Dear Brett

ENVIRONMENTAL DUE DILIGENCE ADVICE – PART LOT 2 THE BOULEVARD, WEMBLEY DOWNS

Emerge Associates has been engaged by the Town of Cambridge (ToC) to provide environmental due diligence advice for part of Lot 2 The Boulevard, Wembley Downs (herein referred to as ‘the site’). The purpose of this advice is to identify the environmental values, opportunities and constraints of the site, to assist the ToC in determining whether the site should be identified as a ‘*potential future development site (subject to further investigation)*’ in the ToC draft Local Planning Strategy (LPS), which is currently being finalised. It has been assumed that any ‘potential future development’ would be associated with residential land uses.

The site is owned in freehold by the ToC, is approximately 7.9 hectares (ha) in size and is located in the north-eastern extent of the Wembley Golf Course adjacent to Empire Avenue, as shown in the attached **Figure 1**.

Key findings

The assessment has not identified any environmental considerations which would fundamentally constrain potential future residential development of the site. Notwithstanding this, there are a range of environmental considerations applicable to the site that would require management through the planning and development process, if future residential development was proposed. These include:

- Consideration of the retention of native mature trees as part of any development design process, as well as appropriately managing community expectations in this regard.
- Confirmation of the presence or absence of the *Tuart Woodlands and Forests of the Swan Coastal Plain* ecological community within the site, if it is listed as a threatened ecological community under the *Environmental Protection and Biodiversity Conservation Act 1999*.
- Compliance with State and Commonwealth environment legislation, where applicable. This includes the mandatory referral of any scheme amendment to the Environmental Protection Authority, as well as potential referral of any potential development to the Commonwealth Department of Environment and Energy if significant impacts to Matters of National Environmental Significance are likely to or have the potential to occur.

- Provision of suitable separation between final floor levels and groundwater levels, particularly in the low-lying eastern portion of the site. This would likely be informed by the results of site-specific groundwater monitoring investigations.
- Attainment of a suitable groundwater allocation for irrigation of POS areas, if required. This may require trading from existing licences in the locality, given all groundwater resources underlying the site are currently fully allocated.
- Completion of various technical environmental investigations and strategies to inform any potential development design and to support the associated environmental and planning approvals processes. These may include:
 - Significant tree surveys
 - Fauna surveys and habitat assessments (including targeted black cockatoo surveys)
 - Acoustic impact investigations associated with adjacent roads (existing and future)
 - District, local and urban water management strategies (including groundwater monitoring)
 - Bushfire management plans
 - Environmental assessment reporting.

Overall, these environmental considerations would not fundamentally constrain potential future residential development of the site and could be suitably managed and accommodated through the standard planning and development process.

Information sources

This advice has been based on a desktop review of various publicly available databases and information sources, as well as the results of a site specific *Spring Flora and Vegetation Survey* completed by Emerge Associates in November 2018 (provided as **Attachment A**).

Land use planning and environmental approvals context

The site is currently reserved for a combination of ‘Parks and Recreation’ and ‘Primary Regional Roads’ under the Metropolitan Region Scheme (MRS), which is reflected in the ToC Local Planning Scheme No. 1. If future development of the site was proposed, it is likely that scheme amendments would be required to facilitate this.

All scheme amendment proposals are required to be referred to the Environmental Protection Authority (EPA) under Part IV of the *Environmental Protection Act 1986* (EP Act) for the EPA to determine whether or not the proposed scheme amendment is environmentally acceptable.

Based on a desktop review of publicly available databases, no historical or existing proposals or scheme amendments applicable to the site are known to have been referred to the EPA. Similarly, the site is not subject to any existing or historical Clearing Permits issued under Part V of the EP Act. At a commonwealth level, the site is not subject to any existing or historical referrals under the *Environmental Protection and Biodiversity Protection Act 1999* (EPBC Act).

Whilst no existing environmental approval instruments apply to the site, this would likely change if future development of the site was proposed and progressed. Potential environmental approval requirements in this regard have been discussed below, where applicable.

Summary of key environmental values, opportunities and constraints

Based on the review and assessment of available information, the environmental values of the site have been documented in **Table 1**. The key spatial considerations, approvals and management implications for any potential future development proposals are also discussed.

Table 1: Summary of environmental values within the site and key spatial considerations, approvals and management implications for potential future development

Environmental factor	Relevance to site and summary of information	Considerations and implications for potential future development
Topography, soils and landform	<ul style="list-style-type: none"> The site slopes from west to east, with an elevation of 25 m Australian Height Datum (AHD) in its western extent, sloping to 6 m AHD in a flat area in the eastern extent of the site. The site is situated within the Spearwood dunal system. The Geological Survey of Western Australia (Gozzard 1982) identifies the western extent of the site as being underlain by limestone, whilst the remainder of the site comprises sandy soils. 	<ul style="list-style-type: none"> The eastern low point of the site would likely require importation of fill to facilitate any potential development, due to the low surface elevation and close proximity to groundwater (discussed further below). Generally, high groundwater levels require the importation of fill to meet local government requirements in order to achieve necessary separation between groundwater levels and finished floor levels.
Geo-heritage	<ul style="list-style-type: none"> The Department of Mines, Industry Regulation and Safety (DMIRS) maintains a register of significant geo-heritage features and formations. This register does not identify any geo-heritage features within the site. 	<ul style="list-style-type: none"> None.
Acid sulfate soils	<ul style="list-style-type: none"> Regional mapping published by the Department of Water and Environmental Regulation (DWER) does not identify the site as having any risk of ASS occurring within 3 metres of the natural soil surface. 	<ul style="list-style-type: none"> None.
Flora and vegetation	<ul style="list-style-type: none"> Regional vegetation complex mapping (Heddle <i>et al.</i> 1980) identifies the majority of the site within the Cottesloe – Central and South complex, with the eastern portion of the site within the Karrakatta – Central and South complex. Approximately 33.6% and 23% of the original extent of each complex remains across the Swan Coastal Plain respectively (EPA 2015). The site specific <i>Spring Flora and Vegetation Survey</i> (Emerge Associates 2018) was completed on 16 November 2018. The survey report is provided in Attachment A and the results are summarised as follows: <ul style="list-style-type: none"> The site has been subject to significant historical disturbance, with grassy weeds dominating ground-storey vegetation. Five disturbed plant communities were identified, as shown in the attached Figure 2. As a result of the disturbance, vegetation condition was assessed to range from ‘degraded’ to ‘completely degraded’ and as such the site is not considered to support intact native vegetation communities. See Figure 3. Whilst vegetation is highly disturbed from its natural state, the site does contain an overstorey of mature native trees such as tuart, jarrah, marri (primarily within upland areas in the west of the site) and flooded gum (associated with low-lying areas in the east of the site). 	<ul style="list-style-type: none"> The site does not contain any intact native vegetation communities or associated listed PECs and TECs, and as such, there are unlikely to be any spatial constraints on potential development proposals for the site in this regard. However, if the <i>Tuart Woodlands and Forests of the Swan Coastal Plain</i> community is listed as a Federal TEC, then its potential occurrence within the site would need to be reconsidered in the context of any approved conservation advice. This listing may impact on the spatial design of any development proposal; however it can be managed through the standard planning and development design process. Whilst only one component of a vegetation community, individual mature native trees identified within the site also support environmental values in their own right. Whilst mature native trees are not typically afforded statutory environmental protection (unless, for example, they provide habitat for conservation significant fauna species), they are commonly highly valued by local communities due to factors such as perceived environmental concerns, amenity value and urban canopy cover. It is likely that any future development proposal within the site would need to have a design which considers the retention of mature native trees. This is typical of development proposals for sites which support mature native trees and can be supported by technical investigations such as a <i>Significant Tree Survey</i>.

