41115721	Fast protein liquid chromatography FPLC system	A type of column chromatography system used to separate or purify proteins from complex mixtures. It is very commonly used in biochemistry and enzymology.	
41115722	Fast protein liquid chromatography FPLC column	A device used in Fast Protein Liquid Chromatography FPLC systems.	
41115723	Supercritical fluid chromatograph	An analysis device that is designed for separation and determination of the compounds by using the supercritical fluid as mobile phase.	
41115724	Chromatography vial or insert or cap	Vial or insert or cap utilized for chromatographic bioanalytical autosampling and analysis	
41115725	Thin layer chromatography plate	A sheet of metal, glass or plastic, that is coated with a thin layer of solid silica or alumina absorbent, and is utilized for thin layer chromatographic separation of a mixture's components through capillary action	
41115726	Thin layer chromatography fitting	Replacement part or fitting utilized on a thin layer chromatograph	
41115727	Chromatography blotting paper	A blotting paper composed of superclean cotton or cellulose that is utilized during the stationary phase of thin layer chromatography to ensure wicking capability and uniformity of capillary action

41115820	Immunology analyzer accessories or supplies		
41115821	Microbiology analyzers		
41115822	Microbiology analyzer accessories or supplies		
41115823	Protein analyzers		
41115824	Protein analyzer accessories or supplies		
41115825	Radioisotopic analyzers		
41115826	Radioisotopic analyzer accessories or supplies		
41115827	Urinalysis analyzers		
41115828	Urinalysis analyzer accessories or supplies		
41115829	Meat or dairy product analyzers		
41115830	Glucose analyzers		
41115831	Stacker or magazine for microplate handling	Robotic device to handle SBS microplates. Such robots may be liquid handlers which aspirate or dispense liquid samples from and to these plates, or plate movers which transport them between instruments.	
41115832	Antibiotic detection equipment	Equipment that tests the anti-biotic substances reside in dairy products, meats, and others as the chemical substance that is produced by the microbes.	
41115833	Skin analyzer	Equipment that examines the skin condition with the measurement of skin oil, moisture, elasticity, pores, pigment and others.	
41115834	Flow cytometer accessories or supplies	Replacement parts, accessories and supplies for flow cytometric analysis	
41115835	Androgeny and fertility automated counter	Analyzers for automated semen and sperm analysis	
41115836	Androgeny and fertility automated counter accessories and supplies	Replacement parts, accessories and supplies for automated semen and sperm analysis

41115837	Particle counter and sizer	Automated analyzer for fluid particle enumeration and size distribution analysis	
41115838	Particle counter and sizer accessories and supplies	Replacement parts, accessories and supplies for automated fluid particle enumeration and size distribution analysis	
41115839	Blood bank apheresis and donor unit processing analyzer	All analyzers utilized for blood component therapy collection, apheresis and processing	
41115840	Blood bank apheresis and donor unit processing analyzer accessories and supplies	Replacement parts, tubing sets, accessories and supplies for automated blood component therapy collection and processing	
41115841	Automated blood culture system	Automated system for incubating and processing blood cultures	
41115842	Automated blood culture system analyzer accessories or supplies	Replacement parts, accessories and supplies for automated blood culture system	
41115843	Molecular diagnostics analyzer	Automated system for qualitative and quantitative nucleic acid diagnostics	
41115844	Molecular diagnostics analyzer accessories	Replacement parts and accessories for molecular diagnostics automated testing system	
41115845	Cell metabolism analyzer	Automated system for measurement of metabolic pathways, predominately glycolysis and mitochondrial respiration in real time assays	
41115846	Cell metabolism analyzer accessories	Replacement parts and accessories for automated cell metabolism analyzer systems	
41115847	Sweat chloride iontophoresis analyzer	Automated system for collection and testing of sweat chloride by iontophoresis methodology for cystic fibrosis screening	
41115848	Sweat chloride iontophoresis analyzer accessories	Replacement parts and accessories utilized for iontophoretic sweat chloride collection and automated testing systems	
41115849	Electrolyte analyzer	Automated system utilized for sodium, potassium, chloride, carbon dioxide and lithium quantitation

UNSPSC v16_0901

1/27/2014

41115850	Pipettor delivery calibration and verification analyzer	Automated system for the calibration and volume delivery verification of manual and electronic pipettors	
41115851	Pipettor delivery calibration and verification analyzer accessories	Replacement parts, accessories and supplies for pipettor calibration and delivery verification analyzers	
41115852	Flow cytometry analyzer	Automated system for laser based cell counting and sorting, biomarker monitoring and other biophysical applications by suspension in fluid and passage through a detection system	
41115853	Automated high performance chromatography HPLC analyzer system	Automated systems utilizing high performance chromatography HPLC methodology for biochemical quantitation	
41115854	Automated high performance chromatography HPLC analyzer system accessories	Replacement parts and accessories utilized for high performance chromatography HPLC automated testing systems	
41115855	Transplant diagnostics analyzer	Automated systems utilized for immunoserology and HLA typing specific to transplant diagnostics platforms	
41115856	Transplant diagnostics analyzer accessories	Replacement parts and accessories utilized for automated transplant diagnostics platform testing systems	
41115857	Flame photometer analyzer	Automated system for the quantitation of sodium, potassium, chloride and lithium in serum, plasma or aqueous solutions, utilizing spectral ray measurement following sample vaporization by an extremely hot flame	
41115858	Flame photometer analyzer accessories	Replacement parts and accessories utilized for automated flame photometric analyzer systems	
41115859	Gas-liquid chromatography and mass spectrometry analyzer	Automated system combining gas or liquid chromatography and mass spectrometry for sample constituent identification in diverse applications	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41115860	Genomic analysis analyzer	Automated systems for qualitative and quantitative genomic analysis, gene expression, and polymerase chain reaction PCR amplification and detection	
41115861	Genomic analysis analyzer accessories	Replacement parts and accessories utilized on genomic analysis analyzers	
41115862	Nucleic acid extraction, isolation and purification analyzer	Automated sample preparation systems for nucleic acid extraction, isolation and purification, resulting in purified products to be utilized in diverse nucleic acid detection systems	
41115863	Nucleic acid extraction isolation and purification analyzer accessories	Replacement parts and accessories utilized on nucleic acid extraction, isolation and purification analyzers	
41115864	Multiplex analyzer	Automated systems for simultaneous qualitative and quantitative multiplex microarray analysis	
41115865	Multiplex analyzer accessories	Replacement parts and accessories utilized on multiplex analyzers	
41115866	Biomagnetic separation analyzer	Automated system which applies a magnetic force on particles within a solution in order to separate molecules, specific proteins, cells or nucleic acids within in vitro and in vivo scenarios	
41115867	Biomagnetic separation analyzer accessories	Replacement parts and accessories utilized on magnetic bioseparation analyzers	
41115868	Automated quality control manager system	Analyzer system and software designed to manage laboratory assay quality control data, providing a mechanism to automate, centralize, standardize and implement QC processes necessary for accreditation and cost management.

41116150	Androgeny and fertility test kits and supplies	All test kits and supplies for manual semen and sperm analysis	
41116151	Androgeny and fertility quality controls and calibrators and standards	All quality controls utilized in manual semen and sperm analysis	
41116152	Flow cytometry quality controls and calibrators and standards	All quality controls, calibrator beads, and standards utilized in flow cytometric analysis	
41116153	Immunohistochemistry quality controls and calibrators and standards	All quality control preserved tissue slides utilized specifically on IHC autostainers	
41116154	Particle counter and sizer quality controls and calibrators and standards	All quality controls and calibrators and standards utilized in automated particle enumeration and size distribution counters	
41116155	Molecular biology and cell culture growth media	All growth media for cell and tissue culture utilized to facilitate molecular biological evaluations	
41116156	Virology reagents or solutions or stains	All reagents, solutions or stains utilized for cell virology detection and identification procedures	
41116157	Virology cell and tissue culture media	All growth media for cell and tissue culture utilized in virology detection and identification procedure	
41116158	Enzyme linked immunosorbent assay ELISA kit	A test kit that uses antibodies and color change to identify a substance	
41116159	Transplant diagnostics test kit	Test kit utilized for manual methodologies in immunoserology and HLA testing specific to transplant diagnostics platforms	
41116160	Transplant diagnostics reagent or solution	Reagent, solution or stain utilized for manual methodologies in immunoserology and HLA typing specific to transplant diagnostics platforms

41116220	Lipid profile or at risk liver enzyme test monitor or meter	Monitor or meter utilized for point of care whole blood lipid profile and "at risk" liver enzymes analysis	
41116221	Lipid profile or at risk liver enzyme test monitor or meter accessories	Replacement parts and accessories utilized for point of care whole blood lipid profile and "at risk" liver enzymes analysis	
41116222	Blood bilirubin test monitor or meter	Monitor or meter utilized for point of care whole blood bilirubin quantitation	
41116223	Blood bilirubin test monitor or meter accessories	Replacement parts and accessories for point of care whole blood bilirubin test monitor or meter	
41116224	Glucose and beta hemoglobin test monitor or meter accessories	Replacement parts and accessories for point of care whole blood glucose and beta hemoglobin test monitor or meter	

Class

Commodity	Commodity Title	Definition	Synonyms
41116301	Flash point testers		
41116302	Incombustibility tester	A type of device that tests the temperature not to catch the fire to prevent the fire risk from textile product, electric wire, plastic, construction interior material, vehicle interior material and others.	
41116303	Flammability tester	Flammability indicates the degree of resistance to the flame for certain material. It is stringently regulated for clothes, interior materials, construction materials and others, and there are several types of tester in accordance with the product use and test method.	
41116304	Fire point tester	A tester that measures the igniting temperature that means the combustibles would be required to reach certain temperature from the outside heat to make itself burning.

41116501	Meter dials or dial kits		
41116502	Electrical clip	A clip that is designed to promptly and temporarily connect the electric signal.	

Family 41120000 Laboratory supplies and fixtures

Class 41121500 Pipettes and liquid handling equipment and supplies

Commodity	Commodity Title	Definition	Synonyms
41121501	Robotic or automated liquid handling systems		
41121502	Laboratory diluters		
41121503	Manual multichannel air displacement pipetters		
41121504	Manual single channel air displacement pipetters		
41121505	Manual single channel positive displacement pipetters		
41121506	Manual single channel repeating pipetters		
41121507	Electronic single channel pipetters		
41121508	Electronic multichannel pipetters		
41121509	Pasteur or transfer pipettes		
41121510	Volumetric pipettes		
41121511	Serological pipettes		
41121513	Dropping pipettes		
41121514	Pipette pumps		
41121515	Pipette bulbs		
41121516	Bottle top dispensers		
41121517	Pipetter inserts or accessories		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41121518	Aspirating pipette	Pipette that is unplugged, ungraduated and sterile, utilized for aspirating liquids by vacuum suction methodology	
41121519	Positive displacement repeating pipettor	Pipettor operating on a positive displacement principle, which contains a reservoir tip, allowing for variable volume repeating dispensing from the reservoir and not from the primary sample	
41121520	Automated vial or tube decapper recapper	Automated system which utilizes a hands free torque technique to decap and recap tubes or vials while retaining reagent and sample integrity	
41121521	Automated liquid handling system accessories	Replacement parts and accessories utilized on automated liquid handling and diluter systems	
41121522	Pipettor reagent reservoir	Reservoir or boat utilized to contain reagents, solutions or stains that will be pipetted by multichannel pipettors	

Class

Commodity	Commodity Title	Definition	Synonyms
41121601	Filter tip pipette tips		
41121602	Aerosol barrier pipette tips		
41121603	Low retention pipette tips		
41121604	Reference pipette tips		
41121605	Ultramicro pipette tips		
41121606	Gel loading pipette tips		
41121607	Universal pipette tips		
41121608	Robotic pipette tips		
41121609	Variable volume pipette tips		
41121610	Repeating pipettor reservoir pipette tip	Reservoir style pipette "tip" that is used for pipetting with positive displacement repeating pipettors

Class 41121700 Test Tubes

Commodity	Commodity Title	Definition	Synonyms
41121701	Multipurpose or general test tubes		
41121702	Microcentrifuge tubes		
41121703	Centrifuge tubes		
41121704	Cryogenic tubes		
41121705	Nuclear magnetic resonance NMR tubes		
41121706	Culture tubes		
41121707	Separator test tubes		
41121708	Anti coagulant test tubes		
41121709	Capillary or hematocrit tubes		
41121710	Test tube closures or caps		
41121711	Urinalysis testing tubes or accessories		
41121712	Viscometer tube	A tube that is used for tester to measure various viscosities. Depending on the viscosity tester and method, each has different type and shape.	
41121713	Sand size analyzer	A measurement tube that measures the volume of sand and others by installing the sensor and others to the pipe where sand and others are passed or passing the sand and others on the upper pipe to pass the lower part with the water in the glass pipe or plastic pipe with the scale.	
41121714	Cluster tube or tube strip or cap	A tube system comprised of microtubes that are attached in strips or blocks that are used for harvesting cells, cell uptake and receptor binding assays and/or radioimmunoassays	
41121715	Specimen transport tube or aliquot tube	Tube used for the aliquoting of urine, plasma, serum, whole blood, cerebrospinal fluid or body fluid for the purpose of transport or storage in a tube other than the primary collection tube

Class 41121800 General laboratory glassware and plasticware and supplies

Commodity	Commodity Title	Definition	Synonyms
41121801	Laboratory watch glasses		
41121802	Laboratory stirring rods		
41121803	Laboratory beakers		
41121804	Laboratory flasks		
41121805	Laboratory graduated cylinders		
41121806	Laboratory vials		
41121807	Laboratory ampoules		
41121808	Laboratory burets		
41121809	Laboratory funnels		
41121810	Laboratory staining dishes or jars		
41121811	Laboratory microchemistry kits		
41121812	Laboratory dishes		
41121813	Cuvettes		
41121814	Laboratory lids or covers or coverslips	These are covers and lids for beakers, flasks, graduated cylinders, etc.	
41121815	Laboratory adapters or connectors or fittings		
41121816	Laboratory glass tube	A base glass that makes the glass device for testing, such as test tube, or cylinder. The coefficient of thermal expansion is low that there is almost no impact by the heat expansion during the experiment.	
41121817	Glass bell jar	Glass equipment that has the bell-shape. It is used for combustion experiment to find out the properties of weight, ingredient and of air atmosphere.	
41121818	Laboratory storage bottle	Bottles utilized for media and general storage	
41121819	Laboratory dropper bottle and dropper cap	Bottles and bottle caps utilized specifically for dropper dispensing of reagents and solutions	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41121820	Laboratory carboy or spout	Large capacity container, comprised of rigid plastic materials, that is used for the storage or transport of fluids and/or the spout utilized for dispensing from the carboy	
41121821	Vial closure cap or seal or stopper	Cap, flip seal or stopper used for the closure of a laboratory general purpose sample vial

42131700

Surgical textiles

Commodity	Commodity Title	Definition	Synonyms
42131701	Surgical drapes	A large assortment of durable, tear-resistant, flame retardent, low-linting sheet-like barrier products used to cover a patient and establish a sterile field during an invasive procedure. Size and shape used are determined by the needs of the surgical team at the point of use. Drapes may be whole or fenestrated in a variety of ways to accomodate the size and shape of the pateint and requirements of the operative site.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42131702	Surgical gown	A long, loose, durable, tear resistant, low-linting garment with cuffed sleeves that features an overlapping back panel and waist level strap to enclose the torso in an aseptic fashion. Disposable and reusable gowns are sterile and in sizes ranging from X-Small to XX-Large. The disposable versions are usually constructed of waterproof breathable non-woven fabric. Non-disposable gowns may be made of woven cloth or water repellant fabric with reinforced barriers in the torso and sleeves.	
42131704	Surgical towels	A product made of absorbant paper or woven cloth material used in the health care setting to absorb fluids. The paper version is always for single use only. Cloth products may be provided unsterile to be processed for multiple uses or sterile for single use. Some cloth products are supplied sterile with a radioopaque marker or QR code for use as a counted surgical item during an invasive procedure.	
42131705	Surgical leggings		
42131706	Surgical jumpsuits		
42131707	Surgical isolation suits or helmets or facemasks or accessories		
42131708	Surgical cleanup or room turnover pack or kit	Packs or kits used to cleanse and restore an operating room OR between procedures. These kits or packs include disposable bed sheets, mop heads, cleaning wipes, breathing circuits, etc.

UNSPSC v16_0901

1/27/2014

42132101	Hospital underpads	A disposable or non-disposable multi-layer bedding product that is typically square or rectangular shaped in a variety of sizes. Disposable products are constructed with a top layer made of breathable wicking material that allows fluids to pass through to a highly absorbant cellulose inner layer. The outer layer is a waterproof barrier to protect furniture or mattress surfaces from fluid contamination. Non-disposable products are usually multiple layers of quilted fabric with a vinyl backing.	
42132102	Medical stretcher sheets		
42132103	Patient barrier drapes		
42132104	Hospital antimicrobial pillows for general use	A cushioned support that has been treated with a substance or product that inhibits the growth of microorganisms. These bedding products are typically used to support the head or other body part for comfort or positioning. They are not unlike a typical pillow used in the home. Not the same as a patient positioning pad or pillow.	
42132105	Hospital bed sheets		
42132106	Hospital bedspreads		
42132107	Hospital blankets		
42132108	Hospital protective pillow covers		

Class 42132200 Medical gloves and accessories

Commodity	Commodity Title	Definition	Synonyms
42132201	Medical glove boxes or dispensers	A container used to store and dispense gloves at convenient locations within the healthcare environment. This does not include Isolation Glove Boxes, which are used to isolate workers from toxic substances.	
42132202	Finger cots	A sheath worn to protect a finger. Similar to gloves, except only covers one finger instead of entire hand.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42132203	Medical exam or non surgical procedure gloves	A generic hand covering that has a separate sheath for each finger used to provide a protective barrier for general infection control or hygiene. Manufactured of latex or non-latex material, they are not hand specific, have categorical sizes (x-small through x-large). The product may be provided unsterile in bulk packaging, or sterile as a single glove or pair. Synonyms: exam gloves, procedure gloves Excludes surgical gloves, chemotherapy gloves	
42132204	Medical glove liners	A liner worn between the hand and a medical glove, generally to increase comfort for extended wear.	
42132205	Surgical gloves	A specialized type of glove for aseptic technique that is mandated primary protective barrier attire. They are packaged hand specific - left and right- as pairs for individual use. They are made of a variety of latex and latex-free materials, are incrementally sized to fit a variety of hand lengths, and are provided sterile. Gloves of increased thickness are available.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42141802	Electrotherapy electrodes or accessories	A variety of cables, electrodes, creams or gels used to deliver a controlled level of electrical current or symmetrical rectangular biphasic waveform to a muscle or soft tissue in order to stimulate or condition the target tissue. Functions include but are not limited to increasing circulation, enhancing healing, preventing or relieving pain. The amount of energy delivered will vary depending upon the target tissue and goals of therapy.	
42141803	Electrotherapy lead wires or cables		
42141804	Galvanic or faradic stimulators		
42141805	Neuromuscular stimulators or kits		
42141806	Short wave diathermy units		
42141807	Transcutaneous electric nerve stimulation units		
42141808	Diathermy electrodes		
42141809	Muscle stimulator lead sets		
42141810	Iontophoresis electrode	Device for the use of electric current to introduce medicine through the skin. Commonly used in rehabilitation.	
42141811	Extracorporeal shock wave therapy system	A system used to relieve pain by generating shock waves with electrohydraulic stimuli inside the body.	
42141812	Static electricity generator for electric stimulation	Medical equipment used for improving blood circulation by applying AC or DC current onto the body. It needs doctors prescription or direction when used.	
42141813	Electroconvulsive device	Medical device used to apply short and strong electricity to a patients head, thus producing electric seizures in the patient with schizophrenia.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42141814	Static electricity stimulator	Medical device used for improving blood circulation by applying AC or DC current to the body.	
42141815	High frequency electromagnetic wave stimulator	Medical equipment used to ease the pain of the patient by applying high frequency energy	
42141816	Electromagnetic therapy stimulator	A medical device used to relieve muscle pain by using the magnetic field of an electromagnet.	
42141817	Magnetic pulse stimulator	A medical device used to relieve muscle pain by using the magnetic field of a permanent magnet.

42142507	Butterfly needles		
42142509	Epidural anesthesia kit or tray	A standard assembly of products designed to gain aseptic access to the spinal epidural space for delivery of medication. They are used for the purpose of pain relief or for delivery of pharmaceuticals. The trays may include, but are not limited to skin disinfectant products, gauze sponges, adhesive bandages, needles, tubing, and medication. The products are typically supplied in a durable injection plastic presentation tray with organizing slots that is inside a surgical grade wrapper.	
42142510	Filter needles		
42142511	Needle caps or protection devices or accessories		
42142512	Fistula needles		
42142513	Radiology procedural needles		
42142514	Spinal anesthesia kit or tray	A standard assembly of products designed to gain aseptic access to the spinal subarachnoid space for delivery of medication for pain relief or for delivery of other pharmaceuticals as dictated by the patient condition. Tray or kit components include, but are not limited to skin disinfectant products, gauze sponges, adhesive bandages, needles, tubing, and medication. These products are typically supplied in a durable injection plastic presentation tray with organizing slots	
42142515	Vacuum tube needles		
42142516	Vented needles		
42142517	Extension tubes

42142518	Biopsy aspirator products or accessories		
42142519	Needle guides		
42142520	Dispensing pins		
42142521	Blood collection needle	A hollow, large bore metal tube with a sharp, beveled point at one end and a hubbed connector at the other usually used with a syringe or tubing set for the withdrawal of blood in an aseptic fashion.	
42142522	Surgical needles for ears or noses or throats		
42142523	Hypodermic needle	A hollow metal tube with a sharp, beveled point at one end and a tapered female luer hub or similar connector at the other supplied in a wide variety of gauge or French outer diameters. It is usually used with a syringe to inject into or extract fluids or medications from the body. Sterile medical hypodermic needles are usually provided individually wrapped with conventional or safety engineered protective caps in place. Disposal is subject to bloodborne pathogen regulations.	
42142524	Etching needles or sets		
42142525	Irrigation needles		
42142526	Needle protectors		
42142527	Needle cleaning wires

UNSPSC v16_0901

1/27/2014

42142531	Needle or blade or sharps disposal container or cart	A labeled, leak-proof, puncture resistant receptacle that features a limited access entry and a closable, locking lid. It is used to contain contaminated medical devices and supplementary products capable of piercing or puncturing the skin. Mandatory features include red color and or appropriate labeling that clearly displays hazardous material content in logo and written forms.	
42142532	Pericardiocentesis needles or kits or accessories		
42142533	Needle for intravenous or arterial administration ports	A type of needle designed for intravenous or arterial administration ports. Ports are implanted devices through which blood may be withdrawn and infusions given without repeated needle sticks. A subcutaneous port is one surgically placed under the skin. It consists of a artificial septum, a self-sealing rubber material, which the needle can pierce, and a catheter that is placed in a blood vessel.	
42142534	Intraosseous needle	Special types of needles used in emergency situations, mainly on children, when intravenous access cannot be established. These needles are used to infuse fluid and drugs into the bone marrow cavity and are also used to withdraw blood.	
42142535	Anesthesia nerve block tray or needle	A sterile tray or needle used for interruption of the conduction of impulses in peripheral nerves or nerve trunks by the injection of a local anesthetic solution.	
42142536	Thoracentesis or paracentesis needle and catheter	Needles and catheters for use in thoracentesis and paracentesis procedures.	
42142537	Thoracentesis set or tray	Set or tray for use in thoracentesis procedures.	
42142538	Paracentesis set or tray	Set or tray for use in paracentesis procedures.

42142606	Medical metered delivery syringes		
42142607	Medical micro syringes		
42142608	Medical syringe without needle	A medical device of varying volumes that is a simple piston pump consisting of a plunger that fits snugly within a chamber or barrel at one end and a straight tapered nozzle or male leuer type connector at the other. Some devices feature a ringed handpiece and plunger for insertion of fingers to improve manual control. Some nozzles have a removable component or adaptor to facilitate attachment to an assortment of other delivery products.	
42142609	Medical syringe with needle	A product that combines a simple piston chamber and plunger and a removable hypodermic sharp beveled point needle together. The plunger can be advanced or withdrawn allowing injection or extraction as needed. The syringe may be of varying volumes. Needles are of varying lengths and diameter or gauge. They will have a cap or safety guard affixed. The combined product is typically sterile and individually wrapped.

UNSPSC v16_0901

1/27/2014

42142715	Urinary catheterization kit	A standard assembly of sterile components that facilitate aseptic access to the urinary bladder via a long, hollow, latex or non-latex tube and collection receptacle to provide hygiene for an in-dwelling drainage device. Drainage tubes are typically measured in the French scale. They are made in a variety of types, shapes, diameters, and number of internal channels, configurations. Collection containers vary in style and capacity.
42142716	Pessary device	Used in the management of pelvic support defects
42142717	Nephrostomy catheter or drain	Small flexible, rubber tube placed into the kidney to drain urine caused by a ureteral blockage or ureteral or bladder perforation.
42142718	Penile support and lengthening device	A mechanical device worn on the penis typically for gradual penile lengthening or for the non-surgical correction of penile curvature (Peyronie's disease). It operates on the principle of traction and typically consists of a base-ring that rests against the pubic bone, a penis head holder with a protective cushion and a silicone or latex band that locks over the glans groove, and two expandable, spring-loaded metal rods that exert a constant load between the root and the head of the penis.
42142719	Urethrotome	An instrument for cutting stressed urethral strictures.
42142720	Male external urinary catheter	A type of catheter that is placed on the outside of the penis for the purpose of collecting urine. This is less invasive than a urinary catheter, also referred to as sheaths, condom catheters or texas catheters.
42142721	Urological guidewire or glidewire	A urological guidewire is introduced into the urethral stricture via a cystoscope.

-----------	-----------------	------------	----------

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42161601	Hemodialysis administration kit or set	A standard assembly of products needed to gain vascular access for the purpose of removing toxic waste substances from the blood or blood cleansing treatments. These kits typically include, but are not limited to tape, ointments, alcohol pads, skin disinfectant products, gauze sponges, or adhesive bandages. It is common practice for these kits to be custom assembled to the specification of the treatment facility. A synonym for these is Put On or Take Off Kit	
42161602	Hemodialysis blood bag samplers		
42161603	Hemodialysis blood oxygen demand apparatus		
42161604	Hemodialysis chairs		
42161605	Hemodialysis dialysate conductivity meters

42181516	Electromyography EMG units or accessories	Used to test nerve and muscle integrity.	
42181518	Case for medical instrument set or its accessories	These cases are used to protect and transport instrument sets.	
42181519	Drop carrier	Carrier used to carry medical materials to the affected parts.	
42181520	Intrathoracic pressure meter	A device used to measure intrathoracic pressure.	
42181521	Spinal fluid pressure monitor	A device used to measure the pressure of spinal fluid on the spinal cord.	
42181522	Apparatus for gait analysis	An device to identify functional recovery in hypofunction of walking ability and its treatment.	
42181523	Isokinetic testing and evaluation system	A device used to measure and evaluate a patients muscle strength and range of joint motion.	
42181524	Rigidity analyzer	A device used to measure the range of a patients limb rigidity for the evaluation of medication and treatment.	
42181525	Ataxiagraph	A device used to assess the extent of ataxia by measuring the amount of swaying of the body when standing erect with eyes closed.	
42181526	Algesimeter	An instrument used to measure the sensitiveness to pain, especially to test anesthetizatio levels.	
42181527	Medical dynamometer	A device used to measure a patients grip strength.	
42181528	Skin resistance measuring device	A device that measures skin resistance.	
42181529	Esthesiometer	A thin bar type device for measuring the tactile sensitivity or a device to test the anesthesia of the patient.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42181530	Iontophoresis sweat induction system	A device used for inducing sweat in order to diagnose diseases including cystic fibrosis by applying direct current and a saline solution or drug ion. It includes fluoride ion and other similar devices.	
42181531	Skin electrical conductivity measuring instrument	A device used to measure potential difference by using skin electrodes.	
42181532	Galvanic skin response measurement	A device used to determine the autonomic response as a psychological index by measuring electric resistance between two electrodes attached to the skin.	
42181533	Nerve conduction velocity measurement device	A device used to measure nerve conduction velocity by applying electric shock to peripheral nerves of a patient.	
42181534	Electroglottograph	An instrument used to research glottal closure, laryngeal diagnosis, articulation disorder and laryngeal structure by attaching electrodes to both larynges and measuring the electrical impedance of the larynges.	
42181535	Physiological electronic signal conditioner	A device used to amplify, process and record physiological signals.	
42181536	Caries electrical detection device	A device that searches decays in tooth using electric current.	
42181537	Dental bite force measuring instrument	A device that electrically measures the bite force or pressure of upper and lower teeth. It can diagnose abnormal distribution or unbalance in bite force due to nerve root function disability such as temporomandibular arthrosis.	
42181538	Dental occlusal sound measuring device	A device that electrically measures the sound of occlusion of teeth during mandibular motion. It measures the presence of early contact that elicits occlusion interference by indicating the waveform on the oscilloscope.

Class 42181600 Blood pressure units and related products

Commodity	Commodity Title	Definition	Synonyms
42181601	Aneroid blood pressure units		
42181602	Electronic blood pressure units		
42181603	Mercury blood pressure units		
42181604	Blood pressure air release valves or inflation bulbs		
42181605	Blood pressure cuff or bladder	A device for measuring or monitoring blood pressure. Types include single-use disposable or re-usable. The disposable type is typically made of a plastic inflatable reservoir with a soft coated outer layer. The re-usable type usually has a latex inflatable reservoir with a durable, washable sleeve. Both types feature extruding hoses with connectors and are designed to wrap around an extremity and be secured with velcro or ties. The reservoir component comes in a wide variety of lengths, widths, and volume	
42181606	Blood pressure inflation hoses or pneumatic hoses or adapters		
42181607	Blood pressure recording units		
42181608	Blood pressure measuring instrument accessories		
42181609	Blood pressure monitor dome kits		
42181610	Blood pressure cuff kits		
42181611	Central venous pressure CVP manometer	An instrument attached to a central IV line used to measure the central venous blood pressure.	
42181612	Blood pressure mobile stand	Mobile stand for storage of the blood pressure unit and supplies allowing for easy transport from one area to another.	

Class 42181700 Electrocardiography EKG units and related products

Commodity Commodity Title Definition Synonyms

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42181701	Electrocardiography EKG units	Unit for performing and recording a test of the electrical activity of the heart.	
42181702	Electrocardiography EKG adapters or cables or leads		
42181703	Electrocardiography EKG cable or lead or unit testers		
42181704	Electrocardiography EKG calipers or rulers		
42181705	Electrocardiography EKG graphic recorders		
42181706	Electrocardiography EKG monitor screens		
42181707	Electrocardiography EKG neonatal strap or ring electrodes		
42181708	Electrocardiography EKG electrode patch	A disposable disc with a center core of conductive gel surrounded by a flexible adhesive border that attaches to a monitor cable by a snap-like protuberance on the external surface. Transmission of electrical activity of the heart comprises the EKG recording. A synonym is ECG, cardiogram	
42181710	Electrocardiography EKG surface electrode testers		
42181711	Electrocardiography EKG telephone transmitter or receiver systems		
42181712	Electrocardiography EKG unit analyzers		
42181713	Long term continuous electrocardiography EKG or holter monitoring systems		
42181714	Electrocardiography EKG monitor accessory kits		
42181715	Electrode solutions or creams		
42181716	Electrocardiography EKG accessories		

UNSPSC Codeset

42181717	Electrocardiography EKG electrode bulbs		
42181718	Electrocardiography EKG recording pens		
42181719	Electrocardiography EKG transmitter or telemetry or accessories	Used for monitoring a patient who needs constant monitoring of their EKG while they are in the hospital or at home.	
42181720	Stress exercise monitoring system	A device used to examine and record electrocardiograms under condition of physiological stress caused by exercise utilities like treadmills.	
42181721	Sphygmograph	A medical system used to measure the pulse which comes as photoelectric, pressure or impedance types.	
42181722	Pulse wave analyzer	A system used to measure and analyze the pulse.	

