Checklist of the mosses of sub-Saharan Africa (version 5, 12/06)

Brian J. O'Shea

Botany Department, Natural History Museum, Cromwell Road, London SW7 5BD, U.K.
(brian@brianoshea.co.uk)

Abstract. 2746 moss taxa are listed for sub-Saharan Africa and adjacent islands, with distribution by country. Each distribution record is supported by a literature reference and 7697 African synonyms and annotations are included, also supported by references, giving a total of 849 references. Totals of taxa for each geographic unit are provided, together with family placement for all genera. The document replaces version 4, published in December 2003.

Preface

This is the fifth revised version of the African moss checklist for sub-Saharan Africa. It is now over eleven years since the first publication (1663), and three years since the previous version [7444]. It should be noted that all references in this paper are given as numbers, but these are translated into 'author+year' references in the bibliography. Those in round () brackets were present in the previous edition, and those in square brackets [] have been added or changed in this edition. References included in previous versions retain the same number. With version 5 there are now an additional 395 publications included with 5240 new synonyms and annotations, as well as corrections and additions missed from earlier publications. Earlier versions only included synonyms that post-dated the sources used to put the original list together, but now all the synonyms known from sub-Saharan Africa are included, significantly increasing the size of the document. Despite the many new taxa added to the list, the taxon count has dropped significantly, from 2791 to 2746, reflecting both the significant amount of taxonomic work on African mosses in recent years, as well as the removal of many as synonyms. The task of accumulating and entering new data into the database continues, but this version contains all data available up to the end of November 2006.

The data in the first version was analysed further in two papers (2602, 2365), and periodically further updates are made to some of this data via the Tropical Bryology Research (TBR) web site:

<http://www.TropicalBryologyResearch.co.uk/>

Take the 'Africa/diversity' option and look for the heading *African moss diversity and endemism*. The data from this version should be on the website by (or shortly after) publication date.

As with previous versions, publication will be simultaneously in both printed and on-line versions: *Tropical Bryology Research Reports* **6**: 1-252, and via the website given above, taking the 'TBR Reports' option. The PDF format is recommended for download as this mirrors the author's printed version; the MS Word version may paginate differently in different versions of software. If you have downloaded the electronic version, please copy the files to anyone who might have an interest. Future updates are planned at two to four year intervals, and will be made available in the same way.

Although the introductory comments are substantially the same as previous versions, there are some changes in this version. These are summarised at the end of the introduction.

Introduction

This checklist is intended to give an overall view of the distribution of tropical African mosses, and a list of sub-Saharan hepatics is also available [8367], via our website. The need for checklists containing "current names" (rather than just an indiscriminate list of all the names ever used, whether accepted or not) has been identified as one of the most vital tools needed to progress conservation and ecological issues in botany (1639). Such checklists are seen as tactical steps towards a global plant species information system. There has also been debate about the most appropriate approach to putting together the taxonomic backbone of such an information system and what information should be stored, and the data in this checklist covers the basic requirement, common across all plant groups: species name, relevant synonyms, generic and family placement, geographical distribution and bibliographic citation.

The scope of the checklist is all of sub-Saharan Africa, together with the Atlantic and Indian Ocean islands in the tropics. This does not quite conform to the Index Muscorum divisions, as part of Africa-4 is excluded to the south (the islands in the southern Atlantic and Indian Oceans). For practical reasons it was necessary to draw a definite boundary round the region, even when this cut across existing affinities, such as the north Atlantic islands (Cape Verde is included, the Canaries, Madeira and Azores are excluded). This differs slightly from the combined *Bryologia Africana* (398) and *Flora of Southern Africa* (83) areas, by including the islands of Cape Verde, Ascension and St. Helena.

All African countries have been covered by checklists, although some of these are now rather old, and these were the source of the original data for this checklist. Apart from the recently added Sudan checklist, these were mapped in the original 1995 publication, and are:

West Africa	Schultze-Motel 1975	(47)
Central Africa	Born, Frahm & Pócs 1993	(65)
Southern Africa	Perold & Van Rooy 1993	(1531)
Ethiopia	Cufodontis 1951	(50)
Sudan	O'Shea 2004	(7430)
Eastern Africa and Angola	Kis 1985	(46)
Atlantic islands	Geheeb 1910	(1296)
Indian Ocean islands	Crosby & Schultze-Motel 1983	(40)

All of this data has been entered into a database, and updated with later publications. I would be grateful for pointers to any omitted publications, or monographs that include African taxa, that are not already included in the references. Where data has been taken from an existing checklist, I have not included all the individual supporting references and have instead just

given the name of the checklist - e.g. east African references will typically show (46) (= Kis, 1985) as the reference. It will be necessary to go to the source document quoted to get the detailed references. The resulting list contains 2746 taxa, with over 10,000 taxon/country occurrences - an average of around 3.6 countries (or part countries) per taxon (slightly up on version 3). All taxa in the source lists (including synonyms) should appear in the checklist as either accepted taxa, or as synonyms or excluded taxa.

This document is not intended as a taxonomic work. The quality of the data in this list is variable in its taxonomic quality, although it attempts to present the latest position for all taxa. Some difficult and complex families where revision is almost complete (e.g. Calymperaceae) are in a good state, and the list represents a useful synthesis of the current position. Where the process of revision is still underway (e.g. Fissidentaceae) there are now large numbers of synonyms, with only a few more taxa still to tackle. In other areas work has hardly begun, such as Sematophyllaceae and parts of Hypnaceae, and this will continue to cause problems for those attempting to identify plants in these groups. The list will at least indicate the scale of the problem.

Producing and maintaining the list would have been unmanageable without computer assistance, and all data used in the list is held on the TAXA system (115), and the main taxon distribution list and list of references was generated directly from TAXA.

Although this list was checked against the previous version and a list of new synonyms, there has been considerable manipulation of data and what was once correct may no longer be so. Please let me know of any mistakes.

Assumptions, Comments & Compromises

A list this size cannot be produced without taking a pragmatic view, and listed below are some of the problems faced and assumptions taken.

- The basic list has been built from the latest 'authoritative' list for the country concerned - i.e. on lists that validate the occurrence in a country via earlier lists or collections, as discussed above. The area included in the checklist, and the countries involved, are shown in Fig. 1. All taxa mentioned in *Index Muscorum* as occurring in Africa-2, 3 or 4 (excluding Africa 4 south of South Africa) are included as either valid taxa, or as synonyms, or as excluded taxa. Records not localised to a country will be treated as doubtful or excluded taxa, and taxa that are not identified at least to subspecies or variety level (i.e. forms) are marked as excluded. New publications have been monitored for potential additions and changes since the first version of this list in 1995, although no checks have been made on most taxa as to their taxonomic validity or whether they are correctly identified.
- Where the source information does not provide sufficient locality detail, group names have been used (e.g. Senegambia, for Senegal + Gambia), and where the parts are particularly isolated (e.g. the two major islands belonging to Equatorial Guinea, Fernando Po (Bioko) and Annobón) distribution is recorded separately from mainland Rio Muni. In previous versions intra-country divisions have been used (e.g. South Africa was divided into four regions), but these have now been removed.
- Where there is more than one reference for the occurrence of a taxon in a country, I have not in most cases checked whether the specimens referred to are different. Where I have checked, I have chosen between duplicates by retaining those with: 1) more widely

published references, 2) more authoritative/detailed references, 3) references with wider information.

