## ISRAEL FLOWERS

On 9 April 2018, Israel Post issued a variety of different stamps celebrating anniversaries of its Independence, the Israeli Defense Forces, and Civil Aviation. Along with these, was a set of four stamps, a booklet, and a souvenir sheet depicting "Spring Flowers."

The flora of Israel includes some 2,700 species, more than half of which bloom in the spring.

The first stamp shows a Cornflower or Bachelor's Button (*Centaurea cyanoides*). These blue flowers are often used by florists since that is a scarce floral color. They are edible and are used to add color to salads and for herbal tea.

The Garland Chrysanthemum (*Glebionis coronaria*) appears on the second stamp. It is captioned *Chrysanthemum coronarium*, a synonym. A leafy herb rich in vitamins and minerals, it is used in many Asian cuisines.

The third stamp shows *Tulipa agenensis*, a member of the lily family. Cultivars of this plant led to "tulipmania" when they were imported to the Netherlands in the early 17th century, where plants sold for tremendous sums.

The fourth stamp shows the blossoms of Purple Clover (*Trifolium purpureum*). This plant is grown for silage and hay, but is also used as an herbal remedy for a variety of ailments.

Note that the designs of the sheet stamps differ by the inclusion of images of various insects.
