

S P E R M A T O G E N E S I S

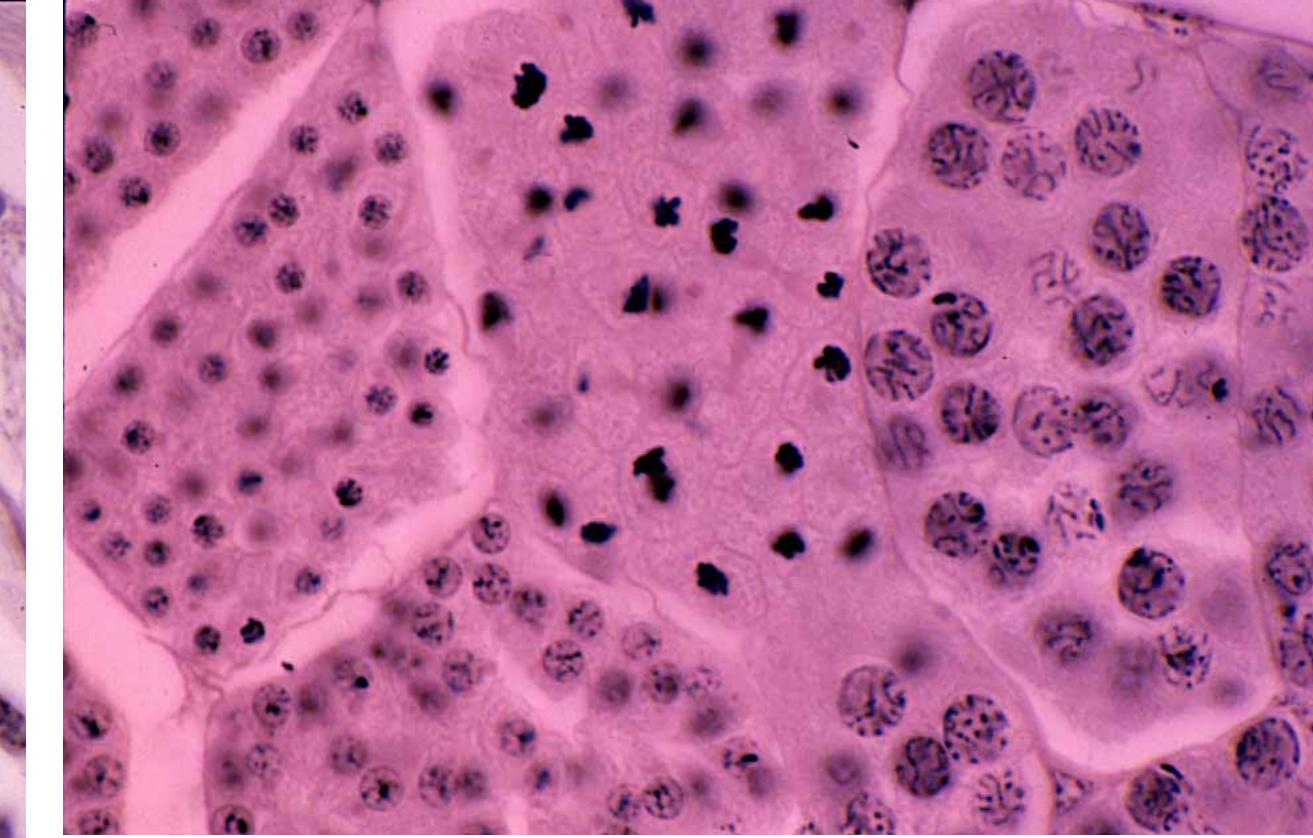

L.S. of grasshopper (Orthoptera:
Acrididae) sperm tubes

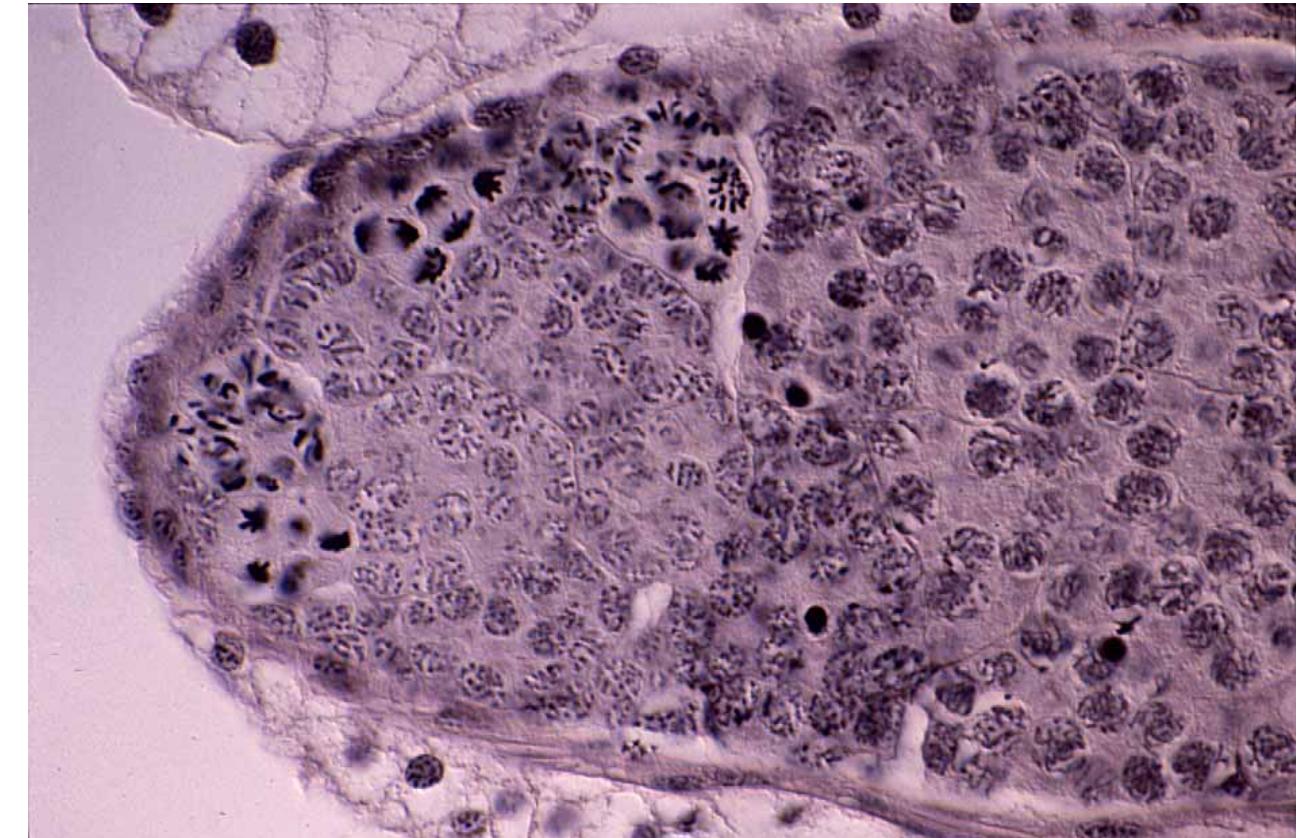

Apex of grasshopper sperm tube

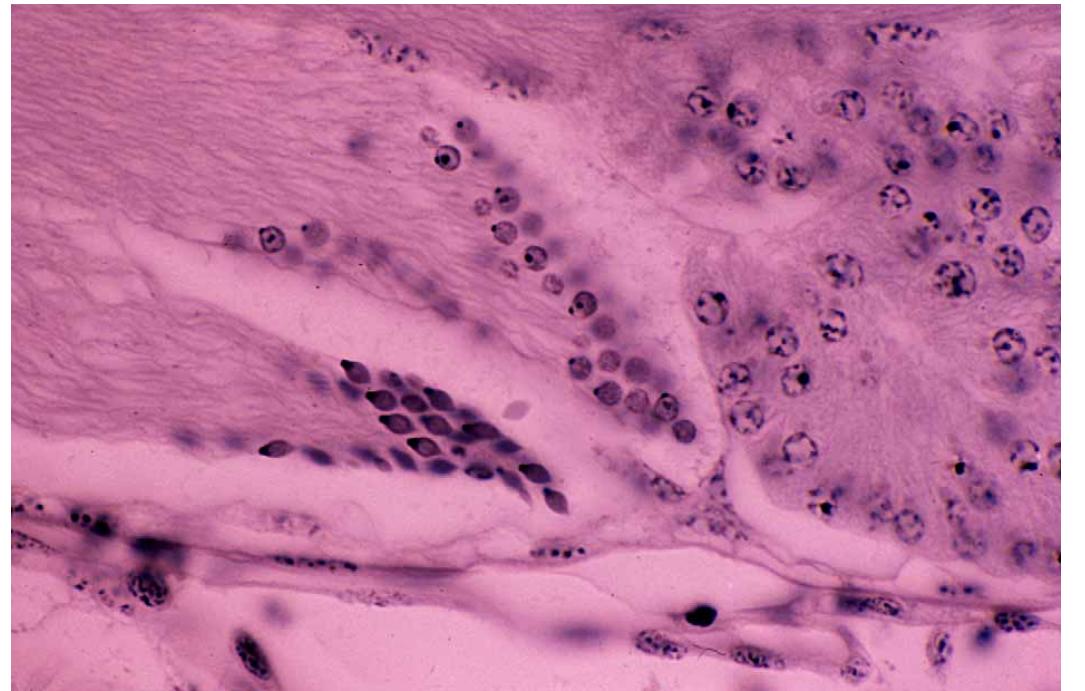

Cysts in grasshopper sperm tube

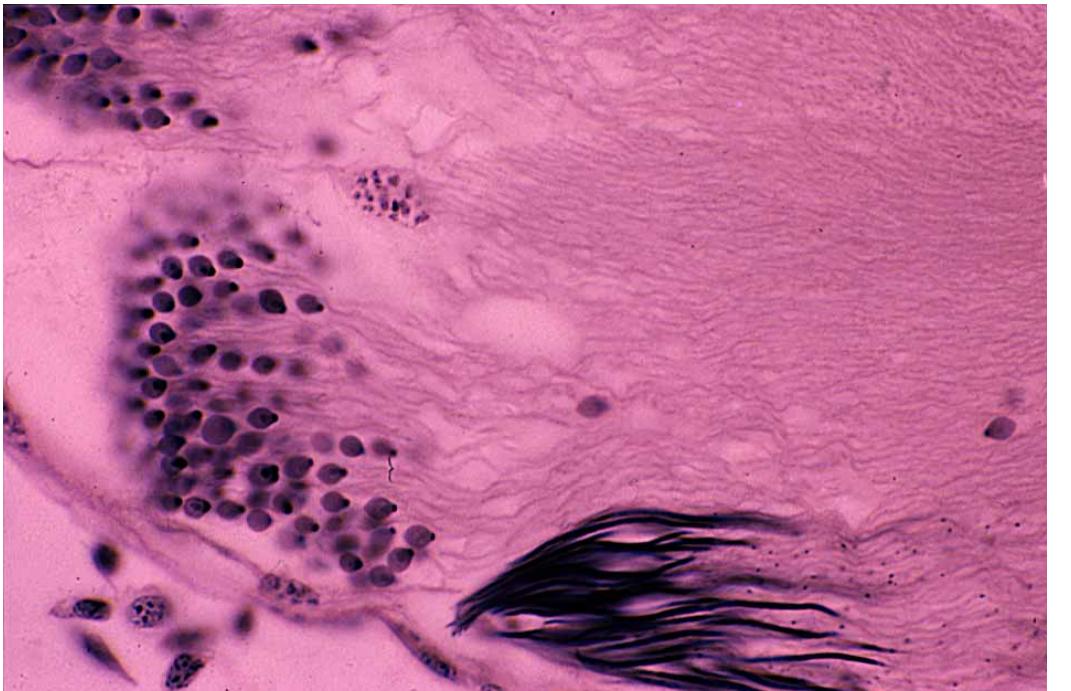

Cysts in grasshopper sperm tube

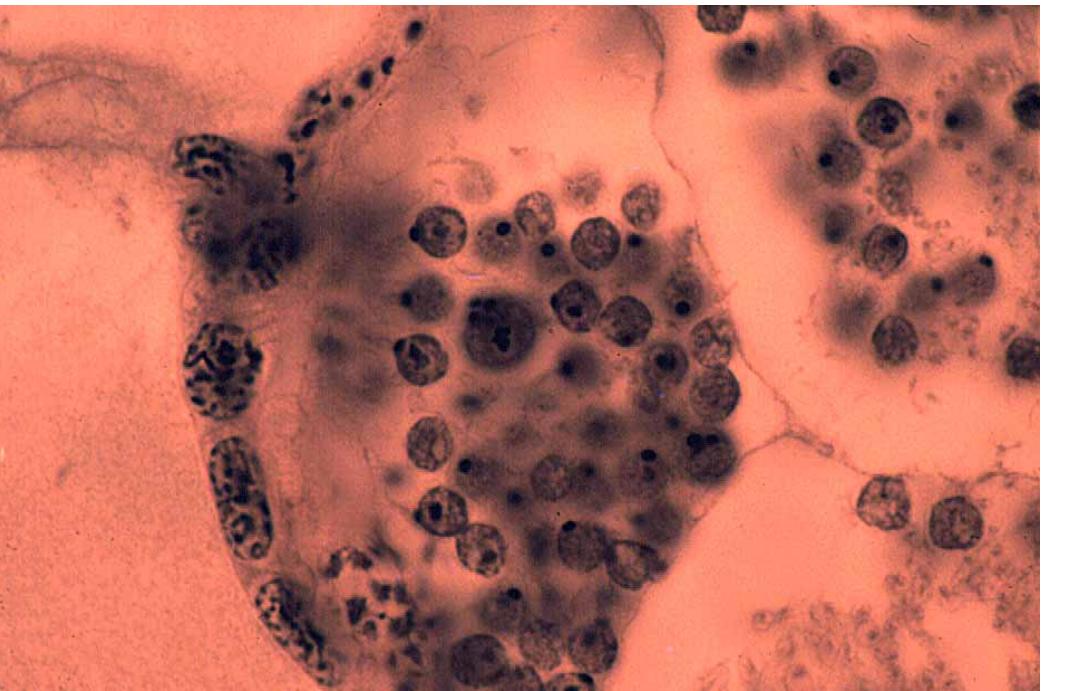

Grasshopper spermatogonial
cysts

Grasshopper spermatid
bundles

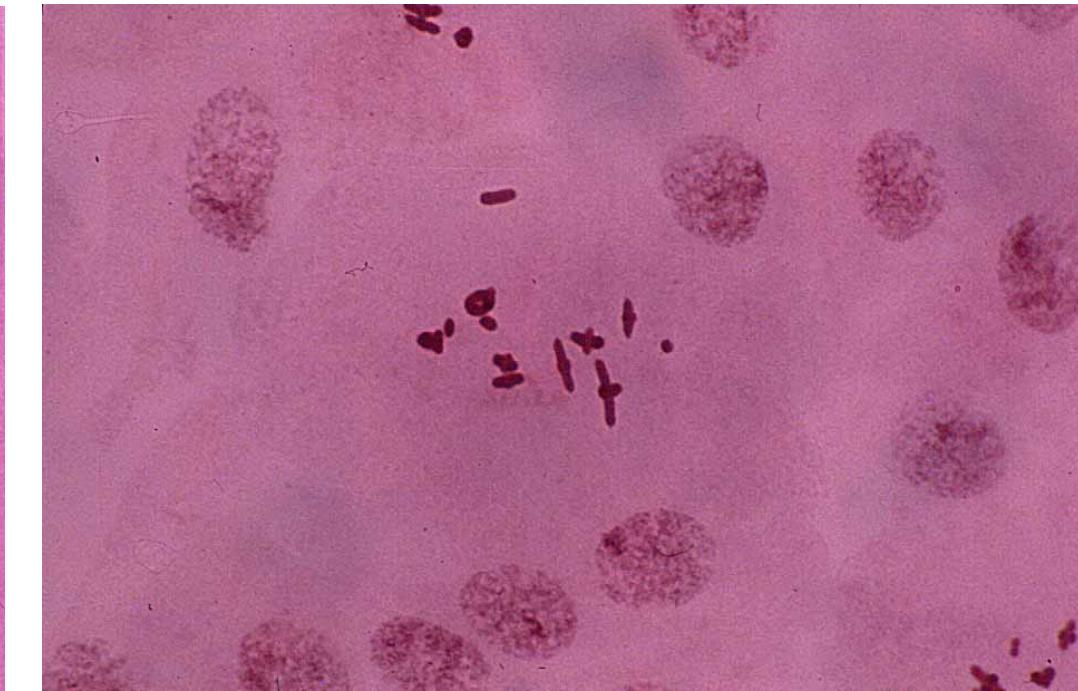

Grasshopper spermatid
bundles

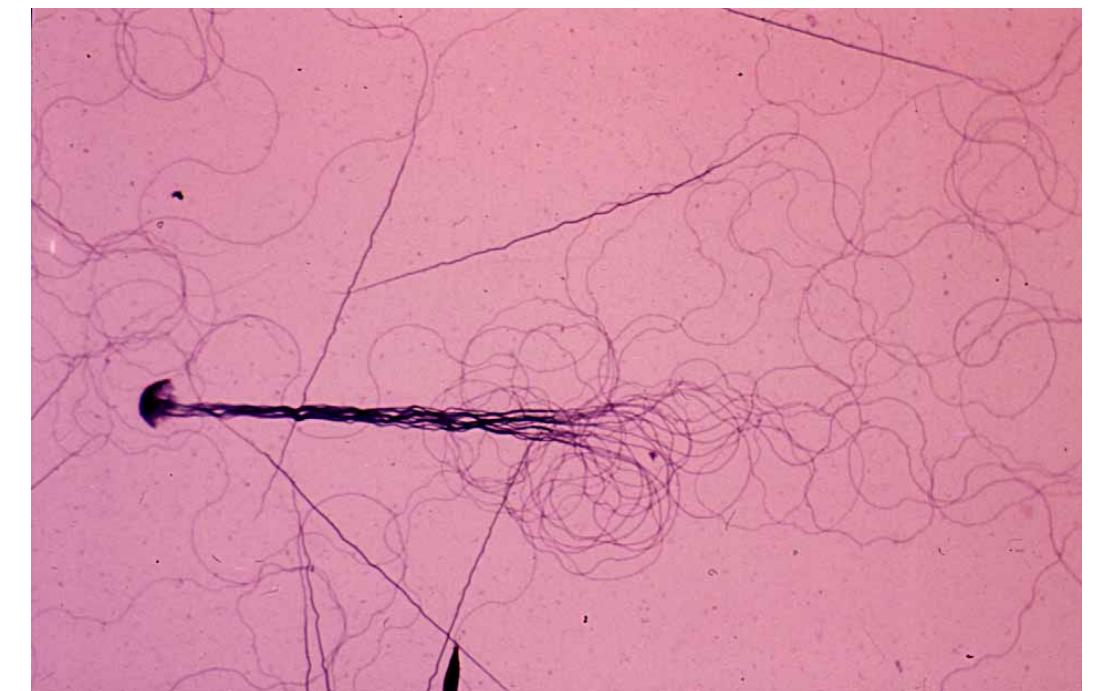

Grasshopper spermatids
with 1, 2 and 4 axonemes

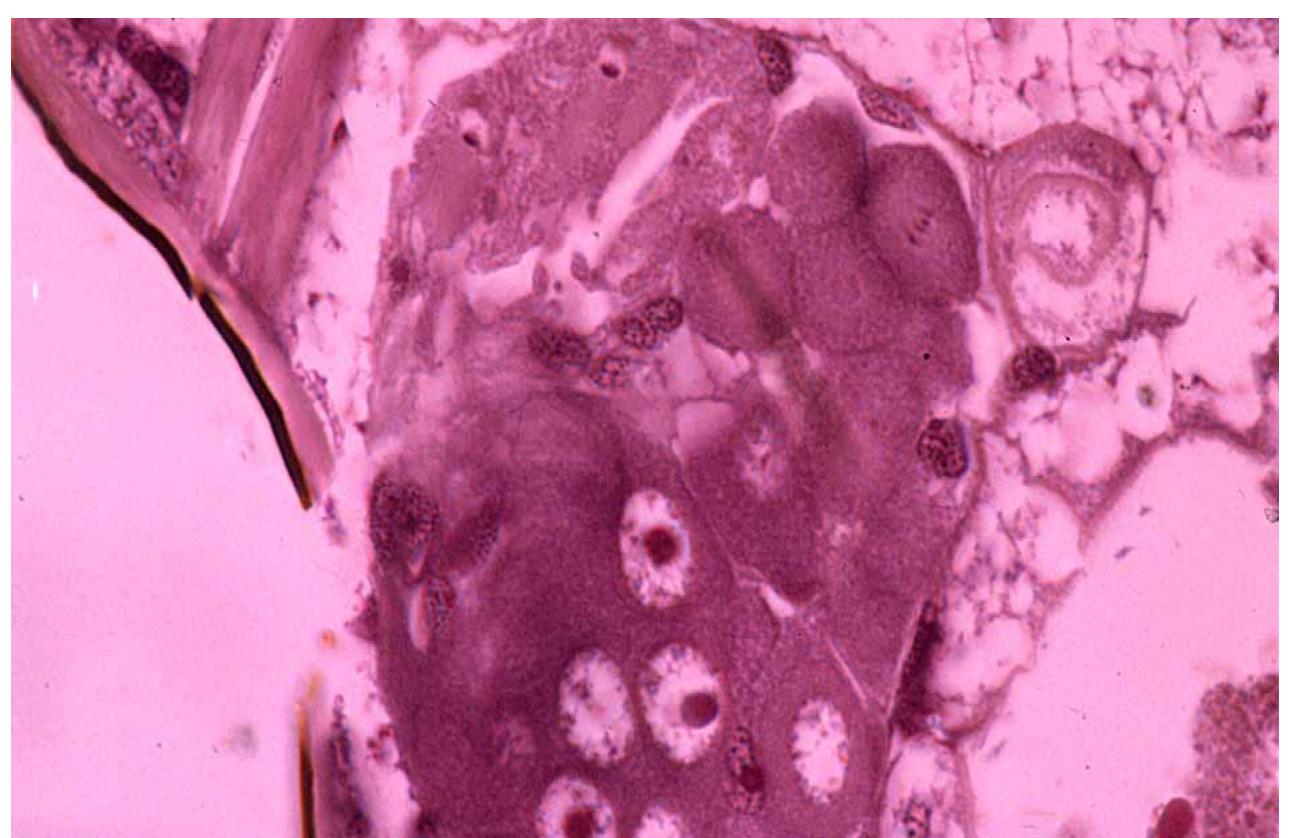

Squash preparation of
grasshopper primary
spermatocytes in
diakinesis

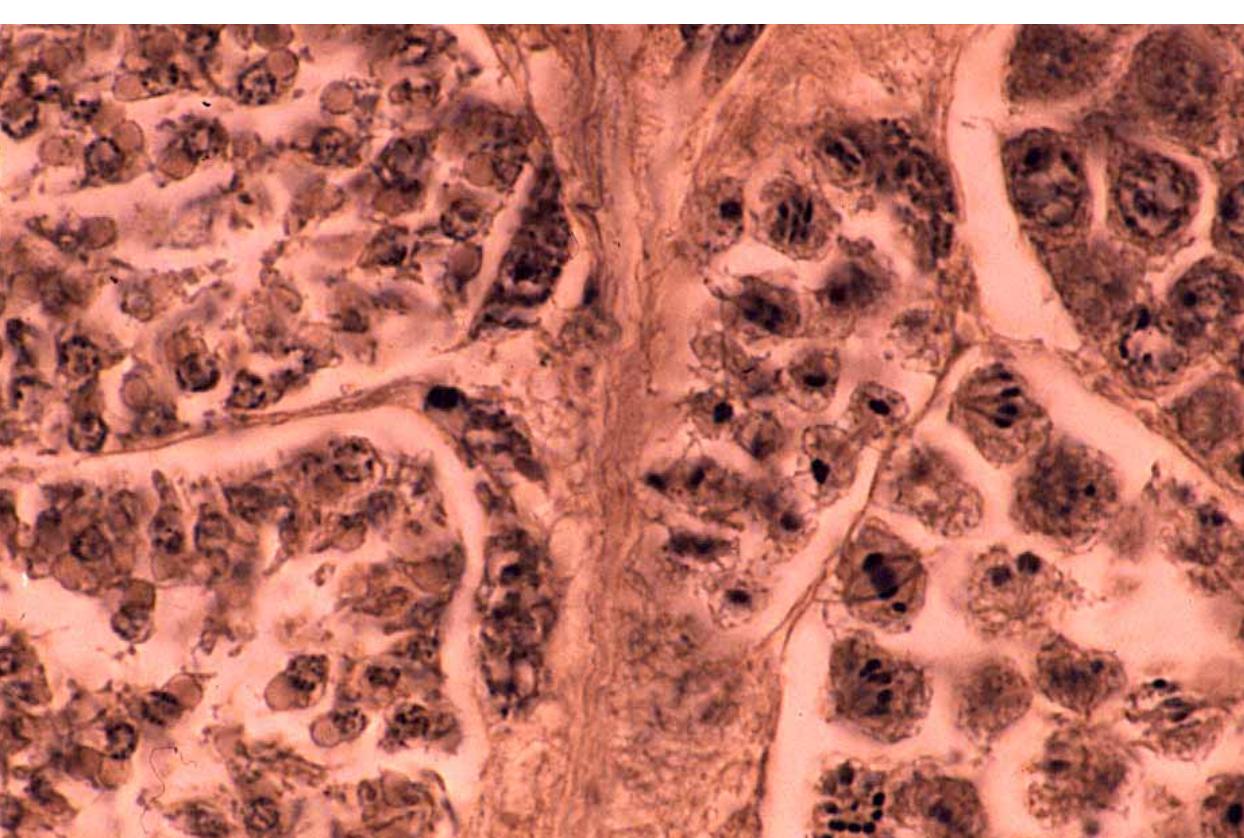

Squash preparation of
grasshopper primary
spermatocytes in
metaphase I

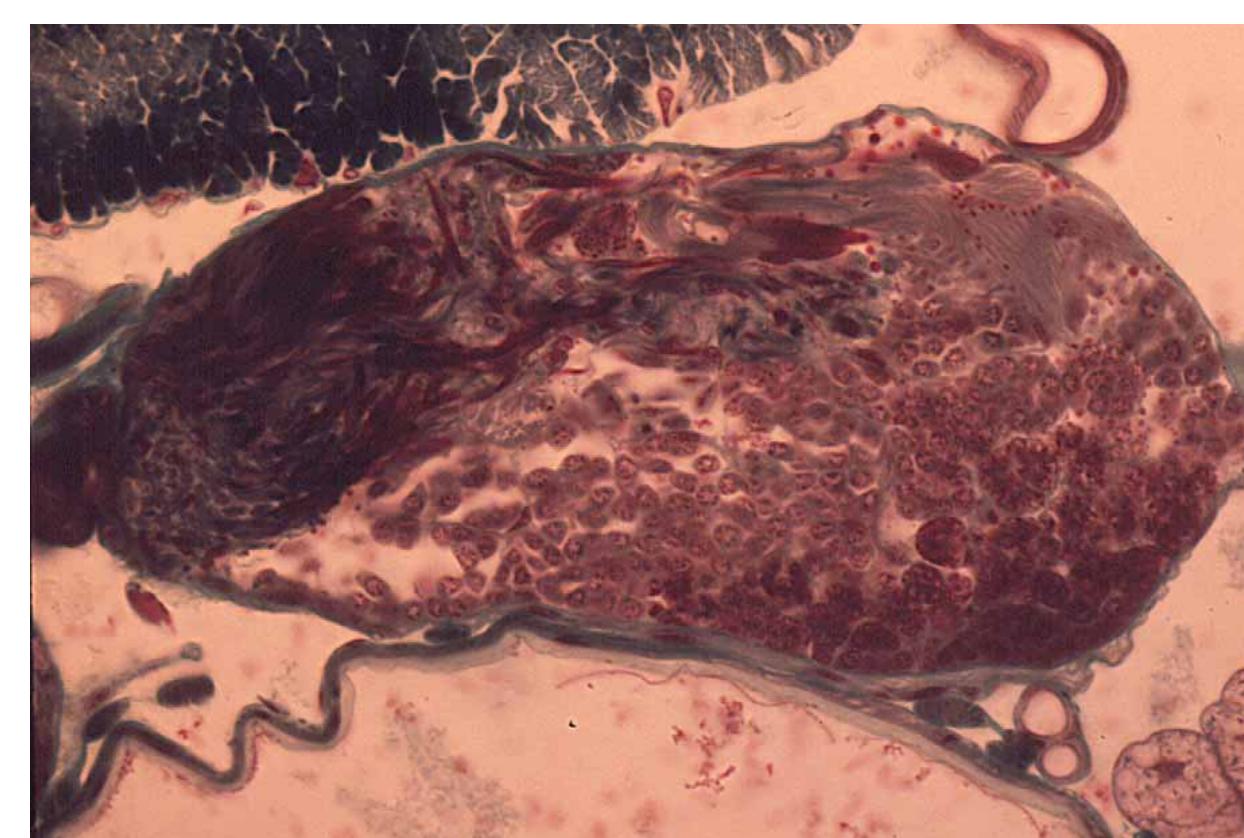

Squash preparation of
grasshopper sperm bundle

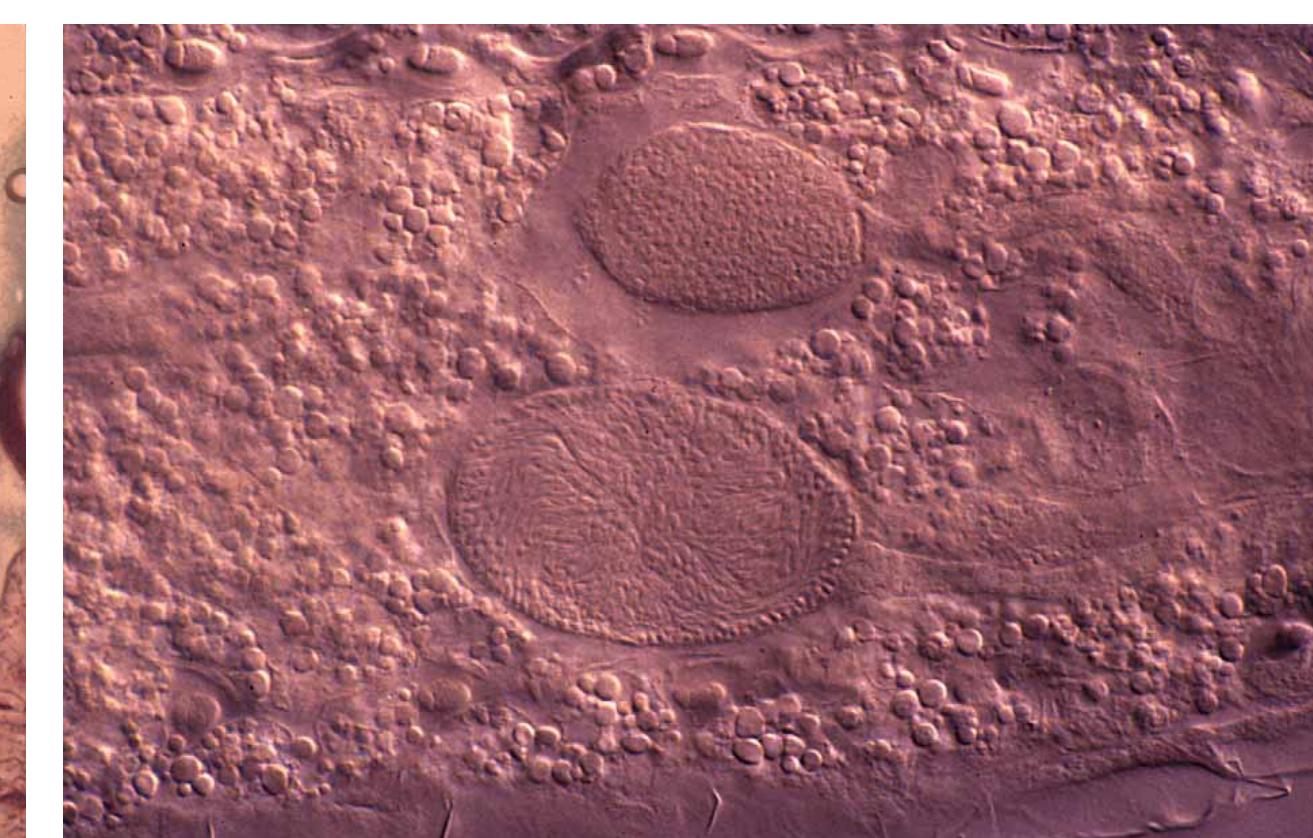

Hebrus pusillus (Hemiptera:
Hebridae) spermatogenesis

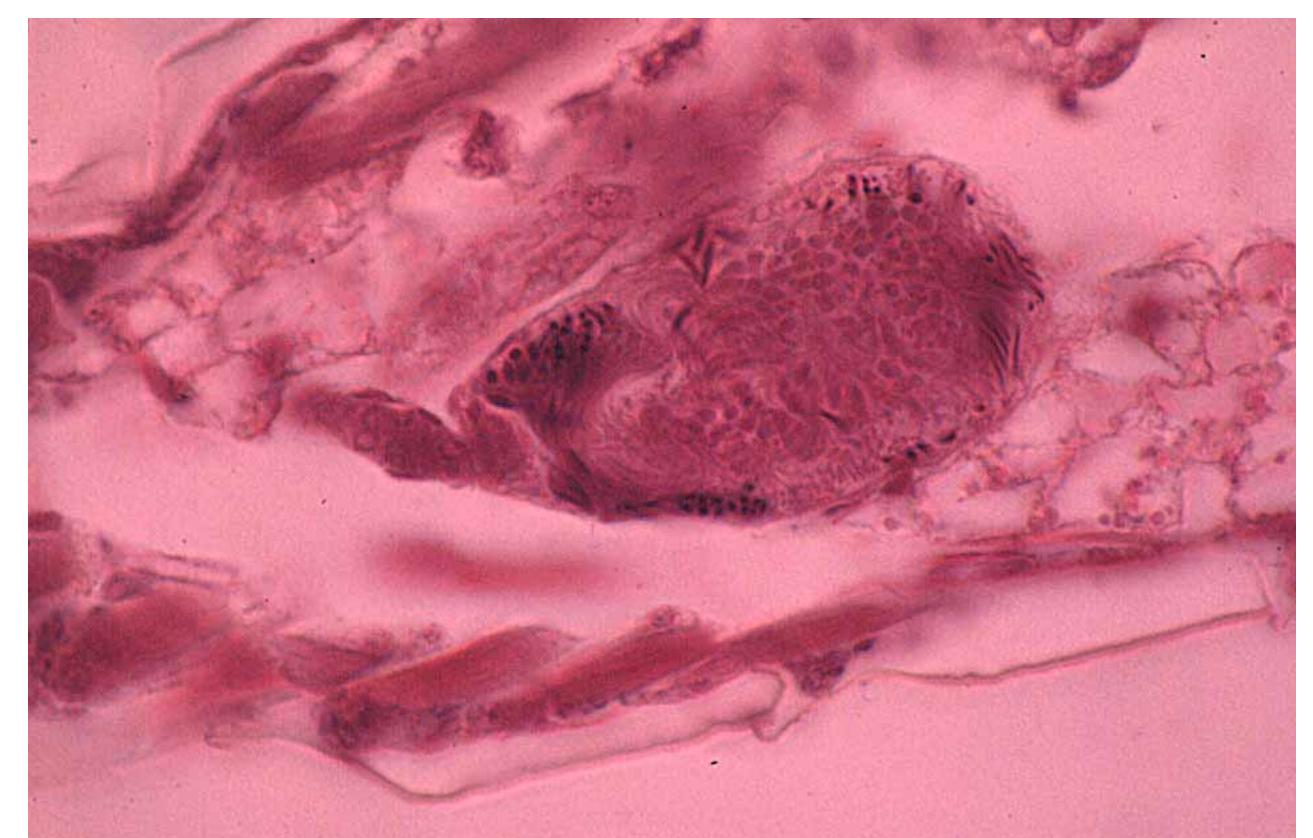

Anasa tristis (Hemiptera:
Coreidae) testis

Caddisfly (Trichoptera) testis

Parthenopthrips dracaenae
(Thysanoptera: Thripidae) early
pupa, showing two testes

