loans to the public sector.

¹We refer to loans sold, also synthetically, but not derecognized from balance sheet.

Under traditional securitizations the Group retains the first loss in the form of junior bonds or similar exposure and in some cases provides further credit enhancement as described above. This enables the Group to benefit from the portion of the sold receivables' yield in excess of the yield due to the senior and mezzanine tranches.

Retention by the Group of the first loss risk and the corresponding yield means that most of the risk and return on the portfolio is retained. Consequently these transactions are recognized in the accounts as loans and no profits arising out of the transfer of the assets are recognized and the sold receivables are not derecognized.

Synthetic securitizations also entail retention of the receivables subject to credit default protection on the balance sheet. The swap is recognized in the accounts, as well as any other retained interest.

The following table shows the Group's retained **gross and net cash exposure** under securitizations in which it was the originator, subdivided according to whether or not the receivables were derecognized in the accounts.

The amounts given are mainly interests retained by the originator, net of self-securitizations, as required by the first update to Banca d'Italia Circular 262/2005 (see also Part A) Accounting Policies). ABSs arising out of securitizations and held in the Corporate & Investment Banking Division's and UniCredit Bank Ireland's portfolio are also shown.

Exposures deriving from the securitization of own assets				(€ thousands)
	Balance sheet exposure as at			
	12.31.2009		12.31.2008	
	Gross exposure (nominal amount)	Net exposure (*)	Net exposure (*)

(\$) Amount adjusted excluding self-securitizations, following 1st update circ. Bank of Italy 262/2005 dated Nov 18th 2009.

The transactions included under "Assets sold and derecognized" are those in which the Group, while retaining most of the risk and return of the underlying receivables, nevertheless derecognized them because the transaction was prior to January 1st, 2002. On first adoption of IFRS the option permitted by IFRS 1 that allows assets sold before January, 1st 2004 not to be rerecognized, regardless of the amount of risk and return retained, was taken.

Beside the indicated exposures, the Group has also carried out traditional transactions concerning performing loans by purchasing the liabilities issued by the SPVs (so-called self-securitizations) for a total amount of €41,522,071 thousand.

In 2009 two self-securitizations were carried out, whose underlyings were leasing contracts originated in Italy concerning the use of motor vehicles, capital goods and real-estate assets for a nominal amount of €1,705,231 thousand and residential mortgages originated in Italy for a nominal amount of €3,499,601 thousand.

However, assessment and monitoring of risk underlying securitizations are performed with regard not to exposure to the SPV but rather to the sold receivables, which are monitored continuously by means of Interim reports showing status of the receivables and repayment performance.

The following tables give a breakdown of the Group's retained (i.e., non-derecognized) receivables by region and asset quality, and by traditional and synthetic securitizations.

Funded securitization structures originated by the Group mainly have as underlyings residential mortgages originated in Italy corporate loans originated in Germany and leasing granted to Italian counterparties.

Synthetic securitization structures have mainly residential mortgages and loans to Corporate and Small Medium Entities originated in UE countries as underlyings.

Performing assets account for 96.99% of traditional securitizations' portfolio and 97.4% of synthetic transactions' portfolio.

The Group is not an originator of securitizations having as underlying US residential mortgages, neither prime nor subprime nor Alt-A.

The fair value of assets sold and not derecognized exceeds the carrying amount by over €1,200 million.

1.2 Other Consolidated SPVs

SPVs which do not perform securitization transactions of Group assets, but whose risks are mainly borne by the Group, which also receives their returns, are consolidated as well, even if they do not belong to the Banking Group.

Consolidation of these vehicles is required by IAS 27, and by the related interpretation SIC 12.

Starting from 2007, the consolidation perimeter includes vehicle companies sponsored by the Group and issuing commercial papers (so-called Asset Backed Commercial Paper Conduits) and set up both as multi-seller customer conduits to give clients access to the securitization market, and as arbitrage conduits.

In particular, Arabella Finance Ltd., Salome Funding Ltd. and Black Forest Funding Corp. are Customer Conduits, while Bavaria Universal Funding Corp. falls within the category of Arbitrage conduits.

Additionally, also the following vehicles are now included in consolidation, as they now meet the requirements provided by the above mentioned SIC 12 and the consolidation requirements under IFRS (see Part A, Section 3 – Consolidation Procedures and Scope): Altus Alpha Plc, Grand Central Funding Corp., Redstone Mortgages Plc and a further 11 vehicles operating in Tender Option Bond (TOB).

Customer conduits require the formation and management of a bankruptcy-remote company (i.e., one that would be immune from any financial difficulties of the originator) which directly or indirectly buys receivables created by companies outside the Group.

The receivables underlying these transactions are not bought directly by the conduit set up by the Group, but by a purchase company which in turn is wholly funded by the conduit by means of commercial paper or medium term notes.

In some circumstances purchase companies fund further SPVs which buy loan portfolio.

The main purpose of these transactions is to give corporate clients access to the securitization market and thus to lower funding costs than would be borne with direct funding.

Arbitrage conduits require the formation and management of an SPV that buys highly rated corporate bonds, asset-backed securities and loans.

The purpose is to achieve a profit on the spread between the yield on the assets held, usually medium/long-term, and the short/medium-term securities issued to fund the purchase.

The conduits' purchase of assets is financed by short-term commercial paper and medium-term note issues.

Payment of interest and redemption of the securities issued by the conduit therefore depends on cash flow from the receivables purchased (credit risk) and the ability of the conduit to roll over or replace its market funding on maturity (liquidity risk).

To guarantee prompt redemption of the securities issued by the conduit, these transactions are guaranteed by a standby letter of credit covering the risk of default both of specific assets and of the whole program.

The underwriters of issued securities also benefit from security provided by specific liquidity lines which the conduit may use if it unable to place new commercial paper to repay maturing paper, e.g. during market turmoil.

These liquidity lines may not however be used to guarantee redemption of securities issued by the conduit in the event of default by the underlying assets.

In its role as sponsor, the Group selects the asset portfolios purchased by conduits or purchase companies, provides administration of the assets and both standby letters of credit and liquidity lines.

For these services the Group receives fees and also benefits from the spread between the return on the assets purchased by the SPV and the securities issued.

Starting from H2 2007 the securities issued by these conduits experienced a significant contraction in investor demand. The Group has consequently purchased directly all their outstanding commercial paper.

However, the situation improved during 2009, as shown by the trend of exposures to conduits sponsored by the Group, which are disclosed in the table below.

Exposures sponsored by the Group		(€ thousands)	
	Amounts as at		
	12.31.2009	12.31.2008	
Balance sheet exposures	2,347,103	5,268,124	
- Arabella Finance Ltd	-	2,185,413	
- Bavaria Universal Funding Corp	751,603	322,644	
- Salome Funding Ltd	1,595,500	2,760,067	
Credit facilities	1,614,149	1,775,512	
- Arabella Finance Ltd	1,556,083	219,712	
- Bavaria Universal Funding Corp	1,555	1,109,850	
- Salome Funding Ltd	56,511	445,950	

The lines of credit shown are the difference between total credit lines granted and the amount of commercial paper underwritten by the Group. This figure is the additional risk exposure incurred by the Group and arising from commercial paper purchased by third parties and commitments to purchase further assets under the program.

Cash exposures are commercial paper purchased by the Group. These exposures are fully consolidated and therefore not visible in the consolidated accounts.

As regards the business of the above-mentioned SPVs, Altus Alpha Plc operates in investment fund units, Grand Central Funding Corp. in intercompany repurchase agreements, Redstone Mortgages Plc in the warehousing portfolio of UK mortgage loans, while Tender Option Bond vehicles operate in bonds issued by US local authorities and municipalized companies.

Due to its activity of loan and credit lines underwriting and the subscription of liabilities issued by these vehicles, also in these cases the Group bears most of the risk and receives most of the returns on this business.

The following table shows the amount of **exposures towards other consolidated SPVs**.

Exposures toward other consolidated SPV		(€ thousands)
		Amounts as at 12.31.2009
Balance sheet exposures		2,754,750
- Altus Alpha Plc		1,100,178
- Grand Central Funding Corp		70
- Redstone Mortgages Plc		1,652,735
- TOB Trusts		1,767
Credit facilities		324,752
- Altus Alpha Plc		-
- Grand Central Funding Corp		139
- Redstone Mortgages Plc		-
- TOB Trusts		324,613

According to the line-by-line consolidation method, the following items should be recognized in Consolidated Accounts:

- assets held by consolidated vehicles in place of the loans provided to them or the liabilities subscribed by Group companies , now eliminated on consolidation
- loans to purchase companies for non-consolidated subordinated vehicles.

The consolidated Accounts include the substance of the assets in the books of the non-consolidated purchase companies because they are wholly financed by the consolidated conduits.

The following table gives the amount of the **consolidated SPVs' assets by region**.

Consolidated SPVs' assets broken down by geographical area										(€ thousands)

The item "Others" comprises corporate loans and short-term commercial loans.

Over 55% of the structured credit products (i.e. RMBS, CMBS, CDO and CLO/CBO) held by the conduits were rated A or better and about 44% were rated triple-A.

The underlyings were almost entirely of US origin.

The quality of assets held by consolidated vehicles, which are mainly mortgage loans and consumer loans is carried out by specific units using a look-through approach with the aim of analyzing the performance of the underlying receivables portfolios.

As at December 31, 2009 impaired loans were €188,884 thousand, entirely attributable to Redstone Mortgage Plc. Valuations performed in the year (also for the purposes of first consolidation) were made particularly complex by the difficult macro-economic environment and led to the recognition of costs in the amount of €166,718 thousand, of which €93,985 thousand were impairment losses.

The **residual life of consolidated vehicles' underlyings** is given in the following table. Average residual life is in most cases under one year or over five years.

Consolidated SPVs' assets broken down by residual life (€ thousands)				
Remaining average life	Amounts as at 12.31.2009			
	Less than 1 year	1 to 5 years	Over 5 years	Total

% IAS portfolio	0.48%	2.52%	0.70%	1.34%	0.90%	0.71%

1.3 Other non-consolidated SPVs

The Group is also an investor in structured credit instruments issued by vehicles which are not consolidated, as these instruments do not bear most of the risk and do not receive most of the return on the operations carried out by SPVs.

These exposures are mainly held on the books of the Corporate and Investment Banking Division (CIB) and Unicredit Bank Ireland.

This business was particularly affected by the difficult situation on the financial markets, which began in 2007 and determined a transformation of the structured credit product market into an illiquid market.

Against this background, in 2008 the Group ring-fenced these products in a specific Global ABS Portfolio managed with the aim of maintaining the holdings, also in view of the fact that the underlyings have good fundamentals. This portfolio is subject to monitoring and reporting of both credit risk and market risk.

This new strategy has been reflected in the accounts through the reclassification of most of these positions in the item “loans and receivables to customers” occurred for the most part in the second half of 2008 and, for the remaining, in the first half 2009. See Section 1.4 for information about the effects of this reclassification.

This portfolio shows the following characteristics:

- high *seniority* with an insignificant percentage of junior positions;
- predominance of residential mortgage-backed securities and commercial mortgage-backed securities;
- an insignificant portion of products has US Subprime or Alt-A mortgages as underlyings;
- high rating (over 95% of the positions is classified as “investment grade”)
- mainly concentrated in EU Countries.

- Others	50,000	18,220	1,632	69,852	368,707	-	-	368,707
Guarantees given	-	-	-	-	-	-	-	-
Credit facilities	-	-	-	-	11,156.00	-	-	11,156

The above table presents the Group's exposure to SPEs, including guarantees given and lines of credit. This support is generally given when structuring securitizations for third parties as manager or arranger of the transactions.

At December 31, 2009 the Group's exposure in structured credit products was €8,670,996 thousand, a reduction of over 27% from December 31, 2008 when the figure was €12,021,653 thousand.

The exposure in ABSs fell from €10,965,470 thousand at December 31, 2008 to €8,247,536 thousand.

Also exposure in the form of loans to vehicles fell from €1,056,183 thousand at December 31 to €423,460 thousand. Unutilized portion of credit lines and guarantees given amounts to €456,294 thousand.

In addition to reported exposures, the Group is exposed to Credit Default Swaps having structured credit products as underlyings. These instruments have a negative fair value of € 270,446 thousand and a notional amount of € 1,615,676 thousand.

The good credit quality of this portfolio is borne out by the fact that over 89% of these instruments are rated A or better and over 50% of the portfolio is triple-A rated.

At December 31, 2009 over 95% of these exposures were rated A and 78% of the portfolio was rated triple-A. The change was due to the general worsening of market conditions in the first 9 months of 2009.

Over 82% of the exposure is toward countries belonging to European Union. Exposure to Greece, Ireland, Portugal and Spain accounts for 20.68%, most of which concerns exposures to Spanish underlying assets (13%).

The following tables give a breakdown of the **net exposure** at December 31 2009, **by instrument, rating and region**.

Structured credit product exposures broken down by rating class										
Exposure type	AAA	AA	A	BBB	BB	B	CCC	CC	C	NR

The Group's portfolio includes the following:

RMBSs: Residential mortgage backed securities are notes issued by SPVs whose redemption depends on the performance of residential mortgages securitized by a non-Group originator.

An insignificant portion of these instruments has US Subprime or Alt-A mortgages as underlyings.

The following table shows the main characteristics of these instruments as at December 31, 2009 and December 31, 2008.

RMBS		
	12.31.2009	12.31.2008
Gross Exposure	3,760,849	4,814,821

thereof US Subprime	0	0
there of US Alt-A	0	0

CDOs: Collateralized debt obligations are notes with varying seniority issued by SPVs in respect of debt instruments, including structured credit instruments (CDOs of ABS).

As with all asset-backed securities, redemption of these notes depends on the performance of the underlying assets and any additional security.

The purpose of these instruments is to benefit from the spread between the notes' yield and that of the assets.

An insignificant portion of these instruments has US Subprime or Alt-A mortgages as underlyings.

The following table shows the main characteristics of these instruments as at December 31, 2009 and December 31, 2008.

CDO		
	12.31.2009	12.31.2008

Exposure to US Subprime and Alt-A Mortgages

The Group's exposure to US Subprime and Alt-A mortgages was restricted to the above RMBSs and CDOs with these underlyings.

The Group has no mortgages classified as sub-prime in its loan book nor guarantees of such exposure.

The following table summarizes exposure to US Subprime and Alt-A mortgages, which was €87,795 thousand at December 31, 2009, i.e. a reduction from both December 31, 2008 when this figure was €105,752 thousand.

US Subprime and Alt-A exposures (€ thousands)			
Underlying / exposure type	Amounts as at 12.31.2009		
	CDO of ABS	RMBS	Total
US Alt-A	3,789	48,328	52,117
US Subprime	15,505	20,173	35,678
Total	19,294	68,501	87,795

Over 26% of instruments with US subprime underlyings were rated A or better. Over 19% of instruments with Alt-A mortgage underlyings were rated A or better. Their respective coverage ratios were 63.9% and 26.9%.

Percentage **composition of the vintage** of **US Subprime and Alt-A** exposures is reported in the following tables.

US Subprime and Alt-A percentage of exposures broken down by vintage				
Underlying / vintage	Before 2005	2005	2006	2007
US Alt-A	6.67%	29.44%	53.75%	10.14%
US Subprime	23.82%	55.04%	7.67%	13.47%
Total	13.64%	39.84%	35.03%	11.49%

1.4 Reclassification of Structured Credit Products

In 2008 and in Q1 2009 most structured credit products were reclassified from financial assets held for trading or available for sale to “loans and receivables with customers”, pursuant to the amendments to IAS 39 endorsed by Regulation EC 1004/2008 (see Part A – 3.1. Transfers between portfolios).

The following table shows the amounts of these instruments which were subject to reclassification, the amounts which would have been recognized in the year if they had not been reclassified, as well as the amounts actually recognized in the year.

Accounting Portfolio before reclassification (2)	Accounting Portfolio after reclassification (3)	Carrying amount as at 12/31/2009	Fair Value as at 12.31.2009	Income/expenses absent reclassification (before taxes)		Income/expense recognized during the period (before taxes)	
				From measurement	Other	From measurement	Other
Available for sale	Loans to customers	173,698	159,275	-13,569	5,768	0	4,883
Held for Trading	Loans to customers	7,239,131	5,910,812	125,758	317,364	-58,675	363,512
Total		7,412,829	6,070,087	112,189	323,132	-58,675	368,395

These data include a non-significant amount of asset backed securities from own synthetic securitizations or in respect of which the underlying assets were derecognized from the balance sheet.

1.5 The Fair Value of Structured Credit Products

Structured credit products classified as financial assets held for trading, designated at fair value and available for sale are valued at their market value, in line with the general rules described in Part A. 3) Information on Fair Value.

The deterioration of market conditions since H2 2007 made it particularly complex to value these products due to the gradual disappearance of a liquid secondary market characterized by executable prices that could be used for valuation purposes.

As described in Part A.3, in order to react to this new market environment, the Group has resorted to *Independent Price Verification* and *Fair Value Adjustment* processes.

In respect of structured credit products, this process requires that the prices for trading positions be verified monthly by Risk Management units that are independent from the units that assume the risk exposure, and that the fair value be adjusted in order to consider the subjectivity resulting from the use of illiquid parameters.

As a result of the valuation process described above, structured credit products are valued by using as a reference the prices of the main price providers (MarkIt). However, these valuations should be considered as “second-level” as they are not necessarily executable (for further information on fair value levels see Part A.3.2. Fair Value Hierarchy).

Absent this type of prices for the instrument being valued, its fair value is determined by using cash-flow discounting models.

These models discount the instrument’s estimated cash flows at a rate that considers an adequate risk spread, whose determination is therefore fundamental for the valuation process. In particular, the spread used is the average spread applied to instruments which are similar to that being valued in terms of asset class, rating, underlying geography.

Where it is impossible to identify similar instruments, the spread is anyway determined by considering instruments which are similar to that being valued, adjusted (through interpolation and extrapolation processes) to take into account the differences noted.

The value resulting from the described valuation models is based on inputs and prices which are not necessarily executable on the market.

The value is therefore subject to further fair value adjustments to consider the risks associated to the use of non-executable inputs and prices.

This adjustment, which is proportionate to the observability of prices/inputs used in the valuation, is determined according to the economic effects of a one notch downgrade of the instrument being valued, i.e. the use of a spread which is appropriate to a level of rating immediately lower than that used.

The fair value determined by using these valuation techniques is classified as level-2 or level-3 according to the degree of similarity between the spread and the instrument being valued, and the consequent significance of the calculated value adjustments.

71.58% of the portfolio is priced using level 2 methods and the remaining 28.42% according to level 3 methods.

Structured credit product exposures: fair value hierarchy		
Exposure type	Level 2	Level 3
RMBS	99.17%	0.83%
CMBS	54.46%	45.54%
CDO	8.36%	91.64%
CLO	90.87%	9.13%
Other ABS	46.34%	53.66%
Total	71.58%	28.42%

1.6 Group Exposure to Monoline Insurers

The Group has limited exposure to monoline insurers.

It is not the usual practice of the Group to manage credit risk arising from ABS exposures through credit derivatives, or other guarantees with monoliners.

The Group has direct exposure to certain baskets of names which include monoliners.

The following table gives the amount of these **exposures** by **monoliner**.

Exposures to monoliners		
(€ thousand)		
Counterparty	Nominal amounts as at	
	31.12.2009	31.12.2008
AMBAC Assurance Corporation	9,158,236	2,674,491
Assured Guaranty Corporation	7,660,068	11,902,696
FGIC Corporation	5,081,114	1,202,050
FSA Global Funding	17,215,047	0
MBIA Insurance Corporation	27,348,397	9,307,514
Radian Group	34,982,901	8,715,789
XL Capital Assurance	4,551,169	4,164,326
Total	105,996,932	37,966,866

The Group's portfolio includes asset-backed securities and other debt securities amounting to €872,427 thousand, which are guaranteed also by monoline insurers.

1.7 Group Exposure to Leveraged Finance

As part of its lending business, the Group grants loans or credit lines that may be classified as leveraged finance, in that they finance the acquisition of significant stakes in target companies, which are usually subsequently absorbed by the borrower.

Repayment and debt service depend largely on the cash flow generated by the new company post-absorption.

These transactions bear good yields in terms of both interest and fees. However, the risk is higher given the borrower's greater leverage.

The Group is generally involved in leveraged finance through participation in syndicated loans made by a banking syndicate.

In December 2009 the total amount of these transactions, mainly concentrated in the CIB Division, was 8,346,800 thousand (net of value adjustments totaling € 215,800 thousand), 63% of which was with 20 counterparties, almost totally EU residents.

These exposures are monitored continuously for credit quality by analyzing the borrower's business performance indicators and fulfillment of budget objectives in order to detect any lasting impairment losses.

In the case of further future syndications through the sale of a portion of the loan to third parties, at the same paying a portion of fees already received, these fees are not recognized as income.

2. OTC Trading Derivatives with Customers

The business model governing OTC derivatives trading with customers provides for centralization of market risk in the MIB Division, while credit risk is assumed by the Group company which, under the divisional or geographical segmentation model, manages the relevant customer's account.

The Group's operational model provides for customer trading derivatives business to be carried on, as part of each subsidiary's operational independence:

- by the Italian commercial banks that close transaction in OTC derivatives in order to provide non-institutional clients with products to manage currency, interest-rate and price risk. Under these transactions, the commercial banks transfer their market risks to the MIB Division by means of equal and opposite contracts, retaining only the relevant counterparty risk. The commercial banks also place or collect orders on behalf of others for investment products with embedded derivatives (e.g., structured bonds);
- by the MIB Division operating with large corporates and financial institutions, in respect of which it assumes and manages both market and counterparty risk;
- by UCB AG, BA AG and Pekao, which transact business directly with their customers.

UniCredit Group trades OTC derivatives on a wide range of underlyings, e.g.: interest rates, currency rates, share prices and indexes, commodities (precious metals, base metals, petroleum and energy materials) and credit rights.

OTC derivatives offer considerable scope for personalization: new payoff profiles can be constructed by combining several OTC derivatives (for example, a plain vanilla IRS with one or more plain vanilla or exotic options). The risk and the complexity of the structures obtained in this manner depend on the respective characteristics of the components (reference parameters and indexation mechanisms) and the way in which they are combined.

Credit and market risk arising from OTC derivatives business is controlled by the Chief Risk Officer competence line (CRO) in the Parent and/or in the Division or subsidiary involved. This control is carried out by means of guidelines and policies covering risk management, measurement and control in terms of principles, rules and processes, as well as by setting VaR limits.

This business with non-institutional clients does not entail the use of margin calls, whereas with institutional counterparties (dealt with by the MIB Division) recourse may be made to credit risk mitigation techniques, for example "netting" and/or collateral agreements.

In addition to the information given in chapter 18 Other Information – Fair Value of Part A) Accounting Policies, it should be noted that write-downs and write-backs of derivatives to take account of counterparty risk are determined in line with the procedure used to assess other credit exposure, specifically:

- performing exposure to non-institutional clients of the Italian commercial banks is valued in terms of PD (Probability of Default) and LGD (Loss Given Default), in order to obtain a value in terms of 'expected loss' to be used for items designated and measured at fair value;
- non-performing positions are valued in terms of estimated expected future cash flow according to specific indications of impairment (which are the basis for the calculation of the amount and timing of the cash flow).

Referring to write-downs and write-backs of derivatives to take account of counterparty risk totaled, no significant effects have affected 2009 Profit&Loss.

Here follows the breakdown of balance-sheet asset item 20 “Financial assets held for trading” and of balance-sheet liability item 40 “Financial liability held for trading”.

To make the distinction between customers and banking counterparties, the definition contained in Banca d’Italia Circular No. 262 as firstly updated on November 18, 2009 (which was used for the preparation of the accounts) was used as a reference.

Structured products were defined as derivative contracts that incorporate in the same instrument forms of contracts that generate exposure to several types of risk (with the exception of cross currency swaps) and/or leverage effects.

The balance of item 20 “Financial assets held for trading” of the consolidated accounts with regard to derivative contracts totaled € 75,086 million (with a notional value of € 2,160,065 million) including € 21,620 million with customers. The notional value of derivatives with customers amounted to € 387,425 million including € 363,925 million in plain vanilla (with a fair value of € 20,948 million) and € 23,500 million in structured derivatives (with a fair value of € 672 million). The notional value of derivatives with banking counterparties totaled € 1,772,640 million (fair value of € 53,466 million) including € 169,112 million related to structured derivatives (fair value of € 3,523 million).

Customers entered into a total of 5,393 structured derivative contracts with the Group that are reported in balance-sheet asset item 20 “Financial assets held for trading”. Of these, the largest 20 customers in terms of exposure cover 36% of overall exposure (generating exposure of € 239 million for the Group).

