51143204	Acamprosate	<p>This classification denotes a neuroprotective agent, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier N4K14YGM3J. The European Medicines Agency schedules Acamprosate in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB07366MIG. Acamprosate generally arises in the molecular formula C₅H₁₁NO₄S. The term ACAMPROSATE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, volume 4, no. 3 1990, list 30.) ACAMPROSATE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: S(=O)(=O)(O)CCCNC(=O)C.</p>	<p>acamprosate; ακαμπροζατ; acamprosate; acamprosat; ακαμπροσάτη; akamprozát; acamprosato; akamprozat; acamprosato; acamprosato; 阿坎酸; 1-propanesulfonic acid; 3-(acetylamino)-; 3-(acetylamino)propane-1-sulfonate; 3-(acetylamino)propane-1-sulphonate</p>
51143205	Altinicline	<p>This classification denotes a cholinergic agonist with the molecular formula C₁₂H₁₄N₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier RJ9V9V09VM, chemically known as pyridine, 3-ethynyl-5-((2s)-1-methyl-2-pyrrolidinyl)- but more generally known as altinicline, which bears U.S. National Institutes of Health Compound Identifier 3036156. Altinicline most often comes in base and maleate forms. The term ALTINICLINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 14, No. 3, 2000, List 44). SMILES: CN1CCCC1C2=CN=CC(=C2)C#C.</p>	<p>altinicline; αλτινικλίνη; altinikliini; altiniclina; altiniclin; and алтИНИКЛИН</p>

51152401	Acetaminophen/chlorzoxazone	<p>This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF) which falls under VA Drug Class MS200. This VA Drug Class (MS200) classifies this compound as belonging to the group SKELETAL MUSCLE RELAXANTS. The first component of this combination drug is an analgesic and antipyretic with the molecular formula C₈H₉NO₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 362O9ITL9D, chemically known as n-(4-hydroxyphenyl)acetamide but more generally known as acetaminophen, which bears U.S. National Institutes of Health Compound Identifier 1983. Acetaminophen comes in many forms, including base, acetate, cysteine, cysteinylglycine, di-methyl derivative, glucuronide, glutathione, hemisuccinate, mercapturate, and sulfate. The European Medicines Agency schedules Acetaminophen in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB09611MIG. The World Health Organization schedules acetaminophen in its Anatomical Therapeutic Chemical (ATC) Classification. The second component of this combination drug is a muscle relaxant with the molecular formula C₇H₄ClNO₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier H0DE420U8G, chemically known as 2-benzoxazolinone, 5-chloro- but more generally known as chlorzoxazone, which bears U.S. National Institutes of Health Compound Identifier 2733. The European Medicines Agency schedules Chlorzoxazone in its eXtended EudraVigilance Medicinal Product</p>

51162306	Acetaminophen/caffeine/chlorpheniramine/phenylpropanolamine	<p>This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class RE599. This VA Drug Class (RE599) classifies this compound as belonging to the group COLD REMEDIES, OTHER. The first component of this combination drug is an analgesic and antipyretic with the molecular formula C₈H₉NO₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 362O9ITL9D, chemically known as n-(4-hydroxyphenyl)acetamide but more generally known as acetaminophen, which bears U.S. National Institutes of Health Compound Identifier 1983. Acetaminophen comes in many forms, including base, acetate, cysteine, cysteinylglycine, di-methyl derivative, glucuronide, glutathione, hemisuccinate, mercapturate, and sulfate. The European Medicines Agency schedules Acetaminophen in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB09611MIG. The World Health Organization schedules acetaminophen in its Anatomical Therapeutic Chemical (ATC) Classification. The second component of this combination drug is a cns stimulant and bioactive food component with the molecular formula C₈H₁₀N₄O₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 3G6A5W338E, chemically known as 1,3,7-trimethylxanthine but more generally known as caffeine, which bears U.S. National Institutes of Health Compound Identifier 2519. caffeine comes in many forms, including base, benzoate, benzoate sodium, bromide, citrate,</p>
----------	---	--

hydrobromide, hydrochloride, hydroiodide, monohydrate, salicylate, sodium benzoate, sodium benzoicum, and sodium salicylate. The European Medicines Agency schedules Caffeine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB13146MIG. The World Health Organization schedules caffeine in its Anatomical Therapeutic Chemical (ATC) Classification. The third component of this combination drug is a histamine-1 receptor antagonist, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 3U6IO1965U. The European Medicines Agency schedules Chlorphenamine (under maleate form) in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB01243MIG. Chlorpheniramine generally arises in the molecular formula C₁₆H₁₉CIN₂. The term 'chlorpheniramine maleate' is a European Pharmacopoeia designation. The fourth component of this combination drug is an adrenergic agonist with the molecular formula C₉H₁₃NO, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 33RU150WUN, chemically known as 1r,2s-(-)-norephedrine hydrochloride but more generally known as phenylpropanolamine, which bears U.S. National Institutes of Health Compound Identifier 4786. The European Medicines Agency schedules Phenylpropanolamine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB09790MIG. The term PHENYLPROPANOLAMINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication,

'chlorpheniramine' is a European Pharmacopoeia designation. The third component of this combination drug is an alpha-adrenergic agonist with the molecular formula C₁₀H₁₅NO, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 7CUC9DDI9F, chemically known as 1s,2s-(+)-pseudoephedrine hydrochloride but more generally known as pseudoephedrine, which bears U.S. National Institutes of Health Compound Identifier 5032. The European Medicines Agency schedules Pseudoephedrine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB10157MIG. The term PSEUDOEPHEDRINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 19 1975, List 5). The World Health Organization schedules pseudoephedrine in its Anatomical Therapeutic Chemical (ATC) Classification.