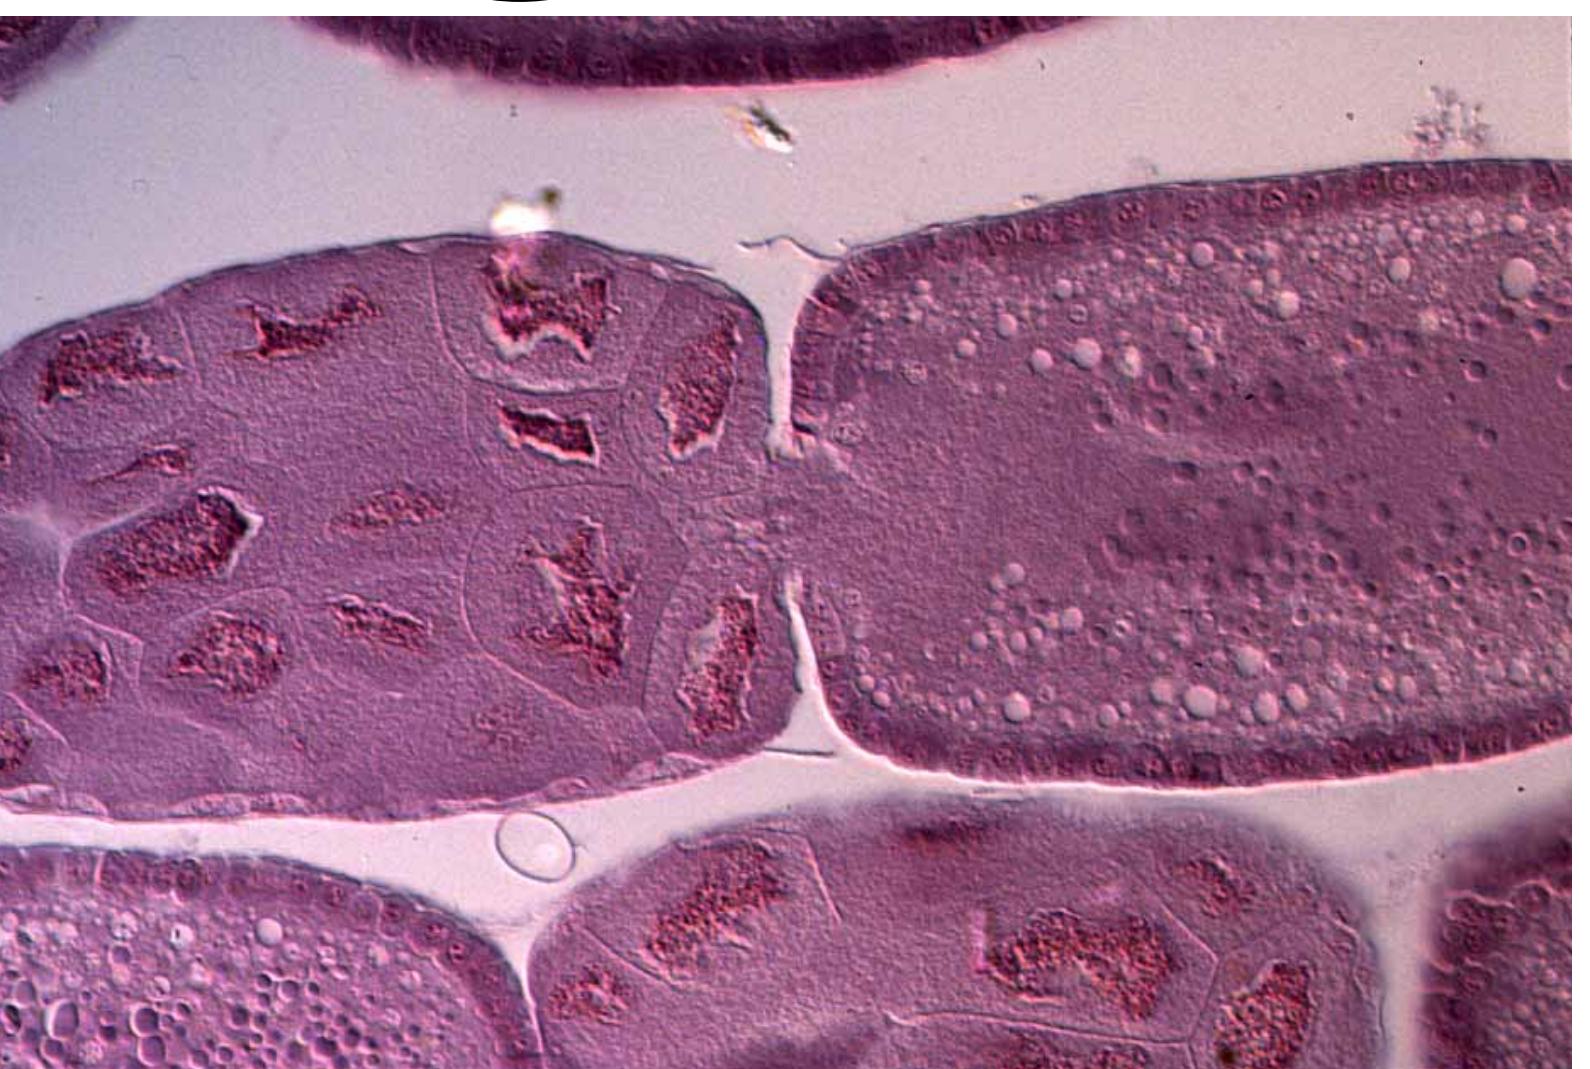

Frankliniella fusca (Thysanoptera:
Thripidae) late pupa; L.S. through
testis

O O G E N E S I S

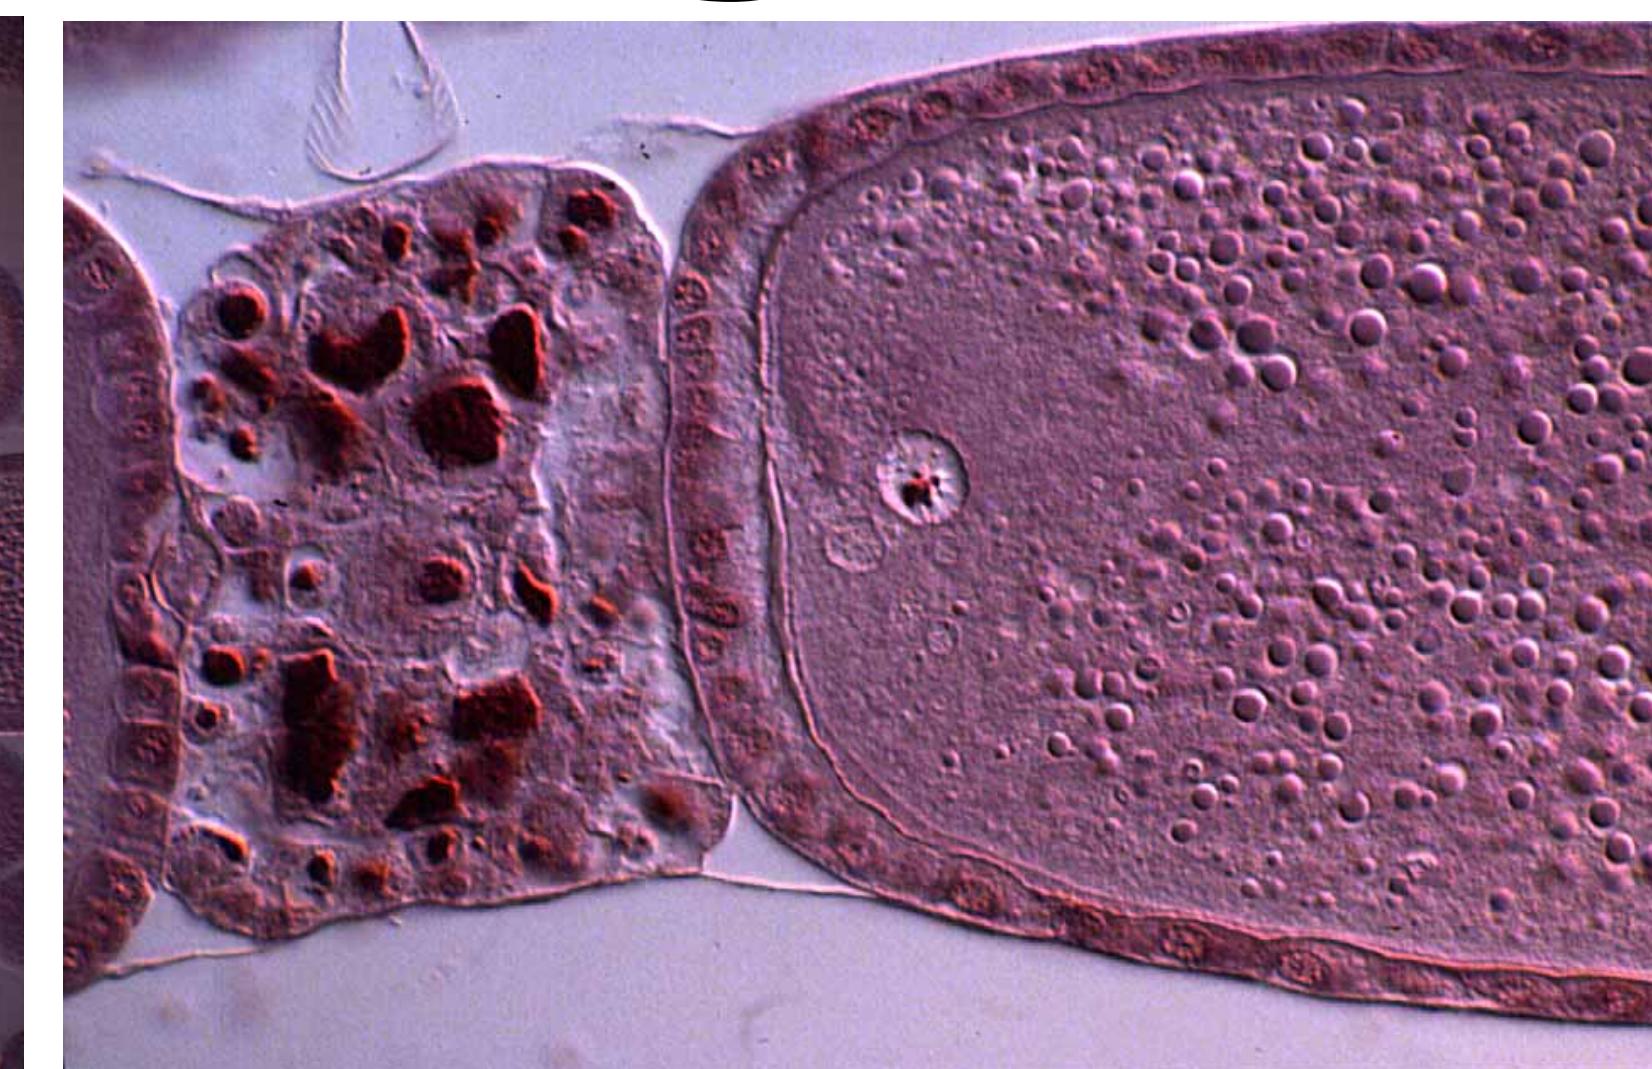

L.S. of honeybee (*Apis mellifera*) (Hymenoptera: Apidae) ovarioles

L.S. of honeybee ovariole

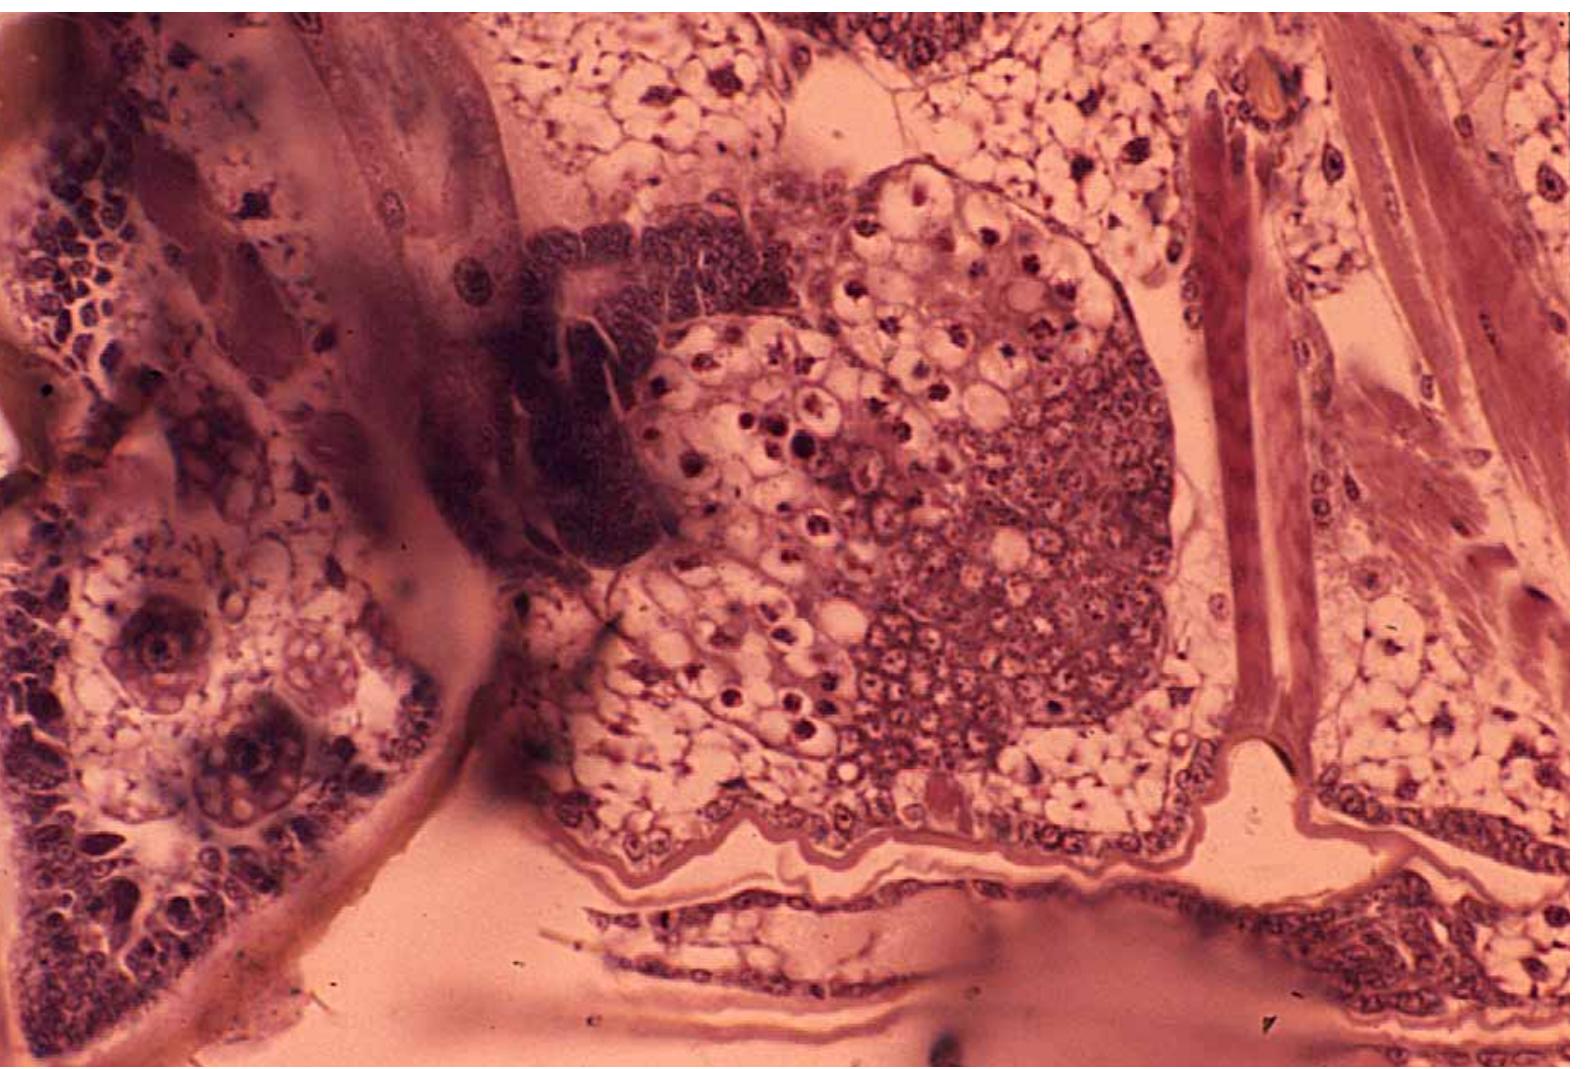

L.S. of honeybee ovariole

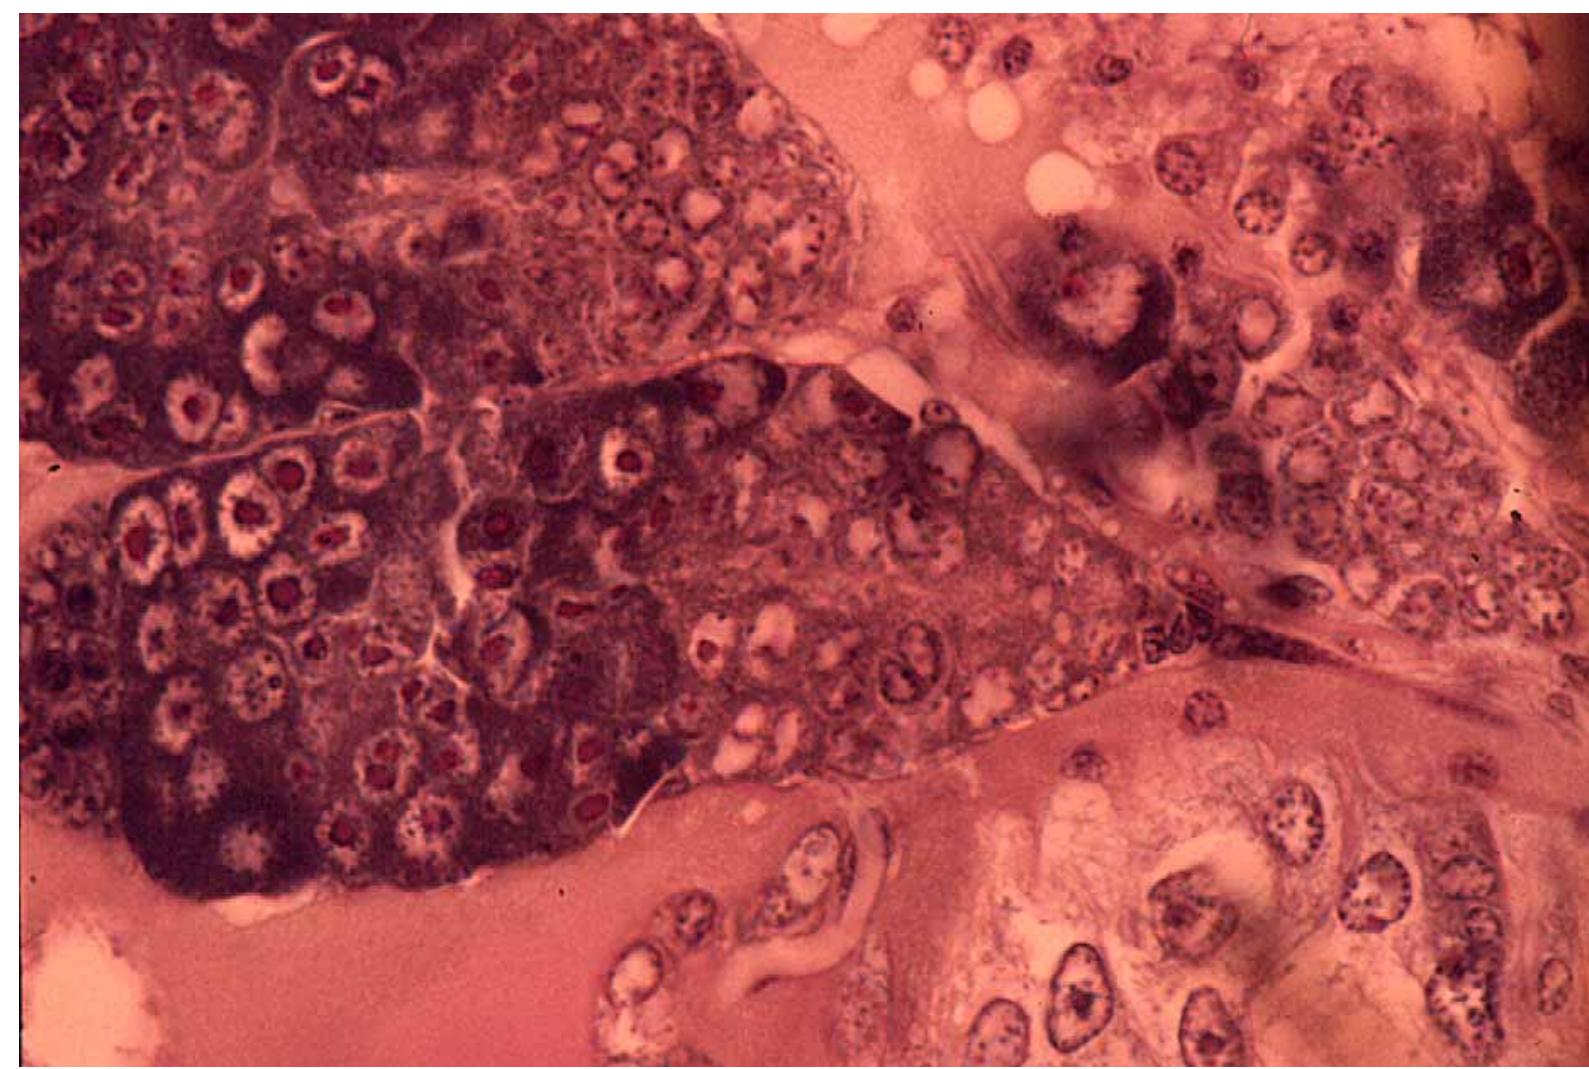

L.S. of honeybee ovariole

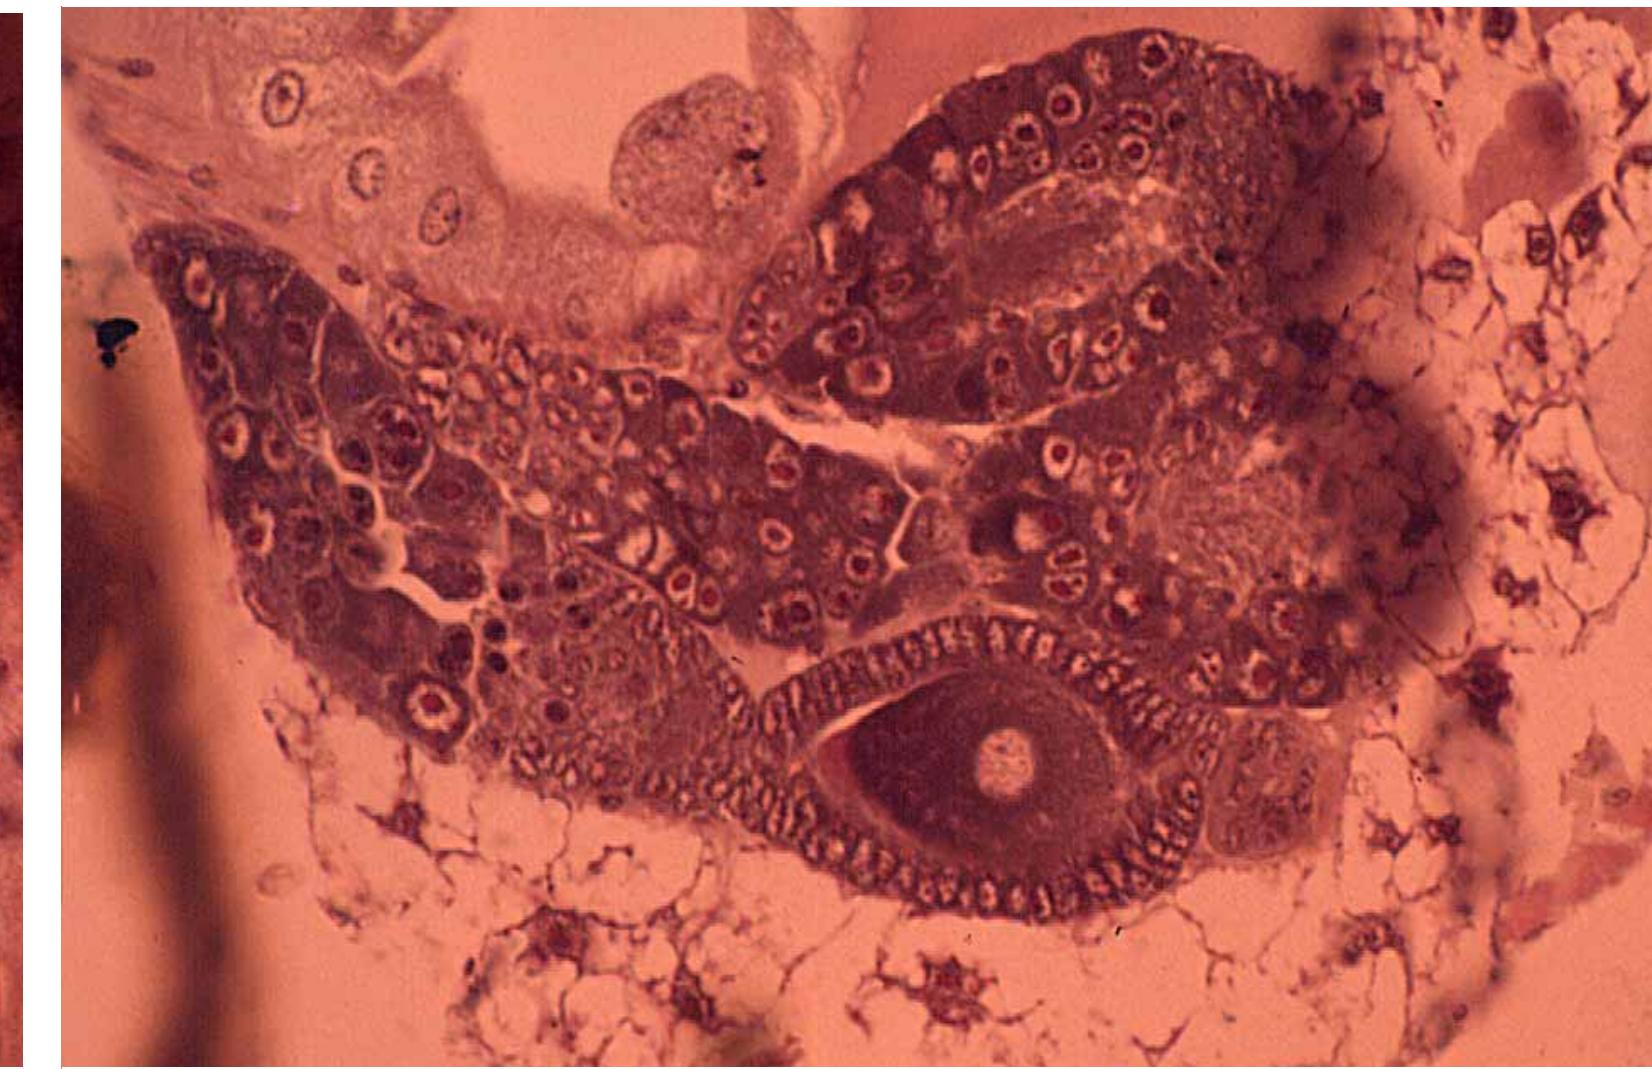

L.S. of honeybee ovariole

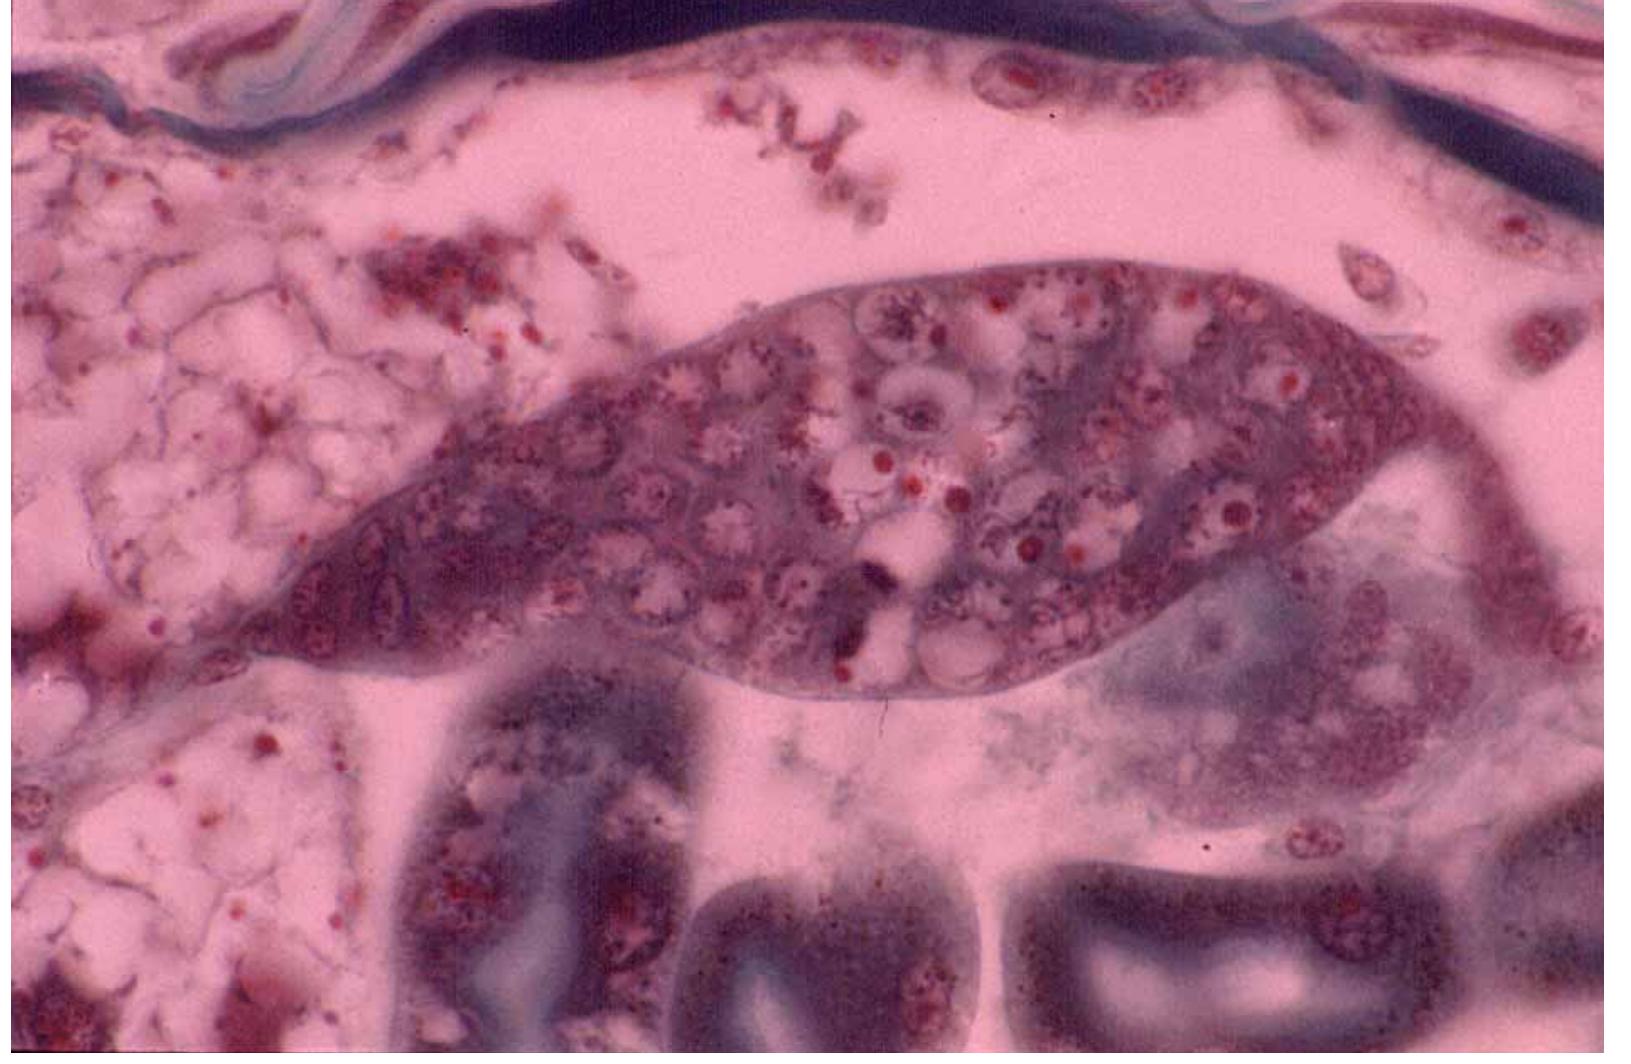

F.S. of *Hebrus pusillus* (Hemiptera: Hebridae) larva V ovary rudiment

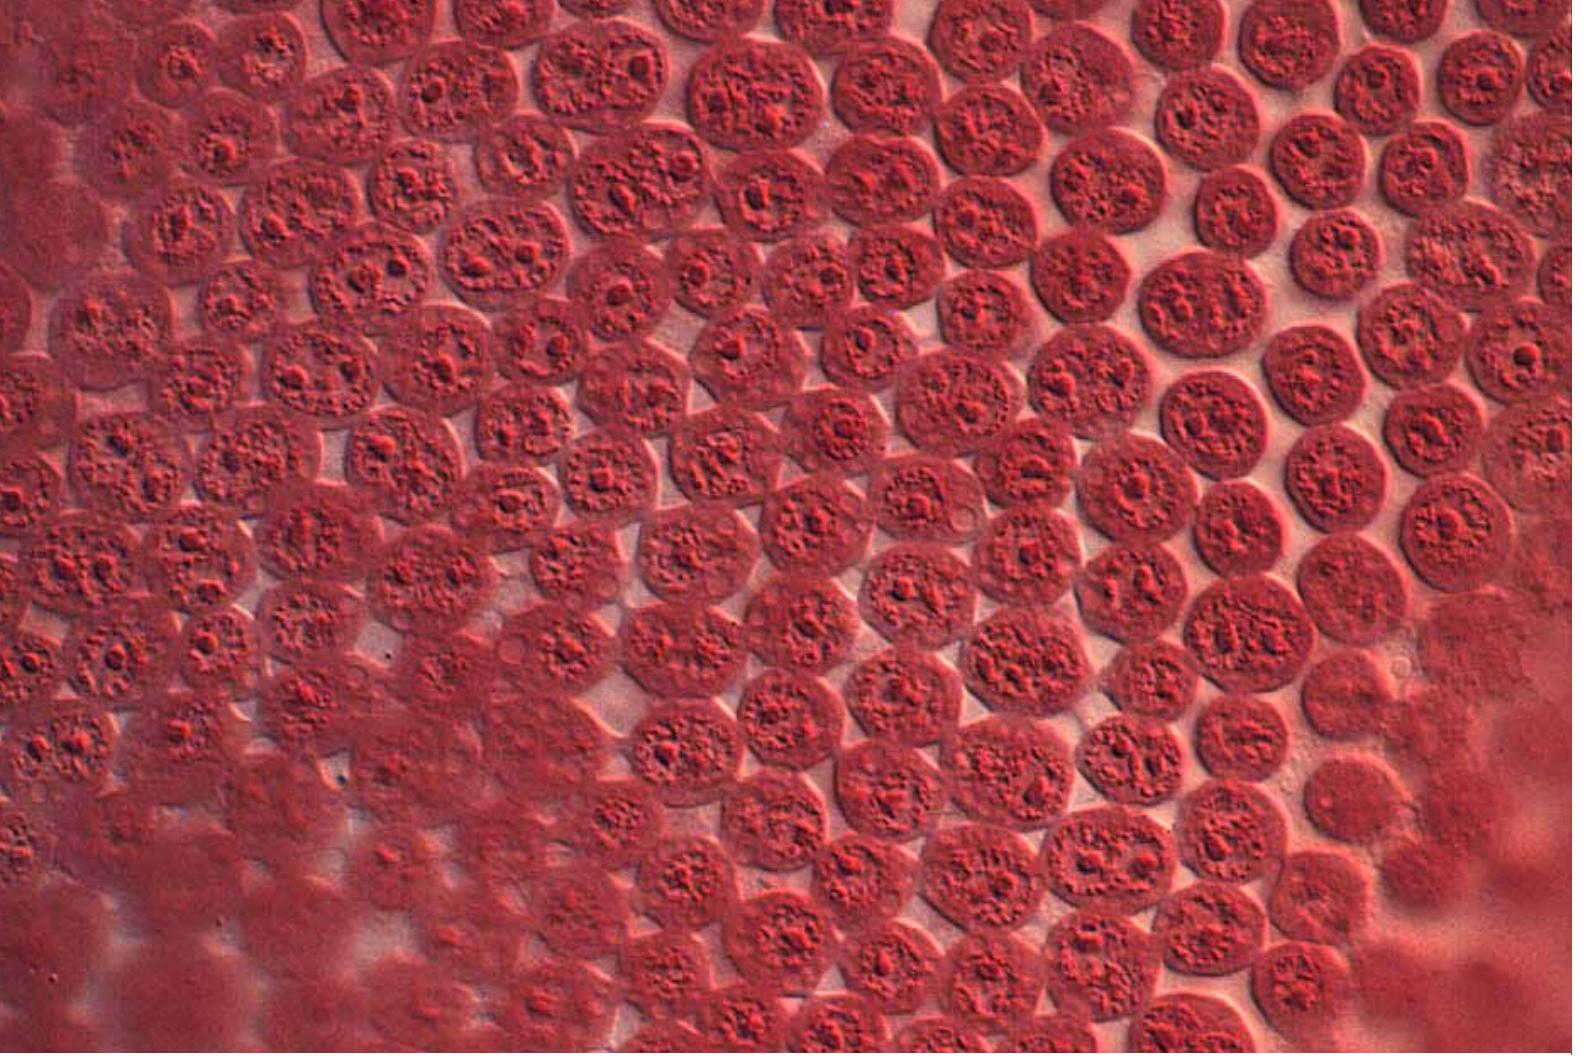

L.S. of *Hebrus* pharate adult ovary

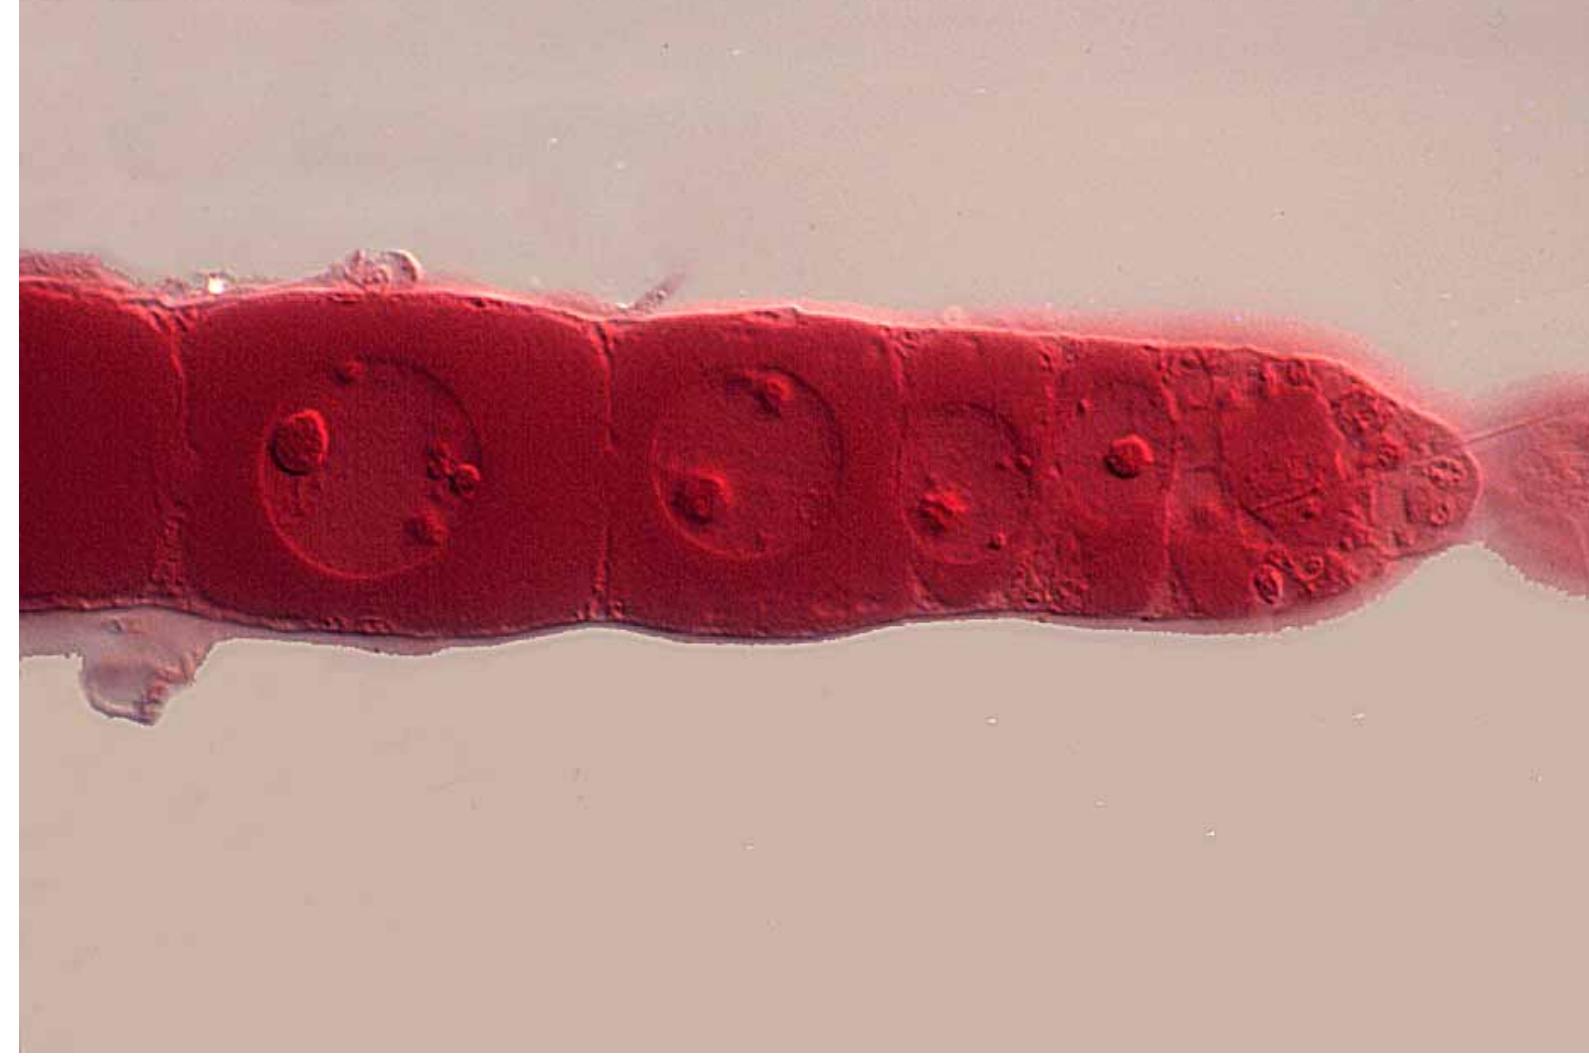

L.S. of *Hebrus* pharate adult ovary

L.S. of *Haplothrips verbasci* (Thysanoptera: Phlaeothripidae) larva II ovary rudiment