- All relevant references seen up to the end of November 2006 have been included.
- It has been assumed that if one plant is synonymised with another, then its distribution data can also be transferred. A situation where this approach could cause problems is exemplified by *Rhodobryum spathulatum*, where the type is actually *Bryum aubertii*, but the collections called *Rhodobryum spathulatum* are in fact *Rhodobryum ontariense*. I hope I have managed to identify most of such cases.
- Synonyms are listed in alphabetic sequence with the rest of the names, and not under the valid taxa to which they apply. This means that it may be difficult to work back from a reference to the original name(s) under which it was collected, other than by working from the source document. However, access to resources such as TROPICOS/MOST (<http://mobot.mobot.org/W3T/Search/most.html>) will usually allow the connections to be elicited.
- No distinction has been made between nomenclatural and taxonomic synonyms.
- A number of taxa have been found that do not appear in *Index Muscorum* (1521), or the *Index of Mosses* (80, 1644, 3649, 6072), or in Missouri Botanical Garden's TROPICOS/MOST website (see paragraph above). The status of such taxa is not always clear (although usually *nomina nuda*), but they are all now included as unaccepted taxa, to prevent them getting missed from taxonomic revisions. Taxa that are not accepted for nomenclatural reasons (i.e. they have a type specimen and legal description, but have been given an illegal name) are still included in the list, but replacement names are not yet published.
- No judgement has been made on the age of records - all apparently valid records have been accepted.
- From version 3, the northern boundary of the area covered was extended to include Mauritania and the northern parts of Mali, Niger, and Chad, made possible by the publication of a North African checklist (4565); the northern border is now the same as that of *Index Muscorum*'s 'Africa-2'
- Standard country abbreviations are used, following Hollis & Brummitt (4505), but with additions to cover those areas such as islands and part-countries that are treated here in the same way as countries but by Hollis & Brummitt as sub-divisions of a country.
- Abbreviations of names in taxon authorities follow Brummitt & Powell (4924).
- Journal titles follow Crosby 1999 (5043).

Changes in this version

The main change in this edition is the almost doubling of the number of synonyms and other unaccepted names. These came mostly from *Index Muscorum*, and the rest came from later publications. The sources of the synonyms have all been identified, in many cases with specific page numbers in the references. The reference given is not necessarily the earliest - just a statement of where the synonym came from. I have attempted to provide the earliest published reference, but in some early references *Index Muscorum* is substituted as the source. All the references mentioned are available via the London Natural History Museum library, and the details will also be available via TROPICOS/MOST (including viewing scans of some of the original publications).

Acknowledgements

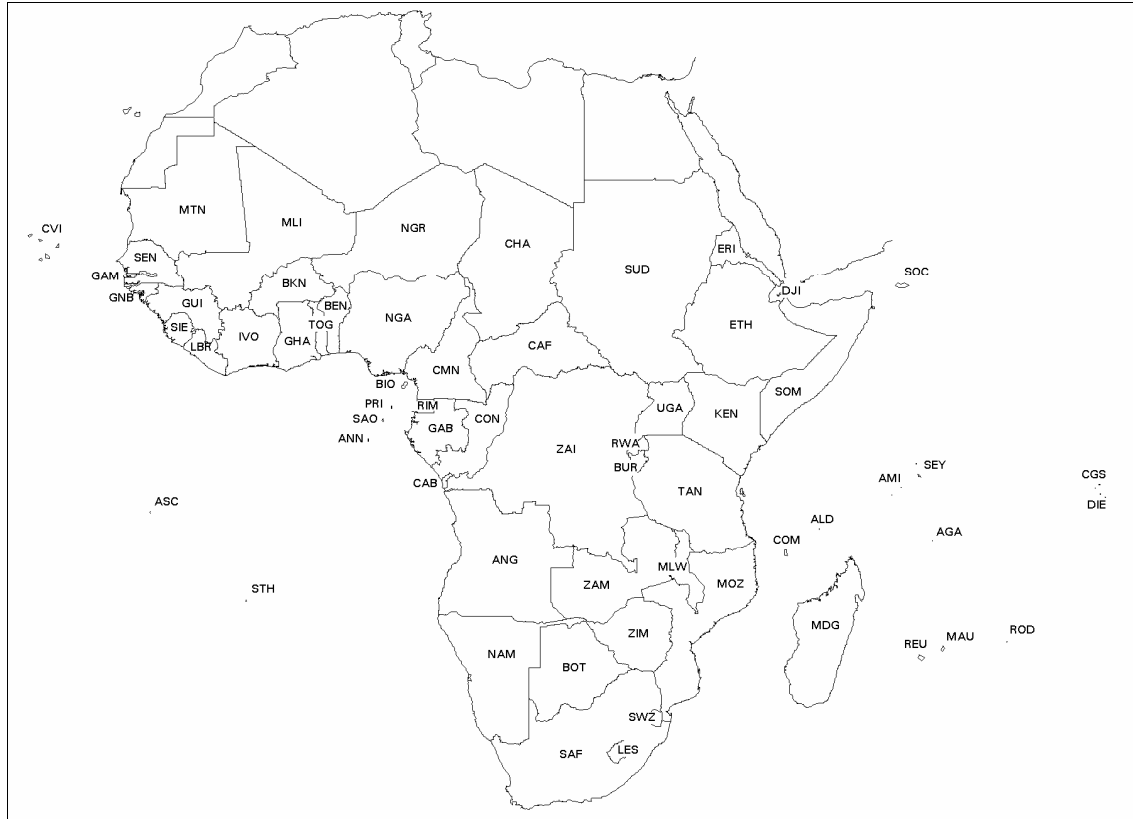

Version 1: I have received assistance on this project from a large number of people, but I would particularly like to thank Len Ellis for the time he has spent in searching out specimens and references, and Martin Wigginton for discussions especially in the early days of the checklist, and many pointers to literature references. Thanks also go to those who have commented on the final family treatments: Ida Bruggeman-Nannenga (Fissidentaceae), Len Ellis (Calymperaceae), Johannes Enroth (Neckeraceae), Allan Fife (Funariaceae), Jan-Peter Frahm (Dicranaceae), Angela Newton (Pterobryaceae), Ryszard Ochyra (Amblystegiaceae, Brachytheciaceae, Grimmiaceae), Philip Sollman (Pottiaceae), Dries Touw (Thuidiaceae s.l.), and to Tamás Pócs, who gave thorough comments on the whole paper in a very short space of time. As I did not always accept the advice given, any mistakes are mine.

Version 2: After the first issue of this Checklist, I received feedback from many people pointing out errors and omissions, and I hope these are all dealt with in this new version.

Version 3: Thanks to Rosa Ros for making the North African checklist [4565] available to me in advance of publication, to many others, some just casual readers, others experts in their own field (including several already thanked in version 1), for discovering errors and pointing out missed references, and to Martin Wigginton for preventing many production errors creeping through.

Version 4: Thanks again to Martin Wigginton for his meticulous attention to detail in reviewing this manuscript, and to Philip Sollman for highlighting a number of areas needing attention in the Pottiaceae. The many changes and additions in this list reflect a very healthy level of activity in both taxonomy and collecting, but there is still a long way to go; I thank all working on the African moss flora for their input, and long may it continue.

Version 5: The addition of all remaining African moss names should now be in this checklist, and this not only sets a baseline for the flora, but it should reduce any doubt people have about whether or not they have seen all the details.

Checklist

The list is in alphabetic order of taxon names, whether or not they are accepted taxa, and the unaccepted names (mainly taxonomic and nomenclatural synonyms) are shown inset, in a smaller font, along with comments and excluded species. The assumed family of each genus is shown in Appendix B.

The countries in which a taxon is recorded are shown by a three character abbreviation. These abbreviations are interpreted in Figure 1 and in Appendix A. The numbers in brackets after each country (and after synonyms and unaccepted names) are the literature references, which are translated to 'author+year' in the References section. Those synonyms and unaccepted names added in this version have the literature reference in square brackets []. and those of earlier names are in round brackets ().

Abietinella abietina (Hedw.) M.Fleisch. LES(1635,4897), SAF(1531,4897,8328).

Acanthocladiella albescens (P.de la Varde) H.Rob. & C.F.Reed. Excluded: see notes for *Heterophyllum albescens*.

Acanthocladiella angolensis Dixon, *nom. nud.* = *Rhacopilopsis variegata* (4720: 216)

Acanthocladiella congoana Thér. & Dixon ex P.de la Varde = *Rhacopilopsis variegata* (4720: 216)

Acanthocladiella flexilis (Renauld & Cardot) M.Fleisch. = *Rhacopilopsis variegata* (4720)

Acanthocladiella guineensis (Broth. & Paris) H.Rob. & C.F.Reed = *Rhacopilopsis variegata* (6733)

Acanthocladiella julicaulis (Broth. & Paris) H.Rob. & C.F.Reed = *Rhacopilopsis variegata* (6733)

Acanthocladiella kilimandscharica Broth. & P.de la Varde = *Rhacopilopsis trinitensis* (4720)

Acanthocladiella transvaaliensis Thér. & Dixon in Sim = *Rhacopilopsis trinitensis* (4720)

Acanthocladium afro-nemorosum Broth. ex Paris, *nom. nud.* Excluded: no original specimen stated, but probably related to *Rhacopilopsis*.

