INTRODUCTION

Our Commercial Range

Our carefully selected portfolio contains not only the market leading Commercial brands that you would expect, it also features lesser known brands that meet our ethos for quality and performance. We are proud of the manufacturers that we work closely with, carefully selecting the equipment to ensure reliability, build quality and most importantly the correct price point for you.

Why Choose Commercial?

Commercial equipment is designed and tested for its purpose. Commercial ensures reliability and consistent performance reducing the risk of break downs which can create a nuisance in the middle of a busy service. The build quality is harder wearing and capable of the usage it's designed for. To achieve a commercial status, the equipment is tested in many different environments and in many ways. This gives the guarantee that it will do what it is meant to do.

We are also very aware of the carbon footprint that our equipment has. Lighter duty, cheaper

options have a shorter lifespan and so add to the ever-growing problem of waste disposal. We encourage our customers to invest in their equipment, allowing them to have confidence in the equipment as well as doing their bit for the environment too.

Warranty

All products come with a manufacturer's warranty. This will either be a Parts Only or a Parts & Labour Warranty and will be clearly marked per unit.

Parts Only Warranty: Replacement Parts will be provided but the labour cost of the engineer will not.

Parts & Labour Warranty: All costs are covered by the manufacturer (exclusions will always apply).

We are able to offer Parts & Labour Warranty for all products in this brochure but additional charges will apply to those that come with a manufacturer's Parts Only Warranty as standard.

CONTENTS

STORAGE REFRIGERATION

Chest Freezers	6-7
Undercounter Fridges & Freezers	7-9
Upright Fridges & Freezers	9-13
Baker Cabinets	13
Gastronorm Cabinets	13-21

Commercial Microwaves	86
Slot & Conveyor Toasters	86

FOOD PREPARATION

Stick Blenders & Attachments	88
Planetary & Whisk Mixers	88
Vegetable Prep Machines	88
Gravity Feed Slicers	88-89
Meat Mincers	89
Cheese Graters & Cutters	89

SERVERY & HOT DISPLAY

Banqueting Trolleys	91
Hot Cupboards & Drawers	91-92
Carvery Stations	92
Hot Tops	92
Dry Heat Bain Maries	92-93
Heated & Ambient Displays	93
Heated Plate Dispensers	93

STERLING PRO

Where quality and value meet! With all the features you would expect from a premium brand quality product, Sterling Pro offers the discerning caterer the best of both, while rapidly becoming the refrigeration engineer's choice.

A globally recognised brand whose commercial portfolio includes laundry, ice makers and refrigeration. Delivering their efficient 6th Sense Technology together with energy efficient designs, energy bills are kept to a minimum.

VESTFROST

Established in 1963, Vestfrost have grown to become one of the leading manufacturers of storage refrigeration. From chest freezers to uprights, wine display to medical storage, Vestfrost's cabinets offer excellent reliability backed up with an amazing 3 Year Parts and Labour warranty.

Manufactured in Germany, the Ecomax range of catering equipment, dish and glasswashers, together with the Ecomax Plus models, offer the quality and reliability users would expect from Hobart, at a great price.

Atosa Catering Equipment is a leading high-tech manufacturer that encompasses scientific research, design, innovation in sales of commercial refrigeration. Leading the way in Climate Class, energy consumption and full stainless-steel construction.

Adler is a high quality manufacturer of glass and dishwashers. Established in 1960 in Italy, Adler has over 250,000 machines in service around the world and this depth of knowledge means they produce reliable and functional products.

autonumis

Established in 1962 Autonumis are a privately owned light engineering company supplying refrigerated display cabinets, chilled drinks dispensers and vending equipment to major brand owners, distributors and end users.

Based in Spain, Coreco offers a comprehensive range of refrigeration solutions. With a focus on innovation, quality, and efficiency, Coreco products provide reliable cooling and storage solutions for various industries.

DC offers a range of cutting-edge warewashing solutions for commercial applications. Their products are designed to provide efficient and thorough cleaning of dishes, glassware, and utensils, while ensuring optimal hygiene.

Diamond

European manufactured quality products at competitive prices, ranging from display refrigeration through to blast-chillers, food prep to cooking. Only the best products get the Diamond seal of approval.

Exceptionally high quality chest freezers made using high quality components in their factory in Denmark. With over 40 years of experience in refrigeration production, the Elcold range includes some of the largest chest freezers available.

Electrolux is a leading brand in the laundry industry, offering a comprehensive range of washing machines, dryers, and ironers designed for commercial use. Their equipment is known for its durability, advanced features, and user-friendly design, ensuring optimal performance.

In its 65 year history, Fama has built up a strong reputation as one of the top manufacturers of food prep and cooking equipment in Europe. Their range includes stick blenders, gravity slicers, meat mincers, cheese graters, veg prep machines and conveyor toasters.

FOSTER

With over 70 years of expertise, Foster are at the cutting edge of refrigeration design. Their storage cabinets offer all the latest innovations and environmentally friendly options the commercial caterer could need.

GAMKO

Gamko is a leading manufacturer and supplier of professional drinks refrigeration for the bar, leisure and catering industries. Established in 1958 and sporting over 60 years of drinks cooling expertise, providing a flexible product range.

GRAM

Our Gram refrigeration units are engineered to perform in demanding environments, giving you peace of mind. With a smart interior and exterior design, our cabinets and counters offer quality cooling for your fresh produce.

