10101708	Live sardine fish	Member of clupeidae family. Genus is sardine. It is a small oily fish that lives in large schools in coastal waters.
10101709	Live red belly pacu fish	A type of omnivorous South American freshwater fish that is related to the piranha. Scientific name is piaractus brachypomus. Family is characidae. Genus is piaractus. Native to the Amazon, it is also known as gambitana, pacu blanco, pirapitinga, pirapating, pacu rojo, cachama blanca, morocoto.
10101710	Live peruvian rock seabass fish	A type of gamefish that lives in rocky and sandy coastal areas. Scientific name is palabrax humeralis. Family is serranidade. Other common names include: bagalo, cabrilla, cabrilla comun, cabrilla de roca, cabrilla gatito, cabrillones, cagalo, muni, cabrilla loca, cabrillon, lubina.
10101711	Live paiche fish	A type of tropical freshwater fish found in the Amazon and Orinoco river basins. Common names are branquina, yowarachi. It belongs to the osteoglossidae family. Genus is arapaima
10101712	Live mojarra fish	A type of prey and bait fish in many parts of the Caribbean, including the South American coast and Caribbean islands. Belongs to the sparidae, gerridae families and to the diplodus vulgaris species of the embiotocidae family. It is also known as mojarras de espinas largas, mojarritas, mojarras de aleta amarilla, mojarrita bandera, mojarra plateada, mojarra manchita, mojarra espanola o blanquilla, mojarra costera, mojarrita cubana, mojarrita esbelta or flaca, mojarrita pinta, or mojarrita de ley

10101713	Live mauri fish	A type of catfish native to Lake Titicaca in the Bolivian highlands. Scientific name is trichomycterus dispar. Family is trichomycteridae. Genus is trichomycterus. Other common names include mauri, mari and huita.
10101714	Live maparate fish	A type of catfish native to the Amazon. Scientific name is hypophthalmus marginatus. Family is pimelodidae. Genus is hypophthalmus. Its habitat is the lenitic and lotic environments of the Amazon, Orinoco, French Guyana and Suriname.
10101715	Live lumptail sea robin fish	A type of sea robin fish, also known as gurnard, which is a bottom-feeding member of the scorpaeniform fishes in the family triglidae. They get their name from their large pectoral fins, which, when swimming, open and close like a birds wings in flight. Scientific name is prionotus stephanophrys. Family is chordata. Genus is prionotus. It has white flesh. Other common names include cabrilla voladora, pez gallina, rubio volador, gallineta jorobada, vaca voladora.
10101716	Live llambina fish	A type of freshwater tropical fish found in the Amazon and Orinoco river basins. Scientific name is potamorhina altamazonica. Family is curimatidae. Genus is potamorhina. Common names include branquina, yowarachi.
10101717	Live ispi fish	A type of pupfish native to the Lake Titicaca region of Bolivia and Peru. It is a carnivorous plankton feeder and can reach a length between 9 and 22 centimetres. Scientific name is orestias ispi. Family is ciprinodontidae. Genus is orestias.

1/27/2014

10101718	Live frigate tuna fish or melva fish	A small type of tuna fish that lives in tropical and sub-tropical waters. Scientific name is <i>Auxis thazard</i> . Family is Scombridae. Genus is <i>Auxis</i> . Other common names are botellita, barrileto negro, cabana negra, barrilete negro.	
10101719	Live freshwater silverside fish	A variety of silverside fish found in freshwater. This species is different from the sea silverside as it does not have a protractile or expandable mouth and has a very elongated body. A closely related species from Argentina, <i>odontesthes bonaerensis</i> , is currently found in the Lake Titicaca region of the Bolivian and Peruvian altiplano. This species is morphologically different from the sea silverside in the number of gill-rakers or spines located in the upper , such as the native species <i>basilichthys archaeus</i> or river silverside.	
10101720	Live acarahuazu fish	A tropical freshwater fish native to Peru, Colombia, Brazil and French Guyana. It is also known as oscar, tigre oscar, pavon copaneca. Scientific name is <i>astronotus ocellatus</i> . Family is cichlidae. Genus is <i>astronotus</i> .	
10101721	Live arawana fish	A characteristic fish of the Amazonian jungle although it is also related to other Australian -- <i>scleropages jardinii</i> -- and Asian -- <i>scleropages formosum</i> -- species. Alternate names include pez dragon, pez mono. Scientific name is <i>osteoglossum bicirrhosum</i> . Order is osteoglossiform. Family is osteoglossidae.	
10101722	Live armored catfish or carachama	A tropical zone freshwater fish native to the Amazon river basin. Carachama means ribless; its scales are like armor. Scientific name is <i>pseudorinelepis genibarbis</i> . Family is loricariidae. Order is siluriformes.

1/27/2014

10101723	Live black prochilodus	A tropical zone freshwater fish found in the basins of the Amazon, Tocantins and Argentina rivers. Species is prochilodus nigricans. Family is prochilodontidae. Genus is prochilodus.	
10101724	Live blochs catfish	A tropical freshwater fish found in the basins of the Amazon and Orinoco rivers. Scientific names include pimelodus blochi, valenciennes, pimelodus clarias, bloch, pseudorhamdia macronema, bleeker, pseudorhamdia piscatrix, cope, glanis clarias bloch. Family is pimelodidae. Genus is pimelodus. Common names include cuatro lineas, moni.	
10101725	Live bobo mullet	A type of ocean and freshwater fish. Species is joturus pichardi. Genus is joturus --the only one. Family is mugilidae.	
10101726	Live cabinza grunt	A type of ocean fish in the monospecific isacia genus. Scientific name is isacia conceptionis. Family is haemulidae.	
10101727	Live carachi fish	A tropical zone freshwater fish native to highland lakes and tributary rivers in South America. It is a benthic carnivorous species. Scientific names: orestias agassii, orestias luteus, orestias olivaceus. Family is ciprinodontidae. Genus is orestias. Common names: carachi negro, carachi enano, carachi amarillo, gringo, punku, kello.	
10101728	Live cascafe fish	A tropical zone freshwater fish found in the trans-andean river basins of Peru and Ecuador. Scientific name is brycon atrocaudatus. Family is characidae. Genus is brycon.

Class 10101900 Insects

Commodity	Commodity Title	Definition	Synonyms
10101901	Butterflies		
10101902	Beetles		
10101903	Bees		
10101904	Silkworms		
10101905	Live chilean recluse spider	A type of poisonous spider native to South America. Its scientific name is <i>Loxosceles laeta</i> , a species of the <i>Sicariidae</i> family. It is considered to be the most dangerous spider of the <i>Loxosceles</i> genus. Its bite can generate severe systemic reactions, even death. Its web is irregular and is generally located in corners which do not trap prey effectively, hence the spider leaves to hunt its prey especially at night. Common names include <i>arana de rincon</i> or <i>arana de los rincones</i> .	
10101906	Live aphid lion or <i>Chrysoperla externa</i>	The aphid lion or <i>Chrysoperla externa</i> is an insect species used as a biological control agent for agriculture in tropical and warm regions of Central and South America. It is a highly adaptable predator that can be found in cold, warm and tropical climates. It can also tolerate carbamate and phosphorous organic pesticides.	
10101907	Live insidious flower bug	The orius <i>Insidiosus</i> is a bug considered as a beneficial insect as it is a predator of other insects that attack agricultural crops and is commonly used for biological control. Both adults and larvae are predators.

UNSPSC v16_0901

1/27/2014

10101908	Live southern black widow	A type of poisonous spider whose scientific name is <i>latrodectus mactans</i> , an araneomorph, the largest of the theridiidae family. The female has a red sand clock-shape stain in the lower side of the abdomen. It can be found in warm, dark places such as woodpiles. However, it also builds nests on plants. The black widows venom is mainly neurotoxic. It is also known as arana de lino or cuyucha, arana del trigo or arana de poto colorado, capulina spider, cazanpulga spider, American black widow.	
10101909	Live sugarcane borer or stem borer	The <i>diatraea saccharalis</i> are lepidopter insects that are one of the most destructive insect species to cultivated plants in many agricultural producing countries, such as Argentina and United States. Their larvae feed on stems and leaves, leaving holes that damage the plant, break it, prevent the transport of nutrients and substances and are the entry way for fungi, whose toxins can be dangerous to human health. They are also known as stem borers.

UNSPSC v16_0901

1/27/2014

10102004	Live chironius or vine snake	A type of tree-dwelling snake spanning 13 species. It lives in tropical rainforests and mountain forests of Central and South America and feeds on frogs. It is also known as culebra verde, cabeza verde de latinoamerica, sipo, culebra marron del amazonas.
10102005	Live clelia or mussurana snake	A type of snake spanning 10 species whose prey is lizards and other snakes. It lives close to forests and similar habitats. It is found from Mexico to Argentina East of the Andean Mountain Range. It is also known as mussurana, culebra marron de collar, mexican culebra ofiofaga.
10102006	Live drymarchon or indigo snake	A type of snake spanning 4 species that immobilizes its prey with its jaws. When disturbed, it whistles, vibrates its tail and flattens its neck. Although it can be found in different places, it prefers to be close to water. It is found from Florida and Texas in the USA to Argentina. It is also known as serpiente indigo, serpiente parda, culebra americana, cazador rabo negro.
10102007	Live epicrates or rainbow boa snake	A type of snake spanning 11 species that kills its prey by constriction. Some species are five meters long and others do not exceed one meter and fifty centimeters. It is found in Central and South America and the Caribbean islands. It is also known as boa cubana o maja, boa arco iris, jiboia parda, boa fords, boa manchada, boa de mona, boa de franjas de las bahamas.
10102008	Live giraffe	A large mammal native to Africa. Its scientific name is giraffa camelopardalis, an artiodactyla mammal species from the giraffidae family.

UNSPSC v16_0901

1/27/2014

10102009	Live bushmaster or lachesis snake	A type of venomous snake spanning 4 species. It is one of the largest snakes with a length that can reach up to three meters with seventy-five centimeters. Rather than a rattle, its tail has a corneal spine. It lives in cold microclimates of tropical rainforests, especially in mountains. This species is highly aggressive and attacks and bites its victims without provocation. The bites may easily be mortal. It is also known as mapana rayo, bushmaster, senior de los arbustos, surucucu, cascabel muda, shushupe, verrugos	
10102010	Live coral or micrurus snake	A type of venomous snake spanning 76 species. Its color is typically red, yellow or white and black rings. Its venom is a powerful neurotoxic-type venom, however there are relatively few instances of human snakebite due to its timid and peaceful nature. Almost all free coral snakes are ophiophagus. it ranges throughout the Americas, except in some mountainous areas, from the USA to 40 degrees south latitude in Argentina. It is also known as coral, coral snake, mboi-Cumbe, coralillo, candelilla, cobra arle	
10102011	Live paca	A species of rodent of the cuniculidae family. It lives near water sources in the tropical forests and mountains of Mexico, Paraguay, Argentina, Peru, Venezuela, Colombia, Ecuador and Bolivia. The paca is indiscriminately hunted due to its excellent and extremely soft meat, as well as for its pork-like flavor, which together with the destruction of its habitat threaten its survival as a species. it can be tamed and bred.

UNSPSC v16_0901

1/27/2014

10161538	Papelillo or copal blanco or bursera odorata tree	Tree from the bursera family and genus. Genus considered as succulent for its capacity to store liquid in trunk and branches	
10161539	Palo rosa tree	Tree of the apocynaceae family. The wood is dark pink. Tree can grow to height of 42 m -as found in jungles of Misiones in Argentina. Found in meridional Brazil, Paraguay and the Northeast of Argentina	
10161540	Molle serrano tree	Tree of the anacardiaceae family, with small yellowish white flowers and red fruit of one seed that has a doughy and sweet texture	
10161541	Molle costeno tree	Tree from the anacardiaceae family. Native to Brazil and extended to all tropical and sub-tropical areas of the Americas, with smallflowers and red bunches with turpentine smell	
10161542	Moena amarilla tree	Lauraceae family. Medium-size trees, light brown external bark and cream internal bark, with rapid oxidation to ferruginous, aromatic smell, oblong-elyptical leaves, when fresh terminal branches are blackish to whitish	
10161543	Moena alcanfor or canela moena tree	Tree from the lauraceae family. Medium to big size tree, branches that have creamy mottling in big areas. Internal pale pink bark with a cinammon-like smell.	
10161544	Mimosa tree	Coniferous tree, species acacia longifolia, of extended size, from the mimosaceae family - leguminosae. It produces thick yellow-golden axillary spikes.	
10161545	Marupa tree	Tree of the simaroubaceae family. It is found in high areas in well-drained sandy soils, in very wet forest formations. Creamy yellowish internal bark, with whitish veins, sandy texture and very sour taste from where its generic name comes from.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

10161546	Macambo tree	Tree of the sterculiaceae family. This rapid-growth tree has a small section and can be combined with several tree species. It is preferably found in alluvial soils and tollerates minimum floods. The pulp and seeds of this big fruit are very popular as food. Seeds are used in soups, fried or as snack.
10161547	Jacaranda tree	Tree of the bignoniaceae family. It grows in low elevations in wet climates. It has very bright purple tubular leaves and its fruit has the shape of castanets
10161548	Huayruro tree	Tree of the species ormosia coccinea of the leguminous family. It reaches a height of 30 m and produces beautiful red seeds with a with dot covering a third of its surface. These seeds are used in jewelry and other decorations. They are poisonous if eaten.
10161549	Grevilia tree	Tree from the proteaceae family. It grows rapidly and is used for fencing.
10161550	Floripondio bush	Bush from the solanaceae family. Reaches a height of 5 m and has oval leaves with asymetrical limbs at the base. It blooms from summer to autumn producing white aromatic flowers of 3 cm, that can have double petals.
10161551	Erica bush	Tree of the ericaceae family. It has whitish, hairy little branches, with leaves grouped into verticils of 1 or 2. flowers producing large quantities of flowers. Its root wood , with a bulb shape, is widely used in pipe manufacturing.
10161552	Cumala tree	Tree of the myristicaceae family. Reaches a height of 35 m. Corrugated trunk at the base
10161553	Copoazu tree	Tree of the malvaceae family. Originally from eastern Amazon, it is a sort of amazon white cocoa. Its natural habitat is the tropical rainforest in non flooding highlands

UNSPSC v16_0901

1/27/2014

10161554	Coral tree	Tree of the fabaceae or leguminosae family. It is a tree that reaches a height of 3,5 to 7.18 m, with thorny branches
10161555	Cocona bush	Bush of the species, solanum sessiliflorum of the solanaceae family, a species native to tropical America. Its fruit has a nutritional value beneficial for human consumption. The juice volume is 36 cm, the pulp and mucilage of ripened fruit are edible and are used in juice preparation
10161556	Chilean alamo tree	Tree of the species, popullus nigra of the salicaceae family. Typical of Chile's rural landscape, it has a colorful attraction in yellow tones during the autumn. Its trunk is grey, therefore its name and fruits are covered with cotton
10161557	Chestnut tree	Tree of the fagaceae family. Around 20-30 meters in height with a trunk measuring 2 m in diameter. Produces brownish color chestnuts
10161558	Ceder or cedro colorado tree	Tree of the meliaceae family. Straight trunk tree that reaches a height of 40 m, big crown, elongated, thick, rough and corrugated bark, with deep grooves in dark brown or grey.
10161559	Cedrela tree	Perennial or deciduous tree during the dry season, from the meliaceae family. Its wood is valued for its smell, structure and color. The cedrela odorata of Antilles is used in the preparation of havana cigars
10161560	Capirona tree	Tree of the rubiaceae family. The capirona is a wild tree and is up to 30 m of height, characteristic of wet and tropical areas. It has several medicinal properties including its bark that is used as an infusion for eye infections, diabetes and ovaric illnesses. It is also used in cataplasms for being an optimum cicatrizant and antimicotic

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

10161561	Caoba tree	Medium to big size tree that can reach more than 25 meters of height and up to two meters diameter. The heart is a deep red or brown color that created the term caoba color
10161562	Calistemo bush	Tree of the myrtaceae family reaching 6-7 m high. Flexible and hanging branches. Red flowers grouped in thick spikes of 7 cm approximately. Fruit in globe-shaped capsule, woody, inserted in the calyx tube of 6 mm diameter approximately.
10161563	Aroma tree	Mimosaceae family tree, usually known as aroma or huisache. It has multiple stems characterized by a expanded and dense crown, thorny branches and fragrant flowers.
10161564	Araucaria tree	From the araucariaceae family. Coniferous tree that may reach a height of 70 m, although in cultivation it usually does not reach these heights. It can be placed in a pot and be cultivated indoors as a small tree
10161565	Anallu caspi tree	Tree species known as anallu caspi tree, cordia ucalensis
10161566	Albizia tree	Fabaceae family. Deciduous tree reaching a height of 5 m, with a wide crown and arched branches. The fruit is a brown pod which is also a vegetable
10161567	Alamo carolino tree	Deciduous tree with more than 20 m of height of the salicaceae family. Heart-shaped young leaves, scarcely acuminate. For ornamental use, forest repair, industry
10161568	Cardenal tree	Known as china rose. It is a coniferous tree from the malvaceae family originally from East Asia. Flowers are big, red, strong and usually lack smell.

1/27/2014

10161810	Coleus limon plant	Ornamental plant easy to cultivate and of rapid growth that belongs to the lamiaceae family. The leaves stand out due to the difference of pigments inside them. Some areas of the leaves may totally lack chlorophyll	
10161811	Costilla de adan plant	Vine perennial plant of the araceae family. It has a thick stem and reaches a length of 20 m. It has big, shiny, roped, leathery leaves of 20 to 90 cm long x 20 to 80 cm wide	
10161812	Dumbcane plant	Plant of the araceae family, notable for its characteristic clear spots on their leaves.	
10161813	Diverse agave plant	Ornamental plant of the agavaceae family. Notable for its dark green leaves with cranberry and yellowish borders.	
10161814	Croto plant	Plant of the euphorbiaceae family genus. Its leaves are shiny and can be veined, big, narrow or with a laced form of different colors from yellow to all the red color range.	
10161815	Dracena plant	Plant of the asparagaceae family. It is a bush with one or several trunks of slow growth that may eventually reach 5 m high. Its leaves are linear to lanceolated.	
10161816	Falsa hiedra plant	Araliaceae family plant. Persistent, coriaceous leaves with complete borders and intense green color.	
10161817	Ichu plant	Plant from the poaceae family. Native to the South American Andean highlands and areas in Mexico and Guatemala. Used as forage for livestock.	
10161818	Iresine herbstii plant	Plant from the amaranthaceae family. Has several red elongated stems and is cultivated for its forage value. Persistent foliage with purple leaves.	
10161819	Elephant ear or oreja de elefante plant	Plant of the araceae family.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

10161820	Mijo plant	Plant from the poaceae family. Cultivated as cereal in arid areas of Africa and Asia, it reaches a height of 30 to 90 cm, it ends in a bunch of 5 to 7 spikes similar to a hand or claw fingers
10161821	Papyrus plant	Marsh plant of the cyperus genus, cyperaceae family. Long, thin, firm jade-color leaves with brown spikes of 10 to 30 cm long.
10161822	Rhapsis plant	Plant of the arecaceae family. It has grouped stems and is covered with persistent pods and fibrous pods.
10161823	Rhoeo plant	Herbaceous plant from the commelinaceae family. It has lanceolated and linear leaves about 30 cm long and 7 cm wide that are green on top and purple on the underside.
10161824	Sanguinaria roja plant	Plant of the oleaceae family. It has white flowers - although some species are yellow - and has a sweet and intense fragrance.
10161825	Stevia rebaudiana plant	Plant of the asteraceae family. Its leaves, lanceolated or elliptical and dented, are alternate, simple, bright dark green and rough surface, sometimes hairy of up to 5 cm long and 2 cm wide.

Class 10171500 Organic fertilizers and plant nutrients

Commodity	Commodity Title	Definition	Synonyms
10171501	Manure or guano		
10171502	Plant hormones		
10171503	Fish meal		
10171504	Compost		
10171505	Foliar nutrient	Foliar nutrients are sources of nourishment that are applied to foliage to boost nutrient density in crops.	
10171506	Humus	Substance composed of certain organic products derived from the decomposition of organic remains	
10171507	Urea fertilizer	Urea fertilisers are nitrogen rich organic plant and soil nutrient supplements	

Class 10171600 Chemical fertilizers and plant nutrients

Commodity	Commodity Title	Definition	Synonyms
10171601	Ammonium nitrate fertilizer	An important fertiliser with NPK rating (34% nitrogen), it is less concentrated than urea and does not lose nitrogen to the atmosphere.	
10171602	Potassic fertilizer		
10171603	Phosphatic fertilizer		
10171604	Sulphuric fertilizer		
10171605	Nitrogen Phosphorous Potassium Mixtures NPK		
10171606	Pure silica fertilizer	A fertilizer that has the soluble silicate as the main ingredient.	
10171607	Magnesium fertilizer	A fertilizer that contains magnesium compounds.	
10171608	Micro element fertilizer	A fertilizer containing small quantities of growth-enhancing elements such as carbon, oxygen and hydrogen that are essential to the growth of crops in mass.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

10171609	Silica phosphate fertilizer	A chemical fertilizer that contains phosphorus acid, silicic acid, magnesia and lime. It is used to reduce insect damage and add vitality plant root systems.	
10171610	Silica potassium fertilizer	A fertilizer that contains potassium as well as phosphoric acid, silicic acid, magnesia and lime. Silica potassium fertilizer helps reduce cold weather damage and physiological stress on plants.	
10171611	Calcium fertilizer	A fertilizer containing calcium which promotes the condensation reaction of the soil colloid, neutralizes acidity, and encourages active breeding of useful microbes.	
10171612	Superphosphate fertilizer	Superphosphate is a fertilizer produced by the action of concentrated sulphuric acid on powdered phosphate rock. It is used as maintenance fertiliser, providing a pool of soil solution P for pasturage	
10171613	Ammonium nitrate mixed with calcium carbonate fertilizer	A universal nitrogen fertilizer that can be applied to all types of soil and all plants. It is suitable for blending with other granulated fertilizers.	
10171614	Potassium chloride for agricultural use	Fertilizer ingredient for plant and crop growth	
10171615	Potassium sulphate	A soluble substance used in making fertilizers	
10171616	Diammonium hydrogenorthophosphate fertilizer	A soluble plant fertilizer which contains a great source of phosphorus and nitrogen	Diammonium phosphate

Class 10171700 Herbicides

Commodity	Commodity Title	Definition	Synonyms
10171701	Weed killer		
10171702	Fungicides		
10171703	Propanil	Selective contact herbicide with a short duration of activity used to control broad-leaved and grass weeds.

Class 10171800 Soil conditioners

Commodity	Commodity Title	Definition	Synonyms
10171801	Organic soil conditioner	A product used to improve the organic properties of soil to be appropriate for plant growth.	
10171802	Inorganic soil conditioner	A product used to improve the inorganic properties of soil to be appropriate for plant growth.	

Family 10190000 Pest control products

Class 10191500 Pesticides or pest repellents

Commodity	Commodity Title	Definition	Synonyms
10191506	Rodenticides		
10191507	Bird repellents		
10191508	Termite shields		
10191509	Insecticides		
10191510	Abamectin	Abamectin is a mixture of avermectins which are derived from the soil bacterium <i>Streptomyces avermitilis</i> . It contains avermectin B1A and avermectin B1B. These two components have very similar biological and toxicological properties. It is an effective insecticide and acaricide used to control a wide range of insect and mite pests of agronomic, fruit, vegetable and ornamental crops, and it is used by homeowners for control of fire ants.	
10191511	Fipronil	Fipronil is a member of the phenyl pyrazole class of pesticides that act on the nervous system of insects.	
10191512	Cypermethrin	Non systemic insecticide used to control a wide range of insects in fruits, vines, vegetables, cereals, maize, rice, cotton, forestry and ornamentals, etc.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

10191513	Deltamethrin	A potent insecticide , effective by contact and ingestion against wide range of pests. It prevents the sodium channels from functioning so that no transmission of nerve impluses can take place.	
10191514	Fenitrothion	Non systemic insecticide to control the chewing, sucking and boring insects in cereals, soft fruit, tropical fruit, vines, rice, sugar cane, vegetables, turf and forestry	
10191515	Chlorphyriphos	Non systemic insecticide to control Coleoptera, Diptera, Homoptera and Lepidoptera in soil or on foliage.	
10191516	Malathion	Non systemic insecticide to control Coleoptera, Diptera, Hemiptera, Hymenoptera and Lepidoptera in a wide range of crops	
10191517	Diazinon	Non systemic insecticide and acaricide to control the sucking and chewing of insects and mites in a very wide range of crops including deciduous fruit trees, citrus fruit, vines, olives, bananas, etc.	
10191518	Carbaryl	A type of insecticide that controls the growth of chewing and sucking insects, controls the growth of earthworms in turf and is used as an animal ectoparasiticide.

1/27/2014

11101525	Kieserite		
11101526	Carnallite		
11101527	Diatomaceous silica		
11101528	Activated alumina	Type of drying agent possessing a high absorption capacity, high surface area, high strength and thermal stability. Widely used as an absorbent, drying agent and catalyst carrier in chemical, petrochemical and fertilizer industries.	
11101529	Zeolite	An aluminosilicate mineral that has a microporous structure- pores smaller than 2 nanometers in diameter.	
11101530	Calcite	A carbonate mineral that is the most stable polymorph of calcium carbonate, CaCO ₃ . It has a Mohs hardness of 3, a specific gravity of 2.6 to 2.8, and its luster is vitreous in crystallized varieties. Color is white or none, though shades of gray, red, yellow, green, blue, violet, brown, or even black can occur when the mineral is charged with impurities.	
11101531	Serpentine	Any of a group of hydrous magnesium-rich silicate minerals. The composition of these common rock-forming minerals approximates Mg ₃ Si ₂ O ₅ OH ₄ . Serpentine is usually grayish, white, or green but may be yellow -chrysotile- or green-blue -antigorite. The green color is due to iron replacing magnesium.	
11101532	Peridot	A gem-quality forsteritic olivine. The chemical composition is Mg, Fe 2SiO ₄ , with Mg in greater quantities than Fe.	
11101533	Pyrophyllite	Very soft, pale-colored silicate mineral, hydrated aluminum silicate, Al ₂ OH ₂ Si ₄ O ₁₀ , that is the main constituent of some schistose rocks.

Class 11101900 Intermediate processed and refined ore products

Commodity	Commodity Title	Definition	Synonyms
11101901	Iron ore concentrate	Iron ore that has been further processed to concentrate iron content	
11101902	Nickel concentrate	An intermediate ore product which is produced from nickel ore and traded in the market	
11101903	Nickel briquette or compact	A form of nickel ore that has been processed to the point where it is 98 to 99 percent pure nickel.	
11101904	Nickel matte	An intermediate ore product produced from nickel ore and traded in the market	
11101905	Aluminum liquid	An intermediate product derived from processed aluminum ore which can then be casted into one or more aluminum alloys	
11101906	Copper concentrate	Copper ore that is processed to slurry form with a 30 percent copper purity level	
11101907	Copper cathode	Copper ore that has been processed and purified to 99 percent purity and formed into multi ton cathode shapes	
11101908	Manganese sinter or pellet	Manganese ore that has been sintered and or pelletized	
11101909	Manganese fines	A type of refined manganese ore sized to meet market demand.	
11101910	Manganese lumps	A type of refined manganese ore sized to meet market demand.	
11101911	Iron ore pellets	A type of refined iron ore sized to meet market demand.	
11101912	Iron ore lumps	A type of refined iron ore sized to meet market demand.	
11101913	Iron ore fines	A type of refined iron ore sized to meet market demand.	
11101914	Cobalt ore matte		
11101915	Zinc dust or powder or flakes

11121608	Bamboo		
11121610	Hardwoods		
11121612	Wood pith		
11121614	Teak wood	Teak (Tectona), is a genus of tropical hardwood trees in the family Verbenaceae, native to the south and southeast of Asia, and is commonly found as a component of monsoon forest	
11121615	Poplar wood	Populus is a genus of trees which includes the cottonwoods, poplars, and aspens, all of which are sometimes termed poplars (in some areas "popple").	
11121616	Pine wood	Pine wood is commercially among the most important of species used for timber in temperate and tropical regions of the world	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

11121617	Oak wood	The term oak can be used as part of the common name of any of several hundred species of trees and shrubs in the genus <i>Quercus</i> (from Latin "oak tree"), and some related genera, notably <i>Cyclobalanopsis</i> and <i>Lithocarpus</i> . Oaks are hardwood trees. Oak wood has a density of about 0.75 g/cm ³ , great strength and hardness, and is very resistant to insect and fungal attack because of its high tannin content
11121618	Maple wood	Trees or shrubs in the genus <i>Acer</i> are commonly called Maples. They are variously classified in a family of their own, the <i>Aceraceae</i> , or (together with the <i>Hippocastanaceae</i>) included in the family <i>Sapindaceae</i>
11121619	Cherry wood	Cherry can be described as a moderately hard and heavy wood; it is strong and stiff making it an ideal choice for wood flooring
11121620	Tornillo wood	Type of wood found in the Peruvian jungle of medium density.
11121621	Pashaco wood	A type of wood that has a low basic density and has a very pale brown color. It has good reaction to artificial drying without relevant risks as slight deformations. The Pashaco is an easy sawing wood and of good workability. However, it is prone to biologic attack and proper preservation treatment should be applied. The wood is used in indoor carpentry, drawers, doors, furniture, toys, scale models; it is suitable for making paper pulp.
11121622	Catahua wood	A type of light wood used to make panels, indoor lining, particle panel, laminated, veneer and plywood, formwork, drawers. Scientific name is <i>hura crepitans</i> L. Common names include catahua amarilla, habilla, assacu, catahua.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

11121623	Capirona wood	A wood derived from the capirona tree belonging to the rubiaceae family. It grows in lands with high organic content of the high and low jungle. The wood of this tree can be used in floors, parquet, moldings, pegs, navy construction, beams, bodywork, turnery, sport articles, tennis and ping pong rackets, tool handles.
11121624	Copaiba wood	A type of wood derived from the copaiba tree that belongs to the fabaceae family. Commonly known as copaiba, aceite de palo, arbol del aceite, copai or copaibi. It is a heavy, medium fine wood, easy to saw and good workability for carving. It is used in carpentry, flooring, indoor linings, parquet, plywood, floorboards, box preparation, moldings, formworks and laminations. In its preserved form it may be used in props or posts for fencing. it is ideal for particle panels and wood-cement panels.
11121625	Eucalyptus wood	A type of wood derived from the eucalyptus tree genus from the myrtaceae family. There are over 700 species, most of them from Australia. Currently, they are distributed in most part of the world and due to its rapid growth, they are frequently used in forest planting for paper in addition ot its ornamental value. it is used both in outdoor and indoor carpentry for doors, laminated profiles for windows, kitchen furniture, plywood panels and tongued and grooved flooring.
11121626	Utucuro wood	A type of wood derived from the utucuro tree which belongs to the family Malvaceae. The wood is used in joinery, lightweight structures, moldings

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

11121627	Ceiba wood	The Ceiba is a flowering tree comprised of 48 species belonging to the family Malvaceae. The new classifications include Chorisia species within this genus. It is native to Central America. The wood is widely used, mainly in industry and decorative laminate. Also known as Ceiba, pochote, Pongo, Huimba, Huimba white, black Huimba, Lupuna	pochote, pongo, huimba, white huimba, black huimba, lupuna

11121811	Cotton linter	Short, fuzzy fiber which remains stuck to cotton seeds after ginning. Used in the manufacturing of paper.	

Class 11121900 Perfumery products

Commodity	Commodity Title	Definition	Synonyms
11121901	Licorice roots		

Class 11122000 Engineered wood products

Commodity	Commodity Title	Definition	Synonyms
11122001	Plywood	A type of engineered board made from thin sheets of wood, called plies or wood veneers. The layers are glued together, each with its grain at right angles to adjacent layers for greater strength. There are usually an odd number of plies, as the symmetry makes the board less prone to warping and the grain on the outside surfaces runs in the same direction. The plies are bonded under heat and pressure with strong adhesives making plywood a type of composite material.	
11122002	Particleboard	A type of engineered wood product manufactured from wood particles, such as wood chips, sawmill shavings, or even saw dust, and a synthetic resin or other suitable binder, which is pressed and extruded. Particleboard is a type of fiberboard, a composite material, but it is made up of larger pieces of wood than medium-density fibreboard and hardboard.	
11122003	Medium density fiberboard	Building material which combines the technologies of the hardboard and particleboard industries and is manufactured from wood fibers combined with a synthetic resin, usually urea formaldehyde. It is intended for interior use.

UNSPSC v16_0901

1/27/2014

11122004	Wood veneers	Wood veneers are constructed of thin slices of real wood which are adhered to the surface of a piece of furniture to give it the glowing appearance of real wood.	
11122005	Glued laminated timber	A type of structural timber composed of several layers of dimensioned timber glued together.	
11122006	Treated timber	A type of timber that is injected or coated with chemicals to prevent decay or other damage insects or humidity.	
11122007	Densified wood	Wood impregnated with synthetic resins.	

Family 11130000 Non edible animal products

Class 11131500 Animal hides and skins and animal textile materials

Commodity	Commodity Title	Definition	Synonyms

11151513	Ceramic fibers		
11151514	Polymer aramid fibers		
11151515	Asbestos fibers		
11151516	Polyurethane fiber or spandex	A synthetic fiber known for its exceptional elasticity.It is stronger and more durable than rubber.	
11151517	Polyvinyl alcohol fiber	This fiber is said to be the most similar to cotton fibers since it is the most moisture absorbent among synthetic fibers.	
11151518	Polyethylene fiber	A fiber derived from polyethylene produced by polymerizing ethylene. It is high in strength, but low in heat resistance.	
11151519	Rock wool or mineral wool	A fiber made from natural or synthetic minerals or metal oxides heated to molten rock at a temperature of about 1600 degrees centigrade, through which a stream of air or steam is blown.	
11151520	Human hair worked	Used in making wigs,false beards, eyebrows and eyelashes, switches and the like.	
11151521	Human hair unworked	Unworked human hair whether or not washed or scoured.

UNSPSC v16_0901

1/27/2014

11162132	Damask fabric	A reversible figured fabric of silk, wool, linen, cotton, or synthetic fibers with a pattern formed by weaving	
11162133	Satin fabric	A type of woven fabric that typically has a glossy surface and a dull back.	
11162134	Waterproof fabric	High water resistant fabric that prevents water entry but allows an excellent ventilation and outlet of sweat vapor.	
11162135	Embroidered fabric	A type of fabric containing detailing on a section of the fabric.	
11162136	Narrow weave fabric	Narrow fabrics of wrap without weft assembled by adhesive	
11162137	Tufted fabric other than carpet	Textile fabric woven a certain way	
11162138	Gauze fabric	A type of narrow weave fabric used for bandaging	
11162139	Animal hair or horsehair fabric		

Class 11162200 Nonwoven fabrics

Commodity	Commodity Title	Definition	Synonyms
11162201	Spunbonded nonwovens		
11162202	Spunlaced nonwovens

Class 11162400 Batting

Commodity	Commodity Title	Definition	Synonyms
11162401	Cotton batting	A type of batting made from cotton.	
11162402	Synthetic batting	A type of batting made from synthetic fiber.	

Family 11170000 Alloys

Class 11171500 Basic steels

Commodity	Commodity Title	Definition	Synonyms
11171501	E24-2 or A37-2 steel	Basic steel, with the following main characteristics: C < 0,18 %, P < 0,50 %, S < 0,50 %, balance = Fe + minor metallurgical pollutions. One of the most common basic irons used in the construction industry.	

Class 11171600 Stainless steel alloys

Commodity	Commodity Title	Definition	Synonyms
11171601	Stainless steel alloy 304	A type of stainless steel alloy with the following main characteristics: Cr 17,00 to 19,00 percent, Ni 8,00 to 10,00 percent, balance equals Fe + minor metallurgical pollutions. This commodity is probably the most common stainless steel used in industries to protect parts from moist corrosion	
11171602	Stainless steel alloy 304I	A type of stainless steel alloy with the following main characteristics: Cr 18,00 to 20,00 percent, Ni 10,00 to 12,00 percent, balance equals Fe + minor metallurgical pollutions. This commodity matches a stainless steel quality used to manufacture some parts like forks and knives.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

11171603	Stainless steel alloy 316	A type of stainless steel alloy with the following main characteristics: Cr 16,50 to 18,50 percent, Ni 10,00 to 13,00 percent, Mo 02,00 to 02,50 percent, balance equals Fe + minor metallurgical pollutions. This stainless steel enables protection against moisture and heat corrosion.	
----------	---------------------------	--	--

11171604	Ferro nickel alloy	Ferro nickel is a stainless steel based alloy	
----------	--------------------	---	--

Class

Commodity	Commodity Title	Definition	Synonyms
11171701	Z90WDCV6542 or M2 high speed steel	High speed steel alloy, with the following main characteristics: W 6,40 %, Mo 5 %, Cr 4,20 %, V 1,80 %, C 0,9 %, balance = Fe + minor metallurgical pollutions	

11171702	Z90WDKCV65542 or M35 high speed steel	High speed steel alloy, with the following main characteristics: W 6,40 %, Mo 5 %, Co 4,80%, Cr 4,20 %, V 1,80 %, C 0,93 %, balance = Fe + minor metallurgical pollutions	
----------	---------------------------------------	---	--

Class

Commodity	Commodity Title	Definition	Synonyms
11171801	Inconel 600 super alloy	Nickel-based alloy, with the following main characteristics: Ni 72,00 % min., Cr 14,00 to 17,00 %, Fe 6,00 to 10,00 %, balance = minor metallurgical pollutions. This alloy is suitable for high temperature applications where corrosion resistance is important. Frequently used for heat-treating baskets.	

Class

Commodity	Commodity Title	Definition	Synonyms
11171901	TA6V super alloy	Titanium-based alloy, with the following main characteristics: Al 06,00 %, V 04,00 %, balance = Ti + minor metallurgical pollutions. This alloy is mainly used in the aircraft industry.	

Class

UNSPSC v16_0901

1/27/2014

11172001	Aluminum alloy 7178	Aluminum based alloy with the following main characteristics: Zn 6,30 to 7,30 percent, Mg 2,40 to 3,10 percent, Cu 1,60 to 2,40 percent, Fe 1,00 percent, balance equals Al + minor metallurgical pollutions. Alloy 7178 is a high strength alloy with magnesium and copper as the major alloying elements. It is heat treatable and develops improved mechanical properties from precipitation hardening.	
11172002	Aluminum remelt	Aluminum product consisting of aluminum pieces that have been remelted into specific shapes. The fact that they have been melted twice differentiates them from regular aluminum products	
11172003	Aluminum iron alloy	An alloy consisting of a blend of aluminum and iron.	

Class

Commodity	Commodity Title	Definition	Synonyms
11172101	Pygmalion or 846 alloy	Cobalt-based alloy, with the following main characteristics: Co 64,00 %, Cr 28,50 %, Mo 6,00 %, balance = minor metallurgical pollutions	

Class

Commodity	Commodity Title	Definition	Synonyms
11172201	Magnesium aluminum alloy	A magnesium alloy used to improve the fabrication property of aluminum	

Class

Commodity	Commodity Title	Definition	Synonyms
11172301	Ferro manganese alloy	A manganese based alloy traded as a commodity	
11172302	Med carbon ferro manganese alloy	A type of manganese based alloy traded as a commodity	
11172303	Silicon manganese alloy	A type of manganese based alloy traded as a commodity	

UNSPSC Codeset

Family

Class

Commodity	Commodity Title	Definition	Synonyms
11181501	Molybdenum oxide	Oxide from molybdenum metal. Used for the manufacturing of some alloys	
11181502	Titanium oxide	As a pigment of high refringence, titanium dioxide is the most widely used white pigment because of its brightness and very high refractive index (n=2.4), in which it is surpassed only by a few other materials. When deposited as a thin film, its refractive index and colour make it an excellent reflective optical coating for dielectric mirrors and some gemstones	
11181503	Indium oxide	Indium oxide is used in some types of batteries, thin film infrared reflectors transparent for visible light (hot mirrors), some optical coatings, and some antistatic coatings.	
11181504	Tin oxide	Tin oxide is mainly used to make transparent conductive coatings for liquid crystal displays, flat panel displays, plasma displays, touch panels, electronic ink applications, organic light-emitting diodes, and solar cells, and antistatic coatings and EMI shieldings.	
11181505	Sealing clay	A type of clay with a high quality sealing functionality.	
11181506	Vanadium oxide	A compound of vanadium and oxygen.	
11181507	Nickel oxide	Nickel Oxide	
11181508	Manganese oxide	A type of non ferrous oxide produced when manganese is further processed from ore.	
11181509	Artificial corundum	An artificial rock-forming mineral.

12131501	Dynamite		
12131502	Explosive cartridges		
12131503	Propellant explosives		
12131504	Explosive charges		
12131505	Plastic explosives		
12131506	Aluminized explosives		
12131507	Ammonium nitrate explosives		
12131508	Nitroglycerin powder explosives		
12131509	Ammonium nitrate and fuel oil ANFO	Ammonium nitrate prill is mixed with fuel oil as blasting agent.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12131510	White phosphorus	A material made from a common allotrope of the chemical element phosphorus that is used in smoke, tracer, illumination and incendiary munitions. White phosphorus is a translucent waxy solid that quickly becomes yellow when exposed to light. For this reason it is also called yellow phosphorus. It is highly flammable and pyrophoric (self-igniting) upon contact with air as well as toxic (causing severe liver damage on ingestion and phossy jaw from chronic ingestion or inhalation). The odour of combustion of this form has a characteristic garlic smell. White phosphorus is only slightly soluble in water and it can be stored under water. Indeed, white phosphorus is only safe from self-igniting when it is submerged in water. It is, however, soluble in benzene, oils, carbon disulfide, and disulfur dichloride	WP

12142103	Ammonia		
12142104	Carbon dioxide gas CO2		
12142105	Industrial air		
12142106	Inert gas mixtures		
12142107	Hydrogen sulfide	A colorless, toxic, flammable gas that is responsible for the foul odor of rotten eggs and flatulence.	
12142108	Carbon monoxide	Carbon monoxide with the chemical formula CO, is a colorless, odorless, and tasteless gas.	
12142109	Dry ice	Solidified carbon dioxide that changes to a gas as it warms. It can be used as a coolant to induce a cold climate for products that are required to remain frozen during transport. It can also be used to provide a cool steam which clings to the floor of a stage, or for multiple other uses.	
12142110	Liquid ammonia	Compressed ammonia gas.	

Class 12142200 Isotopes

Commodity	Commodity Title	Definition	Synonyms
12142201	Deuterated solvents

Class 12164200 Retarders			
Commodity	Commodity Title	Definition	Synonyms
12164201	Acid corrosion inhibitors		
Class 12164300 Iron controllers			
Commodity	Commodity Title	Definition	Synonyms
12164301	Iron control additives		
12164302	Iron sequestering agent	A specialized additive for preventing the precipitation of metal compounds in oil well formations.	
12164303	Iron corrosion inhibitor	An additive to inhibit formation of rust, e.g., iron oxides, usually red oxides, formed by the reaction of iron and oxygen in the presence of water or air moisture.	
Class 12164400 Non emulsifiers			
Commodity	Commodity Title	Definition	Synonyms
12164401	Non emulsifying additives		
Class 12164500 Food or drug additives			
Commodity	Commodity Title	Definition	Synonyms
12164501	Preservatives		
12164502	Flavours or extracts		
12164503	Fragrance additives		
12164504	Sweeteners		
12164505	Excipient	An inactive substance used as a carrier for the active ingredients of a medication.	
12164506	Tablet binder	A substance that holds the ingredients in a tablet together.	
12164507	Tablet coating	A substance that protects tablet ingredients from deterioration by moisture in the air and makes large or unpleasant-tasting tablets easier to swallow.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12164508	Disintegrant	Substance that expands and dissolves when wet causing the tablet to break apart in the digestive tract, releasing the active ingredients for absorption.	
----------	--------------	--	--

12164509	Anticaking agent	A substance used in such things as table salt to keep the product from forming lumps, making it better for packaging, transport, and for the consumer.	
----------	------------------	--	--

Class

Commodity	Commodity Title	Definition	Synonyms
12164601	Sizing agent	A substance that is applied to fibers during paper manufacture in order to curb their tendency to absorb liquids by capillary action thereby keeping the ink on the surface of the paper where it was intended to remain.	
12164602	Thickening agent	A substance which, when added to a mixture, increase its viscosity without substantially modifying its other properties including its chemical properties. They provide body, increase stability, and improve suspending action.	
12164603	Optical brightener	A type of additive that absorbs light in the ultraviolet and violet region of the electromagnetic spectrum, and re-emits light in the blue region. These additives are designed to enhance the appearance of colours in fabrics and papers.	
12164604	Antistatic agent	A compound used for treatment of materials or their surfaces in order to reduce or eliminate buildup of static electricity generally caused by the triboelectric effect. Its role is to make the surface or the material itself slightly conductive	
12164605	Micro flocculant	Polymeric additive used to improve filler distribution in paper pulp.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12164606	Light and ultraviolet UV stabilizer	An additive used frequently in plastics, including cosmetics and films. The primary function is to protect the substance from the long-term degradation effects from light, most frequently ultraviolet light. Different UV stabilizers are utilized depending upon the substrate, intended functional life, and sensitivity to UV degradation.	
----------	-------------------------------------	---	--

Class

Commodity	Commodity Title	Definition	Synonyms
12164701	Antiseptic additive	A substance that discourages the growth of microorganisms. It is added to food, medicines and other products to prevent decomposition of the product.	

Class

Commodity	Commodity Title	Definition	Synonyms
12164801	Cement water reducing agent	A mixing agent that disperses cement particles by charging them with electricity when mixing cement and water. It has the effect of increasing the cement contact area with water.	
12164802	Water swelling or water stop agent	A chemical product that expands or swells upon contact with water, thereby sealing off water from the materials it is applied to.	
12164803	Structural water repellent	An additive used to make construction materials waterproof or water resistant by use of fatty acids to block pores within the concrete, preventing water passage.	

Class

Commodity	Commodity Title	Definition	Synonyms
12164901	Urethane waterproof coating	A urethane-based coating used for waterproofing external walls, roofs and other outdoor structures.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12164902	Asphalt waterproof coating	A waterproofing agent that works by spraying structures with a rubber asphalt emulsion and coagulation materials dispensed by a multi-headed sprayer.	
12164903	Epoxy waterproof coating	A waterproofing coating whose main ingredient is epoxy. It is resistant to abrasion and chemical penetration which makes it ideal to apply in waterproofing of water supply system and waste water treatment plants and water tanks.	
12164904	Inorganic waterproof coating	A slurry waterproofing agent injected into a cement mixture where it coats the particles of cement, silica and ceramic minerals.	
12164905	Waterproof admixture	A waterproofing agent that comes in powdered or liquid form used for mixing with concrete at the time of pouring of concrete. It increases water resistance of concrete structure itself.	

Class

Commodity	Commodity Title	Definition	Synonyms
12165001	Concrete non shrinkage agent	A mixing agent that prevents shrinkage of concrete under curing or hardened state for the purpose of preventing cracks on the concrete surface due to contraction that occurs in poured concrete.	

Class

Commodity	Commodity Title	Definition	Synonyms
12165101	Polymer gel	Polymers used in enhanced oil recovery solutions for in-depth conformance and sweep efficiency improvement	
12165102	Dispersant surfactant	Dispersant or colloidal surfactants used in enhanced oil recovery solutions for in-depth conformance and sweep efficiency improvement	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12165103	Alkali polymer surfactant ASP	Engineered alkali, polymer, surfactant dilutions used in enhanced oil recovery solutions for full field residual oil sweep	
12165104	Surfactant polymer SP	Engineered surfactant polymer dilutions used in enhanced oil recovery solutions for full field residual oil sweep	

Family 12170000 Colorants

Class 12171500 Dyes

Commodity	Commodity Title	Definition	Synonyms
12171501	Fluorescent dyes		
12171502	Phthalein dyes		
12171503	Rosaniline dyes		
12171504	Food or drug or cosmetic safe FDC dyes		
12171505	Laked		
12171506	Natural dyes		
12171507	Sulfur dye	Sulfur dyes are two part "developed" dyes used to dye cotton with dark colors such as the dark black in socks and the indigo blue of the common blue jean. These are some of the most extensively used dyes in the textile industry.	
12171508	Vat dye	Vat dyes are essentially insoluble in water and incapable of dyeing fibres directly. However, reduction in alkaline liquor produces the water soluble alkali metal salt of the dye, which, in this leuco form, has an affinity for the textile fibre.	
12171509	Reactive dye	Reactive dyes utilize a chromophore containing a substituent that is capable of directly reacting with the fibre substrate. The covalent bonds that attach the reactive dye to natural fibers make it among the most permanent of dyes.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12171510	Solvent dye	A solvent dye is a dye soluble in organic solvents. It is usually used to color organic solvents, hydrocarbon fuels, waxes, lubricants, plastics, and other hydrocarbon-based nonpolar materials.	
12171511	Acid dye	Acid dye is a member of a class of dye that is applied from an acidic solution. In the home or art studio, the acid used in the dyebath is often vinegar (acetic acid) or citric acid.	

Class

Commodity	Commodity Title	Definition	Synonyms
12171602	Inorganic metal oxides		
12171603	Carbon black		
12171604	Titanium dioxide		
12171605	Organic pigments		
12171606	Zeaxanthin	Zeaxanthin is one of the most common carotenoid alcohols found in nature. It is the pigment that gives paprika, corn, saffron, and many other plants their characteristic color. It is also found in the macula of the human retina, as well as the human crystalline lens. There it is thought to play a role in protection against age-related macular degeneration (AMD) and age-related cataract formation. It may also protect against some forms of cancer.	
12171607	Paris green	A common name for copper(II)-acetoarsenite, or C.I. Pigment Green 21, an extremely toxic blue green chemical used as a pigment.	
12171608	Caput mortuum	A purple variety of haematite iron oxide pigment also known as cardinal purple used in oil paints and paper dyes.	
12171609	Cadmium green	A class of pigments that have cadmium as one of the chemical components. Result of mixing cadmium yellow with viridian to give a bright, pale green mixture called cadmium green.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12171610	Cadmium orange	A class of pigments that have cadmium as one of the chemical components.Cadmium orange is an intermediate cadmium sulfoselenide.
12171611	Cadmium yellow	A class of pigments that have cadmium as one of the chemical components.Cadmium yellow is cadmium sulfide (CdS).
12171612	Cadmium red	A class of pigments that have cadmium as one of the chemical components.Cadmium red is cadmium selenide (CdSe).
12171613	Red ochre	A pigment made from naturally tinted clay. It has been used worldwide since prehistoric times. Chemically, it is hydrated iron (III). oxide.
12171614	Yellow ochre	A pigment made from naturally tinted clay. It has been used worldwide since prehistoric times. Chemically, it is hydrated iron (III) oxide.
12171615	Sanguine	A red earth pigment used in the manufacture of artists chalks or pastels.
12171616	Prussian blue	A dark blue pigment used in paints and formerly in blueprints.Alternative names: preu-¼ischblau or berliner blau (German); berlin blue (English).
12171617	Venetian red	A light and warm pigment that provides a darker shade of scarlet, derived from nearly pure ferric oxide (Fe2O3) of the hematite type.
12171618	Chrome green	One of the principal oxides of chromium used as a pigment.Commonly called institutional green.
12171619	Aureolin	A pigment used in oil and watercolor painting.Sometimes called cobalt yellow, its chemical composition is potassium cobaltinitrite.
12171620	Chrome yellow	A natural yellow pigment made of lead chromate (PbCrO4). Because it tends to oxidize and darken on exposure to air over time, and contains lead, it has been largely replaced by Cadmium Yellow.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12171621	Fluorescent pigment	An inorganic pigment that radiates fluorescent light upon contact with radiant ray or electron beam with wavelength shorter than visible ray or ultraviolet ray.	
----------	---------------------	--	--

Class 12171700 Color compounds and dispersions

Commodity	Commodity Title	Definition	Synonyms
12171701	Polymer masterbatches		
12171702	Pigment dispersions		
12171703	Inks

	12191601	Alcohol solvents		
	12191602	Active solvents		
Family	12350000	Compounds and mixtures		
Class	12352000	Aliphatic and aromatic compounds		

Commodity	Commodity Title	Definition	Synonyms
12352001	Alkanes		
12352002	Alkenes		
12352003	Alkynes		
12352005	Aromatic or heterocyclic compounds		
12352006	Toluene	A mono-substituted benzene derivative, i.e., one in which a single hydrogen atom from a group of six atoms from the benzene molecule has been replaced by a univalent group, in this case CH ₃ . As such, its IUPAC systematic name is methylbenzene. It is an aromatic hydrocarbon that is widely used as an industrial feedstock and as a solvent. Like other solvents, toluene is sometimes also used as an inhalant drug for its intoxicating properties; however, inhaling toluene has potential to cause severe neurological harm. Toluene is an important organic solvent, but is also capable of dissolving a number of notable inorganic chemicals such as sulfur, iodine, bromine, phosphorus, and other non-polar covalent substances.	

Class	12352100	Organic derivatives and substituted compounds		
-------	----------	---	--	--

Commodity	Commodity Title	Definition	Synonyms

12352129	Amidines or imidines		
12352130	Acrylate or methacrylate intermediates		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12352131	Pyrrolidone	An organic compound used in industrial settings as a high-boiling non-corrosive polar solvent for a wide variety of applications. It is an intermediate product in the manufacture of polymers.	
12352132	Triclosan	A potent wide spectrum antibacterial and antifungal agent. Used as an ingredient in many detergents, dish-washing liquids, soaps, deodorants, cosmetics, lotions, anti-microbial creams, various toothpastes, and an additive in various plastics and textiles.	
12352133	Freeze conditioner	A chemical compound sprayed over mined coal to keep it from freezing in railroad cars.	
12352135	Propylene glycol	A liquid alcohol used as a solvent in antifreeze and in the food, plastics, and perfume industries. Also called 1,2-propanediol or propane-1,2-diol.	
12352136	Triethylene glycol	A liquid alcohol used chiefly as a solvent and in medicine as an air disinfectant. Also called TEG, or triglycol	
12352137	Ethylene glycol	A liquid alcohol used as an antifreeze in cooling and heating systems and as an additive in the manufacture of polyesters.

