

INSTRUCTIONS TO AUTHORS

The Lichenologist is an international journal and welcomes papers and short communications from contributors anywhere in the world on any aspect of lichenology.

Manuscripts must be original, clearly and precisely presented in English and submitted in triplicate exclusively to the Senior Editor: Dr P. D. Crittenden, School of Life and Environmental Sciences, University of Nottingham, University Park, Nottingham, NG7 2RD, U.K. A cover sheet should accompany the manuscript including the following information: title and a short running title of not more than 6 words for page headings (not required for Short Communications); name and contact details for the corresponding author (i.e. postal address, telephone and fax numbers, and email address); the total number of pages (text plus references) and numbers of figures and tables. Authors submitting a manuscript do so on the understanding that, if it is accepted, copyright of the paper will be assigned exclusively to the publisher (see Copyright below).

An electronic version of the manuscript must be sent both with the original submission and, after refereeing, with any revised manuscript. A PC compatible disc and Word 97 or more recent format should be used.

Text. This must be typewritten on A4 (210 × 297 mm) or letter (8·5 × 11 inch) in double spacing with 2·5 cm margins all round. On all points of style concerning text and tables consult recent copies of the journal. Words to be italicized should be either underlined or typed in italics but not both. Complete scientific names (genus, species and authority) must be cited at first mention. Thereafter the generic name may be abbreviated to the initial except at the beginning of a sentence or where the abbreviation might result in confusion with other genera. Recent issues should be consulted for layout of new species, new combinations, synonymy and lists of specimens examined. Examples of style are given below. The spelling of locality names in the British Isles and abroad must follow the most recent editions of maps published by the Ordnance Survey and *The Times Atlas of the World*, respectively.

Examples of style employed in

(a) description of new species:

Ramalina jamesii Krog sp. nov.

Thallus saxicola, ascendens vel plus minusve inclinatus . . . etc.

Typus: Portugal, Madeira, Porto Santo, Pico do Facho, 33°05'N, 16°19'W, on acidic rock, 350 m alt., 7 April 1988, H. Krog & E. Timdal 6163 (O—holotypus; BM, UPS—isotypi).

(b) citation of described species or new combinations:

Pyrenopsis furfurea (Nyl.) Th. Fr.

Bot. Notiser 1866: 58 (1866); type: Scotland, Ben Lawers, 1864, Jones (H-NYL 42916—lectotype; BM—isotype).

Pyrenopsis terrigenum (Th. Fr.) Forss., *Nova Acta R. Soc. Scient. Upsal.* ser. 3, 13(6): 81 (1985).—*Pyrenopsis haematopsis* (Sommerf.) β. *terrigena* Th. Fr. in Hellbom, *Öfvers K. Vetens Akad. Forh.* 22(6): 478 (1865); type: Sweden, Lule Lappmark, Skarfi, 1864, Hellbom (UPS—holotype).

(c) citation of specimens examined:

Long lists of citations are discouraged. Data should be reproduced as either maps or lists containing only data essential for locating specimens. Complete lists, with the above format, can be deposited with *The Lichenologist* and other appropriate Institutions, and their location noted in the text.

Selected specimens examined. **British Isles:** Scotland: V.C.96, Easterness: Abernethy Forest, near Forest Lodge, 38°01.16', on *Pinus lignum*, 1975, Coppins [2199] & Rose (BM, E).—**Germany:** Bayern: Allgauer Alpen, 1957, Schoppel & Poelt [Poelt, *Lichenes Alpinum* no. 56] (H).—**Australia:** Tasmania: Weindorfers Forest, 41°38'S, 145°56'E, 920 m, 1988, Kantvilas 68/88 (E); Cox Bight, behind west beach, sea-level, 1985, J. A. Elix 20945 (ANUC). Victoria: Belbel Creek, c. 1800 m, 5 vi 1983, M. E. Hale (HO).

Tables. These must be self-explanatory and each presented on separate pages outside the main text. A short title should be provided with any additional information contained in footnotes. Vertical columns should be separated by spacing; vertical lines must be avoided.

Figures. Refer to all *drawings*, *diagrams*, *graphs* and *photographs* as figures. These should be of the highest quality and suitable for direct reproduction. Each figure should be presented on a separate page. Plan figures to appear within a single column (67 mm) or for reproduction across two columns (139 mm).

Drawings, *diagrams* and *graphs* should be submitted in black ink on white card, white paper or tracing film at up to twice the size they will finally appear. Preferred symbols for graphs are ●, ○, ■, □, ▲, △.