The balance of item 40 “Financial liabilities held for trading” of the consolidated accounts with regard to derivative contracts totaled € 76,932 million (with a notional value of € 1,762,266 million) including € 19,335 million with customers. The notional value of derivatives with customers amounted to € 267,902 million including € 243,204 million in plain vanilla (with a fair value of € 18,232 million) and € 24,698 million in structured derivatives (with a fair value of € 1,103 million). The notional value of derivatives with banking counterparties totaled € 1,494,364 million (fair value of € 57,597 million) including € 116,569 million related to structured derivatives (fair value of € 2,835 million).

D. BANKING GROUP – CREDIT RISK MEASUREMENT MODELS

During financial year 2009, the Group completed the re-estimation of the Credit Portfolio Model, in order to adapt it to the different geographic areas, both internal and abroad where the Group operates.

Roll-out of mentioned Credit Portfolio Model on the relevant Legal Entities of the Group will be carried out during 2010.

Section 2 – Market Risk

Generally speaking, banks' market risks are due to price fluctuations or other market risk factors affecting the value of positions on its own books, both the trading book and the banking book, i.e. those arising from business operations and strategic investment decisions. UniCredit Group's market risk management includes, therefore, all activities relating to cash and capital structure management, both in the Parent and in the individual Group companies.

The Parent monitors risk positions at the Group level. The individual Group companies monitor their own risk positions, within the scope of their specific responsibilities, in line with UniCredit Group supervision policies. The results of individual companies' monitoring activities are, in any event, shared with the Parent company.

The individual companies comprising the Group produce detailed reports on business trends and related risks on a daily basis, forwarding market risk documentation to the Parent company.

The Parent's Group Market Risk unit is responsible for aggregating this information and producing information on overall market risks.

Organizational Structure

The Parent's Board of Directors lays down strategic guidelines for taking on market risks by calculating capital allocation for the Parent company and its subsidiaries, depending on propensity for risk and value creation objectives in proportion to risks assumed.

The Parent's Risks Committee provides advice and recommendations in respect of decisions taken by the Chief Executive Officer and in drawing up proposals made by the Chief Executive Officer to the Board of Directors with regard to the following:

- the Group's risk appetite, including capitalization objectives, capital allocation criteria, risk-taking capacity, cost of equity and dividends policy, as well as internal capital limits;
- general strategies for the optimization of risks, general guidelines and general policies for Group risk management
- internal models for measuring all types of risks to calculate regulatory capital
- structure of limits by type of risk
- strategic policies and funding plans.

Similarly, it decides on the following:

- the definition of guidelines relative to Group financial policies (asset and liability management strategies, including the Group-wide duration profile)
- the allocation of risk to the Business Units and to the Entities, specific risk-related guidelines and strategies and consequently setting of limits for achieving objectives in terms of risk appetite and limits by type of risk
- methods for the measurement and control of the Group's aggregate risks (deriving from the aggregation of individual types of risk)
- guidelines, policies and strategies for real estate risk, financial investment risk and business risk
- intervention plans in the event of critical aspects shown in the initial validation reports and over time;
- topics involving the implementation of Basel 2 standards, as well as the respective project and process activities

The Risk Committee comprises the following members: the Chief Executive (Chair of the Committee), the Deputy General Managers, the Chief Risk Officer (chairs the Committee in the absence of the Chief Executive) and the Chief Financial Officer, the Legal & Compliance Officer, the CEE Division Program Officer, and the Human Resources Officer. The Head of the Group Internal Audit Department also attends meetings of the Risk Committee, but is not entitled to vote.

In June 2009, the Board of Directors approved the Group Risk Management reorganization guidelines, with the following objectives:

- improvement of directing, coordinating and control activities for some aggregate risks (so-called “Portfolio Risk”), through dedicated responsibility centers (“Portfolio Risk Managers”) focusing and specializing entirely on the abovementioned risks, from a Group and cross-divisional standpoint;
- maintaining consistency with the Group business model, ensuring clear specialization and focus – from a purely transactional point of view – of specific centers of responsibility on risks originating with the Group functions assigned to assume risk, at the same time keeping these “centers of responsibility” (“Transactional Risk Managers”) completely independent from the functions assigned to assume risk (e.g. Business Units, Cash Management functions, Asset Management, and CEE Countries).

With reference to Market Risk in particular, the “Markets & Balance Sheet Risks Portfolio Management” department was created, responsible for supervising and managing the overall profile for market risk and Group balance sheet and cash management by setting all the respective strategies, methodologies and limits.

The aforesaid department interfaces in turn and cooperates for market risk monitoring purposes with the so-called “Transactional” level functions responsible for all risks (market, but also credit and operational risk) originating with the relevant Strategic Business Areas (SBAs)/Divisions (CIB&PB, Retail, Treasury, Asset Management and CEE). For market risk purposes, the predominant exposure is found in the CIB&PB (Corporate, Investment Bank & Private Bank) SBA, within which the Investment Banking Division operates.

As part of the market risk reorganization described above, the structure of the Committees responsible for market risk was reviewed. This structure has three levels:

- First-level Committees;
 - Group Risk Committee
- Second-level Committees;
 - Group Market Risk Committee
 - Group Asset & Liabilities Committee
- Third-level Committees;
 - Group Transactional Markets Committee

In general, the Parent company proposes limits and investment policies for the Group and its entities in harmony with the capital allocation process when the annual budget is drawn up.

In addition, the Parent’s Asset and Liability Management unit, in coordination with other regional liquidity centers, manages strategic and operational ALM, with the objective of ensuring a balanced asset position and the operating and financial sustainability of the Group’s growth policies on the loans market, optimizing the Group’s exchange rate, interest rate and liquidity risk.

In 2009, the Group continued to develop and expand existing models with the aim of achieving increasing accuracy in the representation of the Group’s risk profiles for portfolios of complex financial products.

The monitoring of these risk profiles was made even more efficient and rapid with the introduction of individual risk limits, in addition to VaR limits, in relation to primary investment banking operations.

In the same way, and in an effort to achieve product/portfolio assessments based on more rigorous standards of prudence, methodologies for establishing valuation reserves for loan products were refined and made more specific with a special focus on structured loans.

Internal Model for Price, Interest Rate and Exchange Rate Risk of the Regulatory Trading Book

Within the organizational context described above, the policy implemented by the UniCredit Group within the scope of market risk management — and so, specifically, in managing interest rate risk — is aimed at the gradual adoption and use of common principles, rules and processes in terms of appetite for risk, ceiling calculations, model development, pricing and risk model scrutiny.

Group Market & Balance Sheet Risks Portfolio Department is specifically required to ensure that principles, rules and processes are in line with industry best practice and consistent with standards and uses in the various countries in which they are applied.

The main tool used by the UniCredit Group to measure market risk on trading positions is Value at Risk (VaR), calculated using the Historical simulation method. During this phase of convergence, however, some companies belonging to the Group still use a Monte Carlo-type simulation approach.

The Historical simulation method provides for the daily revaluation of positions on the basis of trends in market prices over an appropriate observation period. The empirical distribution of profits/losses deriving there from is analyzed to determine the effect of extreme market movements on the portfolios. The distribution value at the percentile corresponding to the fixed confidence interval represents the VaR measurement. The parameters used to calculate the VaR are as follows: 99% confidence interval; 1 day time horizon; daily update of time series, which can be extended to cover at least a year. Use of a 1-day time-horizon makes it possible to make an immediate comparison between profits/losses realized.

In its capital calculation and risk monitoring functions, UniCredit adopts the internal models used by UCB AG and BA AG and approved by the respective national supervisory authorities. For the purposes of calculating capital requirements, the internal model method has been authorized for full use for UCB AG and BA AG. No recourse is made, on the other hand, to the internal model for calculating capital requirements regarding trading positions in relation to the Parent company, UCI Ireland and Bank Pekao. The standardized measurement method is also applied to the calculation of capital covering the risk of holding banking book exposure in foreign currencies for the subsidiaries that do not perform trading activities.

The characteristics of the internal models are as follows:

- UCB AG: Monte Carlo simulation with the full evaluation of individual positions taken in options, with VaR calculated as 1-day expected loss with a 99% confidence interval. The Monte Carlo simulation is based on a variance-covariance matrix calculated on a one-year historical observation period without weighting.
- BA AG: Declustered² historical simulation based on a two-year historical observation period with VaR calculated as 1-day expected loss with a 99% confidence interval and with the full evaluation of individual positions taken in options.

² Historical returns for each risk factor are weighted by the ratio between the current volatility and the historical volatility.

Trading portfolios are subject to Stress Tests according to a wide range of scenarios for managerial reporting, which are described in paragraph 2.8 below. According to national regulations, some relevant scenarios are also a matter of regulatory reporting on a quarterly basis. Moreover, substitute risk measures, i.e. sensitivities, defined stress scenarios or the indication of nominal amounts, are considered and included in the regulatory reporting for the estimation of risks that are not covered by the VaR simulation of UCB AG internal model.

Apart from use in calculating capital requirements on market risks, internal models are applied to all positions included in the trading book to perform back testing, through the continuous comparison of the bank's daily VaR measures with the subsequent daily profit or loss. This test consists of comparing the estimated expected loss with clean P&L data, i.e. simulated changes in portfolio value that would occur were end-of-day positions to remain unchanged.

As for internal scenario analysis policies and procedures (i.e. "stress testing"), these procedures have been entrusted to the individual legal entities. Overall, however, a set of scenarios common to the Group as a whole, is applied to all positions in order to check on a monthly basis the potential impact that their occurrence could have on the global trading portfolio.

In aggregating the various risk profiles of the different risk taking units of the Group, the diversification arising from positions taken by group companies which have adopted different internal models has conservatively been disregarded when calculating the overall risk.

The harmonization of VaR methodologies and the definition of an appropriate consistent framework to come to the calculation of a Group's VaR is one of the main targets of the Market Risk reorganization within the group.

2.1 Interest Rate Risk – Trading Book

Qualitative Information

Trading book interest rate risk arises from financial positions taken by Group specialist centers holding assigned market risk limits within certain levels of discretion. Apart from use of internal models in calculating capital requirements on market risks, risk positions in the Group are monitored and subject to limits assigned to the portfolios on the base of managerial responsibilities and not purely on regulatory criteria.

As stated, the UniCredit Group uses a VaR internal model to control market risk on the trading book. VaR, being a single metric, thus quantifies overall market risk, which means that breaking it down into interest rate risk, price risk and exchange rate risk components is superfluous.

Quantitative Information

Trading Portfolio

Shown below are the VaR data on the overall market risk for the managerial trading book.

The following table gives the VaR for the aggregate risk of the trading portfolio.

Interest rate risk on trading book

December 31, 2009

Daily VaR on Trading Book		2009			2008
	12.31.2009	AVERAGE	MAX	MIN	AVERAGE
UniCredit Spa ⁽¹⁾	3.7	3.9	5.4	2.1	5.6
UCI - Ireland	0.2	0.2	0.2	0.2	0.2
BA Group	14.7	21.7	41.1	11.9	22.2
UCB AG	21.4	57.8	113.4	19.7	56.1
UniCredit Group Total ⁽²⁾	39.9	83.6	160.2	33.9	84.1

(1) Regulatory Trading Book VaR as of 12.31.2009 is equal to 5 € millions.

(2) Total VaR is computed as simply the sum of the different components, without taking into account any differentiation effect among the various Entities.

Changes in Risk

In 2009, there has been a generalized reduction in the UniCredit Group's market risk, principally due to a marked reduction both in the credit spreads representing the principal risk factor characterizing overall exposure and in their volatility, an element that also affected other risk factors (interest rate risk, share prices and exchange rate risk), as well as a strategy of gradual reduction of exposure to non-core businesses in the portfolios compared to "core markets."

The following graphs analyze the backtesting results referred to the market risk on the trading book, in which VaR results are compared to the theoretical profit and loss results for each main risk taker unit:

UCB AG

During 2009, only 1 overdraft was recorded in UCB AG, principally due to substantial updating of market quotes on some specific bond types in a very illiquid market framework. In general, a marked reduction of market volatility has been observed during the last year.

BA AG

In BA no overdrafts were recorded in 2009.

2.2 Interest Rate Risk – Banking Book

Qualitative Information

A. General aspects, operational processes and methods for measuring interest rate risk

Interest rate risk consists of changes in interest rates that are reflected in:

- interest income sources, and thus, the bank's earnings (cash flow risk);
- the net present value of assets and liabilities, due to their impact on the present value of future cash flows (fair value risk).

The Group measures and monitors this risk within the framework of a banking book interest rate risk policy that establishes consistent methodologies and models and limits or thresholds to focus on with regard to the sensitivity of net interest income and the Group's economic value.

Interest rate risk has an impact on all owned positions resulting from business operations and strategic investment decisions (banking book).

At December 31, 2008, the sensitivity of interest income to an immediate and parallel shift of +100bps was +€508 million (and -€951 million for a shift of -100bps).

The sensitivity of the economic value of shareholders' equity to an immediate and parallel change in interest rates ("parallel shift") of +1 bp was -€ 1 million at December 31, 2009³.

³ Excluding UC Leasing, UC Factoring, UC Luxembourg and other minor Legal Entities.

The main sources of interest rate risk can be classified as follows:

- repricing risk - the risk resulting from timing mismatches in maturities and the repricing of the bank's assets and liabilities; the main features of this risk are:
 - yield curve risk - risk resulting from exposure of the bank's positions to changes in the slope and shape of the yield curve;
 - basis risk - risk resulting from the imperfect correlation in lending and borrowing interest rate changes for different instruments that may also show similar repricing characteristics;
- optionality risk – risk resulting from implicit or explicit options in the Group's banking book positions.

Some limits have been set out, in the above described organization, to reflect a risk propensity consistent with strategic guidelines issued by the Board of Directors. These limits are defined in terms of VaR (calculated using the methodology described above in relation to the trading portfolio), Sensitivity or Gap Repricing for each Group bank or company, depending on the level of sophistication of its operations. Each of the Group's banks or companies assumes responsibility for managing exposure to interest rate risk within its specified limits. Both micro- and macro-hedging transactions are carried out for this purpose.

At the consolidated level, Group HQ's Asset Liability Management Unit takes the following measures:

- It performs operating sensitivity analysis in order to measure any changes in the value of shareholders' equity based on parallel shocks to rate levels for all time buckets along the curve;
- Using static gap analysis (i.e., assuming that positions remain constant during the period), it performs an impact simulation on interest income for the current period by taking into account different elasticity assumptions for demand items;
- It analyses interest income using dynamic simulation of shocks to market interest rates;
- It develops methods and models for better reporting of the interest rate risk of items with no contractual maturity date (i.e., demand items).

In coordination with the Group's ALM and Treasury Areas, the Market and Balance Sheet Risks Portfolio Management Area sets interest rate risk limits using VaR methodologies and verifies compliance with these limits on a daily basis.

B. Fair value hedging operations

Hedging strategies aimed at complying with interest rate risk limits for the banking portfolio are carried out with listed or unlisted derivative contracts, and the latter, which are commonly interest rate swaps, are the type of contracts used the most.

Macro-hedging is generally used, meaning hedges related to the amounts of cash contained in asset or liability portfolios. Under certain circumstances, the impact of micro-hedges related to securities issued or individual financial assets are recognized (especially when they are classified in the available-for-sale portfolio).

C. Cash flow hedging operations

In certain instances, cash flow hedging strategies are also used as an alternative to fair value hedging strategies in order to stabilize income statement profits in the current and future years. Macro-hedging strategies are mainly used and they may also refer to the interest rate risk of the core portion of financial assets "on demand."

Quantitative information

This distribution is made on the basis of the period between the balance sheet date and the first following yield review date. For fixed-rate transactions the residual life is the period from the balance sheet date to final maturity. On balance sheet items are disclosed at their carrying value. Derivatives are shown, under the double entry method, at settlement value for those with underlying securities and at the notional value for those without underlying securities; options are shown at their delta equivalent value.

2. Bank portfolio: internal models and other sensitivity analysis methodologies

Please refer to paragraph “2.1 Interest Rate Risk – Regulatory trading book” – Quantitative information” for the aggregate sensitivity analysis model, used to measure the different risks.

2.3 – Price Risk – Regulatory Trading Book

Qualitative Information

A. General Information

As described above, price risk relating to equities, commodities, investment funds and related derivative products included in the trading book, originates from positions taken by Group specialist centers holding assigned market risk limits within certain levels of discretion.

Price risk deriving from own trading of these instruments is managed using both directional and relative value strategies via direct sale and purchase of securities, regulated derivatives and OTCs and recourse to security lending. Volatility trading strategies are implemented using options and complex derivatives.

B. Price Risk Management Processes and Measurement Methods

For both a description of internal processes for monitoring and managing risk and an illustration of the methodologies used to analyze exposure, please refer to introduction on internal models.

2.4 Price Risk – Banking Book

Qualitative Information

A. General Aspects, Price Risk Management Processes and Measurement Methods

Banking book price risk primarily originates in equity interests held by the Parent company and its subsidiaries as a stable investment, as well as units in mutual investment funds not included in the trading book in so far as they are also held as a stable investment.

Just in respect of these last instruments, internal price risk management and measurement processes reproduce what has already been said with regard to the regulatory trading book.

2.5 Exchange Rate Risk

Qualitative Information

A. General Aspects, Exchange Rate Risk Management Processes and Measurement Methods

As it has already been said in the introduction, exchange rate risk also originates from positions taken by Group specialist centers holding assigned market risk limits within certain levels of discretion. Exchange risk originates from currency trading activities performed through the negotiation of the various market instruments, and is constantly monitored and measured by using internal models developed by group companies. These models are, in addition, used to calculate capital requirements on market risks corresponding to this type of risk.

B. Hedging Exchange Rate Risk

The Parent company implements a policy of hedging profits created by the Group's Polish subsidiaries (which constitute the main subsidiaries not belonging to the euro zone), as well as dividends relating to the previous year, said policy being activated during the period between year-end and the payment date. This hedging policy is implemented using foreign exchange derivative products aimed at protecting against fluctuations in the Euro/Zloty exchange rate.

2.7 Sensitivity Analysis and Stress Testing

The Group conducts sensitivity analysis weekly to determine the effect on the income statement of changes in the value of individual risk factors or several risk factors of the same type. The analysis covers the CIB division's entire portfolio.

The following information covers sensitivity to interest rates, credit spreads, exchange rates, share prices and commodity prices.

Interest-Rate Sensitivity

Sensitivity to changes in interest rates is determined using both parallel shifts of interest-rate curves, and changes in the curve itself.

The curves are analyzed using parallel shifts of +1 basis point, ±10bps and ±100bps.

For each 1bp shift, sensitivity is calculated for a series of time-buckets. Sensitivity for changes in the steepness of the rate curve is analyzed by clockwise turning (Turn CW), i.e. an increase in short-term rates and a simultaneous fall in long-term rates, and by counter-clockwise turning (Turn CCW), whereby short-term rates fall and long-term rates rise.

Currently, clockwise and counter-clockwise turning use the following increases/decreases:

- +50bps/-50bps for the one-day bucket
- 0 bps for the one-year bucket
- -50bps/+50bps for the 30-year plus bucket
- for each of the above buckets, the change to be set is found by linear interpolation.

Credit Spread Sensitivity

Credit spread sensitivity is calculated by assuming a worsening of creditworthiness seen in a parallel shift of +1bp/+10bps/+100bps in the credit spread curves.

These sensitivities are calculated both inclusively, assuming a parallel shift of all the credit spread curves, and in respect of specific rating classes and economic sectors.

In addition to the foregoing, the sensitivity resulting from a deterioration of creditworthiness (i.e. a change of relative +50%) or an improvement (i.e. a change of relative -50%) is calculated; in this case the shape of the credit spread curves is also changed, since the change in bps of higher spreads will be greater than that of lower spreads.

In this regard, the most serious impact of the deterioration of the creditworthiness scenario (i.e. by relative +50%) observed in the last three months, according to which the hypothetical loss grew by -€1,321 million (September 2009) to -€1,135 million (December 2009), was largely due to the general widening of spreads. Consequently, in absolute terms, this scenario is characterized by a smaller assumed widening of the credit spreads.

Exchange-Rate Sensitivity

This simulation assesses the economic impact of the appreciation or depreciation by 1%, 5% and 10% of each currency against all the others. Exposure to the various currencies is indicated as the "Delta cash equivalent" in euros: this is the euro equivalent of the currency amount which would expose the bank to the same exchange-rate risk arising in its actual portfolio.

		€million					
Exchange rates	Delta Cash-equivalent	-10%	-5%	-1%	+1%	+5%	+10%
EUR		-40.8	-19.6	-4.0	2.9	-6.6	5.7

GBP	-191.2	23.8	10.1	1.9	-1.9	-8.7	-15.6
CHF	-24.7	-4.8	-2.9	-0.1	-0.2	-1.6	-4.2
JPY	40.4	9.3	0.9	-0.3	0.4	2.4	4.6

Share-Price and Commodity-Price Sensitivity

Share-price sensitivity is expressed in two ways:

- as a "Delta cash-equivalent", i.e. the euro equivalent of the quantity of the underlying that would expose the bank to the same risk arising from its actual portfolio;
- as the economic result of a rise or fall in spot prices of 1%, 5%, 10% and 20%.

The Delta cash-equivalent and the Delta 1% (i.e. the economic impact of a 1% rise in spot prices) are calculated both for each geographical region (assuming that all stock markets in the region are perfectly correlated) and on the total (assuming therefore that all stock markets are perfectly correlated). The sensitivity arising from changes of 5%, 10% and 20% is calculated solely on the total.

In addition, sensitivity to commodity price changes is calculated according to the above criteria. Given its secondary importance as compared to other risk exposures, this is calculated as a single class.

Sensitivity to the volatility of interest rates, exchange rates and share prices

In addition to the sensitivity of financial instruments to changes in the underlying risk factor, we also calculate sensitivity to the volatility of interest rates, exchange rates and share prices, assuming a positive or negative change of 30% in volatility curves or matrixes.

With regard to the sensitivity to the volatility of interest rates, as with the scenarios of sensitivity to the widening of credit spreads, there was a marked decrease in hypothetical losses in the last quarter. This was due primarily to decreased volatility.

By contrast, there was a relative increase in hypothetical losses in the scenarios of a 30% reduction in equities' volatility. In view of a substantially unchanged Delta and Vega profile, this was due to the absolute low level of implicit market volatility based on bullish expectations (which are normally implemented through deep out-of-the-money options).

Stress Tests

Stress Tests complement the sensitivity analysis and VaR results in order to assess the potential risks in a different way. Stress test performs the evaluation of a portfolio under both simple scenarios (assuming change to single risk factors) and complex scenarios (assuming simultaneous changes in a number of risk factors).

Results for simple scenarios are reported to top management on a weekly basis, together with the most relevant sensitivities. They include shocks on:

- Interest rates: Parallel shifts and Steepening/Flattening of IR curves; Increase/Decrease in IR volatilities
- Credit Markets: Parallel shifts of Credit Spreads curves (both absolute changes and relative changes); sensitivity to Base Correlation, Issuer Correlation and Recovery Rates
- Exchange Rates: Appreciation/Depreciation of each currency; Increase/Decrease in FX volatilities
- Equities: Increase/Decrease in Spot Prices; Increase/Decrease in Equity volatilities; sensitivity to Implied Correlation
- Commodities: Increase/Decrease in Spot Prices

As far as complex scenarios are concerned, so far, two different scenarios (Full US Recession and Financial Crisis) have been applied to the whole CIB portfolio on a monthly basis and reported to top management.

“Full US Recession” Scenario

This scenario assumes a severe US recession affecting also the rest of the world by a “contagion effect”. In terms of macro-economic variables, this scenario assumes:

- A dramatic decrease in equity prices and indices on US and non-US markets associated to an equity volatility increase;
- A dramatic US (different stress factors depending on the maturity) and non-US (different stress factors depending on the maturity and geographic area) interest rate decrease each also associated to an increase in interest rate volatility;
- A dramatic and comprehensive widening in *credit spreads* depending on rating and industry class.

“Financial Crisis” Scenario

The *Financial Crisis* scenario was introduced in the last quarter of 2008 and reflects the trend of Financial Markets in the third quarter 2008. To account for the low liquidity in the market, the time horizon for this scenario was extended to cover a period of one quarter, as well as the 2 to 6 weeks applied so far.

In terms of macro-economic variables, this scenario assumes:

- Stock markets plunging (fall) combined with an increase in equity volatilities;
- A comprehensive decrease in interest rates (different stress factors depending on the maturity and on the geographical area), together with a distinct steepening of interest rates curves. In this scenario, an increase in interest rate volatility is also assumed;
- A more dramatic and comprehensive widening of *credit spreads* with different stress factors depending on rating and industry class.