Environmental factor	Relevance to site and summary of information	Considerations and implications for potential future development
	<ul style="list-style-type: none"> No conservation significant flora species were observed or are considered likely to occur given the high weed coverage. The site is not considered to support any listed Threatened or Priority Ecological Communities (TECs and PECs), based on the observed species composition and vegetation condition, including the <i>Banksia Woodlands of the Swan Coastal Plain</i> TEC. The <i>Tuart Woodlands and Forests of the Swan Coastal Plain</i> ecological community is currently being considered for potential listing as a TEC under the EPBC Act. Distribution mapping (CALM 2003) identifies its potential occurrence within the Wembley Golf Course adjacent to the site, but with the lowest canopy density score of 0-9% and in a 'highly disturbed' condition. Mature tuart trees were observed in the western extent of the site, but the vegetation condition was assessed as 'degraded' or 'degraded to completely degraded'. The occurrence of this community within the site would likely be dependent on condition thresholds, which would accompany any listing as a TEC. 	
Fauna habitat	<ul style="list-style-type: none"> Vegetation within the site was observed to be highly disturbed from its natural state and subject to significant weed infestation; therefore its habitat value to native fauna species is likely to be reduced. Notwithstanding this, the site would still provide some habitat value to native fauna species, particularly mature native trees. A search of Department of Biodiversity, Conservation and Attraction's <i>NatureMap</i> database identified a range of conservation significant fauna species previously recorded within the general locality of the site, including threatened species of black cockatoo. Regional habitat mapping for Carnaby's black cockatoo (Glossop <i>et al.</i> 2011) identifies vegetation within the site as potential Carnaby's black cockatoo foraging habitat. Mature native trees would likely provide some foraging value to black cockatoos if they utilised the site. Based on a review of various <i>Great Cocky Count</i> survey reports, no known black cockatoo roosts occur within the site. The closest black cockatoo roosts occur approximately 3 km to the south, within or in proximity to Perry Lakes Reserve. Whilst a site specific fauna survey has not been completed, the reconnaissance flora and vegetation survey identified a number of mature native trees within the site. These trees may represent potential black cockatoo habitat trees, dependent on their size and hollow characteristics. This is not uncommon for sites comprising native vegetation, but a fauna survey would be required to confirm this. 	<ul style="list-style-type: none"> A site specific fauna survey and habitat assessment would likely be required to support any future development proposal (such as a scheme amendment or structure plan). This assessment would likely need to include a specific black cockatoo habitat assessment, to determine the extent and quality of foraging habitat and whether potential breeding trees and/or roosting habitat is present. This is a typical requirement of the development process. If conservation significant fauna habitat is determined to occur within the site; <ul style="list-style-type: none"> These values may warrant or require retention as part of any future development design (such as retention of mature trees). Any proposal incorporating removal of these values may require referral under the EPBC Act, if the habitat supports Matters of National Environmental Significance (e.g. black cockatoo habitat trees).
Ecological linkages	<ul style="list-style-type: none"> A network of broad regional ecological linkages across the Perth metropolitan region was mapped by the Perth Biodiversity Project in 2007. One of these mapped regional ecological linkages extends between vegetated areas 	<ul style="list-style-type: none"> The extent to which vegetation within the site potentially contributes to ecological linkages would be further clarified through completion of a fauna survey and habitat assessment.

Environmental factor	Relevance to site and summary of information	Considerations and implications for potential future development
	<p>associated with Herdsman Lake, Wembley Golf Course and Bold Park, including the site.</p> <ul style="list-style-type: none"> Whilst the site comprises vegetation, the extent to which this contributes to any ecological linkage is likely to be reduced due to the level of site disturbance and associated weed cover. 	<ul style="list-style-type: none"> There is no existing statutory mechanism to formally implement regional ecological linkages. However, if retention of vegetation is proposed in order to contribute to ecological linkage functionality, this is typically considered as part of the structure planning design process.
Environmentally Sensitive Areas	<ul style="list-style-type: none"> The Department of Water and Environmental Regulation (DWER) map and maintain a register of Environmentally Sensitive Areas (ESAs), which are typically associated with known occurrences of conservation significant vegetation values (such as threatened flora, threatened ecological communities, conservation category wetlands etc.). No ESAs are mapped by DWER as occurring within or adjacent to the site. 	<ul style="list-style-type: none"> None.
Conservation reserves	<ul style="list-style-type: none"> The majority of the site is currently reserved for 'Parks and Recreation' under the MRS, along with the surrounding Wembley Golf Course. Such MRS reserves can be implemented to facilitate a range of land uses, one of which may be environmental conservation. However, it is not clear if the designation of the existing MRS reserve over the site was originally intended to facilitate a conservation outcome, or if this was associated with the recreational use of the adjacent golf course. Given the site is not identified within a <i>Bush Forever Site</i> under the MRS, this suggests that purpose of the 'Parks and Recreation' may not have been intended for conservation land uses. The site does not contribute to any regional or national parks, or lands managed by the Department of Biodiversity, Conservation and Attractions. 	<ul style="list-style-type: none"> The intended land use of the 'Parks and Recreation' MRS reserve over the majority of the site should be clarified with the Department of Planning, Lands and Heritage as part of any potential future rezoning process. If the reservation was originally implemented to facilitate a conservation outcome, this may change the context of any future development proposal.
Wetlands	<ul style="list-style-type: none"> Based on a review of the <i>Geomorphic Wetlands of the Swan Coastal Plain</i> dataset published by the Department of Biodiversity, Conservation and Attractions, no wetlands are mapped as occurring within the site. Plant communities Er and ErBp identified in the <i>Spring Flora and Vegetation Survey</i> (Emerge 2018) were observed to contain native flora species which occur in low-lying or wetland habitats. However, no obvious wetland landforms or surface water features were observed within the site. 	<ul style="list-style-type: none"> None.
Hydrology	<ul style="list-style-type: none"> Based on a review of hydrography mapping published by the Department of Water and Environmental Regulation, the site does not contain any mapped surface water features. No surface water features were observed within the site during the reconnaissance flora and vegetation survey (Emerge Associates 2018). Based on a review of the <i>Perth Groundwater Map</i> published by DWER, the historical maximum groundwater level below the site is approximately 5-6 m AHD. Given the elevation of the site varies from 6-25 m AHD, this indicates the low-lying eastern portion of the site may experience minimal separation to groundwater. 	<ul style="list-style-type: none"> Any potential future development proposal for the site would require the preparation of appropriate water management strategies at subsequent stages of the planning process, including a District Water Management Strategy (DWMS) for the scheme amendment process, a Local Water Management Strategy (LWMS) and an Urban Water Management Plan (UWMP) for subdivision. The purpose of the water management strategies and plans would be to address the stormwater and groundwater management within the site. Groundwater monitoring would need to occur within the site to support any potential future development proposal, in order to determine the depth from the surface to groundwater. As