UNSPSC v16_0901

1/27/2014

12352138	Methyl ethyl ketone	An organic compound with the formula $\text{CH}_3\text{C}(\text{O})\text{CH}_2\text{CH}_3$. This colorless liquid ketone has a sharp, sweet odor reminiscent of butterscotch and acetone. It is produced industrially on a large scale, and also occurs in trace amounts in nature. It is soluble in water and is commonly used as an industrial solvent. In this form it is used in processes involving gums, resins, cellulose acetate and nitrocellulose coatings and in vinyl films. For this reason it finds use in the manufacture of plastics, textiles, in the production of paraffin wax, and in household products such as lacquer, varnishes, paint remover, a denaturing agent for denatured alcohol, glues, and as a cleaning agent.	MEK, Butanone

12352301	Inorganic acids		
12352302	Inorganic metal salts		
12352303	Inorganic oxides		
12352304	Inorganic peroxides		
12352305	Inorganic hydroxides		
12352306	Inorganic hydrides		
12352307	Acid halides or its substitutes		
12352308	Silicates	Silicates includes oxygenated compounds containing silicon eg: asbestos, talc etc. their applications vary and may be fillers in plastics, rubber, cements.	
12352309	Silica	Silica is pure sand and inorganic in nature with applications like in ceramics, glass, abrasives, etc.	
12352310	Silicones	Silicones are siloxane polymers based on silicons and oxygen used for adhesives, sealants etc	
12352311	Alumina and other aluminum compounds	Alumina and other aluminium compounds readily absorb water from air and are powdery compounds of aluminum used in varied application based on the use and perspective of the same chemistry by different people.	
12352312	Potassium permanganate		
12352313	Trifluoroacetic acid TFA	A carboxylic acid and reagent with the formula CF_3CO_2H used frequently in organic synthesis because of a combination of convenient properties: volatility, solubility in organic solvents, and its strength. It is also less oxidizing than sulfuric acid but more readily available in anhydrous form than hydrochloric acid.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12352322	Sulphuric acid	<p>A highly corrosive strong mineral acid with the molecular formula H₂SO₄. It is a pungent, colorless to slightly yellow viscous liquid which is soluble in water at all concentrations. It is widely produced with different methods, such as contact process, wet sulfuric acid process and some other methods. Sulfuric acid is produced from sulfur, oxygen and water via the conventional contact process (DCDA) or the wet sulfuric acid process (WSA). Most sulfuric acid production (60 percent) is consumed for fertilizers, particularly superphosphates, ammonium phosphate and ammonium sulfates. About 20 percent is used in chemical industry for production of detergents, synthetic resins, dyestuffs, pharmaceuticals, petroleum catalysts, insecticides and antifreeze, as well as in various processes such as oil well acidizing, aluminium reduction, paper sizing, water treatment. About 6 percent of uses are related to pigments and include paints, enamels, printing inks, coated fabrics and paper, and the rest is dispersed into a multitude of applications such as production of explosives, cellophane, acetate and viscose textiles, lubricants, non-ferrous metals and batteries.</p>

1/27/2014

12352323	Hydrochloric acid	A clear, colorless, highly pungent solution of hydrogen chloride (HCl) in water. It is a highly corrosive, strong mineral acid with many industrial uses. Hydrochloric acid is found naturally in gastric acid. It is used in the chemical industry as a chemical reagent in the large-scale production of vinyl chloride for PVC plastic, and MDI/TDI for polyurethane. It has numerous smaller-scale applications, including household cleaning, production of gelatin and other food additives, descaling, and leather processing

Family 12360000 Pharmaceutical drug precursors

Class 12361500 Narcotic drug precursors

Commodity	Commodity Title	Definition	Synonyms
12361501	1-phenyl-2-propanone	An organic compound with the chemical formula $C_6H_5CH_2C(O)CH_3$. It is a colorless oil that is soluble in organic solvents. This substance is used in the manufacture of methamphetamine and amphetamine, where it is commonly known as P2P	Phenylacetone, P2P

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12361502	3,4-methylenedioxyphenyl-2-propanone	A chemical compound consisting of a phenylacetone moiety substituted with a methylenedioxy functional group. It is commonly synthesized from either safrole which, for comparison, is 3-[3,4-(methylenedioxy)phenyl]-2-propene) or its isomer isosafrole via oxidation using the Wacker oxidation or peroxyacid oxidation methods. It is a controlled substance by the US Government on account of its relation to the MDxx chemical class, MDP2P, as well as safrole and isosafrole.	piperonyl methyl ketone, MDP2P, PMK
12361503	Gamma-butyrolactone	A hygroscopic colorless oily liquid with a weak characteristic odor and is soluble in water. GBL is a common solvent and reagent in chemistry and is used as an aroma compound, as a stain remover, as a superglue remover, as a paint stripper, and as a solvent in some wet aluminium electrolytic capacitors. In humans it acts as a prodrug for GHB, and it is used as a recreational intoxicant with effects similar to alcohol.	GBL
12361504	Hydroiodic acid	A mixture derived from Hydrogen iodide HI which usually contains 48% - 57% HI by mass. Currently listed as an illicit drug by the US Government owing to its usefulness as a reducing agent. Reduction with HI and red phosphorus has become the most popular method to produce methamphetamine in the United States.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12361505	Hypophosphorous acid	A phosphorus oxoacid and a powerful reducing agent with molecular formula H_3PO_2 . It is a colorless low-melting compound, which is soluble in water, dioxane, and alcohols and is used in the formulation of pharmaceuticals, discoloration of polymers, water treatment, retrieval of precious or non-ferrous metals. Its main use is for electroless plating. Currently considered a controlled drug by the US Government because it can reduce elemental iodine to form hydroiodic acid, which is a reagent effective for reducing ephedrine or pseudoephedrine to methamphetamine.	
12361506	N-acetylanthranilic acid	An organic compound with the molecular formula $C_9H_9NO_3$. It is an intermediate product in catabolism of quinaldine in <i>Arthrobacter</i> sp., and is further metabolized to anthranilic acid. It is classified as an illicit drug precursor by the United Nations.	
12361507	Phenylacetic acid	An organic compound containing a phenyl functional group and a carboxylic acid functional group. It is a white solid with a disagreeable odour. Because it is used in the illicit production of phenylacetone (used in the manufacture of meth/amphetamine), it is subject to controls in the United States.	α-toluic acid, benzeneacetic acid, alpha tolylic acid, 2-phenylacetic acid

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

12361508	Piperonal	<p>An organic compound that is commonly found in fragrances and flavors. The molecule is structurally related to benzaldehyde and vanillin. It exists as a white or colorless solid. It has a floral odor commonly described as being similar to that of vanillin and cherry. It is used as flavoring and in perfumes. Piperonal may be used in the synthesis of 3,4-methylenedioxyamphetamine MDA via the substituted nitrostyrene via a condensation reaction. This intermediate can then be reduced by a strong reducing agent such as lithium aluminium hydride (LiAlH₄) to yield MDA. However it can also be used in the illicit production of synthetic drugs like ecstasy and methamphetamine.</p>	heliotropin
12361509	Red phosphorus	<p>A form of phosphorus which is a nonmetallic chemical element with symbol P and atomic number 15. A multivalent pnictogen, phosphorus as a mineral is almost always present in its maximally oxidised state, as inorganic phosphate rocks. Elemental phosphorus exists in two major forms—white phosphorus and red phosphorus—but due to its high reactivity, phosphorus is never found as a free element on Earth. The vast majority of phosphorus compounds are consumed as fertilisers. Other applications include the role of organophosphorus compounds in detergents, pesticides and nerve agents, and matches. It can also be used in the production Methamphetamine via the Nagai route which involves red phosphorus and hydrogen iodide (also known as hydroiodic acid or iohydroic acid).</p>

UNSPSC v16_0901

1/27/2014

12361510	Acetic anhydride	<p>This classification is a chemical compound, an anhydride, an acetylation agent, a common precursor and reagent, a lachrymatory agent, and a refractive liquid which emits acetic odor, with the molecular formula C₄H₆O₃, a compound which US FDA recognizes as an active or moiety under Unique Ingredient Identifier 2E48G1QI9Q, chemically known as acetyl acetate, but more commonly known as acetic anhydride, which bears US National Library of Medicine Compound Identifier 7918 and European Inventory of Existing Commercial Chemical Substances number 203-564-8. Under the World Customs Organization Harmonised System, acetic anhydride is scheduled in 29152400, and acetic anhydride bears US Drug Enforcement Administration Number 8519. Other names for acetic anhydride include acetanhydride, acetic acid anhydride, acetic oxide, acetyl acetate, acetyl anhydride, acetyl ether, acetyl oxide, anhydride acetique, anhydrid kyseliny octove, anidride acetica, azijnzuuranhydride, essigsaeureanhydrid, ethanoic anhydrate, and ethanoic anhydride. Acetic anhydride bears RTECS AK1925000, CDC IDHL (or Immediately Dangerous to Life or Health) Code 108247, UN Hazard Code 1715, and EC Index 607-008-00-9. NATO knows acetic anhydride under INC 11568, FIIG A10800, and FSC 6810 (Chemicals). The United Nations International Drug Control Programme's Technical Services Branch, in accordance with and support of the 1988 Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances, and Article 12 thereof, in conjunction with scientific findings Clandestine Manufacture of Substances under International Control (ST/NAR/10), has determined that this</p>	<p>anhidrido acetico; essigsäureanhydrid; etaananhüdriid; anhydride acétique; A anhydride acetica; etikskabes anhidrids; ecetsavanhydrid; bezwodnik octowy; etikkahappoanhydridi.</p>

commodity (acetic anhydride) is a precursor in manufacture of Amfetamine, Cocaine, Fentanyl, Heroin, Metamfetamine, Methaqualone, PEPAP, and ring substitutes of Amfetamine and Metamfetamine (See Scientific and Technical Note SCITEC/11). Under EU regulations, acetic anhydride is governed by Regulation (EC) No 273/2004 (rules for the monitoring of trade between the Community and third countries in drug precursors) and Official Journal L 022, 26/01/2005 P. 0001-0010. Under US regulations, acetic anhydride is governed by Title 21 Code of Federal Regulations, ^{oo} 1309, 1310.02, and 1313. Under Canadian regulations, acetic anhydride is governed by Controlled Drugs and Substances Act subsection 55(1) (S.C. 1996, c. 19) and Precursor Control Regulations (SOR/2002-359), P.C. 2002-1615 2002-09-24. SMILES: CC(=O)OC(=O)C.

13111064	Acrylic resins	Polymers or copolymers of acrylic acid, methacrylic acid, esters of these acids or acrylonitrile are currently missing from the resin class.	
13111065	Cellulosic resins	Cellulose based resins	
13111066	Polyterpene resins	Polyterpene resins are obtained by polymerization of turpentine resulting in polymers of alpha & beta pinene.	
13111067	Ethylene Vinyl Alcohol		
13111068	Linear Low Density Polyethylene		
13111069	Polyacrylonitrile resin		
13111070	Polyamideimide resin		
13111071	Polyaryletherketone resin		
13111072	Polybenzimidazole resin		
13111073	Polymethylpentene resin		
13111074	Polyvinylidene Fluoride		
13111075	Polycarbonate acrylonitrile butadiene styrene alloy PC ABS	A thermoplastic resin used to make light, rigid, molded products.

UNSPSC v16_0901

1/27/2014

13111076	Cross linked polyethylene PEX	A form of polyethylene with cross-links. It is formed into tubing, and is used predominantly in hydronic radiant heating systems, domestic water piping and insulation for high tension electrical cables.	
13111077	Polyamide 6-12	Nylon resulting from the contribution of six carbon atoms from the diamine and twelve carbon atoms from the diacid with amide bonds alternating direction between each monomer.	
13111078	Polyamide 6-6	Nylon resulting from the contribution of six carbon atoms each from the diamine and the diacid with amide bonds alternating direction between each monomer.	
13111079	Polyamide 4-6	Nylon in the form of an aliphatic polyamide resulting from the polycondensation of 1,4 diaminobutane and adipic acid.	
13111080	Polyamide high temperature nylon HTN	Nylon blended with semicrystalline glass reinforced copolymers for the purpose of improving heat resistance.	
13111081	Polyamide 12	Nylon derived from glutaric acid and exhibiting alternate hydrogen bond directions.	
13111082	Polyamide 6	Nylon resulting from ring opening polymerization of caprolactam molecules with all amide bonds lying in the same direction.	

Class 13111100 Rosins

Commodity	Commodity Title	Definition	Synonyms
13111101	Wood rosin

13111308	Polystyrene foam		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

13111309	Polyurethane foam	A type of porous plastic material known as foamrubber. It is formed by an addition of bubbles, basically due to the chemical reaction of two components: polyol and isocyanate, its formulation needs and admits multiple variants and additives. Such reaction releases carbon dioxide, gas that forms bubbles. it has several uses, some of them are: main filling or integrating of mattress cushioning, sofa and chair seats; in construction as thermal insulator or filling; in automotive industry and in man	
13111310	Ethylene vinyl acetate foam	A type of foam made from ethylene vinyl acetate EVA, a thermoplastic polymer. It is also known by its English commercial name, 'foamy', formed by repetitive units of ethylene and vinyl acetate. It is employed in designs, school works, show industry, scenography and theater, educational and creative crafts, children playgrounds, occupational therapy, etc.

14111536	Library book or borrowers cards		
14111537	Label papers		
14111538	Digital paper	Digital paper is patterned paper used in conjunction with a digital pen to create handwritten digital documents. The printed dot pattern uniquely identifies the position coordinates on the paper. The digital pen uses this pattern to store the handwriting and upload it to a computer.	
14111539	Medical monitoring or tracing or recording paper	Paper usually supplied on a roll for recording clinical information.	
14111540	Stamp paper	A paper coated on one side with a water soluble adhesive with the other side available for applying an inked design.	
14111541	Optical mark reader paper	A type of paper or form that enables recognition of marks entered with pencil or water-based sign pen with an optical mark reader.	
14111542	Korean paper for stationery	Paper made with traditional manufacturing method of Korea with bark of paper mulberry as the main ingredient. With tough and strong characteristics, unlike paper made in the West, it has outstanding ability to be preserved with soft surface texture.	
14111543	Inkstone	A stationary that is made of rock, porcelain or others used for the ink stick and it has rectangular shape, square shape, circular shape, oval shape and others.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

14111544	Security paper	A type of paper that includes characteristics useful to identify or authenticate a document as original or characteristics that show evidence of handling when trying to commit forgery, for example, in order to remove or alter signatures from a check. Typical uses of this paper include birth certificates and several types of school certificates. These papers are presensitized against chemicals and fluorescent fibrils.	
14111545	Wide format printer paper	A type of printer paper, usually supplied in rolls up to 72 inches (1.83m) wide, is used in large commercial printing applications.

14111816	Applicant fingerprint cards		
14111817	Deposit verification form		
14111818	Thermal paper	Heat sensitive paper used in credit card terminals, receipt generating machines, and other point of sale machines.	
14111819	Booking forms or reservation books	A paper or a book with pre-printed fields designed for recording reservations of all kinds such as those used in hotels and other kinds of business.	
14111820	Game of chance forms or coupons	A paper our coupon with pre-printed fields used for lotteries, gambling or other games of chance.	
14111821	Order forms or order books	A paper or a book with pre-printed fields for recording an order or list of items demanded.	
14111822	Delivery forms or delivery books	A paper or book with pre-printed fields specifically designed for controlling deliveries.	
14111823	Control forms or control books	A paper or a book with pre-printed fields used to record business management data such as number of entrances and exits and other kind of important business information.	
14111824	Pharmacy prescription pad	Physician pads used for ordering the outpatient a supply of necessary medications.	
14111825	Menu	A printed brochure or public display that shows the list of options for a diner to select.	
14111826	Birth certificate	An official record of the date and place of a persons birth, usually including the names of the parents.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

14111827	Death certificate	A document issued by a government official such as a registrar of vital statistics that declares the date, location and cause of a person's death. May also be a medical certificate of the cause of death or MCCD.	
14111828	Business letterhead paper	Paper including the printed name and the logo or any other design of an institution or company.	
14111829	Pre-printed notepad	Bound pre-printed sheets with the logo of an institution or slogan. The sheets are glued in the upper part to facilitate the pulling up of sheets. They can be ruled, graph or uniform and are normally used as a promotional gift.	
14111830	Engrossing paper	A type of paper used for the final version of legal documents. It is of higher quality and is thicker than standard paper. Sometimes it is supplied with pre-printed headings such as æLast Will and TestamentÆ	
14111831	Visitor or guest book	A type of business use book used to record details of guests or visitors to businesses, organizations or events.

14122201	Seed germinating papers		
14122202	Tea bag paper	A tea bag is a small, porous silk, paper or nylon bag with tea inside that is used for brewing tea. It consists of two parts, the tea and the bag. The tea remains inside the bag as the tea is brewed, making it easier to dispose of without making a mess	
14122203	Transfer paper	Paper used in sewing and also to print fabrics. It is dry, instantaneous and waterproof. It has a good durability, wash after wash without losing its color.	
14122204	Impressed stamp paper	A type of paper impressed with images or stamps used in check forms, banknotes, stock, share or bond certificates and similar documents of title.	

Segment 15000000 Fuels and Fuel Additives and Lubricants and Anti corrosive Materials

Family 15100000 Fuels

Class 15101500 Petroleum and distillates

Commodity	Commodity Title	Definition	Synonyms
15101502	Kerosene		
15101503	Naphtha		
15101504	Aviation fuel		
15101505	Diesel fuel		
15101506	Gasoline or Petrol		
15101507	Benzene		
15101508	Crude oil		
15101509	Marine fuel		
15101510	Condensate		
15101511	Ethanol	A type of fuel, ethyl alcohol, which is the same type of alcohol found in alcoholic beverages. It can be used as a transport fuel, mainly as a biofuel additive to gasoline.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

15101512	Petroleum coke or pet coke	A carbon solid derived from oil refinery coker units or other cracking processes.	
15101513	Diesel fuel off road	Diesel fuels specifically formulated for use off roads and highways	

Class

Commodity	Commodity Title	Definition	Synonyms
15101601	Sub bituminous or weak coal	A lower quality of coal used to produce a lower quality coke for use in blast furnaces but can also be pulverized and directly injected into blast furnaces as another means of introducing the reducing agent to the iron making process. Called Pulverized Coal Injection	
15101602	Lignite		
15101603	Peat		
15101604	Coke		
15101605	Charcoal		
15101606	Jellied alcohol fuels		
15101607	Hexamines		
15101608	Trioxanes		
15101609	Briquette	A dried solid fuel for heating made from a mixture of anthracite and another pulverized carbide or combined with bonding materials and then molded into cylinder shape. It is called a nine-holed briquette or just a holed briquette as it has airholes.	
15101610	Coconut shell charcoal	A type of activated carbon manufactured from coconut shell which is considered superior to other sources mainly because of the small macropore structure of coconut shells which renders them more effective for the adsorption of gas/ vapour and for the removal of color, oxidants, impurities and odor of compounds.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

15101611	Anthracite or hard coal	A type of coal that has fine carbonization without smoke for combustion, low volatilization and high fixed carbon contents of between 85 and 95 percent.	
15101612	Metallurgical coal	A type of coal, usually anthracite, used primarily in the iron making process specifically for producing coke which acts as a reducing agent, e.g., strips off oxygen from iron ore. This is the high level distinction between coal used for metallurgical reasons --processing of ores to produce metals-- versus coal used for heating purposes--energy or thermal coal used in power stations or other furnaces.	
15101613	Raw coal	Raw coal is coal that contains dilution material e.g. tramp iron, timber, and strong rocks or increased ash content. It is coal that is typically washed before to produce a more marketable metallurgical or energy coal. It is a product that can be sold in the raw form to other parties that prefer an unwashed coal or other parties that have facilities to wash the coal themselves.	
15101614	Energy coal	Energy coal is hard, bituminous thermal or steam coal	

Class 15101700 Fuel Oils

Commodity	Commodity Title	Definition	Synonyms
15101701	#2 Heating fuel oil		
15101702	#4 or #6 Residual heavy fuel oils		

Class 15101800 Plant based liquid fuels or biofuels

Commodity	Commodity Title	Definition	Synonyms
15101801	Biodiesel	A type of biofuel that is made with the ingredients in vegetable oil, such as soybean oil and it is most widely used along with bioethanol.	

Family 15110000 Gaseous fuels and additives

UNSPSC Codeset

UNSPSC v16_0901

Class 15111500 Gaseous fuels

Commodity	Commodity Title	Definition	Synonyms
15111501	Propane		
15111502	Methane		
15111503	Propylene		
15111504	Ethylene		
15111505	Butane		
15111506	Acetylene		
15111507	Water gas or producer gas		
15111508	Coal gas		
15111509	Methylacetylene propadiene MAPP gas		
15111510	Liquified petroleum gas		
15111511	Liquefied natural gas LNG	Gaseous fuel converted to liquid form for ease of handling and storage. Contains mainly methane and is obtained by refining natural gas. Also contains ethane, propane, butane, nitrogen, carbon dioxide, sulfur compounds, etc.	

Class 15111700 Fuel additives

Commodity	Commodity Title	Definition	Synonyms
15111701	Fuel thickeners		
15111702	Icing inhibitors for fuel systems		

Family 15120000 Lubricants and oils and greases and anti corrosives

Class 15121500 Lubricating preparations

Commodity	Commodity Title	Definition	Synonyms
15121501	Engine oil		
15121502	Cutting oil		
15121503	Gear oil		
15121504	Hydraulic oil		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

15121505	Transformer oil or insulating oil	A highly refined mineral oil that is stable at high temperatures and has excellent electrical insulating properties. It is used in oil filled transformers, some types of high voltage capacitors, fluorescent lamp ballasts, and some types of high voltage switches and circuit breakers. Its functions are to insulate, suppress corona and arcing, and to serve as a coolant.	
15121508	Transmission oil		
15121509	Brake oil		
15121510	Antigalling		
15121511	Assembly pastes		
15121512	Anti adhesives		
15121513	Graphite lubricants		
15121514	Spray lubricants		
15121515	Anti seize or anti stain compounds		
15121516	Leak stop		
15121517	Lubricating soaps		
15121518	Damping fluids		
15121519	Watch lubricating oils		
15121520	General purpose lubricants		
15121521	Pump lubricating oils		
15121522	Weapon lubricating oils		
15121523	Lens preparation fluids		
15121524	Tempering oils		
15121525	Quenching oils		
15121526	Lubricants for food processing equipment		
15121527	Turbine oil	Oil used in turbines.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

15121528	Fire resistant hydraulic fluid	Oil and water mixture used for hydraulics in underground mining.	
15121529	Refrigerating machine oil	A type of lubricant made of mineral oil used on the cylinders of refrigeration compressors and other refrigeration machinery.	
15121530	Heat transfer oil or fluid	A type of heat transfer fluid, generally in a closed loop system, used to heat or cool process equipment. It is comprised of refined mineral oil or synthetic oil with quality appropriate for thermal transfer medium.	

Class

Commodity	Commodity Title	Definition	Synonyms
15121801	Moisture repellent		
15121802	Anti corrosion lubricant		
15121803	Rust remover		
15121804	Rust proofing preparation		
15121805	Anti weld pastes		
15121806	Penetrating oils		
15121807	Antifreeze	A solution used in internal combustion engines and many other heat transfer applications designed to prevent a rigid enclosure from undergoing physical stresses and catastrophic deformation due to the expansion that occurs when water turns to ice.	

Class

Commodity	Commodity Title	Definition	Synonyms
15121901	Silicone grease		
15121902	Grease		
15121903	Fluoropolymer grease		
15121904	Wool grease		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

15121905	Thermal grease	A substance that increases thermal conductivity between the surfaces of two or more objects. Also called thermal compound, heat paste, thermal paste, or heat sink compound.

Class 20101600 Screens and feeding equipment

Commodity	Commodity Title	Definition	Synonyms
20101601	Screens		
20101602	Feeders		
20101603	Drain hole screen		
20101617	Gearmotors		
20101618	Apron feeder	This conveyor has metallic plates linked as a continuous chain which roll over two toothed drives and driven rollers to convey material.	
20101619	Weigh belt feeder	Weigh belt feeder / conveyor is a like a small belt conveyor with load cells under the belt to measure the weight of material conveyed over it. Drive is variable speed.	
20101620	Electromagnetic vibro feeder	A vibro feeder has a tray which is mounted below a hopper and material is discharged by inducing vibration to this tray electro magnetically through a set of leaf springs.	
20101621	Electromechanical vibro feeder	A vibro feeder has a tray which is mounted below a hopper and material is discharged by inducing vibration to this tray through two eccentric weight mechanical vibrators on both sides.	

Class 20101700 Crushers and breakers and grinders

Commodity	Commodity Title	Definition	Synonyms
20101701	Rock crushers		
20101702	Roll crushers		
20101703	Cone crushers		
20101704	Gyratory crushers		
20101705	Impact crushers

20111708	Drill stems		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20111709	Well drilling tool or accessory kits		
20111710	Thru tubing packer repair kit	Repair kit for a device that can be run into a wellbore with a smaller initial outside diameter that then expands externally to seal the wellbore. Packers employ flexible, elastomeric elements that expand. The two most common forms are the production or test packer and the inflatable packer. The expansion of the former may be accomplished by squeezing the elastomeric elements (somewhat doughnut shaped) between two plates, forcing the sides to bulge outward. The expansion of the latter is accomplished by pumping a fluid into a bladder, in much the same fashion as a balloon, but having more robust construction.	
20111711	Thru tubing parts and accessories	Parts and components used in the tubing string. Through-tubing is generally associated with live-well operations, thereby causing minimal interruption to production and eliminating the need to kill the well.	
20111712	Wash pipe	A tool-string component used with a burn shoe for washover operations. The wash pipe is a relatively large internal-diameter tubular that can be washed over a fish in preparation for engaging and retrieving the fish.	
20111713	Drilling fingerboard	The working platform approximately halfway up the derrick or mast in which the derrickman stores drillpipe and drill collars in an orderly fashion during trips out of the hole.	
20111714	Coiled tubing connector	A downhole device used to connect the tool string to the coiled tubing string.	
20111715	Well site pit liner	Liner used to contain water pumped from well sites until it can be picked up and disposed of. Similar to a pool liner.

20121113	Float collars		
20121114	Float shoes		
20121115	Oilfield cementing tools		
20121116	Retrievable cementing packers		
20121118	Subsea cement heads		
20121119	Surface cement heads		
20121120	Bow spring centralizer	A type of centralizer employing a metal strip shaped like a hunting bow attached to the outside of well casing.Used to keep casing in the center of a wellbore prior to and during a cement job.	
20121121	Blade centralizer	A type of centralizer employing a rigid blade design.The blade is made of high-quality chrome molybdenum alloy steel.This type of centralizer works well even in deviated wellbores, but do not provide as good centralization as bow-spring type centralizers in vertical wells.	
20121122	Bow spring centralizer sub	Combination of short length of pipe with bow spring centralizer.	
20121123	Cementing stage tool kit	Assortment of stage tool components which are used to position the casing string in a wellbore for cementing operations.	
20121124	Cementing float equipment kit	Assortment of float equipment components used to provide casing buoyancy and prevention of re-entry of cement.They guide casing into the wellbore and provide a landing seat for wiper plugs in oilfield cementing operations.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20121125	Cement retainer kit	Assortment of isolation tools set in the well casing or liner that enables treatments to be applied to a lower interval while providing isolation from the annulus above.	
20121126	Centralizer parts and accessories	Parts and accessories for devices used to centralize the casing string in the wellbore oilwell drilling operations.	
20121127	Landing collar	A component installed near the bottom of the casing string	
20121128	Torque and drag reduction tool	Specialized type of cementing equipment tool for oilfield operations.	
20121129	Torque and drag reduction tool parts and accessories	Component parts and accessories for torque and drag reduction tool.	
20121130	Bridge plug parts and accessories	Parts and accessories for a downhole tool, composed primarily of slips, a plug mandrel, and a rubber sealing element, that is run and set in casing to isolate a lower zone while an upper section is being tested or cemented.

20121420	Production packers		
20121421	Pump down through flow line equipment		
20121422	Completion safety joints		
20121423	Completion seal assemblies		
20121424	Seal bores or polished bores		
20121425	Side pocket mandrels		
20121427	Subsurface safety valves		
20121428	Travel joints		
20121429	Tubing anchors		
20121430	Twin flow assemblies		
20121431	Inflatable packer	A type of packer that uses an inflatable bladder to expand the packer element against the casing or wellbore.	
20121432	Downhole control valve parts and accessories	Component parts of control valve used in the wellbore in oilfield operations.	
20121433	Cased hole completion repair kit	Assortment of tools used to repair cased-hole completions which are comprised of small holes (perforations) made in the portion of the casing passing through the production zone to provide a path for the oil to flow from the surrounding rock into the production tubing.	
20121434	Sliding sleeve repair kit	Assortment of components used to repair sliding action in sleeve for performing ON / OFF action in artificial lift valve systems	
20121435	Setting adapter kit	Assortment of components used in constructing the setting adapter which is part of the setting tool also known as a running tool. This is a tool or device that is used in the placement or setting of downhole equipment such as permanent packers or plugs. The running tool can be retrieved after the operation or setting process.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20121436	Plunger lift system parts and accessories	Component parts of a system that unloads gas wells and high gas/liquid ratio oil wells without interrupting production. These include a plunger that travels to the bottom of the well where the fluid is picked up and, acting as a swab, is brought to the surface removing all liquids in the tubing. The system uses the well's own energy requiring no additional power expense.	
20121437	Subsurface safety valve parts and accessories	Component parts and accessories of a specialized downhole valve used in oilfield operations.	
20121438	Gas lift valve parts and accessories	Parts and accessories of valve used in an artificial-lift method in which gas is injected into the production tubing to reduce the hydrostatic pressure of the fluid column called asgas lift system	
20121439	Production packer mandrel	Sealing device of liner in oilwell drilling operations.	
20121440	Annulus casing packer sub	Sealing device with sub used in space between two concentric objects such as wellbore and casing.	
20121441	Liner setting tool	Running tool used in liner placing operations in wellbore in production process.	
20121442	Drag block	Spring-loaded buttons on a packer that provide friction with casing to retard movement of one section of a packer while another section rotates for setting.	
20121443	Liner packer setting tool kit	Assortment of tools used in setting liner packers in production process	
20121444	Liner system repair kit	Assortment of components used to repair liner system, e.g., parts of the casing string that do not extend to the top of the wellbore, but instead are anchored or suspended from inside the bottom of the previous casing string. Includes conductors, hangers, tie-backs, etc.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20121445	Production packer parts and accessories	Parts and accessories for an isolating device used in the oilwell completion process.	
20121446	Liner top packer	Sealing device of liner in oilwell drilling operations.	
20121447	Liner setting collar	Special tool with collar for setting liner in open wellbore.	
20121448	Junk bonnet	Device used for collecting junk in oilwell completion process.	
20121449	Plunger lift equipment	Equipment used in gas wells to unload relatively small volumes of liquid.Called a plunger lift system.	
20121450	Gas lift mandrel	Device installed in the tubing string of a gas-lift well onto which or into which a gas-lift valve is fitted. There are two common types of mandrels: 1/ a gas-lift valve is installed as the tubing is placed in the well; 2/ in the side-pocket mandrel, however, the valve is installed and removed by wireline while the mandrel is still in the well, eliminating the need to pull the tubing to repair or replace the valve.	
20121451	Gas lift valve	a device installed on a gas lift mandrel, which in turn is put on the tubing string of a gas lift well.

20121514	Downhole stabilizers		
20121515	Drilling subs		
20121516	Thrusters		
20121517	Wellbore hole reamer parts and accessories	Component parts and accessories of a device used to enlarge the size of an existing borehole in oilfield operations.	
20121518	Rotating control head	A sealing device used to close off the annular space around the kelly in drilling with pressure at the surface, usually installed above the main blowout preventer.	
20121519	Rotating control head parts and accessories	Parts and accessories for a sealing device used to close off the annular space around the kelly in drilling with pressure at the surface, usually installed above the main blowout preventer.	
20121520	Blowout preventer parts and accessories	Parts and accessories for a type of valve installed at the wellhead to prevent the escape of pressure either in the annular space between the casing and drill pipe or in open hole (i.e., hole with no drill pipe) during drilling completion operations.	
20121521	Downhole shock absorber parts and accessories	Parts and accessories for an apparatus that absorbs shock downhole in a wellbore. The kinetic energy from a moving tool is absorbed to dissipate such energy, to decelerate the moving tool, or to prevent impact damage from contact between the tool and other downhole components.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20121522	Casing scraper parts and accessories	Parts and accessories for a tool that is forced through a pipeline or flow line to clean out accumulations of wax, scale, and debris from the walls of the casing pipe.	
20121523	Drilling jar	A mechanical device used downhole to deliver an impact load to another downhole component, especially when that component is stuck. There are two primary types, hydraulic and mechanical jars.	
20121524	Drilling jar parts and accessories	Parts and accessories for a mechanical device used downhole to deliver an impact load to another downhole component.

20121718	Overshot control	Lever for adjusting an overshot grapple.	
20121719	Overshot packer	Special sealing element in overshot tool.	
20121720	Overshot parts and accessories	Parts and accessories for a fishing tool that is attached to tubing or drill pipe and lowered over the outside wall of pipe or sucker rods lost or stuck in the wellbore.	
20121721	Fishing magnet	A powerful permanent magnet designed to recover metallic objects lost in a well.	
20121722	Taper tap	A tap with a gradually decreasing diameter from the top. It is used to retrieve a hollow fish in oilfield downhole operations.	
20121723	Fishing spear grapple	An inside grappling device for oilfield downhole fishing operations that has a tapered and threaded profile, enabling the fisherman to first guide the tool into the top of the fish, and then thread the fishing tool into the top of the fish so that recovery may be attempted.	
20121724	Fishing spear parts and accessories	Parts and accessories for an inside grappling device for oilfield downhole fishing operations that has a tapered and threaded profile, enabling the fisherman to first guide the tool into the top of the fish, and then thread the fishing tool into the top of the fish so that recovery may be attempted.	
20121725	Casing cutter	Heavy cylindrical apparatus bearing knives, and run on a string of tubing or drill pipe into a well, to perform cutting on the inner walls of a pipe through rotation, thus freeing a pipe section.	
20121726	Box tap	External type of downhole fishing tool used in oilwell drilling operations.

UNSPSC v16_0901

1/27/2014

20121727	Junk basket	Basket inside overshot which is used for collecting debris or metal particles during downhole fishing operations.	
20121728	Fishing jar	A mechanical device used downhole to deliver an impact load to another downhole component used in fishing operations	

Class 20121800 Directional drilling equipment

Commodity	Commodity Title	Definition	Synonyms
20121801	Geosteering tools		
20121802	Mud motors		
20121803	Rotary steerable tools		
20121804	Directional drilling surface control systems		
20121805	Straight hole directional drilling tools		
20121806	Logging while drilling tools LWD	Measurement of formation properties during the excavation of the hole, or shortly thereafter through the use of tools integrated into the bottom hole assembly.	
20121807	Logging while drilling tools LWD parts and accessories	Parts of tools and tool accessories used in the logging while drilling	
20121808	Directional drilling stabilizer	A device used to stabilize the drill string during drilling operations especially in directional drilling.	
20121809	Rotary steerable tools parts and accessories	Parts and accessories for rotary steerable tools used in directional drilling.	
20121810	Directional drilling sub	Short length of pipe having swivel action used in directional drilling.	
20121811	Directional drilling thruster	Equipment having a small propulsive ability used in directional drilling.	
20121812	Directional drilling drill collar	Drill collar with swivel action ability used in directional drilling.	
20121813	Mud motor parts and accessories	Parts and accessories used by mud motors.

20121909	Surveying systems		
20121910	Telemetry systems		
20121911	Ultrasonic tools		
20121912	Well logging bottom hole pressure equipment		
20121913	Well logging downhole test equipment		
20121914	Well logging units		
20121915	Bulk density log	Device used for measuring the bulk density of the formation in oilfield operations.	
20121916	Optical sensing downhole cable	Special type of cable used in optical sensing wellbore (downhole) operations in oilwell drilling	
20121917	Optical sensing mandrel and accessories	Short length of pipe and accessories used in optical sensing operations	
20121918	Optical sensing surface cable	Specialized cable used in surface level oilfield optical sensing operations.	
20121919	Casing inspection tool and accessories	Device and accessories used for inspecting casing in oilfield operations	
20121920	Freepoint indicator tool and accessories	A device run on wireline into the wellbore and inside the fishing string and fish to locate the area where a fish is stuck	

UNSPSC Codeset

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20122359	Slickline running tool parts and accessories	Parts and accessories used in specialized tools used to run equipment in a well, such as a wireline running tool for installing retrievable gas lift valves.	
20122360	Wireline broach	Downhole tool used to repair the internal diameter of the production tubing used by wireline process.	
20122361	Standing valve	Downhole valve assembly that is designed to hold pressure from above while allowing fluids to flow from below	
20122362	Wireline bell guide	A flared-end sub run on the end of the tubing string to permit easy access of wireline tools into the tubing	
20122363	Wire finder	An oilfield downhole fishing tool used for the retrieval of broken or cut slickline from the wellbore.	
20122364	Wireline tool string	A wireline device in oilfield operations that can be dozens of feet long with multiple separate tools installed to perform multiple downhole operations at once.	
20122365	Slickline centralizer parts and accessories	Parts and accessories used in slickline centralizer which help to centralize the wireline tool string	
20122366	Magnetic decentralizer	A type of slickline centralizer with magnetic ability.	
20122367	Wireline pulling tool	Tool used to pull wireline device or equipment in wellbore	
20122368	Wireline mandrel	Short length of pipe used in wireline operations	
20122369	Wireline setting tool	Tool used for setting or placing wireline accessories in wellbore.	
20122370	Wireline crossover	Short pipe having different sizes and profile in opposite end used in wireline.	
20122371	Slickline centralizer	Centralizers specially Used in Slickline Activity

20122841	Traveling blocks		
20122842	Mud desanders		
20122843	Mud dessilters		
20122844	Power tongs	A mechanically powered wrench used to make up or break out a drill rod,casing, or pipe string	
20122845	Pipe handling equipment parts and accessories	Parts and accessories used in pipe handling equipment	
20122846	Stabbing board	A temporary platform erected in the derrick at an elevation of about 20 to 40 feet above the derrick floor. The derrickman or other crew members work on this board while casing is being run in a well. Derived from the term to stab meaning to guide a joint while it is being screwed into another joint or section.	
20122847	Lift sub and plug	Short sub having lifting hook profile on the top which is used for lifting purpose with a thread in and out actions.	
20122848	Horizontal makeup device or bucking unit parts and accessories	Parts and accessories for a device used to make up and buck up couplings on pipe lying in the horizontal position.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20122849	Well casing spider	Elongated device for lowering and raising of long strings of oil well casing. It permits the well casing to be moved rapidly through the central opening of the spider while operations are proceeding normally but will permit the firm grasp of the casing when required during an emergency. It is comprised of many wedge shaped slips formed of cast metal attached to a spider bowl which is hollow and whose interior surface tapers upwardly and outwardly.	
20122851	Hydraulic power unit	Hydraulic power units provide pressurized flow to hydraulic motors, cylinders, and other hydraulic components. Hydraulic power units (HPUs) differ from pumps, as an HPU contains a fluid reservoir, multiple pump stages and coolers to keep fluid at a safe working temperature.	

Class 20122900 Surface data logging equipment

Commodity	Commodity Title	Definition	Synonyms
20122901	Surface data logging conduits		
20122902	Surface data logging sensors		
20122903	Surface data logging units		

Class 20123000 Multilateral equipment

Commodity	Commodity Title	Definition	Synonyms
20123001	Multilateral casing		
20123002	Multilateral junctions		
20123003	Multilateral packers		
20123004	Multilateral packer parts and accessories	a piece of downhole equipment, consisting of a sealing device, a holding or setting device, and an inside passage for fluids, used to block the flow of fluids through the annular space between the tubing and the wall of the wellbore by sealing off the space between them.

	20142301	Pneumatic methanol injections skids		
Class	20142400	Ocean floor equipment		
Commodity	Commodity Title	Definition	Synonyms	
	20142401	Subsea production wellhead equipment		
	20142403	Subsea production manifold system	Includes manifold base and body and ROV actuated valves and foundation pile and pigging loop and pressure caps and fabrication and PLET-PLEM and connectors and covers and plates and jumpers i.e., production and gas lift and gas injection and water injection	
	20142404	Vertical annular separation and pumping system		
	20142405	Subsea christmas tree and component		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20142406	Subsea control system	Includes topside and subsea controls, control stations, flying leads, subsea control module SCM, SCM mounting base, hydraulic and electric power units, uninterrupted power supply, distribution units, master control station.	
----------	-----------------------	---	--

Class 20142500 Produced water treating equipment

Commodity	Commodity Title	Definition	Synonyms
20142501	Oil field water oil centrifuges		

Class 20142600 Production control system instrumentation

Commodity	Commodity Title	Definition	Synonyms
20142601	Wireless production control systems		

Class 20142700 Pumping units

Commodity	Commodity Title	Definition	Synonyms
20142701	Sucker rod pump jacks		
20142702	Rod pumps		
20142703	Mechanical rod pumps		
20142704	Pumping frame and extension assembly	Specially fabricated oilfield structure used in artificial lift system pumps.	
20142705	Crank arm assembly	Crank used in oilwell pumping unit extends from and is coupled to the valve member at the valve stem for moving the valve member between open flow and closed flow positions responsive to rotation of the crank arm.	
20142706	Equalizer pitman assembly	Pumping unit parts in oilwell production process	
20142707	Horsehead assembly	Oilwell pumping unit forward part	
20142708	Samson post assembly	Support of oilwell pumping unit	
20142709	Walking beam assembly	Connecting structure used in oilwell pumping unit	
20142710	Hanger bar assembly	Pumping unit parts in oilwell production process	

Class 20142800 Production separators

Commodity	Commodity Title	Definition	Synonyms
-----------	-----------------	------------	----------

UNSPSC Codeset

UNSPSC v16_0901

20142801	Oil water separators		
----------	----------------------	--	--

Class

20142900	Storage vessels and tanks
----------	---------------------------

Commodity	Commodity Title	Definition	Synonyms
20142901	Oil storage tanks		
20142902	Fiberglass holding tank	Tank constructed of fiberglass for containing liquids.	
20142903	Steel holding tank	Tank constructed of steel for containing fluids.	
20142904	Plastic holding tank	Tank constructed of plastic used to contain liquids.	
20142905	Air receiver tank	An essential component to any high pressure compressed gas system, it serve as a buffer and a storage medium between the compressor and the consumption system.	

Class

20143000	Sucker rods
----------	-------------

Commodity	Commodity Title	Definition	Synonyms
20143001	Alloy steel sucker rods		
20143002	Pony rods		
20143003	Continuous sucker rod	Finishing rod used to remove fluid from wellbore in artificial lift system.Also known as a special steel pumping rod.	
20143004	Continuous sucker rod pin end	Threaded end of continuous sucker rod having special pulling criteria.	
20143005	Sucker rod shear coupling	Special type of coupling used to connect sucker rods.	
20143006	Progressive cavity pump sucker rod	Sucker rod for PCP applications involving high torque work --spinning motion-- instead of high tension work, like the standard ones used on sucker rod pumps --reciprocating motion-- which involve high torque work	

Class

20143300	Pipeline service equipment
----------	----------------------------

Commodity	Commodity Title	Definition	Synonyms
20143301	Pipeline pig	Device used for cleaning oil pipeline	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20143302	Interior pipeline inspection equipment	A type of equipment comprised of a camera and lighting device and moved by robot. It is used to identify abnormalities within sewage pipe, water supply pipe and gas pipe through monitor.	
20143303	Interior pipeline robotic cutter	A robotic device equipped with cutters that is inserted into a pipeline and can be remotely activated to remove protrusions within the pipeline.	

Class

Commodity	Commodity Title	Definition	Synonyms
20143401	Umbilical termination assembly	A multi-plexed electro-hydraulic system that connects multiple subsea control modules to the same communications, electrical and hydraulic supply lines. The result is that many wells can be controlled via one umbilical, which is terminated at an umbilical termination assembly stabplate.	
20143402	Umbilical riser and flowline	Hardware elements that are required to connect the subsea systems to topside systems of a floating production unit.	
20143403	Umbilical unit	The connective medium between surface installations and subsea developments, umbilicals can include electrical, hydraulic, chemical injection and fiber optic connections.	
20143404	Subsea jumper assembly	An electric cable, optical fibre cable, hose, or steel tube with end fittings or connectors installed at each end to provide a flexible connection between sub-sea terminations or between a sub-sea termination or sub-sea distribution unit and a sub-sea system.	

Class

Commodity	Commodity Title	Definition	Synonyms
-----------	-----------------	------------	----------

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20143501	Subsea running tool	Tool designed to ensure an efficient deployment and a soft landing at the subsea structure, and allow for running with or without the aid of guide-wires. Designed and used to reduce operating times and risk associated with drilling a subsea well.	
20143502	Subsea manifold	Equipment used to merge the flow from multiple subsea wells for transfer into production flowlines and to manage distribution of injected water, gas and chemicals.	
20143503	Subsea connection system	Subsea connection systems are used to provide diverless links between subsea wells, manifolds, pipelines, risers and control umbilicals.	
20143504	Subsea jumper installation tool	Tool is designed to ease the subsea installation of electrical and hydraulic jumpers	

Class

20143600

Subsea flexibles

Commodity	Commodity Title	Definition	Synonyms
20143601	Subsea flexible riser	A flexible conduit which can handle both vertical and horizontal movements utilized to transport produced hydrocarbons, as well as production materials, such as injection fluids, control fluids and gas lift and are insulated to withstand seafloor temperatures.	
20143602	Subsea flexible pipe or pipeline	Technically challenging, multi-layer structure of helically wound metallic wires and tapes and extruded thermoplastics designed to form a structure that addresses the specific environmental requirements and characteristics of the transported fluids	

Class

20143700

Subsea pipeline materials

Commodity	Commodity Title	Definition	Synonyms
20143701	Subsea line pipe	Line Pipe designed and manufactured for use in harsh subsea environments	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

20143702	Subsea pipe coating and insulation and cathodic protection	Materials or systems designed and manufactured for use in harsh subsea environments while providing sufficient protection from corrosion and thermal insulation	
20143703	Subsea buoyancy equipment or module	Equipment used to assist in reducing deep water pressures and increasing the uplift of buoyancy of subsea installations, modules or components	
20143704	Subsea flange	Flange designed and manufactured for use in harsh subsea environments	
20143705	Subsea fitting	Fittings designed and manufactured for use in harsh subsea environments	
20143706	Vortex induced vibration VIV suppression equipment	Equipment used to reduce the vortex shedding patterns in the wake from the use of subsea pipeline, risers or umbilicals. Examples include Helical strakes, Shrouds, Axial slats, Streamlined fairing, Splitter plate, Ribbed cable, Pivoted guiding vane, Spoiler plates	

Class **20143800** Subsea meters

Commodity	Commodity Title	Definition	Synonyms
20143801	Subsea flow meter, single phase	Device for measuring fluid flow rates (oil and gas) coming from the wellbore. Since single phase meters are designed to accurately measure only one fluid, the mixture must pass through a fluid-separation stage (separator) prior to metering	
20143802	Subsea flow meter, multi phase	Device for measuring individual fluid flow rates of oil and gas when more than one fluid is flowing through a pipeline at subsea temperatures and pressure	
20143803	Subsea wet gas meter	Meter used in subsea applications to differentiate between liquid and gas flows in an on-line, real-time process for flow metering at the well-head or transmission pipeline.	

Segment **21000000** Farming and Fishing and Forestry and Wildlife Machinery and Accessories

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

Family 21100000 Agricultural and forestry and landscape machinery and equipment

Class 21101500 Agricultural machinery for soil preparation

Commodity	Commodity Title	Definition	Synonyms
21101501	Ploughs		
21101502	Harrows		
21101503	Cultivators		
21101504	Weeders		
21101505	Hoeing machines		
21101506	Graders or land levelers		
21101507	Agricultural rollers		
21101508	Rollers for lawn or sports grounds		
21101509	Trencher drainage machine		
21101511	Irrigation trickles		
21101512	Irrigation overheads		
21101513	Disks		
21101514	Subsoilers		
21101516	Dibblers		
21101517	Rotary tiller or power tiller	A motorised cultivator that works the soil by means of rotating tines or blades. Rotary tillers are either self-propelled or drawn as an attachment behind either a two-wheel tractor or four-wheel tractor.	
21101518	Soil sterilizer	A machine that injects soil fumigant into the soil in order to exterminate pests, particularly soil nematodes.	
21101519	Soil injector	A device that mechanically injects substances into a specific stratum of the soil without mixing the soil or mycorrhizae.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

21101520	Flame thrower	A device that throws out flame by igniting the liquid fuel being sprayed using compressed air and compressed gas.	
21101521	Fertilizer mixer	A device used to mix fertilizer or agrichemicals with water at the appropriate concentration prior to watering.	
21101522	Ridge plough or plow	A type of plow used for crops, such as potatoes or scallions, which are grown buried in ridges of soil using a technique called ridging or hilling. A ridging plough has two mouldboards facing away from each other, cutting a deep furrow on each pass, with high ridges either side. The same plough may be used to split the ridges to harvest the crop.	
21101523	Automated management system for agricultural machinery	A device mounted on agricultural machinery that automatically samples and analyzes soil and uses resulting data to set work scope and route generation for the machine. Provides data on plant growth and harvesting.	

Class

Commodity	Commodity Title	Definition	Synonyms
21101601	Planters		
21101602	Transplanters		
21101603	Grain drills		
21101604	Seed drills		
21101605	Seed treating equipment		
21101606	Hole diggers		
21101607	Seeder attachment		
21101608	Plant growth cabinet or chamber	A type of equipment that enables germinated seedlings to grow in a protected environment using artificial or natural light.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

21101609	Seed bed	A specially prepared cold frame, hotbed or raised bed used to grow seedlings in a controlled environment into larger young plants before transplanting them into a garden or field.	
21101610	Soil covering machine	A machine that covers sections of field containing transplanted seedlings with vinyl or other material after harvest to prevent environmental pollution.	
21101611	Fertilizer flow rate controller	A type of equipment that automatically controls the timing and quantity of fertilizer dispensed in agricultural operations.	
21101612	Seed germinator	A type of equipment that promotes uniform germination by maintaining appropriate temperature and humidity by piling up seedbed boxes on truck in order for seeds to be uniformly developed.	
21101613	Air seeder	Machine that allows consistent delivery from the seed-metering device to the seedbed via an air delivery method.	

Class

Commodity	Commodity Title	Definition	Synonyms
21101701	Mowers		
21101702	Haymaking machinery		
21101703	Harvesters		
21101704	Combine harvesters		
21101705	Threshing machines		
21101706	Crop dividers		
21101707	Harvester parts or accessories		
21101708	Mower parts or accessories		
21101709	Baler	A piece of farm machinery used to compress a cut and raked crop such as hay, straw, or silage into compact bales that are easy to handle, transport and store.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

21101710	Harvest dryer	A machine that dries wet grain following harvesting to the moisture level appropriate for storage in order to prevent deterioration and improve quality of stored grain.	
21101711	Corn sheller	A machine that detaches grains such as corn, beans and peanuts from the heart or stalk.	
21101712	Cut flower automatic binding machine	A machine that removes stems and leaves and binds cut flowers at the time of harvesting.	
21101713	Cotton ginning machine	Machine that separates rapid and easily cotton fibers from cotton husks and sticky seeds, it uses a screen and some wire hooks that push cotton while some brushes remove loose cotton threads to prevent obstructions.	

Class

Commodity	Commodity Title	Definition	Synonyms
21101801	Sprayers		
21101802	Dusters		
21101803	Water sprinklers		
21101804	Fertilizer spreaders or distributors		
21101805	Fog or mist generators		
21101806	Composter		
21101807	Pollination equipment or supplies		
21101808	Frost protection equipment		
21101809	Grain fumigation system	A type of equipment that sterilizes by fumigating grain storage bins or boxes with methyl bromide, sulfural fluoride or carbon gas, in order to protect grain or fruit from insects during storage or transportation.	

Class

Commodity	Commodity Title	Definition	Synonyms
21101901	Milking machines		
21101902	Animal husbandry equipment		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

21101903	Incubators or brooders for poultry		
21101904	Feed mixers		
21101905	Livestock identification equipment		
21101906	Egg inspection or collecting equipment		
21101907	Animal watering machines		
21101908	Milk cooling tanks		
21101909	Animal shearing or clipping equipment		
21101910	Wool comb	A type of comb used to straighten, arrange and lay parallel by length the fibers of wool prior to further treatment.	
21101911	Poultry manure composter	A machine that makes compost by drying poultry droppings with fire after having processed it with sulfuric acid or fermentation in order to use it as fertilizer.	
21101912	Livestock restraint chute	A stall used to confine livestock while administering injections, performing surgical operations, administering drugs, performing artificial insemination, assessment of pregnancy, treatment and castration.	
21101913	Debeaker	A device designed to cut off the beak of chicken or other fowl.	
21101914	Livestock electric fence	An electrically charged device designed to control and protect livestock using psychological methods.	
21101915	Pig backfat tester	A measuring device for determining the weight of lean meat and the fat content in the back of pigs in order to establish a rating.	
21101916	Milking machine parts and accessories		

Class 21102000 Agricultural machinery for cleaning and sorting and grading

Commodity	Commodity Title	Definition	Synonyms
21102001	Cleaning machines for seed or grain or dried leguminous vegetables		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

21102002	Sorting machines for seed or grain or dried leguminous vegetables		
21102003	Grading machines for seed or grain or dried leguminous vegetables		
21102004	Rice cleaning or hulling equipment		
21102005	Grinding mills		
21102006	Hammer mills		
21102007	Fruit sorter	A machine that automatically identifies and sorts sizes of fruit according to predetermined standards.	
21102008	Barley cleaning or hulling equipment	A milling machine that removes the skin of barley, rice barley or other grains to make the white and rounded grains to cook rice appropriately.	
21102009	Cleaning, sorting, and grading machine parts and accessories		

Class 21102100 Agricultural processing machinery and equipment

Commodity	Commodity Title	Definition	Synonyms
21102101	Agricultural briquetting or pelting machines		
21102102	Oil seed expeller	A machine that extracts oil or solution by exerting pressure on seeds of grain such as corn, sesame, bean, pepper and pumpkin or meat of fruits such as apricot, coconut and walnut.	

Class 21102200 Forestry machinery and equipment

Commodity	Commodity Title	Definition	Synonyms
21102201	Decorticators		
21102202	Lumbering equipment		
21102203	Reforestation equipment		
21102204	Forestry saws		
21102205	Forestry skidders		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

21102206	Forestry increment borers		
21102207	Forestry ipsometer		
21102208	Log splitter	A piece of machinery or equipment used for splitting firewood from softwood or hardwood logs.	
21102209	Forestry winch	Machine equipped with motor, power transfer unit, drum, and wire rope to collect logged wood.	

Class

Commodity	Commodity Title	Definition	Synonyms
21102301	Greenhouse irrigation equipment		
21102302	Greenhouse pots		
21102303	Greenhouse ventilation equipment		
21102304	Greenhouse isolation equipment		
21102305	Agricultural sun shade material	An agricultural material used for the purpose of prevention of sunlight from entering the greenhouse or thermal insulation of the greenhouse.	
21102306	Hydroponic fertilizer injector	A type of equipment that supplies liquid fertilizer necessary for plant growth along with fresh air by circulating it around the root system.	

Class

Commodity	Commodity Title	Definition	Synonyms
21102401	Beekeeping equipment		
21102402	Silkworm equipment		
21102403	Butterfly breeding equipment		
21102404	Beetle breeding equipment

1/27/2014

22101520	Twin engine elevating scrapers		
22101521	Pulled scrapers		
22101522	Track bulldozers		
22101523	Wheel bulldozers		
22101524	Mobile excavators		
22101525	Wheel excavators		
22101526	Track excavators		
22101527	Integrated tool carriers		
22101528	Wheel loaders		
22101529	Skid steer loaders		
22101530	Open bowl scrapers		
22101531	Snow blowers		
22101532	Track loaders		
22101533	Treedozers		
22101534	Combat earthmovers		
22101535	Pile extractor	A type of equipment used to extract a pile which was driven under a building, a structure, a sewer, a waterway or a revetment. It consists of a clamp which catches the pile and a vibration exciter which generates vibration by oil pressure. It is used with a crane by suspending it from the crane.	
22101536	Tire washer	An equipment installed to wash tires and pollutants under vehicles for the purpose of preventing pollution in the surrounding environment and road sides. It is set up in the areas such as construction areas and factories which can cause polluttional dusts.	
22101537	Concrete pile cutter	A device used in cutting the head section of pretensioned spun high strength concrete pile.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

22101538	Snow plow	A type of non motorized equipment that is used to make the snow removal from road easy by crushing snow and ice frozen on the road or surface of ground during winter. It is attached to mid or front portion of construction equipment, such as grader used in leveling the surface.	
22101539	Earthmoving machinery parts and accessories	Accessories and spare parts used in the replacement and or maintenance of earthworking machinery	
22101540	Dumper designed for off-highway use		

Class

22101600 Paving equipment

Commodity	Commodity Title	Definition	Synonyms
22101602	Ramming equipment		
22101603	Road wideners		
22101604	Vibratory plates

22101612	Road rooters		
22101613	Road surface heater planers		
22101614	Concrete paving strike offs		
22101615	Paving breakers		
22101616	Curbing machines		
22101617	Grouting machines		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

22101618	Trackway surfacing outfits or its laying mechanisms		
22101619	Scrubbing machines		
22101620	Joint cleaning or refacing machines		
22101621	Asphalt distributor	Equipment used to pave a road with asphalt by heating and distributing it on the road. Smaller versions of this equipment are towed by a vehicle. Larger ones are mounted on a truck.	
22101622	Asphalt recycler	A machine used to recycle pieces of asphalt which were once used for construction, road maintenance and laying pipe-line.	
22101623	Concrete paving and finishing machine	A self-powered machine which pours the concrete mixture and finishes the paving concrete on the road surface. It is used to consolidate and level concrete roads.	
22101624	Road marking machine	A motor-driven vehicle used to mark characters, symbols and lines on the paved roadway for traffic control.	
22101625	Concrete surfacing machine	A portable grinder used to level and smooth the surface of roadways, which is installed with a grinding disk and a drum. It is also used to grind the rough surface of asphalt and roadways or remove useless materials on the roads.	
22101626	Asphalt mixing plant	A device or facility used to make asphalt for road pavement, airports, harbors and other similar facilities. It divides into a stationary plant and a travelling plant.	
22101627	Asphalt melter	A device used to heat and melt asphalt which is provided to the mixing machine of an asphalt mixing plant. It consists of an asphalt kettle, an asphalt tank, and oil heater and an asphalt pump.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

22101628	Aggregate washer	A device used to remove impurities on the surface of an aggregate prior to use in paving operations.	
22101629	Aggregate dryer	A cylindrical drying device used for drying and heating aggregates which are provided to the mixer of an asphalt mixing plant. It is composed of stationary type and movable types.	
22101630	Roadmarking remover	A machine used to remove marked lines or characters on paved roadways by use of cutter blades or high pressure injection or a burner installed in the machine.	
22101631	Pile driver guide	A type of equipment that induces straight line motion of machines designed to drive in or withdraw pile.	

Class

Commodity	Commodity Title	Definition	Synonyms

23101515	Engraving machines		
23101516	Glass bead peener machines		
23101517	Grit blast machines		
23101518	Shot peen machine		
23101519	Robot machines		
23101520	Ram electro discharge machines		
23101521	Wire cathode electrode discharge machine		
23101522	Chip breaker		
23101525	Oscillating spindle sander	A sander mounted on a rotating spindle, but also moves up and down at the same time.	
23101528	Drum sander	A large sander that uses a rotating sanding drum.	
23101529	Glue roller spreader	A machine used for joining plywood sheets or similar wood products by roller coating single boards or planks with adhesive material consistently.	
23101530	Dovetail machine	A type of woodworking machinery used to cut dovetail shaped grooves in wood.	
23101531	Combination woodworking machine	A type of woodworking machinery that combines the functions of two or more separate machines into a single unit.	
23101532	Tenoner or tenoning machine	A machine that makes four angled protrusions --called tenons-- at the end of the wood material for linking square timber.	
23101533	Cold press	A type of wood laminating machine that uses pressure rather than heat to join glued sheets of wood.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23101534	Edge bander	A type of woodworking machine applies hot melt adhesive backed edge banding to straight edges of panels or planks of wood.	
23101535	Finger jointing machine	A type of woodworking machine that cuts multiple widths or fingers into the workpiece for joining together with glue another workpiece that is similarly cut.	
23101536	Dowel machine	A type of woodworking machinery that produces dowel rods. It does so by employing interchangeable cutting heads of varying diameters, thus enabling the machine to be quickly retooled to manufacture different diameters of dowel. Each head consists of a hollow chuck with cutting knives protruding inward, through which the wood passes as the knives cut it into cylindrical shape.	
23101537	Belt and disc sander	A machine that is used for woodwork that combines the functions of disc sander and belt sander.	
23101538	Woodworking jointer	A machine that is used to trim a side of lumber in order to create a flat surface on one edge of a board.	
23101539	Gaining machine	This machine aims at perforating wood to prepare the places where dowels are put for the joints of several types of furniture. In this case it is used to make a hole where the door lock is to be placed.	
23101540	Machine to make wood music instruments	Equipment that cuts, polishes and makes perforations in the development of wood music instruments.