Scenario	€ million	
		Total
US Recession	-	321
Financial Crisis	-	1,018

2.8 Independent Price Verification Process

In this respect, further to the market turmoil following the sub-prime mortgages' meltdown and the subsequent uncertainties in the valuation of most of the Structured Credit Products, as mentioned above the Holding Company (HC) Group Market & Balance Sheet Risks Portfolio Management function, in a joint effort with Market Risk Control at the Legal Entity (LE) level, has decided to:

- centralize the Independent Price Verification (IPV) process for such products in the Risk Control function of UCB AG London branch which has been elected as the group's "competence center" for the evaluation of complex structured credit products, i.e. ABS, CDO, CLO, CDO of ABS, etc., which represent the various sectors.
- harmonize the IPV methodology across the group defining a consistent approach based on the ranking of each single position according to the availability and relative reliability of available price sources. As a consequence, all such positions have been treated and valued uniformly at the group level, including Bank of Austria's (BA) and UCI Ireland's
- define and develop a proper methodology to apply specific Fair Value Adjustments to such valuations. The chosen approach is essentially based on the above ranking of price sources and defines specific stress tests for market valuations, the wider the less reliable is the ranking through their respective sensitivity to a one-notch downgrade
- the whole process has been shared and developed within the framework of the established cooperation model between all CRO (Chief Risk Office) functions either at the HC as well as at the LE level and the HC and LE CFO (Chief Financial Office) functions, responsible for the accounting treatment of such valuations and adjustments.

Section 3 – Liquidity Risk

Qualitative Information

A. General aspects, operational processes and methods for measuring liquidity risk

Definition of Liquidity Risk

Liquidity Risk is defined as the risk that the Group may find itself unable to fulfil its expected or unexpected payment obligations (by cash or delivery) without jeopardizing its day-to day operations or its financial condition and may result from various internal or external factors.

The key principles of the UniCredit Group's liquidity risk management model

The Group aims to be liquid at all times, namely to maintain liquidity at the level enabling to conduct safe operations. The objective is to fund its operations at the best rate conditions under normal operating circumstances, and to remain in a position to meet payment obligations in the event of a liquidity crisis.

To this end, the Group complies accurately with the legal and regulatory provisions imposed by the national Central Banks and by the national authorities of each country where it operates.

A liquidity crisis may be defined as an event which would prevent the Group from having the means to fulfil its payment obligations. This would be detrimental to our relationship with our customers that is based on their trust that the bank is able to repay its obligations timely.

Given the Group's international presence, the management's point of view is that local laws and local regulation applicable to each Group company are to be observed, but they are not sufficient to manage overall liquidity risk. For this reason, in addition to local legal and regulatory requirements the Group, through the Holding and under the responsibility of its Group Risk Management, defines policies and metrics to be applied at the Group-wide level, as to ensure that liquidity position of any entity meets the requirements of the Group.

The key principle is that UniCredit Group manages the liquidity on a centralised oversight at the Group level, with a decentralized execution through the Regional Liquidity Centres (Italy, Germany, Austria & CEE, and Poland). Each Regional Liquidity Centre is responsible for compliance with both their own limits and with those of the liquidity management of the Banks/Companies falling within its own perimeter. Due to and in line with local regulatory requirements and business needs, each entity manages its liquidity on the local level within the framework of UniCredit Group.

The centralised approach to liquidity risk management is aimed at:

- Reducing overall borrowing requirements from non-Group counterparties;
- Optimising access to liquidity markets by leveraging on the Group's credit rating and minimising funding costs.

More in detail, while the Regional Liquidity Centre is responsible to optimise the liquidity within the perimeter of its responsibility through a first level netting activity, the Holding holds a second level netting role of liquidity distribution centre and is in charge of overseeing the Group's liquidity, by complying both with the consolidated limits and with tactical and structural funding strategies. This role at Group level is held by Group Finance, through the Group Treasury, which is in charge of this process on the basis of the reports on net deficits/surpluses generated on a daily basis by the single Regional Liquidity Centres.

Group Treasury manages liquidity flows, providing or receiving funding through intra-group deposits and financings, with respect to which it sets the market prices in accordance with the guidelines defined at the Group level by the Transfer Price Policy, and subject to the authorisation of the credit exposure by the competent decision-making bodies (e.g. Credit Committee, Board of Directors, etc.) at both the local level and the Group level.

Only UniCredit S.p.A. has the access to the public unsecured market (senior, subordinated). The Regional Liquidity Centres, instead, keep market access through money markets instruments, private placements and with the instruments typically available on specific markets (i.e. Pfandbriefe, CD/CP, etc.).

Optimisation of liquidity risks is pursued through the setting of specific limits on the standard banking activity of transforming short, medium and long-term maturities. This is implemented in accordance with legal and regulatory framework in each country and internal rules and policies of the Group Companies through management models in place within the individual Regional Liquidity Centres. Such models are subject to analyses carried out by the local Risk Management or equivalent structure with the same responsibilities in coordination with the Group's Risk Management to ensure that they comply with the metrics and the objectives of the Group's Liquidity Policy.

The regional policies must conform to national law and regulatory requirements and the fundamental principles of the Group's Policy, as set out below:

- The Group, through the Liquidity Risk Portfolio Department and under the responsibility of the Group's Risk Management, determines and coordinates the liquidity risk management policies. The control function is executed through the Divisional Risk Officer, with a *primus inter pares* control role for the Treasury Risk Department. Liquidity management transactions are executed by the Group's Treasury, under the responsibility of the Chief Financial Officer (CFO).
- Each *Regional Liquidity Centre* is responsible for compliance, with the liquidity policy, on the part of the banking companies within its scope of competence and for the optimisation of funding carried out on its relevant markets/through its relevant customer base.

Techniques for risk measurement, internal capital determination and stress testing

It is generally accepted that liquidity risk cannot be mitigated by capital. As such Liquidity risk does not add to the Economic Capital usage, nevertheless it is considered as an important risk category also for the risk appetite determination of the Group. Liquidity risk, for its particular nature, is addressed by means of Gap analyses, liquidity stress testing, and complementary measures (mainly through a set of ratios: e.g. Loan to Deposit, Leverage). In particular Gap analyses are performed within two distinct time horizons:

- liquidity mismatch approach on a daily basis, which controls for the short term liquidity risk arising from the overnight up to a 3 months maturity
- gap ratios on a monthly basis, which control the medium to long term risk (structural liquidity) from the 1Y maturity onwards

The liquidity metrics

The Group's Liquidity Policy is based upon the Liquidity Risk Mismatch Model which is characterized by the following fundamental principles:

1. Short-term liquidity risk management (operational liquidity), which considers the events that will impact upon the Group's liquidity position from 1 day up to one year. The primary objective is to maintain the Group's capacity to fulfil its ordinary and extraordinary payment obligations while minimizing the relevant costs;
 - a. Cash Horizon: this is an additional short term measure, which expresses for how many days the Group may not need to access the wholesale market (short, medium and/or long term) in case of an *outage* of the markets
2. Structural liquidity risk management (structural risk), which considers the events that will impact upon the Group's liquidity position over one year. The primary objective is to maintain an adequate ratio between total liabilities and medium to long-term assets, with a view to avoiding pressures on short-term sources (both current and future), while in the meantime optimizing the cost of funding.
3. Stress tests: Liquidity risk is a low probability, high impact event. Therefore stress testing is an excellent tool to reveal potential vulnerabilities in the Balance Sheet. The Bank uses several scenarios ranging from general market crisis to idiosyncratic crisis, and combinations hereof.
4. Additional metrics: in 2010 two additional measures are going to be followed according to the Risk Appetite framework set by UniCredit Group's BoDs.

In this context, the Holding takes into account all of the assets, liabilities, off-balance sheet positions and present and future events which generate certain or potential cash flows for the Group, thereby protecting the Group Banks/Companies from risks related to the transformation of maturity.

Short term liquidity management

Consolidated short-term liquidity management aims at ensuring that the Group remains in a position to fulfil its cash payment obligations, whether expected or unexpected, for the following 12 months.

- The standard measures taken for such purposes are the following:
- management of the access to payment systems (operational liquidity management);
management of cash payments to be made and monitoring of the level of liquidity reserves and the extent of utilization of the same (analysis and active management of the maturity ladder);

These listed principles are applicable at Group level and have to be considered across the Regional Liquidity Centres.

Cash Horizon

The Group adopts the indicator "Cash Horizon" as a synthetic indicator of the liquidity risk levels, this indicator is monitored through the Maturity Ladder as defined above. This indicator identifies - for each perimeter where it is applied (from the Group level to single Regional Liquidity Centres) - the number of days over which the Legal Entity is no longer able to face up its liquidity obligations as defined above, after having used the available counterbalancing capacity. The objective of the Group during 2009 has been to guarantee a cash horizon of at least 3 months.

Structural liquidity management

The Group's structural liquidity management aims to limit refinancing exposures with respect to maturities exceeding one year and thus reducing refinancing needs in the shorter term.

The maintenance of an adequate ratio between medium to long-term liabilities and assets aims to avoid pressures on short-term sources, whether present or future.

The standard measures taken for such purposes are the following:

1. the postponement of liabilities maturities to reduce the sources of less stable funding, while in the meantime optimizing the cost of funding (integrated management of strategic liquidity and tactical liquidity);
2. the financing of growth through strategic funding activities, setting the most appropriate maturities (Financial Planning and elaboration of the Contingency Liquidity Policy-CLP);
3. The conciliation of medium- to long-term wholesale funding requirements with the need to minimize costs, by diversifying sources, national markets, currencies of issuance and instruments used (realization of the Contingency Funding Plan-CFP).

Liquidity Stress Test

Stress testing is a risk management technique used to evaluate the potential effects on an institution's financial condition of a specific event and/or movement in a set of financial variables. As a forward looking tool, liquidity stress testing diagnostic the institution's liquidity risk. In particular the results of the stress tests are used to:

- Assess the adequacy of liquidity limits both in quantitative and qualitative terms (ex. the needs of setting and allocating unsecured financial limits)
- Planning and carrying out alternative sourcing transactions for purposes of off-setting liquidity outflows
- Structuring/modifying the liquidity profile of the Group's assets
- Providing support to the development of the liquidity contingency plan

In order to execute stress tests that are consistent across the Liquidity Centres, the Group has a centralised approach to stress testing, requiring each Regional Liquidity Centre to run the same scenario set under the coordination of the Group Risk Management through the activation of local procedures.

At the Regional Liquidity Centre level the use of statistical/quantitative behavioural models are accepted, provided they are validated by the local Risk Management or equivalent structure with same responsibilities.

The Group runs liquidity scenarios and sensitivity analyses on a regular basis, the latter by assessing the impact on an institution's financial condition of a move in one particular risk factor, the source of the shock not being identified, whereas scenario tests tend to consider the impact of simultaneous moves in a number of risk factors, the stress event being well defined.

Liquidity scenarios

At macro level the Group identifies three basic different classes of potential liquidity crisis:

1. Market (Systemic, global o sector) related crisis: Market Downturn Scenario. This scenario consists of a sudden turmoil in a monetary and capital market, which may be caused by closure (or limited access) to market/settlement system, critical political events, country crisis, credit crunch, etc.
2. Specific to the Group, or part of it: Name crisis, and Downgrade Scenarios; the assumption could be operational risk, event relate to the worsen perception of the group reputation risk and a downgrade in UCG rating
3. A combination of market and specific crisis: Combined Scenario

The results of the stress test may highlight the needs of setting up specific limits concerning, for instance, unsecured funding, the ratio between cash-in/cash-out flows and counterbalancing capacity, the ratio between eligible and non-eligible securities, among others.

Additional liquidity risk measures

In addition, within the determination of the Risk Appetite measures at Group Level, two new measures have been introduced for liquidity risk management purposes: the **Loans to Deposits ratio** and the **Leverage ratio**. Both of them have to be calculated at Group level and at Single Legal Entity level.

Monitoring and reporting

The Short Term Liquidity limits and the Cash Horizon are monitored and reported on a daily basis. The structural liquidity ratios are monitored and reported on a monthly basis. The survival period and liquidity stress test are reported and monitored on a weekly basis. Further risk appetite figures as are the Loan to Deposit ratio and the Leverage Ratio, given their measurement nature according to accounting definitions, their measurement and control will be performed on a quarterly basis. The risk appetite statement development are set first in the 3 year plan, and then reviewed yearly. The monitoring plays a key role as the results feed into the decision making process.

Mitigation factors

The main liquidity mitigation factors for UniCredit Group are:

- an accurate short term and medium to long term liquidity planning monitored monthly;
- an effective Contingency Liquidity Policy (CLP) with feasible and up-to-date Contingency Action Plan (CAP) to be executed in case of market crisis;
- a liquidity buffer to face unexpected outflows;
- robust and regular up to date stress testing performed on a high frequency.

Funding Plan

The measurement and management of structural liquidity risk involve the following:

- A process for defining financing requirements which is integrated with the Group Planning (integration between the Budget/Three-year Plan and the Financial Plan), in terms of preliminary predictions/forecasts, final/actual figures and an analysis of discrepancies
- A process of continuous alignment between the reports on financing requirements and the composition of strategic funding (integration between Financial Plan and Funding Plan), in terms of predictions/forecasts, realisation and analyses of variations;

The functions involved in such processes are the following:

- At Group level: Group Finance Department, Group Planning Department, Capital Management, Group Risk Management
- At Regional Liquidity Centres level and the Banks/Companies of the Group falling within their perimeter: ALM functions, Planning functions, Treasury functions, Risk Management functions.

The structural liquidity profile and the annual funding plan are regularly monitored and updated by the Group's ALM, in coordination with the ALM function of the Regional Liquidity Centres. The two main purposes are the following:

- maintaining a balanced maturity structure in line with the growth trend of the Group's overall assets and liabilities, with the international market conditions, and with the interest rate dynamics.
- Transferring to the Banks/Companies the cost of structural financing, in accordance with the procedures set out under the internal rules/policies, with the single policies adopted by the Regional Liquidity Centres and with principles of functional specialisation.

The duty of monitoring the Group's liquidity risk position has been entrusted, on the basis of their role and functions, to the Treasury, Asset & Liability Management and Market Risk Management units of each Group entity and at Group level. This consists of the analysis, classifications and management of cash flow gaps for all the maturities and in the review of compliance with limits based on the methodologies and frequency appropriate for the level of analysis (daily for short-term liquidity and monthly for structural liquidity).

Short-term liquidity is monitored using a maturity ladder that shows cash flows with daily maturities from overnight to annual levels. Structural liquidity is monitored for all maturities by incorporating a dynamic projection of business growth in terms of customer loans and deposits in order to prevent any source of stress connected with short-term liquidity, and at the same time ensuring structural liquidity in keeping with the determination and implementation of the Group's Funding Plan.

Group Contingency Liquidity Policy

A liquidity crisis is a high impact, low probability event. Therefore, a crisis-mode governance model that can be activated effectively in case of crisis according to an approved procedure has to be defined. In order to be able to proceed timely, a set of mitigating actions have to be pre-defined. Depending on the situation some of these actions can then be approved for execution.

The ability to act in time is essential to minimize the potentially disruptive consequences of a liquidity crisis. The analytics of the stress tests will form a valuable tool to identify the expected consequences and to define up front the most suitable actions in a certain crisis scenario. In combination with Early Warning Indicators (EWI) the organisation may even be able to reduce the liquidity effects in the initial stages of a crisis.

Liquidity crises usually develop quickly and the relevant signals may be either difficult to interpret or may even be lacking; it is, therefore, important to identify clearly players, powers, responsibilities, communication and reporting criteria, in order to increase significantly the probability of overcoming the state of emergency successfully. A liquidity crisis could be classified as systemic (e.g. overall capital and money market disruption) or specific (e.g. specific within the sphere of the bank), or a combination of both.

The Group Contingency Liquidity Policy (CLP) has the objective of ensuring the availability of an effective organisational model in order to manage efficiently the negative impacts of a liquidity crisis situation. This is achieved through:

- Activation of extraordinary liquidity governance and operating model
- Consistent internal and external communication
- A set of available standby mitigating liquidity actions
- A set of early warning indicators that may point towards a developing crisis

The Group Contingency Liquidity Policy (CLP) consists of the Contingency Liquidity Policy and its annex the Contingency Action Plan (CAP). The first part is related to the Governance, which should be reviewed on a yearly basis. The annex part, CAP, defines the operative framework, addresses the "Who & What" issues in a crisis and establishes the Contingency Funding Plan (CFP). The CFP is complementary to the Group Funding Plan. The CAP needs to be updated as soon as the situation changes, but at least once a year via Group ALCO (GALCO).

Every Regional Liquidity Centre and Legal Entity, that runs a liquidity mismatch, needs to have a locally approved CLP that is aligned with the Group's one and that meets the requirements of the local regulator, if any. A positive advice of the Liquidity Risk Portfolio Management Department as well as Head of Group Finance Department is required.

Early Warning Indicators

The Early Warning Indicators, EWI, are a tool to assist the liquidity managers to assess the current market situation. As with any indicator it should never be used on an auto-pilot basis.

A number of indicators have been developed to capture potential strains in the market. The indicators are clustered as:

- UniCredit related
- Financial Sector related
- Market related

The EWI are one of the tools that the management can use to decide whether to change from Business as Usual to a contingent situation.

Quantitative Information

The Group has originated self-securitization transactions in which it has acquired all the liabilities issued by the SPVs (the so-called self-securitizations). At December 31, 2009 underlying assets amounted to €41,522,071. Information on these transactions is provided in paragraph C.1 - Securitization transactions in the above Section 1 - Credit Risk.

Section 4 – Operational Risk

Qualitative Information

A. General aspects, operational processes and methods for measuring operational risk

Operational risk

Operational risk is the risk of loss due to errors, infringements, interruptions, damages caused by internal processes or personnel or systems or caused by external events. This definition includes legal and compliance risks, but excludes strategic and reputational risk.

For example, losses arising from the following can be defined as operational: internal or external fraud, employment practices and workplace safety, client claims, products distribution, fines and penalties due to regulation breaches, damage to the company's physical assets, business disruption and system failures, process management.

Group operational risk framework

UniCredit Group sets the operational risk management framework as a combination of policies and procedures for controlling, measuring and mitigating the operational risk of the Group and controlled entities.

The operational risk policies, applying to all Group entities, are common principles defining the roles of the company bodies, the operational risk management function as well as the relationship with other functions involved in operational risk monitoring and management.

The Parent company coordinates the Group entities according to the internal regulation and the Group operational risk control rulebook. Specific risk committees (Risk Committee, ALCO, Operational Risk Committee) are set up to monitor risk exposure, mitigating actions and measurement and control methods.

The methodology for data classification and completeness verification, scenario analysis, risk indicators, reporting and capital at risk measurement is set by the Holding company Operational & Reputational Risks Portfolio Management department and applies to all Group entities. This new department replaces the Operational Risk Management unit, responsible for the above mentioned activities up to last year. A pivot element of the risk control framework is the operational risk management application, allowing the collection of the data required for operational risk control and capital measurement.

In March 2008, UniCredit Group received authorization to use the AMA model (Advanced Measurement Approach) for calculating operational risk capital. The use of this method will in time be rolled out to the main entities of the Group.

Organizational structure

Senior Management is responsible for approving all aspects relating to the Group operational risk framework and verifying the adequacy of the measurement and control system and is regularly updated on changes to the risk profile and operational risk exposure, with support from the appropriate risk committees if required.

The **Group Operational Risk Committee**, chaired by the Holding company's head of Group Risk Management department (Group CRO) is made up of permanent and guest members. The list of participants of the Committee has been updated in 2009, also in the light of the changes in the organizational structure of the Group CRO department.

The mission of the Group Operational Risk Committee is to define proposals and opinions for the Group Risk Committee, for:

- the Group risk appetite, including the goals and criteria of the operational risk capital allocation in the Group;
- the structure and definition of operational risk limits and their allocation to the Business Units and the Entities of the Group;
- the internal model for operational risk measurement for regulatory capital purposes;
- specific operational risk strategies

The Group Operational Risk Committee meets with approval functions instead for the following topics:

- guidelines and special policies on operational risk topics;
- corrective actions for balancing the Group operational risk positions, including the mitigation actions;
- Group strategies, including strategies for insurance hedging after joint proposals from the Global Insurance Management function and the Operational & Reputational Risks Portfolio Management department;
- the internal model for operational risk measuring, both for economic capital purposes and for stress testing activities.

In the Holding company, the Operational & Reputational Risks Portfolio Management department, part of the Strategic Risk Management & Control department, supervises and manages the overall profile of the operational and reputational risks in the Group by defining the strategies, methodologies and limits.

Regarding the operational risk management function, the department has two organizational units. The Operational Risk Methodologies and Control unit is responsible for the methodologies, the calculation model for the Group operational capital at risk and the guidelines for operational risk control activities; it is also supporting and controlling the legal entities' Operational Risk Management functions, in order to verify that Group standards are met in the implementation of control processes and methodologies.

The Operational Risk Strategies and Mitigation unit is responsible for the definition and monitoring of the risk limits and for the identification of strategies and mitigation actions and the monitoring of their implementation.

The Operational Risk Management functions of the controlled entities provide specific operational risk training to staff, also with the use of intranet training programs, and are responsible for the correct implementation of the Group framework elements. The Holding company's Operational & Reputational Risks Portfolio Management department prepares regular updates on regulatory and managerial aspects of operational risk, which are sent to the functions responsible for operational risk control and management.

In compliance with regulations, an internal validation process (self-assessment) for the operational risk control and measurement system has been set up at the Holding company and in the relevant Group entities in order to verify the conformity with regulations and Group standards.

The Operational Risk Management functions of the entities provide a summary of the activities carried out and assess whether they comply with regulations and Group standards. Where areas for improvement are identified, the proposed actions must be indicated, along with, where possible, the predicted timeframe for their implementation. The entities meeting the advanced (AMA) requirements and those of the Italian entities using the standard (TSA) method must compile the validation document and send it to the Holding company.

The validation document, together with the opinion of the Holding company and the Internal Audit report, is submitted to the entity's Board of Directors for approval. After this, the Group validation document is drawn up which is then submitted to the UniCredit Board of Directors for approval, together with the Internal Audit report.

Reporting

A reporting system has been developed to inform senior management and relevant control bodies on the Group operational risk exposure and the risk mitigation actions.

In particular, quarterly updates are provided on operational losses, capital-at-risk estimates, relevant external events and the main initiatives undertaken to mitigate operational risk in the various business areas. A summary of the trend of the most important risk indicators is drawn up each month.

The results of the main scenario analyses carried out at Group level and the relevant mitigation actions undertaken are also submitted to the attention of the Group Operational Risk Committee.

Operational risk management

Operational risk management exploits process reengineering to reduce the risk exposure and insurance policies management, defining proper deductibles and policies limits.

Regularly tested business continuity plans will also assure operational risk management in case of interruption of main business services.

The Risk Committee (or other bodies in accordance to local regulations) reviews risks tracked by the Operational Risk functions of the Legal entities, with the support of functions involved in daily operational risk control, and monitors the risk mitigation initiatives.

Risk capital measurement and allocation mechanism

UniCredit developed an internal model for measuring the capital requirements. The system for measuring operational risk is based on internal loss data, external loss data (consortium and public data) scenario loss data and risk indicators.

Capital at risk is calculated per event type class. For each risk class, severity and frequency of loss data are separately estimated to obtain the annual loss distribution through simulation, considering also insurance coverage. The severity distribution is estimated on internal, external and scenario loss data, while the frequency distribution is determined using only the internal data. An adjustment for key operational risk indicators is applied to each risk class. Annual loss distributions of each risk class are aggregated through a copula functions based method. Capital at risk is calculated at a confidence level of 99,9% on the overall loss distribution for regulatory purposes and at a confidence level of 99,97% for economic capital purposes.

Through an allocation mechanism, the individual legal entities' capital requirements are identified, reflecting the Legal Entities' risk exposure.

The AMA approach has been formally approved by the Supervisory Authority and is expected to be rolled out in all the relevant Group entities before the end of 2012. The entities not yet authorised to use the advanced methods contribute to the consolidated capital requirement on the basis of the standard (TSA) or basic (BIA) model.

B. Legal Risks

There are pending lawsuits against UniCredit Spa and other UniCredit Group companies. In many cases, there is substantial uncertainty regarding the outcome of the proceedings and the amount of any possible losses. These cases include criminal proceedings, administrative proceedings by the Supervisory Authority and claims in which the petitioner has not specifically quantified the penalties requested (for example, in putative class action in the United States). In such cases, given the infeasibility of predicting possible outcomes and estimating any losses in a reliable manner, no provisions are made. However, where it is possible to reliably estimate the amount of possible losses and the loss is considered likely, provisions are made in the financial statements based on the circumstances and consistent with IAS international accounting standards.

To protect against possible liabilities that may result from pending lawsuits (excluding labour law, tax cases or credit recovery actions), UniCredit Group has a provision for risks of charges of €1.3 billion as at December 31, 2009. However, it is possible that this provision may not be sufficient to entirely meet the legal charges and the fines and penalties requested in pending legal actions.

Therefore, it may occur that a negative outcome for said proceedings could have a harmful effect on the financial situation of UniCredit Group.

The following is a summary of pending cases in which UniCredit Group is involved, and which have a value of €100 million or greater. Tax, labour law and credit recovery cases are not included.