Class

Commodity	Commodity Title	Definition	Synonyms
42181801	Pulse oximeter units		
42181802	Pulse oximeter cables		
42181803	Pulse oximeter probe or sensor	An inexpensive, flexible, adhesive or clip-like device with two light emitting electrodes to measure levels of oxygenated -660nm- and deoxygenated -940nm- hemoglobin in the blood flowing through target tissue. Sensors may be non-disposable or disposable in a variety of shapes and sizes that accomodate patient anatomic features such as fingers, ears, nose or foot and either adult or pediatric ranges.	
42181804	Pulse oximeter probe or sensor accessories		
42181805	Pulse oximeter unit accessories	This would include items such as, adapter tube, mounting bracket, etc.

Class 42181900 Acute care monitoring units and related products

Commodity	Commodity Title	Definition	Synonyms
42181901	Acute care fetal or maternal monitoring units or accessories		
42181902	Intracranial pressure ICP monitoring units or accessories		
42181903	Cardiac output CO monitoring units or accessories		
42181904	Multiparameter vital sign unit or accessories	Patient monitoring device used in an acute care setting to track changes in medical condition through parameters such as vital signs.	
42181905	Medical transducer monitor cables		
42181906	Intrauterine pressure monitoring catheters		
42181907	Basal metabolism apparatus		
42181908	Intracompartmental pressure monitoring sets or accessories		
42181910	Transcervical intrauterine kits		
42181911	Fetal scalp electrode	Clip which pricks the babys scalp or needle which pricks the tissue used to monitor the heartbeat of the baby during labor.	
42181912	Fetal electroencephalographic monitor	Medical device used to measure electrical skin potentials produced by the fetal brain by means of one or more electrodes placed transcervically on the fetal scalp during labor.	

Class 42182000 Scopes and specula and accessories for medical exam diagnostic use

Commodity	Commodity Title	Definition	Synonyms
42182001	Anal or rectal exam specula		
42182002	Anoscopes or proctoscopes		
42182003	Colposcopes or vaginoscopes or accessories

42182006	Laryngeal or oropharyngeal exam specula		
42182007	Medical exam scope bulbs or lamps		
42182008	Medical exam scope handles or handle chargers		
42182009	Medical exam scope specula tips or specula tip dispensers		
42182010	Medical exam specula holders or stands		
42182011	Medical exam specula or dilator tips or tip dispensers		
42182012	Nasal exam specula or dilators		
42182013	Vaginal exam specula		
42182014	Otoscope or ophthalmoscope accessories		
42182015	Otoscope speculums		
42182016	Nasopharyngoscopes or accessories		
42182017	Ear specula sets		
42182018	Bronchoscopes or accessories		
42182019	Dilator kits		
42182020	Angioscopes or accessories		

Class 42182100 Stethoscopes and related products

Commodity	Commodity Title	Definition	Synonyms
42182101	Electronic stethoscopes or accessories		
42182102	Hand held doppler or accessories	Small pocket sized instrument using ultrasonic frequency to detect blood flow in extremities or to detect and evaluate fetal heart rate.	
42182103	Medical acoustic stethoscope or accessory	Any of various instruments used for listening to sounds produced within the body.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42182104	Stethoscope head	Stethoscope head with multiple removable diaphragm structures and bell components for adapting the stethoscope for use with infants or adults, or on sites having less skin area, such as between the ribs.	
42182105	Stethoscope head covers		
42182106	Stethoscopic phonocardiographs		
42182107	Stethoscope headsets		
42182108	Patient thermoregulators		

Class 42182200 Medical thermometers and accessories

Commodity	Commodity Title	Definition	Synonyms
42182201	Electronic medical thermometers		
42182202	Fiberoptic medical thermometers		
42182203	Medical thermometer carrying cases or covers		
42182204	Medical thermometer racks		
42182205	Medical thermometer tip or probe covers		
42182206	Mercury medical thermometers		
42182207	Patient temperature continuous or trend monitors		
42182208	Patient temperature strips		
42182209	Thermometer probes		
42182210	Non mercury glass medical thermometer	A type of glass medical thermometer that does not contain mercury.	
42182211	Infrared thermography system	A device used to describe the surface temperature of the body according to auto emitting infrared ray, which includes a component used to project infrared rays to the body and photograph the body images.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42182212	Liquid crystal thermometer	A medical instrument or device used to measure temperature by using a liquid crystal in order to diagnose diseases including a breast tumor.	
----------	----------------------------	--	--

Class 42182300 Neurological exam products

Commodity	Commodity Title	Definition	Synonyms
42182301	Medical diagnostic pinwheels		
42182302	Reflex hammers or mallets		
42182303	Neuropsychiatry exam cards		
42182304	Psychodiagnostic test sets or kits		
42182306	Neurological discriminators		
42182307	Neurological pins		
42182308	Electroencephalograph EEG or accessories	Unit for performing and recording a test of the electrical activity of the brain.	
42182310	Electromyographs		
42182311	Neurologic sensor	There are two main types of neurological sensors. The first is a conductive wire with a fine gauge needle at one end and a hub or connector at the other. The other type is an adhesive disc or patch with a center core containing conductive gel that is attached to the distal end of the cable. Either type wire conducts waveforms to a device that tracks activity.	
42182312	Electromyograph electrodes or sets		
42182313	Neurological diagnostic sets		
42182314	Biofeedback device	Device which gives visual and audio feedback depending on physiological parameters of patient, e.g., alpha wave, muscle motion, skin temperature, etc. in order for the patient to control physiological parameter by him or herself.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42182315	Electroencephalographic spectrum analyser	A system used to display a signal from the electroencephalograph in forms of the density and the frequency of the spectrum.	
42182316	Evoked response detector	A device used to measure various evoked potentials and make data analyses including an averaging process caused by stimuli

1/27/2014

42183055	Endothelial cell counter	Device used to estimate the endotheliocyte that is assumed to transport materials in the lumen.	
42183056	Anterior camera	Device used to film or print the interior segment of the eye by using the reflected light.	
42183057	Eye movement monitor	Device used to measure and record the movement of the eyeball.	
42183058	Visual field laser instrument	Device used for applying the interference pattern by the laser in order to test the function of the retina	
42183059	Photosimulator	Device used to stimulate the eyeball by the light for the purpose of test the retinal function or the visual function.	
42183060	Schirmer strip	A small strip of filter paper used to test the amount of tear of the eye by stimulating the lower eyelid	
42183061	Ocular pressure applicator	Manual device consisting of a sphygmomanometer type squeeze bulb, a dial indicator and a band intended to apply pressure on the eye in preparation for ophthalmic surgery.	
42183062	Iris camera	Device that records or analyses the iris.	
42183063	Ophthalmic electrolysis unit	A device intended to destroy ocular hair follicles by applying a galvanic electrical current. It is sometimes powered by batteries.	
42183064	Therapeutic contact lense	Lens used for the treatment of corneal disorders, such as bullous keratopathy, keratoconjunctivitis sica and keratohecolosis.	
42183065	Diagnostic contact lense	Short-time used lenses for testing the anterior chamber angle and the fundus, the anterior chamber angle surgery and for recording the change of electroretinogram.	
42183066	Corneal camera	Device intended to film the endothelial cell of the cornea by transmitting the light to the cornea.

UNSPSC v16_0901

1/27/2014

42201810	Medical x ray film or cassette	A product designed to record a non-digital diagnostic radiographic image projected onto a phosphorous coated surface. A thin sheet of light or radiation sensitive coated material and a light-proof housing or its accessories are used to record a static image used for assessment of an object such as a body part. Synonyms include radiograph, roentgenogram	
42201811	Medical x ray quality assurance or calibration devices		
42201812	Medical x ray tables or stands or chairs or cabinets or accessories		
42201813	Medical x ray tomography units		
42201814	Medical x ray tubes

42201831	Medical x ray films or cassettes masks		
42201832	Radiographic film or cassette covers		
42201833	Radiographic film or cassette changers		
42201834	Medical radiographic x ray apparatus rectifier assemblies		
42201835	Medical x ray apparatus tube unit assemblies		
42201836	Medical x ray apparatus compression band assemblies		
42201837	Medical x ray water coolers		
42201838	Medical enteroclysis catheters or catheters kits		
42201839	Medical imaging procedure trays	These are supply trays for procedures such as hysterosalpingogram, etc.	
42201840	Vascular sealing devices	These sealing devices are used by cardiologists and radiologists following percutaneous procedures such as angiography, angioplasty and stent placement	
42201841	Medical diagnostic x ray papers		
42201843	Medical x ray skin marker	A device used for marking tissue for mammography, lesions, radiation therapy, etc, thus reducing the possibility of repeat examinations.	
42201844	Medical diagnostic x ray ruler		
42201845	Radiology film jacket or insert or mailer	Folders or envelopes used for storage or shipment of x-ray films.	
42201846	Radiographic and fluoroscopic x ray collimator	A device used to define the dose and direction of radiation.	
42201847	Mobile x ray system	A mobile medical device used to generate and control x rays for medical diagnosis.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42201848	Digital x ray imaging system	A medical imaging system which digitalizes the x ray projection signal by using a semiconductor containing an x ray generator.	
42201849	Fluorescent scanner	A device used to measure the fluorescent radiation by applying x ray or low level energy of gamma ray to a human body.	
42201850	Nuclear tomography system	A device which provides the tomogram of a certain part of the body by detecting the nuclear radiation inside the body.	
42201851	Beta or gamma counter for clinical use	A device used to count the beta rays or the gamma rays emitted from clinical samples.	
42201852	Fluorescent screen	A screen which applies fluorescent operation during irradiation.	
42201853	Myelographic procedure set	A myelogram is an x-ray procedure of the spinal cord after injection of air or contrast into the subarachnoid space. The sets and trays contain the instruments and materials needed to perform the procedure.

UNSPSC v16_0901

1/27/2014

Class	42203400	Vascular imaging and interventional cardiology and cardiac catheterization lab products
-------	----------	---

Commodity	Commodity Title	Definition	Synonyms
42203401	Coronary stent	An implantable medical device comprised of a small metal tube-like structure that is inserted into an artery of the heart muscle during a cardiac catheterization procedure or balloon angioplasty. The device holds the target artery open to supply blood to the myocardium or muscle of the heart. The stent may be uncoated bare metal or treated with a variety of drug eluting coatings.	
42203402	Diagnostic or interventional vascular catheters or sets		
42203403	Diagnostic or interventional vascular catheter introducers or sets		
42203404	Vascular imaging guidewire	An elongated, slender, hydrophilic-coated or uncoated, blunt ended, highly engineered metal structure that may be fixed or flexible depending upon the intended use for access to the vascular system. The defining characteristic is torque control guidance. This is achieved by applying force to the outer densely coiled polymer or nitinol sheath that overlies the smooth inner steel structure. The pulling motion extends the curved end to a straight configuration allowing the user to navigate.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42203405	Angioplasty balloon catheter	A long thin tube-like medical device with a balloon at the distal tip and luer type hub at the proximal end. It may feature hydrophylic coating or be uncoated. The device is inserted through a minimally invasive incision and advanced with fluoroscopic guidance to identify a narrowed portion of the vascular anatomy. Once pathology is located, the balloon is inflated to compress the lesion and causing the artery to dilate or widen. Synonyms includes PTCA	
42203406	Removal devices of diagnostic or interventional vascular catheters or sets		
42203407	Angiography contrast medium delivery set	A specialized assembly of intravenous tubing with segments for inflow of fluid, stopcocks to control flow, and outflow of fluid to a closed recepticle. These sets are used to inject carbon dioxide gas, radioopaque dyes and other fluid either manually or mechanically under varying degrees of pressure into the vascular system during a medical imaging procedure. Mechanical injectors may have multiple individually wrapped component parts.	
42203408	Cardiovascular sheath kits		
42203409	Angioscopic valvulotomes		
42203410	Cardiovascular catheter sheath	A plastic cover that provides protection to catheters during intravascular procedures.	
42203411	Catheter carts		
42203412	Peripheral stent	A peripheral stent is a device that is implanted in a peripheral vessel used to open the vessel.	
42203413	Vascular coil	Device used to treat cerebral aneurysms. Coils are used to occlude (fill) intracranial aneurysms, significantly reducing the incidence of aneurysm rupture or re-rupture.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42203414	Vascular filter	A self expanding sieve-like or mesh implantable medical device that may be permanent or removed after a period of time. The device serves to trap blood clots or emboli within the vascular system.	
42203415	Cardiac catheterization lab equipment		
42203416	Cardiac ablation catheter	Device used to treat irregular heartbeat through a form of energy that renders a small area of tissue inactive. thereby ending the occurrence of abnormal rhythms.	
42203417	Endograft	A stented graft placed in the arterial tree from inside the blood vessel via a remote access site. This is most commonly performed via the groin (femoral) artery.	
42203418	Artherectomy catheter	An artherectomy catheter shaves plaque out of an artery.	
42203419	Biliary stent	An implantable medical device with a radially expandable plastic or metal tube or stent that is inserted into the bile duct -drainage conduit from the gallbladder- to relieve narrowing of the channel. Placement is achieved by flexible endoscopic retrograde technique. Synonym includes ERCP	
42203420	Vascular imaging snare	A wire loop or noose for removing polyps and tumors by encircling them at the base and closing the loop.	
42203421	Diagnostic or interventional vascular tray or pack	This is a tray or pack that is made specifically for vascular imaging procedures.	
42203422	Embolization glue	Embolization glue is a liquid embolic agent, similar to glue, used to clog vessels that feed tumors, aneurysms, and/or venous malformations.	
42203423	Embolization sphere	Embolization spheres are special non-toxic, microscopic particles that are uniform in size that result in vessel occlusion, much like embolization glue.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42203424	Arteriotomy site closure device	A specialized tool used either externally - outside the body- or internally -inside the body- to close small incisions or an artery or adjacent tissue. Not to exceed 10 French outer diameter.	
42203425	Thrombectomy or embolectomy catheter or catheter set	A thin tube-like device of varying lengths and diameters with a small ballon or working element at the distal end. The device is inserted into the vascular system, advanced to the target blood clot or occlusion, and activated to remove the occlusion or thrombus and other embolic materials from the arterial and venous systems.	
42203426	Angiography guidewire torque device	A device that has an elongated tubular body with interior long axial channel and a rotary clamp wheel for gripping and ungripping a guide wire extending through the channel. The clamp wheel is accommodated within an integral enlargement of the tubular body with a segment of the wheel surface extending through the surface of the enlargement for rotation by a user's thumb in order to grip and un grip the guide wire for feeding, withdrawing or rotating the wire with respect to a catheter.	
42203427	Angiography introducer needle	A needle used to obtain access to the artery or vein during a catheterization procedure.	
42203428	Angiography control valve and hemostatic valve	These valves are used to allow the entry of the catheter or guidewire into the blood vessel while preventing the blood from flowing outward.	
42203429	Pericardiocentesis catheter	Device used to drain the pericardial sac.	
42203430	Electrophysiology mapping catheter	An electrophysiology EP study is a test that records the electrical activity and the electrical pathways of the heart. This test is used to help determine the cause of heart rhythm disturbance and the best treatment options.

Commodity	Commodity Title	Definition	Synonyms
42203501	Cardiac pacemaker generator or cardiac resynchronization therapy pacemaker CRT-P		
42203502	Cardiac pacing leads or electrodes or accessories		
42203503	Cardiac pacing lead introducers or sets		
42203504	Cardiac recorder	A device that is implanted directly under the skin, is programmable with looping memory that records electrocardiogram (ECG) tracings. The recorder is programmed by the physician to retrieve cardiac data, display and print the stored data.	
42203505	Implantable cardioverter defibrillator ICD or cardiac resynchronization therapy defibrillator CRT-D	An implantable cardioverter-defibrillator (ICD) is a small battery-powered electrical impulse generator which is implanted in patients who are at risk of sudden cardiac death due to ventricular fibrillation. The device is programmed to detect cardiac arrhythmia and correct it by delivering a jolt of electricity.	
42203506	Implantable cardiac defibrillator device ICD or cardiac resynchronization therapy defibrillator CRT D lead or electrode	The ICD lead carries electrical impulses from the ICD to the heart. It also carries information from the heart back to the ICD

Family 42220000 Intravenous and arterial administration products

Class 42221500 Intravenous and arterial cannulas and catheters and accessories

Commodity	Commodity Title	Definition	Synonyms
42221501	Arterial line catheters		
42221502	Arterial line continuous catheter flush valves		
42221503	Central venous catheters		
42221504	Peripheral intravenous catheters for general use		
42221505	Pediatric or microflow or scalp vein intravenous or arterial catheters		
42221506	Umbilical catheters		
42221507	Intravenous or arterial start kit without catheter	A standard assembly of accessory products without a cannula or sheath that contains items such as tape, antiseptic, tourniquet and dressing to facilitate access to the vascular system.	
42221508	Intravenous or arterial catheter skin care kits		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42221509	Intravenous or arterial catheter tray	A standard assembly of products in a convenience grouping. It includes a cannula or sheath and other items necessary to initiate fluid delivery through a vein or artery.	
42221512	Intravenous or arterial cannulas or accessories		
42221513	Cardiovascular catheterization kits		
42221514	Pulmonary artery catheter	A soft catheter with an expandable balloon tip that is inserted into the heart and used for measuring blood pressure in the pulmonary artery.	
42221515	Central venous catheter repair kit	Kit containing parts to repair already inserted central venous catheters.	
42221516	Catheter tip occluder	A device used to occlude the tip of the catheter to prevent the influx of material when it is infused inside.	
42221517	Hemodialysis catheter	A venous catheter used for dialysis of the blood.	
42221518	Splint strapping material	Materials used to create, secure and modify orthopedic splints.	

Class 42221600 Intravenous and arterial tubing and administration sets and related products

Commodity	Commodity Title	Definition	Synonyms
42221601	Intravenous or arterial administration air bubble detectors		
42221602	Intravenous or arterial administration ports or injection sites or caps or protectors		
42221603	Intravenous or arterial extension tubing		
42221604	Intravenous or arterial tubing adapters or connectors or locks or caps or protectors		
42221605	Intravenous or arterial tubing check valves		
42221606	Intravenous or arterial tubing clamps		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42221607	Intravenous or arterial tubing filters or screens for general use		
42221608	Intravenous or arterial tubing identification labels or tapes		
42221609	Intravenous or arterial tubing administration set	A flexible, sterile, hollow conduit of varying lengths with a spiked point and drip chamber at one end and a male leur type connector at the other. These may contain a variety of sideports or hubs to allow additional tubes to be attached in an aseptic manner. All sideports have either a gasket, stopcock, or capped entry system for supplemental lines. Some sideports may have an additional pliable segment with adaptors that attach the line into an automated pump delivery device.	
42221610	Intravenous tubing spike entry ports or caps or protectors		
42221611	Intravenous tubing spikes or caps or protectors		
42221612	Intravenous or arterial tubing needleless injection ports or stopcocks or manifolds		
42221613	Intravenous tubing transfer leg closures or snaps		
42221614	Intravenous tubing with catheter administration kits		
42221615	Secondary or piggyback medication intravenous tubing	A flexible, hollow conduit of varying lengths with a spike and drip chamber at one end and a connector at the other used to connect or adapt into a primary intravenous tubing to deliver medication at prescribed intervals.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42221616	Intravenous or arterial tubing extension set	A flexible, hollow conduit of varying lengths used to lengthen a primary or secondary tubing, filter fluids, provide additional infusion ports, and reduce cannula manipulation. It is wrapped individually and labeled either Male to Male or Male to Female for ease of Luer adaptor identification. Such sets are distinguished from primary or secondary tubings by the lack of a spike adaptor at either end.	
42221617	Needle resheathers		
42221618	Intravenous or arterial procedure trays	This commodity provides for supplies and catheters needed for venous or arterial access or monitoring.	
42221619	Needleless injection manifold kit	This is a plastic set of three or more conjoining stopcocks attached to an injectable syringe and tubing.	

Class 42221700 Intravenous and arterial infusion bags and containers and related products

Commodity	Commodity Title	Definition	Synonyms
42221701	Intravenous or arterial infusion single port bags or containers		
42221702	Intravenous or arterial infusion transfer bags or containers		
42221703	Intravenous or arterial fluid warmers or accessories	Equipment used to warm intravenous fluids prior to administration to patient to help maintain normothermia in surgery or other clinical areas.	
42221704	Intravenous or arterial pressure infusion bags		
42221705	Analgesia infusion vial assemblies		
42221706	Intravenous or arterial infusion transfer bags or container spouts		
42221707	Analgesic infusion sets or kits

Class 42221800 Intravenous and arterial catheter and needle positioning aids

Commodity	Commodity Title	Definition	Synonyms
42221801	Intravenous or arterial arm board covers		
42221802	Intravenous or arterial arm boards		
42221803	Intravenous or arterial catheter positioning tapes or dressings or straps or cuffs		

Class 42221900 Intravenous or arterial flow measurement and regulation products

Commodity	Commodity Title	Definition	Synonyms
42221901	Dial calibrated intravenous flowmeters or regulators		
42221902	Intravenous drop counters or regulators		
42221903	Ultrasonic blood flow detectors		
42221904	Electromagnetic blood flowmeter	A device which provides the verification and measurement of blood flow velocity following coronary bypass, organ transplantation and other vascular reconstructions.	
42221905	Laser blood flowmeter	An instrument used to measure blood flow velocity invasively or noninvasively by using laser technology to identify blood flow disturbances such as thrombus, stenosis, mechanical trauma, etc. and to assess their severity	
42221906	Magnetic resonance blood flowmeter	An instrument used to measure patient blood flow velocity in order to diagnose peripheral vascular diseases. It periodically measures the blood flow quantity of the limbs by detecting magnetic resonance signals from blood after applying a magnetic field.	

Class 42222000 Intravenous infusion pumps and its analyzers and sensors and its accessories

1/27/2014

42293501	Surgical irrigation or suction handpiece or cannula or tip	A sterile or unsterile, disposable or non-disposable hollow tube designed to be manipulated by hand used to deliver fluids to or remove fluids or other substances from an anatomic site for general applications. Suction devices are used in conjunction with a source of negative pressure to aspirate fluids from an anatomic site. Irrigation devices hook into a source of sterile fluid by a spiked connector. Combination tubings that combine both actions are typically engineered to fit into a specific machine

42294524	Eyemagnets for ophthalmic surgery		
42294525	Ophthalmic medical instrument sets		
42294526	Lachrymal dilators or sets		
42294527	Intraocular gas	A type of gas used inside the eye to aid in the treatment of detached retina. Usually Perfluoropropane and Sulfur Hexafluoride.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42294528	Viscoelastic agent or viscosurgical device	A highly viscous substance that is injected into the eye during surgery to maintain the space in the anterior chamber, preventing its collapse and allowing for the insertion of an artificial intraocular lens implant. There are many brand names such as Healon« and Viscoat«. There are three main substances that make up these agents: Sodium Hyaluronate, Chondroitin Sulfate and Hydroxypropyl Methylcellulose.	
42294529	Cystotome	An instrument used to open the capsule of the lens in cataract surgeries.	
42294530	Vitrectomy lens	Lens used in surgery to view different fields of the retina.	
42294531	Ophthalmic laser lens	Lens used in ophthalmic laser surgical procedures such as LASIK, Argon and YAG.

42294604	Autotransfusion filters		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42294605	Autotransfusion reservoir or its accessories	A sterile molded high impact plastic receptacle of varying liquid capacity. Aspirated fluids are mixed with a dilute anticoagulant before they pass through a high micron filter that primarily cleanses particulate matter. Aspirated fluid is then stored until a sufficient quantity is collected to initiate the centrifugal processing. These activities will ultimately provide red cells or plasma suitable for administration back to the patient. Excludes blood transfer bags and filters	
42294606	Autotransfusion tubing sets or kits		
42294607	Autotransfusion valves		

Class 42294700 Open heart perfusion equipment and monitors and accessories and related products

Commodity	Commodity Title	Definition	Synonyms
42294701	Heart and lung machines or accessories		
42294702	Intraaortic balloon pump and accessories	A medical pumping device that provides counter pulsation by inflating a ballon catheter placed in the aorta to increase coronary perfusion, and decrease the work of the heart. The catheters are of varying lengths and diameter to accomodate anatomic differences in the patient. They are long thin circular products with an external bladder at the end placed into the patient through a groin incision to access the femoral artery. Once placed into the aorta, the multiple tiled connectors are attached to the pump	
42294703	Intracardiac suction devices or accessories		
42294704	Perfusion filters or related products		
42294705	Perfusion blood parameter monitors or accessories or related products

UNSPSC v16_0901

1/27/2014

42294906	Endoscopic cutting instrument	A disposable or non-disposable surgical instrument that features a sharp blade or honed cutting or scissoring action at one end, a long, insulated shaft of small outer diameter, and a pencil like or ring handled grip on the other end. These devices are used to slice into or separate tissue planes sharply. There may be an adaptor for application of monopolar or bipolar cutting current.	
42294907	Endoscopic cytology or microbiology brushes		
42294908	Endoscopic clamp or dissector or grasper or forceps	A type of disposable or non-disposable instrument with a long thin shaft of small outer diameter that typically has a spoon like blunted tip on movable jaw tips at one end and a ringed handle or sliding trigger handpiece at the other. The device may feature an adaptor to attach a monopolar or bipolar cord for application of electrical current as needed.	
42294909	Endoscopic dilators or inflation devices		
42294910	Endoscopic monopolar or bipolar cable	A type of disposable or non-disposable long, slender, cord-like product that consists of an insulated or coated assembly of electrical wires with connectors or adaptors at both ends. The connectors are designed to accept or attach onto an instrument and conduct monopolar or bipolar current from an activating machine to the target tissue. Synonyms include Bovie Cord, Bipolar Cord, DAT cord. Excluded are fiberoptic cables, cords, and adaptors.	
42294912	Endoscopic fluid management systems or accessories		
42294913	Endoscopic hemostatic balloons or needles or tubes or accessories

42294916	Endoscopic insufflation filters		
42294917	Endoscopic insufflation needles		
42294918	Endoscopic insufflation tubing	A long, thin, sterile, hollow hose with a luer type or locking connector at the distal end. The proximal end -closest to the machine or tank- may have a luer connector or blister adaptor. The tubing is used to convey gas under positive pressure from a reservoir or reserve tank into the abdomen. Expansion provides space and enhances visualization of abdominal organs for minimally invasive surgery with a lighted rigid optical instrument with or without the use of a video camera. If the tube does not contain a hy	
42294919	Endoscopic guidewire or glidewire	An elongated, slender, flexible, blunt ended metal structure used to gain access to the target structure via the use of an optical visualization device or endoscope. These products have a wider variety of straight and curved tip configurations. They may be hydrophilic coated, and may have a radio-opaque tip marker. Length of the guidewire varies depending on the target of the invasive procedure. Outer diameter of the guidewire must be less than the smallest inner diameter of the endoscope or accessory devic

42294924	Endoscopic monopolar or bipolar hand instrument or accessories	A disposable or non-disposable elongated, small diameter insulated surgical hand held device that cuts, coagulates or dissects tissue when activated. The distal end typically has a spoon shaped electrode that touches tissue but is not a scissor or grasper. Monopolar devices direct electrical current from the tip through the patient's body to a dispersive or ground pad. In bipolar devices, the electrical current flows from one tip of the forcep through the target tissue and completes the circuit at the other	
42294925	Endoscopic needles or punches		
42294926	Endoscopic overtubes		
42294927	Endoscopic instrument packs or trays or kits

42294929	Endoscopic retractors		
42294930	Endoscopic snares or snare wires or accessories		
42294931	Endoscopic specimen retrieval forceps	A disposable or non-disposable medical device with a long, slender sheath that has a bag, basket, or grasping jaw to contain, hold, and extract a stone, organ, excised tissue or foreign body from a field under visualization with a lighted optical instrument.	
42294933	Endoscopic suction or irrigation tips or coagulation probes or accessories		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42294934	Endoscopic suturing device	A disposable or non-disposable instrument with a long, thin sheath that has a blunt jaw type opening at one end and a ring handled control at the toehr. The device has a small recessed grove on both sides of the jaw. When a specially engineered endoscopic suture is loaded, the double ended needle passes back and forth through the soft tissue from one jaw to the other in a sequential shuttling action. Excludes suture anchor and non-suture soft tissue anchor.	
42294935	Endoscopic trocar or sheath or obturator or cannula	Trocars and cannulae are designed to establish a port of entry for endoscopic instruments used during minimally invasive surgery.	
42294936	Endoscopic working elements or working channels		
42294937	Fog reduction devices for endoscopes or mirrors		
42294938	Sealing caps for endoscopes

42294953	Endoscopic extractors		
42294954	Endoscopic tissue or specimen removing devices or accessories		
42294955	Endoscopic hooks or accessories		
42294956	Endoscopic guidewire tracers		
42294957	Endoscopic shaver blade or accessories	A type of long, slender, round product that has an outer fluted protective sheath and an inner sharp or abrasive edged tool that cuts or sculpts target tissue as it spins. The inner portion is activated by a high speed mechanical device that moves in a continuous forward, reverse, or alternating motion to dissect tissue. The shaver tip is used through a trocar sleeve that is opposite that of the illuminated optical visualization tool or endoscope.	
42294958	Endoscopic vessel sealing and cutting attachments and accessories	These products consist of hand pieces and cords or accessories for vessel sealing and cutting instruments. Examples include ligasure, harmonic scalpel, and gyrus.