Whole mount of cricket (Orthoptera: Gryllidae) follicle cells

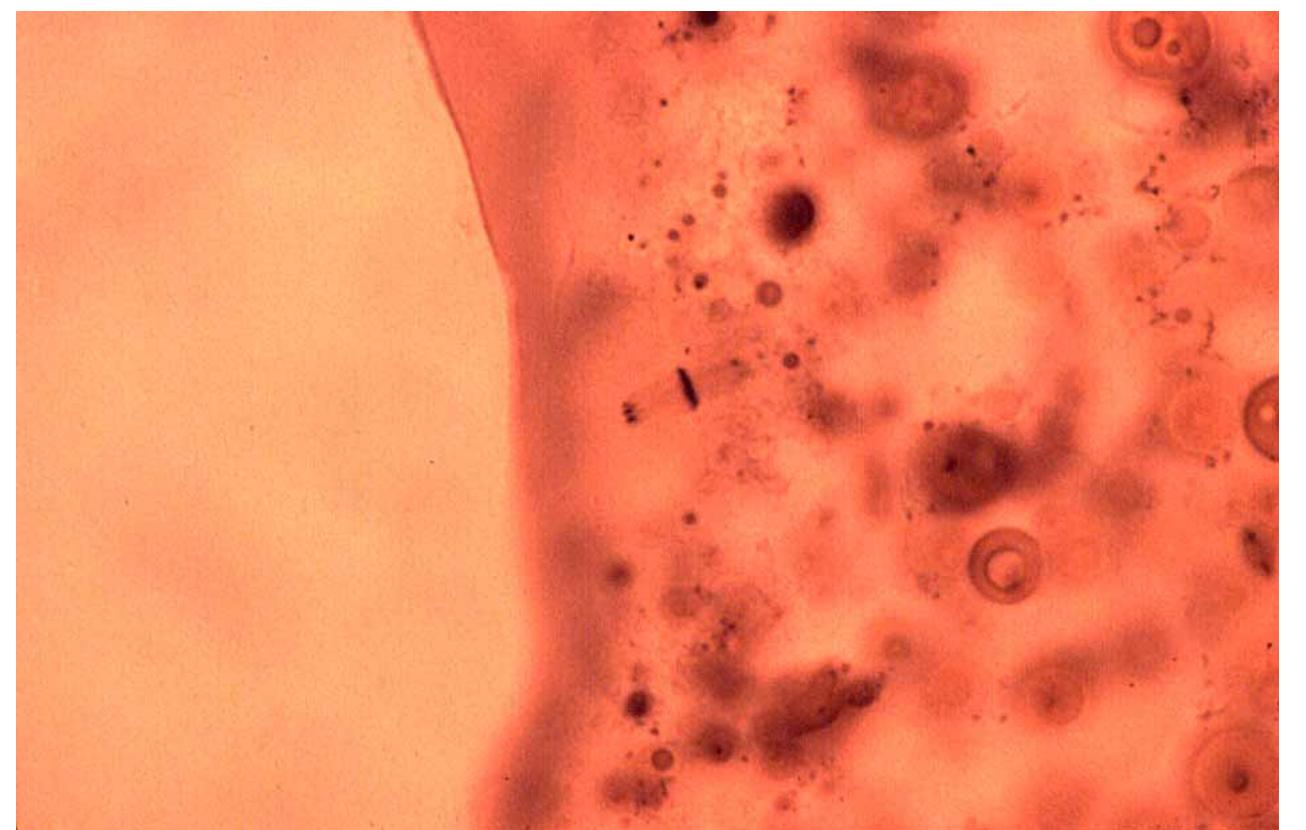

Whole mount of cricket ovariole

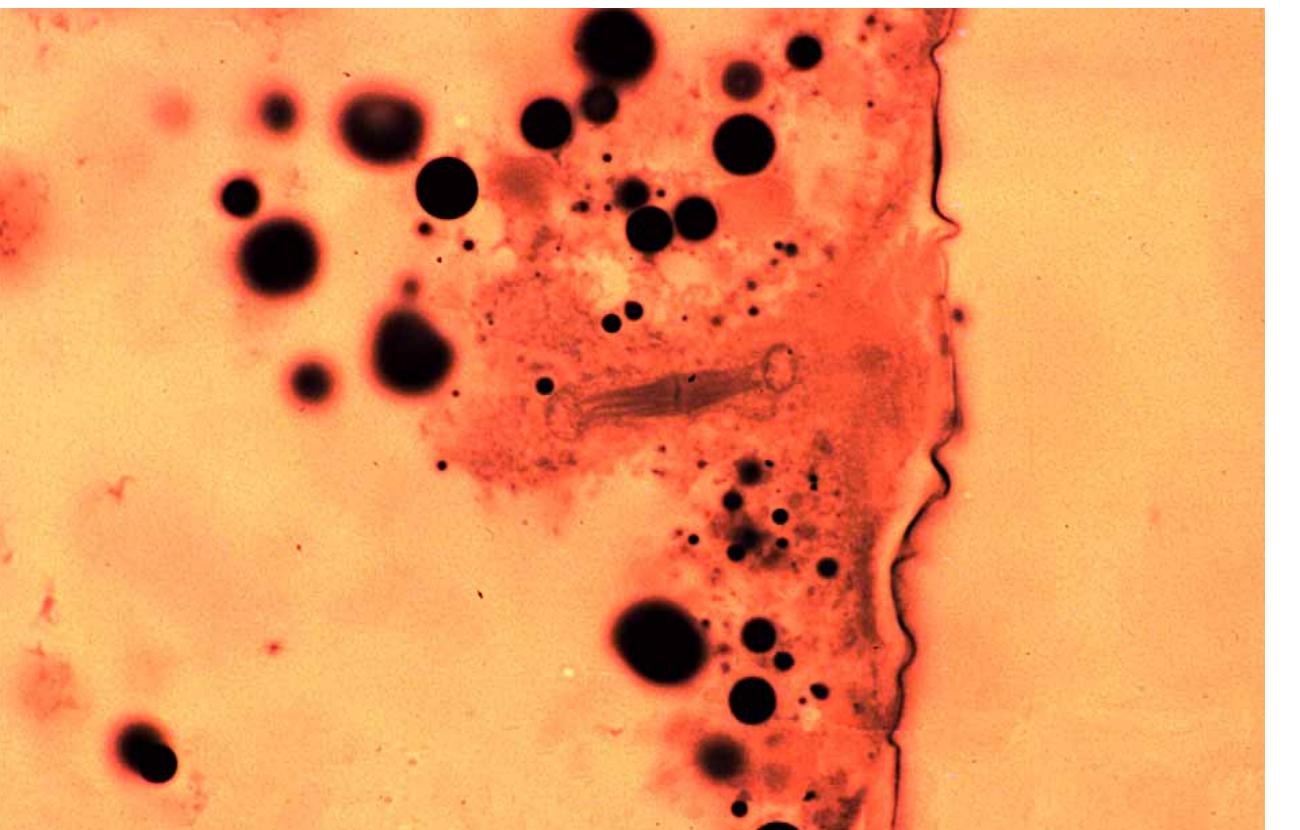

Whole mount of cricket ovariole

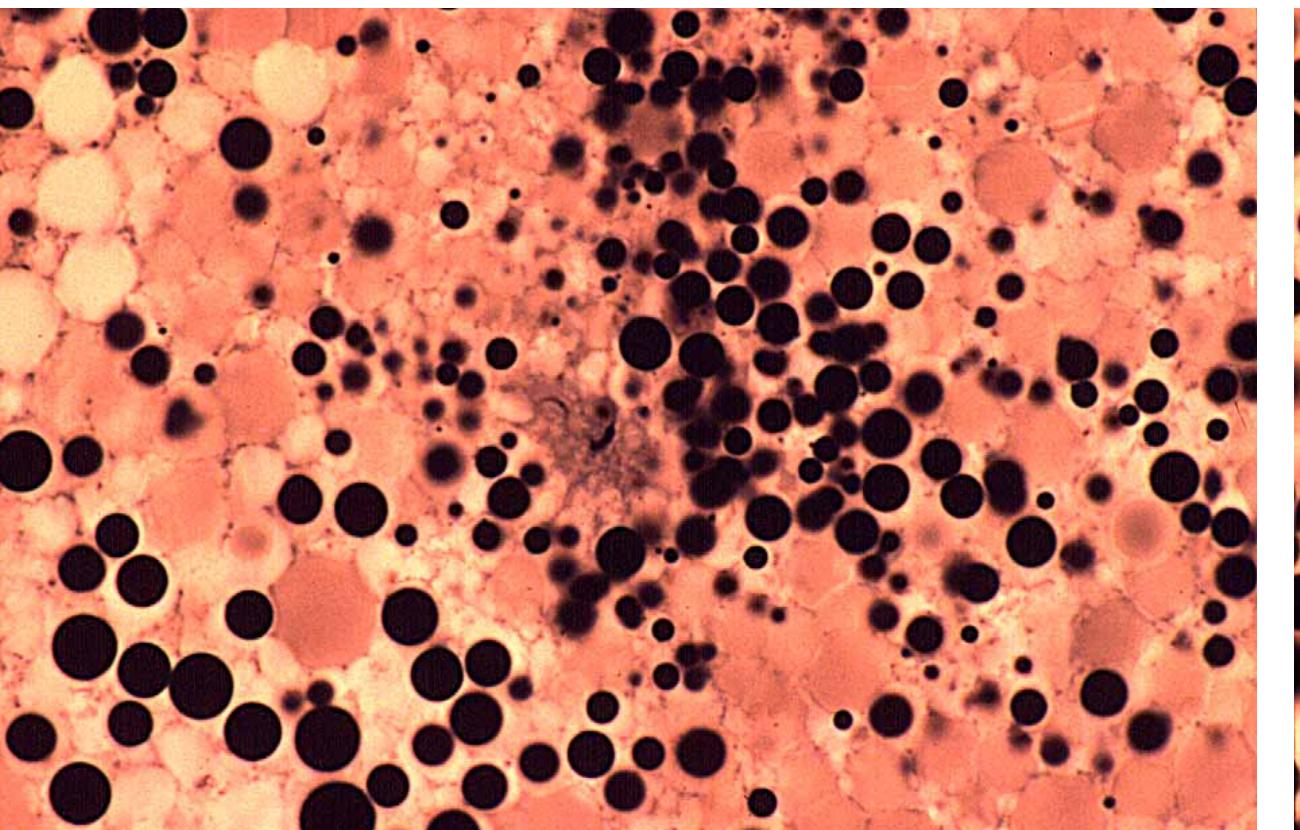

EARLY EMBRYOGENESIS

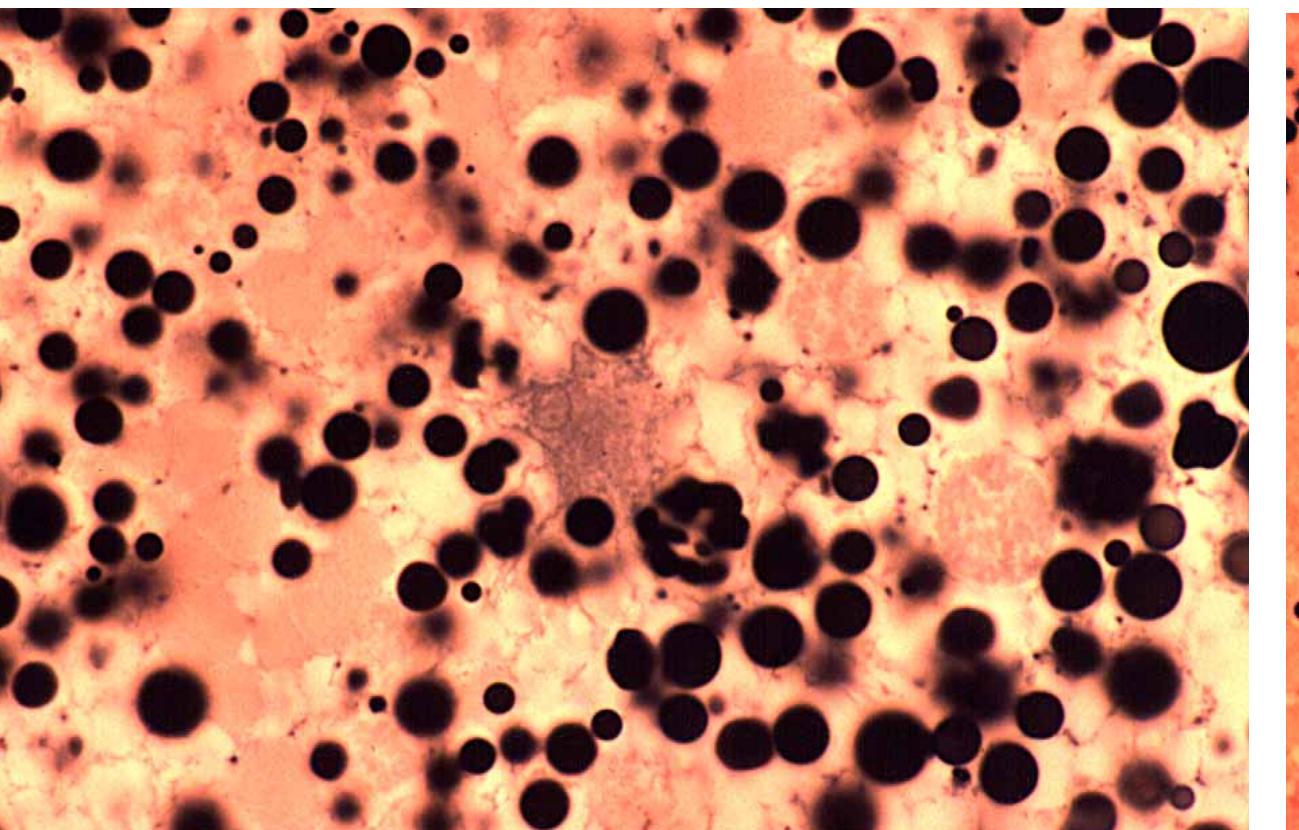

Lytta viridana (Coleoptera: Meloidae)
female anaphase I

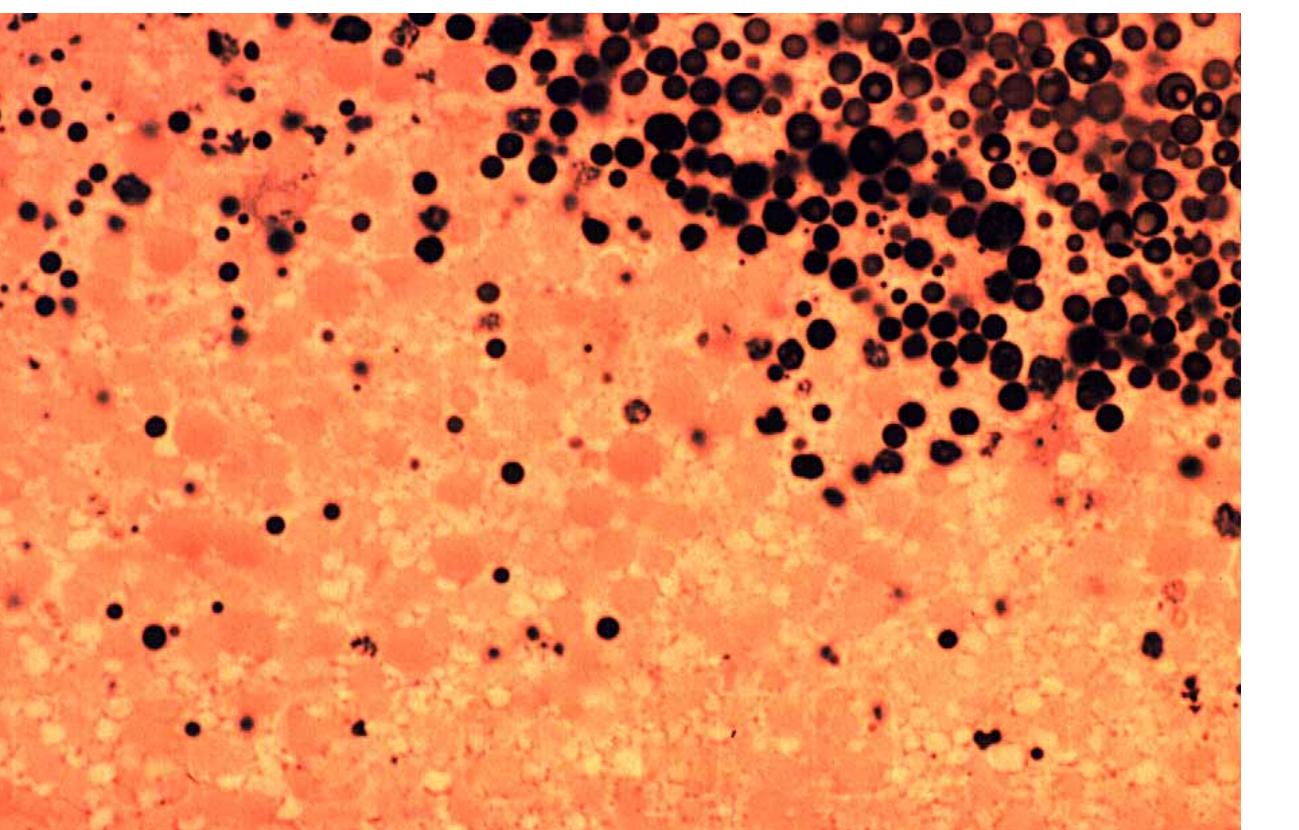

Lytta viridana female interphase II

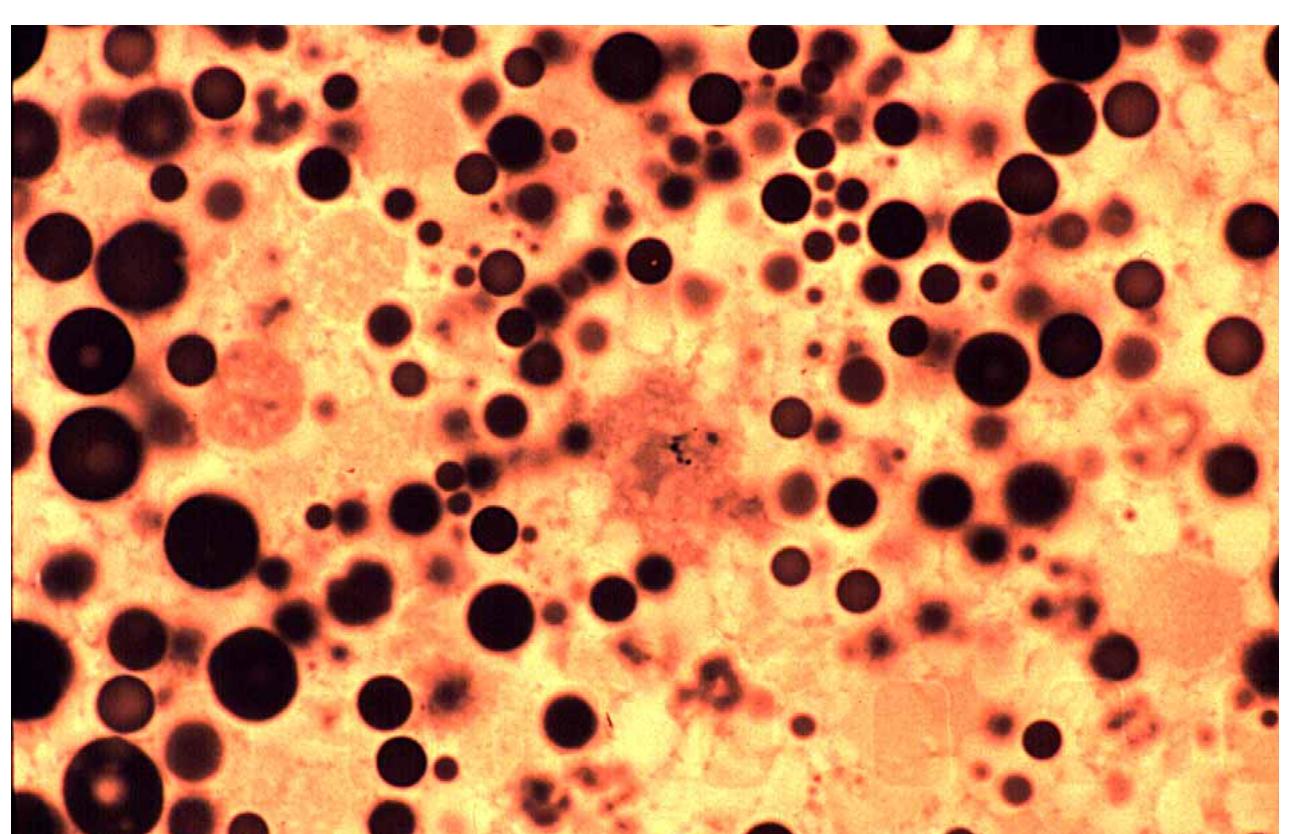

Lytta viridana sperm in yolk system

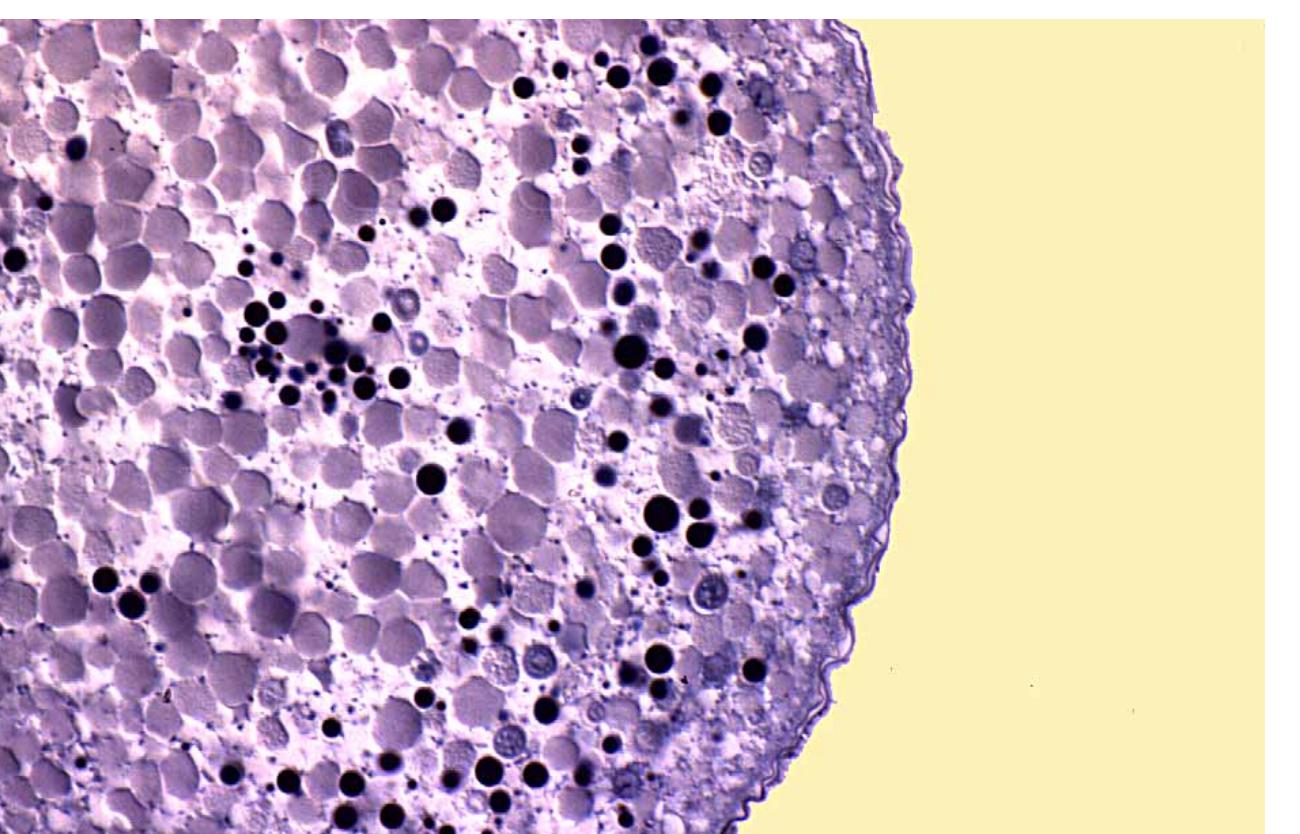

Lytta viridana male pronucleus and
axoneme in yolk system

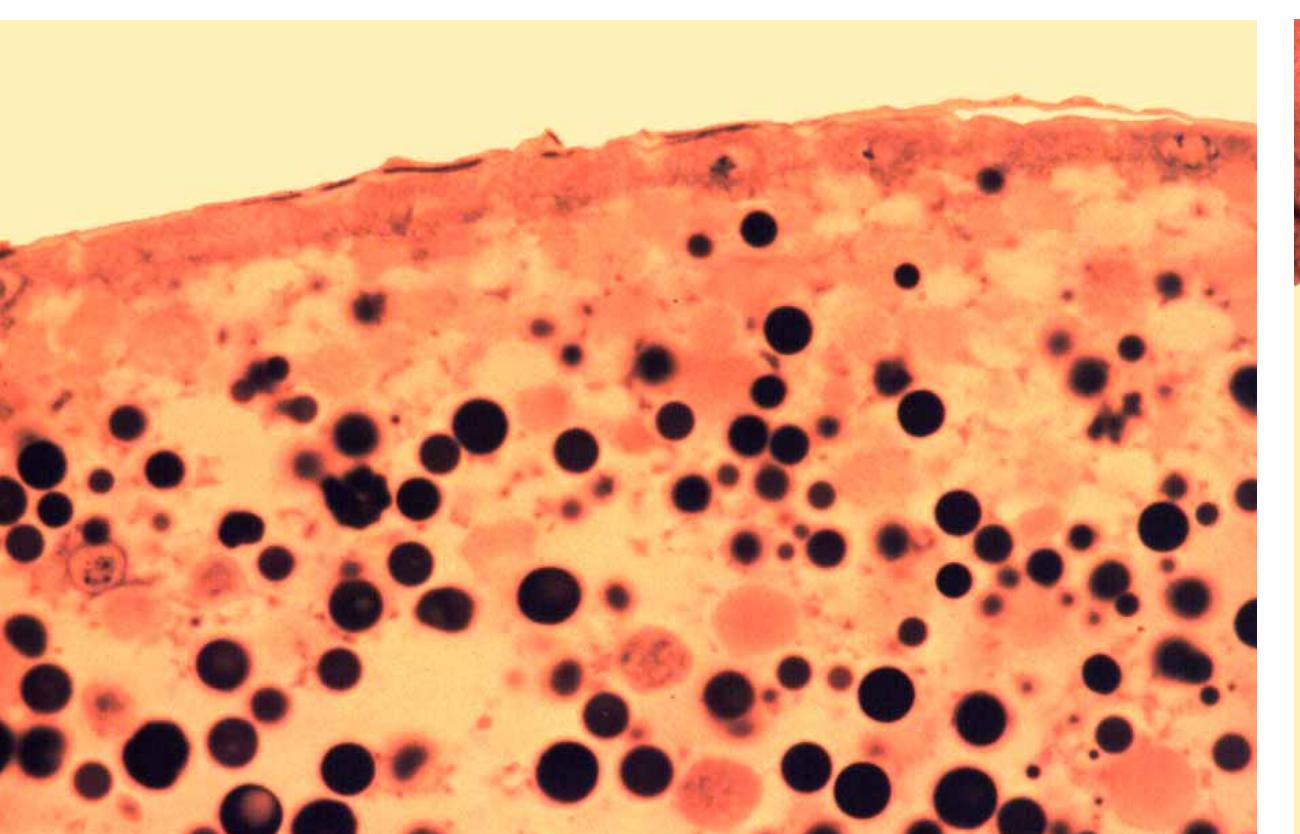