UNSPSC v16_0901

1/27/2014

23121511	Textile washing machine	A machine used for rinsing and washing large volumes of textiles prior to their conversion to workpieces.	
23121512	Carding machine	A machine that brushes and straightens unorganised clumps of fibre and then aligns the individual fibres so that they are more or less parallel with each other.	
23121513	Yarn assembly winder	A machine that combines 2 string, 3 string or more of single yarns in consistent tension.	
23121514	Sizing machine	A machine that coats strands of yarn with size to stiffen and strengthen yarn for further processing.	
23121515	Raising machine	A machine that raises the soft nap on the surface of the woven fabric made in spun yarn to give cloth soft, fluffy texture.	
23121516	Singeing machine	A machine for giving material a smooth sleek surface by burning off projecting fibers on cotton yarn, spun silk or woven fabric with heat of the heat plates or combustion flame.	
23121517	Fine spinning machine	A machine that makes thread by twisting and thinning carded and drawn yarn --the roving-- to the desired thickness and winding it on a bobbin.	
23121518	Thread unravelling machine	A machine used in weaving and knitting that unwinds and unravels thread.	
23121519	Laboratory spinning system	Spinning equipment that is designed to be used in a laboratory for synthetic textile manufacturing. The spinning solution is extruded into an acid or alkali bath or air to form the filament and this machine winds it onto a bobbin.	
23121520	Warping machine	A machine for preparing yarns in parallel, under the same tension, and in the right order according to color and end type, for weaving.

Class 23121600 Textile working machinery and equipment and accessories

Commodity	Commodity Title	Definition	Synonyms
23121601	Button covering machines		
23121602	Button sewing machines		
23121603	Buttonhole machines		
23121604	Cloth cutting machines		
23121605	Cushion filling machines		
23121606	Folding or rewinding machines		
23121607	Bleaching machines		
23121608	Fabric or cloth folding machines		
23121609	Reeling or unreeling machines		
23121610	Dyeing machines		
23121611	Cutting or pinking machines		
23121612	Sewing machine needles		
23121613	Silk processing machines		
23121614	Sewing machines		
23121615	Fabric cutting tables		
23121616	Dyeing tester	A device designed to test material to determine dyeing ability between fiber and dye.	
23121617	Fabric frame	Pictoric support, frame generally made in wood supporting a wood plate or painted fabric piece.	
23121618	Grip of overlock sewing machine	Instrument of the overlock sewing machine used to thread	
23121619	Hemmer for sewing machine	Sewing machine accessory to perform light spiral binds of 2 fabric clothing	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23121620	Textile turning machine	It is composed of a fixed table or bench, a frame or mobile table and motor means to rotate angularly the frame or mobile table regarding the fixed table or bench by placing it between two end positions, usually for shirt necks and cuffs.	
23121621	Fabric splicing machine	Industrial equipment to fuse small pieces such as cuffs, necks, waistbands, shirt front, tiles, etc.	

Family 23130000 Lapidary machinery and equipment

Class 23151900 Paper making and paper processing machinery and equipment and supplies

Commodity	Commodity Title	Definition	Synonyms
23151901	Cutters		
23151902	Slitters		
23151903	Washing or dewatering machines		
23151904	Winders		
23151905	Wood pulp or dissolver machines		
23151906	Calenders for paper or cardboard making		
23151907	Screen drum or sieve	A device of wire mesh or closely perforated metal, used for straining, sifting, ricing, or pureeing a filter to retain larger pieces while smaller pieces and liquids pass through.	
23151908	Mechanical pulp refiner	A machine that passes wood chips between one rotating -rotor- and one stationary -stator- metal discs. This process is called refining and produces a pulp often referred to as a refiner mechanical pulp.	
23151909	Wood pulper	A type of paper making equipment that dissolves wood pulp or old paper in water to make a slurry that is then processed into paper.	
23151910	Flotator	A type of equipment used in paper recycling that removes ink from the recovered fiber by injecting air bubbles which adhere to the ink and float.	
23151911	Paper machine	A machine comprised of 4 process units that uses a specially woven plastic fabric mesh conveyor belt in the wet end to create a continuous paper web transforming a source of wood pulp into a final paper product.

23152901	Wrapping machinery		
23152902	Form or fill or seal machinery		
23152903	Packaging vacuum		
23152904	Packaging hoppers		
23152905	Carton forming machines		
23152906	Taping machines		
23152907	Packaging machinery supplies	Includes sealing bars and wires, suckers that grab paper or plastics, plows that push box lids down, heaters for film, vacuum dies, steel rule cutting dies, fingers that hold open bags for filling, etc.	
23152908	Bottle washing machine	A machine that removes impure substances from the interior and exterior surfaces of bottles and processes them for washing, sterilizing and drying.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23152909	Commodity sorting machine	A machine that processes bulk product through a diverter whereupon sorted products are then classified manually or automatically using a reader.	
23152910	Automatic bag making machine	A machine that produces single opening containers or sacks made of paper, vinyl and various other materials.	
23152911	Shoe closing machine	Tool that sews, glues or closes with a sensing device regulating the height of the shoe for a better ironing.	
23152912	Bottle capping machine	Machine that caps bottles through a rotational movement with the help of an upper belt conveyor supplied with magnets. Only caps adopting the right position are adhered.	
23152913	Canning seamer	Equipment used for sealing the lid to the can body.	

Class Holding and positioning and guiding systems and devices

23153138	Cutting or chipping heads		
23153139	Guide beds		
23153140	Link arms		
23153141	Electro discharge machine EDM wire	Attachment used in a wire electro discharge machine EDM. Removes metal by burning the work piece with a very thin wire instead of cutting or grinding. One of three basic types of EDM. The other two are electrode EDM and small-hole EDM.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23153142	Accordion bellows	Accordion bellows are convoluted, expandable, fabric or elastomer components used to protect screws, shafts, slide ways and other components from liquid, chips, dirt and other debris. Accordion bellows are round, square or rectangular in shape and can be manufactured with a variety of end configurations and options. Round and square accordion bellows can have either four closed sides, or three open sides and one closed side.	
23153143	Spray nozzle	A specialized nozzle used to spray coal as it is being mined to control dust	
23153144	Spray block	Block that holds and supplies the water to dust suppression spray in coal mining operations	
23153145	Spray gun	an applicator resembling a gun for applying liquid substances in the form of a spray.

Class

Commodity	Commodity Title	Definition	Synonyms
23153601	Acid etch marking machines	Acid etch marking machines incise an image, code, or mark into the surface of the metal part using an acid. The acid eats the metal, leaving behind roughened areas, or if the surface exposed to the acid is very narrow, burning a line into the plate.	
23153602	Laser marking machine	Machine using a laser beam to create a permanent mark, code, or design on a part for identification and/or tracking purposes.	
23153603	Pinstamp marking machine	A pneumatically driven and returned conical tipped pin that permanently indents the marking surface to form either dot matrix or continuous line characters.	
23153604	Laser Etching Tool		
23153605	Dot marking machine	A type of etching or marking machine in which a mark is made with a special pen on the surface of the metal material being processed.	
23153606	Electro etcher marking machine	A machine that uses electrolysis to mark metal material using an electrolytic marking stencil or character plate.	
23153607	Inkjet marking machine	A machine that uses a computer adjustable inkjet stream to mark processed material.	

UNSPSC Codeset

23181507	Crushing machinery		
23181508	Blanching machinery		
23181509	Sorting machinery		
23181510	Meat tyer or bagger	Device that facilitates bagging or netting of rolled meats, roasts, hams, etc.	
23181511	Forming machine		
23181512	Cooling machine		
23181513	Preduster		
23181514	Cheese making machine	A machine that automatically produces cheese with milk.	
23181515	Bean curd making machine	A machine that manufactures tofu. It washes and separates beans and impure substances, the soaks them in a water tank and crushes and filters them appropriately. They are then boiled and poured into a mold.	
23181516	Noodle making machine	A machine that uses wheat and other flours to make noodles.	
23181517	Fermented soybean machine	A machine that produces fermented soybeans in standardized shape. After washing the beans to remove impure substances, the machines soaks them in a water tank and filters and steams them.	
23181518	Food fermentation device	A reactor that disintegrates organic compounds with microbes, such as yeasta and bacteria in order to generate alcohol, organic acid, carbon gas and others.	
23181519	Pasteurizing machine	Machine employing thermal process to reduce pathogen agents performed on food.	
23181520	Cream separator		
23181521	Laver or seaweed refining machine	Machine used to refine the laver to be easy to eat and stored through drying, seasoning, roasting and other processes	

UNSPSC Codeset

UNSPSC v16_0901

23181606	Peeling machinery		

Class 23181700 Food cooking and smoking machinery

Commodity	Commodity Title	Definition	Synonyms
23181701	Smoking machinery		
23181702	Roasting machinery		
23181703	Cooking machinery		
23181704	Steaming machinery		
23181705	Food sterilizing machine	A machine designed to conserve food products by sterilizing and then cooling them prior to packing.	

Class 23181800 Industrial beverage processing machinery

Commodity	Commodity Title	Definition	Synonyms
-----------	-----------------	------------	----------

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23181801	Coffee roasting equipment	Equipment used in the coffee roasting process which follows coffee processing and precedes coffee brewing. The most common roasting machines are of two basic types: drum and hot-air, although there are others including packed bed, tangential and centrifugal roasters. Roasters can operate in either batch or continuous modes. The roasting process consists essentially of sorting, roasting, cooling, and packaging but can also include grinding in larger scale roasting houses.	
23181802	Juicing machinery		
23181803	Ice making machines		
23181804	Ice cream machines		
23181805	Ice making machine parts and accessories	General parts used in ice making machinery by the ice Industry	
23181806	Beverage sterilizer	Equipment that sterilizes beverage product with high pressure steam during the manufacturing process for various beverages.	
23181807	Dairy mixer	Mixing equipment used for preparing milk and milk products

23201001	Plate columns		
23201002	Packed columns		
23201003	Liquid dispersed contactor		
23201004	Wetted wall column		
23201005	Bubble columns		
23201006	Distillation column	A large, vertical cylindrical column used oil, chemical and other process industries to heat process feedstock such as crude oil and separate out different distinct products or fractions each having different boiling points or boiling ranges. The lightest products (those with the lowest boiling point) exit from the top of the columns and the heaviest products (those with the highest boiling point) exit from the bottom of the column and are often called the bottoms. Column size ranges from about 65 centimeters to 16 meters and heights ranging from about 6 meters to 90 meters or more.	
23201007	Distillation column packing	Material used as packing in distillation column.	
23201008	Distillation tray

23201201	Spray dryers		
23201202	Air dryers		
23201203	Fluidbed dryers	This dryer is used for drying powders and/or crystals (salt etc.)	
23201204	Food drying equipment	Equipment used for drying food products	

Family 23210000 Electronic manufacturing machinery and equipment and accessories

Class 23211000 Electronic assembly machinery and support equipment

Commodity	Commodity Title	Definition	Synonyms
23211001	Chip placers		
23211002	Glue dispensing machinery		
23211003	Terminal insertion machine	A machine designed for the insertion and assembly of wiring terminals.	

Class 23211100 Electronic manufacturing and processing machinery

Commodity	Commodity Title	Definition	Synonyms
23211101	Semiconductor process systems		
23211102	Printed circuit board making system	Equipment used to manufacture the circuit pattern of the printed circuit board PCB that structures the electronic circuit.	
23211103	Wafer wire bonder	A machine that is connected to the chip pad and the lead frame to link the chip attached on the paddle of the lead frame and the lead frame electrically as the die bonding process in semiconductor assembly process.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23211104	Semiconductor chip inspection monitor	Equipment that inspects for defects in the wafer and the final completed semiconductor chip in the semiconductor manufacturing process.	
23211105	Vacuum impregnation or porosity sealing device	A sealing device that fills all interior spaces, and may or may not leave a thin coating on the surface, depending on the wash rinse performance. The main application of vacuum impregnation porosity sealing is in boosting the dielectric strength of transformers, solenoids, lamination stacks or coils, and some high voltage components. It prevents ionization from forming between closely spaced live surfaces and initiating failure.	
23211106	Ion implanter	A machine which accelerates the ions of a material in an electrical field and impacts them into another solid. This process is used to change the physical, chemical, or electrical properties of the solid.	

Family 23220000 Chicken processing machinery and equipment

	Commodity	Commodity Title	Definition	Synonyms

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23241401	Bench grinder	Depending on the grade of the grinding wheel it may be used for sharpening cutting tools such as lathe tools or drill bits. Alternatively it may be used to roughly shape metal prior to welding or fitting.
23241402	Surface grinding machine	A surface grinder has a head which is lowered, and the workpiece is moved back and forth past the grinding wheel on a table that has a permanent magnet for use with magnetic stock.
23241403	Internal grinding machine	Internal grinders use a wheel to grind the inside diameter of a workpiece as the workpiece itself rotates.
23241404	External grinding machine	External grinders grind the external surfaces of the workpiece as the workpiece itself rotates.
23241405	Centerless grinding machine	A type of grinding machine capable of precision grinding without the use of a work piece spindle.
23241406	Ultrasonic machine	A type of metal grinding machine in which an abrasive slurry freely flows between the workpiece and a vibrating tool.
23241407	Cylindrical grinding machine	A type of cylindrical grinding machine that is used for finishing the surface with high precision after rough grinding.
23241408	Knife grinding machine	A machine tool that grinds the edge of chisels and other woodworking tools.
23241409	Optical profile grinding machine	A type of grinding machine that precisely grinds the shape of the workpiece according to the design drawing projected on the attached screen.
23241410	Worm grinding machine	A type of grinding machine that grinds the tooth profile of the worm with the twisted tooth of one line or several lines of screw shape.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23241411	Buffing machine	A type of grinding equipment that is used when making the surface of the processed metal sleek or glossy. The buff that is loaded on the rotation axis is processed with high speed rotation by connecting it to the workpiece.	
----------	-----------------	---	--

Class

23241500	Metal cutting machines
----------	------------------------

Commodity	Commodity Title	Definition	Synonyms
23241501	Abrasive jet machining equipment		
23241502	Electrochemical machine ECM	Electrochemical machining is basically the reverse of electroplating. An electrolyte acts as current carrier, and the high rate of electrolyte movement in the tool-workpiece gap washes metal ions away from the workpiece (anode) before they have the chance to plate on the tool (cathode).	
23241503	Flame cutting machine	A device that focuses an intense flame causing high heat and used to cut metal.	
23241504	Gear cutting tool		
23241505	Laser cutting machine	Laser cutting machines use high-powered lasers to cut, scribe, or perforate a variety of materials in plate or sheet form.	
23241506	Plasma cutting machine	Plasma cutting machines melt an area with an arc, and then cut by a high-velocity, high-temperature ionized gas.	
23241507	Sawing and cut-off machine	Sawing and cut-off machines are used to cut raw material to specified lengths or sizes.	
23241508	Water jet cutting machine	The force of a water jet acts like a saw and cuts a narrow groove into the material.	
23241509	Metal band sawing machine	A machine that cuts metal by winding up and rotating a striped saw with a band shaped blade around the driving pulley and the driven pulley.	
23241510	Metal shearing machine	A machine with blades, or rotary disks, for dividing plates or bars of metal.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23241511	Threading machine	A cutter that works on making the screw shape in linear line on the round bars, such as pipe or bolt.	
----------	-------------------	---	--

Class

Commodity	Commodity Title	Definition	Synonyms
23241601	Boring tool		
23241602	Broach		
23241603	Countersink tool or counterbore tool		
23241605	Drill carbide		
23241606	Drills high speed steel		
23241608	Hob cutter		
23241609	Knives and skives		
23241610	Pipe or tube cutter		
23241611	Reamer		
23241612	Shaper cutter	Cutters used during the shaping process in which the cutter travels along a straight path and the workpiece is stationary.	
23241613	Shaving cutter		
23241614	Solid milling cutter		
23241615	Taps		
23241616	Wire or cable cutter		
23241617	Taper pin reamer	A type of reamer manufactured with a taper of 1/4 per foot. They are used to ream holes into which standard taper pins will fit. The point of each reamer will enter the hole reamed by the next smaller size.	
23241618	Tower bolt reamer	A type of reamer designed for lining up bolt holes on cell phone towers, wind mills, and transmission towers.	
23241619	Pipe reamer	A type of reamer manufactured with a taper of 3/4 per foot.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23241620	Shell reamer	A type of reamer designed to be used as a chucking reamer for reaming bearings and other similar work.	
23241621	Rod saw blade	Carbide grit edged sawing wire cuts tile, glass, marble, hardened tool steel, fiber board, and many other hard to cut materials.	
23241622	Single angle cutter	A type of cutter designed for chamfering or beveling parts. Manufactured in single right and left angle in 45° & 60°.	
23241623	Side milling cutter	A type of cutter supplied in straight and staggered tooth form for light and heavy deep slot operations in steel and in most soft materials.	
23241624	Plain milling cylindrical cutter	A type of high speed cutter used for surface cutting and finishing in all types of materials.	
23241625	Shell end milling cutter	The cutters are used for face and slab milling in all types of materials.	
23241626	Convex cutter	A type of high speed steel cutter that is form-relieved for milling concave half circles in all types of materials.	
23241627	Concave cutter	A type of high speed steel cutter that is form-relieved for milling convex half circles in all types of materials.	
23241628	Corner rounding cutter	A type of cutter used to produce convex corner radii up to a quarter circle.	
23241629	Metal slitting saw	A type of saw used for general slotting and sawing applications.	
23241630	T slot cutter	A type of cutter used for opening out the bottom of a previously milled slot to form a T-slot.	
23241631	Woodruff seat cutter	A type of cutter used for cutting the smaller Woodruff keyseats.	
23241632	Dovetail cutter	A type of cutter used to produce dovetail slides for machine tool tables, jigs and fixtures	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23241633	Gear shaper cutter	A type of cutter used for chamfering, topping, protuberance, flat or fillet roots of gears.	
23241634	Jobber length drill	The most common type of drill. The length of the flutes is ten times the diameter of the drill, that is they will drill a hole that is 10D deep.	
23241635	Screw machine drill	A type of drill that excels at delivering better hole accuracy and longer tool life, even in use on difficult materials such as stainless steel or in heavy duty applications such as truck or mobile home bodies.	
23241636	Silver and deming drill	A type of drill used extensively in maintenance departments, machine shops, and in construction environments. Silver and Deming drills are perfect for portable drilling and drill presses where the chuck capacity is 1/2. Also called Blacksmith Drills or Prentice Drills (Canada). All S&D Drills are 6 overall length with 3 flute length.	
23241637	Extra length or longboy drill	A type of drill designed for general purpose drilling in deep hole applications where a 9 to 13 flute length is required.	
23241638	Carbide tipped hole cutter	A type of cutter best for cutting sheet metal, including stainless steel up to 1/8 thick.	
23241639	Taper shank drill	A type of drill designed for maximum performance when drilling a wide variety of materials where the driving machinery has a taper shank arbor or spindle.	
23241640	Multi step drill	A type of drill that automatically deburs the drilled hole. Non-slipping point does not require a pilot hole and drills material up to 1/8 thick accurately and cleanly.	
23241641	Mult step hex step drill	A type of drill that contains an entire drill set in one cutting tool. Especially useful for professional electricians and sheet metal contractors.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23241642	Speed threader	A type of ready-to-use combination die/die-stock for repairing external threads on bolts and threaded rod.	
23241643	Hex shank reamer	Short length bridge reamer seven inches long.	
23241644	Carbon dioxide laser	A cutting tool that uses a continuous wave carbon dioxide laser beam.	
23241645	Straight shank chucking reamer	A cutting tool that is used to polish drilled holes to precise dimension by biting on the chuck, and the shape of shank of reamer is straight line.	
23241646	Adjustable reamer	A reamer that can be adjusted to desired dimension by adjusting the nut with a set of 3 to 8 cutting blades in the main body of the reamer.	
23241647	Taper shank chucking reamer	A cutting tool that is used to polish drilled holes to precise dimension by biting on the chuck, and the shape of shank of reamer is tapered.	

Class

Commodity	Commodity Title	Definition	Synonyms
23241701	Shot blasting machine	Machines with abrasive materials (usually sand) are propelled by a high-velocity jet of air, or by a rotating wheel, onto the surface of the workpiece. Shot blasting is particularly useful in deburring metallic and nonmetallic materials and stripping, cleaning, and removing surface oxides.	
23241702	Thermal energy deburring machine	The part is placed in a chamber, which is then injected with a mixture of natural gas and oxygen. This mixture is ignited, and a heat wave is produced that heats up the burrs and melts them away.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23241703	Vibratory or barrel finishing machine	Machines used to improve the surface finish and remove burrs from large numbers of relatively small workpieces. Specially shaped abrasive pellets or media are placed in a container along with the parts to be deburred and then the container is either vibrated or tumbled.	
----------	---------------------------------------	--	--

Class

Commodity	Commodity Title	Definition	Synonyms
23241801	Drill press or radial drill	The workpiece is clamped securely and the drill is lowered manually by hand wheel or by power feed at preset rates. Radial drills are larger drill presses.	
23241802	Gang drilling machine	Drilling machines with multiple spindles that are capable of drilling as many as 50 holes of varying size, depth, and location in a single step.	
23241803	Gun drilling machine	Drilling machine used for long holes such as those found in gun bores, gun drills are used. The length of the hole requires that coolant be delivered through the shaft of the gun drill to the cutting front.	
23241804	Numerically controlled drilling machine	Numerically controlled drilling machines in which various drilling operations are performed automatically and in the desired sequence with the use of a turret.	
23241805	Rotary table drilling machine	Single or multiple drill head, multiple work station rotating platen drilling machine	
23241806	Multiple spindle head drilling machine	A machine comprised of multiple spindles on same head capable of multiple drilling operations.	
23241807	Radial arm drilling machine	A type of drilling machine with the drill head mounted on a radial arm and that can be freely rotated to allow a workpiece to be drilled at any point.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23241808	Deep hole drilling machine	A drilling machine that drills relatively deep holes with respect to the hole diameter.	
23241809	Bench drilling machine	A small vertical drilling machine that is installed on work table or bench.	

Class

Commodity	Commodity Title	Definition	Synonyms
23241901	Horizontal boring machine	A boring machine in which the spindle of the machine is oriented in the horizontal direction.	
23241902	Jig boring machine	Jig boring is used to accurately enlarge existing holes and make their diameters highly accurate. Jig boring is used for holes that need to have diameter and total runout controlled to a high degree.	
23241903	Metal broaching machines	Machines that shape internal and external surfaces, such as holes of circular, square or irregular sections, keyways, teeth of internal gears, multiple spline holes, and flat surfaces.	
23241904	Internal broaching machine	Broaching machines that enlarge or shape an existing hole by either pushing or pulling a broach through the hole. Internal broach types include hole, keyway, internal gear, and rifling.	
23241905	Surface broaching machine	A type of broaching machine that shapes the surface of a material by using a surface broach. Surface broach types include slab, slot, contour, dovetail, pot, and straddle.	
23241906	Vertical boring machine	A boring machine that has the main vertical shaft.

23242106	Indexable tool bodies or holders		
23242107	Insert carbide		
23242108	Insert ceramic		
23242109	Insert diamond		
23242110	Insert steel		
23242111	Lathe turret	An attachment for a lathe consisting of a rotating cylindrical block holding various cutting tools.	
23242112	Metal cutting band saw blade		
23242113	Metal cutting circular saw blade		
23242114	Steady rest	Steady rests are placed on the bed of a lathe to support long and slender parts from deflecting under the cutting forces.	
23242115	Tailstock	The tailstock, which can slide along the ways and be clamped at any position, supports the other end of the workpiece on a lathe.	
23242116	Tapping machine attachment		
23242117	Threading machine attachment		
23242118	Knurling tool	This tool is used in conjunction with a lathe to emboss the ends of metal tubes and shafts. The embossed grooves may act as hand grips for the user or better traction for rubber or plastic covers. The knurling tool itself consists of multiple rotary cutters which are held against the metal shaft as it turns on the lathe at a relatively slow speed (500 rpm on average).	
23242119	Lathe bit	A bite that has the processing blade for cutting in the lathe processing.	
23242120	Machine table base	A table for metal working machines designed for easy setting of location of X-axis and Y axis for precision work, such as boring, drilling, grinding and milling.

Class 23242200 Gear manufacturing machines

Commodity	Commodity Title	Definition	Synonyms
23242201	Bevel gear generator	Machines used for cutting bevel gears. Bevel gear teeth may be straight, spiral or bevel.	
23242202	Gear hobbing machine	Gear hobbing machines use a gear-cutting hob to cut the teeth of a gear. A gear-cutting hob is basically a worm or screw, made into a gear-generating tool by machining a series of longitudinal slots or gashes into it to form cutting teeth.	
23242203	Gear honing machine	Gear honing machines use a plastic gear impregnated with fine abrasive particles. The process is faster than grinding and is used to improve the surface finish.	
23242204	Gear lapping machine	Gear lapping machines further improve the surface finish from honing machines. The ground gear teeth are lapped using abrasive compounds with either a gear-shaped lapping tool or a pair of mating gears that are run together.	
23242205	Gear shaping machine	Gear shaping machines use a pinion-shaped cutter to create a gear. The cutter has an axis parallel to that of the gear blank and rotates slowly with the blank at the same pitch-circle velocity with an axial reciprocating motion.	
23242206	Gear shaving machine	Gear shaving uses a cutter in the exact shape of the finished tooth profile and removes small amounts of metal from the gear teeth.	
23242207	Gear grinding machine	Gear grinding machines finish the gears by grinding them with grinding wheels in the exact shape of the tooth spacing of the gears.	
23242208	Gear tooth chamfering machine	A machine that consistently removes the edges in accordance with the outline of the gear.	

Class 23242300 Lathes and turning centers

Commodity Commodity Title Definition Synonyms

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23242301	Automatic bar machine	All operations on these machines are performed automatically, with tools attached to a turret. The bar stock is fed forward automatically after each part is machined to finished dimensions and cut off. These machines may be equipped with single or multiple spindles.	
23242302	Automatic lathe or chucking machine	A type of machine that may have a horizontal or vertical spindle and does not have tailstocks; also called chucking machine. It is used for machining individual pieces of regular or irregular shapes and is available in either single or multiple spindle types.	
23242303	Horizontal turning center	A computer-controlled lathe or turning center with a horizontal spindle and several features including multiple turrets that hold a variety of tools and/or multiple spindles.	
23242304	Tracer or duplicating or contouring lathe	Tracer lathes are machine tools with attachments that are capable of turning parts with various contours. The cutting tool follows a path that duplicates the contour of a template.	
23242305	Turret lathe	Turret lathes are capable of performing multiple cutting operations on the same workpiece, such as turning, boring, drilling, thread cutting, and facing. Several cutting tools are mounted on the main turret, which is rotated for each specific cutting operation. After the part is machined, a tool mounted on a turret, called the square turret, which moves radially into the workpiece, cuts the part off.	
23242306	Vertical turning center	A computer-controlled lathe or turning center with a vertical spindle and several features including multiple turrets that hold a variety of tools and/or multiple spindles.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23242307	Leadscrew	A large screw used to actuate precise movements of the tool or the work when performing cutting or grinding operations on a machine tool such as a lathe.	
23242308	Centering machine	A machine that is designed to find the central point on one or both sides of the workpiece prior to drilling and countersinking work to be turned on a lathe.	

Class

Commodity	Commodity Title	Definition	Synonyms
23242401	Horizontal machining center	A machining center with a horizontal spindle. Horizontal machining centers are suitable for large as well as tall workpieces requiring machining on a number of surfaces.	
23242402	Multi-tasking or universal machining center	Machining centers that are equipped with both horizontal and vertical spindles. They have a variety of features and are capable of machining all surfaces of a workpiece (vertical, horizontal, and diagonal).	
23242403	Vertical machining center	A machining center with a vertical spindle. Vertical machining centers are suitable for performing various machining operations on flat surfaces with deep cavities, such as in mold and die making.	

Class

Commodity	Commodity Title	Definition	Synonyms
23242501	Bed milling machine	A type of milling machine where the table is mounted directly on the bed, which replaces the knee, and can move only longitudinally.	
23242502	Bridge milling machine	Bridge milling machines have a bridge over the fixed table and the crossbeam is fixed.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23242503	Column and knee milling machine	General purpose milling machine where the milling cutter may be horizontal for slab milling or vertical for face and end milling, boring, and drilling operations. The knee supports the saddle and gives the table vertical movement.	
23242504	Gantry milling machine	Gantry milling machines have a bridge over the fixed table, but the crossbeam moves.	
23242505	Profiling and duplicating milling machine	Profile milling machines have five-axis movements, three linear and two angular movements. Duplicating milling machines reproduce parts from a master model by using tracer fingers.	
23242506	Traveling column milling machine	Horizontal or vertical milling machines with a CNC moving column and fixed table/bed.	
23242507	Universal milling machine	A type of milling machine that can be used for either vertical or horizontal milling. The spindle head articulates to allow for either of type of milling.	
23242508	Copy milling machine	A machine designed for milling profiles or relief contours --three dimensional milling-- on articles made of various materials by means of a cutting tool which reproduces on the article the surface or contour of a master device.	
23242509	Turret milling machine	A type of vertical milling machine that has a stationary spindle and the table is moved both perpendicular and parallel to the spindle axis to accomplish cutting.	
23242510	Planer style milling machine	A type of large milling machine that is built in the same configuration as planers except with a milling spindle instead of a planing head.	
23242511	Machine end mill	A bar shaped machine cutting tool used for groove cutting, side cutting, and contour cutting.

UNSPSC v16_0901

1/27/2014

23242601	Beveling machine	A machine used for producing bevels. A bevel is a slant or angle on a surface. Two adjoining surfaces, if not at right angles are beveled. Bevel also has many industry-specific uses.
23242602	Burnishing machine	Burnishing machines improve the surface finish of parts through a cold-working broaching process. Burnishing removes no metal, instead it compresses and smoothes out fine surface irregularities and is used for soft, ductile materials.
23242603	Chamfering machine	A machine used for producing chamfers. A chamfer is a beveled edge connecting two surfaces. If the surfaces are at right angles, the chamfer will typically be symmetrical at 45 degrees. Chamfers may be both exterior (cutting off an external angle) and interior (filling in an internal angle).
23242604	Lapping machine	Lapping machines improve the surface finish of parts by using a lap tool, which is typically made of cast iron, copper, leather, or cloth. Lapping machines are used on flat, curved, cylindrical or spherical surfaces to improve the surface finish.
23242605	Metal polishing machine	Polishing machines produce a smooth, lustrous surface finish on parts. Polishing is done with disks or belts made of fabric, leather, or felt and coating with fine powders of aluminum oxide or diamond.
23242606	Skiving machine	Skiving machines perform a shaving process, which removes extra material from parts using specially designed knives.
23242607	Super finishing machine	Super-finishing machines are used to improve surface finish of parts by applying a very light pressure and having the stone move in a motion with short strokes.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23242608	Tool presetter	Tool measuring and inspection systems that provide tool presetting functions prior to the tool being used in a specific machine. A tool presetter may use video cameras, manage tool assemblies for jobs running on machining centers and cells, allow CAD files to be viewed on presetter, or run complex measuring routines.	
23242609	Honing machine	A machine used to achieve very precise surface and geometry dimensions in non-gear applications by removing minute amounts of metal from the work piece.	
23242610	Diamond bore sizing machine	A machine that utilizes diamond cutting tools to precisely achieve bore (internal diameter) sizes.	
23242611	Notching machine	A metalworking machine that cuts off the edges or corners of the workpiece according to a predetermined dimension.	
23242612	Metal engraving machine	A machine tool that cuts or engraves a design into a metal plate for subsequent use as a template for production.	
23242613	Tapping machine	A machine tool that cuts female screws mechanically by using the tap on the straight hole drilled.	
23242614	Key seating machine	A machine tool that is used to cut the keyway and key groove.	
23242615	Sheet metal grooving machine	A machine equipped with a steel bar used to hollow out a groove in the workpiece.

Class 23251500 Metal bending machines

Commodity	Commodity Title	Definition	Synonyms
23251501	Hydraulic press brake	Press brakes bend sheet metal or plate by utilizing long dies and a hydraulic press. Hydraulic presses operate at constant speeds and can transmit large amounts of energy to the workpiece by maintaining a constant load throughout the stroke.	
23251502	Manual press brake	Press brakes bend sheet metal or plate by utilizing long dies and a mechanical press. The mechanical press is either the crank or eccentric type, with speeds that vary from a maximum at the center of the stroke to zero at the bottom of the stroke.	
23251503	Metal folding machine	Folding machines support the material through the whole cycle and the machine gauges off of the overall width of the part, not just the flange. The tooling for folding machines is almost universal, where press brakes require different tooling for every gauge and bend.	
23251504	Tangent bender		
23251505	Tube bending machine	Bending machines that use internal mandrels, or filling tubes with particulate materials such as sand, which are often necessary to prevent collapsing of the tubes during the bending. Solid rods and structural shapes are also bent by these techniques.	
23251506	Tube end finisher		
23251507	Wing bender		
23251508	Steel bar bending machine	A metal forming machine that bends steel rod to desired shape.	
23251509	Wire drawing machine	A metal processing machine that reduces the diameter of worked material by pulling or drawing it through metal dies with the cross section of product shape.

1/27/2014

Class

Commodity	Commodity Title	Definition	Synonyms
23251601	Thread rolling machine		
23251602	Sheet metal forming machine	A machine that is used when the thin steel sheet is wound up in circular shape as a part of the press working machine.	
23251603	Rolling press	A machine used in metal sheet manufacturing wherein metal sheets are passed through revolving rollers to achieve the desired thickness.	

Class

Commodity	Commodity Title	Definition	Synonyms
23251701	Forge shear press	Subjecting the material to shear stresses, typically between a punch and a die, cuts the material into a slug, billet, or preform used during the forging operation.	
23251702	Impression and closed die forging press	Two shaped dies are pressed together and the workpiece acquires the shape of the die cavities.	
23251703	Open die forging press	A solid workpiece is placed between two flat dies and reduced in height by pressing the two dies together.	
23251704	Radial forging machines		
23251705	Roll forging machines		
23251706	Rotary burrs		
23251707	Trim press	Trim presses are used after the forging press operations to remove excess metal or flash.	
23251708	High speed forging machine	A forging machine that increases the speed of the hammer head much greater by compressing the vapor or air and momentarily releasing it.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23251709	Air hammer forging machine	A forging machine that applies compressed air to the piston to operate the ram and it is generally used in hot forging works.	
23251710	Spring hammer forging machine	A type of forging machine that applies the strike by transmitting the rotation force of the crank to the hammer through the leaf spring for impact.	
23251711	Steam hammer forging machine	A type of forging machine that ascends and descends with the hammer head by the vapor force to forging the material.	
23251712	Drop hammer forging machine	A type of forging machine that makes the forging by dropping the hard steel hammer from appropriate height.	
23251713	Swaging forging machine	A type of forging machine that puts the workpiece into the dies and repeatedly strikes dies at high speed with the hammer.	
23251714	Upset forger or crank press	A type of forging machinery that increases the diameter of the workpiece by compressing its length.	

Class

Commodity	Commodity Title	Definition	Synonyms
23251801	Bend die		
23251802	Cutting die		
23251803	Die casting die		
23251804	Fine blanking die	Fine blanking dies produce very smooth and square edges on sheet metal.	
23251805	Forge die	Dies are engraved or machined metal blanks used to form another object through a forging process.	
23251806	Metal extrusion die		
23251807	Metal stamp		
23251808	Pipe bending mandrel		
23251809	Rotary die		

UNSPSC Codeset

UNSPSC v16_0901

23251810	Stamping die		
23251811	Steel rule die		
23251812	Threading die		
23251813	Cabling die	Attachment for manufacture of steel cable or wire.	
23251814	Drawing die	Device used in wire and cable manufacturing which reduces diameter of input wire through continuous "drawing" or pulling operation, thus stretching and transforming metal to produce smaller diameter wire.	

Class

Commodity	Commodity Title	Definition	Synonyms
23251901	Metal sheet feeder	A machine that supplies metallic raw material to the process of cutting and dimensioning galvanized sheet, tin free steel plate, aluminum sheet, etc. which are then sent to the container manufacturing process.	

Family

Class

Commodity	Commodity Title	Definition	Synonyms
23261501	Fused deposition modeling machine	FDM is the second most widely used rapid prototyping technology. A plastic filament is unwound from a coil and supplies material to an extrusion nozzle. The nozzle is heated to melt the plastic and is moved over the table in the required geometry. The nozzle deposits a thin bead of extruded plastic to form each layer. The plastic hardens immediately after being squirted from the nozzle and bonds to the layer below.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23261502	Inkjet method machine	This machine uses a single jet each for a plastic build material and a wax-like support material, which are held in a melted liquid state in reservoirs. The liquids are fed to individual jetting heads, which squirt tiny droplets of the materials as they are moved in X-Y fashion in the required pattern to form a layer of the object. The materials harden by rapidly dropping in temperature as they are deposited.	
23261503	Laminated object manufacturing machine	Profiles of object cross sections are cut from paper or other web material using a laser. The paper is unwound from a feed roll onto the stack and first bonded to the previous layer using a heated roller, which melts a plastic coating on the bottom side of the paper. The profiles are then traced by an optics system that is mounted to an X-Y stage.	
23261504	Laser powder forming machine	A high power laser is used to melt metal powder supplied coaxially to the focus of the laser beam through a deposition head. The X-Y table is moved in raster fashion to fabricate each layer of the object. The head is moved up vertically as each layer is completed. Metal powders are delivered and distributed around the circumference of the head either by gravity, or by using a pressurized carrier gas.	
23261505	Selective laser sintering machine	A roller spreads Thermoplastic powder over the surface of a build cylinder. The piston in the cylinder moves down one object layer thickness to accommodate the new layer of powder. A laser beam is then traced over the surface of this tightly compacted powder to selectively melt and bond it to form a layer of the object.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23261506	Stereolithography machine	Stereolithography is the most widely used rapid prototyping technology. Stereolithography builds plastic parts or objects a layer at a time by tracing a laser beam on the surface of a vat of liquid photopolymer.	
23261507	Three dimensional printing machine	A type of printing machine that uses a process that starts by depositing a layer of powder object material at the top of a fabrication chamber. To accomplish this, a measured quantity of powder is first dispensed from a similar supply chamber by moving a piston upward incrementally. The roller then distributes and compresses the powder at the top of the fabrication chamber. The multi-channel jetting head subsequently deposits a liquid adhesive in a two dimensional pattern onto the layer of the powder which becomes bonded.	

Family Welding and soldering and brazing machinery and accessories and supplies

Class Welding machinery

Commodity	Commodity Title	Definition	Synonyms
23271401	Submerged arc welding machine	A submerged arc-welding machine creates a thick layer of flux completely covers the molten metal and prevents spatter and sparks. The flux also acts as a thermal insulator, allowing deep penetration of heat into the workpiece.	
23271402	Ultrasonic welding machine	Ultrasonic welding machinery joins the contacting surfaces of two pieces by subjecting them to a static normal force and oscillating shearing (tangential) stresses. It can be used with a wide variety of metallic and nonmetallic materials, including dissimilar metals and is extensively used for joining plastics.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23271403	Projection welding machine	One or more projections (dimples) are embossed, forged, or machined on one of the surfaces to be welded. The two pieces are then pressed together and weld nuggets are formed as the projections are compressed.
23271404	Plasma arc welding machine	Plasma-arc welding machines use a concentrated stream of plasma, and ionized hot gas, composed of nearly equal numbers of electrons and ions. Plasma-arc welds create deeper and narrower welds on a variety of metals.
23271405	Laser welding machine	Laser beam welding utilizes a high-power laser beam as the source of heat to produce a fusion weld.
23271406	Spot welding machine	Spot welding is the most common form of resistance welding. Spot welding is usually used on sheet metal and in applications having some type of overlapping joint design. Resistance spot welds are made from electrodes on both sides of the joint and no filler metal is used.
23271407	Tungsten inert gas welding machine	The TIG process lets a one weld thinner material than other processes and it also provides excellent fusion. TIG also produces the best looking weld beads, which are used when cosmetic appearances are important.
23271408	Metal inert gas welding machine	A MIG welding machine creates an arc between the work piece and a continuously consumable electrode, the wire in these wire welding processes.
23271409	Shielded metal arc welding or stick welding machine	Stick, the most basic of welding processes, offers the easiest option for joining steel and other metals. SMAW or stick joins metals when an arc is struck between the electrode and the work piece, creating a weld pool and depositing a consumable metal electrode into the joint.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23271410	Welding rectifier		
23271411	Plastic welder	A welder designed to weld or seal pieces of thermoplastic together using any one of several techniques.	
23271412	Thermite welder	A type of welding machine that uses thermite -- 5 parts iron oxide red powder and 3 parts aluminium powder by weight, ignited at high temperatures--to melt metal, which is poured between two workpieces to form a welded joint.	
23271413	Electron beam welding EBW machine	A type of welding machine that uses an electron beam gun to produce electrons that strike the workpiece, at which point their energy is converted into heat, instantly vaporizing the metal under temperatures near 25,000 degrees C. The heat penetrates deeply, making it possible to weld much thicker workpieces than is possible with most other welding processes. However, because the electron beam is tightly focused, the total heat input is actually much lower than that of any arc welding process.	
23271414	Electro slag welding ESW machine	A type of welding machine employing a single pass welding process for thick --greater than 25mm up to about 300mm--materials in a vertical or close to vertical position. Welding is made by melting the basic material and wire by the heat of the current flowing into the slag.	
23271415	Cold pressure or contact welding machine	A type of welding machine in which joining takes place without fusion at the interface of the two parts to be welded. Unlike in the fusion-welding processes, no liquid or molten phase is present in the joint. Pressure is applied to the workpieces through dies or rolls thus producing adhesion.

UNSPSC v16_0901

1/27/2014

23271416	Friction welding FW machine	A welding machine that employs a solid-state welding process that generates heat through mechanical friction between a moving workpiece and a stationary component. Because no melt occurs, friction welding is not actually a welding process in the traditional sense, but a forging technique.
23271417	Braze welding machine	A type of welding machine that uses a bronze or brass filler rod coated with flux to join steel workpieces. It is virtually identical to the equipment used in brazing, except there is no capillary action.
23271418	Flash butt welding machine	A type of butt welding machine that runs a strong electrical current through the touching ends of two unjoined pieces of rail. The ends become white hot due to electrical resistance and are then pressed together forming a strong weld.
23271419	Upset welder	A type of welding equipment that binds two pieces together through direct pressure, high temperature and applied electrical current sufficient to expel surface contaminants -- called upset-- from the weld. No external welding material is used.
23271420	Seam welder	A welder that is used for joint welding of relatively thin metal plate as a type of electric resistance welding.
23271421	Band saw blade welder	A welder that welds band shaped metal used for band saw machinery.
23271422	Stud welder or stud arc welder	A special welding machine that joins a metal stud or nut to a metal plate.
23271423	Alternating current AC arc welder	An type of arc welding machine that uses alternating current.
23271424	Direct current DC arc welder	An arc welder that uses direct current for welding current.

Class

Commodity	Commodity Title	Definition	Synonyms
23271501	Furnace brazing machine	Furnace brazing is when the parts are cleaned, loaded with brazing metal and placed into a furnace. The furnace then melts the filler metal to join the surfaces.	
23271502	Induction brazing machine	Induction brazing is when the parts are loaded with filler metal and placed near the induction coils for rapid heating.	

Class

Commodity	Commodity Title	Definition	Synonyms
23271601	Furnace soldering machine	Furnace soldering is when the parts are cleaned, loaded with brazing metal and placed into a furnace. The furnace then melts the filler metal to join the surfaces.	
23271602	Induction soldering machine	Induction brazing is when the parts are loaded with filler metal and placed near the induction coils for rapid heating.	
23271603	Soldering iron	Soldering irons are tools for bonding two or more metallic surfaces together with an intermediate alloy (such as tin/lead or zinc/copper alloys), which is melted and re-cooled as the bond.	
23271604	Wave soldering machine	Machine used to attach components in the manufacture of printed circuit boards	
23271605	Reflow oven	A machine used for reflow soldering of components to printed circuit boards.	
23271606	Selective soldering machine	A type of machine used to selectively solder individual or multiple components to printed circuit boards	
23271607	Automatic soldering machine	A machine that handles the application of filler metal and flux, along with heating and cooling automatically. Material costs are controlled, since filler metal and flux are applied automatically in just the right amount.

Class 23271700 Welding and soldering and brazing accessories

Commodity	Commodity Title	Definition	Synonyms
23271701	Blow pipe		
23271702	Blow torch		
23271703	Braze ring		
23271704	Desoldering Gun		
23271705	Desoldering pump		
23271706	Desoldering tip		
23271707	Gas welding or brazing or cutting apparatus		
23271708	Temperature indicating stick		
23271709	Welding generator		
23271710	Welding or brazing tip cleaner file		
23271711	Welding or cutting tip		
23271712	Welding or soldering kit		
23271713	Welding positioner and manipulator	Welding positioners and manipulators include tube and circumferential welder, turning roll and rotator, weld manipulator, positioner and turntable, longitudinal seamer, robotic positioning station, and head and tail stock type positioners and manipulators.	
23271714	Welding screen	A type of protective screen, made of a polyvinyl chloride plastic film, used to protect nearby workers from exposure to the UV light from the electric arc.	
23271715	Welding tip dresser blade		
23271716	Welding tip dresser or accessories		
23271717	Flashback arrestor	Specific check valve usually installed between torch and welding hose to prevent flow of burning fuel gas and the oxygen mixture back into hoses and regulators.

23271718	Welding blanket	Covering that provides protection from sparks, spatter and slag generated by welding or metal-cutting applications	
----------	-----------------	--	--

Class

Commodity	Commodity Title	Definition	Synonyms
23271801	Anti spatter spray		
23271802	Brazing flux		
23271803	Desoldering braid		
23271804	Gas welding or brazing rod		
23271805	Iron powder		
23271806	Solder		
23271807	Soldering fluid		
23271808	Soldering flux		
23271809	Soldering tip		
23271810	Welding electrode		
23271811	Welding flux		
23271812	Welding rod		
23271813	Welding wire		
23271814	Cutting electrode	A type of arc welding electrode that operates under high current, produces a sharp, high intensity arc which melts the portion of arc and displaces the molten metal from the arc pool.	
23271815	Solder bar	Bar or ingot solder	
23271816	Solder paste	Solder suspended in flux used for connection of terminations	
23271817	Solder powder	Powder form solder	
23271818	Solder wire		
23271819	Metal joining flux	Substances that promote the effects of various metal joining processes

UNSPSC v16_0901

1/27/2014

23271820	Welding electrode moisture stabilizer	A device designed to prevent excessive humidity absorbtion by the welding electrode.	
23271821	Welder torch	A torch that is used when welding with inert gas without reacting with the oxygen in air in the high temperature during the welding work.	

Family **23280000** Metal treatment machinery

Class **23281500** Coating or plating machines

Commodity	Commodity Title	Definition	Synonyms
23281501	Anodizing machine	Machine wherein the workpiece is the anode in an electrolytic cell immersed in an acid bath, resulting in chemical adsorption of oxygen from the bath. Anodizing is an oxidation process in which the workpiece surfaces are converted to a hard and porous oxide layer that provides corrosion resistance and a decorative finish.	
23281502	Electrolytic bath machine	Electrolytic bath machines plate the workpiece (cathode) with a different metal (anode), while both are suspended in a bath containing a water-base electrolyte solution. The metal ions from the anode are discharged under the potential from the external source of electricity, combine with the ions in the solution, and are deposited on the cathode.	
23281503	Thermal spray machine	Coating machines that apply various metals and alloys, and ceramics by a spray gun with a stream of oxyfuel, flame, electric arc, or plasma arc. The coating material may be in the form of wire, rod, or powder.	
23281504	Barrel plating machine	A type of electro plating machine that brings the workpiece into contact with an electrolyte while rotating in a perforated hardwood barrel.	

Class **23281600** Heat treating machines

Commodity Commodity Title Definition Synonyms

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

23281601	Induction heating machine	The part to be heat-treated is heated rapidly by the electromagnetic field generated by an induction coil carrying alternating current, which induces eddy currents in the part. The coil may be shaped to fit the contour of the part and may be designed to also quench the part.	
23281602	Quench machine	Quench refers to the rapid cooling of a part to prevent phase transformations. Quenching may be carried out in the following medias including water, brine (saltwater), oils, molten salts, air, caustic solutions, polymer solutions or gas.	
23281603	Heat treating age hardening furnace	Furnace used to relieve mechanical stresses during the manufacture of aluminum heat exchangers.	

Class

Commodity	Commodity Title	Definition	Synonyms
23281701	Cladding machine	Metals are bonded with a thin layer of corrosion-resistant metal by applying pressure with rolls or other means.	
23281702	Shot peening machine	Shot peening machines repeatedly hit the workpiece surface with a large number of cast steel, glass, or ceramic shot (small balls), making overlapping indentations on the surface. This process improves the fatigue life of the component and is used extensively on shafts, gears, springs, oil-well drilling equipment, and jet-engine parts.	
23281703	Sand blasting machine	A metal surface treatment machine that uses sand at high pressure to remove impurities on the product surface.	
23281704	Surface hardening electro discharge machine	A metal working machine that is used to harden the surface of the product at a certain location and depth only.

Class 23281800 Metal treatment fixtures and tooling

Commodity	Commodity Title	Definition	Synonyms
23281801	Electroplating rack	Electroplating racks are used in electrochemical plating operations. They hold the workpieces to be plate and are electrically conductive at certain contact points, to enable the plating process. Noncontact surfaces are covered with insulating material.	
23281802	Physical vapor deposition rack	Type of rack used in vapor deposition coating operations. It holds the workpieces to be coated.	

Class 23281900 Metal cleaning machinery and supplies

Commodity	Commodity Title	Definition	Synonyms
23281901	Electrochemical metal cleaner	A type of cleaning fluid used in conjunction with electrochemical processes to clean parts. Variations include, but are not limited to, alkaline solutions, emulsions, solvents, hot vapors, acids, salts, or organic compound mixtures.	
23281902	Chemical metal cleaner	Type of metal cleaner employing chemicals to remove the oil and grease from surfaces. Includes one or more of the following processes: solution, saponification, emulsification, dispersion, or aggregation.	
23281903	Mechanical or ultrasonic metal cleaner	A type of metal cleaner that physically disturbs the contaminants, as with wire or fiber brushing, dry or wet abrasive blasting, tumbling, and steam jets. Ultrasonic cleaners use high frequency sound waves to create bubbles for loosening and removing dirt, scale, and other impurities from parts. Mechanical or ultrasonic cleaners are particularly effective in removing rust, scale, and other contaminants.	
23281904	Aqueous cleaning and washing equipment	Washing/cleaning system used in micro-chip and other production to remove waste products and other contaminants	

UNSPSC Codeset

24101616	Below the hook device		
24101617	Scissor lift or lift table	A device that employs a scissors mechanism to raise or lower materials in such a way as to provide ergonomic positioning for operators. Lift tables come in a vast array of configurations and can be built to suit various highly specialized industrial processes. The most common lift table design incorporates hydraulic cylinders and an electrical motor to actuate the scissor lifting mechanism. Lift tables can also be driven by pneumatic sources or by foot pump when the load is not excessively heavy. Lift tables can be mounted in a pit for floor-level loading, can include rotating tops, tilting mechanisms, and other various features to ensure operator safety and ease of use.	
24101618	Pipe layer		
24101619	Bridge cranes		
24101620	Track cranes

24101632	Side shifts		
24101633	Hoist drums		
24101634	Chain bags		
24101635	Screw jacks		
24101636	Counter weight bag and counterweight	Weights attached to the counterweight cantilever or to the rotating platform to assist in counteracting the weight of the load and/or certain parts during operation.	
24101637	Nylon fabric sling	These slings are made up of a fabric on the top with a nylon rope inside	
24101638	Wire rope sling	These slings are made up of tightly woven metallic wire ropes	
24101639	Windlass	An apparatus for moving a heavy weight. It consists of a horizontal cylinder (barrel), which is rotated by the turn of a crank or belt. A winch is affixed to one or both ends, and a cable or rope is wound around the winch, pulling a weight attached to the opposite end.	
24101640	Traversing gear unit	Traversing gear for a working machine comprising a drive motor, which is connected to a hydrostatic compound gear that has a hydraulic pump and two hydraulic motors.	
24101641	Shackle	A U-shaped bar. The open end can be passed through chain links. Used during material handling.	
24101642	Floating crane	A marine lifting machine used to move or construct materials on the water. It is mainly used in harbors and other waterway commercial and construction sites.	
24101643	Laundry and dressing trolley	This is a type of lifting equipment used for the purpose of moving laundry and dressing.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24101644	Dumb waiter	A type of vertical lift equipment or elevator used to carry small cargo. It is used frequently in transportation of books at library or products at warehouse.	
24101645	Crawler crane	Crawler type vehicle with crane device and driver compartment, and is used mainly for pulling up and transporting heavy objects on weak foundation.	
24101646	Railway crane	A crane with track type roller equipped with hoist.	
24101647	Material lifting clamp	A clamp that is designed to pick up and hold or move an object.	
24101648	Plate lifting clamp	Clamp manufactured to transport mainly plate type objects by picking up or hanging them horizontally or vertically.	
24101649	Winch crane	A device used to move cargo vertically up and down or horizontally by installing boom on vertical post and by using rotation of boom and wire rope of its frontal end, and has support structure on the lower portion that supports the post.	
24101650	Guy derrick	Crane with 6 or 7 units of guy line that is used mainly in transportation and assembly of steel frame and is similar to derrick with ropes.	
24101651	Capstan	A machine used in pulling up or pulling heavy objects by rotating rope or wire wound around vertical conical body, and is used mainly in winding rope for mooring of vessels.	
24101652	Jib crane	A crane that has the inclined jib that is also referred to as the slewing crane with many turns to make. It has a horizontal cantilever shape that extends from the vertical post.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24101653	Overhead crane	A crane that enables pulling up and transporting heavy objects by laying rail onto the posts of internal wall surfaces of factory and attaching hoist onto 1 to 2 units of girder and cross beam that can travel on the rail.
24101654	Gantry crane	A crane comprised of a supporting device both ends of which have legs with wheels moving on rail. Above the supporting device, a trolley moves horizontally to carry the goods.
24101655	Vehicle parking lift system	Mechanical three dimensional parking facility that can accommodate larger number of vehicles within limited space by parking vehicles in three dimensions.
24101656	Tractor towed crane	A wheel type crane that is hauled by the connecting rod of a tractor and the power is supplied from tractor to operate through manipulation of cable.
24101657	Tractor mounted crane	A crane mounted on the front, center or rear portion of a wheel type tractor and used primarily for railroad construction. It is hauled by the connecting rod of a tractor and the power is supplied from tractor to operate through manipulation of cable.
24101658	Lifting magnet	A device used for stevedoring and transporting steel plate, scrap iron, slave, iron lump, beams and other metal items by using principle of electromagnet. Eye for pulling up is attached to the upper aspect of the device.
24101659	Vehicle movable jack or dolly	A device for moving or transporting vehicles used for changing the location of vehicle within a narrow space such as car repair shop and transportation of parked vehicle that becomes obstacle under emergency situations.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24101660	Battery lifter	Lifting device used to raise or lower heavy batteries of electric motor vehicles or forklifts. Designed to be hung on crane or hoist by attaching sling or hook onto insulated beam.
24101661	Vehicle lift	Lifting device, usually hydraulic, used for lifting vehicles for maintenance of underbody of vehicle, alignment of wheel and maintenance of tire and others.
24101662	Winch cover	A cover that is made with textile, leather or plastic product. It is used to cover all or part of winch to protect the winch from the factors of damage, such as humidity, dust and others.

24101726	Conveyor liner		
24101727	Vibrating conveyors		
24101728	Conveyor mounts		
24101729	Elevator bucket	The bucket that is attached to a bucket elevator conveying system	
24101730	Screw conveyor	Type of conveyor system consisting of an Archimedian screw contained within a tube and turned by a motor so as to deliver material from one end to the other.	
24101731	Conveyor skirt board	Attachment to conveyors for holding skirt board rubber.	
24101732	Conveyor carrying idler bracket	Carrying idler frames are fabricated out of mild steel strips and angles and are used to hold the impact idlers and carrying idlers in position and support / guide the belt.	
24101733	Conveyor return idler bracket	A return idler bracket is generally fabricated from mild steel mostly in 'L' or 'J' shape.	
24101734	V plough scraper	This is a V-shaped metallic frame with a rubber strip inserted into it. The frame is mounted on the top side of a return conveyor belt.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24101735	Air slide	This is an enclosed conveyor which is divided into two parts. On the top side material flows; on the bottom side compressed air flows in pulses. The two parts are separated by means of a porous fabric which the compressed air passes through and fluidizes the material being conveyed.
24101736	Dense phase conveying system	This system has a top surge tank, a leak proof valve, a dispenser and conveying pipes. Dust from the system is added to the surge tank. From there it enters into the dispenser, where the material is pressurized and discharged in batches.
24101737	Lean phase conveying system	This system has a top surge tank, a leak proof valve, a dispenser and conveying pipes. Dust from the system is added to the surge tank and from there it enters into the dispenser, where the material is driven by a continuous stream of compressed air.
24101738	Rod gate	This a type of valve used in controlling flow rate of granular bulk raw materials, mostly fitted at the bottom of bunkers/silos. It consists of a box-like frame made of a mild steel channel through which mild steel control rods are inserted from both sides. Rod removal increases material flow; rod insertion decreases material flow.
24101739	Bulk receiving unit	This equipment is similar to a belt conveyor, but the belt is wider and has side walls to hold the material. Equipment orientation is horizontal with the discharge end inclined upwards
24101740	High angle conveyor	These are also called "z" conveyors, the basic configuration is like a belt conveyor. The only difference is that instead of a flat belt, there are bucket shaped vanes fixed on top of the belt to hold the conveying material.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24101741	Internal belt scraper	This device consists of a fabricated metallic frame containing blades made of a flexible material. It is mounted just over a conveyor belt where it scrapes the conveyed material.	
24101742	External belt scraper	This device consists of a fabricated metallic frame containing blades made of a flexible material. It is mounted just over a conveyor belt where it scrapes the conveyed material.	
24101743	Conveyor tail shaft	Shaft used on conveyor systems. It is located at the unloading end of the conveyor system.	
24101744	Conveyor head shaft	Shaft used on conveyor systems. It is located at the loading end of the conveyor system.	
24101745	Wheel conveyor	A type of conveyor similar to a roller conveyor except that wheels are attached instead of rollers to convey goods on it.	
24101746	Portable conveyor	A type of adjustable length conveyor mounted on wheels to enable easy transportation of device as needed.	
24101747	Conveyor support	A conveyor support device used to adjust the height or gradient of a movable or portable conveyor, or to move the conveyor.	
24101748	Tripper conveyor	A pulley-driven type of conveyor belt used in construction, mining, and other large-scale earth-moving businesses. They are also known as tiered or stepped conveyers and are designed to convey materials uphill. In order to keep these materials from sliding back down the conveyor, tall ridges or flaps are affixed laterally to the face of the conveyor belts.	
24101749	Conveyor system	An integrated conveyor assembly comprised of frame, belts, pulleys and power source designed to transport material or objects automatically and continuously over prescribed distance.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24101750	Overhead track conveyor	A type of conveyor that consists of a continuous loop of chain or cable that is suspended from a track. Carriers or trolleys are attached periodically to hang or contain products. There are several different types of overhead trolleys. Manual trolleys or push systems are used mainly in low-volume applications. Motorized overhead trolleys have wheels that run on a rail and are driven by a motor.