UNSPSC v16_0901

1/27/2014

42295405	Introducer or guide pin or guidewire or glidewire for non endoscopic surgical or open heart procedures	An elongated,slender,hydrophilic-coated or uncoated, sharp ended, metal structure that may be rigid, fixed, or flexible depending upon the intended use for access to the human anatomy. These devices may be radioopaque for visualization on an x-ray or fluroscopic image.	
42295406	Laparotomy or x-ray detectable or surgical specialty sponge	Laparotomy or specialty or x-ray detectable or gauze surgical spear or sponge or wick.	
42295407	Patient masks for surgical use		
42295408	Surgical scrub brush or accessories	A type of disposable or non-disposable product comprised of multiple bristles on one side and a sponge or graspable flange on the other. Disposable brushes may be impregnated with a disinfecting antimicrobial soap.	
42295409	Surgical applicators		
42295410	Surgical basin set or pack	An individual container or a standard collection of sterile or unsterile metal or plastic receptacles for use in a procedural setting for holding fluids, specimens, or other objects. The products come in a variety of shapes and sizes to fit the needs of the intended procedure.	
42295411	Surgical blade holders or breakers		
42295413	Surgical canal brushes		
42295414	Surgical custom or specialty procedure packs		
42295415	Surgical equipment cover	A flexible, adjustable, durable, cloth or plastic sheeting that is countoured to be placed on, over, or around an apparatus or implement during storage in an aseptic environment. If intended for multiple use, the product should be durable enough to be laundered routinely. A disposable plastic overlay should be replaced as determined by facility guidelines.	
42295416	Surgical evacuators

UNSPSC v16_0901

1/27/2014

42295456	Surgical felt or fabric or patch or pledget	A type of treated or untreated, synthetic, implantable, cloth-like material used to replace, cover, reinforce, or bolster an anatomic area in a surgical procedure. Excludes surgical mesh or tissue barrier products	
42295457	Surgical helmet lenses or hoods		
42295458	Drying or powdering equipment for surgical gloves		
42295459	Fluid decanting devices for surgical use	Used in pouring solutions from a container such as an IV bag to the sterile field.	
42295460	Protective caps for orthopedic implants	Tips for orthopedic wires or pins. Used to protect the patients skin from injury caused from the protruding implant.	
42295461	Tissue glue or systems or applicators or accessories	Used for holding tissue in place. Used in a variety of specialty areas, such as neuro, plastics, etc.	
42295462	Urodynamic catheters or accessories		
42295463	Ureteral catheter or catheter set	An individual hollow tube or a standard collection of products that includes a tube designed for placement in the ureter above the bladder.	
42295464	Organ preservation solution	Solutions used to preserve organs from the time it is removed from a donor to the time it is transplanted to the recipient. These solutions allow the organ to be transported between hospitals and prevent changes to the organ that would affect transplantation. An example is University of Wisconsin or UW solution.	
42295465	Neurophysiological monitoring system	Monitors patients during brain and spinal cord surgeries.Ex. Needle electrodes, patch electrodes, portable monitoring system.

42295466	Surgical bone cement	An permanent implantable medical device composed of polymethylmethacrylate copolymer, methylmethacrolate monomer, or acrylic with or without the presence of radiopacifiers or antibiotic substances. The products are used to anchor an orthopedic implant. Bone cement it typically provided with two individual components; powdered beads of the Benzoyl peroxide and styrene copolymer and a methylacrylate hydroquinone liquid activator. The powder and liquid componets are combined and mixed until a desirable semi	
42295467	Surgical bone cement mixer	Bowl specifically designed for mixing bone cement with or without vacuums.	
42295468	Surgical bone cement injector or accessory	A device and accessories used to inject surgical bone cement.	
42295469	Surgical bone cement kits or accessories	Includes items that can be used to prepare the bone before implanting, or disposable items to remove excess cement, as well as disposable products used to help introduce bone cement to a canal.Examples include cement restrictors, curettes, pressurizers, canal tips, etc. all of which can be individually packaged or come as a kit.	
42295470	Platelet concentration system	Product used in surgery for the collection, preparation and utilization of platelet concentration from the patients own blood for the purpose of speeding wound healing and controlling bleeding at the surgical site.	
42295471	Bone marrow aspiration system	Product used in surgery for the collection, preparation and utilization of bone marrow from the patients bone to facilitate bone and soft tissue healing.

UNSPSC v16_0901

1/27/2014

42295502	Human tissue implant	Any cells, soft tissue, nerve tissue, organ, blood, cartilage, bone product that originates from or is derived from a human source or donor.	
42295503	Implantable infusion port or accessories	An implantable medical venous access device or system. It is comprised of a reservoir compartment or port or portal placed under the skin in a surgically created pocket and a hollow tube or catheter that is placed into a large blood vessel or the heart. The appliance typically has a plastic or metal backing that contains an integral hollow core or reservoir with a silicone bubble or septum for needle insertion. Accessories include an introducer. Synonyms include Port-a- cath, Port, Access Device, all total	
42295505	Ophthalmic implant	A type of implantable medical device that is used to correct, replace, or supplement pathology of the eye, eyelids, or tear ducts. Excludes intraocular lenses, gold eyelid weights, silicone sheeting, intraocular gases, and craniomaxillofacial bone plates and screws.	
42295506	Oral maxillofacial implants or sets		
42295508	Otolaryngology implants or sets		
42295509	Plastic or cosmetic implant or tissue expander or set	A type of biocompatible medical device used to surgically reconstruct, repair, augment, replace, or supplement a part of the body for cosmetic or rehabilitation purposes.	
42295510	Surgical adhesion barrier	A sterile, implantable, medical device that is placed between opposing structures to reduce potential post-operative scarring or attachment between soft tissue layers.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42295511	Surgical bone stimulator	An external ultrasonic or electrical pulse generator with an assortment of electrode styles suited to the target anatomy. This product is used to activate or support osteogenesis in difficult fractures or to prevent non-union. Excludes nerve stimulators and pain control stimulators.	
42295512	Surgical implantable shunts or shunt extenders		
42295513	Surgical mesh or tissue barrier	A type of implantable medical device of biologic or synthetic origin used to support, repair or close openings in soft tissue or to prevent adhesions.	
42295514	Silicone sheeting	Silastic sheeting is a flexible flat silicone sheeting in various sizes that has multiple medical applications.	
42295515	Synthetic tissue implants		
42295516	Urological implant or set	A product or standard collection of products that is inserted into the body to preserve urinary function, prevent occlusion, restore erectile function, or control urinary incontinence.	
42295517	Cardiovascular extenders		
42295518	Graft protectors		
42295519	Preparation kit for penile prosthesis

UNSPSC v16_0901

1/27/2014

42295520	Ventriculostomy kit	CSF-Ventriculostomy Reservoir Kits are Burr Hole models featuring removable reservoir caps. All models can easily be converted to a CSF-Flow Control shunt component. Additionally, any CSF-Flow Control valve can be directly attached to any of the ventriculostomy reservoirs. The non-metallic design of the reservoirs prevents distortion of CT or MRI scans. The reservoir domes are designed to allow multiple punctures with a 25-gauge or smaller noncoring tip or short beveled needle.	
42295521	Gastrointestinal implant	Implantable devices in the gastrointestinal tract, such as an artificial stoma device, gastrointestinal bypass sleeve, etc.	
42295522	Implantable nerve stimulator system or kit or accessories	An individual part or standard grouping of components needed to deliver electrical current directly or indirectly to a nerve to provide therapeutic action.	
42295523	Gynecological implant or sling	An implantable medical device used to maintain structural or functional integrity of the organs of the female reproductive system.	
42295524	Intraocular lens IOL	A permanently implantable medical device that may be soft and foldable or rigid that is inserted into the anterior chamber of the eye for vision correction. The clear spherical portion may have rigid or flexible arms to ensure secure placement. The round optical portion may feature ultraviolet UV filtering. Synonym IOL. Excludes any contact lens worn on the exterior of the eye for temporary vision improvement, irrigating or non-irrigating asymmetric lenses that are placed on the surface of the eye	
42295525	Biological tissue implant	Bovine or porcine or other collagen tissue implant.	
42295526	Hair implant system	A device used to implant or transplant hair.

Class Cerebral spinal fluid CSF drainage products and accessories

Commodity	Commodity Title	Definition	Synonyms
42295601	Cerebral ventricular drainage catheter or adapter	An external cerebral spinal fluid CSF ventricular drainage catheter set including drainage collection bag, and all related items used for management of hydrocephaly.	
42295602	External cerebral ventricular drainage bag or reservoir	Collection device for use in draining/collecting cerebrospinal fluid from the cerebral ventricles to prevent pressure on the brain.	
42295603	Lumbar cerebrospinal fluid drain or kit	Catheter that is placed in the spinal canal to drain CSF.	

Class Surgical thermo ablation systems and accessories

Commodity	Commodity Title	Definition	Synonyms
42295801	Surgical thermo ablation cassette	Products used in a procedure using heat to remove tissue, part of the body, or destruction of tissue function.	
42295802	Surgical thermo ablation tubing set	Products used in a procedure using heat to remove tissue, part of the body, or destruction of tissue function.	
42295803	Surgical thermo ablation catheter	Catheter used in a procedure using heat to remove tissue, part of the body, or destruction of tissue function.	

Class Surgical stents

Commodity	Commodity Title	Definition	Synonyms
42295901	Gastrointestinal stent	A tiny tube placed into an artery, blood vessel, or other duct to maintain patency.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42295902	Tracheal stents	A tiny tube placed into an artery, blood vessel, or other duct to maintain patency.	
42295903	Urological stents	A tiny tube placed into an artery, blood vessel, or other duct to maintain patency.	
42295904	Vaginal or uterine stents	A tiny tube placed into an artery, blood vessel, or other duct to maintain patency.	
42295905	Endoprosthesis or wall stents or tubes	An implantable system for transcutaneous insertion of an implantable and radially expandable tube for maintaining patency in the applicable duct.	
42295906	Esophageal stent	A tube placed in the esophagus to keep a blocked area open so the patient can swallow soft food and liquids. Often made of metal mesh, plastic, or silicone, and may be used in the treatment of esophageal cancer.	

Class

Commodity	Commodity Title	Definition	Synonyms
42296001	Aortic valve	Prosthetic or natural replacement aortic valve used to replace damaged natural valves. This valve is situated at exit of the left ventricle of the heart where the aorta begins.	
42296002	Cardiovascular conduit	An implanted bypass tube designed to redirect blood flow, for example from one heart chamber to another, or around an abdominal aortic aneurysm.	
42296003	Mitral valve	A permanently implanted synthetic or biologic medical device that is a replacement for a damaged or stenotic natural valve between the left atrium and the left ventricle. It serves as a one way valve permitting blood to flow forward but not retrograde. Includes insertion handpieces or sizing rings or annuloplasty stabilizing rings.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42296004	Tricuspid valve	Prosthetic or natural replacement tricuspid valves. The tricuspid valve stands between the right atrium and right ventricle and allows blood to flow only from the atrium into the ventricle.	
42296005	Annuloplasty ring	A ring used to repair a cardiac valve by shortening the circumference of its annulus	
42296006	Vascular graft	A permanently implantable medical device without a stent component used to replace, supplement or bypass a blood vessel.	
42296007	Cardiovascular occluder	An artificial implanted device used to occlude holes in the septum.	
42296008	Pulmonary valve	A semilunar valve of the heart that lies between the right ventricle and the pulmonary artery and has three cusps.	

Class

Commodity	Commodity Title	Definition	Synonyms
42296101	Implantable aneurysm clip	Clip permanently implanted for intracranial vascular occlusion.	
42296102	Temporary aneurysm clip	Temporary vessel clip used for temporary vascular occlusion during intracranial surgical procedures.	
42296103	Dural replacement or repair device	A product used for dural repair to prevent CSF leakage. Example: lifecell, duramatrix, duraseal.	
42296104	Cranial plate or bur hole cover	A metallic plate used in internal fixation of cranial bone or coverage of a cranial bur hole.	
42296105	Cranial mesh	Metallic mesh used in internal fixation of cranial bone.	
42296106	Nerve repair graft	A collagen tube, cuff, mesh or graft used to repair damaged peripheral nerves.	
42296107	Cranial clamp	A metallic or resorbable clamp that is used in fixation of cranial flaps. They contain an inferior disk and a superior disk that clamps the cranial bone flap in place to aid in bone healing.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42296108	Cerebral aneurysm encapsulating kit	A standardized assembly of sterile supplies consisting of a resinous powder and an activating substance used in the surgical setting to envelope or contain a weakened portion of a blood vessel within the circulatory system of the brain.	
----------	-------------------------------------	--	--

Class 42311600 Exogenous topical hemostatic agents

Commodity	Commodity Title	Definition	Synonyms
42311601	Absorbable gelatin sponge	An absorbable gelatin sponge is a sterile, absorbable, water-insoluble pliable, gelatin base sponge impregnated with porcine skin-derived gelatin. These are used to control capillary bleeding in surgical procedures by application of mechanical pressure or tamponade; it is left in situ and is absorbed by the body in from 4 to 6 weeks. The gelatin complex may activate or support the blood clotting cascade by acting with prothombin.	
42311602	Bone wax	A sterile non-absorbable opaque mixture of beeswax, paraffin, and isopropyl palmitate. Commonly applied to an open surface of cancellous bone to control bleeding.	
42311603	Oxidized cellulose or polysaccharide based hemostatic products	A variety of sterile products impregnated with resorbable protein fibers (collagen) derived from Bovine tendon sources in sheet, pad, foam, or granular compositions. Collagen supports platelet aggregation and clot formation by enabling the formation of fibrin. Faster acting than gelatin foam. Products with a grainy consistency allows for application to irregular or convoluted surfaces such as the brain, liver, or heart, or lung. Other forms facilitate microsurgical applications.	
42311604	Collagen hemostatics or microfibrillar collagen		
42311605	Thrombin non-absorbable patch	Topical hemostasis patches containing thrombin (non-implantable)	

Class 42311700 Medical and surgical adherent tapes and related products for specialty use

Commodity	Commodity Title	Definition	Synonyms

42312009	Medical stapler for internal use	A disposable or non-disposable medical device used in resection of bowel, lung, and other soft tissue. When loaded with a cartridge of surgical staples for internal use, the device is manually activated to fire staples. This action effects closure of soft tissue in a variety of surgical resections including but not limited to lung and bowel. These devices can be used in traditional open, minimally invasive, or endoscopic procedures. Variations in tool design are specific to the intended surgical approach a	
42312010	Medical stapler for external use	A type of disposable trigger activated medical device that contains a number of U-shaped loops of metal or bioabsorbable material that pierce through the skin and are flattened to secure wound edges in alignment.	
42312011	Medical staples for internal use	A type of absorbable or non-absorbable clasp - like device loaded into a functionally engineered multi-load device. When loaded into the appropriate stapler handpiece they are released by a triggering mechanism to secure, close, or connect soft tissue layers within the body. These devices may be used in open, minimally invasive, or endoscopic procedures as time saving alternative to suturing. Variations in width, depth, and snugness of closure allow for variations in target tissue.	
42312012	Staples for skin closure

UNSPSC v16_0901

1/27/2014

42321501	Surgical wire and its accessories	An implantable device comprised of metal extruded out to form a long, slender, solid, cylindrical, flexible, single strand or multi-strand cable. This may be of any diameter. It is used to encircle bone or to fixate bone to bone, or soft tissue to bone. Accessories include, but are not limited to, items that crimp two ends of wire together or bind a wire to another device.
42321502	Orthopedic guidewire or guide pin or guide rod	A thin, usually flexible wire that can be inserted into a confined or tortuous space to act as a guide for subsequent insertion of a stiffer or bulkier instrument, such as a screw.
42321503	Bone graft extender or void filler or substitute	An implantable biologic or chemically engineered device that enlarges, supplements, replaces bone. Materials include human sources, calcium phosphates, or synthetic materials that have biomechanical properties and structure similar to human bone. Activation or stimulation of native bone growth activity is a feature of these products.
42321504	Intramedullary nail or rod	A cylindrical implant, usually composed of metal, used to align and internally fix fractures of long bones
42321505	Bone plate	An implantable medical device composed of a finely machined metal or non-metal bar with perforations for the insertion of bone screws used to immobilize segments of bone. The perforations may or may not feature a threaded or grooved surface to engage or lock the screw head into place. Excludes cranial plate or burr hole cover or spinal plates and external fixation instrument or systems

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42321506	Bone screw	An implantable metal or non-metal medical device composed of a cylindrical shaft and a cork-screw like external helical thread for a variety of generalized anatomic uses. The shaft may be solid or hollow (cannulated) to accommodate the passage of a guidewire or guidepin. The head is usually recessed to accommodate a screwdriver for insertion and removal. It may be used alone or in combination with a wide variety of other orthopedic implants to hold bone fragments together or to affix a plate to a bony surface.
42321507	Internal fixation set	A set of devices including plates, pins, rods, wires or screws, used to stabilize and join the ends of fractured bones.
42321508	Orthopedic nut	A nut used during joint replacement or internal fixation.
42321509	Orthopedic washer	A washer used during joint replacement or internal fixation.
42321510	Orthopedic cap	A cap used during joint replacement or fixation to cover rod or screw ends.
42321512	Bone fixation pin or peg	Bone fixation pins are used to stabilize a fractured area in the bone and or used to stabilize an external device via bone indwelling. A bone fixation peg is a cylindrical internal bone fixation implant that generally has a smooth shaft but also may have a partial thread. This is opposed to a bone screw that will always have a threaded shaft. A bone peg will also need to be threaded at the proximal head end to lock onto a bone plate, whereas a bone screw may or may not be locking.
42321513	Temporary fixation pin or wire	A bone fixation pin or wire, i.e. Kirschner, Steinmann, used for temporary internal fixation of a fracture during open or closed reduction.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42321514	Bone fixation staple	A metallic staple for internal fixation of bone fragments.	
42321515	Intramedullary nail blade	A metallic device used as an adjunct for the stability of an intramedullary nail.	
42321516	Intramedullary nail locking bolt	A device for securing an intramedullary implant within a bone.	

Class

Commodity	Commodity Title	Definition	Synonyms
42321601	Intervertebral disc	An implantable medical device that is a prosthetic or artificial replacment for the nucleus pulposus (intravertebral disc). The device is situated between two adjacent vertabrae in the spinal column to support intravertebral height and preserve motion.	
42321602	Spinal cable	A flexible cable or set of cables used in spinal fixation.	
42321603	Kyphoplasty balloon	A balloon that is inserted into a fractured vertebra through a trocar and expanded, and the resulting space is filled by injection of cement.	
42321604	Spinal crosslinking device	An implantable medical device that crosses the intraspinous area on a transverse or horizontal plane to attach two parallel rods. The length of these components may be fixed or adjustable. It is used in combination with other products to create a stabilizing construct in spinal fusion procedures.	
42321605	Spinal interbody cage	A cage placed internally on the spinal cord to provide stabilization.	
42321606	Spinal decompression device	A device that relieves the pressure on the spinal cord as caused by a tumor, cyst, hematoma, or bone.	
42321607	Spinal hook	A U-shaped rod that is used in spinal fixation to engage portions of a vertebrae.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42321609	Spinal rod	An implantable medical device that is elongated cylindrical or polygonal dowel-like piece of metal or non-metal that are affixed to the posterior spinous process parallel to the spine along the coronal plane (top to bottom). Rods are affixed by a variety of screws, wires, cords, or hooks to provide stabilization and fixation in correction of spinal curvature or spinal fusion. Rods may be straight or curved (lordotic) of varying lengths and diameters to accommodate variations in anatomy. Long, straight rod
42321610	Spinal screw	An implantable medical device that has a cylindrical shape of varying lengths and outer diameter with external helical threads. It may be made of metal or other strong biocompatible material. They have a polyaxial (movable) or fixed head with a recessed fitting to accomodate a screwdriver or other attachment device. Spinal screws may be used individually or in combination with rods, plates, wires, cables, and/or hooks in a variety of constructs to attach the bones of the spine, sacrum, and cranium as indica
42321611	Spinal plate	An implantable medical device that is flat metal or strong biocompatible material piece with perforations to accomodate screw placement. They are used for internal fixation of the anterior or posterior spine by sitting flush with the exposed bone surface to provide stabilization in conjunction with screws.
42321612	Spinal sleeve ring or end cap	Accessory for spinal implants that augments a spinal fixation procedure.
42321613	Spinal set screw or blocker or plug	A set screw that locks or blocks a particular section of spinal hardware. Synonyms: Blocker, Plug

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42321614	Spinal nut	Accessory nut that secures part of the spinal fixation hardware.	
42321615	Spinal saddle or cradle	An implant that is used to support the spine in correction of spinal stenosis.	
42321616	Spinal connector or coupler	Spinal connector or coupler not used in a cross link mechanism.	
42321617	Spinal staple	A bone staple used specifically for spinal fixation procedures.	
42321618	Spinal washer	A screw or spacer washer used specifically in a spinal fixation procedure.	
42321619	Spinal cement restrictor	A spinal implant that is used to retain bone cement within a targeted area during an interbody fusion.	
42321620	Spinal bolt	Spinal bolt used in a spinal fixation procedure that is separate or different from a spinal screw.	
42321621	Temporary spinal fixation pin or wire	A bone fixation pin or wire, i.e. Kirschner, Steinmann, used for temporary internal fixation of the spine during spinal fixation.	
42321622	Spinal implant kit or system	A kit that contains all of the implanted pieces that are used in spinal fixation surgery.	

Class

Commodity	Commodity Title	Definition	Synonyms
42321701	One piece acetabular cup	An artificial cup-like implant that is placed on the pelvic bone during hip replacement surgery that is one piece, containing both the shell and liner.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42321702	Acetabular cup shell	An implantable medical device that is a dome shaped hollow semi-spherical product of varying depths and circumference that feature a variety of internal and/or external surface textures. The cup or shell may or may not have perforations to accommodate placement of acetabular screws. The cup is placed into a reamed or natural acetabular socket to accommodate the prosthetic femoral head implant. Excluded: 42321703 Acetabular cup liner or shell liner or insert; 42321701 One piece acetabular replacement system
42321703	Acetabular cup liner	This is a polyurethylene liner used as a barrier between the acetabular shell and femoral head.
42321704	Femoral head	A ball shaped implantable medical device composed of metal or ceramic. This product is placed on the neck or proximal end of a femoral stem during total hip replacement or hip resurfacing procedure.
42321705	Femoral stem distal centralizer	The femoral centralizer acts to center the distal stem of the femoral prosthesis within the intramedullary canal of the proximal femur.
42321706	Femoral hip stem extension	A stem extension to lengthen replacement femoral heads.
42321707	Total hip replacement kit or system	A kit that contains all of the implanted pieces that are used in "total hip replacement" surgery.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42321708	Femoral hip stem	An implantable medical device that is solid, semi-tubular, formed metal body with a rounded blunt distal tip and an angled or offset proximal end. The proximal configuration varies by device. The distal end of the stem is inserted into the femoral canal that has been prepared to accept the device by reaming or broaching the intramedullary space to accomodate the contours of the sized prosthesis. The device may be implanted with bone cement or press fit without cement. Prosthetic stems vary in length, diam	
42321709	One piece hip hemiarthroplasty prosthesis	A one piece femoral stem with non modular head.	
42321710	Femoral modular hip component adapter	A modular component used to construct a proximal femoral stem for hip arthroplasty.	
42321711	Resurfacing femoral component	A partial component for resurfacing only the articular surface of the proximal femur.	
42321712	Femoral stem proximal centralizer	The femoral centralizer acts to center the proximal stem of the femoral prosthesis within the intramedullary canal of the femur.	
42321713	Acetabular screw	A bone screw utilized for non cemented fixation of an acetabular cup or shell.	
42321714	Acetabular augment	An implant used to supplement an area deficient of bone stock during a hip arthroplasty.	
42321715	Bi polar or uni polar hip component	A modular femoral hip component for replacement of the proximal femur without acetabular reconstruction.	
42321716	Femoral canal cement restrictor	A plug inserted below a femoral stem prior to injection of bone cement that prevents leakage down the femoral canal.	
42321717	Hip component screw	A screw utilized to combine modular components of a revision hip system,not a bone screw.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42321718	Acetabular cage	An implant that enables the re-creation of a normal hip center. It improves hip joint stability.	
42321719	Acetabular mesh	Mesh that helps contain the impacted graft material within the deficient acetabulum by helping the surgeon establish an interface in which to cement a replacement acetabular component.	
42321720	Acetabular screw hole cover	An implant used for covering the apex hole in the acetabulum prior to inserting the liner, providing a watertight barrier. It's designed to prevent blood or particles from getting into the unused screw hole.	
42321721	Acetabular hole eliminator or plug	An threaded plug intended to close the apical hole of an acetabular cup. It's designed to prevent blood or particles from getting into the unused screw hole.	
42321722	Acetabular ring	An acetabular ring that is used to lock the acetabular liner into the cup used during hip arthroplasty surgery.	
42321723	Femoral neck	A femoral neck component that connects the femoral head to the femoral stem used during hip arthroplasty surgery.	

Class

Commodity	Commodity Title	Definition	Synonyms
42321801	Femoral knee component	An implantable medical device of metal, metal alloys, or biocompatible material with a smooth spherical outer surface and a formed or jugged or stemmed inner surface. It is fixed onto the prepared distal surface of the femur (large bone of the thigh) to provide a functional weight bearing surface that allows for flexion and extension of the knee joint. Size and shape vary with configurations for uni-condylar or modular replacement, primary replacement, gender specific variations, or revision arthroplasty. C

UNSPSC v16_0901

1/27/2014

42321802	Femoral knee extension stem	A rod that is attached to the femoral component, within the femur, to provide stabilization after knee replacement surgery.	
42321803	Tibial extension stem	A rod that is attached to the tibia baseplate to provide tibial stabilization after knee replacement surgery.	
42321804	Patellar implant	A circular implantable medical device composed of high density or linked polyethelene with a smooth domed surface on one side and a flat surface with several small raised pegs on the other. The native patella bone is reamed and drilled to prepare a flat circumferential templated surface that accepts the molded prosthesis. The prosthesis is affixed to the internal surface of the kneecap with bone cement. Synonym: Patella button	
42321805	Tibial baseplate	An implantable medical device of metal that has a flat top, a formed or flanged bottom, and a bean-like or semicircular or C-shaped profile if viewed from above. Size and shape will vary depending upon anatomic consideration of the patient, gender specificity, and whether the reconstruction is primary or revision arthroplasty. The proximal surface of the tibia (shin bone or large bone of the calf) is sawed and broached to templated configurations that accommodate the stemmed surface of the prosthesis. The p

42321902	Humeral head	An implantable medical device that is a prosthetic replacement for the articular (smooth rounded head) surface of the humerus (long bone of the upper arm). The proximal humerus head rotates in the glenoid (shoulder) socket or cavity in a ball and socket type joint configuration. The humeral head prosthesis is a cast metal or metal alloy with a dome shaped smooth highly polished surface on the outer side and hollowed concave textured surface on the under side that features a central post. The post is engineered	
42321903	Humeral stem	An implantable medical device that is solid, semi-tubular, formed metal body with a rounded blunt distal tip and an angled or offset proximal end. The proximal configuration varies by device. The stem is inserted into the proximal humeral (long bone of the upper arm) canal that is prepared to accept the device by reaming or broaching the intramedullary space to accommodate the contours of the sized prosthesis. Implant may be implanted with or without (press fit) bone cement. Prosthetic stems vary in length,	
42321904	Resurfacing humeral component	A partial component for resurfacing only the articular surface of the proximal humerus.	
42321905	Glenoid sphere	A ball or head component for the glenoid used for a reverse shoulder arthroplasty.	
42321906	Glenoid fixation component	A keeled or pegged or screw fixation component used to resurface the glenoid during shoulder arthroplasty.	
42321907	Humeral insert liner or cup	An insert for the proximal humeral component used for a reverse shoulder arthroplasty.	
42321908	Humeral canal cement restrictor	A plug inserted below a humeral stem prior to injection of bone cement that prevents leakage down the humeral canal.

42322201	Interference screw	Screw used to anchor soft tissue to bone. Made of metal and resorbable materials.	
42322202	Soft tissue non-suture anchor	An arthroscopic or minimally invasive implant for soft tissue fixation	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

42322203	Suture anchor	An implantable medical device that resembles a screw or T-shaped configuration with a single or double thread-like tail used to secure soft tissue to bone or other immovable anatomic feature. The anchor portion may consist of a metal, plastic, or polylactide component. The thread-like portion may be metal, or an absorbable or non-absorbable ligature strand used to tie down or fix the soft tissue.	
42322204	Soft tissue fixation washer	A screw washer designed with spikes to augment soft tissue fixation to the bone.	
42322205	Soft tissue fixation pin	An absorbable soft tissue fixation pin designed to augment graft fixation without penetration of the graft itself.	
42322206	Soft tissue staple	A metallic staple used in fixation of soft tissue to bone.	

Segment **43000000** Information Technology Broadcasting and Telecommunications

Family **43190000** Communications Devices and Accessories

Class **43191500** Personal communication devices

Commodity	Commodity Title	Definition	Synonyms
43191501	Mobile phones	A portable radiotelephone also known as cellular or satellite phones. These can be car or hand-held portable phones	
43191502	Pagers	A personal messaging device capable of either one-way or 2-way communication of voice, numeric and/or alpha characters	
43191503	Pay phones	A public or private telephone that accepts coins or encoded credit cards for usage.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43191504	Fixed phones	A fixed or wired phone is an instrument or system used for voice communication. A device that converts acoustical energy (sound) into electrical energy for transmission to a distant point. Includes commodities such as Feature, 2500, Novelty, Hotel and Motel, Speaker and Multi-line telephones
43191505	Answering machines	Integrated or standalone device used to record telephone messages from callers for retrieval by their owner at a later date.
43191507	Special purpose telephones	Special purpose telephones include equipment designed for the visually or hearing impaired and/or phones that have special properties such as explosion proof.
43191508	Digital telephones	Telephones which operate in digital networks such as in integrated services digital network (ISDN)
43191509	Analog telephones	
43191510	Two way radios	Radios used for Family Radio Service (FRS), General Mobile Radio Service (GMRS), and Multi-Use Radio Service (MURS).
43191511	IP phones	These are telephones that look like conventional phones and they use computer networks (wireless or wired) for voice conversation. The phones provide similar services as ISDN phones.
43191512	Digital enhanced cordless telecommunications DECT cordless phones	Cordless phones following the industry radio technology standard, DECT (Digital Enhanced Cordless Telecommunications) for cordless communication up to a few hundred metres.
43191513	Video phone	Videophone is a telephone which is capable of both audio and video duplex transmission. It uses regular telephone lines.
43191514	Satellite phone	A type of mobile phone that communicates directly with orbiting communications satellites.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43191515	Speaker phone	A telephone with a microphone and loudspeaker provided separately from those in the handset, thus enabling group conversation.	
43191516	Keyphone system	A phone device that is structured with the main device equipped with the control function and phone terminal with the call selection button and others to use jointly with the phone lines with several phones.	

Class

Commodity	Commodity Title	Definition	Synonyms
43191601	Mobile phone face plates	Replaceable face or external cover plates that come in different designs to suit the top of mobile or cellular phones	
43191602	Phone dialers	Equipment that pulses out a standard dial protocol signal.	
43191603	Phone extension cords	A multi-conductor, male/female modular line cord generally used to permit greater separation between the Communications Outlet and the telephone equipment. Flexible insulated wire connecting receiver to base	
43191604	Phone face plates	It is a protective covering for the front of a fixed phone. The standard faceplate is designed around an ACO outlet. The faceplate is equipped with fiber optic connectors, a telephone jack, and an "F" style connector for video applications. The accessories include the cover, lens etc.	
43191605	Phone handset cords	Cord that goes between your phone and the handset. Also known as curly cord used to connect a handset with the telephone.	
43191606	Phone handsets	The hand held part of the telephone. Consists of a receiver and transmitter at the ends of a common handle and is connected to the telephone handset mounting. The combined hand held unit of microphone and ear piece of a standard telephone instrument.	