Action initiated against UniCredit S.p.A., its Managing Director and the Managing Director of HVB (Hedge Fund Claim) and action initiated against Verbraucherzentrale (VzfK Claim)

In July 2007, eight hedge funds, (followed by various minority shareholders of HVB), submitted a writ of summons to the Regional Court of Munich for compensation for damages allegedly suffered by HVB as a consequence of certain transactions regarding the transfer of equity investments and business lines from HVB (after its entry into UniCredit Group) to UniCredit S.p.A. or other UniCredit Group companies (and vice versa). In addition, they argue that the HVB reorganisation cost should be borne by UniCredit S.p.A.. The defendants in the lawsuit are UniCredit S.p.A., its Managing Director, Alessandro Profumo, and the former Managing Director of HVB, Wolfgang Sprissler.

The plaintiffs are seeking: (i) damages in the amount of €17.35 billion, plus interest; (ii) that the Munich Court order UniCredit S.p.A. to pay HVB's minority shareholders appropriate compensation in the form of a guaranteed regular dividend from November 19, 2005 onwards.

The defendants lodged their defence pleas with the Regional Court of Munich on February 25, 2008.

Furthermore, another minority shareholder of HVB, Vzfk – already owner of a non-significant shareholding in the company capital - started legal proceedings that were substantially similar towards UniCredit S.p.A., its CEO, Alessandro Profumo and the then CEO of HVB, Wolfgang Sprissler (for an amount equal to €173.5 million plus interest) and the Regional Court of Munich combined the mentioned proceedings to that promoted by the hedge fund on July 29, 2009

The defendants, while aware of the risks that any such suit inevitably entails, are of the opinion that the claims are groundless, given that all of the transactions referred to by the plaintiffs were carried out on payment of consideration which was held to be fair on the basis of third-party advisors' opinions. As such, no provision has been made.

Special Representative

On June 27, 2007, the HVB annual Shareholders' Meeting passed a resolution for a claim of damages against UniCredit S.p.A., its legal representatives, and members of HVB's management board and supervisory board, citing damages to HVB due to the sale of its equity investment in BA and the Business Combination Agreement (BCA) entered into with UniCredit S.p.A. during the integration process. The attorney Thomas Heidel was appointed as Special Representative by a shareholders' resolution voted on by the minority shareholders with the task of verifying if there are sufficient grounds to move forward with this claim. To this end, the Special Representative was granted the authority to examine documents and obtain further information from the company.

Based on his investigations within HVB, in December 2007, the Special Representative asked UniCredit S.p.A. to restore the purchased BA shares to HVB. In January 2008, UniCredit S.p.A. replied to the Special Representative, stating that, in its view, such a request was unfounded.

On February 20, 2008 Attorney Heidel, acting as Special Representative, filed a petition against UniCredit S.p.A., its Managing Director, Alessandro Profumo, the former Managing Director of HVB, Wolfgang Sprissler and HVB's Chief Financial Officer, Rolf Friedhofen, requiring the defendants to return the BA shares to HVB along with compensation to HVB for any additional losses in the matter or, if this petition is not granted by the Munich Court, to pay €13.9 billion in damages.

On July 10, 2008, Attorney Heidel filed and gave notice of an amendment to the petition. In it he asks that UniCredit S.p.A., its Managing Director, and HVB's former Managing Director and Chief Financial Officer be ordered to return the additional amount of €2.98 billion (plus interest) in addition to damages that may result from the capital increase resolved by HVB in April 2007 following the transfer of the banking business of the former UBM to HVB. Specifically, the Special Representative asserts that the transfer was overvalued and that auditing rules were violated.

Since it is doubtful that the amendment of the Special Representative's petition is in line with the resolution of the HVB Shareholders' Meeting in June 2007, UniCredit S.p.A. considers the plaintiff's claims to be unfounded, partly in consideration of the fact that both the sale of BA and the transfer of the operations of the former UBM during the HVB capital increase occurred on the basis of independent assessments (fairness opinions and valuation reports) of well-known External Auditors and investment banks, thus, it has not made any provisions.

It should be noted that on November 10, 2008, an extraordinary meeting of HVB shareholders' was held and resolved to revoke the resolution of June 27, 2007, consequently, Attorney Heidel was removed as HVB's Special Representative. This means that the Special Representative no longer has the authority to prosecute the actions brought against UniCredit S.p.A., its officer, or HVB's officers, unless the resolution is declared null or ineffective. In particular, the removal prevents the Special Representative from continuing his petition for damages, which, moreover, will not disappear automatically, but rather only if a decision in this matter is made by HVB's supervisory board (against Wolfgang Sprissler and Rolf Friedhofen) and the management board (against UniCredit S.p.A. and its Managing Director). HVB's Statutory Bodies, with the assistance of external consultants, initiated a review of this complex matter to make the related decisions under their authority.

The removal of the *Special Representative* was contested by Attorney Heidel and by a minority shareholder. On August 27, 2009 the Regional Court of Munich declared the Special Representative's removal null. However the decision is not yet final and binding, in that an appeal is pending with the High Regional Court of Munich.

On June 2, 2009 the Regional Court of Munich decided to suspend arguments on the Special Representative's petition until a final decision is made on the validity of the appointment and subsequent removal of the Special Representative.

The Special Representative submitted a request to review the suspension measure of the petition. The same first instance judge will review and if, as expected, the judge does not reverse his decision, the High Regional Court will decide on the correctness of the suspension measure.

Cirio

In April 2004, the extraordinary administration of Cirio Finanziaria S.p.A. served notice to Sergio Cragnotti and various banks including Capitalia S.p.A. (absorbed by UniCredit S.p.A.) and Banca di Roma S.p.A., of a petition to obtain judgment declaring the invalidity of an allegedly illegal agreement with Cirio S.p.A. regarding the sale of the dairy company Eurolat to Dalmata S.r.l. (Parmalat). The extraordinary administration subsequently requested that Capitalia S.p.A. and Banca di Roma S.p.A. be found jointly liable to reimburse a sum of €168 million and that all defendants be found jointly liable to pay damages of €474 million.

Furthermore, the extraordinary administration requested, should the above fail, the revocation of the deeds of settlement made by Cirio S.p.A. and/or repayment by the banks of the amount paid for the agreement in question, on the grounds of undue profiteering, pursuant to Article 2901 of the Italian Civil Code.

In May 2007, the case was retained for the judge's ruling. No preliminary investigation was conducted. In February 2008, an unexpected ruling by the Court of Rome ordered Capitalia S.p.A. (currently UniCredit S.p.A.) and Sergio Cragnotti to pay €223.3 million plus currency appreciation and interest from 1999. UniCredit S.p.A. has appealed the sentence, requesting the suspension of the execution of the lower court's judgment.

The Rome Court of Appeals, with a ruling issued on March 17, 2009, suspended the execution of the lower court's judgment.

The next hearing is scheduled on November 11, 2014.

In order to oversee such risks, provisions were made for an amount considered congruous to the current risk of the proceedings.

In April 2007, certain Cirio Group companies in administration filed a petition against Capitalia S.p.A. (now UniCredit S.p.A.), Banca di Roma S.p.A., UBM (now UniCredit S.p.A.) and other banks for compensation of damages resulting from their role as arrangers of bond issues by Cirio Group companies, although, according to the plaintiffs, they were already insolvent at the time. Damages were quantified as follows:

- the damages incurred by the petitioners due to a worsening of their difficulties were calculated within a range of €421.6 million to €2.082 billion (depending upon the criteria applied);
- the damages incurred because of the fees paid to the Lead Managers for bond placements were calculated at a total of €9.8 million;
- the damages, to be determined during the proceedings, incurred by Cirio Finanziaria S.p.A. (formerly Cirio S.p.A.), for losses related to the infeasibility of recovering, through post-bankruptcy clawback, at least the amount used between 1999 and 2000 to cover the debt exposure of some of the Group companies;

plus interest and currency revaluation from the date owed to the date of payment.

In the ruling of November 3, 2009 the judge denied the plaintiff's claim holding the companies of Cirio Group in extraordinary administration jointly liable for reimbursement of legal expenses in favour of the defendant banks.

The Extraordinary Administration has appealed against the ruling.

UniCredit S.p.A., having considered the opinion of its defence counsel, believes the action to be groundless, and is confident the judgment will be favourable. Accordingly no provisions have been made.

International Industrial Participations Holding IIP N.V.

On October 30, 2007, International Industrial Participations Holding IIP N.V. (formerly Cragnotti & Partners Capital Investment N.V.) and Sergio Cragnotti brought a civil action against UniCredit S.p.A. (as the successor to Capitalia S.p.A.) and Banca di Roma S.p.A. for alleged direct damages and loss of profit quantified at €135 million resulting from:

- primarily, the breach of contractual obligations of financial assistance previously assumed in favour of Cragnotti & Partners Capital Investment N.V., Sergio Cragnotti, and Cirio Finanziaria S.p.A. Cirio Group, which resulted in its insolvency;
- secondarily, the illegitimate refusal by the defendants to provide Cirio Finanziaria S.p.A. and Cirio Group the financial assistance necessary to repay a bond expiring on November 6, 2002, not acting properly and in good faith.

The investigating magistrate set a clarification hearing for the conclusions for October 18, 2010. Following the recent reorganisation of UniCredit Group, without prejudice to the legitimation of UniCredit S.p.A. as the defendant, the question in law, previously attributable to Banca di Roma S.p.A. was transferred to UniCredit Corporate Banking S.p.A..

The plaintiff's claim in this action is completely groundless.

In consideration of such, at the time being no provisions have been made.

Gruppo Fratelli Costanzo

The companies of the Costanzo group, originally controlled by the Costanzo family, have been under extraordinary administration since 1996. In February 2006 several representatives of the Costanzo family brought suit for damages against the extraordinary administration and the Ministry of Production alleging poor management of the companies in the group. The plaintiffs also sued the members of the Supervisory Committee, of which the subsidiaries IRFIS S.p.A. and Banca di Roma (now UniCredit S.p.A.) were members, alleging omissions in oversight. The total claim amounts to about €2.04 million. As a result of the Catania Court's declaration of lack of jurisdiction, the case was brought again before the Regional Administrative Court of Lazio – Rome in November 2009. The claim for damages appears groundless and therefore, on the basis of the opinion of defense counsel as well, no provision has been made for it. To obtain a declaration of lack of territorial jurisdiction on the part of the Regional Administrative Court of Lazio – Rome and, on the other hand, the presence of jurisdiction on the part of the Regional Administrative Court of Sicily – Catania, the company Fratelli Costanzo S.p.A in A.S. (under extraordinary administration) has appealed to the Council of State for a preliminary determination of jurisdiction.

Qui tam Complaint against Vanderbilt LLC and other UniCredit Group companies

On July 14, 2008, Frank Foy and his wife, in compliance with local New Mexican law (Qui Tam Statute), according to which any State resident may file a legal action on behalf of the State, filed a complaint on behalf of the State of New Mexico in relation to certain investments made by the New Mexico Educational Retirement Board (ERB) and the State of New Mexico Investment Council (SIC) in Vanderbilt LLC ("VF"), an indirect UniCredit S.p.A. investee company. Frank Foy claims to have been the Chief Investment Officer of ERB and to have submitted his resignation in March 2008.

Frank Foy requests, on behalf of the State of New Mexico, compensation for damages totalling USD 360 million (including applicable penalties as part of the New Mexico Fraud against Taxpayers Act, which provides for the possibility of treble damages) based on the New Mexico Fraud against Taxpayers Act, asserting that Vanderbilt VF and the other defendants surreptitiously persuaded ERB and SIC to invest USD 90 million in Vanderbilt products (i) by knowingly providing false information on the nature and risk level of the VF investment and (ii) by guaranteeing improper contributions to then-Governor of the State of New Mexico, Bill Richardson, and other State officials, to convince them to make the investment. Frank Foy maintains that the State suffered damages equivalent to the entire initial investment of USD 90 million (consequential damages) and requests an additional USD 30 million for loss of profit.

Defendants include – *inter alia* – the following:

- Vanderbilt Capital Advisors, LLC (VCA), a wholly-owned indirect subsidiary of Pioneer Investment Management USA Inc. (PIM US);
- Vanderbilt Financial, LLC (VF), a special purpose vehicle in which PIM US has an 8% holding;
- Pioneer Investment Management USA Inc. (PIM US), a wholly-owned subsidiary of PGAM;
- PGAM., a wholly-owned subsidiary of UniCredit S.p.A.;
- UniCredit S.p.A.;
- various directors of VCA, VF and PIM US;
- law firms, external auditors, investment banks and State of New Mexico officials.

At present, an assessment on the economic impact that may result from the proceedings is premature and thus no provisions have been made.

The defendants have requested that the plaintiff's claim be denied. The Court has not yet set a date for a hearing on said request.

The petition was served to the American companies, including Vanderbilt Capital Advisors and Pioneer Investment Management USA Inc. (both part of UniCredit Group). Also the natural persons who are called as defendants have been served the petition.

On September 24, 2009 UniCredit S.p.A. and on December 17, 2009 PGAM were served the petition.

Divania S.r.l.

In the first half of 2007, Divania S.r.l. filed a suit against UniCredit Banca d'Impresa S.p.A. (now UniCredit Corporate Banking S.p.A.) contesting the violations of the law and regulations (relevant, amongst other things, to financial products) with reference to the operations in rate and currency derivative transactions created between January 2000 and May 2005 by Credito Italiano S.p.A. initially, and subsequently by UniCredit Banca d'Impresa S.p.A. (now UniCredit Corporate Banking S.p.A.), for a total of 206 contracts.

The petition, which requests that the contracts be declared inexistent, or failing that, null and void or to be cancelled or terminated and that UniCredit Banca d'Impresa S.p.A. (now UniCredit Corporate Banking S.p.A.) be found liable to pay a total of €276.6 million as well as legal fees and interest, was served on March 26, 2007 in the Court of Bari as part of the new corporate procedure. An expert witness report was requested in the fall of 2008. Recently the experts requested an extension of 120 days for submitting the report that was due at the beginning of March 2010 and it's quite likely they will request a further delay.

UniCredit Corporate Banking S.p.A. considers the claimed amount to be disproportionate to the actual litigation risk, as the amount claimed was calculated by adding all debit entries made (for an amount much larger than the actual), without including the credits that drastically reduce the claimant's demands. Furthermore, a settlement had been reached, and signed on June 8, 2005, for the contested transactions, under which Divania S.r.l. stated that it would no longer make any claim, for any reason, for the transactions now being disputed. The petition calls into question the validity of the transaction, arguing that the settlement is null and void given the alleged illegitimacy of the transactions in question. UniCredit Corporate Banking S.p.A. believes that the maximum amount at risk is approximately €4 million, equivalent to the sum that was debited to the plaintiff's account at the time of the transaction. For this reason, a provision has been made for an amount consistent with the lawsuit risk.

On September 21, 2009, Divania S.r.l. served an additional and separate petition to UniCredit Corporate Banking S.p.A. at the Court of Bari, requesting compensation for damages allegedly incurred, amounting to €68.9 million, contesting the violations of the law and regulations (relevant, amongst other things, to financial products) as a result of the bank's behaviour in relation to the derivative transactions in question, and, more generally, the behaviour in regards to the customer. The suit is closely linked to the one already pending.

The petition is considered to be without grounds and therefore no provisions have presently been made.

Acquisition of Cerruti Holding Company S.p.A. by Fin.Part S.p.A.

At the beginning of August 2008, the receivership of Fin.Part S.p.A. ("Fin.Part") brought a civil action against UniCredit S.p.A., UniCredit Banca S.p.A., UniCredit Corporate Banking S.p.A. and one other bank not belonging to UniCredit Group for contractual and tort liability.

Fin.Part makes claim against each of the defendant banks, jointly and severally or alternatively, each to the extent applicable, for compensation for damages allegedly suffered by Fin.Part and its creditors as a result of the acquisition of Cerruti Holding Company S.p.A. ("Cerruti").

The action contests the legality of the conduct displayed during the years 2000 and 2001 by the defendant banks, in concert among them, for the acquisition of the fashion sector of the Cerruti 1881 Group, by means of a complex financial transaction focused specifically on the issue of a bond for €200 million by a special purpose vehicle in Luxembourg (C Finance S.A.).

It is maintained that Fin.Part was not able to absorb the acquisition of Cerruti with its own funds, and that the financial obligations connected with the bond payment brought about the bankruptcy of the company. Therefore, the receivership is requesting compensation for damages in the amount of €211 million, which represents the difference between the liabilities (€341 million) and the assets (€130 million) of the bankruptcy estate, or such other amount as determined by the court. Furthermore, it is requested the defendants return all of the amounts earned in fees, commissions and interest in relation to the fraudulent activities.

Papers were filed on December 23, 2008 that included the bankruptcy of C Finance S.A.

The receivership maintains that the insolvency of C Finance S.A., which existed at the time of its establishment, due to the issue of the bond and the transfer of proceeds to Fin.Part in exchange for assets with no value, should be attributed to the banks involved in causing the financial difficulties, as their executives contributed to devising and executing the transaction.

The defendant banks are asked to compensate the damages as follows: a) the total of bankruptcy liabilities (€308.1 million); or, alternatively, b) the amounts disbursed by C Finance S.A. to Fin.Part and Fin.Part International (€193 million); or, alternatively, c) the amount collected by UniCredit S.p.A. (€123.4 million).

In another area, the banks are requested to compensate damages for the amounts collected (equivalent to €123.4 million as well as €1.1 million in fees and commissions) for the alleged invalidity and illegality of the case or for illegal reasons involving all parties to the complex deal that the transaction in question allegedly turned into, according to the petitioner, the payment of Fin.Part debts to UniCredit S.p.A. using the proceeds from the C Finance S.A. bond issue. In addition, the transaction was allegedly a means for evading Italian laws regarding limits and procedures for bond issues.

UniCredit Group's legal counsel is assessing the procedural aspects and the relationships between the accompanying petitions of the two bankruptcies, also in regard to the appeal pursuant to Article 101 of Regional Decree no. 267 of March 16, 1942, filed by the C Finance S.A. bankruptcy against the bankruptcy of Fin.Part.

In January 2009, the judge rejected the writ of attachment for the defendant not belonging to UniCredit Group.

On June 9, 2009 the deed of appearance and reply was submitted for UniCredit S.p.A..

On October 05, 2009 and on January 12, 2010 the parties personal appeared for settlement proceedings. The settlement proceedings were unproductive due to the distance of the parties' positions.

The next hearing is scheduled on april 27, 2010.

On October 2, 2009, the receivership of Fin.Part subpoenaed in the Court of Milan UniCredit Corporate Banking S.p.A. (as the party of the former Credito Italiano) in order that (i) the invalidity of the “payment” of €46 million made in September 2001 by Fin.Part to the former Credito Italiano be recognised and consequently, (ii) the defendant be sentenced to return said amount in that it relates to an exposure granted by the bank as part of the complex financial transaction under dispute in the prior proceedings. UniCredit S.p.A., also based on the information supplied by their legal counsel, believes the claims are groundless and/or lacking from an evidence viewpoint, consequently, also bearing in mind that the proceedings are in their initial stages, no provisions have presently been made.

Seanox Oil P.T.

In 2004, Seanox Oil P.T., with registered office in Jakarta, made a decision to liquidate (through Branch 26 in Milan of the former Banca di Roma) 2 certificates of deposit that were apparently issued by UBS for a total amount of USD 500 million (USD 300 million and USD 200 million).

The aforementioned company instituted proceedings against the former Banca di Roma S.p.A., claiming it had suffered unjust loss deriving from the alleged illicit delivery to UBS Bank of Zurich of one of the certificates, that of the certificate having a face value of USD 200 million, which having proved to be false, was withdrawn by UBS Zurich.

Accordingly, the plaintiff requested compensation for damages for the notional value of the certificate of deposit held by UBS, or USD 200 million, equivalent to €158 million.

The bank duly appeared in court to dispute the reconstruction of events and requested that the petition be wholly rejected in that it is unfounded in law and in fact. Following a number of recent restructuring transactions by UniCredit Group, the disputed right behind the case was transferred to UniCredit Banca S.p.A.

In the hearing on November 18, 2009, the attorney assisting the Bank demonstrated the falsity of the certificate at issue. The outcome of the hearing was that the Court ruled for the rejection of all of the preliminary evidentiary proceedings and adjourned the hearing to February 2, 2011 for further specification of the allegations.

For this reason, a provision has been made for an amount consistent with the risk of the lawsuit.

Mario Malavolta

In July 2009, Mario Malavolta, on his own behalf and as legal counsel and director of Malavolta Corporate S.p.A. and its subsidiaries and associates, sued UniCredit S.p.A. for compensation for damages (approximately €135 million) allegedly due to illicit behaviour on UniCredit S.p.A.'s part. Furthermore, the petitioner requests the confirmation of the improper application of interest on its current accounts held by the aforementioned company.

The defendant named in this action is UniCredit Corporate Banking S.p.A..

The petitioner disputes the conduct by the defendant during the period 2006-2007, maintaining that improper involvement by the bank in the decision-making processes of Malavolta Group companies allegedly prevented the restructuring processes and caused significant financial burden (currently the companies of Malavolta Group are insolvent and under bankruptcy proceedings).

The facts and circumstances described above also allegedly resulted in significant damages to Mario Malavolta in his role as shareholder and director of Malavolta Corporate S.p.A. and its subsidiaries. As preliminary defenses, the Bank has alleged that the plaintiff lacks standing and interest in the matter. On the merits, as a subordinate alternative, it has alleged that the complaints lack grounds and are excessively broad, not supported by the documents produced on the record.

The proceedings are in the initial phases and no provisions have presently been made.

Valauret S.A.

In 2001, the plaintiffs (Valauret S.A. and Hughes de Lasteyrie du Saillant), bought shares in the French company Rhodia S.A. They maintain that they suffered losses as a result of the drop in Rhodia share prices between 2002 and 2003, allegedly caused by earlier fraudulent actions by members of the company's board of directors, which made the financial statements untruthful and misleading. In 2004, the plaintiffs filed a petition claiming damages against the board of directors, the external auditors, and Aventis S.A. (the alleged majority shareholder of Rhodia S.A.). Later they extended their claim to other parties, arriving at a total of 14 defendants, the latest being Bank Austria (BA), against which a petition was filed at the end of 2007, as successor of Creditanstalt AG (CA). The plaintiffs maintain that the latter was involved in the aforementioned alleged fraudulent activities, as it was the credit institution of one of the companies involved in said activities. Valauret S.A. is seeking damages of €129.8 million in addition to legal costs and Hughes de Lasteyrie du Saillant is seeking damages of €4.39 million.

In BA's opinion, the involvement of CA in fraudulent activities is without grounds. In 2006, well before the action was extended to BA, the civil proceedings were suspended following the opening of criminal proceedings lodged by the French public ministries based on the criminal charge against persons unknown by the same plaintiffs.

In December 2008, the Commercial Court of Paris suspended the civil proceedings against BA. In relation to such circumstances no provisions were made.

Treuhandanstalt

BA (formerly Bank Austria Creditanstalt AG) has joined as a party in support of the defendant AKB Privatbank Zürich AG (formerly a subsidiary of BA and formerly Bank Austria (Schweiz) AG) in a suit relating to alleged claims of Bundesanstalt für vereinigungsbedingte Sonderaufgaben "BvS" (formerly Treuhandanstalt), the German public body for the new Länder reconstruction. Essentially it is asserted that the former subsidiary embezzled funds from companies in the former East Germany. BvS is requesting compensation for damages of approximately €128 million, plus interest dating back to 1992.

On June 25, 2008 the Zurich District Court rejected the request of BvS, with the exception of the amount of €320 thousand that, in the Court's opinion, represents fees and commissions applied in good faith, in accordance with a contract that was no longer valid, by the former subsidiary of BA. Following the appeal submitted by both parties, the suit will continue in front of the Zurich Court of Appeals.

At the time being it is not possible to reliably estimate the final result of the action, nor determine the level of responsibility, if any responsibility exists. Presently, in compliance with international accounting standards, no provisions were made.

Association of small shareholders of NAMA d.d. in bankruptcy; Slobodni sindiKat

Zagrebačka was called before the Zagreb Municipal Court by two parties: (i) the association of small shareholders of NAMA d.d. in bankruptcy; (ii) Slobodni Sindikat.

The parties allege that Zagrebačka violated the rights of NAMA d.d., as minority shareholder of Zagrebačka since 1994. The parties assert, inter alia, that Zagrebačka did not distribute to NAMA d.d. profits in the form of Zagrebačka shares.

As such, the plaintiffs ask the Court to sentence Zagrebačka to assign ownership of 44,858 Zagrebačka shares to NAMA d.d. or, alternatively, to pay the equivalent amount in cash that the plaintiffs estimate at Kuna 897,160,000.00 (approximately €123.7 million) assuming that each share has a value of Kuna 20,000.

Zagrebačka maintains that the plaintiffs do not have legal standing in that they have never been Zagrebačka shareholders, nor the holders of the rights allegedly violated.