Photographs (colour or black and white) should be submitted at the size they will appear. All photographs should be printed on glossy paper; several may be grouped together by mounting on white card with a narrow gap between them.

Subdivisions of figures should be labelled with capital letters, e.g. A, B, C, etc. No letters, arrows, scales, etc. should be done on the original figures; indicate these on mounts or photocopies accompanying each manuscript.

All legends for figures should be provided on a separate page to be included with the text of the paper after the references.

Figures in electronic form are acceptable. Technical details can be found at <http://www.elsevier.nl/locate/disksub/>. All electronic submissions *must* be on disk and accompanied by high-quality hardcopy.

References. Citations in the text should take the form: Green & White (1988) or (Brown 1988a, b, 1989; Smith & Jones 1999). Multiple citations should be ordered chronologically. When papers are by three or more authors, give only the name of the first author followed by *et al.* (e.g. Halonen *et al.* 1998) throughout the text. At the end of the text, list the references alphabetically using the following standard forms:

Culberson, C. F. & Kristinsson, H. (1970a) A standardized method for identification of lichen products. *Journal of Chromatography* **46**: 85–93.

Hale, M. E. (1983) *The Biology of Lichens*. 3rd Edn. London: Arnold.

Haworth, D. L. (1976) Lichen chemotaxonomy. In *Lichenology: Progress and Problems* (D. H. Brown, D. L. Hawksworth & R. H. Bailey, eds): 139–184. London: Academic Press.

When citing an Elsevier journal, include the digital object identifier (DOI), if noted, from the article's title page. Please note the following examples:

McCarthy, P. M. (2000) Key to the saxicolous taxa of *Porina*. *Lichenologist* **32**: 1–13. doi:10.1006/lich.1999.0213

Fos, S. & Clerc, P. (2000) The lichen genus *Usnea* on *Quercus robur* in Iberian cork-oak forests. *Lichenologist* **32**: 67–88. doi:10.1006/lich.1999.0242

References should be listed in alphabetic sequence with: single authors, by date; two authors, alphabetically, then by date; three or more authors by date only.

Abbreviations, etc. For guidance on units, symbols, chemical nomenclature and abbreviations consult Instructions to authors for the *The New Phytologist*.

Copyright. Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the British Lichen Society. The Copyright Transfer Agreement, which may be copied from the pages immediately preceding these Instructions for Authors or found on the journal home page listed on the back cover, should be signed by the appropriate person(s) and should accompany the original submission of a manuscript to this journal. The transfer of copyright does not take effect until the manuscript is accepted for publication. Copyright in the paper for the United States of America shall be assigned to the Society. It is the policy of the publisher that authors need not obtain permission in the following cases only: (1) to use their original figures or tables in their future works; (2) to make copies of their papers for use in their classroom teaching; and (3) to include their papers as part of their dissertations.

Offprints. In consideration for the assignment of copyright, the Society will supply 50 offprints of each paper or Short Communication but not of Book Reviews. Further offprints may be ordered at extra cost at the proof stage. Reprints must be ordered directly from Elsevier Ltd when the author returns the proofs of their article.

Page charges are not levied, but if funds to cover printing costs are available quicker publication, or that of unusually long papers, can be facilitated. Authors are responsible for the cost of coloured illustrations.

Books dealing with any aspect of lichenology will be reviewed. Publishers wishing to have works reviewed in *The Lichenologist* should send them to Dr B. J. Coppins, Royal Botanic Gardens, Inverleith Row, Edinburgh, EH3 5LR, in the first instance.

Notice: While the Senior Editor and Editors endeavour to check the accuracy of statements in contributions in as far as they are able, it should be emphasized that views expressed in papers in *The Lichenologist* are those of their authors and do not necessarily represent those of the British Lichen Society, Elsevier, the Senior Editor, or the Editors.