HOSHIZAKI

Hoshizaki is a leading manufacturer of commercial kitchen and food service equipment. Their ice makers are designed with hygiene as a priority. Each ice cycle is made with fresh water, ensuring only the highest quality of ice. Its recognized for its precise shape, clarity and slow dilution.

Ice-A-cool

Cool, quality, cost effective refrigeration. Ice-A-cool is a new brand by Atosa for their green range of upright refrigeration, counters, preparation and display refrigeration units.

LABCOLD

A leading specialist manufacturer and supplier of medical and laboratory refrigerators and freezers. Labcold refrigerators and freezers have developed a reputation for being safe, secure and reliable.

Lec

Offering a range of pharmacy, ward and laboratory refrigeration - Lec Medical has been a key provider of medical refrigeration for over 70 years, utilising extensive industry knowledge to create innovative and exceptionally high quality appliances.

LIEBHERR

Family run since 1954, Liebherr brings exceptional German design combined with robust Austrian build quality. Reliable, energy efficient and cost effective refrigerated storage solutions that will last.

MASTER FROST ICE MAKERS

Established in Greece, 1965, Masterfrost has been producing professional ice makers for over 50 years - focussing purely on quality, efficiency, affordability and low running costs.

Miele

Miele Professional appliances are produced in their very own expert centres in Germany and Europe. Offering great value, the Miele laundry and dishwasher range offers customers long service life, low consumption of water and energy, and quick and reliable work processes.

MOFFAT

Commitment to quality and innovation has made E&R Moffat one of the UK's leading catering equipment manufacturers, producing food displays, servery counters, backbar and kitchen equipment.

Prodis

Prodis embody their philosophy of "Economy Without Compromise", delivering high quality equipment without having to compromise on the quality, reliability or features. Their range features both storage and display refrigeration units.

SAMSUNG

Samsung follows a simple business philosophy: to devote it's talent and technology to creating superior products and services that contribute to a better global society. To achieve this, Samsung sets a high value on its people and technologies. Their range varies from commercial washers and dryes to heavy-duty microwaves.

Scotsman

For over 50 years Scotsman has been one of the world's leading manufacturers of ice machines. Today the brand offers hundreds of model variations, producing more different types of ice than any other manufacturer.

Purever UK

The Purever range of coldrooms offers quality at a great price. With multiple sizing options available in both chillers and freezers, these rooms are an excellent choice.

STORAGE REFRIGERATION

Commercial storage refrigeration is essential for businesses in the food industry to safely store and preserve perishable goods at low temperatures. It ensures that food remains fresh, maintains quality, and extends its shelf life.

We offer a wide range of commercial storage refrigeration solutions to cater to various needs and preferences. Our stock includes:

Chest Freezers: These are spacious and suitable for storing large quantities of frozen food. They are commonly used in restaurants, supermarkets, and convenience stores.

Undercounter Fridges & Freezers: Compact and space-saving, these units fit underneath countertops, making them ideal for establishments with limited space. They are commonly used in bars, cafés, and small kitchens.

Upright Fridges & Freezers: These tall, vertical units provide ample storage space and easy access to stored items. They are commonly used in commercial kitchens, supermarkets, and foodservice establishments.

Gastronorm Cabinets: Designed to accommodate gastronorm-sized containers, these cabinets are versatile and suitable for storing a variety of food items. They are widely used in restaurants, hotels, and catering services.

Fish Storage Cabinets: Specifically designed to meet the unique requirements of storing fish, these

cabinets provide a controlled environment with precise temperature and humidity settings.

Gastronorm Counters: These refrigerated counters combine storage space with a work surface, making them convenient for food preparation in commercial kitchens and foodservice settings.

Pizza Preparation Counters: These counters have a refrigerated topping unit, allowing pizza makers to store ingredients conveniently while assembling pizzas. They are commonly used in pizzerias and restaurants.

Saladette Counters: Designed for salad and sandwich preparation, these counters have a refrigerated topping well and storage space for ingredients, ensuring freshness and easy access during food preparation.

Topping Wells: These small refrigerated units are perfect for storing toppings and condiments, such as sauces, dressings, and garnishes. They are commonly used in fast-food restaurants and salad bars.

Blast Chillers: These rapid chilling units quickly lower the temperature of hot food to prevent bacterial growth and maintain food quality. They are crucial for food safety in commercial kitchens.

Coldrooms: These large-scale storage facilities offer a significant amount of space to store a variety of perishable items, making them suitable for businesses with high storage demands, such as supermarkets and food distribution centres.

STERLING PRO MULTI-PURPOSE CHEST FREEZERS

- Refrigerant: R600a
- Power supply: 13 amp plug
- White exterior finish
- Embossed aluminium interior
- 60mm thick insulation
- Digital temperature display
- Max ambient: 43°C
- Castors make models perfect for outdoor serving - including cans and bottles (x2 with breaks/x2 without)*

UK Service
Support

High efficiency components

Low energy compressors, large area evaporators and high performing electronic fans that minimize temperature gains, reducing energy consumption.

Integrated Stainless Steel handle

Ergonomic, Stainless Steel made, robust, perfectly integrated handle ensures practical opening of the door that avoids dust and dirt collection and is extremely easy to clean.

Insulation - 80mm thickness

80mm thickness CFC-free, high-density (40kg/m³) polyurethane insulation, guarantees exceptional, long-term insulation and energy savings in all Vantage cabinets.