51162402	Acetaminophen/dextromethorphan/guaifenesin/phenylephrine	<p>This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF) which falls under VA Drug Class RE514. This VA Drug Class (RE514) classifies this compound as belonging to the group DECONGESTANT/ANTITUSSIVE/EXPECTORANT/ANALGESIC. The first component of this combination drug is an analgesic and antipyretic with the molecular formula C₈H₉NO₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 362O9ITL9D, chemically known as n-(4-hydroxyphenyl)acetamide but more generally known as acetaminophen, which bears U.S. National Institutes of Health Compound Identifier 1983. Acetaminophen comes in many forms, including base, acetate, cysteine, cysteinylglycine, di-methyl derivative, glucuronide, glutathione, hemisuccinate, mercapturate, and sulfate. The European Medicines Agency schedules Acetaminophen in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB09611MIG. The World Health Organization schedules acetaminophen in its Anatomical Therapeutic Chemical (ATC) Classification. The second component of this combination drug is an opioid receptor agonist and opioid with the molecular formula C₁₈H₂₅NO, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 7355X3ROTS, chemically known as 2h-10,4a-iminoethanophenanthrene, 1,3,4,9,10,10a-hexahydro-6-methoxy-11-methyl- but more generally known as dextromethorphan, which bears U.S. National Institutes of Health Compound Identifier 3008.</p>
----------	--	--

The European Medicines Agency schedules Dextromethorphan in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB07051MIG. The term DEXTROMETHORPHAN is an International Non-Proprietary Name. The World Health Organization schedules dextromethorphan in its Anatomical Therapeutic Chemical (ATC) Classification. The third component of this combination drug is an expectorant with the molecular formula C₁₀H₁₄O₄, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 495W7451VQ, chemically known as 1,2,3-propanetriol, ether with 2-methoxyphenol but more generally known as guaifenesin, which bears U.S. National Institutes of Health Compound Identifier 3516. The European Medicines Agency schedules Guaifenesin in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB07973MIG. The term GUAIFENESIN is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 25 , No. 10 1971, List 11). The World Health Organization schedules guaifenesin in its Anatomical Therapeutic Chemical (ATC) Classification. The fourth component of this combination drug is an alpha-adrenergic agonist with the molecular formula C₉H₁₃NO₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 1WS297W6MV, chemically known as tannins, compds. with (r)-3-hydroxy-alpha-((methylamino)methyl)benzenemethanol but more generally known as phenylephrine, which bears U.S. National Institutes of Health

51171710	Alosetron	<p>This classification denotes a 5-HT₃ receptor antagonist with the molecular formula C₁₇H₁₈N₄O, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 13Z9HTH115, chemically known as 2,3,4,5-tetrahydro-5-methyl-2-((5-methyl-1H-imidazol-4-yl)methyl)-1H-pyrido(4,3-b)indol-1-one but more generally known as alosetron, which bears U.S. National Institutes of Health Compound Identifier 2099. Alosetron comes in base and hydrochloride forms. The European Medicines Agency schedules Alosetron in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB05358MIG. The term ALOSETRON is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 6, No, 3 1992, List 32). The World Health Organization schedules alosetron in its Anatomical Therapeutic Chemical (ATC) Classification. ALOSETRON is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: <chem>O=C1N(CCC2N(C3C(C12)CCCC3)C)CC1NC[NH]C1C</chem>.</p>	<p>aloksetron; алостерон; alosétron; alosetron; αλοσετρόνη; aloszetron; alosetron; alosetron; alosetron; alosetrón; 阿洛司琼; 1H-pyrido(4;3-b)indol-1-one; 2;3;4;5-tetrahydro-5-methyl-2-((5-methyl-1H-imidazol-4-yl)methyl)-</p>

51172119	Butaverine	<p>This classification denotes an antispasmodic agent, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 1I5O5WIU8X. The European Medicines Agency schedules Butaverine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB06009MIG. Butaverine generally arises in the molecular formula C18H27NO2. The term BUTAVERINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, volume 19 1975, list 5.) BUTAVERINE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: O(C(=O)CC(N1CCCCC1)C1CCCCC1)CCCC.</p>	<p>butaverine; бутаверин; butavérine; butaverin; βουταβερίνη; butaverin; butaverina; butaweryna; butaverina; butaverina; 布他维林; butyl 3-phenyl-3-(1-piperidyl)propionate</p>
51172120	Ciclactate	<p>This classification denotes an antispasmodic agent with the molecular formula C12H22O3, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier MYS6082G8G, chemically known as 3,3,5-trimethylcyclohexyl lactate. but more generally known as ciclactate, which bears U.S. National Institutes of Health Compound Identifier 193969. The European Medicines Agency schedules Ciclactate in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB06233MIG. The term CICLACTATE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 22, No. 10, 1968, List 8). CICLACTATE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: O(C1CC(CC(C1)C)(C)C)C(=O)C(O)C.</p>	<p>ciclactate; κικλακτάτη; siklaktaatti; ciclattato; ciclactat; and ЦИКЛАКТАТ</p>

51172307	Trientine	<p>This classification denotes a metal chelator with the molecular formula C₆H₁₈N₄, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier SJ76Y07H5F, chemically known as 1,4,7,10-tetraazadecane but more generally known as trientine, which bears U.S. National Institutes of Health Compound Identifier 5565. The European Medicines Agency schedules Trientine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB11281MIG. The term TRIENTINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 34, No. 10 1980, List 20). TRIENTINE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: N(CCNCN)CCN.</p>	<p>trientine; триентин; trientine; trientin; τριαντίνη; trientin; trientina; trientyna; trientina; trientina; 曲恩汀</p>
51172308	Methylene blue	<p>This classification denotes a dye with the molecular formula C₁₆H₁₈N₃S.Cl.3H₂O, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier T42P99266K, chemically known as 3,7-<i>bis</i>(dimethylamino)phenothiazin-5-ium chloride but more generally known as basic blue 9, which bears U.S. National Institutes of Health Compound Identifier 6099. The European Medicines Agency schedules Methylene blue in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB21957. SMILES: S1C2C(NC3C1CC(N(C)C)CC3)CCC(=[N](\C)C)/C2.</p>