BRITISH LICHEN SOCIETY

OFFICERS 2003

President

A. M. Coppins, 37 High Street, East Linton, Lothian EH3 5LR

Vice President

D. J. Hill, D.Phil., MIEEM, C.Biol., F.I.Biol., School of Biological Sciences,
The University of Bristol, Woodland Road, Bristol BS8 1UG

Secretary

P. A. Wolseley, M.A., c/o Department of Botany, The Natural History Museum,
Cromwell Road, London SW7 5BD

Treasurer

R. M. H. Hodgson, MBBS, FRCA, Gorselands, Axtown Lane, Yelverton, Devon PL20 6BU

Assistant Treasurer

C. Smith, Pen-y-lan, Leinthall Starkes, Ludlow SY8 2HP

Regional Treasurer (Americas)

S. R. Clayden, M.Sc., The Herbarium, New Brunswick Museum, 277 Douglas Avenue,
Saint John, New Brunswick E2K 1E5, Canada

Senior Editor (Lichenologist)

P. D. Crittenden, Ph.D., School of Life and Environmental Sciences,
The University of Nottingham, University Park, Nottingham NG7 2RD

Editor (Bulletin)

P. W. Lambley, The Cottage, Elsing Road, Lyng, Norwich, Norfolk NR9 5RR

Conservation Officer

B. W. Edwards, Dorset Environmental Record Centre, Library Headquarters, Colliton Park,
Dorchester, Dorset DT1 1XJ

Mapping Recorder and Archivist

M. R. D. Seaward, D.Sc., F.L.S., F.I.Biol., Department of Environmental Science,
The University, Bradford, West Yorkshire BD7 1DP

Librarian

A. Fletcher, Ph.D., F.L.S., Leicestershire County Council Heritage Services, Collection Resources
Store, 50 Hayhill Industrial Estate, Sileby Road, Barrow on Soar, Leicestershire LE12 8LD

Curator

R. K. Brinklow, B.Sc., Dundee Museums and Art Galleries, Albert Square,
Dundee DD1 1DA

Field Meetings Secretary

S. Davey, Stable Flat, Downland Court, 115 East End Lane, Ditchling, Hassocks, Sussex BN6 8UR

Members of Council

F. R. Blatchley S. P. Chambers V. J. Giavarini S. H. J. J. Louwhoff
N. A. Sanderson C. W. Smith P. R. Smith R. G. Woods

Membership of the British Lichen Society is open to all individuals (not institutions) anywhere in the world interested in any part of lichenology. Subscriptions, due on joining and afterwards on 1 January each year, are: ordinary members, £25; associate members, £18.50; senior associate members, £7.50; junior associate members, £5.00 (US dollar rates are double the sterling rates). Members receive the *Bulletin of the British Lichen Society* and issues of *The Lichenologist* published in the year they join, and afterwards while they remain members of the Society, free of charge. Associate members do not receive *The Lichenologist*. Details of the membership, facilities and activities of the Society and an application form may be found on the British Lichen Society web site at <http://www.theBLS.org.uk> or obtained from the Secretary (address above).

The Lichenologist

Volume 35 Part 5/6 September/November 2005

Articles

- ETAYO, J. and Hafellia *alisioae* and *H. gomerana* (lichenized MARBACH, B. Ascomycetes, Physciaceae), two new species from the Canary Islands, with a key to all known corticolous species 369
- GIORDANI, P., The lichen genus *Neofuscelia* (Ascomycota, BENESPERI, R., RELLINI, I., *Parmeliaceae*) in Italy 377
- FRATI, L., BRUNIALTI, G.,
PAOLI, L., ISOCRONO, D.
and ELIX, J. A.
- LUMBSCH, H. T., *Ochrolechia splendens* (Pertusariaceae), a new species MESSUTI, M. I. and from south-western North America 387
NASH III, T. H.
- BJERKE, J. W. *Menegazzia subsimilis*, a widespread sorediate lichen 393
- KANTVILAS, G. and *Hueidea* (Fuscideaceae), a new lichen genus from alpine McCARTHY, P. M. Australia 397

Short Communication

- MESSUTI, M. I. and Two new synonyms of *Pertusaria melanospora* Nyl. 409
ARCHER, A. W.

Cumulative Index Volumes 21—35

How to use this index

Introduction

This index has four parts: a chronological index, a subject index, an author index and an index of reviewed books.

References consist of an optional volume number followed by a colon, and then a single number (for a single page) or two numbers separated by a hyphen (for a range of pages). Examples are 25: 108–115, 35: 99, 200–201, 86. If the volume number is omitted, the most recently specified volume number is implied. For example, the list 28: 118–120, 125, 130–131, 288, 32: 96, 117 contains six references, the first four being in volume 28 and the final two in volume 32.

The Lichenologist has used a number of characters that do not appear in the standard English character set of 26 uppercase and 26 lowercase characters. Those that appear in this index are listed on the right hand side of the lines below. Though printed as shown below, for collating purposes they are deemed to have the value of the standard English character, or sequence of characters, to their left.

