Family Pleuronectidae Cuvier 1816

righteye flounders

By

Sergei A. Evseenko

Laboratory of Oceanic Ichthyofauna

*P. P. Shirshov Institute of Oceanology, Russian Academy of Sciences
36, Nakhimovsky Prospect, Moscow, 117218 Russia
email: evseenko@sio.rssi.ru*

Righteye flounders, or pleuronectids, compose a large, speciose family of pleuronectiforms that differ from other members of the suborder Pleuronectoidei mainly by the position of both eyes on the right side of the head. This family includes halibuts, flounders, soles, turbots, dabs, and plaice but none of these names is restricted to any one taxonomic group, and the names are often used interchangeably for the same species. In most righteye flounders the pelvic fins are symmetrically placed, with one on each side of the median ridge. Dorsal fin origin above upper eye or in front of it. Pectoral fins present. No fin spines. No supramaxilla. No teeth on vomer or palatines. Preopercle edge free. Gill membranes fused in majority of species. Vertebrae 32–66. Ribs present. Egg usually without oil globules in yolk. Adults typically under 60 cm (23.6 in) in length. The greatest length recorded, 267 cm (8 ft 9 in), was attained by a female Pacific halibut, *Hippoglossus stenolepis*. Pleuronectids inhabit all oceans, occasionally are found in brackish water, and rarely enter fresh water.

The systematic status of several groups traditionally placed in the family Pleuronectidae (e.g., poecilopsettines, rhombosoleines, paralichthodines) is unsettled (Hensley and Ahlstrom 1984 [ref. 26815], Nelson 1994 [ref. 26204]). The subfamily Samarinae has been elevated to family based on cladistic analyses (Chapleau and Keast 1988 [ref. 12625], Chapleau 1993 [ref. 26822], Nelson 1994 [ref. 26204]). Sakamoto (1984 [ref. 5273]) revised the family on the basis of a detailed phenetic study. That revision synonymized several genera with *Pleuronectes*, obscuring the differences among the groups (Mecklenburg et al. 2002 [ref. 25968]). Lindberg and Fedorov (1993 [ref. 21500]) considered the same genera as subgenera of *Pleuronectes*. Robins et al. (1991 [ref. 14237]) and Kramer et al. (1995 [ref. 26825]) used the generic and species arrangement proposed by Sakamoto (1984 [ref. 5273]) in lists of fishes and guides to eastern North Pacific species. Monophyly of *Pleuronectes* (sensu Sakamoto, 1984 [ref. 5273]) was questioned by Chapleau (1993 [ref. 26822]), Nelson (1994 [ref. 26204]), and Rass (1996 [ref. 24656]). The first two authors emphasized the necessity for cladistic analysis of Pleuronectidae. Such an analysis of Pleuronectidae (sensu Chapleau and Keast 1988 [ref. 12625]) = (Pleuronectinae sensu Norman 1934 [ref. 6893]) was recently completed by Cooper and Chapleau (1998 [ref. 26711]). They made numerous changes in generic limits; however, their changes are not accepted here. Classification follows Nelson (1994 [ref. 26204]) in recognizing four subfamilies. Classification at the generic level also follows Nelson (1994) as the most stable. The Pleuronectidae is in need of further detailed cladistic studies to clarify the relationships of the subfamilies and species. Currently the family consists of forty genera with about 100 species.

The genus *Neoetropus*, containing only the type species, *N. macrops* Hildebrand & Schroeder 1928, was referred to the family Pleuronectidae by Norman (1934 [ref. 6893]), who supposed that it may belong

to the subfamily Poecilopsettinae; however, judging from the description of the holotype and its radiograph, it is a reversal specimen, probably of a species in the *Citharichthys-Etropus* group (Paralichthyidae).

Subfamily Paralichthodinae Regan 1920

Body rather elongate, compressed. Dorsal fin extending forward on snout above nasal organ of blind side; most rays forked distally, scaled on their bases. Pelvic fins short-based, subequal, that of eyed side median and somewhat advanced. Lateral line equally developed on both sides of body. Mouth rather large; jaws and dentition about equally developed on both sides. Gill membranes separate. Vertebrae 30–31. Eyed side brownish gray with small, dark spots. A single genus with one species. Attains 50 cm in length. Marine, found at depths of 1–100 m. Apparently endemic to southern Africa. The genus *Paralichthodes* sometimes is placed in Pleuronectinae (Sakamoto 1984 [ref. 5273]) or Samarinæ (Regan 1910 [ref. 26827]) or is classified as a separate subfamily (Regan 1929 [ref. 26828], Norman 1934 [ref. 6893], Hubbs 1945 [ref. 26824], Nelson 1994 [ref. 26204]) or family (e.g., Regan 1920 [ref. 3671], Cooper and Chapleau 1998 [ref. 23314]). The family-group name was proposed first by Regan (1920 [ref. 3671]) as a family, then later he reduced its rank to subfamily (Regan 1929 [ref. 26828]).

Genus *Paralichthodes* Gilchrist 1902

Paralichthodes Gilchrist 1902:108 [ref. 1644]. Type species *Paralichthodes algoensis* Gilchrist 1902. Type by monotypy.

Paralichthodes algoensis Gilchrist 1902

Paralichthodes algoensis Gilchrist 1902:108, Pl. 8 [ref. 1644] (Algoa Bay, South Africa). Holotype (unique): SAM 15341 [ex PEM].

DISTRIBUTION: Western Indian Ocean and eastern South Atlantic.

Subfamily Pleuronectinae Cuvier 1816

Eyes and color always on right side of body, except in rare sinistral specimens of some species and in *Platichthys* species. Origin of dorsal fin above the eyes. Lateral line well developed on both sides of body. Gill membranes fused. Oil globules absent in eggs of all species except *Hypsopsetta guttulata* and *Pleuronichthys ritteri*. Other characters as given in Pleuronectidae synopsis. Twenty-seven genera with about 61 species. Benthic carnivores occupying shelf and slope habitats in arctic and northern seas. *Platichthys*, *Kareius*, and some species of *Liopsetta* and *Pleuronectes* enter brackish and fresh water. There are two tribes in Pleuronectinae, Hippoglossini and Pleuronectini, classified on the basis of jaw morphological characters (Li 1981 [ref. 26826]). They may not be monophyletic (Nelson 1994 [ref. 26204]) and have been reclassified by Cooper and Chapleau (1998 [ref. 26711]) into a number of tribes and subfamilies not accepted here. Sakamoto (1984 [ref. 5273]) in his revision of Pleuronectidae regrouped several pleuronectine genera (e.g., *Isopsetta*, *Lepidopsetta*, *Limanda*, *Liopsetta*, *Parophrys*, *Pseudopleuronectes* and *Pleuronectes*) under the genus *Pleuronectes*. A cladistic analysis of Pleuronectinae (sensu Norman 1934 [ref. 6893]) = Pleuronectidae (sensu Chapleau and Keast 1988 [ref. 12625]) conducted by Cooper and Chapleau (1998 [ref. 26711]) resulted in resurrection of the genera *Isopsetta*, *Lepidopsetta*, *Limanda*, *Parophrys*, and *Pseudopleuronectes* from the synonymy of *Pleuronectes* (sensu Sakamoto 1984 [ref. 5273]). Besides that, they reclassified the following genera: *Atheresthes* and *Reinhardtius* to *Reinhardtius*; *Errex*, *Glyptocephalus*, and *Tanakius* to *Glyptocephalus*; *Embassichthys* and *Microstomus* to *Microstomus*; *Hypsopsetta* and *Pleuronichthys* to *Pleuronichthys*; and *Kareius* and *Platichthys* to *Platichthys*. The revision of pleuronectines by Cooper and Chapleau (1998 [ref. 26711]) has been followed in an annotated list of fishes of Far Eastern seas (Boretz 2000 [ref. 26821]). However, I retain most of the just-mentioned genera (except *Errex*) as separate genera. The same nomenclatural decision was made by other authors for

the following genera reclassified by Cooper and Chapleau (1998 [ref. 26711]): *Atheresthes* (Evseenko 2000 [ref. 26823], Hoshino 2001 [ref. 25541]), *Hypsopsetta* (Evseenko 2003 [ref. 27298]), *Embassichthys* (Orr and Matarese 2000 [ref. 24744], Mecklenburg et al. 2002 [ref. 25968]), *Platichthys* (Voronina 1999 [ref. 24880]), and *Liopsetta* (Voronina and Evseenko 2001 [ref. 25618]).

Genus *Acanthopsetta* Schmidt 1904

Acanthopsetta Schmidt 1904:237 [ref. 3946]. Type species *Acanthopsetta nadeshnyi* Schmidt 1904. Type by monotypy.

***Acanthopsetta nadeshnyi* Schmidt 1904**

Acanthopsetta nadeshnyi Schmidt 1904:237, Pl. 5 (fig. 1) [ref. 3946] (Aniva Bay, Okhotsk Sea; Japan Sea: Amerika Bay and Peter the Great Bay, Primorye, Russia; Wonsan, Korea; 55–110 m). Syntypes: BMNH [ex ZIN 12340] (10; ZIN 12339–46 (1, 3 now 2, 7, 3, 1, 2, 8, 6+), 12764 (1), 13066 (1)).

DISTRIBUTION: Western North Pacific.

Genus *Atheresthes* Jordan & Gilbert 1880

Atheresthes Jordan & Gilbert 1880:51 [ref. 2366]. Type species *Platysomachthys stomias* Jordan & Gilbert 1880. Type by original designation (also monotypic).

***Atheresthes evermanni* Jordan & Starks 1904**

Atheresthes evermanni Jordan & Starks 1904:621, Pl. 5 (fig. 1) [ref. 2526] (Matsushima Bay, Japan). Holotype (unique): USNM 51490.

Reinhardtius oleosus Tanaka 1918:226 [ref. 17357] (Tokyo fish market, probably from Iwate [Ibaraki] Pref., Japan). Holotype (unique): ZUMT.

DISTRIBUTION: North Pacific.

***Atheresthes stomias* (Jordan & Gilbert 1880)**

Platysomachthys stomias Jordan & Gilbert 1880:301 [ref. 10581] (just outside the Golden Gate Bridge (obtained at San Francisco market), California, U.S.A.). Holotype (unique): ?USNM 27186 (1 of 3).