Acanthocladium albescens Thér. & P.de la Varde = *Wijkia albescens* [2751: 71]

Acanthocladium albi-alare M.Fleisch., *nom. nud.* = *Heterophyllum albi-alare* [1520] (= *Rhacopilopsis variegata*)

Acanthocladium bessonii (Renauld & Cardot) Broth. ex Paris = *Wijkia bessonii* [2751]

Acanthocladium cuynetii Bizot = *Wijkia cuynetii* (47: 520)

Acanthocladium flexile (Renauld & Cardot) Broth. ex Paris = *Rhacopilopsis variegata* [4720]

Acanthocladium jungneri Broth. = *Wijkia jungneri* (2751)

Acanthocladium jungneri var. *subintegrifolium* P.de la Varde = *Wijkia jungneri* var. *subintegrifolia* [2751]. Note: treated here as *Wijkia jungneri*.

Acanthocladium le-testui Thér. & P.de la Varde = *Wijkia letestui* [2751]

Acanthocladium madagassum Thér. = *Wijkia madagassa* [2751]

Acanthocladium perchlorum M.Fleisch., *nom. nud.* Excluded: an undescribed collection from Tanzania.

Acanthocladium protensum (Renauld & Cardot) Broth. ex Paris = *Wijkia protensa* [2751]

Acanthocladium rigidicaule Broth. Note: a type specimen of this taxon in BM appears to be a *Wijkia*.

Acanthocladium rutenbergii (Geh.) Broth. ex Paris = *Wijkia rutenbergii* [2751]

Acanthocladium rutenbergii var. *eflagellare* Cardot in Grandid. = *Wijkia rutenbergii* var. *eflagellaris* [2751]

Acanthocladium subpilotrichella Broth. ex Paris, *nom. nud.* Excluded: no published distribution.

Acanthocladium subtrichocolea Broth. ex Paris, *nom. nud.* = *Wijkia trichocoleoides* [717]

Acanthocladium trichocolea (Müll.Hal.) Broth. = *Wijkia trichocolea* (2751)

Acanthocladium trichocolea var. *subintegrifolium* Thér. & P.de la Varde = *Wijkia trichocolea* var. *subintegrifolia* [2751]

Acanthocladium trichocoleoides (Müll.Hal.) Broth. = *Wijkia trichocoleoides* (2751)

Acanthocladium trichocoleopsis M.Fleisch., *nom. nud.* Excluded: Fleischer [2737: 1205] mentions this name in a list, suggesting it might be related to *Rhacopilopsis*, but there is no further information, and no original specimen.

Acanthorrhynchium decolor (Besch.) M.Fleisch. = *Acanthorrhynchium papillatum* (3070)

Acanthorrhynchium loucoubense (Besch.) M.Fleisch. = *Acanthorrhynchium papillatum* (3070)

Acanthorrhynchium papillatum (Harv.) M.Fleisch. COM(40), MDG(40,2672), SEY(1848,1926,1946,2195,2328,2330,2353,4932).

Acanthorrhynchium serratum (Renauld & Cardot) M.Fleisch. = *Acanthorrhynchium loucoubense* (1848) (= *Acanthorrhynchium papillatum*)

Acaulon capense Müll.Hal. Excluded: type not found [82: 201]

Acaulon leucochaete I.G.Stone SAF(1531,8328).

Acaulon muticum (Hedw.) Schimp. Excluded: listed for sub-Saharan Africa by *Index Muscorum*, but no records have been found.

Acaulon recurvatum Magill SAF(82,1531,8328).

Acaulon robustum Broth. ex Roth LES(4897).

Acaulon rufochaete Magill = *Microbryum rufochaete* (1420)

Acaulon sphaericum J.Shaw. Excluded: type destroyed and no other specimens known [82: 201].

Acaulon uleanum Müll.Hal. LES(4897).

Acirrhynchium cupressinum Hampe ex Paris = *Rhaphidostegium sphaerotheca* [4250] (= *Sematophyllum subpinnatum*)

Acirrhynchium strangulatum Schimp. ex Müll.Hal., *nom. nud. in synonym.* = *Isopterygium strangulatum* [1521]

Acroceratium Mitt., *nom. nud. in err.* = *Acrocladium* [1521]

Acrocladium aubertii A.Jaeger, *nom. illeg. incl. spec. prior.* = *Catagonium nitens* (40: 229)

Acrocladium mucronatum A.Jaeger = *Catagonium mucronatum* [1521] (= *Catagonium nitens* ssp. *maritimum*)

Acrocladium politum (Hook.f. & Wilson) Mitt. = *Catagonium nitens* var. *nitens* [2857]

Acrocryphaea dusenii M.Fleisch., *nom. nud.* Excluded: see *Cryphaea dusenii* Müll.Hal., *nom. nud.*

Acrocryphaea emarginata Thér. & Naveau ex P.de la Varde, *nom. nud.* Excluded: this taxon, recorded for Central African Republic [47: 502], was not dealt with by Manuel (1291) in his transfer of *Acrocryphaea* to *Schoenobryum*, presumably because it was a *nomen nudum*, and the source (1567) gives no indication on what specimen it was based.

Acrocryphaea latifolia Broth. & P.de la Varde = *Schoenobryum concavifolium* [7157]

Acrocryphaea latifolia var. *microspora* P.de la Varde = *Schoenobryum concavifolium* [7157]

Acrocryphaea madagassa (Geh.) Broth. = *Schoenobryum concavifolium* [7157]

Acrocryphaea plicatula Dixon & Thér. = *Schoenobryum concavifolium* [7157]

Acrocryphaea robusta Broth. in Mildbr. = *Schoenobryum concavifolium* [7157]

Acrocryphaea subintegra (Renauld & Cardot) Broth, ex Paris. = *Schoenobryum concavifolium* [7157]

Acrocryphaea subrobusta (Geh.) Broth. = *Schoenobryum concavifolium* [7157]

Acrocryphaea tisserantii Thér. & P.de la Varde = *Schoenobryum concavifolium* [7157]

Acrocryphaea welwitschii (Duby) Broth. = *Schoenobryum concavifolium* [7157]

Acroporium coppeyi (Cardot) Dixon = *Sematophyllum coppeyi* [1521]

Acroporium depressum Thér. MDG(40).

Acroporium diminutum Brid. SEY(1941,2353).

Acroporium eburense Bizot IVO(4), SIE(3216).

Acroporium incrassatum Dixon & Thér. UGA(46), ZAI(65).

Acroporium laevifolium (Renauld) Broth. MDG(40).

Acroporium lamprophyllum Mitt. SEY(2353), ZAI(2675).

Acroporium lamprophyllum was transferred to *Trichosteleum* by Buck, 1983 (3419), but Tan, 1994 (3283) considered it more correctly placed in *Acroporium*.

Acroporium le-testui P.de la Varde GAB(47), GHA(3072).

Acroporium megasporum (Duby) M.Fleisch. CMN(47), COM(40), GAB(47),

MAU(105,3410), MDG(40), REU(105), RIM(4639), SEY(1926,1941,1946,2353),

TAN(46).

Acroporium megasporum var. *densum* (Renauld & Cardot) Wijk & Margad. MDG(40).

Acroporium megasporum var. *heterodictyon* P.de la Varde GAB(47).

Acroporium pocsii Bizot CMN(47).

Acroporium prionophylax W.R.Buck ZAI(65).

Acroporium punctuliferum (Thwaites & Mitt.) M.Fleisch. = *Acroporium lamprophyllum* (3283)

Acroporium pungens (Hedw.) Broth. RWA(65), ZAI(65).

Acroporium stellatum (Renauld & Cardot) Broth. MDG(40).

Acroporium subluxurians (Dixon & Thér.) B.C.Tan & O'Shea GHA(47), LBR(47).

Actinodontium dusenii Broth. CMN(47).