Class 51172400 Combination antacid, antidiarrheal, anti-flatulence, digestive, and gastric preparations

Commodity	Commodity Title	Definition	Synonyms
51172401	Aluminum hydroxide/magnesium hydroxide/magnesium trisilicate	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GA103. This VA Drug Class (GA103) classifies this compound as belonging to the group ALUMINUM/MAGNESIUM CONTAINING ANTACIDS.	
51172402	Acidophilus/pectin	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GA208. This VA Drug Class (GA208) classifies this compound as belonging to the group ANTIDIARRHEAL AGENTS.	
51172403	Alginic acid/aluminum hydroxide/calcium stearate/magnesium trisi	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GA109. This VA Drug Class (GA109) classifies this compound as belonging to the group MAGNESIUM/SODIUM BICARBONATE CONTAINING ANTACIDS.	
51172404	Alginic acid/aluminum hydroxide/magnesium trisilicate/sodium bic	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GA199. This VA Drug Class (GA199) classifies this compound as belonging to the group ANTACIDS, OTHER.

51172701	Hyoscyamine/methenamine/methylene blue/phenyl salicylate/sodium	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GU209. This VA Drug Class (GU209) classifies this compound as belonging to the group ANTISPASMODICS, URINARY, OTHER.
51172702	Atropine/benzoic acid/hyoscyamine/methenamine/phenyl salicylate	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GU209. This VA Drug Class (GU209) classifies this compound as belonging to the group ANTISPASMODICS, URINARY, OTHER.
51172703	Atropine/benzoic/gelsemium/hyoscyamine/methenamine/methylene/phe	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GU209. This VA Drug Class (GU209) classifies this compound as belonging to the group ANTISPASMODICS, URINARY, OTHER.
51172704	Atropine/benzoic/hyoscyamine/methenamine/methylene/phenyl	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GU209. This VA Drug Class (GU209) classifies this compound as belonging to the group ANTISPASMODICS, URINARY, OTHER.
51172705	Atropine/hyoscyamine/phenazopyridine/scopolamine	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GU209. This VA Drug Class (GU209) classifies this compound as belonging to the group ANTISPASMODICS, URINARY, OTHER.

51173213	Bisacodyl/phospho-soda	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GA209. This VA Drug Class (GA209) classifies this compound as belonging to the group LAXATIVES, OTHER.
51173214	Bisacodyl/tannic acid	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class RS300. This VA Drug Class (RS300) classifies this compound as belonging to the group LAXATIVES, RECTAL.
51173215	Bryonia/hydrastis/phenolphthalein	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GA204. This VA Drug Class (GA204) classifies this compound as belonging to the group STIMULANT LAXATIVES.
51173216	Calcium pantothenate/danthron	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GA209. This VA Drug Class (GA209) classifies this compound as belonging to the group LAXATIVES, OTHER.
51173217	Calcium pantothenate/danthron/docusate	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class GA209. This VA Drug Class (GA209) classifies this compound as belonging to the group LAXATIVES, OTHER.

51191602	Sodium chloride electrolytes	<p>This classification denotes an electrolyte solution, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 451W47IQ8X, chemically known as sodium;chloride, more generally known as sodium chloride or saline, U.S. National Institutes of Health Compound Identifier 5234. The European Medicines Agency schedules Sodium chloride in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB12581MIG. Sodium chloride generally arises in the molecular formula CLNA. The term 'sodium chloride' is an FDA designation, but the term COMPOUND SOLUTION OF SODIUM CHLORIDE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, 1955, 9, 185-194, List 1.) SMILES: [Na+].[Cl-].</p>	
51191603	Total parenteral alimentation or total parenteral nutrition TPN	<p>This classification denotes intravenous preparations that deliver minerals and vitamins necessary to proper electrolyte functioning. These typically come in plastic or polymer bags, and attach to a drip, which flushes substances into the patient's bloodstream or system.</p>

51191704	Multiple electrolyte solutions	This classification denotes alkalinizing agents composed of mixtures of substances that dissociate into two or more ions, to some extent, in water.	
51191705	Citric acid and potassium citrate combination	This classification denotes an alkalinizing agent combination drug. The first component of this drug is a carboxylic acid with the molecular formula C ₆ H ₈ O ₇ .H ₂ O, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 2968PHW8QPm, and which is called citric acid. The European Medicines Agency schedules citric acid monohydrate in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB12482MIG. The term citrate is a U.S. FDA designation. SMILES: OC(CC(=O)O)(CC(=O)O)C(=O)O. The second component of this drug is an an electrolyte replacement agent with the molecular formula C ₆ H ₅ O ₇ .3K.H ₂ O, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier EE90ONI6FF, chemically known as 1,2,3-propanetricarboxylic acid, 2-hydroxy-, tripotassium salt but more generally known as potassium citrate, which bears U.S. National Institutes of Health Compound Identifier 13344. The European Medicines Agency schedules Potassium citrate in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB14973MIG. The World Health Organization schedules potassium citrate in its Anatomical Therapeutic Chemical (ATC) Classification.

51192401	Ascorbic acid/cyanocobalamin/ferrous gluconate/intrinsic factor	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT802. This VA Drug Class (VT802) classifies this compound as belonging to the group MULTIVITAMINS WITH MINERALS.	
51192402	Alanine/glutamic acid/glycine/thiamine	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT809. This VA Drug Class (VT809) classifies this compound as belonging to the group VITAMIN COMBINATIONS, OTHER.	
51192403	Aluminum hydroxide/ferrous sulfate/magnesium hydroxide	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class TN410. This VA Drug Class (TN410) classifies this compound as belonging to the group IRON.