DISTRIBUTION: North Pacific.

Genus *Cleisthenes* Jordan & Starks 1904

Cleisthenes Jordan & Starks 1904:622 [ref. 2526]. Type species *Cleisthenes pinetorum* Jordan & Starks 1904. Type by original designation (also monotypic).

Protopsetta Schmidt 1904:230 [ref. 3946]. Subgenus of *Hippoglossoides*. Type species *Hippoglossoides herzensteini* Schmidt 1904. Type by monotypy.

REMARKS: *Cleisthenes* Jordan & Starks 1904 sometimes is treated as a subgenus of *Hippoglossoides* Gottsche 1835.

***Cleisthenes herzensteini* (Schmidt 1904)**

Hippoglossoides herzensteini Schmidt 1904:229 [ref. 3946] (Mauka, w. Sakhalin I.; Peter the Great Bay, 55–63 m; and Wonsan, Korea, Japan Sea). Syntypes: ZIN 12361–65 (2, 1, 4, 1, 1).

DISTRIBUTION: Western North Pacific.

***Cleisthenes pinetorum* Jordan & Starks 1904**

Cleisthenes pinetorum Jordan & Starks 1904:622, Fig. [ref. 2526] (Kinkwazan I., Matsushima Bay, Japan). Holotype: USNM 51403.

DISTRIBUTION: Western North Pacific.

Genus *Clidoderma* Bleeker 1862

Clidoderma Bleeker 1862:425 [ref. 388]. Type species *Platessa asperrima* Temminck & Schlegel 1846. Type by monotypy.

***Clidoderma asperrimum* (Temminck & Schlegel 1846)**

Platessa asperrima Temminck & Schlegel 1846:177, Pl. 91 [ref. 4374] (Japan). Lectotype: RMNH D1338 (dry).

DISTRIBUTION: North Pacific.

Genus *Dexistes* Jordan & Starks 1904

Dexistes Jordan & Starks 1904:624 [ref. 2526]. Type species *Dexistes rikuzenius* Jordan & Starks 1904. Type by original designation (also monotypic).

Araiias Jordan & Starks 1904:624 [ref. 2526]. Type species *Araiias ariommus* Jordan & Starks 1904. Type by monotypy.

***Dexistes rikuzenius* Jordan & Starks 1904**

Dexistes rikuzenius Jordan & Starks 1904:624, Pl. 6 (fig. 1) [ref. 2526] (Matsushima Bay, Japan, Albatross sta. 3774, 84 fm). Holotype: USNM 51423.

Araiias ariommus Jordan & Starks 1904:624, Pl. 6 (fig. 2) [ref. 2526] (Matsushima Bay, Japan, 42–45 fm). Holotype: USNM 51417.

DISTRIBUTION: Western North Pacific.

Genus *Embassichthys* Jordan & Evermann 1896

Embassichthys Jordan & Evermann 1896:506 [ref. 2442]. Type species *Cynicoglossus bathybius* Gilbert 1890. Type by original designation (also monotypic).

***Embassichthys bathybius* (Gilbert 1890)**

Cynicoglossus bathybius Gilbert 1890:123 [ref. 1623] (Santa Barbara Channel, off s. California, U.S.A., Albatross sta. 2980, 33°49'45"N, 119°24'30"W, 603 fm). Lectotype: USNM (not found).

DISTRIBUTION: North Pacific.

REMARKS: The lectotype was established by Jordan and Evermann (1898:2656 [ref. 2444]).

Genus *Eopsetta* Jordan & Goss 1885

Eopsetta Jordan & Goss in Jordan 1885:923 [135 of separate] [ref. 2385]. Subgenus of *Hippoglossoides*. Type species *Hippoglossoides jordani* Lockington 1879. Type by original designation (also monotypic).

Xystrias Jordan & Starks 1904:623 [ref. 2526]. Type species *Hippoglossus grigorjewi* Herzenstein 1890. Type by original designation (also monotypic).

***Eopsetta grigorjewi* (Herzenstein 1890)**

Hippoglossus grigorjewi Herzenstein 1890:134 [56 in n.s.] [ref. 18286] (Hakodate, Hokkaido, Japan). Holotype (unique): ZIN 8732.

Verasper otakii Jordan & Snyder 1900:378 [ref. 2502] (Tokyo, Japan). Holotype (unique): USNM 49396.

DISTRIBUTION: Western North Pacific.

***Eopsetta jordani* (Lockington 1879)**

Hippoglossoides jordani Lockington 1879:235 [ref. 20589] (San Francisco, California, U.S.A.). Syntypes: CAS (4, lost).

DISTRIBUTION: Eastern North Pacific.

Genus *Glyptocephalus* Gottsche 1835

Glyptocephalus Gottsche 1835:136, 156 [ref. 1862]. Type species *Pleuronectes saxicola* Faber 1828. Type by monotypy.

Errex Jordan 1919:343 [ref. 2413]. Type species *Glyptocephalus zachirus* Lockington 1879. Type by original designation (also monotypic).

***Glyptocephalus cynoglossus* (Linnaeus 1758)**

Pleuronectes cynoglossus Linnaeus 1758:269 [ref. 2787] (Belgium). Syntypes: BMNH 1853.11.12.126 [Gronovius coll.] (1, skin).

Pleuronectes saxicola Faber 1828:244 [ref. 18075] (Denmark). No types known.

Pleuronectes nigromanus Nilsson 1829:401 [ref. 18475] (North Sea). No types known.

Platea elongata Yarrell 1839:33 [ref. 17748] (Stoford, Bridgewater Bay, England). Holotype (unique): whereabouts unknown (dry specimen).

Glyptocephalus acadianus Gill 1873–74:362 [ref. 17659] (Eastport, Maine, U.S.A.). Holotype (unique): USNM 12685.

DISTRIBUTION: North Atlantic.

***Glyptocephalus stelleri* (Schmidt 1904)**

Microstomus stelleri Schmidt 1904:247 [ref. 3946] (Aniva Bay, Okhotsk Sea; Japan Sea from Tatar Strait to Wonsan, Korea; about 50–80 m). Syntypes: ZIN 12347 (6), 12349–52 (3, 1, 2, 2), 12437 (1), 13069–70 (1, 1).

Glyptocephalus ostroumowi Pavlenko 1910:59, Figs. 13a, b [ref. 3393] (Peter the Great Bay, Russia, Japan Sea, 245–280 ft [35–40 Russian fm]). Syntypes: (5) whereabouts unknown.

Glyptocephalus sasae Snyder 1911:548 [ref. 4152] (Otaru market, Hokkaido, Japan). Holotype: USNM 68246.

Microstomus hireguro Tanaka 1916:67 [ref. 15075] (Obama, Fukui Pref., Japan). Syntypes: ZUMT 6987–89 (3, lost).

DISTRIBUTION: North Pacific.

***Glyptocephalus zachirus* Lockington 1879**

Glyptocephalus zachirus Lockington 1879:88 [ref. 17560] (markets of San Francisco, California, U.S.A.). Syntypes: CAS (6, lost).

DISTRIBUTION: North Pacific.

Genus *Hippoglossoides* Gottsche 1835

Hippoglossoides Gottsche 1835:164, 168 [ref. 1862]. Type species *Hippoglossoides limanda* Gottsche 1835. Type by monotypy.

Citharus Reinhardt 1837:116, 130 [ref. 3691]. Type species *Pleuronectes platessoides* Fabricius 1780. Type by subsequent designation.

Drepanopsetta Gill 1861:50 [ref. 1766]. Type species *Pleuronectes platessoides* Fabricius 1780. Type by monotypy.

Pomatopsetta Gill 1864:216 [ref. 1704]. Type species *Platea dentata* Storer 1839. Type by monotypy.

Cynopsetta Jordan & Starks (ex Schmidt) 1906:188 [ref. 2531]. Type species *Hippoglossoides dubius* Schmidt 1904. Type by monotypy.

***Hippoglossoides dubius* Schmidt 1904**

Hippoglossoides dubius Schmidt 1904:227, Pl. 6 (fig. 1) [ref. 3946] (Mauka, w. Sakhalin I., Japan Sea, 46–47 Russian fm; Aniva Bay, s. Sakhalin I., Okhotsk Sea, 29 Russian fm). Syntypes: ZIN 12366–67 (1, 1).

Hippoglossoides katakurae Snyder 1911:546 [ref. 4152] (Otaru, Japan). Holotype (unique): USNM 68244.

DISTRIBUTION: Northwest Pacific.

***Hippoglossoides elassodon* Jordan & Gilbert 1880**

Hippoglossoides elassodon Jordan & Gilbert 1880:278 [ref. 10580] (Seattle and Tacoma, Washington, U.S.A.). Syntypes: (about 20) MCZ 35950 [ex USNM 27263] (1); MNHN A-3349 (1); NMW 43866 (1); USNM 27263 (now 7); UMMZ 162066 [ex USNM 27263] (1); ZMUC [ex USNM 27263] (?).

DISTRIBUTION: North Pacific.

***Hippoglossoides platessoides* (Fabricius 1780)**

Pleuronectes platessoides Fabricius 1780:164 [ref. 17464] (North Seas). No types known.

Pleuronectes limandooides Bloch 1787:24, Pl. 186 [ref. 468] (e. Atlantic). Lectotype: whereabouts unknown.

DISTRIBUTION: North Atlantic.

REMARKS: This species is split into two subspecies: *Hippoglossoides platessoides platessoides* (Fabricius 1780) from the northwestern Atlantic and *H. p. limandooides* (Bloch 1787) from the northeastern Atlantic.

***Hippoglossoides robustus* Gill & Townsend 1897**

Hippoglossoides robustus Gill & Townsend 1897:234 [ref. 1749] (Bering Sea, Albatross sta. 3541, 56°14'N, 164°08'W, 49 fm). Holotype (unique): USNM 48766.

Hippoglossoides hamiltoni Jordan & Gilbert in Jordan & Evermann 1898:2616 [ref. 2445] (off Dalnoi Point, Kamchatka, Russia, Albatross sta. 3641, 52°58'00"N, 158°36'00"E, 16 fm). Holotype (unique): SU 5769.