24101907	Spill containment supports		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24101908	Drum stillage	A type of pallet or cage for storing and/or transporting a plurality of drums containing hazardous material, such as radioactive waste, comprising a rectangular planar base having a post extending upwardly from each corner. Each post is hollow and is provided with a support pad at an end remote from the base. The support pads lie in a plane substantially parallel to the base. Upper and lower tie plates extend between the four posts to define a perimeter around the stillage.

Commodity	Commodity Title	Definition	Synonyms
24112204	Metallic pails		
24112205	Non metallic pails		
24112206	Metallic flammable liquid cans		
24112207	Non metallic flammable liquid cans		
24112208	Spray kit		
24112209	Jerrycans		
24112210	Milk can	A type of can used for milk storage and packing	

Class 24112400 Storage chests and cabinets and trunks

Commodity	Commodity Title	Definition	Synonyms
24112401	Tool chest or cabinet		
24112402	Hazardous materials cabinets		
24112403	Tool belts		
24112406	Shelf partition		
24112411	Road and flight case	Custom-designed cases made specially for the transportation of heavy, yet fragile equipment such as electronic equipment, lighting, etc. These cases are made of wood panels and reinforced with metal corners, edges and casters. They also have handles for easier manipulation and saucers on the top which enable them to be stacked during transportation. They may include custom made protective liners.áá	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24112412	Equipment transportation case	Custom designed cases built to transport fragile equipment such as musical instruments, scientific instruments or electronic equipment, etc. They have built-in form-fitted liners to protect the equipment and they are designed to be carried by hand.áá	
24112413	Flag storage box or case	Box made to store flags. It is usually wooden, varnished with lacquer, or plastic.	
24112416	Underground equipment cabinet	Waterproof cabinet for storing various machines or electrical devices. Can be equipped with hydraulic system enabling it to be lowered or raised, differentiating it from equipment installed in the cabinet	

Class 24112500 Corrugated and other supplies for distribution

Commodity	Commodity Title	Definition	Synonyms
24112501	Slotted corrugated cartons		
24112502	One piece die cut shipping cartons		
24112503	Die cut corrugated shipping cartons with separate lids		
24112505	Corrugated cardboard shapes		

Class 24112600 Liquid containers

Commodity	Commodity Title	Definition	Synonyms
24112601	Jugs		
24112602	Jars		

Class 24112700 Pallets

Commodity	Commodity Title	Definition	Synonyms
24112701	Wood pallet	Wood pallets are pallets made of lumber and wood components, including processed materials composed of wood chips, wood powders and paper.	
24112702	Plastic pallet	Plastic pallets are pallets made of plastic, including single and multiple sheets of extruded plastic.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

Class 24112800 Freight containers

Commodity	Commodity Title	Definition	Synonyms
24112801	Dry freight container	Dry containers are weatherproof boxes designed for shipment of dry state freight, generally used for overseas shipments. They differ from other types of freight containers.	
24112802	Open top freight container	An open top container has an open top covered by a tarpaulin instead of a solid roof. This enables oversized (i.e. door opening) cargo such as timber and scrap metal to be loaded from the top. These containers normally have end doors to give flexibility to loading and discharging operations.	
24112803	Platform freight container	Platform containers are without sides, ends or roof. They are used for awkwardly shaped cargoes which cannot fit on or in any other type of container.	
24112804	Flatrack freight container	Flatracks are especially suited for heavy loads or cargo that needs loading from the top or sides, such as pipes and machinery. Includes collapsible and non-collapsible containers with or without walls. Flatracks are especially suited for heavy loads.	
24112805	Temperature controlled freight container	A type of freight container used for transport of cargo requiring temperature control.	

Class 24112900 Crates

Commodity	Commodity Title	Definition	Synonyms
24112901	Wooden crate	Rigid wooden container of considerable size; covered or open top	
24112902	Plastic crate	Container used for transporting fresh food such as fish and other goods.	

Class 24113000 Slip sheets

Commodity	Commodity Title	Definition	Synonyms
-----------	-----------------	------------	----------

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24113001	Corrugated slip sheet	The corrugated material consists of two kraft liner board outer surfaces with a corrugated interior that is bonded together with adhesive or glue. This bonded material provides the necessary strength for the push-pull device to clamp the slip sheet once or twice.	
24113002	Fiberboard or solid kraftboard slip sheet	The fiberboard slip sheet consists of several layers of solid fiberboard sheets laminated together.	
24113003	Plastic slip sheet	The plastic slip sheet is made of a combination of polyethylene materials. This type of material allows for greater non-tear strength and an increased number of uses in cold and humid environments.

Class 24131500 Industrial refrigerators

Commodity	Commodity Title	Definition	Synonyms
24131501	Combined refrigerator freezers		
24131502	Liquid nitrogen refrigerators		
24131503	Walk in refrigerators		
24131504	Refrigerated containers		
24131505	Refrigerated vessels		
24131506	Refrigerated tanks		
24131507	Blast chiller	A unit capable of blast chilling goods or commodities to a prescribed temperature	
24131508	Cabinet refrigerator	An upright cabinet designed for the storage of goods or product above 0 degrees centigrade.	
24131509	Under counter refrigerator	A low undercounter height cabinet for the storage of frozen product.	
24131510	Counter refrigerator	A work height counter refrigeration unit with one to 4 doors for the storage of product above 0 degrees centigrade.	
24131511	Bakery cabinet refrigerator	Cabinet refrigerator designed specifically to accommodate bakery size trays and store goods or commodities above 0 degrees centigrade.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

24131512	Refrigerated counter preparation station	A work height counter refrigeration unit with one to 4 doors capable of storing product above 0 degrees centigrade together with chilled food pans on the counter top. Used in the makeup of sandwiches and pizza under temperature controlled conditions.	
24131513	Refrigerant	A refrigerant is a compound used in a heat cycle that undergoes a phase change from a gas to a liquid and back. The two main uses of refrigerants are refrigerators/freezers and air conditioners.	
24131514	Precooling and cold storage unit	Storage unit for precooling, which is processing of cooling of products to prescribed temperature prior to refrigeration or freezing in order to maintain freshness after harvesting fruits or vegetables.	
24131515	Pharmaceutical refrigerator and freezer	Refrigerator, single or combined, and refrigeration system designed specifically for vaccines and other pharmaceuticals

25101611	Cargo trucks		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25101612	Concrete transport truck	The concrete transport truck is made to transport and mix concrete from a factory to the construction yard. They are charged with dry materials and water, with the mixing occurring during transport.	
25101613	Concrete pump truck	The vehicle that directly loads liquid concrete from a concrete mixer or a mixer plant, and conducts concreting at the work site by sending concrete to the pour location under high pressure through a in-vehicle pipe built on a boom.	
25101614	Load motovan	Special motor vehicle usually of three wheels used for load and transport of light products.	

Class

Commodity	Commodity Title	Definition	Synonyms
25101702	Police vehicles		
25101703	Ambulances		
25101704	Fire fighting pump truck	Fire truck equipped with firefighting pumps, hoses and nozzles to put out fire	
25101705	Fire fighting water tank truck	Fire truck equipped with water tank and water intake device to supply water for pumping	
25101706	Fire fighting chemical truck	Fire truck equipped with special fire-extinguishing chemicals and spraying devices to fight fires involving oil, gas or other highly flammable and hazardous materials	
25101707	Fire fighting ladder truck	Fire truck equipped with an extension ladder assembly to put out fire or save lives when fire or other emergency situations occur in high buildings	
25101708	Rescue truck	Truck equipped with lifesaving devices including winch, hydraulic devices, safety mat and others	
25101709	Smoke exhaust truck	Truck equipped with a ventilator to clear smoke out of the building in case of fire.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25101710	Smoke exhaust truck with lighting	Truck equipped with a ventilator and lighting to remove smoke from buildings at night	
25101711	Fire fighting truck with remote control nozzle	Truck equipped with arm-typed nozzles which can be operated remotely to assure safety from threat such as toxic substances	
25101712	Fire investigation car	Specialized vehicle equipped with measuring, analyzing, and data processing devices to investigate the cause of a fire and estimate damage	

Class

Commodity	Commodity Title	Definition	Synonyms
25101801	Motorcycles		
25101802	Scoters		
25101803	Mopeds		
25101804	Motorcycle sidecar	A three wheeled motorcycle that runs by the motive power from the attached motor.	

Class

Commodity	Commodity Title	Definition	Synonyms
25101901	Agricultural tractors		
25101902	Motor homes		
25101903	Snowmobiles or snow scooter		
25101904	Golf carts		
25101905	All terrain vehicles tracked or wheeled		
25101906	Go cart		
25101907	Trailer, travel or caravan	Prefabricated living structures attached to a trailer chassis that can be towed from one place to another	
25101908	Quads		
25101909	Amphibious vehicle	A vehicle that is viable on land as well as on the water.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25101910	Water sprinkling truck	A vehicle specially designed for cleaning the road and for extinguishing fires.It is equipped with a water tank and sprinklers.	
25101911	Aerial working platform truck	A vehicle designed to support aerial work including the maintenance of street lamps in a safe and effective manner.It is equipped with a truck chassis, a support frame, jacks, outriggers and booms.	
25101912	Ladder lift truck	A specially designed truck equipped with a ladder and a lift basket, so as to move luggage or any other thing up to a high place.	
25101913	Refrigerator truck	A specially-designed truck equipped with a refrigeration device on the back side of the truck.It is used to transport food requiring refrigeration.	
25101914	Waste collection vehicle or garbage truck	A truck with an insulated metal container used to collect and transport garbage or paper.It is sometimes equipped with special devices such as a loader and a knuckle boom.	
25101915	Oil tank truck	A special truck used to transport oil or oil products including gasoline, light oil, kerosene, etc.It is equipped with chassis, oil tank, hoses and a lubrication system.	
25101916	Hopper truck	A specially designed truck with telescoping screens at the rear of the truck as openings.The truck can dump bulk materials such as sand, ballast, grain, etc by gradually lowering its screen openings.	
25101917	Flatbed truck	A truck with an unenclosed bed, e.g., without sides, doors or roof.	
25101918	Neighborhood electric vehicle NEV	A low speed vehicle propelled by a rechargeable battery-powered electric motor.	
25101919	Road sweeper	A vehicle which cleans surfaces or gutters of the road by using water, brushes, or induction pipes installed on the vehicle.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25101920	Tank trucks	A special truck with a rear container and door designed to protect freight from weather or burglary. May also come equipped with windows, lights and ventilation.	
25101921	Van trucks	A special motor vehicle with a mounted tank or pump to carry liquid products. Oil tanks or hopper trucks are excluded from this group.	
25101922	Road repair truck	A construction vehicle used for maintenance of aged portions of existing paved road.	
25101923	Crawler type tractor	A self propelled vehicle that generates towing force in 2 variable crawlers. A tractor that performs various tasks including towing, leveling of ground and transportation of soil depending on the equipment attached to the vehicle.	
25101924	Guard rail cleaning vehicle	A vehicle that cleans by running along curved surface or flat surface of vertical structure along the road such as tunnel or guardrail. It is equipped with rotating brush and water spraying apparatus on the end of the outrigger that is hydraulically operated.	
25101925	Sign truck	A vehicle that warns and guides traffic by turning on and off arrow shaped signal made of several light bulbs on the rear of the vehicle.	
25101926	Snow plow truck	A vehicle with a mounted blower or blade -- snow plow-- in front designed to remove accumulated snow from roads and other surfaces.	
25101927	Salt spreader truck	A vehicle that sprays calcium or sand to melt snow or ice accumulated on the road, runway or other surfaces to prevent slipping.	
25101928	Mobile media truck	A special vehicle equipped with the broadcasting and advertising equipment including power generator, screen, speaker, monitor.

UNSPSC v16_0901

1/27/2014

25101929	Mobile office van	A vehicle that is applied to a variety of use for business trip, outdoor work, sales promotion activity, counseling and others on the basis of mobility and convenience with the required facilities for work environment.
25101930	Lighting truck	A vehicle equipped with light generating equipment to provide illumination where necessary in emergency, such as filming, night fire, emergency rescue and others.
25101931	Outside broadcasting van	A vehicle that is loaded with the required devices for relay from the spot outside of studio at the broadcasting station.
25101932	Crowd control truck	A specialized crowd control vehicle equipped with devices for launching gas shells or streams of water to break up crowds such as demonstrations, strikes or others.
25101933	Crane truck	A special vehicle which is loaded with a crane to load and unload cargo on a cargo truck. Generally, It may make a 360 degree in rotation.
25101934	Funeral vehicle or hearse	A special vehicle that is used for funeral to carry the coffin with corpse.
25101935	Spray truck	Equipment that sprays liquid particles by ejecting from small holes after the liquid chemical is pressed by the pump and sent to the exhaust nozzle. It is consisted of motorized type or towing type loaded in the trailer.
25101936	Vacuum truck	A vehicle that removes waste substances and sedimentation within the sewer pipe in vacuuming and absorbing into the sludge tank for vehicle and washing with high water pressure on various sedimentary and residue in the sewer pipes for flawless drainage.
25101937	Medical examination and treatment bus	A vehicle equipped with medical equipment designed to provide medical diagnostic and treatment services outside of the hospital.

25111511	Oil or gas crew boat		
25111512	Oil or gas workboat		
25111513	Seismic vessel		
25111514	Icebreaker	A special purpose ship used to navigate through ice-covered seas.	
25111515	Liquified gas carrier	A tanker ship used to transport liquified gas products including methane, ethane, propane etc.This includes LPG (Liquified Petroleum Gas) and LNG (Liquified Natural Gas) tankers.	
25111516	Inflatable rubber boat	An inflatable boat constructed of rubber whose sides are comprised of rubber tubing that can be inflated with air. Used for rescue, transportation, sports, diving and other special purposes.Some types can be powered by a motor.	
25111517	Hovercraft	A marine vehicle supported by a cushion of air that enables it to navigate water, ice, sand and even swamps.	
25111518	Hospital ship	A ship equipped with medical care equipment and facilities equivalent to a land-based hospital.Staffed by physicians and medical support personnel.	
25111519	Racing boat or shell	A small boat propelled by oars designed for high speed.Used in racing competitions.	
25111520	Buoy	A floating marine warning device designed to assist ship navigation and warn of dangerous conditions.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25111521	Marine anchor	A sub-marine mooring device designed to fix a ship or marine structure at a point in the sea by lodging itself in the seabed.Can be temporary or permanent.	
25111522	Chemical tanker carrier	A type of tanker ship capable of transporting chemicals and related hazardous liquids.	
25111523	Factory ship	A fishing ship capable of processing marine products at the fishing site with the marine processing facilities within the ship.	
25111524	Bulk carrier	A ship that transports bulk commodities such as grain, coal, mineral and other goods not separately packed.	
25111525	Pure car carrier or roll on roll off ship	A cargo ship designed for transporting vehicles.	
25111526	Drill ship	A ship equipped with facilities for drilling and collecting oil, natural gas and other sub sea and sub surface mineral liquids.	
25111527	Row boat	A small ship that is propelled by rowing.	
25111528	Quarantine boat	A specialized craft used for medical treatment and inspection of passengers and crews on ships entering port.	
25111529	Weather ship	A ship equipped with several kinds of weather observation equipment for studying weather patterns at sea.	
25111530	Pilot boat	A small craft used for carrying the pilot between the pier and the ship.	
25111531	Hydrographical survey ship	A ship equipped for surveying water depth and currents, tides, geography and geology of seabed and others.	
25111532	Debris collection vessel	A ship equipped with facilities for cleaning refuse, foreign substances and undesirable aquatic organisms floating on the sea surface, or surfaces of lakes and other bodies of water.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25111533	Training ship	A ship that is used for navigation practice and actual practice training for students. It is equipped with the structure of cargo vessel and passenger ship.	
25111534	Research vessel	A ship equipped for surveying and research of marine environment in general and specific marine issues or subject areas in particular spanning multiple industries.	
25111535	Cable laying ships	A ship that is used to install or repair cable for power or communication on sea bed.

UNSPSC v16_0901

1/27/2014

25121706	Draft gears		
25121707	Bogie assemblies		
25121708	Heavy railway rail	Rail that typically refers to the standard inter-city rail network, which is built to be robust enough for heavy and high-speed trains, including freight trains, and long distance and high speed passenger trains.	
25121709	Heavy railway relay rail	Used heavy rail in good enough condition to be re-laid. Relay rail is often used for industrial sidings and spur tracks, where the slower speed and infrequent traffic do not warrant laying new rail. Relay rail is graded and classified according to the type and number of flaws, and the amount of wear established.	
25121710	Light railway rail	Rail that is built to lightweight construction including a steeper ruling gradient, suitable to lightweight trains or trams, and usually, but not always, intended for passenger traffic only, usually in urban and suburban areas.	
25121711	Light railway relay rail	Used light rail in good enough condition to be re-laid. Relay rail is often used for industrial sidings and spur tracks, where the slower speed and infrequent traffic do not warrant laying new rail. Relay rail is graded and classified according to the type and number of flaws, and the amount of wear established.	
25121712	Steel railway tie	Steel railroad ties used in underground applications.	
25121713	Electrical rail contact bond	Keeps electrical connectivity between rails.	
25121714	Heavy rail turnout switch	Turnout switch for heavy rail lines.	
25121715	Light rail turnout switch	Turnout switch for light rail lines.	
25121716	Wooden railroad tie	Wooden structure used to support rail in railroad track construction	
25121717	Rail bond	Device providing electrical connection between adjoining or parallel rails.

25172122	Passenger airbag inflator	Air inflation mechanism used for passenger side front automotive inflatable restraint system	
25172123	Knee airbag inflator	Air inflation mechanism used for automotive lower front (knee) inflatable restraint system	
25172124	Side airbag inflator	Air inflation mechanism used for automotive door or seat side inflatable restraint system	
25172125	Curtain airbag inflator	Air inflation mechanism used for automotive side head protection (curtain) inflatable restraint system	
25172126	Seat belt webbing	Fabric strap used in seat belt manufacture	
25172127	Seat bladder	Device placed in automotive seat to detect the presence of an occupant	
25172128	Seat belt tension sensor BTS	Sensor to determine the amount of tension in a vehicle seat belt system	
25172129	Driver information system	A device installed inside of a car to control other electronic devices such as HVAC, AV GPS, etc.	
25172130	Vehicle keyless entry control or fob	A small radio frequency transmitting device used to lock and unlock vehicle doors and or perform other security related tasks remotely from the vehicle. Also commonly known as a key fob.	
25172131	Immobilizer	An electronic anti-theft device designed to prevent the engine from running unless the correct key is used to start the car.

25174410	Vehicle sound systems and components		
25174411	Rubber key pad	Elastomeric material, sometimes bearing imprinted symbols, used to improve user tactile sensation when interacting with various controls such as radio buttons, remote keyless entry fobs, etc.	
25174412	Vehicle decorative applique	A facade panel or the like added to the surface of a vehicle interior component such as an instrument panel, door trim panel, glove box door or the like for decorative purposes.	
25174413	Vehicle interior badge or emblem	Sticker or badge and the like depicting branding, model or other designation applied by various means to various areas of the vehicle interior.	
25174414	Tachograph	A machine that records the measurements of a tachometer, especially one in a vehicle recording its speed and the times at which it was driven.	
25174415	Vehicle oil pressure gauge	A device that displays the pressure readings of engine oil in the lubricating system.	
25174416	Vehicle cigarette lighter	A device that provides electrical heat to light a cigarette or cigar for vehicle passengers.	
25174417	Vehicle combination switch	A switch that controls multiple signal lights installed on the vehicle.	
25174418	Vehicle floor mat	A mat that is installed on the vehicle floor and trunk floor to maintain cleanliness.	
25174419	Vehicle audio video system	An Audio/visual system that is manufactured to endure the vehicle vibration.	
25174420	Vehicle ash tray	An ash tray for vehicle that is installed inside of vehicle to throw away the cigarette ash or cigarette butt.	
25174421	Vehicle curtain	A curtain which is installed inside of vehicle made in elasticity material or semi-elasticity material.

UNSPSC v16_0901

1/27/2014

25174801	Truck suction stabilizer or ground jack	A jack extended from the side of an aerial ladder or aerial platform truck to brace and stabilize the chassis when the ladder or platform is raised.	
25174802	Boom for wrecker truck or tow truck	Adjustable arm connected to winch for recovering vehicles that are in a ditch, culvert, over an embankment, or any place the wrecker cannot be safely backed into.	
25174803	Towing hook	A metal product that has the shape of an angle or bent for convenient towing of vehicle. It is used for lifting or pulling vehicles.	
25174804	Vehicle outrigger	A projecting frame extending laterally beyond the main structure of a vehicle to stabilize the structure or support an extending part.	
25174805	Vehicle sand spreader	A specifically equipped vehicle that sprays sand for snow removal to make flawless traffic flow when there is snow or ice on the road due to snowfall during winter.	
25174806	Fitted vehicle body cover	An assembly-type textile product that can be disassembled. It is manufactured to cover all or part of the vehicle to protect the cargo and personnel, and the cover may have holes and transparent window.	
25174807	Vehicle hinge	A part that is the supporting point for opening and closing of vehicle door, hood, trunk and others.	
25174808	Vehicle accessories storage box	A box designed for storage of food, flares, emergency goods and others inside or outside of the vehicle.	
25174809	Vehicle ladder	A ladder that has a device for attachment to a land vehicle. It is used for getting on and off the vehicle.	
25174810	Vehicle jack	A tool that uses the principle of lever and hydraulics to lift heavy objects. It is loaded on the vehicle as an emergency tool for tire changing and other uses.

25191704	Engine or vehicle stands		
25191705	Engine piston and rod scale	Balancing equipment to accurately measure and adjust weight of piston and rod assembly to crankshaft of engine.	
25191706	Railway rolling stock lifting jack	A jack that lifts up railway vehicles such as locomotives, passenger cars, etc.	
25191707	Railway lift table for engine and component	A railroad device used to remove or load engine, truck, wheel set and other components while the railway vehicle is undergoing maintenance without lifting it up.	
25191708	Carburetor balancer	A balancer that synchronizes two carburetors by promptly and accurately measuring the absorption volume in the event of operating by using one engine and two carburetors.	
25191709	Power adjuster	A device that maintains the preset power of the vehicle or makes changes in accordance with the plan previously set.	
25191710	Valve lapper	Equipment that grinds the contact side between poppet valve and valve seat of the cylinder head of diesel or gasoline engines.	
25191711	Valve refacer	Equipment that grinds the valve face that connects with the valve seat for the poppet valve with absorption and exhaustion of reciprocating type internal combustion engine. It is comprised of motor, chuck, grind wheel, cooling water pump and others.	
25191712	Valve seat cutter	Equipment that grinds the valve sheet of the cylinder head of reciprocating type internal combustion engine with certain angle and shape. The pilot stem is inserted to the valve guide hole to insert the T shaped handle axis and process the valve sheet by turning the handle manually.

1/27/2014

25191713	Antifreeze recycling device	A device that removes impure substances from anti freezing liquid enabling the liquid to be reused.	
25191714	Brake drum lathe	A special lathe for vehicle maintenance that rotates and processes the brake drum from the lathe for revising the partial abrasion of the brake drum from the friction when the vehicle is stopped or decelerated during running.	
25191715	Brake shoe grinder	A brake shoe is designed to suspend or decelerate the vehicle during running. It is special equipment for the vehicle maintenance and repairing to grind the brake shoes.	
25191716	Brake spring pliers	A tool that inserts or take out the return spring on two brake shoes of a half-moon shape installed inside of the brake drum.	
25191717	Vehicle body straightening machine	A machine calibrated for each part that fits a vehicle body capable of repairing those parts of the body that are bent or out of shape.	
25191718	Vehicle service creeper	A device used when working under the equipment body for a vehicle or construction machine. There is a pillow on the plate to lie down and it is easy to roll with the wheels attached.	
25191719	Wheel nut or lug wrench	An specialized type of wrench used to loosen or tighten lug nuts on vehicle wheels.	
25191720	Spark plug wrench	An specialized type of socket wrench for removng or installing spark plugs on an internal combustion engine.	
25191721	Spark plug cleaner	A device that sprays high pressure air to remove impure substances, such as lead compounds or carbon deposits attached to the spark plug.	
25191722	Engine tool kit	A standard tool kit that is designed for assembly and disassembly of the engine.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25191723	Piston heater	A device that heats the piston to a certain temperature in order to expand the piston pin holes when assembling the piston and connecting rod with the piston pin.	
25191724	Automatic transmission rebuild kit	Equipment that is exclusively designed and manufactured for each vehicle for prompt, accurate and safe disassembly or assembly by the user in consideration of the structural characteristics of inner part of automatic transmission.	
25191725	Automotive boring machine	A type of metal cutting equipment designed for use in vehicle maintenance and repair specifically for cutting the inner part of engine cylinder or connecting rod of vehicle.	
25191726	Automotive honing machine	A machine that is exclusively used for vehicle maintenance and repairing for precision grinding for inner part of cylinder and others of vehicle engine by rotational motion and reciprocating motion for honing tool in the round bar shape.	
25191727	Connecting rod aligner	A device that measures bending or twisting of connecting rod. It has the vertical direction of long surface plate and has a simple structure that aligns the surface plate and the pin in vertical direction.	
25191728	Crankshaft balancer	Equipment that measures and corrects the rotational balance of crank shaft, a high speed engine component.	
25191729	Crankshaft grinder	A type of grinding machine that grinds the side of the pin and journal of vehicle crankshafts.	
25191730	Timing light	A measuring device that checks the ignition timing of engine.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25191731	Torque converter cleaner	A specialized type of equipment that removes impure substances inside of the converter of the automatic transmission. Washing oil is penetrated through the filter in forced circulation type to inject and wash inside torque converter.	
25191732	Piston vise	A vise used for grinding and measuring of the piston. It secures the piston with a V shape block installed on the horizontal surface.	
25191733	Piston grinder	A type of grinding machine that grinds the finish side when the surface of the piston is worn out or corroded to be irregular.	
25191734	Valve spring compressor	A tool for assembly or disassembly of the valve and spring that works by compressing the spring of exhaust valve and air intake valve of the cylinder head or cylinder block of internal combustion engine.	
25191735	Piston ring compressor	A tool that compresses several piston rings into the ring groove at once for assembling the piston to the cylinder.	
25191736	Vehicle driving simulator	A driver training device that simulates road and safety conditions likely to be encountered when driving a vehicle.	
25191737	Automatic tire inflator	Equipment that injects air into vehicle tire automatically according to the desired pneumatic pressure.	
25191738	Tire spreader	A device that spreads open the tire in order to inspect for damage to internal wall of the tire.	
25191739	Steering gear simulation tester	A testing device for vehicle steering gears of all types.	
25191740	Vehicle washing machine	An external cleansing system that washes the exterior of auto, bus and truck vehicles.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25191741	Railway washing machine	An external cleansing system that washes the exterior of railway locomotives, passenger cars and rolling stock. It is installed over the tracks and operates when trains pass under it.	
25191742	Vehicle parts washing machine	A type of cleansing machine that washes off the rust preventive oil, waste substance, foreign substance and others attached on the surface of the vehicle part. It is mixed in water with the detergent.	
25191743	Railway component washing machine	A type of cleansing machine that washes residue off railway component parts such as air con filters.	
25191744	Tire retreading machine	A machine to recycle worn tires, where the tire body is used and the old and worn tread is removed through scratch and application of a new tread.	

Class

Commodity	Commodity Title	Definition	Synonyms
25191801	Growler tester	A device that inspects for open circuits, short circuits and ground of engine or motor coils, alternators, armatures and stators of starter.	
25191802	Dwell tachometer	A device that measures the angle of cam and number of engine rotations.	
25191803	Diesel smoke tester	A device that measures the smoke discharged by vehicle diesel engines using light penetration and reflection.	
25191804	Radiator tester	A device that tests the condition and performance of vehicle radiators by testing the capability of caps and leakage of core or tank of radiator by applying air pressure.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25191805	Engine distributor tester	A tester that measures the condition and performance of vehicle electrical system specifically the primary current frequency for ignition, electric power distribution of secondary high voltage current, ignition timing following the rotation speed and load.	
25191806	Battery hydrometer	A type of meter that determines battery condition before recharging and discharging by measuring the specific gravity of electrolytes.	
25191807	Bearing oil leakage detector	A type of detection device that detects and records the volume of oil leaked from the engine bearing or vehicle drive.	
25191808	Brake tester	A device designed to check and measure the braking capability of vehicle.	
25191809	Side slip tester	A type of alignment device that checks for discrepancies in vehicle front wheel alignment such as toe in, camber and caster.	
25191810	Chassis dynamometer	A device that checks and measures the density of exhaust gas against the standard allowable for the design power of the vehicle and its loaded condition as it is referred to as the chassis dynamo.	
25191811	Speedometer tester	A device that checks and measures the condition and performance of vehicle speed indicators.	
25191812	Stall tester	A diagnostic device designed to check the condition and performance of torque converters, front and rear brake bands, front and rear clutch by measuring the maximum rotation speed of engine for each range while the brake is on from the vehicle with the automatic transmission.	
25191813	Spark plug gap gauge	A gauge that measures the gap on engine spark plugs.	
25191814	Spark plug tester	A device that measures spark gap and ignition and determines condition and performance.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25191815	Armature tester	A diagnostic device for checking the condition and performance of armatures in vehicles.	
25191816	Compression type spring tester	A device for testing the tension or reactive force compression type coil springs on valves, clutches and cylinder heads on internal combustion engines. It tests for free height, squareness of the spring with the spring placed on the plane part of the tester.	
25191817	Compression pressure gauge	A device that measures the compression pressure when the piston reaches the top dead center of the compression stroke on reciprocating type internal combustion engines. It is used to detect damage or leakage in cylinder, piston, piston ring, valve, head gasket and others.	
25191818	Air cleaner element tester	A device that inspects the function of element or filter in the air cleaner.	
25191819	Anti lock braking system ABS simulation tester	A diagnostic device for checking the condition and performance of anti lock brake systems on vehicles.	
25191820	Engine multimeter	A portable digital tester that measures the direct and alternating current, voltage and resistance, number of engine rotations, dwell angle, frequency, on vehicle engines.	
25191821	Engine simulation tester	Equipment that is used for improving the fault diagnosis capability of electronically controlled engines.	
25191822	Engine injector tester	A testing device designed to check the condition and performance of the vehicle fuel supply system, specifically fuel clogging, leakage, pressure. The device determines fuel supply efficiency with the measurement of injection volume per certain stroke of fuel injection device.	
25191823	Engine test bed		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

25191824	Engine tune up tester	A device that checks compression pressure, timing, vacuum condition, exhaust release volume, carbon monoxide and hydrocarbon release, number of engine rotations and others for improving the engine capability.	
25191825	Fuel consumption meter	A device that measures the volume of fuel consumed for each unit time of internal combustion engine or combustor.	
25191826	Oil leakage tester	Equipment that inspects for oil leakage from each part of vehicle.	
25191827	Electronic control suspension ECS simulation tester	A testing device to determine condition and performance of electronically controlled suspension.	
25191828	Automatic transmission tester	Equipment used to test the capability and diagnose faults in vehicle automatic transmission performance.	
25191829	Electronic control inspection system	Equipment that is designed to check the vehicle electronic control part as used in the maintenance plant and others.	
25191830	Headlight tester	A device designed to test the luminous intensity and angle of head lights for vehicle.	
25191831	Vehicle window regulator tester	A diagnostic tool used to test and adjust the operation of vehicle window regulators.	
25191832	Vacuum gauge for vehicle servicing	A gauge that is used to inspect for leakage of engine valves, delays of ignition time, leakage of head gaskets or manifold gaskets and damage to valve springs. It is comprised of a vacuum gauge, hose, adaptor, connector, case and others.	
25191833	Camber caster gauge	A gauge that measures the tilting angle of camber, caster, and king pin when aligning the front wheels of the vehicle.	
25191834	Coil condenser resistance or ohm tester	A diagnostic device designed test the capability of vehicle ignition systems, coils and condensers.	

UNSPSC Codeset

26101107	Pump motor AC		
26101108	Compressor motor AC		
26101109	Synchronous motor AC		
26101110	Multispeed motor AC	A motor wound in such a way that varying connections at the starter can change the speed to a predetermined speed.	
26101111	Pressure washer motor AC	A type of motor designed for use in pressure washers and steam cleaners.	
26101112	General purpose motor AC	A motor having a NEMA "B" design, listed and offered in standard ratings, with standard operating characteristics and mechanical construction for use under usual service conditions without restriction to a particular application or type of application (NEMA).	
26101113	Submersible motor AC	A motor designed to operate while submerged in liquid.	
26101114	Induction motor AC	A type of electrical alternating current motor.	
26101115	Multi phase motor AC	A type of electrical alternating current motor.	
26101116	Single phase motor AC	A type of electrical alternating current motor.	
26101117	Vertical hollowshaft motor AC	A type of definite purpose motor developed to meet the specific needs of the vertical turbine pump industry. Employs a hollow shaft through which a pump shaft is extended. Adjustments to lift the impellers and give a running clearance for the pump casing can be made by turning a nut threaded on the shaft which is accessible at the top portion of the motor. Vertical turbine pump shafts are usually composed of many lengths joined by screw thread couplings.

26101759	Starter adapters		
26101760	Choke rods		
26101761	Camshaft plugs		
26101762	Engine component linkages		
26101763	Freeze plugs		
26101764	Cylinder liners		
26101765	Vibration dampers		
26101766	Governors		
26101767	Turbine stator	The stator is the very important electrical part of the turbine. It contains all the coils of wire which will have voltage induced in them as the magnets pass over them. It's defined as the 'stator' because it is the 'stationary' (it doesn't turn) part of the alternator	
26101768	Turbine shaft	The turbine shaft is the very important part of the turbine. The simplest turbines have one moving part, a rotor assembly, which is a shaft with blades attached.	
26101769	Ignition coil	A device that converts current from a battery into the high-voltage current required by spark plugs.	
26101770	Electronic engine control for gasoline engines	Control system for gasoline engines	
26101771	Electronic engine control for diesel engine	Control system for diesel automotive engines	
26101772	Injector cleaner	A fluid added to the fuel tank to clean fuel injecting devices	
26101773	Diesel proportional metering valve	Valve that can take various configurations used to mix fuel and air in a desired ratio in an automotive diesel fuel system.	
26101774	Canister purge solenoid valve	A specialized mechanism used to control release of vapors from the purge canister in automobile evaporative emissions systems	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

26101775	Diesel high pressure valve	Specialty valve capable of withstanding extremely high pressures present during compression and combustion phases of an automotive diesel fuel system.
26101776	Immobilizer coil	A device used as a component of a theft deterrent system in an automotive ignition system such that vehicle starting is enabled only when specific codes are exchanged between the coil and the vehicle key, remote starter or other starting device.
26101777	Fuel injector coil gasoline	An electronic device that is a component of an automotive electro mechanical actuation system in an automotive gasoline injection system.
26101778	Fuel injector coil diesel	An electronic device that is a component of an automotive electro mechanical actuation system in an automotive diesel injection system.
26101779	Wiring harness grommet	A rubber or plastic component with a through hole used to protect wiring harnesses from abrasion, pinching or other damage as they pass through holes in metal or other hard, sharp or otherwise non-compliant materials
26101780	Oil injector or metering valve	Lubricating oil dispensing or metering device that measures and injects lubricant as required.
26101781	Piston pin	A component that plays the role of connecting link that conveys the gas pressure generated at the time of explosion of gas in the combustion chamber of internal combustion engine from the piston to the connecting rod.
26101782	Ignition distributor	A device that distributes and regulates the high voltage generated by the ignition coil to each cylinder in an engine and controls the time of ignition in accordance with the number of revolutions of and load on the engine.

UNSPSC Codeset

1/27/2014

26101783	Hydraulic swivel joint	A component composed of a fluid conveying pipe that can swivel around a fixed shaft enabling hydraulic fluid to flow in two directions.	
26101784	Differential spider	A spider with four radial shaped arms designed to form connecting section between two shafts, one of which rotates while the other shaft is stopped or rotates with different speed or in different direction.	
26101785	Oil strainer element	A pump component that enables filtration by the strainer which is installed on the intake of an oil pump.	
26101786	Valve tappet	A kind of power transmission device that converts the rotational motion of the camshaft into straight line motion of pushrod.	
26101787	Admission valve and rack	Valve system and linkage used to moderate steam flow into a turbine and control RPM and power output

26111534	Transmission hubs		
26111535	Ballscrews or ballscrew assemblies		
26111536	Shaft mounted speed reducer	A helical gear reducer designed for mounting directly on the drive shaft.	
26111537	Worm speed reducer	Gear reducer using a worm screw and worm gear to transmit torque.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

26111538	Helical speed reducer	Gear reducer using helical cut gears to transmit torque.	
26111539	Helical and worm speed reducer	Double reduction reducer consisting of both a worm and worm gear set as well as a helical gear set.	
26111540	Planetary speed reducer	Gear reducer consisting of planetary gear sets.	
26111541	Cycloidal speed reducer	Gear reducer using rolling elements and a multilobe cam to transmit torque.	
26111542	Bevel speed reducer increaser	Gear box using bevel gears to transmit torque at a 90 degree angle.	
26111543	Traction drive speed reducer	Unit using chain and variable conical pulleys.	
26111544	Speed controller	Motor control device that takes a signal representing the demanded speed and drives a motor at that speed.	
26111545	Brake drum adapter	A type of auxiliary device used in installation and removal of brake drum by delicately adjusting drum with heavy weight.	
26111546	Turbine disk	A component that fixes the turbine blade in the axial flow of a turbine engine thereby conveying the motive power obtained from the blade to the rotor shaft.	
26111547	Clamping hub	A device that ensures a frictional connection between the motor shaft and gearhead.	
26111548	Gear shift	Axle assembly with more than one bevel gear.	
26111549	Shaft shoulder	A device that enables a step change in the diameter of a shaft, to provide a bearing surface for axial loads.	
26111550	Motion control parts and accessories	Accessories and accessory kits used with motion control devices.

26111911	Pneumatic clutch	Pneumatically operated clutch	
26111912	Mechanical clutch	Mechanically operated clutch.	
26111913	Clutch hold back unit	This is a type of clutch which has a ratchet and pawl mechanism inside which will allow rotation only in one direction.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

26111914	Jaw clutch	A structure in which pole flanges attached to the driving shaft and the driven shaft are interlocked with each other. Flange on one side is inserted through feather key at the end of the shaft through the key, in order to enable it to move in parallel.	
26111915	Automatic clutch	A type of equipment that automatically enables clutch conversion without separate manipulation. It does not have clutch pedal and the gear is changed automatically in accordance with the given situation only through manipulation of lever for speed change.	
26111916	Semi automatic clutch	A clutch that enables speed change through clutch connection only with gear lever manipulation.	
26111917	Electromagnetic clutch	A clutch that conveys torque with electromagnetic force generated by the built-in electromagnetic coil with quick response and ease of control.

26121635	Cable reels		
26121636	Power cord		
26121637	Outdoor fiber optics cable	Fiber optic communications cable, which is used externally. This commodity includes products such as optical aerial telcommunication cable, direct burried fiber optic cable and underwater fiber optic cable.	
26121638	Crimping materials	Includes various shrinking/crimping muffs	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

26121639	Combined or customized multi cables	Multi-cables are composed of various quantities of coaxial, twinaxial, pairs and singles cabled together per customer's specification, shielded and jacketed with various materials and colors.	
26121640	Heat resistant cables		
26121641	Installation cables	Cables used for installation purposes, in general.	
26121642	Instrumentation Cable	Single/multi pair; shielded/non-shielded; 300/600 volts; stranded conductor; suitable for installation in trays, troughs, channels, conduit, wireway; ITC/PLTC types.	
26121643	Bare steel reinforced electrical cable	Type of electrical cable used in underground mining to supply power underground	
26121644	Bare aluminum electrical cable	Type of cable used to supply power in underground mining	
26121645	Bare copper electrical cable	Type of cable used to supply power in underground mining applications	
26121646	Trailing and mining machine cable	Cable used to supply power to underground mining machinery.	
26121647	Trailing and mining machine cable assembly	Cable assemblies used to supply power to mining machinery with connection plugs installed.	
26121648	High voltage cable termination kit	This kit consists of high temperature resistant sleeves, which are mounted on the cable at the termination ends.	
26121649	High voltage cable joining kit	This kit consists of high temperature resistant sleeves, which are mounted on the cable.	
26121650	Fiber optic cable assembly	A length of fiber optic cable that has been terminated with a connector, pigtail or other component.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

26121651	Oil resistant SO cable	SO cable denotes a portable, oil-resistant cable comprised of 2 or more conductors, which can be used in both indoor and outdoor applications. This versatility allows SO cable to be utilized in a variety of environments including commercial, residential and industrial facilities. The high stranding in SO cable creates extra flexibility that further promotes its use in a wide variety of applications.
26121652	Electrical cord assembly	A cable for electricity that is designed for the terminal process to connect the ends of both sides or one end to the other item.
26121653	Toll cable	A cable which is used in relay between toll switches or between broadcasting stations.
26121654	Carrier frequency cable	A polyethylene dual insulated foam skin aluminum sheathed cable which is used on pulse code modulation line and cable used in the carrier frequency range.
26121655	Simplex and duplex fiber optic cable	An optical cable that is used for interior distribution of a building, such as wall, ceiling and others. The number of insulated conductors is 1 to 2, and this is frequently applied on the jumper code, the cable for connection between the terminal devices in the interior optical distribution box and connection between the interior optical transmission equipment.
26121656	Submarine fiber optic cable	An optical cable for seabed that is coated with the jute asphalt CaCo3 with the first and second iron wire external layer by having the external part with the lead cover, galvanized steel wire and others in consideration of external impact and water pressure for the purpose of installation in shallow seas.
26121657	Flame retardant fiber optic cable	An optical cable that is used in communication lines exposed to fire danger.

UNSPSC v16_0901

1/27/2014

26121658	Aluminum conductor motion resistant transmission cable	Bare aluminum conductor, steel reinforced motion-resistant cable used for overhead transmission lines.	
26121659	Aluminum conductor quadruplex service drop cable	Insulated cable with aluminum conductor, used to supply 3-phase power to service entrance.	
26121660	Aluminum conductor duplex service drop cable	Cable used primarily for 120 volt outdoor and overhead service applications.	
26121661	Aluminum conductor underground service entrance cable	Cable used for 600 volt service entrance applications requiring high-heat, moisture and sunlight resistance.	
26121662	Aluminum conductor service entrance cable	A 600 volt aluminum conductor, polyethylene insulated service entrance cable.	
26121663	Single aluminum conductor service cable	A 600 volt high-heat and moisture-resistant cable primarily used in conduit or raceways.	
26121664	Aluminum conductor polyethylene covered line wire	Primarily used for overhead secondary distribution lines. Installed on insulators, treated as a bare conductor.	
26121665	Aluminum triplex service drop cable	Insulated aluminum conductor cable, used to supply power to user's service head.	
26121666	Communication cable assembly	A communication cable that is manufactured to connect to equipment with different each end or both ends.	
26121667	Backplane input output cable	Electrical cable which affixes to the backplane (as opposed to the front) of an I/O modular chassis.

26121809	Single core 60 volt class h automotive cable	A single core 60 volt automotive cable that operates within the minus 40degree to plus 250 degree centigrade range.	
26121810	Single core 600 volt class a automotive cable	A single core 600 volt automotive cable that operates within the minus 40degree to plus 85 degree centigrade range.	
26121811	Single core 600 volt class b automotive cable	A single core 600 volt automotive cable that operates within the minus 40degree to plus 100 degree centigrade range.	
26121812	Single core 600 volt class c automotive cable	A single core 600 volt automotive cable that operates within the minus 40degree to plus 125 degree centigrade range.	
26121813	Single core 600 volt class d automotive cable	A single core 600 volt automotive cable that operates within the minus 40degree to plus 150 degree centigrade range.	
26121814	Single core 600 volt class e automotive cable	A single core 600 volt automotive cable that operates within the minus 40degree to plus 175 degree centigrade range.	
26121815	Single core 600 volt class f automotive cable	A single core 600 volt automotive cable that operates within the minus 40degree to plus 200 degree centigrade range.	
26121816	Single core 600 volt class g automotive cable	A single core 600 volt automotive cable that operates within the minus 40to plus 225 degrees C range	
26121817	Single core 600 volt class h automotive cable	A single core 600 volt automotive cable that operates within the minus 40degree to plus 250 degree centigrade range.	
26121818	Multi core 60 volt class a automotive cable	A multi core 60 volt automotive cable that operates within the minus 40degree to plus 85 degree centigrade range.	
26121819	Multi core 60 volt class b automotive cable	A multi core 60 volt automotive cable that operates within the minus 40degree to plus 100 degree centigrade range.

Class 26131800 Power generation control equipment

Commodity	Commodity Title	Definition	Synonyms
26131801	Electrical control panels for generators		
26131802	Compressor control panels	These control panels are used in Gas and Steam compression equipment and machinery	
26131803	Generator control or protection panels	These panels monitor general functionality of generators for plant protection.	
26131804	Gas turbine control panels	These panels control the functions of gas turbines in power generation	
26131807	Steam turbines control panels	These panels control the functions of steam turbines in power generation	
26131808	Substation load control switchgears	Switchgear is the switching equipment used in the generation and transmission of electric power. This commodity is used specifically in substation applications (heavy volume).	
26131811	Current limiting reactors	Current -limiting reactors are equipment that provide reactance (thus current intensity) in an electric circuit.	
26131812	Gas insulated switchgears	Switchgear is the switching equipment used in the generation and transmission of electric power. This commodity includes switchgear that is gas insulated.	
26131813	Switchyard disconnect switches	These are switches used to regulate power in a switchyard (enclosed area of a power system that contains the switchgear).	
26131814	Switchyard surge arrestors	Surge arrestors stop the flow of electricity. These specifically are utilized in a switchyard (enclosed area of a power system that contains the switchgear)	
26131815	Electric accumulator	Used in the storage of energy or power.

27111513	Hose cutter		
27111514	Glass cutters		
27111515	Hand or push drill		
27111516	Punching pliers		
27111517	Knife blade sets or dispensers		
27111518	Wire lug crimping tool		
27111519	Tinners snips		
27111520	Nut splitters		
27111521	Nibblers		
27111522	Flaring tool	A plumbing tool used to widen the end diameter of a tube according to different diameter measures.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111523	Glass scraper	A tool comprised of two joined plates that may be either plastic or metallic, containing a rough metal blade between them that is located in the upper extreme in order to remove deposits on a glass surface.
27111524	Rivet cutter	A tool specially designed for removing rivet heads in order to undo a union between surfaces by extracting the inside rod.
27111525	Pincers	A tool having a pair of jaws and handles pivoted together to work in opposition which can either grasp or cut. Aliases: carpenter pincers, bricklayer pincers.
27111526	Deburring tool	A hand tool used to smooth out rough areas or surface irregularities on metal or other material. Comprised of a handle containing an elongated bar similar to a bit attached to a blade or cutting disc.
27111527	Wad punch	Iron and steel tool with hollow sharpened mouthádesigned to punch out or cut holes in a material.á Comes ináawl form as a single punch or in revolving punch pliers comprised of multiple punches of different diameters.
27111529	Insulated scissors	A type of scissors that does not allow electric current (typically 1000 volts AC and 1500 volts DC) to pass through it. Usually made of alloyed steel (vanadium and molybdenum).
27111530	Fishmonger scissors	A type of scissors consisting of two plastic covered blades having on one side a desquamate surface designed to remove fish scales.
27111531	Hair scissors	A cutting implement consisting of two steel blades joined by a swivel pin that allows the cutting edges to be opened. May include a finger rest. Designed as a work instrument for hairdressers.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111532	Jeweler scissors	A specialized cutting implement consisting of two hardened steel leaves or blades which can be straight or curved, joined by a swivel pin. áDesigned for high precision and cutting force to shape hard materials very common in the field of jewelry
27111533	Butcher scissors	A cutting implement consisting of two blades longer than the usual joined by a swivel pin that allows the cutting edges to be opened and closed with a wide and uniform cut. áUsed for cutting several kinds of meat. áSome scissors can include a support (clamp) to fix the scissor in the table
27111534	Compass cutter	A hand tool comprised of a main body with measurement indicators and an interchangeable blade at one end, and an adjustable shaft at the other end with a nail for fastening. áThe shaft can be adjusted to select the size of the circumference to be cut when the tool is spun.
27111535	Wire scissors	A specialized cutting implement consisting of two hardened steel leaves joined by a swivel pin. Used for cutting wire.
27111536	Circle cutter	A tool that is used to make circular holes between 30-80 mm in diameter in wood, ceramic or other compatible materials in a precise way.
27111537	Wood auger bit	Specialized bit for drilling large-diameter, deep holes in wood or thick man-made boards
27111538	Forstner bit	Type of bit used to form holes with a flat bottom, such as for kitchen cupboard hinges
27111539	Flat wood bit	Type of bit intended for power drill use only.The centre point locates the bit and the flat steel on either side cuts away the timber.
27111540	Tile bit	A specialized bit for drilling ceramic tile and glass.It has a ground tungsten carbide tip.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111541	Bullet pilot point	With their central point and two spurs, this type of drill bit resembles spur point bits, but can be used in metal, wood and plastics.
27111542	Spur point bit	Also known as a wood or dowel bit, they have a central point and two raised spurs that help keep the bit drilling straight.
27111543	Masonry bit	As the name suggests, these are designed for drilling into brick, block, stone, quarry tiles or concrete. The cutting tip is often made from tungsten carbide bonded to a spiralled steel shaft.
27111544	Rip saw	A saw designed for cutting along the grain. The front of the teeth are generally at right angles to the blade and pitched at between 85 and 90 degrees to the blade.
27111545	Crosscut saw	A saw that differs from ripsaws in that the teeth are bevel-filed at an angle instead of being at 90 deg.
27111546	Panel saw	A small version of the crosscut saw measuring from 45 to 60cm (18 to 24 in) and with smaller teeth of 10-12 points. It is used for cutting thin wood and for the larger joints.
27111547	Flooring saw	A specialized saw used only to cut across floorboards so that they can be lifted.
27111548	Tenon or back saw	A type of saw that is stiffened along the back of the blade. The length of blade can range from 20cm (8 in) up to 40cm (16 in), or even longer for special work.
27111549	Pad or keyhole saw	A type of saw intended primarily for cutting the straight sides of a keyhole. It can be used for any internal cut, straight or curved.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111550	Bow saw	A type of saw considered by many to be the most satisfactory saw for cutting shapes since the narrow blade negotiates curves easily, and is held in tension.Both the handle and knob (at the other end of the blade) can be turned so that a cut can be made more or less parallel to the required cut.
27111551	Log saw	A type of saw intended for crosscutting logs.It has a metal frame.
27111552	Coping saw	A type of saw used for thinner wood and for tight curves or shapes. By turning the handle the tension of the blade can be slackened or increased.
27111553	Two man crosscut saw	A type of saw designed for sawing through large logs using various pattern teeth.Each tooth pattern is claimed to have its own particular advantages, however this is often up to personal preference.
27111554	Blade sharpener	A tool to sharpen the blades of cutting tools by grinding them down to even out the surface of the blade.
27111555	Center punch	A type of punch typically used as an aid to drilling operations.It forms a small dimple in which the tip of the drill (if it is small enough) will fit.
27111556	Hollow punch	A type of punch similar to center punches, but with the difference that it produces holes or markings. The holes can be made in different shapes triangle,round and squares.
27111557	Taper punch	A type of punch with long tapers on the punching side of the tool. These types of punches are used for deep hole markings.
27111558	Parallel pin punch	A type of punch used in making parallel holes.It is quite different from taper and center punches as it has a parallel shank and no pointed end.
27111559	Hacksaw	Saw used for cutting metal.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111560	Mini pliers	Mini pliers are specially designed for working with small objects. These pliers have very small nose compare to other pliers. Which can hold minute things.	
27111561	Miter box	A tool that enables precision cutting of boards, timber and rods at prescribed angle by using fixture and saw.	
27111562	Optical fiber cleaver	A tool for cutting optical fiber.	

Class 27111600 Forming tools

Commodity	Commodity Title	Definition	Synonyms
27111601	Mallets		
27111602	Hammers		
27111603	Anvils		
27111604	Hatchets		
27111605	Picks		
27111607	Swaging tools		
27111608	Manual wire straighteners		
27111609	Electric wire straighteners		
27111610	Hammer and mallet components	A set of spare items related to hammers and mallets basically: handles, heads, head framework.	
27111611	Stonemason hammer	A specialized type of hammer with a cut in both sides designed for shaping stones and chipping walls.	
27111612	Non sparking hammer or mallet	A hammer or mallet made of a specific alloy, usually combinations of beryllium, copper, bronze, aluminum appropriate for use in environments with high explosive risk such as chemical plants, power stations, gas and oil distribution lines, etc.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111613	Non sparking hatchet	A type of hatchet made of a specific alloy, usually a combination of beryllium and copper or bronze and aluminum appropriate for use in environments with high explosive risk such as chemical plants, power stations, gas and oil distribution lines, etc.
27111614	Non sparking pick	A type of pick made of a specific alloy, usually a combination of beryllium and copper or bronze and aluminum appropriate for use in environments with high explosive risk such as chemical plants, power stations, gas and oil distribution lines, etc.
27111615	Sledge hammer	A sledgehammer is a tool that consists of a large, flat head attached to a lever (or handle). The head is typically made of metal. The sledgehammer can apply more impulse than other hammers due to its large size. Along with the mallet, it shares the ability to distribute force over a wide area
27111616	Ball peen hammer	A type of hammer used in metalworking. (The spelling ball-pein is usual in the UK.) It is distinguished from a point-peen hammer or chisel-peen hammer by having a hemispherical peening head.
27111617	Rubber mallet	Rubber mallets are hammers with heads made of softer materials than the steel normally used in hammerheads so as to avoid damaging a delicate surface. They are typically used to form sheet metal, since they don't leave marks, as well as for forcing tight-fitting parts together.
27111618	Claw hammer	The most popular hammer for general work, available with a wooden, glass-fibre or steel handles. The most popular weights are 455-680g (16 to 24oz).
27111619	Cross and straight pein hammer	A type of hammer mainly used for shaping metal. The pein can be at right angles to the handle or parallel with it.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111620	Cross pein pin hammer	A lighter weight version of the cross and straight pein hammer, ideal for light joinery and cabinet work. Weight 55g (4oz).	
27111621	Club hammer or lump hammer	A type of hammer with a double faced head that is useful for light demolition work, driving steel chisels and masonry nails.	
27111622	Joiners mallet	A type of mallet used to drive chisels or to tap wood joints together where a metal-faced hammer would cause damage or bruising.	
27111623	Hand bottle crimper	A hand tool used in tightening caps onto bottles.