Actinodontium hirsutum Besch. = *Lepidopilum hirsutum* (1521)

Actinodontium hirsutum var. *ramosum* Besch. = *Lepidopilum hirsutum* (40: 231)

Actinodontium streptopogoneum Broth. ex Paris = *Actinodontium streptopogoneum* [1521]

Actinodontium streptopogoneum Broth. ex Paris CMN(47).

Adelothecium bogotense Hampe MDG(40,1925), TAN(1347).

Aerobryidium lanosulum (Müll.Hal.) M.Fleisch. ex Broth. = *Aerobryopsis capensis* (7168)

Aerobryidium subpiligerum (Hampe) Cardot = *Aerobryopsis capensis* (7168)

Aerobryidium subpiligerum var. *majus* (Renauld & Cardot) Wijk & Margad. Excluded: the owning species of this taxon has been synonymised with *Aerobryopsis capensis*, so its status needs reviewing; the variety has been recorded only from Réunion [105].

Aerobryopsis capensis (Müll.Hal.) M.Fleisch. CMN(47), COM(40), ETH(50), GAB(47),

- GHA(7168), KEN(46,5315,7065), MAU(105,5916), MDG(40), MLW(67), MOZ(3072), NGA(5160,5176), REU(105), RIM(4639), SAF(1531,7766,8328), SEY(1926,1941,2353,4932), TAN(46), ZAI(65,2675), ZAM(46), ZIM(46).
- Aerobryopsis cirrifolia*** (Schwägr.) Broth. ex Paris MAU(105).
Aerobryopsis crispicuspis (Besch.) M.Fleisch. = *Aerobryopsis longissima* [1946: 272]
Aerobryopsis cymatocheilos (Kindb.) Broth. = *Aerobryopsis capensis* (7168)
Aerobryopsis eriocladioides M.Fleisch. *nom. nud.* Excluded: an undescribed specimen from Mozambique.
Aerobryopsis longipendula (Dusén) Broth. = *Aerobryopsis capensis* (7168)
- Aerobryopsis longissima*** (Dozy & Molk.) M.Fleisch. MAU(3072), SEY(1926,1946,1947,2322,2328,2353,4932).
Aerobryopsis longissima (Dozy & Molk.) M.Fleisch. was synonymised with *Aerobryopsis wallichii* in version 2 of this checklist based on Noguchi (2588). However, this overlooked Townsend's 1978 proposal that the type of *Aerobryopsis wallichii* belongs to *Aerobryidium* (4161), which is supported by Buck (2759). The name *Aerobryopsis longissima* is thus re-instated.
Aerobryopsis pseudocapensis (Ångstr.) M.Fleisch. = *Aerobryopsis subpiligera* [1848: 357] (= *Aerobryopsis capensis*)
Aerobryopsis pseudocapensis var. *majus* (Renauld & Cardot) Renauld & Cardot. Note: this valid taxon from Madagascar has not been re-assessed, but is likely to be a synonym of *Aerobryopsis capensis*.
Aerobryopsis subpiligera (Hampe) M.Fleisch. = *Aerobryopsis capensis* (7168)
Aerobryopsis trachyptera (Müll.Hal. ex Dusén) Broth. = *Aerobryopsis capensis* (7168)
Aerobryopsis wallichii (Brid.) M.Fleisch. = *Aerobryopsis longissima* (4161). Note: see under *Aerobryopsis longissima*.

Bryum zygodontoides Müll.Hal. = *Bryum coronatum* [10: 587]
- Caduciella mariei*** (Besch.) Enroth COM(40,780), TAN(780,1439).
Callicostella (Müll.Hal.) Mitt. Note: Menzel (1750) summarises the position over the use of this name. Crosby pointed out the priority of *Schizomitrium* Schimp. over *Callicostella*, but Koponen and Isoviita proposed the conservation of *Callicostella*, to avoid the nomenclatural changes. This proposal was accepted by the Committee for Bryophyta of IAPT, for submission to the 1993 Tokyo Congress, and confirmed there. Nevertheless, in the interim, a large number of nomenclatural changes were made: these have been reversed in this checklist.
Callicostella abrupta Mitt. = *Glossadelphus abruptus* (4975). Note: this has been treated as a synonym of *Glossadelphus truncatulus*; see note under *Phyllodon truncata*.

Calymperopsis (Müll.Hal.) M.Fleisch. Note: the view of Reese & Orbán (132) was that this genus should be treated as a subgenus of *Syrrhopodon*, and Reese has now revised several of the taxa (1708, 1711), provided a synopsis of the subgenus (1909) and annotated all BM specimens with a name in *Syrrhopodon*. The annotations suggest that previous understanding of the subgenus has been highly suspect. All records have now been transferred to *Syrrhopodon*, but see reservations expressed under that genus regarding distribution data.

Hookeria squarrosula Paris., *nom.nud.* Excluded: an undescribed specimen from Réunion.

Hookeria squarrosula Paris, *nom. nud.* = *Hookeria squarrosula* [1521]. Excluded: an undescribed specimen from Réunion.

Hookeria staudtii Broth. = *Hookeriopsis staudtii* [1521]

Hookeria struthiopteris (Brid.) Arn. = *Lopidium struthiopteris* [1521]

Hookeria subcordata Hampe ex Müll.Hal., *nom. inval. in synon.* = *Cyclodictyon vallis-gratiae* [243: 169]

Hookeria thomeana Broth. = *Callicostella fissidentella* [279: 367]

Hookeria tomentosa (Hedw.) Arn. = *Racopilum tomentosum* [1521]

Hookeria tristis Müll.Hal. = *Callicostella tristis* (1519: 604)

Hookeria uncinata Sm. = *Hypnum cupressiforme* [1911: 423]

Hookeria usambarica Broth. = *Callicostella usambarica* (1521)

Hookeria vallis-gratiae Hampe ex Müll.Hal. = *Cyclodictyon vallis-gratiae* (1519: 607)

Hookeria versicolor (Mitt.) Mitt., *hom. illeg.* = *Thamniopsis versicolor* (2817)

Hookeria vesicularia Müll.Hal. ex Paris, *nom. nud.* Excluded: an undescribed specimen (*Dusén 69*) from Cameroon.

Hookeria vesiculosa (Brid.) Müll.Hal. = *Cyclodictyon vesiculosum* (1521)

Hookeria viridis (Renauld & Cardot) Paris = *Hypnella viridis* [1521] (= *Glossadelphus viridis*)

Hookeria woodii Rehm & Macowan ex Sim, *nom. nud. in synon.* = *Porothamnium woodii* [1911: 404]. Excluded: see *Stereophyllum woodii*.

Hookeriopsis - Several species of this genus have already been transferred to *Thamniopsis* following a review of species occurring in the neotropics, and it is likely that all the remaining African species will also be transferred. The easiest character to distinguish the two genera are: basal laminal cells different from apical ones = *Thamniopsis*; areolation homogeneous = *Hookeriopsis*. See [2817: 217] for further details.