Hippoglossoides propinquus Hubbs 1915:469, Pl. 26 (fig. 5) [ref. 2224] (Aniva Bay, Sakhalin I., Albatross sta. 5005, 46°04'40"N, 142°27'30"E, 42–43 fm). Holotype: USNM 75667.

DISTRIBUTION: North Pacific.

Genus *Hippoglossus* Cuvier 1816

Hippoglossus Cuvier 1816:221 [ref. 993]. Type species *Pleuronectes hippoglossus* Linnaeus 1758. Type by absolute tautomy.

***Hippoglossus hippoglossus* (Linnaeus 1758)**

Pleuronectes hippoglossus Linnaeus 1758:269 [ref. 2787] (European seas). Syntypes: BMNH 1853.11.12.127 [Gronovius coll.] (1, skin).

Hippoglossus vulgaris Fleming 1828:199 [ref. 1339] (rivers and estuaries of England).

Hippoglossus maximus Gottsche 1835:164 [ref. 1862] (European seas). Syntypes: BMNH 1853.11.12.127 [Gronovius coll.] (1, skin).

Hippoglossus gigas Swainson 1839:302 [ref. 4303] (no locality stated). No types known.

Hippoglossus americanus Gill 1864:220 [ref. 1704] (e. coast of North America). No types known.

Hippoglossus linnei Malm 1877:508 [ref. 2881] (European seas). Syntypes: BMNH 1853.11.12.127 [Gronovius coll.] (1, skin).

DISTRIBUTION: North Atlantic.

REMARKS: *Hippoglossus vulgaris* Fleming is based in part on *Pleuronectes hippoglossus* Linnaeus 1758. *Hippoglossus maximus* and *H. linnei* are regarded as unneeded new names for *Pleuronectes hippoglossus* Linnaeus 1758 (to avoid “Strickland tautomy”).

***Hippoglossus stenolepis* Schmidt 1904**

Hippoglossus stenolepis Schmidt 1904:224, Fig. 15 [ref. 3946] (Aniva Bay, s. Sakhalin I., Okhotsk Sea). Holotype (unique): ZIN 12588.

Hippoglossus hippoglossus camtchaticus Rendahl 1931:61 [ref. 16326] (Kamtchatka, Russia, nw. Pacific). Holotype (unique): NRM 10104.

DISTRIBUTION: North Pacific.

Genus *Hypsopsetta* Gill 1862

Hypsopsetta Gill 1862:330 [ref. 1668]. Type species *Pleuronichthys guttulatus* Girard 1856. Type by monotypy.

***Hypsopsetta guttulata* (Girard 1856)**

Pleuronichthys guttulatus Girard 1856:137 [ref. 1809] (Tomales Bay, California, U.S.A.). Syntypes: whereabouts unknown.

Parophrys ayresii Günther 1862:456 [ref. 1969] (San Francisco, California, U.S.A.). Holotype (unique): BMNH 1862.8.16.1.

DISTRIBUTION: Eastern Pacific.

***Hypsopsetta macrocephala* Breder 1936**

Hypsopsetta macrocephala Breder 1936:4, Fig. 1 [ref. 13685] (San Francisquito Bay, Gulf of California, Mexico). Holotype (unique): YPM 809.

DISTRIBUTION: Eastern Pacific: San Francisquito Bay, Gulf of California.

REMARKS: *Hypsopsetta macrocephala* Breder 1936 is recognized provisionally as a valid species; however, its taxonomic status requires further study.

Genus *Isopsetta* Lockington 1883

Isopsetta Lockington in Jordan & Gilbert 1883:832 [ref. 2476]. Type species *Lepidopsetta isolepis* Lockington 1880. Type by original designation (also monotypic).

***Isopsetta isolepis* (Lockington 1880)**

Lepidopsetta isolepis Lockington 1880:325 [ref. 17554] (San Francisco market, California, U.S.A.). Syntypes: ANSP 8872 (1); ZMUB 1191 [ex USNM 26982] (1); USNM 26982 (orig. 6, now 3), 27116 (3).

DISTRIBUTION: Eastern North Pacific.

Genus *Kareius* Jordan & Snyder 1900

Kareius Jordan & Snyder 1900:379 [ref. 2502]. Type species *Pleuronectes scutifer* Steindachner 1870. Type by original designation (also monotypic).

***Kareius bicoloratus* (Basilewsky 1855)**

Platessa bicolorata Basilewsky 1855:260 [ref. 200] (Shantung, China). Holotype or syntypes: ZIN 6354 (1, lost).

Pleuronectes scutifer Steindachner 1870:628 [6 of separate], Pl. 2 [ref. 4218] (Chefoo, Shantung Prov., China). Holotype (unique): NMW 42671.

DISTRIBUTION: Western North Pacific.

REMARKS: It is not clear whether the original description of *Platessa bicolorata* Basilewsky 1855 [ref. 200] was based on more than one type specimen. The date of publication requires additional research; it could be between 1852 and 1855.

Genus *Lepidopsetta* Gill 1862

Lepidopsetta Gill 1862:330 [ref. 1668]. Type species *Platichthys umbrosus* Girard 1856. Type by monotypy.

***Lepidopsetta bilineata* (Ayres 1855)**

Platessa bilineata Ayres 1855:[2] col. 5 [ref. 13428] (Gulf of the Farallones, off San Francisco, California, U.S.A.). Neotype: CAS 42650.

Platichthys umbrosus Girard 1856:136 [ref. 1809] (Cape Flattery, Washington, U.S.A.). Holotype (unique): apparently lost.

Pleuronectes perarciatus Cope 1873:32 [9 of separate] [ref. 929] (Alaska, U.S.A.). Holotype (unique): ANSP 8725.

DISTRIBUTION: North Pacific.

REMARKS: The neotype of *Platessa bilineata* Ayres was selected by Orr and Matarese (2000: 561, 567 [ref. 24744]).

***Lepidopsetta mochigarei* Snyder 1911**

Lepidopsetta mochigarei Snyder 1911:547 [ref. 4152] (Otaru, Hokkaido, Japan). Holotype: USNM 68245.

DISTRIBUTION: Western North Pacific.

***Lepidopsetta polyxystra* Orr & Matarese 2000**

Lepidopsetta polyxystra Orr & Matarese 2000:571, Figs. 21–23 [ref. 24744] (Constantine Harbor, Amchitka I., Aleutian Is., Alaska, U.S.A., 19–42 m). Holotype: UW 014826.

DISTRIBUTION: North Pacific.

Genus *Limanda* Gottsche 1835

Limanda Gottsche 1835:136, 160 [ref. 1862]. Type species *Limanda vulgaris* Gottsche 1835. Type by monotypy.

Myzopsetta Gill 1861:51 [ref. 1766]. Type species *Platessa ferruginea* Storer 1839. Type by subsequent designation.

***Limanda aspera* (Pallas 1814)**

Pleuronectes asper Pallas 1814:425 [ref. 3351] (sea between Kamchatka, Russia and Alaska, U.S.A.). Syntypes: ZMB 7414 (1).

Limanda asprella Hubbs 1915:482, Pl. 27 (fig. 7) [ref. 2224] (market of Korsakov, Aniva Bay, Sakhalin I., west of Okhotsk Sea). Holotype (unique): USNM 75668.

DISTRIBUTION: Northern North Pacific.

***Limanda ferruginea* (Storer 1839)**

Platessa ferruginea Storer 1839:477 [141], Pl. 7 [Pl. 2] [ref. 4278] (Cape Ann, Massachusetts, U.S.A.). Holotype (unique): whereabouts unknown.

DISTRIBUTION: Western North Atlantic.

***Limanda limanda* (Linnaeus 1758)**

Pleuronectes limanda Linnaeus 1758:270 [ref. 2787] (European seas). No types known.

Pleuronectes limandula Bonnaterre 1788:75 [ref. 4940] (“Ocean”). Holotype (unique): whereabouts unknown.

Limanda vulgaris Gottsche 1835:160 [ref. 1862]. (European seas). No types known.

Limanda oceanica Bonaparte 1846:48 [ref. 519] (“Ocean”). No types known.

DISTRIBUTION: Eastern North Atlantic and seas of northern Europe.

***Limanda proboscidea* Gilbert 1896**

Limanda proboscidea Gilbert 1896:460, Pl. 33 [ref. 1628] (Bristol Bay, Alaska, U.S.A., 11.5–21 fm).
Syntypes (incl. potential lectotype): BMNH 1896.7.23.232 [ex USNM] (1); MCZ 28220 (1);
SU 3087 (1), 3089 (2), 5429 (1); USNM 48629 (1), 64131 (1); ZMUC J1861 (1).

DISTRIBUTION: North Pacific.

***Limanda punctatissimus* (Steindachner 1879)**

Hippoglossoides (Hippoglossina) punctatissimus Steindachner 1879:167 [49 of separate] [ref. 4229] (Hakodate, Hokkaido, Japan). Holotype (unique): NMW 43879.

Limanda iridorum Jordan & Starks 1906:206, Fig. 14 [ref. 2532] (Mororan [Muroran], Japan).
Holotype: USNM 55644 (not found in 1980 or in 56366).

DISTRIBUTION: Western North Pacific.

***Limanda sakhalinensis* Hubbs 1915**

Limanda sakhalinensis Hubbs 1915:480, Pl. 26 (fig. 6) [ref. 2224] (Aniva Bay, Sakhalin I., w.
Okhotsk Sea, Albatross sta. 5013, 43 fm). Holotype: USNM 75674.

Limanda korigarei Hubbs 1915:483, Pl. 27 (fig. 8) [ref. 2224] (Aniva Bay, Sakhalin I., w.
Okhotsk Sea, Albatross sta. 5008, 40 fm). Holotype: USNM 75669.

DISTRIBUTION: Western North Pacific.

Genus *Liopsetta* Gill 1864

Liopsetta Gill 1864:217 [ref. 1704]. Type species *Platessa glabra* Storer 1843. Type by original
designation.

Euchalarodus Gill 1864:216 [ref. 1704]. Type species *Euchalarodus putnami* Gill 1864. Type by
monotypy.