Zagrebačka maintains that the alleged violation of rights due to the former minority shareholder NAMA

d.d. never occurred. Therefore, Zagrebačka believes that the plaintiffs' claims are groundless, as they have not proven either the existence of the rights or the quantified damages. On November 16, 2003, at the first hearing, the judge rejected the request by the plaintiffs, without dealing with the merit of the litigation, declaring that the plaintiffs did not even have the legitimisation to act. The decision has been appealed.

In relation to these proceedings, no provisions have been made.

GBS S.p.A.

At the beginning of February 2008, General Broker Service S.p.A. (GBS S.p.A.) initiated arbitration proceedings against UniCredit S.p.A. aiming at declaring the behaviour of Capitalia S.p.A. and subsequently UniCredit S.p.A. illegitimate with regards to the insurance brokerage relationship in effect and allegedly deriving from the exclusive agreement signed in 1991, and furthermore to obtain compensation for damages suffered, originally estimated at €121.7 million, then increased to €197.1 million.

The 1991 agreement, which included an exclusivity right, was signed by GBS S.p.A. and the former Banca Popolare di Pescopagano e Brindisi. The bank, following the 1992 merger with Banca di Lucania, became Banca Mediterranea, which was incorporated in 2000 in Banca di Roma S.p.A., which then became Capitalia S.p.A. (currently UniCredit S.p.A.).

The brokerage relationship with GBS S.p.A., dating back to the 1991 contract, was then governed by (i) an insurance brokerage service agreement signed in 2003 between GBS S.p.A., AON S.p.A. and Capitalia S.p.A., whose validity was extended to May 2007, and (ii) a similar agreement signed in May 2007 between the aforementioned brokers and Capitalia Solutions S.p.A., on its own behalf and as proxy for the banks and in the interest of the companies of the former Capitalia Group, including the holding company.

In July 2007, Capitalia Solutions S.p.A., on behalf of the entire Capitalia Group, exercised its right of withdrawal from the contract in accordance with the terms of the contract (in which it is expressly recognised that, in the event of withdrawal, the banks/companies of the former Capitalia Group should not be obliged to pay the broker any amount for any reason).

At the request of GBS, an expert witness report was ordered, whose results, both in terms of method and calculations, have been disputed by UniCredit S.p.A..

In the award issued on November 18, 2009 UniCredit S.p.A. was sentenced to pay GBS S.p.A. a total amount of €144 million, as well as legal costs and the costs of the expert opinion report. UniCredit S.p.A., deeming that the arbitral ruling was groundless, presented an appeal, requesting the suspension of the execution of the judgement. In the case that the request for suspension - once submitted following the execution of the arbitration award, which has not occurred at the being - is not accepted, UniCredit S.p.A. could be held to pay €144 million as well as other expenses, in pendency of the decision for the appeal. Considering the development of the matter, a provision has been made for an amount consistent with what currently appears to be the potential risk resulting from the award issued.

Deutsche Pfandbrief Bank (former Hypo Real Estate AG) and Hypo Real Estate International AG against HVB

Until 2001, HVB was the parent company of a group that was consolidated for tax purposes. Each year it paid the competent authority the taxes owed by the whole group and then recovered the amounts paid from the individual companies.

Hypo Real Estate Bank AG (and Hypo Real Estate Bank International AG, merged into Hypo Real Estate Bank AG), which belonged to said group, maintained the amount charged was excessive, and initiated legal proceedings in the District Court of Munich.

In the judgment of April 29, 2008, the Court sentenced HVB to pay €75.5 million as well as interest and expenses for a total amount of €116 million as at December 16, 2009.

HVB, on opinion of its legal counsel, believes that the plaintiffs' request is groundless and is therefore appealing the judgment of first instance.

On December 16, 2009, HVB executed a transaction agreement that provided for the payment of €46.5 million including interest for the purpose of resolving the controversy. The mentioned agreement is binding.

FinTeam spol s.r.o.

In March 2009, FinTeam spol s.r.o., a Slovakian company, sued UniCredit Bank Slovakia a.s. before a Bratislava Court for transactions involving exchange rates and derivatives (futures transactions and exchange rate options for Euro/Slovakian Corona) carried out as part of the Master Treasury Agreement signed between FinTeam and UniCredit Bank Slovakia in June 2004.

FinTeam alleges that certain transactions executed between the parties are invalid, in that they were not carried out in compliance with the provisions of the Master Treasury Agreement.

Furthermore FinTeam alleges that it incurred losses due to transactions charged on its account by UniCredit Bank Slovakia in connection with the aforementioned transactions.

Therefore FinTeam requests that the UniCredit Bank Slovakia is sentenced to indemnify damages, including loss of profits and legal expenses, allegedly incurred by FinTeam as a result of the alleged breaches of the master agreement made by UniCredit Bank Slovakia and estimates said damages equal to €100 million. Up today no evidence has been provided to prove that the damages occurred and that they amount to €100 million. .

UniCredit Bank Slovakia duly filed its statement of defence and objected the lack of capacity of the Court of Bratislava according to the arbitration clause set forth in the Master Treasury Agreement, which requires the parties to submit any dispute to the Permanent Arbitration Tribunal at the Slovakian Bank Association. Nonetheless, since the arbitration clause can be amended by mutual agreement of the parties, UniCredit Bank declared its availability to accept the Court of Bratislava as the competent court.

As to the merit, UniCredit Bank Slovakia deems ungrounded the requests of FinTeam. In fact, the bank thinks it complied with all obligations provided for by the Master Treasury Agreement and duly exercised its rights there under.

In the light of the above, UniCredit Bank Slovakia considers the claim and claim amount to be without basis and has not made any provisions at the time being.

ADDITIONAL RELEVANT INFORMATION

The following section illustrates the some further pending proceedings against UniCredit S.p.A. and the other companies of the UniCredit Group that UniCredit Spa considers relevant and for which, at the time being, the claims were not characterised by a known economic demand or for which the economic request cannot be quantified.

Voidance action challenging the transfer of shares of Bank Austria Creditanstalt AG (BA) held by HVB to UniCredit S.p.A. (Shareholders' Resolution of October 25, 2006)

Numerous minority shareholders of HVB have filed petitions challenging the resolutions adopted by HVB's Extraordinary Shareholders' Meeting of October 25, 2006 approving a Sale and Purchase Agreement ("SPA") transferring the shares held by HVB in International Moscow Bank and AS UniCredit Bank Riga to BA and the transfer of the Vilnius and Tallin branches to AS UniCredit Bank Riga, asking the Court to declare these resolutions null and void. In the course of this proceeding, some shareholders asked the Regional Court of Munich to state that the BCA, entered into between HVB and UniCredit S.p.A. should be regarded as a de facto domination agreement.

The shareholders filed their lawsuit contesting alleged deficiencies of the formalities relating to the convocation and conduct of the Extraordinary Shareholders' Meeting held October 25, 2006, and that the sales price for the shares was allegedly inadequate.

In the judgment of January 31, 2008, the Court declared the resolutions passed at the Extraordinary

Shareholders' Meeting of October 25, 2006 to be null and void for formal reasons. The Court did not express an opinion on the issue of the alleged inadequacy of the purchase price but expressed the opinion that the BCA entered into between UniCredit S.p.A. and HVB should have been submitted to HVB's Shareholders' Meeting as it represented a "concealed" domination agreement.

HVB filed an appeal against this judgment since it is believed that the provisions of the BCA would not actually be material with respect to the purchase and sale agreements submitted to the Extraordinary Shareholders' Meeting of October 25, 2006, and that the matter concerning valuation parameters would not have affected the purchase and sales agreements submitted for the approval of the shareholders' meeting. HVB also believes that the BCA is not a "concealed" domination agreement, due in part to the fact that it specifically prevents entering into a domination agreement for five years following the purchase offer.

In essence, the HVB shareholder resolution could only become null and void when the Court's decision becomes final. In light of the duration of the appeal phase, which is currently underway, as well as the ability to further challenge the second-instance judgment at the German Federal Court of Justice, we estimate that it will take between three and four years for the final decision.

Moreover, it should be noted that in using a legal tool recognised under German law, and pending the aforementioned proceedings, HVB asked the Shareholders' Meeting held on July 29 and 30, 2008 to reconfirm the resolutions that were passed by the Extraordinary Shareholders' Meeting of October 25, 2006 (so-called Confirmatory Resolutions) and contested. If passed, these resolutions would make the alleged improprieties irrelevant.

The Shareholders' Meeting approved these resolutions, which, however, were in turn challenged by several shareholders in August 2008. In February 2009, an additional resolution was adopted that confirmed that adopted resolutions.

In the judgement of December 10, 2009, the Court rejected the avoidance action. Several former shareholders filed an appeal against this judgement, no date for oral hearing was set so far.

In light of the above events, the appeal proceedings initiated by HVB against the judgment of January 31, 2008 were suspended until a final judgment is issued in relation to the confirmatory resolutions adopted by HVB's Shareholders' Meeting of July 29 and 30, 2008.

Voidance action challenging the squeeze-out of HVB minority shareholders (Shareholders' Meeting of June 27, 2007)

The annual HVB Shareholders' Meeting of June 27, 2007 authorised, inter alia, a resolution to transfer to UniCredit S.p.A. the shares held by the minority shareholders in exchange for a cash settlement of €38.26 per share (a so-called squeeze-out).

More than 100 shareholders filed suits challenging this resolution asking the Court to declare it null and void.

The Regional Court of Munich rejected the action on August 27, 2008. Various minority shareholders have filed an appeal with the High Regional Court.

On June 19, 2009, the High Regional Court of Munich issued an order of consideration in which it expressed its intention to reject the challenges without oral arguments and on August 27, 2009 rejected the appeals. On the basis of the public documentation, it results that an appeal has been filed to the German Federal Court of Justice against the decisions on the "squeeze-out" of the High Regional Court of Munich and the Regional Court of Munich, such complaint was not accepted by the Constitutional Court for decision.

The ruling of Munich Higher Regional Court re the squeeze-out out of former HVB-shareholders is final and binding.

In the meantime, HVB, which believes that the lawsuits are clearly unfounded, filed an unblocking motion in December 2007 asking the Court to grant clearance for the transfer resolution to be entered in the Chamber of Commerce, notwithstanding the pending avoidance action by the minority shareholders against the resolution.

The Regional Court of Munich granted HVB's request on the grounds that the procedural deficiencies of the resolution in question were unfounded. The minority shareholders challenged the judgment in front of the High Regional Court which, in its judgment of September 3, 2008, rejected the appeal (the so-called unblocking motion of second instance). The judgment is final and there can be no recourse to higher levels of jurisdiction.

Accordingly, on September 15, 2008, the Munich Business Register recorded the squeeze-out and UniCredit S.p.A. became the shareholder of the entire HVB share capital.

Squeeze-out of HVB minority shareholders (appraisal proceedings)

Approximately 300 former minority shareholders of HVB filed a request to revise the price obtained in the squeeze-out (appraisal proceedings). The dispute mainly concerns profiles regarding the valuation of HVB. UniCredit S.p.A. submitted its defence briefs on July 23, 2009.

The proceeding is still pending.

The next hearing will take place on April 15, 2010.

Squeeze-out of Bank Austria's minority shareholders

After a settlement was reached on all legal challenges to the transaction in Austria, the resolution passed by the Bank Austria shareholders' meeting approving the squeeze-out of the ordinary shares held by minority shareholders (with the exception of the so-called "golden shareholders") was recorded in the Vienna Business Register on May 21, 2008.

Accordingly, UniCredit S.p.A. became the owner of 99.995% of the Austrian bank's share capital with the resulting obligation to pay minority shareholders a total amount of €1,045 million, including interest accrued on the squeeze-out, in accordance with local laws.

The minority shareholders received the squeeze-out payment including the related interest.

Several shareholders who felt the squeeze-out price was inadequate have initiated proceedings with the Commercial Court of Vienna, in which they are asking the Court to review the adequacy of the amount paid (appraisal proceedings). UniCredit S.p.A. immediately challenged the competency of the Vienna Court. In the judgment of October 14, 2008, the Court maintained its competency in the case, without going into the matter. UniCredit S.p.A. then contested the decision with the High Regional Court of Vienna. In the judgment of July 6, 2009, the latter upheld that the Commercial Court of Vienna was competent to hear the case. UniCredit S.p.A. filed an extraordinary appeal with the Supreme Court challenging the decision of the High Regional Court.

In addition to the judicial proceeding in front of the Commercial Court of Vienna, a minority shareholder initiated at the same time a parallel procedure before an Arbitral Tribunal. If the outcome is unfavourable for UniCredit S.p.A., a negative impact for the Group cannot be excluded.

Cirio and Parmalat criminal proceedings

Between the end of 2003 and the beginning of 2004, criminal investigations of some former Capitalia Group, now UniCredit Group, officers and managers were conducted in relation to the insolvency of Cirio Group. The trials resulting from these investigations, related to the Group's insolvency, involved the former Capitalia S.p.A., (now UniCredit S.p.A.), one of the lending banks of said group and resulted in the some executives and officers of the former Capitalia S.p.A. (now UniCredit S.p.A.) being committed trial. Cirio S.p.A.'s extraordinary administration and several bondholders joined the criminal judgment as civil complainants without specifying damages claimed. UniCredit S.p.A., also as the universal successor of UniCredit Banca di Roma S.p.A. was cited as legally liable. The proceedings are in the discussion phase.

The officers involved in the proceedings in question maintain that they performed their duties in a legal and proper manner.

With respect to that proceeding, also on the basis of legal opinions, although there is a potential risk of civil liability for UniCredit S.p.A. due in part to the complexity of the facts alleged, it is at present not possible to reliably estimate the contingent liability, due to the lack of relevant elements.

With regard to the state of insolvency of the Parmalat Group, from the end of 2003 to the end of 2005, investigations were also carried out on certain executives and officers of the former Capitalia S.p.A. (now UniCredit S.p.A.), who had been committed for trial within the scope of three distinct criminal proceedings known as "Ciappazzi", "Parmatour" and "Eurolat".

Companies of the Parmalat Group in extraordinary administration and numerous Parmalat bondholders are the plaintiffs in the civil suits in the aforementioned proceedings. All of the civil claimants' lawyers have reserved the right to quantify damages at the conclusion of the first instance trials.

In the "Ciappazzi" and "Parmatour" proceedings, several companies of the UniCredit Group have been cited as legally liable.

The proceedings are in the discussion phase.

Upon execution of the settlement of August 1, 2008 between UniCredit Group and Parmalat S.p.A., and as Parmalat Group companies in extraordinary administration, all civil charges were either waived or revoked.

The officers involved in the proceedings in question maintain that they performed their duties in a legal and proper manner.

For these proceedings, a provision has been made for an amount consistent with what currently appears to be the potential risk for the legally liable UniCredit S.p.A.

Lehman

As is widely known, 2008 witnessed periods of considerable instability in financial markets involving all major markets, particularly those in the United States.

Several companies in the Lehman Brothers Group were put into receivership in the countries in which they operated. Specifically, in the U.S., Lehman Brothers Holdings Inc., among others, was put into receivership, while in the Netherlands, Lehman Brothers Treasury Co. BV was put into receivership.

As a result, as at December 31, 2009, a certain number of complaints were received concerning transactions involving financial instruments issued by Lehman Group companies or related to them. A careful review of these complaints is being conducted by the companies that received them. The number of pending cases as at December 31, 2009 is essentially negligible.

Madoff

In December 2008, Bernard L. Madoff, former chairman of the NASDAQ and owner of Bernard L. Madoff Investment Securities LLC ("**BMIS**"), an investment company registered with the Securities Exchange Commission (the "**SEC**") and the **Financial Industry Regulatory Authority ("FINRA")**, was arrested on charges of securities fraud for what has been described by U.S. authorities as a Ponzi scheme. In the same month, a bankruptcy administrator (the "**SIPA Trustee**") for the BMIS liquidation was appointed in accordance with the U.S. Securities Investor Protection Act of 1970. In March 2009, Bernard L. Madoff was found guilty of several crimes, including securities fraud, investment adviser fraud, and providing false information to the SEC: In June 2009, Bernard L. Madoff was sentenced to 150 years in prison.

Following Bernard L. Madoff's fraud conviction, several criminal and civil suits were filed in various countries against financial institutions and investment advisers by, or on behalf of, investors, intermediaries acting as brokers for investors and public entities in relation to losses incurred.

UniCredit S.p.A., some of its subsidiaries, and some of its employees or former employees were subpoenaed, or may be subpoenaed in the future, in the proceedings and/or investigations of the Madoff case in various countries, including the United States, Austria, and Chile.

As at the date of Bernard L. Madoff's arrest, the Alternative Investments division of Pioneer, a subsidiary of the UniCredit S.p.A. ("**PAI**"), acted as investment manager and/or investment adviser for some funds that had invested in other funds with accounts at BMIS. Specifically, PAI acted as investment manager and/or investment adviser for the Primeo funds and AllWeather funds. PAI acted as the investment adviser for the Primeo funds from April 2007, after having been sold to BA Worldwide Fund Management ("**BAWFM**"), an indirect subsidiary of BA. The Primeo and AllWeather invested in other funds, which held accounts managed by BMIS. Certain documents prepared by these funds showed assets managed by the UniCredit S.p.A.'s subsidiaries on behalf of fund administrators of €805 million in November 2008. Based on these documents, the amount includes invested capital and proceeds from the investment. Given Bernard L. Madoff's admission of guilt and the facts that emerged following the fraud committed by BMIS, it is clear that the amounts indicated in the aforementioned documents do not accurately reflect the investments made and the proceeds from these investments. As a result, the above amounts should not be considered indicative of the amount of losses incurred by final investors of the funds involved.

Speculative funds established under Italian law and managed by PAI do not have any exposure to funds that invested in accounts managed by BMIS.

HVB issued various tranches of debt securities whose potential yield was calculated based on the yield of a hypothetical structured investment (synthetic investment) in the Primeo funds. The notional value of the debt securities issued in reference to Primeo funds was €27 million. Some legal proceedings were brought in Germany regarding debt securities issued by HVB and connected to Primeo funds, citing HVB as the defendant.

BAWFM, a subsidiary of BA, acted as investment adviser for Primeo funds until the beginning of April 2007. Some BA customers purchased shares in Primeo funds that were held on their accounts with BA.

UniCredit S.p.A. and its BA and PAI subsidiaries were named as part of the 50 defendants in three putative class actions suits filed with the United States District Court for the Southern District of New York, in which the petitioners claim to represent the investors of three funds in which assets were invested in BMIS, directly or indirectly. The defendants were accused of having omitted pertinent information from, or including false information in, prospectuses and related appendices used for the securities offer. The petitioners of the class action allege that the investors were misled, for example, as to the lack of diversification of the investments, on the fact that the funds were invested in BMIS and on the level of due diligence performed by the defendants. Furthermore, the petitioners allege that the defendants did not give adequate attention to "red flags" that were identified and would have made them aware of Bernard L. Madoff's fraud. The three class actions claim compensation for damages with related interest, reimbursement of expenses, costs, legal consultancy fees and the recognition of equitable/injunctive relief. One of the class actions specifically seeks a sentence finding the defendants liable for an amount equivalent to the amount of the initial investments of the collective parties together with interest and proceeds that the parties would have received if their money had been invested wisely. This suit also specifically requests compensation for punitive damages and that the Court prohibits the defendants from using assets of the funds to defend themselves or to indemnify themselves.

Proceedings were initiated in Austria related to Bernard L. Madoff's fraud in which BA and BANKPRIVAT AG (a former subsidiary of BA, with which it merged on October 29, 2009), among others, were named as defendants. The parties invested in funds that, in turn, invested directly or indirectly in BMIS. BA is also the subject of proceedings in Austria following the complaint filed by the Supervisory Authority for Austrian financial markets with the Austrian Attorney's Office and complaints filed to said Attorney's Office by private parties that invested in funds which, in turn, invested directly or indirectly in BMIS. The parties that filed said complaints maintain that BA violated the terms of the Austrian Consolidated Investment Act that governs the role of BA as "auditor of the prospectus" of Primeo funds.

Several subsidiaries of UniCredit S.p.A. have received orders and requests to produce information and documents from the SEC, the U.S. Department of Justice and the SIPA Trustee in the United States, the Austrian Supervisory Authority for financial markets, the Irish Supervisory Authority for financial markets and BaFin in Germany related to their respective investigations into Bernard L. Madoff's fraud.

In addition to proceedings stemming from the Madoff case against UniCredit S.p.A., its subsidiaries and some of their respective employees and former employees, additional actions have been threatened and may be filed in the future in said countries or in other countries by private investors or local authorities. The pending or future actions may have negative consequences for the Group.

All pending actions are in the initial phases. UniCredit S.p.A. and its subsidiaries involved intend to defend themselves against the charges regarding the Madoff case by any method available to them.

At the time being it is not possible to reliably estimate the timing and results of the various actions, nor determine the level of responsibility, if any responsibility exists. Presently, in compliance with international accounting standards, no provisions were made for specific risks associated with Madoff disputes.

Medienfonds

Various investors in VIP Medienfonds 4 GmbH & Co. KG ("**Medienfonds**") brought legal proceedings against the subsidiary HVB. The investors in the Medienfonds fund initially enjoyed certain tax benefits which were later prohibited by the tax authorities. HVB did not sell shares in the Medienfonds fund, but granted loans for the investment in said fund, to all investors (for a part of the amount invested), by assuming specific repayment obligations in respect of said fund of which some film distributors are holders. The actors argue that HVB was aware that the structure of the fund increased the tax risk associated with the investment, particularly in relation to the possible loss of tax benefits and that it would be responsible, together other parties, for presumed errors in the prospectus used to market the fund. The courts of first instance passed various sentences, also unfavourable, on HVB, but none of these decisions have yet become final. The District High Court of Munich is dealing with the issue relating to prospectus liability through a specific procedure pursuant to the Capital Markets Test Case Act (Kapitalanleger-Musterverfahrensgesetz) including that of HVB. HVB and another German bank involved in said proceedings have proposed a settlement. HVB has moved to make provisions which are, at present, deemed to be congruous.

CODACONS Class action

With a petition served on January 5, 2010, CODACONS (*Co-ordination of the associations for the defence of the environment and the protection of consumer rights*), in the interest of one of its applicants, submitted a class action to the Court of Rome against UniCredit Banca di Roma S.p.A. pursuant to article 140-*bis* of the Consumer Code (Legislative Decree no. 206 dated September 6, 2005). This action, which was brought for an amount of €1,250 (plus unquantified non-material damages), is based on the allegations of AGCM, according to which Italian banks would have paid for the abolition of maximum overdraft commission introducing new and more costly commissions for users. The applicant asked the Court of Rome to allow the action specifying the criteria based on which the parties which intend to adhere are included in the class action and setting fixed terms of not more than 120 days within which the adhesion contracts must be deposited in the court registry. If the Court considers the collective action admissible, the sum requested could increase in an exponential way in relation to the number of adhesions of current account holders of UniCredit Banca di Roma S.p.A. who considered themselves injured by the bank's behaviour. UniCredit believes to have operated in compliance with the law.

RELEVANT EVENTS OCCURRING AFTER 12/31/2009

Vanderbilt

Another Vanderbilt-related lawsuit has been recently filed in New Mexico. PIM US was served on January 14, 2010, and the company's attorneys have agreed to accept service on behalf of the other Vanderbilt defendants.

It names most of the Vanderbilt defendants, including PIM USA, but not PGAM nor UCI. This lawsuit is titled *Hill v. VCA*, and is styled – in the alternative - as a class action or derivative action brought by individual members/beneficiaries of the ERB. The lead plaintiff, Donna J. Hill, alleges that she is a records technician at New Mexico State University and a participant in the ERB pension fund. The complaint names substantially the same Vanderbilt defendants who are sued in the Foy case (but not UniCredit or PGAM), and the substantive allegations are largely identical to those made in the Foy case. This lawsuit, however, is predicated on common law claims of fraud and on the theory that the Vanderbilt defendants knowingly assisted (aided and abetted) the state officials in breaching their fiduciary duties to the ERB pension plan participants.

The Hill complaint does not specify the amount of damages claimed, but the amount would be subsumed within the damages claimed under the Foy lawsuit.

I.CO.PO.DE.SO Srl e Pietro Montanari

The company I.CO.PO.DE.SO Srl and its legal representative Mr. Pietro Montanari, on his behalf, brought suit against UniCredit S.p.A on February 10, 2010 to obtain compensation of damages in the amount of about €133 million in addition to interest and monetary adjustment. The first hearing for appearances was set for May 25, 2010 before the Court of Rome.

The plaintiffs allege that Cassa di Risparmio di Roma (C.R.R., now UniCredit), by a series of acts and by conduct (between the end of the decade of the 1970s and the beginning of the 1980s) supposedly caused the bankruptcy of I.CO.PO.DE.SO Srl, causing the mentioned plaintiffs to incur extremely significant damages in the form of material losses and loss of reputation.

Considering the fact that the case is still in its preliminary stages, no provision has been made on the balance sheet.