Lytta viridana two cleavage energids
in yolk system

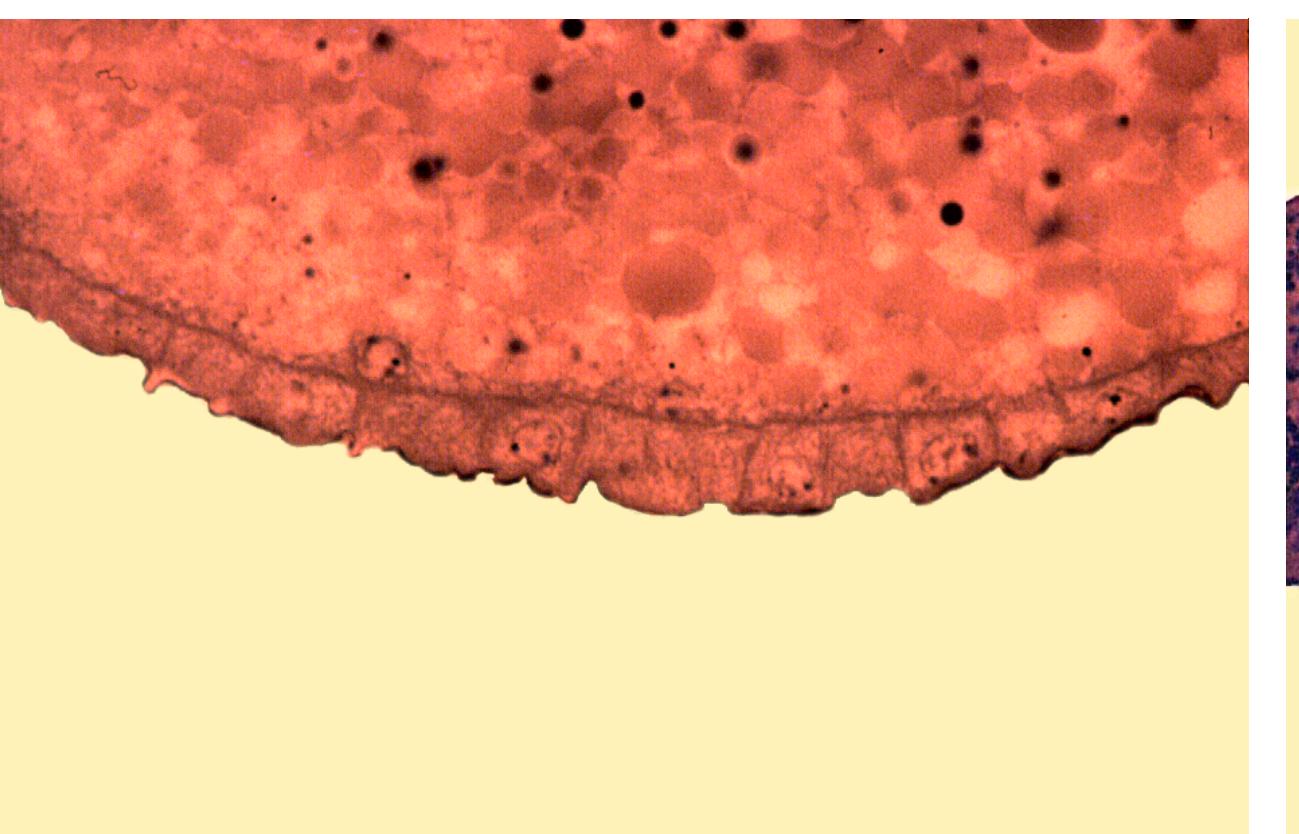

Lytta viridana cleavage energid in
metaphase

Lytta viridana cleavage energids ap-
proaching periplasm

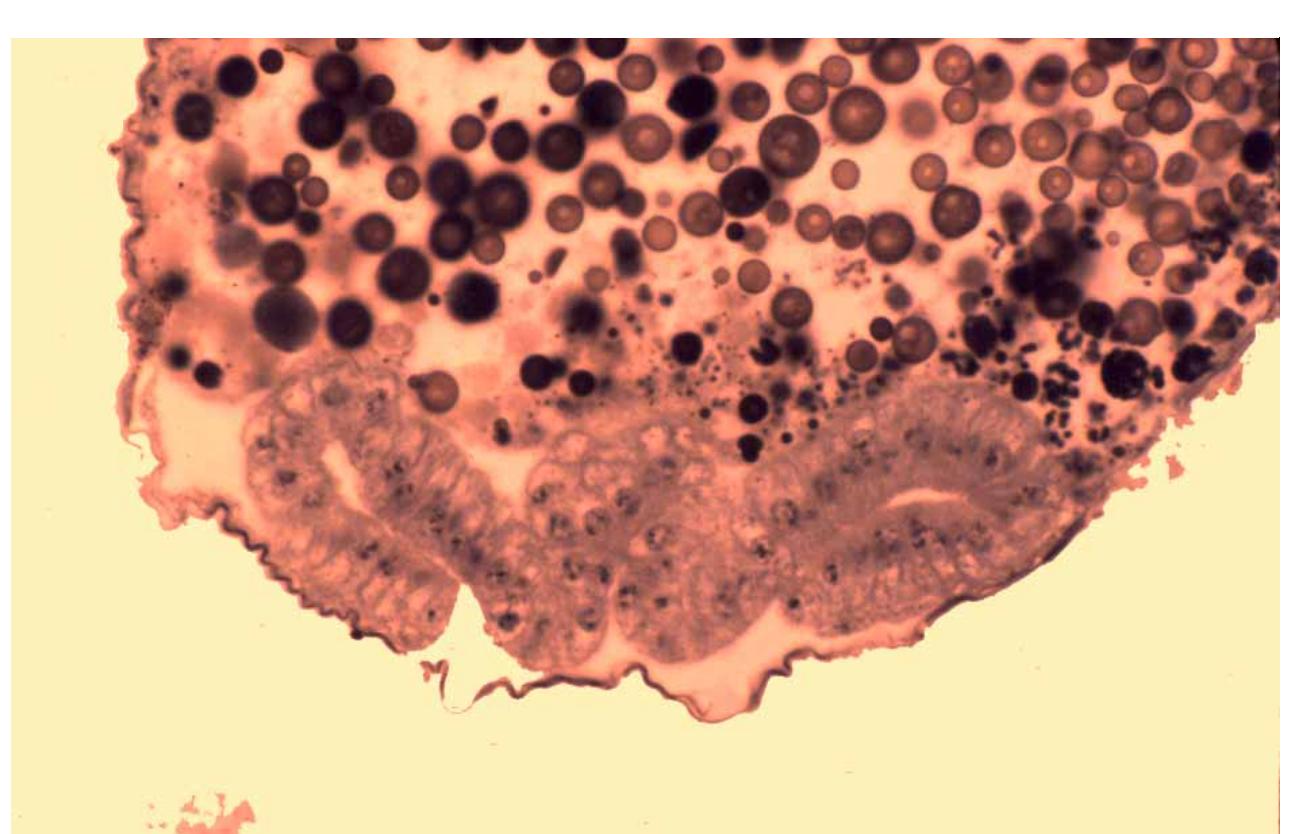

Lytta viridana preblastoderm with
cleavage furrows

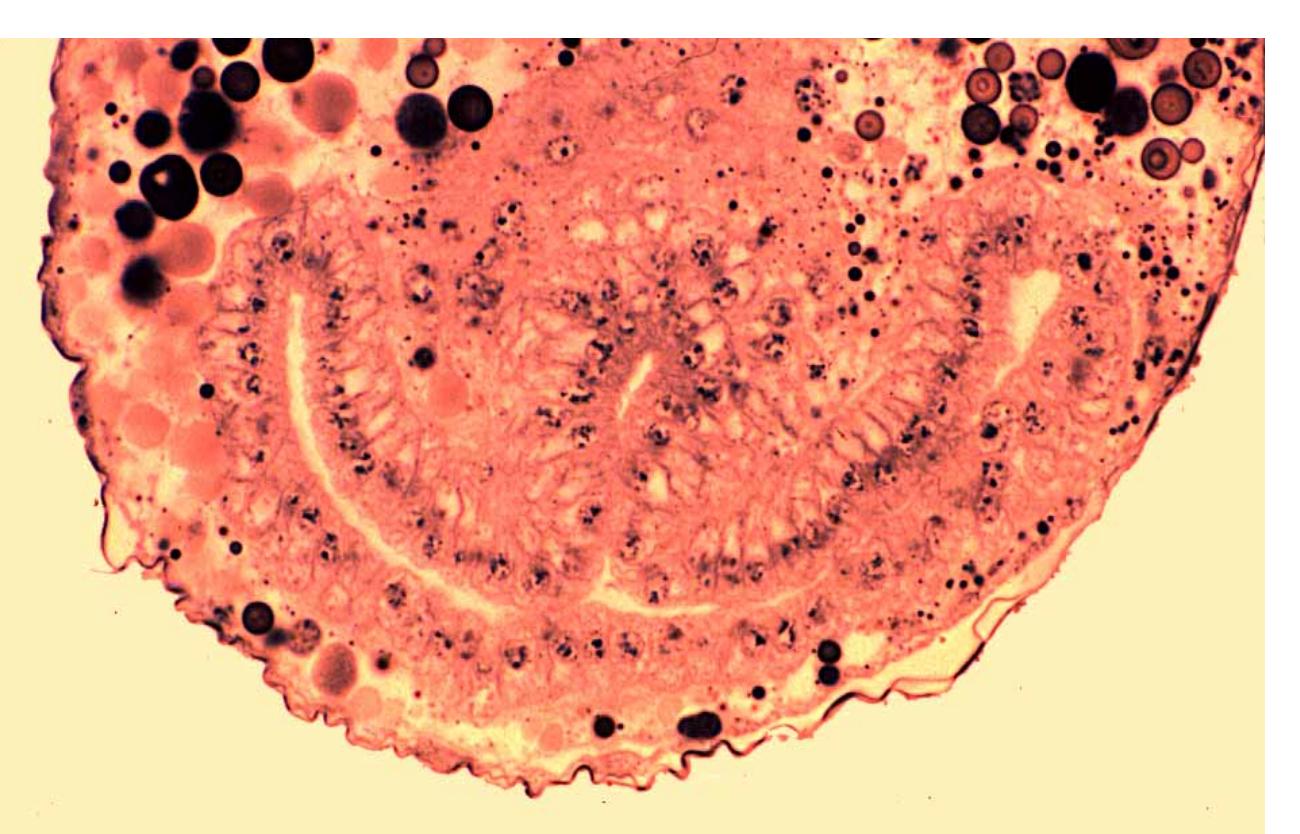

Lytta viridana blastoderm

Lytta viridana L.S. of germ band

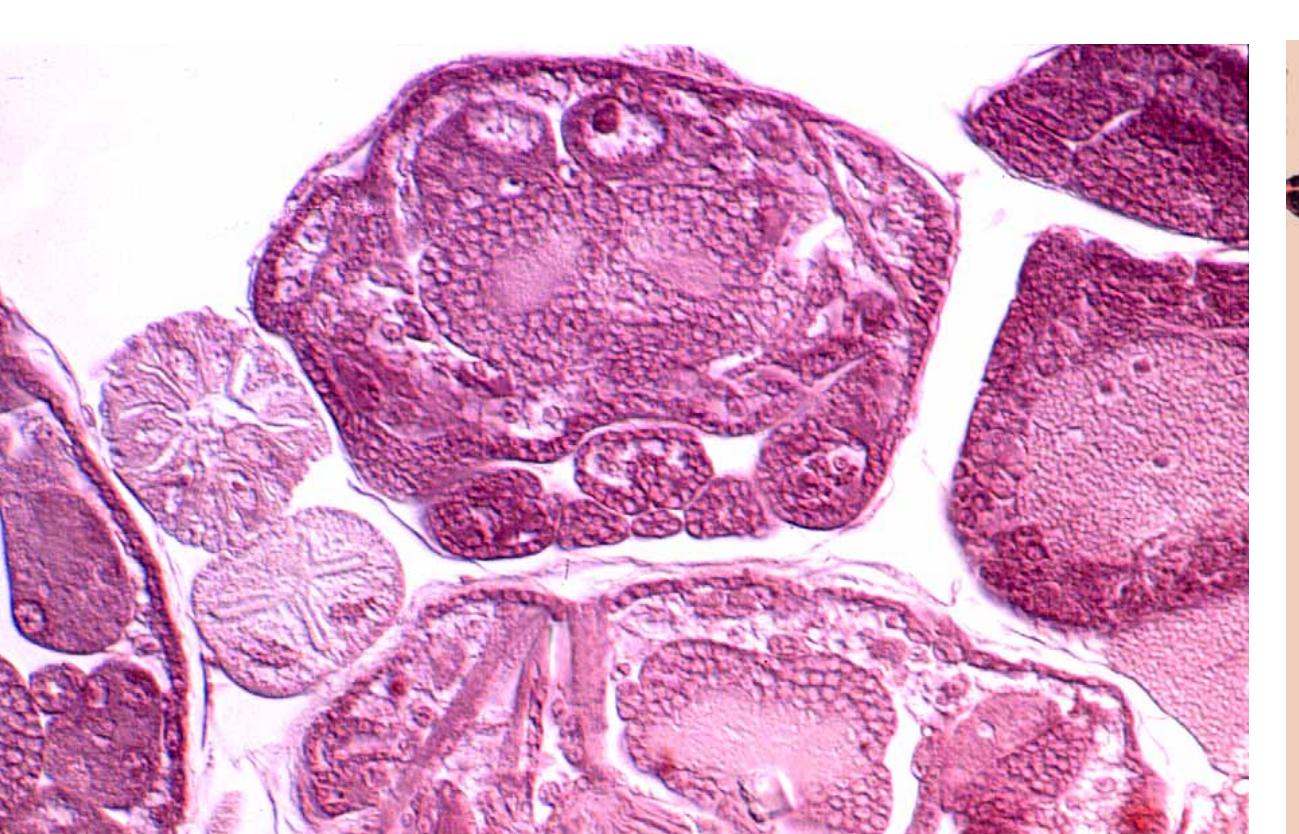

Lytta viridana X.S. through germ
band at gastrulation

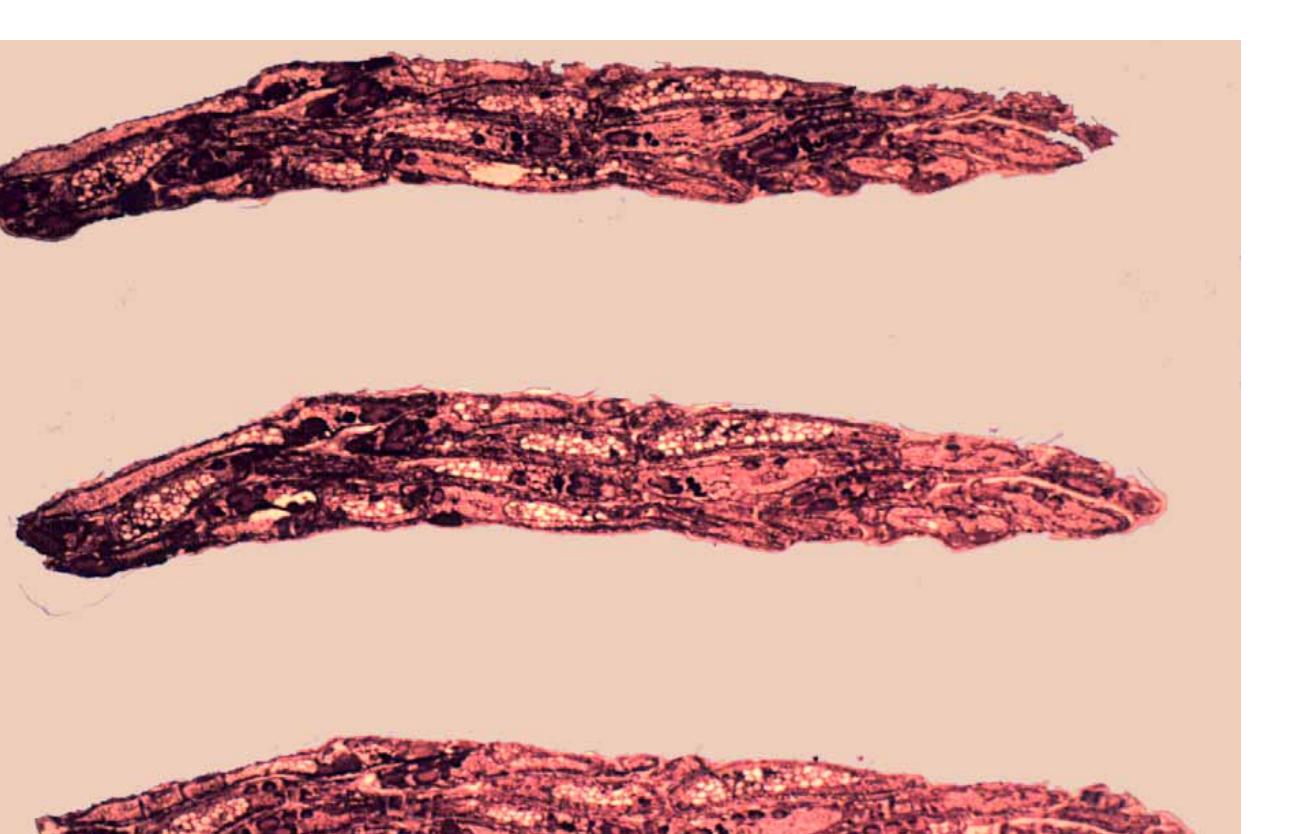

Lytta viridana X.S. through posterior
end of germ band at gastrulation

X.S. through abdomen of viviparous
aphid female (Hemiptera: Aphididae),
showing 9 early embryos