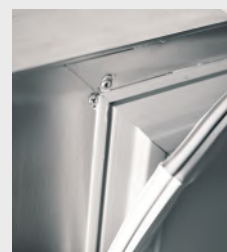

Intelligent air circulation system

Perfect temperature consistency with its innovative airflow design that encircles the food and ensures its proper conservation.

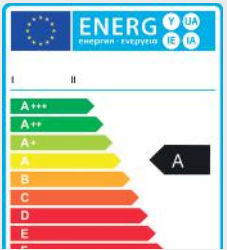

Rounded edge interior

Easier cleaning operations to reduce potential dirt traps and optimum hygiene.

Removable door gasket

Removable pull-out/push-in magnetic door gasket to keep maximum hygiene and maintain the insulating properties.

Maximum energy savings

The XPI700 refrigerator achieves the highest A Rating under the conditions defined in climate class 5, ensuring the maximum energy savings.

*The label complies with the delegated regulation (UE) 2015/1094 of the commission of 5th May 2015

Compact controller

Extra large, screen touch controller with energy saving strategy and HACCP alarm system, which allows an easy temperature parameter adjustment ensuring the best food preservation. It also offers a Bluetooth data logger as an option.

Evaporation of defrost water

Hot gas coming from the compressor is used to automatically evaporate defrost water, instead of by means of heating elements, achieving even less energy consumption.

Stamped guides, sturdy wire grids

Stamped guides with rounded edges enable more convenient cleaning operations without any difficulties. Plastic coated wire grids allow storage of different packaging types and have a maximum loading capacity of up to 40kg.

Internal LED lighting

Low energy consumption LED lighting to display the interior, standard in all Vantage upright models.

Self closing hinged doors

Hinged doors with automatic return for a perfect closing that minimize temperature gain and reduces energy consumption. Doors have a 120° dwell position and closes automatically at less than 90°. Door hinges are also reversible.

STERLING PRO GREEN SINGLE DOOR UNDERMOUNTED CABINETS

OPTIMA COLDROOMS

The Optima coldrooms are designed to provide low cost, high quality solutions for small restaurants, fast food establishments, supermarkets and even private individuals. The use of high quality materials and modern manufacturing techniques enables you to offer your customer maximum flexibility with minimum running costs.

Quality

- Roof and wall panels are made from galvanised steel panels
- Floor panels are reinforced and are made of synthetic resin
- All rooms are manufactured with modern techniques
- All panels have high-density 85mm foam insulation
- CFC and HCFC free panels
- Heavy-duty handles and locks

Assembly

- Provided with everything you need
- Quick and easy assembly
- Panels join using simple cam-lock system
- Joined and sealed with silicon (provided)

Flexibility

- 92 different sizes available
- Coving and skirting available
- Two different heights
- With or without floor panels
- Left or right-hand hinged door
- Monoblock or remote motor options

Equipped

- Provided with everything you need
- Pressure balance valve with freezer models
- Door heaters with freezer models
- Tools, sealant, instructions and fittings provided

DISPLAY REFRIGERATION

Commercial display refrigeration plays a vital role in showcasing and effectively merchandising refrigerated products in the food and beverage industry. It combines functionality and aesthetics to attract customers while ensuring optimal storage and presentation of perishable goods.

We proudly offer a diverse range of commercial display refrigeration units to cater to various needs and preferences. Our stock includes:

Bottle Coolers: These units are designed specifically to cool and display bottled beverages, such as beer, soft drinks, and water. They are commonly used in bars, pubs, and convenience stores.

Display Chillers & Freezers: These refrigeration units feature transparent doors or glass panels, allowing customers to easily view and access chilled or frozen products. They are ideal for supermarkets, deli's, and cafés.

Wine Coolers & Cabinets: Specifically designed for storing and showcasing wine bottles, these units provide precise temperature control and elegant display options. They are popular in wine shops, restaurants, and hotels.

Glass Frosters: These specialized units quickly chill glasses, ensuring that beverages served to customers are refreshingly cold. They are commonly found in bars, clubs, and cocktail lounges.

Display Chest Freezers: These chest-style freezers feature transparent lids or glass panels to display

frozen products while keeping them at the ideal temperature. They are often used in convenience stores and supermarkets.

Display Cabinets: These refrigerated cabinets feature glass doors and adjustable shelves, making them perfect for displaying various food items, such as desserts, sandwiches, and salads. They are commonly used in bakeries, cafés, and deli's.

Serveover Counters: These refrigerated counters combine a display area for showcasing chilled products, such as meats, cheeses, and ready-to-eat meals, with a convenient serving surface. They are popular in butcher shops, delicatessens, and cafés.

Patisserie Counters: Designed specifically for displaying pastries, cakes, and desserts, these refrigerated counters offer an attractive showcase while maintaining the freshness and quality of delicate treats. They are commonly found in bakeries and patisseries.