Mario Malavolta

Mr. Mario Malavolta, as director of Malavolta Corporate SpA, filed a petition on February 3, 2010 to join the case begun in July 2009, requesting compensation of damages totaling about €445 million.

The Bank has filed a brief opposing the petition to join the case and has contested the claims of the plaintiff.

Special Representative

On March 3, 2010 the High Regional Court of Munich granted the appeal against nullification of the resolution to remove the Special Representative. The decision is not final.

Madoff

In October 2009, the Southern District consolidated the three cases for pretrial purposes. Thereafter, amended consolidated complaints relating to each of three investment fund groups that allegedly invested with BMIS (the "Herald" funds, "Primeo" funds and "Thema" funds) were filed.

The amended "Herald" complaint, filed in February 2010, asserts putative class action claims on behalf of investors who owned shares of Herald Fund SPC-Herald USA Segregated Portfolio One and/or Herald (Lux) on December 10, 2008, or purchased shares in those funds from January 12, 2004, to December 10, 2008, and were damaged thereby. The amended complaint alleges that UniCredit S.p.A., Bank Austria and Bank Medici, among other defendants, breached common law duties and violated U.S. federal securities laws by, inter alia, knowingly or recklessly failing to safeguard plaintiff's investment in the face of "red flags" concerning Madoff. Plaintiff seeks unspecified damages, punitive damages, recoupment of fees, benefits or assets unjustly obtained from the putative class, costs and attorneys' fees to be determined at trial, as well as an injunction preventing defendants from using fund assets to defend the action or otherwise seeking indemnification from the funds.

The amended "Primeo" complaint, filed in February 2010, asserts putative class action claims on behalf of investors who owned shares of Primeo Select Fund and/or Primeo Executive Fund on December 10, 2008, or purchased shares of those funds from January 12, 2004, to December 12, 2008, and were damaged thereby. The amended complaint alleges that UniCredit S.p.A., Bank Austria, Bank Medici, BA Worldwide, PAI and Pioneer Global Asset Management S.p.A, among other defendants, breached common law duties and violated U.S. federal securities laws by, inter alia, misrepresenting the monitoring that would be done of Madoff and plaintiffs' investments and disregarding "red flags" of Madoff's fraud. Plaintiffs seek unspecified damages, recoupment of fees, benefits or assets unjustly obtained from the putative class, interest, punitive damages, costs and attorneys' fees to be determined at trial, as well as an injunction preventing defendants from using fund assets to defend the action or otherwise seeking indemnification from the funds.

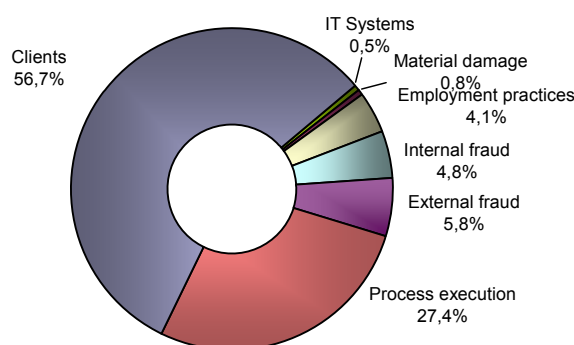

The amended "Thema" complaint, filed in February 2010, asserts putative class action claims on behalf of investors who owned shares of Thema International Fund plc and/or Thema Fund on December 10, 2008, or purchased shares in those funds from January 12, 2004, to December 14, 2008, and were damaged thereby. The amended complaint alleges that UniCredit S.p.A., BA Worldwide and Bank Medici, among other defendants, violated U.S. federal securities laws and committed common law torts by, inter alia, recklessly or knowingly making or failing to prevent untrue statements of material fact and/or failing to exercise due care in connection with plaintiff's investment. The amended complaint further alleges that UniCredit S.p.A., BA Worldwide and Bank Medici were unjustly enriched by the receipt of monies from the putative class. Plaintiff seeks unspecified damages (including profits that the putative class would have earned had their money been invested prudently), interest, punitive damages, costs and attorneys' fees, as well as an injunction preventing defendants from using fund assets to defend the action or otherwise seeking indemnification from the funds.

These proceedings are in their initial stages. UniCredit Sp.A. and its affiliated defendants intend to defend these proceedings and to assert defenses against the Madoff-related claims directed at them.

Quantitative Information

Detailed below is the percentage composition, by type of event, of operational risk sources as defined by the New Basel Capital Accord and acknowledged by the New Regulations for the Prudential Supervision of Banks issued by the Bank of Italy in December 2006 (Circular No. 263) and in successive updates. The major categories are as follows:

- internal fraud: losses owing to unauthorised activity, fraud, embezzlement or violation of laws, regulations or business directives that involve at least one internal member of the bank;
- external fraud: losses owing to fraud, embezzlement or violation of laws by subjects external to the bank;
- employment practices and workplace safety: losses arising from actions in breach of employment, health and workplace safety laws or agreements, from personal injury compensation payments or from cases of discrimination or failure to apply equal treatment;
- clients, products and professional practices: losses arising from non-fulfilment of professional obligations towards clients or from the nature or characteristics of the products or services provided;
- damage from external events: losses arising from external events, including natural disasters, acts of terrorism and vandalism;
- business disruption and system failures: losses owing to business disruption and system failures or interruptions;
- process management, execution and delivery: losses owing to operational or process management shortfalls, as well as losses arising from transactions with commercial counterparties, sellers and suppliers.

In 2009, the main source of operational risk was "Clients, products and professional practices", a category which includes losses arising from the non-fulfilment of professional obligations towards clients or from the nature or characteristics of the products or services provided, as well as any sanctions for violating tax regulations. The second largest contribution to losses came from errors in process management, execution and delivery due to operational or process management shortfalls. There were also, in decreasing amounts, losses stemming from external fraud, internal fraud and employment practices. The residual risk categories were damage to physical assets from external events and IT systems related problems.

Section 5 – Other Risks

The main risk factors are those indicated above, but there are other risk profiles. The Group has broadened the types of risk analyzed in order to achieve a more accurate measurement of the risks assumed. At the same time, methods have been established for combining risks to reach an overall measurement of risk by integrating individual risks through the calculation of internal capital. To this end, the Group has identified risks inherent in the Group's asset and liability positions and its operations, singling out the following types of risk in addition to the credit, market, operational and liquidity risks already mentioned:

- **Business risk:** this derives from a reduction of margins not due to market, credit or operational risks, but to changes in the competitive environment and in customer behavior. Specifically, it mainly concerns future changes in margins and their impact on the Group's value and capitalization levels.
- **Real estate risk:** this risk is defined as the potential losses from negative fluctuations in the market value of the real estate portfolio owned by the Group. Real estate provided as collateral by customers is obviously not included.
- **Financial investment risk:** this represents the potential loss in value of non-speculative financial investments made in non-Group companies which are not included in the scope of consolidation. Trading book positions are not taken into consideration.
- **Strategic risk:** this arises from unexpected changes in the competitive environment, from the failure to recognize ongoing trends in the banking sector or from making incorrect conclusions regarding these trends. The impacts of decisions that are detrimental to long-term objectives and that may be difficult to reverse are also considered.
- **Reputational risk:** this is the current or future risk of a decline in profits or capital as a result of a negative perception of the bank's image by customers, counterparties, bank shareholders, investors or the regulator.

The second step in extending the risk profile consists of identifying the best analysis method. Certain categories lend themselves to quantitative analysis using statistical methods, while others require a more qualitative approach such as scenario analysis. Quantitative measurement is carried out using:

- Estimates of operating capital and
- Stress Tests.

Economic capital is the capital the Group needs to hold to bear risks associated with its positions and operations and is calculated in relation to both individual and combined risk categories consistent with the target rating. Based on the approaches described, the Group has decided to measure business, real estate and financial investment risk using economic capital since the amount of capital determined may be used to cover potential losses. On the other hand, strategic risk is analyzed using scenarios that also arrive at an estimate of potential losses in certain contexts, but is not included in the estimate of the combined risk profile.

The multi-faceted nature of risk necessitates Stress Test analyses in addition to the measurement of operating capital. This is done not only to estimate losses in certain scenarios, but also to understand the impact of the factors causing these losses.

Stress Tests are performed for individual and combined risk categories by simulating combined changes in risk factors in order to support the estimate of combined operating capital. The combined Stress Test estimate deals both with the amount of individual risks, as well as with the decreased diversification benefit in crisis conditions.

Internal Capital Adequacy Assessment Process (ICAAP)

In accordance with the Basel II recommendations, measuring risk profile is a fundamental element of the capital adequacy process.

The Group's approach to capital adequacy consists of five phases:

- Risk identification, as described above
- Risk profile measurement
- Planning capital and definition of the risk appetite
- Monitoring and reporting
- Risk governance

Risk profile measurement is carried out using the internal capital, which is determined by aggregating economic capital related to the types of risk described above net of diversification benefits plus a cushion that takes into account significant elements for determining the risk profile, such as the variability of the economic cycle and the risk model, with reference to the quality of the data and the accuracy of the models.

The risk profile is defined using internal capital for large and medium-sized companies, while for small companies a synthetic approach is used to allow for an efficient measurement process at the consolidated level.

The capital planning process involves allocating the capital to the divisions and entities in order to reach value creation objectives on the basis of risk propensity. Over the long run the Group aims to generate an income greater than is necessary to remunerate risk (cost of capital at risk) and thus create value so as to maximize the return for its shareholders.

Risk propensity can be defined as the long- and short-term variability in results that Senior Management is willing to accept in support of a particular strategy.

The framework adopted by UniCredit comprises three areas:

- Capital adequacy;
- Profitability and risks;
- Liquidity and Funding;

Capital adequacy is the balance between capital and assumed risk, with a view to both the first and second pillar, where it is measured respectively by the Core Tier 1 Ratio, Total Capital Ratio and the Risk Taking Capacity. The latter is the ratio between the available capital (Available Financial Resources, AFR) and the internal capital.

The AFR can be used to protect the bank from insolvency. These resources must be committed and defined on a contractual basis, so that they can be relied upon in times of crisis. Since losses impact the AFR, these can also be defined as the amount of losses that can be absorbed by the bank before it becomes insolvent.

The internal economic capital measurements and the resulting Risk Taking Capacity are illustrated in the following table.

Capital Adequacy	December 2009 (€billion)
Internal capital	43.9
Available Financial Resources (AFR)	64.0
Risk Taking Capacity	145.9%

Internal Capital is then broken down at the consolidated level according to the divisional structure, a key concept of the Group business strategy.

The Stress Test on risks is run under a capital adequacy perspective by integrating risk values with scenario impacts on available capital, which represents the Group capacity to stand further losses in stressed conditions.

The risk appetite and the objectives consequently set are then subject to monitoring and reporting in terms of both risk profile and profitability.

Metrics for determining the Risk Appetite are calculated at the consolidated and principal Legal Entity level.

To improve the efficiency of the decision-making process, the monitoring translates into a regular report to the Top Management both at the individual Entity, as well as at the Group level.

In addition, the Parent Bank is required to submit an accounting report on a consolidated basis in accordance with the Banca d'Italia guidelines, at the same time providing a chart on the principal Entities.

The governance at the basis of the capital adequacy process is divided into two dimensions:

- within each Entity, including the Parent Bank;
- in the relations between the Parent Bank (with guidance, support and oversight functions), the Divisions, the Sub-Holdings and the Entities.

The capital adequacy process is of fundamental importance within the Group and therefore requires an adequate risk governance system ensuring the involvement of Top Management and appropriate assignment of ICAAP activities to the organizational functions.

In fact, the ultimate responsibility lies with the Board of Directors, since the capital adequacy process requires the determination of the propensity for risk and the definition of a direction for the proper allocation of the available capital resources. Senior Management identifies the relevant bodies/structures that will participate in the process and adopts decisions regarding reporting activities to the competent decision-making body (for example, the Group Risk Committee).

Reputational Risk

The UniCredit Group has identified reputational risk as the current or future risk of a decline in profits or capital as a result of a negative perception of the bank's image by customers, counterparties, bank shareholders, investors or the regulator.

In this regard, in July 2009, in the broader context of the Group Risk Management reorganization, the new Reputational Risk Measurement and Control unit was formally appointed within the Operational and Reputational Risks Portfolio department.

The primary role of Reputational Risk Measurement and Control is:

- developing methodologies enabling the identification, assessment and measurement of reputational risk;
- defining reputational risk limits, and suggesting mitigation actions, supporting the relevant Business Units and Legal Entities in monitoring their implementation

Moreover, a dedicated Group Reputational Risk Committee, reporting to the Group Risk Committee, has been established with responsibility in issuing reputational risk policies, ensuring consistency in reputational risk practice across Business Units and Legal Entities and controlling and monitoring the Group Reputational Risk portfolio. Furthermore, the Group Transactional Risk Committees are in charge of handling reputational issues concerning individual transactions, based on reputational risk special policies.

In July 2009, the Group Risk Committee approved the updated version of both the Nuclear Energy and the Defense/Weapons Industry Reputational Risk Special Policies, governing business operations in such sectors.

Part F – Consolidated Shareholders’ Equity

Part F – Information on Shareholders’ Equity	450
Section 1 – Consolidated shareholders’ equity	450
Section 2 – Shareholders’ equity and banking regulatory ratios	453

Part F – Information on Shareholders' Equity

Following the above-mentioned first amendment to Banca d'Italia Circular 262/2005 in Part F, Consolidated Shareholders' Equity, a new table has been established in Section 4 to detail the capital adequacy of financial conglomerates subject to supplementary regulatory procedures.

Section 1 – Consolidated shareholders' equity

A. Qualitative information

The UniCredit Group has made a priority of capital management and allocation (for both regulatory and economic capital) on the basis of the risk assumed in order to expand the Group's operations and create value. These activities are part of the Group planning and monitoring process and comprise:

- planning and budgeting processes:
 - proposals as to risk propensity and capitalisation objectives;
 - analysis of risk associated with value drivers and allocation of capital to business areas and units;
 - assignment of risk-adjusted performance objectives;
 - analysis of the impact on the Group's value and the creation of value for shareholders;
 - preparation and proposal of the financial plan and dividend policy;
- monitoring processes
 - analysis of performance achieved at Group and business unit level and preparation of management reports for internal and external use;
 - analysis and monitoring of limits;
 - analysis and performance monitoring of the capital ratios of the Group and individual companies.

The Group has set itself the goal of generating income in excess of that necessary to remunerate risk (cost of equity), and thus of creating value, so as to maximise the return for its shareholders in terms of dividends and capital gains (total shareholder return). This is achieved by allocating capital to various business areas and business units on the basis of specific risk profiles and by adopting a methodology based on risk-adjusted performance measurement (RAPM), which will provide, in support of planning and monitoring processes, a number of indicators that will combine and summarise the operating, financial and risk variables to be considered.

Capital and its allocation are therefore extremely important for strategy, since capital is the object of the return expected by investors on their investment in the Group, and also because it is a resource on which there are external limitations imposed by regulatory provisions.

The definitions of capital used in the allocation process are as follows:

- Risk or employed capital: This is the equity component provided by shareholders (employed capital) for which a return that is greater than or equal to expectations (cost of equity) must be provided;
- Capital at risk: This is the portion of capital and reserves that is used (the budgeted amount or allocated capital) or was used to cover (at period-end - absorbed capital) risks assumed to pursue the objective of creating value.

Capital at risk is dependant on the propensity for risk and is based on the target capitalisation level which is also determined in accordance with the Group's credit rating.

If capital at risk is measured using risk management methods, it is defined as economic capital, if it is measured using regulatory provisions, it is defined as regulatory capital. In detail:

- Economic capital is the portion of equity that is actually at risk, which is measured using probability models over a specific confidence interval.
- Regulatory capital is the component of total capital represented by the portion of shareholders' equity put at risk (Core Equity or Core Tier 1) that is measured using regulatory provisions.

Economic capital and regulatory capital differ in terms of their definition and the categories of risk covered. The former is based on the actual measurement of exposure assumed, while the latter is based on schedules specified in regulatory provisions.

The relationship between the two different definitions of capital at risk can be obtained by relating the two measures to the Group's target credit rating (AA- by S&P) which corresponds to a probability of default of 0.03%. Thus, economic capital is set at a level that will cover adverse events with a probability of 99.97% (confidence interval), while regulatory capital is quantified on the basis of a Core Tier 1 target ratio in line with that of major international banking groups with at least the same target rating.

Thus, during the application process the "double track" approach is used which assumes that allocated capital is the greater of economic capital and regulatory capital (Core Tier 1) at both the consolidated and business area or business unit levels.

If economic capital is higher, this approach makes it possible to allocate the actual capital at risk that regulators have not yet been able to incorporate, and if regulatory capital is higher, it is possible to allocate capital in keeping with regulatory provisions.

The starting point for the capital allocation process is consolidated capital attributable to the Group.

The purpose of the capital management function performed by the Capital Management unit of Planning, Finance and Administration is to define the target level of capitalisation for the Group and its companies in line with regulatory restrictions and the propensity for risk.

Capital is managed dynamically: the Capital Management unit prepares the financial plan, monitors capital ratios for regulatory purposes and anticipates the appropriate steps required to achieve its goals. On the one hand, monitoring is carried out in relation to both shareholders' equity and the composition of capital for regulatory purposes (Core Tier 1, Tier 1, Lower and Upper Tier 2 and Tier 3 Capital), and on the other hand, in relation to the planning and performance of risk-weighted assets (RWA).

The dynamic management approach aims to identify the investment and capital-raising instruments and hybrid capital instruments that are most suitable for achieving the Group's goals. If there is a capital shortfall, the gaps to be filled and capital generation measures are indicated, and their cost and efficiency are measured using RAPM. In this context, value analysis is enhanced by the joint role played by the Capital Management unit in the areas of regulatory, accounting, financial, tax-related, risk management and other aspects and the changing regulations¹ affecting these aspects so that an assessment and all necessary instructions can be given to other Group HQ areas or the companies asked to perform these tasks.

¹ E.g. Basel II, IAS/IFRS etc.

B. Quantitative information

B.1 Consolidated shareholders' equity: breakdown by type of company (€'000)

Net Equity Items	Amounts as at 12.31.2009					Total
	Banking group	Insurance companies	Other companies	Consolidation adjustments and eliminations		
Share Capital	8,735,405	5	45,128	(14,695)		8,765,843
Share premium reserve	38,338,920	-	5,264	(9)		38,344,175
Reserves	15,052,546	(9,424)	(903,100)	971,350		15,111,372
Equity instruments	-	-	-	-		-
(Treasury shares)	(6,019)	-	-	-		(6,019)
Revaluation reserves	(1,358,124)	2,105	(21,729)	19,669		(1,358,079)
- Available for sale financial assets	(124,728)	2,105	(21,729)	-		(144,352)
- Property, plant and equipment	-	-	-	-		-
- Intangible assets	-	-	-	-		-
- Hedges of foreign investments	-	-	-	-		-
- Cash-flow hedge	450,713	-	-	-		450,713
- Exchange difference	(1,929,616)	-	-	-		(1,929,616)
- Non-current assets classified held for sale	-	-	-	-		-
- Actuarial gains (losses) on defined benefits plans	-	-	-	-		-
- Valuation reserves from investments accounted for using the equity method	(32,356)	-	-	19,669		(12,687)
- Special revaluation laws	277,863	-	-	-		277,863
Profit (loss) of the year - Minority interests	2,034,783	32	(54,511)	54,316		2,034,620
Shareholders' equity	62,797,511	(7,282)	(928,948)	1,030,631		62,891,912

B.2 Revaluation reserves for available-for-sale assets: breakdown (€'000)

Assets/Values	Amounts as at 12.31.2009									
	Banking Group		Insurance companies		Other companies		Consolidation adjustments		Total	
	Positive reserve	Negative reserve	Positive reserve	Negative reserve	Positive reserve	Negative reserve	Positive reserve	Negative reserve	Positive reserve	Negative reserve
1. Debt securities	379,468	(731,178)	2,105	-	7,730	-	-	-	389,303	(731,178)
2. Equity securities	263,175	(35,572)	-	-	-	(29,425)	-	-	263,175	(64,997)
3. Units in investment fund	35,235	(36,256)	-	-	-	(34)	-	-	35,235	(36,290)
4. Loans	492	(92)	-	-	-	-	-	-	492	(92)
Total 12.31.2009	678,370	(803,098)	2,105	-	7,730	(29,459)	-	-	688,205	(832,557)
Total 12.31.2008	419,398	(1,183,984)	728	(61)	2	(196,657)	-	-	420,128	(1,380,702)

Amounts shown as at December 31, 2008 differ from those published due to the reclassification of reserves related to equity investments recognized using equity method.

B.3 Revaluation reserves for available-for-sale assets: annual change					(€'000)
	Changes in 2009				
	Debt securities	Equity securities	Units in investments funds	Loans	
1. Opening balance	(937,783)	26,126	(50,522)	1,605	
2. Positive changes	980,855	528,294	81,230	64	
2.1 <i>Fair value</i> increases	918,239	238,267	54,048	35	
2.2 Reclassification through profit or loss of negative reserves	60,696	65,437	22,769	24	
- <i>due to impairment</i>	9,451	64,831	8,754	-	
- <i>following disposal</i>	51,245	606	14,015	24	
2.3 Other changes	1,920	224,590	4,413	5	
3. Negative changes	384,947	356,242	31,763	1,269	
3.1 <i>Fair value</i> reductions	358,251	219,686	22,389	1,163	
3.2 Impairment losses	-	-	1,869	-	
3.3 Reclassification through profit or loss of positive reserves: following disposal	11,831	136,556	5,728	106	
3.4 Other changes	14,865	-	1,777	-	
4. Closing balance	(341,875)	198,178	(1,055)	400	

Annual changes differ from those reported in the Other Comprehensive Income Statement due to the inclusion of business combinations in the table above.

Section 2 – Shareholders' equity and banking regulatory ratios

2.1 Regulatory framework

The prudential scope of consolidation defined by regulatory rules (Bank of Italy regulations n. 263 - December 27, 2006 and n. 155 - December 18, 1991) includes subsidiaries with the following characteristics:

- Banks, financial companies and ancillary banking services companies directly or indirectly controlled to which the line-by-line consolidation method is applied;
- Banks, financial companies and ancillary banking services companies directly or indirectly participated for a share equal or more than the 20% when they are jointly controlled with other entities, to these subsidiaries has to be applied the proportional consolidation method
- The following entities are consolidated with equity method:
 - banks or financial companies directly or indirectly participated for a share equal or more than the 20% or anyway subjected to significant influence;
 - to companies, different from banks, financial companies and ancillary banking services companies directly or indirectly controlled exclusively or jointly or subjected to significant influence.

Further prudential treatments provided by the regulation are: the deduction of the value of the subsidiary from the capital and the sum of the subsidiary value to the Risk Weighted Assets.

The prudential scope of consolidation is different from the scope of the Financial Statement, defined by IAS/IFRS rules.

2.2 Capital for regulatory purposes

A. Qualitative information

1. Tier 1

The following instruments are included in tier 1:

INTEREST RATE	MATURITY	STARTING DATE OF PREPAYMENT OPTION	AMOUNT IN ORIGINAL CURRENCY (mln)	AMOUNT INCLUDED IN REGULATORY EQUITY (euro '000)	STEP-UP	OPTION TO SUSPEND INTEREST PAYMENT	ISSUED THROUGH A SPV SUBSIDIARY

C.3 Capital for regulatory purposes (included TIER 3)/Weighted risk assets (Total capital ratio)		12.02		10.64

Ratios as at December 31, 2008 were restated following the inclusion in Tier 2 Capital of the portion of the translation reserve associated with foreign net investment.

Part G – Business Combinations

Part G – Business Combinations	460
Section 1 – Business Combinations Completed in 2009	460
Section 2 – Business Combinations Completed after December 31, 2009	461

Part G – Business Combinations

Section 1 – Business Combinations Completed in 2009

1.1 Business Combinations

Business combinations with counterparties outside the Group are carried out using the purchase method prescribed by IFRS 3 - Business Combinations as noted in Part A .2 above concerning the main balance-sheet items.

No business combinations with external counterparties have been completed since December 31, 2008.

As part of ongoing reorganization, the Group undertook business combinations between entities already directly or indirectly controlled by UniCredit SpA (business combinations under common control).

These transactions had no economic substance and were accounted for in the acquirer's and acquired entity's accounts in accordance with the continuity principle, under which the acquirer purchases the net assets acquired at their carrying value in the acquired entity's accounts.

Any difference between this value and the purchase price are recognized in an equity reserve both by the acquirer and by the seller.

These transactions have no effect on consolidated profit.