UNSPSC Codeset

1/27/2014

43191607	Phone headset ear or speaker cushions	Replaceable speaker or ear covers of a headset for fixed or mobile phones	
43191608	Phone headset voice tubes	Replaceable device which directs the voice up to the microphone of a headset	
43191609	Phone headsets	Telephone transmitter and receiver worn on the head to keep the hands free. A combination microphone and earpiece used to conduct conversations.	
43191610	Personal communication holders or mounts, stands	A phone accessory designed to hold a phone in a stationary position. It is a clamp that holds the receiver. It is attached to mounting hardware for affixing to a stable surface	
43191611	Phone line protectors	Module/device that prevents voltage transient from damaging [phone] equipment	
43191612	Phone rests	A phone accessory designed to provide a place to rest a phone on a person's shoulder while talking.	
43191614	Phone voice converters	Smart devices used to change the user voice for personal and official usage also can be a device that converts spoken language to text	
43191615	Vehicle handsfree phone set	It is car or vehicle phone or attachments for mobile phones which allows users to talk without using hands.	
43191616	Centrex phone console	Abbreviation for 'central office exchange' service, a type of PBX service in which switching occurs at a local telephone station instead of at the company premises. Typically, the telephone company owns and manages all the communications equipment necessary to implement the PBX and then sells various services to the operating company.	
43191618	Conversation recording units	Intratedged or standalone recording device used with telephones to record telephone conversations.

43191619	Telephone signaling devices	These are the signalling devices of the telephone. It includes the telephone bells, horns and strobes	
43191621	Handset adapters		
43191622	Pager modules or accessories	The pager module is a high sensitivity decoder module that can receive, decode and output paging messages.	
43191623	Pay phone coin mechanisms	Mechanical assembly responsible for coin operation in a pay telephone.	
43191624	Pay phone coin chutes	Chutes used in pay phones for coin conveyance	
43191625	Pay phone coin boxes	Boxes used for collecting coins in the coin operated Pay telephones.	
43191626	Pay phone hoppers	The hopper will hold the coin until the circuit board instructs the relay to kick the coins in to either coin box or reject chute	
43191627	Pay phone coin box vault doors	Safety enclosures compatible with most payphone right side slot.	
43191628	Pay phone microphone windscreens	This commodity is used for filtering noise, protecting the microphone head from saliva, and protecting the microphone head if dropped.	
43191629	Notebook or palmtop skins or face plates	A cover for hand-held computer devices	
43191630	Mobile phone starter kits		
43191631	Phone or modem jack adapters or country kits or travel kits		
43191632	Phone antenna	A more sensitive type of antenna for a mobile or radio phone. Can be mounted on the phone or can be external, connected to the phone with cable.	
43191633	Key phone subset	A multi-functional phone that simultaneously shares the number of calling line and incoming line of office line and extension in connection to the office line.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43191634	Extension board for keyphone system	A board that is enabled to make the additional structure with the function card by the need for each in meeting the demand of users on the main device of the key phone released with the basic capacity.	
----------	-------------------------------------	---	--

Family	43200000	Components for information technology or broadcasting or telecommunications	
--------	----------	---	--

Class	43201400	System Cards	
-------	----------	--------------	--

Commodity	Commodity Title	Definition	Synonyms
43201401	Graphics or video accelerator cards	A graphics accelerator is a computer microelectronics component to which a computer program can offload the sending and refreshing of images to the display monitor and the computation of visual effects. Hardware (often an extra circuit board)to perform tasks such as plotting lines and surfaces in two or three dimensions, filling, shading and hidden line removal.	
43201402	Memory module cards	Memory is an electronic holding place for instructions or data, allowing quick access for microprocessors of communications, computer, or networking equipment. In a computer, memory usually contains operating system instructions and some or all of the application programs and related data that is being used.	
43201403	Modem cards	A card that provides the capability of a modem. Internal circuitry that converts computer data into sound that can be transmitted over phone lines.	
43201404	Network interface cards	An adapter circuit board installed in a computer to provide a physical connection to a network. Also called adapter cards or NIC cards.	
43201405	Optical network receive cards	A card that contains optoelectric circuitry that converts an incoming optical signal to and electrical signal.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43201406	Optical network transmit cards	A card that contains optoelectirc circuitry that converts an electrical signal to an optical signal.
43201407	Peripheral controller cards	A device that communicates between a computer and its peripherals. It is often a separate card that is connected to the computers bus(e.g. PCI, ISA, PCMCIA) or built in to the motherboard. Can be SCSI, IDE, etc.
43201409	Wireless network interface cards	Wireless network interface cards provide a dedicated connection to a wireless network. This includes the Bluetooth standard.
43201410	Switch ports or cards	A specific line into a switch, specified by shelf, slot, and port within that slot.
43201411	Peripheral component interconnect PCI card	A card that is connected in a PCI expansion slot or motherboard to increase the connectivity of the computer.
43201412	PCMCIA or PC card	A computer system card developed by a consortium of the same name: Personal Computer Memory Card International Association (PCMCIA). that is used in tablet PCs, laptop or notebook computers and other computing devices to allow WI-FI connectivity without necessity of cables.
43201413	Magnetic stripe card	A type of card capable of storing data by modifying the magnetism of tiny iron-based magnetic particles on a band of magnetic material on the card. The magnetic stripe, sometimes called a magstripe, is read by physical contact and swiping past a reading head.
43201414	Hard disk protector	An anti-modification device which protects a hard disk from modification of programs or data by other persons except for the administrator.It is designed to be installed in an ISA slot of a computer.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43201415	Subscriber identity module SIM card	A smart card that stores data for cellular telephone subscribers. The SIM holds personal identity information, cell phone number, phone book, text messages and other data. It can be thought of as a mini hard disk that automatically activates the phone into which it is inserted.	
43201416	Data acquisition board	A board that implements the analysis on the application software by converting the analog signal that is inputted from the sensor to the digital data.	
43201417	Multimedia integrated board	A board that could undertake the integrated function with the built-in two or more of boards with the major function of multimedia, such as graphic, moving picture, television reception, sound, video, overlay, and modem function.	

Class

Commodity	Commodity Title	Definition	Synonyms
43201501	Asynchronous transfer mode ATM telecommunications interface cards	Interface that provides ATM port capabilities within networking equipment	
43201502	Audio accelerator cards	Sound cards designed to accessorize audio signal.	
43201503	Central processing unit CPU processors	The central unit, or "brains" in a computer that contains the logic circuitry that performs the instructions of a computer's programs.	
43201507	Daughterboards	A printed circuit board that plugs into another circuit board (usually the motherboard). A daughtercard is similar to an expansion board, but it accesses the motherboard components (memory and CPU) directly instead of sending data through the slower expansion bus. Processor cards belong to this category. Includes processor cards.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43201508	Dispersion compensation fiber module DCFMs	Modules used in optical networks to compensate for the distortion in optical signals as they are transmitted through the network. During long haul transmission in optical fiber cable, signal light is attenuated and signal shape is distorted by chromatic dispersion inherent in the optical fiber. By remedying the attenuation and distortion at the optical amplifier and dispersion compensation module, a large capacity transmission becomes possible.
43201509	Exchange datacom modules	Modules designed to transfer data to voice and voice to data in a telephony network.
43201513	Motherboards	A motherboard is the physical component in a computer that contains the computer's basic circuitry and other components. On the typical motherboard, the circuitry is imprinted or affixed to the surface of a firm planar surface and usually manufactured in a single step.
43201522	Parallel port cards	Parallel port cards are used for data transmission between input output devices and the cpu.Data transmission is two way in nature at any point of time.
43201531	Video capture boards	Input devices to convert raw video into a digital form that can be stored on in digital media accessible to a computer.
43201533	Musical instrument digital interface MIDI interfaces	A hardware specification and protocol used to communicate note and effect information between synthesisers,computers, music keyboards, controllers, and other electronic music devices. It is basically a high-speed serial connection with separate connections for MIDI in, MIDI out and MIDI through (to allow devices to be chained).
43201534	Exchange component CODEC interfaces	Interface that provides Compression and Decompression CODEC capabilities within networking equipment

UNSPSC Codeset

1/27/2014

43201535	Serial infrared ports	Devices that enable information technology equipment to communicate with infrared frequencies and protocols.
43201537	Print servers	Print servers cache print requests to provide high volume printer sharing on a network. They can be added to a network system as an internal board or as a stand-alone external device.
43201538	Central processing unit coolers	Device that provides a cooling mechanism to a processor, this may be in the form of fans and heatsinks designed specifically for cooling processors
43201539	Console controller mainframe	The interface between the console and the mainframe.
43201540	Channel converter	A modulator/demodulator with many channels designed for different frequency ranges.
43201541	Channel to channel interface mainframe	An interface device used to connect two or more mainframe channels.
43201542	Control unit	A mainframe unit that monitors analog and digital inputs and conveys desired control signals to drive the system to which it is connected.
43201543	Coupler facility mainframe	A device used to couple different mainframe units.
43201544	Interface bus converter or controller	Includes converters such as GPIB converter simply translate the data from one bus type to another. For instance, a RS232 to GPIB converter, translates the serial commands generated by the RS232 interface to GPIB commands. Many converters, are also controllers.

43201545	Fax boards	It is a loop-start interface, four-port fax board for medium to heavy fax traffic on a LAN. It supports modems, ECM, advanced compression (MR and MMR), and BFT. When combined with fax server software it can be used for LAN fax broadcasting.	
43201546	Audio conferencing boards	Conferencing resource boards provide for building solutions that range from small party conferences for call centers, small business applications, and chat lines to large systems including collaboration servers, Internet-based audio conferencing systems, and business audio conferencing solutions.	
43201547	Voice boards	These boards are ideal building blocks for developers building cost-effective, highly scalable, voice applications for telephone networks or the Internet.	
43201549	Interface bus switches	An interface bus switch enables several controllers to share one or more devices, or lets a single controller operate multiple bus systems. An example is a GPIB or general purpose interface bus.	
43201550	Network packet data synchronization device	The synchronisation device is connected to digital links connecting network hardware. It ensures that the 2 ends of the network hardware are synchronised to avoid bit slips and loss	
43201552	Hardware or telephony adapters	Electronic adapters to physically connect two or more devices. Examples are parallel to serial or parallel to SCSI converters; gender changers; USB, mouse, keyboard or memory stick adapters. Also, telephony adapters such as handset or headset adapters.	
43201553	Transceivers and media converters

1/27/2014

43201554	Personal computer television PC TV tuners	TV tuners are used to watch TV on a personal computer. They could be plug-in cards (on PCI bus) or external (usually on USB or Hi-Speed USB bus). They are similar to video capture boards but video capture boards can not capture TV signal.	
43201555	PC radio tuners	Radio (usually FM) tuners used to listen to FM radio on a personal computer.	
43201556	Small computer system interconnect SCSI adapters	Adapters providing SCSI interface. SCSI host based adapters could reside on PCI (PCI64 etc.), USB buses.	
43201557	Redundant array of independent disks RAID controllers	RAID controllers provide SCSI, IDE/ATA or SerialATA interfaces. The key difference from usual storage controllers that they allow to create drive arrays with variable level of redundancy.	
43201558	Fibre channel controller	Controllers providing Fibre Channel interface to a personal computer or server. They are usually used for construction of SANs (Storage Area Networks).	
43201559	Serial port cards		
43201560	Coprocessor	A processor that is used for the purpose of assisting the central processing unit CPU from the computer system.	

Class

Commodity	Commodity Title	Definition	Synonyms
43201601	Computer chassis	A chassis is enclosure designed to protect computer sub-assemblies or components	
43201602	Network equipment chassis	A network chassis or rack mount is usually modular and easily scalable, designed for efficiently grouping networking equipment and wiring. For example, a network chassis sits in the wiring closet and connects each data line to the network backbone	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43201603	Chassis stacking components	Chassis peripheral used to hold physically connect a chassis to it's components.	
43201604	Electronic equipment bays or baskets	A component designed to hold a specific device within a chassis.	
43201605	Expanders	A component of a chassis designed to provide a spacer between employ slots or spaces that a smaller component was used.	
43201608	Removable drive frames	It is fixed in the hard disk tower in order to place and connect the removable drive tray to the computer.	
43201609	Storage device trays or assemblies	These trays are used to hold the storage devices like hard drive , tape drives , tape libraries. These trays sometimes come with attachment like extension assembly or external axis assembly or Expansion assembly units ,which makes the trays more flexible to accommodate additional storage units. Expansion Unit has control over all attached modules in the storage drive or library.This expansion unit allows the creation of a multi-module virtual library in a single rack mount configuration.The multi-unit configuration can also be disassembled at any time and each module redeployed independently to meet changes in backups	
43201610	Backplane or panels or assemblies	These are the enclosures for server or its parts . They come as screw-less plastic front panels, bottom panels, top panels, bottom panel and backplanes with door, and security door locks.These panels come with the slots to aid in assembling various peripheral controls of the networking equipment, server or computer. These panels sometimes comes as the combinational of one or more panels and are sold as panel assemblies.

1/27/2014

43201611	Computer cradles	Computer cradles are the mounting devices to the computer. Different types of mounts are used secure different types of computers. This cradle includes adapters, cables and vibration resistant isolators. For palmtops these mounts comes with the USB cable along with its adapter and comes with the power adapter. Palm computers are mounted on this cradle and this cradle enables the palm to connect to other computer for file or data or resource sharing.	
43201612	Computer faceplates	Face plates are the protective covering for the front of the computers or its components. They are available in various colors for monitors, speakers, CPU towers.	
43201614	Console extenders	The console extender allows access to a computer system from a remote console (keyboard, monitor, and mouse). It is suitable for any kind of installations where the console needs to be kept in a conveniently accessible location, leaving the system equipment to reside in a safe place.	
43201615	Drive bay cover kits	This commodity is used as a cover for the drive bay of the computer case	
43201616	Hard disk drive array towers	A tower for holding a group of hard disks.	
43201617	Card cages		
43201618	Computer rack component	Various accessories or components for computer racks (including rack shelves, panels, doors, conversion kits, etc.)	
43201619	Computer cooling fan	A device that ventilates the heat compulsively manually or automatically not to damage the device by the heat generated for long time of operation for the equipment on the rack.

UNSPSC v16_0901

1/27/2014

43201801	Floppy drives	A device with a read/write head for accessing removable magnetic recording media typically encased in flexible or hard shell covers known as floppy disks.	
43201802	Hard disk arrays	A bundle of hard disks that are packaged together as one logical device.	
43201803	Hard disk drives	A hard disk drive (HDD) is the mechanism that controls positioning, reading, and writing of data and furnishes the largest amount of data storage for a PC.	
43201806	Tape arrays	A bundle of tape drives that are packaged together as one logical device. Example: Tape array is a rack mounted storage system consisting of multiple drives, cooling fans and powersupply which provide data backup for an enterprise.	
43201807	Tape drives	A tape drive is the device that positions, writes from, and reads to the tape. Tape is an external storage medium, usually both readable and writable, consisting of a loop of flexible celluloid-like material that can store data in the form of electromagnetic charges that can be read and also erased.	
43201808	Read only compact disc CD	An optical disc is an electronic data storage medium that can be read using a low-powered laser beam	
43201809	Read write compact disc CD	An optical disc is an electronic data storage medium that can be read or write using a low-powered laser beam	
43201810	Read only digital versatile disc DVD	A DVD is very similar to a CD in that it is an optical disc data storage medium using a low-powered laser beam to read upto 7GB's of data on a single disc.	

UNSPSC Codeset

UNSPSC v16_0901

43201811	Read write digital versatile disc DVD	A read/write DVD is very similar to a CD in that it is an optical disc data storage medium using a low-powered laser beam to read or write upto 7GB's of data on a single disc.	
43201812	Magneto optical MO drives	An MO device employs both magnetic and optical technologies to obtain ultra-high data density for storing digital data.	
43201813	High capacity removable media drives	High capacity removable storage devices can store hundreds of megabytes or gigabytes of data on a single disk, cassette, card or cartridge. An examples of this is a zip drive.	
43201814	Electronic media or data duplicating equipment	Equipment for the mass production of optical or magnetic recordings. Examples are Digital Tape duplicators, CD duplicators and DVD duplicators. These devices are usually purpose built stand-alone machines which feature single or multiple simultaneous duplication capabilities coupled with media storage feeders and automated exchangers which enable bulk media production or duplication to be carried out under software control with minimal manual intervention.	
43201815	Peripheral component microchannel interconnect architecture reader and writer drives	These drives permit to write and read PCMCIA cards and SmartCards.	
43201816	Ultra density optical UDO drives or autoloaders or libraries	Ultra density optical drives, loaders or libraries use UDO drives. UDO is a storage standard along the lines of mageto optical drives, but have different characteristics.	
43201817	Compact disc CD drive		
43201818	Digital video disc DVD drive		
43201819	Read only high definition digital versatile disc HD DVD	A high-density optical disc format designed for the storage of data and high-definition video, this kind of HD DVD is for read only, HD DVD has a single-layer capacity of 15 GB and a dual-layer capacity of 30 GB.

43201820	Read write high definition digital versatile disc HD DVD	A high-density optical disc format designed for the storage of data and high-definition video, this kind of HD DVD is for read and write, HD DVD has a single-layer capacity of 15 GB and a dual-layer capacity of 30 GB.	
43201821	Read only blu-ray disc BD	A high-density optical disc format designed for the storage of data and high-definition video, this kind of BD is for read only, BD has a single-layer capacity of 25 GB and a dual-layer capacity of 50 GB.	
43201822	Read write blu-ray disc BD	A high-density optical disc format designed for the storage of data and high-definition video, this kind of BD is for read and write, BD has a single-layer capacity of 25 GB and a dual-layer capacity of 50 GB.	
43201823	Multimedia hard disc drive HDD player	This device stores data like a normal hard disk drive but is used to record and play video images.	
43201825	Disc publisher	A type of computer peripheral that automatically burns and prints multiple CD or DVD discs.	
43201826	Compact disk read only memory CD ROM array	A cabinet-styled device in which a series of CD-Rom drives are set and connected in array with networks, so as to enable online users to share and access optical disks or CD-Roms at the same time.	
43201827	Portable hard disk storage device	A small and portable external hard disk storage device which is well known for its durability, fast data transmission, semi-permanent storage and renewability.	
43201828	Digital video disc audio DVD A		
43201829	Digital video disc video DVD V

43201830	Solid state drive SSD	A solid-state drive SSD is a data storage device that uses solid-state memory to store persistent data. An SSD emulates a hard disk drive interface, thus easily replacing it in most applications. An SSD using SRAM or DRAM instead of flash memory is often called a RAM drive.	
43201831	Telecommunications memory unit	A type of device that stores and reads the receiving and forwarding information from the wireless communication equipment in electric input and removes the memorized information in accordance with needs.	
43201832	Optical or compact disc juke box	A type of device that is built-in for the stack that stores optical disk or CD --compact disc-- Rom and disc driver of 2 to 10 units.	
43201833	Digital to analog conversion system	A system that converts the digital image or data into the analog image. This device is designed to output the equivalent analog value from the digital code.	
43201834	Storage device controller	An intelligent controller to which storage devices are attached.	
43201835	Network attached storage NAS device	A device designed to manage vast repositories of information in environments requiring very large capacities, high levels of performance and high availability	

Class 43201900 Media storage device accessories

Class

43202000	Removable storage media
----------	-------------------------

Commodity	Commodity Title	Definition	Synonyms
43202001	Compact disks CDs	A removable compact disc (CD) is a small, portable, round medium made of molded polymer for electronically recording, storing, and playing back audio, video or text in digital form. CD formats are read-only or recordable with a data storage capacity ranging from 640 - 720 MB	
43202002	Blank tapes	A magnetically coated strip of plastic on which data can be encoded. Tapes storage capacities range from a few hundred kilobytes to several gigabytes. Tapes are sequential-access media, which means that to get to a particular point on the tape, the tape must go through all the preceding points. Because tapes are so slow, they are generally used only for long-term storage and backup or for transporting large amounts of data.	
43202003	Digital versatile disks DVDs	A removable disk media that can be read-only or recordable. DVD or digital versatile/video disc - a type of CD-ROM that holds a minimum of 4.7GB (gigabytes), enough for a full-length movie. The DVD specification supports disks with capacities of from 4.7GB to 17GB and access rates of 600KBps to 1.3 MBps. DVD uses MPEG-2 to compress video data.	
43202004	Floppy disks	Removable magnetic diskettes that are read-writeable. Called "floppy disks" or "floppies" because their housings or outer sleeves were originally flexible, current standard for floppy format is a hard plastic 3.5 inch outer shell with 1.44 MB or 2.88 MB capacity.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43202005	Flash memory storage card	Electronic memory for storage in devices like cameras or PDAs. Common formats include Compact Flash, Smartmedia, and Memory Stick.	
43202006	Magneto Optical MO disks	Disks used with magneto optical drives.	
43202007	High capacity removable media blank disks	Modern high capacity (much more than conventional floppy) disks except optical disks (CD, DVD) and magneto optical and WORM disks.	
43202008	Ultra density optical UDO blank disks	Ultra density optical blank disks, both rewritable and write-once, are used with UDO drives.	
43202009	Blank audio tape	A thin and flexible tape with the non-magnetic substance that is coated with film which magnetization is available to record the vibration of sound wave with the electromagnetic method.	
43202010	Pen or flash drive	USB flash drives are NAND type flash memory data storage devices integrated with a universal serial bus USB interface. They are typically small, lightweight, removable and rewritable.	

Class

Commodity	Commodity Title	Definition	Synonyms
43202101	Compact disk cases	Cases or organizers for CD or DVD disks which protect them from dust and humidity.	
43202102	Floppy disk cases	Cases or organizers for floppy diskettes.	
43202103	Multimedia storage holders	A steel storage cabinet with large capacity and a central locking system. Cabinets can be bolted together vertically when stacked and horizontally when side by side. It is designed to store CD/CD-ROM, audio cassettes, VHS video Cassettes or 3.5 floppy discs and other media.

1/27/2014

43202104	Vertical helix scan VHS videotape storage or accessories	An organizer used to store VHS tapes. They usually store both single and double tapes as well as DVD and are available in wall mountable designs. Units connect side-by-side and vertically to expand its storage capacity.	
43202105	Multiple media cabinets	The commodity is a mobile cabinet with installed cabling and shelves. All the multimedia tools can be accessed at the flip of a switch.	
43202106	Portable media case or wallet	Cases or organizers for USB flash drives or memory sticks or flashcards to protect them from dust and humidity, and for portability.	
43202107	Compact disc or digital versatile disc CD/DVD briefcase	A special briefcase to transport and protect CDs and DVDs.	
43202108	Memory card case	A small case designed to store and protect memory cards (SD, MMC, etc.).	

Class

Commodity	Commodity Title	Definition	Synonyms
43202201	Telephone piece parts	Miscellaneous component pieces used to construct a telephone	
43202202	Telephone ring generators	A generator which is a primary source of telephone ringing current, the output of which is employed to operate telephone ringers.	
43202204	External ringer or its parts	This commodity refers to the ringers used externally with pay phones or regular analog phones for amplifying sound to an audible level in an indoor or outdoor environment.	
43202205	Keycaps or keytops or keys	A pushbutton switches, any shape or design and marked with letter(s), numeral(s), or other characters.	
43202206	Storage drive or input device components	Components for building or repairing hard drives, floppy drives, etc.	
43202207	Head mount arms and assembly	It is used to hold the magnetic read write head and move it along the radius of the platter.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43202208	Lead assemblies	It is used to transfer the data from the head to the disk cache.	
43202209	Head stack assemblies	It is used to hold multiple heads to read a stack of platters.	
43202210	Crash stops	It is used to brake the movement of the arm.	
43202211	Platters or disks	It is the surface on which data is stored.	
43202212	Read write head assemblies	It is the device which performs the read write operations on the disk.	
43202213	Disc motor drives	It is used to rotate the disks at high speed.	
43202214	Comb assemblies	It is used to move the read write heads over the surface of the platters of a hard drive.	
43202215	Keyboard or mouse cable	A cable to connect or extend the connection of the mouse or the keyboard with the CPU of the computer.	
43202216	Printer connection cable	Cable to connect a printer to the CPU of a computer.	
43202217	Computer cable holder	A holder or clip used to bundle or group computer cables.	
43202218	Computer cable cover	A protective covering for computer cables to avoid breakage.	
43202219	Automotive heating ventilation air conditioning HVAC control head assembly	Automotive HVAC control assemblies	
43202220	Automotive heating ventilation air conditioning HVAC power module	Automotive HVAC power module	
43202221	Automotive heating ventilation air conditioning HVAC resistor assembly	Automotive HVAC resistor assemblies	
43202222	Computer cable	Cable with industry standard connection and termination configurations used to connect various peripherals, instruments and equipment to computers.

UNSPSC v16_0901

1/27/2014

Class 43211500 Computers

Commodity	Commodity Title	Definition	Synonyms
43211501	Computer servers	A computer which provides some service for other computers connected to it via a network. The most common example is a file server which has a local disk and services requests from remote clients to read and write files on that disk, often using Network File System (NFS) protocol or Netware on PCs.	
43211502	High end computer servers	A computer designed for the higher performance and scalability spectrum of available platforms in that period of time.	
43211503	Notebook computers	A notebook computer is a battery- or AC-powered personal computer generally smaller than a briefcase that can easily be transported and conveniently used in temporary spaces such as on airplanes, in libraries, temporary offices, and at meetings. A notebook computer, sometimes called a laptop computer, typically weighs less than 5 pounds and is 3 inches or less in thickness.	
43211504	Personal digital assistant PDAs or organizers	Personal digital assistant (PDA) is a term for any small mobile hand-held device that provides computing and information storage and retrieval capabilities for personal or business use, often for keeping schedule calendars and address book information handy. Input is through a combination of pen and character recognition software.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211505	Point of sale POS terminal	<p>A point-of-sale (POS) terminal is a computerized replacement for a cash register. Much more complex than the cash registers, the POS system can include the ability to record and track customer orders, process credit and debit cards, connect to other systems in a network, and manage inventory. Generally, a POS terminal has as its core a personal computer, which is provided with application-specific programs and I/O devices for the particular environment in which it will serve. A POS system for a restaurant, for example, is likely to have all menu items stored in a database. POS terminals are used in most industries that have a point of sale such as a service desk, including restaurants, lodging, entertainment, and museums. POS terminals are also Web-enabled, which makes remote training and operation possible, as well as inventory tracking across geographically-dispersed locations.</p>	
43211506	Thin client computers	<p>A 'thin client' is a network computer without a hard disk drive, whereas a typical PC computer includes a disk drive. In client/server applications, a client designed to be especially small so that the bulk of the data processing occurs on the server. Although the term 'thin client' usually refers to software, it is increasingly used for computers, such as network computers and Net PCs, that are designed to serve as the clients for client/server architectures. Thin client is a low-cost, centrally-managed computer devoid of CD-ROM players, diskette drives, and expansion slots.</p>	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211507	Desktop computers	A type of computer workstation intended for individual use that is faster and more capable than a personal computer. It is intended for business or professional use rather than home or recreational use. Workstations and applications designed for them are used by small engineering companies, architects, graphic designers, and any organization, department, or individual that requires a faster microprocessor, a large amount of random access memory (RAM), and special features such as high-speed graphics adapter
43211508	Personal computers	A small, relatively inexpensive general purpose computer designed for an individual user. Personal Computers are all are based on microprocessor technology that enables manufacturers to put an entire CPU on one chip. Businesses use personal computers for word processing, accounting, desktop publishing, and for running spreadsheet and database management applications. They are frequently attached to corporate networks. At home, the most popular uses for personal computers are for accessing the Internet and for playing games.
43211509	Tablet computers	A computer in the form of a tablet designed to mimic the use of a traditional clip board. Larger and more powerful than a PDA, input is predominantly by the use of a stylus, finger touch or voice recognition. Tablet Computers usually run a specialised Tablet Computer Operating System and frequently have integrated wireless connectivity features, which enable them to communicate with corporate networks as the user moves through the building. They may or may not have an integral keyboard.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211510	Mainframe console or dumb terminals	Standard ASCII or other protocol computer input/output device with a monitor, keyboard and communications capability to a computer system.	
43211511	Wearable computing devices	A wearable computer is a computer that is subsumed into the personal space of the user, controlled by the user, and has both operational and interactional constancy, i.e. is always on and always accessible. Most notably, it is a device that is always with the user, and into which the user can always enter commands and execute a set of such entered commands, and in which the user can do so while walking around or doing other activities (Mike K)	
43211512	Mainframe computers	Accessories to enhance the usability of computers.	
43211513	Ultra mobile personal computer	A hybrid device that is a cross between a PDA and Tablet computer. What makes the ultra mobile PC (UMPC) unique is that it relies on a full operating system like Windows or Linux instead of standard PDA operating systems like Palm and Pocket PC. The UMPC can be considered an additional tool for mobile computing instead of a PDA replacement. It was developed as a joint development exercise between Microsoft, Intel, and Samsung, among others.	
43211514	Computer kiosk	A structure that houses a computer terminal providing customized retail services.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211515	Computer workstation	A a high-end microcomputer designed for technical or scientific applications.It has sufficient RAM, storage capacity and processing speed to facilitate computation intensive design and technical analysis.They are optimized for the visualization and manipulation of different types of complex data such as 3D mechanical design, engineering simulation, animation and rendering of images, and mathematical plots. Consoles consist of a high resolution display, a keyboard and a mouse at a minimum, but also offer multiple displays, graphics tablets, 3D mice, etc.
43211516	Minicomputer	A computer that is smaller than medium-sized computer but larger than personal computer under the classification following the size and capability. The uses are found broadly in graphic, office processing, e-publishing and others.
43211517	Analog computer	A computer which does arithmetic operation by accepting the physical quantity (analog) that is changed on time.
43211518	Multi screen computer	A computer that has a main body with several monitors in a single system to simultaneously operate different application programs.
43211519	Electronic reader or E-reader	An e-reader or electronic reader is a device which is optimized for reading content, such as e-books, newspapers and documents. A standalone e-reader typically has wireless connectivity for downloading content and conducting other web-based tasks.
43211520	Barebone computer	A barebone computer is a partially built or unassembled computer containing basic components only with additional customer required components assumed to be added later

UNSPSC v16_0901

1/27/2014

Class 43211600 Computer accessories

Commodity	Commodity Title	Definition	Synonyms
43211601	Computer switch boxes	A docking station is a hardware frame and set of electrical connection interfaces that enable a notebook computer to effectively serve as a desktop computer. Allows the notebook to communicate with a local printer, storage or backup drives, network interface and has an expansion base for floppy and CD-ROM or DVD drives.	
43211602	Docking stations	A port replicator is similar to a docking station but does not include expansion slots. A port replicator is an attachment for a notebook computer that allows a printer, monitor, and keyboard to be simultaneously connected. The port replicator duplicates all of the notebook's ports, and may provide specific ports for joysticks and MIDI devices.	
43211603	Port replicators	Devices that enable one or more computer accessories, like printers to connect together and be switched on and off. Other examples are Keyboard video mouse (KVM) switch boxes, console switches, manual data switches and automatic data switches	
43211604	Peripheral switch boxes	An integrated circuit designed for high-speed data manipulations and used in audio, communications, image manipulation, and other data-acquisition and data-control applications.	
43211605	Signal processor upgrades	A package of hardware and software that adds multimedia capabilities to a computer. Typically a multimedia kit includes a CD-ROM or DVD player, a sound card, speakers, and a bundle of CD-ROMs.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211606	Multimedia kits	Computer speakers are multimedia speakers which are used to play sound recorded in digital format.	
43211607	Computer speakers	A device and program that translates encoded data into its original format. Reads encoded mpeg, wav files and data from live, playback, or still video or audio.	
43211608	Encoder decoder equipment	A device and program that translates encoded data into its original format. Reads encoded mpeg, wav files and data from live, playback, or still video or audio.	
43211609	Universal serial bus hubs or connectors		
43211610	Computer country or localization kits	Accessories used for localization purposes. These kits generally would consist of following parts: localized manuals and/or localized keyboards and/or country specific power cords etc	
43211611	Handheld PDA Starter Kits	Accessory Starter kits for Hand Held Personal Computers usually include items such as covers, connection cables, spare stylii and screen protectors.	
43211612	Computer accessory kits		
43211613	Computer or notebook stands		
43211614	Bluetooth universal serial bus USB adapter	An informatic device to synchronize data between compatible hardware with bluetooth technology, used above all with PDA, mobiles, PC or others.	
43211615	Notebook computer expansion dock	An add-on for notebook computers to deliver high-performance capabilities for multimedia applications, it increases the number of ports of the notebook computer to those of a normal computer (USB ports, printer or video ports etc)	
43211616	Personal digital assistant PDA holder	A holder to attach a PDA usually in the car but it could be used in an office too, enabling comfortable screen access.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211617	Universal serial bus USB extension cable	A device to lengthen the extension of the USB connector cable.	
43211618	Universal serial bus general packet radio service USB GPRS modem	A specialized modem that uses a terminal-like interface USB 2.0 and later to drive a packet oriented mobile data service available to users of the 2G cellular communication systems global system for mobile communications (GSM), as well as in the 3G systems.	
43211619	Notebook computer carrying case	Various padded or unpadded containers of various materials and configurations used to transport or store notebook computers	