Environmental factor	Relevance to site and summary of information	Considerations and implications for potential future development
	<ul style="list-style-type: none"> Based on a review of the <i>Water Register</i> published by DWER, groundwater resources underlying the site are fully allocated. 	<p>outlined above, any potential future development within the site would likely require the importation of fill in the eastern portion of the site to provide suitable separation between maximum groundwater levels and finished floor levels. While not an environmental constraint, this does create a financial impost.</p> <ul style="list-style-type: none"> If groundwater abstraction was required as part of any potential future development proposal (for example, to irrigate public open space areas), then groundwater allocations would likely need to be acquired or traded from existing licences in the area.
Basic raw materials	<ul style="list-style-type: none"> No regionally significant basic raw materials, as mapped by DMIRS, are identified as occurring within the site. No 'priority resource locations', 'extraction areas' or 'key extraction areas', as identified in <i>State Planning Policy 2.4 Basic Raw Materials</i> (WAPC 2000), are identified as occurring within the site. 	<ul style="list-style-type: none"> None.
Potential contamination	<ul style="list-style-type: none"> A review of the DWER <i>Contaminated Sites Database</i> indicates that no land parcels incorporating the site are registered on the database as a contaminated site ('contaminated – remediation required', 'contaminated – restricted use' or 'remediated for restricted use') pursuant to the <i>Contaminated Sites Act 2003</i>. A review of the Certificate of Title for Lot 2, which incorporates the site, did not identify any memorials on title relating to contamination. 	<ul style="list-style-type: none"> None.
Surrounding land uses and zoning	<ul style="list-style-type: none"> The site is bound to the north and east by Empire Avenue. To the south and west, the site is bound by stands of vegetation and open fairways associated with the Wembley Golf Course. The site is dissected by an unconstructed MRS 'Primary Regional Roads' reserve, which generally extends between Pearson Street and Oceanic Drive. 	<ul style="list-style-type: none"> Any future development proposal for the site would likely have to consider vehicular noise emissions from Empire Avenue, or from the potential future road associated with the MRS 'Primary Regional Roads' reserve, as they have the potential to impact on any sensitive land uses which may be proposed within the site. A site-specific acoustic assessment may be required to support any such proposal to satisfy the requirements of <i>State Planning Policy 5.4 Road and Rail Transport Noise and Freight Considerations in Land Use Planning</i>. This is a typical requirement of the development process.
Aboriginal heritage	<ul style="list-style-type: none"> Based on a review of the <i>Aboriginal Heritage Inquiry System</i> (published by the Department of Planning, Lands and Heritage Affairs), no Registered Aboriginal Heritage Sites or Other Heritage Places are mapped as occurring within the site. 	<ul style="list-style-type: none"> None.
European heritage	<ul style="list-style-type: none"> Based on a review of the State Heritage Office register of heritage sites, there are no sites listed by the local or state government as containing heritage values. 	<ul style="list-style-type: none"> None.
Bushfire	<ul style="list-style-type: none"> The <i>Map of Bush Fire Prone Areas</i> published by the Office of Bushfire Risk Management identifies the site and surrounding area as a 'bushfire prone area'. 	<ul style="list-style-type: none"> Given the site is mapped as a 'bushfire prone area', any potential future development proposal for the site would be required to satisfy the requirements of <i>State Planning Policy 3.7 Planning in Bushfire Prone Areas</i> (SPP 3.7) and the <i>Guidelines for Planning in Bushfire Prone</i>

Environmental factor	Relevance to site and summary of information	Considerations and implications for potential future development
	<ul style="list-style-type: none"> • Vegetation within and surrounding the site to the south and west (within the Wembley Golf Course) would likely represent bushfire hazards. 	<p><i>Areas throughout the various stages of the planning process (including scheme amendment, structuring planning, subdivision and development stages). This typically involves an assessment of the bushfire hazards applicable to the site and compliance with the bushfire protection criteria (development location, development siting and design, vehicular access and water supply), which would be documented in a Bushfire Management Plan, to be prepared and/or updated at each stage of the planning process.</i></p>

Summary and closing

We trust that the above meets your needs in regards to your consideration of the site. Should you have any queries or concerns regarding any of the above please contact the undersigned on 08 9380 4988.

Yours sincerely
Emerge Associates

Ashley Bird

TECHNICAL MEMORANDUM

Spring Flora and Vegetation Survey

Part Lot 2 The Boulevard, Wembley Downs

PROJECT NUMBER	EP18-127(01)	DOC. NUMBER	EP18-127(01)—003 MS
PROJECT NAME	Town of Cambridge Local Planning Strategy	CLIENT	Town of Cambridge
AUTHOR	MS	REVIEWER	TAA
VERSION	1	DATE	3/12/2018

1. INTRODUCTION

The Town of Cambridge (ToC) is in the process of preparing a draft Local Planning Strategy (LPS). As part of this process, the ToC are considering the future land use of a parcel of land referred to as the eastern ‘surplus Wembley Golf Course site’, located within part Lot 2 The Boulevard, Wembley Downs (referred to herein as ‘the site’).

The site is located approximately 9 kilometres (km) north west of the Perth Central Business District within the ToC. The site is 7.85 hectares (ha) in size and is bound by Empire Avenue to the north and east, and by the Wembley golf course to the south and west, as shown in the attached **Figure 1**.

Emerge Associates (Emerge) were engaged by the ToC to provide environmental consultancy services to support the planning process for the site. As part of this, Emerge undertook a flora and vegetation survey to the standard required of a ‘reconnaissance’ survey in accordance with the Environmental Protection Authority’s (EPA’s) *Technical Guidance – Flora and Vegetation Surveys for Environmental Impact Assessment* (EPA 2016).

The purpose of this survey was to provide sufficient information on the flora and vegetation values within the site to inform finalisation of the draft LPS.

To complete the reconnaissance survey the following tasks were undertaken:

- Desktop review of background information regarding threatened flora species and ecological communities relevant to the site and surrounds.
- Compilation of a representative list of flora species recorded as part of the field survey.
- Mapping of plant communities and vegetation condition.
- Identification of potential habitat for conservation significant flora and vegetation and likelihood of occurrence.
- Documentation of the desktop assessment, survey methodology and results into a report.

2. METHODS

2.1. Desktop Review

Searches were conducted of NatureMap and EPBC Act Protected Matters databases using a 10 km query radius. The results of searches are provided as **Appendix A**.

2.2. Field surveys

A botanist from Emerge visited the site on 16 November 2018 to conduct a flora and vegetation survey.

The site was traversed on foot and the composition and condition of vegetation was assessed. The site was searched for vegetation that would potentially comprise suitable habitat for threatened and/or priority flora species.

Formal sampling of native vegetation was not undertaken due to the relatively degraded condition vegetation present within the site. However, the composition and condition of native vegetation was recorded at a series of sample points where photo-point/relevés were completed. A total of 12 locations were sampled in this way and the position of the sample points were recorded with a hand-held GPS unit, as shown in **Figure 2**.