A	À
O	Ö Ø
a	á ä å
ae	æ
c	ć
e	é ê ë ë ç
i	í
n	ñ
o	ó ö ø
ss	ß
u	ú ü

A very few additional non-English characters occur rarely in *The Lichenologist*, mainly in personal names from Slavonic languages. In this index, these additional characters are printed as, and collated as, the standard English character which they most closely resemble.

For collation, uppercase and lowercase characters are equivalent, and characters in bold or italic type are equivalent to those in regular type.

Names of taxa are italicized throughout.

Chronological index

The chronological index is self-explanatory. To aid readability, the first author of each paper is printed in bold type.

Subject index

The subject index is designed to be used together with the chronological index. If your reference, or references, is under a keyword with a broad meaning, refer to the corresponding title or titles in the chronological index to refine your search.

In the subject index a reference in **bold** type indicates a new taxon or a new combination. A reference in *italic* type indicates a taxon that is the base name of a new combination. All other references are in regular type.

Under a place name, the keyword “new” means that a newly described taxon occurs in that place. The keyword “newto” means that a previously described taxon is reported as new to that place.

The keyword “new” is also used under some ecological categories, e.g. under “foliicolous lichens”.

Under the name of a species or infra-specific taxon, the abbreviation “LEC” means “lectotype designated”. The abbreviation “RE” means a significant range extension, usually at least a new country.

Under a taxon, the keyword “maps” means that a distribution map exists for that taxon. See the primary keyword “maps” for full details.

Under a taxon or a place, the keyword “keys” means that a key exists for that taxon (or some part of it) or that place (or some part of it). See the primary keyword “keys” for full details.

Under a genus, the character “~” introduces a species or infra-specific taxon in that genus. For example, the entry “~*portentosa*” under the primary keyword “*Cladonia*” introduces information for *Cladonia portentosa*.

Author index

Under each author, a reference in regular font is to some item, other than a book review, written by that author. A reference in italics is to a book review written by that author.

For items other than book reviews, if an author is the first author of that item the reference is preceded by a short title. For the full title, see the chronological index. If an author is not the first author, the reference is not preceded by a title.

Index of reviewed books

This lists reviewed books in order of the authors of the books.

The editors are grateful to Dr Bernard Abbott for undertaking the major task of compiling this index. This task was greatly facilitated by the use of Rich Text Format. The author is grateful to Dr Vincent Abbott for suggesting this method and for providing a full specification of Rich Text Format.

CHRONOLOGICAL INDEX

21: 1 1989 Pages 1–99

Laundon, J. R. The species of *Leproloma*—the name for the *Lepraria membranacea* group 1–22; **Hawksworth, D. L.** Notes on aquatic species of *Verrucaria* in the British Isles 23–28; **Ruoss, E.** & Ahti, T. Systematics of some reindeer lichens (*Cladonia* subg. *Cladina*) in the Southern Hemisphere 29–44; **Sancho, L. G.** & Crespo, A. *Lasallia hispanica* and related species 45–58; **Aptroot, A.** Contribution to the Azores lichen flora 59–65; **Ferry, B. W.** & Pickering, M. Studies on the *Cladonia chlorophaea* complex at Dungeness, England 67–77; **Belandria, G.**, Asta, J. & Nurit, F. Effects of sulphur dioxide and fluoride on ascospore germination of several lichens 79–86; **Vitikainen, O.** Range extension of *Solorina simensis* to Papua New Guinea 87; **Galloway, D. J.** Nomenclatural notes on *Pseudocyphellaria* IV: some South American taxa 88–89; **van der Knaap, W. O.**, Aptroot, A. & Oosterveld, P. A 7500-year-old record of *Peltigera aphthosa* from Spitzbergen 90–91; **BOOK REVIEWS**; **Coppins, B. J.** Correction 99