Class

Commodity	Commodity Title	Definition	Synonyms
43211701	Bar code reader equipment	Devices that enable a computer to access data inputs from bar codes. Bar code equipment consists of a barcode reader,code interpreter which can be a hardware or software,barcode printer and verifiers .Bar code equipment are used for identifying commercial products or parts.	
43211702	Magnetic stripe readers and encoders	Magnetic card readers are designed to read the magnetic stripe data on credit cards, debit cards, drivers licenses, and I.D. cards with just a swipe and send the data to a PC. They require no software for their operation.The data sent to the PC will be the input for processing by a software which outputs the results.	
43211704	Currency recognition equipment	Currency verifiers are used to detect counterfeit bills, while tracking each bill. Optical scanning recognition, magnetic ink detection, and ultra-violet reading are among the most common methods for verifying the authenticity of currency, bank checks, travelers checks, credit cards, and other items of value.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211705	Game pads or joy sticks	A device consisting of a hand held stick that pivots about one end and transmits its angle in two dimensions to a computer. Joysticks are often used to control games, and usually have one or more push-buttons whose state can also be read by the computer. Most I/O interface cards for IBM PCs have a joystick (game control) port.
43211706	Keyboards	The keyboard is a primary text input device typically with the same key arrangement as the typewriter . The keyboards may contain standard function keys, customizable keys or special key arrangements for ergo-dynamic consideration or for ease of use for learning such as the Dvorak system.
43211707	Light stylus	A light stylus for computers is an input device used to write text or draw lines on a surface using light. Used for graphics applications, such as CAD/CAM, where the stylus is attached to an electronically-sensitive tablet.
43211708	Computer mouse or trackballs	A mouse or trackball consists of a metal or plastic housing or casing, a ball that sticks out of the bottom or top of the casing and ,when rolled, a sensor sends impulses to the computer that causes a mouse-responsive program to reposition a visible indicator or cursor on the display screen. One or more buttons is used to select actions. This tracking device can be cabled or send infared signals to the computer.
43211709	Pressure stylus	A stylus, aka 'pen' is an input device used to write text or draw lines by applying pressure to the input surface such as a tablet or digital display screen for a computer.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211710	Radio frequency identification devices	RFID (radio frequency identification) is a technology that incorporates the use of electromagnetic or electrostatic coupling in the radio frequency (RF) portion of the electromagnetic spectrum to uniquely identify an object, animal, or person. An RFID system consists of three components: an antenna and transceiver (often combined into one reader) and a transponder (the tag). RFID is sometimes called dedicated short range communication (DSRC).
43211711	Scanners	A scanner captures images of photographic prints, bar codes, posters, magazine pages, and similar sources for computer editing and display. Scanners come in hand-held, feed-in, and flatbed types and for scanning black-and-white only or color. Optical character recognition software allows scanned printed documents to be converted to electronic text without having to type them in at a keyboard.
43211712	Graphics tablets	Graphics tablets, also known as digitizers, are devices which are used to convert data in analog format into digital format.
43211713	Touch pads	A stationary pointing device used mainly on laptop computers. Touchpads provide a small, flat surface that you slide your finger over as an alternative to the mouse and works by sensing the user's finger movement and downward pressure. They were developed to provide a more natural or intuitive connection for the user than the mouse.
43211714	Biometric identification equipment	Devices that enable a computer to access data inputs that enable it to validate a user using visual frequencies.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211715	Portable data input terminals	Portable data terminals are small, lightweight data terminals designed for flexible, single-hand operation and built for unmatched durability. These terminals are ideal for a wide range of data tracking applications. These terminals can have the features like Small, lightweight contoured form factor which rests easily in the users hand, Configurable layout with multiple keyboards and display choices, High performance scan module with 180 degree rotation for aiming front, left or right, decodes standard range of 1D bar codes, Rechargeable battery option provides longer life for full-shift capabilities.
43211717	Optical character recognition systems	These optical Character Recognition systems are utilized to convert text from hard copy documents into electronic output.
43211718	Camera based vision systems for automated data collection	Camera based vision systems for automated data collection is a collection of hardware and software used for automated data capturing. The components which go into the systems are optical or laser scanners for scanning the objects, software and computers for recognition and storing the data. They find application in retail, commercial, manufacturing, transportation and logistics, and postal and parcel delivery industries and specialised fields like semi-conductor and fiber optic manufacture industries.
43211719	Voice microphones for computers	A device for converting sound waves into commands to operate the computers.
43211720	Point of sale payment terminal	Punch card readers are mechanical devices which are used to read punched cards and execute the instructions on the punched cards. They are the first input devices for computers before the keyboard came into existence.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211721	Punch card readers	These are kits containing swiping machines, carbon transfers, printers, etc., for credit and debit card processing at the point of sale (POS). They are often distributed by banks to retailers. These include the entire set of items, rather than just individual pieces. They commonly are bundled as a set.
43211722	Business card scanner	A device that automatically places contact information (both sides of a card) into the correct fields of an electronic address book. These scanners are portable and robust.
43211723	Electronic voting or vote-counting equipment	The equipment which electronically conducts voting card/e-data processing in the course of voting and vote-counting related works (e.g.) storage, analysis, transmission, print, etc.)
43211724	Computer peripheral kit	A collection of computer peripherals sold together. Commonly includes a mouse and keyboard but may include other combinations.
43211725	Compact disc or digital versatile disc CD/DVD cleaner	Wipes or equivalent cleaning products specifically designed for cleaning and maintaining CDs and DVDs
43211726	Digital pen	Electronic device that enables capture of handwritten notes and drawings and synchronization with PCs or notebook computers for storage.
43211727	Magnetic ink character recognition MICR device	A device used as a common document language by the commercial banking industry for interbank exchange of monetary data.
43211728	Smart card dummy terminal	A terminal which is capable of self-processing and displaying input/output information with a built-in microprocessor and RAM.
43211729	Optical mark reader	A device which can optically read scripts written by a pencil or a pen on a certain object including a card.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211730	Data acquisition system	An instrumentation system that may make analysis and control on computer for the data acquired from measuring instrument and the signal from sensor.	
43211731	Image analyzer	A comprehensive image analysis system that formulates the result by making quantitative analysis in input image and the structured image database with several experiment results in advance on software.	
43211732	Digital film reader	A device that scans the micro film and others taken with the optical camera and reads the screen image thereof.	

Class

Commodity	Commodity Title	Definition	Synonyms
43211801	Computer data input device covers	Covers that protect the computer or peripherals from environmental or user damage.	
43211802	Mouse pads	A mousepad is a small, portable surface that provides traction to allow a computer mouse ball to roll rather than glide and are typically made with a plastic or cloth surface and a thin rubber or plastic cushion.	
43211803	Key board skins	Key board skins are transparent ,flexible, spillproof, waterproof and dustproof covers for key boards.	
43211804	Keyboard drawers or shelves	This commodity allows the storage of the keyboard under the desk	
43211805	Service kits for storage devices	This service kit includes replacement parts of a storage device and may even contain necessary associated tools in the same package.	
43211806	Keyboard wrist rest	A device that is placed adjacent to the keyboard to support the wrists enabling less stressful typing.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211807	Mouse wrist rest	An article that is placed under the wrist when using a computer mouse to avoid pain due to prolonged use.	
----------	------------------	---	--

Class

43211900

Computer displays

Commodity	Commodity Title	Definition	Synonyms
43211901	Cathode ray tube CRT monitors	A cathode-ray tube and associated electronics connected to a computers video output. A monitor may be either monochrome (black and white) or colour (RGB). Colour monitors may show either digital colour (each of the red,green and blue signals may be either on or off, giving eight possible colours: black, white, red, green, blue, cyan,magenta and yellow) or analog colour (red, green and blue signals are continuously variable following any combination to be displayed). Digital monitors are sometimes known as TTL because the voltages on the red, green and blue inputs are compatible with TTL logic chips.	
43211902	Liquid crystal display LCD panels or monitors	Flat panel diaplays are Liquid Crystal Display monitors.They use liquid displays instead of Cathod Ray guns.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211903	Touch screen monitors	A touch screen can be CRT or LCD and is a computer display screen that is sensitive to human touch, allowing a user to interact with the computer by touching pictures or words on the screen. Touch screens are used with information kiosks, computer-based training devices, and systems designed to help individuals who have difficulty manipulating a mouse or keyboard. Touch screen technology can also be used as an alternative user interface with applications that normally require a mouse, such as a Web browser. Often this uses beams of infrared light that are projected across the screen surface. Interrupting the beams generates an electronic signal identifying the location of the screen. Software interprets the signal and performs the required operation.	
43211904	Plasma display panels PDP	A plasma display panel (PDP) is essentially a matrix of tiny fluorescent tubes. PDP s are relatively light weight and can be manufactured at a thickness of 3-4 inches. They also feature wide viewing angles and no susceptibility to magnetic fields	
43211905	Organic light emitting displays	An organic light emitting display (OLED) is an electronic device made by placing a series of organic thin films between two conductors. When electrical current is applied, a bright light is emitted.	
43211906	Character displays	Displays that can present only alpha numerical symbols. Generally, Character displays are used in POS (point of sale) products	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43211907	Head mounted displays	Head-mounted displays are used with virtual reality systems. An HMD can be a pair of goggles or a full helmet. In front of each eye is a tiny monitor. Because there are two monitors, images appear as three-dimensional. In addition, most HMDs include a head tracker so that the system can respond to head movements. For example, if you move your head left, the images in the monitors will change to make it seem as if you're actually looking at a different part of the virtual reality.	
43211908	Vacuum fluorescent display	A display device that emits a clear, high contrast image.	
43211909	Poly light emitting diode LED display	Emissive video image displays	
43211910	Display tilt mechanism		
43211911	Touchscreen glass	Significant business use	
43211912	Touchscreen film		
43211913	LCD active display	Active matrix display uses a grid of transistors and capacitors for improved image quality. Passive matrix depends on a non dynamic conductive grid to supply current, resulting in a lesser level of image quality.	
43211914	LCD passive display	Active matrix display uses a grid of transistors and capacitors for improved image quality. Passive matrix depends on a non dynamic conductive grid to supply current, resulting in a lesser level of image quality.	

Class

Commodity	Commodity Title	Definition	Synonyms
43212001	Computer display glare screens	A filter that reduces the amount of harmful glare for a computer.	
43212002	Monitor arms or stands	This is an a arm you can mount on a wall or put it on your desk. It is used to put your monitor on and move it	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43212003	Monitor components	Internal parts and pieces of monitors that are commercialized independently and used as spare parts for its repair.	
----------	--------------------	---	--

Class

Commodity	Commodity Title	Definition	Synonyms
43212101	Band printers	Band printers use an engraved band to print characters on to a sheet of paper.They can be used to print characters and not graphics.They are high speed printers which are mainly used for large greenbar reports, multi-part forms and printing labels.	
43212102	Dot matrix printers	A kind of printer with a vertical column of up to 48 small closely packed needles or pins each of which can be individually forced forwards to press an ink ribbon against the paper. The print head is repeatedly scanned across the page and different combinations of needles activated at each point.

UNSPSC v16_0901

1/27/2014

43212103	Dye sublimation printers	<p>Dye-Sub printers uses heat to melt wax away from a specially coated print ribbon similar to wax thermal printers, except that the heating array in the dye sublimation printer is much more precise and can heat the dyes in the transfer ribbon to one of 256 levels. Page-sized panels (8 1/2 x 11) on the ribbon consist of cyan, magenta and yellow dye. A thermal print head, consisting of thousands of heating elements, capable of precise temperature variations, moves across the transfer ribbon. Heat from the heating elements cause the color on the ribbon to vaporize and diffuse onto the surface of the specially coated paper. Precise temperature variations are responsible for the varying densities of color. The hotter the heating element, the more dye is vaporized and diffused onto the paper's surface. Dye sublimation printers are often identified with the ability to print continuous tone images. Although image quality is an advantage of dye sub printers, they are not as adept at rendering fine such lines as fonts</p>	
43212104	Inkjet printers	<p>A class of printer in which small ink droplets are sprayed electrostatically from a nozzle onto the paper. Ink-jet printers produce high-quality text and graphics.</p>	
43212105	Laser printers	<p>Uses the same technology as copy machines. A non-impact high-resolution printer which uses a rotating disk to reflect laser beams to forms an electrostatic image on an imaging [developer] drum. This attracts electrically charged toner (dry ink powder,generally a plastic heat-sensitive polymer) which is then transferred onto the paper and fused into it by heat. Laser printers produce very high quality text and graphics.</p>

1/27/2014

43212106	Line matrix printers	Contains a chain of characters or pins that print an entire line at one time. Line printers, also called daisy wheel printers, are used to print data line by line.They are faster than dotmatrix printers but produce low-quality print and can not print graphics.
43212107	Plotter printers	A plotter is a printer that interprets commands from a computer to make line drawings on paper. Unlike a regular printer, the plotter can draw continuous point-to-point lines directly from vector graphics files or commands. It uses one or more pens that can be raised, lowered and moved over the printing media to draw graphics or text.The heart of the plotter is the printer head assembly,consisting of a horizontal bar and, attached to it, the head assembly holding the pen in use. The pen can be positioned horizontally by moving the pen assembly along the bar.Vertical positioning is achieved by either moving the bar(stationary page plotter) or the paper (rolling page plotter).Combinations of horizontal and vertical movement are used to draw arbitrary lines and curves in a single action, in contrast to printers which usually scan horizontally across the page.
43212108	Thermal tape printers	An inexpensive printer that works by pushing heated pins against heat-sensitive paper. Thermal printers are widely used in calculators and fax machines.
43212109	Bag tag printer	Specialized Printer used by airlines, etc. to print tags for tracking and distribution on aircraft and ground handling units.
43212110	Multi function printers	A device that combines the facilities of a Printer with one or more of the following: Scanner, or FAX, or Photocopier
43212111	Airline ticket or boarding pass ATB printers	Specialized printer used to print airline tickets and boarding passes

43212112	Point of sale POS receipt printers	The Commodity shall be used as Printer at Point of sale in Restaurants, Retail shops for printing High Quality Receipts	
43212113	Compact disc CD or labeling printers	The commodity is used to print text, color graphics and photos on printable surface areas of CD/CD-R/DVD/DVD-R	
43212114	Digital image printers	This is a type of printer which prints digital images without the use of computers. This printer unit has slot where the storage disks can be inserted and the prints can be taken. It incorporates a number of enhancements for improved digital creation, speed, performance and image quality	
43212115	Bar code printer	A computer peripheral for printing barcode labels or tags that can be attached to physical objects.	
43212116	Radio frequency identification RFID tag printer	A tag printer in which data are encoded in the RFID chip and the information is printed in a rolled RFID tag.	
43212117	Printer controller	A type of device that undertakes the role to control input/output and motion of the printer by assisting the central processing unit as located in between the computer and the printer.

UNSPSC v16_0901

1/27/2014

43221501	Automated attendant systems	A device which answers callers with a digital recording and allows caller to route themselves to an extension through touch tone input in response to a voice prompt. Example: "If you know the extension of your party, enter it nowà"
43221502	Automatic call distributor ACD	A feature on a PBX or Centrex, or as a stand alone unit on user premises to distribute large amounts of incoming calls to a group of attendants or agents on a controlled and managed basis. A device that allows the testing of different numbers of agents and trunks
43221503	Telecom announcers	A device that enables a call management system to place a series of announcements so that users will hear specific announcements, such as date-and time-specific messages. A digital recorder that stores audio messages for answer only applications.
43221504	Premise branch exchange PBX systems	A private telephone branch exchange switch used by medium and large companies. The switch is connected to the local public telephone network and performs in house routing and switching. central switching office.
43221505	Standalone telephone caller identification	A device that allows subscribers to view the phone number and/or name of the calling party before answering the phone
43221506	Teleconferencing console	A device permitting more than two people to be linked by telecommunications through a conference bridge
43221507	Autodialers	Electronic machine that is programmed with telephone numbers that can be dialed sequentially until a voice is detected. A device which allows the user to dial pre-programmed telephone numbers by pushing one or two buttons.

UNSPSC v16_0901

1/27/2014

43221508	Telephone busy lamp fields	An attendant console peripheral that enables an attendant to track the status of all stations from a lighted panel or series of lamps. A device with rows of tiny lights that show which phones in a telephone system have conversations on them, which phones are ringing and which phones are on hold. Each light corresponds to a telephone extension on the system.
43221509	Telephone call accounting systems	A complete system usually consisting of a computer, a magnetic storage device (floppy or hard disk), software and some mechanical method of attaching itself to a telephone system. The process of accumulating data on individual calls or of reporting that data.
43221510	Telephone call diverter or forwarder	An ancillary device which is connected to a telephone line. The device will, when the called telephone rings, initiate a telephone call on another line to a different telephone number. A device that intercepts calls to a number and connects them to an operator or prerecorded message, or will initiate or re-direct a telephone call to a different telephone number
43221513	Telephone call sequencers	A piece of equipment which attaches to a key system or a PBX to direct incoming calls to the next available person to answer that phone.
43221514	Telephone dial backup units	Units that provide redundant telephone dial systems. A device that allows automatic and/or manual switched backup in the event of a dedicated line failure.
43221515	Telephone line sharing devices	Device that enables a single telephone line to be shared by more than one phone.
43221516	Telephone line status monitors	Device which provides a visual indication on an ECTS telephone of the idle, busy, ringing or held state for each line appearing on the telephone.

UNSPSC v16_0901

1/27/2014

43221517	Telephony equipment service observing units	A device that enables supervisors to monitor and communicate silently to customer service staff or telemarketing representatives without disrupting the activity.
43221518	Telephony equipment toll restrictors	Equipment inserted in an outgoing dial trunk that restricts calls to forbidden or unauthorized codes.
43221519	Voice mail systems	An automatic answering service with the ability to record and replay messages. Unlike simple answering machines, voice mail uses a programmable computer system with options such as temporary call routing, monitoring, and reporting. Refers to e-mail or mobile network systems that support audio. Users can leave spoken messages or listen to messages by executing commands in the e-mail system.
43221520	Interactive voice recognition equipment	This platform is a Telecommunications Network Component that is capable of setting up a voice dialog with a subscriber of the Telecommunication Network involved and to direct the subscriber to a requested service.
43221521	Telecommunications remote access unit	A piece of computer hardware allowing a user outside the PBX to access the PBX by dialing it over a normal phone line.
43221522	Teleconference equipment	Equipment used in hosting and serving teleconferencing capabilities through a conference bridge..
43221523	Music or message on hold player	An audio storage device used with a telephone system to play music or recorded messages to callers on hold.
43221524	Music on hold adapter	An interface adapter that allows the player to connect to a phone or phone system that does not have a music on hold connector.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43221525	Intercom systems	Equipment used for communicating voice messages using a dedicated infrastructure. An internal communication system which allows the user to dial another phone within the building	
43221526	Telephone entry systems	The commodity is used for Telephones to answer your door from any phone in your home. A push of the doorbell sends a distinctive ring to the existing phones, letting you know someone has arrived at the door. The Telephone Entry System includes relays for automatic unlocking and whole house paging to create a complete integrated access control system.	
43221527	Wire tapping protector	A type of device that is installed to prevent any act of attempt to obtain the information illegally by connecting to the communication line directly and indirectly or sense the wireless frequency.	
43221528	Supervisory signal unit	A device to monitor the motion of switchboard by mount on the console of the switching system.	
43221529	Call meter	A device to record the number of phone calls by the telephone subscribers.	
43221530	Switch board signal device	A device to generate various signal required for switch board, such as call signal, dial tone, ringing tone, calling tone and others for ringing a bell.

43221603	Digital subscriber loop DSL customer premise equipment CPE plain old telephone system POTS splitter	It is a Digital Subscriber Loop device to utilize DSL technology for voice and data use from the same POTS line	
43221604	Digital subscriber loop or line XDSL equipment	High transmission speed equipment involved in handling all types of digital subscriber lines, the two main categories being ADSL and SDSL. Two other types of xDSL technologies are High-data-rate DSL (HDSL) and Very high DSL (VDSL). Transmission speeds can be up to 32 Mbps for upstream traffic, and from 32 Kbps to over 1 Mbps for downstream traffic.	

Class

Commodity	Commodity Title	Definition	Synonyms
43221701	Television core equipment	Television core equipment manage signals in the VHF,UHF or VHF/UHF range.	
43221702	Television access equipment	Television access equipment receive and transmit signals in the VHF,UHF or VHF/UHF range.	
43221703	Television antennas	An antenna is a specialized transducer that converts radio-frequency (RF) fields into alternating current (AC) or vice-versa, in this case for transmitting television frequencies. There are two basic types: the receiving antenna, which intercepts RF energy and delivers AC to electronic equipment, and the transmitting antenna, which is fed with AC from electronic equipment and generates an RF field. Television antennas are directional antennas and receive signals in the VHF,UHF or VHF/UHF range.	
43221704	Radio core equipment	Radio core equipment manage signals in the VHF,UHF or VHF/UHF range.	
43221705	Radio access equipment	Radio access equipment receive and transmit signals in the VHF,UHF or VHF/UHF range.

1/27/2014

43221706	Radio antennas	An antenna is a specialized transducer that converts radio-frequency (RF) fields into alternating current (AC) or vice-versa, in this case for transmitting radio frequencies. There are two basic types: the receiving antenna, which intercepts RF energy and delivers AC to electronic equipment, and the transmitting antenna, which is fed with AC from electronic equipment and generates an RF field	
43221707	Microwave core equipment	Microwave core equipment manage signals in the VHF,UHF or VHF/UHF range.	
43221708	Microwave access equipment	Microwave access equipment receive and transmit signals in the VHF,UHF or VHF/UHF range.	
43221709	Microwave antennas	An antenna is a specialized transducer that converts radio-frequency (RF) fields into alternating current (AC) or vice-versa, in this case for transmitting microwave, or high end frequencies. There are two basic types: the receiving antenna, which intercepts RF energy and delivers AC to electronic equipment, and the transmitting antenna, which is fed with AC from electronic equipment and generates an RF field. Microwave antennas offer point to point and point to multipoint microwave communication which operate in the UHF,EHF and SHF frequency bands.	
43221710	Satellite core equipment	Satellite core equipment manage signals in the VHF,UHF or VHF/UHF range.	
43221711	Satellite access equipment	Satellite access equipment receive and transmit signals in the VHF,UHF or VHF/UHF range.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43221712	Satellite antennas	An antenna is a specialized transducer that converts radio-frequency (RF) fields into alternating current (AC) or vice-versa, in this case for transmitting radar or low end RF frequencies. There are two basic types: the receiving antenna, which intercepts RF energy and delivers AC to electronic equipment, and the transmitting antenna, which is fed with AC from electronic equipment and generates an RF field./ Satellite antennas are used on the ground to transmit Signals to the satellite and to receive Signals from the satellite.
43221713	Shortwave core equipment	Shortwave core equipment manage signals in the VHF,UHF or VHF/UHF range.
43221714	Shortwave access equipment	Shortwave access equipment receive and transmit signals in the VHF,UHF or VHF/UHF range.
43221715	Shortwave antennas	An shortwave antenna is a specialized transducer that converts radio-frequency (RF) fields into alternating current (AC) or vice-versa, in this case for transmitting shortwave RF frequencies.
43221716	Pager core equipment	Pager core equipment manage signals in the VHF,UHF or VHF/UHF range.
43221717	Pager access equipment	Pager access equipment receive and transmit signals in the VHF,UHF or VHF/UHF range.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43221718	Radar antennas	An antenna is a specialized transducer that converts radio-frequency (RF) fields into alternating current (AC) or vice-versa, in this case for transmitting radar or low end RF frequencies. There are two basic types: the receiving antenna, which intercepts RF energy and delivers AC to electronic equipment, and the transmitting antenna, which is fed with AC from electronic equipment and generates an RF field. Radar antennas operate in the UHF part of the radio frequency spectrum and is used to detect the position and/or movement of objects.	
43221719	Aircraft antennas	Sends or receives aircraft signals.	
43221720	Automotive antennas	Automotive antennas are also called power antennas as they automatically rise when the radio is turned on and lower when it is shut off. Some cars had the antenna wires imbedded in the windshield.	
43221721	Radio frequency data communication equipment	Radio frequency data communication equipment use radio frequency to carry data between the devices in a communication network which are the data communication equipment(DCE) and data terminal equipment(DTE).	
43221722	Global positioning system GPS antenna		
43221723	Cellular antenna		
43221724	Time synchronized generator	Equipment which uses the 1PPS --1 Pulse Per Second-- received from Global Positioning System that it is the equipment supplying the precise time and frequency synchronized with the global standard time.	
43221725	Signal divider	A device that distributes the radio frequency signal, such as television signal, frequency modulation signal and others equally within the antenna.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43221726	Reflector for antenna	A conductor bar or conductor plate that has shape of bar-type, net-type, flat-type, or paraboloid surface. It is used in the event of reaching farther distance or increasing the sensitivity of reception input by intensifying the energy that is to be radiated from the antenna to the relative direction.	
43221727	Antenna accessory	An accessory that is installed to attach or manage the antenna.	
43221728	Radome or radar dome	A device that surrounds the antenna to protect the antenna from the climate while enabling the wireless frequency energy to pass through it as much as possible.	
43221729	Portable antenna	An antenna that is made for easy to carry.	
43221730	Wired telecommunications transmitter	A type of device that delivers or receives the information to the desired area by using the wire communication line. Wireless transmitter or receiver that uses the wireless frequency is excluded.	
43221731	Underwater communication system	A complete set of communication equipments specially manufactured to enable the two-way communication under water.	
43221732	Speaker control unit	A device to select or control the speaker located in an area to send to the group or region to be conveyed of broadcasting contents.	
43221733	Remote automatic meter reading system	A system that undertakes automatically from remote distance for the meter inspection on electricity, water, gas, hot water, heat meter and others within each individual home or business unit by using the Public Switched Telephone Network PSTN, wireless frequency, power line and others.

UNSPSC v16_0901

1/27/2014

43221801	Optical amplifiers	An optical or IR repeater that amplifies a modulated laser beam directly, without opto-electronic and electro-optical conversion	
43221802	Optical network or communication filters	A component that enables increasing or targeting the optical signal as it travels between destinations. Optical devices use to transmit a select range of light frequency, or to separate ranges of light frequencies in optical communication circuits	
43221803	Optical adapters	Adapters that enable very high-speed data communication between servers and downstream network devices like switches and routers	
43221804	Optical networking lasers	A device which produces a single frequency light. It transmits optical pulses of light that creates the transmission of the voice and data packets through fiber. The laser generation portion of the optical networking components making up the transmission unit.	
43221805	Asynchronous transfer mode ATM network equipment	Equipment designed to deliver long haul internet traffic over the AMT.	
43221806	Synchronous optical network SONET network equipment	Equipment designed to deliver long haul internet traffic over the SONET.	
43221807	Telecommunications dense wavelength division multiplexing DWDM filters	A filter used in conjunction with Dense Wavelength Division Multiplexing	
43221808	Synchronous digital hierarchy SDH telecom equipment	Equipment that enables synchronous digital hierarchy (SDH) and synchronous optical network (SONET) refer to a group of fiber-optic transmission rates that can transport digital signals with different capacities.	
43221809	Optical transmitter	A type of device that uses the optical signal to deliver information to the desired area.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43221810	Optical multiplexer	A type of device that converts and transmits the electric signal, such as multiplexing and demultiplexing for return signal of optical communication, detection of synchronizing signal, generation of synchronization clock, photoelectric transformation and others into optical transmission signal.	
43221811	Optical switch	A type of device that is designed to switch the optical path by inserted in the optical fiber.	

Class

Commodity	Commodity Title	Definition	Synonyms
43222501	Firewall network security equipment	Provides a buffer between any connected public networks and a private network. A firewall router uses access lists and other methods to ensure the security of the private network.	
43222502	VPN network security equipment	Equipment that enable virtual private networks (VPNs) to use advanced encryption and tunneling to permit organizations to establish secure, end-to-end, private network connections over third-party networks, such as the Internet or extranets.	
43222503	Vulnerability Assessment Security Equipment		
43222504	Radio jamming transmitter	A transmission device that interferes to mix with the different frequency without the purpose of reception when certain frequency is received.	

Class

Commodity	Commodity Title	Definition	Synonyms
43222602	Cable head end equipment	A cable head-end is the facility at a local cable TV office that originates and communicates cable TV services and cable modem services to subscribers. In distributing cable television services, the head-end includes a satellite dish antenna for receiving incoming programming.