The main transactions of this kind carried out in 2009 were:

- Absorption by UniCredit Global Information Services SpA of HVB Information Services GmbH, previously a subsidiary of UniCredit Bank AG; WAVE Solution Information Technology GmbH previously a subsidiary of UniCredit Bank Austria AG and Kyneste SpA.
- Split-off and absorption of the Back Office business owned by Unicredit Bank Austria AG and Unicredit Bank AG by Unicredit Business Partner S.p.a.
- Absorption of UniCredit Banca per la Casa SpA by UniCredit Consumer Financing SpA.
- Absorption of Private Bank Business owned by Unicredit International Bank Luxembourg S.A. by Unicredit Luxembourg S.A.
- Split-off and absorption of the "Loans against Salary" business owned by Family Credit Network SpA, by UniCredit Consumer Financing SpA.
- Absorption of UniCredit Global Leasing SpA by Locat SpA.
- Acquisition by OOO UniCredit Leasing, a 100% subsidiary of ZAO UniCredit Bank, of ZAO Locat Leasing Russia, previously a 100% subsidiary of UniCredit Leasing and acquisition by UniCredit Leasing of a controlling stake in OOO UniCredit Leasing.
- Absorption by UniCredit Bank Austria AG of Bank Privat und Asset Management GmbH.
- Absorption of BACA Giocondo Nekretnine D.O.O. by Interkonzum DOO.
- Absorption of BACA Minerva Leasing GMBH by UniCredit Global Leasing Export GmbH.
- Absorption of CA IB D.D. by Zaba Turizam D.O.O.
- Absorption of CALG Hotelgrundstuckverwaltung Grundung 1986 GmbH by UniCredit Global Leasing Export GmbH.
- Absorption of Pekao Auto Finanse S.A. by Pekao Leasing SP Z.O.O.
- Absorption of Pekao Leasing I Finanse S.A. by Pekao Leasing SP Z.O.O.

Section 2 – Business Combinations Completed after December 31, 2009

No business combinations with external counterparties have been completed since December 31, 2008.

Part H – Related-Party Transactions

Part H – Related-Party Transactions	464
1. Details of Top Managers' Compensation	464
2. Related-Party Transactions.....	465

Part H – Related-Party Transactions

UniCredit SpA's counterparties, with whom UniCredit Group companies have entered into related party transactions, as defined by IAS 24, include:

- direct and indirect subsidiaries;
- associates;
- Top managers of UniCredit SpA (“key management personnel”);
- close family members of key management personnel and companies controlled by, or associated with, key management personnel or their close family members;
- Group employee pension funds.

Details of top managers' compensation are given below, together with related party transactions, pursuant to IAS 24. Key management personnel as defined include Directors and managers with strategic responsibility in the areas of planning, directing and controlling the activities of UniCredit, directly or indirectly.

Key management personnel include, as well as the Directors including the Managing Director/CEO, the members of the Management Committee and the Head of the Internal Audit Department holding office in 2009.

1. Details of Top Managers' Compensation

Total compensation paid to Directors and top managers in 2009 is given below pursuant to IAS 24 and to the circular no. 262 issued by Banca d'Italia on December 22, 2005 (and updated on November 18, 2009) requiring that also the Statutory Auditors' compensation be included.

Compensation paid to key management personnel		(€ thousand)	
	Year 2009	Year 2008	
a) short term benefits	38,799	26,650	
b) post retirement benefits	3,248	2,429	
<i>of which under defined benefit plans</i>	264	18	
<i>of which under defined contribution plans</i>	2,984	2,411	
c) other long term benefits	85	63	
d) termination benefits	8,687	2,300	
e) share-based payment	20,710	11,678	
Total	71,529	43,120	

Compensation paid to Directors (€9,572k), Statutory Auditors (€855k) and Managers with strategic responsibility (€30,927k) as shown in the schedule required by CONSOB, pursuant to art. 78 of the Issuer Rules, in the Accounts of UniCredit S.p.A., and 30,175 relating to other costs borne in 2009 (the company share of social security contributions, allocations to severance pay funds and share-based payments using UniCredit and its subsidiaries' equity instruments).

The increase in costs versus the previous year is due: to the enlargement of the population included in the Key Management Personnel perimeter, to the return to the payment of a monetary incentive linked to the positive performance achieved and to a higher amount of severances paid in connection with an increased turnover in senior executive population.

2. Related-Party Transactions

In order to ensure full compliance with legislative and regulatory provisions currently in effect as regards disclosure of transactions with related parties, UniCredit adopted, some time ago, a procedure for identifying related-party transactions. Under this procedure, the decision-making bodies provide appropriate information, to enable compliance with the obligations of the Directors of UniCredit, as a listed company and the Parent Company of the banking group of the same name.

In this regard, the Board of Directors of the Company defined the criteria for identifying transactions entered into with related parties, consistent with the guidelines provided by CONSOB in its communication No. 2064231 dated September 30, 2002 and subsequently with the model established by IAS 24. The units of the Company and the companies belonging to the UniCredit Group were notified of the guidelines necessary to comply systematically with the mentioned reporting requirements.

That said, in 2009 the intra-group transactions and transactions with Italian or foreign related parties were generally carried out at arm's length. All intra-group transactions were carried out based on assessments of mutual economic benefit, and the applicable terms and conditions were established in accordance with fair dealing criteria, with a view to the common goal of creating value for the entire Group. The same principle was applied to the rendering of services, as well as the principle of charging on a minimal basis for these services, solely with a view to recovering the respective production costs.

Further information on related party transactions, and in particular on procedures implemented by the Group, is provided in the Report on operations, chapter "Corporate Governance".

The following table sets out the assets, liabilities and guarantees as at December 31, 2009, for each group of related parties, pursuant to IAS 24.

Related party transactions (€000)							
	Amounts as at 12.31.2009

Operating costs	-9,711	2,044	-17,332	-382	-9,824	-35,205	0.22%

In respect of transactions entered into with the Company's Top Management (including the key management personnel), in compliance with art. 136 of Legislative Decree 385/93 (Single Banking Act) obligations towards persons that perform management, administration and control functions were unanimously resolved by the Board of Directors and by all Statutory Auditors, according to the methods and criteria provided by the already mentioned art. 136 of the Single Banking Act.

"Other related parties" gives the aggregate of the figures relating to:

- close family members (i.e., persons who may be expected to influence the individual concerned) of key management personnel,
- companies controlled/associates by key management personnel or their close family members,
- figures relating to Group employee pension funds of which UniCredit is the instituting source.

Pursuant to the provisions of applicable regulations, in 2009 no atypical and/or unusual transactions were carried out whose significance/size could give rise to doubts as to the protection of company assets and minority interest, either with related or other parties.

Please refer to the Sections "Corporate Transactions and Rationalization of Group Operations" and "Subsequent Events" in the Report on Operations for information on non-recurring significant events and transactions.

Part I – Share-Based Payments

Part I – Share-Based Payments	470
A. Qualitative Information	470
B. Quantitative Information	472

Part I – Share-Based Payments

A. Qualitative Information

1. Description of payment agreements based on own equity instruments

1.1 Outstanding instruments

Group Medium & Long Term Incentive Plans for selected employees include the following categories:

- **Equity-Settled Share Based Payments;**
- **Cash Settled Share Based Payments¹.**

The first category includes the following:

- **Stock Options** allocated to selected Top & Senior Managers and Key Talents of the Group;
- **Performance Shares** allocated to selected Top & Senior Managers and Key Talents of the Group and represented by free UniCredit ordinary shares that the Parent Company undertakes to grant, conditional upon achieving performance targets set at Group and strategic area level in the Strategic Plan and any amendments thereto approved by the Parent Company's Board;
- **Employee Share Ownership Plan (ESOP)** that offers to eligible Group employees the possibility to buy UniCredit ordinary shares with the following advantages: granting of free ordinary shares ("Discount Shares" and "Matching Shares" or, for the second category, rights to receive them) measured on the basis of the shares purchased by each Participant ("Investment Shares") during the "Enrolment Period". The granting of free ordinary shares is subordinated to vesting conditions (other than market conditions) stated in the Plan Rules.

The second category includes synthetic "Share Appreciation Rights" linked to the share-value and performance results of some Group-Companies².

¹ Linked to the economic value of instruments representing a subsidiary's Shareholders' Equity.

² Pioneer Global Asset Management at the end of 2009.

1.2 Measurement model

1.2.1 Stock Options

The Hull and White Evaluation Model has been adopted to measure the economic value of Stock Options. This model is based on a trinomial tree price distribution using the Boyle's algorithm and estimates the early exercise probability on the basis of a deterministic model connected to:

- reaching a Market Share Value equals to an exercise price- multiple (**M**);
- probability of beneficiaries' early exit (**E**) after the end of the Vesting Period.

Any new Stock Options' Plans haven't been granted during 2009.

1.2.2 Other equity instruments (Performance Shares)

The economic value of Performance Shares is measured considering the share market price at the grant date less the present value of the future dividends during the performance period. Parameters are estimated by applying the same model used for Stock Options measurement.

Any new Performance Shares' Plans haven't been granted during 2009.

1.2.3 Employee Share Ownership Plan

For both Discount Shares and Matching Shares (or rights to receive them) the fair value is measured at the end of the Enrolment Period according to the weighed average price paid by Participants to buy the Investment Shares on the market.

The following tables show the measurements and parameters used in relation to Discount Shares and Matching Shares (or rights to receive them) connected to the "Employee Share Ownership Plan" approved in 2008.

Measurement of Discount Shares ESOP 2008

	Discount Shares
Date of Discount Shares delivery to Group employees	18 Jan 2010
Vesting Period Start-Date	1 Jan 2009
Vesting Period End-Date	31 Dec 2009
Discount Shares' Fair Value per unit [€]	1.702

Measurement of Matching Shares ESOP 2008

	Matching Shares
Date of Matching Shares (or related rights) delivery to Group employees	18 Jan 2010
Vesting Period Start-Date	1 Jan 2010
Vesting Period End-Date	31 Dec 2012
Matching Shares' (or related rights) Fair Value per unit [€]	1.702

Within the limits of the “Employee Share Ownership Plan” approved in 2008:

- all Profit and Loss and Net Equity effects related to Discount Shares had been booked during 2009 (excepting adjustments, according to Plan Rules, that will be booked during 2010);
- during the three-year period 2010-2012 will be booked the Profit and Loss and Net Equity effects related to Matching Shares (or rights to receive them).

B. Quantitative Information

1. Annual Changes

UniCredit Stock Options:

Items/Number of options and exercise price		Banking Group Year 2009 (1)			Banking Group Year 2008 (1)		
		Number of Options	Average exercise price [€]	Average maturity	Number of Options	Average exercise price [€]	Average maturity
A.	Outstanding at beginning of period	256,483,798	4.2875	Nov-2016	179,821,182	4.5614	Dec-2015
B.	Increases						
B.1	New issues				88,127,044	3.7134	Jul-2018
B.2	Other						
C.	Decreases						
C.1	Forfeited	13,306,559	4.4779		7,751,133	4.6566	
C.2	Exercised				3,590,226	2.2063	
C.3	Expired	20,746,272	4.2955		123,069	1.9602	
C.4	Other						
D.	Outstanding at end of period	222,430,967	4.2753	Jun-2017	256,483,798	4.2875	Nov-2016
E.	Vested Options at end of period	86,743,028	3.7999	Aug-2015	72,067,805	3.6917	Apr-2012

(1) The information related to Number of options and Average exercise price had been modified as the free capital increase resolved by the UniCredit Annual General Meeting on April 29, 2009 (“scrip dividend”), implied the recommendation by AIAF (Associazione Italiana Analisti Finanziari) to apply an “adjustment factor” equal to 0.88730816.

Other UniCredit equity instruments: Performance Shares and Restricted Shares

(1) This item refers to the increase in number of Performance Shares promised to beneficiaries as consequence of the "adjustment factor" equal to 0.88730816 recommended by AIAF (Associazione Italiana Analisti Finanziari), after the free capital increase resolved by the UniCredit Annual General Meeting on April 29, 2009 ("scrip dividend"). The "adjustment factor" had been applied only to Performance Shares promised to beneficiaries still entitled to receive them on May 18, 2009 (trading date "ex attribution").

(2) The average market price at the exercise date is equal to € 1.6917.

(3) UniCredit undertakes to grant, conditional upon achieving performance targets set in the Strategic Plan, 35,074,877 ordinary shares at the end of 2009 (43,977,880 ordinary shares at the end of 2008).

According to ESOP 2008 Plan Rules, in January 2010 had been delivered to Group Participants:

- 278,650 Discount Shares related to services rendered during 2009;
- 1,018,108 Matching Shares and 157,377 rights to receive them; these shares (or rights) are subject to a three-year vesting during the period 2010-2012.

The said above UniCredit free ordinary shares had been acquired on the market.

2. Other information

Employee Share Ownership Plan 2009

In April 2009 the Ordinary Shareholders' Meeting approved the "UniCredit Group Employee Share Ownership Plan 2009" ("ESOP 2009") that offers to eligible Group employees the opportunity to purchase UniCredit ordinary shares at favorable conditions in order to reinforce employees' sense of belonging and commitment to achieve the corporate goals.

The ESOP 2009 was launched on October 27, 2009 in ten countries across the Group (Austria, Bulgaria, Czech Republic, Germany, Hungary, Italy, Poland, Romania, Serbia and Slovakia) with a participation rate of about 3.9% of the eligible employees.

The ESOP 2009 is a share plan similar to the plan approved for 2008 under which:

1. during the **“Enrolment Period”** (from January 2010 to December 2010) the Participants can buy UniCredit ordinary shares (“Investment Shares”) by means of monthly or one-off contributions (via one to three installments in March, May and/or October 2010) taken from their Current Account. In case, during this Enrolment Period, a Participant leaves the Plan, he/she will lose the right to receive any free ordinary shares at the end of the Enrolment Period;
2. at the end of the Enrolment Period (January 2011), each Participant will receive one free ordinary share (**“Discount Share”**) every 20 shares purchased; Discount Shares will be locked up for three years;
3. furthermore, at the end of the Enrolment Period, the Participant will receive another free restricted share (**“Matching Share”**) every 5 shares acquired, considering for the computation both the Investment Shares and the Discount Shares; also this free ordinary share will be subject to lockup for the next three years but, differently from the Discount Share, the Participant will lose the entitlement to the Matching Share if, during the three-year holding period, he/she will no longer be an employee of a UniCredit Group Company unless the employment has been terminated for one of the specific reasons stated in the Rules of the Plan. In some countries, for fiscal reasons, it will not be possible to grant the Matching Shares at the end of the Enrolment Period: in that case an alternative structure is offered that provides to the Participants of those countries the right to receive the Matching Shares at the end of the Holding Period (**“Alternative Structure”**);
4. during the **“Holding Period”** (from January 2011 to January 2014), the Participants can sell the Investment Shares purchased at any moment, but they will lose the corresponding Matching Shares (or right to receive them).

Discount Shares and Matching Shares are qualified as “Equity Settled Share-based Payments” as Participants, according to Plan’s Rules, will receive UniCredit Equity Instruments as consideration for the services rendered to the legal entity where they are employed. For both Discount Shares and Matching Shares (or rights to receive them) the fair value will be measured at the end of the Enrolment Period according to the weighed average price paid by Participants to acquire the Investment Shares on the market.

All Profit and Loss and Net Equity effects related to ESOP 2009 will be booked as follows:

- during 2010 for Discount Shares;
- during the three-year period 2011-2013 for Matching Shares (or rights to receive them).

ESOP 2009 has not been produced any effect on 2009 Consolidated Financial Statement.

Effects on Profit and Loss

All Share-Based Payment granted after November 7, 2002 which *vesting period* ends after January 1, 2005 are included within the scope of the IFRS2.

Financial liabilities related to Cash-settled payment plans have been recognized if not yet settled on January 1, 2005.

Financial statement presentation related to share based payments (€ thousand)

	2009		2008	
	Total	Vested Plans	Total	Vested Plans
Costs	58,716		-5,146	
- connected to Equity Settled Plans	57,086		53,973	
- connected to Cash Settled Plans ¹	1,630		-59,119	
Debts for Cash Settled Plans	8,617	5,157	7,767	2,836
-of which Intrinsic Value		4,276		1,917

(1) Partly included in "payroll – other staff" in keeping with the recognition of other monetary charges connected to the remuneration of services provided by beneficiaries. The revenues recognized in 2008 arise from the decrease of liabilities related to synthetic cash settled "Share Appreciation Rights" linked to the share-value and performance results of some Group-Companies.

Organizational Structure	478
A – Primary Segment.....	480
B – Secondary Segment	482

Part L – Segment Reporting

Organizational Structure

Disclosure relating to segment reporting reflects the Group's organisational structure¹ by business segments in line with the current practice in management reporting of Group results, as follows: Retail Banking, Corporate & Investment Banking, Private Banking, Asset Management, Central and Eastern Europe (CEE) and Poland's Markets.

Retail

The Retail Banking Strategic Business Area ("SBA" or "Retail SBA") of UniCredit Group aims to satisfy the financial needs of Mass Market, Affluent and Small Business customers in Italy, Germany and Austria by bringing together the Group's experience in the area of retail banking and making it available to serve customers regardless of their geographic location. The Retail SBA includes the three new Italian commercial banks (UniCredit Banca, UniCredit Banca di Roma and Banco di Sicilia), the retail business areas of UniCredit Bank AG in Germany and UniCredit Bank Austria, besides UniCredit Family Financing Bank, a bank specializing in mortgages and consumer credit, which provides the SBA's banks with solutions that meet the many financial requirements of households. Lastly, since May 2009 the Retail SBA has included Asset Gathering, the business area specializing in individual retail customer deposits through the direct channel and a network of financial consultants. Asset gathering operates through FinecoBank in Italy, DAB Bank in Germany and DAT Bank in Austria; these banks offer the banking and investment services of traditional banks, but distinguish themselves for their unique focus on innovation, which is reflected primarily in the development of modern businesses such as online trading.

Corporate & Investment Banking

The Corporate & Investment Banking area, which is the result of the combination of the previous Corporate and MIB divisions, targets corporate and institutional customers that operate (primarily, but not exclusively) in the primary markets where the UniCredit Group has a presence.

Through a broad range of dedicated financial products and services, from traditional lending activities and services that are typical of commercial banking to more complex services with a higher added value (e.g., project finance, acquisition finance and other investment banking services and services to access/operate in international financial markets), CIB supports its customers during the various phases of the business's life by providing support in ordinary corporate activities, in growth and internationalization projects, and lastly, during any restructuring periods.

The strengthening of CIB's position as a European regional specialist in the most advanced global financial markets and investment banking services will enable it to round out the broad range of services it provides to its customers.

Private Banking

The Private Banking business unit primarily targets high-net-worth individuals by providing advisory services and solutions for wealth management using a comprehensive approach. The business unit operates through a network of around 1,200 private bankers located in more than 250 branches in the three main countries (Italy, Germany and Austria), in addition to a selective presence in several offshore European markets (Switzerland, Luxembourg and San Marino).

¹ In late 2008 and early 2009 UniCredit Group made certain changes to its organizational model leading to three Strategic Business Areas (SBA), viz.: (i) Retail, (ii) Corporate & Investment Banking and Private Banking, and (iii) Global Banking Services headed by three Deputy CEOs. The heads of the Business Unit Asset Management and CEE Divisionalization Program (including Poland's Markets) report directly to the CEO.

Asset Management

Asset Management is known for its brand Pioneer Investments, the company within the UniCredit Group operating around the world in the asset management sector and specialising in the management of customer investments.

The business line, a partner of many leading international financial institutions, offers investors a complete range of innovative financial solutions, including mutual funds, hedge funds, assets administration, portfolios for institutional investors and structured products.

Central Eastern Europe

The CEE area comprises the businesses of the Group in the countries of Central and Eastern Europe, with the exception of Poland and Ukraine. The CEE operates in 18 countries: Azerbaijan, Bosnia-Herzegovina, Bulgaria, Czech Republic, Croatia, Estonia, Hungary, Latvia, Lithuania, Romania, Russia, Serbia, Slovakia, Slovenia, Ukraine, Turkey, Kyrgyzstan and Kazakhstan.

Poland's Markets

The Poland's Markets business unit manages the Group's businesses in Poland and Ukraine through UniCredit Bank LTD (Ukraine). The business unit's banks are Bank Pekao in Poland and UniCredit Ukraine Bank in Ukraine.

Results by business segment are disclosed as per the condensed income statement, in line with the Report on Operations.

The business segments' or business lines' income statements were compiled by aggregating the income statements of their constituent subsidiaries or – where a subsidiary operates in more than one segment – of assets, after application of their respective write-downs and adjustment for intercompany transactions. The following rules were applied to determine business segment results for subsidiaries with businesses in more than one segment (viz. UniCredit SpA, Bank Austria AG, UniCredit Bank AG, UniCredit Luxembourg SA, HVB Immobilien AG, HVB Global Asset Company LP, Geldilux SA) whereby indirect items are added to directly attributable income and expense:

- The refinancing cost of loans etc. and revenue from use of funds was determined on the basis of the Internal Transfer Rates defined by the relevant UCG policies.
- Capital was allocated in proportion to risk-weighted assets and remunerated on average at 9.18% after tax.
- Costs borne centrally on behalf of the Business Units were attributed according to actual consumption, and overheads were divided between the Business Units in proportion mainly to their respective direct and indirect costs, with the exception of the Holding's governance costs which remain not allocated.

The comparative figures have been restated to take into account the following changes: transfer of Asset Gathering from Private Banking to Retail, as well as centralization of Corporate Banking and Markets & Investment Banking former divisions into the CIB area.

Please see the Report on Operations for comments on business and results of the business segments.

Annex 4 - Definition of Terms and Acronyms

ABCP Conduits – Asset Backed Commercial Paper Conduits

Asset Backed Commercial Paper Conduits are a type of “SPV - Special Purpose Vehicle” (q.v.) set up to securitize various types of assets and financed by Commercial Paper (q.v.).

Commercial Paper generally matures in 270 days, with payment of principal and interest depending on the cash flow generated by the underlying assets.

ABCP Conduits may be single-sellers or multi-sellers according to the number of issues they make. Conduits generally require several SPVs. The first-level vehicles issue the Commercial Paper and finance one or more second-level vehicles or Purchase Companies (q.v.) which purchase the assets to be securitized.

An ABCP Conduit will have the following:

- issues of short-term paper creating a maturity mismatch between the assets held and the paper issued;
- liquidity lines covering the maturity mismatch; and
- security covering default risk in respect of both specific assets and the entire program.

ABS – Asset Backed Securities

Debt securities, generally issued by a “SPV - Special Purpose Vehicle” (q.v.) guaranteed by assets of various types such as mortgage loans, consumer credits, credit card receivables, etc. Principal and interest payments are subject to the performance of the securitized assets and the existence of any further security guaranteeing the bond. ABSs are divided into tranches (senior, mezzanine and junior) according to the priority with which principal and interest will be paid.

Absorbed capital

Absorbed capital is the capital required to cover business risks. It is the higher between the regulatory capital (which is obtained by multiplying risk-weighted assets by the target core tier 1 ratio) and the internal capital, which represents the total amount of capital the entire Group sets aside as a buffer against potential losses and needs to support its business activities and all positions held. Internal capital is the sum of the aggregated economic capital and a cushion that considers the effects of the cycle and model risk.

Acquisition Finance

Finance for business acquisition operations. The most common form of Acquisition Finance is the leveraged buy-out (see Leveraged Finance).

Affluent

Banking customer segment whose available assets for investment are regarded as moderate to high.

ALM – Asset & Liability Management

Integrated management of assets and liabilities, designed to allocate resources in such a manner as to optimize the risk/return ratio.

ALT-A (residential mortgages)

Mortgages whose borrowers, while not subject to the significant repayment problems of those described as Subprime (q.v.), have a risk profile with high loan-to-value and installment-to-income ratios or incomplete documentation of the debtor's income.

Alternative investment

Alternative investments cover a wide range of forms of investment, including investments in Private Equity (q.v.) and Hedge Funds (q.v.).

Asset allocation

Decisions to invest in markets, geographical areas, sectors or products.

Asset management

Activities of management of the financial investments of third parties.

ATM – Automated Teller Machine

Automated machine that allows customers to carry out operations such as withdrawing cash, paying in cash or checks, requesting account information, paying utility bills, topping up mobile phone credits, etc. The customer activates the terminal by inserting a smart card and entering his/her Personal Identification Number.

Audit

Process of controlling a company's activities and accounting, carried out either by an internal body (internal audit) or by an external firm of auditors (external audit).

Banking book

Used in relation to financial instruments, particularly securities, this term identifies the portion of such portfolios intended for "proprietary" activities.

Basel 2

New international capital agreement redefining the guidelines for determining the minimum capital requirements for banks.

The new prudential regulations, which came into force in Italy in 2008, are based on three pillars.

- **Pillar 1:** while the objective of a level of capitalization equivalent to 8% of the risk-weighted exposures remains unchanged, a new set of rules has been defined for measuring the typical risks associated with banking and financial activities (credit risk, counterparty risk, market risk and operating risk) which provides for alternative calculation methods characterized by different levels of complexity, with the ability to use internally developed models subject to prior authorization by the Regulatory Authority;

- **Pillar 2:** this requires the banks to have processes and tools for determining the adequate level of total internal capital (Internal Capital Adequacy Assessment Process - ICAAP) for covering all types of risk, including risks other than those covered by the overall capital requirement (Pillar 1), within the framework of an evaluation of current and future exposure that takes account of strategies and of changes in the reference context. It is the Regulatory Authority's task to examine the ICAAP process, formulate an overall judgment and, where necessary, apply the appropriate corrective measures;

- **Pillar 3:** this introduces obligations to publish information concerning capital adequacy, exposure to risks, and the general characteristics of the systems used for identifying, measuring and managing those risks.