27111727	Chuck keys		
27111728	Screwdriver set	Two or more screwdrivers of different types and sizes sold as a single unit.	
27111729	Wrench set	Two or more wrenches of different types and/or sizes sold as an integrated unit.	
27111730	Double ended swivel wrench	A wrench containing a flat long principal framework ended by a swivel in each extreme that articulate a socket for nuts or a driver for bolts but both being the same type.	
27111731	Precision screwdriver	A type of screwdriver designed for very fine work characterized by accurate action tapered for quick turning and usually equipped with a rotating cap for fingertip control.	
27111732	Non sparking screwdriver	A screwdriver made of a specific alloy, usually combinations of either beryllium and copper or bronze and aluminum, appropriate for use in environments with high explosive risk such as chemical plants, power stations, gas and oil distribution lines, etc.	
27111733	Flexible rod screwdriver	A type of screwdriver with either a multiple tip or fixed tip containing a flexible rod enabling it to reach difficult access working points.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111734	Multiple tip screwdriver	A type of screwdriver that can accommodate different kinds of bits by means of a detachable head that holds the bit. Usually comes with several heads appropriate for a variety of screw sizes and types.
27111735	Ratchet screwdriver	A type of screwdriver whereby the screwdriver rod is locked to the handle for clockwise rotation, but uncoupled for counterclockwise rotation for tightening or loosening screws. Some include accommodation within the handle for storing bits.
27111736	Insulated screwdriver	A type of screwdriver for electrical use that does not allow electric current (typically 1000V in AC and 1500V in DC) to pass through it. Material of construction is usually alloyed steel (vanadium and molybdenum).
27111737	Hand push automatic screwdriver	A type of screwdriver wherein its rod turns, either to the left or to the right, by means of an inner spring movement received from the stored energy after pushing the handle down.
27111738	Voltage tester screwdriver	A type of insulated screwdriver with its tip serving as a contact point with a conductor and either a cable with a gag or just a cable ending at an electrode going out from the top of the handle to close the circuit so that it displays electric current flow.
27111739	Torque screwdriver	A type of screwdriver designed to measure torque while tightening, based on the elastic deformation of a calibrated spring. The torque value is shown in a display located on its handle.
27111740	Telescoping screwdriver	A type of screwdriver with multiple bits containing an expandable magnetic pick up aerial that is located within the rod. Usually there is a compartment inserted in the handle to keep the interchangeable bits.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111741	Interchangeable rod screwdriver	A type of screwdriver which has the capability of extracting its rod by pulling it after turning by means of a muller nut located at the end of the handle.	
27111742	Impact screwdriver	A type of screwdriver that works through the principle of impact.	
27111743	Ring wrench or spanner	A type of wrench (spanner) that has a completely enclosed head, and may have six or 12 flats. A 12 flat wrench (spanner) engages upon the corners of the nut and can engage both hexagon and square bolts.	
27111744	Offset ring wrench or spanner	A type of wrench (spanner) that has an offset head allowing it to connect with nuts in awkward places, and to give room for your hand to move without hitting the workpiece.	
27111745	Split ring wrench or spanner	A type of wrench (spanner) where a section of the ring is removed so the six or 12-point jaws can be located like an open-ended spanner.	
27111746	Bulldog wrench or spanner	A type of wrench (spanner) where a worm screw is located close to the opening jaw, which has a rack engaged with the screw, making the wrench (spanner) very easy to adjust with the finger and thumb of the holding hand.	
27111747	Box wrench or spanner	A type of wrench (spanner) made of tubing with flats arranged at each end. Holes through the tubing are designed to take a tommy bar set at right angles to the tubing, and this is used to apply pressure to the wrench (spanner) head.	
27111748	Footprint wrench	A type of wrench where the jaw opening can be adjusted by lifting the moveable handle and re-positioning the pivot so that the wrench can be used on a number of pipe sizes. Pressure is applied by squeezing the two handles together.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111749	Pipe wrench or stillson wrench	An adjustable wrench used for turning soft iron pipes and fittings with a rounded surface. The design of the adjustable jaw allows it to rock in the frame, such that any forward pressure on the handle tends to pull the jaws tighter together.
27111750	Mole wrench	A self gripping wrench which can be adjusted to grip various diameters of pipe. The width of the jaws is adjusted by the knurled screw on the rear of the main handle and the tool is just then 'squeezed' onto the pipe.
27111751	Tap spanner or basin wrench	A type of wrench designed to tighten basin and bath tap backnuts in the often restricted space under the basin/bath where an ordinary spanner would have insufficient turning space.
27111752	Obstruction wrench	An open-end wrench designed with large offset angles for work in cramped spaces.
27111753	Ratchet wrench	A type of wrench that has a ratchet mechanism at the end that allows tightening or loosening in confined spaces.
27111754	S wrench	A type of wrench that has different sockets at the both ends.
27111755	Y wrench	A type of wrench having three different sockets at its three ends.
27111756	Crows foot wrench	A type of wrench that has detachable end sockets to the handle.
27111757	Slugging wrench	A type of wrench designed for use with hammers where impact or shock is required for loosening of frozen and rusty nuts and bolts.
27111758	Cam over wrench	A type of wrench that utilizes a ball and lobe design that allows the tool to slip free when torque is reached, thus preventing over-torquing.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111759	Blade wrench	A type of wrench with an adjustable interconnection between the tool body and the blade portion which permits selective angular positioning of the blade portion.	
27111760	Wheel nut wrench or lug nut wrench	A type of wrench for loosening or tightening a wheel nut of a vehicle.	
27111761	Water pump wrench	A type of wrench that has an unusual stepped opening.	
27111762	Flexible head gear wrench	A type of wrench that has a flexible, adjustable head at the end.It is a variety of ratchet wrench.	
27111763	Allen wrench	A six-sided wrench that fits into the hex socket of a cap screw or set screw.	
27111764	Drill drift	A device used to pull out the taper shank drill attached to drill sleeve or drill socket of various drilling equipment.	
27111765	Drum plug wrench	A non adjustable tool used in opening and closing the screw cap of oil drum.	
27111766	Cross rim wrench	A tool with socket wrench with different configurations or dimensions on the end of each of 4 cross shaped bars that can be turned by rotatory force.	
27111767	Offset screw driver	A screw driver with the driver bit and the handle bent in the shape of an L.	
27111768	Point socket	Type of socket that enables the rotation of the bolt or nut continuously without the need to reposition the die. The turning force is transmitted through the recess, where it engages the die

27111807	Straight edges		
27111809	Bevels		
27111810	Stud finders		
27111811	Folding ruler	A ruler formed by a series of ribs normally made of plastic which are united to each other consecutively by way of swivelled ends. Alias: carpenter rule.	
27111812	Long tape ruler	A measuring device consisting of a tape measure rolled up either in a box or a disc and used to measure longer distances than a regular tape measure.	
27111813	Plumb bob line	A specialized line usually made of nylon to avoid damage when suspended with a weight at the bottom (plumb bob).	
27111814	Inspection mirror	A tool used to assess work or equipment status where direct physical access is difficult. Consists of a mirror at the end of a rod.	
27111815	Combination square	A ruler with composite functions including drawing lines, drawing parallel lines, measuring of depth of groove, finding the center and measuring right angle on timber or steel materials.	
27111816	Gage ball set	A collection of various measurement balls with different diameters.	
27111817	Shrink or shrinkage rule	A type of ruler used in wooden pattern factories and cast iron factories. It has scale that is at greater interval in order to account for the contraction of molten metal which contracts during solidification.	
27111818	Dial gauge stand	An auxiliary tool that supports measurement devices such as dial gauge and dial test indicator, etc.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111819	Roughness comparison specimen	A standard specimen for comparison of surface roughness that is used as a standard in comparing and measuring the surface roughness of various machine processed surfaces through tactile and visual senses.
27111820	Square master	A device enabling measurement of squareness and straightness by moving a lever. Also enables assessment of the parallelism of a surface through measurement of straightness.
27111821	Cylindrical square	A measurement tool used to measure the squareness of attachment of jigs and products as squareness measurement master.
27111822	Angle measuring instrument	A type of angle measuring device. In general, it is equipped with a rotating component and circumference scale, and is used widely in automatic controllers.
27111823	Center gauge	An instrument used in installation and adjustment of shelves and screw bite, and testing of angle of tools. One side is used to measure angle while the other side has scales.
27111824	Angle gauge	An instrument that is standard for measurement of angle or testing. It is possible to obtain arbitrary standard angle by pairing from polygonal angle gauges with diverse range of vertical angle.
27111825	Sine plate	A surface plate with a sturdy metallic block or table with smoothly finished plane used to set accurate angle.
27111826	Precision surface plate	A solid flat plate made of cast iron or stone with its surface accurately and smoothly finished in order to perform centering, line drawing, assembly and measurement by placing work piece on its top.
27111827	Adjustable angle plate	A foundation plate used to fix the work piece on the upper plate, and is capable of precision adjustment and angle adjustment.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111828	Fixed angle plate	A cast iron tool used in performing drawing points or line, or machine processing by fixing the work piece into the groove by means of bolt, etc.	
27111829	Optical parallel	A plate with optical glass on the both side with highly precise level of parallelism. Used in measuring the level of flatness and parallelism of the micrometer measurement surface by using light wave interference.

27111909	Spatulas		
27111910	Burins		
27111911	Cross cut chisels		
27111912	Wood gouge	A chisel type cutting implement having a long, curved blade; used for hollowing out wood, or for making holes, channels, or grooves in wood.	
27111913	Edge trimmer	A wood finishing tool designed to shave the prominent material that is left both in width and along the edge from wood board edges.	
27111914	Bull point chisel	A circular or octagonal rod of iron or steel with a sharpened end for breaking up concrete or masonry. Aliases-synonyms: Concrete chisel.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111915	Stonemason chisel	A chisel made of tungsten carbide having a claw tooth head that is used after the bull point chisel in order to prepare a stone surface.	
27111916	Roof ripper		
27111917	Glue roller	A manual device for applying glue that uses a trigger for releasing glue onto a roller. Usually comes with a support for storage.	
27111918	Hand sander	A manual tool that contains abrasive on one side and has a handle on the other side.	
27111919	Bastard cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth.	
27111920	Second cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth.	
27111921	Smooth cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth.	
27111922	Cross cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth. A cross-cut file has two sets of teeth crossing obliquely.	
27111923	Chain saw file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth. Chain saw files are round files with various cuts.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111924	Rasp cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth. Rasp files have furrows made by straight cuts of a chisel, either single or crossed and have coarse, single teeth, raised by the pyramidal end of a triangular punch with various cuts.
27111925	Needle file	A large family of specially shaped small, narrow files ranging from about 3" to 8" in length.
27111926	Aluminum flat file	Type of file designed with a special tooth construction for filing aluminum and other soft metals with a minimum of clogging.
27111927	Aluminum half round file	Type of file designed with a special tooth construction for filing both flat and curved surfaces in aluminum and other soft metals.
27111928	Cheesegrater file	Type of file designed for rapid work on all soft materials - wood, aluminum, fiberglass, and laminated countertops.
27111929	Flat hand file	Type of file designed for safe filing of internal corners and where metal must be removed rapidly. One edge is uncut or safe for filing one surface without damaging an adjoining one.
27111930	Round file	Type of file designed for enlarging holes and shaping curved surfaces
27111931	Half round file	Type of file designed for filing both flat and curved surfaces
27111932	Square file	Type of file designed for filing slots, key ways, grooves, square holes and edges, and for filing flat surfaces where a heavier section is preferred
27111933	Three square triangular file	Type of file designed for filing internal angles above 60°, corners, grooves, notches, and for filing HSS taps and cutters after machining.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111934	Flat taper file	Type of file designed for use where metal must be removed rapidly and a smooth finish is not required.
27111935	Knife file	Type of file designed in the shape of a knife for filing slots, key ways, and acute angles
27111936	Warding file	Type of file designed for filing in narrow spaces where other files will not fit.
27111937	Laminate file	Type of file designed for lamination work and precision work on plastics.
27111938	Long angle lathe file	Type of file designed for filing work that is rotating in a lathe and for bench filing of aluminum and copper alloys.
27111939	Half round pipe line file	Type of file designed for filing weld beads and scale off pipe line
27111940	Mill saw file	Type of file designed as multi-purpose files for sharpening saws, various cutting edge tools, draw filing, lathe work, and finishing work on hard materials.
27111941	Taper saw file	Type of file designed for sharpening all styles of saws with 60° angle teeth.
27111942	Double end saw file	Type of file designed for general saw sharpening
27111943	Farmers own file	Type of file designed for sharpening cutting edge tools, e.g., knives, hoes, mower machine blades, etc.
27111944	Precision file	Type of file designed for fine finish work and are used by tool and die makers, instrument makers, model makers, and watchmakers.
27111945	Die sinker riffler	A tool specially designed for getting into crevices, corners, and contours of dies and molds.
27111946	Silversmiths riffler	A tool specially designed for making glass molding dies.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27111948	Half round wood rasp	A type of rasp designed with a very coarse rasp cut for filing both flat and curved surfaces in wood or soft metals.
27111949	Half round cabinet rasp	A type of rasp designed with a finer rasp cut for filing both flat and curved surfaces.
27111950	Round wood rasp	A type of rasp designed with a coarse rasp cut for enlarging holes and shaping curved surfaces in wood or soft metals.
27111951	Four in hand shoe rasp	A type of rasp for filing both flat and curved surfaces in soft metals, wood, plastics, and leather.
27111952	Horse rasp	A type of rasp designed for filing and shaping horses hooves prior to shoeing.
27111953	Farrier rasp	A type of rasp designed for filing and shaping horses hooves prior to shoeing.
27111954	Taper shank bridge reamer	A type of heavy duty reamer designed for use in structural steel fabrication bridge work, and ship construction to line up bolt and rivet holes.
27111955	Round shank bridge reamer	A type of reamer designed for lining up holes in structural steel fabrication bridgework, ship construction, automotive maintenance, and railroad car manufacture.
27111956	Burnisher	A hand tool that can remove the grinding particles or perform surface polishing work on highly precise surfaces or surface for which surface grinding has been completed.
27111957	Nozzle cleaner	A tool shaped like a needle that is used in removing carbon and foreign matter attached to the torch or fuel injection nozzle due to incomplete combustion or expanding hole.
27111958	Hand lapper	A hand tool used in processing surface smoothly by rolling with exertion of pressure after having applied lapping compound on the surface of object to be processed.

27112018	Bulb planter	A hand-held garden tool consisting of a cylindrical drum and handle, designed to be driven into the earth to the depth required for planting, then removed holding the displaced earth within the drum.	
27112019	Pruning saw	A type of hand saw mounted on a long handle or telescoping pole with a curved, often collapsible blade designed for pruning trees or large shrubs.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112020	Sickle	An agricultural tool composed of a steel curved blade with teeth or sharpened edge on the concave part affixed to a short handle for cutting grass or crops. Smaller version of a scythe.
27112021	Lawn aerator	A type of lawn maintenance tool designed to loosen up and aerate compacted soil. Variations of the tool either extract plugs of soil and or punch holes with spikes into the lawn to improve circulation of air, water and nutrients at the root level.
27112022	Border shear	A pair of large clippers with long handles having its head arranged either in straight form or turned 90 degrees to the left used to cut weeds or stems which are close to walls or places difficult to be accessed.
27112023	Hand cultivator	A manual garden tool composed by a handle plus a one, three or four prong head which is designed to be propelled along the soil to plough, to mulch, to furrow, or to pull up roots.
27112024	Miniature garden tool set	A set of reduced size garden tools such as a minifork, a minicultivator, a minihoe, weed remover, a trowel, a planter, a mini hoe-cultivator combo, a minirake, a minifork that are used for working in pots, terraces and gardens.
27112025	Short handled hoe	A hand tool with a short handle usually made of wood and a little flat blade inserted for removing plants considered unattractive, or troublesome from gardens.
27112026	Handle wedge	A piece of wood or metal shaped at a sharp angle used to tighten the handle of a hand tool with a blade, thus averting a possible accident with the tool.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112027	Garden broom	A tool composed of a group of wood filaments or metallic/plastic rods at the end of a handle in the form of a straight stick that can be of several sizes or materials. áThe tool is used to remove leaves, branches or other kind of litter.
27112028	Tree debarker	A small hand tool comprised of a wide flat blade screwed onto a handle that can be of several sizes. Used in gardens or estates to debark or clean the trunk of trees.
27112029	Garden watering can	A container for water, typically of metal or plastic having a long spout with a perforated nozzle, in the other side it usually has a handle, it is used to water plants.á
27112030	Billhook	A large heavy knife with a broad blade, used as an implement for cutting vegetation. It is similar to a machete, but it is more angular and ends in a hook that allows a second cut by pulling backwards after the first cut. It also usually has a rectangular secondary blade on the back.
27112031	Garden sieve	An device consisting of a perforated sheet or fabric contained in a circular form (usually of wood) employed to separate seeds of several sizes. áAlso used in fertilizer works.
27112032	Adze	A cutting tool differing from an axe in that the blade is set at a right angle to the handle. It is used for shaping wood.
27112033	Garden tool set	An assortment of small tools used in gardening that are sold together.
27112034	Root cutter	A tool used in gardening to cut or extract the roots of plants minimizing the damage.
27112035	Hedge trimmer	A gardening and landscaping power tool powered by either electric or gasoline motors.
27112036	Garden shredder	A power tool for reducing garden waste, (clippings, twigs, and small branches) into small pieces which can then be used for mulching or composting.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112037	Brush cutter	A type of cutter designed for cutting down brambles and overgrown parts of the garden.	
27112038	Garden chainsaw	A power tool ideal for heavy pruning tasks and tree felling.	
27112039	Lopper	A type of pruning tool designed to handle materials where the diameter exceeds 2-inch (20 mm). The longer handles on these pruners give the user more reach, as well as more leverage. They are useful for hedges, vineyards, and orchard maintenance.	
27112040	Soil probe	A tube-shaped device narrow in diameter for collection of soil specimens from ground.	
27112041	Grafting knife	A knife used in splitting the base tree for grafting of trees. Two styles: one that can be folded and integrated type that cannot be folded.	
27112042	Tree caliper	A device used to measure the diameter of a tree or seedling. It is designed with auxiliary ruler moving along elongated main ruler shaped like caliper used in precision measurement.	
27112043	Tree diagnostic tool or resistograph	A type of equipment used to measure the extent of compression, annual rings, range of decomposition, chapping, defectiveness, status of change and speed of sap flow during tree growth.	
27112044	Tree trunk Injection set	An injection set used to supply nutrients to the tree trunk when the nutritional status of the tree is very poor or the tree has difficulties in absorbing moisture or nutrients due to poor state of roots.	
27112045	Sod cutter	A machine used to cut grass turf in order to transfer the turf.	
27112046	Turf sweeper	A device that collects and removes the mown grass after cutting.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112047	High branch shears	A shear that can cut branches at the height of tall trees whose branches are straight and thick, and grow very high.

27112131	Deep throat jaw opening clamps		
27112132	Hold down clamps		
27112133	T handle clamps		
27112134	Longnose pliers		
27112135	Insulated pliers	A specialized type of pliers that do not allow electric current (1000 volts AC and 1500 volts DC) to pass through it. Usually made of alloyed steel (vanadium and molybdenum).	
27112136	Non sparking pliers	Pliers made of a specific alloy, usually combinations of beryllium and copper or bronze and aluminum, appropriate for use in environments with high explosive risk such as chemical plants, power stations, gas and oil distribution lines, etc.	
27112137	Pliers set	Two or more pliers of different kinds and/or sizes sold as an integrated unit.	
27112138	Manual pipe straightener	A tool for straightening low resistance pipe used in the plumbing and construction industries.	
27112139	Combination pliers	A type of pliers machined from forged steel with its two handles precisely joined with a heavy-duty rivet that maintains the pliers' accuracy even after repeated use under extreme force on heavy-gauge wire.	
27112140	Circlip pliers	A type of pliers for installing and removing circle clips (circular retaining rings).	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112141	Glass pliers	A type of pliers designed to hold glass while cutting.It has special jaws to clean the sharp corners and edges of the glass.	
27112142	Multi tool pliers	A type of hand tool containing pliers as well as other tools for doing multiple chores, whether hunting, camping, hiking or emergency chores.	
27112143	Tile cutting pliers	A type of pliers with a base handle and an actuating handle connected by a pivot and a return spring and terminating in a respective cutter blade for cutting small tiles.For cutting big tiles, the tool has a jaw plate and two needle holders longitudinally spaced at an inner side that move relative to the longitudinal stop bar.	
27112144	Snap pliers	A type of pliers with a bent nose.They are designed to hold retaining rings. There are two types: internal and external snap pliers.	
27112145	Slip joint pliers	A type of pliers whose pivot point or fulcrum can be moved to increase the size range of their jaws.	
27112146	Swivel base vise	A type of vise that has a swivelling base attached to a set of jaws which can clamp down on various items. The jaws can be rotated with the assistance of the base.	
27112147	Crimping pliers	A special type of pliers whose sole purpose is to close crimp beads which are metal beads that are crushed to hold beading wire.	
27112148	Electronics pliers	A specialized hand tool designed primarily for gripping electronic wires or other objects by using leverage. These are designed for numerous purposes and sometimes require different jaw configurations to grip, turn, pull, or crimp a variety of things.	
27112149	Electrostatic pliers	A type of pliers that have spring loaded jaws to confirm the gripping of objects. The spring maintains the jaws in a closed position.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112150	Jewellers pliers	Pliers used for jewellery work.It has a small nose to pick up small objects.
27112151	Wire-stripping pliers	A type of pliers designed for cutting and removing insulation on electrical wire while leaving the wire intact.
27112152	Triclover clamp	A type of clamp that is crevice free and designed for quick and easy assembly without the use of tools.It is mostly used to clamp Triclover Pipe, Liner assembly and is used extensively throughout the food, beverage, cosmetic and pharmaceutical industries.
27112153	Belt lacer	A hand tool that closes lacing for binding cut surface by manual pressure following alignment of supporting belts.
27112154	Milling vise	A type of vise used to hold the work piece by holding it onto the table of milling machine.
27112155	Piston ring expander	A tool similar to pliers used in inserting or pulling out piston ring from the piston.
27112156	Hand vise	A small vise with pin configuration used for manual work with very small rod, line, drill and tap by clamping them with chuck.
27112157	Drill vise	A machine vise that can be connected to the top of a drilling machine table. It uses a rectangular screw or trapezoid screw as feed screw.
27112158	Leg vise	A type of vise that clamps work piece and attaches to a work table. Used for simple forging work and hand finishing.
27112159	Chain vise	Cam equipment connected to chain with base containing at least 2 V shaped jaws. Used to secure pipe or other round shaped work pieces.
27112160	Wire twister	A type of pliers used to twist and hold wire in place and prevent loosening due to vibration. Used for binding steel reinforcements, sacks or bundles with wire.

UNSPSC Codeset

1/27/2014

27112161	Wire wrapping tool	A tool for winding and unwinding electric wire on terminal when installing and repairing telephone facility and others.	
27112162	Rule clamp	A tool used to combine two rulers into a single long ruler by connecting the ends of the two rulers with a clamp containing tightening type screws.	

Class

Commodity	Commodity Title	Definition	Synonyms
27112201	Trowels		
27112202	Floats		
27112203	Edgers		
27112205	Concrete vibrators		
27112206	Screed board	A rectangular strip or plank of wood or metal used to level off a horizontal surface of concrete or other composite building material when it is still not dry, when the implement is big it can include a handle to pull and make the job easier, it can include also a level bubble to ensure the correct position of the utensil.	
27112207	Hand rammer	A cone-shaped tool always heavy and thick, fitted with a handle that is used to roll flat sand, stones, pavements or others.	
27112208	Pickaxe	A pickaxe is a tool with a hard head attached perpendicular to the handle. Normally one edge is pointed like a spike and the other chiseled, however, some types have a hammer. The spike is most commonly made of metal, and the handle is most commonly made of wood or metal.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112209	Masonry shovel	A special kind of shovel adapted to the needs of masonry work. It is more resistant, has a longer blade and a heavier weight bearing handle. Constructed of steel, aluminum or plastic as well as non-sparking material. Can be pointed, round or straight. Used for digging and moving material.
27112210	Brick jointer	Sometimes called strikers, this item is used by the bricklayer to strike joints in brick and block walls. This tool gives the joints a neat, finished appearance.
27112211	Tuck pointer	Tuck pointers (also called joint fillers) are used in repairing the mortar in old brick walls. The size and shape of a tuck pointer's blade allow for easy application of new mortar between old bricks. .
27112212	Curb face tool	A type of large metal hand tool, typically 12" to 18" long, with a 1/16" thick metal blade and a wooden handle. The shape of the curb face tool is designed to be an exact match to the curb's required profile.
27112213	Concrete chute	A device that channels or conveys concrete or cement mixtures from the mixing chamber to the pour site.
27112215	Grooving edger	Masonry and concrete hand tool used for smooth finishing
27112216	Tile scribe	A tool used to score the glazed surface of tiles so that they can be broken along the scribe line.A Scribe needs to be used against a straight edge to ensure that the scribe mark is straight.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112217	Tile cutter	A tool for cutting large numbers of tiles in straight lines. Various designs are available but the usual type incorporates a 'scribe wheel', which is pulled across the tile, and a breaking arm, which is pushed down after scribing to break the tile along the mark.
27112218	Tile power saw	A specialized tool to cut tiles in straight lines. It is essential when cutting large numbers of tiles and/or thick, tough tiles (such as floor tiles).
27112219	Tile nipper	A hand tool used to cut away small, often irregular, areas of tile in a controlled manner.
27112220	Tile hand saw	A tile saw is needed to cut irregular shapes etc faster than just using nippers. They generally look a bit like a hacksaw, with a frame holding the ends of a special tile cutting blade.
27112221	Tile drill bit	A specialized carbide-tipped bit for drilling glass, tile and mirrors. The bit can be used with a hand drill, but is best used in a variable speed power drill on a slow speed.
27112222	Tile hole cutter	An alternative to drills, this tool has a diamond cutting edge which meets the tile surface square on. It can range in size from 12 to over 100mm diameter and should be used in a power drill and leave a smooth and clean finish.
27112223	Tile file	A type of file used to smooth rough edges and shape tiles. When shaping tiles, it should only be used to remove small amounts as it works very slowly. Ideally the file should have both a flat and curved face so that it can be used for filing both straight edges and contoured shapes.
27112224	Profile gauge	A tool designed to help transfer awkward shapes onto tiles for cutting. Its use is not restricted to tiling and it can be useful in woodworking and other crafts.
27112225	Notched spreader	A specialized tool for spreading adhesive for small tiling jobs.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112226	Tile trowel	A tool for applying adhesive in a manner similar to a notched spreader, but which is easier to use when large amounts of tiling are to be done.	
27112227	Grout spreader	A tool used to spread grout across tiles and into the spaces between them.It has a flexible, squeegee edge to move the grout around without damaging the surface of the tiles.	
27112228	Grout rake	A special tool with a narrow hardened blade used for removing old and discolored grout.Working the blade along the grout joints will remove the old grout and leave room for applying new grout.	
27112229	Tile removing chisel	A tool with a cranked blade that enables easy and quick removal of tiles with minimal damage to the backing wall or floor.It can also be used to remove plaster.	
27112230	Tuck pointer or joint filler	A tool used in repairing the mortar in old brick walls.	
27112231	Step tool	A tool for inserting and removing rod-type steps.It is used in concrete work and forestry.	
27112232	Groover	A hand tool used in making grooves or shallow scales on cement walls or concrete surfaces prior to curing in order to adjust the location of occurrence of crack or to make shape.

UNSPSC v16_0901

1/27/2014

27112307	Chalk for chalk line	Product that is used for chalk line marker devices and gives color to the line of the chalk lines. It is usually blue but there are other colors available in the market.	
27112308	Marking cart	Cart with two or more wheels used to mark a surface with a line. It can work with paint, aerosol or dust (usually lime).	
27112309	Marking pen	A special kind of pen that is able to write and mark different materials or surfaces like glass, wet surfaces, wood or others.	
27112310	Chalk holder	A circular or square implement used to grasp an industrial marking chalk. Facilitates use and keeps fingers protected and clean. It also prevents chalk breakage.	
27112311	Marking chalk	This kind of chalk is designed for industrial marking on complex surfaces such as steel, concrete, stone, glass, wood, rubber, fabric or others. It can support extreme high or low temperatures. It comes in several colors.	
27112312	Surface gauge	A tool used to draw a line on work piece or find the center of a round rod. It has a needle for drawing a line on the pole with foundation made of cast iron.	
27112313	Marking gauge	A tool used to draw parallel line or make marks with prescribed dimensions on timber or steel plate.

27112722	Beveling tool	Power tool used in high speed weld preparation of milled steel, stainless steel, and aluminum plate.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112723	Power shears	A small power tool used to make a very precise cut in copper or steel plate.
27112724	Power nibbler	A tool for cutting sheet metal with minimal distortion with a blade that moves in a linear fashion against a fixed die. Similar to shears.
27112725	Power riveter	An electrical tool for driving rivets usually in the form of a gun. Power supply can be power cable or battery.
27112726	Power rod cutter	Power tool for cutting rods of several materials (usually steel). It works by placing a rod at one end, and at the other a handle with a button. By pressing it, the machine cuts the rod in a precise way.
27112727	Mortar gun	A gun-shaped tool to make cement mortar penetrate and fill fissures or cracks. This tool is electrically powered via AC power or battery.
27112728	Power flaring tool	A portable unit that enables rapid and precise flaring of suitable tubes and the pre-installation of cutting rings.
27112729	Tube crimper	A gun shaped pressing tool that makes the correct connection between two tubes. Power source can be either AC or battery.
27112730	Power grease gun	A common power tool used for lubrication. Applies lubricant through an aperture to a specific point, usually a grease nipple, which carries the lubricant to the place needed. Power source is either AC or battery.
27112731	Power scissors	A type of scissors that move automatically, powered by AC or battery.
27112732	Power pipe bender	A power tool commonly used to make the elbows of pipes and also other forms.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112733	Angle cutter	A tool with the cutting face angled with respect to the axis of rotation formed by a manual saw and a basis upon which the material is placed by elevating the saw until the material stands still and fixed ready to obtain strips or wood marks in angle, generally to 45 degrees.
27112734	Jigsaw	A tool used for cutting arbitrary curves, such as stenciled designs or other custom shapes, into a piece of wood or similar material. It is usually used in a more artistic fashion than other saws, which only cut in straight lines and exist mainly to cut pieces of wood to length for building structures. In this way, it is similar to the rasp and the chisel.
27112735	Scroll saw	A small electric or pedal operated saw useful for cutting intricate curves where a jigsaw or coping saw is not appropriate. It is capable of creating curves with edges. It is somewhat similar to a band saw, but unlike band saws, in which the saw blade is a continuous loop, scroll saws use saw blades similar to those used by coping saws and operate through a quick reciprocating up and down motion.
27112736	Wall chaser	A specialised power tool generally used for cutting a groove into a wall. It is comprised of a motor that drives two abrasive discs like those found in an angle grinder. The abrasive discs are placed closely together.
27112737	Orbital sander	The most common type of electrical sander available. It comes with rectangular, square or round base plates. When using an orbital sander, there is no need to worry about the direction of wood grain
27112738	Detail sander	A type of orbital sander with small, usually triangular, base plates which can fit into awkward areas such as window frames, small items or furniture etc.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112739	Belt sander	A type of sander that can remove material quicker than an orbital sander, but does not produce as good a finish as can be achieved with an orbital sander.	
27112740	Bench sander	A type of sander used not just for sanding but for shaping as well. These machines are powerful and make easy work of rapid removal of material from the work piece.	
27112741	File sander or finger sander	A type of sander with a very narrow (in the order of 12.5mm) sanding belt which can get into narrow areas.	
27112742	Disc sander	An accessory for a power drill or fitted as a bench mounted sanding tool.	
27112743	Radial arm saw	A woodworking power tool that allows for vertical movement of the saw, which is housed in the saw carriage and supported by an arm. The yoke houses the motor and the blade and allows for beveled cuts from 0 to 90 degrees.	
27112744	Pneumatic saw	A type of power saw driven by pressurized air.	
27112745	Concrete saw	A powered saw (often known as a consaw or road saw) used for cutting concrete, masonry, brick, asphalt and other solid materials. Concrete saws are powered by gasoline, hydraulic or pneumatic pressure, or electric motors. The significant friction generated in cutting hard substances like concrete usually requires the blades to be cooled to prolong their life and reduce dust. Blades are either abrasive or diamond tipped.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112746	Chain saw	A portable mechanical, motorized saw.It is used in logging activities such as felling, limbing, and bucking; by tree surgeons to fell trees and remove branches and foliage; to fell snags and assist in cutting firebreaks in wildland fire suppression, and to harvest firewood.Chainsaws with specially designed blades have been developed as tools for use in chain saw art.
27112747	Reciprocating saw	A type of saw in which the cutting action is achieved through a push and pull reciprocating motion of the blade. The typical style of this saw has a foot at the base of the blade, also similar to a jigsaw. The user rests this foot against the surface being cut so that the tendency of the blade to push away from or pull towards the cut as the blade travels through its cycle can be countered.
27112748	Miter saw	A motorized saw (also called a chop saw or drop saw) used to make a quick, accurate crosscut in a workpiece.Common uses include framing operations and the cutting of molding.Most miter saws are relatively small and portable.
27112749	Angle grinder	A handheld power tool used for cutting, grinding and polishing. The motor drives a geared head at a right-angle on which is mounted an abrasive disc that can be replaced when worn.Angle grinders typically have an adjustable guard and a side-handle for two-handed operation.
27112750	Battery powered crimping tool	Die or dieless compression tool powered by a battery.
27112751	Power cable cutter accessories	Accessories for cable cutter that is battery operated or powered by electricity.

UNSPSC v16_0901

1/27/2014

27112828	Impact socket	A tool very similar to a regular socket but they are rather used with a power or pneumatic tool instead a manual wrench because of its major resistance to the effort.	
27112829	Impact wrench attachments and accessories	Commodities intended to enhance the use of impact sockets such as increaser adapters, reducer adapters, extensions, fastening rings, fastening rods, joints, etc.	
27112830	Screwdriver accessories and supplies	Accessories and spare items related to screwdrivers such as handles, rods and magnetizerátips, adapters.	
27112831	Wrench accessories and supplies	A set of accessories and spare items which is related to wrenches such as extensions to double offset ring wrenches, pins and telescopic levers to tubular wrenches, etc.	
27112832	Socket attachments and accessories	These commodities are intended to enhance the use of manual sockets such as: adapters, extensions, security rings, joints, handles, springs, security pins, etc.	
27112833	Drill bit case	An empty container or wrapping usually made of metal, plastic, wood or other material that is used to protect and organize drill bits	
27112834	Hand pipe threader case	An empty container or wrapping usually made of metal, plastic, wood or other material that is used to protect and order the pipe threaders.	
27112835	Machine reamer	A tool designed to create or modify a very round and accurately sized hole.	
27112836	Screwdriver bit set	A group of screwdriver bits of several kinds that are sold as an unit.	
27112837	Hand reamer	A tool for enlarging or shaping a hole, for use on all materials where a hand operation and accuracy are desired, the tool is often larger and thinner than machine reamers.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27112838	Cutting disc	A circular tool attachment made of steel that is inserted into a rotating power tool. The attachment is a type of blade used for scorching and cutting ceramic, asphalt, marble or other materials.	
27112839	Chisel bit	Edgeátool bit with a flat steel blade with a cutting edge, attachment to power tools like chippers	
27112840	Guide drill bit	A drill bit with a guide included for a better and more precise perforation.	
27112841	Hand drill bit for metal	High speed drill bit for accurate drilling in metal using hand drill	
27112842	Hand drill bit for wood	Drill bit designed specifically for drilling in wood reducing the chipping, tear out, and burning caused by high-speed metal drill bits	
27112843	Hand drill bit for stone	Drill bit designed specifically for drilling in stone and concrete. There are three different classifications of drill bits used for drilling into stone-soft, medium, and hard	
27112844	Lapping plate	A device that can be circular shape, rectangular shape or square shape made of various metallic materials. It enables easy abrasive actions with numerous narrow V shaped grooves or vertical grooves on the grinding surface.	
27112845	Drill bit set	A standard collection or kit of different bits used in a drill	
27112846	Heat gun adapter	Accessory piece that attaches to the nose of the heat gun.	
27112847	Die case	Carrying case for hydraulic compression dies.

27112904	Resin guns		
27112905	Oil can		
27112906	Caulking guns		
27112907	Broadcast spreaders		
27112908	Oil gun		
27112909	Roofing mop		
27112910	Portable waste oil storage	A type of equipment for temporary storage of waste oil of vehicle engine or transmission at motor repair shops.	
27112911	Oil cup	A device used to supply a small quantity of oil to the lubrication section of machine, equipment and motor.	
27112912	Oil changer	A type of equipment used to withdraw old used oil and replace it with new oil when replacing oil for engine, transmission and final reduction gear in accordance with the interval for replacement.	
27112913	Oil lubricator	A device used to inject oil into transmission and final reduction gear of vehicle or construction machines. Various types including pneumatic type, manual type and electric motor type.	
27112914	Grease lubricator	A device used in injecting grease into vehicles or construction machines. Two types: manual type and pneumatic type.	
27112915	Natural gas dispenser	A type of equipment used to supply natural gas fuel to vehicles at natural gas refilling or service stations.	
27112916	Liquid fuel dispenser or gasoline pump	A type of equipment for supply of liquid fuel to vehicles with gasoline or diesel engine.

27121706	Ferrule nuts		
27121707	Crimp connectors		

Class Hydraulic tools

Commodity	Commodity Title	Definition	Synonyms
27121801	Manhole cover lifters		
27121802	Hydraulic accumulators		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27121803	Hydraulic clamp	A device usually block-shaped used to join, grip, support or compress mechanical or structural parts with a clamping force up to eight tons.
27121804	Hydraulic shears	A small hydraulic tool used to make a very precise cut in copper or steel plate.
27121805	Hydraulic extractor	An hydraulic device for extracting that usually includes a handle, hydraulic press and shaft and accessories.
27121806	Hydraulic pipe bender	An hydraulic tool composed of a tripod containing the pipe bender which functions by attaching the ends to the pipe and pressing down on the center and turning.
27121807	Hydraulic puller	Hydraulic pullers are used for efficient removal of gears, bearings, wheels, pulleys and other pressed fit parts. Hydraulic power offers a controlled means of applying force without the need for hammering or heating.
27121808	Hydraulic chain cutter	A hydraulic tool designed to cut metallic chains in a secure way.
27121809	Hydraulic nut breaking tool	A nut cutting tool in which a cutting head includes a yoke for embracing a nut to be cut and for supporting a fixed blade as close as possible to the nut.
27121810	Hydraulic hand crimp tool	A hydraulic tool designed to crimp connectors onto a cable.
27121811	Hydraulic crimp tool accessory	Accessories used with hydraulic tools. Examples include test slugs, fluids
27121812	Hydraulic remote	A die or dieless remote power tool designed to crimp connectors onto a cable.
27121813	Hydraulic classifier	Particle separator in two or more granulometric fractions regarding the settlement velocity inside a fluid.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27121814	Compression die adaptor	Adaptor used in compression tools to allow different styles of dies to be inserted in jaw of tool.	
27121815	Hydraulic wrench	Portable wrench to fasten bolt or nut by spinning movement which controls fluid pressure	

Family Pneumatic machinery and equipment

Class Pneumatic tools

Commodity	Commodity Title	Definition	Synonyms
27131501	Pneumatic impact wrenches		
27131502	Compressed air gun		
27131504	Pneumatic hammer		
27131505	Pneumatic drill		
27131506	Pneumatic nail drivers		
27131507	Pneumatic sanding machines		
27131508	Air motors		
27131509	Pneumatic accumulators		
27131510	Accumulator bladders or bags		
27131511	Pneumatic grinders		
27131512	Pneumatic screwdriver		
27131513	Pneumatic file	A handle-shaped tool designed to hold file bit inserts that can be in several forms. The device makes the file bit move automatically backwards and forwards.	
27131514	Pneumatic pliers	A pneumatic tool having a pair of pivoted jaws, used for holding, bending or cutting.	
27131515	Pneumatic wrench non impact	A non impact wrench available in three types: dynamometric, angular or with head. Used to drive nuts or other fasteners.	
27131516	Pneumatic pen	A pen-shaped tool used to engrave in hard surfaces by means of heat.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27131517	Industrial pneumatic stapler	A pneumatic device used to bind material together by means of staples with a professional result.
27131518	Pneumatic auto glass removal tool	A pneumatic tool cylinder-shaped and ended in a blade, used to separate the glass from the place where it is inserted, above all is used in cars, where it can be cut through quickly, safely and without damage to the glass or the car body.
27131519	Pneumatic or air punch	A gun-shaped tool used to convert circular holes into hexagonal holes to allow rivet nuts to be attached. Works with multiple materials and commonly includes a safety pressure valve.
27131520	Pneumatic rod cutter	Pneumatic tool for cutting rods of several materials, usually steel.
27131521	Pneumatic riveter	A gun-shaped or straight tool used to drive rivets. Such pneumatic or oleo pneumatic (with oil) tools are able to invert the spin and set free the rivet to make the job easier. Can be used with riveted screws and nuts.
27131522	Miniature pneumatic sander	A small pneumatic tool used for sanding. Sanding disc has a diameter between 30-150 mm. Operates at a slower speed than normal sanders. Used for sanding on surfaces with difficult access, requiring high precision.
27131523	Pneumatic rammer	A pneumatic tool thin and large with interchangeable rubber or metal cleats used to roll flat sand, concrete and other materials. Capable of delivering 600 to 1800 impacts per minute.
27131524	Pneumatic countersink	A pneumatic tool for making a hole. There are two variations: gun or straight.
27131525	Pneumatic shears	A small pneumatic tool used to make a very precise cut in copper or steel plates.
27131526	Pneumatic press	A press that uses compressed air to flatten, mark, punch or otherwise shape a workpiece.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

27131527	Pneumatic tool set	An assortment of small pneumatic tools sold together as a kit or set.	
27131528	Pneumatic nail puller	A tool in which the piston is operated with pneumatic force and causes the nail head to pop up by hitting the end of embedded nail.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30103608	Wooden poles or telephone poles	Long thin stick of wood, often used standing straight up in the ground to support things such as wiring. Examples include telegraph or electricity poles	
30103609	Brattice board	Board used in underground mining when installing brattice for ventilation.	
30103610	Crib block	Treated wood blocks used in underground mining for supporting roof and equipment.	
30103611	Shovel mat	Log mats used to move large equipment over soft or uneven surfaces.	
30103612	Railway tie	Treated wood ties used for railroad track and support of roof.	
30103613	Precast haydite element		
30103614	Steel plate joist		
30103615	Plate girder	A riveted or welded steel girder having a deep vertical web plate with a pair of angles along each edge to act as compression and tension flanges.	
30103616	Composite framework	A structure made of composite materials that gives shape or support	
30103617	Wooden framework	A structure made of wood that gives shape or support	
30103618	Steel framework	A structure made of steel that gives shape or support	
30103619	Precast concrete element		
30103620	Crib block treated	Crib block treated with preservative to prevent rotting.	
30103621	Railway tie untreated	Railway tie not treated with preservative.	
30103622	Square timber	A piece of timber made out of long logs that are log cut for square or rectangular shape.	
30103623	Reinforcing bar or rebar or mesh

30121702	Geotextile		
30121703	Bridge rail		
30121704	Concrete slab		
30121705	Paving slab		
30121706	Concrete curb		
30121707	Noise protection board		
30121708	Brick tile		
30121709	Ungraded crushed rock		
30121710	Paving stone		
30121711	Natural curbstone		
30121712	Post cover	Device applied to public facilities such as electric posts or lamp posts to prevent attachment of advertisements including stickers, or posters	
30121713	Manhole cover	A manhole cover that enables people to have access to various underground facilities including water supply and sewerage pipeline in order to perform inspection, repair and cleaning.	
30121714	Manhole box	A structure or hole on the road surface designed to enable people to have access to underground.	
30121715	Bridge expansion joint	A type of equipment that enables structures to withstand contraction under temperature change, concrete creep, dehydration contraction, live load, death load, or rotating displacement of the structure in the zone where the upper structure of the road and bridge is linked or the zone connected to the upper structure.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30121716	Bridge seat mounting	A type of equipment used to distribute the load generated by impact, expansion and contraction that acts on the upper structure of bridge onto the lower structures of the bridge.	
30121717	Guardrail	A steel fence or facility that is installed between the traffic lane and pedestrian path to protect the latter from traffic accidents.	
30121718	Safety fence and net for rock drop	A safety net or fence that is installed at places with risk of falling rock. It works by connecting the part between the column and column with wire rope, wire net and others.	
30121719	Safety separator for road	A road safety facility that is used to separate roadways, and protect road side structures. Can be made of rubber, plastic, concrete, ironwork and others.	
30121720	Drain pipe odor suppression device	Device installed at lower end of grating and entrance of drain pipe to prevent bad odor, insects from coming in	
30121721	Drainage earth and sand barrel	Specialized barrel installed in drainage and manhole system to filter earth and sand, waste and other similar materials	

Class

Commodity	Commodity Title	Definition	Synonyms
30121801	Tree grating	A protective cover surrounding the trunk of a tree.	
30121802	Tree protection rod	A prop installed to support a tree beside the street or a fruit tree which exposed to high wind.	
30121803	Artificial turf	An artificial grass made with synthetic textile.	

Class

Commodity	Commodity Title	Definition	Synonyms
30121901	Soil stabilizer	A material that improves the physical and or chemical properties of soil. Applied as an organic powder to stabilize in combination of soil particles.

Class 30131500 Blocks

Commodity	Commodity Title	Definition	Synonyms
30131502	Concrete blocks		
30131503	Stone blocks		
30131504	Ceramic blocks		
30131505	Haydite block		
30131506	Natural rock slab		
30131507	Light concrete block		
30131508	Glass block		
30131509	Sound proof block	A block built for soundproofing.	
30131510	Concrete block for revetment	A block constructed on the interface between streams, rivers, or lakes roundabouts in order to prevent soil erosion.	
30131511	Concrete armor unit	A block built to protect a breakwater or a coastal structure by weakening wave energies.	
30131512	Autoclaved lightweight aerated concrete block	An aerated concrete block made lighter by the use of foam in the concrete.	
30131513	Rubber block	A block made of used rubber and rubber materials and used for flooring materials for non-vehicular walkways including sidewalks, playgrounds, etc.	
30131514	Reinforced concrete built up culvert block	A ferroconcrete block mainly used for culvert drainage, streets and footpaths, etc.	
30131515	Wood block	A block manufactured out of timber used to serve as a retaining wall and prevention framework.	
30131516	Braille block	A block or tile with prominence and depressions that is installed on the floor of pedestrian passage to seek safety of the disabled and general pedestrian and guide them to certain location.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30131517	Adobe block	Type of brick block elaborated from miry soil or mire and dried grass or straw which is molded and sun-dried.	
30131518	Concrete block for bridges	A block made with concrete for the construction of bridges.	

Class

Commodity	Commodity Title	Definition	Synonyms
30131602	Ceramic bricks		
30131603	Concrete bricks		
30131604	Stone bricks		
30131605	Sandlime brick		
30131606	Loess brick	A brick mixed with loess, straw and water, which is good for soundproofing, dampproofing and insulation.	
30131607	Clay brick	A brick made of clay in the process of oxidation, adding lime powder for change of color.	
30131608	Salt glazed brick	A brick mainly made of clay. Its surface consists of a fusion of glaze or similar material.	
30131609	Fabricated brick	A brick made of plastics or urethane which is easy to manufacture.	
30131610	Insulating fire brick	A brick which is excellent in insulation due to theporosity which lowers the heat transmission.	
30131611	Wood brick	Brick made with processed wood or compressed wood fragments. Used for inner walls in buildings.	

Class

Commodity	Commodity Title	Definition	Synonyms
30131702	Stone tiles or flagstones		
30131703	Concrete tiles or flagstones		
30131704	Ceramic tiles or flagstones		
30131705	Head stones		

UNSPSC Codeset

UNSPSC v16_0901

Class

Commodity	Commodity Title	Definition	Synonyms
30162001	High pressure laminate	Laminate finishing material that is mainly used as a countertop finishing material and as a wall covering. This material is available in sheet form.	
30162002	Specialty laminate	Specialty laminate is designed for particular applications, such as custom print, flame retardant, etc.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30162003	Metal laminate	Laminate material made out of metal, generally aluminum and available in a variety of finishes. Used as finishing material for countertops, wall covering, and in some cabinetry and furniture applications.	
30162004	Edgebanding laminate	Edgebanding is a laminate material used to finish the edges of countertops and as a finishing material for cabinetry.	
30162005	Rigid thermal foil RTF	Three dimensional laminate that is made of a rigid vinyl film composite. Used in cabinet production.	

Class

Commodity	Commodity Title	Definition	Synonyms
30162101	Steel stairs		
30162102	Wooden stairs		
30162103	Concrete stairs		
30162104	Stair nosing	A type of stair tread protection.	

Class

Commodity	Commodity Title	Definition	Synonyms
30162201	Laminate countertop		
30162202	Cultured marble countertop	Cultured marble is a mixture of resin, marble dust, and catalyst. Pigments are added to the mixture to get the desired colors.	
30162203	Solid surface countertop	Type of countertop made of solid synthetic sheets formed by mixing a mineral compound with polyester and/or acrylic resins, the countertop is smooth and uniform throughout. It has the look of stone without the seams or potential color variations	
30162204	Granite countertop	Type of countertop made of plutonic igneous rock having visibly crystalline texture; generally composed of feldspar and mica and quartz

Class

Commodity	Commodity Title	Definition	Synonyms
30162301	Lazy susan hardware or assembly	Shelves inside of cabinets that spin for easy access	
30162302	Spice rack or spice drawer insert	Spice rack or door inserts that are built into a cabinet	
30162303	Pull out waste basket hardware or assembly	Waste basket built into cabinets	
30162304	Pantry hardware or assembly	Shelving and related organizers for a pantry type cabinet	
30162305	Tilt out tray hardware or assembly	A type of tray that opens by tilting instead of opening like a regular drawer	
30162306	Door mount or sliding towel hardware or assembly	Device for holding towels that hooks to cabinets or over cabinet doors	
30162307	Pull out or tip out hamper hardware or assembly	Component hardware for a type of hamper that is accessed by tipping or pulling out.	
30162308	Bread box lid or assembly	Container for storing bread that is integrated into a cabinet.	
30162309	Stemware rack	A specialized rack for holding glasses that is mounted inside a cabinet.	
30162310	Roll out tray	A type of tray attached to a cabinet that can be rolled out.	
30162311	Slide out storage bin or assembly	A type of storage container mounted inside a cabinet that can be accessed by sliding it out.	

Class

Commodity	Commodity Title	Definition	Synonyms
30162401	Folding wall	A type of wall structure that can be folded to convert one large room into two small rooms.	
30162402	Screen wall or cubicle	A moveable structure used to separate workplaces within a large room	
30162403	Interior wall system	Prefabricated wall system used when building small rooms within a large office area	
30162404	Cold storage wall	Insulated wall used in cold storage buildings.

30171512	Door openers		
30171513	Kick plates		
30171514	Door closers		
30171515	Inspection door		
30171516	Door screen	Material used for screen doors, not the door itself.	
30171517	Sound proof door	A door designed to block noise from outside.	
30171518	Blem door	A term used for blemished doors	
30171519	Blast proof door	A door designed to block fire and debris in case of explosion and fire.	
30171520	Door and window loop	Used to run cable from the door frame to the door stile	
30171521	Water tight door	A door designed to block water and prevent leakage.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30171522	Air tight door	A door designed to prevent circulation of contaminated air and harmful gas.	
30171523	Fire door	A door designed to provide emergency exit for escape from fire and to block the spread of fire.	
30171524	Shielding door	A door that is manufactured by using a special screening agent inside the door to protect equipment and human life from radioactive rays, electromagnetic waves or magnetic field.	
30171525	Pressure door	A door specially manufactured and installed for the purpose of adjusting external atmospheric pressure and atmospheric pressure in work place by installing it at the entrance to air caisson workroom.	
30171526	Folding door	A type of door that segregates interior space such as office or meeting rooms, and that can open and close in both directions of the segregated space.	
30171527	Melamine door	A type of door made of melamine resin-saturated decorative paper that is laminated under heat and pressure and then pasted onto particle board. The resulting panel is often called melamine and commonly used in ready-to-assemble furniture and inexpensive kitchen cabinets.

30181604	Toilet seat lid	Lid to be fixed to toilet seat	
30181605	Drain	Plumbing fitting used as a conduit to remove water, or some other liquid, from somewhere that it is not wanted.	
30181606	Robe hook	Hooks mounted in bathroom; used to hang robes	
30181607	Shower curtain or assembly	Shower curtain or assembly including curtain and other parts used to keep water from escaping a showering area.	
30181608	Shower rod	Mounted devices to hold shower curtains	
30181609	Shower caddy	Devices used in showers to hold soaps, shampoos, etc	
30181610	Toilet tissue holder	Specialized device for holding and dispensing toilet paper	
30181611	Toothbrush or tumbler holder	Fixture, fixed or otherwise, designed to hold toothbrush(es) and/or a tumbler or other drinking vessel for use in a restroom.	
30181612	Shaving razor hook	Hook or other hanging device to hang a shaving razor.	
30181613	Bathtub or whirlpool apron or skirt	A piece of material, usually plastic, used to conceal or hide the inner workings of a bathtub, whirlpool or other bathing apparatus.	
30181614	Soap dispenser		

Class

Commodity	Commodity Title	Definition	Synonyms
30181701	Spigot	A device for regulating the flow of a liquid from a reservoir such as a pipe, generally found outdoors and not flowing into a vessel such as a sink.	
30181702	Faucet unit	A specialized tap for delivering a mixture of hot and cold water into a sink, or other vessel.	

Class

Commodity	Commodity Title	Definition	Synonyms

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30181801	Shower head	A perforated nozzle for spraying water on a bather taking a shower.	
30181802	Faucet aerator	A device installed in a faucet or showerhead that adds air to the water flow, thereby maintaining an effective water spray while reducing overall water consumption.	
30181803	Hand held shower unit	Hand held device used to spray water within a shower. Unit includes hand held shower and hose.	
30181804	Faucet handle	Handle used to start or stop the flow of water from a faucet.	
30181805	Combination fixed and hand held shower head	A handheld and standard shower head together.	
30181806	Whirlpool jet	Injection devices that are installed in hot tubs, swimming pools, showers or bath tubs to spray water	
30181807	Spout	A pipe, tube, or liplike projection through or by which a liquid is discharged, poured, or conveyed, from a faucet.	
30181808	Rough in valve	Plumbing valves which reside behind the wall, or out of sight of the rest of the finished plumbing fixtures.	
30181809	Hand shower repair kit	Kit of hand shower parts used for installation and repair.	
30181810	Faucet trim	Trim piece for faucets not including handle.	
30181811	Faucet repair kit	Kit of internal parts for faucet repair.	
30181812	Body spray head	A shower jet used to spray portions of the body directly	

Family 30190000 Construction and maintenance support equipment

Class 30191500 Ladders and scaffolding

Commodity	Commodity Title	Definition	Synonyms
30191501	Ladders		
30191502	Scaffolding		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30191505	Step stool		
30191506	Platform step ladder	A type of ladder that gives a stable working position with a high level platform for resting tools and materials being used.Available in various heights and with or without a high level hand rail.	
30191507	Combination ladder	A type of ladder that provides the combined functionality of a step ladder, an extension ladder and a stair ladder in one unit.	
30191508	Roof ladder	A type of ladder designed to function with scaffolding for work with pitched roofs.It has two wheels at the upper end which enable it to be pushed up the roof without damaging the slates or tiles.	
30191509	Fire escape ladder	A ladder which is used for the rescue activities at the time of emergency evacuation from fire and others. It defines the cross bar, vertical bar and others with interval, inner dimension and others in consideration of safety, convenience of handling and others.	
30191510	Fire extinguishing ladder	A ladder which is possible to move for use as it goes up to the higher area or goes down to lower area.	

Class

Commodity	Commodity Title	Definition	Synonyms
30191601	Scaffolding handrail		
30191602	Scaffolding stabilizers		
30191603	Scaffolding flooring		
30191604	Scaffolding cross brace	Metal rods that are used to add stability to the structural members, placing them at angles prevent scaffold breaks.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30191605	Scaffolding frame	The main part of the structure of scaffolds, it consist in a square-shaped metal structure with hangers to place platforms, holes to place the cross braces and others, it must be rigid and stable.
30191606	Scaffolding staircase	A special kind of staircase that is inserted in scaffolds to let the buiding workers go up and down with more security and comfort.
30191607	Scaffolding counterweight	An accessory used in scaffolding to balance the weigh and avoid the fall of suspended scaffolds, it is heavy and usually cubic.
30191608	Scaffolding corbel	A triangular scaffolding accessory that is placed in angles that support weigh adding more stability to the structure, in this way we can keep the distance to the facade and continue the assembly in spite of possible irregularities.
30191609	Scaffolding trestle	A device normally consisting of a ridge plank fixed edgways to two pair of legs, each pair with the legs converging to meet at the plank; it is, inter alia, used as a solitary scaffold or as a support for duckboards.
30191610	Scaffolding davit	An accessory of direct fixation in the scaffold structure for taking up and down little loads, it is specially useful to assemble and disassemble the structure.
30191611	Scaffolding fixation device	A fixation accessory that consists of a ring where other scaffolding accessories can be hung on one side, and on the other a tab enabling fixation to be screwed to the structure.
30191612	Scaffolding wire rope	A special kind of large diameter (8 to 10 mm) wire made of a very resistant steel used in scaffolding.
30191613	Ladder platform	Device that clips onto a ladder rung to provide a convenient area for tools and materials at the top of the ladder.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30191614	Ladder tray	Ladder attachment that holds bucket and tools in a high position.	
30191615	Ladder stay	A device that locks onto the top two rungs of the ladder with one end and at the other end rests against a wall so the ladder is held off a small distance from the wall. It allows the underside of the eaves and guttering to be worked on without having to lean back.	
30191616	Construction safety net	A safety net installed around structures in order to prevent injuries caused by falling material and tools or falling accidents of people during work.	
30191617	Construction safety shelf	A wooden protective shelf installed on the exterior and interior of construction scaffolding to reduce risk of injury due to falling objects or tools during high elevation work.	