UNSPSC v16_0901

1/27/2014

43222604	Content delivery networking equipment	Content caching networking solutions take advantage of IP infrastructure to provide enhanced scalability and help ensure high levels of content availability and security while enabling faster Web responses. Content networking equipment guarantees efficient delivery of high-bandwidth files, and decrease network congestion.
43222605	Network gateway	In the IP community, an older term referring to a routing device. Today, the term router is used to describe nodes that perform this function, and gateway refers to a special-purpose device that performs an application-layer conversion of information from one protocol stack to another. Devices that perform application layer conversion from one protocol stack to another and devices used to connect voice-over-Internet Protocol (VoIP) and dial access solutions to the Public Switched Telephone Network (PSTN).
43222606	Internet service node startup kits	A bundle of equipment and documentation to provide a user the ability to get their network up and running.
43222607	Cache engine equipment	A network device designed to store copies of Internet pages in flash memory.
43222608	Network repeaters	Device that regenerates and propagates electrical signals between two network segments - section of a network that is bounded by bridges, routers, or switches

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43222609	Network routers	Network layer device that uses one or more metrics to determine the optimal path along which network traffic should be forwarded. Routers forward packets from one network to another based upon network layer information. Also known as a bridge. A network device that forwards packets to their destinations along an optimal path that is determined by using Layer 3 information.
43222610	Network service concentrators or hubs	Hardware device that contains multiple independent but connected modules of network and internetwork equipment. Can be active (where they repeat signals sent through them) or passive (where they do not repeat, but merely split, signals sent through them). In Ethernet and IEEE 802.3, an Ethernet multiport repeater. Can be synonymous to a hub.
43222611	Network channel or data service units	A CSU or DSU (Channel Service Unit or Data Service Unit) these are hardware devices about the size of an external modem that converts a digital data frame from the communications technology used on a local area network (LAN) into a frame appropriate to a wide-area network (WAN) and vice versa. Equipment used to connect a digital phone line (T-1 or Switched 56 line) coming in from the phone company to either a multiplexer, channel bank or directly to another device producing a digital signal.
43222612	Network switches	Network device that filters, forwards, and floods frames based on the destination address of each frame. The switch operates at the data link layer of the OSI model.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43222615	Storage area network SAN switch	A storage area network (SAN) is a high-speed special-purpose network (or subnetwork) that interconnects different kinds of data storage devices with associated data servers on behalf of a larger network of users. Typically, a storage area network is part of the overall network of computing resources for an enterprise. A storage area network is usually clustered in close proximity to other computing resources but may also extend to remote locations for backup and archival storage, using wide area network carrier technologies. SANs support disk mirroring, backup and restore, archival and retrieval of archived data, data migration from one storage device to another, and the sharing of data among different servers in a network. SANs can incorporate subnetworks with network-attached storage (NAS) systems	
43222619	Video networking equipment	Video networking equipment provides a powerful, high-performance video head-end solution that receives audio and video streams from any satellite, terrestrial, or wireless source.	
43222620	Multiservice switch	A switch that provides multiple capabilities. For example, an IP+ATM multiservice switch provides advanced IP and ATM capabilities, and a multiservice WAN switch supports WAN data, voice, and video applications	
43222621	Content switch	Content switch intelligently switches and balances traffic load across multiple servers	
43222622	Server load balancer	Provides balance between the multiple input requests to two or more servers to balance the load and maintain maximum system response time to the user.	
43222623	Digital cross connects DCX equipment	Connects synchronous ports at all switching levels - includes DACS in the US.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43222624	Optical cross connects equipment	Fitted to network hardware to perform cross connections between all kinds of pleiochronous and synchronous port at all switching levels	
43222625	Access servers	Communications processor that connects asynchronous devices to a LAN or WAN through network and terminal emulation software. Performs both synchronous and asynchronous routing of supported protocols. Sometimes called a network access server.	
43222626	Cable modems	A cable modem is a device that enables you to hook up your PC to a local cable TV line and receive data at about 1.5 Mbps	
43222627	Integrated services digital network ISDN access devices	A client device providing ISDN digital transmission over ordinary telephone copper wire as well as over other media. ISDN requires adapters at both ends of the transmission so your access provider also needs an ISDN adapter. Equipment used to adapt Integrated Services Digital Network (ISDN) Basic Rate Interface (BRI) channels to existing terminal equipment standards such as EIA-232 and V.35. A Terminal Adaptor is typically packaged like a modem, either as a stand-alone unit or as an interface card that plugs into a computer or other communications equipment (such as a router or PBX).A Terminal Adaptor does not interoperate with a modem; it replaces it.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43222628	Modems	A modem modulates outgoing digital signals from a computer or other digital device to analog signals for a conventional copper twisted pair telephone line and demodulates the incoming analog signal and converts it to a digital signal for the digital device. An electronic device for converting between serial data from a computer and an audio signal suitable for transmission over telephone lines. In one scheme the audio signal is composed of silence (no data) or one of two frequencies representing 0 and 1.
43222629	Modem banks	Modem banks are a set of modems through which a connection to a network resource can be established through a Point to point protocol(PPP) especially by computers which are not physically connected to a network. A bundle of modems combined together for consolidated management.
43222630	Multistation access units	In a Token Ring network, a device to attach multiple network stations in a star topology, internally wired to connect the stations into a logical ring. The MAU contains relays to short out nonoperating stations. Multiple MAUs can be connected into a larger ring through their Ring In/Ring Outconnectors.

UNSPSC v16_0901

1/27/2014

43222631	Wireless fidelity base stations Wifi	The base station, with an Ethernet RJ-45 port, can be connected to the Internet via digital subscriber line (DSL) or cable modem. This commodity includes a base station that connects a wireless system to a wired land-based system. Wireless access points are connected to an Ethernet hub or server and transmit a radio frequency over an area of several hundred to a thousand feet which can penetrate walls and other non-metal barriers. The central radio transmitter/receiver that maintains communications with mobile radiotelephone sets within a wireless cell. 802.11, or IEEE 092.11, is a type of radio technology used for wireless local area networks (WLANS). Wi-Fi, 802.11 is composed of several standards operating in different radio frequencies.	
43222632	Broadband aggregators	A high-performance, scalable service gateway that enables the selection and delivery of broadband network services, virtual private networks (VPNs), and voice- and entertainment-driven traffic over the full suite of access media	
43222633	Remote management adapters	Remote management adapters are installed in personal computers or various network devices and allow management of PC or network devices remotely through computer network.	
43222634	Network management or monitoring device	Devices that allow to manage and/or monitor devices in a network or perform analysis of network status.	
43222635	Network equipment upgrade kit	A set of components/modules/software for a network device intended for the device functionality upgrade.	
43222636	Network application engine	Application engines are network appliances designed for providing customers with high-performance access to applications, storage, and content.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43222637	Gigabyte passive optical network GPON	A network technology based on passive optical nets (PON). It makes possible data transfer rates of up to 2.5 gigabytes in both directions: downstream and upstream.	
43222638	Managed lease line network MLLN equipment	The MLLN is an integrated, fully managed, multi-service digital network platform through which service provider can offer a wide range of services at an optimal cost to business subscribers.	
43222639	Internet protocol IP multimedia subsystem hardware	Hardware concerning IMS which is an integrated network for telecommunications carriers that uses the IP protocol as its foundation for packetized voice, video and data. The IP Multimedia Subsystem (IMS) is designed to interface with the PSTN and provide traditional telephony services such as 800 numbers, caller ID and local number portability.	
43222640	Wireless access point	A device enabling two-way service of wireless data by connecting wired and wireless networks, which helps a user use high-speed internet and intranet services.	
43222641	Internet protocol sharing device	A device used to make it possible for computers to use internet at the same time by using one IP or Internet Protocol	
43222642	Routing switcher	A device which sends the signal for multi channel to multi-channel and multi-channel to single channel for the multi-relay of broadcasting and communication.	
43222643	Cable network tester	A testing device that is manufactured for the inspection of functions or properties of the electric cable for power transmission or communication.

UNSPSC v16_0901

1/27/2014

43222644	Network traffic controller	Equipment that supports the limited resources to efficiently use by applying the data compression, traffic and bandwidth management technology from the network communication.	
----------	----------------------------	--	--

Class

Commodity	Commodity Title	Definition	Synonyms
43222701	Telegraph keys	A component of a telegraph system that originally consisted of two pieces of brass or copper which could be pressed together to complete the electrical circuit or allowed to spring apart using their natural "springiness" to break the circuit. As people developed the need to send messages more rapidly, the designs of keys changed and the evolution of these different designs of telegraph keys is the focus of my telegraph museum exhibits.	
43222702	Telegraph electromagnets	A component of a telegraph system that consisted of a coil of from 50 to several hundred turns of insulated wire wrapped around an iron core. It pulled on a piece of iron whenever an electric current was passed through it. These devices first caused marks to be made on a paper tape and then, when it was discovered that people could decipher the noises that they made by ear, they developed into the electromagnetically operated "sounders" used from the 1850s to the 1950s	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43222703	Telegraph sounders	A component of a telegraph system that could recognize the different sounds made by the register as dots and dashes. This device used an electromagnet to pull on a piece of iron and make a clicking sound. When the electromagnet pulled on the iron, it made a more solid and heavy sounding click and when it released the iron, it made a thinner and lighter sounding click. Operators learned to discriminate between these two sounds and to use this ability to tell whether they were hearing a dot or a dash.	
43222704	Telegraph switch board	The principle is the same as the general switch board, but it is designed to possess the unique service function for operating the telegraphic circuit.	

Class

43222800	Telephony equipment
----------	---------------------

Commodity	Commodity Title	Definition	Synonyms
43222801	Broadband or narrowband digital cross connect DCX equipment	Equipment used in a specialized type of high-speed data channel switch, that can accept specific line connect instructions that are independent of any calls that may flow over the system. These commands may be automate or manually input. Cross Connect equipment specific to Broadband, or Wideband.	
43222802	Circuit switchboard equipment	Mechanical, electrical, or electronic equipment which opens or closes telephone circuits, completes or breaks an electrical path, or selects paths or circuits within the telephone system.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43222803	Digital loop carrier DLCs	<p>Digital loop carrier (DLC) is equipment that bundles a number of individual phone line signals into a single multiplexed digital signal for local traffic between a telephone company central office and a business complex or other outlying service area. Typically, up to 24 analog voice calls are combined into a single signal and transmitted over a single copper T-carrier system or E-carrier line, an optical fiber cable, or a wireless connection. In a home, business, or other installation using digital loop carrier, the analog phone lines of individual users are connected to a local DLC box which then converts the analog signals into digital and combines (multiplexes) them into one signal that it sent to the phone company's central office on the single line. At the central office, the combined signal is separated back into the original signals. An estimated 20% of today's telephone users are being served by digital loop carriers.</p>	
43222805	Private branch exchange PBX equipment	<p>A PBX (private branch exchange) is a telephone system within an enterprise that switches calls between enterprise users on local lines while allowing all users to share a certain number of external phone lines. The main purpose of a PBX is to save the cost of requiring a line for each user to the telephone company's central office. The PBX is owned and operated by the enterprise rather than the telephone company (which may be a supplier or service provider, however). Private branch exchanges used analog technology originally. Today, PBXs use digital technology (digital signals are converted to analog for outside calls on the local loop using plain old telephone service).</p>

1/27/2014

43222806	Punch down blocks	<p>A teleconference is a telephone meeting among two or more participants involving technology more sophisticated than a simple two-way phone connection. At its simplest, a teleconference can be an audio conference with one or both ends of the conference sharing a speaker phone. With considerably more equipment and special arrangements, a teleconference can be a conference, called a videoconference, in which the participants can see still or motion video images of each other. Because of the high bandwidth of video and the opportunity for larger and multiple display screens, a videoconference requires special telecommunication arrangements and a special room at each end. As equipment and high-bandwidth cabling become more commonplace, it's possible that videoconferences can be held from your own computer or even in a mobile setting. Today's audio teleconferences are sometimes arranged over dial-up phone lines using bridging services that provide the necessary equipment for the call.</p>	
43222811	Telephony equipment alarm units	<p>A system that provides remote alarm to monitor telephony network capabilities, such as ones used to monitor air pressure cable systems.</p>	
43222813	Telephone switchboard part kits	<p>A kit containing of a collection of switchboard weights, dial mountings, switchboard lamp covers, switchboard plugs, switchboards cords and like used with telephone switchboard.</p>	
43222814	Telecommunication equipment installation or modification kits	<p>A collection of items as mounting hardware, racks, workbenches, adapter cables, interconnect cables and electrical/electronic ancillary equipment (adapting facilities, interface equipment), as are required for installation, mounting and operation of telephone or telegraph equipment</p>

43222815	Telecommunication terminal units	Telecommunication terminal units or EGIS - Secure Digital Voice Terminal: A Secure Digital Voice Terminal (SDVT) is a four-wire non-secure/secure telephone set that transmits and receives digital voice and loop signaling information at 16 or 32 kb/s rates. The SDVT is a secure telephone that has embedded exportable encryption module capability that supports non-secure and secure (non-encrypted/encrypted) operations for telephony applications	
43222816	Telephony keyers	Telephony keyers or EGIS - Keyer: An item that by electrical, electronic, and/or mechanical means automatically opens and closes a control circuit or circuits of another item in a predetermined manner. Excludes KEYER:FREQUENCY SHIFT and MODULATOR:RADIO TRANSMITTER for telephony applications	
43222817	Telecommunication repeaters	This commodity refers to receive, to amplify through current induction, and to retransmit automatically, a coded signal at an intermediate point in a long line.	
43222818	Telephone distributing terminal frame	A mounting frame which has one or more fanning type terminal boards and is the terminating point for telephone lines.	
43222819	Port connection panels	A panel with many ports, used when more computers or peripheral devices have to be connected.	
43222820	Voice echo cancellers	Electronic equipment which is bolted onto a switched network to eliminate voice echo.

43222822	Time division multiplexer TDM	A device that uses time-division multiplexing (TDM). This is a method of putting multiple data streams in a single signal by separating the signal into many segments, each having a very short duration. Each individual data stream is reassembled at the receiving end based on the timing. Optical technology and equipment which manages data frames in a series of time slots
43222823	Wave division multiplexer WDM	WDM (wavelength division multiplexing), in which several baseband-modulated channels are transmitted along a single fiber but with each channel located at a different wavelength. Each of N different wavelength lasers is operating at the slower Gbps speeds, but the aggregate system is transmitting at N times the individual laser speed, providing a significant capacity enhancement. The WDM channels are separated in wavelength to avoid cross-talk when they are (de)multiplexed by a non-ideal optical fiber. The wavelengths can be individually routed through a network or individually recovered by wavelength-selective components. WDM allows us to use much of the fiber bandwidth, although various device, system, and network issues will limit the utilization of the full fiber bandwidth. Note that each WDM channel may contain a set of even slower time-multiplexed channels. (Definition - http://www.rad.com/)
43222824	Aerial cable rollers	Aerial cable roller is a cylindrical hardware fitted at the base of the cable puller, used for pulling the aerial cable without damaging it.
43222825	Telephone modification kits	An item or items employed to modify telephone equipment.

UNSPSC v16_0901

1/27/2014

43223205	Instant messaging platform	This platform is a Telecommunications Network Component that is capable of managing the presence 'awareness' of a user. It basically shows if the user is online, offline, away, in a call etc.
43223206	Wireless internet gateway	WAP Gateway (Wireless application protocol); this platform ia a Telecommuncations Network Component that is capable of sending and receiving data in WAP format to Mobile devices that make use of the WAP bearer.
43223207	Video streaming system	This platform is a combination of a Telecommunications Network Component and an IT Network Component capable of sending a video in parts to a user where the user is able to start viewing the video before the complete video data is downloaded. The video data can be retrieved and stored by the subscriber of the Telecommunication Network involved.
43223208	Mobile or messaging game platform	A combination of Telecommunications Network - and IT Network components that is capable of providing entertainment applications to subscribers (Bundle of HW,SW, Service)
43223209	Location based messaging service platforms	A special platform which enables an operator to locate subscriber by mobile internal data and offer a special content for this region (e.g. Events in the city, cinema, etc.); bundle of HW, SW, Service
43223210	Micropayment messaging systems	A special platform that enables subscribers to e- commerce transactions of very low value (Bundle of HW, SW, Service)
43223211	Paging controllers	Provide voice-paging connection between a telephone system and one zone paging/background music system. It also interfaces a PBX system or with a key system using central office line position.

Class 43223300 Datacom and network connectivity installation devices and equipment

Commodity	Commodity Title	Definition	Synonyms
43223301	Datacom cross connect system and accessories		
43223302	Datacom label		
43223303	Datacom patch cord		
43223305	Network cable management panel assembly		
43223306	Network system cabinet or enclosure		
43223307	Network system cabling box		
43223308	Network system equipment rack		
43223309	Patch panel		
43223310	Fiber optic connector	The terminal of a fiber strand that is used to connect it to another strand of fiber.	
43223311	Fiber optic attenuator	Device that reduces signal power in fiber optic links by inducing a fixed or variable loss. It is used to control the power level of optical signals at the outputs of light sources and electrical-to-optical converters.	
43223312	Fiber optic cable stripper	Device to safely and efficiently remove the outside jacket from optical fiber cables.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43223313	Fiber optic crimper	Mechanical tool used to reduce fiber optical connections and insure connectivity.
43223314	Fiber optic polishing fixture	A fixture for holding fiber optic ferrules to enable polishing of the optical fiber ends.
43223315	Fiber optic tool blade set	A set of blades used for the stripping and conforming of a fiber optic strand.
43223316	Fiber optic scribe	A tool used to scribe a fiber optic strand so it can be manipulated.
43223317	Fiber optic buffer remover	A tool used to remove the protective coating from fiber optic strands.
43223318	Fiber optic emitter	A fiber optic connector that emits the optical beam to the next connection.
43223319	Fiber optic detector	A fiber optic connector that detects the optical beam from the previous connection.
43223320	Fiber optic continuity tester	A tool that confirms the continuous condition of the optical element in a fiber optic strand.
43223321	Fiber optic connector clip	A fiber optic connector clippositions the fiber optic connectors so that the connectors can only be inserted into a corresponding number of receiving connectors in one way.
43223322	Fiber optic support grip	An device designed to reduce stress on fragile fiber optic cables in vertical or sloping runs.
43223323	Fiber optic adapter	Fiber optic cable to cable connector.
43223324	Fiber optic polishing film	A film used to enhance the quality of fiber optic connections in assemblies.
43223325	Fiber optic swab	A tool used for cleaning fiber optic connections.
43223326	Fiber optic patch cord	A cord used for linking the equipment and components in a fiber optic network.
43223327	Fiber optic fault locator	A hardware and software tool used to find breaks or faults in a fiber optic line.
43223328	Fiber optic patch panel	A wiring device used to terminate, protect and organize the fiber optic cables and optical fibers in fiber optic communication networks.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43223329	Fiber optic light source	A fiber optic test equipment to measure the fiber optic loss for all types of fiber optic cables.
43223330	Fiber optic connector assembly tool	A tool that performs multiple operations associated with the assembly of fiber optic cables.
43223331	Fiber optic insert	A dry component of a fiber optic cable that lies alongside the filament to protect it.
43223332	Fiber optic tool kit	A set of tools used for various connection and repair operations on fiber optic cables.
43223333	Fiber optic scope eyepiece	Eyepiece containing the lense and light for a fiber optic scope.
43223334	Fiber optic tool and die set	A collection of tools and dies used for fiber optic cable shaping and conditioning operations.
43223335	Fiber optic music wire	A length of piano or other type musical instrument wire used to save a fiber optic connector when the cable has broken inside the ferrule.
43223336	Fiber optic scope adapter	A portable fiber optical scope that can be attached to a camera or other electronic device.
43223337	Fiber optic enclosure	A specialized container used to organize fiber optic cables
43223338	Fiber optic connection closure	A commodity that is used for direct connection of the optical cables, divergence of the optical cables and protection of the connected parts.
43223339	Fiber optic distribution box	A type of device that is connected to the optical fiber cable, optical termination equipment or optical transmission device. And this device is structured with the optical adaptor board, distributor or optical fiber splice plate to enable the connection and switching between the systems and be equipped with optical attenuator.
43223340	Fiber optic fusion splicer	A machine that has the physical fusion splice for two disconnected part on the optical cable line.

UNSPSC v16_0901

1/27/2014

43223341	Combiner	A device that combines a multiple number of transmission signals to transmit in one transmission path without impedance change.	
43223342	Waveguide and connection kit	A metal pipe that has hollow middle part that conveys the electric signal or electric energy that has the frequency of microwave or higher, and it is the joint filler and related goods for connection.	
43223343	Network punchdown tool	A small hand tool used by telecommunications and network technicians to install or terminate wiring for telephone, data and audio networks.	

Family

43230000

Software

Class

43231500

Business function specific software

Commodity	Commodity Title	Definition	Synonyms
43231501	Helpdesk or call center software	Software to enable help desk and call center applications.	
43231503	Procurement software	Procurement software is used for managing contracts and agreements with suppliers, negotiating conditions, and buying products and services.	
43231505	Human resources software	Time accounting or human resources software manage employee evaluations, track wages and absenteeism, maintain safety records and vacation time off. They organize business contacts of employees, manage meetings and track agendas, follow up on critical tasks and generate custom reports . These soft ware have an inbuilt time accounting software which helps to manage time .Examples are HRtrack,workindex ,hr guide, etc	
43231506	Materials requirements planning logistics and supply chain software	Software to enable supply chain.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43231507	Project management software	Project management software is a software tool for assisting in the process of planning, organising, staffing,directing and controlling the production of a system. An example of a project management software is PERT chart editor
43231508	Inventory management software	These software are used to maintain the inventory of companies and restaurents. This software make use of barcodes or unique ids for their inventory management system .Some of the inventory management software are Tracrite software,Accurateid,ordersplus,clevertool,aldata software etc.
43231509	Bar coding software	Bar coding software is a software used to interpret bar codes for identifying commercial products or parts Also labeling printing .
43231510	Label making software	Label-making software allows users to create and print custom labels complete with graphics.
43231511	Expert system software	Software to enable expert system creation and management
43231512	License management software	Allowing an individual or group to use a piece of software. Nearly all applications are licensed rather than sold. There are a variety of different types of software licenses. Some are based on the number machines on which the licensed program can run whereas others are based on the number of users that can use the program. Most personal computer software licenses allow you to run the program on only one machine and to make copies of the software only for backup purposes. Some licenses also allow you to run the program on different computers as long as you don't use the copies simultaneously.

UNSPSC v16_0901

1/27/2014

43232001	Action games	Software games that focus on action and dexterity skills	
43232002	Adventure games	Software games that focus on adventure and strategy	
43232003	Sports games	Software games that focus on sporting events or assimilate sports	
43232004	Family software	Family titles are software whose content is purely used to provide information to the entire family. They include cooking, gardening, astrology, automobile and other titles of interest to the whole family.	
43232005	Music or sound editing software	Music or sound editing software is used to convert the music/sound available in analog format such as in vinyl LPs and audio tapes to digital format to be stored in a computer harddisk or in a CD. Extra features are built in to these software to enhance special effects for fade ins/outs, noise filtering, volume adjustment, etc.	

Class

Commodity	Commodity Title	Definition	Synonyms
43232101	Pattern design software	This commodity includes a software tool that allows one to design and print their own customizede cross-stich or grip work patterns from hand drawn or imported photos or images.	
43232102	Graphics or photo imaging software	Software to draw, manipulate images, color, type, special effects for print or presentation programs	
43232103	Video creation and editing software	Software to enable video production	
43232104	Word processing software	Software that allows users to create, edit, store, and print documents.	
43232105	Charting software	Software that provides templates for adding the drawing and diagramming of charts.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232106	Presentation software	Presentation software are application software for creating presentations, speeches, slides, etc.They employ colorful graphics to present business information and other complicated data in easy-to-read charts and graphs in order to make immediate comprehension easier.Powerpoint is an example for presentation software.	
43232107	Web page creation and editing software	This is an editing software used for webpage developing.It is preferably used for its easy access and working.	
43232108	Calendar and scheduling software	An application that helps in scheduling or planning the activities electronically. The print out of the schedule can also be made.	
43232110	Spreadsheet software	Spreadsheet software is a type of application program which manipulates numerical and string data in rows and columns of cells. The value in a cell can be calculated from a formula which can involve other cells. A value is recalculated automatically whenever a value on which it depends changes. Different cells may be displayed with different formats.Microsoft, Lotus, Borland and many other companies offer Windows-based spreadsheet programs. Some spreadsheet support three-dimensional matrices and cyclic references which lead to iterative calculation.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232111	Optical character reader OCR or scanning software	Optical character recognition (OCR) is the process of converting an image of text, such as a scanned paper document or electronic fax file, into electronic text. The text in an image is not editable: the letters are made of tiny dots (pixels) that together form a picture of text. During OCR, the software analyzes an image and converts the pictures of the characters to editable text based on the patterns of the pixels in the image. OCR also enables screen readers and refreshable Braille displays to read the text contained in some images. The software used for OCR is called OCR software.	
43232112	Desktop publishing software	Desktop publishing (DTP) software combine text and graphics into documents such as books, magazines, brochures, and manuals by using a computer system and high-resolution output devices.	

Class

Commodity	Commodity Title	Definition	Synonyms
43232201	Content workflow software	Scheduling software is an application software which helps organise daily activities of a person.	
43232202	Document management software	The document imaging and document management software help in finding files faster, organize documents easily, save space and distribute information. Some of the document management softwares are WORLDDOX ,LASERFICHE etc.	
43232203	File versioning software	Software to version content files for archive and publishing for use in a information technology system.	
43232204	Embedded text entry software		
43232205	Fonts software

43232301	Categorization or classification software	Software to manage business classifications.	
43232302	Clustering software	Software for combining and sharing resources across different technology tiers and architectures. Allows multiple computers or servers to be clustered together	
43232303	Customer relationship management CRM software	Software to manage customer interactions.	
43232304	Data base management system software	A database is an organized body of related information and Database software is a software which helps to organise the set of related informations. By making use of this software we can store the related informations and retrieve it whenever neccessary.some of the examples for these kind of softwares are MS Acess ver 97/2000(DBMS), oracle ver 7.1/8/9 (RDBMS),sybase (RDBMS), SQL Server 6.5/7/2000 (RDBMS)	
43232305	Data base reporting software	Software to create and manage database reporting capabilities	
43232306	Data base user interface and query software	Software to manage a query and presentation interface to access database data	
43232307	Data mining software	Software to access and algorithmically extract information from a data source	
43232309	Information retrieval or search software	Software to leverage indexing routines to access and retrieve data from data sources	
43232310	Metadata management software	Software to manage and store metadata objects.	
43232311	Object oriented data base management software	Software to manage and store object based databases	
43232312	Portal server software	Software to manage and create information portals	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232313	Transaction server software	Transaction server software are a designers or developers suite of software that helps programmers isolate the business logic in their programs from the platform-related code. Application servers can handle all of the application logic and connectivity found in client-server application. Many application servers also offer features such as transaction management, clustering and failover, and load balancing; nearly all offer ODBC support.	
43232314	Business intelligence and data analysis software	A type of application software designed to assist with business intelligence BI. Specifically, it is about tools assisting in the analysis and data presentation.	

Class

Commodity	Commodity Title	Definition	Synonyms
43232401	Configuration management software	Configuration management software is a software tool used to apply technical and administrative controls to a)Identification and documentation of physical and functional characteristics of configuration items (Configuration item is a hardware or software, or an aggregate of both, which is designated by the project configuration manager for configuration management) b)Any changes to characteristics of those configuration items and)Recording and reporting of change processing and implementation of the system.	
43232402	Development environment software	Software to assist in the creation and management of successful information technology systems.	
43232403	Enterprise application integration software	Software to integrate application data and processes	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232404	Graphical user interface development software	GUI tools are software programs used to develop programs which run in a windows environment.Examples are visual basic, visual foxpro, visual c++.	
43232405	Object or component oriented development software	Software to build object orientated software systems.	
43232406	Program testing software	Program testing software is a software tool used to test and evaluate a program to ensure that it complies with the requirements specified during its development cycle.	
43232407	Requirements analysis and system architecture software	Software to develop requirements and architecture for computer systems.	
43232408	Web platform development software	Software to develop web platform capabilities	
43232409	Compiler and decompiler software	A program that converts another program from some source language (or programming language) to machine language (object code). Some compilers output assembly language which is then converted to machine language by a separate assembler.	

Class

Commodity	Commodity Title	Definition	Synonyms
43232501	Foreign language software	Foreign language translation software are also known as machine translators; they provide approximate translations to and from English and another language. Also, software to aid in learning or translating languages	
43232502	Computer based training software	Training software are otherwise known as CBTs(computer based training) softwares. They provide a medium of instruction with interactive software used for self phased training purposes.	
43232503	Spell checkers	Software for checking the spelling of words in digital file against a dictionary of preferred spellings.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232504	Route navigation software	Software for assisting the user in managing a user in moving from one geography to another in a selected path or route.	
43232505	Multi-media educational software	Multi-media software that often uses adventure storylines, gaming elements and friendly characters to stimulate and educate children. The emphasis is on the Child exploring a virtual world or adventure that makes the learning process fun.	
43232506	Encyclopedia software	A software version of an Encyclopedia with multi-media presentations, definitions and articles that provides the same sort of information as traditional book based encyclopedias	
43232507	Dictionary software		
43232508	Phonebook software		
43232509	Voice synthesizer and recognition software	Software capable of processing a persons voice with purposes of identification, education, guidance to disabled people and other scientific character purposes.	
43232510	Geographic information system	A system which integrates hardware, software, and data for capturing, managing, analyzing, and displaying all forms of geographically referenced information	GIS

Class

Commodity	Commodity Title	Definition	Synonyms
43232601	Aviation ground support software	Aviation ground support software are software developed for the entire gamut of aircraft support from ground which includes aircraft maintenance, baggage handling and other infrastructure which support the aircraft at ground.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232602	Aviation test software	Aviation test software are software used to train the pilot in the ground before the actual flight testing. These software simulate environment within an aircraft and the weather conditions the pilots are likely to encounter during actual flight conditions. Examples are Microsofts Flight simulator
43232603	Facilities management software	Facilities management software are used to optimise the resources of a company. They offer built-in reporting capability for moves, assets, space availability, schedule personnel relocation ahead of time and much more. Provision is available for ad-hoc custom report generation to meet the unique needs of the company. Some of the facilities management softwares are IMPACT XP and ARCHITOSH for Macintosh computers
43232604	Computer aided design CAD software	Computer aided design software is a software used to design various engineering, architectural, and industrial objects.
43232605	Analytical or scientific software	Analytical or scientific software are specialised software used for scientific research and analysis by capturing data and performing complex analysis with report, graph and image generating facilities for the scientific community.
43232606	Compliance software	Compliance Softwares serves users by providing software tools and support documents which enable clients to effectively monitor, check, and if necessary, correct essential areas of control. These softwares help with achieving compliance with federal, state, standard or local regulations devices.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232607	Flight control software	Flight control software is a software which can correctly identify and respond to changes in aircraft stability and control characteristics, and immediately adjust the control system to maintain the best possible flight performance under both normal and adverse conditions.	
43232608	Industrial control software	Industrial control software is a software that controls, configures and monitors intelligent industrial control devices by operation from a computer or microprocessor.	
43232609	Library software	Software to automate acquisition, cataloging, searching, and circulation functions for books and other library materials.	
43232610	Medical software	This software tool is used for evaluating, planning or redesigning hospitals and other healthcare procedures. The animation and graphical output reports show the behavior of certain patients and their performance. Some softwares like EMR software, X Link Software etc will come under this title.	
43232611	Point of sale POS software	Point of sale software are software which are used in sales outlets to register products sold in the outlet. They bill the products sold and give the sales of the day. They generate reports on the sales made.	
43232612	Computer aided manufacturing CAM software	Computer aided manufacturing software are specialised programs installed on computers which automate the manufacturing process, particularly the fabrication, assembly, and control aspects of manufacturing.	
43232613	Manufacturing execution system MES software	A software application that companies can use to measure and control critical production activities.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232614	Computer aided design CAD and computer aided manufacturing CAM system	Software that includes the computer aided design CAD to design an object and the computer aided manufacturing CAM program to make product.	
43232615	Facial recognition software	Software capable of processing the visual representation of a person's face with purposes of identification, document forgery detection, and security.	
43232616	Legal management software	Legal software that allows to control pending appointments, consultations, procedure status, plaintiffs and defendants, pending and received documents, fees for procedures with their corresponding reports and graphs.	
43232617	Meteorological control software	Software that compiles essential information of the pavement, meteorological and traffic sensors to supervise meteorological conditions that change in real time and help to make timely decisions.	
43232618	Radar image treatment software	Software capable of processing the visual representation of information captured by a sensor mounted in a radar device.	
43232619	Satellite image treatment software	Software capable of processing the visual representation of information captured by a sensor mounted in an artificial satellite.	