- Hookeriopsis ambigua*** P.de la Varde BUR(65), GAB(47), RWA(65), ZAI(65).
Hookeriopsis angolensis (Welw. & Duby) Paris = *Thamniopsis pappeana* (2817) (= *Thamniopsis utacamundiana*)
- Hookeriopsis balazsii*** Bizot CMN(47).
Hookeriopsis cheiloneura (Broth.) Broth. = *Thamniopsis cheiloneura* (2817)
Hookeriopsis corbieri (Renauld & Cardot) Broth. ex Cardot in Grandid., *nom. inval. in synon.* = *Lepidopilidium corbieri* [1521]
Hookeriopsis darntyi (Besch.) Broth. ex Cardot in Grandid. = *Thamniopsis pappeana* (2817) (= *Thamniopsis utacamundiana*)
- Hookeriopsis diversifolia*** (Renauld & Cardot) Broth. ex Cardot in Grandid. COM(40), MDG(40).
- Hookeriopsis gabonensis*** Broth. & P.de la Varde GAB(47), UGA(5696).
Hookeriopsis mittenii P.de la Varde = *Thamniopsis versicolor* (2817)
- Hookeriopsis pallidifolia*** (Mitt.) Geh. & Herzog STH(1296,4202,5331).
- Hookeriopsis papillosula*** Broth. & P.de la Varde GAB(47).
Hookeriopsis pappeana (Hampe) A.Jaeger = *Thamniopsis pappeana* (2817) (= *Thamniopsis utacamundiana*)
Hookeriopsis pappei Hampe ex Kindb., *nom. illeg. incl. spec. prior.* = *Hookeriopsis pappeana* [1521] (= *Thamniopsis utacamundiana*)
- Hookeriopsis pocsii*** Bizot TAN(46).
Hookeriopsis squarrosula A.Jaeger, *nom.nud.* Excluded: an undescribed specimen from Réunion.
- Hookeriopsis staudtii*** (Broth.) Broth. CMN(47).
Hookeriopsis versicolor (Mitt.) Broth., *hom. illeg.* = *Hookeriopsis mittenii* [7449: 138]
Husnotiella latifolia (Dixon) R.H.Zander & Magill = *Didymodon tophaceopsis* (1420)
- Husnotiella latifolia* var. *tanneri*** (Bizot & Pócs) Kis TAN(46).
Husnotiella latifolia var. *tanneri* (Bizot ex Pócs) Kis. Note: *Husnotiella latifolia* has been made a synonym of *Didymodon tophaceopsis* by Zander (1420), but he did not deal with this variety. If it is distinct, it also should be transferred.
Husnotiella plicata Magill = *Didymodon jackvancei* (1420)
Hydrogonium afro-fontanum Müll.Hal. = *Barbula ehrenbergii* (1158) (= *Barbula bolleana*)
Hydrogonium bolleanum (Müll.Hal.) A.Jaeger = *Barbula bolleana* [1420]
Hydrogonium bollei Müll.Hal. ex Kindb., *nom. illeg. incl. spec. prior.* = *Hydrogonium bolleanum* [1521] (= *Barbula bolleana*)
Hydrogonium brotheri (Renauld & Paris) Hilp. = *Barbula ehrenbergii* (1158) (= *Barbula bolleana*)
Hydrogonium clavicoatum (Renauld & Cardot) Hilp. = *Barbula indica* (1158)
Hydrogonium dorrii (Renauld & Cardot) Hilp. = *Barbula indica* (1158)
Hydrogonium ehrenbergii (Lorentz) A.Jaeger = *Barbula bolleana* (2666)
Hydrogonium fontanum (Müll.Hal.) A.Jaeger = *Barbula meidensis* (1420)
Hydrogonium tisserantii (P.de la Varde) W.Schultze-Motel = *Barbula tisserantii* (1420)
Hygroamblystegium caudicaule (Müll.Hal.) Broth. = *Pseudoleskea chilensis* (1533)
Hygroamblystegium filicinum (Hedw.) Loeske ex Broth. = *Cratoneuron filicinum* (1521)
Hygroamblystegium procerum Dixon = *Cratoneuron filicinum* (4866)
Hygroamblystegium tenax (Hedw.) Jenn. Excluded: Tanzanian collections given this name by Potier de la Varde have been shown to be *Cratoneuron filicinum* (1533)
- Hygrophynum causequei*** (Renauld & Cardot) Cardot in Grandid. MDG(40).
Hygrophynum hedbergii P.de la Varde = *Platyhypnidium hedbergii* (65)
- Hylocomiopsis cylindricarpa*** Thér. BIO(8180), BUR(65), CMN(32,47,6489), ETH(111), KEN(46,2661,6489), RWA(65), TAN(46), UGA(4282), ZAI(65,5319,6489).
Hylocomium bartramiophilum (Müll.Hal.) Paris. Excluded: see note under *Gollania barramiophila*.
Hylocomium brevirostre (Brid.) Bruch, Schimp. & W.Gümbel = *Loeskeobryum brevirostre* [3395]
Hylocomium proliferum (Brid.) Lindb., *nom. illeg. incl. spec. prior.* = *Hylocomium splendens* [1521]
Hylocomium proliferum var. *alpinum* (Limpr.) Broth. in Mildbr., *hom. illeg.* = *Hylocomium splendens* [4926: 692]
Hylocomium purum (Hedw.) De Not. = *Pseudoscleropodium purum* [1521] (= *Scleropodium purum*)
Hylocomium rugosum (Hedw.) De Not. = *Rhytidium rugosum* [1521]
Hylocomium rutenbergii (Geh.) Paris = *Acanthocladium rutenbergii* [1521] (= *Wijkia rutenbergii*)
- Hylocomium splendens*** (Hedw.) Bruch, Schimp. & W.Gümbel KEN(46,2661,4112,5315), RWA(65), STH(1296,4202,5331), TAN(46,1410), UGA(46,7922), ZAI(65).
Hylocomium splendens var. *alaskanum* (Lesq. & Jam.) Limpr. = *Hylocomium splendens* (3395)
Hylocomium splendens var. *alpinum* Schlieph. = *Hylocomium splendens* (3395)
- Hymenoloma antarcticum*** (Hook.f. & Wilson) Ochyra LES(4897), SAF(4897,8328).
Hymenostomum abyssinicum Schimp. ex Paris *nom. nud.* Excluded: an undescribed collection (*Schimper s.n.*) from Ethiopia. Cufodontis [40: 222] stated that a specimen existed in BM, but one was not found.
Hymenostomum ayresii (Schimp.) Broth. = *Weissia ayresii* (1420)
Hymenostomum brachycarpum Paris = *Weissia dieterlenii* (82: 263)
Hymenostomum brachypelma Kindb. = *Weissia brachypelma* (1420)

- Hymenostomum cameruniae* Müll.Hal. ex Paris. Excluded: an undescribed specimen (*Dusén* 286) from Cameroon.
- Hymenostomum chloropus* (Besch.) Broth. = *Weissia ayresii* (1420)
- Hymenostomum cucullatum* (Müll.Hal.) Kindb. = *Weissia cucullata* (82: 266)
- Hymenostomum eckendorffii* P.de la Varde = *Tortella eckendorffii* (1420)
- Hymenostomum eurybasis* Dixon = *Weissia latiuscula* (82: 267)
- Hymenostomum guineense* Broth. & Paris GUI(47).**
- Hymenostomum humicola* (Müll.Hal.) Paris = *Weissia humicola* (82: 266)
- Hymenostomum hyphiloides* Wager & Broth. in Wager, *nom. nud.* = *Hyophila zeyheri* [4800: 193] (= *Trichostomum brachydontium*)
- Hymenostomum latiusculum* (Müll.Hal.) Paris = *Weissia latiuscula* (82: 267)
- Hymenostomum lineaeifolium* (Müll.Hal.) Paris = *Weissia lineaeifolia* (1420)
- Hymenostomum opacum* Wager & Dixon = *Barbula indica* (82: 243)
- Hymenostomum oranicum* (Müll.Hal.) Paris = *Weissia fallax* [4926: 188] (= *Weissia controversa*)
- Hymenostomum pellucidum* Broth. ex Micheletti, *nom. nud.* Excluded: an undescribed collection (*Pater Michael de Carbonara, s.n.*) from Mt. Sciret, nr. Karen [40: 222].
- Hymenostomum pulicare* Besch. = *Trichostomum pulicare* (1420)
- Hymenostomum rutilans* (Hedw.) Nees & Hornsch. = *Weissia rutilans* [1521]
- Hymenostomum socotranum* (Mitt.) Broth. = *Weissia socotrana* (1420)
- Hymenostomum termitidarum* (Müll.Hal.) Paris = *Weissia termitidarum* [1521]
- Hymenostomum tortile* (Schwägr.) Bruch, Schimp. & W.Gümbel = *Weissia condensa* (1420)
- Hymenostomum tortile* var. *crispatum* (Nees & Hornsch.) Podpera = *Weissia controversa* var. *controversa* [71: 623]
- Hymenostomum vallis-gratae* Hampe ex A.Jaeger, *nom. nud.* = *Semibarbula stuhlmanii* [1911: 237] (= *Barbula indica*)
- Hymenostomum zeyheri* (Hampe) Broth. = *Hyophila zeyheri* [1521] (= *Trichostomum brachydontium*)
- Hymenostylium calcareum* (Nees & Hornsch.) Mitt. = *Gymnostomum calcareum* [1521]
- Hymenostylium ceratodonteum* (Müll.Hal.) Broth. = *Didymodon ceratodonteus* (1911)