X.S. through abdomen of viviparous
aphid female, showing parts of 3 late
embryos

L.S. through female larva of *Miastor*
sp. (Diptera: Cecidomyiidae),
showing paedogenetically developing
larvae

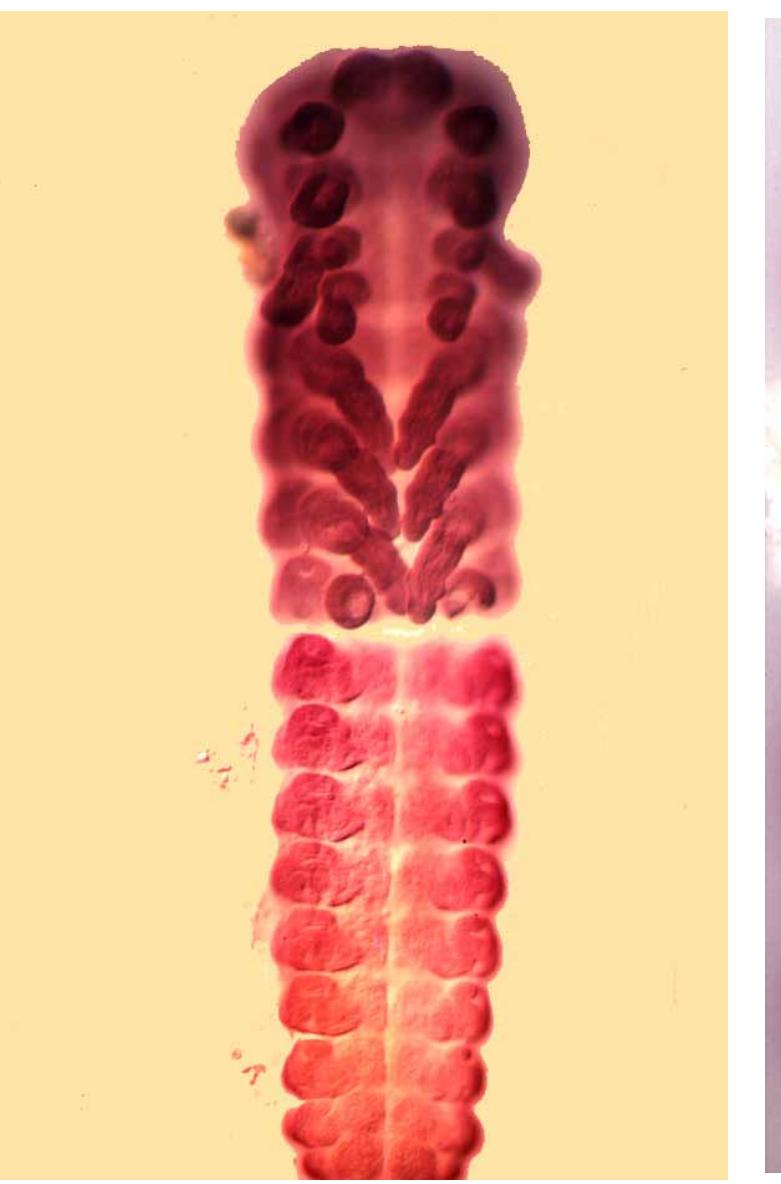

ORGANOGENESIS

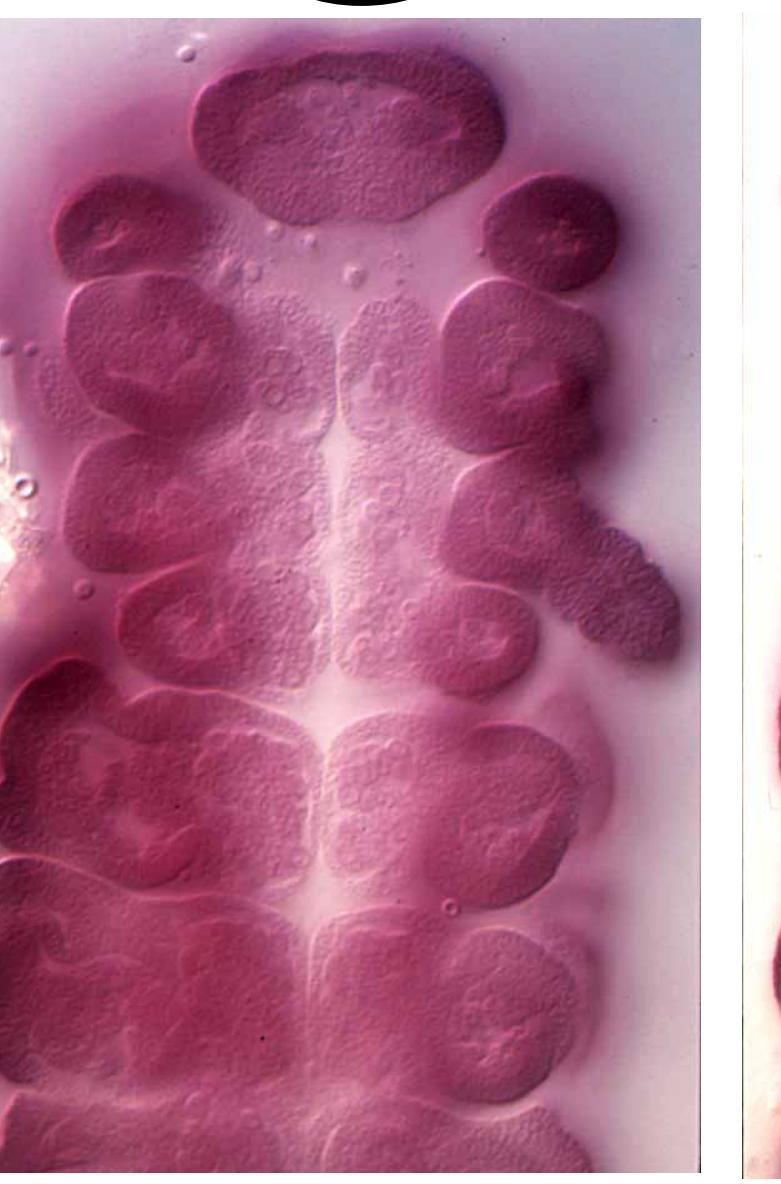

Wholemount of 52h embryo of *Lytta viridana* (Coleoptera: Meloidae)

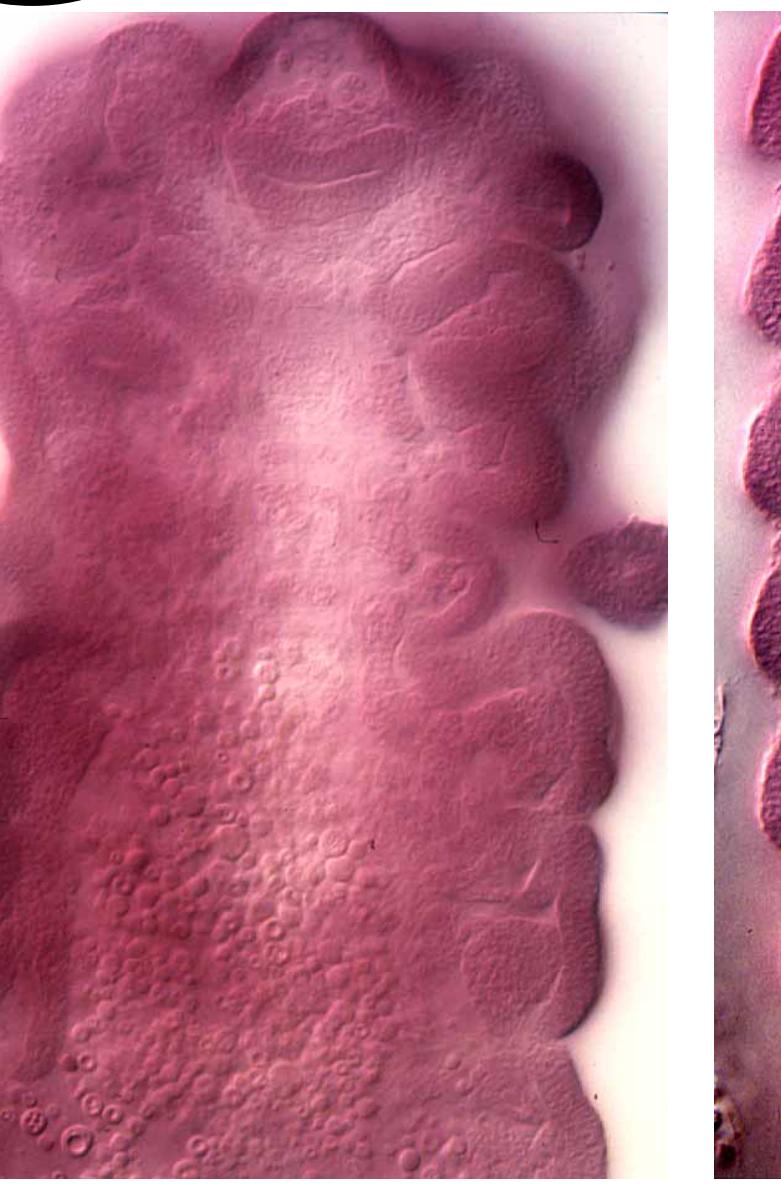

Wholemount of 72h embryo *Lytta viridana*

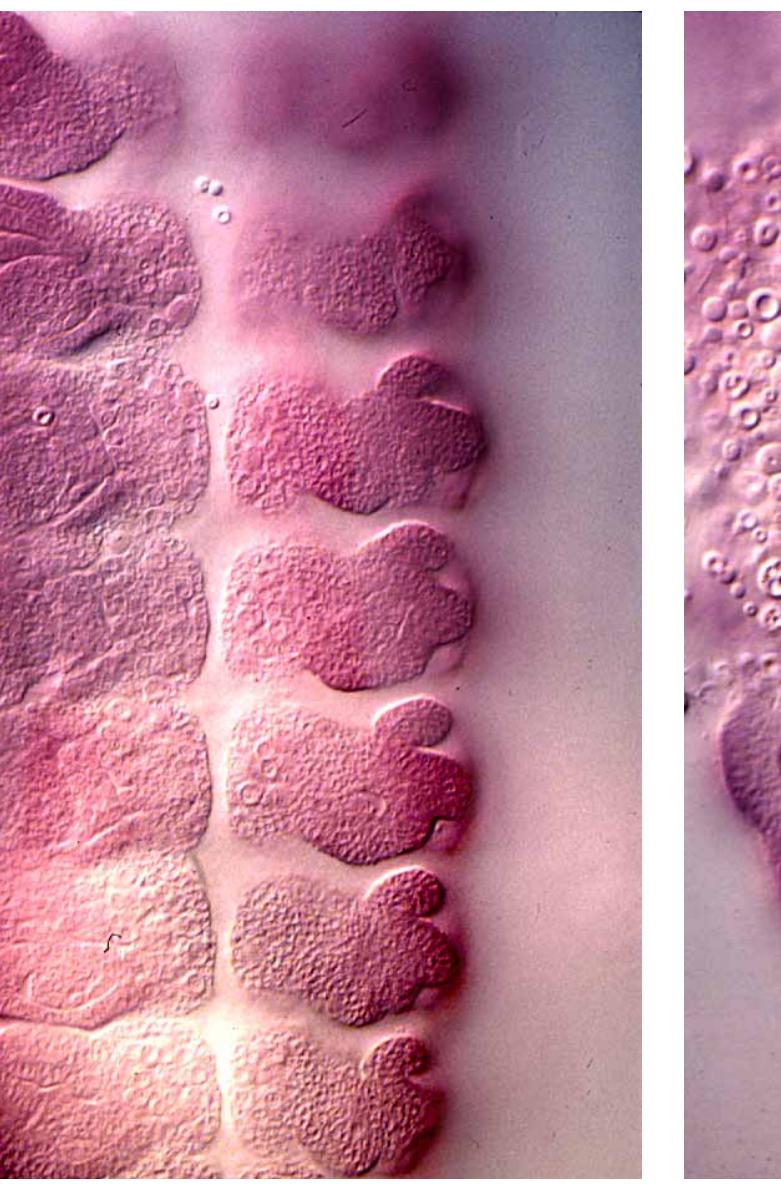

Wholemount of 88h embryo of *Lytta viridana*

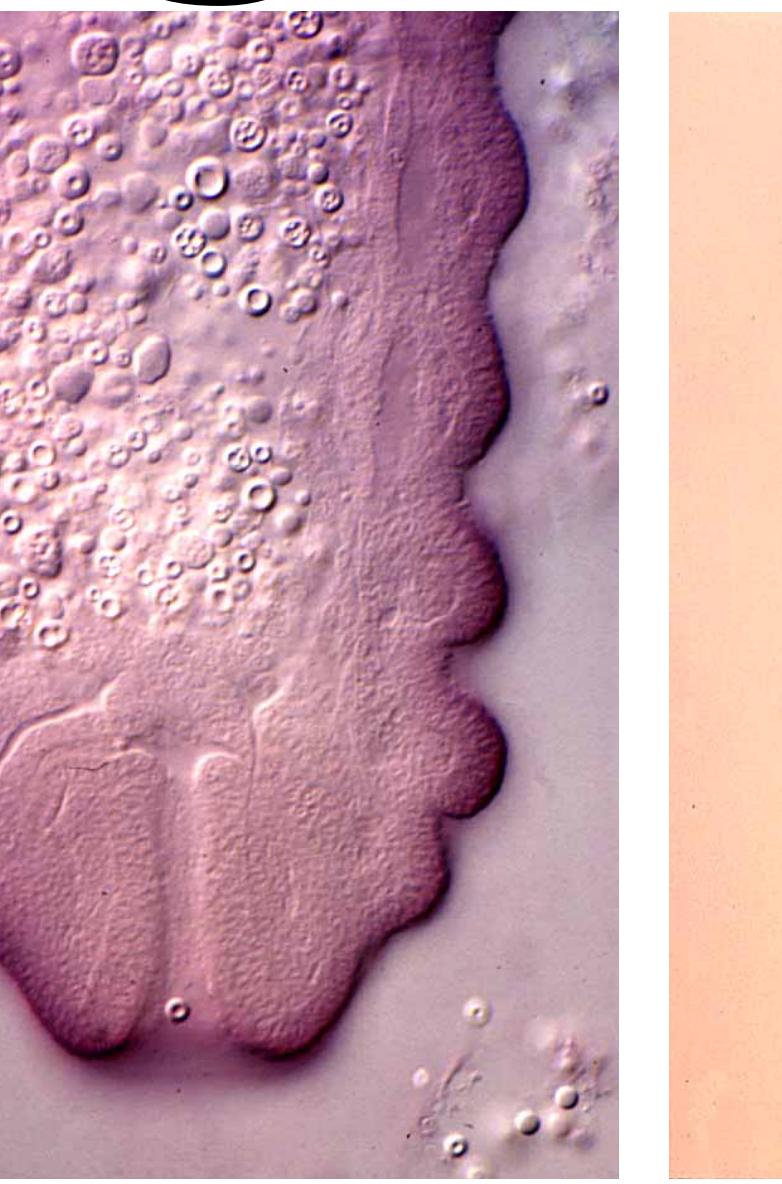

Wholemount of 88h embryo of *Lytta viridana*, showing neuroblasts of developing CNS

Wholemount of 88h embryo of *Lytta viridana*, showing stomodaeum and developing neuropile of CNS

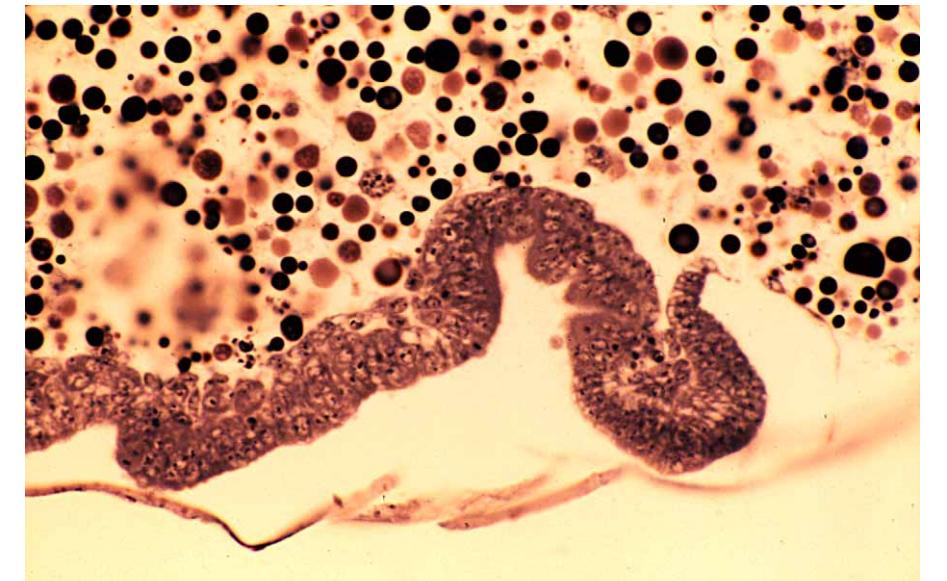

Wholemount of 88h embryo of *Lytta viridana*, showing abdominal neuroblasts

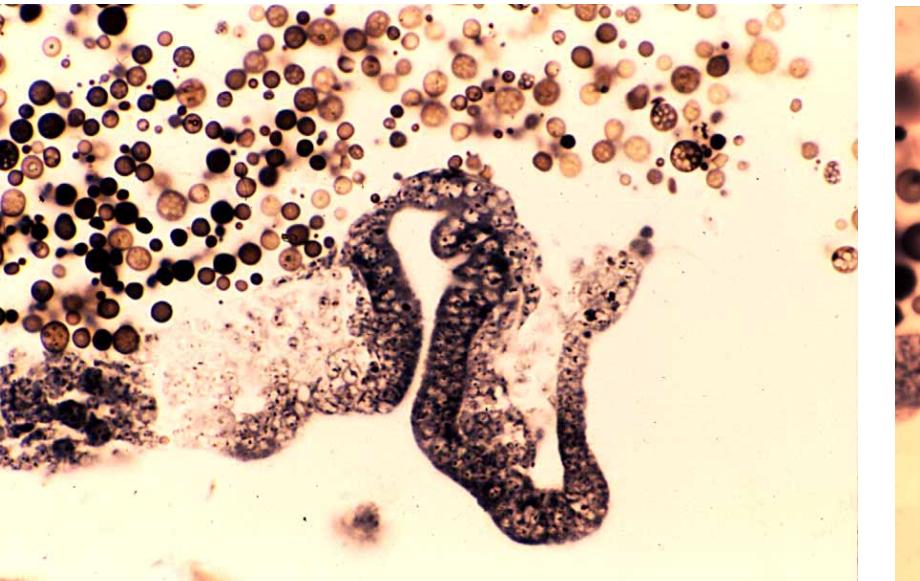

Wholemount of 88h embryo of *Lytta viridana*, showing proctodaeum and MTs

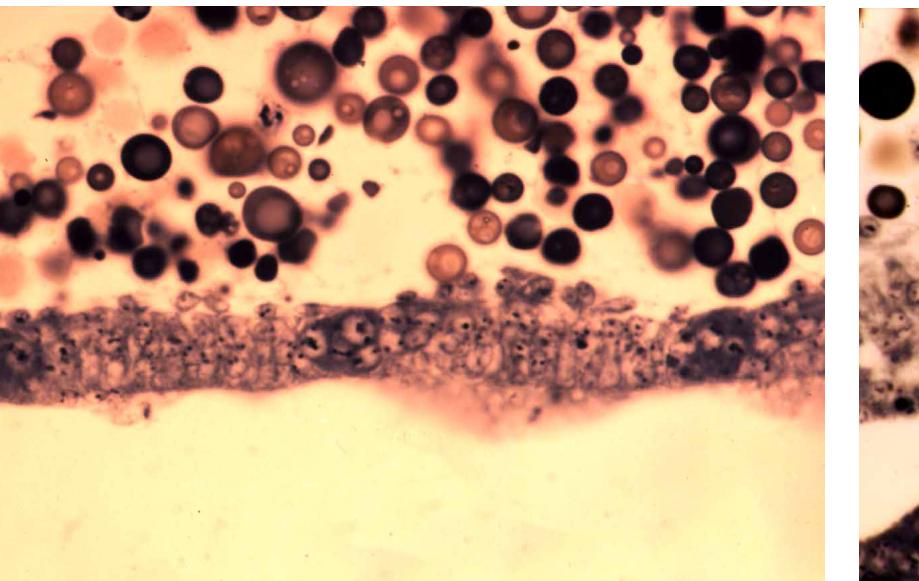

Wholemount of 96h embryo of *Lytta viridana*

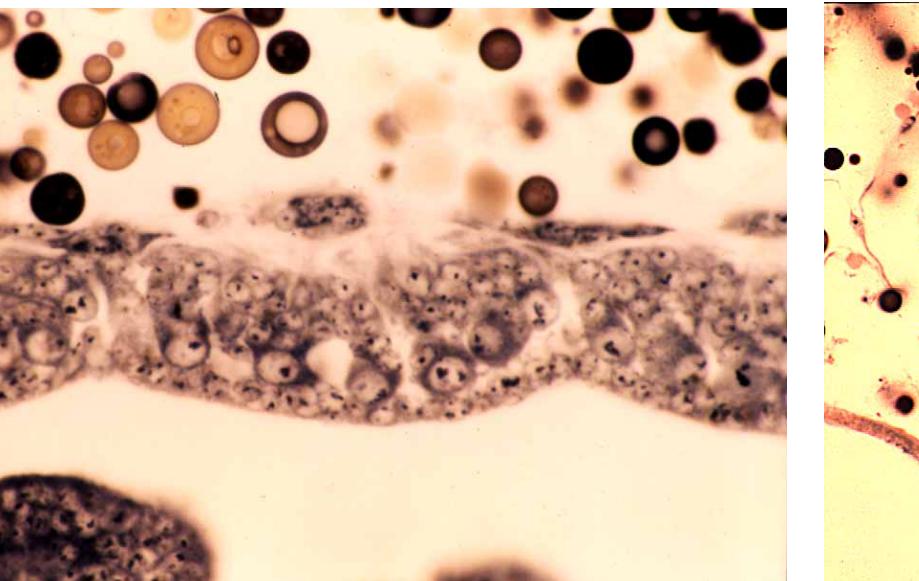

L.S. through stomodaeum of 56h embryo of *Lytta viridana*

L.S. through stomodaeum of 72h embryo of *Lytta viridana*

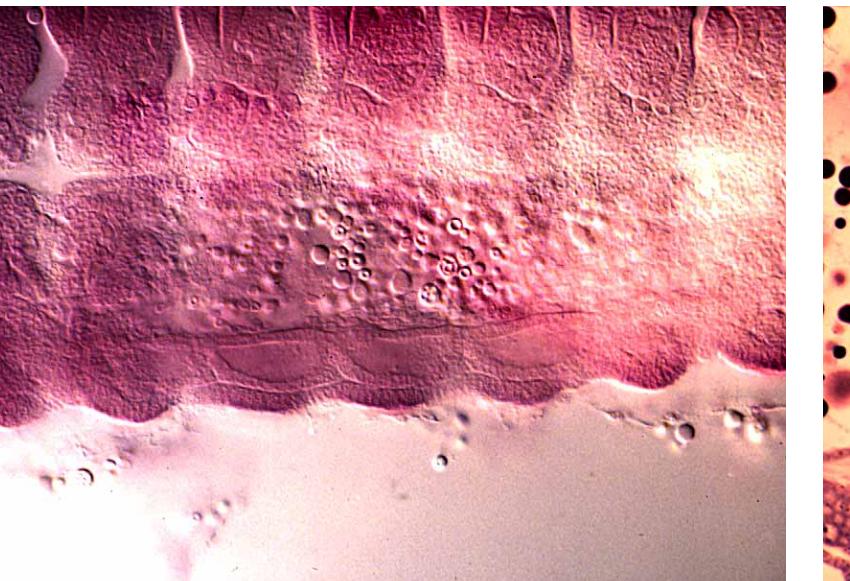

L.S. through midline of 72h embryo of *Lytta viridana*, showing midline precursor neuroblasts

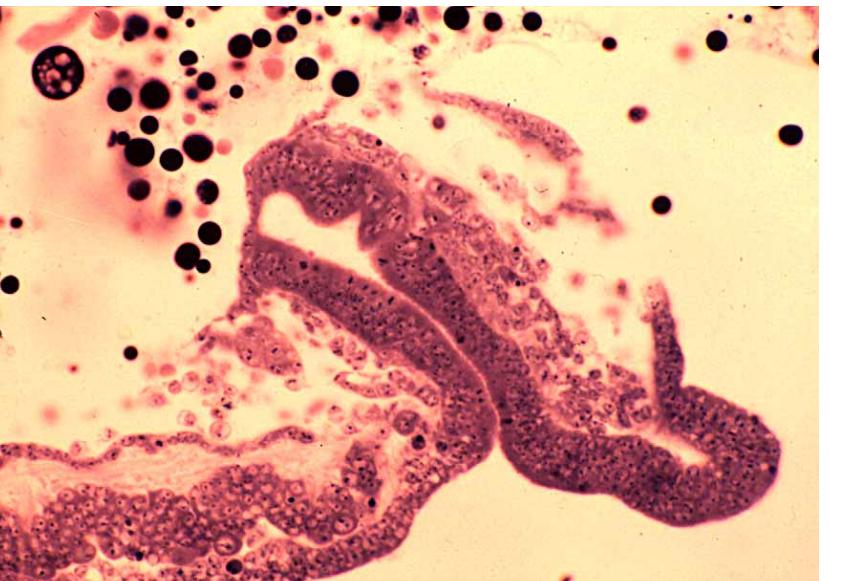

Parasagittal section through 72h embryo of *Lytta viridana*, showing neuroblasts and ganglion mother cells