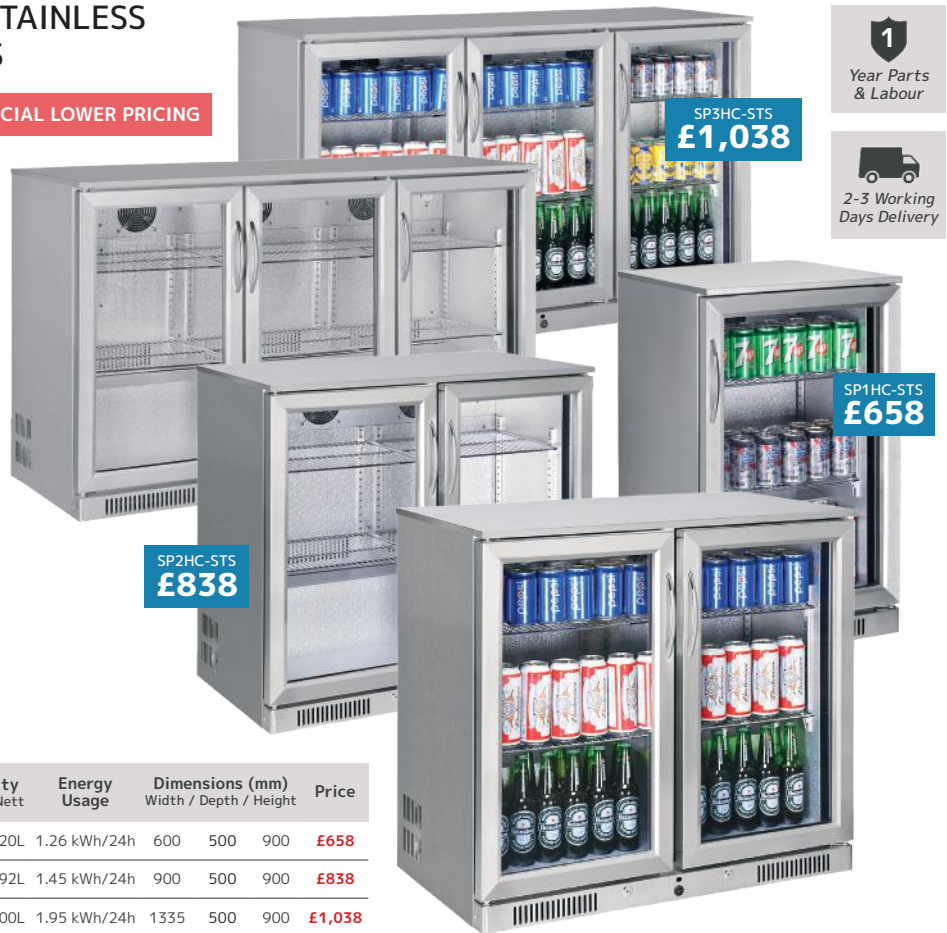

Refrigerated Wells: These versatile units feature refrigerated compartments that can be used to display a variety of food items, such as salads, yogurt, and condiments. They are often used in salad bars, buffets, and self-serve stations.

Multidecks: These open-fronted display units are designed to provide maximum visibility and accessibility to a wide range of refrigerated products. They are commonly used in supermarkets, convenience stores, and grab-and-go outlets.

STERLING PRO GREEN STAINLESS STEEL BOTTLE COOLERS

- Refrigerant: R600a
- Energy rating: D
- Temperature: +2°C to +10°C
- Power supply: 13 amp plug
- Stainless Steel exterior
- Aluminium interior finish
- 50mm thick insulation
- Adjustable shelves: x2 (SP1HC) x4 (SP2HC) / x6 (SP3HC)
- Max ambient of 32°C
- Internal LED lighting
- Automatic defrost
- Lockable doors
- Climate class: 4
- Voltage: 230V/50HZ
- Cooling system: Static with fan
- Defrost type: Automatic
- Compressor mounting: Bottom
- Digital temperature display
- Self closing doors
- Hinged doors only

MEDICAL APPLIANCES

Medical appliances, including medical refrigeration and medical dishwashers, are essential in healthcare facilities, laboratories, pharmacies, and research settings. They play a crucial role in maintaining the integrity, safety, and efficacy of temperature-sensitive medical supplies, vaccines, medications, specimens, and laboratory samples.

The importance of medical refrigeration lies in its ability to maintain precise and consistent temperature control within specific ranges. Medications and vaccines, for example, require strict temperature management to preserve their potency and effectiveness. Vaccines, in particular, are highly sensitive to temperature fluctuations, and even slight deviations can compromise their efficacy.

In addition to medications and vaccines, medical refrigeration is essential for storing laboratory samples and specimens that are used for diagnostic purposes, research, and scientific experiments. These samples often require specialized storage conditions, including specific temperature ranges, humidity control, and insulation from external contaminants.

Pharmacies also rely on medical refrigeration to maintain the stability and effectiveness of pharmaceutical products. Many medications, such as insulin, certain antibiotics, and biologics, require refrigeration to prevent degradation and maintain their therapeutic value.

We offer a comprehensive range of medical appliance solutions from reputable brands. Our stock includes:

Low Temperature Chest Freezers: These specialized freezers are designed to maintain extremely low temperatures for the storage of sensitive medical supplies and samples. They provide reliable and secure freezing capabilities.

Pharmacy Refrigerators: These refrigerators are specifically designed to store medications at the appropriate temperature range, ensuring their potency and effectiveness. They feature precise temperature control and storage compartments suitable for pharmaceutical storage requirements.

Laboratory Fridges & Freezers: These units are designed to meet the unique requirements of laboratory settings. They provide precise temperature control, optimal storage conditions, and secure storage for laboratory samples, reagents, and other temperature-sensitive materials.

Medical Dishwashers: In addition to refrigeration, we also offer medical-grade dishwashers. They ensure thorough cleaning and sanitization of medical instruments and equipment, maintaining strict hygiene standards. Medical dishwashers also provide an efficient and reliable cleaning performance, helping to prevent the spread of infections and ensure the safety of patients and staff.