***Liopsetta glacialis* (Pallas 1776)**

Pleuronectes glacialis Pallas 1776:706 [ref. 18509] (Arctic Ocean, Kara Bay). No types known.

Pleuronectes cicatricosus Pallas 1814:424 [ref. 3351] (sea between Kamchatka, Russia and
Alaska, U.S.A.). No types known.

Platessa dwinensis Lilljeborg 1851:5 [ref. 17538] (mouth of R. Dvina [Dwina], Arkhangelski
Oblast, Russia). No types known.

Pleuronectes franklinii Günther 1862:442 [ref. 1969] (Arctic seas of America). Syntypes: BMNH
uncat. (1, 1).

Pleuronectes glacialis natio caninensis Suvorov 1929:119 [ref. 19829] (Cheshskaya [Chosha]
Bay, s. Barents Sea, Russia). Syntypes: (19) not at ZIN.

Liopsetta glacialis knipowitschi Essipov 1939:171, Fig. 2 [ref. 21768] (Gulf of Ob at Cape
Drovyanji, 72°25'N, 72°45'E, Siberia, Arctic Ocean). No types known.

DISTRIBUTION: Eastern North Atlantic through Arctic to North Pacific.

***Liopsetta pinnifasciata* (Kner 1870)**

Pleuronectes pinnifasciatus Kner in Steindachner & Kner 1870:422 [2 of separate], Pl. 1 (fig. 1)
[ref. 4250] (Decastris [De Kastri] Bay, Tatar Strait, n. Japan Sea). Holotype (unique): NMW
[ex Mus. Godeffroy 5583].

DISTRIBUTION: Western North Pacific.

***Liopsetta putnami* (Gill 1864)**

Euchalarodus putnami Gill 1864:216 [ref. 1704] (harbor of Salem, Massachusetts, U.S.A.).
Syntypes: USNM 5368 (2).

DISTRIBUTION: Western North Atlantic off North America.

Genus *Lyopsetta* Jordan & Goss 1885

Lyopsetta Jordan & Goss in Jordan 1885:923 [135] [ref. 2385]. Subgenus of *Hippoglossoides*. Type species *Hippoglossoides exilis* Jordan & Gilbert 1880. Type by original designation (also monotypic).

***Lyopsetta exilis* (Jordan & Gilbert 1880)**

Hippoglossoides exilis Jordan & Gilbert 1880:154 [ref. 10584] (between the Golden Gate Bridge and Point Reyes, California, U.S.A.). Syntypes: (upwards of 100) ANSP 8721 (1); MCZ 35946 [ex USNM 27121] (1); MNHN A-3307 (1); MSNG 8332 (1); MTD F141 [ex USNM] (1); USNM 27061 (2, not found in 1980), 27121 (12); ZMB 11625 (1), 11652 (1), 11693 (1); ZMUB 1465 [ex USNM 27121] (1); ZMUC (1).

DISTRIBUTION: Eastern North Pacific.

Genus *Microstomus* Gottsche 1835

Microstomus Gottsche 1835:136, 150 [ref. 1862]. Type species *Microstomus latidens* Gottsche 1835. Type by monotypy.

Cynicoglossus Bonaparte 1837:punctata 97 [ref. 4893]. Type species *Pleuronectes cynoglossus* Linnaeus 1758. Type by monotypy.

Cynoglossa Bonaparte 1846:48 [ref. 519]. Type species *Pleuronectes microcephalus* Donovan 1803. Type by monotypy.

Brachyprosopon Bleeker 1862:428 [ref. 388]. Type species *Pleuronectes microcephalus* of Fleming 1828. Type by monotypy.

Veraequa Jordan & Starks 1904:625 [ref. 2526]. Type species *Veraequa achne* Jordan & Starks 1904. Type by original designation (also monotypic).

***Microstomus achne* (Jordan & Starks 1904)**

Veraequa achne Jordan & Starks 1904:625, Pl. 7 (fig. 1) [ref. 2526] (Matsushima Bay, Japan, Albatross sta. 3772, 79 fm). Holotype (unique): USNM 51447.

DISTRIBUTION: Western North Pacific.

***Microstomus kitt* (Walbaum 1792)**

Pleuronectes kitt Walbaum 1792:120 [ref. 4572] (British seas). No types known.

Pleuronectes laevis Shaw 1803:299 [ref. 4014] (London, England). No types known.

Pleuronectes microcephalus Donovan 1803:3 unnum. pp., Pl. 42 [ref. 17408] (England). No types known.

Platessa pola Cuvier 1829:339 [ref. 995] (no locality). No types known.

Microstomus latidens Gottsche 1835:150 [ref. 1862] (Copenhagen fish market). Syntypes: whereabouts unknown.

Pleuronectes gilli Steindachner 1868:120 [ref. 20463] (“Eismeer bei Nordisland”). Holotype (unique): not yet found at NMW.

DISTRIBUTION: Eastern North Atlantic.

***Microstomus pacificus* (Lockington 1879)**

Glyptocephalus pacificus Lockington 1879:254 [ref. 20590] (markets of San Francisco, California, U.S.A.). Syntypes: CAS (2, lost in 1906).

DISTRIBUTION: Eastern North Pacific.

***Microstomus shuntovi* Borets 1983**

Microstomus shuntovi Borets 1983:718, Fig. [ref. 8248] (North Pacific, 35°17'N, 171°19'E, 270–290 m). Holotype: ZIN 45771 (not in collection in 1996).

DISTRIBUTION: North Pacific.

Genus *Parophrys* Girard 1854

Parophrys Girard 1854:139 [ref. 1817]. Type species *Parophrys vetulus* Girard 1854. Type by monotypy.

***Parophrys vetulus* Girard 1854**

Parophrys vetulus Girard 1854:140 [ref. 1817] (San Francisco, California, U.S.A.). No types known.

Parophrys hubbardi Gill 1862:281 [ref. 1666] (San Francisco, California, U.S.A.). Holotype: USNM 4482.

Pleuronectes digrammus Günther 1862:445 [ref. 1969] (Victoria Harbor, Vancouver I., British Columbia, Canada). Syntypes: BMNH 1860.11.19.39–40 (2, skins).

DISTRIBUTION: Eastern North Pacific as far west as Agattu Island, Aleutian Islands.

Genus *Platichthys* Girard 1854

Platichthys Girard 1854:139 [ref. 1817]. Type species *Platichthys rugosus* Girard 1854. Type by monotypy.

Flesus Moreau 1881:298 (v. 3) [ref. 3040]. Type species *Pleuronectes flesus* Linnaeus 1758. Type by absolute tautonomy of name in synonymy of one of two included species.

***Platichthys flesus* (Linnaeus 1758)**

Pleuronectes flesus Linnaeus 1758:270 [ref. 2787] (European seas). Syntypes: BMNH 1853.11.12.132–134 [Gronovius coll.] (3, skins), ?NRM 20 (1).

Pleuronectes passer Linnaeus 1758:271 [ref. 2787] (European seas). No types known.

Pleuronectes flesoides Pontoppidan 1766:188, Pl. 15 [ref. 18567] (Locality?). No types known.

Pleuronectes roseus Shaw in Shaw & Nodder 1796, Pl. 238 [ref. 4013] (Thames River, U.K.). Holotype (unique): Leverian Mus. (not researched).

Pleuronectes luscus Pallas 1814:427 [ref. 3351] (Feodosiya, Crimea, Ukraine). No types known.

Plateissa carnaria Brown 1830:99, Pl. 2 (not 3) [ref. 17288] (Prestonpans, se. Scotland, U.K.). No types known.

Plateissa glabra Rathke 1837:352 [ref. 18611] (Kerch, Crimea). No types known.

Plateissa flesus var. *marmorata* Nordmann 1840:534, Pl. 28 (fig. 1) [ref. 3209] (locality unknown). No types known.

Pleuronectes italicus Günther 1862:452 [ref. 1969] (Mediterranean; Dalmatia [Croatia]). Syntypes: BMNH 1842.6.7.3 (1).

Pleuronectes bogdanovii Sandeberg 1878:236, Figs. [ref. 18653] (White Sea). No types known.

Flesus vulgaris Moreau 1881:299 [ref. 3040].

Pleuronectes flesus var. *trachurus* Duncker 1892:280, 291, Fig. 2 [ref. 17428] (mouth of Trave R., Germany, Baltic Sea). Syntypes: (several) whereabouts unknown.

Pleuronectes flesus var. *leiurus* Duncker 1892:280, 291, Fig. 1 [ref. 17428] (Elbe R. at Hamburg, Germany). No types known.

Pleuronectes flesus septentrionalis Berg 1932:5, Fig. 3 [ref. 26819] (Murman Coast and coasts of Kanin Peninsula, Barents Sea). Syntypes: (many) ZIN? 18.772 [figured, 25 cm].

DISTRIBUTION: Eastern North Atlantic and western Europe; introduced elsewhere.

REMARKS: Some authors recognize from two (Voronina 1999 [24880]) to six (Berg 1949 [ref. 12936]) subspecies within this species. *Flesus vulgaris* Moreau 1881 is an unneeded new name for *Pleuronectes flesus* Linnaeus 1758; therefore, the syntype of Desoutter et al. (2001:312 [ref. 25922]) is not a type specimen (MNHN 1898-0941).

***Platichthys stellatus* (Pallas 1788)**

Pleuronectes stellatus Pallas 1788:347, Pl. 9 (fig. 1) [ref. 18507] (Kamtchatka; Aleutian Is.; Kuril Is.). Possible type: ZMB 7415 (1).

Platichthys rugosus Girard 1854:139 [ref. 1817] (San Francisco, California, U.S.A.). No types known.

DISTRIBUTION: North Pacific.

Genus *Pleuronectes* Linnaeus 1758

Pleuronectes Linnaeus 1758:268 [ref. 2787]. Type species *Pleuronectes platessa* Linnaeus 1758. Type by subsequent designation.

Plateissa Cuvier 1816:220 [ref. 993]. Type species *Pleuronectes platessa* Linnaeus 1758. Type by absolute tautonymy.

***Pleuronectes platessa* Linnaeus 1758**

Pleuronectes platessa Linnaeus 1758:269 [ref. 2787] (European seas). Syntypes: BMNH 1853.11.12.130–131 [Gronovius coll.] (2, skins).