The data recorded for each sample included:

- site details (site name, site number, observers, date, location)
- environmental information (slope, aspect, bare-ground, rock outcropping soil type and colour class, litter layer, topographical position, time since last fire event)
- biological information (vegetation structure and condition, degree of disturbance and flora species present (all native species major non-native species).

Additional plant taxa not observed within the relevés were recorded opportunistically as the botanist traversed the site. Photographs were taken throughout the field visit to show particular site conditions.

All plant specimens collected during the field survey were dried, pressed and then named in accordance with requirements of the Western Australian Herbarium. Identification of specimens occurred through comparison with named material and through the use of taxonomic keys. Flora species not native to Western Australia are denoted by an asterisk (*) in text and raw data.

Vegetation condition was assigned at each sample point and changes in vegetation condition were also noted and mapped across the site. The condition of the vegetation was assessed using the condition scale provided in the conservation advice for the ‘banksia woodlands of the Swan Coastal Plain’ threatened ecological community (TEC)(DoEE 2016) which incorporates the Keighery scale (1994) (**Table 1**).

Table 1: Vegetation condition scale applied during the field assessment

Condition	Definition (Keighery 1994)	Indicator (DoEE 2016)	
		Typical native vegetation composition	Typical weed cover
Pristine	Pristine or nearly so, no obvious signs of disturbance.	Native plant species diversity fully retained or almost so	Zero or close to
Excellent	Vegetation structure intact, disturbance affecting individual species and weeds are non-aggressive species.	High native plant species diversity	Less than 10%
Very good	Vegetation structure altered obvious signs of disturbance. For example, disturbance to vegetation structure caused by repeated fires, the presence of some more aggressive weeds, dieback, logging and grazing	Moderate native plant species diversity	5-20%
Good	Vegetation structure significantly altered by very obvious signs of multiple disturbances. Retains basic vegetation structure or ability to regenerate it. For example, disturbance to vegetation structure caused by very frequent fires, the presence of some very aggressive weeds at high density, partial clearing, dieback and grazing.	Low native plant species diversity	5-50%
Degraded	Basic vegetation structure severely impacted by disturbance. Scope for regeneration but not to a state approaching good condition without intensive management. For example, disturbance to vegetation structure caused by very frequent fires, the presence of very aggressive weeds, partial clearing, dieback and grazing.	Very low native plant species diversity	20-70%
Completely degraded	The structure of the vegetation is no longer intact and the area is completely or almost completely without native species. These areas are often described as 'parkland cleared' with the flora comprising weed or crop species with isolated native trees or shrubs.	Very low to no native species diversity	Greater than 70%

2.3. Mapping and data analysis

2.3.1. Plant communities

The local plant communities within the site were separated according to species composition identified from the sample data collected during the field survey. Once the communities were defined the vegetation was described according to the dominant species present using the structural formation descriptions of the *National Vegetation Inventory System* (NVIS) (ESCAVI 2003). The identified plant communities were then mapped on aerial photography (1: 3,000) from the sample point/s and boundaries were interpreted from aerial photography. Vegetation condition was

mapped on aerial photography (1:3,000) based on the location/s and notes recorded during the field survey to define areas with changes in condition.

2.3.2. Floristic community type

The species within the identified plant communities were compared to the regional ‘floristic community type’ (FCT) dataset *A Floristic survey of the southern Swan Coastal Plain* by Gibson et al. (1994). Statistical floristic analysis was not completed due to the reconnaissance level of the survey and lack of defined quadrat sampling, which is required for FCT analysis. Instead, likely FCT/s were inferred based on flora species recorded as well as contextual information relating to the geomorphology and soils in the site.

2.3.3. Threatened and priority ecological community

Areas of native vegetation potentially representing ‘banksia woodlands of the Swan Coastal Plain’ TEC were assessed against key diagnostic characteristics and thresholds relating to size and vegetation condition provided in the *Approved Conservation Advice (incorporating listing advice) for the Banksia Woodlands of the Swan Coastal Plain ecological community* (TSSC 2016).

Note that the ‘tuart (*Eucalyptus gomphocephala*) woodlands and forests of the Swan Coastal Plain’ ecological community was proposed as a TEC under the EPBC Act in October 2017. No decision has been made on the status of this TEC. It is possible that some vegetation within the site may meet requirements to be considered tuart woodland. However, the degree to which vegetation may meet criteria for any future tuart woodland TEC will likely depend on condition thresholds that are applied when and if the community is listed.

2.3.4. Species accumulation curve

A species accumulation curve was plotted from sample data by generating a trendline (log) in Microsoft Excel. The trendline was forecast to locate the asymptote of the curve (the point at which the curve flattens), which provides an indication of amount of sampling that would be required before it can be assumed few species remain undetected. Comparison between actual and estimated species accumulation assists in evaluating the adequacy of sampling effort.

2.4. Survey limitations

It is important to note the specific constraints imposed on surveys and the degree to which these may have limited survey outcomes. An evaluation of the survey methodology against standard constraints outlined in the EPA document *Technical Guidance – Flora and Vegetation Surveys for Environmental Impact Assessment* (EPA 2016) is provided in **Table 2**.

Table 2: Evaluation of survey methodology against standard constraints outlined in EPA Technical Guidance – Flora and Vegetation Surveys for Environmental Impact Assessment

Constraint	Degree of limitation	Details
Availability of contextual information	No limitation	The broad scale contextual information is adequate to place the site and vegetation in context.
	Minor limitation	FCT assignment was undertaken through comparison to the authoritative floristic study of the Swan Coastal Plain by Gibson <i>et al.</i> (1994). Having a regional study to compare survey results is advantageous as it provides the ability to classify vegetation to a formal scheme. However, the Gibson <i>et al.</i> (1994) data is now more than 20 years out of date and was also derived from a limited sample of vegetation that was largely located on public land. Due to the high degree of local endemism / spatial variation inherent to vegetation on the Swan Coastal Plain it is likely that the groups identified for certain FCTs in Gibson <i>et al.</i> (1994) could be further separated into a greater number of groups to better reflect differences in vegetation composition evident at finer/local scales. Due to the relatively degraded condition of vegetation within the site, FCTs were inferred and available information was considered appropriate for this purpose.
Experience level of personnel	No limitation	This flora and vegetation survey was undertaken by a qualified ecologist with 15 years' experience in environmental science in Western Australia. Plant identifications and plant mapping were reviewed by a botanist with over 7 years of botanical experience in Western Australia.
Suitability of timing	No limitation	The survey was conducted in November and thus within the latter part of the spring main flowering season. The site has been subject to historical disturbance and has significant weed cover, so there is lower potential that annual and geophytic native species, including threatened and priority species, may occur within the site. However, it is possible that certain earlier flowering plants may be present and these may not have been easily detectable at the time of survey. Nonetheless given the degraded condition of vegetation the survey timing was acceptable to provide conclusive characterisation of vegetation for a reconnaissance level survey.
Temporal coverage	No limitation	Comprehensive flora and vegetation assessments can require multiple visits, at different times of year, and over a period of a number of years, to enable observation of all species present. As the survey was a reconnaissance level survey conducted in the main flowering period a single visit was not considered a particular limitation.
Spatial coverage and access	No limitation	Site coverage was comprehensive (track logged).
	No limitation	All parts of the site could be accessed as required.
Sampling intensity	No limitation	A total of 70 species were recorded, of which 68 were recorded from twelve sample locations and 2 were recorded opportunistically. An adequate degree of sampling was undertaken for a reconnaissance level survey, given the degree of disturbance and the small area of intact vegetation. Additional sampling in the main flowering period could be combined with the current assessment to meet the requirements of a detailed survey.
Influence of disturbance	Minor limitation	Time since fire is greater than 5 years as interpreted from aerial imagery and therefore short lived species more common after fire may not have been visible.
	No limitation	Historical ground disturbance and weed invasion was evident throughout much of the site. The disturbance history of the site was considered when undertaking field sampling.
Adequacy of resources	No limitation	All resources required to perform the survey were available.