51192404	Ascorbic acid/bioflavonoids	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT801. This VA Drug Class (VT801) classifies this compound as belonging to the group MULTIVITAMINS.
51192405	Ascorbic acid/bioflavonoids/calcium	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT801. This VA Drug Class (VT801) classifies this compound as belonging to the group MULTIVITAMINS.
51192406	Ascorbic acid/citrus bioflavonoids/hesperidin complex/rutin	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT400. This VA Drug Class (VT400) classifies this compound as belonging to the group VITAMIN C.
51192407	Ascorbic acid/cyanocobalamin/ferrous fumarate	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT802. This VA Drug Class (VT802) classifies this compound as belonging to the group MULTIVITAMINS WITH MINERALS.
51192408	Ascorbic acid/cyanocobalamin/ferrous fumarate/folic acid/intrins	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT802. This VA Drug Class (VT802) classifies this compound as belonging to the group MULTIVITAMINS WITH MINERALS.

51192409	Ascorbic acid/cyanocobalamin/ferrous gluconate/folic acid/gold	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT802. This VA Drug Class (VT802) classifies this compound as belonging to the group MULTIVITAMINS WITH MINERALS.
51192410	Ascorbic acid/niacin	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT801. This VA Drug Class (VT801) classifies this compound as belonging to the group MULTIVITAMINS.
51192411	Ascorbic acid/cyanocobalamin/folic acid/iron	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT802. This VA Drug Class (VT802) classifies this compound as belonging to the group MULTIVITAMINS WITH MINERALS.
51192412	Ascorbic acid/docusate/ferrous fumarate	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT809. This VA Drug Class (VT809) classifies this compound as belonging to the group VITAMIN COMBINATIONS, OTHER.
51192413	Ascorbic acid/ferrous fumarate	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class VT802. This VA Drug Class (VT802) classifies this compound as belonging to the group MULTIVITAMINS WITH MINERALS.

51201601	Anthrax antigen	This classification denotes preparations recognized by the immune system and which induce an immune reaction to an acute infection caused by the spore-forming bacteria bacillus anthracis, an infection called anthrax. It commonly affects hooved animals such as sheep and goats. Infection in humans often involves the skin (cutaneous anthrax), the lungs (inhalation anthrax), or the gastrointestinal tract. Anthrax is not contagious and can be treated with antibiotics.	
51201602	Brucella antigen	This classification denotes a vaccine against a genus of gram-negative, aerobic bacteria that causes brucellosis. Its cells are nonmotile coccobacilli and are animal parasites and pathogens. The bacterium is transmissible to humans through contact with infected dairy products or tissue.	
51201604	Diphtheria vaccine	This classification denotes a vaccine for a localized infection of mucous membranes or skin caused by toxigenic strains of corynebacterium diphtheriae. It is characterized by the presence of a pseudomembrane at the site of infection. diphtheria toxin, produced by C. diphtheriae, can cause myocarditis, polyneuritis, and other systemic toxic effects.	
51201605	Encephalitis virus vaccine	This classification denotes vaccines to treat inflammation of brain parenchymal tissue as a result of viral infection, typically primary or secondary manifestation of togaviridae infections; herpesviridae infections; adenoviridae infections; flaviviridae infections; bunyaviridae infections; picornaviridae infections; paramyxoviridae infections; orthomyxoviridae infections; retroviridae infections; and arenaviridae infections.

51201606	Hemophilus influenzae vaccine	This classification denotes a vaccine for a species of haemophilus found on the mucous membranes of humans and a variety of animals, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 2495X8VZXG.
51201607	Hepatitis B virus vaccine	This classification denotes a vaccine for inflammation of the liver in humans caused by a member of the orthohepadnavirus genus, hepatitis b virus, which transmits (generally) by parenteral exposure, such as transfusion of contaminated blood or blood products, but can also be transmitted via sexual or intimate personal contact.
51201608	Influenza virus vaccine	This classification denotes a vaccine for an acute viral infection in humans involving the respiratory tract. It is marked by inflammation of the nasal mucosa; the pharynx; and conjunctiva, and by headache and severe, often generalized, myalgia.
51201609	Measles virus vaccine	This classification denotes a vaccine for a highly contagious infectious disease caused by morbillivirus, common among children but also seen in the nonimmune of any age, in which the virus enters the respiratory tract via droplet nuclei and multiplies in the epithelial cells, spreading throughout the mononuclear phagocyte system.
51201610	Meningococcal vaccine	This classification denotes vaccines or candidate vaccines used to prevent infection with neisseria meningitidis.

1/27/2014

51201612	Mumps virus vaccine	This classification denotes a vaccine for an acute infectious disease caused by rubulavirus, spread by direct contact, airborne droplet nuclei, fomites contaminated by infectious saliva, and perhaps urine, and usually seen in children under the age of 15, although adults may also be affected.
51201613	Parotitis vaccine	This classification denotes a vaccine to treat inflammation of the parotid gland due to Staphylococcus aureus infection.
51201614	Pertussis vaccine	This classification denotes a vaccine for a respiratory infection caused by bordetella pertussis and characterized by paroxysmal coughing ending in a prolonged crowing intake of breath.
51201615	Pneumococcal vaccine	This classification denotes vaccines for vaccines or candidate vaccines used to prevent infections with streptococcus pneumoniae.
51201616	Poliovirus vaccine	This classification denotes a vaccine for a species of enterovirus which is the causal agent of poliomyelitis in humans. Three serotypes (strains) exist. Transmission is by the fecal-oral route, pharyngeal secretions, or mechanical vector (flies). Vaccines with both inactivated and live attenuated virus have proven effective in immunizing against the infection.

UNSPSC v16_0901

1/27/2014

51201617	Rabies vaccine	This classification denotes a vaccine for an acute viral cns infection affecting mammals, including humans, which is caused by the rabies virus (a type species of lyssavirus) and which usually spreads by contamination with virus-laden saliva of bites of rabid animals, most especially dogs, cats, bats, foxes, raccoons, skunks, and wolves. The inactivated virus vaccine is used for preexposure immunization to persons at high risk of exposure, and in conjunction with rabies immunoglobulin, for postexposure prophylaxis.
51201618	Rota virus vaccine	This classification denotes a vaccine for a genus of reoviridae, causing acute gastroenteritis in birds and mammals, including humans.
51201619	Rubella virus vaccine	This classification denotes a vaccine that addresses that acute infectious disease caused by the rubella virus, of type species of rubivirus causing acute infection in humans, primarily children and young adults, and which enters the respiratory tract via airborne droplet and spreads to the lymphatic system.
51201620	Smallpox vaccine	This classification denotes a vaccine an acute, highly contagious, often fatal infectious disease caused by an orthopoxvirus characterized by a biphasic febrile course and distinctive progressive skin eruptions. Vaccination has succeeded in eradicating smallpox worldwide.