Plateissa vulgaris Cloquet 1826:403 [ref. 852]. (European seas). Syntypes: BMNH 1853.11.12.130–131 [Gronovius coll.] (2, skins).

Pleuronectes borealis Faber 1828:244 [ref. 18075] (Iceland; North and West Jutland and Kattegat, Denmark). Syntypes: whereabouts unknown.

Plateissa latus Cuvier 1829:339 [ref. 995] (France [*nos côtes*]). No types known.

Pleuronectes platessa var. *baltica* Nilsson 1855:616 [ref. 3205] (Sund, Baltic Sea). No types known.

DISTRIBUTION: Eastern North Atlantic and seas of northern Europe.

REMARKS: *Plateissa vulgaris* Cloquet 1826 is an unneeded new name for *Pleuronectes platessa* Linnaeus 1758.

***Pleuronectes quadrituberculatus* Pallas 1814**

Pleuronectes quadrituberculatus Pallas 1814:423 [ref. 3351] (sea between Kamchatka, Russia and Alaska, U.S.A.). No types known.

Pleuronectes pallasi Steindachner 1879:163 [45 of separate], Pl. 2 (fig. 3) [ref. 4229] (Kamchatka, Russia). Syntypes: (several) NMW 42642 (2).

DISTRIBUTION: North Pacific.

Genus *Pleuronichthys* Girard 1854

Pleuronichthys Girard 1854:139 [ref. 1817]. Type species *Pleuronichthys coenosus* Girard 1854. Type by monotypy.

Heteroprosopon Bleeker 1862:429 [ref. 388]. Type species *Plateissa cornuta* Temminck & Schlegel 1846. Type by monotypy.

***Pleuronichthys coenosus* Girard 1854**

Pleuronichthys coenosus Girard 1854:139 [ref. 1817] (San Francisco, California, U.S.A.). Syntypes: USNM 697 (1).

Pleuronichthys nephelus Starks & Thompson 1910:282, Fig. 1 [ref. 10117] (San Juan Is., Puget Sound, Washington, U.S.A.). Holotype: USNM 74606.

DISTRIBUTION: Eastern North Pacific.

***Pleuronichthys cornutus* (Temminck & Schlegel 1846)**

Plateissa cornuta Temminck & Schlegel 1846:179, Pl. 92 (fig. 1) [ref. 4374] (Japan). Lectotype: RMNH 1336 (stuffed).

Pleuronichthys lighti Wu 1929:66, Fig. 54 [ref. 17843] (Island of Amoy or vicinity). Holotype (unique): whereabouts unknown.

DISTRIBUTION: Western North Pacific.

REMARKS: The lectotype of *Platessa cornuta* Temminck & Schlegel was designated by Boeseman (1947:146 [ref. 12876]).

***Pleuronichthys decurrens* Jordan & Gilbert 1881**

Pleuronichthys decurrens Jordan & Gilbert 1881:453 [ref. 12598] (Point Reyes and the Farallons, California, U.S.A.). Syntypes: ANSP 8884 (1) San Francisco; MNHN A-3280 (1), A-3368 (1); MTD F131 [ex USNM] (1); UMMZ 162042 (1); ?USNM 26978 (30, missing in 1980) Monterey, ?USNM 27115 (2) San Francisco; ?ZMB 11734 [ex USNM] (1).

DISTRIBUTION: Eastern North Pacific.

***Pleuronichthys ocellatus* Starks & Thompson 1910**

Pleuronichthys ocellatus Starks & Thompson 1910:285, Fig. 2 [ref. 10117] (31°21'N, 113°49'W, Gulf of California, Mexico, Albatross sta. 3024, 31°21'00"N, 113°49'00"W, 11 fm). Holotype: USNM 74605.

DISTRIBUTION: Eastern Pacific.

***Pleuronichthys ritteri* Starks & Morris 1907**

Pleuronichthys ritteri Starks & Morris 1907:243, Pl. 21 [ref. 10118] (San Diego Bay, California, U.S.A.). Holotype: SU 9786.

DISTRIBUTION: Eastern North Pacific: off west coast of U.S.A.

***Pleuronichthys verticalis* Jordan & Gilbert 1880**

Pleuronichthys verticalis Jordan & Gilbert 1880:49 [ref. 2366] (outside the Golden Gate Bridge, near San Francisco, California, U.S.A.). Syntypes: ANSP 8885 (1); Genova Mus. [ex USNM] (1); MTD F130 [ex USNM] (1); USNM 26979 (orig. 25, now 8), ?27230 (2); ?ZMB 11732 (1); ZMUB 1212 [ex USNM 26982] (1); ZMUC [ex USNM] (some).

DISTRIBUTION: Eastern North Pacific: off west coast of U.S.A.

Genus *Psettichthys* Girard 1854

Psettichthys Girard 1854:140 [ref. 1817]. Type species *Psettichthys melanostictus* Girard 1854. Type by monotypy.

***Psettichthys melanostictus* Girard 1854**

Psettichthys melanostictus Girard 1854:140 [ref. 1817] (San Francisco, California, U.S.A.). No types known.

DISTRIBUTION: Eastern North Pacific.

Genus *Pseudopleuronectes* Linnaeus 1758

Pseudopleuronectes Bleeker 1862:428 [ref. 388]. Type species *Pleuronectes planus* Mitchell 1814. Type by monotypy.

Limandella Jordan & Starks 1906:204 [ref. 2532]. Type species *Pleuronectes yokohamae* Günther 1877. Type by original designation.

Gareus Hubbs 1915:486 [ref. 2224]. Subgenus of *Liopsetta*. Type species *Pleuronectes obscurus* Herzenstein 1890. Type by original designation (also monotypic).

***Pseudopleuronectes americanus* (Walbaum 1792)**

Pleuronectes americanus Walbaum 1792:113 [ref. 4572] (New York, U.S.A.). No types known.

Pleuronectes planus Mitchell 1814:8 [ref. 3030] (New York, U.S.A.). No types known.

Platessa pusilla DeKay 1842:296, Pl. 47 (fig. 153) [ref. 1098] (shallow bays about New York, U.S.A.). Syntypes: New York State coll. (whereabouts unknown).

Pseudopleuronectes dignabilis Kendall 1912:392, Pl. 57 [ref. 14848] (Georges Bank, New England coast, U.S.A.). Holotype: USNM 73918.

DISTRIBUTION: Western North Atlantic: coast of North America.

***Pseudopleuronectes herzensteini* (Jordan & Snyder 1901)**

Limanda herzensteini Jordan & Snyder 1901:746 [ref. 2504] (Vladivostok, Russia; Hakodate, Japan). Syntypes: ZIN 1583 (3), 6163 (1), 8730 (1).

Pleuronectes japonicus Herzenstein 1890:130 [52 in n.s.] [ref. 18286] (Vladivostok, Russia; Hakodate, Japan). Syntypes: ZIN 1583 (3), 6163 (1), 8730 (1).

Limanda angustirostris Jordan & Starks (ex Kitahara) 1906:208, Fig. 15 [ref. 2532] (Aomori, Japan). Holotype: USNM 55645.

Limanda angustirostris var. *maculosa* Pavlenko 1910:58, Fig. 12 [ref. 3393] (Peter the Great Bay, Russia, Japan Sea. Syntypes: (2) whereabouts unknown.

DISTRIBUTION: Western North Pacific.

REMARKS: *Limanda herzensteini* Jordan & Starks 1901 is a replacement name for *Pleuronectes japonicus* Herzenstein 1890, which is preoccupied by *Pleuronectes japonicus* Houttuyn 1782 in Cynoglossidae.

***Pseudopleuronectes obscurus* (Herzenstein 1890)**

Pleuronectes obscurus Herzenstein 1890:127 [49 in n.s.] [ref. 18286] (Vladivostok, Russia; Japan). Syntypes: ZIN 8725–29 (1, 1, 1, 1, 1).

DISTRIBUTION: Western North Pacific.

***Pseudopleuronectes schrenki* (Schmidt 1904)**

Limanda schrenki Schmidt 1904:235 [ref. 3946] (Mauka, w. Sakhalin I., Japan Sea). Syntypes: ZIN 12377A–B (3, 1).

DISTRIBUTION: Western North Pacific.

***Pseudopleuronectes yokohamae* (Günther 1877)**

Pleuronectes yokohamae Günther 1877:442 [ref. 2009] (Yokohama Bay, Japan). Syntypes: BMNH 1879.5.14.21–22 (2).

DISTRIBUTION: Western North Pacific.

Genus *Reinhardtius* Gill 1861

Reinhardtius Gill 1861:50 [ref. 1766]. Type species *Pleuronectes cynoglossus* of Fabricius (not of Linnaeus) 1780. Type by monotypy.

Platysomichthys Bleeker 1862:425 [ref. 388]. Type species *Pleuronectes pinguis* Fabricius 1824. Type by monotypy.

***Reinhardtius hippoglossoides* (Walbaum 1792)**

Pleuronectes hippoglossoides Walbaum 1792:115 [ref. 4572] (Northern Ocean). No types known.

Pleuronectes pinguis Fabricius 1824:45 [ref. 17474] (Greenland). No types known.

Hippoglossus groenlandicus Günther 1862:404 [ref. 1969] (Greenland). Syntypes: (at least 5 at BMNH, 4 stuffed).

Reinhardtius matsuurae Jordan & Snyder 1901:309, Pl. 16 (figs. 7–8) [ref. 2506] (Misaki, Kanagawa Pref., Sagami Sea, Japan). Holotype: ZUMT 456 (stuffed) not seen in 1997.

DISTRIBUTION: North Pacific, North Atlantic, and southern Arctic.

Genus *Tanakius* Hubbs 1918

Tanakius Hubbs 1918:370 [ref. 2228]. Subgenus of *Dexistes*. Type species *Microstomus kitaharae* Jordan & Starks 1904. Type by original designation (also monotypic).

***Tanakius kitaharae* (Jordan & Starks 1904)**

Microstomus kitaharae Jordan & Starks 1904:625, Pl. 7 (fig. 2) [ref. 2526] (Matsushima Bay, Japan, Albatross sta. 3770, 42–45 fm). Holotype: USNM 51418.