3. RESULTS AND DISCUSSION

The site generally comprises a flat inter-dunal landform, but includes a south east facing slope along its western side. Based on the degree of modification that has occurred to remnant vegetation it is assumed that the site has been subject to repeated historical disturbances. Soils are sandy, grey at the surface and yellow at depth. Some evidence of moisture (vigorous *Pennisetum clandestinum* (kikuyu)) was observed on the eastern side of the site near culvert outlet from Empire Avenue. However, surface conditions were largely dry at the time of the survey. The site is currently used as bushland reserve within the Wembley Golf course.

A native overstorey persists across much of the site but with a predominantly non-native understorey. The dominant vegetation comprises *Eucalyptus gomphocephala* (tauart), *E. marginata* (jarrah) and *Corymbia calophylla* (marri) or *E. rudis* (flooded gum) trees over **Ehrharta calycina* (perennial veldt grass) and variety of other non-native weed species. A small patch of vegetation appears to have been revegetated with native species (plant community **ErBp_revegetated** discussed in **Section 6**).

3.1. Flora

A total of 27 native and 43 non-native (weed) or planted species were recorded within the site during the field survey, representing 28 families and 58 genera. The dominant family within the site was Poaceae (1 native taxa and 24 non-native taxa). The other three dominant families were Fabaceae (6 native taxon and four non-native taxa), Asteraceae (five non-native taxa) and Proteaceae (seven native taxa of which four appear to have been planted in revegetated area).

A complete species list is provided in **Appendix B** and sample data in **Appendix C**.

3.2. Threatened and priority flora

No threatened or priority flora were recorded in the site. No areas of suitable habitat for threatened or priority flora were identified in the site.

3.3. Declared pests

One species listed as declared pests was recorded within the site:

- **Asparagus asparagoides*.

This species is listed in the 'permitted – S11' category of declared pests.

3.4. Plant communities

Five native plant communities and cleared areas were identified within the site as outlined in **Table 3** and shown in **Plates 1-5**. The extent of plant communities within the site is shown in **Figure 2**.

Table 3: Plant communities present within the site

Plant community	Description	Area (ha)
EgCc	<i>Eucalyptus gomphocephala</i> and <i>Corymbia calophylla</i> over occasional <i>Jacksonia sternbergiana</i> over * <i>Ehrharta calycina</i> and non-native weed species	0.10
EgMmCc	<i>Eucalyptus gomphocephala</i> , <i>Eucalyptus marginata</i> and <i>Corymbia calophylla</i> over occasional <i>Jacksonia sternbergiana</i> , <i>Xanthorrhoea</i> spp. and <i>Macrozamia fraseri</i> over <i>Hardenbergia comptoniana</i> over * <i>Ehrharta calycina</i> and non-native weed species	3.59
Er	<i>Eucalyptus rufa</i> over occasional <i>Acacia saligna</i> , <i>Jacksonia furcellata</i> occasional <i>Rhagodia baccata</i> over * <i>Ehrharta calycina</i> and non-native weed species.	1.95
ErBp	<i>Eucalyptus rufa</i> over occasional <i>Banksia prionotes</i> over <i>Jacksonia furcellata</i> over <i>Rhagodia baccata</i> over occasional <i>Dianella revoluta</i> and * <i>Ehrharta calycina</i> and non-native weed species.	1.99
ErBp (revegetation)	<i>Eucalyptus rufa</i> over <i>Banksia prionotes</i> over <i>Jacksonia furcellata</i> and variety of planted native species (<i>Corymbia calophylla</i> , <i>Hakea trifurcata</i> , <i>Banksia sessilis</i>) over occasional <i>Dianella revoluta</i> and * <i>Ehrharta calycina</i> and non-native weed species.	0.04
Cleared	Cleared paths and tracks	0.16

Plate 1: Plant community **EgCc** in 'degraded to completely degraded' condition

Plate 2: Plant community *EgMmCc* in 'degraded' condition

Plate 3: Plant community *Er* in 'degraded to completely degraded' condition

Plate 4: Plant community **ErBp** in 'degraded to completely degraded' condition

Plate 5: Plant community **ErBp (revegetation)** in 'degraded' condition

3.5. Vegetation condition

The majority of the site supports vegetation in ‘degraded’ to ‘degraded - completely degraded’ condition. The revegetated area was mapped as degraded as weed cover was equally high in this as other areas of this site. Areas of bare soil were also mapped as being in ‘completely degraded’ condition. The extent of vegetation by condition category is detailed in **Table 4** and shown in **Figure 3**.

Table 4: Vegetation condition categories within the site

Condition category (Keighery (1994))	Size (ha)
Pristine	0
Excellent	0
Very good	0
Very good - good	0
Good	0
Degraded	1.841
Degraded – completely degraded	5.851
Completely degraded	0.165

3.1. Floristic community type

As the condition of vegetation within the site is ‘degraded’ to ‘degraded - completely degraded’ the vegetation is not highly representative of a native ecological community. However, the structure expected of native woodland systems is still present. Plant communities **EgEmCc** and **EmCc** are likely to be remnants of FCT 28 ‘Spearwood *Banksia attenuata* or *Banksia attenuata* - *Eucalyptus* woodlands’ (Gibson et al. 1994). Plant communities **ErBp** and **Er** are likely to be remnants of seasonal wetland community such as FCT ‘S07’ from Keighery *et al.* (1996).

3.2. Threatened and priority ecological communities

The vegetation in the site does not represent any listed threatened or priority ecological communities (TEC or PEC). It is possible that parts of the site may contain vegetation that is associated with the tuart woodland TEC that is currently being considered for listing under the EPBC Act. Verification of the presence of this TEC within the site would require review of yet to be provided conservation advice.

3.3. Species richness and sampling adequacy

A total of 70 species were recorded from 12 samples. A species accumulation curve derived from sample data is presented in **Plate 6**. After 12 samples the curve is still increasing but is close to its asymptote. This indicates that few species likely remain undetected by sampling.

Considering the disturbance history of the site and the time spent sampling and traversing the vegetation, the survey effort was considered to be adequate to prepare a representative species inventory.