Microthamnium tenellum Mitt. ex Dixon, *nom. nud. in synonym.* = *Mittenothamnium saproadelphus* [3420: 78]
Microthamnium trichostegium Müll.Hal. ex Paris, *nom. nud.* Excluded: appears in a list [4254: 21]; no description or specimen provided.
Microthamnium viguieri Thér. Note: see under *Microthamnium longirostrum*.
Microthecium boivinii Schimp. ex Paris, *nom. nud. in synonym.* = *Vesicularia galerulata* [1848: 480]
Mielichhoferia basilaris Bruch. & Schimp. ex Müll.Hal. = *Schizymerium basilare* (1487)
Mielichhoferia bequaertii Dixon & Naveau = *Pohlia bequaertii* (65)
- Mielichhoferia borbonica* Thér. REU(105).**
Mielichhoferia breutelii Schimp. ex A.Jaeger, *nom. nud.* = *Haplodontium reticulatum* [1911: 316]. Excluded: see note under *Weissia reticulata*.
- Mielichhoferia bryoides* (Harv.) Wijk & Margad. LES(1531,4897), MLW(67,6087), SAF(1531,8328), SWZ(7972), ZIM(46).**
Mielichhoferia campylocarpa Schimp. ex Cufod., *nom. nud.* = *Mielichhoferia schimperii* (50: 229)

- Mielichhoferia cardotii*** A.J.Shaw & H.A.Crum MDG(40).
Mielichhoferia cholnokyi P.de la Varde = *Mielichhoferia subnuda* (83: 339)
Mielichhoferia clavata Bruch & Schimp. ex Müll.Hal. Excluded: see *Weissia reticulata*: the type collection contains two different elements.
- Mielichhoferia clavata*** Bruch & Schimp. ex Müll.Hal., *nom. illeg.* ETH(50), SUD(1419).
Mielichhoferia commixta Thér. = *Schizymerium commixtum* (1487)
Mielichhoferia compacta (Lindb.) Kindb., *hom. illeg. incl. spec. prior.* = *Mielichhoferia mielichhoferi* [1521]
Mielichhoferia cratericola Broth. = *Schizymerium cratericola* (65)
Mielichhoferia densifolia Angstr. = *Brachymerium acuminatum* (23: 4)
Mielichhoferia ecklonii Hornsch. = *Mielichhoferia bryoides* [2584: 231]
- Mielichhoferia elgonensis*** P.de la Varde TAN(46), UGA(46).
Mielichhoferia elongata Rehmman ex Kindb., *nom. nud.* Excluded: an undescribed collection (*Rehmman 212*) from Natal, South Africa.
Mielichhoferia hariotii Thér. = *Schizymerium hariotii* (1487)
Mielichhoferia hymenostoma Bruch. & Schimp. ex Müll.Hal. = *Schizymerium hymenostomum* (1487)
- Mielichhoferia hymenostomoides*** P.de la Varde UGA(46).
- Mielichhoferia linderi*** Thér. RWA(65).
Mielichhoferia madagassa Renaud & Cardot ex Cardot = *Schizymerium madagassum* (1487)
- Mielichhoferia madagassa*** var. ***gracilis*** Thér. MDG(40).
Mielichhoferia madagassa var. *gracilis* Thér. Note: *Mielichhoferia madagassa* has now been transferred to *Schizymerium*, but this variety was not considered at the time of the transfer. It should be synonymised or transferred.
Mielichhoferia mildbraedii Broth. = *Schizymerium mildbraedii* (65)
Mielichhoferia notarisii (Mitt.) Jur. = *Haplodontium notarisii* [1521] (= *Brachymerium notarisii*)
- Mielichhoferia ovalis*** Mitt. CMN(47), IVO(1458).
Mielichhoferia pellucida Hampe. Excluded: see note under *Weissia reticulata*.
Mielichhoferia procerrima Rehmman ex Geh., *nom. nud.* = *Anomobryum promontorii* [4378: 69] (= *Anomobryum julaceum*)
Mielichhoferia procumbens Rehmman ex Paris, *nom. nud.* = *Anomobryum promontorii* [4378: 69] (= *Anomobryum julaceum*)
Mielichhoferia rehmannii Müll.Hal. = *Mielichhoferia bryoides* [1911: 316; 83: 338]
Mielichhoferia ruwenzorensis Thér. & Naveau = *Schizymerium ruwenzorensis* (65)
Mielichhoferia schimperi Besch. ex Paris, *nom. nud.* Excluded: an undescribed specimen (*Schimper 1027*) from Ethiopia [50: 229].
- Mielichhoferia speluncae*** P.de la Varde UGA(46).
Mielichhoferia squarrosula Rehmman ex Dixon & A.Gepp, *nom. nud. orthogr.* = *Mielichhoferia squarrulosa* [1521] (= *Brachymerium acuminatum*)
Mielichhoferia squarrulosa Müll.Hal. = *Brachymerium acuminatum* (83: 343)
- Mielichhoferia squarrulosa*** var. ***fragilis*** Thér. & Naveau ZAI(65).
- Mielichhoferia subbasilaris*** Broth. RWA(65), UGA(46).
- Mielichhoferia subnuda*** Sim LES(1531,4897), SAF(1531,8328).
Mielichhoferia transvaaliensis Müll.Hal. = *Mielichhoferia bryoides* (83: 338)
Mielichhoferia vallis-gratiae Hampe ex Paris, *nom. nud.* = *Mielichhoferia bryoides* [1911: 316]
- Mielichhoferia vardei*** J.Shaw & H.A.Crum CMN(47).
- Mielichhoferia woodii*** P.de la Varde UGA(46).
Mittenothamnium afro-elegantulum (Broth.) Cardot = *Mittenothamnium horridulum* [1911: 419]
Mittenothamnium aureum (Besch.) Cardot = *Mittenothamnium reptans* (717)
- Mittenothamnium bescherellei*** (Renaud & Cardot) Cardot REU(105).
Mittenothamnium brachycarpum (Renaud & Cardot) Cardot = *Mittenothamnium microthamnioides* [1848: 510]
Mittenothamnium brachycarpum var. *glauculum* Cardot in Grandid. = *Mittenothamnium microthamnioides* var. *glauculum* [1521]
Mittenothamnium brevicuspis (P.de la Varde) Wijk & Margad. = *Chryso-hypnum frondosum* (717)
Mittenothamnium byssicormum Müll.Hal. ex Paris, *nom. nud.* Excluded: an undescribed collection (*Dusén 214*) from Cameroon.
- Mittenothamnium caudiforme*** (Müll.Hal.) Cardot MOZ(46).
Mittenothamnium cavifolium (Dixon) Wijk & Margad. = *Chryso-hypnum cavifolium* (717)
- Mittenothamnium ctenidioides*** (Dixon) Schelpe SAF(1531,7766,8328), TAN(46).
Mittenothamnium cygnicollum (Dixon) Wijk & Margad. = *Mittenothamnium reptans* (717)
Mittenothamnium elegantulum (Müll.Hal.) Cardot. Excluded: the only taxon with this name (which appears in two papers by Egunyomi (5176, 5745)), has so far only been reported from America, and was described by Hooker, not Müller. From (5745), it is probably a mistake for *Mittenothamnium afroelegantulum* (Broth.) Cardot, which is a synonym of *Mittenothamnium horridulum*, but as it is not clear, the references have been ignored.
Mittenothamnium frondosum (Mitt.) Cardot = *Chryso-hypnum frondosum* (717)