VESTFROST LOW TEMPERATURE CHEST FREEZERS

- Power supply: 13 amp plug
- Digital XR30CX controller
- Stable and reliable
- Prepared for temperature logging
- Audible and visual alarm

COMMERCIAL LAUNDRY

Commercial washing machines and dryers are robust and efficient appliances designed for heavy-duty use in commercial and industrial settings. They are specifically engineered to handle large volumes of laundry, making them ideal for businesses such as laundromats, hotels, hospitals, and restaurants.

Commercial washing machines are equipped with advanced features, including larger capacity drums, multiple wash cycles, and programmable settings. They offer superior cleaning performance, removing tough stains and dirt effectively. These machines are designed to withstand frequent use and high-speed spinning, resulting in shorter wash cycles and improved productivity.

Commercial dryers are designed to dry large loads of laundry quickly and efficiently. They feature powerful airflow systems and high-capacity drums that allow for fast drying times. These dryers often offer customizable settings, such as temperature control and moisture sensors, ensuring that the laundry is dried effectively while minimizing energy consumption.

Both commercial washing machines and dryers are built to withstand the demands of commercial environments, offering durability, reliability, and longevity. They are constructed with heavy-duty materials and robust components to handle continuous use and heavy workloads. These appliances are designed to maximize efficiency, reduce operational costs, and deliver outstanding performance.

When choosing commercial washing machines and dryers, it is essential to consider factors such as load capacity, energy efficiency, programmable features, and maintenance requirements.

We offer a wide range of laundry equipment to meet the diverse needs of businesses. Our stock includes:

American Style Top Load Washers & Dryers: These machines are designed with a spacious 15kg drum capacity, making them ideal for businesses that need to process large loads of laundry quickly. They offer user-friendly controls and efficient water usage.

Front Loading Washers and Dryers: Front-loading machines are known for their energy efficiency and superior cleaning performance. They offer various programmable options, including different wash and dry cycles, making them versatile for different types of fabrics and laundry requirements.

Rotary Ironers: Rotary ironers are designed for efficient and professional pressing of large linens and fabrics. They feature a large heated roller, allowing for quick and effective ironing of items such as sheets, tablecloths, and napkins.

Steam Systems: Steam systems are often used in commercial laundry operations to enhance the cleaning and sanitization of garments and linens. They provide high-temperature steam that helps remove stains, wrinkles, and allergens, resulting in fresh and hygienic laundry.

WHIRLPOOL ATLANTIS 6TH SENSE AMERICAN STYLE WASHER & DRYER

3LWTW4815FW Top Loading Washer

- Power supply: 13 amp plug
- 6th Sense Technology
- Hot and cold fill

WHIRLPOOL PROFESSIONAL 6TH SENSE WASHER

- **6th Sense Technology:** Adapts resources according to the size and type of load, saving energy, water & time
- **Zen Motor Technology:** Delivers great cleaning results while minimizing noise & vibrations
- **Steam Hygiene:** Neutralizes up to 99.9% of bacteria with a hot steam flow at the end of the cycle
- **Fresh Care+:** Delicately steams and gently tumbles your laundry for up to 6 hours after the cycle is over
- **Steam Refresh:** Generates a flow of steam that removes unpleasant smells, relaxes fibres & smoothes creases
- **Anti Allergy Cycle:** Eliminates all the detergent traces & 99.9% of pollen, dust mites & pet hair
- **Anti Stain Cycle:** This exclusive professional programme is capable of removing up to 100 stains in just one hour
- **Aquastop Protection:** Thanks to intelligent sensors, the machine automatically turns off when a fault is detected
- **Stackable:** Stack this unit with the AWZ9HP dryer using the Wpro C00378975 stacking kit (sold separately)
- **Tested to 5,000 cycles:** Built to bear all the safety tests required by the Machinery Directive 2006/42/EN

WHIRLPOOL PROFESSIONAL 6TH SENSE HEAT PUMP DRYER

- **6th Sense Technology:** Adapts resources according to the size and type of load, saving energy, & time
- **Heat Pump Technology:** Thanks to the sense inverter motor and Heat Pump Technology, this unit ensures maximum energy efficiency without compromising the drying result. To dry a full load with cotton cupboard dry, you can save up 60% kWh more than a standard condenser dryer
- **3Dry Technology:** 3 dimensional air distribution that reaches every inch of the drum. From today uniform drying of bulky items such as bed linen is guaranteed with no more wet zones
- **Fresh Care+:** Keeps your garments fresh & soft inside the drum for up to 6 hours after the cycle ends thanks to ideal temperature conditions & delicate tumbling action
- **Easy cleaning filter:** A little filter collects the fluff in the condensation area, making the cleaning operation easier than ever. It takes just 3 little steps: open the filter, pull the ergonomic handle to extract it and then clean it
- **Stackable:** Stack this unit with the AWH912 washer using the Wpro C00378975 stacking kit (sold separately)
- **Tested to 5,000 cycles:** Built to bear all the safety tests required by the Machinery Directive 2006/42/EN

WAREWASHING

Commercial warewashing equipment is essential for businesses in the hospitality and foodservice industry that require efficient and effective cleaning of dishes, glassware, and utensils. These machines are designed to handle high volumes of dirty items, saving time and ensuring hygienic results.

Investing in reliable and efficient commercial warewashing equipment is crucial for maintaining cleanliness, hygiene, and operational efficiency in foodservice establishments. Proper warewashing practices help ensure customer satisfaction, meet health and safety regulations, and contribute to the overall success of your business.