1/27/2014

51201621	Tetanus vaccine	This classification denotes a vaccine against a disease caused by tetanospasmin, a powerful protein toxin produced by clostridium tetani, a disease commonly called Tetanus. Tetanus usually occurs after an acute injury, such as a puncture wound or laceration. Generalized tetanus, the most common form, is characterized by tetanic muscular contractions and hyperreflexia. Localized tetanus presents itself as a mild condition with manifestations restricted to muscles near the wound. It may progress to the generalized form.
51201623	Typhoid vaccine	This classification denotes vaccines used to prevent typhoid fever (An acute systemic febrile infection caused by salmonella typhi, a serotype of salmonella enterica) and/or paratyphoid fever (a prolonged febrile illness commonly caused by several paratyphi serotypes of salmonella enterica), which are caused by various species of salmonella.
51201624	Varicella virus vaccine	This classification denotes a live, attenuated varicella virus vaccine used for immunization against chickenpox, recommended for children between the ages of 12 months and 13 years.
51201625	Yellow fever vaccine	This classification denotes a vaccine that addresses an acute infectious disease primarily of the tropics, caused by a virus and transmitted to man by mosquitoes of the genera Aedes and Haemagogus.
51201626	Hepatitis A virus vaccine	This classification denotes a vaccine for inflammation of the liver in humans caused by a member of the hepatovirus genus, human hepatitis a virus, and which can be transmitted through fecal contamination of food or water.

51201627	Haemophilus B vaccine	This classification denotes a vaccine for a species of haemophilus found on the mucous membranes of humans and a variety of animals, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier LUY6P8763W. The US Centers for Disease Control recognizes this preparation under Concept Code 51 and CDC Code System OID 2.16.840.1.113883.12.292.
51201628	Measles and mumps and rubella virus vaccine	This classification denotes a compound vaccine. The first disease that this compound vaccine prevents is a highly contagious infectious disease caused by morbillivirus, called measles, common among children but also seen in the nonimmune of any age, in which the virus enters the respiratory tract via droplet nuclei and multiplies in the epithelial cells, spreading throughout the mononuclear phagocyte system. The second disease this compound vaccine prevents is an acute infectious disease caused by rubulavirus, called mumps, spread by direct contact, airborne droplet nuclei, fomites contaminated by infectious saliva, and perhaps urine, and usually seen in children under the age of 15, although adults may also be affected. The third disease this compound vaccine prevents An acute infectious disease caused by the rubella virus, commonly called rubella, and which enters the respiratory tract via airborne droplet and spreads to the lymphatic system.

51201634	Haemophilus influenzae B with diphtheria and tetanus and wholecell pertussis conjugated vaccine	This classification denotes a vaccine for a) a species of haemophilus found on the mucous membranes of humans and a variety of animals; b) A localized infection of mucous membranes or skin caused by toxigenic strains of corynebacterium diphtheriae; A disease caused by tetanospasmin, a powerful protein toxin produced by clostridium tetani; and d) A respiratory infection caused by bordetella pertussis.	
51201636	Lyme disease vaccine	This classification denotes vaccines for an infectious disease caused by a spirochete, borrelia burgdorferi, which is transmitted chiefly by Ixodes dammini and pacificus ticks in the United States and Ixodes ricinis in Europe. It is a disease with early and late cutaneous manifestations plus involvement of the nervous system, heart, eye, and joints in variable combinations. This disease was formerly known as Lyme arthritis and first discovered at Old Lyme, Connecticut.	
51201638	Plague vaccine	This classification denotes vaccines for an acute infectious disease caused by yersinia pestis that affects humans, wild rodents, and their ectoparasites. This condition persists due to its firm entrenchment in sylvatic rodent-flea ecosystems throughout the world. Bubonic plague is the most common form.	
51201639	Staphylococcus vaccine	This classification denotes a vaccine against staphylococcus aureus, an opportunistic bacterial pathogen, a genus of gram-positive, facultatively anaerobic, coccoid bacteria. Its organisms occur singly, in pairs, and in tetrads and characteristically divide in more than one plane to form irregular clusters.

51201702	E Coli	This clasification denotes vaccines or candidate vaccines used to prevent or treat infections from a species of gram-negative, facultatively anaerobic, rod-shaped bacteria (gram-negative facultatively anaerobic rods) commonly found in the lower part of the intestine of warm-blooded animals. It is usually nonpathogenic, but some strains are known to produce diarrhea and pyogenic infections. Pathogenic strains (virotypes) are classified by their specific pathogenic mechanisms such as toxins (enterotoxigenic escherichia coli), etc.	
51201703	Gumboro	This clasification denotes vaccines or candidate vaccines used to prevent or treat infection a species of avibirnavirus causing severe inflammation of the bursa of Fabricius in chickens and other fowl, sometimes called infectious bursal disease virus. Transmission is thought to be through contaminated feed or water.	
51201704	Avian infectious bronchitis	This clasification denotes vaccines or candidate vaccines used to prevent or treat infection with a species of coronavirus causing infections in chickens and possibly pheasants.	
51201705	Newcastle virus vaccine	This clasification denotes vaccines to treat an acute febrile, contagious, viral disease of birds caused by an avulavirus called newcastle disease virus. It is characterized by respiratory and nervous symptoms in fowl and is transmissible to man causing a severe, but transient conjunctivitis.

51241401	Benzalkonium chloride/polyoxyethylene	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.
51241402	Acetone/alcohol/benzalkonium chloride/salicylic acid	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.
51241403	Acetone/isopropyl alcohol/polysorbate 80	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.
51241404	Adapalene/benzoyl peroxide	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.
51241405	Alcohol/citric acid/salicylic acid	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.

