ENG

Corporate Social Responsibility

With deep-rooted commitment to our people and our planet, Dümmen Orange is uniting the world through the language of flowers.

COMMUNITY INVOLVEMENT

Over 15 local projects worldwide ranging from shoes for schools, to toys for children

31 million liters of fresh water provided to African staff and their families at home

Free tree seedlings provided to our staff in El Salvador to promote reforestation in their community

WORKING CONDITIONS

1.5 million free meals served to staff in Africa and Latin America

EUR 1 million in donations for education and culture committed over 3 years, including our US-scholarship

Free health care benefits for staff and their families on our farms in Africa and Latin America, including daycare, vaccinations, HIV tests and support

ENVIRONMENT

70% reduction of toxic load due to our new GreenGuard policy

31,000 additional trees planted worldwide because of our commitment to reforestation

13.5 ha of land restored worldwide because of rehabilitation of local environments

TRANSPARENCY

Over 90 audits passed worldwide

Certifications received from global institutions, including MPS and Fairtrade

SUCCULENTS

Echeveria

The plant grows in a rosette with beautiful and varied leaf shapes. Leaves are fleshy with a waxy layer. Leaf colours come in a wide range. Prefers well drained soil and high light intensity. Plants grown under high light and low water conditions will show the strongest colour expression. After a rain shower, droplets of water may remain in the heart of the plant, like a pearl. Dümmer Orange offers a very wide selection of varieties including the Ubink-range

SUCCULENT PRODUCTION CYCLE

HOW OUR PRODUCT LIFE CYCLE WORKS

To produce the best succulent cuttings for your business and market, Dümme Orange works closely with dedicated production farms to align on cutting specifications, packaging and labelling. The cornerstones of quality cutting supply are our four farms.

GUATEMALA & COSTA RICA

Antigua Flowers, Guatemala – This Dümme Orange-owned farm is located close to the ancient city of Antigua and produces mainly Echeveria, Gasteria and Haworthia.

Floramo, Costa Rica – Just an hour from the city of San Jose, this farm produces mainly Echeveria cuttings. The local climate guarantees healthy and strong vegetative cuttings.

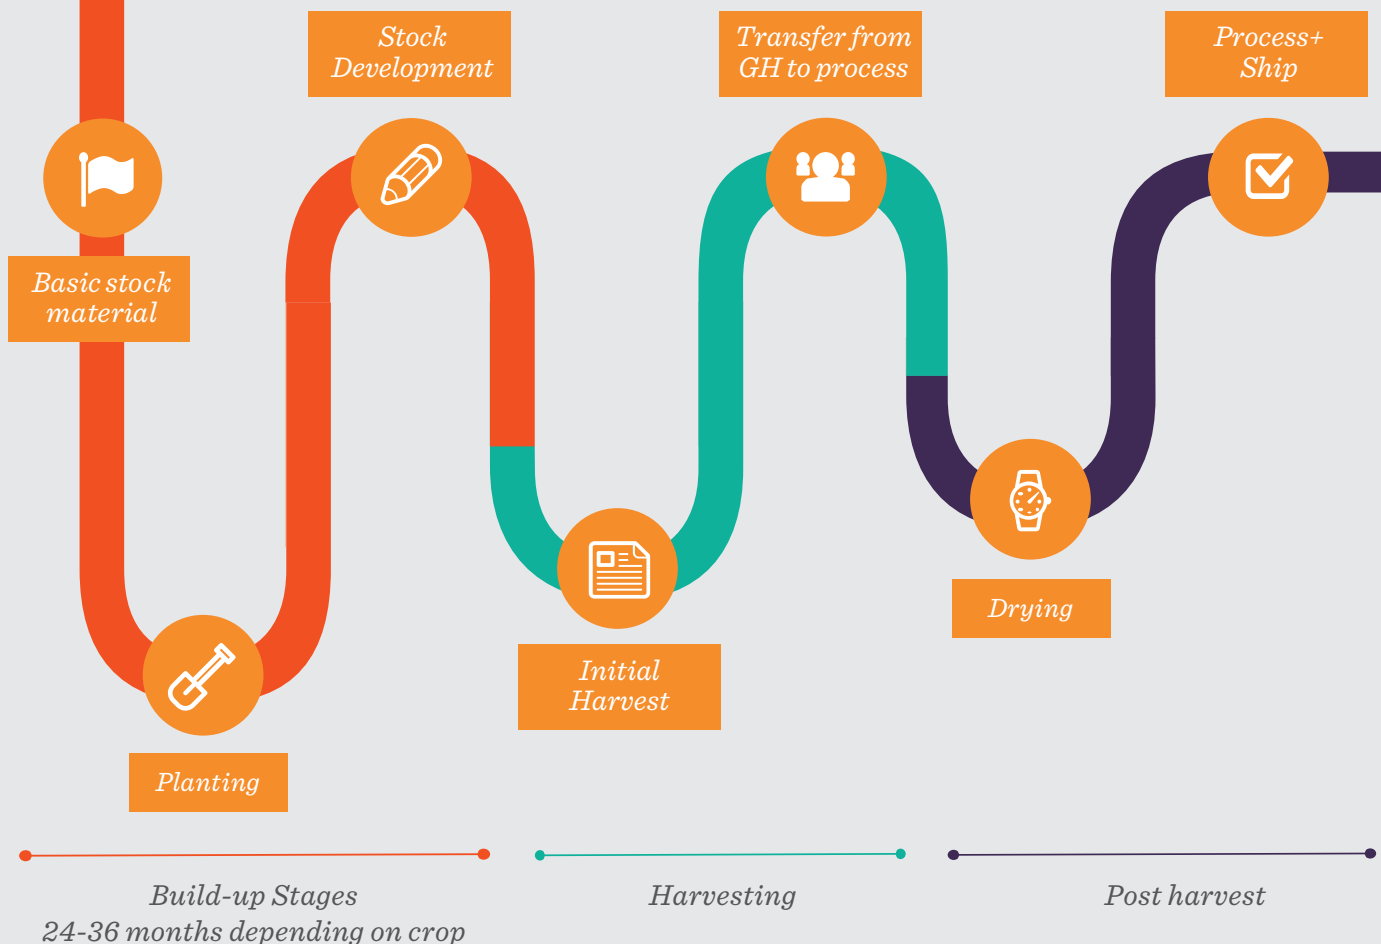

ZIMBABWE

Zimflora, Zimbabwe – Producer of a very wide and diverse assortment including Aloe, Crassula, Echeveria, Haworthia and Gasteria. The dry and consistent climate, as well as ideal production infrastructure, ensures sturdy, compact and colourful cuttings.

INDONESIA

Florion, Indonesia – On the island of Java, Indonesia, the company produces Dümme Orange's Euphorbia milii, Tradescantia 'Nanouk' and Saintpaulia products.

SUCCULENTS

Haworthia

Dark green sturdy leaves. Smooth skin in some cases, but most varieties are covered with decorative white markings. Extremely hardy plants that thrive with limited watering over extended periods. This make them ideal as low-care house plants. Most popular varieties include Barcelona and Concolor

EPIPHYLLUM

ANGULIGER

DISCOVER OUR HIGHLIGHT

Known as the fishbone cactus. This epiphytic cactus has a smooth green skin and long branched stems. When you're lucky, you can see Epiphyllum blooming with its white flowers that exude a strong, sweet scent. Without flowers, the plant also has great decorative value due to the serrated stems. This variety is very suitable for cultivation in hanging baskets