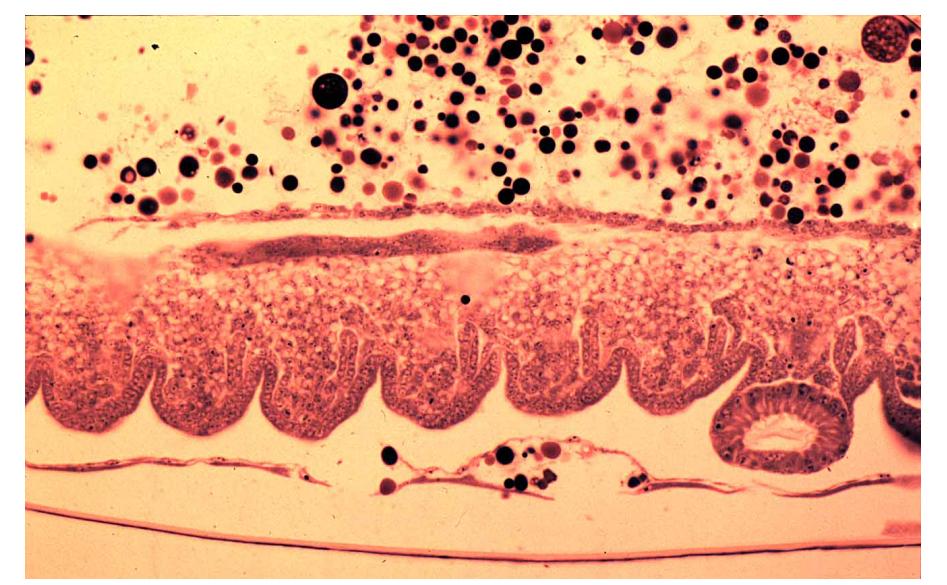

X.S. through prothorax of 72h embryo of *Lytta viridana*

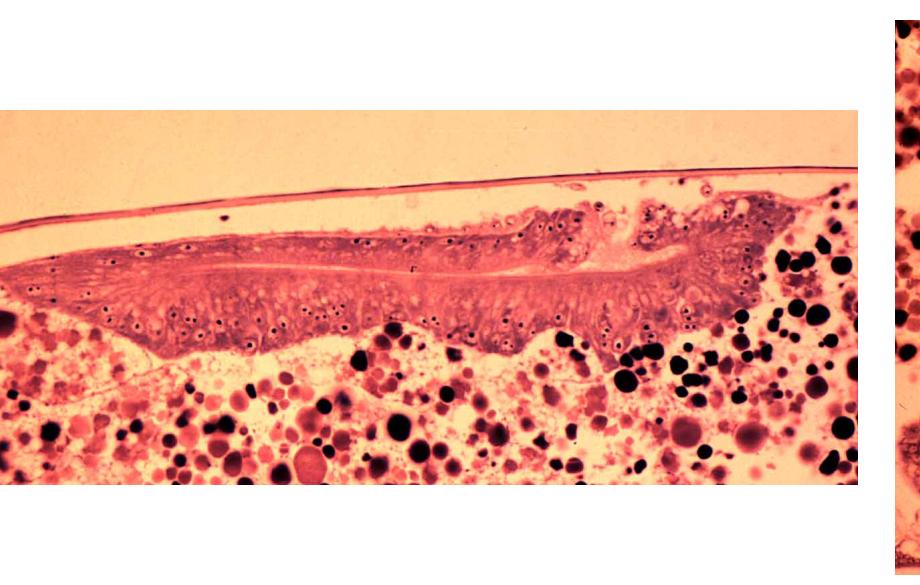

Wholemount of 88h embryo of *Lytta viridana*, showing abdominal coelomic sacs

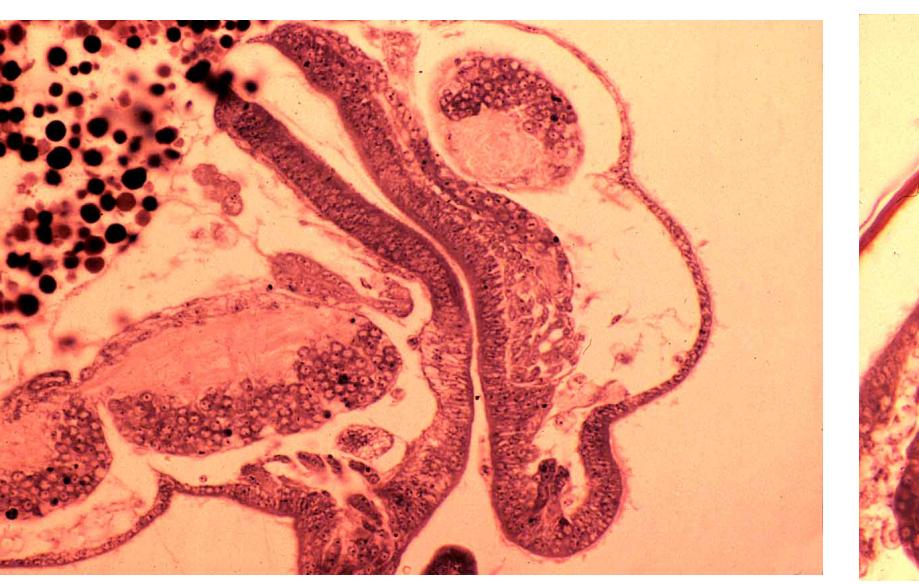

L.S. through stomodaeum of 88h embryo of *Lytta viridana*

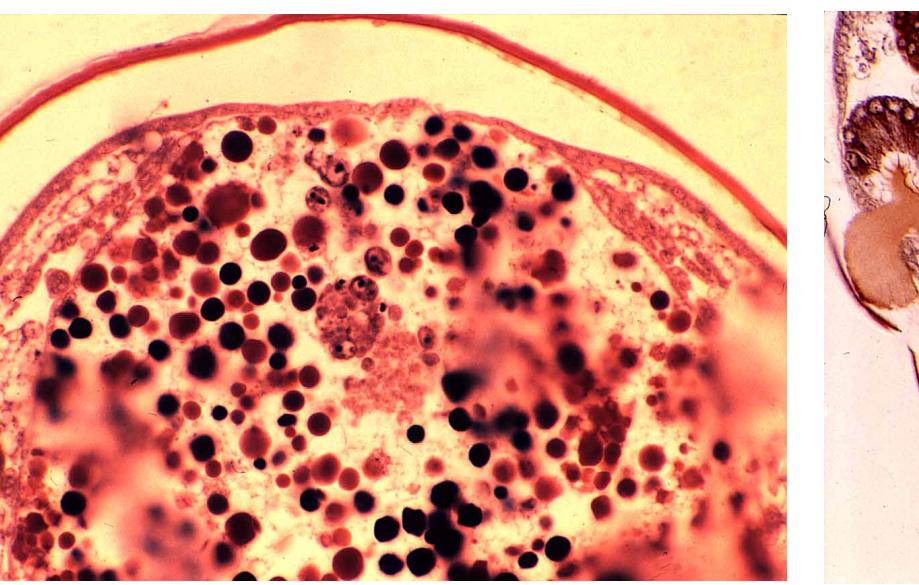

Parasagittal section of 96h embryo of *Lytta viridana*, showing genital ridge

L.S. through secondary dorsal organ of 120h embryo of *Lytta viridana*

L.S. through stomodaeum of 120h embryo of *Lytta viridana*

X.S. through 132h embryo of *Lytta viridana* just before dorsal closure

X.S. through abdominal segment 1 of a 132h embryo of *Lytta viridana*, showing pleuropodia

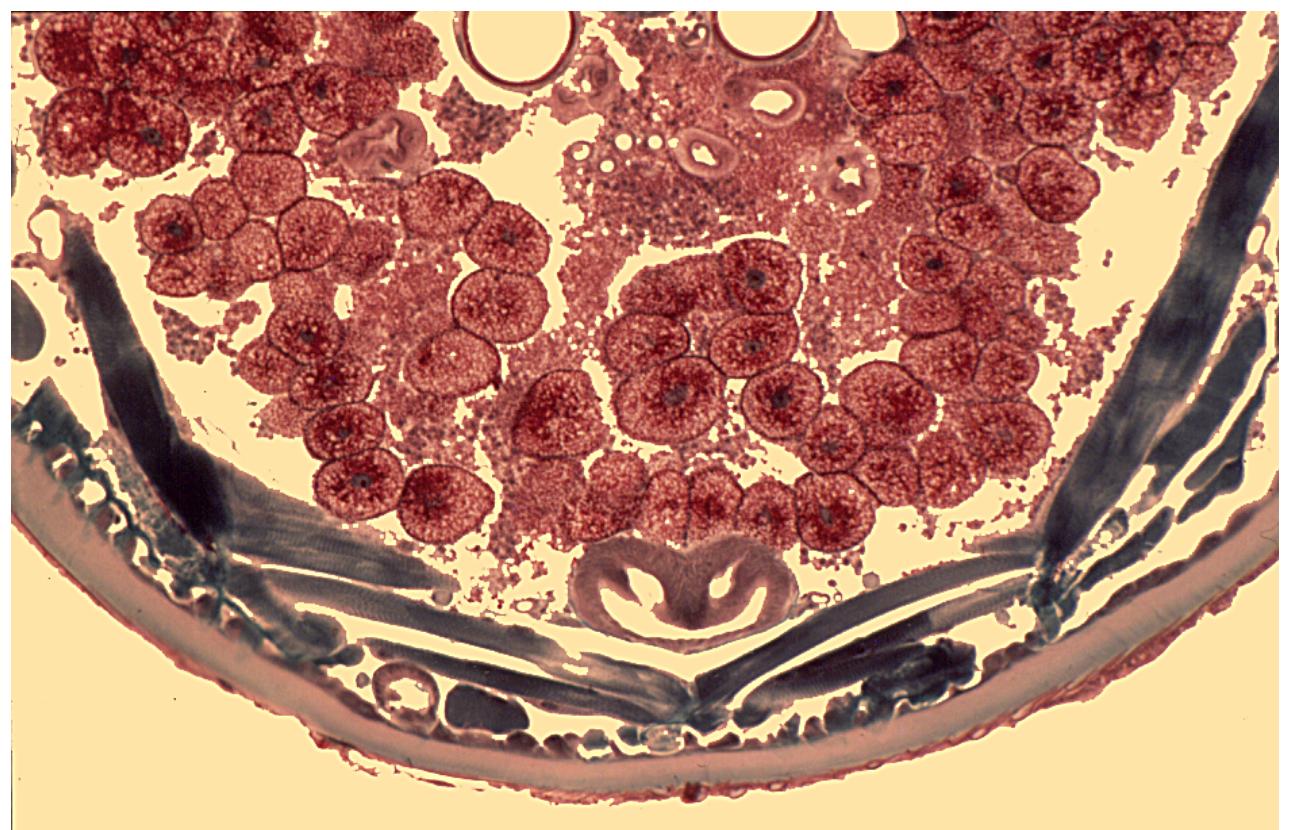

F.S. of embryo of *Gymnopais* sp. (Diptera: Simuliidae), showing cardioblasts zipping up at dorsal closure

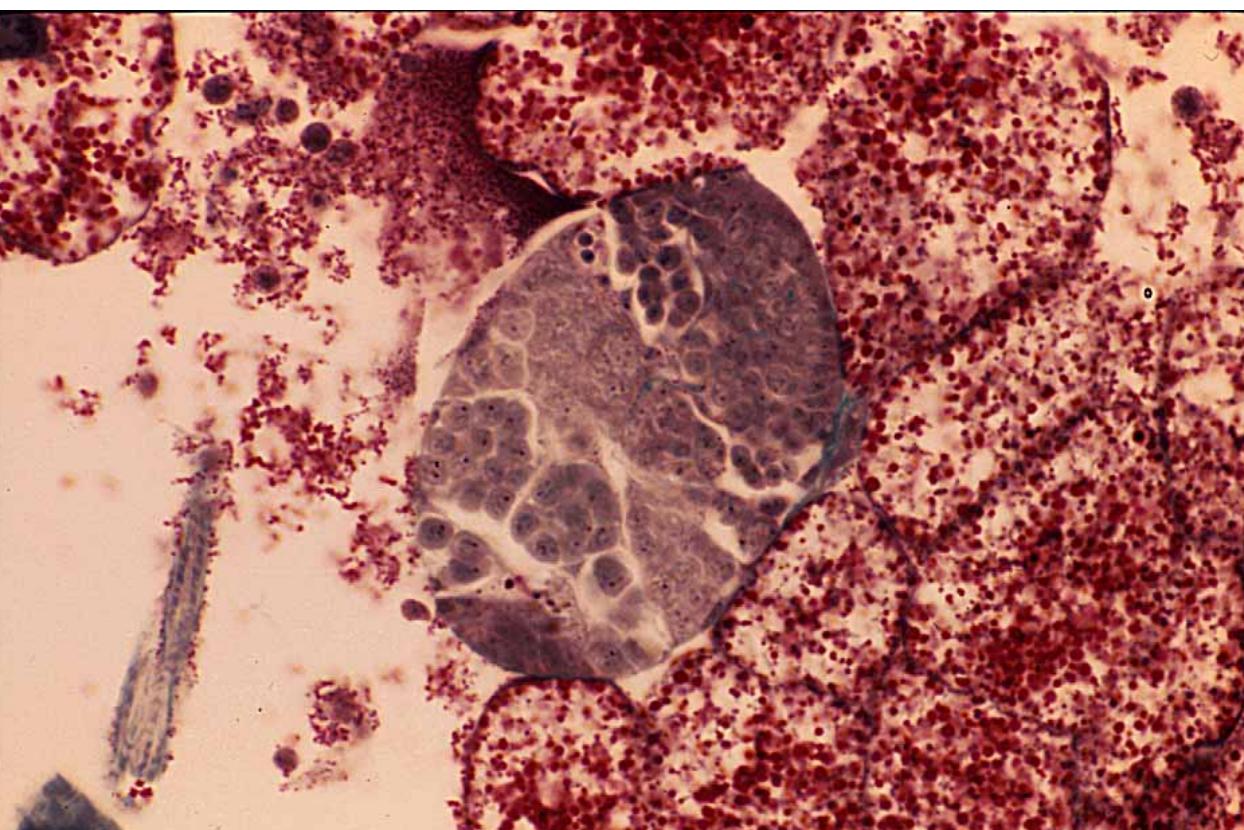

X.S. through abdomen of *Rhodnius prolixus* embryo (Hemiptera: Reduviidae), showing germ cells, mesoderm and neural groove

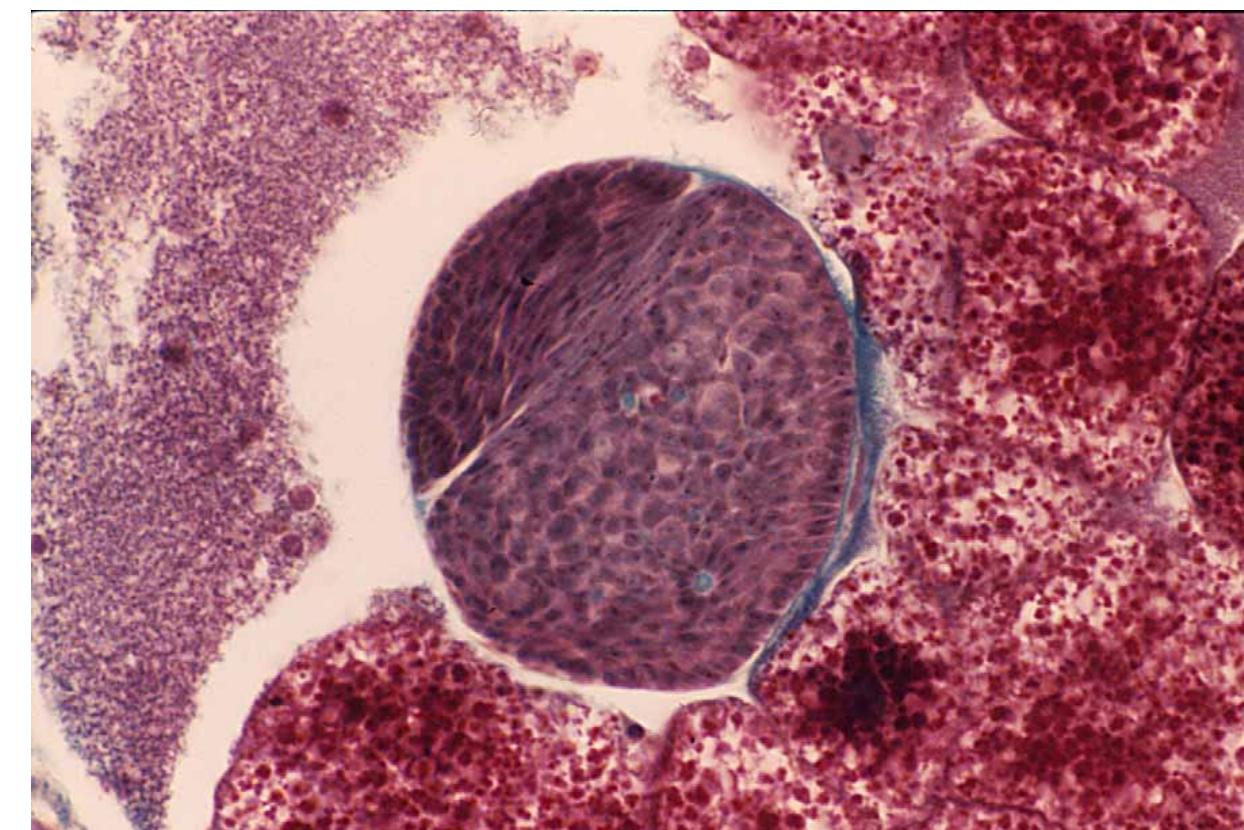

IMAGINAL DISCS

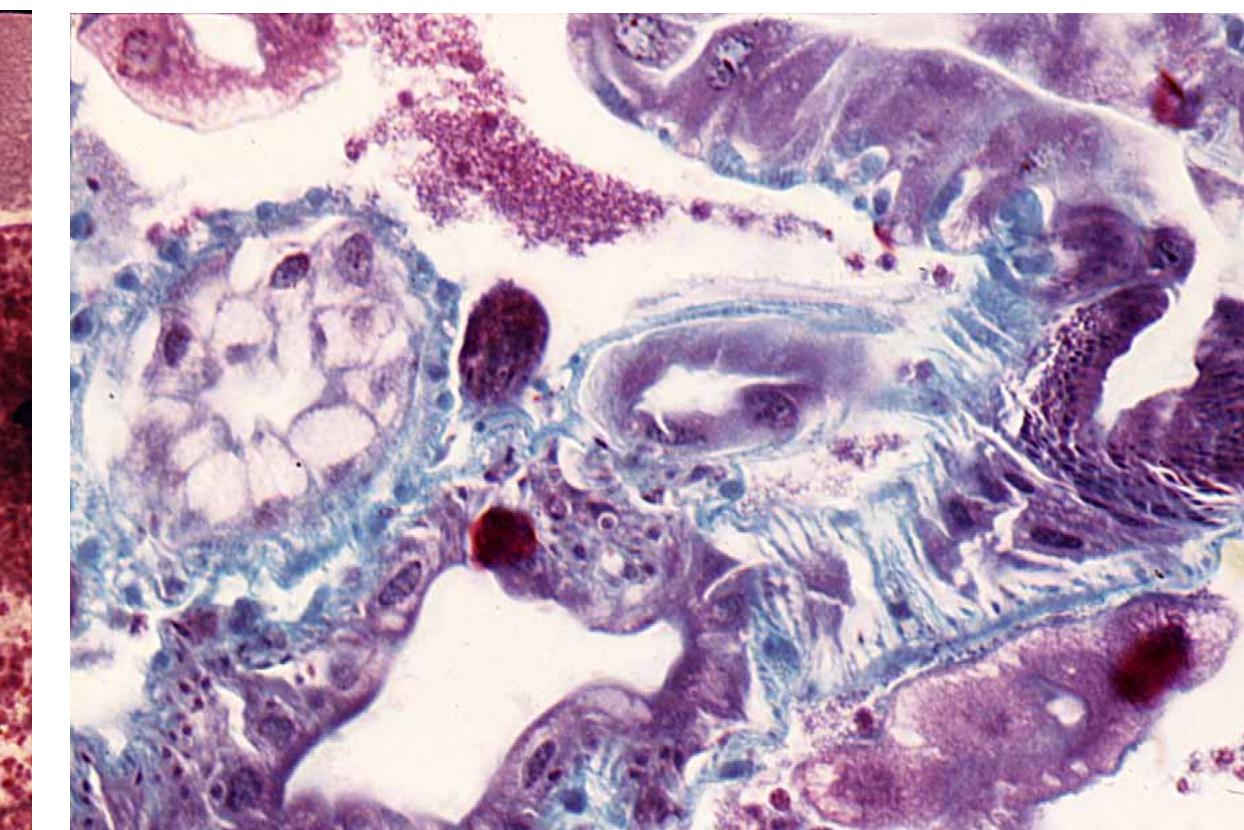

X.S. through genital disc of larva III of
Musca domestica (Diptera:
Muscidae)