51241406	Alcohol/glycolic acid	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.
51241407	Alcohol/resorcinol	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.
51241408	Alcohol/salicylic acid	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.
51241409	Alcohol/sulfur/zinc oxide/zinc sulfate	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.
51241410	Attapulgite/salicylic acid/sulfur	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE752. This VA Drug Class (DE752) classifies this compound as belonging to the group ANTIACNE AGENTS, TOPICAL.

51241862	Diphenhydramine/phenol	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE900. This VA Drug Class (DE900) classifies this compound as belonging to the group DERMATOLOGICALS, TOPICAL OTHER.
51241863	Diphenhydramine/tripelennamine	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE900. This VA Drug Class (DE900) classifies this compound as belonging to the group DERMATOLOGICALS, TOPICAL OTHER.
51241864	Diphenhydramine/zinc acetate	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE900. This VA Drug Class (DE900) classifies this compound as belonging to the group DERMATOLOGICALS, TOPICAL OTHER.
51241865	Diphenhydramine/zinc oxide	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE900. This VA Drug Class (DE900) classifies this compound as belonging to the group DERMATOLOGICALS, TOPICAL OTHER.
51241866	Fluocinolone/hydroquinone/tretinoin	This classification denotes a combination drug defined by the U.S. Department of Veterans Affairs in its (VA's) National Drug File (NDF), which falls under VA Drug Class DE900. This VA Drug Class (DE900) classifies this compound as belonging to the group DERMATOLOGICALS, TOPICAL OTHER.

Class 51272100 Anaesthetic benzoates

Commodity	Commodity Title	Definition	Synonyms
51272101	Parethoxycaine	<p>This classification denotes an anesthetic agent with the molecular formula C₁₅H₂₃NO₃, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 68E52E5J67, chemically known as benzoic acid, p-ethoxy-, 2-(diethylamino)ethyl ester but more generally known as parethoxycaine, which bears U.S. National Institutes of Health Compound Identifier 7183. The European Medicines Agency schedules Parethoxycaine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB09624MIG. The term PARETHOXYCAINE is an International Non-Proprietary Name. PARETHOXYCAINE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: O(CCN(CC)CC)C(=O)C1CCC(OCC)CC1.</p>	<p>parethoxycaine; паретоксикаин; paréthoxycaine; parethoxycain; παρεθοξυκαΐνη; paretoxikain; paretossicaina; paretoksykaina; paretoxicaina; paretoxicaina; 对乙氧卡因</p>
51272102	Amylocaine	<p>This classification denotes an anesthetic agent with the molecular formula C₁₄H₂₁NO₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier QRW683O56T, chemically known as 2-butanol, 1-(dimethylamino)-2-methyl-, benzoate (ester) but more generally known as amylocaine, which bears U.S. National Institutes of Health Compound Identifier 10767. Amylocaine most often comes in base and hydrochloride forms. The European Medicines Agency schedules Amylocaine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB12893MIG. SMILES: O(C(CN(C)C)(CC)C)C(=O)C1CCCCC1.</p>

51272103	Betoxycaïne	<p>This classification denotes an anesthetic agent with the molecular formula C₁₉H₃₂N₂O₄, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 03DB58Y9DO, chemically known as ethanol, 2-(2-(diethylamino)ethoxy)-, 3-amino-4-butoxybenzoate but more generally known as betoxycaïne, which bears U.S. National Institutes of Health Compound Identifier 19668. Betoxycaïne most often comes in base, q, and hydrochloride forms. The European Medicines Agency schedules Betoxycaïne in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB05807MIG. The term BETOXYCAINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 19 1975, List 5). BETOXYCAINE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: <chem>O(CCN(CC)CC)CCOC(=O)C1CC(N)C(OCCCC)CC1</chem>.</p>	<p>betoxycaïne; бетоксикаин; bétoxycaïne; betoxycaïn; βητοξυκαΐνη; betoxikain; betoxicaina; betoksykaina; betoxycaína; betoxycaína; 贝托卡因</p>
51272104	Butethamine	<p>This classification denotes an anesthetic agent with the molecular formula C₁₃H₂₀N₂O₂.ClH, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 0M63DKI91K, chemically known as 2-isobutylaminoethanol hydrochloric acid salt, p-aminobenzoic acid ester but more generally known as butethamine hydrochloride, which bears U.S. National Institutes of Health Compound Identifier 11116. SMILES: <chem>CC(C)CNCCOC(=O)C1=CC=C(C=C1)N.Cl</chem>.</p>

51272105	Hydroxytetracaine	<p>This classification denotes an anesthetic agent with the molecular formula C₁₅H₂₄N₂O₃, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 8A96H4311N, chemically known as 4-(butylamino)-2-hydroxy-benzoic acid, 2-(dimethylino)ethyl ester (9ci) but more generally known as hydroxytetracaine, which bears U.S. National Institutes of Health Compound Identifier 71630. The European Medicines Agency schedules Hydroxytetracaine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB08086MIG. The term HYDROXYTETRACAIN is an International Non-Proprietary Name. HYDROXYTETRACAIN is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: O(CCN(C)C)C(=O)C1C(O)CC(NCCCC)CC1.</p>	<p>hydroxytetracaine; гидрокситетракаин; hydroxytétracaïne; hydroxytetracain; υδροξυτετρακαΐνη; hidroxitetrakain; idrossitetracaina; hydroksytetrakaina; hidroxitetracaina; hidroxitetracaina; 羟丁卡因</p>