Class

Commodity	Commodity Title	Definition	Synonyms
30191701	Construction shed		
30191702	Construction trailer		

Class

Commodity	Commodity Title	Definition	Synonyms
30191801	Structural formwork	A temporary structure of wood or steel designed to contain and give structure to poured concrete.	
30191802	Structural formwork accessory	Wood or steel accessory used for the mould installed to pour concrete.	
30191803	Structural spacer	A material which provides support to an iron reinforcing rod by adjusting the interval of the iron reinforcing bar accurately for concrete pillar, wall, precast structure and others.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30191804	Temporary roadway lining plate	Rectangular metal plate used to provide temporary roadway for ordinary and construction vehicles during public works, building, bridge and road construction. Comprised of thick plate and two types of rolled steel materials, surface of the plate is welded and processed. Lining plates are widely used in underground construction projects including subways, underground drain pipes, etc. They are also used in the construction of bridges.	
----------	--------------------------------	--	--

30191805	Structural deck plate	Metal panel used alternatively for floor material or molding, including zinc-galvanizing plate combined with wire and rebar and others	
----------	-----------------------	--	--

Family Portable Structure Building Components

Class Portable Structure Consolidating Components

Commodity	Commodity Title	Definition	Synonyms
30241501	Tube frame connector	Multiple way connector linking a pole to either ridges or purlins. It links all perimeter pieces and comes in different shapes and angles (T, U, two way corner, crowns, etc.).	
30241502	Anchor plate	Metal plate through which anchors (pegs or mechanical) are driven, used either as a base plate or as part of an anchorage system to which a guy wire is hooked up to in order to hold tension.	
30241503	Bail ring	Ring moving up and down the mast attached to the higher end of the canvas and part of a center pole. Its purpose is to lift the fabric to its peak and hold it in place at the top of the pole by means of ropes or cables.	
30241504	Base plate	A device used at the base of a column to provide firm footing and sometimes act as a pivot to bring the pole up into position during installation and down when dismantling.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30241505	Cupola	A rigid structure on which the rooftop canvas sections of a tent can be laced or attached. It is mainly used for lifting and acts as an anchor point for the tent's roof canvas.
30241506	Funicular bell	Element fixed on a guy by a pulley, between the masts and the side poles, which replaces the function of interior quarter poles by supporting the canvas, giving the tent roof a particular shape and more interior space.
30241507	Gable	Part of the end wall of a temporary self-standing tents roof structure. It is usually triangular in shape.
30241508	Gin pole and accessories	A simple hoisting and loading device consisting of block and tackle suspended from near the top of a single pole or multiple poles, termed a mast, held vertically or obliquely (when also a boom) by guys. Its purpose is to change the angle or direction of a cable.
30241509	Mast section and king pole	A column or truss, that can be divided into sections, rising vertically in the middle of a tent or on the sides of a center piece structure. Rigged to stand or lift the roof canvas of a tent, it is the highest pole of the tent and main support of the roof canvas.
30241510	Side pole	Pole that supports the perimeter of the tents roof.
30241511	Stake or peg	Pieces of material that are driven into the ground and are part of an anchoring system that holds the guy cables or the anchor plates of a structure.
30241512	Transom	A horizontal member which is placed on top of upright poles and generally used to make an entrance to a tent.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30241513	Steel A-frame	Triangular shaped structure composed of square steel tubing with a stirrup welded at the top in which the stringer or support beam sits. Acts as a structural support. In some cases, the stirrup can be mounted on a threaded rod or screw-jack which makes it adjustable.	
30241514	Structural brace	A device (such as a bar or an angle bracket) placed between two other pieces, used as a tie or strut to bear transverse strains and prevent distortion.	
30241515	Structural alignment tool	In portable structures, non-structural tubing or devices installed between two or more structural parts, used to set and regulate the spacing between those parts.	

Class

Commodity	Commodity Title	Definition	Synonyms
30241601	Grandstand footboard and accessories	Floor panels specially built for grandstands which, once set up, become part of the structure.	
30241602	Stair step	In portable structures such as grandstands, the horizontal surface on which people walk to go up or down stairways.	
30241603	Stringer	Tiered or stepped metal structures which act as the main support of a grandstand's structure on which one installs the seats, the footboards, etc.	
30241604	Stair riser	Vertical structural element covering the space between two steps in a staircase.	

Class

Commodity	Commodity Title	Definition	Synonyms
30241701	Framing beam or rail or tubing	Parts of framed tent structures that contribute to the final framing and consolidate the roof, walls, or other parts of the structure. They include purlins and eaves, rafters, ridge poles, side wall rails, uprights, etc.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

30241702	Portable structure canvas section	Section of technical textile that is cut, glued, welded and equipped with ropes, ties, grommets etc. according to an engineering design in order to be assembled onto a tent or membrane structure.	
----------	-----------------------------------	---	--

Family 30250000 Underground mining structures and materials

Class 30251500 Underground roof support structures

Commodity	Commodity Title	Definition	Synonyms
30251501	Combination roof bolt and truss	Used in underground mining applications to support roof.	
30251502	Roof plate	Plates used in conjunction with roof bolts to support roof in underground mine.	
30251503	Resin glue capsule or cartridge	Resin glue used in conjunction with roof bolts to support roof in underground mine.	
30251504	Expansion shell	Expansion shells used in conjunction with roof bolts to support roof in underground mine.	
30251505	Rib mat	Metal used in conjunction with roof bolt to support roof in underground mining.	

Family 30260000 Structural materials

Class 30261500 Brass bars

Commodity	Commodity Title	Definition	Synonyms
30261501	Hot rolled c360 brass bar	Hot rolled bars of various cross sections produced from c360 free cutting brass	
30261502	Hot forged c360 brass bar	Hot forged bars of various cross sections produced from c360 free cutting brass	
30261503	Hot rolled c464 brass bar	Hot rolled bars of various cross sections produced from c464 naval brass	
30261504	Hot forged c464 brass bar	Hot forged bars of various cross sections produced from c464 naval brass

1/27/2014

31143203	Metallized injection molding	Injection molded component consisting of various plastic materials with the addition decorative metallic finish applied to its show surface after molding, using an electrostatic evaporative coating process	
31143204	Lased injection molding	Injection molded component consisting of various plastic materials that is treated with laser to produce etching or other decorative effects to its show surface	
31143205	Lased and painted injection molding	Injection molded component consisting of various plastic materials that is treated with laser to produce etching or other decorative effects to its show surface and is painted to highlight or accentuate the decorative effect	

Family 31150000 Rope and chain and cable and wire and strap

Class 31151500 Ropes

Commodity	Commodity Title	Definition	Synonyms
31151501	Cotton rope		
31151502	Polyester rope		
31151503	Polypropylene rope		
31151504	Nylon rope		
31151505	Wire rope		
31151506	Hemp rope		
31151507	String or twine		
31151508	Sisal rope		
31151509	Rubber rope		
31151510	Rayon rope	Rayon is a material made from synthetic textile fibers produced by forcing a cellulose solution through fine spinnerets and solidifying the resulting filaments, with this material we get a silk-like texture rope but more resistant than silk, and it is good to control mite infestation.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31151511	Linen rope	Linen is a material made from the fibers of the flax plant, the linen rope is used in lots of fields like textile, footwear or others.
31151512	Polyethylene rope	Polyethylene is a thermoplastic material composed of polymers of ethylene, the polyethylene rope is very difficult to rot or mildew, it has several uses.
31151513	Coconut fiber rope	A rope made of coconut fiber that has high lignin content and low cellulose content, making it resilient and durable, these ropes are rough and strong.
31151514	Jute rope	Jute is a long, soft, shiny vegetable fibre that can be spun into coarse, strong threads, it is produced from plants in the genus Corchorus, family Malvaceae, jute rope is very widely used in a lot of fields.
31151515	Esparto grass rope	A tough, wiry grass (<i>Stipa tenacissima</i>) of northern Africa and south Spain, yielding a fiber used in making ropes very resistant and with a long life.
31151516	Raffia rope	The fiber of the raffia is obtained from the leaves of the raffia palm that is found in South America, Africa and Madagascar, and with this raw material we get a rope very resistant and with a long life, the raffia can be also synthetic.
31151517	Aloe rope	A rope made of aloe vera, a material that makes this rope very resistant to deterioration.
31151518	Impregnated rope	A special kind of rope that is impregnated with another substance to strengthen or improve performance under specific conditions. Examples include resin or tar-impregnated rope.
31151519	Latex rope	A flexible rope made of latex that makes it exceptionally abrasion resistant and UV radiation resistant.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31151520	Vynylon rope	A rope made of nylon spun yarn, a synthetic fiber, with outstanding weatherability and is easy to handle for flexible and non-slippery features.	
31151521	Asbestos rope	Rope made of yarn and long fibers of asbestos and roll brading.	

Class

Commodity	Commodity Title	Definition	Synonyms
31151601	Safety chains		
31151603	Roller chains		
31151604	Proof coil chains		
31151605	Sash chain		
31151606	Jack chains		
31151607	Coil chains		
31151608	Ball chains		
31151609	Chain links		
31151610	Hollow pin chain	A serial chain used in industrial machines to be inserted in the sprockets, the hollow pin is at the center of articulation, and always keeps the pitch length.	
31151611	Silent chain	A multi-leaf inverted tooth steel link chain.	
31151612	Block chain	A multi-leaf chain mainly used in hoist applications.	
31151613	Engineering chain	Chain designed to operate in elevators, drives and rugged conveyor service.	
31151614	Conveying chain	Chain designed to be used as a conveyor, generally with table top attachments.	
31151615	Roller or plate top chain	A kind of chain comprised of inner and outer -- or top-- plates that provide greater loading capacity and permit higher speed with a single power traction unit.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31151616	Pintle chain	A type of chain that has links that are approximately U-shaped. The closed end of each link fits into the open end of the next one; a pin holds the two links together.	
31151617	Dragline chain	Chain built to exact specifications used for lifting or dragging dragline buckets.	
31151618	Longwall chain	Chain used in conjunction with flights to move coal from where it is being mined to conveyors. High impact resistant chain for use on heavy duty longwall haulage and conveyors.	
31151619	Escalator step chain	A chain used exclusively for escalators that causes the step to move which is the part passengers step onto.	

Class

Commodity	Commodity Title	Definition	Synonyms
31151702	Non electric control cables		
31151703	Lifting cables		
31151704	Track cables		
31151705	Non electrical steel cables		
31151706	Non electrical copper cables		
31151707	Non electrical aluminum cables		
31151708	Guy cables		
31151709	Non electrical iron cable	Cable with non electrical properties made of iron.	
31151710	Synthetic cable	A very strong thick rope made of synthetic material, with applications in construction and security. It is non-abrasive and very resistant.	

Class

Commodity	Commodity Title	Definition	Synonyms
31151803	Piano steel wire		
31151804	Staple wire		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31151805	Strand or multi filament wire	A group of wire strands bundled or twisted together as a functional unit made of metal, it has several applications.	
31151806	Laminated wire	A group of wire strands bundled or twisted together as a laminated functional unit.	

Class

Commodity	Commodity Title	Definition	Synonyms
31151901	Metal straps		
31151902	Leather straps		
31151903	Fiber straps		
31151904	Plastic straps		
31151905	Rubber straps		
31151906	Ratchet tie down strap	Assembly made of a strong, narrow fabric, closely woven, ratchet buckle, and fittings at both ends principally used as strap designed to withstand strain.	

Class

Commodity	Commodity Title	Definition	Synonyms
31152001	Razor wire		
31152002	Barbed wire		

Class

Commodity	Commodity Title	Definition	Synonyms
31152101	Cotton cord	A length of flexible material similar to rope, but thinner and shorter, made of cotton fibers braided together.	
31152102	Nylon cord	A length of flexible material similar to rope, but thinner and shorter, made of nylon fibers braided together.	
31152103	Metallic cord	A length of flexible material similar to rope, but thinner and shorter, made of metallic fibers braided together.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31152104	Silicone cord	A length of flexible material similar to rope, but thinner and shorter, made of silicone fibers braided together.	
31152105	Latex cord	A length of flexible material similar to rope, but thinner and shorter, made of cotton fibers braided together.	
31152106	Polyester cord	A length of flexible material similar to rope, but thinner and shorter, made of polyester fibers braided together.	
31152107	Neoprene cord	A length of flexible material similar to rope, but thinner and shorter, made of neoprene fibers braided together.	
31152108	Polypropylene cord	A length of flexible material similar to rope, but thinner and shorter, made of polypropylene fibers braided together.	
31152109	Rubber cord	A type of line thinner and shorter than a rope made of twisted fibers or threads of rubber whose insulation characteristics make it suitable for electrical applications as well as other applications.	
31152110	Asbestos cord	A line thinner and shorter than a rope comprised of twisted fibers or threads made of asbestos. Insulating properties make it suitable for use with electrical applications.	
31152111	Glass fiber cord	A line thinner and shorter than a rope that is made of fiber cord, a very resistant material.	
31152112	Ceramic fiber cord	A line thinner and shorter than a rope made of ceramic fiber, a material very resistant to high temperatures.	

Class

Commodity	Commodity Title	Definition	Synonyms
31152201	Low carbon steel wire	A type of wire generally referred to as iron wire. It has a carbon content ranging from of 0.06 percent to 0.25 percent and a tensile strength of 35 kilograms per square millimeter.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31152202	Hard drawn steel wire	A wire made from metal drawn at room temperature after the thermal disposition of the hard drawn steel material is made from high carbon wire rod.	
31152203	Stainless steel wire	A steel wire given corrosion resistance by adding 12 percent more chromium. It resists rust because of the passivity film of chromium oxide under the oxidative atmosphere.	
31152204	Stranded steel wire	A type of wire made up of a coated steel wire and two lines of copper wire. The purpose is to control the electromagnetic interference from external sources.	
31152205	Oil tempered wire	A type of wire made by the tempering process after quenching the cold work wire and oil in consecutive passes.	
31152206	Coated steel wire	A type of steel wire coated or plated with other metals, such as zinc or aluminum.	
31152207	Prestressed concrete steel wire	A high strength steel wire used for a compression member of pre-stressed concrete.	
31152208	Prestressed concrete stranded steel wire	A steel wire with high strength used to make pre-stressed concrete that is made up of several strips.	
31152209	Iron wire	Wire made of iron.	

Class 31152300 Non electric nonferrous metal wire

Commodity	Commodity Title	Definition	Synonyms
31152301	Lead or lead alloy wire	A type of wire made with the main material of lead or lead alloy.	
31152302	Nickel or nickel alloy wire	A type of wire made with the main material of nickel or nickel alloy.	
31152303	Nichrome alloy wire	A type of wire made with an alloy of nickel and chrome.	
31152304	Copper or copper alloy wire	A type of wire made with the main material of copper or copper alloy.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31152305	Aluminium or aluminium alloy wire	A type of wire made with the main material of aluminum or aluminum alloy.	
31152306	Tin or tin alloy wire	A type of wire made with the main material of tin or tin alloy.	
31152307	Titanium or titanium alloy wire	A type of wire made with the main material of titanium or titanium alloy.

31161500 Screws

Commodity	Commodity Title	Definition	Synonyms
31161501	Cap screws		
31161502	Anchor screws		
31161503	Drive screws		
31161504	Machine screws		
31161505	Set screws		
31161506	Sheet metal screws		
31161507	Tapping screws		
31161508	Wood screws		
31161509	Drywall screws		
31161510	Captive screw		
31161511	Locking screws		
31161512	Thread rolling screws		
31161513	Flathead screws		
31161514	Weld screws		
31161516	Thumb screws		
31161517	Shoulder screws		
31161518	Socket screw		
31161519	Elevator bucket screw	A metric screw (DIN 15237) with a large head diameter, zinc plated as standard or stainless, and with bolt hex nut small.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31161520	Hexagonal head screw	A screw with hexagonal head that follows DIN standard numbers like 931, 933 or 961.	
31161521	Carriage screw	A mushroom-shaped head screw with a square neck, made of steel or stainless steel, this screw is under the DIN standard number 603, it usually includes a hex nut.	
31161522	Eye screw	A screw that is characterized by the hole in the head, it accomplishes the DIN 444 standard.	
31161523	Wing screw	Steels screws easy to recognize because of the flat wing head, with that head we can screw with hands, this screw is in accordance with the DIN 316 standard.	
31161524	Decorative screw	A special kind of screw that has an extra function, decorate, it is available in several forms and colors.	
31161525	Screw for plastic	A specialized fastener for connecting plastic materials.	
31161526	Concrete screw	A type of fastener designed for use with composite materials such as concrete.	
31161527	Hammerhead or T screw	A fastener with a T-shaped square neck.	
31161528	Self drilling screw	Externally-threaded fastener with a self-drilling point that drills, taps and fastens.	
31161529	Jack screw	A mechanism that uses a long threaded rod to position a matching nut at any position along its length.	
31161530	Grub screw	A type of set screw having no projecting head. Its top is either slotted or provided with a socket.	
31161531	Lead screw or power screw	A leadscrew is a screw specialized for the purpose of translating rotational to linear motion.	
31161532	Allen screw	Type of screw whose head has a hexagonal socket.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31161533	Washer assembled screw	A screw that is rolled after assembling the washer onto the machine screws to secure the washer not to be loosened from the small screws.	
31161534	Trapezoidal thread screw	A screw that has a trapezoidal shape for the cross section of screw thread.	
31161535	Acoustical lag screw	A screw with a sharp point and wood screw threads and a hole on the flat end. It can be driven with a driver tool, or installed using an adjustable wrench or pliers. They are ideal for tie-down and tie-wire applications. Commonly found in suspended ceiling installations. They can also be used for wire guiding and hanging pipe, fixtures and more.

31161622	Shear bolt	Fastening device designed to provide a permanent one way fastening.	
31161623	Cable bolt	Used in underground mining applications to support roof.	
31161624	Resin bolt	Bolts used to support roof in underground mining.	
31161625	Railway track bolt	Bolts used to fasten railroad track to the ties.	
31161626	Sems bolt	A bolt with a washer capture on the shank of the bolt between the threaded portion and the bolt head.	
31161627	Bolt assembly	A mechanism consisting of a threaded bolt with various head configurations and including other components such as sleeves, expansion devices, etc.	
31161628	Square head bolt	A bolt with square shaped head.	
31161629	Round head bolt	A bolt with a round head shape.	
31161630	Blank bolt	A semi finished product that is designed to meet the special dimensions of user. If needed, the length may be extended with the outline forming, boring, threading and welding, and others.	
31161631	Shoulder bolt	A product having the head with a covering metal sheath that enables the bolt to move, slide, and pivot.

31161632	Rock bolt	A bolt used to support and reinforce rock for mine shaft, tunnel, underground utility pipe conduit, cutting sloping side. It is placed by drilling a hole in the rock rocks around the mine shaft and tunnel and placing the bolt on the holes.	
31161633	Stove bolt	A bolt which is supplied with the screw that is inserted with the nuts including the hexagon nuts for tightening together with the machine screw.	
31161634	Over neck bolt	A bolt that has an elliptical neck under the head. This bolt has the head with the nominal diameter.	
31161635	Washer assembled bolt	A machine bolt that has is assembled with the washer that cannot be separated for one or more thereof.	
31161636	Welding bolt	A bolt that has an external screw. The screw part has small protrusions above and below the head for welding.	
31161637	Socket head bolt	A bolt that has a cylindrical head with the hexagon groove on the back of the head.	
31161638	T bolt	A bolt that has a T shaped head.	
31161639	Hanger bolt	A headless bolt that is designed to connect a round bar and hanger to tie up to the ceiling.	
31161640	Hook bolt	A bolt that has a hook shaped head.

31161730	Square nuts		
31161731	Weld nuts	Weld nuts have a projection for spot welding. It is classified by function.	
31161732	Half moon nut	A metal fastener largerr than the standard nut with a central, threaded hole that is designed to fit around and secure a bolt or a screw as well as part of the surface where it is placed.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31161733	T nut or T slot nut	A type of fastener in the shape of a T with a central threaded hole that is designed to fit around and secure a bolt or a screw leaving a flush surface.	
31161734	Slotted round nut	A type of fastener round in shape with a slot in its main diameter.	
31161735	Cage nut	A special kind of fastener that is used for square hole racks. It can be of several types: cylindrical, normal, to level out, clip or frontal assembly.	
31161736	Decorative nut cap	A fastener whose form or color is decorative as well as functional.	
31161737	Shear nut	Fastening device designed to provide a permanent one way fastening.	
31161738	Keps nut or K nut	Also called a K-nut or washer nut. It is a nut with an attached, free-spinning washer used to make assembly more convenient	
31161739	Weld or clinch nut	A nut welded or mechanically attached to a metal part for the purpose of joining multiple parts.	
31161740	Bolt nut	A combined component used to tighten down on the bolt shaft.	
31161741	Internal wrenching nut	A cylindrical shaped nut that has the inner part processed in spline shape to use the opposite sides of the bearing side as used with the insertion wrench.

31161818	Seal washers		
31161819	Washer kits		
31161820	Spherical or domed washers		
31161821	Tapered washer	A washer made of steel or stainless steel for use with channel sections.	
31161822	Tooth lock washer	A type of lock washer that has teeth around either the inner or outer perimeter of the washer to reduce vibration.	
31161823	Fender washer	A type of washer that is much larger in diameter than the bolt with which it is used. This gives the washer the ability to distribute the bolt force over a wider area.	
31161824	Roof bolt washer	Large washers used in conjunction with roof bolt to support roof in underground mining.	
31161825	Belleville washer	A type of non-flat washer with aslight conical shape which gives the washer a spring characteristic.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31161826	Notched washer	A type of washer generally used with a key to prevent rotation of the washer relative to the shaft.
31161827	Clipped washer	A type of washer used when there is not enough room for a standard washer and also the washer will not rotate.
31161828	Slotted washer	A type of washer having a wide range of flexibility without creating a heavy load build up.
31161829	Retaining washer	A type of washer used in applications requiring pre-assembly of the screw and washer, to reduce final assembly cost.
31161830	Wave washer	A type of washer designed to offer a compensating spring force and maintain a load or take up shock.
31161831	Finger spring washer	A type of washer designed to reduce noise and vibration and to prevent excess wear especially at high speeds.
31161832	Countersunk washer	A type of washer that provides the same function as a flat washer except when used with flat head screws. In this case, it provides a sealing function for flat head screws used in a countersunk hole.
31161833	Bonded washer	A type of washer that acts like a simple pressure gasket providing leak-proof sealing from water, gases, oils and other fluids.
31161834	Cup washer	A type of washer designed to protect the head of a metal screw from electrical contact.
31161835	Tab washer	A type of thin metal washers designed with two or more tabs which project from the outside diameter.
31161836	Anchor plate washer	A type of washer with a large plate connected to a tie rod or bolt.
31161837	Split washer	A type of washer that helps keep a screw from backing out due to vibration.

UNSPSC Codeset

UNSPSC v16_0901

31162903	Screw clamps		
31162904	Wire rope clamps		
31162905	Beam clamps		
31162906	Hose or pipe clamps		
31162907	Extending clamp	A device used to join, support or compress mechanical or structural parts. One or both arms of the clamp are adjustable to accommodate the size of the workpiece.	
31162908	Miniature clamp	A type of clamp designed for use with small workpieces or used in small spaces.	
31162909	Isophonic clamp	A type of clamp designed to be used on hoses and pipes to reduce sound vibrations.	
31162910	Drill clamp	A type of holding device designed to keep drilling tools in place and immobile. It can include claws for better support.	
31162911	Hand screw clamp	A type of clamp also known as 'toolmaker's clamp' that is used mainly in metalwork. The adjustable jaws will fit angled material.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31162912	Sash clamp	This type of clamp has a flat bar with a fixed jaw that adjusts with a screw action and a sliding jaw that is locked in position along the bar to suit the job being undertaken.Used for big tasks such as sash windows, table tops, doors etc.	
31162913	Bench clamp	A type of clamp designed to fit workbenches with holes 18-38mm.	
31162914	Web clamp	A type of clamp with a nylon band that wraps around the object and is tightened with a ratchet.Can be used with corner gripping pieces so that pressure is evenly distributed.	
31162915	Miter clamp	A type of clamp designed for gripping two pieces of material with mitered ends at right angles. There are two types: internal (upper) or external (lower).	
31162916	Quick action clamp	A type of hand operated clamp designed for quickly and easily clamping all kinds of workpieces. It has a single finger release.	
31162917	Quick grip clamp	A type of clamp designed for one-handed operation with adjustable pressure.It is best for thin pieces as the jaws do not close squarely.	
31162918	Power clamp	A type of clamp that applies maximum force in a single movement.	
31162919	Speed clamp	A type of clamp comprised of a metal bar with serrations.As clamping pressure is applied the serrations lock and secure the sliding head.	
31162920	Picture frame clamp	A type of clamp designed to hold the mitered corners of picture frames.

31163004	Miniature couplings		
31163005	Coupling sleeves		
31163006	Grid coupling	Coupling that uses a serpentine grid to connect two hubs.	
31163007	Chain coupling	Coupling that uses double roller chain to connect two hubs.	
31163008	Disc coupling	Coupling that uses one or more disks or disk packs to connect two hubs via staggered pins.	
31163009	Rigid coupling	Solid couplings that rigidly connect two shafts together	
31163010	Spider coupling	A connecting device used on shafts of rotary machines to make connections. It is star or spider shaped, elastic but very resistant.	
31163011	Jaw coupling	A type of coupling device that requires no lubrication and has no metal to metal contact.	
31163012	Coupling half	A type of coupling for interconnecting fire or other hose to a reciprocal connection mounted on another hose or on a fixed object.	
31163013	Shaft coupling	A device for providing a connection, readily broken and restored, between two adjacent rotating shafts.	
31163014	Rotary coupling	A type of coupling designed to eliminate the use of seals in rotating and reciprocating machines such as seal-less pumps and pistons.	
31163015	Oldham coupling	A type of coupling consisting of a pair of disks, one flat and the other hollow, both pinned to the ends of the shafts. A third, center disk with a pair of lugs projecting from each face of the disk fits into the slots between the two end disks and enables one shaft to drive the other shaft.	
31163016	Rod coupling	A double-pin-thread coupling used to connect two drill rods.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31163017	Coupling rod	A device that connects the drive wheels of a locomotive.	
31163018	Bellows coupling	A type of flexible coupling designed to transmit torque while permitting some radial and axial and angular misalignment.	
31163019	Magnetic coupling	A type of coupling designed to transmit rotational and/or linear motion without direct contact using a magnetic field.	
31163020	Flange coupling	A type of coupling having two separate cast iron flanges. Each flange is mounted on the shaft end and keyed to it.	
31163021	Universal flexible coupling	A type of coupling where the angular or offset misalignment of the shaft reaches values which cannot be accommodated by flexible couplings.	
31163022	Clamp coupling	A type of coupling sometimes called a compression coupling or a ribbed coupling. It is a modification and an improvement on the sleeve coupling.	
31163023	Muff coupling	A type of device that has two shafts to face and fit together within a cast iron or cast steel cylinder and is bound with keys. This device is the simplest coupling to use if the axis diameter and the load for conveyance are very small.	
31163024	Flange type flexible coupling	A coupling that drills the diameter of the bolt hole of the main body of the flange slightly large to permit the deviation of the shaft center in a way of inserting the bush and convey the power by fixing the flange with the bolt.	
31163025	Split muff coupling	A coupling that holds the clamp of two semi cylindrical shapes with the bolt.	
31163026	Half lap coupling	A coupling that secures the common key by overlapping at both ends to make slightly larger and sloped within the muff.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31163027	Roller chain coupling	A coupling that tightens the two lines of roller chain to fit at the end of both axes attached to the sprocket to deliver the driving force.	
31163028	Grid type flexible coupling	A coupling that has the structure to deliver power by inserting the grid to the grooves that are paved on the hub.	
31163029	Friction clip coupling	A coupling that is tightened by pounding at both ends of the soft steel ring. After covering the connection part of both axes has the cast iron split muff with the surrounding conical shape.	
31163030	Dura flex coupling	A coupling that is formed with two elements of urethane rubber and metal hub that may permit the eccentricity between axes. It has outstanding oil-free and chemical resistance properties.	
31163031	Sellers coupling	A coupling that tightens the conical shaped wedge with the slit between the two axes and uses the friction force with the shaft by the tightening of the taper the bolt.	
31163032	Electrical coupling adapter	An adaptor that is used to electrically or physically connect for equipment to equipment, or equipment and other subject.

31163213	Pivot pins		
31163214	Shear pins		
31163215	Grooved pins		
31163216	Cable hanger	Used as a positioning connector (hanger) on a wire rope, it allows the wire rope to be inserted into a cam from only one direction without allowing the rope to slip or pull out. It consists of a metal frame with an eye (loop) at one end and a metal cam inside the frame. Once it is slid on the span of the wire rope, it is connected from the eye end to an anchor.	
31163217	Quick disconnect shaft hub locking bushing	Tapered style shaft hub bushing	
31163218	Bearing adapter sleeve	Tapered adapter sleeves used to mount tapered bore bearings.	
31163219	Cylindrical pin	A fastening device employing a shaft to connect two materials while enabling their movement.	
31163220	Pin assortment set	A collection of different types of pin fasteners packaged and sold together.	
31163221	Panel pin	A small slender pin with a very small head, mainly used for attaching plywood or hardboard to supports.	

UNSPSC Codeset

31163222	Square key	Square key is of uniform cross-section and used for power transmission.	
31163223	Rectangular key	Rectangular key is of rectangular cross-section and is used for power transmission.	
31163224	Taper key	Taper keys is of unifom width and height and is tapered. ált is used for power transmission.	
31163225	Gib head key	A type of power transmission device similar to the square key.	
31163226	Circlip	A type of spring ring, but smaller, that has a hole at either end for receiving the pins of special pliers.	
31163227	Flinger	A ring which is either machined around a shaft or fixed on it.	
31163228	Split ring	A ring with overlapped or interlocked ends which may be sprung apart so that objects, as keys, may be strung upon the ring or removed from it.	
31163229	Metal retaining clip	A fastener made of metal used to secure the parts of a chain.	
31163230	Plastic retaining clip	A fastener made of plastic used to secure the parts of a chain	
31163231	Pipe retaining collar	A round plate that has the shape of flange joined with the bolt to tighten the rubber ring to maintain the air-tightness of pipe joint in the cast iron pipe and polyethylene pipe.

31171529	Bearing cups		
31171530	Cam follower bearing		
31171531	Angular contact bearing	Ball bearing that will accept radial loads as well as axial loads in one direction.	
31171532	Self aligning bearing	Ball bearing having two rows of balls with a common sphered raceway in the outer ring.	
31171533	Take up bearing and frame	Mounted bearing to be used in adjustable frames.	
31171534	Tapped base bearing	Mounted bearing having tapped holes in its base for attachment.	
31171535	Cartridge bearing	Bearing having the same properties as radial ball bearings except a wider width.	
31171536	Insert bearing	Bearing designed to be mounted into housing.	
31171537	Combination bearing	Bearing having both ball and roller bearings, one to take thrust load while the other accepts radial load.	
31171538	Four point bearing	Single row bearing designed to take radial load as well as axial load in both directions.	
31171539	Bearing ball	A principal component in a bearing that enables the reduction of friction.	
31171540	Bearing needle	An important individual component of a bearing that is sold separately and serves to decrease the friction of the bearing.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31171541	Bearing roller	An important individual component of the bearing that is sold separately, and is used to reduce friction inside the bearings.
31171542	Tensioner bearing	A friction reducing device designed to work with an axle, which it supports, while enabling another attached item to spin, absorbing the tension between the two.
31171543	Flexure bearing	A type of bearing which allows motion by bending a load element.
31171544	Plummer block bearing	A mounted bearing used to provide support for a rotating shaft with the mounting surface on a parallel line with the axis of the shaft.
31171545	Bearing cover	A device that protects a bearing from contamination and loss of lubricant. There are two types: 1/ non-removeable shields or 2/removeable seals that allow the bearing to be cleaned and re-lubricated.
31171546	Reversible bearing	A type of bidirectional bearing having the capability of being reversible.
31171547	Cylindrical bearing	A type of bearing that has high radial capacity. These bearings feature low friction, which permits operation at high speed.
31171548	Bearing withdrawal sleeve	A sleeve that is used to tighten the bearings with the inner diameter of the taper on the cylindrical shaft.
31171549	Jewel bearing	Material that is made for jewelry, like, sapphire, ruby and others, non-magnetic substance with a little loss on torque and friction of bearing for freely rotating equipment by securing the rotating shaft or axle and others of a machine on certain location.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31171550	Combined ball roller bearing	A bearing that is designed for integrated use of needle roller and ball with the space saving-type by having the needle roller receive the load in the radial direction and having the ball receive the load in the shaft direction. This bearing is used for transmission engineering, machine tool and others.
31171551	Oilless bearing	A bearing that is consisted of sleeves made in material of oilless metal that is contained of the firm shaft and lubricant oil which is used in the parts with less load applied. This is mainly used in the small motors, such as the cooling fan for computer.
31171552	Thrust ball bearing	A ball bearing which is used in cases where the load is applied to the shaft direction. This is mainly used for mid- to low speed.
31171553	Thrust roller bearing	A roller bearing which is used in the cases where the load is applied to the axis direction.
31171554	Guide bearing	A bearing that determines the shaft location or undertakes the role to guide the simple linear motion, not a bearing that supports the load applied to the rotating shaft.
31171555	Roller bearing adapter assembly	An adaptor that combines the rolling bearing sleeve and the rolling bearing rock washer. This is the auxiliary part of bearing used to easily tighten the bearings with the tapering on the inside diameter on the cylindrical shaft.
31171556	High performance insert bearing	A bearing for unit that prevents heat, vibration, noise and others which may be generated by high-speed rotation or is designed to display its capability required under the adverse environment of dust-proof, water-proof, heat-resistance, cold-resistance and others.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31171557	Journal bearing bushing	A bearing that supports the radial load that works vertically to the rotating shaft by forming the oil film from the sliding rotation for the bearing and journal.	
31171558	Linear and rotary motion roller	A cylindrical roller that has the hole in the central location in order to accommodate the pin or shaft to combine the push stick, inducement device, joint, rocker arm, rotation table or horizontal bar.	
31171559	Lock plate for roller bearing	A detent that is used for rolling bearing. It undertakes the roll to prevent the rotation of nuts for adaptor and shaft and it is used for the inside diameter number 44 or higher.	
31171560	Locking snap ring for roller bearing	A ring that is designed to secure the shaft-direction location by loading onto the outside diameter of the rolling bearing.	
31171561	Adapter sleeve for roller bearing	A part of an adaptor for rolling bearing that has the external diameter surface of taper and the smaller side to insert the nut. It is used to load onto the cylindrical-shaped shaft with the inner diameter of the taper.	
31171562	Insert bearing with set screw locking	A bearing for unit that has the two fixed screws (grubs or set screws) on the inner collar. This device is appropriate to the device with the changing rotation direction. The inner collar is expanded on both sides and the standard product has two lubricant injection holes on the outer collar.	
31171563	Insert bearing with eccentric locking collar	A bearing for unit that is used for consistent rotation direction. The inner collar is expanded in one or both sides and the standard product has two lubricant injection holes on the outer collar.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31171564	Insert bearing with standard inner ring	A bearing for unit that is appropriate to the high-speed device with changing rotation direction. The width of inner collar and outer collar is the same and the standard product has two lubricant injection holes on the outer collar.

31211510	Polyurethane primers		
31211511	Urethane primers		
31211512	Latex primers		
31211513	Marking paint	Also called inverted marking paint. Used in surveying, sports, construction and highway engineering to mark ground surfaces.	
31211514	Cold galvanizing compound	A compound applied to bare clean steel for excellent corrosion protection. This coating was originally developed to prevent bare steel structures from rusting when exposed to the elements.	
31211515	Solvent based paint	Paint containing a volatile solvent carrier	
31211516	Baked finish paint	A paint that is made to form the paint coat by heating after applying the painting. This paint is mainly used for industrial use as home appliance and others.	
31211517	Pattern finish paint	A type of paint that has the special denatured alkyd as the main ingredient. It forms the paint film with the beautiful dimensional pattern, and it is appropriate for finishing coat for plastering of various metal parts.	
31211518	Anti rust paint	A type of paint that is made with the raw materials of rust resisting pigment and synthetic resin. This is used with the primer for rust-proofing and repairing of construction iron materials and steel structures.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31211519	Aluminum paint	A type of paint that has the main ingredients of petroleum type synthetic resin and aluminum pigment. The product has strong adhesion, durability and anti-corrosion, outstanding weatherability and moisture resistance, and it is the paint appropriate to the steel-material facilities for the purpose of reflection of hot wire, prevention of moisture penetration and others.	
31211520	Antifouling paint	A paint for final application on the surface exposed to the body of a ship and sea water.	
31211521	Ready mixed paint	A dry oil paint that is used in the wooden material surface, metal surface, plywood, steel frame and others. The main ingredients are coloring pigments, body pigments, dry oil, alkyd resin varnish and others, and this paint liquefied them with sufficient mixed dispersion.	
31211522	Heavy duty coating	A paint that is used for the long-term conservation of steel structures, such as bridge, marine structure, power plant, various plants, ships and others which has special environment of the plant area and the coastal area that inflict severe corrosion to the steel structure, unlike general structures.	
31211523	High temperature paint	Type of paint specially formulated for resisting high temperatures, such as: heaters, furnaces, chimneys, reactors, heat ducts, etc.

31241807	Visual filters		
31241808	Dichroic filter	A dichroic filter or thin-film filter is a very accurate color filter used to selectively pass light of a small range of colors while reflecting other colors	
31241809	Lyot filter	A type of optical filter named for its inventor Bernard Lyot, that uses birefringence to produce a narrow passband of transmitted wavelengths.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

31241810	Gelatin filter	A representative optical absorption filter that is from the colored filters that penetrates the specific wavelength and absorbs the other wavelengths. It is made by forming the thin film on the glass substrate with the organic pigment dissolved in the gelatin solution.	
31241811	Color filter	A filter that absorbs the opposite color that the filter has among three primary colors of light and emphasizes the color of the subject similar to the filter color and makes the other different colored subject darker.	
31241812	Polarizing filter	A filter that is used to change the natural light to the polarized light or detect the polarized light. This filter undertakes the role to minimize the reflection.	
31241813	Reflection filter	An optical filter that reflects only the light of specific wavelength.	
31241814	Suction filter	A filter that is used generally in selecting the radiant light stripe of the area of visible rays. This filter absorbs the light of specific wavelength to limit the radiant light.	
31241815	Interference filter	A filter that filters the wave of specific wavelength by using the interference phenomenon that arises on thin film.

Class

Commodity	Commodity Title	Definition	Synonyms
31371201	Dense castables		
31371202	Insulating castables		
31371203	Low cement castables		
31371204	Acid or alkali resistant castable		
31371205	Abrasion resistant castable		
31371206	Sic castable		
31371207	Self flow castable		
31371208	Tabular alumina castable		
31371209	Erosion resistant castable		
31371210	High alumina castable	A powdery castable refractory that is manufactured and kneaded by using alumina silica as the main binding agent (50% or more). The strength is displayed by the hydration reaction with the added appropriate volume of moisture.	
31371211	Fire clay castable	A powdery castable refractory with the main raw materials in fire clay, agalmatolite or others. The strength is displayed by the hydration reaction with the addition of appropriate volume of moisture.	
31371212	Special service castable	A castable refractory that is used for special purposes. This is used to provide outstanding erosion resistance, abrasion resistance, spalling resistance and high strength on special parts of boiler interior, kiln, steel manufacturing, induction furnace and others.

31411601	Rubber die cut seal	Seal produced by cutting rubber sheet materials using punches and dies to achieve desired perimeter shapes	
31411602	Foam die cut seal	Seal produced by cutting various open or closed cell foam sheet materials using punches and dies to achieve desired perimeter shapes	
31411603	Plastic die cut seal	Seal produced by cutting plastic sheet materials using punches and dies to achieve desired perimeter shapes	
31411604	Die cut seal kit	Seal kit for seals produced by cutting various sheet materials using punches and dies to achieve desired perimeter shapes	
31411605	Silicone die cut seal	Seal produced by cutting silicone sheet materials using punches and dies to achieve desired perimeter shapes	

Class

Commodity	Commodity Title	Definition	Synonyms
31411701	Pusher mechanical seal	A mechanical seal utilizing a dynamic secondary seal or o-ring that is responsible for sealing the fluid path between the pump shaft and the inside diameter of the rotating seal face.	
31411702	Bellows mechanical seal	A non pusher design that does not move along the shaft or sleeve to maintain seal face contact. The bellows itself provides the necessary spring loading for seal face contact.	
31411703	Mechanical seal kit	Seal kit for seals designed to prevent leakage between a rotating shaft and its housing.	
31411704	V ring seal	Seal mounted on shafts allowing their thin, tapered V flanges to seal against a surface at right angles to the shaft	
31411705	Lip seal	An annular shaft seal for sealing against oil which is flexible and uses an interference fit on the shaft and deformation stress to maintain the seal.

Class

Commodity	Commodity Title	Definition	Synonyms
31411801	Welded diaphragm seal	A type seal welded or bonded directly to the upper housing, permitting removal of the upper housing without a loss of fill fluid	
31411802	Clamped diaphragm seal	A type seal clamped between the upper and lower housing allowing it to be removed and replaced easily	
31411803	Capsule diaphragm seal	A type seal that is internally sealed, with the fill fluid within the capsule in the upper housing	
31411804	Rubber diaphragm seal	A type seal produced by molding or extruding rubber to the desired configuration	
31411805	Fiber reinforced diaphragm seal	An elastomeric or other polymeric diaphragm seal reinforced with glass, carbon or other fibers	

Class

Commodity	Commodity Title	Definition	Synonyms
31411901	Rubber molded seal	Seal produced from rubber materials by using various molding processes to achieve desired dimensions and features	
31411902	Plastic molded seal	Seal produced from various plastic materials by using various molding processes to achieve desired dimensions and features	
31411903	Precision molded seal	Molded seal produced from engineered materials, using close tolerance tooling to achieve significantly more precise dimensions than typically achieved	
31411904	Rubber on metal or plastic molded seal	A type of seal consisting of rubber molded onto a rigid plastic or metal substrate used to prevent flow of a liquid or gas from one area to another and or to provide physical features	
31411905	Silicone molded seal	Seal produced from silicone materials by using various molding processes to achieve desired dimensions and features

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

32101529	Splitter	An electronic device that consists of an RF signal splitter (power divider) preceded by an RF amplifier that compensates for the RF loss of the splitter. áUsed to allow one antenna to feed several receivers.
32101530	Radio frequency RF combiner	A signal combining network that allows several discrete inputs to be added into a common bandwidth and that has high isolation between inputs. áAlso may be called a power combining network
32101531	Attenuator network pad	This is a passive network of resistors used to reduce signal level.
32101532	Ceramic substrate	A substrate composed of ceramic material used as the platform for an integrated circuit.
32101533	Output transformer	A transformer that is connected to the output of the amplification circuit that uses the transistor or electronic tube and others to change the impedance of external load circuit to the optimum load impedance for transistor or electron tube load.
32101534	Wave trap	A device that attenuates the interfering wave by adding the rejection circuit consisted of high frequency coil and condenser between the receiving antenna and receiver to heighten the selectivity of the receiver.
32101535	Phase modulation circuit	A circuit network that makes the phase modulation wave with the phase changes, and simultaneously, the amplitude is also changed that it is refined with certain amplitude through the amplitude limiter and synthesizes the phase modulation circuit by the vector synthesis to the modulation wave with the changing size.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

32101536	Phase unbalance and power factor compensator	A device that makes automatic compensation for the power factor and maintains the phase equilibrium for power to control the active power of electricity and reactive power and frequency harmonic.	
32101537	Synchro repeater	A repeater that receives the video signal of the transmitter to convert its channel to re-send, and when converting the channel from several relay sites for same program, it is converted to the same transmission channel for re-sending.	
32101538	Impedance stabilizer	A type of device that is used to combine the two circuits to maintain the impedance in certain ratio at the wideband frequency.	
32101539	Frequency selector	A device that operates the signal apparatus by using the signal current of several different frequencies, such as responding only by the resonant on specific frequency, automatically identifying the interval of wireless frequency signals, and others.	
32101540	Resolver	A rotation device that is used to detect the rotation angle from the servomechanism.	
32101541	Synchro transmitter	A synchronized electric device that transforms and transmits the location signal of the mechanical rotation angle in proportion to the output electric signal.	
32101542	Synchro receiver	A synchronized electric device that receives the location signal of the mechanical rotation angle and transforms the above in proportion to the output electric signal.	
32101543	Gauge controller and indicator	A type of device that controls the gauge by adjusting the output with the comparison of pre-determined value for the signal received from the sensor or mark the value measured by attaching to the gauge.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

32101544	Frequency oscillator	A device that generates the vibration voltage with the desired frequency by using the direct current as the power.	
32101545	Antenna coil	A component that is connected to the device that radiates the electromagnetic wave into the space or captures the radiated electromagnetic wave.	
32101546	Frequency multiplier	A device obtained with the output of frequency as the multiplier of input frequency.	
32101547	Limiter	A single component that is used for vacuum tube, semiconductor element or metal rectifier. And this product removes the noise signal for the radar or wireless receiver.	
32101548	Discriminator	A circuit to take out the original signal wave from the frequency modulation wave or the phase modulation wave, respectively.

32101636	Digital Signal Processor DSP		
32101637	Network Processors		
32101638	Application specific integrated circuit	A type of integrated circuit customized for a specific purpose.	
32101639	8 bit microcontroller	A microprocessor on a single integrated circuit intended to operate as an embedded system.	
32101640	16 bit microcontroller	A microprocessor on a single integrated circuit intended to operate as an embedded system.	
32101641	Low end digital signal processor DSP	A specialized microprocessor designed specifically for digital signal processing,	
32101642	32 bit midrange microcontroller	A microprocessor on a single integrated circuit intended to operate as an embedded system.	
32101643	Programmable logic integrated circuit	An electronic component also called a programmable logic device (PLD) used to build reconfigurable digital circuits.	
32101644	High end digital signal processor DSP	A specialized microprocessor designed specifically for digital signal processing,	
32101645	32 bit high end microcontroller	A microprocessor on a single integrated circuit intended to operate as an embedded system.	
32101646	NOR parallel flash memory	A type of flash memory. Flash memory is a non-volatile computer memory that can be electrically erased and reprogrammed. It is a technology that is primarily used in memory cards and USB flash drives for general storage and transfer of data between computers and other digital products.	
32101647	NOR serial flash memory	A type of flash memory. Flash memory is a non-volatile computer memory that can be electrically erased and reprogrammed. It is a technology that is primarily used in memory cards and USB flash drives for general storage and transfer of data between computers and other digital products.

UNSPSC v16_0901

1/27/2014

32121510	Gas capacitor	A capacitor that uses the gas as the dielectric substance.	
32121511	Oil capacitor	A capacitor that uses the oil as the dielectric substance. This device enables for consecutive change for capacitance by mechanical method that the capacity value is adjusted.	
32121512	Mica capacitor	A capacitor that has thin plate reproduced in natural condition of mica plate or mica piece as the dielectric body.	
32121513	Vacuum capacitor	A capacitor that uses the vacuum condition as the dielectric substance.	
32121514	Paper capacitor	A capacitor that uses the paper as the dielectric substance.	
32121515	Metallized paper capacitor	A capacitor that is the dielectric made in paper, plastic or a combination of paper and plastic. This capacitor is coated with the metal membrane on top.

32131010	Bare printed circuit boards		
32131011	Integrated circuit lids		
32131012	Sputtering targets		
32131013	Photo mask		
32131014	Bare flexible printed circuit board	Rigid or flexible printed circuit boards without mounted electronic components.	
32131015	Single sided bare printed circuit board	A type of printed circuit board with conductors on one side but no components.	
32131016	Double sided bare printed circuit board	A type of printed circuit board with conductors on both sides but no components.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

32131017	Multilayer bare printed circuit board	A type of printed circuit board with no components, consisting of several thin boards, separated by insulating layers and including required internal and external connections.	
32131018	Heavy layer copper bare printed circuit board	A type of printed circuit board with a heavier than normal layer of Cu, greater than 200 microns in thickness, with no components; used in applications of high power distribution, heat dissipation and the like.	
32131019	Electroplated gold layer bare printed circuit board	A type of printed circuit board without components, which has undergone an electrolytic process to deposit gold pads.	
32131020	Assembled flexible printed circuit board	A type of printed circuit board using a flexible plastic substrate and having components assembled to it.	
32131021	Low temperature co fired ceramic substrate	Multilayer structure to provide the connections for electronic circuits, similar to printed circuit boards, that are joined just prior to firing. It is fired at lower temperatures allowing co-firing with conductive materials such as silver and gold and allowing the inclusion of components such as resistors into the package.	
32131022	Ceramic for printed circuit board PCB substrates	Various ceramic materials used in the manufacture of Printed Circuit Board substrates.	
32131023	Electrical or electronic device holder	A holder that seals off or holds the electric or electronic device or component.

32141009	Photo tubes		
32141010	Photo multiplier tubes		
32141011	Camera or television pickup tubes		
32141012	Diode tubes		
32141013	Triode tubes		
32141014	Tetrode tubes		
32141015	Pentode tubes		
32141016	Multiple valve tubes		
32141017	Counter tube	A type of device that measures the individual particles of radiation one at a time.	
32141018	Beam output tube	A power tube that is centered on the eyes of Grid No. 1 and Grid No. 2 from the tetrode. This is the output tube for power amplification like the pentode.	
32141019	Microwave electron tube	An electronic tube that uses the principle that there is a change of density in an area with certain distance when a speed change is made to the electron with weak electric wave, and as the external circuit is placed, the strong electric wave is to be derelict.	
32141020	Frequency converting tube	A vacuum tube for frequency conversion that undertakes both actions of local oscillation and mixture together in a single vacuum tube.	
32141021	Rectifier tube	An electron tube that is used as the rectifier that uses the rectification feature of electronic current.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

32141022	Voltage regulator electron tube	An electronic tube which is to maintain the voltage of power, such as power generator and others, within the limit required regardless of change in input voltage or load change.	
----------	---------------------------------	---	--

Class

Commodity	Commodity Title	Definition	Synonyms
32152001	Distributed control packaged system DCS	A process control system that uses a network to interconnect sensors, controllers, operator terminals and actuators. Generally very large and costly, a DCS typically contains several computers at multiple locations for control and uses proprietary interconnections.	
32152002	Supervisory control and data acquisition packaged system SCADA	A process control system that collects data from sensors and or machines and sends them to a central computer for management and control. Common components include human to machine interface HMI, remote terminal unit RTU and programmable logic controller PLC.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

32152003	Safety instrumented packaged system SIS	A process control system that performs specified functions to achieve or maintain a safe state of the process when unacceptable or dangerous process conditions are detected. It is separate and independent from regular control systems but is composed of similar elements, including sensors, logic solvers, actuators and support systems.

39101612	Incandescent lamps		
39101613	Infrared lamps		
39101614	Metal halide lamp HID		
39101615	Mercury vapor lamp HID		
39101616	Ultraviolet UV lamps		
39101617	High pressure sodium lamp HID		
39101618	Neon lamps	A lamp consisting of a discharge tube containing neon gas at low pressure. The lamp is constructed by mounting two electrodes within a small glass envelope. Two wire leads made of tin plated Dumet metal are brought out of the lamp to make electrical connection.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39101619	Compact fluorescent CFL lamps	Compact fluorescent lamps (CFLs) are smaller versions of standard fluorescent lamps, consuming between 5 to 40 watts. Unlike standard fluorescent lamps, they can directly replace standard incandescent bulbs.	
39101620	Induction lamp		
39101621	Low pressure sodium lamp HID		
39101622	Miniature lamp		
39101623	Sealed beam lamp		
39101624	Black light	A lamp that emits long wave UV radiation and very little visible light.	
39101625	Xenon lamp	A lamp that employs xenon gas to add in the life span of the light source.	
39101626	Krypton lamp	A lamp that employs Krypton gas to add in the life span of the light source.	
39101627	Arc lamp	Lamp that uses light emission of arc generated when current flows between electrodes.	
39101628	Light emitting diode LED lamp	Lamp using light emitting diode or LED technology, available in linear or bulb form. It can come with embedded converter or external converter. Separate lamp is needed for lighting.	

Class

Commodity	Commodity Title	Definition	Synonyms
39101801	Lamp filament		
39101802	Lamp glass		
39101803	Lamp base		
39101804	High pressure sodium lamp ignitor	A device that provides a high voltage potential to excite the sodium gas within the bulb to ignite it.	
39101805	Metal halide dry capacitor	Dry capacitor for probe start metal halide lamps.	
39101806	High pressure sodium lamp dry capacitor	Dry capacitor for high pressure sodium lamps.

Commodity	Commodity Title	Definition	Synonyms
39111501	Fluorescent fixtures		
39111503	Wall fixture	Sconces, bathroom light strips.	
39111504	Stage or projection or studio lighting system		
39111505	Recessed lighting		
39111506	Chandeliers		
39111507	Desk fixtures		
39111508	Track lighting		
39111509	Floor lamp fixture		
39111510	Table lamp fixture		
39111512	Laboratory task light	Light used in laboratories to clearly focus on certain lab tasks.	
39111515	Downlighting fixtures		
39111520	Halogen lighting fixtures		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39111521	Decorative ceiling or flush mount fixture	An ornate or flush mount ceiling light fixture.	
39111522	Pendant lighting		
39111524	High intensity discharge HID fixture		
39111525	Incandescent fixture		
39111527	Solar lighting fixture		
39111528	Undercabinet fixture	A lighting fixture that is attached underneath a cabinet bottom.	
39111529	Lighting gobo	A thin circular plate with holes cut in it to create patterns of projected light.	
39111530	Commercial downlighting fixture	A lighting fixture that may be employed in inclined ceiling applications.	
39111531	Commercial downlighting trim	Trim and accessories employed with commercial downlighting fixtures.	
39111532	Fluorescent high bay fixture	Fluorescent light used for large scale (area) commercial applications.	
39111533	Fluorescent strip	Fluorescent light fixture in the shape of a rectangular strip used in commercial and industrial applications.	
39111534	Lensed troffer	A specialized lighting fixture used mostly for suspended ceiling and recessed lighting situations.	
39111535	Parabolic fixture	Parabolic light fixtures are open cell lights recessed into the ceiling. They offer a sharp cut-off level, meaning that light can be focused directly downward more effectively than with older prismatic fixtures.	
39111536	Vanity lighting	Lighting used for or in conjunction with vanities.	
39111537	Sports lighting fixture	Lighting fixture used to illuminate sporting events.	
39111538	Garage or canopy lighting fixture	Lighting fixtures used in garages or on canopies.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39111539	Lighting box	Rectangular shaped or circular shaped box sunk into the upper portion of the ceiling in order to install lighting in rooms or living room of residential unit, building and apartments.	
39111540	Auto lift lighting system	Lighting system that enables indoor lighting devices to move up and down vertically, and used for the purpose of making maintenance and repair of lighting apparatus safer and easier.	
39111541	Interior lighting fixture accessory	Includes accessories, fasteners, replacement parts, and ancillary items.	
39111542	Magnifying lamp	A type of lamp that provides an increased area of vision and brightness for the user. Intended for work on small things where the need for magnification exists, for example electronic components, small items in crafts, hobbies and reading.	
39111543	Bath fan with light	An exhaust fan with an integrated light fixture used in a bathroom or restroom application.	
39111544	Light emitting diode LED fixture	Lighting fixture that contains Light Emitting Diode LED technology, an energy efficient lighting source alternative to other lighting sources, e.g. fluorescent, halogen, HID, incandescent, solar, etc.	LED Fixtures

Class

Commodity	Commodity Title	Definition	Synonyms
39111603	Roadway or highway lighting		
39111605	Landscape lighting	Lighting used in landscape settings.	
39111606	Underwater lighting		
39111608	Residential street lights		
39111609	Lighting pole or post and hardware	The pole or post and associated hardware used for free standing elevated light fixture placement.	
39111610	Flashlight	A handheld portable light.

1/27/2014

39111611	Flood light	An artificial light providing even illumination across a wide area.	
39111612	Area lighting	Lighting done for external large areas.	
39111613	Security lighting	Lighting specifically placed to enable security measures at a location.	
39111614	Mailbox lighting fixture	Lighting fixtures used to illuminate mailboxes.	
39111615	Ingrade lighting	Lighting fixtures flush mounted in the ground in order to illuminate trees, buildings and other structures in an unobtrusive manner.	
39111616	Outdoor lighting accessories	Components and parts used with outdoor lighting fixtures.	
39111617	Renewable energy street lighting	Lighting used from electric energy which is stored from an electric condenser after being converted from a renewable energy source: solar, wind, or water power. It is usually used on the street or in the park.	
39111618	Sports lighting system	Complete engineered lighting system for sports field consisting of precast concrete base, one or more steel pole sections designed to mate with base and adjoining pole section, electrical components enclosure to house components for luminaire power and control, wire harness with plug-in connectors, and one or more factory-aimed luminaires.	
39111619	Large area lighting system	Complete engineered lighting system for non-sport related large areas consisting of precast concrete base, one or more steel pole sections designed to mate with base and adjoining pole section, electrical components enclosure to house components for luminaire power and control, wire harness with plug-in connectors, and one or more factory-aimed luminaires.

39121025	Buck boost transformer		
39121026	Control power transformer		
39121027	Encapsulated transformer		
39121028	Harmonic mitigation transformer		
39121029	Isolation transformer		
39121030	Pad mount transformer		
39121031	Power supply outlet strip		
39121032	Current transformer	A current transformer (CT) is a type of instrument transformer designed to provide a current in its secondary winding proportional to the current flowing in its primary winding.	
39121033	Potential transformer	A potential transformer (PT) is a type of instrument transformer designed to provide a voltage in its secondary winding proportional to the voltage in its primary. They are commonly used in metering and protective relaying in the electrical power industry where they facilitate the safe measurement of voltages	
39121034	Zero phase current transformer	The current transformers used to prevent malfunction of a ground relay for electric power distribution. The current generates through the process in which 3-level conductors pass through an iron core with the secondary coil wound on it, which produces magnetic balance.	
39121035	Motor starting compensator	A device used to operate large scale load motors by connecting a motor terminal to the center tap of an autotransformer.	
39121036	Radio frequency RF transformer	A transformer designed to transfer radio frequency energy from one circuit to another by means of a magnetic field. This differs from a power transformer.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39121037	Limiting transformer	Transformer used when boosting or stepping down voltage for application in households, offices or others, and used for small capacity devices.	
39121038	Deflecting yoke	An electromagnetic force generation device that is located around cathode-ray tube electron gun of television, and undertakes the role to deflect the electronic beam discharged from the electron gun to up, down, right and left direction.	
39121039	Fuel cell power supply	Electric power generation equipment that generates electricity by using the energy obtained through electrochemical reaction between hydrogen acquired through reforming of fuel such as natural gas, methanol, coal gas and others and atmospheric oxygen.	
39121040	Electric power saver	A device that reduces electric power consumption by using various electrical mechanisms.	
39121041	Constant voltage transformer	Transformer used for computer department or precision machine and devices that requires uniform voltage at all times, and has constant voltage device by utilizing the principle of parallel ferro resonance.	
39121042	Filament transformer	Transformer for power supply that heats the filament in electron tube, and used in adjusting line voltage.	
39121043	Rotary transformer	Stator amplifier used on rotating magnetic head of videocassette recorder to pick up the signals of videocassette recorder.	
39121044	Audio frequency transformer	Transformer used in conversion of voltage in the audio frequency range.	
39121045	Modulation transformer	A transformer that is used to match the impedance of the coil on secondary output from the amplitude modulation circuit.	
39121046	Matching transformer	Transformer used to match impedance.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39121047	Intermediate frequency transformer	Transformer used to convert input/output impedance as well as to obtain selectivity of intermediate frequency in intermediate amplifier unit.	
----------	------------------------------------	---	--

39121445	Twist on wire connector		
39121446	Wire terminal connector kit		
39121447	Wire terminal disconnect		
39121448	Wire or cable compression connector	A type of connector used to terminate cable and provide strain relief by compressing a rubber bushing onto cable.	
39121449	Wire or cable compression splice	Wire connector that uses compression to piece together splices.	
39121450	Hammer head	Used to connect cables to the distribution transformers.	
39121451	Tap off	Connectors that allow smaller gauge wires to be connected to larger gauge wires.	
39121452	Cable joint	Connectors that join two ends of cable	
39121453	Crab joint	Power distribution blocks that have built in limiters. Power can be connected on one leg and distributed 3 ways, 5 ways or 7 ways.	
39121454	Battery terminal		
39121455	Electrical insertion mold connector		
39121456	Substation connector	Electrical connector used for high voltage purposes in electrical substation circuits.	
39121457	Exothermic connector	A permanent welded connection that fuses electrical connections without the need for an outside power force.	
39121458	Wire or cable compression reducer	A compression connector for joining two cables of different sizes.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39121459	Printed circuit board PCB press fit header connector	Solderless electrical connector employing hand or machine applied pressure to accomplish joining of the mating parts.	
39121460	Filtered header connector	A male, female or combination electrical connector that accepts wire or pin headers and is filtered against electromagnetic or other interference.	
39121461	Connector and cable seal	Seal to protect the connection points of multiple cables.	
39121462	Telecommunication connector	A component that is used for the physical and electronic combination of circuit board or peripheral device that composes the communication equipment.	
39121463	Jack for plug	An electrical component with negative terminus that has been prepared for insertion of plug.	
39121464	Electrical metallic tubing EMT elbow	A piece of non-threaded tubular electrical tubing used to enable a change in direction of the raceway.	
39121465	Flexible braid	Flexible braid with or without ferrules is used for bonding, grounding and connecting moving electrical parts.	
39121466	Mechanical connector lug and cap	Screw cap or port plug used in insulated mechanical connectors.	
39121467	Mechanical connector plug and cap	Screw cap or port plug used in insulated mechanical connectors.	
39121468	Input output connector cover	Protective cover used with electrical plugs or connectors.