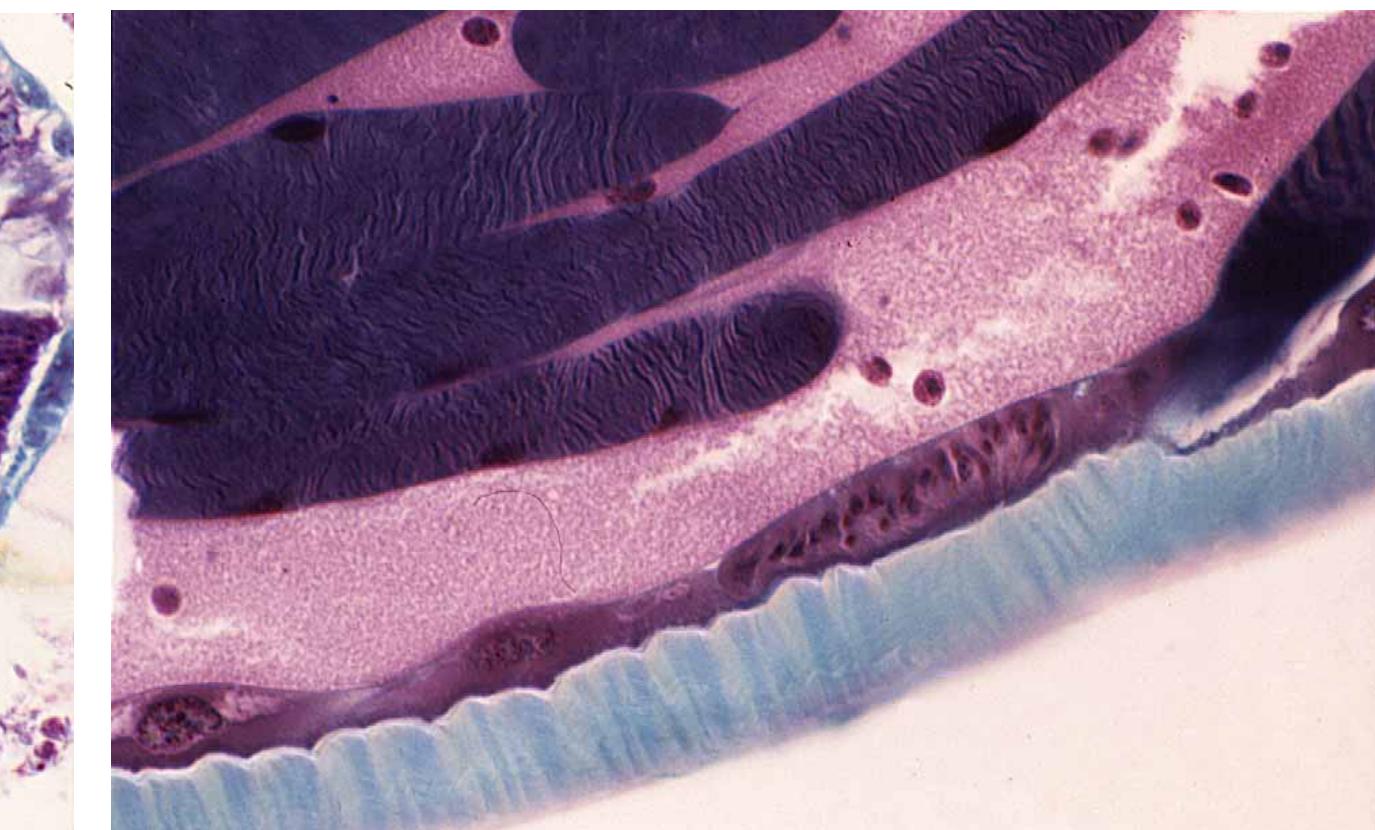

L.S. through testis rudiment of larva
III

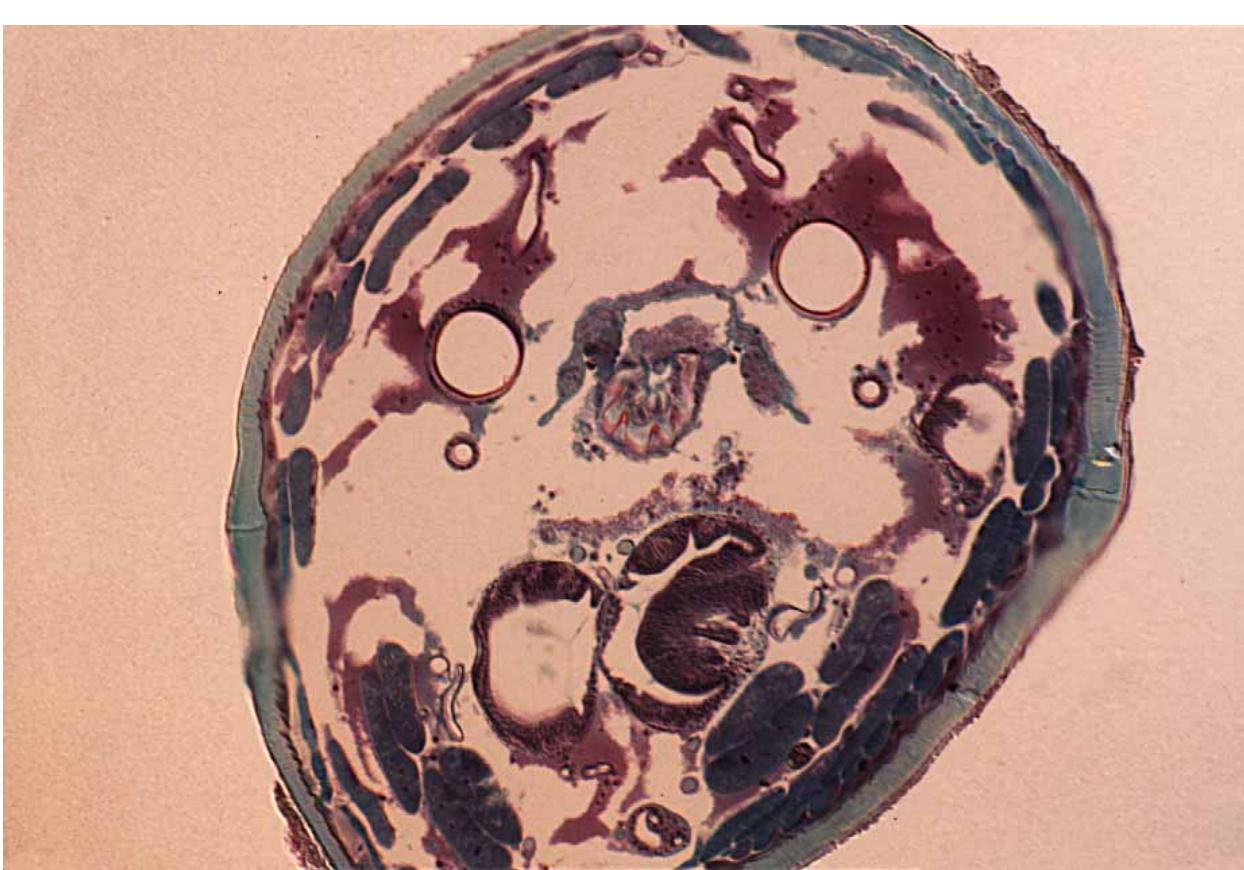

X.S. through ovary rudiment of larva
III

L.S. through mid- and hindguts of
larva III, showing imaginal midgut
islands

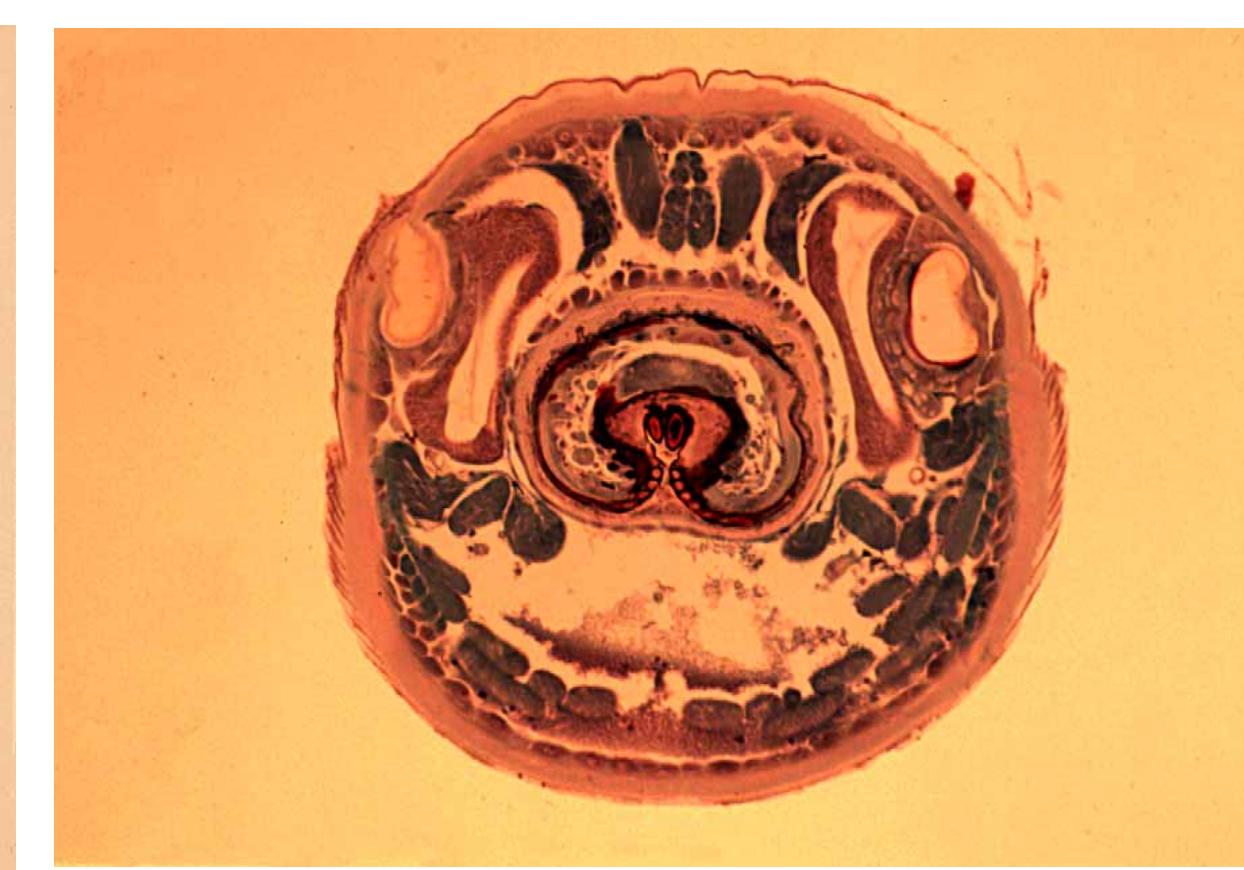

X.S. through imaginal abdominal
histoblast of larva III

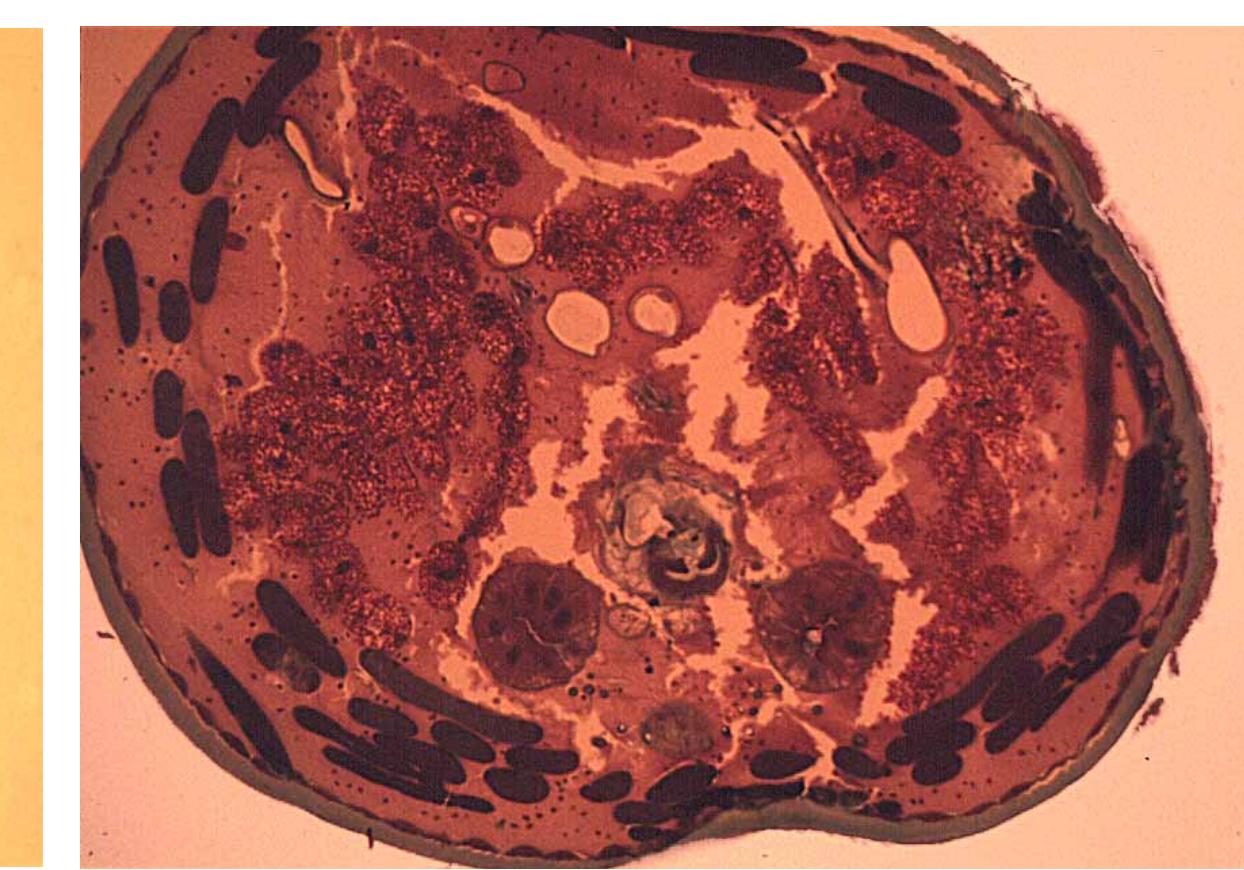

X.S. through larva III and prothoracic
imaginal discs

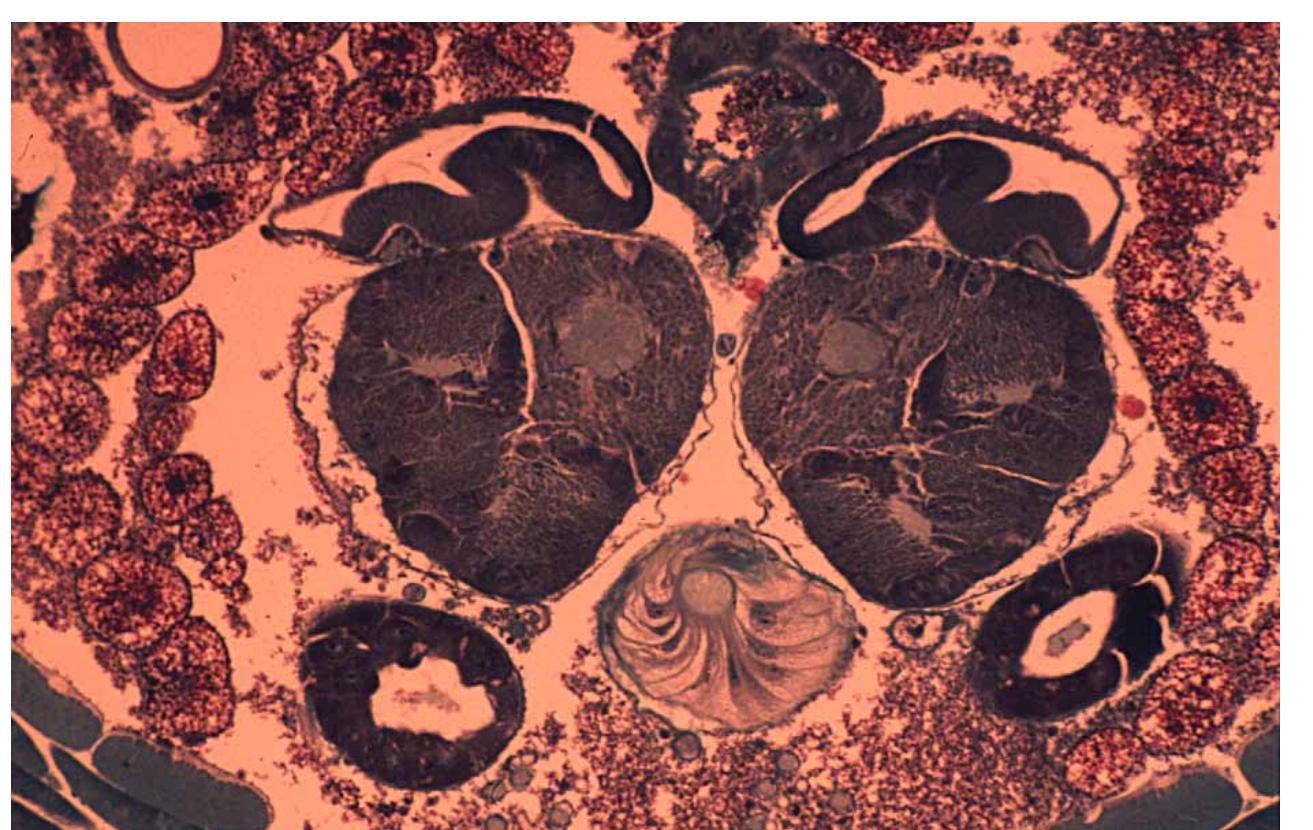

X.S. through larva III and most
thoracic imaginal discs

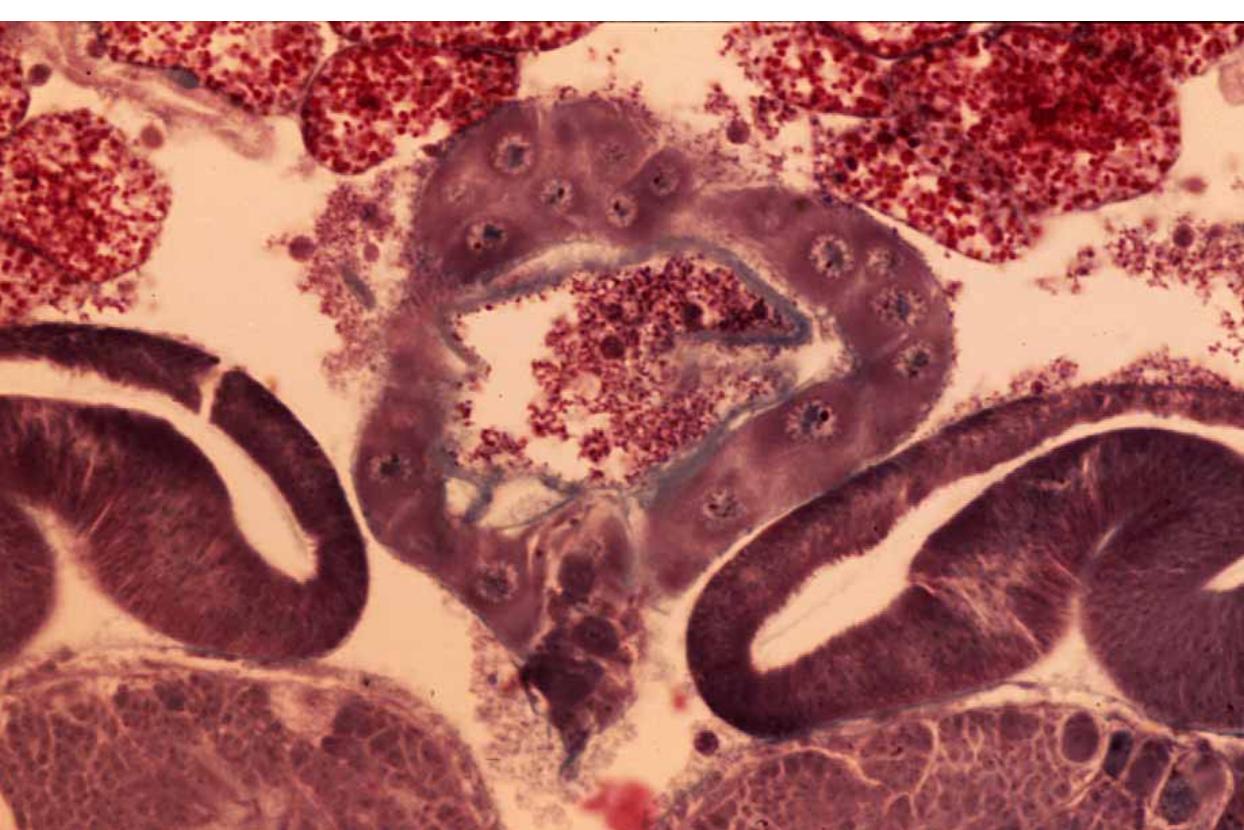

X.S. through mouthhooks and dorsal
prothoracic discs of larva III

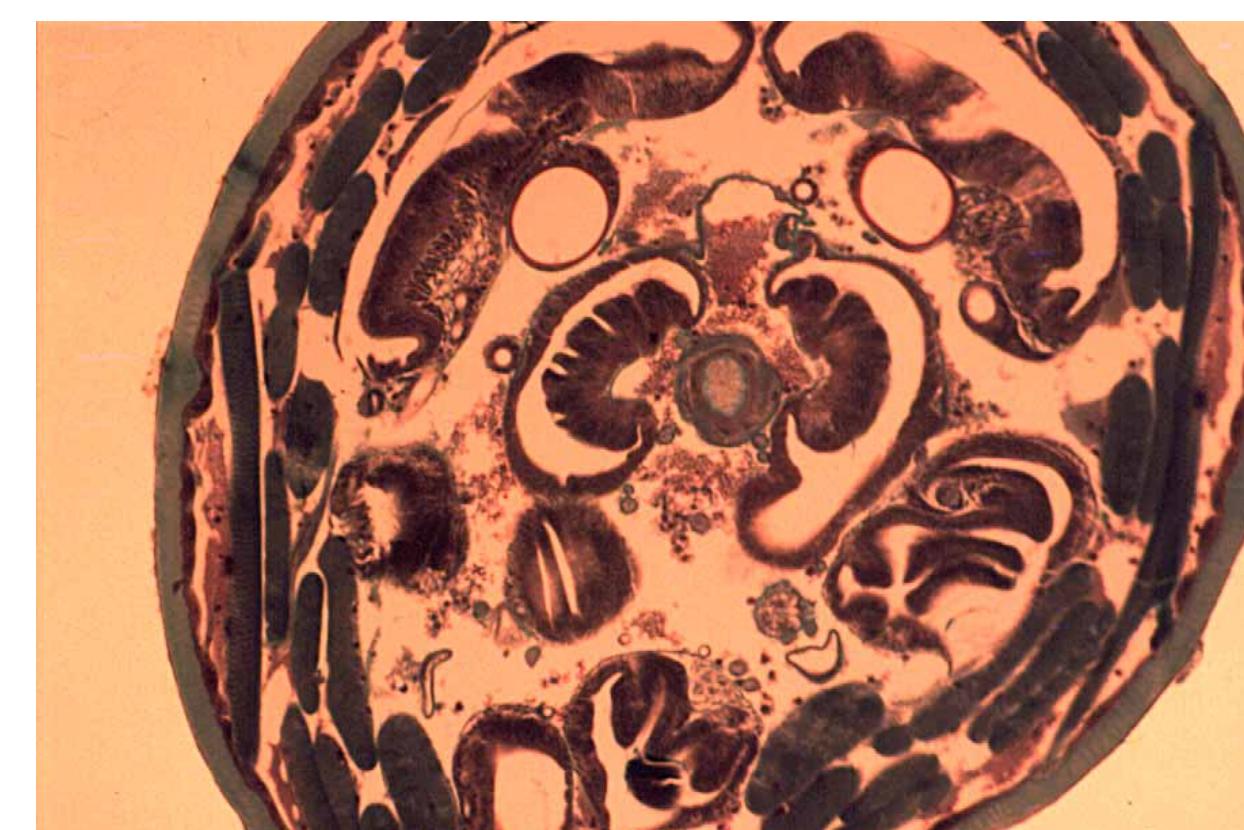

X.S. through imaginal ring of foregut
and larval salivary glands of larva III

X.S. through protocerebral lobes, ring
gland and eye/entennal discs of larva
III

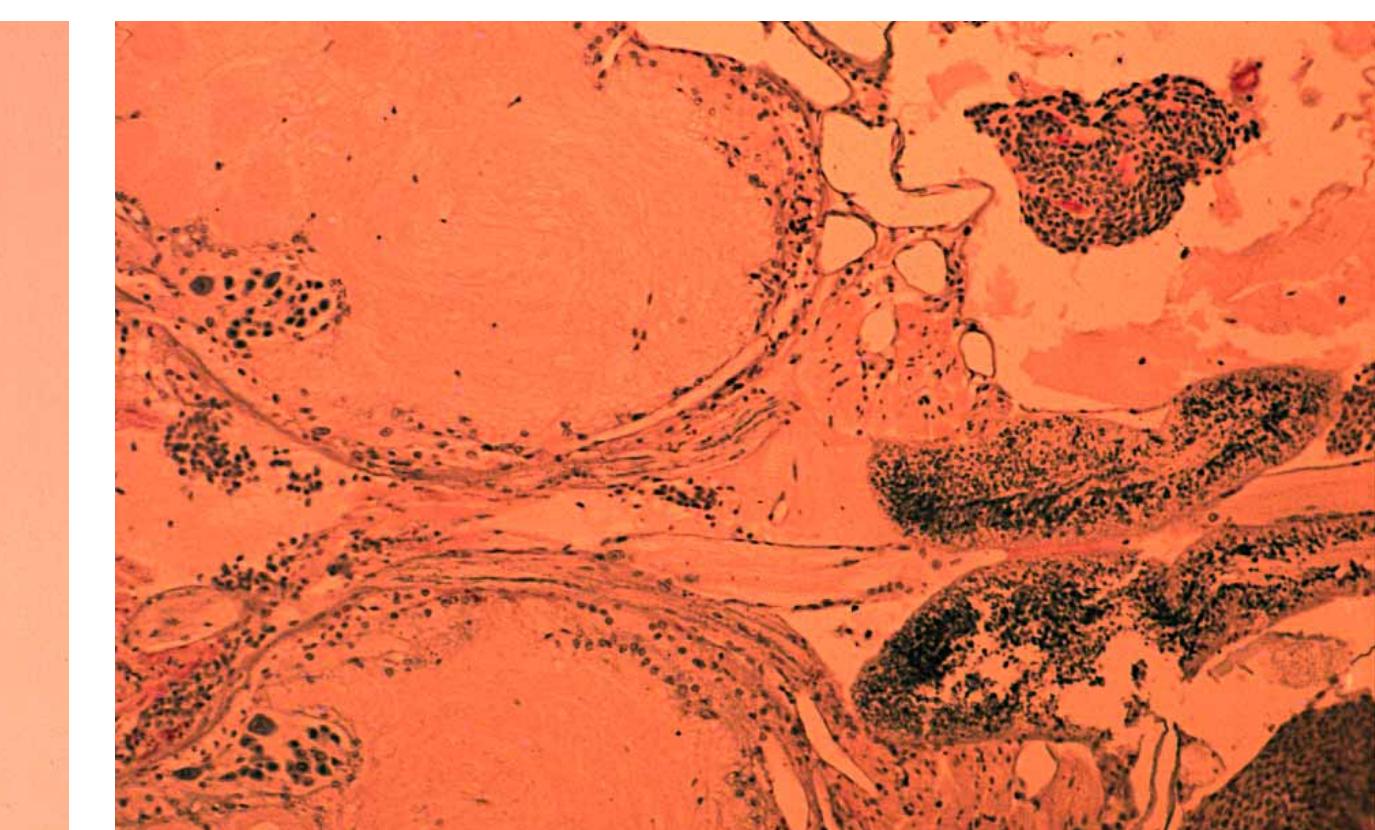

X.S. through ring gland and eye/
antennal discs of larva III

X.S. through eye/antennal discs of
larva III

X.S. through cephalopharyngeal
skeleton and labial discs

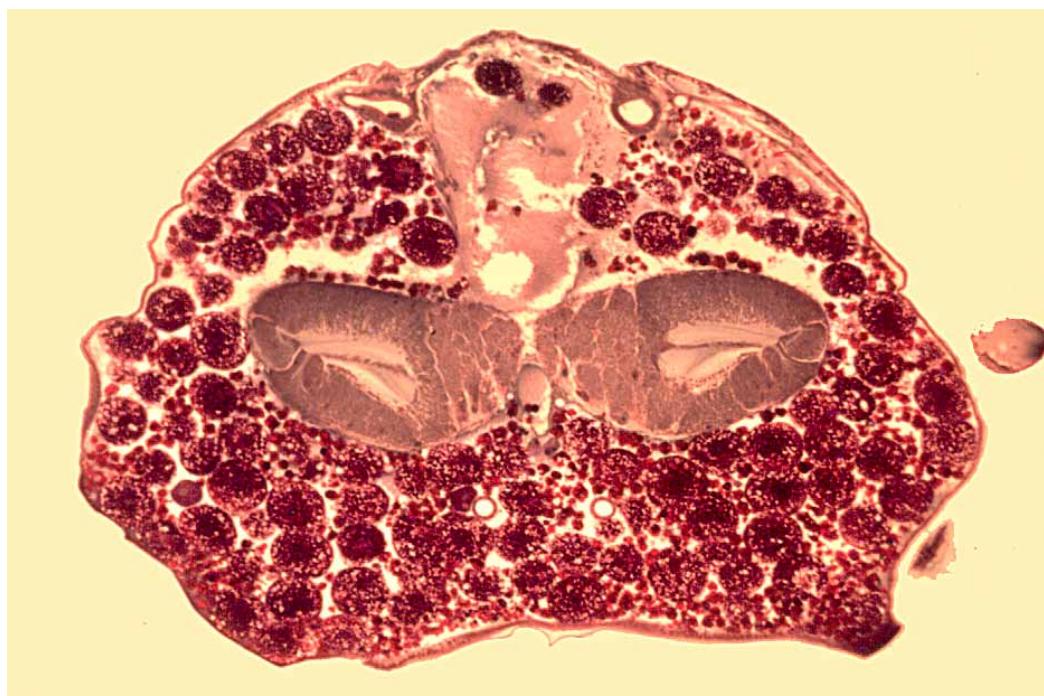

F.S. through protocerebral lobes, re-
current nerve, neurosecretory cells
and corpora cardiaca of *Periplaneta*
americana (Blattodea: Blattidae)
nymph

M E T A M O R P H O S I S

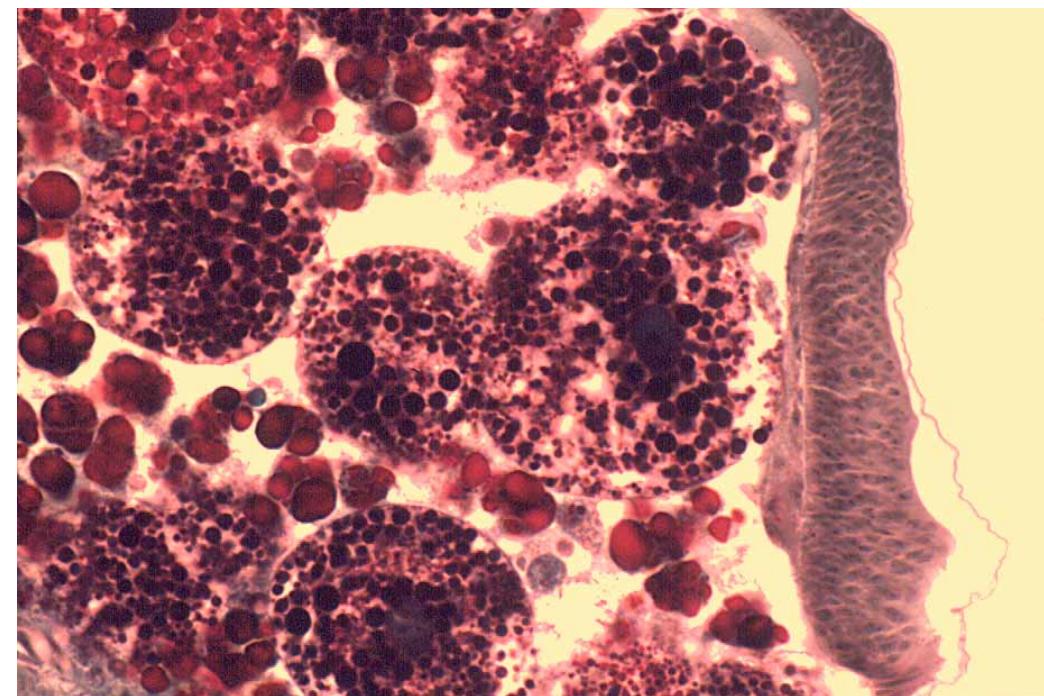

In *Musca domestica* (Diptera: Muscidae)

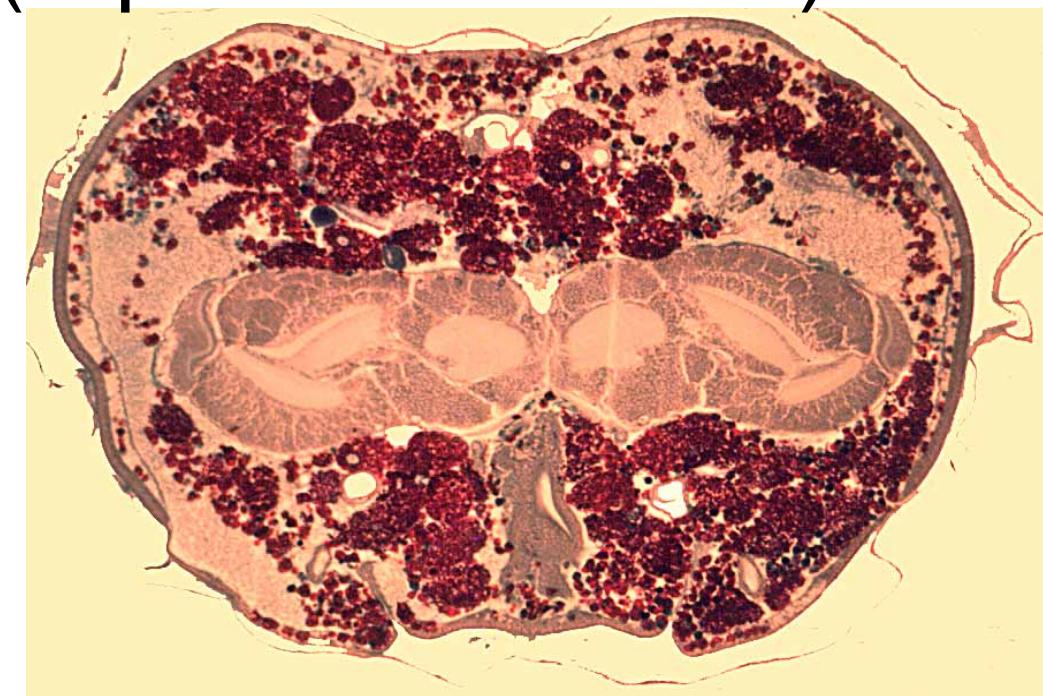

Squash preparation of polytene larval salivary gland chromosomes of *Simulium* sp. (Diptera: Simuliidae)

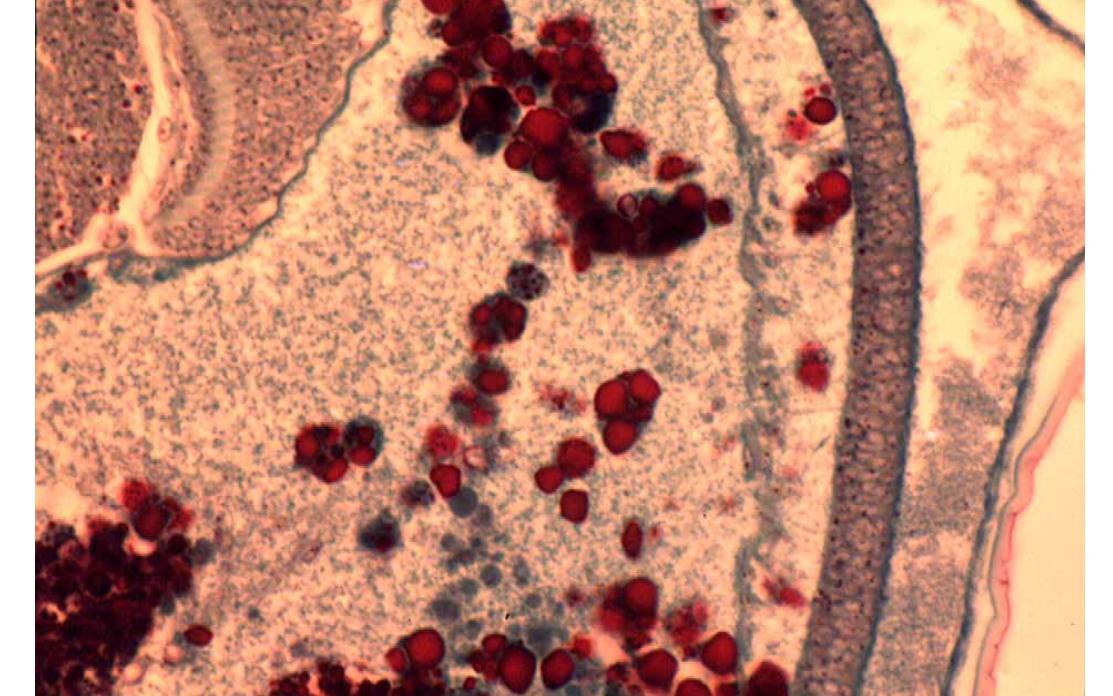

F.S. of head and brain 24h after pupariation (24h AP)