21: 2 1989 Pages 101–193

Henssen, A. *Metamelanea* and *Stromatella*, new genera of *Lichenaceae* 101–118; **Holopainen, T.** & Kauppi, M. A comparison of light, fluorescence and electron microscopic observations in assessing the SO₂ injury of lichens under different moisture conditions 119–134; **Fahselt, D.** & Krol, M. Biochemical comparison of two ecologically distinct forms of *Xanthoria elegans* in the Canadian High Arctic 135–145; **Yagüe, E.** & Estévez, M. P. β-1,4-glucanase (cellulase) locations in the symbionts of *Evernia prunastri* 147–151; **Henderson, A.** Literature on air pollution and lichens XXIX 153–157; **Alexander, R. W.**, Richardson, D. H. S., Cotton, D. & Seaward, M. R. D. Field meeting to Sligo and Connemara National Park 159–168; **Coppins, B. J.** *Rinodina griseosoralifera*, a new corticolous sorediate lichen from western Europe 169–172; **Jacobsen, P.** & Kappen, L. Notes on *Rinodina olivaceobrunnea* in the Antarctic 173–177; **Gjerlaug, H. C.** *Cladonia imbricarica*, new to continental Europe 178–179; **Hansen, E. S.** & Tønsberg, T. *Cladonia alaskana*, new to Greenland 180–181; **Archer, A. W.** Chemistry and distribution of *Cladonia staufferi* 181–184; **Brodo, I. M.** *Hypogymnia pulvata*, new to North America 184–186; **BOOK REVIEWS**

21: 3 1989 Pages 195–293

Coppins, B. J. Notes on the *Arthoniaceae* in the British Isles 195–216; **Coppins, B. J.** On some species of *Catillaria* s. lat. and *Halecania* in the British Isles 217–227; **Orange, A.** *Macentina stigmemooides* (*Verrucariaceae*), a new lichenized species from Great Britain and Ireland 229–236; **Coppins, B. J.** & James, P. W. The identity of '*Lecidea cinnabarina*' in the British Isles 237–242; **Holien, H.** The genus *Bryoria* sect. *Implexae* in Norway 243–258; **Wessels, D. C. J.** & Büdel, B. A rock pool lichen community in northern Transvaal, South Africa: composition and distribution patterns 259–277; **Fahselt, D.** Enzyme polymorphism in sexual and asexual umbilicate lichens from Sverdrup Pass, Ellesmere Island, Canada 279–285; **Gilbert, O. L.** Field meeting in the eastern Howgills, Cumbria 287–291; **Büdel, B.** New localities for *Peltula rodriquesii* 293

21: 4 1989 Pages 295–399

Jørgensen, P. M. & Galloway, D. J. Studies in the lichen family *Pannariaceae* III. The genus *Fuscoderma*, with additional notes and a revised key to *Leioderma* 295–301; **Randlane, T.** & Saag, A. Chemical variation and geographical distribution of *Asahinea chrysanthra* (Tuck.) Culb. & C. Culb. 303–311; **John, E.** & Dale, M. R. T. Niche relationships amongst *Rhizocarpon* species at Jonas Rockslide, Alberta, Canada 313–330; **Hallingbäck, T.** Occurrence and ecology of the lichen *Lobaria scrobiculata* in southern Sweden 331–341; **Fahselt, D.**, Maycock, P. & Wong, P. Y. Reproductive modes of lichens in stressful environments in central Ellesmere Island, Canadian High Arctic 343–353; **Kieft, T. L.** & Ahmadjian, V. Biological ice nucleation activity in lichen mycobionts and photobionts 355–362; **Czeczugia, B.** & Richardson, D. H. S. Carotenoids in some lichen species from Ireland 363–367; **Henderson, A.** Literature on air pollution and lichens XXX 369–378; **Brightman, F. H.** & Seaward, M. R. D. Obituary: Arthur Edward Wade MSc FLS 1895–1989 379–381; **Orange, A.** The identity of *Macentina aurantiaca* McCarthy & Věžda 383; **Torrente, P.** & Egea, J. M. *Opegrapha leptospora* and *Opegrapha mehdensis*, two new synonyms of *Opegrapha vermicellifera* 384–385; **Torrente, P.** & Egea, J. M. The identity of *Opegrapha diaphoroides* Nyl. 386–387; **Oliver, E.**, Crittenden, P. D., Beckett, A. & Brown, D. H. Growth of lichen-forming fungi on membrane filters 387–392; **BOOK REVIEWS**

22: 1 1990 Pages 1–101

Hawksworth, D. L. & Ahti, T. A bibliographic guide to the lichen floras of the world (second edition) 1–78; **Kantvilas, G.** The genus *Roccellinastrum* in Tasmania 79–86; **Gilbert, O. L.** The lichen flora of urban wasteland 87–101