DISTRIBUTION: Western North Pacific.

Genus *Verasper* Jordan & Gilbert 1898

Verasper Jordan & Gilbert in Jordan & Evermann 1898:2606, 2618 [ref. 2445]. Type species *Verasper moseri* Jordan & Gilbert 1898. Type by original designation (also monotypic).

***Verasper moseri* Jordan & Gilbert 1898**

Verasper moseri Jordan & Gilbert in Jordan & Evermann 1898:2619 [ref. 2445] (Shana Bay, Iturup I., Kuril Is.). Holotype: USNM 48797.

DISTRIBUTION: Western North Pacific.

***Verasper variegatus* (Temminck & Schlegel 1846)**

Platesa variegata Temminck & Schlegel 1846:176, Pl. 90 [ref. 4374] (Japan). Lectotype: RMNH D1333 (stuffed).

DISTRIBUTION: Western North Pacific.

Subfamily Poecilopsettinae Norman 1934

Poecilopsettines compose a compact group of small-sized and comparatively rare righteye flounders replacing the other subfamilies of pleuronectids in subtropical and tropical seas. Body oval-shaped or elongate, strongly compressed. Eyes on right side of head; reversal rare. Origin of dorsal fin above the eyes. Pelvic fins subsymmetrical, that on eyed side slightly in advance. Pectoral fin on blind side the same length or smaller than fin on eyed side. No fin spines. Lateral line rudimentary on blind side of body. Preopercle edge free and distinct. Mouth and teeth small. Vertebrae 36–43. Coloration on eyed side variable, often with spots or blotches on body and fins; blind side whitish. Marine; benthic, primarily in deep water, found at depths of about 60–500 m; deepest occurrence down to 880 m in *Poecilopsetta colorata*. Size range about 9–19 cm total length. Most species are usually under 15 cm in length. Feed on bottom-living animals. Three genera with 19 species, distributed primarily in the Indo-Pacific, with two species (*Poecilopsetta beanii* and *P. inermis*) occurring in the western North Atlantic. Sometimes this subfamily is recognized at the family level (as suggested by Chapleau and Keast 1988 [ref. 12625]).

Genus *Marleyella* Fowler 1925

Marleyella Fowler 1925:203 [ref. 5570]. Subgenus of *Poecilopsetta*. Type species *Poecilopsetta bicolorata* von Bonde 1922. Type by original designation (also monotypic).

***Marleyella bicolorata* (von Bonde 1922)**

Poecilopsetta bicolorata von Bonde 1922:14, Pl. 5 (fig. 2) [ref. 520] (Natal, South Africa, Pickle stns. 110 and 115, 70–222 fm). Syntypes: (several) BMNH 1922.3.27.5–6.

DISTRIBUTION: Western Indian Ocean.

***Marleyella maldivensis* Norman 1939**

Marleyella maldivensis Norman 1939:103, Fig. 34 [ref. 6556] (Maldives, Indian Ocean, 229 m). Holotype: BMNH 1939.5.24.1797–1798 (132 mm spec.).

DISTRIBUTION: Indian Ocean.

Genus *Nematops* Günther 1880

Nematops Günther 1880:57 [ref. 2011]. Type species *Nematops microstoma* Günther 1880. Type by monotypy.

***Nematops chui* Fowler 1934**

Nematops chui Fowler 1934:338, Fig. 93 [ref. 1416] (China Sea, off s. Luzon I., Philippines, Albatross sta. D.5110, 135 fm). Holotype: USNM 93087.

DISTRIBUTION: Western Pacific.

***Nematops grandisquama* Weber & de Beaufort 1929**

Nematops grandisquama Weber & de Beaufort 1929:134, Fig. 32 [ref. 16063] (St. Nikolaas Bay, Bali, Indonesia, 108–162 m). Syntypes: BMNH 1933.2.18.16 [ex ZMA] (1); ZMA 112647 (4).

DISTRIBUTION: Indo-West Pacific.

***Nematops macrochiru*s Norman 1931**

*Nematops macrochiru*s Norman 1931:421, Fig. 1 [ref. 16316] (Bali Strait, Indonesia, 8°29'S, 114°40'E, 200 m). Holotype (unique): BMNH 1931.7.23.1.

DISTRIBUTION: Indo-West Pacific.

REMARKS: Record of occurrence of this species from St. Helena Island in the Atlantic Ocean is erroneous.

***Nematops microstoma* Günther 1880**

Nematops microstoma Günther 1880:57, Pl. 24 (fig. C) [ref. 2011] (outside Nares harbor, Admiralty Is., 152 fm). Holotype (unique): BMNH 1879.5.14.91.

DISTRIBUTION: Western Pacific.

Genus *Poecilopsetta* Günther 1880

Poecilopsetta Günther 1880:48 [ref. 2011]. Type species *Poecilopsetta colorata* Günther 1880. Type by monotypy.

Boopsetta Alcock 1896:305 [ref. 91]. Type species *Boopsetta umbrarum* Alcock 1896. Type by monotypy.

Alaeops Jordan & Starks 1904:623 [ref. 2526]. Type species *Alaeops plinthus* Jordan & Starks 1904. Type by original designation (also monotypic).

Paralimanda Breder 1927:86 [ref. 635]. Type species *Paralimanda inermis* Breder 1927. Type by monotypy.

***Poecilopsetta albomaculata* Norman 1939**

Poecilopsetta albomaculata Norman 1939:101, Fig. 32 [ref. 6556] (Maldives, Indian Ocean, sta. 194, 265–293 m). Holotype: BMNH 1939.5.24.1774–1776 (130 mm spec.).

DISTRIBUTION: Western Indian Ocean.

***Poecilopsetta beanii* (Goode 1881)**

Limanda beanii Goode 1881:473 [ref. 1833] (off New Jersey, U.S.A., *Fish Hawk* sta. 875, 39°57'N, 70°57'30"W, 126 fm). Lectotype: USNM 26102.

DISTRIBUTION: Western North Atlantic.

REMARKS: The lectotype was established in the caption to Pl. 378, p. 3311 in Jordan and Evermann (1900 [ref. 2446]). The caption identifies *Fish Hawk* sta. 875 as the lectotype locality.

***Poecilopsetta colorata* Günther 1880**

Poecilopsetta colorata Günther 1880:48, Pl. 22 (fig. B) [ref. 2011] (Kai Is., *Challenger* sta. 192, Indonesia, Arafura Sea, 129 fm). Holotype: BMNH 1879.5.14.97.

Poecilopsetta maculosa Alcock 1894:130 [16 of separate], Pl. 7 (fig. 1) [ref. 90] (Bay of Bengal, Investigator sta. 162, 13°51'12"N, 80°28'12"E, 145–250 fm). Holotype (unique): ZSI F13732.

DISTRIBUTION: Indo-West Pacific.

***Poecilopsetta dorsialta* Guibord & Chapleau 2001**

Poecilopsetta dorsialta Guibord & Chapleau 2001:1081, Fig. 1 [ref. 25825] (Lusaran Point, between Panay and Guimaras, Philippines, *Albatross* sta. 5421, 10°33'30"N, 122°26'E, 250 m). Holotype: USNM 150696.

DISTRIBUTION: Philippines.

***Poecilopsetta hawaiiensis* Gilbert 1905**

Poecilopsetta hawaiiensis Gilbert 1905:679, Pl. 95 [ref. 1631] (Pailolo Channel, between Molokai I. and Maui I., Hawaiian Is., U.S.A., *Albatross* sta. 3810 [or 3858], 128–138 fm). Holotype: USNM 51638.

DISTRIBUTION: Central Pacific.

***Poecilopsetta inermis* (Breder 1927)**

Paralimanda inermis Breder 1927:87, Fig. 36 [ref. 635] (north of Grovers Reef, Belize, 484 fm). Holotype (unique): YPM 516.

Poecilopsetta albomarginata Reid 1934:10, Pl. 1 [ref. 16454] (Tobago I., West Indies, *Caroline* sta. 100, 18°38'45"–18°40'15"N, 64°52'45"–64°50'15"W, 100–300 fm). Holotype: USNM 93303.

DISTRIBUTION: Western Atlantic.

***Poecilopsetta macrocephala* Hoshino, Amaoka & Last 2001**

Poecilopsetta macrocephala Hoshino, Amaoka & Last 2001:73–81, Figs. 1–3 [ref. 25689] (off nw. Australia, 18°46'S, 116°19'E, 555 m). Holotype: CSIRO H5213-01.

DISTRIBUTION: Eastern Indian Ocean: off northwestern Australia.

***Poecilopsetta natalensis* Norman 1931**

Poecilopsetta natalensis Norman 1931:426 [ref. 16316] (off Natal, South Africa, 188 fm). Holotype (unique): BMNH 1922.3.27.7.

DISTRIBUTION: Western Indian Ocean.

***Poecilopsetta normani* Foroshchuk & Fedorov 1992**

Poecilopsetta normani Foroshchuk & Fedorov 1992:11, Fig. [ref. 20776] (Saya de Malha Bank, 11°12'N, 62°16.4'E, 255–270 m). Holotype: ZIN 49132.

DISTRIBUTION: Indian Ocean.

***Poecilopsetta plinthus* (Jordan & Starks 1904)**

Alaeops plinthus Jordan & Starks 1904:623, Pl. 5 (fig. 2) [ref. 2526] (Suruga Bay, Japan, *Albatross* sta. 3708, 60–70 fm). Holotype: USNM 51406.

Poecilopsetta megalepis Fowler 1934:340, Fig. 94 [ref. 1416] (Balayan Bay and Verde I. Passage, Philippines, *Albatross* sta. D.5117, 118 fm). Holotype: USNM 93094.

DISTRIBUTION: Western Pacific, Japan to Philippines.

REMARKS: *P. megalepis* Fowler 1934 is placed here as a synonym of *P. plinthus* (Jordan & Starks 1904) based on Guibord and Chapleau (2002 [ref. 26820]).

***Poecilopsetta praelonga* Alcock 1894**

Poecilopsetta praelonga Alcock 1894:130 [16 of separate], Pl. 7 (fig. 2) [ref. 90] (off Colombo, Sri Lanka, *Investigator* sta. 151, 142–400 fm or southwest of Ceylon, sta. 204, 180–217 fm). Syntypes: ZSI F13733–34 (2). Not ZSI F61/1 (1).