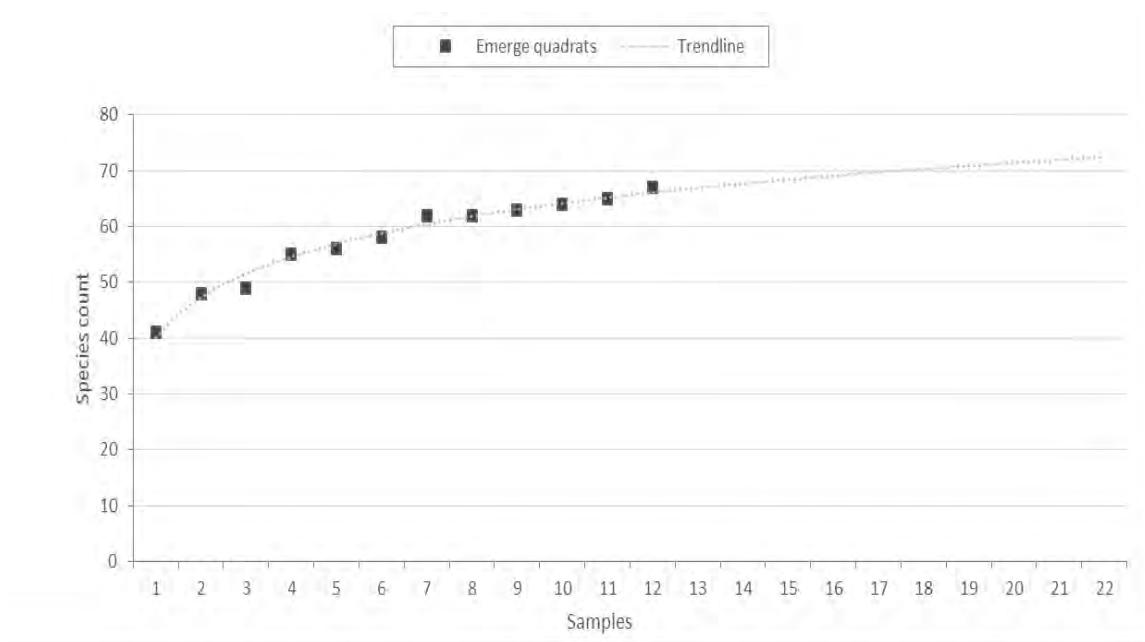

Plate 6: Species accumulation curve derived from sample data ($y = 10.479\ln(x) + 40.047$, $R^2 = 0.9815$)

4. CONCLUSIONS

The site has been subject to repeated historical disturbances. A native overstorey is present throughout along with scattered native midstorey species, but the understorey vegetation is dominated by non-native weed species.

No threatened or priority flora species were recorded in the site and no suitable habitat for threatened or priority flora species was identified in the site.

The vegetation in the site is present in ‘degraded’ to ‘degraded to completely degraded’ condition.

The vegetation in the site is not considered to represent any listed TEC or PEC.

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected.

Information on the coverage of this report and qualifications on data supporting this report are contained in the caveat at the end of the report.

Information is available about [Environment Assessments](#) and the EPBC Act including significance guidelines, forms and application process details.

Report created: 22/11/18 17:50:23

[Summary](#)

[Details](#)

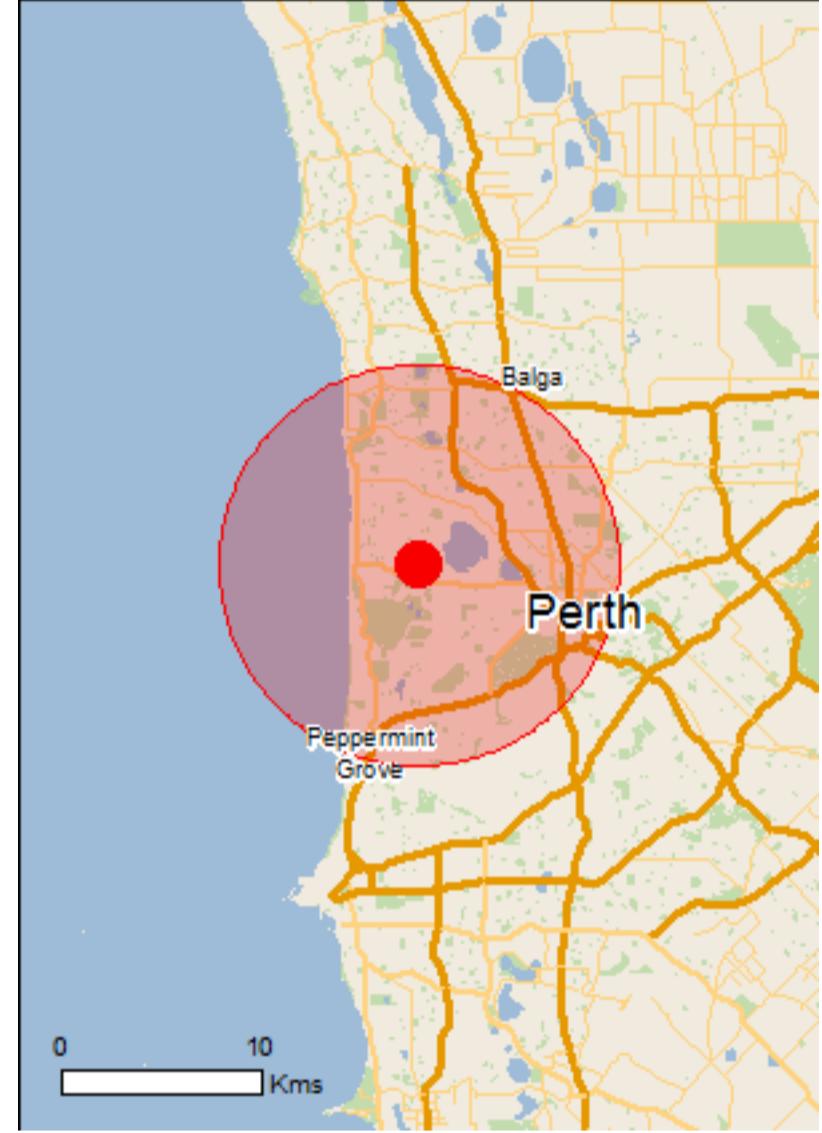

[Matters of NES](#)

[Other Matters Protected by the EPBC Act](#)

[Extra Information](#)

[Buffer: 10.0Km](#)

Summary

Matters of National Environmental Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance:	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	None
Listed Threatened Ecological Communities:	1
Listed Threatened Species:	56
Listed Migratory Species:	63

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Land:	5
Commonwealth Heritage Places:	4
Listed Marine Species:	99
Whales and Other Cetaceans:	12
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have nominated.