Class Network applications software

Commodity	Commodity Title	Definition	Synonyms
43232701	Application server software	Software to enable application server capabilities	
43232702	Desktop communications software	Desktop communications software is a software tool that co-ordinates the telephone system, address book, fax and e-mail to enable a user to keep in touch with more people more efficiently while working on a computer. Its a handy tool for the home and small business.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232703	Interactive voice response software	Interactive voice response software is a software used in PBX and voice mail systems, that uses a prerecorded database of voice messages to present options to a user, typically over telephone lines. User input is retrieved via DTMF tone key presses. When used in conjunction with voice mail, for example, these systems typically allow users to store, retrieve, and route messages, as well as interact with an underlying database server which may allow for automated transactions and data processing.	
43232704	Internet directory services software	Software to enable and deliver directory services	
43232705	Internet browser software	Internet browsing software is a program which allows a person to read hypertext. The browser gives some means of viewing the contents of pages and of navigating from one page to another. Netscape Navigator, NCSA Mosaic, Lynx, and W3 are examples for browsers for the World-Wide Web. They act as clients to remote web servers.	

Class

Commodity	Commodity Title	Definition	Synonyms
43232801	Network monitoring software	Software to monitor, analyze, and detect network systems.	
43232802	Network operating system enhancement software	Operating system enhancement software are used to optimise the operations of a OS software in order to finetune it for peak performance in terms of speed and reliability.	
43232803	Optical network management software	Software to create and manage optical networks	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232804	Administration software	Administration software is used to manage computers, peripherals and printers in a network. They are capable of distributing software from a central computer, detect every machine on the network, track hardware and software configurations, send key information to a central database and perform other tasks.	
43232805	Internet protocol IP multimedia subsystem software	Software concerning IMS (IP Multimedia Subsystem - internet platform)	

Class

43232900 Networking software

Commodity	Commodity Title	Definition	Synonyms
43232901	Access software	Remote access software is a software that enables remote access of a computer system in a network.	
43232902	Communications server software	Communications server software is a software that provides voice, fax and data messaging solutions for an office or workgroup.	
43232903	Contact center software	Software to enable contact center applications	
43232904	Fax software	Software to enable fax capabilities	
43232905	LAN software	System management software is used by system managers, aiming to minimise the use of excessive, redundant resources to address the overlapping requirements of performance balancing, network management, reducing outages, system maintenance costs, diagnosis and repair, and migration to new hardware and software system versions.	
43232906	Multiplexer software	Multiplexer software multiplexes (combines) several signals for transmission over a single medium.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43232907	Storage networking software	Storage management software is a software that enables network administrators to route backup data from various devices on a network to another device such as a server or a magnetic tape backup unit. This is done either to make use of a high-capacity storage system such as a tape juke-box or for disaster protection.
43232908	Switch or router software	Router software is a software that acts as a router between a LAN and a PPP or SLIP link, and allows transparent access from the LAN to the Internet using a single IP address through network address translation (NAT). It can also act as a PPP server for dial-in connections, or route between LANs.
43232909	WAN switching software and firmware	Software to enable WAN capabilities in a network
43232910	Wireless software	Software to enable Wireless capabilities in a network
43232911	Network connectivity terminal emulation software	A program that allows a computer to act like a particular brand of terminal, e.g. a vt-100. The computer thus appears as a terminal to the host computer and accepts the same escape sequences for functions such as cursor positioning and clearing the screen. xterm is a terminal emulator for the X Window System.
43232912	Gateway software	Gateway software is a software that enables data flow between two networks.
43232913	Bridge software	Bridge software is a software used in a device which forwards traffic between network segments based on data link layer information. These segments would have a common network layer address.

UNSPSC v16_0901

1/27/2014

43232914	Modem software	Modem software is a software used to transmit data over a telehone line.Computer information is stored digitally, whereas information transmitted over telephone lines is transmitted in the form of analog waves. A modem software converts between these two forms.	
43232915	Platform interconnectivity software	Platform interconnectivity software is an interfacing software which facilitates the communication between computers running different operating systems.	
43232916	Infrared data transfer irda software		

Class 43233000 Operating environment software

Commodity	Commodity Title	Definition	Synonyms
43233001	Filesystem software	Software to manage and create a file system for a computing device	
43233002	Network operation system software	An operating system that includes special functions for connecting computers and devices into a local-area network (LAN); Software that enhances a basic operating system by adding networking features and runs networking devices such as routers and switches. An operating system which includes software to communicate with other computers via a network. This allows resources such as files, application programs, and printers to be shared between computers.	
43233004	Operating system software	Software to provide the operation interface to the computer and provide higher level services and APIs	
43233005	Computer firmware		
43233006	Virtual machine software	Software that emulates a computer and may execute programs like it was a real computer. This software was at the beginning defined as an efficient and isolated duplicate of a physical machine.

Class 43233200 Security and protection software

Commodity	Commodity Title	Definition	Synonyms
43233201	Authentication server software	Software to enable and manage security authentication	
43233203	Network security or virtual private network VPN management software	Software to manage network access abilities.	
43233204	Network security and virtual private network VPN equipment software	Software to configure or maintain security and VPN equipment	
43233205	Transaction security and virus protection software	Virus protection software are programs to detect and remove computer viruses. The simplest kind scans executable files and boot blocks for a list of known viruses. Others are constantly active, attempting to detect the actions of general classes of viruses.	

Class 43233400 Utility and device driver software

Commodity	Commodity Title	Definition	Synonyms
43233401	Compact disc CD server software	Software for managing information technology systems that utilize the CD format. CD server software is a software that lets users in a network to share cd-rom drives over a network.	
43233402	Data conversion software	Software to convert dates from one format to another	
43233403	Data compression software	Compression utilities are software used for coding of data to save storage space or transmission time. Reduces the KB size of files and directories by temporarily removing spaces. Some of the utilities used are PKZIP, ZIP, WINZIP and GZIP.	
43233404	Compact disc CD or DVD or sound card software	Configuration files for allowing for multi-media add-ons to function.	
43233405	Device drivers or system software	Software to provide software interfaces to hardware systems and devices	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

43233406	Ethernet driver software	The Ethernet driver software is a program that acts like a translator between the Ethernet and programs that use the device	
43233407	Graphics card driver software	A graphics card driver software is a program that acts like a translator between the graphics card and programs that use the device	
43233410	Printer driver software	Print utility software is a software tool used for retrieving, managing, mailing, distributing, importing and using printed data.	
43233411	Screen saver software	A program which displays either a completely black image or a constantly changing image on a computer monitor to prevent a stationary image from burning into the phosphor of the screen. Screen savers usually start automatically after the computer has had no user input for a preset time. Some screen savers come with many different modules, each giving a different effect.	
43233413	Voice recognition software	Voice recognition software are computer software designed to recognise spoken words. Dragon Speak, Naturally speaking and Voice Xpress are some of the commercially available speech recognition software.	
43233414	Storage media loading software	Storage media loading software is a software used to control the autoloaders and jukeboxes, used to automatically load the data stored on to a drive which reads and writes data on the storage medium,	
43233415	Backup or archival software	Software which provides flexible, powerful backup protection of desktop computer hard drives and networked drives to (for example) an OIT network server or dat tape drive. Lost files can be recovered by restoring them from the server or from other backup hardware and media.	
43233416	Codec stacks

Class 45111600 Projectors and supplies

Commodity	Commodity Title	Definition	Synonyms
45111601	Pointers		
45111602	Projection lamps		
45111603	Projection screens or displays	These are screens or displays that use projection technology. They are generally used for presentation purposes.	
45111604	Slide projectors		
45111605	Transparency equipment or supplies		
45111606	Liquid crystal display projection panels		
45111607	Overhead projectors		
45111608	Film projectors		
45111609	Multimedia projectors		
45111610	Epidiascopes		
45111612	Dissolve controls		
45111613	Cathode ray tube projector		
45111614	Liquid crystal display projector		
45111615	Projection lenses		
45111616	Video projectors		
45111617	Overhead projector or video trolleys		
45111618	Presentation light boxes		
45111619	Film reel	A reel to store for convenient storing, handling and filming for the developed film.	
45111620	Slide film copier	A machine that copies the color reversal films of 8mm, 16mm, 35mm and others in the original size. It is structured with the milk-white board, bellows, and focusing rail and others.	

Class 45111700 Audio presentation and composing equipment and hardware and controllers

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

45111701	Assistive listening devices		
45111702	Audio jack boxes		
45111703	Listening centers		
45111704	Audio mixing consoles		
45111705	Public address systems		
45111706	Combination audio mixer and amplifier	A product that combines an audio mixer and a power amplifier in a single unit. May be either rack mounted or desktop.	
45111707	Audio equipment connector and stage box	A box that features multiple audio signal connectors, enabling multiple microphones and other audio signals to be plugged into a box located on stage, connected by multicore cable to a remote audio mixing desk.	
45111708	Broadcast domain controller	A control equipment that is used for the purpose of checking the normal operation condition of its structure elements of intercommunicating equipment in amp, microphone, timer, and others communication device for the purpose of emergency crisis of fire, earthquake, or the purpose of conference control and others.	
45111709	Remote amplifier	Equipment that may control the main equipment from a specific area of the outside with remote control. This equipment selects the power ON--OFF and speaker line and adjusts as in the main equipment.	
45111710	Chime and siren unit	A type of device that has the generation of 4 scales of chime for upward or downward level of soft sound color used to inform the beginning and ending of information broadcasting.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

45111711	Speaker baffle	A screening structure or partition that is used to increase the practically effective delivery distance between the two points of acoustic system, such as the front point and rear point of electroacoustic transducer and others.
45111712	Tape duplicator	Recording equipment that is designed to make several reproduction tapes simultaneously from 1 master tape. It is the copying device to make many copies in short period of time by recording in faster speed than the original tape.
45111713	Audio distribution amplifier	A type of device that distributes the signal to the several types of equipment input terminal by amplifying and separating one audio input signal for several signals.
45111714	Audio analog to digital AD converter	Equipment that converts the analog audio signal into the digital audio signal.
45111715	Audio digital to analog DA converter	Equipment that converts the digital audio signal into the analog audio signal.
45111716	Digital audio workstation DAW	Equipment that may edit and reproduce or edit specific part while looking into the graphic screen on the monitor after storing the acoustic input signal into the digital signal on the hard disc.
45111717	Reverberator	An echoing device that is designed to add the reverberation to naturally make the sound of microphone with less reflection sound.
45111718	Delay unit	Equipment that improves the time difference arising between the image and sound for slow propagation velocity of the sound.
45111719	Audio monitor	A type of device that is designed to monitor particularly or simultaneously for the sound of each channel after inputting several channels of audio signal on a number of equipment.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

45111720	Audio spectrum analyzer	Equipment that is designed to find out the size or characteristics of signal by analyzing for each frequency of the signal output through various audio devices.	
45111721	Reel to reel tape recorder	A tape recorder that records the audio signal in magnetic tape wound around round plastic or aluminum wheel.	
45111722	Cassette deck	Audio equipment that may reproduce the recorded sound or records the audio by using the cassette tape.	
45111723	Hard disk recorder	A type of device that saves and reproduces on hard disc or magneto-optical disc for having all sounds to the file type as well as having the film or video for synch-operation set function as one of the very important functions.	
45111724	Magnetic head	A part that has the function to change the electric signal to magnetic energy or converts the magnetic energy on the recording medium to electric signal in magnetic sound recording or magnetic video recording and others. Depending on each function, it is divided into the write head, reproducing head and erase head.	
45111725	Acoustic box	An airtight box where the speaker has a back wave in counterphase with the front wave, is muted to prevent shorting acoustic, and the subwoofer dampens to prevent damage.

45111809	Television mount accessories		
45111810	Visual presenters		
45111811	Video precision monitor	A high resolution monitor for expert that has higher stability and resolution compared to the general monitor. By inputting 2 or more of composite signals, it may selectively make the screen quality monitoring in the program manufacturing process.	
45111812	Visual information display device	A type of device that displays in projecting various signals sent from computer, television, video equipment, network and others onto a large screen.	
45111813	Down stream keyer	Equipment that inserts logo, character and others manufactured from the logo generator or digital video effector on the television emission screen.	
45111814	Digital video effects DVE equipment	Equipment that provides diverse image effect ranging from the 2 dimensional effects of screen expansion, reduction, rotation, motion, orbit indication, mosaic, multi-screen, mirror and others to 3D effect of phase rotation and others by using the computer video processing technology after converting the analog video signal to the digital signal.	
45111815	Audio vidio console	A type of device that edits screen quality or voice and monitors or listens to the voice or video from a broadcasting station and others.	
45111816	Logo generator	Equipment that is designed to output in moving picture as saving the character and diagram that is used in a program.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

45111817	Character generator	Equipment that makes the characters or drawings shown on the television screen.	
45111818	Video noise reducer	Equipment that is designed to remove the noise in the video signal to convert it into the video signal with great signal to noise ratio.	
45111819	Video mixer	Equipment that improves the program production function by mixing or adjusting several image input signals.	
45111820	Video processing amplifier	An image signal stabilization device that is designed to emit the clean video signal made by separating and processing the color burst, the structure element of the input television image signal.	
45111821	Synchronizing or sync generator	Equipment that generates the synchronization signal as the standard signal to synchronize the scanning of reception side to transmission side for the complete image reproduction on the television screen.	
45111822	Television aspect ratio converter	A type of device that converts the television screen ratio of 4:3 to different screen ratio such as 16:9.	
45111823	Video standards converter	Equipment that converts the video material produced in mutually different television quality score to fit into the television quality score of its own country.	
45111824	Synchronizing or sync converter	A type of device that makes the frequency of the two oscillation signals and phases to be consistent.	
45111825	Frame synchronizer	A synchronous conversion device that enables the two television signals to mix by making consistent synchronization of video signal transmitted from outside and basic video signal.	
45111826	Motion picture experts group MPEG encoder	A type of device that compresses and saves by converting the video signal with the MPEG -- Motion Picture Experts Group-- compression method.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

45111827	Video tape checker	A type of device that erases the image recorded as well as analyzes the tape condition to classify for the grade of top, middle and bottom and displays the defective location on LED --light-emitting diode-- or output paper.	
45111828	Prompter	A type of device that indicates the contents in caption or others by enabling MC master of ceremonies to undertake the broadcasting while reading the news or script.	
45111829	Process camera	A camera that copies the negative or positive film used in the photolithography from the manuscript. It is structured with manuscript frame, lens frame, light source lamp, flash lamp and others.

45121622	Camera lens cleaners		
45121623	Camera controllers		
45121624	Photography light reflector	A reflector for scattered reflection that is used for the purpose of removing the shade or dark part by diffusing the light penetrated onto the subject when filming person or product in near distance.	
45121625	Shutter release	Equipment that is used in operating the camera shutter to prevent the shaking when taking a photo.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

45121626	Digital camera back	An input device which enables editing and printing by direct transmission of the camera image to the computer screen.	
45121627	Camera flash diffuser	The diffuser fades environment light. Its main function is to spread the light in a uniform way to eliminate unwanted shades thereby creating a smooth effect.	
45121628	Camera lens filter	The filter serves to reduce light which is important when adjusting the diaphragm and the time to adjust the speed.	
45121629	Camera track motor	Battery charged device that conveys the film in a camera and tightens the shutter after each exposure.	
45121630	Camera parasol reflector	Accessory for camera which is placed around the object to be photographed to prevent the entry of excess or reflected light.	
45121631	Electronic viewfinder	An electronic viewfinder EVF is a viewfinder in which the image captured by the target is projected in a miniature screen. The image in this screen is used to help the camera to center the scene to be photographed.	
45121632	Photographic flashlight apparatus	Including flashbulbs; photographic (except cinematographic) enlargers and reducers.

45121705	Photographic enlargers		
45121706	Photo cutters or trimmers		
45121707	Photo print dryer	Electric dryer (heat based) for processed photo paper.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

45121708	Photo print washer	A bathtub-like vessel for processed photo paper washing.	
45121709	Automated film processor	An automated device which makes visible the latent image on a film by transporting it automatically through specialized sections where developing, fixing, washing and drying of the film occur.	
45121710	Sheet film drum	Drum for developing sheet photo films.	
45121711	Color controller	A type of device that is designed to adjust the chromaticity of the photo during the process of making the photo prints from the color film.	
45121712	Film editing desk	A type of device that is designed for recording any indication, signal, writing or others on the film or revising the portrait film of a person.	
45121713	Film inspection machine	A machine in electric operation type that is manufactured to stop the operation automatically in appropriate location for the defective part of the film for dual joint and inspection of movie film to discover the defect.	
45121714	Film reader	A roll of film not photo-sensitized or thin and flexible piece used in the beginning and the end of the roll of film in order to deliver or insert the film through the projector or film processing equipment.	
45121715	Film hanger	A tool that is designed to tightly hold or support while the film is developed, fixed, washed or dried.	
45121716	Contact printer	A machine that is made for positive film by shedding the light for arc that has rich infrared ray as closely held in vacuum with leaking the air between line art or halftone dot negative film and plate surface made with the process camera.	
45121717	Film platemaking system	Equipment that undertakes the process to copy the halftone dot through certain lighting from the film to the printing plate.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

45121718	Film densitometer	A type of device that is measured of density for the developed film.	
45121719	Digital photo printing kiosk	Equipment which prints out the photo instantly as insert the fee and memory card filmed with digital camera and others.	
45121720	Film loader	A type of device that is used to rewind the film yet not to be photosensitized on the film magazine. It is structured with the part for shielded film storage and the part that rewinds the film.	
45121721	Monocomparator and accessories	A system providing a viewing capability of turning and moving from a reference cartesian system in which the photogram is formed with points to measure. The binocular observation system has a reference mark that must be on the detail in order to conduct the reading.

Class 45131500 Still picture film

Commodity	Commodity Title	Definition	Synonyms
45131501	Color film		
45131502	Black and white film		
45131503	Instant picture film		
45131505	X ray film		
45131506	Slide film	A transparent positive film in black and white or color condition for the projection onto the screen by added into the projector.	
45131507	Processed microfilm	A film which is used to take the photo on material or bibliographies in documents, drawings, and printed materials that are reduced to a very small and invisible size for preservation.	
45131508	Negative film	A film that displays the image with the same color with the actual object only when developed on the printing paper. It is the film to display with the negative image with opposite of black and white when printing the film after shooting with the color of the subject in complementary color.	
45131509	Film spotting color	A color painting for printing correction that is added to the pigment with black, white and sepia on the plastic.	
45131510	Photographic dye	A substance which is used in coloring or mixing color on the black/white or color printing paper or film.

	45141604	Photographic print processor	A type of device that is used in moving the image by shedding the ray on the photo-sensitized material yet not to be sensitized from the transparent or semi-transparent photo image.	
	45141605	Photograph purifier	Auto pure water supply equipment for washing that is manufactured for developer that develops the film and printing paper.	
	45141606	Developing tank reel	A reel that winds down the film to develop the photographed film, and winds the film on the developing tank.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

45141607	Camera obscura	A type of temporary dark room in box shape that is used for developing the film or arrangement of film mainly in outdoor or indoor.	
45141608	Film squeegee	A device that is used to remove the moisture remaining on film and printing paper after washing off the photo completed for printing or film completed for developing.	
45141609	Film developing machine worktable	A worktable that is used in developing the film and printing the photo or placing the equipment for developing pictures.	
45141610	Photographic timer	A timer for dark room that is used to adjust appropriate time to develop film and photo print.	
45141611	Photographic processing temperature regulator	Equipment that adjusts the temperature to maintain the temperature of the developer consistently as the film is being developed.	
45141612	Portable darkroom	A shielding device made in fabric, vinyl, nylon, wooden material and others, that is used in winding the film to the developing tank in outdoor.

46151713	Forensic latent print chemicals		
46151714	Evidence drying cabinets		
46151715	Fingerprint equipment		
46151716	Lie detector	A type of device that is used in investigation of a case. It is used to find out if a statement or answer of a person is false or not by measuring the physiological change arising in accordance with the emotional condition or psychological condition of the person.	

Class Explosives control equipment and accessories and supplies

Commodity	Commodity Title	Definition	Synonyms
46151801	Blast guard container	A special type of reinforced container combining a high strength outer steel shell with an inner compressive layer for the safe disposal of explosive devices. The compressive layer is designed to absorb the major blast energy and resist fragmentation. The outer shell restrains any remaining lateral blast energy and fragmentation. Residual blast energy is vented upwards away from the public, keeping the receptacle unpenetrated.	

Class Chemical biological control equipment and accessories and supplies

Commodity	Commodity Title	Definition	Synonyms
46151901	Chemical biological decontamination trailer	Mobile unit mounted on wheels especially equipped for removing chemical and biological contaminants from people and equipment.

UNSPSC v16_0901

1/27/2014

46161501	Airport signaling systems		
46161502	Railway signaling systems		
46161503	Marine signaling systems		
46161504	Traffic signals		
46161505	Parking meters		
46161506	Snow or ice melter		
46161507	Barrier tapes or chains		
46161508	Traffic cones or delineators		
46161509	Speed stoppers		
46161510	Gate barrier systems		
46161511	Traffic beacon	A mobile or fixed sign that is used as a reference mark to indicate or warn about dangerous places, deviations or stops in the traffic. It usually has powerful lights that flash intermittently. Alias: Beacon signal.	
46161512	Traffic chain	A chain that is hung on several poles to indicate to the cars the correct way. It is used when there is a long distance to the sign.	
46161513	Traffic safety fence	A traffic safety structure used to guide vehicles and pedestrians while repairing road.	
46161514	Cats eye road stud	A facility that is installed on the road surface for seeking the flawless flow and traffic safety by clearly inducing the views of operators at night and in rain as the lines on the road surface is supplements as the road auxiliary unit.	
46161515	Crash cushion	A type of device that undertakes the role of a buffer by absorbing the shock for the purpose of minimizing the disaster with lessening of the impact force received from the direct collision to the road facilities during the vehicle operation.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46161516	License plate recognition system	A type of device that reads the vehicle number automatically by the camera filming the plate number of the vehicle that passes the vehicle detector.	
46161517	Lane dividing rail	A road safety facility which is built for securing the safety and inducement of views of driver by installing it to the place impossible for installation of the central separator, guard rail or protective wall by the space restriction in place where there are substantial risk of traffic accident.	
46161518	Traffic control channelizer drum	A drum-shape traffic safety facility which is used for traffic control or inducement during the road construction work.	
46161519	Traffic lane tape	A traffic lane that is manufactured for the tape-type to be attached to or removed from the asphalt or concrete floor.	
46161520	Variable message sign	A system with traffic information electronic sign board which is designed to express the traffic information arising in real time for moving picture, graphic, characters, and others by installing it on intersections and roads.	
46161521	Parking lot entry exit warning light	A warning lamp that is installed for the purpose of preventing the collision with the vehicle that enters into the entrance by igniting the red signal light when the vehicle comes out by installed on the entrance area of parking lots.	
46161522	Parking lot proximity warning light	A lamp which is designed to make smooth vehicle operation and prevent accidents by operating the rotational warning light and the buzzer to warn vehicles and pedestrians in advance if there is any vehicle entering into the parking lot.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46161523	Parking lot snow melter	A type of device that is designed as the snow removal and anti-icer by installing it below the entry slope to the parking lot, outdoor parking lot entrance, road surface and others with the cable that coats the heat wire with the insulation material, metal, polyvinyl chloride and others.
46161524	Traffic flow analyzer	A type of device that surveys the directions, kinds, volumes, changes in time and others of cars and people passing the cross section, artery road and others.
46161525	Vehicle detection loop coil	A detector that is designed to detect the conversion signal with the change of high frequency inductance that is formed on the coil part as the vehicle enters on top of the loop coil by sending the constant high frequency magnetic signal current with the burial on the road surface.
46161526	Pedestrian sensor	A type of device that enables the number of pedestrians or direction flow to sense as it is installed on the cross road where the passage of the pedestrian is very busy.
46161527	Traffic flow sensor	A type of device that measures the number of passing vehicles and their speed and others automatically with the electric signals after the vehicles stepping on and passing on as it is installed on major roads and intersections.
46161528	Airport warning light	A light facility that is helpful for navigation or hazard indication that may hinder for airport facilities or other navigation activities.
46161529	Voice guide device for blind person	A device that is designed to provide the information as installed in a place where a visually disabled person approaches the first when using the facilities of public buildings, subway stations, bus stations and others.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46161530	Parking barrier gate	A control device which progresses or stops a vehicle with the arm in bar-shape pulled up or pulled down as it is installed on the entrance and exit of the parking lot.	
46161531	Traffic safety mirror	A mirror which is installed in severely curved road to see and reflect the vehicle approached from any blind spot.	
46161532	Retracting or moveable traffic bollard	Device used on public spaces to allow only authorised vehicles to pass through	
46161533	Fixed traffic bollard	Device used on public spaces to block passage of any vehicle	
46161534	Vehicle parking concave plate	A reusable plate used to provide surface traction, particularly in parking lots to prevent tires from slipping when parking or leaving.	

Class

Commodity	Commodity Title	Definition	Synonyms
46161601	Rope float lines		
46161602	Life rings		
46161603	Pool alarms		
46161604	Life vests or preservers		
46161605	Life buoy	A buoy that has the circular shape which is used as purported for waiting for the rescue with the troubled people in water to holding on.	

Class

Commodity	Commodity Title	Definition	Synonyms
46161701	Descending life line	An evacuation device used in case of fire or other emergencies. It is connected to the ring of the supporting pole and activated by the weight of the escaper.	
46161702	Rescue air bag	Equipment that uses the force of air when lifting up heavy object or widening the narrow gap from the building collapse, vehicle accident and others.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46161703	Safety air mat	Rescue equipment that is installed to reduce the impact and rescue human life as it is used for emergency evacuation purposes when an accident occurs or installed in places where there is a risk of falling.	
46161704	Rescue line launcher	Equipment that sends the rope by using the compression air from the equipments used to send the rope for rescuing.	
46161705	Hydraulic rescue equipment set	Equipment that is used when rescue activities are undertaken by promptly cutting off or removing the barriers by using the hydraulic force when there is any vehicle accident or building collapse.	
46161706	Air tent	A tent that is installed by blowing the air by using the compression air cylinder air blower and others.	
46161707	Rescue door opener	Equipment that is designed to break up and open the gate particularly the locking device when the rescue is impossible with the door locked when approaching the victim during fire or disaster.	
46161708	Rescue net	Equipment that is capable of having people on and carrying them out during the evacuation of human lives isolated in a place with impossible to approach through helicopter or others.	
46161710	Rescue light	A light that undertakes the role to induce people to be rescued or people working on rescuing with the light used in the rescue activities.	
46161711	Life detector	Equipment that is used in search of buried survivors when having various types of disasters such as earthquake, gas explosion, building collapse and the like.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46161712	Personal safety alert	Equipment that is worn for the safety of staff that moves to the risky place for the purpose of disaster prevention or rescue at the place of disaster or accident area.	
46161713	Smoke signal device	A device that is manufactured to inform the location and status when requesting for help and rescue by generating smoke.	
46161714	Life line	A rope that is used for evacuation purpose when the emergency situation arises in skyscraper where the stairs and others are not available to use.	
46161715	Confined space rescue equipment	Equipment that is used for rescuing activities in the manhole or other narrow and deep areas.

46171619	Security or access control systems		
46171620	Safety light curtains		
46171621	Surveillance video or audio recorders		
46171622	Closed circuit television CCTV system	Limited use system comprised of video cameras to transmit a signal to a specific place and limited set of monitors.It differs from broadcast television in that the signal is not openly transmitted, though it may employ point to point wireless links.	
46171623	Home security alarm	A type of device that informs of theft by making the warning sound, automatically sending the theft signal to nearby police office or profit-oriented security company by using various sensors to prevent the infiltration of theft by installing in ordinary homes or various buildings.	
46171624	X ray baggage inspection system	Equipment that searches the properties within the cargo by radiating with the X-ray.	
46171625	Radio communication monitoring system	A type of device that is installed for monitoring the operation of many wireless stations.	
46171626	Night vision equipment	A portable night observation equipment of light amplification method that defects the target at night to use in various crime prevention activities, patrolling of drug crime, marine security, and night penetration activities.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46171627	Wireless signaler system for hearing impaired	A wireless signal that enables the hearing-impaired persons to recognize by informing the phone or fax sound, baby crying sound, knocking sound, clock alarm sound and buzzer sound in vibration or light.	
46171628	Automatic time of day indicator	A type of device that informs the standard time of certain country or region automatically.	
46171629	Signal mirror	An object that grinds for high degree with the aiming device to emerge the image in the type of bright spots on the reflected light of solar rays.	
46171630	Vehicle rain and water level sensor	A system that is possible to link with the auto device and indicate displacement with digital as designating and warning of high and low point in measuring and recording the water level.	
46171631	Seismic alarm	Equipment that is used to prevent the damages from warning in advance when there is an earthquake expected to have the damages on human lives or buildings.	
46171632	Passive infrared sensor	A device for security that is designed to output the electric signal by sensing the temperature change when an object with the movement penetrates while having all objects in watch zone keep watch status.	
46171633	Security metal detector	Equipment that is used for personal search that detects the weapons with metal, tools for crime, or precious metals at airport, customs, jail and others.	
46171634	Chemical agent detector paper	A product that is to protect individual and equipment by promptly taking the emergency action or wear the protective equipment by determining the change for colors with the presence of the liquid-type of chemical agents as attached to individual and other equipment under the chemical warfare.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46171635	Chemical agent detector	Equipment that detects the presence of chemical agents harmful to human body.	
46171636	Security facsimile transmission equipment	Equipment for security that is designed to protect safe transmission and reproduction of data as being sent to remote distance through the facsimile.	
46171637	Wiretap device	A type of device that is directly or indirectly connected to the communication line for the purpose of overhearing or recording the contents of dialogue or wireless communication.	
46171638	Radiation detector and alarm	Equipment that minimizes the damage from the radiation by making the warning sound or visually informing to the public when the radiation is senses or reached to certain range.	
46171639	Traffic video compensator	A type of device that compensates picture quality of traffic situation screen transmitted from the cable cameras for traffic that are set in major roads or intersection by using appropriate electric circuit with filter, amplifier, buffer and others.	
46171640	Automatic traffic monitoring system	A type of device that is capable of automatically disposing various forms required in handling of violators by making auto recognition and vehicle inquiries for the vehicle number after detecting the vehicle in violating the speed limit, signal violation, non-permitted vehicle passing through exclusive road and others.	