Boopsetta umbrarum Alcock 1896:305 [5 of separate] [ref. 91] (off Colombo, Sri Lanka, *Investigator* sta. 204, 180–217 fm). Holotype: ZSI F 61/1.

DISTRIBUTION: Indo-West Pacific.

***Poecilopsetta vaynei* Quéro, Hensley & Maugé 1988**

Poecilopsetta vaynei Quéro, Hensley & Maugé 1988:326, Fig. 3 [ref. 12837] (Madagascar, 25°02.7'S, 47°05.8'E, 65–70 m). Holotype: MNHN 1986-0653.

DISTRIBUTION: Western Indian Ocean.

***Poecilopsetta zanzibarensis* Norman 1939**

Poecilopsetta zanzibarensis Norman 1939:102, Fig. 33 [ref. 6556] (near Zanzibar, sta. 106, 183–194 m). Holotype: BMNH (130-spec. from sta. 106).

DISTRIBUTION: Western Indian Ocean.

Subfamily Rhombosoleinae Regan 1910

This subfamily unites righteye flounders with asymmetrical pelvic fins (the one on the eyed side may be joined to the anal fin). Dorsal fin commencing just behind the nasal organ of the blind side or extending forward on the snout above it. Pectoral radials absent. Lateral line equally developed on both sides of body. Gill membranes fused. Egg with many small oil globules in yolk. Vertebrae 30–46. Attain 35–45 cm in length. Marine, most species on the continental shelf. Some species of *Rhombosolea* enter fresh water in New Zealand. Distributed primarily in temperate water near Australia and New Zealand, with one species, *Oncopterus darwini* Steindachner 1874, in the southwestern Atlantic. Some of the species superficially resemble the Soleidae. Nine genera, with 19 species. Sometimes this subfamily is recognized at family level (as suggested by Chapleau and Keast (1988 [ref. 12625]).

Genus *Ammotretis* Günther 1862

Ammotretis Günther 1862:458 [ref. 1969]. Type species *Ammotretis rostratus* Günther 1862. Type by monotypy.

***Ammotretis brevipinnis* Norman 1926**

Ammotretis brevipinnis Norman 1926:268, Fig. 11 [ref. 3216] (St. Vincent Gulf, South Australia). Holotype (unique): BMNH 1925.1.26.1.

DISTRIBUTION: Southeastern Indian Ocean.

***Ammotretis elongatus* McCulloch 1914**

Ammotretis elongatus McCulloch 1914:123, Pl. 27 [ref. 2940] (Investigator Strait or area south of Kangaroo I., South Australia). Syntypes: AMS E.2419 (1), I.12391 (1).

DISTRIBUTION: Southeastern Indian Ocean.

***Ammotretis lituratus* (Richardson 1844)**

Solea liturata Richardson 1844:156 [ref. 20295] (no locality [? Tasmania, Australia]). Holotype (unique): whereabouts unknown.

Ammotretis tudori McCulloch 1914:124, Pl. 26 [ref. 2940] (off east coast of Flinders I., Bass Strait, 37 fm; Spencer Gulf, 20 fm, South Australia). Syntypes: (several) AMS E.977 (1, not found in 1980), I.10026 (1); QM I.1439 (1).

DISTRIBUTION: Southeastern Indian Ocean.

***Ammotretis macrolepis* McCulloch 1914**

Ammotretis macrolepis McCulloch 1914:125, Fig. 9 [ref. 2940] (east coast of Flinders I., Bass Strait, South Australia, 40 fm). Holotype (unique): AMS E.455 (1).

DISTRIBUTION: Southeastern Indian Ocean.

***Ammotretis rostratus* Günther 1862**

Ammotretis rostratus Günther 1862:458 [ref. 1969] (Norfolk Bay, Tasmania, Australia). Holotype (unique): BMNH 1848.3.18.245.

Ammotretis adspersus Kner 1867:286, Pl. 13 (fig. 4) [ref. 18426] (Sydney, N.S.W., Australia). No types known.

Rhombosolea bassensis Castelnau 1872:167 [ref. 757] (Melbourne, Victoria, Australia). Syntypes: MHN A-8764 (1), A-1765 (1).

Solea uncinata Klunzinger 1879:260 [ref. 18913] (King George Sound, Western Australia). Syntypes: SMNS 2695 (4, not found).

DISTRIBUTION: Eastern Indian Ocean to western South Pacific.

REMARKS: *Solea uncinata* also appeared in Klunzinger 1880:408 [84 of separate] [ref. 2624].

Genus *Azygopus* Norman 1926

Azygopus Norman 1926:261 [ref. 3216]. Type species *Azygopus pinnifasciatus* Norman 1926. Type by monotypy.

***Azygopus pinnifasciatus* Norman 1926**

Azygopus pinnifasciatus Norman 1926:262, Fig. 10 [ref. 3216] (Great Australian Bight, 126°30'E, sw. from Eucla, Australia). Holotype: AMS E.3600.

Azygopus pinnifasciatus flemingi Nielsen 1961:223, Fig. 3 [ref. 9369] (42°10'S, 170°10'E, 610 m). Holotype: ZMUC P853105.

DISTRIBUTION: Eastern Indian Ocean to western South Pacific.

Genus *Colistium* Norman 1926

Colistium Norman 1926:272 [ref. 3216]. Type species *Ammotretis nudipinnis* Waite 1911. Type by subsequent designation.

***Colistium guntheri* (Hutton 1873)**

Ammotretis guntheri Hutton 1873:267, Pl. 11 (fig. 82a) [ref. 2285] (Wellington harbor, New Zealand). Holotype (unique): presumed lost.

DISTRIBUTION: Western South Pacific off New Zealand.

***Colistium nudipinnis* (Waite 1911)**

Ammotretis nudipinnis Waite 1911:50 [ref. 4567] (Porangahau Bay and Hawke Bay, New Zealand). Syntypes: (several) whereabouts unknown.

DISTRIBUTION: Western South Pacific off New Zealand.

Genus *Oncopterus* Steindachner 1875

Oncopterus Steindachner 1875:363 [ref. 4221]. Type species *Oncopterus darwinii* Steindachner 1874. Type by monotypy.

Curioptera Whitley 1951:68 [ref. 4711]. Type species *Oncopterus darwinii* Steindachner 1874. Type by being a replacement name.

***Oncopterus darwinii* Steindachner 1874**

Oncopterus darwinii Steindachner 1874:172 [ref. 20470] (San Antonio harbor in San Matías Bay, e. coast of Argentina). Syntypes: (several) MCZ 11397 (3), 11398 (5 or 4); NMW 43920 (4).

DISTRIBUTION: Western South Atlantic.

Genus *Pelotretis* Waite 1911

Pelotretis Waite 1911:50 [ref. 4567]. Type species *Pelotretis flavilatus* Waite 1911. Type by monotypy.

***Pelotretis flavilatus* Waite 1911**

Pelotretis flavilatus Waite 1911:50 [ref. 4567] (New Zealand and Chatham Is., off New Zealand). Syntypes: (several) whereabouts unknown.

DISTRIBUTION: Western South Pacific off New Zealand.

Genus *Peltorhamphus* Günther 1862

Peltorhamphus Günther 1862:460 [ref. 1969]. Type species *Peltorhamphus novaezealandiae* Günther 1862. Type by monotypy.

***Peltorhamphus latus* James 1972**

Peltorhamphus latus James 1972:354, Fig. 7 [ref. 7082] (Wellington Harbor, New Zealand, 41°15'S, 174°52.5'E, 20 m). Holotype: NMNZ P.5139.

DISTRIBUTION: Western South Pacific.

***Peltorhamphus novaezealandiae* Günther 1862**

Peltorhamphus novaezealandiae Günther 1862:461 [ref. 1969] (Norfolk I. and New Zealand).

Syntypes: (at least 12) BMNH 1848.3.18.?.(1), 1848.3.18.131–135 (5?), 1848.3.18.216 (1), 1853.2.14.21 (1); ZMB 5002 (1).

DISTRIBUTION: Western South Pacific off New Zealand.

***Peltorhamphus tenuis* James 1972**

Peltorhamphus tenuis James 1972:353, Fig. 6 [ref. 7082] (off Westport, New Zealand, 41°43'S, 171°34'E, 12–20 m). Holotype: NMNZ P.5138.

DISTRIBUTION: Western South Pacific.

Genus *Psammodiscus* Günther 1862

Psammodiscus Günther 1862:457 [ref. 1969]. Type species *Psammodiscus ocellatus* Günther 1862. Type by monotypy.

***Psammodiscus ocellatus* Günther 1862**

Psammodiscus ocellatus Günther 1862:457 [ref. 1969] (no locality). Syntypes: (4) BMNH.

DISTRIBUTION: Indo-West Pacific: Indonesia and northwestern Australia.

Genus *Rhombosolea* Günther 1862

Rhombosolea Günther 1862:458 [ref. 1969]. Type species *Rhombosolea monopus* Günther 1862. Type by subsequent designation.

Bowenia Haast 1873:277 [ref. 2025]. Type species *Bowenia novaezealandiae* Haast 1873. Type by monotypy.

Apsetta Kyle 1901:986 [ref. 2704]. Type species *Apsetta thompsoni* Kyle 1901. Type by monotypy.

Adamasoma Whitley & Phillipps 1939:231 [ref. 4737]. Subgenus of *Rhombosolea*. Type species *Rhombosolea retiaria* Hutton 1874. Type by monotypy.

***Rhombosolea leporina* Günther 1862**

Rhombosolea leporina Günther 1862:460 [ref. 1969] (Australia). Syntypes: BMNH 1848.3.18.195-196 (2).

Rhombosolea millari Waite 1911:205, Pl. 37 [ref. 14826] (Hawke Bay, New Zealand). Syntypes: (several) whereabouts unknown.

DISTRIBUTION: Western South Pacific.

***Rhombosolea plebeia* (Richardson 1843)**

Rhombus plebeius Richardson 1843:27 [ref. 12502] (Tolaga Bay, New Zealand). Holotype (unique): ?BMNH 1842.10.12.2.