State and Territory Reserves:	8
Regional Forest Agreements:	None
Invasive Species:	40
Nationally Important Wetlands:	3
Key Ecological Features (Marine)	None

Details

Matters of National Environmental Significance

Listed Threatened Ecological Communities

[Resource Information]

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Name	Status	Type of Presence
Banksia Woodlands of the Swan Coastal Plain ecological community	Endangered	Community likely to occur within area
Listed Threatened Species		
Name	Status	Type of Presence
Birds		
Anous tenuirostris melanops	Vulnerable	Species or species habitat may occur within area
Botaurus poiciloptilus	Endangered	Species or species habitat known to occur within area
Calidris canutus	Endangered	Species or species habitat known to occur within area
Red Knot, Knot [855]	Critically Endangered	Species or species habitat known to occur within area
Calidris ferruginea		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris tenuirostris	Critically Endangered	Roosting known to occur within area
Great Knot [862]	Vulnerable	Species or species habitat known to occur within area
Calyptorhynchus banksii naso		
Forest Red-tailed Black-Cockatoo, Karrak [67034]	Endangered	Species or species habitat known to occur within area
Calyptorhynchus latirostris	Vulnerable	Roosting known to occur within area
Carnaby's Cockatoo, Short-billed Black-Cockatoo [59523]	Endangered	Species or species habitat known to occur within area
Charadrius leschenaultii		
Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Roosting known to occur within area
Charadrius mongolus		
Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
Diomedea amsterdamensis		
Amsterdam Albatross [64405]	Endangered	Species or species habitat may occur within area
Diomedea epomophora		
Southern Royal Albatross [89221]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area

Name	Status	Type of Presence
<u>Diomedea exulans</u> Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
<u>Diomedea sanfordi</u> Northern Royal Albatross [64456]	Endangered	Foraging, feeding or related behaviour likely to occur within area
<u>Halobaena caerulea</u> Blue Petrel [1059]	Vulnerable	Species or species habitat may occur within area
<u>Leipoa ocellata</u> Malleefowl [934]	Vulnerable	Species or species habitat likely to occur within area
<u>Limosa lapponica baueri</u> Bar-tailed Godwit (baueri), Western Alaskan Bar-tailed Godwit [86380]	Vulnerable	Species or species habitat known to occur within area
<u>Limosa lapponica menzbieri</u> Northern Siberian Bar-tailed Godwit, Bar-tailed Godwit (menzbieri) [86432]	Critically Endangered	Species or species habitat may occur within area
<u>Macronectes giganteus</u> Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
<u>Macronectes halli</u> Northern Giant Petrel [1061]	Vulnerable	Species or species habitat may occur within area
<u>Numenius madagascariensis</u> Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
<u>Pachyptila turtur subantarctica</u> Fairy Prion (southern) [64445]	Vulnerable	Species or species habitat known to occur within area
<u>Phoebetria fusca</u> Sooty Albatross [1075]	Vulnerable	Species or species habitat may occur within area
<u>Pterodroma mollis</u> Soft-plumaged Petrel [1036]	Vulnerable	Species or species habitat may occur within area
<u>Rostratula australis</u> Australian Painted-snipe, Australian Painted Snipe [77037]	Endangered	Species or species habitat likely to occur within area
<u>Sternula nereis nereis</u> Australian Fairy Tern [82950]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
<u>Thalassarche carteri</u> Indian Yellow-nosed Albatross [64464]	Vulnerable	Foraging, feeding or related behaviour may occur within area
<u>Thalassarche cauta cauta</u> Shy Albatross, Tasmanian Shy Albatross [82345]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
<u>Thalassarche cauta steadi</u> White-capped Albatross [82344]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
<u>Thalassarche impavida</u> Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area

Name	Status	Type of Presence
<u><i>Thalassarche melanophrys</i></u> Black-browed Albatross [66472]	Vulnerable	Species or species habitat may occur within area
Mammals		
<u><i>Balaenoptera musculus</i></u> Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
<u><i>Bettongia penicillata ogilbyi</i></u> Woylie [66844]	Endangered	Species or species habitat likely to occur within area
<u><i>Dasyurus geoffroii</i></u> Chuditch, Western Quoll [330]	Vulnerable	Species or species habitat may occur within area
<u><i>Eubalaena australis</i></u> Southern Right Whale [40]	Endangered	Breeding known to occur within area
<u><i>Megaptera novaeangliae</i></u> Humpback Whale [38]	Vulnerable	Species or species habitat known to occur within area
<u><i>Neophoca cinerea</i></u> Australian Sea-lion, Australian Sea Lion [22]	Vulnerable	Species or species habitat known to occur within area
<u><i>Pseudocheirus occidentalis</i></u> Western Ringtail Possum, Ngwayir, Womp, Woder, Ngoor, Ngoolangit [25911]	Critically Endangered	Species or species habitat likely to occur within area
Plants		
<u><i>Andersonia gracilis</i></u> Slender Andersonia [14470]	Endangered	Species or species habitat may occur within area
<u><i>Anigozanthos viridis subsp. terraspectans</i></u> Dwarf Green Kangaroo Paw [3435]	Vulnerable	Species or species habitat may occur within area
<u><i>Caladenia huegelii</i></u> King Spider-orchid, Grand Spider-orchid, Rusty Spider-orchid [7309]	Endangered	Species or species habitat may occur within area
<u><i>Diuris micrantha</i></u> Dwarf Bee-orchid [55082]	Vulnerable	Species or species habitat likely to occur within area
<u><i>Diuris purdiei</i></u> Purdie's Donkey-orchid [12950]	Endangered	Species or species habitat may occur within area
<u><i>Drakaea elastica</i></u> Glossy-leaved Hammer Orchid, Glossy-leaved Hammer Orchid, Warty Hammer Orchid [16753]	Endangered	Species or species habitat likely to occur within area
<u><i>Drakaea micrantha</i></u> Dwarf Hammer-orchid [56755]	Vulnerable	Species or species habitat likely to occur within area
<u><i>Eleocharis keigheryi</i></u> Keighery's Eleocharis [64893]	Vulnerable	Species or species habitat may occur within area
<u><i>Lepidosperma rostratum</i></u> Beaked Lepidosperma [14152]	Endangered	Species or species habitat likely to occur within area
<u><i>Synaphea sp. Fairbridge Farm (D. Papenfus 696)</i></u> Selena's Synaphea [82881]	Critically Endangered	Species or species habitat may occur within area

Name	Status	Type of Presence
<u><i>Thelymitra dedmaniarum</i></u> Cinnamon Sun Orchid [65105]	Endangered	Species or species habitat may occur within area
<u><i>Thelymitra stellata</i></u> Star Sun-orchid [7060]	Endangered	Species or species habitat may occur within area
Reptiles		
<u><i>Caretta caretta</i></u> Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
<u><i>Chelonia mydas</i></u> Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
<u><i>Dermochelys coriacea</i></u> Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area
<u><i>Natator depressus</i></u> Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Sharks		
<u><i>Carcharias taurus</i> (west coast population)</u> Grey Nurse Shark (west coast population) [68752]	Vulnerable	Species or species habitat known to occur within area
<u><i>Carcharodon carcharias</i></u> White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat known to occur within area
<u><i>Rhincodon typus</i></u> Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Listed Migratory Species		[Resource Information]
* Species is listed under a different scientific name on the EPBC Act - Threatened Species list.		
Name	Threatened	Type of Presence
<u>Migratory Marine Birds</u>		
<u><i>Anous stolidus</i></u> Common Noddy [825]		Species or species habitat likely to occur within area
<u><i>Apus pacificus</i></u> Fork-tailed Swift [678]		Species or species habitat likely to occur within area
<u><i>Ardenna carneipes</i></u> Flesh-footed Shearwater, Fleshy-footed Shearwater [82404]		Foraging, feeding or related behaviour likely to occur within area
<u><i>Diomedea amsterdamensis</i></u> Amsterdam Albatross [64405]	Endangered	Species or species habitat may occur within area
<u><i>Diomedea epomophora</i></u> Southern Royal Albatross [89221]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
<u><i>Diomedea exulans</i></u> Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
<u><i>Diomedea sanfordi</i></u> Northern Royal Albatross [64456]	Endangered	Foraging, feeding or related behaviour likely to occur within area