We offer a comprehensive range of commercial warewashing equipment to meet the diverse needs of businesses. Our stock includes:

Glasswashers: Commercial glasswashers are specialized equipment designed to efficiently clean and sanitize glassware in commercial settings. Commonly used in bars, restaurants, hotels, and other establishments that serve beverages in glasses, they are designed to handle a high volume of glassware, providing quick and effective cleaning to keep up with the demands of a busy establishment. These machines feature dedicated wash cycles that use a combination of water, detergent, and high-temperature rinses to ensure thorough cleaning and sanitation.

Dishwashers: Dishwashers are versatile machines that can handle a variety of dishware, including plates,

bowls, and cutlery. They are designed to provide efficient and thorough cleaning using hot water and powerful jets, removing tough stains and food residue. They are essential equipment in foodservice establishments, such as restaurants, cafeterias, hotels, and catering businesses, where a high volume of dishes, utensils, and cookware needs to be cleaned efficiently and effectively.

Passthrough Dishwashers: Passthrough dishwashers are designed for high-capacity operations, allowing operators to load dirty dishes at one end and retrieve clean, sanitized items at the other. These machines offer fast cleaning cycles and can handle a large volume of dishes in a short amount of time. Investing in a passthrough dishwasher can significantly streamline and optimize your dishwashing operations. It ensures efficient handling of large dishware volumes, reduces labour costs, enhances cleanliness, and helps maintain a smooth workflow in your commercial kitchen or foodservice establishment.

Conveyor Dishwashers: Conveyor dishwashers are advanced and high-capacity commercial dishwashing machines that are commonly used in large-scale foodservice establishments, such as busy restaurants, banquet halls, and institutional kitchens. These dishwashers are designed to handle a continuous flow of dishes, utensils, and other washable items, making them ideal for high-volume operations.

BEVERAGE EQUIPMENT

Commercial beverage equipment is essential for businesses in the food and beverage industry that require specialized equipment to prepare and serve a wide range of beverages. These machines are designed to handle high volumes and deliver consistent quality, ensuring efficient and reliable beverage service.

We offer a comprehensive range of commercial beverage equipment to meet the diverse needs of businesses. Our stock includes:

Ice Makers: Commercial ice makers are specialized machines designed to meet the high ice production demands of businesses in various industries. These robust appliances are built to produce large quantities of ice consistently and efficiently. They are commonly used in restaurants, bars, hotels, hospitals, supermarkets, and other commercial settings where a reliable supply of ice is essential. Commercial ice makers come in different sizes and configurations, offering a range of ice types and production capacities to meet the specific needs of different businesses. They play a crucial role in beverage service, food preservation, and presentation, ensuring a steady and sufficient supply of ice for various applications.

Ice Crushers: Used for crushing ice in commercial settings, these units efficiently and quickly turn ice cubes into crushed ice, making them ideal for bars, restaurants, and other businesses that require ice for drinks and food preparation.

Slush & Sorbet Machines: Slush and sorbet machines are used to prepare icy treats like slushies and

sorbets. They feature freezing chambers that mix and freeze the beverage mixture, creating a smooth and refreshing frozen treat.

Drink Mixers: Drink mixers are designed to blend ingredients together, creating delicious and frothy beverages like milkshakes and smoothies. These machines have powerful motors and multiple speed settings to achieve the desired consistency.

Juice & Milk Dispensers: Juice and milk dispensers are used to store and dispense large quantities of chilled beverages. They often feature refrigeration systems and easy-to-use dispensing mechanisms, making them ideal for self-service set-ups or buffet-style operations.

Coffee Machines: Coffee machines are essential appliances for brewing and preparing coffee in both commercial and residential settings. These machines automate the process of making coffee, providing convenience and consistent results. Investing in a reliable and suitable coffee machine allows coffee enthusiasts and businesses to enjoy the convenience of brewing their favourite coffee beverages with consistent quality.

Coffee Grinders: Coffee grinders are essential tools for grinding coffee beans into the desired consistency for brewing. These compact appliances help unlock the flavours and aromas trapped within the coffee beans, allowing for fresher and more flavourful coffee. With adjustable settings and different grinding methods, coffee grinders offer control and customization to suit various brewing methods.

COOKING EQUIPMENT

Commercial cooking equipment is essential for businesses in the foodservice industry that require efficient and reliable cooking solutions to prepare a wide variety of dishes. These machines are designed to handle high-volume cooking while delivering consistent and precise results.

We offer a comprehensive range of commercial cooking equipment to meet the diverse needs of businesses. Our stock includes:

Counter-top & Standing Fryers: Fryers are used to deep fry various food items, such as French fries, chicken, and seafood. They are available in counter-top or standing models, providing flexibility in placement and capacity.

Pasta Cookers: Pasta cookers are designed to boil pasta quickly and efficiently, ensuring perfect texture and consistency. These machines often feature multiple compartments to cook different types of pasta simultaneously.

Crepe & Pancake Makers: Crepe and pancake makers allow businesses to easily prepare thin, delicate crepes or fluffy pancakes. They come with a flat cooking surface that evenly distributes heat for consistent results.

Contact & Salamander Grills: Contact grills provide a quick and convenient way to cook items like burgers, sandwiches, and paninis. Salamander grills, on the other hand, are designed for broiling and browning dishes, melting cheese, and finishing off dishes with a crispy topping.