Bowenia novaezealandiae Haast 1873:277, Pl. 16 (bottom) [ref. 2025] (Lake Ellesmere, New Zealand). Holotype (unique): CMC (lost).

Apsetta thompsoni Kyle 1901:986, Figs. 1–3 [ref. 2704] (New Zealand). Holotype (unique): whereabouts unknown.

DISTRIBUTION: Western South Pacific.

***Rhombosolea retiaria* Hutton 1874**

Rhombosolea retiaria Hutton 1874:107 [ref. 21346] (Wellington harbor, New Zealand). Holotype (unique): presumed lost.

Rhombosolea (Adamasoma) retiaria adamas Whitley & Phillipps 1939:232 [ref. 4737] (Hokitika, New Zealand). No types known.

DISTRIBUTION: Western South Pacific off New Zealand.

***Rhombosolea tapirina* Günther 1862**

Rhombosolea tapirina Günther 1862:459 [ref. 1969] (Australian seas). Syntypes: (at least 17) BMNH 1846.1.31.78 (1, skin), 1847.6.17.82 (1), 1848.3.18.47–49 and 52–53 (5), 1848.3.18.240–244 (5); ZMB 9376 [ex BMNH] (1).

Rhombosolea monopus Günther 1862:459 [ref. 1969] (New Zealand; Bay of Islands; Australia). Syntypes: (3) BMNH 1848.3.18.194 (1), BMNH uncat. (1).

Rhombosolea flesoides Günther 1863:117 [4 of separate] [ref. 1972] (Victoria, South Australia). Holotype (unique): BMNH 1863.1.15.49 (dry).

Pleuronectes victoriae Castelnau 1872:168 [ref. 757] (Melbourne, Victoria, Australia). Syntypes: AMS A.7133 (1); MNHN A-8766 (1), 8767 (1).

DISTRIBUTION: Western South Pacific.

Genus *Tararetis* Last 1978

Tararetis Last 1978:22 [ref. 2726]. Type species *Tararetis derwentensis* Last 1978. Type by original designation (also monotypic).

***Tararetis derwentensis* Last 1978**

Tararetis derwentensis Last 1978:23, Fig. 1 [ref. 2726] (Derwent R. estuary off Nutgrove Beach, Tasmania, Australia, 147°21'E, 42°55'S, 3 m). Holotype: TMH D1305.

DISTRIBUTION: Southeastern Indian Ocean.

Incertae Sedis Genus-Group Names

Inopsetta Jordan & Goss in Jordan 1885:924 [136 of separate] [ref. 2385]. Type species *Parophrys ischyurus* Jordan & Gilbert 1880. Type by original designation (also monotypic). Synonym of *Pleuronectes* Linnaeus 1758 and also *Platichthys* Girard 1854 when type species is regarded as a hybrid.
Pluviopsetta Tanaka 1916:141 [ref. 4326]. Type species *Pluviopsetta taniguchii* Tanaka 1916. Type by monotypy. Questionably a synonym of *Pleuronectes* Linnaeus 1758.
Pseudoplatichthys Hikita 1934:11, et. seq. [ref. 2160]. Type species *Pseudoplatichthys oshorensis* Hikita 1934. Type by original designation (also monotypic). The type species is thought to be a hybrid between *Platichthys stellatus* (Pallas 1788) and *Kareius bicoloratus* (Basilewsky 1855) or a synonym of *Platichthys* Girard 1854.

Unavailable Genus-Group Names

Passer Klein 1775:816 [ref. 2618]. Suppressed. In the synonymy of *Platichthys* Girard 1854.
Tapirisolea Ramsay 1883:17, 44 [ref. 6592]. Nomen nudum. In the synonymy of *Ammotretis* Günther 1862.

zachirus, *Glyptocephalus* Lockington 1879 = *Glyptocephalus zachirus* Lockington 1879
zanzibarensis, *Poecilopsetta* Norman 1939 = *Poecilopsetta zanzibarensis* Norman 1939

Incertae Sedis Species-Group Names

achirus, *Pleuronectes* Bloch & Schneider 1801:158 [ref. 471].
albus, *Pleuronectes* Bloch & Schneider 1801:159 [ref. 471].
annulatus, *Pleuronectes solea* Walbaum 1792:110 [ref. 4572].
aramaca, *Pleuronectes* Cuvier 1829:341 [ref. 995].
argenteus, *Pleuronectes* Shaw 1803:308 [ref. 4014].

ater, *Leptosoma* Nardo 1827:32, 39 (no. 139) [ref. 3146]. Also in Nardo 1827:col. 481 and 487 [ref. 19740]. Unneeded new name for and objective synonym of *Pleuronectoides solea* Nardo 1824. Also seen as *Leptosoma atrum* and *Leptosoma atra*.

barbatus, *Pleuronectes* Shaw 1803:309 [ref. 4014].

cynoglossus, *Pleuronectes* Nilsson (not of Linnaeus) 1832:53 [ref. 3204].

fasciatus, *Pleuronectes* Gronow in Gray 1854:91 [ref. 1911].

glabra, *Platessa* Storer 1843:130 [ref. 18831].

gronovii, *Solea* Günther 1862:472 [ref. 1969].

ischyrus, *Parophrys* Jordan & Gilbert 1880:276 [ref. 10580]. *Parophrys ischyrus* Jordan & Gilbert 1880 is thought to be a hybrid between *Platichthys stellatus* (Pallas 1788) and *Parophrys vetulus* Girard 1854.

macleayi, *Ammotretis* Ogilby 1885:122 [ref. 3262].

maculosus, *Pleuronectes* Gronow in Gray 1854:89 [ref. 1911].

magnus, *Rhombus* Minding 1832:90 [ref. 3022].

mancus, *Pleuronectes lunatus* Bloch & Schneider 1801:154 [ref. 471].

melanogaster, *Platessa* Higgins 1855:4596, 4914 [ref. 20919].

microstomus, *Pleuronectes* Faber 1828:245 [ref. 18075].

minutus, *Pleuronectes* Nardo 1847:col. 121 [ref. 17994].

oshorensis, *Pseudoplatichthys* Hikita 1934:189 [English p. 11], Pl. 2 (figs. 1–2) [ref. 2160]. This species is thought to be a hybrid between *Platichthys stellatus* (Pallas 1788) and *Kareius bicoloratus* (Basilewsky 1855).

ovalis, *Ammotretis* Saville-Kent 1889:10 [ref. 18384].

ponticus, *Hippoglossus* Bonaparte 1846:47 [ref. 519].

quadridens, *Pleuronectes* Faber 1828:884 [ref. 18076].

quenselii, *Pleuronectes* Hollberg 1821:59 [ref. 18304].

ramosus, *Rhombus* Michahelles 1831:199 [ref. 17702].

rhombeus, *Pleuronectes* Bloch & Schneider 1801:145 [ref. 471].

rhomboides, *Pleuronectes* Cuvier 1816:222 [ref. 993].

rondeletii, *Pleuronectes* Shaw 1803:307 [ref. 4014].

rostrata, *Platessa* Storer 1850:268, Pl. 8 (fig. 2) [ref. 18109].

rostratus, *Pleuronectes* Gronow in Gray 1854:89 [ref. 1911].

solea, *Pleuronectoides* Nardo 1824:233 [ref. 3144].

taniguchii, *Pluviopsetta* Tanaka 1916:142 [ref. 4326].

zonatus, *Ammotretis* Macleay 1882:367 [ref. 17588].

Unavailable Species-Group Names

baltica, *Pleuronectes flesus* Suvorov 1925:280 [ref. 19828]. Infrasubspecific. In the synonymy of *Platichthys flesus* (Linnaeus 1758).

caninensis, *Pleuronectes flesus* Suvorov 1929:111 [ref. 19829]. Infrasubspecific. In the synonymy of *Platichthys flesus* (Linnaeus 1758).

fitzingerii, *Rhombus* Heckel 1848:194 [ref. 18256]. Nomen nudum.

hippoglossoides, *Reinhardtius* Gill 1861:50 [ref. 1766]. A new combination for *Pleuronectes hippoglossoides* Walbaum 1792. In the synonymy of *Reinhardtius hippoglossoides* (Walbaum 1792).

innominatus, *Pleuronectes* Bloch & Schneider 1801:xxxv, 163 [ref. 471]. The word “innominatus” appears in the index (p. xxxv) referring to unnamed species (f.) described on p. 163. Apparently not a new name proposal, but rather an indication that the indexer did not find a name for this species.

limanda, *Hippoglossoides* Gottsche 1835:168 [ref. 1862]. Apparently a new combination for *Pleuronectes limanda* Linnaeus 1758. In the synonymy of *Hippoglossoides platessoides* (Fabricius 1780), subspecies *limandooides* (Bloch 1787).

passarinus, *Pleuronectes* Nardo 1847:col. 121 [ref. 17994]. Nomen nudum.

pictus, *Pleuronectes* Forster in Bloch & Schneider 1801:161 [ref. 471]. Nomen nudum.

pola, *Pleuronectes* Gistel 1848:105 [ref. 1822]. Nomen nudum.

septentrionalis, *Pleuronectes flesus* Suvorov 1925:280 [ref. 19828]. Infrasubspecific. In the synonymy of *Platichthys flesus* (Linnaeus 1758), but a valid subspecies as described.

septentrionalis, *Hippoglossus* Thon in Ersch & Gruber 1831:335 [ref. 19965]. Replacement name. May be an unneeded new name for *Pleuronectes hippoglossus* Linnaeus 1758. [Needs translation; may be incertae sedis.]

striatopinnatus, *Pleuronectes* Tilesius 1805:443 [ref. 19843]. Nomen nudum.

Acknowledgments

I am very grateful to Dr. William Eschmeyer (CAS) for his helpful advice on nomenclature problems. I would like to thank Sandra Raredon (USNM) for the digital image of *Neoetropus macrops* skeleton. The California Academy of Sciences provided funding toward preparation of the checklist through a grant from the Alfred P. Sloan Foundation. I am deeply grateful to the CAS annotated checklist team, especially William J. Poly and Catherine W. Mecklenburg, for their technical and editorial support.