- Mittenothamnium fruticellum* (Mitt.) Cardot = *Mittenothamnium reptans* (717)
Mittenothamnium glabrifolium (Müll.Hal.) Cardot = *Mittenothamnium reptans* var. *pseudoreptans* [4274: 329] (= *Mittenothamnium pseudoreptans*)
- Mittenothamnium horridulum*** (Broth.) Cardot CMN(47), GUI(47), MDG(40), NGA(334), SAF(1531,8328).
Mittenothamnium inclinatum (Renauld) Cardot = *Mittenothamnium microthamnioides* [1848: 444]
- Mittenothamnium isopterygioides*** (Renauld & Cardot) Cardot GAB(47).
Mittenothamnium lacouturei (Renauld & Cardot) Cardot MDG(40).
Mittenothamnium leptoreptans (Broth.) Cardot SAO(47).
Mittenothamnium leptosquarrosus Cardot, *nom. nud.* Excluded: an undescribed collection (*Dusén 840*) from Cameroon.
- Mittenothamnium limosum*** (Besch.) Cardot MDG(40), REU(105).
Mittenothamnium madagassum (Besch.) Cardot COM(40), MAU(3410), MDG(40,3410), REU(105,3410).
Mittenothamnium microthamnioides (Geh.) Wijk & Margad. MDG(40,3410), MOZ(46), REU(3410), ZAM(46).
Mittenothamnium microthamnioides var. ***glauculum*** (Cardot) Wijk & Margad. MDG(40).
Mittenothamnium mollissimum Cardot, *nom. nud.* = *Mittenothamnium madagassum* [1848: 446]
- Mittenothamnium overlaetii*** Thér. & Naveau NGA(5160,5176), TAN(46), ZAI(65).
Mittenothamnium overlaetii var. *kilimandscharicum*. Note: this was an orthographic error in version 1 of the Checklist for *Mittenothamnium patens* var. *kilimandscharicum*.
Mittenothamnium pallescens Broth. in Mildbr., *nom. nud.* Excluded: an undescribed collection (*Mildbraed 6548*) from Annobon [1619: 159; 47: 523].
- Mittenothamnium patens*** (Hampe) Cardot SAF(1531,4897,7766,8328), TAN(46).

Neckera borgeniana Kiaer ex Paris, *nom. illeg. incl. spec. prior.* = *Neckera valentiniana* [1848: 373]

- Neckera borgenii* Kiaer ex Renauld = *Neckera valentiniana* [1848: 373]
Neckera breviuscula Müll.Hal. ex Dusén = *Calyptothecium breviusculum* [1521] (= *Calyptothecium acutifolium* var. *breviusculum*)
Neckera brotheri Paris = *Calyptothecium subacutifolium* [1521] (= *Calyptothecium acutifolium* var. *acutifolium*)
Neckera canariensis (Brid.) Brid. = *Leucodon canariensis* [1521]
Neckera capensis Bruch, Schimp. & W.Gümbel, *nom. nud.* = *Neckera valentiniana* [4800: 210]
Neckera capensis Müll.Hal. = *Aerobryopsis capensis* [1521; 1519: 581]
Neckera capensis var. *laevigata* Rehmann ex Dixon & A.Gepp, *nom. nud.* = *Neckera valentiniana* [1911: 400]
Neckera chevalieri Broth. & Corb. = *Neckeropsis chevalieri* [1521] (= *Neckeropsis liliana*)
Neckera chrysonera Hampe ex Müll.Hal. = *Orthostichopsis subimbricata* [1848: 345; 2]
Neckera cirrifolia (Schwaegr.) Müll.Hal. = *Aerobryopsis cirrifolia* [1521]
Neckera comorae Müll.Hal. = *Neckeropsis lepineana* var. *comorae* [1521] (= *Neckeropsis lepineana*)

***Neckera complanata* Hedw. SAF(8358), TAN(7273).**

***Neckera complanata* var. *maxima* Dixon KEN(46,7065).**

- Neckera crispa* Hedw. Excluded: *Index Muscorum* lists this taxon as occurring in sub-Saharan Africa, but no records have been found.
Neckera curtispindula Hedw. = *Antitrichia curtispindula* (1521). Note: see *Antitrichia kilimandscharica*.
Neckera decolorans Hampe ex Müll.Hal., *nom. nud. in synon.* = *Pilotrichella pseudo-imbricata* [2193: 265]
Neckera dentata (Schwaegr.) Müll.Hal., *hom. illeg.* = *Leptohymenium dentatum* [1521]. Excluded: so far no specimens under these names have been found.
Neckera denticulata (P.Beauv.) Brid. = *Pilotrichum denticulatum* [1521]. Note: see under *Pilotrichum denticulatum*.
Neckera diaphana Müll.Hal. = *Braunia secunda* [5414: 10; 1519: 547]
Neckera disticha Hedw. = *Neckeropsis disticha* (1521)
Neckera dregeana Hornsch. = *Entodon dregeanus* [1521] (= *Entodon macropodus*)
Neckera dusenii Müll.Hal. ex Dusén, *nom. nud. in synon.* = *Pinnatella braunii* [4087: 41] (= *Homaliodendron piniforme*)
Neckera ehrenbergii Müll.Hal. Note: a valid neotropical taxon, which appeared in previous versions of this list as a synonym of *Neckera remota*. Unfortunately Müller used this name twice, once as an illegitimate synonym of *N. ehrenbergii*, once as a valid African taxon, but both with the same authors, and on the same page.
Neckera extans Besch. = *Neckeropsis disticha* (286)
Neckera flagellacea Mitt. = *Pinnatella flagellacea* [1521] (= *Homaliodendron pinniforme*)
Neckera flavescens (Hook.) Müll.Hal., *hom. illeg.* = *Campyloodontium flavescens* [1521] (= *Mesonodon flavescens*)
Neckera flexuosa Harv. in Hook. = *Cryptoleptodon pluvinii* (301)
Neckera floribunda (Dozy & Molck.) Müll.Hal. = *Floribundaria floribunda* [1521; 1519: 583]
Neckera floribundula Müll.Hal. = *Floribundaria floribundula* [1521]
Neckera fluminalis Müll.Hal. ex Renauld = *Neckeropsis madecassa* [1848: 371]
Neckera foveolata Mitt. = *Neckeropsis foveolata* [1521]
Neckera fuscescens Müll.Hal. = *Meiothecium fuscescens* [1521]
Neckera gracilis (Hedw.) Müll.Hal. = *Pterogonium gracile* [1521; 1519: 556]
Neckera grateloupii (Mont.) Müll.Hal. = *Schwetschkea grateloupii* [1521]
Neckera gromieri Thér. = *Neckera remota* (286)
Neckera guillemei Broth. ex Paris, *nom. nud.* Excluded: an undescribed specimen from Tanzania.
Neckera hedbergii P.de la Varde. Note: De Sloover (286) states that without sporophytes, it is impossible to assign this taxon to a species, but suggests that it might be a synonym of *Neckera remota*, which has been followed here.
Neckera hoehneliana Müll.Hal., *nom. illeg.* = *Calyptothecium hoehnelii* (2)
Neckera hoehnelii Müll.Hal. = *Calyptothecium hoehnelii* (2)
Neckera homoclada Müll.Hal. ex Paris, *nom. nud.* Excluded: an undescribed specimen from Ethiopia, which Cufodontis [50: 236] suggests may be a synonym of *Neckera remota*.
Neckera hookeriacea (Dusén) M.Fleisch. = *Neckeropsis hookeriacea* [1521; 286] (= *Neckeropsis madecassa*)
Neckera humboldtii (Hook.) Müll.Hal. = *Rhacocarpus purpurascens* [10: 721]
Neckera hygrometrica (Harv. & Hook.) Müll.Hal. = *Wardia hygrometrica* [1521]
Neckera imberbis (Sm.) Müll.Hal. = *Hedwigidium integrifolium* [8254: 14]