Best practice

Behavior commensurate with the most significant experience and/or the best level of knowledge achieved in relation to a given technical or professional field.

Budget

Statement forecasting the future costs and revenues of a business.

CBO - Collateralized Bond Obligations

CDO - Collateralized Debt Obligations (q.v.) with bonds as underlyings.

CCF - Credit Conversion Factor

Ratio between (a) the unused portion of the line of credit that it is estimated may be used in the event of default and (b) the portion currently unused.

CDO - Collateralized Debt Obligations

Bonds issued by a vehicle with loans, bonds, ABS - Asset Backed Securities (q.v.) or other CDOs as underlyings. CDOs make it possible to derecognize assets in the bank's balance sheet and also to arbitrage the differences in yield between the securitized assets and the bonds issued by the vehicle.

CDOs may be funded if the vehicle legally acquires title to the assets or unfunded if the vehicle acquires the underlying risk by means of a CDS - Credit Default Swap (q.v.) or similar security.

These bonds may be further subdivided as follows:

- **CDOs of ABSs**, which in turn have tranches of ABSs as underlyings
- **Commercial Real Estate CDOs (CRE CDOs)**, with commercial property loans as underlyings
- **Balance Sheet CDOs** which enable the Originator (q.v.), usually a bank, to transfer its credit risk to outside investors, and, where possible under local law and supervisory regulations, to derecognize the assets from its balance sheet
- **Market Value CDOs** whereby payments of interest and principal are made not only out of cash flow from the underlying assets, but also by trading the instruments. The performance of the notes issued by the vehicle thus depends not only on the credit risk, but also on the market value of the underlyings
- **Preferred Stock CDOs** with hybrid debt/equity instruments or Preference shares (q.v.) issued by financial institutions
- **Synthetic Arbitrage CDOs** which arbitrage the differences in yield between the securitized assets acquired synthetically by means of derivatives and the bonds issued by the vehicle.

CDS - Credit Default Swap

A derivative in which a seller of protection engages, for a fee, to pay the buyer of protection a fixed amount should a certain event indicating a deterioration of the creditworthiness of a reference entity occur.

CGU - Cash Generating Unit

A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.

CLO - Collateralized Loan Obligations

CDO - Collateralized Debt Obligations (q.v.) with loans made by authorized lenders such as commercial banks as underlyings.

CMBS - Commercial Mortgage Backed Securities

ABS - Asset Backed Securities (q.v.) with commercial mortgages as underlyings.

Commercial Paper

Short-term securities issued to raise funds from third-party subscribers as an alternative to other forms of debt.

Consumer ABS

ABS (q.v.) in which the collateral consists of consumer credits.

Core Tier 1 Capital

Tier 1 Capital (q.v.), net of hybrid instruments. It is the bank's tangible capital.

Core Tier 1 Capital Ratio

Indicates ratio between the bank's Core Tier 1 Capital and its risk-weighted assets (see the Glossary entry "RWA").

Corporate

Customer segment consisting of medium to large businesses.

Cost/Income Ratio

The ratio between operating expenses and operating income. It is one of the main key performance indicators of the bank's efficiency: the lower the ratio, the more efficient the bank.

Cost of risk

The ratio between loan loss provisions and loans and receivables with customers. It is one of the indicators of the bank assets' level of risk: the lower the ratio, the less risky the bank assets.

Covered bond

A bond which, as well as being guaranteed by the issuing bank, may also be covered by a portfolio of mortgages or other high-quality loans transferred, to this end, to a suitable SPV – Special Purpose Vehicle (q.v.).

Credit risk

The risk that an unexpected change in the creditworthiness of a counterparty, the value of the guarantees provided by it or the margins used by it in the event of insolvency might produce an unexpected change in the value of the bank's credit position.

Covenant

A loan agreement clause whereby the lender is entitled to restructure or call in the loan on occurrence of the events specified in the clause, which ties changes in the borrower's profits and financial situation to events of default or restructuring (modifying e.g. the repayment schedule or the interest rate charged).

Default

A party's declared inability to honor its debts and/or the payment of the associated interest.

Deteriorated credits

Credits are subjected to periodic examination in order to identify those which, following events occurring after their entry in the accounts (at the market value, normally equal to the disbursed amount including the transaction costs and revenues directly attributable to the provision of the credit), show objective signs of a possible loss of value. This category includes credits that have been classed as bad, doubtful, restructured or overdue, in accordance with the Banca d'Italia rules consistent with IAS/IFRS (q.v.).

Duration

This is generally calculated as the weighted average of the maturities for payment of the interest and capital associated with a bond, and represents an indicator of the interest rate risk to which a security or a bond portfolio is subject.

EAD – Exposure at Default

Relating to the on-balance and off-balance sheet positions, EAD is defined as the estimation of the future value of an exposure at the time of the debtor's default. Only banks that meet the requirements for adopting the IRB – Internal Rating Based (q.v.) advanced approach are allowed to estimate EAD (q.v.). Other banks are required to refer to regulatory estimations.

Economic capital

Capital level that is required to cover the bank's losses that may occur with at a time horizon of one year and a certain probability or confidence level. Economic Capital is a measure of the variability of the Expected Loss of the portfolio and depends on the degree of diversification of the portfolio itself.

EPS - Earnings Per Share

An indicator of a company's profitability calculated as: Net Profit divided by Average total outstanding shares (excluding treasury shares)

EVA - Economic Value Added

Expresses the ability to create value in monetary terms. EVA is equal to the difference between the Net Operating Profit After Tax NOPAT – Net Operating Profit After Tax (q.v.) and the cost of the invested capital.

Factoring

Contract for the sale without recourse (with credit risk borne by the buyer) or with recourse (with credit risk borne by the seller) of commercial credits to banks or specialist companies, for the purposes of management and collection. May be associated with financing in favor of the seller.

Fair value

The sum for which, in a freely competitive market, an item can be exchanged or a liability extinguished between aware and independent parties.

FINREP

Document issued by the Committee of European Banking Supervisors (CEBS). The Committee gives advice to the European Commission on policy and regulatory issues related to banking supervision; it also promotes cooperation and convergence of supervisory practice across the European Union. The objective of FINREP is to provide guidelines for implementation of the consolidated Financial Reporting framework for supervisory purposes; it is based on International Financial Reporting Standards (IFRSs).

Forwards

Forward contracts on interest rates, exchange rates or share indices, generally traded on "OTC - Over-the-Counter" (q.v.) markets, in which the conditions are fixed when the contract is agreed but execution will take place at a predetermined future date, by means of the collection or payment of differentials calculated with reference to various parameters according to the subject of the contract.

FRA – Forward Rate Agreement

Contract whereby the parties agree to receive (pay) at maturity the difference between the value calculated by applying a predetermined interest rate to the transaction amount and the value obtained on the basis of the level reached by a reference rate preselected by the parties.

FTE - Full Time Equivalent

The number of a company's full-time employees. Part-time employees are considered on a pro-rata temporis basis.

Funding

Provision, in various forms, of the funds necessary to finance business activities or particular financial transactions.

Futures

Standardized contracts whereby the parties undertake to exchange money, transferable securities or goods at a preset price at a future date. These contracts are traded on regulated markets, where their execution is guaranteed.

Goodwill

The additional sum paid for the acquisition of an equity interest, equal to the difference between the cost and the corresponding share of net assets, for the portion not attributable to the identifiable assets of the acquired company.

Hedge Fund

Speculative mutual investment fund adopting hedging techniques which generally are not used by ordinary mutual funds, in order to deliver a constant performance, which is only hardly linked to reference markets. Hedge Funds are distinguished by a limited number of partners and require a high minimum level of investment.

IAS/IFRS

International accounting standards issued by the International Accounting Standard Board (IASB), a private international body established in April 2001, involving representatives of the accounting professions of the principal countries and, as observers, the European Union, IOSCO (International Organization of Securities Commissions) and the Basel Committee. This body is the successor of the International Accounting Standards Committee (IASC), set up in 1973 to promote harmonization of the rules for the preparation of company accounts. When the IASC became the IASB, it was decided, among other things, to name the new accounting principles "International Financial Reporting Standards" (IFRS). At international level, work is currently underway to harmonize the IAS/IFRS with the US GAAP – United States Generally Accepted Accounting Principles (q.v.).

ICAAP – Internal Capital Adequacy Assessment Process

See "Basel 2 – Pillar 2".

Impairment

Within the framework of the IAS/IFRS (q.v.), this refers to the loss of value of a balance sheet asset, recorded when the balance sheet value is greater than the recoverable value, i.e. the sum that can be obtained by selling or using the asset.

Index linked

Policies whose performance at maturity depends on a benchmark parameter that may be a share index, a basket of securities or another indicator.

Investment banking

Banking segment devoted to the subscription and placement of newly issued securities, as well as the trading of financial instruments.

Investor

Any entity other than the Sponsor (q.v.) or Originator (q.v.) with exposure to a securitization.

IRB – Internal Rating Based

Method for determining the capital needed to cover credit risk within the framework of Pillar 1 of Basel 2 (q.v.). The rules are applied to the exposures of the banking portfolio. Furthermore, in the IRB methods the risk weightings of the assets are determined on the basis of the bank's own internal evaluations of the debtors (or, in some cases, of the transactions). Using systems based on internal ratings, the banks determine the weighted risk exposure. The IRB methods consist of a basic method and an advanced method, which differ in terms of the risk parameters that the bank must estimate: in the basic method, the banks use their own estimates for "PD – Probability of Default" and the regulatory values for the other risk parameters; in the advanced method, the banks use their own estimates for "PD – Probability of Default", "LGD – Loss Given Default", "CCF – Credit Conversion Factors" and, where provided for, "M - Maturity" (q.v.). The use of IRB methods for the calculation of capital requirements is subject to authorization from Banca d'Italia.

IRS – Interest Rate Swap

See "Swap".

Joint venture

Agreement between two or more companies for the conduct of a given economic activity, usually through the constitution of a joint stock company.

Junior, Mezzanine and Senior exposures

In a securitization transaction, the exposures may be classified as follows:

- **junior** exposures are the last to be repaid, and consequently absorb the first loss produced by the securitization transaction;
- **mezzanine** exposures are those with medium repayment priority, between senior and junior;
- **senior** exposures are the first to be repaid.

Ke

The cost of equity is the minimum return on investment required by the shareholder. It is the sum of a risk-free rate and an additional spread remunerating the shareholder for the credit risk and the volatility of the share price. The cost of capital is based on medium-long term averages of market parameters.

Lead Arranger

The bank responsible for arranging a securitization. The arranger's duties include checking the quality and quantity of the assets to be securitized, conducting relations with rating agencies, drawing up the prospectus and dealing with accounting and legal problems.

Leasing

Contract whereby one party (the lessor) grants to another party (the lessee) for a given period of time the enjoyment of an asset purchased or built by the lessor at the choice and on the instructions of the lessee, with the latter having the option of acquiring ownership of the asset under predetermined conditions at the end of the leasing contract.

Leveraged Finance

Loans provided mainly to Private Equity funds in order to finance the acquisition of a company through a financial transaction based on the cash flow generation capacity of such target company. This can result in a higher level of debt and therefore a higher level of risk. Leveraged finance may be syndicated.

LGD – Loss Given Default

Expected value (which may be conditional upon adverse scenarios) of the ratio, expressed as a percentage, between the loss giving rise to the default and the amount of exposure at the time of the default ("EAD - Exposure At Default", q.v.).

Liquidity risk

The risk of the company being unable to meet its payment commitments due to the inability to mobilize assets or obtain adequate funding from the market (funding liquidity risk) or due to the difficulty/impossibility of easily liquidating positions in financial assets without significantly and unfavorably affecting the price because of insufficient depth or temporary malfunction of the financial market (market liquidity risk).

Mark-up

Positive differential with respect to a benchmark index, generally an interbank rate, applied to the lending rate offered to customers.

Market risk

The effect that changes in market variables might have on the economic value of the Group's portfolio, where this includes both the assets held in the trading book and those entered in the banking book, or the operations connected with the characteristic management of the commercial bank and its strategic investment choices.

M – Maturity

The average, for a given exposure, of the residual contractual maturities, each weighted for the relevant amount.

Medium Term Note

Bond with a maturity of between 5 and 10 years.

Merchant banking

This term covers activities such as the subscription of securities - shares or debt instruments - by corporate customers for subsequent placement on the market, the taking of more permanent equity interests but always with a view to subsequent disposal, and the conduct of business consultancy activities for the purposes of mergers and acquisitions or restructurings.

Monoline Insurers

Insurance companies that insure only one kind of risk. Against payment of premium they guarantee the repayment of principal and interest of bonds – usually “ABS - Asset Backed Securities” (q.v.) or US municipal bonds – on default by the issuer, which enables the guaranteed bond to obtain a better rating than similar unguaranteed issues.

NOPAT – Net Operating Profit After Tax

Net operating profit remaining after the deduction of taxes.

Operating risk

The risk of losses due to errors, violations, interruptions, damages caused by internal processes, personnel or systems, or by external events. This definition includes legal and compliance risk, but excludes strategic and reputational risk.

For example, operating risks include losses deriving from internal or external fraud, employment contracts and employment protection regulations, customer claims, distribution of products, fines and other sanctions arising from breaches of regulations, damages to the company's assets, interruption of operations, malfunction of systems and the management of processes.

Option

The right, but not the commitment, acquired by the payment of a premium, to buy (call option) or sell (put option) a financial instrument at a given price (strike price) by or at a determined future date (American option / European option).

Originator

The entity that originated the assets to be securitized or acquired them from others.

OTC – Over the counter

Over-the-counter (OTC) trading consists of the exchange of financial instruments such as shares, bonds, derivatives or goods directly between two counterparties. The OTC markets do not have standardized contracts or buying/selling procedures and are not associated with a set of rules (admissions, controls, obligations of information, etc.) like those that govern the official markets.

Overcollateralization

The value of the assets underlying the bonds issued is higher than the amount of the bonds.

Payout ratio

Indicates the percentage of net income that is distributed to shareholders. The percentage distributed is determined mainly on the basis of the company's self-financing needs and the return expected by shareholders.

PD – Probability of Default

Probability of a counterparty entering into a situation of "default" (q.v.) within a time horizon of one year.

Preference shares

Capital instruments that associate forms of remuneration tied to market rates with particularly pronounced subordination conditions, such as non-recovery in subsequent years of the interest not paid by the bank and bearing a share of its losses in the event that these produce a significant reduction in the capital requirements. The regulatory authorities set the conditions under which preference shares may be counted among the core capital of banks and banking groups.

Private banking

Financial services aimed at so-called "high-end" private customers for the global management of financial needs.

Private equity

Investments in the risk capital of companies, generally unlisted but with high growth potential and the ability to generate constant cash flows. Investments in private equity include a wide range of operations that vary according to both the development phase of the company concerned and the investment techniques used. These techniques include closed-end private equity funds.

Purchase Companies

Vehicle used by "ABCP Conduits – Asset Backed Commercial Paper Conduits" (q.v.) to purchase the assets to be securitized and subsequently financed by the Conduit vehicle by means of commercial paper.

RARORAC – Risk Adjusted Return On Risk Adjusted Capital

This is the ratio between EVA – Economic Value Added" (q.v.) and allocated/absorbed capital and represents the value created per each unit of risk taken.

Rating

Evaluation of the quality of a company or its issues of debt securities on the basis of the company's financial soundness and prospects. This evaluation is made either by specialist agencies or by the bank on the basis of internal models.

Retail

Customer segment consisting principally of private individuals, self-employed professionals, traders and artisans.

RMBS - Residential Mortgage Backed Securities

Asset Backed Securities (q.v.) with residential mortgages as underlyings.

RWA - Risk Weighted Assets

On-balance sheet assets and off-balance sheet assets (derivatives and guarantees) classified and weighted by different coefficients referring to risks, following banking rules issued by local Supervisors (i.e. Banca d'Italia, Bafin, etc.), to calculate solvency ratios.

Securitization

Transfer of a portfolio of assets to a “SPV - Special Purpose Vehicle” (q.v.) and the issue of securities with various levels of seniority to meet any default by the underlying assets.

Securitizedizations can be:

- **traditional**: method of securitization whereby transfer of the assets is by means of sale of the portfolio to the “SPV - Special Purpose Vehicle” (q.v.).
- **synthetic**: method of securitization whereby the transfer of assets is by means of credit derivatives or similar security enabling the risk of the portfolio to be transferred.

Sensitivity

The greater or lesser degree of sensitivity with which certain assets or liabilities react to changes in rates or other reference parameters.

Sponsor

An entity other than the Originator (q.v.) which sets up and manages an ABCP conduit or other securitization scheme where assets are acquired from a third entity for securitization.

SPV - Special Purpose Vehicles

An entity – partnership, limited company or trust – set up to carry out a set object, such as isolating financial risk or obtaining special regulatory or tax treatment for specific portfolios of financial assets.

SPV's operations are accordingly limited by a set of rules designed for this purpose.

In general SPVs' sponsors (q.v.) do not hold equity in them. The equity is held by other entities in order to ensure that there is no shareholder relationship with the Sponsor (q.v.). SPVs are usually bankruptcy-remote, in that their assets cannot be claimed by the creditors of the sponsor, even if the latter becomes insolvent.

Subprime (Residential Mortgages)

Although Subprime has no univocal definition, this category includes mortgages granted to borrowers who have had repayment difficulties in the past, e.g. delayed installments, insolvency or bankruptcy, or who are more likely to default than the average due to high loan-to-value and installment-to-income ratios.

Swap

A transaction that generally consists of the exchange of financial streams between operators according to different contractual arrangements.

In the case of an interest rate swap (IRS), the counterparties exchange payment streams that may or may not be linked to interest rates, calculated on a notional principal amount (for example, one counterparty pays a stream on the basis of a fixed rate, while the other does so on the basis of a variable rate).

In the case of a currency swap, the counterparties exchange specific amounts in two different currencies, with these amounts being exchanged back in due course according to predefined arrangements that may concern both the capital (notional) and the streams of interest payments.

Tier 1 Capital

The most reliable and liquid part of a bank's capital, as defined by regulatory rules.

Tier 1 Capital Ratio

The percentage of a bank's Tier 1 Capital to its risk weighted assets "RWA – Risk Weighted Assets" (q.v.).

UCI – Undertaking for Collective Investment

This term includes "UCITS" (q.v.) and other collective investment Funds (real estate collective investment funds, closed-end investment funds).

UCITS – Undertaking for Collective Investment in Transferable Securities

This term covers open-end real estate investment funds, both Italian and foreign, and investment companies with variable capital. The latter are joint stock companies that have the sole purpose of collective investment of the assets gathered through a public offer of their own shares.

US GAAP – United States Generally Accepted Accounting Principles

Accounting principles issued by the FASB (Financial Accounting Statement Board), generally accepted in the USA.

VaR - Value at Risk

A method used for quantifying risk. It measures potential future losses which will not be exceeded within a specified period and with a specified probability.

Vintage

The year of issue of the collateral underlying bonds created by securitization. In the case of subprime mortgages this information is an indicator of the riskiness of the bond, since the practice of granting mortgages to subprime borrowers became significant in the US starting in 2005.

Warehousing

A stage in the preparation of a securitization transaction whereby an "SPV – Special Purpose Vehicle" (q.v.) acquires assets for a certain period of time until it reaches a sufficient quantity to be able to issue an ABS.

Jerzy Owskiak,
The Great Orchestra of Christmas
Charity Foundation
Corporate Banking Client - Poland

«**W**hen the climax of the Great Orchestra of Christmas Charity gets under way, some 120,000 volunteers take to the streets of cities, towns and villages. Their donation boxes fill up in an absolutely magical way. Everybody knows we raise money to buy life-saving medical equipment. Sometimes people wonder if their spare change can really help. But of course that is exactly how millions of Poles join to make this happen. But before we can put that spare change to use, it all has to be counted and deposited to our accounts. Sorting, counting, balancing and managing our accounts - by doing these things, Bank Pekao SA helps us immensely and makes our job that much easier.»

It's easy with UniCredit.

Consolidated Financial Statements
Certification pursuant to art. 81-ter of
Consob Regulation no. 11971 of May 14,
1999, as amended

Certification pursuant to art. 81-ter of Consob Regulation no. 11971 of
May 14, 1999, as amended

541

Consolidated Financial Statements Certification pursuant to art. 81-ter of Consob Regulation no. 11971 of May 14, 1999, as amended

1. The undersigned Alessandro Profumo (as Chief Executive Officer) and Marina Natale (as the Manager Charged with preparing the financial reports), of UniCredit SpA, taking into consideration Art. 154-bis (subparagraph 3 and 4) of Italian Legislative Decree February 24th 1998 n.58, do hereby certify:

- the adequacy in relation to the Legal Entity features and
- the actual application

of the administrative and accounting procedures employed to draw up 2009 Consolidated Financial Statements.

2. The adequacy of administrative and accounting procedures employed to draw up 2009 Consolidated Financial Statements has been evaluated applying a Model defined by UniCredit SpA coherent with "Internal Controls – Integrated Framework" (CoSO) and "Control Objective for IT and Related Technologies" (Cobit), which represent international commonly accepted standards for internal control system.

3. The undersigned also certify that:

3.1 The 2009 Consolidated Financial Statements:

- a) were prepared in compliance with applicable international accounting standards recognized by the European Community pursuant to European Parliament and Council Regulation no.1606/2002 of 19 July 2002;
- b) correspond to results of the books and accounts records;
- c) were prepared according to Art. 9 of the Legislative Decree N.38/05 and are suitable to provide a fair and correct representation of the situation of the assets and liabilities, the economic and financial situation of the issuer and the group of companies included in the scope of consolidation.

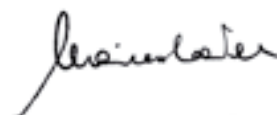

3.2 The report on operations shall contain a reliable analysis of the trend and operating results, as well as whole situation of the issuer and of the Legal Entities included in the scope of consolidation, together with a description of the main risks and uncertainties they are exposed.

Milan, March 16, 2010

Alessandro Profumo

(Translation from the Italian original which remains the definitive version)

Report of the auditors in accordance with article 156 of Legislative decree no. 58 of 24 February 1998

To the shareholders of
UniCredit S.p.A.

- 1 We have audited the consolidated financial statements of the UniCredit Group as at and for the year ended 31 December 2009, comprising the balance sheet, income statement, statement of comprehensive income, statement of changes in equity, statement of cash flows and notes thereto. The parent's directors are responsible for the preparation of these financial statements in accordance with the International Financial Reporting Standards endorsed by the European Union and the Italian regulations implementing article 9 of Legislative decree no. 38/05. Our responsibility is to express an opinion on these financial statements based on our audit.
- 2 We conducted our audit in accordance with the auditing standards recommended by Consob, the Italian Commission for Listed Companies and the Stock Exchange. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and are, as a whole, reliable. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by directors. We believe that our audit provides a reasonable basis for our opinion.

The consolidated financial statements present the prior year corresponding figures for comparative purposes. As disclosed in the notes, the parent's directors restated some of the corresponding figures included in the prior year consolidated financial statements. We audited such financial statements and issued our report thereon on 9 April 2009. We have examined the methods used to restate the prior year corresponding figures and related disclosures for the purposes of expressing an opinion on the consolidated financial statements at 31 December 2009.

- 3 In our opinion, the consolidated financial statements of the UniCredit Group as at and for the year ended 31 December 2009 comply with the International Financial Reporting Standards endorsed by the European Union and the Italian regulations implementing article 9 of Legislative decree no. 38/05. Therefore, they are clearly stated and give a true

and fair view of the financial position of the UniCredit Group as at 31 December 2009, the results of its operations and its cash flows for the year then ended.

- 4 The directors of UniCredit S.p.A. are responsible for the preparation of a report on operations and a report on the corporate governance and shareholding structure, published in the "Governance" section of UniCredit S.p.A.'s website, in accordance with the applicable laws and regulations. Our responsibility is to express an opinion on the consistency of the report on operations and the information required by article 123-bis.1.c/d/f/l/m and article 123-bis.2.b of Legislative decree no. 58/98 disclosed in the report on the corporate governance and shareholding structure with the financial statements to which they refer, as required by the law. For this purpose, we have performed the procedures required by the Italian Standard on Auditing 001 issued by the Italian Accounting Profession and recommended by Consob. In our opinion, the report on operations and the information required by article 123-bis.1.c/d/f/l/m and article 123-bis.2.b of Legislative decree no. 58/98 disclosed in the report on the corporate governance and shareholding structure are consistent with the consolidated financial statements of the UniCredit Group as at and for the year ended 31 December 2009.
