Fast and Easy
waiting list displays

QueueIt! from Best Wave is the quickest, easiest, and least expensive way to deploy visual waiting time information. With **QueueIt!** you simply add people to the queue and check them off when they are served. Every guest knows where they are in the list, and approximately how long they have to wait. Supports one or more simultaneous waiting lists.

COMPATABILITY

ViewSonic EP1020r wireless 10" LCD Digital Signboard or NMP-560 media player with any size screen. **_IAdea_** XDS-101 and XDS-104 10" XDS-151 15" Digital Signboards, XMP-120, XMP-130, XMP-320 and XMP-330 HD media players. SMIL compatible media players.

Most computers, mobile devices and network-ready LCD screens with a web browser.

Most commercial LCD screens with a USB port and the ability to play JPG images.

SIMPLICITY
Just enter a guest name and click Add. When the guest is served, highlight their name in the waiting list and click Remove. That's it!

AUTOMATIC WAIT TIME CALCULATION
As guests are served, **QueueIt!** calculates how long it took to serve them and re-calculates the average wait time. Each waiting list has its own average, and more recent service times are weighted higher in the calculation. All of your guests have a reasonable expectation of their wait time.

STOPS ANNOYING DISRUPTIONS
Your host team will appreciate not being continually interrupted by guests asking where they are on the waiting list.

MOVE PRIORITY GUESTS UP
QueueIt! routinely moves guests up one position in the list as the previous guest is served. Your host staff can also select a guest and move them up or down in the list or remove them at once should the need arise.

ANY NUMBER OF QUEUE DISPLAYS
QueueIt! can handle any number of displays networked to your central server. The displays "pull" content, so there is virtually no limit to the number of queues managed.

SIMPLE FORMATTING
Formatting the look of your waiting lists is as simple as clicking on a line of text and typing. You set the Title, Sub-Title and Footer text.

FONT FLEXIBILITY
Each text line is set to any Font, Style, and size you want, including your Corporate font.

BACKGROUNDS
QueueIt! includes 60 sample backgrounds that you can use as-is, or modify to fit your corporate color scheme. Or, incorporate backgrounds created by your art department for the ultimate in design flexibility.

DATE AND TIME
You may add the date in short or long format or the current time to the Title, Sub-Title, or Footer line on any waiting list.

LOTS OF ROOM
QueueIt! can display up to 16 guest names on each of 2 screens, for a total of 32 guests per waiting list!

ALL QUEUES DISPLAY
In addition to individual screens for each waiting list, you can display the combined waiting list on a single display. **QueueIt!** builds a composite agenda automatically.

VIEW WHAT IS BEING SHOWN
QueueIt! has a viewing area where you may select a queue name from a pop-up menu and see what is currently being displayed. Anyone in your office may view any queue via a web browser on their computer.

DATA ENTRY ONLY
There are two versions of **QueueIt!** One allows formatting, adding new waiting lists, and other administrative functions. The other only allows waiting list management - and is intended for the host staff.

QueueIt!®

DisplayIt! Xpress Software	**Part No.**	**Price**
DisplayIt! Xpress	DI-081	$400 each

DisplayIt! Xpress PC w/Software	**Part No.**	**Price**
DisplayIt! Xpress on an Azulle HDMI Access Plus computer with Windows 10 Home, Ethernet port, and built-in WiFi.	DI-085	$499 each