Chargrills & Griddles: Chargrills and griddles are ideal for cooking meats, vegetables, and other grilled items. Chargrills provide the distinct smoky flavour of grill marks, while griddles offer a flat cooking surface for versatile cooking.

Pizza Ovens: Pizza ovens are specially designed for baking pizzas with crispy crusts and perfectly melted toppings. These ovens often have adjustable temperature settings and features to ensure optimal pizza baking.

Ovens & Hobs: Commercial ovens and hobs are essential components of professional kitchens, providing precise and efficient cooking capabilities. Ovens are designed to bake, roast, and cook a variety of dishes, while hobs offer a dedicated cooking surface for stove top cooking. These appliances are built to withstand the demands of commercial environments, delivering consistent heat distribution and temperature control. With options like combi ovens, convection ovens, open cupboards with hobs, and more, commercial ovens and hobs provide versatility and reliability for culinary operations.

Commercial Microwaves: Commercial microwaves offer quick and efficient heating and reheating of food items. They are designed for high-volume usage and often come with programmable settings and advanced features.

Slot & Conveyor Toasters: Slot toasters are designed to toast bread slices quickly and evenly, while conveyor toasters are suitable for toasting larger quantities of bread, bagels, and buns in a continuous operation.

FAMA COUNTER-TOP ELECTRIC FRYERS

- MFR240 power supply: 13 amp plug
- MFR80/MFR280 power supply: Single phase hard wired
- Temperature range: 50°C to 180°C
- Stainless Steel construction
- Removable tank for cleaning
- Heavy-duty heating elements
- Stainless Steel splash guard
- Drainage tap versions available
- Fast oil heating
- Manufactured in Italy

FOOD PREPARATION

Commercial food preparation equipment plays a crucial role in professional kitchens, streamlining the process of preparing ingredients and creating delicious dishes. These robust and efficient appliances are designed to handle the demands of high-volume food preparation.

We offer a comprehensive range of food preparation equipment to meet the diverse needs of businesses. Our stock includes:

Stick blenders: Stick blenders, also known as immersion blenders, are handheld blending devices with a motorized blade at the end. They are perfect for quickly blending, pureeing, and emulsifying ingredients directly in pots, pans, or bowls. Stick blenders are versatile tools that can be used for making soups, sauces, smoothies, and more.

Planetary & whisk mixers: Planetary and whisk mixers are powerful countertop appliances used for mixing, beating, and whipping ingredients. They come with various attachments, including dough hooks, paddle beaters, and wire whisks, allowing for different mixing tasks. These mixers are ideal for preparing dough, batters, creams, and other mixtures in large quantities.

Vegetable prep machines: Vegetable prep machines are specialized equipment that makes vegetable preparation more efficient. They feature attachments for slicing, dicing, and shredding vegetables, eliminating the need for manual cutting. With adjustable thickness settings and different blade options, they provide consistent and uniform results for salads, stir-fries, garnishes, and more.

Gravity feed slicers: Gravity feed slicers are designed for precise and efficient slicing of various foods, such as meats, cheeses, and vegetables. They feature a tilted carriage that holds the food, and as it slides down under gravity, a sharp rotating blade slices through it. Gravity feed slicers are commonly used in delis, sandwich shops, and restaurants where thin, consistent slices are required.

Meat mincers: Meat mincers are heavy-duty machines used for grinding and processing different cuts of meat. They feature a powerful motor and various grinding plates to control the coarseness of the ground meat. Meat mincers are essential in butcher shops, delis, and restaurants that prepare their own ground meat products, such as sausages, burgers, and meatballs.

Cheese cutters & graters: Cheese cutters and graters are specialized tools designed for cutting and grating different types of cheeses. They come in various styles, including wire cutters for slicing through large blocks of cheese and rotary graters for finely grating cheese. These tools are commonly used in commercial kitchens to efficiently handle cheese preparation for pizzas, sandwiches, and other dishes.

By stocking a variety of commercial food preparation equipment from trusted brands like Fama Industrie and Diamond, we ensure that our customers have access to reliable and efficient tools that enhance their food preparation processes and contribute to consistent and high-quality results.

MOFFAT

SERVERY & HOT DISPLAYS

Servery and hot display units are essential equipment in the foodservice industry, designed to maintain the temperature and presentation of hot food items for serving. These units are commonly used in buffets, cafeterias, catering events, and other food establishments where keeping food warm and easily accessible is crucial.

We offer a comprehensive range of servery and hot display units to meet the diverse needs of businesses. Our stock includes:

Banqueting trolleys: Banqueting trolleys are designed to transport and serve hot food in large quantities, making them perfect for catering events, banquet halls, and hotels. They typically feature multiple shelves or compartments to hold food trays and ensure efficient service.

Hot cupboards & drawers: Hot cupboards and drawers provide heated storage for holding cooked food at a desired temperature before serving. They often feature adjustable temperature controls, humidity settings, and shelves or drawers to accommodate different food items. Hot cupboards are commonly used in professional kitchens and catering establishments.

Carvery stations: Carvery stations are specially designed to hold and display roasted meats, such as beef, ham, or turkey, for carving and serving. These units often include a heated shelf or tray to maintain the temperature of the meat while offering a convenient carving surface for the chef.

Hot tops: Hot tops feature a flat cooking surface that

provides a controlled and even heat source. They can be used for keeping food warm or for cooking directly on the surface, making them versatile equipment for maintaining the temperature of pre-cooked food or for cooking items like grilled sandwiches, pancakes, or stir-fried dishes.

