# THE ULTIMATE IMPORT WIRE

## FIT

### MATCHING BOOTS

Intermotor™ wire sets feature OE style import spark plug and distributor boots that look, fit, and perform like the original components. Engineered for extra-durability, long service life and a smooth installation, Intermotor™ premium import boots provide the right fit and a tight weatherproof seal.

## PROTECTION & POWER

### WIRE CORE & JACKET

Power can't flow if the wire jacket is compromised. That's why Intermotor™ developed a patented hi-gloss clear coat layer that's permanently bonded to our hi-temp silicone jacket. This combination provides powerful protection from engine heat and the potential damage found in today's import engines.

Intermotor™ wire conductors feature precision-matched resistance values to ensure maximum voltage delivery and spark duration while meeting all noise suppression requirements that shield sensitive electronic computers and sensors from interference. The result is clean energy flow for ultimate performance and import power.

## EXTRAS

### CLIPS · TRAYS · LOOM

### NUMBERED LEADS

We've gone to great lengths to build an import wire set that guards against damage and creates a clear path for power.

Intermotor™ factory-installed separator clips, anchors, loom channels and trays\* keep wires sorted properly and safely to protect against arcing, cross-fire, electromagnetic interference, and damage. Convoluted loom and spiral wrap\* protect against abrasion that can cause premature wire failure.

We've even individually numbered each wire lead by cylinder to ensure Intermotor™ import wire sets provide a flawless installation with genuine import performance.