51272106	Meprylcaine	<p>This classification denotes an anesthetic agent with the molecular formula C₁₄H₂₁NO₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 82YT7WU9PW, chemically known as 1-propanol, 2-methyl-2-(propylamino)-, benzoate (ester) but more generally known as meprylcaine, which bears U.S. National Institutes of Health Compound Identifier 4065. The European Medicines Agency schedules Meprylcaine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB08760MIG. The term MEPRYLCAINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 13, No. 12, 1959, List 3). MEPRYLCAINE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: O(CC(NCCC)(C)C)C(=O)C1CCCCC1.</p>	<p>meprylcaine; меприлкаин; méprylcaïne; meprylcain; μεπρυλοκαΐνη; mepriLKain; mepriLcaina; meprylkaina; mepriLcaina; mepriLcaína; 美普卡因</p>
51272107	Metabutethamine	<p>This classification denotes an anesthetic agent with the molecular formula C₁₃H₂₀N₂O₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier PSJ9VIF3RV, chemically known as ethanol, 2- (isobutylamino)-, m-aminobenzoate (ester), monohydrochloride but more generally known as metabutethamine, which bears U.S. National Institutes of Health Compound Identifier 11115. The World Health Organization schedules metabutethamine in its Anatomical Therapeutic Chemical (ATC) Classification. SMILES: CC(C)CNCCOC(=O)C1=CC(=CC=C1)N.</p>

51272109	Pribecaine	<p>This classification denotes an anesthetic agent, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 382TLA8X28. The European Medicines Agency schedules Pribecaine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB10034MIG. Pribecaine generally arises in the molecular formula C16H23NO3. The term PRIBECAINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, volume 29, no. 10 1975, list 15.) PRIBECAINE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: O(CCCN1CCCCC1)C(=O)C1CC(OC)CCC1.</p>	<p>pribecaine; прибекаин; pribécaïne; pribecain; πριβεκαΐνη; pribekain; pribecaina; pribekaina; pribecaína; pribecaína; 丙贝卡因</p>
51272110	Tolycaine	<p>This classification denotes an anesthetic agent, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 12R8659YM6. The European Medicines Agency schedules Tolycaine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB11183MIG. Tolycaine generally arises in the molecular formula C15H22N2O3. The term TOLYCAINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, volume 21 no. 12 1967, list 7.) TOLYCAINE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: O=C(NC1C(CCCC1C(=O)OC)C)CN(CC)CC.</p>	<p>tolycaine; толикаин; tolycaine; tolycain; τολυκαΐνη; tolikain; tolicaina; tolikaina; tolicaína; tolicaína; 托利卡因</p>

51272201	Aliflurane	<p>This classification denotes an anesthetic agent with the molecular formula C₄H₃ClF₄O, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier Q1069WKM8G, chemically known as 2-chloro-1,2,3,3-tetrafluorocyclopropyl methyl ether but more generally known as aliflurane, which bears U.S. National Institutes of Health Compound Identifier 41967. The European Medicines Agency schedules Aliflurane in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB05326MIG. The term ALIFLURANE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 31, No10, 1977, List 17). ALIFLURANE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: CLC1(F)C(F)(OC)C1(F)F.</p>	<p>aliflurane; алифлуран; aliflurane; alifluran; αλιφλουράνη; aliflurán; aliflurano; alifluran; aliflurano; aliflurano; 阿列氟烷</p>
51272202	Cyclopropane	<p>This classification denotes an anesthetic agent, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 99TB643425. The European Medicines Agency schedules Cyclopropane in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB06861MIG. Cyclopropane generally arises in the molecular formula C₃H₆. The term CYCLOPROPANE is an International Non-Proprietary Name or INN. CYCLOPROPANE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: C1CC1.</p>	<p>cyclopropane; циклопропан; cyclopropane; cyclopropan; κυκλοπροπάνιο; ciklopropán; ciclopropano; cyklopropan; ciclopropano; ciclopropano; 环丙烷</p>

51272403	Ether	<p>This classification denotes an inhalation anesthetic and solvent with the molecular formula C₄H₁₀O, a compound which US FDA recognizes as an active or moiety under Unique Ingredient Identifier 0F5N573A2Y, chemically known as 1,1-oxydiethane but more generally known as diethyl ether, and which bears US National Library of Medicine Compound Identifier 3293. The European Medicines Agency schedules Diethyl ether in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB30482. The World Health Organization schedules diethyl ether in its Anatomical Therapeutic Chemical (ATC) Classification. Ethyl ether bears European Inventory of Existing Commercial Chemical Substances number 200-467-2. Under the World Customs Organization Harmonised System, ethyl ether is scheduled in 29091100, and ethyl ether bears US Drug Enforcement Administration Number 6584. The United Nations International Drug Control Programme's Technical Services Branch, in accordance with and support of the 1988 Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances, and Article 12 thereof, in conjunction with scientific findings Clandestine Manufacture of Substances under International Control (ST/NAR/10), has determined that this commodity (ethyl ether) is a precursor in manufacture of Amphetamine, Cocaine, DET (N,N-diethyltryptamine), DMT (N,N-dimethyltryptamine), Fentanyl, Heroin, (+)-Lysergide (LSD), Mecloqualone, Mescaline, Metamphetamine, Methadone, Methaqualone, MPPP (1-methyl-4-phenyl-4-propionoxypiperidine), PEPAP (1-(2-</p>	<p>диетилов етер; етер; éter dietílico; éter; diethylether ether; διαιθυλικός αιθέρας· αιθέρας; oxyde de diéthyle éther éthylique; etere dietilico; dietiletere; etere; dietil-éter; éter; dietylietteri; eetteri.</p>