1/27/2014

39121630	Fuse clip		
39121631	High voltage oil filled circuit breaker	A type of automatically-operated electrical switch designed to protect an electrical circuit from damage caused by overload or short circuit. Used in power transmission networks involving voltages of 72,500 volts or higher. Uses oil as an arc extinguishing medium.	
39121632	Network protector	Device that protects the transformer from overload and fault conditions.	
39121633	Circuit interruptor	Devices that interrupt a circuit due to an overload or fault current condition.	
39121634	Surge arrestor	Devices that are used to protect the transmission system from high voltage surges. They act as safety valves to limit high voltage surges by reducing voltage to values that will not damage equipment. Protect against lightning damage.	
39121635	Voltage regulator	Device that regulates the amount of voltage that will pass through equipment to protect against damage to that equipment	
39121636	Current limiter	Device that regulates the amount of current that will pass through equipment to protect against damage to that equipment	
39121637	Arc suppressor	Devices used to extinguish electrical arcs	
39121638	Fuse cutout	High voltage fuses designed to protect lines or line equipment in the event of a fault	
39121639	Vacuum interruptor	circuit breakers that are designed for switchgear for medium or high voltage electrical power distribution systems	
39121640	Hydraulic circuit breaker		
39121641	Hook fuse	A fuse with both ends in hook shape.	
39121642	Screw fuse	A fuse that uses fuse link with structure for tightening of screw into fuse holder after having inserted fuse element.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39121643	Surge protector panel	Collection of surge protector and equipment that accommodates such collection installed on distributing board in order to protect exchanger from overvoltage, overcurrent induced to the communication system.	
39121644	High speed circuit breaker	Circuit breaker with high speed of circuit breaking, which can prevent damages to devices as it can completely prevent flashover in the event of short circuit.	
39121645	Oil circuit breaker	A type of circuit breaker that switches on and off electric circuit. It has the circuit breaking part immersed in insulating oil, and it is referred to as the oil circuit breaker or OCB or Oil Circuit Breaker.	
39121646	Gas circuit breaker	Circuit breaker in which cutoff of electrical flow is achieved with special gas such as SF6, that is, an inert gas, as an arc extinguishing medium.	
39121647	Electrostatic discharger	A device designed to be discharge when a prescribed level of voltage is applied in order to prevent facility from overvoltage.	
39121648	Earth additive	Additive used to reduce safety accidents by reducing the resistance of electrical conductor.

1/27/2014

39121708	Din rail	A standardized 35 mm wide metal rail with a hat-shaped cross section. It is widely used, especially in Europe, for mounting circuit breakers and industrial control equipment inside equipment racks.	
39121709	Handle tie		
39121710	Electrical receptacle multipliers		
39121717	Cable tie mounts		
39121718	Cable splicing kits		
39121719	Strain reliefs		
39121720	Transformer handles		
39121721	Electrical insulators		
39121722	Wire and cable pulling device		
39121723	Heat shrinkable tube	A tube which is plasticized by extruding plastics or rubber used for insulation. When heated, it contracts, and thus can insulate wires.	
39121724	Connector mounting hardware	Hardware used for mounting electrical connections.	
39121725	Electrical cable grip	A cable grip that is made of strand or others. It is used in pulling in relatively short cable into pipeline or pit as it is designed to support cables.	
39121726	Electrical cable lasher	A device that is used within overhead line structure designed to rotate the steel wire coil formed around the support line or electrical cable in advance by placing the device on top of the bracing line in order to safeguard and support the cable.	
39121727	Electrical insulator rod	Rod manufactured with special insulation to prevent undesired current flow between conductor and object.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39121728	Insulating tube	Rubber tube that covers the exposed electric conduction portion within the boundaries of work area. It is a device that covers mainly the electric conduction portion in straight line state.	
39121729	Electrical lead set	Two or more of different electrical conducting wire formed into a unified body, and it is possible to use them separately according to the location where each is needed.	
39121730	Electrical rosette	Device to connect and support electric cord, and is generally hung from the ceiling in order to fixate cord onto the ceiling.	
39121731	Cable tie kit	Kit containing multiple sizes of cable ties.

39122003	Servo control drive		
39122004	Inverter drive parts and accessories	Accessories and accessory kits associated with inverter drives.	
39122005	Inverter drive output filter	Electrical filter or choke unit connected to an inverter drive to filter unwanted RFI and EMI.	

Class

Commodity	Commodity Title	Definition	Synonyms
39122101	Cable pothead	Cable potheads are used in substations to terminate the high-voltage, oil-filled transmission cables. As termination points, potheads have two basic functions. One function is to provide an electrical connection between the underground cable and the overhead bus. The other function is to provide a seal or end cap for the dielectric oil system.	
39122102	Tap changer	Devices that regulate the functioning of transformers	
39122103	Utility pole	A column shaped structure that is to support the power transmission line and power distribution line or communication line.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39122104	Guy wire	A galvanized steel wire strand installed for the purposes of reinforcement of strength of supporting structure like electric pole and others and maintenance of equilibrium of unbalanced load.
39122105	Electrical spacer	An insulator inserted between conductors to prevent direct contact between them.
39122106	Brace for crossarm	Fitting used in supporting pole bar of overhead transmission and distribution line and electric pole.
39122107	Wood wiring block	Timber used to attach distributing wire device inside of a house.
39122108	Guy wire anchor rod	Steel rod used at the penetration section of guy. It is used in regions where the grounding section of the earth wire are easily corroded or at locations at which concrete block is used as the guy anchor block.
39122109	Square type steel crossarm	Structure constructed to enable installation of electrical cable by horizontally installing on electric pole to support overhead line, and is also referred to as an arm.
39122110	Connecting washer for electric overhead line	Connecting fitting used for linking of aluminum T BAR on the conduction section of electric overhead line and electric car line.
39122111	Sectioning device on the electric car line	Facility for the purposes of limiting the standstill section in load dispatching and securing of operation of train in other section in the event of occurrence of accidents in sections of electric car line or in the event of routine repair works requiring interruption of service by distinguishing load dispatching system of electric car line.
39122112	Insulator set eye	Component used in insulator set on overhead transmission and distribution line and substation.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39122113	Utility pole crossarm	A crossarm used to install or support electric wire on electric pole.	
39122114	Electrical bus way tap or bus tap	A fitting that is used to divergently connecting electrical cable in electrical wiring. In particular, it refers to the fitting to cross the electrical cable in cross-recessed format.	
39122115	Electrical armor rod	A support cable that is used to prevent the disconnection of electric wire with the strand on the overhead transmission and distribution line. And it is used in combination with the cable joint and suspension clamp.	
39122116	Overhead line link fitting	A metallic rod that has the egg shape that is bent in longitudinal direction to prevent the twist deformation of clamp on the overhead transmission and distribution line.	
39122117	Strain pole suspension yoke	Fitting used to support strain pole that reduces the tension of conductor hung on suspension insulator string by installing at arm.	
39122118	Electrical wire block connector	Equipment used to reduce the magnitude of force or change the direction of force by suspending rope or chain onto wheel.	
39122119	Power transmission steel tower	Tower that plays the role of transmitting electric power generated at the power plant to substation located in the vicinity of region of usage or in the central area of usage that is far away from the power plant.	
39122120	Utility pole band	A band used to attach transformer, guys and others onto the electric pole in the overhead distribution line, and includes the hanger band.

39122226	Rocker switch		
39122227	Joystick switch or control		
39122228	Vacuum switch		
39122229	Temperature switch		
39122230	Proximity switch		
39122231	Combination device switch		
39122232	Combination switch	A switch that is made up of two different types of switches or a switch and single plug receptacle to perform an operation.	
39122233	Disconnect switch		
39122234	Locking switch		
39122235	Modular wiring system switch		
39122236	Occupancy or motion sensing switch		
39122237	Panel mount switch		
39122238	Photocell switch		
39122239	Pull chain switch	A switch operated by pulling a chain to move the switch from on to off.	
39122240	Speed switch		
39122241	Reed switch	Type of electrical switch consisting of a pair of ferrous metal contacts in a hermetically sealed glass envelope. Contacts are pulled together by a permanent magnet placed close to the switch.	
39122242	Ground switch	Type of switch used to electrically ground equipment that has been taken out of service for maintenance.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39122243	Micro switch	A switch containing a micro contact gap and snap-action mechanism by which it operates at the specified movement and force.	
39122244	Cutout switch	A switch with a single electrode to protect and operate a transformer. If the internal fuse is shut off, the cover is automatically open by gravity.	
39122245	Magnetic switch	A switch which is activated by magnetic force and is used to protect and control overload of motors by using the overhead relay.	
39122246	Electrical potentiometer switch	A three-terminal resistor with a sliding contact that forms an adjustable voltage divider. If only two terminals are used, it acts as a variable resistor or Rheostat.	
39122247	Automotive HVAC potentiometer switch	A device used in controlling automotive heating, ventilation and air conditioning or circulation units.	
39122248	Power signal distribution switch	A type of switch used in conjunction with automotive vehicle signal devices, systems and controls	
39122249	Steering wheel control switch	A type of switch used in conjunction with automotive vehicle steering wheel controls	
39122250	Automatic transmission gear selector switch	A type of switch that works in conjunction with automotive vehicle gear shift selector or indicator-PRNDL.	
39122251	Detent switch	A type of switch that uses a mechanism to maintain the state of the switch	

Class

Commodity	Commodity Title	Definition	Synonyms
39122301	Buchholtz relay	A relay used to protect against internal defects of transformer.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39122302	Distance relay	A relay designed to set the time limit for motion in accordance with the normal impedance measured from the relay installation point to the point of defect by using voltage and current at the time of defect.
39122303	Multicontact relay	An auxiliary relay with several contact points, and is used for the purposes of relaying and linking control signal or amplification of electric power for control.
39122304	Reed relay	A relay that is structured by combining the coil that makes the move and the reed switch sealed in the glass tube together with the inert gas in encountering with the narrow gap for the reed made of a pair of a ferromagnetic substance.
39122305	Meter relay	A relay that is used by attaching non-contact point type upper of upper limited pointer onto ammeter, voltmeter, wattmeter, varmeter, power factor meter and frequency meter, and can vary red and blue pointer in accordance with the usage. It is a relay used for alarm or interruption signal, and is essential in automatic control.
39122306	Directional ground relay	A ground relay that becomes operational at the time of ground fault under the status of normal direction. It is a ground relay with added function of detecting the direction of point of ground fault on the line that employs loop system format or network system.
39122307	Auxiliary relay	A relay used as an auxiliary for protective relay with purposes including increase in contact capacity, increase in contact points, addition to time delay or others.
39122308	Ratio differential relay	A relay that becomes operational when the difference between 2 currents generated due to defectiveness in differential relay exceeds certain ratio of sum of the 2 currents.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39122309	Unground relay	A relay that is designed to operate in motion to disconnect the accidental circuit by detecting the ground fault from the underground system.	
39122310	Selecting ground relay	A relay that selectively interrupts the accidental electric line by detecting the ground fault in the distribution line of underground neutral system. It is a relay that selectively interrupts by detecting zero-phase sequence voltage and zero-phase earth fault current occurring at the location of relay installation in the event of ground fault.	
39122311	Pressure relay	A relay that operates in response to the magnitude of pressure and is being operated by using increase in pressure of insulation medium in the event of electrical or mechanical accidents as well as being used in protection of devices insulated with fluid.	
39122312	Polarity relay	A direct current relay that control the actions in accordance with the polarity of current in the coil by using interaction between the magnetic flux induced by permanent magnet and that induced by coil.	
39122313	Trip free relay	A relay that trips the circuit breaker upon command for tripping even during input manipulation of circuit breaker as well as deters input action even if input commend is given continually.	
39122314	Blocking relay	An auxiliary relay used hinder operation of other relay or equipment under prescribed conditions.	
39122315	Electromagnetic relay	A relay equipped with electromagnet, armature and contact point, and opens and shuts the contact point by attracting armature by generating magnetic flux by the current flowing in the wound wire of electromagnet.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

39122316	Reclosing relay	A voltage, current and electric power relay with function of shutting the circuit again.	
39122317	Latching relay	A relay that enables continuous sustaining of operational status by applying pulse current only once.	
39122318	Frequency relay	A relay that becomes operational when the frequency reaches prescribed value.	
39122319	Direct current relay	It is used for the purpose of cutting off circuit or protecting line by detecting abnormal state during operation of network system with capacity of less than DC 300V with high sensitivity.	
39122320	Horizontal relay	A relay used widely for strowger type automatic switchboard. It is an electromagnetic relay in the format of contact point spring moving in horizontal direction with characteristics of being multi-contact point type.	
39122321	Non polarized relay	A direct current relay used for various control and locking of safety device of electric signal.	
39122322	Direct current voltage relay	A static relay that uses semiconductor. It is a relay that protects device or line by cutting off circuit or sounding alarm through highly sensitive detection of abnormal status of voltage during operation of direct current network system with capacity of less than DC300V.	
39122323	Multi function digital relay	A digital integrated protective relay that provides the high precision instrumentation and protective related to the receiving and distributing panel power facilities. It is the high-tech protective relay that perfectly materializes the diverse function and high speed communication function.	
39122324	Power relay		
39122325	General purpose relay

40101706	Air conditioner shutters		
40101707	Cooling tower accessories		
40101708	Fan coil unit	A small room air conditioner or air handling unit with a fan, a hot/chilled water coil and an air filter contained in one box.	
40101709	Air handling unit	A device used to cool, heat, dehumidify, humidify, filter, circulate and ventilate air within a building.	
40101710	Reciprocating chiller	A type of chiller which compresses refrigerant gas by the reciprocation of a piston in a cylinder of a compressor. It consists of a compressor, a condenser, a evaporator and an expansion valve.	
40101711	Centrifugal liquid chiller	A type of refrigeration unit which changes the kinetic energy of refrigerant gas to pressure using the centrifugal force of an impeller rotating at high speed. It consists of a compressor, condenser and evaporator, and its refrigerating capacity is large. It is also called a turbo refrigerator.	
40101712	Screw chiller	A type of refrigeration unit which compresses gas in the course of reducing the capacity of refrigerant gas by the high-speed rotation of the rotor of a compressor with a male screw and a female screw engaged with each other.	
40101713	Absorption chiller	A type of refrigeration unit which vaporizes refrigerant gas using an evaporator. The gas is then absorbed into the solution of an absorbent and divided again, transferred to a condenser and condensed by a coolant, establishing a chilling cycle. It uses water as a refrigerant and LiBr solution as an absorbent.

UNSPSC v16_0901

1/27/2014

40101714	Absorption chiller heater	A type of refrigeration unit with a boiler installed within the device which enables both cooling and heating by forming chilling cycles - evaporating, absorbing, recycling and condensing. It generally uses water as a refrigerant and LiBr solution as an absorbent.	
40101715	Constant temperature and humidity chamber	A type of refrigeration unit which not only maintains constant internal temperature and humidity irrespective of external condition, but also circulates, filters and ventilates. It is mainly used in a computing room or a laboratory.	
40101716	Cooling tower	A type of heat exchanger used to bring cooling water which is used for the condenser of a refrigerator directly to the outside for the purpose of reusing the water. It is generally installed on the top of the building or outside.	
40101717	Air conditioner power saver	A device that regulates cooling by automatically cycling the air conditioning unit on or off according to pre-determined settings.	
40101718	Cooling coil	A device for cooling heated air in an air conditioner.	
40101719	Liquid refrigerant receiver	A device that stores liquid refrigerants condensed from the refrigeration cycle from the condenser and the evaporator.	
40101720	Unit cooler	An assembly consisting of a heat transfer device, filter and motor fan designed to cool and to dehumidify.	
40101721	Water cooled condensor	A type of condenser that removes and dissipates heat from the compressed vapor to the surrounding water to condense the refrigerant vapor to a liquid. The liquid refrigerant then falls by gravity to a receiver where it is stored, and available for future use in the system.

UNSPSC v16_0901

1/27/2014

40101722	Steam condenser	A device that cools down the vapor to return to water to maximize the efficiency of the steam turbine from thermal power station, chemical plant and others.	
40101723	Thermoelectric cooler	An apparatus for lowering the temperature of an enclosed space by means of the Peltier effect.

40101830	Heater elements		
40101831	Induction heaters		
40101832	Doors for heating equipment		
40101833	Boiler or heater igniter	Igniter, may or may not be electrical, and is used to light a boiler, heater, hot water tank, etc	
40101834	Burners		
40101835	Plate heat exchanger		
40101836	Shell and tube heat exchanger		
40101837	Chimney		
40101838	Economizer	An economizer is a heat exchange device that heats a fluid up to (but not beyond) the boiling point of that fluid	
40101839	Baffle plate	A plate or wall for deflecting gases or other fluids as in a steam-boiler flue, or a reverberatory furnace.	
40101840	Film heater	A type of heater used to radiate heat through a thin film with a heating element. It is used for heating by laying it within a floor or wallpaper. It is composed of a heating element film and a thermostat.	
40101841	Air preheater	A device to preheat the air for combustion with the remaining heat of the combustion gas prior to escape through the chimney.

1/27/2014

40101842	Ice melting device	A device that uses electric heat to melt ice build up.	
40101843	Electric furnace	A melting furnace that uses electricity to apply heat. It is generally used in melting steel, special cast iron and special steel alloys.	
40101844	High frequency induction vacuum melting furnace	An electric furnace that melts special steels at high temperature generated by high frequency induction current in an atmosphere of non activated gas.	
40101845	Reverberatory furnace	A furnace that is used for smelting and refining of metal.	
40101846	Salt bath furnace	A furnace that is designed to dissolve metal materials, such as steel and others with salts, such as barium chloride or sodium chloride or other others and heat the metal materials, such as steel and others within it.	
40101847	Carburization and nitrification electric furnace	Thermal treatment equipment that is used when the hardness is heightened by penetrating the carbon or nitrogen on the surface of the steel.	
40101848	Forced air heating system	A heating apparatus that provides the heat with the compulsive convection by using the fan with the heat that is generated by exhausting the fuel from the equipment itself.	
40101849	Hot water distribution header	A type of device that gathers the valves in one place to distribute the hot water generated from the hot water heater, such as boiler and others, to several zones like cabinet panel or distributing board.	
40101850	Crematory	A cremator that is used in cremating the corpse.	
40101851	Boiler parts and accessories

40102001	Fire tube boilers		
40102002	Water tube boiler		
40102003	Electric boilers		
40102004	Natural gas powered boilers	This commodity is a boiler that uses natural gas as a power source. Natural gas powered boilers have varying dimensions and weights, depending on the functionality (e.g. residential vs. commercial boilers). It is used for heating water or air, generating steam or storing hot water.	
40102005	Propane gas powered boilers	This commodity is a boiler that uses propane gas as a power source. Propane gas powered boilers have varying dimensions and weights, depending on the functionality (e.g. residential vs. commercial boilers). It is used for heating water or air, generating steam or storing hot water.	
40102006	Waste heat boiler	A boiler which uses the heat of waste gas from several equipments other than the boiler such as a heating furnace, melting furnace and others.	
40102007	Mini oil boiler	A boiler fueled by kerosene, light oil or heavy oil as the fuel with a hydrostatic pressure of 10 meters or less.

40141624	Lubricated plug valves		
40141625	Mud or slush valves		
40141626	Nonlubricated plug valves		
40141627	Orifice valves		
40141628	Pilot valves		
40141629	Pinch valves		
40141630	Piston check valves		
40141631	Pump valves		
40141632	Sentinel valves		
40141633	Slider valves		
40141634	Swing check valves		
40141635	Turbine valves		
40141636	Valve kits		
40141637	Wafer check valves		
40141638	Toggle valves		
40141639	Toilet fill valve	Device that controls the flow of water from the water supply line into a gravity-operated toilet tank regulated by a float mechanism.	
40141640	Toilet flush valve	A buoyant plastic device that covers the outlet in the bottom of the toilet tank and is held in place by water pressure. It is activated by a lever which lifts the device from the outlet and floats clear allowing the tank to empty quickly into the bowl. As the water level drops, the device descends back to the bottom of the tank and covers the outlet pipe again.	
40141641	Poppet valve	A type of valve consisting of a hole and a tapered plug on the end of a shaft also called a valve stem. The shaft guides the plug portion by sliding through a valve guide. The differential pressure seals the valve.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

40141642	Saddle valve	A saddle valve is a valve used to supply liquid where a low volume, low pressure stream is required. The name is derived from the fact that it is mounted in such a way that it "saddles" the line, mounting it from both sides.	
40141643	Foot valve	A type of check valve. It is spherical or cylindrical in construction with perforations or slots all over the valve body to allow entry of water into it.	
40141644	Rotary airlock valve	This valve is made up of a rotor with 6 rigid vanes that moves inside a round casing. The gap between the rotor vanes and the casing is further reduced by means of adjustable vane blades made of teflon or spring steel.	
40141645	Valve stem	A rod attached to a valve for moving it.	
40141646	Valve seat	The fixed surface on which a valve rests or against which it presses.	
40141647	Segment valve	A type of valve designed to provide an optimized flow path for medium consistency pulp.	
40141648	Magnetic valve	A widely used type of valve in which the electromagnet is housed in a chamber which is not exposed to pressure medium to be controlled and in which a rod coupling is placed between the armature of the electromagnet and the valve body.	
40141649	Directional control valve coil assembly		
40141650	Compressed gas valve	A gas valve that is manufactured not to leak in high voltage applications.	
40141651	Air valve	A valve to enable flawless flow of liquid by removing the air in the fluid with the valve that absorbs or releases the air flowing within the pipe.	
40141652	Pressure reducing valve	A valve that consistently maintains the pressure and reduces the pressure on fluid.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

40141653	Sluice valve	A valve that passes, blocks or controls water by installing on pipes for waterworks or industrial water	
40141654	Cock valve	A type of plug valve that stops the flow of liquid or increases or and decreases it by turning the plug inserted in the cone shaped or cylinder shaped hole on the liquid route.	
40141655	Vacuum valve	A valve installed on a pipeline or container operating at a lower internal pressure than the external air pressure	
40141656	Flange type butterfly valve	A butterfly-shaped valve that is in the flange-type for the connected part from the valves that adjust the flow by rotating the circular plate-shape of valve body on the basis of the axis installed in right angle to the flow direction.	
40141657	Fire sprinkler control valve	A valve which supplies water to the sprinkler head automatically once one or more of water sprinklers is opened by sensing fire or others.	
40141658	Block and bleed valve	A heavy duty mainline valve made to hold bubble tight against high pressure. The valve is made with a small bleeder line and valve which are tapped into the block valve's bonnet. When the block valve is closed, its effectiveness may be checked by opening the bleeder valve for evidence of any leakage from the upstream or high-pressure side.	
40141659	Lift check valve	A type of check valve in which the flow control element moves parallel to the direction of fluid flow. The force of the fluid lifts the flow control element off its seat.

40141743	Nozzle tips or caps		
40141744	Drain bowls		
40141745	Fusible plugs		
40141746	Sight glass	A part mounted to a tank or boiler for observing the content level	
40141747	Grease trap	A receptacle designed to collect and retain grease and fatty substances normally found in kitchen or similar wastes; usually installed in the drainage system between the kitchen and the sewer.	
40141749	Vacuum breaker		
40141750	Waste arm	A type of extension pipe or tubing; used to extend a sink drain into a wall.	
40141751	Wall bend	A straight piece of pipe or tubing with a slight bend at one end. Used in household plumbing.	
40141755	Pipe sway brace	A double-acting spring housed in a canister. It restrains undesirable movement of pipe racks.

40141756	Pipe connection box accessory	Pipe connection box accessories such as lids, covers, extensions, bases.	
40141757	Escutcheon	A flat protective covering to prevent soiling.	
40141758	Drainage channel	A watercourse installed for drainage.	
40141759	Floor drain	A drain device which is installed on the floor for drainage	
40141760	Non freeze hydrant	A water hydrant with the freezing prevention function that is installed in areas with the winter freezing concerns.	
40141761	Piping manifold	A device which has the spiral exhaust pipe used for the distribution of air and the suction port paved with the spiral used for piping.	
40141762	Water meter protection tub	A device to secure to prevent frozen damage and leakage of the water meter.	
40141763	Water hammer arrester	A type of device that is installed to prevent high noise and vibration due to the impact wave generated by the fluid inside the pipeline that moves the fluid.	
40141764	Hose assembly	An package consisting of hose and fittings.	
40141765	Drain separator	A type of device that is installed on the vapor or compression air pipe to release the water in the pipe to external side of the pipe by using the difference of specific gravity between the vapor or compression air and air.	
40141766	Snap tap with saddle for water works	A type of device that enables the boring work while the water is kept running when working to install the branch pipe (home entry pipe) from the main pipe for water.	
40141767	Pipe shoe	A supporter that is in slider-type as used in the steam pipe or water pipe in the pipe system.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

40141768	Pitless adapter	A type of device that is installed tightly on the upper extension pipe of the underground water well that disconnects the surface pollutant, such as, foreign substance, insect or others to penetrate inside of the well.	
40141769	Valve box or valve room	A structure that is made in circular cylinder-shape or rectangular shape made in the reinforced plastic and other materials to prevent various valve structures of water and sewer from breaking from outer impact and others.	
40141770	Pipe fusion machine	A machine that is used to join mutually different pipes.

40151561	Triplex pumps		
40151562	Worm pumps		
40151563	Fire pump sets		
40151564	Chemical pumps		
40151565	Macerator pump	A type of pump designed to empty holding tanks. Includes a bronze cutter to grind waste down to small particle size. By grinding down the particles, it makes it possible to eject them (pump out) through the discharge nozzle of the pump.	
40151566	Booster pump	The booster pump is a positive displacement pump which operates by pulling air through a pair of meshing lobes not unlike a set of stretched gears. Air is trapped in pockets surrounding the lobes and carried from the intake side to the exhaust. The supercharger is driven directly from the engine's crankshaft via a belt or, in a two-stroke diesel engine, by spur gears.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

40151567	High temperature pump	A pump manufactured for high precision processes designed to move heated fluid up to 260 degrees F	
40151568	Pulp pump	A special pump for pumping of paper material, slurry and others up to a density of six percent	
40151569	Monoflex pump	A specialized pump designed to work with special rubber, special urethane materials, impeller and casing and shaft for corrosion resistance and abrasion resistance materials.	
40151570	Mixed flow pump	A pump that is an intermediary between a centrifugal pump and an axial flow pump. It accelerates to the axial direction simultaneously with the centrifugal force for the fluid.	
40151571	Inline pump	A pump that is used for agricultural fluid transfer and hot and cold water circulation. It is installed between the pipes with the pump and motor axis as a single type.	
40151572	Air lift pump	A pump that sucks up liquid by using the action generated from releasing the compression air or gas from the tip of the submerged pipe.	
40151573	Magnet pump	A pump that is driven by magnetic force not mechanical force. It operates by having the impeller sealed with the ferrite magnet rotate with the driving magnet attached to the motor axis.	
40151574	Ejector pump	A pump that induces and releases the liquid as kinetic energy created by the pressure of ejecting water, air, or vapor compressed at high speed through the nozzle.	
40151575	Brushless coolant pump	Pump that can take various configurations using brushless motor power.	
40151576	Mortar pump	A type of pump that pumps mixed mortar, plaster or plastering material to high elevation or distant location.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

40151577	Grouting pump	A type of pump that sprays cement grout to harden weak foundation or to fill in gaps in base rock in the construction work for dam, structure, tunnel and harbor.	
40151578	Diving air pump	A pump that supplies the air required for divers to breathe. It uses the helmet-type diving apparatus that sends the air above the water.	
40151579	Gravity pump	A pump that pulls up to the higher place by transferring into small volume of high-pressure liquid with the massive volume of low pressure liquid by using the water inertia.	
40151580	Lubricator pump	A type of precision metering pump operating within rugged cast iron reservoirs which contain the lubricant to be pumped. Each pumping unit supplies a single point of lubrication. Lubricators may be furnished in single or multi feed units for any number of points of lubrication. They are available with various drive arrangements, for a broad range of lubricants, viscosities, and required line pressures.	
40151581	Multi stage pump	A pump with more than two impellers that allows liquid to flow through more than twice.

UNSPSC v16_0901

1/27/2014

40151729	Pump stator	The stationary part of a motor, dynamo, turbine, or other working machine about which a rotor turns.	
40151730	Pump impeller	The rotating part of a centrifugal pump, compressor, or other machine designed to move a fluid by rotation.	
40151731	Pump rotor	A rotating part of an electrical or mechanical device.	
40151732	Pump shaft	A device that transmits the driver torque to the impeller of centrifugal pumps or to the displacement element of rotary pumps.	
40151733	Pump soleplate	A mounting plate onto which a vertical turbine pump VTP is attached to provide a foundation for installation and maintenance. It allows the removal of the pump without disturbing the foundation. Together with the pump discharge head base flange, it is machined to allow precision mating.	
40151734	Pump baseplate	A precisely ground plate that acts as the foundation of a pump or pump assembly.	
40151735	Pump column assembly	A section of the vertical turbine pump consisting of pump column, which is threaded or flanged, column coupling, pump lineshaft, lineshaft coupling, lineshaft bearing and bearing retainer	
40151736	Pump column pipe	An interchangeable section, threaded or flanged, of the vertical turbine pump that connects the discharge head to the pump bowl and contains the fluid being pushed up by the impeller.	
40151737	Pump bowl assembly	A component of a vertical turbine pump consisting of the pump impeller and the impeller bowl. The Pump Bowl Assembly also converts the velocity energy as it leaving one impeller, to pressure energy at the inlet of the next impeller.

40172512	Glass reinforced thermosetting plastic pipe connector	A glass fiber reinforced thermosetting plastic pipe joint that has the material in unsaturated polyester resin.	
40172513	Flexible pipe connector	A pipe connector that is attached and used in the middle of the pipe designed to absorb small vibrations or movements	
40172514	Preinsulated pipe connector	A pipe connector for insulated double layer pipe that is heat protected at the manufacturing plant with insulation material, such as, polyurethane foam, glass fiber, rock wool and others	
40172515	Polybutylene pipe connector	A type of pipe connector used for pipe made of polybutylene	
40172516	Polyethylene pipe connector	A type of pipe connector used for pipe made of polyethylene	
40172517	Polypropylene pipe connector	A type of pipe connector used for pipe made of polypropylene.	
40172518	Coated steel pipe connector	A steel pipe connector coated with asphalt, coal tar enamel, tar epoxy resin paint, liquid epoxy resin paint and others.	
40172519	Aluminium and aluminium alloy pipe connector	A pipe connector made of aluminum or aluminum alloy.	
40172520	Rigid polyvinyl chloride pipe connector	A pipe connector manufactured by injection molding as the main body for polyvinyl chloride.	
40172521	Copper and copper alloy pipe connector	An auxiliary part for pipe that is used in connection of copper pipe.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

40172522	Flexible pipe joint	A pipe joint that is attached and used in the middle of the pipe by manufactured for absorbing the small vibration or movement of axial direction or vertical axial direction of the pipe generated from the pipe system.	
40172523	Corrugated pipe connector	A connecting pipe used to link corrugated pipes together or to change direction of the pipe.

Class 40183000 Rubber and plastic tubing

Commodity	Commodity Title	Definition	Synonyms
40183001	Rubber tubing	Tubing made of rubber material	
40183002	PVC plastic tubing	Tubing made of polyvinyl chloride PVC plastic	
40183003	CPVC plastic tubing	Tubing made of chlorinated polyvinyl chloride CPVC plastic	
40183004	HDPE plastic tubing	Tubing made of high density polyethylene HDPE plastic	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

40183005	Low pressure rubber tubing	A hollow cylinder or pipe of rubber usually long in proportion to its diameter, used for conveying fluids under low pressure.	
40183006	Heat shrink tubing	A tube, produced from a thermoplastic material, whose distinguishing characteristic is its propensity to shrink when exposed to slightly elevated temperatures; used to insulate, isolate and protect electrical wires that are spliced, joined or bundled.	
40183007	Rubber foam tubing	Tubing made from foamed rubber material	
40183008	Polyurethane PUR tubing	Tubing made from polyurethane material	
40183009	Braided sleeve tubing	Rubber, composite or other tubing sheathed partially or completely by a braided metal protective sleeve.	
40183010	High pressure rubber tubing with assembly	A hollow cylinder or pipe of rubber usually long in proportion to its diameter, including additional affixed components such as brackets, fittings and the like, used for conveying fluids under high pressure.

UNSPSC v16_0901

1/27/2014

41101708	Laboratory grinder or polisher	A device used to seamlessly grind or finely process the surface of glassware or a test article.	
41101709	Laboratory asphalt and concrete mixer	A mixer that is used for mixing the samples in a laboratory.	

Class

Commodity	Commodity Title	Definition	Synonyms
41101801	Electron guns		
41101802	X ray generators		
41101803	Coulometers		
41101804	Electroscopes		
41101805	Fluxmeters		
41101806	Magnetometers		
41101807	Electron diffraction apparatus		
41101808	Neutron diffraction apparatus		
41101809	Optical diffraction apparatus		
41101810	Diffractionmeters		
41101811	Electron probe x ray micro analyzer	A device used to detect electrons and X-ray which are generated when the electronic gun shoots an electronic beam and conduct quantitative and qualitative analysis on the elements.	
41101812	Particle accelerator	A device used to generate kinetic energy by accelerating charged particles such as electrons and protons in a strong electronic field or magnetic field.It is used to analyze the deep structure of an atomic nucleus or an elementary particle.	
41101813	Laboratory X ray equipment controller	Control equipment that is designed for the X-ray detector. It controls the X-ray device to maintain the optimal condition to detect the material or part defect.

41102608	Animal testing equipment		
41102609	Anaesthetic gun	Gun used to anesthetize animals.	
41102610	Animal for research testing	Any rodent, mammal, ave, or bovine species of animal utilized for bioresearch in a laboratory setting	
41102611	Research animal food and diet	Food and diet used for the nutrition of animals in a bioresearch laboratory	
41102612	Research animal induction chamber	Chamber or hood used for the induction of anesthesia into animals in a bioresearch laboratory	
41102613	Research animal physiological test kit	Test kit used for the purpose of measurement of biophysical and biochemical analytes in animals in a bioresearch laboratory	
41102614	Research animal bedding material	All bedding materials utilized for the skeletal support, comfort, warmth and dryness of animals in a bioresearch laboratory	

Class Crystallography equipment

Commodity	Commodity Title	Definition	Synonyms
41102701	Crystal lattice models		
41102702	Scintillation crystal assemblies		
41102703	Light scattering equipment		
41102704	X ray diffraction equipment		
41102705	Crystallizers		
41102706	Crystal growing equipment		

Class Histology equipment

Commodity	Commodity Title	Definition	Synonyms
41102901	Tissue embedding stations		
41102902	Embedding molds		
41102903	Embedding capsules		
41102904	Embedding compounds		
41102905	Histological staining apparatus		

UNSPSC Codeset

1/27/2014

41102909	Tissue processors		
41102910	Tissue culture apparatus		
41102911	Histological knives or knife holders or blades		
41102912	Histological glass knife makers		
41102913	Histological hones or straps or compounds		
41102914	Ultrasonic disintegrators		
41102915	Histology sampling and dissecting stations		
41102916	Microtomes		
41102917	Microtome blades		
41102918	Laboratory cover slippers		
41102919	Solvent recyclers		
41102920	Histology tissue cassettes		
41102921	Histology paraffin		
41102922	Automated cover slipping equipment		
41102923	Somatic cell counter	A type of device that measures the number of somatic cells.	
41102924	Automated tissue cassette labeler	Automated tissue cassette labelers and their accessories and supplies	
41102925	Histology formalin and solvent resistant permanent marker	Solvent and formalin resistant permanent markers for histology microslide and tissue cassette labeling	
41102926	Histology tissue cassette hopper	Hoppers used for the storage and dispensing of histology tissue cassettes	
41102927	Histology tissue processing implement	All probes, brushes and other implements utilized in the dissection, embedding and microslide preparation of histological tissue for examination	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41102928	Automated microscope slide labeler	Automated microscope labeling system and its accessories and supplies	
41102929	Histology ultrasonic cleaner	Ultrasonic cleaner utilized in the histology laboratory for equipment cleaning and sample preparation such as bone specimen decalcification	
41102930	Cytology slide processor	Liquid based processing system for gynecological and non gynecological specimens in which the specimen is drawn through a processor for the removal of debris and then is deposited as a thin cell preparation on a microscope slide for staining and examination	
41102931	Paraffin dispenser	Electronic large volume capacity container that melts, maintains constant temperature and consistency, and dispenses liquidized histology paraffin into the tissue embedding cassette

41103013	Explosion proof refrigerators or refrigerator freezers		
41103014	Chromatography refrigerators		
41103015	Blood bank freezers		
41103017	Flammable material storage freezers		
41103019	Plasma storage freezers		
41103020	Ultra cold or ultralow chest freezers		
41103021	Laboratory plate freezers		
41103022	Cool transport or storage		
41103023	Laboratory chillers		
41103024	Cold traps		
41103025	Laboratory cooling equipment accessories		
41103026	Benchtop ice bucket or chilling container	Ice buckets and containers used for chilling specimens on the workbench	
41103027	Blood unit storage boot	Boots and racks used to storage blood units in blood bank refrigerators	
41103028	Liquid nitrogen measuring stick	Flexible stick, usually constructed from fiberglass, that is utilized for measuring the level of liquid nitrogen in storage tanks or systems	
41103029	Cryogenic storage cane	Stepped metal cane used for long term vial and tube cryogenic storage	
41103030	Cryogenic storage bag or overwrap	Bag and protective overwrap used for long term cryogenic freezing, storage and thawing of human blood components and cells	
41103031	Insulated transport cooler or tote	Insulated tote used for temperature controlled transport of biological specimens and products	
41103032	Cryogenic tube or vial permanent marker or label	Label and writing marker used for cryogenic specimen identification that are specially formulated to withstand ultra low freezing temperatures	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41103033	Laboratory dewar flask	Flask utilized for the storage of liquid nitrogen used in laboratory cryogenic freezers, that is insulated by a double wall with vacuum between the walls and silvered surfaces facing the vacuum	
41103034	Cryobead system for microbial organism cryogenic storage	Cryogenic storage system for bacteria that is composed of a cryovial incorporating treated beads and special cryopreservative solution	
41103035	Fresh frozen plasma storage carton or frame	Cardboard or plastic carton designed for use as a protective frame enhancing fresh frozen plasma bags during ultra low cryogenic storage	
41103036	Refrigerated specimen storage rack or tray	Rack or tray used for short or long term refrigerated storage of specimens	
41103037	Polymerase chain reaction PCR tube strip and plate cooler	Cool packs designing for the uniform cooling of PCR plates, tubes or strips during preparation	

Class 41103200 Laboratory washing and cleaning equipment

Commodity	Commodity Title	Definition	Synonyms
41103201	Chemical engineering washers		
41103202	Laboratory washing machines		
41103203	Pipette washers		
41103205	Washing machine racks or accessories		
41103206	Laboratory washing detergents		
41103207	Microplate washers		
41103208	Blood bank cell washers		
41103209	Laboratory wash bottles		
41103210	Laboratory ultraviolet UV sterilizers		
41103211	Laboratory wastewater treatment equipment	Process equipment that is designed to dispose the reaction compounds or residues after the use at the laboratory.	
41103212	Lab glassware cleaning brush	Test tube and flask brushes and other brushes used to clean laboratory glassware	

UNSPSC Codeset

UNSPSC v16_0901

41103310	Gas or vapour concentration measuring instruments		
41103311	Manometers		
41103312	Viscosimeters		
41103313	Depth indicators		
41103314	Microscopic structure estimation apparatus		
41103315	Solution strength estimation apparatus		
41103316	Pycnometers		
41103317	Surface tension measuring instruments		
41103318	Nuclear densitometer		
41103319	Concentration measurement instrument	A type of instrument that is designed to measure the volume of solute contained in the entire solution formed with the solvent and solute.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41103320	Density measurement instrument	A type of instrument that measures density -- volume for each unit-- that is the basic properties of a substance.	
41103321	Floating body stability measurement apparatus	Equipment that measures the weight center of the gravity in floating body including stability, neutral, unstable and others for the object floating on the liquid surface. Floating pontoon is launched on the water tank to measure the center of floating body, and it measures the change of metacenter height following the slope of the metacenter and the floating body from metacenter height to experiment the stability of the floating body.	
41103322	Draft gauge	A type of device that measures the pressure difference on the front and back of the wing wheel to know the air flow in the fan or ventilator.	
41103323	Open channel acoustic flowmeter	Equipment that is used for hydraulic experiment by using the artificial waterway. It is the device used to measure the flow velocity, flow velocity distribution, river bed change, flow rate and others at the open channel with water flowing.	
41103324	Laboratory wave generator	An experiment device that is used for the analysis and adjustment of waves. Motor and linear motion system cause the wave and this device is for the experiment to find out how the object, like a boat floating on fluid, could react to the wave or impact of tidal wave or wave on the dike.	
41103325	Visual fluid flow apparatus	A type of device that enables to see the fluid flow with the bare eyes. Clear pipes are made in several units and let the fluid to flow inside for many experiments of flow velocity, pressure, flux and others.

UNSPSC v16_0901

1/27/2014

41103326	Wind tunnel	Equipment that is utilized to observe and study the phenomenon of air and it proves the theories of hydrodynamics in actual experiment and to measure several types of phenomenon and force working on the object in air. The air flow is artificially generated to find out how the object (model) to be experimented moves in the air in this tunnel-shaped experiment device.
41103327	Current meter	A meter that is design to measure the flowing speed of the fluid. There are the impeller type and the pitot tube-type.
41103328	Vacuum based pipette aspirator system	Vacuum system utilized for the aspiration of chemicals, cell culture media, or other liquids by the use of serological, aspirating or transfer pipettes and pipette tips inserted into the vacuum tubing

41103414	Laboratory environmental conditioning equipment accessories		
41103415	Clean benches		
41103416	Temperature cycle chamber	A test chamber capable of cycling through a wide range of temperatures, typically from well below the freezing point of water to well above its boiling point.	
41103417	Indoor air quality monitor	A device that measures several data on indoor environment conservation of buildings in comprehensive terms. It may measure diversely in accordance with the device characteristics, such as indoor temperature, humidity, radiation temperature, wet bulb temperature, wind speed, relative humidity, carbon dioxide, carbon monoxide, dust and others.	
41103418	Temperature and humidity walk in environmental chamber	A space that the facilities are equipped to adjust the change of temperature and humidity in order to measure the impact of change of temperature and humidity on animal and plant, service life and other characteristics of various machines and equipments. It is the equipment of large space where people may walk around.	
41103419	Pollution environmental chamber	A space that the facilities are equipped to make various polluted environment in order to measure the impact of pollution on animal and plant, service life and other characteristics of various machines and equipments.	
41103420	Ozone environmental chamber	A space that is structured with the device to generate ozone and experiment thereof in order to undertake experiment on the influence of ozone on the ecology and the degradation properties of product due to the ozone.

UNSPSC v16_0901

1/27/2014

41106222	Yeast transformation kits		
41106223	Yeast nitrogen bases YNB or yeast nitrogen base YNB variants		
41106224	Electroporation system	Cuvette, plate, or chamber based system utilized for inserting or transfection of molecules into mammalian cells by using an electrical pulse to create pores in the cell membrane through which those molecules can pass	
41106225	Bottled broth media for bacteria	Broth media utilized for the general or selective growth and differentiation of aerobic and anaerobic bacteria	
41106226	Bottled broth media for yeast	Broth media utilized for the general or selective growth and differentiation of yeast	
41106227	Specialty plate for yeast	Plated agarose media with nutrient ingredients favorable to the general and selective growth of yeast	
41106228	Bottled agar media or stabs for yeast	Bottled or tubed agarose media formulated for the general and selective growth of yeast	
41106229	Bottled saline or water for microbiology	A sterile preparation of purified water or normal saline utilized in diverse routine microbiological applications	
41106230	Inoculum fluid for identification and sensitivity panels	A sterile preparation of water, saline or propagation broth that is utilized to suspend bacterial or yeast primary culture colonies in solution for inoculation into identification or susceptibility panels	
41106231	Contact agar plate for environmental microbial presence	A gridded or non gridded plate that containing a nutrient growth media that is used for monitoring necessary sanitary surfaces, by process of touching the agar to that surface for the growth, detection and enumeration of microorganisms that might be present there	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41106232	Automated microbial culture plate streaker	An automated processing system that inoculates and streaks universal specimen types and sources onto plated and tubed media	
41106233	Biolistic particle delivery system	A device used for high velocity injection of DNA-coated fragments directly into host tissues, cells, or organelles, resulting in the transformation of virtually any diverse cell target	

Class

41106300	Polymerase chain reaction PCR and reverse transcriptase polymerase chain reaction RT PCR products
----------	---

Commodity	Commodity Title	Definition	Synonyms
41106301	Deoxynucleotide triphosphates dNTPs		
41106302	Gene specific polymerase chain reaction PCR kits		
41106303	Kits for polymerase chain reaction PCR purification		
41106304	Kits for messenger ribonucleic acid mRNA quantitation by polymerase chain reaction PCR		
41106305	Nucleotides		
41106306	Polymerase chain reaction PCR buffers		
41106307	Polymerase chain reaction PCR optimizing products		
41106308	Polymerase chain reaction PCR or reverse transcriptase polymerase chain reaction RT PCR primers		
41106309	Premade complementary deoxyribonucleic acid cDNA		
41106310	Purified genomic deoxyribonucleic acids DNA		
41106311	Purified ribonucleic acids RNA		
41106312	Rapid amplification or complementary deoxyribonucleic acid ends RACE technology products

41106622	Yeast expression vectors		

Class

Commodity	Commodity Title	Definition	Synonyms
41106701	Leaf area meter	A meter that measures the accurate leaf area with the luminescence method to analyze with the sensor by penetrating the light on the opaque and irregular plant leaf with the built-in camera focus.	
41106702	Photosynthesis measurement apparatus	Photosynthesis reaction is the reaction that synthesizes the carbohydrate with the energy source of carbon gas, water and inorganic chlorine from the green plant and the solar ray and with the catalyst of chlorophyll. And the device measuring it is referred to as the photosynthesis measurement apparatus.	
41106703	Plant growth measuring instrument or auxanometer	A type of device that measures the nurturing condition of plant periodically during certain period.	
41106704	Chlorophyll measuring instrument	An instrument that measures excessiveness green pigment contained in the chloroplast of plants.	
41106705	Phytotron	A type of device that surveys the impact of various environment conditions on the plants. It is done by artificially building up the environment, such as temperature, humidity, light and others required of plant growth for experiment when undertaking the growth experiment of various plants.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41106706	Minirhizotron	Equipment that continuously observes the process of nurturing and growth through the entire nurturing period of the root under the soil for the plant.	
41106707	Vegetation nutrition inspection device	A type of device that inspects the impact on growth, development and survival of crops when organic compounds, inorganic compounds and others are discharged into the nature. It is designed to measure the leaves of plants at the site.	
41106708	Plant collection device set	A portable tool that is used in gathering plants. The plant collection set is consisted of collection container, plant press, trowel, and pruning shears.	

Family 41110000 Measuring and observing and testing instruments

Class 41111500 Weight measuring instruments

Commodity	Commodity Title	Definition	Synonyms
41111501	Electronic toploading balances		
41111502	Laboratory balances		
41111503	Mechanical balances		
41111504	Pull spring balances		
41111505	Calibration weights or weight sets		
41111506	Animal weighing scales		
41111507	Bench scales		
41111508	Bodyweight measuring scales		
41111509	Floor or platform scales		
41111510	Postal scales		
41111511	Truck or rail scales		
41111512	Triple beam balances		
41111513	Moisture balances		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41111515	Balance weighing containers or bowls or boats or papers		
41111516	Weight measuring instrument accessories		
41111517	Analytical balances		
41111518	Axle load scales		
41111519	Crane scale	A scale that measures the object with the scale attached on the ceiling to measure the weight. The display part is digitalized and widely used in the construction sites and industrial settings.	
41111520	Conveyor weighting scale	An industrial scale that consecutively measures the weight of properties that pass the above belt conveyor.	
41111521	Thermogravimeter	A scale that is used to measure the weight of certain mass when a substance is heated or maintained for certain degree of high temperature.	
41111522	Hopper scale	A scale of hopper type that automatically measures by dividing the weight of cargo in bulk condition for pulverulent body, particle, lump shaped agricultural and fishery products, raw material for industrial use, product and others.	
41111523	Weight prototype	An object or device that sets the standard to define the measurement unit of weight. The device has to be able to easily measure of the change by observation even if the indicated volume is slightly changed, and it has to maintain its property and unit shown for a long time.	
41111524	Price indicating scale	A commercial scale that displays the charge following the weight of the goods. There are container removing function, price computation function, and change calculation function. It is structured for measurement plate and display part.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41111525	Automatic packer scale	A type of scale that is used to pack by measuring for certain level of quantity --volume for a pack-- for cigarette comes out of production from the plant.	
41111526	Automatic selective scale	A scale that selects properties automatically for each weight with the pre-determined standard.

41111601	Micrometers		
41111602	Pedometers		
41111603	Rangefinders		
41111604	Rulers		
41111605	Strain gauges		
41111606	Tellurometers		
41111607	Thread counters or gauges		
41111613	Distance meters		
41111614	Height gauges		
41111615	Laser measuring systems		
41111616	Measuring wheels for distance		
41111617	Feeler gauges		
41111618	Gage block set		
41111619	Go or no go gauge		
41111620	Etalon wedge		
41111621	Calipers		
41111622	Micrometer calipers		
41111623	Thickness measuring devices		
41111624	Alexometer	An instrument for measuring orifices.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41111625	Curvimeter	A type of instrument designed for measuring the length of curved and crooked lines plotted on topographic plans, maps and graphical documents.	
41111626	Gauge block	A precision ground and lapped measuring standard. It is used as a reference for the setting or calibration of measuring equipment.	
41111627	Vee block	A high precision measuring instrument for angles and other measurements, It can have several shapes like "M" or "X" , but always follows a standard.	
41111628	Wire meter	A device for measuring out lengths of wire, cable, rope, hose and other flexible materials easily and efficiently.	
41111629	Cable or wire extension linear position sensor	A manual device that is used to measure with certain precision the distance between a source and a movable object by way of a wire or cable connecting them.	
41111630	Dial indicator or dial gauge	A type of instrument used to accurately measure a small distance. Also known as a Dial gauge or Dial Test Indicator (DTI)	
41111631	Radius gauge	A gauge that measures the rounding part of automobile or machine component.	
41111632	Cylinder gauge	A precision tool that is structured with the character board indicator installed on the pulley that moves on the support frame.	
41111633	Air micrometer	A comparison measurement meter that uses the linear changes of air flux or pressure within the gap between the end of air-blowing nozzle and the measured surface.	
41111634	Electrical micrometer	A micrometer that is indicated by amplifying electrically and converting the finite displacement volume of measuring ruler for contact type into quantity of electricity.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41111635	Gage block comparator	A measurement device that compares and inspects gauge block with the gauge block for master-level.	
41111636	Cylinder diameter measuring equipment	Equipment that is used to measure the diameter of conical-shaped products that may easily cause deformation on the size or get dirty when contacted or when it is in the condition of easily fragile, elasticity or high temperature.	
41111637	Conical cup tester	A type of device that measures the diameter of the specimen in conical-shaped cup made for the Korean Standard test table with the thin steel sheet from 0.5mm to 1.6mm.	
41111638	Cigarette circumference tester	A tester that is designed to measure the length of circumference or diameter of cigar or cigarette filter. It measures with the contact-type or noncontact-type, and there is device to measure the circumference and diameter simultaneously.	
41111639	Screw plug gauge and cross recess	A gauge designed to measure the shape of a cross-recessed groove and the depth of the hole inscribed on the head of the screw components including, cross-recessed head machine screws, cross-recessed head tapping screws, cross-recessed head wood screws and the like.	
41111640	Welding gauge	An exclusive gauge that measures the bead size of the welding part while the sharp part of the butt weld or fillet weld for the two metals is removed.	
41111641	Thread pitch gauge	This is used to inspect the pitch of internal or external screw.	
41111642	Rail joint gap gauge	A gauge that is used to measure the gap between the rail routes.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41111643	Wire gauge	A plate gauge that is used to inspect the wire diameter with the nominal diameter or gauge number.	
41111644	Pin gauge	A measurement gauge that is used to determine the accurate angle of the workpiece.	
41111645	Sine bar	A measurement tool that is used to find out the accurate angle of the workpiece.	
41111646	Telescoping gauge	A gauge that is designed to measure the diameter or width of the hole or groove with the plunger in which the spring is loaded. When the handle screw is rotated, the plunger is accurately affixed.	
41111647	Hole gauge	A gauge that may precisely measure the inner diameter of small caliber in conjunction with the external diameter micrometer.	
41111648	Taper gauge	A gauge that measures the inside diameter of pipes, various holes, and the size of taper part in the gap.	
41111649	Tire depth gauge	A measurement instrument for tire thickness that is designed to measure the abrasion limit of vehicle tires under the Road Transportation Act.	
41111650	Drill gauge	A type of standard gauge that is made with each step for the size sequence. It is used to measure the diameters of drill, tap, machine screw, and general wire rod.	
41111651	Cathetometer	It is the structure that is installed horizontally with the telescope that moves up and down the metal column that is erected vertically. The vertical pillar uses the tri-pot and is attached level to vertically adjust and the telescope adjusts levelness with the level attached to the upper part.	
41111652	Compressometer	Machine that conducts compression resistance assays in bottles and packages, according to standard specifications.

41111731	Microscope collectors		
41111733	Microscope tubes		
41111734	Microscope stages		
41111735	Automated microscope stages		
41111736	Microscope covers		
41111737	Videoscopes		
41111738	Fiberscopes		
41111739	Laboratory microscope replacement bulbs		
41111740	Automated optical inspection system	A system that captures, analyzes and/or archives product images to determine the presence or absence of defects.	
41111741	Microscope differential interference contrast equipment	Equipment that uses the interference effect of light to display the object shown on plane to show the sense of dimension with the height by installing the prism corresponding to each multi-ratio of the objective lens on the condenser.	
41111742	Periscope or protectorscope	An optical device that is made to see outside from the area blocked with its view, such as bunker or basement, by using the prism or mirror.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41111743	Autocollimator	A type of telescope that is used in the measurement of the micro-angle. The focus glass inscribed with the cross mark line or angle scale is placed on the focusing part of the objective lens. For the optical axis on the front of the objective lens, it is placed vertically to form on the same focusing part by the plane reflection glass for image. It measures the straightness, flatness, parallelism, micro-angle and others and is used for inspecting machine tool and angle gauge.	
41111744	Microscopic micrometer	A meter that is used to measure the finite size of object by using the microscope. There are ocular and objective lens.	
41111745	Micromanipulator	A type of device that is used by attaching to the microscope. It sets the tools, such as micro-pipet, finite cutter, finite injector and others, to have the finite maneuvering of cells, nuclear transplant, electric stimulation, cutting and others.	
41111746	Optical lever	Equipment that measures the change volume of finite angle by using the light reflection of mirror.	
41111747	Industrial fiberscope	A type of device that inspects with the oil pipe by lighting up the inside with flexible cable with the light inserted through a small hole of the outside without the machine or structure, such as engine, generator, duct, or elbow, disassembled.	
41111748	Multimedia image microscope	A microscope that includes the video analysis system.	
41111749	Phase contrast microscope	A special microscope that is made for clear observation of the interior structure for the colorless sample.