Class

Commodity	Commodity Title	Definition	Synonyms
46171701	Vehicle parking permit	A security control item used to grant access to vehicles and that records entry time, expiration time and actual parking duration time

UNSPSC v16_0901

1/27/2014

46181536	Anti cut gloves	This type of gloves resists cuts and is very hard to puncture, so it is perfect for professionals that must work with knives or other cutting tools.
46181537	Insulated gloves	A glove that insulates from electricity in work of high, medium or low voltage. It is used by professionals exposed to accidents with electricity.
46181538	Thermal gloves	A glove usually made of polyethylene, nylon, and lycra designed to resist very cold or hot environments.
46181539	Anti vibratory gloves	A glove that cushions the hand, wrist and elbow from vibration caused by hand tool or equipment use.
46181540	Welder gloves	Gloves that provide heat, spark, and abrasion protection. They usually include a lining to make them more comfortable.
46181541	Chemical resistant gloves	A special kind of gloves that resist several types of chemical substances such as carboxylic acids, alcohols or acetones.
46181542	Protective mittens	This workplace item differs from gloves because it does not allow separation of fingers (except thumb finger).
46181543	Waterproof jacket or raincoat	A rainproof coat that can be found in several forms.
46181544	Waterproof trousers or pants	An outer garment for covering the body from the waist to the ankles, divided into sections to fit each leg separately that protects from water. Alias: Waterproof pants.
46181545	Waterproof suit	A combination of waterproof jacket and trousers used by workplace professionals for work in wet environments.
46181546	Waterproof cap	A special kind of cap that is used to protect head from water. It usually includes a bill to protect the face better.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46181547	Waterproof cap cover	A special cover that fits over a cap and protects it from moisture.	
46181548	Welder bib	A garment for welders that protects them from sparks and excessive heat. It covers the neck and chest.	
46181549	Neck gaitor	A circular cloth or neck glove, often lined, worn around the neck to provide additional protection form cold.	
46181550	Protective scarf	A long, broad strip of wool, silk, lace, or other material worn about the neck, shoulders, or head, for protection against cold, drafts, etc.;	
46181551	Protective mesh jacket	A short coat usually extending to the hips made or covered by a metallic mesh or other material to protect the person who wear it from possible harm.	
46181552	Mining headlamp	Illumination device used in underground mining for lighting. Worn by miners.	
46181553	Protective wear dispenser	A device that collects and holds different types of personal protective clothing and equipment	

Class

Commodity	Commodity Title	Definition	Synonyms
46181601	Fire retardant footwear		
46181602	Hazardous material protective footwear		
46181603	Cleanroom footwear

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46182310	Ascender	A mechanical device that can be slid along a rope in only one direction and that is used to connect loads to ropes so that they can be advanced up the rope without their sliding back down.	
46182311	Belay device	A type of tool used as a method of protecting a climber or a load in case of a fall. By routing a rope in and around the device a rope is tied to the climber or load and is payed out or taken in by a second person (the belayer) as the climber or load moves. The belayer can stop the climber or load from falling.	
46182312	Descender	A component for climbing; usually welded steel or aluminum ring about 2 inches in diameter employed to reduce rope wear and ease rope retrieval on rappels.	
46182313	Swivel carabiner	A revolving metal loop that can quickly and reversibly connect components in safety-critical systems; for example, a common use is to attach a rope to a fixed anchor.	
46182314	Safety sling	Safety slings provide fall protection for personal safety and protection.	
46182315	Rubber hand rail	A safety device designed to prevent falling of passengers on escalators, moving walkways, etc.	

Class

Commodity	Commodity Title	Definition	Synonyms
46182401	Decontamination shower		
46182402	Safety wash units		
46182403	Clean booth	Temporary structure located near the production area that provides a way to meet local high cleaning levels where permanent clean room facilities are difficult to set up	
46182404	Clean locker	Specialized device for storing work clothing for workers accessing the clean room	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46182405	Air shower	A facility that removes pollutant substances that are attached to the worker or carried goods before the worker enters into the clean room or moving to the clean space.	
46182406	Pass box	A facility that prevents the inflow of polluted air or outflow of clean air enabling passage of goods through a wall mounted aperture or box. Adaptable for areas with different levels of cleanliness.	
46182407	Chemical spill safety kit	Kit to counteract and clean areas with chemical spillages.	

Class

Commodity	Commodity Title	Definition	Synonyms
46182501	Repellents for canine attacks		
46182502	Personal safety light	Equipment that is enabled to confirm the location of person in activity with the flickering light by a third party as it is attached to the body of worker in the event of fighting to put down a fire or night rescue work and others.	
46182503	Undervoltage alarm	A device for auto electric warning specially manufactured to mark as the voltage of certain device to drop below certain figure to hear or see.	
46182504	Fire alarm control panel	A type of device that is installed in the place where a person is working at all times as it marks for the fire zone with the warning of fire breaking out with the reception of signal notified by the sensor or transmitter.	
46182505	Earth leakage detector and fire alarm	Equipment that is used for the purpose of preventing the accident to expand while enabling the driver for prompt response by making the warning with the leakage of electricity on the cable with the used voltage to be 600V or below.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46182506	Electromagnetic interference EMI shielding equipment	A type of device that disconnects the equipment or facilities that are the subject of protection to prevent the erroneous operation by the electronic inducement from the influence of external magnetic field as it is surrounded by appropriate magnetic shield materials.	
46182507	Electromagnetic interference EMI shielding material	A product that reduces and shields the electromagnetic wave by attaching to the part that generates the electronic wave not to have any electronic wave interfere with the external environment, such as the human body and others.	

Family 46190000 Fire protection

Class 46191500 Fire prevention

Commodity	Commodity Title	Definition	Synonyms
46191501	Smoke detectors		
46191502	Heat detectors		
46191503	Fire resistant coatings or putties or sealants		
46191504	Flame detectors		
46191505	Fire alarm systems		
46191506	Flame arrestor		
46191507	Passive firestop system	Grouping of multiple devices and applications into an integrated system for fire prevention.	
46191508	Belt monitoring system	Monitors for gasses heat and fire	
46191509	Toxic vapor detector	A device that detects and measures the toxic vapor which has not so high of boiling point and is relatively easy to liquefied and warn when it reached the risky level.	
46191510	Thermal observation device TOD	A night observation equipment for the front line monitoring that converts the difference of infrared ray energy released from the identifiable target into the visible image.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46191511	Fire hot spot detector	Equipment that can be confirmed with the complete fire extinguishing to prevent the recurrence after subduing the fire and confirming the excessive heat as well as the fire location when the hot spot is not confirmed at the fire site.	
----------	------------------------	--	--

Class

Commodity	Commodity Title	Definition	Synonyms
46191601	Fire extinguishers		
46191602	Fire sprinkler systems		
46191603	Fire hoses or nozzles		
46191604	Fire blankets		
46191605	Fire suppression hand tools		
46191606	Fire suppression foam or similar compounds		
46191607	Fire breathing apparatus		
46191608	Fire suppression system		
46191609	Fire escape equipment		
46191610	Fire sprinkler heads	The fire sprinkler heads that are used in making fire sprinkler systems	
46191611	Fire hose cart	A two-wheeled, hand-drawn cart with hose wound on a reel, which is used at commercial and industrial sites.	
46191612	Backpack water pump	A portable fire extinguisher, designed to be carried by firefighting personnel, which is used to put out small mountain fires and others.	
46191613	Fire extinguishing agent	A substance of powder or liquid phase with the fire extinguishing capability used for the fire extinguisher.	
46191614	Fire foam liquid proportioner	A device which mixes the foam extinguishing fire agent to the water for fire fighting with certain ratio when requiring the foam extinguishing fire.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46191615	Firefighting standpipe	A pipe that is installed on the external wall of the building to supply water for fire-fighting to the fire extinguishing facilities.	
46191616	Helicopter fire extinguishing water tank	A water container which is attached on the lower part of the helicopter for the purpose of using in the fire extinguishing work.	
46191617	Fire hose washer	Equipment that saves human resources and time by automatically washing off the fire extinguishing hose attached with the impure substances as it is used in fire extinguishing activities.	
46191618	Fire extinguisher base	A support that is placed with the fire extinguisher.	
46191619	Fire water monitor	A type of device that is manufactured to liberally release the compressed extinguishing water at the hot spot as it is loaded onto the fire vehicle or outside fire hydrant.	
46191620	Smoke exhaust fan	Equipment that releases the smoke or toxic gas generated when the fire fighters are unable to make the entry with the smoke or toxic gas in the building or basement with the fire breaking out.	
46191621	Fire extinguisher storage box	A box that stores the fire equipments, such as fire extinguisher and others.	

Family Defense and law enforcement and security and safety training equipment

Class Public safety training equipment

Commodity	Commodity Title	Definition	Synonyms
46201001	Rescue mannequin	Material that is used for the practical training to rescue human lives under the emergency situation. It enables the practical training by placing it in the vehicle where fire breaks out or railway accident site.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

46201002	Disaster management training simulation system	Equipment that is used for mock experiment as used in times of various disaster prevention trainings and fire drills.	
----------	--	---	--

Class 46201100 Small arms weapons training equipment

Commodity	Commodity Title	Definition	Synonyms
46201101	Imitation rifle	An imitation rifle that is imitating the actual rifle shape for education and drill.	
46201102	Firing or shooting range	A shooting range facility that enables to protect the human lives from the bullets and stray bullets fired from the firing exercise.	

Family 46210000 Workplace safety equipment and supplies and training materials

Class 46211500 Workplace safety training aids and materials

Commodity	Commodity Title	Definition	Synonyms
46211501	Workplace safety training kit	A standard assembly of easily accessible safety information, reference guides or manuals and related materials used to inform personnel of different important safety matters	
46211502	Workplace safety training video	A type of video designed for training and informing workplace personnel on important safety matters	
46211503	Workplace safety training manual or handbook	A type of educational and reference guide for training workplace personnel in safety policies and procedures	
46211504	Workplace safety internet based training	An electronic, usually interactive, training approach using internet based tools for helping train workplace personnel in safety policies and procedures	

Class 46211600 Work area marking and visual indicators

Commodity	Commodity Title	Definition	Synonyms
46211601	Work area barricade tape and flags	Workplace safety materials that help identify areas that should not be used by visitors	
46211602	Work area warning posts and chains	Workplace safety items that help identify areas that should not be used by visitors

Class **47101500** Water treatment and supply equipment

Commodity	Commodity Title	Definition	Synonyms
47101501	Activated carbon equipment		
47101502	Ammonia removal equipment		
47101503	Carbon filtration equipment		
47101504	Bacterial removal equipment		
47101505	Chlorine handling equipment		
47101506	Corrosion control equipment		
47101507	Grit chambers		
47101508	Desalination equipment		
47101509	Fluoridation equipment		
47101510	Iron removal equipment		
47101511	Ion exchange equipment		
47101512	Mixers or agitators		
47101513	Oxygen generators		
47101514	Water purification equipment		
47101516	Turbidimeters		
47101517	Ultraviolet disinfection equipment		
47101518	Water conditioners		
47101519	Water softening accessories		
47101521	Ultrafiltration equipment		
47101522	Packaged water treatment systems		
47101523	Collection tanks		
47101524	Sludge or sewage composting equipment		
47101525	Dewatering equipment		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

47101526	Sludge pelletizers		
47101527	Sludge shredders		
47101528	Water treatment dryers		
47101529	Incinerators		
47101530	Odor control equipment		
47101531	Septic tanks		
47101532	Settling tanks		
47101533	Lift stations		
47101534	Sewage distributors		
47101535	Sludge disposal equipment		
47101536	Sludge collectors		
47101537	Sludge conditioning equipment		
47101538	Sludge or sewage digesters		
47101539	Sludge or sewage removal equipment		
47101540	Chemical feeder	The equipment used to feed a proper amount of chemicals such as coagulant and coagulant aids according to water quality or water flow in treatment of water supply and industrial water.	
47101541	Ozone water treatment equipment	The equipment used to treat and remove impurities from wastewater by using oxidation of ozone.	
47101542	Air flotation equipment	A water treatment device or equipment used to purify waste water by releasing tiny bubbles at suspended matters to float to the surface of the water.	
47101543	Surface aerator	A device used to provide air to aerated basins. Electrically powered rotors are submerged in the water to provide air to the water by stirring the water surface with rotation power.	
47101544	Air diffuser for sewage treatment	A device used to provide air to the water needed for sewage treatment process.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

47101545	Rotating biological contactor RBC	A device that disintegrates and processes the impure substances in waste water by delivering the oxygen in the air when it is exposed to the atmosphere and consuming the organic material by the inorganic materials when the circular plate is rotated to wet the reaction vessel.
47101546	Grit removal system	A type of device that gathers the sand and soil piled up on the grit chamber and releases to outside.
47101547	Surface washing device	A type of device that gushes out the high pressure water on the surface of the filter sand in the water treatment facilities for removing the foreign substance precipitated on the surface of filter paper.
47101548	Filter control console	A type of device that precisely finds out the functional condition of the filter paper and automatically controls.
47101549	Gravity filter	A type of equipment that is designed for fast filtering of the discharged water by the gravity not filtered on the filter paper opened.
47101550	Compression filter	A type of equipment that is to filter the discharged water by penetrating the filter water by applying the water pressure by closing the filtering device.
47101551	Up flow filter	A filtering device that has the natural water flowing into the lower part of the tank and filtered to upper direction, and when filtered, the foreign substance arrested is lifted up by the air to release outside. At this time, the filter sand placed upwardly together with the impure substance is washed off and it is dropped to the filter layer again by washing and its own weight.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

47101552	Moving bed filter	A device that scratches out the sand filtered surface attached with the suspended solid in the waste water and it is supplied to the lower part of the filtering layer continuously after washing, or new sand is sent to the filter layer in proportion from the top. There is a method to take out the polluted sand that includes the floating substance to downside while sending new sand from the top.
47101553	Fiber filter	A device that uses the handle-shape textile as the filter media to arrest the pollutant substance to the air gap of the textile tissue to make the filtered water clearly purified and the arrested pollutant substance is released to the outside when washing reversely.
47101554	Jar tester	A type of device that is designed to test the cohesive force and others in the sample when injecting the test chemicals to the waste water at the time of disposing the waste water.
47101555	Baffle wall	A structure that maintains the balance of flow speed and protects the floc generated from the cohesive area for the improvement of the adjustment of natural water volume and the sedimentation efficiency during the water purification process.
47101556	Water trough	A type of channel-type water holder that releases the upper water with the sedimentation of suspended solid from the settling pond or releases the washing water with the backwashing of filter layer from the filter paper.
47101557	Inclined plate settler	A facility that is designed to have high sedimentation effect in short period of time by shortening the sedimentation distance in the pond of sludge by installing several sloped plate.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

47101558	Foam breaker	A device that sprays and ejects water with a nozzle that is installed at a certain distance from the water surface to remove the foam.	
47101559	Scum removal equipment	A type of device that prevents the mixture to the discharged water by removing the scum on the water surface arising from settling pond, digester or others.	
47101560	Filter underdrain equipment	A structure that improves the equal filtering and backward flow functions in the rapid filtration.	
47101561	Adulteration treatment equipment	A type of device that is released and removed by moving and dehydrating with the screw press after filtering and separating from the rotary drum screen for the adulteration that is included in the night soil, sewer water, waste water on livestock and others.	
47101562	Drum screen	A facility that is made to have the pollutant water with solid matter to flow in to the drum-type rotating screen inside that has the water passes the screen to purify while the solid matter are filtered through the screen to be discharged.	
47101563	Wastewater coalescer	A type of device that separates in accordance with the specific gravity difference by assembling of finite oil particle blended in the emulsion condition in the waste water by consecutively condensed to submerge or emerge.	
47101564	Waste crusher	A type of device that crushes the ones that could be crushed with the blade crusher, such as Styrofoam, wooden material, and others, from the waste product arising from the waste substance with the size fit for the processing use.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

47101565	Waste gas burner	A device that uses the methane gas generated from the process of water purification and waste water disposition to use for fuel in boiler and others, and this device completely combusts the surplus gas after the fuel use.
47101566	Multiple media filter	A filter that is blended two or more of filter medias like the filter sand, anthracite, zeolite, active carbon, or sand for use.
47101567	Electrodialysis machine	A device that separates the substance in waste water by electrically moving through the ion exchange membrane.
47101568	Swimming pool cleaning unit	An integrated facility that is composed with a series of equipments used for re-supply with clean water by processing for filtering, sterilization, acidity control and others.
47101569	Wastewater plane screen	A facility that prevents the inflow or outflow of miscellaneous floating materials by installing on the entry part of the intake or grit chamber, the outflow part of the drainage pump facilities.
47101570	Oxidation ditch	A bio-chemical reactor that disassembles the polluted substance by supplying the oxygen with the mechanical aerator to the elliptical reaction vessel.
47101571	Chlorine gas neutralization unit	A device that neutralizes the chlorine gas by operating the ventilator that absorbs the gas and the circulating pump that sprays the neutral liquid simultaneously with the warning of gas leakage when leaking the chlorine gas.
47101572	Disc screen	A type of device that releases the sold matter to be screened while the flowing water passes to the rotating and empty disc-type of screen to purify.
47101573	Flocculator	A facility that makes the slow agitation to make the sedimentation easier by growing the finite floc into the larger floc.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

47101574	Sequencing batch reactor	A device that processes the polluted substance by implementing repeatedly for the processing like the inflow and reaction within a batch reactor, release of sludge and supernatant and sedimentation of mixed liquid.	
----------	--------------------------	--	--

1/27/2014

49211805	Lanyards		
49211806	Physical education equipment storage		
49211807	Physical education assessment tools		
49211808	Obesity measurement tool	A type of device that determines the obesity by measuring the thickness of the hypodermic fat of abdomen, waist and others by using the device that looks like the forceps.	
49211809	Body measurement tool	A type of tool that is designed to measure the length or weight of each part of body.	
49211810	Radar speed gun	A device that measures the speed of an object by using the Doppler effect and this is the speed meter that measures the change of frequency of reflected wave by sending the ultrasound and others to a moving object.	
49211811	Ergometer	A machine that measures several forces that a human moves the muscle. The most representative is the device with the shape of a bicycle.	
49211812	Trunk flexion measurement device	A type of device that is made to move the outline onto the paper or different record device as expresses the prominence and depression parts desired to measure of the trunk with its image.	
49211813	Jump meter	A type of device that is designed to test the instantaneous jumping capability, in other words, the explosive muscular strength by the momentary contraction of leg muscle by jumping high in vertical direction.	
49211814	Fatigue measurement instrument	Fatigue is the phenomenon that declines the bodily function with insufficient nerve-system and chemical control by the severe mental or physical activities. It is the device to measure the degree of such fatigue.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

49211815	Whole body reaction measurement system	Equipment that measures the whole body reaction through the stimulation of light or sound to take the jumping motion.	
49211816	Running analyzer	Equipment that uses to measure and analyze the running capability.	
49211817	Muscular strength measurement instrument	A type of device that is designed to find out the muscular strength by measuring the leg force and brachial muscular strength. It measures the estimated maximum muscular strength with the average power by the speed training and it is possible to measure the muscular endurance force to fit to the age of each gender for tested person.	
49211818	Medicine ball	A ball for physical strength that is used in throwing that is implemented to measure the explosive muscular strength that may quickly assert the muscular endurance in moment of time.	
49211819	Motion analysis system	Equipment that is made up by a series of system that may analyze the motion type, abnormal part, inaccurate part, repetition and others by consecutively filming the movement of human in camera or analyzing the record(data) in computer through tracing down the coordinate that uses the sensor.	
49211820	Grip dynamometer	Equipment that is to measure the isometric muscle power. It is designed to measure the palm power or grasping power of both right and left hands.	
49211821	Back leg chest dynamometer	A meter that measures the pulling power of the back, legs and chest. It is used by reading the figure shown by pulling it hard with straightening of the back from the crouching position by holding the handle at the end of the chain and stepping on the foothold of gauge board.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

49211822	Hand muscle evaluation kit	A device that examines the muscle power of hands and fingers. Three tools of grasping power, finger strength and angle of finger joint are structured for a set.	
49211823	Measuring instrument for human body	A type of device that measures the bodily shape of human for each part thereof. It is structured with the anthropometer, tactometer, calipers, ruler and others to measure the length and thickness of each part of head, waist, chest, ears, face, hands, feet, and other parts.	
49211824	Posture evaluation kit	A type of device that is in simple chart-type of tool that compares and measure the waist curvature, waist twist, bending direction and others in standing position. It is consisted of the scale plate inscribed with lattice-shape on the plastic board and the scale plate to measure the twist in the waist.	
49211825	Intelligence testing device	A device that measures the intelligence of child, mentally retarded child, or brain damaged person whether the intelligence is normal through several types of method. The type of the tester is determined depending on the age, disability condition and others of the tested person.	
49211826	Body feature measuring equipment	A type of device that is made to move the outline onto the paper or different record device as expresses the prominence and depression parts desired to measure of the face or body with its image.	
49211827	Finger tapping tester	A meter that measures the frequency of the finger up-down movement of certain distance and workers with trouble caused by vibration or workers with upper half of the body by the photo transistor.	
49211828	Hand stability tester	A type of device that measures the hand trembling before/after exercising or at normal times by using the light or others.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

49211829	Blood circulation analyzer	A type of device that measures the physical strength. It is the device that measures the volume of wastes in the blood by measuring the circulation of peripheral blood in fingers.	
49211830	Side step tester	A type of device that measures the agility that promptly moves the body.	
49211831	Sit up tester	A type of device that measures the muscular endurance--dynamic endurance-- of the abdomen. Basic measurement method is to measure the frequency of sit-ups as many as possible for 30 seconds (or 60 seconds) on the sensor plate installed.	
49211832	Balance tester	A type of device that measures the equilibrium as the body balance maintaining capability. It is structured with a set for the mat attached with the measurement sensor and the measurement terminal.	
49211833	Heart lung endurance tester	A type of device that measures the heart and lung function by using the aero-bike and others. This is the device to measure the maximum oxygen consumption volume needed for the track long distance runners, such as marathon and others or measure the non-oxygen power capability to measure the momentary heart and lung function of bicycle, weight lifting and others.

49221509	Roller skates or roller blades		
49221510	Sport caps		
49221511	Sports equipment bags		
49221512	Skateboard	A platform made generally of wood with a set of four wheels underneath made for riding on or for performing stunts.	
49221513	Player bench	A bench for players and the coaches in the stadium. It is sometimes set up to separate the field from stands.	
49221514	Judging chair or stand	A location or structure from which referees, judges or umpires can monitor games.	
49221515	Ball pump	A type of device that inserts the air with the power of human resources with the tube for various balls, bicycle tire, air mat and others.	
49221516	Starting gun	A gun which is used to inform the start in the record competition for several athletes in track, swimming, cycle and others who start simultaneously.	
49221517	Starting block	A foot supporter that is used when taking the position at the time of starting in track race.	
49221518	Net post	A type of device that is designed to secure the net in certain height in the ball games e.g., tennis, volleyball and badminton, where the net to cross the middle of the ground is required.	
49221519	Fencing sword or foil	A type of sword that is used in fencing competition.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

49221520	Athletic tool stand	A stand where the tools used in various track and field competitions are stored. It includes the mobile stand and box that place shot put, discus, javelin, hammer and others.
49221521	Sporting goods cart	A manual carriage or chariot that carries the device used in various sports games. It is manufactured exclusively for the equipment or manufactured for multi-purpose use.
49221522	Athletic training dummy	A doll that is made to practice the blocking or tackling in American football or doll in human-shape used for the practice of wrestling, Taekwondo and others. It is made by the canvass fabric to fill inside with sponge, fabric shredded in small pieces, sand, saw dust or water, air and the like.
49221523	Award podium	A stand where various events are undertaken for conferring the medal ceremony for high ranked prize winners in sports games or exchange certificates, winning money and the like. The middle of the stand is marked for number 1 and left side is marked for number 2 and right side is marked for number 3.
49221524	Fencing jacket	A metal jacket that senses electricity that athletes wear for evaluating the offensive point score in the fencing games.
49221525	Rubber inner tube for athletics	A rubber tube that is used in the ball of handball, volleyball, basketball, soccer, water polo, rugby, and other games.
49221526	Weight lifting belt	A belt that is made with leather and others as worn in the weightlifting games.
49221527	Bamboo sword	A sword designed for fencing practice that is made with four bamboo pieces.
49221528	Basketball backstop	Equipment that is installed in appropriate height on both sides of the floor to score in basketball games. It is consisted of ring, backboard and supporter.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

49221529	Fencing judging machine	A judging machine that uses the electricity used in the fencing game. When the tip of the sword is touched the opponent's body, the judging machine has the light on.	
49221530	Sports timer	A watch for time that is used in water polo games.	
49221531	Swinging pole	A pole that has both ends of the log tied with the iron wire in V-shape and hang on the height of 10~20cm from the ground like the swing.	
49221532	Playground system	Equipment that may have several play objects -- sliding, swing, pole climbing and others-- in one system at once.	
49221533	Swimming kickboard	A device that has the plate shape floating well on the water while swimming. The buoys in tubes with air are excluded.

UNSPSC v16_0901

1/27/2014

50131609	Prepared eggs	Includes any product that has been prepared to a specific recipe where eggs are the main ingredient in combination with other ingredients such as protein, vegetables or sauce. These ingredients form a valuable part of the product, rather than just serve as a seasoning or flavouring. Omelettes and souffles would be examples of prepared egg products.	
50131612	In shell table egg from chickens	Includes eggs in the shell that have been sorted to remove eggs of lower quality such as cracked and dirty eggs and are often sorted by size that have been laid by birds of the species Gallus gallus. Eggs may be unwashed, washed, washed and oiled, aged, and/or pasteurized in the shell. Excludes eggs that have been cooked.	
50131613	In shell table egg from ducks	Includes eggs in the shell that have been sorted to remove eggs of lower quality such as cracked and dirty eggs and are often sorted by size that have been laid by birds of the family Anatidae excluding the Tribe of Anserini. Eggs may be unwashed, washed, washed and oiled, aged, and/or pasteurized in the shell. Excludes eggs that have been cooked.	
50131614	In shell table egg from emus	Includes eggs in the shell that have been sorted to remove eggs of lower quality such as cracked and dirty eggs and are often sorted by size that have been laid by birds of the species Dromaius novaehollandiae. Eggs may be unwashed, washed, washed and oiled, aged, and/or pasteurized in the shell. Excludes eggs that have been cooked.

UNSPSC v16_0901

1/27/2014

50131619	In shell table egg from rheas	Includes eggs in the shell that have been sorted to remove eggs of lower quality such as cracked and dirty eggs and are often sorted by size that have been laid by birds of the genus Rhea. Eggs may be unwashed, washed, washed and oiled, aged, and/or pasteurized in the shell. Excludes eggs that have been cooked.	
50131620	In shell table egg from squabs or pigeons	Includes eggs in the shell that have been sorted to remove eggs of lower quality such as cracked and dirty eggs and are often sorted by size that have been laid by birds of the species Columba livia. Eggs may be unwashed, washed, washed and oiled, aged, and/or pasteurized in the shell. Excludes eggs that have been cooked.	
50131621	In shell table egg from turkeys	Includes eggs in the shell that have been sorted to remove eggs of lower quality such as cracked and dirty eggs and are often sorted by size that have been laid by birds of the genus Meleagris. Eggs may be unwashed, washed, washed and oiled, aged, and/or pasteurized in the shell. Excludes eggs that have been cooked.	
50131622	In shell table egg from specialty birds	Includes eggs in the shell that have been sorted to remove eggs of lower quality such as cracked and dirty eggs and are often sorted by size that have been laid by birds other than chicken, emus, geese, guineafowl, ostriches, quail, rhea, squabs, or turkeys. Eggs may be unwashed, washed, washed and oiled, aged, and/or pasteurized in the shell. Excludes eggs that have been cooked.	
50131623	In shell nest run egg from chickens	Includes chicken eggs in the shell that have not been sorted for quality.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

50131624	In shell nest run egg from birds other than chickens	Includes eggs from birds other than chicken that are in the shell and have not been sorted for quality.	
50131625	In shell checked and dirty egg industrial from chickens	Includes chicken eggs in the shell that have cracked shells and/or have dirt on the surface that makes the eggs unsuitable for use as a table egg. These eggs are typically those that were rejected during a quality sorting process. Eggs may be unwashed, washed, or washed and oiled. Excludes eggs that have been cooked.	
50131626	In shell checked and dirty egg industrial from birds other than chickens	Includes eggs in the shell from birds other than chicken that have cracked shells and/or have dirt on the surface that makes the eggs unsuitable for use as a table egg. These eggs are typically those that were rejected during a quality sorting process. Eggs may be unwashed, washed, or washed and oiled. Excludes eggs that have been cooked.	
50131627	Cooked egg from chickens	Includes chicken eggs that have been fully cooked in the shell. Eggs may be hard-cooked in the shell, hard-cooked with the shell removed, cooked and preserved in liquid, or sliced or diced after cooking.	
50131628	Cooked egg from birds other than chickens	Includes eggs that have been fully cooked in the shell from birds other than chicken. Eggs may be hard-cooked in the shell, hard-cooked with the shell removed, cooked and preserved in liquid, or sliced or diced after cooking.	
50131629	Egg products and substitutes from chickens	Includes any homogenous dried, frozen, liquid, or further processed content of a chicken egg after removal from the shell and without other added food ingredients (meat, cheese, vegetables). Excludes recipe-based egg-based products such as quiche mixes or mayonnaise.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

50131630	Decharacterized egg products from chickens	Includes any dried, frozen, or liquid content of a chicken egg after removal from the shell that has a substance added to distinguish the product as not fit for human consumption.	
50131631	Egg products and substitutes from birds other than chickens	Includes any homogenous dried, frozen, liquid, or further processed content of an egg after removal from the shell from birds other than chicken and to which other food ingredients (meat, cheese, vegetables) have not been added. Excludes recipe-based egg-based products such as quiche mixes or mayonnaise.	
50131632	Decharacterized egg products from birds other than chickens	Includes any dried, frozen, or liquid content of an egg after removal from the shell from birds other than chicken to which a substance has been added to distinguish the product as not fit for human consumption.	
50131633	Egg extract from chickens	Includes fractions of a component of a chicken egg for use in the pharmaceutical, cosmetic or food industry. Typical egg extracts are substances such as lysozyme, avidin, vitamins and lipids.	
50131634	Egg extract from birds other than chickens	Includes fractions of a component of an egg from a bird other than chicken for use in the pharmaceutical, cosmetic or food industry. Typical egg extracts are substances such as lysozyme, avidin, vitamins and lipids.	
50131635	Egg imitation	Includes any product that functionally and nutritionally resembles a liquid whole egg, egg yolk, or egg whites but does not contain any egg component.

50304421	Mediterranean mandarin oranges	The variety of mandarin oranges and tangerines known as mediterranean mandarin oranges	
50304422	Minneola tangelo oranges	This tangelo is 1/2 tangerine and 1/2 grapefruit. Characterized by a stem-end neck which tends to make the fruit appear pear or bell-shaped. This appearance has given rise to the name honeybell in the gift fruit trade, but the proper name remains minneola. The fruit is usually fairly large, typically 3 - 3½ inches in diameter. The peel color at peak maturity achieves a bright reddish-orange color. The peel is relatively thin, smooth, and tends to adhere to the internal fruit surface. Seed numbers are few, but variable, and range from 0 up to as many as 15 seeds per fruit	
50304423	Monica oranges	The variety of mandarin oranges and tangerines known as monica oranges	
50304424	Murcott honey oranges	The variety of mandarin oranges and tangerines known as murcott honey oranges	
50304425	Murcott tangors	The variety of mandarin oranges and tangerines known as murcott tangors

50324422	Dried minneola tangelo oranges	This tangelo is 1/2 tangerine and 1/2 grapefruit. Characterized by a stem-end neck which tends to make the fruit appear pear or bell-shaped. This appearance has given rise to the name honeybell in the gift fruit trade, but the proper name remains minneola. The fruit is usually fairly large, typically 3 - 3½ inches in diameter. The peel color at peak maturity achieves a bright reddish-orange color. The peel is relatively thin, smooth, and tends to adhere to the internal fruit surface. Seed numbers are few, but variable, and range from 0 up to as many as 15 seeds per fruit It has been dried for preservation.
50324423	Dried monica oranges	The variety of mandarin oranges and tangerines known as monica oranges that have been dried for preservation.
50324424	Dried murcott honey oranges	The variety of mandarin oranges and tangerines known as murcott honey oranges that have been dried for preservation.