- Zygodon conoideus* var. *latifolius*** Brid. MAU(105).
Zygodon cyathicarpus Mont. = *Amphidium tortuosum* (1519: 487)
- Zygodon dioicus*** Broth. RWA(65), TAN(46), UGA(4282), ZAI(65).
Zygodon dusenii Müll.Hal. ex Paris, *nom. nud.* = *Zygodon intermedius* var. *dusenii* [1521]
- Zygodon elatum*** (Dixon) Goffinet KEN(46).
- Zygodon erosus*** Mitt. KEN(46), SAF(1531,4897,8328), TAN(46), ZAI(65).
- Zygodon erosus* var. *circinatifolius*** Thér. & Naveau ZAI(65).
- Zygodon fragilifolius* var. *fragilifolius*** Broth. ex Malta RWA(65), TAN(46), UGA(46), ZAI(65).
- Zygodon fragilifolius* var. *papillosus*** Goffinet ETH(111), KEN(46,136), RWA(65), TAN(46), UGA(46), ZAI(65).
Zygodon gemmaceus Dixon ex Kis, *orthog. err.* = *Zygodon microgemmaceus*. Note: transcription error in (46).
- Zygodon hirsutus*** G.Negri UGA(46).
- Zygodon intermedius*** Bruch, Schimp. & W.Gümbel BIO(8180), CMN(47), ETH(1927), KEN(46,136,3412,5315), LES(4897), REU(758), RWA(65), SAF(1531,7766,8328), TAN(46), UGA(46), ZAI(65), ZAM(62).
- Zygodon intermedius* var. *dusenii*** Malta CMN(47).
- Zygodon intermedius* var. *strictifolius*** Thér. RWA(65), UGA(46), ZAI(65).
- Zygodon johnstonii*** Broth. ex Malta TAN(46).
Zygodon kilimandscharicus Müll.Hal. = *Amphidium cyathicarpum* [4872: 17] (= *Amphidium tortuosum*)
Zygodon lapponicus (Hedw.) Bruch, Schimp. & W.Gümbel = *Amphidium lapponicum* (1519: 489)
- Zygodon laxifolius*** Thér. MDG(40).
- Zygodon leptobolax*** Müll.Hal. SAF(1531,8328).
- Zygodon leptocarpus*** Thér. MDG(40).
Zygodon macleanus Rehmman ex Kindb., *nom. nud.* = *Amphidium cyathicarpum* [1911: 267] (= *Amphidium tortuosum*)
- Zygodon macrocarpum*** (Dixon) Goffinet KEN(46).
Zygodon madagassus Schimp. ex C.H.Wright, *nom. nud.* = *Zygodon reinwardtii* var. *madacassus* [1521]
- Zygodon microgemmaceus*** Dixon UGA(46).
Zygodon mildbraedii Broth. = *Zygodon trichomitrius* var. *mildbraedii* [1521]
Zygodon obtusifolius Hook. = *Bryomaltaea obtusifolia* (4605)
Zygodon perpusillus Thwaites & Mitt. = *Rhachithecium perpusillum* (1519: 459)
Zygodon perreflexus Müll.Hal. Excluded: type not located, and a contemporary specimen given this name is *Zygodon leptobolax*.
Zygodon preissianus Hampe = *Triquetrella papillata* (1420)
Zygodon pungens Müll.Hal = *Codonoblepharon pungens* (4605)
Zygodon rehmannii Müll.Hal. ex Geh., *nom. nud.* = *Zygodon trichomitrius* [4378: 115]
- Zygodon reinwardtii* var. *madacassus*** Cardot MDG(40).
- Zygodon reinwardtii* var. *reinwardtii*** (Hornsch.) A.Braun BIO(8180), KEN(46), MDG(40), REU(105), RWA(46), TAN(46), UGA(46), ZAI(65).
- Zygodon reinwardtii* var. *ruwenzorensis*** (Thér. & Naveau) Demaret ZAI(65).
- Zygodon robustus*** Broth. ex Malta TAN(46).
- Zygodon roccatii*** G.Negri RWA(65), UGA(46).
- Zygodon roccatii* var. *diffusus*** G.Negri UGA(46).
Zygodon rugifolius Müll.Hal. ex Geh., *nom. nud.* = *Macromitrium schlotheimiaeforme* [6793: 241] (= *Cardotiella secunda*)
- Zygodon runcinatus*** Müll.Hal. SAF(1531,8328), TAN(46).
- Zygodon schimperi*** Hampe ex Müll.Hal. ETH(50).
- Zygodon semitortus*** Mitt. CMN(47), ZAI(65).
- Zygodon seriatus*** Thér. & Naveau ETH(50,1927), KEN(46), RWA(46,65), TAN(46), UGA(46), ZAI(65).
Zygodon simii Dixon = *Leptodontium viticulosoides* [2763: 317; 82: 189]
Zygodon strictissimus Rehmman ex Geh., *nom. nud.* = *Triquetrella tristicha* [2734: 301]
Zygodon subaffinis Rehmman ex Geh., *nom. nud. err.* = *Zygodon erosus* [1077: 63]
Zygodon subcyathicarpus Müll.Hal., *nom. nud.* = *Amphidium cyathicarpum* [6568: 202]
Zygodon torquatus Broth. ex Engl., *nom. nud.* = *Anoetangium torquatum*, *nom. nud.* [1521] (= *Anoetangium brotherusii*)
Zygodon transvaalensis Rehmman ex Sim = *Zygodon intermedius* (1519: 481)

Zygodon trichomitrius Hook. & Wilson SAF(1531,3411,4897,7766,8328), TAN(46), ZIM(61).

Zygodon trichomitrius* var. *mildbraedii Broth. RWA(65), TAN(46), UGA(46), ZAI(65)

Zygodon tristichus Müll.Hal. = *Triquetrella tristicha* (82: 187)

Zygodon viridatus Müll.Hal. = *Ceratodon viridatus* (1521) (= *Ceratodon purpureus* var. *stenocarpus*)

Zygodon volkensis Broth. = *Zygodon reinwardtii* [1077: 119]

Zygodon welwitschii Duby = *Ulea welwitschii* (1521) (= *Rhachithecium welwitschii*)

Zygodon wilmsianus Müll.Hal. = *Anoetangium wilmsianum* (82: 181)

Zygodon wolkensi Broth. ex Paris, *nom. inval. err.* = *Zygodon reinwardtii* [1077: 119]

References

Use this table to translate the numeric references given in the text of this paper to the 'author + year' equivalent. As the references are identified uniquely by a number, suffices are not added when author+date are not unique (e.g. nos. 1 & 2, Argent 1973). All references after number (7487) were added for this version and any lower number references added for this version are marked with an asterisk (*). The alphabetic list of references follows the table. 395 references are added in this version to the 455 in version 4, less one deleted, to give 849 in total.

Appendix A - Country Abbreviations and totals

There are 65 countries, part-countries or islands on the list. The 'Group / *Index Muscorum* zone' column indicates the *Index Muscorum* zone (e.g. Africa-2), together with the group name to which it belongs in the 'Full name' column, if relevant. You can't calculate a group total (e.g. Seychelles) from the data here, as the same species may occur in more than one of the constituents. The South African divisions are no longer included, following the increase in number of these, and the production of a new country-wide checklist. Some of these totals have fallen since the last version, due to *nomina nuda* etc. being removed from accepted status.

Abb.	Full name	No. of taxa	Group/ <i>Index Muscorum</i> zone
AGA	Agalega Islands	6	Seychelles (Africa-3)
ALD	Aldabra	5	Seychelles (Africa-3)
AMI	Amirante Islands	1	Seychelles (Africa-3)

ZAI	Zaire (Dem. Rep. Congo)	599	Africa-2
ZAM	Zambia	143	Africa-2
ZIM	Zimbabwe	270	Africa-2

Appendix B - Family Placement

There are 78 families and 362 genera on the checklist. The allocation of genera to families changes frequently with the current activity in molecular phylogenetics, and some of the changes made in the last version have been reversed, and of course new changes have been added. On the whole, family placement is based on Buck & Goffinet (6099), but some changes have been made based on Goffinet & Buck (7882). There are five new genera: *Aptychopsis*, *Bryoxiphium*, *Chionoloma*, *Ischyrodon*, *Pseudotaxiphyllum*; four replacements: *Porothamnium* being replaced by *Porotrichum*, *Pseudosymblepharis* by *Chionoloma*, *Pylaisia* by *Platygyriella*, *Felipponea* by *Pterogoniadelphus* and one (*Stenocardiopsis*) is excluded. Reasons for these changes are in the checklist annotations.

The comparatively neutral, alphabetical view ties in with the forthcoming *Guide to bryophytes of sub-Saharan Africa*. The figures indicate the number of species for each genus found in sub-Saharan Africa.

Adelotheciaceae		<i>Oxyrrhynchium</i>	3		
<i>Adelothecium</i>	1	<i>Palamocladium</i>	1	Cinclidotaceae