F.S. of compound eye 24h AP

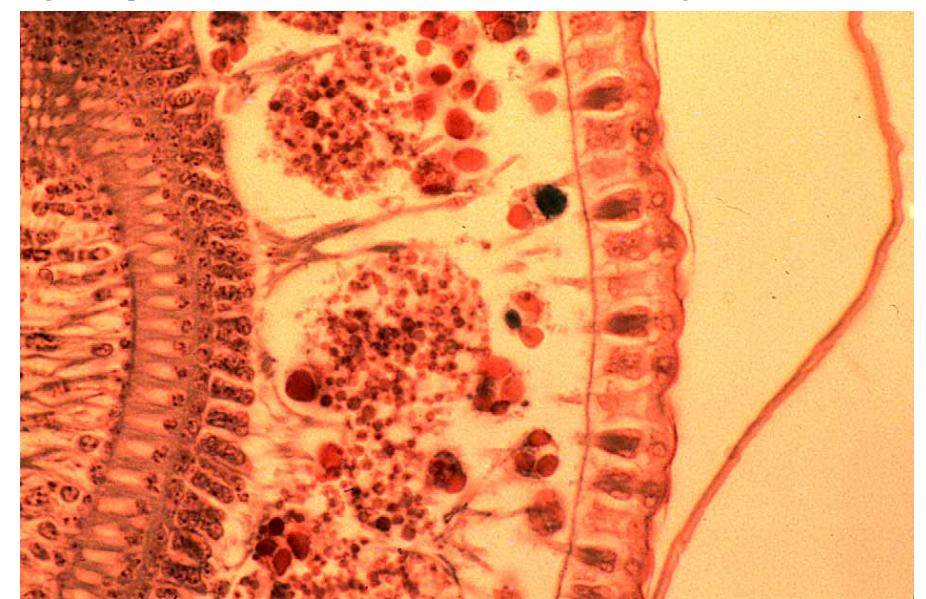

F.S. of head and brain 48h AP

F.S. of compound eye 48h AP

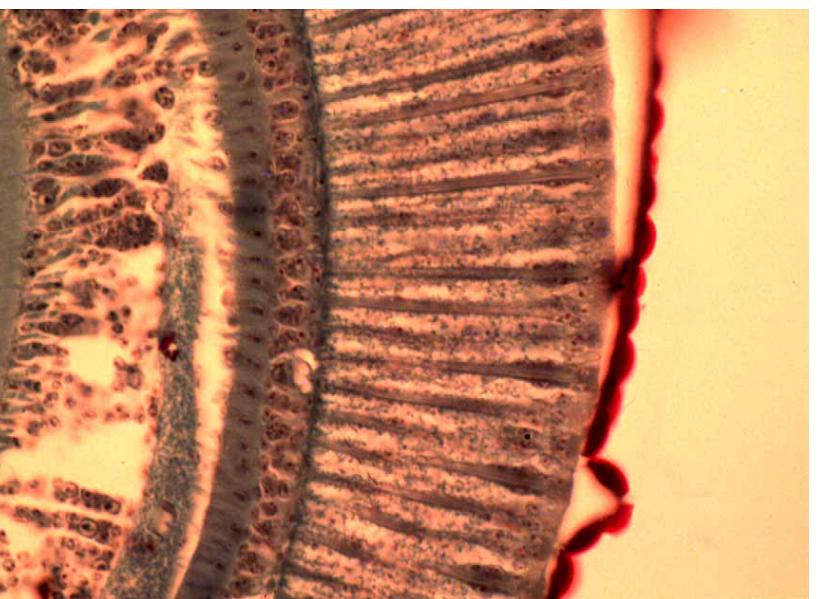

F.S. of head and brain 4 days AP

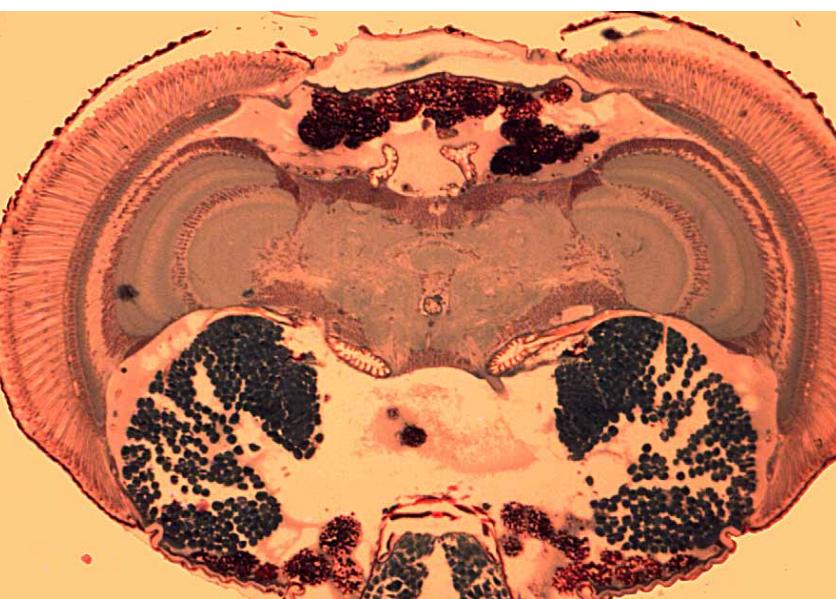

F.S. of compound eyes 4 days AP

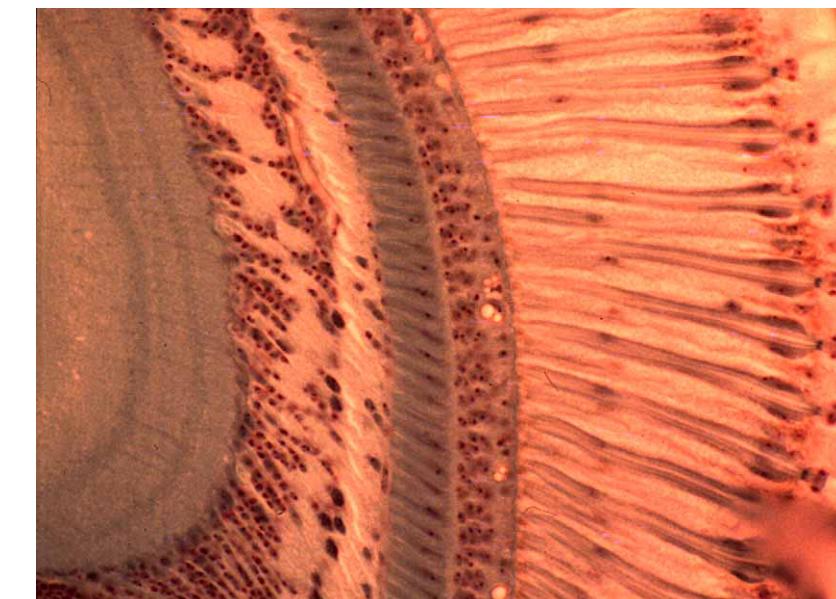

F.S. of head and brain 6 days AP

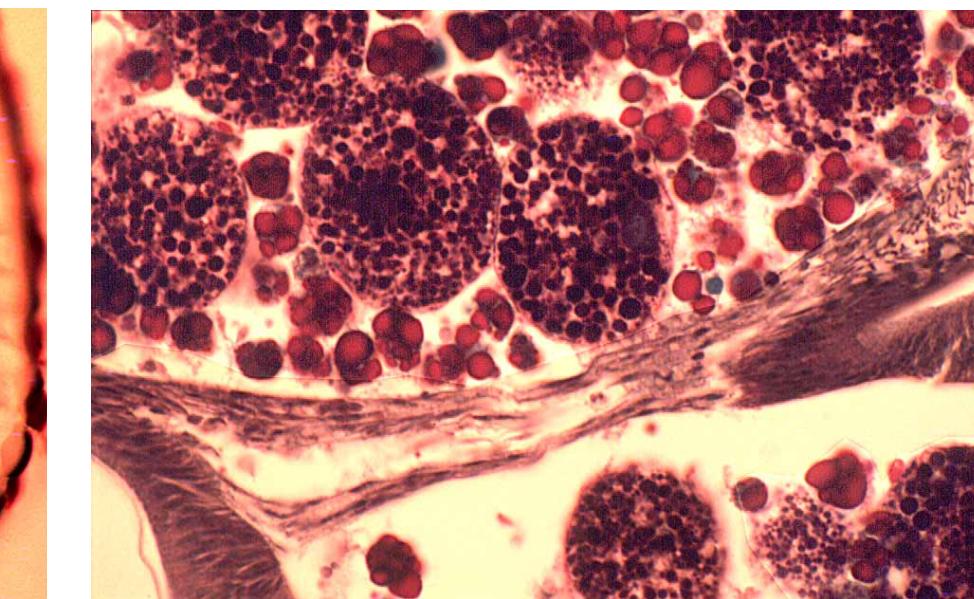

F.S. of compound eyes 6 days AP

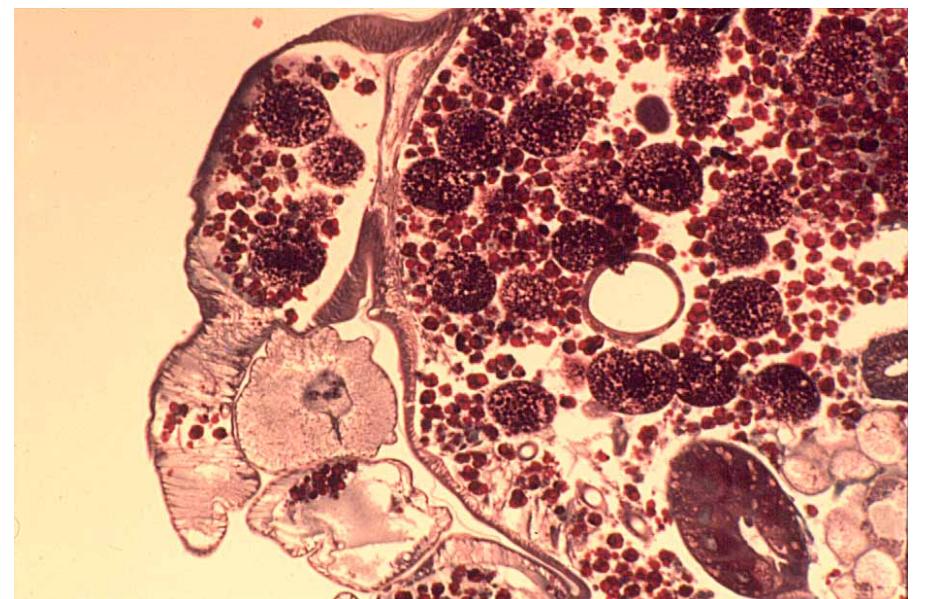

F.S. of head and brain - late pharate adult

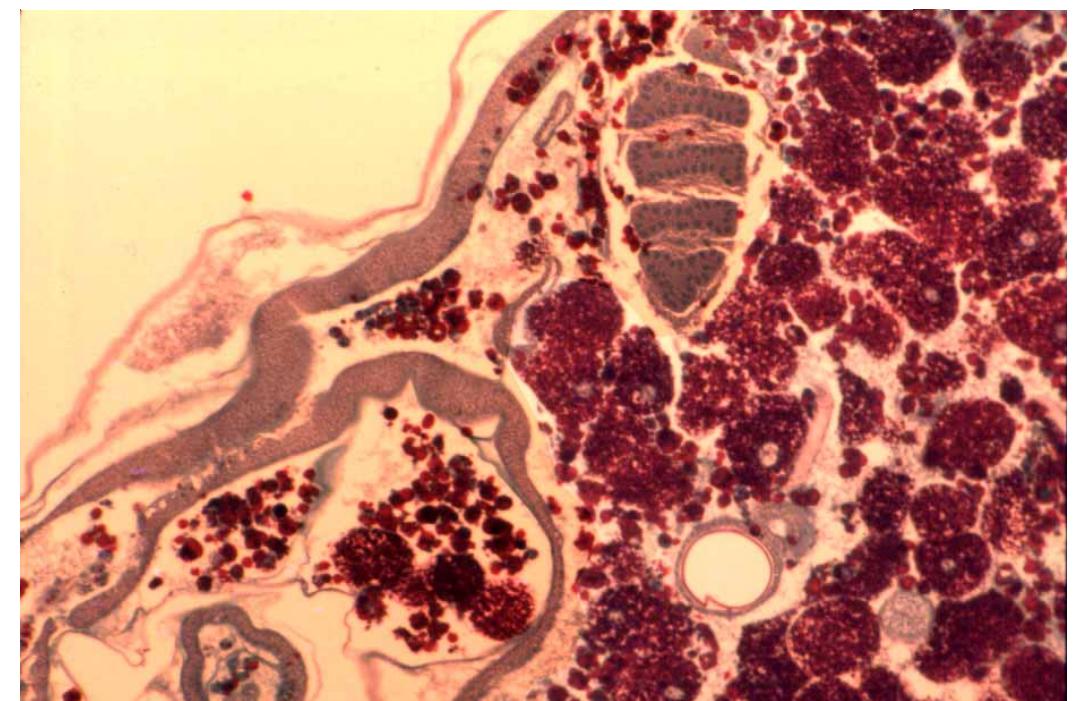

F.S. of compound eye - late pharate adult

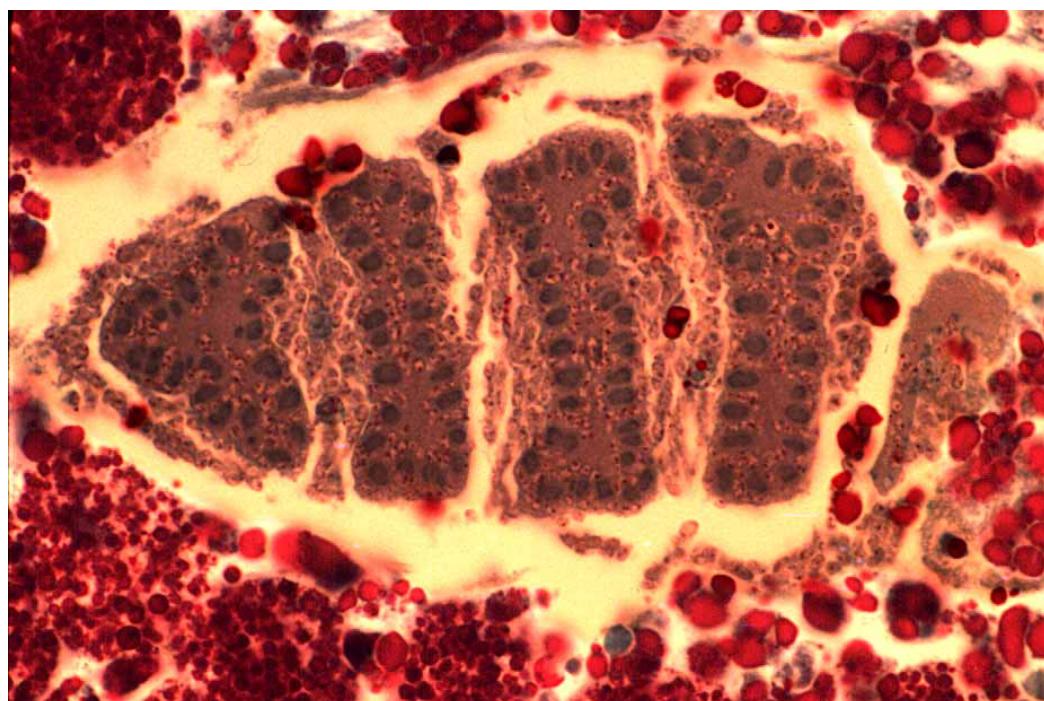

X.S. of wing base 24h AP

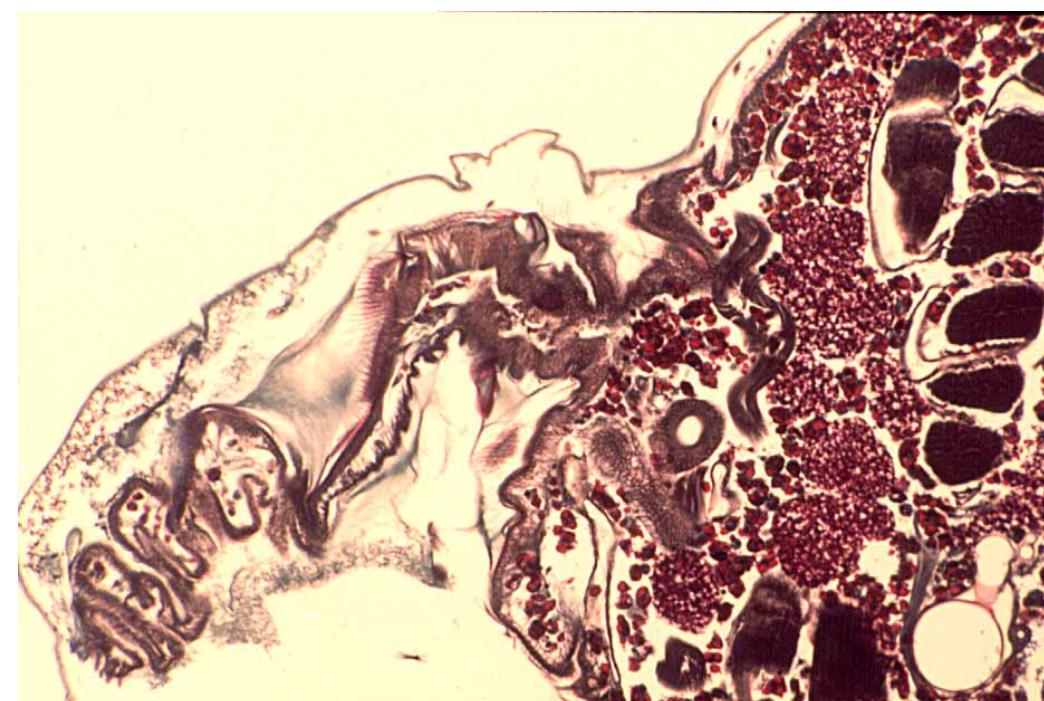

X.S. of wing base 24h AP

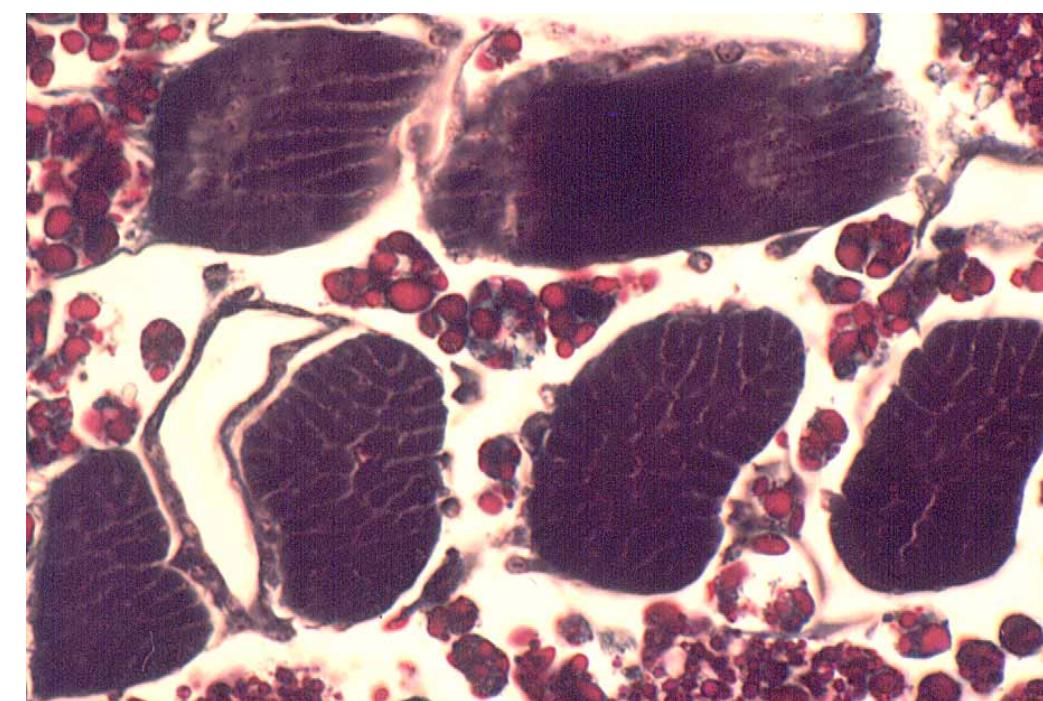

X.S. of wing base 48h AP

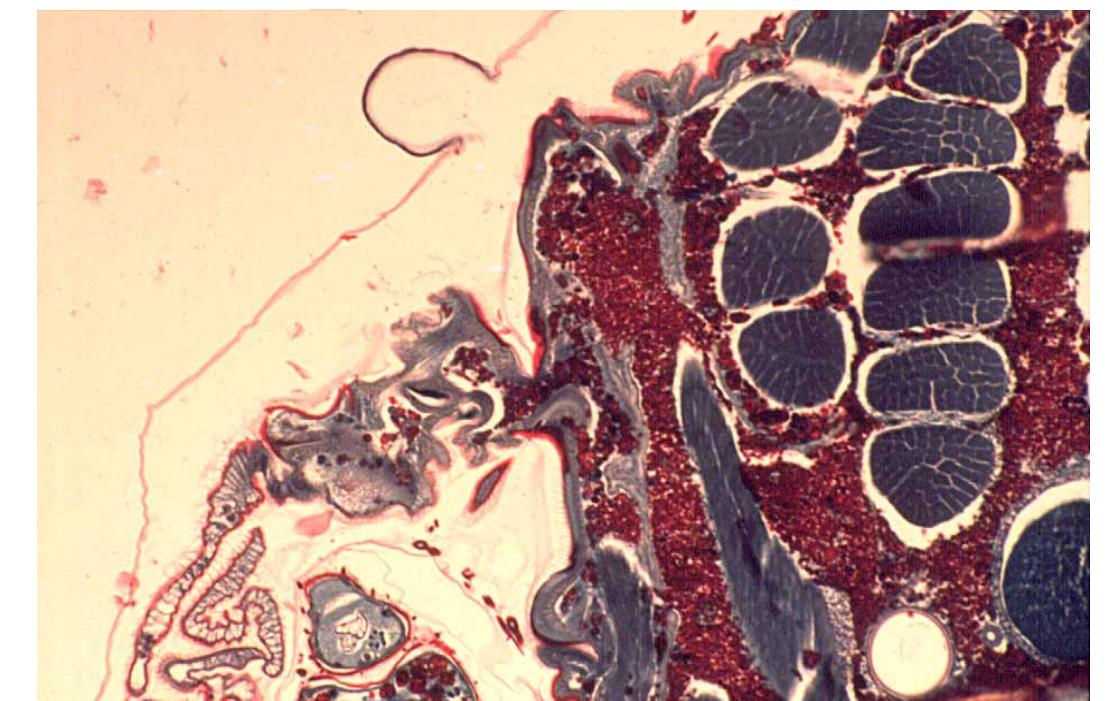

X.S. of wing base 48h AP

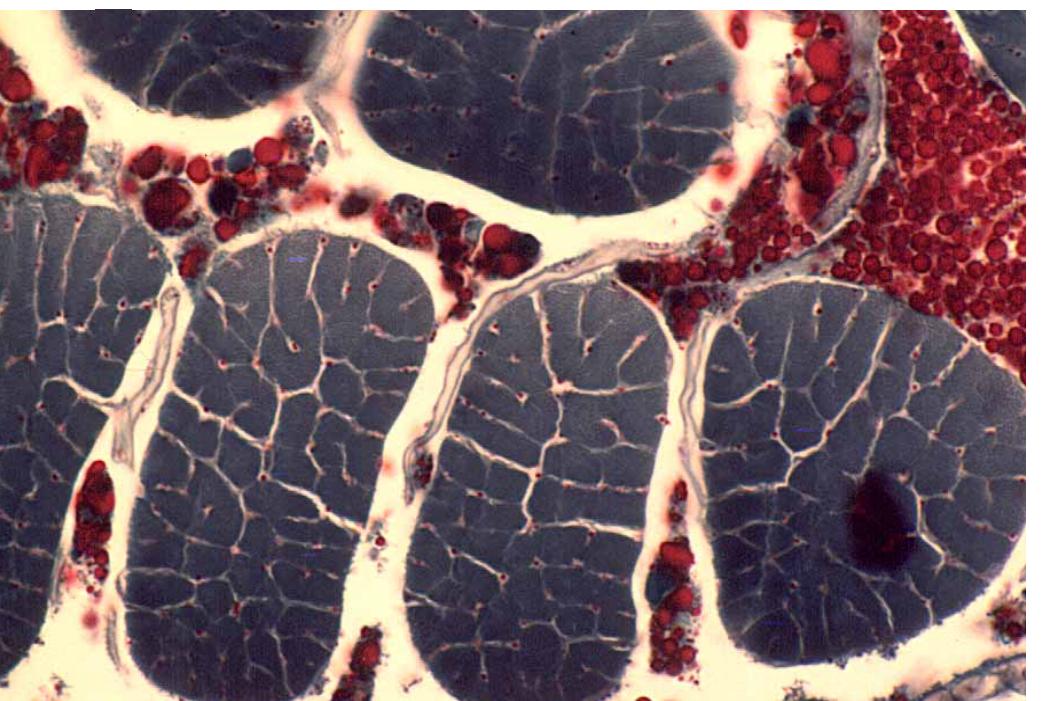

X.S. of wing base 4 days AP

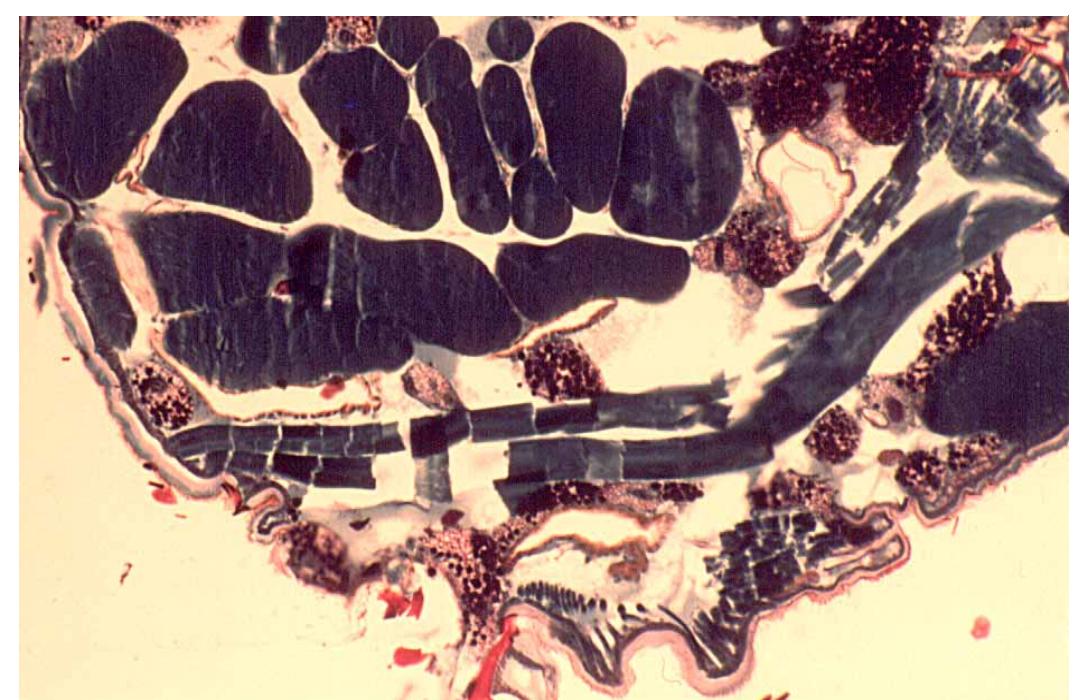

X.S. of longitudinal indirect flight muscles 4 days AP

X.S. of wing base 6 days AP

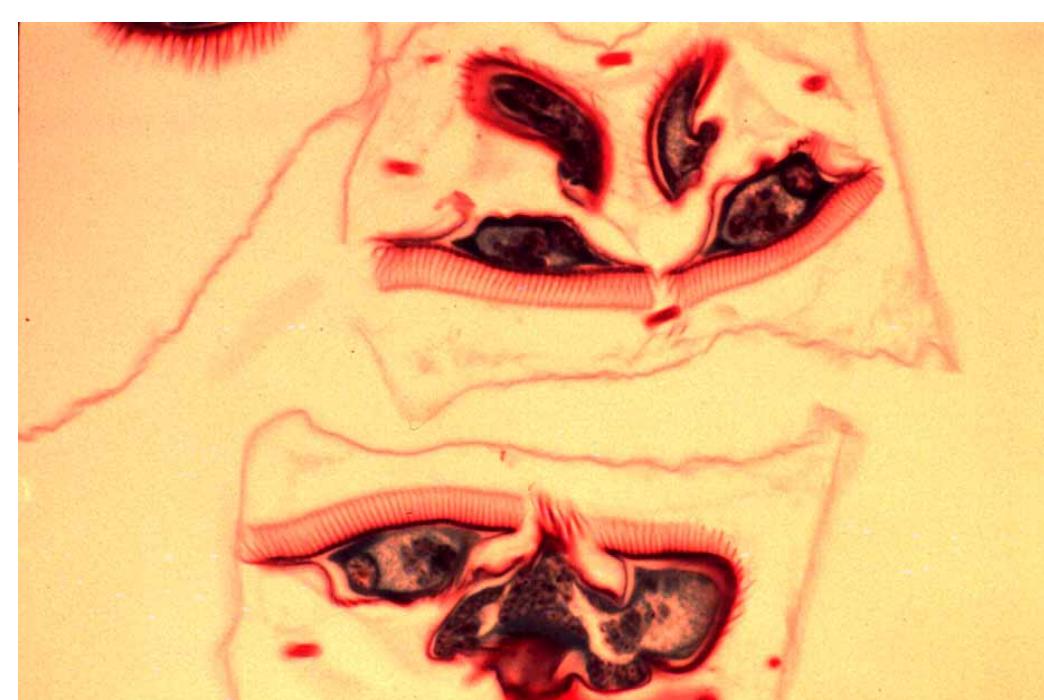

X.S. of longitudinal indirect flight muscles 6 days AP

X.S. of wing base - late pharate adult

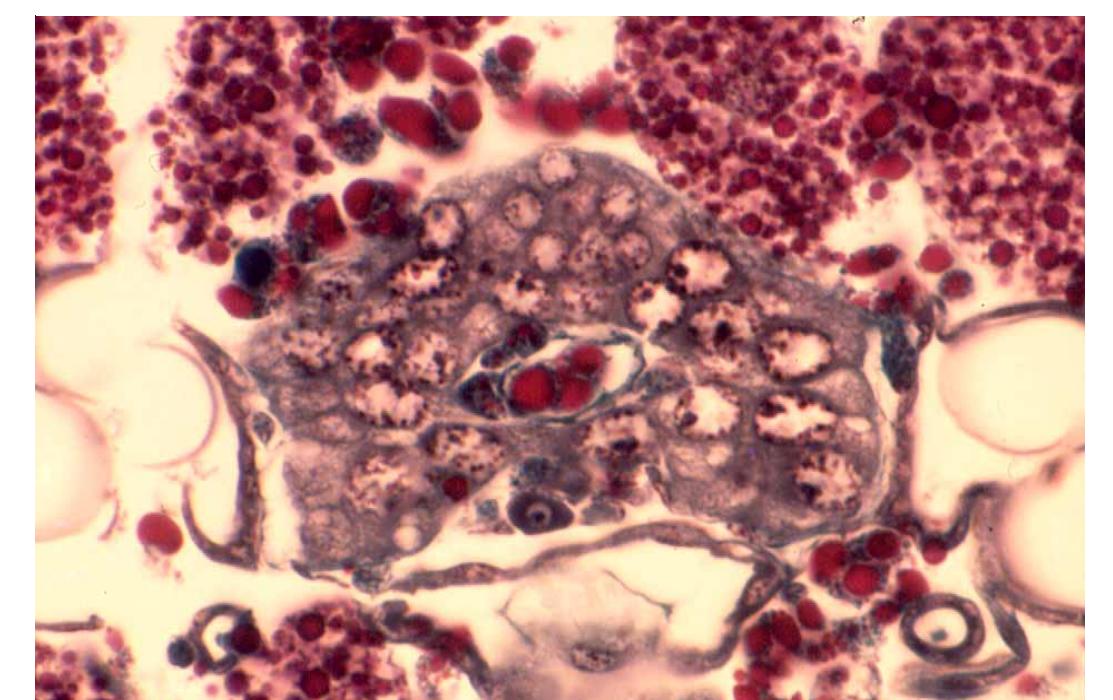

X.S. of longitudinal indirect flight muscles - late pharate

X.S. through pretarsi of late pharate adult

X.S. through ring gland 4 days AP

X.S. through ring gland 4 days AP

X.S. through ring gland - newly emerged adult