- 22: 2** 1990 Pages 103–201
Galloway, D. J. & Arvidsson, L. Studies in *Pseudocyphellaria* (lichens) II. Ecuadorean species 103–135; **Henssen, A.** & Jørgensen, P. M. New combinations and synonyms in the *Lichenaceae* 137–147; **Rogers, R. W.** Ecological strategies of lichens 149–162; **Roberts, D.** & Zimmer, D. Microfaunal communities associated with epiphytic lichens in Belfast 163–171; **Henderson, A.** Literature on air pollution and lichens XXXI 173–181; **Coppins, B. J.** & Gilbert, O. L. Field meeting in western Galloway 183–190; **Farmer, A. M.**, Bates, J. W. & Bell, J. N. B. A comparison of methods for the measurement of bark pH 191–194; **McCarthy, P. M.** *Porina whinrayi*, a new lichen from Tasmania 195–197; **BOOK REVIEWS**
- 22: 3** 1990 Pages 203–354
Brown, D. H., Coppins, B. J. & Galloway, D. J. A birthday tribute: Peter James 203–204; **Tønsberg, T.** *Japewia subaurifera*, a new lichen genus and species from north-west Europe and western North America 205–212; **Jørgensen, P. M.** The lichen genus *Pterygiopsis* in northern Europe 213–217; **Hawksworth, D. L.** & Poelt, J. A second lichen-forming species of *Cheirocytina* from Austria 219–224; **Rambold, G.**, Hertel, H. & Triebel, D. *Koerberiella wimmeriana* (Lecanorales, *Porpidiaceae*) and its lichenicolous fungi 225–240; **Krog, H.** New *Ramalina* species from Porto Santo, Madeira 241–247; **Moberg, R.** *Waynea*, a new lichen genus in the *Bacidiaceae* from California 249–252; **Henssen, A.** *Thermutopsis jamesii*, a new member of the *Lichenaceae* from Antigua 253–259; **Ahti, T.** New species of *Cladonia* from tropical South America 261–268; **Elix, J. A.** & Johnston, J. Three new species of *Relicina* from Australasia 269–275; **Coppins, B. J.** & Kantvilas, G. Studies in *Micarea* in Australasia I. Four new species from Tasmania 277–288; **Kantvilas, G.** The genus *Perthusaria* in Tasmanian rainforests 289–300; **Hawksworth, D. L.** *Globosphaeria*, a remarkable new pyrenomycete on *Normandina* from Tasmania 301–305; **Kärnefelt, I.** Isidiate taxa in the Teloschistales and their ecological and evolutionary significance 307–320; **Ahmadjian, V.** *Trebouxia jamesii* and the question of multinucleate cells in the lichen photobiont *Trebouxia* 321–324; **Guzman, G.**, Quilhot, W. & Galloway, D. J. Decomposition of species of *Pseudocyphellaria* and *Sixta* in a southern Chilean forest 325–331; **Nimis, P. L.**, Castello, M. & Perotti, M. Lichens as biomonitor of sulphur dioxide pollution in La Spezia (northern Italy) 333–344; **Purvis, O. W.**, Elix, J. A. & Gaul, K. L. The occurrence of copper-psoromic acid in lichens from cupriferous substrata 345–354
- 22: 4** 1990 Published 01-Nov-1990 Pages 355–417
Nash III, T. H., Hafellner, J. & Common, R. S. *Omphalora*, a new genus in the *Parmeliaceae* 355–365; **Giavarini, V. J.** Lichens of the Dartmoor rocks 367–396; **Henderson, A.** Literature on air pollution and lichens XXXII 397–403; **Lawrey, J. D.** Obituary: Mason Ellsworth Hale Jr. 23 September 1928–23 April 1990 405–407; **Stevens, G. N.** *Usnea himantodes* Stirton and its synonyms 409–412; **BOOK REVIEWS**
- 23: 1** 1991 Published 12-Feb-1991 Pages 1–98
Brown, D. H. Editorial 1; **Orange, A.** Notes on some terricolous species of *Verrucaria* 3–10; **Thor, G.** & Muhr, L.-E. *Buellia violaceofusca*, a new lichen from Sweden 11–13; **Orange, A.** *Macentina dictyospora* (*Verrucariaceae*), a new lichenized species from Sweden 15–20; **Scutari, N. C.** *Hyperphyscia variabilis*, a new foliose species of *Physciaceae* with 3-septate spores 21–26; **McCarthy, P. M.** The lichen genus *Endocarpon* Hedwig in Australia 27–52; **Stevens, G. N.** *Usnea elixii*, a new lichen species from Australia 53–56; **Aptroot, A.** The lichen flora of the Maldives 57–60; **Halonen, P.**, Hyvärinen, M. & Kauppi, M. The epiphytic lichen flora on conifers in relation to climate in the Finnish middle boreal subzone 61–72; **Gilbert, O.