Dry heat bain maries: Dry heat bain maries are heated wells used to hold and display a variety of hot food items in a controlled temperature environment. They are commonly used for keeping dishes such as soups, sauces, curries, and desserts warm, ensuring that they are readily available for serving.

Heated & ambient displays: Heated and ambient displays are designed to showcase and keep hot food items at the right temperature. These units often feature glass or acrylic panels for excellent visibility and may include shelving or trays to display a variety of dishes, keeping them appealing and accessible to customers.

Heated plate dispensers: Heated plate dispensers are equipment specifically designed to keep plates warm and ready for serving. They ensure that plates are heated to the desired temperature, enhancing the overall dining experience by keeping food warmer for longer.

By offering a variety of servery and hot display units from trusted brands, we aim to provide our customers with the necessary tools to keep their food warm, well-presented, and easily accessible, ensuring a seamless and efficient foodservice experience for both staff and customers.

TERMS & CONDITIONS

For a full copy of the Terms & Conditions please refer to the website prior to placing an order. If you are unclear on any of these points please speak to a member of the sales team for further advice prior to placing an order.

All orders accepted by the Seller will be subject to these Terms and Conditions of Sale.

PRICES

While every attempt will be made to adhere to our published "Price List" we reserve the right to alter or amend prices without prior notification. Prices quoted are exclusive of Value Added Tax.

CANCELLATION

The Seller will only accept cancellations as follows:

- a) If the Buyer cancels after goods have left our warehouse a charge of 25% of invoice value plus delivery charges will be levied.
- b) If the goods have been used by the Buyer or his Agent then the goods will be deemed unreturnable and the order cannot be cancelled.
- c) An additional charge of £ 55+vat per item will be levied if the Seller is required to collect packaged goods from cancelled orders.
- d) Special equipment ordered by the Buyer will be subject to special conditions, Please contact our sales office for further details. Cancellation will not be accepted on special orders.

DELIVERY

Our free of charge standard delivery is to UK Mainland and will take place between 8-6pm. The leadtime varies and is clearly marked by product. The seller will at all times attempt to meet the Buyer's delivery requirements as communicated at point of order however the seller will not accept any liability for losses what so ever (including food losses and labour on site) sustained by a late delivery by the Seller or his Agents. Delivery dates are given as guide dates only and are under no contractual agreement. Additional services such as disposals/timed deliveries and unpack and positions are available but costs vary by product; please contact our sales office in advance of placing your order.

OWNERSHIP AND RISK

From the time of delivery to the Buyer or to the assigned point of delivery, the equipment shall be at the Buyer's risk. Ownership of the equipment shall not pass to the Buyer until payment in full has been received by the Seller.

The Buyer shall take the appropriate steps to notify any third party of the Seller's interest in the equipment and in the event of a threatened seizure of the equipment or of the appointment of a receiver or liquidator or administrator, shall, immediately notify the Seller and the Seller shall be entitled to repossess the equipment upon which the Seller retains Title from the Buyer's premises or location.

DAMAGE

It is the Buyer's responsibility to inspect the equipment at the time of taking delivery prior to signing to accept it. Drivers are given 15 minutes on site to allow for this. Product damage can occur without any obvious sign to the outer packaging so it is essential that the product itself is checked before signing to accept delivery.

Should equipment arrive damaged this must be recorded on the delivery note/drivers device and the Seller notified in writing within 24 hours. Claims for damage will not be entertained if the item has not been noted as damaged when signing the carrier's device or paperwork.

WARRANTY

The Warranty cover will depend on the appliance sold. All products are shown with the standard warranty offering. Where the manufacturer offers a parts only warranty we recommend that you purchase the upgrade available to cover the labour aspect of any service charges.

The validity of your warranty relies on the proper care and servicing of the appliance as laid in the manufacturer's manual. Call outs that are deemed to be user error will be charged on in full.

Any loss or damage to consumables caused by a failure of the equipment is to be the responsibility of the Buyer and should be covered by the Buyer's insurance.

WEEE DIRECTIVE

UK WEEE Regulations (SI2006/3289 Waste Electrical and Electronic Equipment Regulations 2006 as modified by any subsequent legislation).

Future WEEE: The Seller sells its products either retaining the Producer's obligations under the WEEE Regulations or with our customer taking on those responsibilities. In either case the customer must clearly state which of these options he requires and this must be documented.

The Seller will confirm this option on its order acceptance documentation. The customer must agree to disclose this agreement to any subsequent purchaser(s) of this equipment, as required by the regulations.

Historic WEEE The purchaser agrees to absolve The Seller from its obligations under the UK WEEE Regulations which require The Seller to be responsible for financing the collection, treatment, recovery and environmentally sound disposal of any product supplied before 13th August 2005, where a similar new product is being purchased.

The Company undertakes the collection, treatment, recovery and environmentally sound disposal of any product supplied before 13th August 2005 (or outside the scope of the WEEE regulations) subject to payment of its current disposal fees.

FORCE MAJEURE

The Seller shall not be liable in respect of any breach of contract due to any cause beyond his reasonable control including Act of God, inclement weather, flood, lightning or fire, industrial action or lockouts, the act or omission of Government, highways authorities, other competent authority, war, military operations or riot, or the act or omissions of any party for whom the Seller is not responsible.

APPLICABLE LAW

Any contract shall be deemed to be made in England according to English Law and subject to the jurisdiction of the English Courts.