41111750	Microscope anti vibration mat or table	Table or mat that is designed to protect microscopes, their components and clinical specimens for microscopic examination from external oscillations or vibrations	
41111751	Microscope fluorescence filter	Excitation, emission, or dichroic filter utilized for coordinating spectral chromophores in fluorescent microscopes	
41111752	Microscope filter cube or box	Box or cube which houses spectral imaging filters for fluorescent microscopes	
41111753	Manual microscope nosepiece	The nosepiece or turret, which has manual rotation, that holds two or more objective lenses on a microscope	
41111754	Motorized microscope nosepiece	The nosepiece or turret, which has motorized rotation, that holds two or more objective lenses on a microscope	
41111755	Microscope knob	Knob that is used for coarse and fine vertical adjustment of the objectives and condenser of a microscope, or that is used for the horizontal and vertical adjustment of the microscope stage for optimal viewing of specimens	
41111756	Microscope base unit	The bottom aspect of a microscope, utilized to support the viewing elements of that microscope	
41111757	Microscope head	The upper part of the microscope that contains a one or two eyepiece lenses and prisms, and which attaches to the tube, generally referred to with compound light microscopes	
41111758	Microscope body	The basic structural aspect of the microscope, which includes the eyepiece and objective lenses, but does not include the base, illuminators or focusing block	
41111759	Trinocular light compound microscope	A light compound microscope that contains three eyepieces

41111760	Microscope sample manipulation system and accessories	System and accessories that are mechanical and/or interfaced to be utilized with a microscope or multiple microscopes for manipulation of samples being observed	
41111761	Transmission electron microscopy TEM grid or support film	Electron transparent films or electron opaque grids utilized to support specimens when being studied by transmission electron microscopy	
41111762	Transmission electron microscopy TEM grid storage box	Box used for storage of specimen grids utilized in transmission electron microscopy	
41111763	Microscope cleaning kit	Cleaning kit utilized for preventive maintenance of microscopes	
41111764	Microscope fitting	Any replacement screw, clamp, adapter or other fitting utilized on microscope	
41111765	Microscope stage slide clip	Adjustable clip utilized to entrap and stabilize microscope slides on the stage of a microscope	
41111766	Handheld digital microscope	A digital handheld single ocular microscope that allows for viewing of specimens or objects on a computer screen, as well as photographic or video capture, and has magnification powers of 10x to 150x	
41111767	Microscope stage warming system or incubator and accessories	A warming system or microincubator that rests on the stage of inverted microscopes and allows for in vivo observation of cell culture without disruption of growth environment	
41111768	Lighted box agglutination viewer	Agglutination viewer that consists of a glare-free backlighting source for use with blood bank or other applications where magnification is not necessary	
41111769	Lighted mirror agglutination viewer	Agglutination viewer that consists of an under placed magnifying mirror and above placed light to allow for undersurface observation of universal flocculation reactions

41111811	Cold testing equipment station	Pre-operational automated engine test station designed to find and solve issues prior to running a hot test. Cold engine testing includes hooking up an engine or major component such as transmission, hydraulic cylinder, etc. to a dynamometer test station and cycling the engine component to pressure and flow check the component for defects or check for issues.
41111812	Gamma ray radiography examination equipment	Equipment for gamma ray generation and survey that undertakes the non destructive inspection with respect to the interior defect of metal material.
41111813	Industrial radiograph viewing illuminator	An industrial radiograph viewing illuminator that is used for classification, grading and others of permeability photo that is obtained by the radiation permeability test by the X-ray, Gamma-ray and others.
41111814	Neutron radiography examination equipment	Neutron has fine substance permeability for not having the electric charge. It is used It is used for the internal crystal structure study of substance, inspection of defective part or inspection of plastic or chemicals with the method of obtaining the penetration film of heat neutron by using the nuclear furnace of neutron source. This is the generating device of neutron thereof.
41111815	Reinforcement metal detector	A type of precision safety diagnosis equipment for the concrete structures that detects the iron reinforcing rod buried under the concrete structure or bridge and surveys the location and distance of the steel frames.
41111816	Displacement measuring instrument	An instrument that measures by converting the displacement into the electric volume and others.

41111817	Rice taste measuring system	It is used to evaluate the taste of rice in percentage by surveying and measuring the electromagnetic wave on the moisture protection membrane formed on the surface of the rice when actually cooked. It is also used for researches in developing the seed of rice.	
41111818	Non destructive examination reagent	A chemical that is used in non-destructive examination. It is appropriate to the penetration inspection, and when testing all solid surfaces, it detects the material defect open on the surface.	
41111819	Wire rope tester	A tester that measures the crack, short circuit and corrosion conditions of the wire rope.	
41111820	Fluorescence detector	A device that detects the presence of finite defect existing on the surface of the material by using the fluorescent solution. It is used for the flaw test of casting material, forging material, rolling material, welding material and others.

41111964	Seat belt tension sensor		
41111965	Water sensor	An instrument that measures the presence of water.	
41111966	Humidity sensor		
41111967	Lateral long yaw sensor	An instrument that monitors yaw or side-to-side movement from a given axis.	
41111968	Angular rate sensor		
41111969	Voltage control sensor		
41111970	Temperature sensor	An instrument designed to detect temperature changes.	
41111971	Binary counter	A machine like a computer which counts in binary.	
41111972	Supplemental inflator restraint SIR or airbag coil assembly sensor	A sensor used in the coil assembly of supplemental inflator restraint SIR or air bag systems to confirm presence of necessary components.	
41111973	Particle counter	A counter that measures the number of particles for extremely fine pulverulent body or makes comparative measurement that are found in liquid, such as working oil, ultra pure water and others.	
41111974	Heating sensor tester	A tester that is used for testing the capability and the operation condition of the heat sensor used in the fire facilities and others.	
41111975	Magnetic field monitor	A magnet and a magnetic field detector that have the warning (alarm) functions if there are any magnetic field present, scope of its strength, and certain strength.

41111976	Water meter check system	A type of device that is designed to film the instruction marked on the water meter and others to recognize (inputs) the characters automatically and perform the inspection work. This is the portable small computer that may input and output the inspection contents and enables the transmission of the inspection contents.	
41111977	Ion counter	A counter that is designed to measure a number of positive ion and negative ion in the air.	
41111978	Manual microhematocrit tube reader	Device for manual reading and measurement of blood hematocrit level from spun microhematocrit tubes	
41111979	Data logger for clinical temperature controlled equipment	Programmable recording system utilized for sampling, recording and storage of all temperature data for clinical equipment and instruments such as freezers, refrigerators, incubators, storage containers, controlled transport and other application with critical temperature requirements	
41111980	Remote monitoring system for clinical temperature controlled equipment	Programmable wired or wireless remote or onsite monitoring system capable of multimodal transactions regarding temperature and humidity within all aspects of a laboratory environment in order to protect and validate analyzer, reagent, blood product and specimen integrity	
41111981	Blood utilization management system	Specialized system including software utilized for tracking blood component therapy distribution and utilization

41112107	Electro pneumatic transducers		
41112108	Loadcells		
41112109	Current transducer	A device that converts the input signal of current into an output signal of another form.	
41112110	Pressure transducer	A transducer which is designed to detect pressure and produce an electrical signal based on the detected pressure	
41112111	Displacement transducer	A transducer that physically moves in response to a change in condition. Displacement transducers are often used for precision measurement of small distances where traditional contact methods of measurement are not feasible	
41112112	Electric power transducer	A device that converts one form of electrical energy into another form of electrical energy.	
41112113	Mechanical energy transducer	Equipment that is designed to convert into the same type or different type of signal or volume for responding to the signal or volume thereof.	
41112114	Thermo hygro transmitter	A device that sends the current or voltage signal to the indicator or recorder by sensing or measuring the temperature and humidity.

41112219	Thermocouple probes		
41112220	Laboratory freezer or refrigerator thermometers		
41112221	Laboratory incubator thermometers		
41112222	Temperature gauge	A measurement device used to indicate the temperature of an item being monitored.	
41112223	Compound gauge	A visual indicator of pressure that is set for 'zero' psi at atmospheric pressure and includes a dial which will continue to indicate the level of pressure above or below atmospheric pressure.	
41112224	Infrared thermometer	A device used to remotely measure temperature in situations where it is not possible to be in physical contact with the object being measured. This includes objects that are very hot, very small or very far away.	
41112225	Resistance temperature detector RTD	A wire wound and thin film device that measures temperature using the physical principle of the positive temperature coefficient of electrical resistance of metals. The hotter they become, the larger or higher the value of their electrical resistance.	
41112226	Low temperature thermocouple sensor		

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41112227	High temperature thermocouple sensor		
41112228	Combustion efficiency analyzer	An instrument that is designed to measure the efficiency of an object that generates the light and heat by absorbing the surrounding oxygen. This is an instrument that measure the efficiency trough comparison with the calorie generated from the actual combustion process and the calorie generated from the complete combustion.	
41112229	Heat meter	A meter for heating bills inspection that measures the heat consumption for each household as it is installed in common housing for central heating and local heating.	
41112230	Pyrometer calibrator	A type of device that corrects the error of the optical pyrometer and calibrates for accurate measurement. Optical pyrometer is the device to measure the temperature by comparing the brightness of high temperature object and brightness of standard lamp.	
41112231	Oil cloud and pour point tester	A tester that measures the changes in condition following the temperature decline of crude petroleum and gasoline products.	
41112232	Freezing point measuring instrument	An instrument that is used to measure the freezing point and estimate the molecular weight of the substance.	
41112233	Melting point measuring instrument	An instrument that is used to measures the melting point, namely, the temperature that a substance changes its phase from the solid state to the liquid state.	
41112234	Heat flowmeter	A type of device that measures the heat movement volume by conduction, current or radiation by using the heat sensor.	
41112235	Specific heat measuring instrument	An instrument that measures the specific heat as the required calorie that is required for unit weight of certain object to increase 1 degree C.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41112236	Asphalt softening point tester	A tester that measures the softening point of the asphalt with the ring and ball method.	
41112237	Dewpoint thermometer	An instrument that is to measure the dew point temperature at the atmosphere. It is the thermometer that measures the temperature when there is any dew or frost by gradual cooling down of the metal surface.	
41112238	Dropping point tester	A tester that is designed to measure appropriate temperature as the lowest temperature that begins to drop in liquid phase for a part thereof when the semi-solid substances (grease, wax and others) are heated.	
41112239	Glass thermometer	A thermometer that uses the alcohol thermometer and the mercury thermometer, and measures maximum and minimum temperature.	
41112240	Blood unit temperature verification strip	Irreversible strips for monitoring blood unit temperature integrity	
41112241	Laboratory oven thermometer	Thermometer used for critical temperature monitoring in laboratory ovens	
41112242	Laboratory waterbath thermometer	Thermometer used for critical temperature monitoring in laboratory water baths	
41112243	Laboratory heat block thermometer	Thermometer used for critical temperature monitoring in laboratory heat blocks	
41112244	Calibration reference thermometer	A calibrated reference thermometer, certified by the National Institute of Standards and Technology, NIST, that maintains metrologic traceability, and that is utilized to calibrate or verify that any other thermometer will measure within that specific temperature range in which the thermometer is designed to operate

41112413	Differentialpressure gauge	A measurement instrument designed to measure the difference between two pressure sources.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41112414	Pressure calibrator	A type of device that is designed to test the capability of device that measures pressure and the normal operation thereof.	
41112415	Warburg apparatus	An apparatus that is designed to measure the breathing volume or pressure of cell as the process of obtaining the energy by oxidizing the organic substance from the bodily tissue and cell as Warburg developed.	
41112416	Bursting pressure tester	A tester that is designed to measure and test the destruction pressure within the permitted range of container that takes certain pressure, such as liquefied petroleum gas (LPG) container, glass bottle for carbonated drink and others.	
41112417	Vapor pressure measuring instrument	An instrument that is designed to measure the vapor pressure of gasoline volatile crude oil, volatile and non-viscous fuel oil or liquefied petroleum gas.	
41112418	Capillary pressure tester	A tester that measures the capillary tube pressure of air and water, water and oil, or 3 or more fluids. This equipment is equipped with the mercury pump, and it measures the pressure from the time mercury smears into the sample and the pressure when no more smearing can be made in graph.	
41112419	Cigarette filter draw resistance meter	A meter that measures the air suction resistance of the finished and semi-finished filter products and measures the air suction resistance of cigarette. It measures the pressure difference when the air flow speed is set for 17.5mL/s.	
41112420	Pressure drop gauge	Equipment that is used when the pressure is lowered to make the pressure condition fit to the experiment.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41112421	Fruit hardness tester	A tester that is designed to measure the resistance on the pressure of the fruit skin for quality management or confirmation on the level of ageing on fruit.	
41112422	Hydraulic pressure tester	A device that tests the durability by applying the water pressure when confirming the condition of instrument, such as water pipe, tank, boiler, high pressure gas container and others with the applied pressure.	
41112423	Pressure altimeter	A meter which measures the altitude by using the pressure difference of atmosphere.

1/27/2014

41112518	Pump efficiency testing equipment	Equipment that inspects the pump efficiency. It uses the thermal dynamics method and flux to measure.	
41112519	Pitot gauge	Measuring equipment which is designed to measure the discharge water volume in the fire extinguishing facilities, such as indoor and outdoor fire hydrants and others.	
41112520	Fire pump flow meter	A flow meter which is installed to confirm the amount of rated flux by undertaking the operation and capability tests for rated load of fire extinguishing pump at the time of installing the pump and regular inspection.	
41112521	Calibration column	The calibration column is designed specifically for use in determining flow rates of chemical metering pumps Pump flow rate verification on periodic basis or after maintenance is important to system accuracy.	
41112522	Water meter tester	Tester which meaures the volume of water supply coming out of faucets or pipes and checks whether or not the water meter works properly

41112804	Rail abrasion measuring equipment	Equipment that is designed to measure the abrasion condition of the rail installed in order to improve the convenience and secure the safety as a part of management inspection for running rail.	
41112805	Rail downthrow measuring instrument	An instrument that measures the maximum downthrow volume of the running rail with the dynamic load conveyed from the train when it passes the train.	
41112806	Rail joint gap measuring instrument	A type of device that is designed to measure the rail temperature and the gap of joint parts at the time of having the interval to the joint of rail. It occurs when the running rail is expanded and contracted in length direction in accordance with the temperature changes. It may deform 2-way direction or 1-way direction depending on each case.	
41112807	Rail sleeper holding force measuring instrument	An instrument that is designed to measure the external force acting on the upper part of the railroad ties when the train passes by. The running rail is installed on the upper part of the railroad tie and is joined with the spike, bolt, nut and others for its fixation.	
41112808	Electric rail car tester	Equipment that is used for the maintenance and repairing on the electric rail car. This is exclusive tester for electric rail car that confirms and inspects the motion condition and capability of various parts.	
41112809	Taximeter tester	A tester that verifies the running distance of the taxi meters installed in the business or individual taxi.

41113037	Microplate readers		
41113038	Alcoholometer	It is a special type of hydrometer which is used for determining the alcoholic strength of liquids. ált has a special scale marked by volume percents of an alcohol in water.	
41113039	Osmometer accessories	A device for measuring osmotic pressure. Accessories include products such as sample tubes, stirring wires, sample tips.	
41113040	Colony counter	An instrument used to count colonies of bacteria or other microorganisms growing on an agar plate.	
41113041	Elemental analyzer	A type of device that analyzes the ingredient elements that structure the organic compounds.	
41113042	Milk analyzer	A type of device that specifically analyzes the fat, protein, milk sugar, fat-free dry matter and others in the milk. This device generally uses the wavelength of the infrared ray to sense the light from the special wavelength territory for the quantitative analysis of the ingredient.	
41113043	Dietary fiber determination system	A type of device that analyzes the quantity with the dietary fiber ingredients contained in the food and others.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113044	Alcohol hydrometer	A meter that is designed to measure the alcoholic strength. It is the instrument that measures the Tralle scale and proof that measure the contents compared to the alcohol volume.	
41113045	Oil film tester	A tester that tests the degree of oil film formulation for machine lubrication oil and grease types, the change of grease thickness following the temperature change and others.	
41113046	Adhesion tester	A tester that experiments the degree of an object to adhere.	
41113047	Oil foaming characteristics tester	A tester that is designed to measure the volume of bubble generation that is produced by the influence of the surface tension at the time of entering into the lubrication oil for air.	
41113048	Color fastness tester	Color fastness means resistance of color on the dyeing substances based on the action influenced during the use or processing of dye thereof. This is a tester that is designed to test the color fastness.	
41113049	Combustion analyzer	Equipment that analyzes the combustion phenomenon of the substance in comprehensive term.	
41113050	Arsenic detector	Arsenic is the critically toxic compound for human body even for a small volume and it is the gray white-colored element is heated to sublime to generate compound with very strong chemical. This is a type of device that detects arsenic.	
41113051	Oxidation reduction tester	A tester that measures the ratio of oxidation-reduction of soluble substances within the solution.	
41113052	Chalking tester	A tester that measures the chalking phenomenon that drops the pigment or paint powder when the dried surface is rubbed after painting or printing.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113053	Rust prevention tester	A tester that tests the rust preventive capability of lubricant oil that is applied on the metal surface in the event of mixing the water or salt water on the lubricant.	
41113054	Demulsibility tester	A tester that measures the demulsibility, a property to separate into the individual substance for emulsion.	
41113055	Fuel gum tester	A tester that measures the contents of existing rubber substance in gasoline for vehicles or fuel for aircraft.	
41113056	Flame experiment wire	A material that is used in the reaction experiment of the oxidizing flame.	
41113057	Sludge densitometer	A type of device that measures the sludge, such as solid substance or floating substance contained in the liquid of water source or waste water from the plant.

41113116	Gas detector tubes		
41113117	Single gas monitors		
41113118	Multi gas monitors		
41113119	Dissolved carbon dioxide analyzers		
41113120	Carbon monoxide analyzer	An instrument used to measure carbon monoxide(CO) in gas.	
41113121	Vehicle vapor gas analyzing system	A type of device that is used to measure the evaporated gas of vehicle and it enables the hot soak test, retention test, background test and others.	
41113122	Olfactometer	A type of experiment device for laboratory that seeks the applicable dilute magnification by diluting until no more sense of odor.	
41113123	Smoke tester	A tester that measures the volume of smoke generated from the process of experimenting the chemical reaction in a laboratory.	
41113124	Respirometer	A type of device that is designed to measure the discharge gases, such as carbon gas, that are released to outside of body for certain time, periodically or consecutively through the chemical change of substance within the body and building up the oxygen volume supplied from outside to sustain the plant or animal life.

41113320	Lubricating oil testing kit		
41113321	Paint tester		
41113322	Nitrogen or nitrate or nitrite analyzer		
41113323	Sugar analyzers		
41113324	Paint concealment force tester	A tester that is designed to measure or test the hiding power of resin or paint. The hiding power is generally the capability to conceal the top coating paint or pigment, print ink, or resin applied just prior to the application.	
41113325	Washability tester	A tester that is designed to test the washability and abrasion of dried film of enamel paint, ready-mixed paint and emulsion paint.	
41113326	Paint grain measuring instrument	An instrument that is designed to measure the particle size and dispensability of various paints, such as paint, print ink and others.	
41113327	Film applicator	A type of device that is used for sample preparation to test the film capability of paint.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113328	Mercury analyzer	An analyzer that measures the ingredient of mercury included in tap water, sea water, flood, urine, heavy oil, soil, food, exhaust gas or atmosphere.	
41113329	Suspended solids SS tester	A tester that is designed to measure the solid substance found in several liquids and semi-liquid substances.	
41113330	Sludge thickness measuring instrument	A measuring instrument that precisely measures by using the method of infrared ray and others for the thickness of sludge generated from the sedimentation tank of the water supply and sewer as well as the condensation tank.	
41113331	Freezing and thawing tester	A type of tester that tests the resistance on freezing and thawing of liquid phase or mortar.	
41113332	Liquid ration analyzer	A type of device that is designed to measure the liquid ratio of each ingredient for mixed liquid after mixing two or more of liquids of mutually different character and condition.	
41113333	Zeta potential analyzer	A type of device that is designed to measure the zeta potential, an electric feature of the surface of colloid particle floating in the liquid.	
41113334	Paint coating test equipment	Test equipment that tests the formation of the film membrane by dipping the specimen in the paint liquid solution when coating on the paints and taking it out after certain period of time.	
41113335	Dissolved compounds multiple component analyzer	An analyzer that promptly analyzes several ingredients melted in the solution simultaneously.	
41113336	Steam emulsion number tester	A tester that is designed to measure the emulsification on the oil vapor.	
41113337	Dispersion or grain size tester	A tester that evaluates and tests the dispersion, cohesion, and safety of disperse system like colloid.

41113338	Biochemical oxygen demand BOD meter	A meter that measures the oxygen volume that is required for the aerobic bacteria to secrete the organic substance within certain time.	
41113339	Chemical oxygen demand COD meter	A meter that measure the pollution in the water by using the chemical products heavy chrome acid potassium, potassium permanganate. When the organic matter, pollutant substance in water, is oxidized chemically, the organic matter is disintegrated in carbon gas and water to consume the oxygen, and the oxygen volume consumed is the value for chemical oxygen demand.

41113647	Frequency calibrator or simulator		
41113649	Psophometer	An instrument that provides a visual indication of the audible effects of disturbing voltages of various frequencies	
41113650	Functional tester	An instrument designed and built to test parts and systems by emulating the operating envelope and requiring the test part to function as it would when used in the field.	
41113651	Ring out board	A test board to confirm mechanical connections and other elements of vehicle wiring harnesses.	
41113652	Wire assembly board	A mechanical testing template used to assure that cable lengths, connectors, fasteners, etc. are in the correct location and functioning properly.	
41113653	In circuit tester ICT	An instrument used to check values of electrical components prior to final assembly allowing repair while electrical content is reduced.	
41113654	Current loop meter	Device to test the amount of electrical energy flowing through an electrical line.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113655	Generator test set	Equipment that is designed to test the capability or function of power generator that generates electric energy.	
41113656	Servo system tester	Equipment that tests the capability of the servo system and its auxiliary parts of auto control system with the mechanical location and angle for controlled volume.	
41113657	Circuit breaker tester	Equipment that tests if the circuit breaker is appropriately functioned to switch the electric circuit under the abnormal condition for short-circuit breakdown and others.	
41113658	Switch durability tester	A tester that is designed to test durability following the switch motion of various switches or plugs and receptacles.	
41113659	Var meter	A meter that is designed to measure the reactive voltage and current characteristics for electric circuit desired to measure.	
41113660	Oscillator tester	A tester that is designed to test the capability and characteristics of oscillator used to generate the voltage or current with the arbitrary frequency.	
41113661	Voltage regulator tester	A tester that tests if the set output voltage is maintained or if the amplitude of the output voltage on the load change of input is appropriate.	
41113662	Cavity resonator	A type of device that displays the electromagnetic wave or electric oscillation in general.	
41113663	Transformer tester	A tester that is to analyze the rated voltage, rated current, function or characteristic of the transformer used in electric and electronic circuit.	
41113664	Phase sequence indicator	A tester that determines the phase sequence of generated voltage when the 3-phase generator is rotating to the regular rotation direction.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113665	Contact resistance tester	A tester that measures the contact resistance generated when contacting with mutually different conductors.	
41113666	Arrester tester	A tester that is designed to test for any malfunctioning of the lightning arrester.	
41113667	Watt hour meter test equipment	Test equipment that is designed to test the operation condition of the watt-hour meter that integrates the total volume of power used.	
41113668	Capacitor tester	A tester that tests the electrostatic capacity, duration, discharge characteristic and others to find out the abnormality of the condenser. It has the different measurement range in accordance with the condenser capacity.	
41113669	Line voltage detector	A type of device that is installed and used in the high voltage equipment or high voltage conductor.	
41113670	Resister test equipment	Test equipment that is used for testing the characteristics of temperature, voltage and current of resistance.	
41113671	Current divider	A shunt resistor that uses the meter in parallel to flow certain ratio of the measured current to measure the current in excess to the maximum scale figure of ammeter.	
41113672	Relay tester	A tester that tests if the operation time or holding figure of relay that is controlled electrically is correctly operated to meet the standard.	
41113673	Panel and switchboard meter	An electric instruction meter that is attached to the distribution board, cabinet panel, operation panel and others.	
41113674	Blasting machine tester	A tester that measures on how many shots can be made by using the blasting machine.	
41113675	Frequency control test equipment	A type of device that tests the equipment that controls the frequency to be available for any narrow range from the power plant.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113676	Low voltage tester	A tester that is designed to test the capability of large device under the alternating current of 600V or less and, the direct current of 750V or less.
41113677	Withstand voltage tester	A tester that is made to permit the variable voltage for measuring if the electric and electronic devices and the components thereof could endure without losing its functions.
41113678	Clamp tester	A portable tester that is to measure the voltage, current, frequency, temperature, resistance and others of the line without peeling off the insulation material or cutting off the electric wire or circuit.
41113679	Current transformer and potential transformer test equipment	Test equipment that tests the potential transformer and current transformer. It tests the highest voltage, insulation level, rated current, rated voltage, rated frequency and others.
41113680	Power factor meter	A meter that is designed to measure the ratio of actual electric power and the apparent power in the electric circuit.
41113681	Combi tester	A tester that may comprehensively measure for voltage, current, frequency, wave form and others by consisting of power supplier, digital multi-meter, function generator, frequency counter and others.
41113682	Electric power tester	A tester that indicates if the electric power has stable strength and frequency for the electric power generation, conversion and transmission and distribution system.
41113683	Lamp tester	A tester that tests a number of characteristics on life cycle of fluorescent lamp, incandescent lamp, light-emitting diode lamp and others or power efficiency, brightness, temperature change and others.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113684	Voltage and current meter calibrator	A type of device that is designed to measure and calibrate the error in the voltmeter that may measure the voltage and current simultaneously.	
41113685	Static electricity measuring equipment	Equipment that is designed to measure the presence of electric volume or its volume not moved that is shown on the friction object.	
41113686	Pulse meter	A meter that is indicated to display the period occurring with the drastic changes in voltage for the scale as operated by the current flowing in connection with the circuit.	
41113687	Brake testing machine	A tester that measures the signal for brake and other condition to determine for any problems. It is the tester that determines if the functions of running prevention, idle rotation prevention and others operate normally.	
41113688	Converter testing equipment	Equipment that is designed to test the capability and characteristics of converter that is used for electric, electronic and communication circuit.	
41113689	Controller testing equipment	Equipment that is designed to test the capability and characteristic on several types of controller used for electric, electronic and communication.

41113717	Fiber optic test sources		
41113718	Protocol analyzers		
41113719	Optical loss tester	A combined power meter with 6 wavelength laser source, for optical fiber network installation and maintenance. With the large capacity of data storage, USB interface and PC software, it's very convenient for field and laboratory testing.Auto wavelength recognition,Automatically data storage.	
41113720	Traffic intensity testing equipment	Measuring equipment that is used to find out the status of transmission of data when sent from the communication device.	
41113721	Video signal measuring instrument	The television scans the image to transmit the electric signal following the image. That electric signal is referred as the video signal. This is an instrument that is designed to measure the condition of synchronized pulse or the level of that signal.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113722	Electromagnetic interference EMI tester	A tester that tests whether the electric energy generated by radiation, conduction, radio frequency interference and others from electricity, electronic, and information devices through the public air and connected circuit and line would not provide adverse effect of electric energy to the human body and whether it would meet the standard value permitted not to generate the interference, such as erroneous motion, functional decline, damage and others of other devices.	
41113723	Radio equipment tester	A tester that tests the electric facilities that sends or receives radiotelegraphy, wireless phone and other electric wave.	
41113724	Telephone test set	Test equipment that determines the presence of malfunctioning by testing the transmission and receiving function, bell, call sensitivity and others of the telephone as the communication terminal.	
41113725	Optical power meter	A meter that is designed to measure the presence of the line or more in optical line work and maintenance and repairing work. It is the optical communication meter that measures the optical output coming from the optical fiber by using the light receiving sensor.	
41113726	Heat resistance tester	A tester that tests how well would the electric and electronic products endure under high temperature.	
41113727	Distortion meter	A meter that read the degree of distortion of the signal. The series resonance bridge or Wien bridge is generally used to remove the fundamental wave, and the remaining harmonics and noise ingredient are compared and measured with the fundamental wave and this would measure the degree of noise.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113728	Electromagnetic shield environmental chamber	An electromagnetic shielded room that is designed to test the appropriateness on electromagnetic interference of electric, electronic, and information device.	
41113729	Amplifier output meter	A meter that is designed to measure the output of the low frequency amplifier. It is designed to change the input impedance or output level broadly. The instruction uses the rectifier type voltmeter with the scale of decibel or VU (volume unit) meter inscribed, and when using it, it is important to take the matching of impedance between the measured amplifier and the output meter.	
41113730	Television tester	A tester that tests reception function image, blanking condition, number of scanning line, and voice reception condition to determine any problem for the television.	
41113731	Crystal tester	A tester that is designed to measure and test the crystal factor of resonance frequency, impedance and others if the frequency control function is appropriate at the designated frequency for crystal resonator used in frequency control in wireless transmitter and others.	
41113732	Amplifier tester	A tester that is manufactured for the inspection of the function or capability of amplifiers in several types that are used in electric, electronic and communication circuit.	
41113733	Antenna tester	A tester that is manufactured for the inspection of capability and characteristic of the antenna that is used for receiving the wireless communication or broadcasting.	
41113734	Frequency deviation meter	A meter that measures the maximum value of difference of instantaneous frequency of modulated wave and carrier frequency --non-modulation frequency-- in the communication.

UNSPSC v16_0901

1/27/2014

41113735	Microwave equipment tester	A tester that is designed for experiment as composed with microwave transmitter and receiver and other auxiliary part. This is a device composed to undertake reflected, ordinary wave experiment and others.
41113736	Electronic and communication refractometer	A meter that is designed to measure the ratio with the phase velocity of wave in free space and the phase velocity of wave in the given medium space.
41113737	Noise meter	A meter that is designed to measure the noise level of the circuit. Since the circuit for weight addition for appropriate frequency and other required functions are added, this device may mark what noise may cause how much interference thereof.
41113738	Communication line overhaul tester	A tester that is designed to read automatically the abnormality of communication line for prompt inspection by simply determining the insulation condition between insulated conductor and insulated conductor and between insulated conductor and earth on the line of national boundaries and subscriber. Following the insulation resistance value of line, it is possible to determine with the visual discretion by the light-emitting diode lamp and hearing discretion by the warning sound, Also, it undertakes the test
41113739	Electromagnetic susceptibility tester	A type of device that is designed to test the susceptibility on the external electromagnetic wave of electric, electronic and information device not to be interferes for erroneous motion, function decline, damage and others with respect to the electromagnetic wave having the electric and magnetic energy, such as static electricity, voltage, frequency and others that may be received from the outside for electric, electronic and information device.

Class

Commodity	Commodity Title	Definition	Synonyms
41113801	Geological compasses		
41113802	Geological prospecting apparatus		
41113803	Electromagnetic geophysical instruments		
41113804	Gravity geophysical instruments		
41113805	Induced polarization IP geophysical instruments		
41113806	Magnetometer geophysical instruments		
41113807	Resistivity geophysical instruments		
41113808	Gravimeters		
41113809	Ground penetrating radar	A type of device that uses the electromagnetic wave, such as light, sound wave, radio electric wave and others as one of the geophysical prospecting method.	
41113810	Hydrothermal testing equipment	Equipment that experiments how it is changed for rock or mineral of certain kind when the environment is set differently to the conditions of temperature and pressure at the time the rocks or minerals are generated.	
41113811	Solid bearing tester	In order to determine the bearing capacity, the loading plate is installed above the foundation base and applies the weight to measure the settlement on each weight to find the load and subsidence curve. This is a tester that is designed to measure the permitted yield strength of the foundation from the yield strength obtained from the loading test by the loading plate.

UNSPSC v16_0901

1/27/2014

41113812	Ground friction tester	A test that handles the friction, abrasion and lubrication of two sides that make contact and move around relatively.	
41113813	Standard aggregate	An aggregate sample that is defined for several properties to compare and test the capability and properties of aggregates.	
41113814	Soil plastic limit tester	A tester that measures the plastic limit of soil.	
41113815	Soil shrinkage limit tester	A tester that measures the contraction limit of soil. The shrinkage limit of soil has its volume not reduced even if the water content of soil is reduced to certain volume or below, and if the water content is increased this device indicates the increase of volume which is shown in function ratio of limit.	
41113816	Consolidation tester	A tester that is used for the consolidation test that seeks the compression volume and compression speed when piling load, permitting the drainage toward the axis direction and restricting the soil surface.	
41113817	Soil liquid limit tester	A tester that is used to measure the liquid limit of soil.	
41113818	Plate bearing tester	A soil testing device that measures the soil settlement following the compression load in order to find out the bearing capacity of soil from road, run way and others.	
41113819	Soil analyzer	A type of device that is designed to measure the chemical ingredient of lime, magnesium, potassium, fluorine, phosphorus and others contained in soil in ppm unit.	
41113820	Aggregate specific gravity tester	A tester that measures the specific gravity and absorption rate of thick aggregates. It is used for the analysis test of un-solidified concrete washing and it is structured of prevision specific gravity scale, steel wire for specific gravity measurement and water tank.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41113821	Soil penetration tester	A tester that is used for soil survey that measures the hardness of earth for finding out the road or cross section of the ground in engineering works.	
41113822	California bearing ratio tester	A soil tester that is used to determine the California bearing ratio of the subgrade soil by the penetration method in order to determine the bearing capacity of subgrade or roadbed.	
41113823	Specimen expansion tester	A tester that is designed to measure the expansion height following the time lapse for 96 hours as it is dipped in water with the defined load on the earth specimen produced with the pounding on mold.	
41113824	Soil head permeability tester	A tester that is needed for designing and constructing for dam body and drainage hole by knowing the uplift pressure on the structure installed underneath water, inundation area of base ground or dam body of earth dam, river bank, reclaimed dike.	
41113825	Soil aggregate analyzer	A type of device that is designed to measure the aggregation as the physical property of soil.	
41113826	Soil texture analyzer	Equipment that is designed to measure accurately the soil texture for the users.	
41113827	Soil unconfined compression apparatus	A type of device that is used to determine the compression strength and sensitivity of soil.	
41113828	Sand density cone apparatus	A tester that measures the unit weight of earth with the maximum particle radius of 5cm or less under the sand replacement method at the site.	
41113829	Underwater soil picking equipment	Equipment that is designed to collect the sample to analyze the soil of seabed. The lower part of the collector is made in sharp tube to catch the sample as the lower part of the collector speared deep into the seabed from its weight, and independent heavyweight is sometimes attached to enlarge the weight.

41114206	Location hub		
41114207	Total station		
41114208	Longimetry instrument		
41114209	Tachymeter or tacheometer	An instrument used to measure distances and, at the same time, horizontal and vertical angles.	
41114210	Optical level	An optical instrument designed to ascertain the height difference or equality between two points.	
41114211	Altimeter	A meter that measures the height above sea level. It is the device used to measure the present height at certain position or the height of the height of certain object or point on the ground.	
41114212	Mirror stereoscope	A type of optical instrument that reads the actual body as photo, map and object are expanded for better view.	
41114213	Coordinate comparator	A type of device that is designed to measure the plane coordinates on the photo. It is the equipment that is the basis of interpretive photographic surveying e.g., aerotriangulation, application photographic surveying, cadastration, digital photogrammetry and others.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114214	Survey template	A thin plate that is used for surveying. It is used to move the principal point and each direction line by securing on the photo.	
41114215	Dendrometer	A meter that is designed to measure the height of building structure, tree or others.	
41114216	Alidade	A type of device that is designed to test the direction of the sideline during the flat-table surveying. It is the device to fill in on the drawing paper by setting forth the line of collimation direction that is sometimes used to measure the height difference or distance of two points.	
41114217	Lead line	A type of device that is used for surveying. It is the line with the scale and it is generally made for steel chain, hemp yarn, cotton yarn, glass fiber and others, and it hangs the weight made by iron or lead at the end of the line.	
41114218	Planimeter	A type of device that is designed to measure the width of surrounded part with irregular curves on the plane.	
41114219	Plumbing arm	An apparatus that brings the measuring point of the ground and the measuring point of the flat table to be on the same vertical line by using at the time of surveying.	
41114220	Transit	A surveying instrument that is used for measuring the horizontal and vertical angles for two points. This device has the center of two same axles.	
41114221	Optical square	A type of device that can be used to determine the basic line in surveying or used in the precise semiconductor equipment by using the interference difference of prism arranged inside.

Commodity	Commodity Title	Definition	Synonyms
41114401	Anemometers		
41114402	Barometers		
41114403	Precipitation or evaporation recorders		
41114404	Radiosonde apparatus		
41114405	Rainfall recorders		
41114406	Precipitation or evaporation surface observing apparatus		
41114407	Solar radiation surface observing apparatus		
41114408	Temperature or humidity surface observing apparatus		
41114409	Wind surface observing apparatus		
41114410	Weather stations		
41114411	Meteorology instrument accessories		
41114412	Radio acoustic sounding system	Equipment that observes the meteorology on the upper layer. By applying the technology that combined the electromagnetic wave and sound wave technology, this meteorological instrument measures the vertical distribution of temperature, humidity, wind velocity, wind direction and others in the upper atmosphere.	
41114413	Ceilometer	A meter that is designed to measure and record the height of the cloud floor. There are optical method and electric wave method, and it is consisted of three parts; light, electric wave launcher and, receiver and recorder. The part combined with the receiver and recorder is referred to as the detector.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114414	Meteorological satellite receiving equipment	A system that outputs the meteorological chart through monitor and printer for the editing function through the computer by automatically receiving the photo taken by the artificial satellite that is sent to observe the meteorological condition on earth. It is structured with the receiving equipment for meteorological satellite image and the data processing device.
41114415	Lightning analysis system	A large scale spark discharge in air that occurs in nature is referred to as the lightning or thunder. This is equipment that is used to expect the storm and others by sensing the quantity of electric discharge and its location in the convective cloud.
41114416	Weather chart recorder or scanner	A type of device that is used in prompt and accurate sending and receiving by the institutions requiring the weather chart (ships and aircrafts in navigation, research institutions, various observatories, press media, and meteorology related institutions in nearby countries) or central government agencies.
41114417	Meteorological buoy robot	A type of device that has the function to forward the result of meteorology and marine observation on the sea to the land via wireless communication in real time.
41114418	Meteorological satellite data receiving and analyzing system	A system that processes and analyzes the meteorological data by receiving the data sent by the satellite (climate satellite) that loads the meteorological instruments. It is structured with antenna, receiver, processor and analyzer (computer).
41114419	Low level wind shear alert system	A type of device that warns in real time if the meteorological data detected by the turbulence arising from the layer near to the earth surface --planetary boundary layer-- exceeds the range of set value.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114420	Barometer calibrator	Equipment that is used to determine the correction value of the scale inscribed on the barometer by changing to pressure in the chamber to 950hPa, 990hPa, 1010hPa and 1040hPa.	
41114421	Hygrometer calibrator	Equipment that is used to determine the correction value of the scale inscribed on the hygrometer used for the measurement of humidity in atmosphere by adding the water into the chamber and heat it to change the humidity to 30 percent, 60 percent, and 90 percent.	
41114422	Rain gauge calibrator	Equipment that is used to determine the accuracy of rain gauge by supplying the water from the drop speed ranged from 20mm per hour to 30mm per hour by using the burette or rotary pump.	
41114423	Automatic weather system calibrator	Equipment that enables the capability inspection on each sensing element of the automatic weather system and check the data logger.	
41114424	Anemometer calibrator	Equipment that is used to determine the correction value of the anemometer used to measure the wind velocity of meteorology factors.	
41114425	Actinometer calibrator	A standard pyrheliometer that is used to determine the correction value of the pyrheliometer. It simultaneously measures with the same environment condition of the subject pyrheliometer to determine the correction value from the difference of measurement value of both.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114426	Baroswitch	A facility that closes and opens the circuit by the change of air pressure. The circuit of measurement sensor other than the temperature, humidity, and air pressure of radiosonde is used to make automatic connection to the sequential transmitter in accordance with the reduction of the air pressure following the increase of the device.	
41114427	Wind vane	A meter that observes the direction of wind blowing. It is consisted of two wings in general that is designed to read the wind direction with the indicator for the wind direction, and it has the remote reader attached.	

Class

Commodity	Commodity Title	Definition	Synonyms
41114501	Dynamometers		
41114502	Elastometers

41114508	Surface testers		
41114509	Tensiometers		
41114510	Torque limiter		
41114511	Softness tester	A tester that is used for evaluating the resistance for bending, a mechanical property of soft material, like the magnetic tape, film plastic, textile, and paper products.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114512	High speed rotational balance tester	A tester that measures the balance of the body of rotation in high speed. By rotating the body of rotation in high speed on the stand, the vertical shaft, it measures the location of the unbalance oscillation and the volume of oscillation as delivered to the bearing attached to the rotating shaft.
41114513	Eccentricity measuring instrument	An instrument for tool measurement that is used to measure eccentricity of several tools, arbor, shaft and saw tooth, and used for the measurement of circular shapes.
41114514	Twist vibration measuring instrument	Twist vibration is the phenomenon that changes very finitely for rotation by the load change, resonance of shafting and others of the body of revolution (engine, motor, prime mover, pump, compressor, coupling, shaft, damper, ship propelling system and others). This is an instrument that measures twist vibration.
41114515	Centrifugal force tester	A type of device that finds out the relationship with the radius in centrifugal force of object with the uniform circular motion and mass of object, period, and circular motion.
41114516	Cutting force measuring instrument	An instrument that is designed to measure the size of cutting resistance under the base study for the tool geometry or cutting process. Cutting force is the resistance force received by the tool when the workpiece is processed for cutting.
41114517	Hydraulic bulge tester	A tester that tests the hydraulic formation of think plate. It is generally used in processing of narrow mouth impossible for mechanical press work or thin plate with thin thickness.
41114518	Zipper endurance tester	A tester that is designed to test the endurance of the zipper used mainly in clothing, bag and leather products and others.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114519	Tug and trolley system	A precision experiment equipment that surveys the resistance, speed following the cargo volume, fuel consumption volume and others on floating substance, such as ship, submarine, petroleum prospecting ship and others. A model reduced of actual goods is manufactured for the purpose of education and research to design ship, submarine, petroleum prospecting ship and others to prove its characteristics and capability through repeated education and experiment in a way of forecasting the product characteristics a
41114520	Drop tester	A tester that is designed to test the impact resistance of the packing material, impact resistance of contents in the package, appropriateness of packing material, strength comparison of packing box, impact resistance strength of actual goods by dropping packed cargo, packing box or small device from certain height.
41114521	Air compressor tester	When the compressed air is discharged into the air at the entrance of the container, several works can be done by using the acting force and certain sized pressure is required in accordance with the purpose of use. It is a type of device that is designed to test whether the air compressor or compressed air would maintain certain pressure.
41114522	Gear tester	An exclusive gear tester that measures several errors of gear.
41114523	Test bar	A taper gauge that is the auxiliary tool to use in the static level test that surveys the parallelism and straightness of machine tool, measuring apparatus and others and shaking on the rotating shaft.

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114524	Hydraulic tester	A tester which investigates the leakage or deformation by applying the hydraulic pressure to test the capability of pipe, tank and steam boiler.	
41114525	Oil filter tester	A tester that is designed to test the capability of the filter that filters the impure substance within the lubricant oil used in machine by using the particle counter.	
41114526	Air cleaner tester	A tester that is designed to test the normal operation of the air purifier, filtering capability, filter replacement period, air-ventilation resistance, clean-air efficiency, dust collection and others.	
41114527	Belt tester	A tester that is designed to test the characteristics of V belt that is used for delivering the vehicle power and general power.	
41114528	Planer motion mechanism measuring instrument	An instrument that is used for testing the ship with the compulsory motion in order to experimentally seek the hydrodynamic forces coefficients from the ship model towing tank.	
41114529	Tire running tester	A tester that tests the maneuverability and safety of the tires from the external forces.	
41114530	Bonding stress tester	A tester that is designed to measure and test the extreme force and strength.	

Class 41114600 Metals and metallurgy and structural materials testing instruments

Commodity	Commodity Title	Definition	Synonyms
41114601	Abrasion testers		
41114602	Compression testers		
41114603	Concrete or cement testing instruments		
41114604	Corrosion testers		
41114605	Crack or corrosion detectors

41114611	Hardness testers		
41114612	Impact testers		
41114613	Load frame		
41114614	Metal testing instruments		
41114615	Photoelastic testing instruments		
41114616	Proofstress indicators		
41114617	Relaxation testers		
41114618	Roughness measuring instruments		
41114619	Shear strength testers		
41114620	Shock testing apparatus		
41114621	Tension testers		
41114622	Torsion testers		
41114623	Flexure or transverse testing machines		
41114624	Vibration testers		
41114625	Wear testers		
41114626	Welding testing apparatus		
41114627	Proving ring	A standard device used for the calibration test of tension and compression load of all-purpose material tester. It is designed to use for load inspection and ordinary management of the material tester.	
41114628	Plasticity tester	A tester that measures the plasticity of uncombined raw material, combined raw material, and reproduced raw material of unvulcanized rubber and rubber substance.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114629	Heat distortion tester	A tester that tests the degree of deformation when applying the heat to determine the stability following the temperature change on plastic, electric wire and rubber product.	
41114630	Thermal shock tester	A tester that is designed to measure the change of material from the thermal stress arising from quick heating or quick freezing.	
41114631	Stress tester	Equipment that tests the resistance arising from the object when it is applied with the external force (load) as the stress.	
41114632	Tensile strength tester	A tester that applies the load until the specimen is pulled in certain speed to break down. This is to measure the tensile strength, most representative mechanical strength characteristic in various materials.	
41114633	Thermal expansion tester	A tester that is designed to measure the expansion rate of the length generally following the temperature, namely, coefficient of linear expansion.	
41114634	Erichsen tester	A tester that measures the Erichsen value that displays the degree of plastic deformation that flattens the metal well.	
41114635	Jewel appraising tester	A device that may appraise and discern by detecting the optical and physical characteristics in various precious stones.	
41114636	Polymer molding condition measuring instrument	A type of device that is designed to test the change of pressure, volume and temperature influenced when the polymer is injected for molding.	
41114637	Beam test apparatus	An apparatus that experiments bending, deformation, twisting, stress of beam and others in accordance with the shape, structure, support method and others of various beams.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114638	Load tester	Equipment that is designed to measure the load working on the structure. This is the load tester of flexural fracture for pressed cement roof tile or fiber reinforced cement boards.	
41114639	Cement flow tester	Equipment that is designed to measure the flow from the properties of cement or concrete.	
41114640	Road plane measuring equipment	Measurement equipment for road management that measures and records the flatness of paved road with asphalt and cement concrete.	
41114641	Laboratory cement curing equipment	A device that cures the cement mortar.	
41114642	Pinhole detector	A device that detects and warns the occurrence of defective pin hole on the insulation film and others coated to prevent the corrosion of the metal surface.	
41114643	Cement soundness tester	A tester for the stability of cement that is mixed and used on the mortar, and this tester examines the expandability, cracks, twisting and others.	
41114644	Concrete air measuring instrument	A testing instrument that measures the air volume contained in the concrete yet to be solidified.	
41114645	Mortar length tester	A tester that measures the length change of the mortar following the volume of water to make the mortar with certain properties.	
41114646	Vicat needle tester	An essential tester that is designed to test the normal consistency of hydraulic cement and the coagulation time of the hydraulic cement. It is the tester that measures the normal consistency or coagulation time by applying the pressure on the plunger with the needle with certain weight on the cement paste.	
41114647	Slump tester	A tester that is used for concrete to measure the consistency of the concrete to make the appropriate concrete.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114648	Concrete or cement vibration tester	A tester that measures the vibration of concrete used in road pavement or civil construction.	
41114649	Mortar permeability tester	A tester that measures permeable volume and permeable ratio by applying the pressure with water on the mortar or cement for construction.	
41114650	Concrete cylinder mold	A mold that is to form the cylinder specimen for testing the compression strength of the concrete.	

Class

Commodity	Commodity Title	Definition	Synonyms
41114701	Cardboard testing instruments		
41114702	Textiles fastness testers		
41114703	Leather testing instruments		
41114704	Paper testing instruments		
41114705	Textile testing instruments		
41114706	Wood testing instruments		
41114707	Textile or paper strength tester	Equipment that measures the strength from the properties of textile or paper.	
41114708	Water vapor permeability tester	A tester that measures the volume of vapor or moisture penetrating paper, film, or textile product used for the moisture proof packing.	
41114709	Yarn testing instrument	An instrument that measures the properties of weight, diameter, linear density and others per each unit length of the thread.	
41114710	Thermal transmittance tester	A tester that measures the degree of maintaining the body temperature or heat transfer coefficient on the external air, namely, thermokeeping of the textile goods, such as textile for clothes, filling cotton, blanket, rug, leather and others.	
41114711	Textile drape tester	A tester that is related to the textile that measures draping of textile.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114712	Textile water repellency tester	A tester that tests the resistance on wetting of water for water-proofed textile, fiber and paper.	
41114713	Textile crease recovery tester	A tester that measures the property to recover to the original condition for the wrinkle generated from using the textile.	
41114714	Textile maturity tester	A type of device that measures the maturity condition for the cotton. It displays the degree of growth by the diaphragm on the cotton textile.	
41114715	Textile or paper air permeability tester	Equipment that measures or tests the air permeability from the properties of textile or paper.	
41114716	Textile shrinkage tester	A tester that is used when measuring the washing shrinkage rate of cotton, bast fiber fabric and kind of cotton bast fiber blend fabrics.	
41114717	Textile baking tester	A thermal processing tester that dries the sample or evaluates dimensional stability by solidifying the shape or affixing the dye mainly on the dye sample of woven fabric or knitted fabric.	
41114718	Textile pilling degree tester	A tester that tests the phenomenon of peeling off the surface by the friction with the textile or knit.	
41114719	Paper sheet testing machine	A type of paper manufacturing device for test that is purported to undertake the characteristic test of pulp.	
41114720	Paper and cloth water absorption tester	A tester that measures the degree of paper or fiber to absorb water.	
41114721	Fiber length tester	A tester that measures the length of fiber, the most important feature for various fibers.	
41114722	Tearing strength tester	A tester that measures the strength of tearing by applying certain load on textile, paper, vinyl, leather and others.	

UNSPSC Codeset

UNSPSC v16_0901

1/27/2014

41114723	Bursting strength tester	A tester that measures the pressure when the specimen is broken with the pressure applied to the thin-plate shaped material, such as paper, fiber, vinyl film, medical leather and others.

Class 41114800 Ceramics and glass testing instruments

Commodity	Commodity Title	Definition	Synonyms
41114801	Ceramics testing instruments		
41114802	Glass testing instruments		
41114803	Pottery testing instruments		

Class 41115100 Coal and ore testing instruments

Commodity	Commodity Title	Definition	Synonyms
41115101	Coal testing instruments		
41115102	Goniometer	A type of device that measures the size of the facial angle of the mineral crystal. The angle of a very small object can be measured by attaching mineral crystal to the semi-circular protractor and using the fixed bar and the moving bar.	

Class 41115200 Radar and sonar systems and components

Commodity	Commodity Title	Definition	Synonyms
41115201	Radarbased surveillance systems		
41115202	Feed horns		
41115203	Meteorology radar	A type of radar that is used in detecting the meteorology phenomenon. Rain, snow, and cloud consisted of water drop or ice crystal reflects the electric wave that it may detect the collective bodies in typhoon, thunderstorm, front and others.	

Class 41115300 Light and wave generating and measuring equipment

Commodity	Commodity Title	Definition	Synonyms
41115301	Light absorption meters		

UNSPSC Codeset

41115302	Anechoic chambers		
41115303	Frequency analyzers		
41115304	Frequency counters or timer or dividers		
41115305	Electrical frequency meters		
41115306	Interferometers		
41115307	Lasers		
41115308	Lightmeters		
41115309	Luxmeters		
41115310	Optical calibration sets		
41115311	Photometers		
41115312	Bench refractometers or polarimeters		
41115313	Handheld refractometers or polarimeters		
41115314	Polarimeters		
41115315	Polariscopes		
41115316	Reflectometers		
41115317	Stroboscopes		
41115318	Colorimeters		
41115319	Tube or plate readers		
41115320	Signal generators		
41115321	Infrared imagers		
41115322	Laser beam analyzers		
41115323	Function generator	Function generators are equipments which produce and provide various waveforms (Sign Wave, Pyramidal Wave, Square Wave, etc.) which satisfies given functional relations regarding time and voltage input.	
41115324	Ultraviolet sensor		
41115325	Thermal imager	Device that detects radiation in the infrared range of the electromagnetic spectrum.

41115326	Optic collimator	A type of device that includes the light source or heat source and optical system. It is manufactured to assist the arrangement of the optical system of the infrared ray equipment.	
41115327	Photoelectric measuring equipment	Equipment that is designed to measure the strength of electric current generated from the photoelectric effect with the electrons released when the light is shed on a substance.	
41115328	Wave form synthesizer	A type of device that adjusts the harmonics and frequency amplitude and generates various frequencies and phases to obtain the desired wave form.	
41115329	Radiowave propagation measuring equipment	Equipment that is designed to measure the electric wave state of dense call area or call flaw area in a way of measuring the strength of signal, degree of interference, re-use of channel, degree of call volume and noise and others.	
41115330	Haze meter	A meter that measures the turbidity level when the light penetrates plastic film, plastic plate, glass plate and others.	
41115331	Glossiness measuring instrument	An instrument that measures the glossiness of material by measuring the sleekness and reflection rate of the material surface.	
41115332	Optical wavelength meter	A type of research and experiment meter that is designed to review the change in optical wavelength, temperature, and various reliabilities of various optical devices.	
41115333	Photon measurement instrument	An instrument that is used to measure the number of photon, one of the elementary particles.	
41115334	Whiteness tester	A type of device that measures the whiteness of paper and several pulverulent bodies, such as agricultural food like wheat powder, sugar, chemical product, or cement.

41115335	Vectorscope	A special synchro-scope that indicates the vector volume of impedance, voltage, current, and frequency modulation signal, the chromaticity signal of phase modulation signal television on the Braun tube.	
41115336	Laboratory ultraviolet ray lamp	A type of portable inspection device that is used in observation for the defect on the surface by shedding the ultraviolet rays with the built-in light source.	
41115337	Wave measuring instrument	An instrument that measures the amplitude, frequency, degree of distortion, harmonics rate and others on the wave-form of single signal component from the complicated frequency system.	
41115338	Illuminance meter	A meter that measures the brightness of the reflector surface of light or the light source with certain width.	
41115339	Ellipsometer	Equipment that analyzes the structure of the thin film by measuring the thin film thickness, refraction rate, extinction coefficient, and density with the change shown when reflecting the laser or polarized light on the sample.	
41115340	Photometer accessories	Instrument and accessories used to measure the light intensity

41115408	Infrared spectrometers		
41115409	Nuclear magnetic resonance NMR spectrometers		
41115411	Inductively coupled plasma ICP spectrometers		
41115412	Spectrobolometer	A type of device that is used to measure the reflection and penetration for each wavelength of plant. It is also used to measure the amount of radiation for each wavelength of indoor artificial lights.	
41115413	Flow cytometer	A device that makes the quality and quantity analysis on sell particle size, internal structure and others of sample by measuring the scattered light and fluorescence radiated by individual particle with the irradiation of excitation light on the thin current flowing down the particles, such as dyed cell with fluorescence and others.	
41115414	Radio ray spectroscopy system	Equipment that analyzes the type and strength of isotope in the sample by measuring the unique released energy of the radiation isotope.	
41115415	Electron spectroscopy system for chemical analysis	Equipment that is designed to analyze the characteristics of the sample surface by measuring the binding energy of the photoelectron discharged by the light.	
41115416	Electron spin resonance spectrometer	A meter that is used to clarify the micro-structure of distribution of impure substance within the sample, lattice defect or others by measuring the influence of the internal magnetic field by the neighboring electron or atomic nucleus spin when there is any electron not paired within the sample.	
41115417	Atomic absorption AA spectrometer accessories	Accessories adding speed and a better sample identification to an autosampler	
41115418	Spectrophotometer accessories	Accessories adding speed and a better sample identification to an autosampler

Class 41115500 Sound generating and measuring equipment

Commodity	Commodity Title	Definition	Synonyms
41115501	Sonars		
41115502	Sonometers		
41115503	Sound measuring apparatus or decibel meter		
41115504	Sound velocity analyzers		
41115505	Acoustic testing rooms		
41115506	Noise generator	A type of device that generates certain noise for using on the level calibration of extremely short wavelength with noise factor and others or noise loading tester.	
41115507	Voice analyzer	A type of device that analyses the wavelength, sound volume, frequency, wave form by measuring and recording the human voice. It may use computer for voice characteristic capture, analysis, edition, classification, reproduction and others and it is generally used for voice correction, analysis, research and investigation.	
41115508	Sound detector	A sound detector with the stethoscope-shape that is contacted to an object to detect the abnormal sound.	
41115509	Underground pipe and cable detector	A detector that checks the presence of underground reclaimed materials, such as communication cable underground, power cable, gas pipeline, water pipeline, underground pipeline and others.	
41115510	Waterpipe leak detector	A type of device that is used to detect the water leakage by sensing the ejecting sound with sensor in order to survey the leakage in water pipe and others.

41115511	Hearing aid tester	A tester that inspects the capability of the tool that reinforces the hearing of the ear that has problem in hearing.	
41115512	Pinger	Equipment that finds out the speed of search vessel and water temperature. When there is an accident of drowning in deep lake, river or ocean, under the poor situation with terrible water view, the scanning sonar is used to find out the location of sunken ship, floor condition, vehicle or drowned person.	
41115513	Acoustic generator	A type of equipment that generates the sound. It artificially controls the sound to use as the sound source to test the acoustic absorption, insulation of sound, residual time, penetration of sound, distribution of sound and the power of machine sound when testing the construction sound.	
41115514	Sonobuoy	A buoy that has the sound detector and the wireless transmitter built-in. It is used to detect the location and confirm the location of submarine, noise under the sea, and situation of sound dispersion.	
41115515	Hydrophone	A sound electric converter that reacts to the underwater sound energy to convert the energy into the intrinsically consistent (same) electric energy and stimulate the electric form factor, This machine is specially manufactured to use in water.