51273830	Antipyrine and benzocaine solution	<p>This classification denotes a combination drug. The drug consists of two components. The first is PHENAZONE or PHENAZON or ANTIPYRINE or ANALGESINE, a nonsteroidal antiinflammatory drug with the molecular formula C₁₁H₁₂N₂O, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier T3CHA1B51H, chemically known as 2,3-dimethyl-1-phenylpyrazol-5-one but more generally known as antipyrine, which bears U.S. National Institutes of Health Compound Identifier 2206. Antipyrine most often comes in base, iodide, and salicylate forms. The European Medicines Agency schedules Phenazone in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB09753MIG. The term PHENAZONE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 13, No. 12, 1959, List 3). The World Health Organization schedules antipyrine in its Anatomical Therapeutic Chemical (ATC) Classification. SMILES: <chem>CC1=CC(=O)N(N1C)C2=CC=CC=C2</chem>. The second component of this drug is BENZOCAINE, an anesthetic agent with the molecular formula C₉H₁₁NO₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier U3RSY48JW5, chemically known as 4-aminobenzoic acid, ethyl ester but more generally known as benzocaine, which bears U.S. National Institutes of Health Compound Identifier 2337. Benzocaine most often comes in base, oxalate, silicon, and succinate forms. The European Medicines Agency schedules Benzocaine in its eXtended EudraVigilance</p>

51282507	Cefroxadine	<p>This classification denotes a cephalosporin antibiotic with the molecular formula C₁₆H₁₉N₃O₅S, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier B908C4MV2R, chemically known as 7-(d-2-amino-2-(1,4-cyclohexadienyl)acetamide)-3-methoxy-3-cephem-4-carboxylic acid but more generally known as cefroxadine, which bears U.S. National Institutes of Health Compound Identifier 40117. The European Medicines Agency schedules Cefroxadine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB07419MIG. The term CEFROXADINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 34, No. 10 1980, List 20). The World Health Organization schedules cefroxadine in its Anatomical Therapeutic Chemical (ATC) Classification. CEFROXADINE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: S1C2N(C(=O)C2NC(=O)C(N)C2C=CCC=C2)C(=C(OC)C1)C(=O)O.</p>	<p>cefroxadine; κεφροξαδίνη; kefrokadiini; cefroxadina; cefroxadin; цефроксадин; and 头孢沙定</p>

51283603	Rifapentine	<p>This classification denotes an antitubercular agent, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier XJM390A33U. The European Medicines Agency schedules Rifapentine in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB10311MIG. Rifapentine generally arises in the molecular formula C₄₇H₆₄N₄O₁₂. The term RIFAPENTINE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, volume 34, no. 10 1980, list 20.) RIFAPENTINE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix.</p> <p>SMILES: <chem>O(C1C(C(O)C(C(O)C(C)C=CC=C(C(=O)NC2=C(O)C3C(C(=O)/C2=C/NN2CCN(C4CCCC4)C(C2)C2C(OC(OC=CC(OC)C1C)(C2=O)C)C(C3O)C)C)C)C(=O)C.</chem></p>	<p>rifapentine; ριφαπεντίνη; rifapentiini; rifapentina; rifapentin; рифапентин; and 利福噴汀</p>

51283604	Rifaximin	<p>This classification denotes an antibiotic, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier L36O5T016N. The European Medicines Agency schedules Rifaximin in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB10312MIG. Rifaximin generally arises in the molecular formula C₄₃H₅₁N₃O₁₁. The term RIFAXIMIN is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, volume 37, no. 6, 1983, list 23.) RIFAXIMIN is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix.</p> <p>SMILES: <chem>O(C1C(C(O)C(C(O)C(C)C=CC=C(C(=O)NC2C3N4C(NC3C3C5C(OC(OC=CC(OC)C1C)(C5=O)C)C(C(O)C3C2O)C)CC(CC4)C)C)C)C(=O)C</chem></p>	<p>rifaximin; ριφαξιμίνη; rifaksiimiini; rifaximina; rifaximin; рифаксимин; and 利福昔明</p>

51283701	Cefaclor	<p>This classification denotes a cephalosporin antibiotic with the molecular formula C₁₅H₁₄CIN₃O₄S.H₂O, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 69K7K19H4L, chemically known as 5-thia-1-azabicyclo(4.2.0)oct-2-ene-2-carboxylic acid, 7-((aminophenylacetyl)amino)-3-chloro-8-oxo-, (6r-(6-alpha,7-beta(r*))) - but more generally known as cefaclor, which bears U.S. National Institutes of Health Compound Identifier 40958. Cefaclor most often comes in base, anhydrous, and hydrate forms. The European Medicines Agency schedules Cefaclor in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB06163MIG. The World Health Organization schedules cefaclor in its Anatomical Therapeutic Chemical (ATC) Classification. CEFACLOR is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: CLC1=C(N2C(SC1)C(NC(=O)C(N)C1CCCCC1)C2=O)C(=O)O.</p>	<p>cefaclor; κεφακλόρη; kefacloori; cefacloro; cefaclor; цефаклор; and 头孢克洛</p>

51283702	Cefamandole	<p>This classification denotes a cephalosporin antibiotic with the molecular formula C₁₈H₁₈N₆O₅S₂, a preparation that US FDA recognizes as an active ingredient or moiety under Unique Ingredient Identifier 5CKP8C2LLI, chemically known as 5-thia-1-azabicyclo(4.2.0)oct-2-ene-2-carboxylic acid, 7-((hydroxyphenylacetyl)amino)-3-(((1-methyl-1H-tetrazol-5-yl)thio)methyl)-8-oxo-, (6r-(6alpha,7beta(r*))) - but more generally known as cefamandole, which bears U.S. National Institutes of Health Compound Identifier 36831. The European Medicines Agency schedules Cefamandole in its eXtended EudraVigilance Medicinal Product Dictionary or XEVMPD under Index SUB07373MIG. The term CEFAMANDOLE is an International Non-Proprietary Name or INN (see World Health Organization INN reference publication, Volume 28, No. 10 1974, List 14). The World Health Organization schedules cefamandole in its Anatomical Therapeutic Chemical (ATC) Classification. CEFAMANDOLE is scheduled in the U.S. International Trade Commission's Harmonized Tariff System (HTS) Pharmaceutical Appendix. SMILES: S1C2N(C(=O)C2NC(=O)C(O)C2CCCCC2)C(=C(C1)CSC1N(NNN1)C)C(=O)O.</p>	<p>cefamandole; κεφαμανδόλη; kefamandoli; cefamandolo; cefamandol; цефамандол; and 头孢孟多</p>