Name	Threatened	Type of Presence
<u>Hydroprogne caspia</u> Caspian Tern [808]		Foraging, feeding or related behaviour known to occur within area
<u>Macronectes giganteus</u> Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area
<u>Macronectes halli</u> Northern Giant Petrel [1061]	Vulnerable	Species or species habitat may occur within area
<u>Onychoprion anaethetus</u> Bridled Tern [82845]		Foraging, feeding or related behaviour likely to occur within area
<u>Phoebetria fusca</u> Sooty Albatross [1075]	Vulnerable	Species or species habitat may occur within area
<u>Sterna dougallii</u> Roseate Tern [817]		Foraging, feeding or related behaviour likely to occur within area
<u>Thalassarche carteri</u> Indian Yellow-nosed Albatross [64464]	Vulnerable	Foraging, feeding or related behaviour may occur within area
<u>Thalassarche cauta</u> Tasmanian Shy Albatross [89224]	Vulnerable*	Foraging, feeding or related behaviour likely to occur within area
<u>Thalassarche impavida</u> Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
<u>Thalassarche melanophris</u> Black-browed Albatross [66472]	Vulnerable	Species or species habitat may occur within area
<u>Thalassarche steadi</u> White-capped Albatross [64462]	Vulnerable*	Foraging, feeding or related behaviour likely to occur within area
Migratory Marine Species		
<u>Balaena glacialis australis</u> Southern Right Whale [75529]	Endangered*	Breeding known to occur within area
<u>Balaenoptera edeni</u> Bryde's Whale [35]		Species or species habitat may occur within area
<u>Balaenoptera musculus</u> Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
<u>Caperea marginata</u> Pygmy Right Whale [39]		Species or species habitat may occur within area
<u>Carcharodon carcharias</u> White Shark, Great White Shark [64470]	Vulnerable	Species or species habitat known to occur within area
<u>Caretta caretta</u> Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
<u>Chelonia mydas</u> Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area

Name	Threatened	Type of Presence
<i>Dermochelys coriacea</i> Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area
<i>Lamna nasus</i> Porbeagle, Mackerel Shark [83288]		Species or species habitat may occur within area
<i>Manta alfredi</i> Reef Manta Ray, Coastal Manta Ray, Inshore Manta Ray, Prince Alfred's Ray, Resident Manta Ray [84994]		Species or species habitat may occur within area
<i>Manta birostris</i> Giant Manta Ray, Chevron Manta Ray, Pacific Manta Ray, Pelagic Manta Ray, Oceanic Manta Ray [84995]		Species or species habitat may occur within area
<i>Megaptera novaeangliae</i> Humpback Whale [38]	Vulnerable	Species or species habitat known to occur within area
<i>Natator depressus</i> Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
<i>Orcinus orca</i> Killer Whale, Orca [46]		Species or species habitat may occur within area
<i>Rhincodon typus</i> Whale Shark [66680]	Vulnerable	Species or species habitat may occur within area
Migratory Terrestrial Species		
<i>Motacilla cinerea</i> Grey Wagtail [642]		Species or species habitat may occur within area
Migratory Wetlands Species		
<i>Actitis hypoleucus</i> Common Sandpiper [59309]		Species or species habitat known to occur within area
<i>Arenaria interpres</i> Ruddy Turnstone [872]		Roosting known to occur within area
<i>Calidris acuminata</i> Sharp-tailed Sandpiper [874]		Roosting known to occur within area
<i>Calidris alba</i> Sanderling [875]		Roosting known to occur within area
<i>Calidris canutus</i> Red Knot, Knot [855]	Endangered	Species or species habitat known to occur within area
<i>Calidris ferruginea</i> Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
<i>Calidris melanotos</i> Pectoral Sandpiper [858]		Species or species habitat known to occur within area
<i>Calidris ruficollis</i> Red-necked Stint [860]		Roosting known to occur within area
<i>Calidris tenuirostris</i> Great Knot [862]	Critically Endangered	Roosting known to occur within area
<i>Charadrius bicinctus</i> Double-banded Plover [895]		Roosting known to occur within area

Name	Threatened	Type of Presence
<u>Charadrius leschenaultii</u> Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Roosting known to occur within area
<u>Charadrius mongolus</u> Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
<u>Gallinago megala</u> Swinhoe's Snipe [864]		Roosting likely to occur within area
<u>Gallinago stenura</u> Pin-tailed Snipe [841]		Roosting likely to occur within area
<u>Limosa lapponica</u> Bar-tailed Godwit [844]		Species or species habitat known to occur within area
<u>Limosa limosa</u> Black-tailed Godwit [845]		Roosting known to occur within area
<u>Numenius madagascariensis</u> Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
<u>Numenius minutus</u> Little Curlew, Little Whimbrel [848]		Roosting likely to occur within area
<u>Numenius phaeopus</u> Whimbrel [849]		Roosting known to occur within area
<u>Pandion haliaetus</u> Osprey [952]		Breeding known to occur within area
<u>Phalaropus lobatus</u> Red-necked Phalarope [838]		Roosting known to occur within area
<u>Pluvialis fulva</u> Pacific Golden Plover [25545]		Roosting known to occur within area
<u>Pluvialis squatarola</u> Grey Plover [865]		Roosting known to occur within area
<u>Tringa brevipes</u> Grey-tailed Tattler [851]		Roosting known to occur within area
<u>Tringa glareola</u> Wood Sandpiper [829]		Species or species habitat known to occur within area
<u>Tringa nebularia</u> Common Greenshank, Greenshank [832]		Species or species habitat known to occur within area
<u>Tringa stagnatilis</u> Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area
<u>Tringa totanus</u> Common Redshank, Redshank [835]		Roosting known to occur within area
<u>Xenus cinereus</u> Terek Sandpiper [59300]		Roosting known to occur within area

Other Matters Protected by the EPBC Act

Commonwealth Land

[Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Listed Marine Species

[Resource Information]

* Species is listed under a different scientific name on the EPBC Act - Threatened Species list.		
Name	Threatened	Type of Presence
Birds		
Actitis hypoleucus		
Common Sandpiper [59309]		Species or species habitat known to occur within area
Anous stolidus		
Common Noddy [825]		Species or species habitat likely to occur within area
Anous tenuirostris melanops		
Australian Lesser Noddy [26000]	Vulnerable	Species or species habitat may occur within area
Apus pacificus		
Fork-tailed Swift [678]		Species or species habitat likely to occur within area
Ardea alba		
Great Egret, White Egret [59541]		Breeding known to occur within area
Ardea ibis		
Cattle Egret [59542]		Species or species habitat may occur within area
Arenaria interpres		
Ruddy Turnstone [872]		Roosting known to occur within area
Calidris acuminata		
Sharp-tailed Sandpiper [874]		Roosting known to occur within area
Calidris alba		
Sanderling [875]		Roosting known to occur within area
Calidris canutus		
Red Knot, Knot [855]	Endangered	Species or species habitat known to occur within area
Calidris ferruginea		
Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area
Calidris melanotos		
Pectoral Sandpiper [858]		Species or species habitat known to occur within area

Name	Threatened	Type of Presence
<i>Calidris ruficollis</i> Red-necked Stint [860]		Roosting known to occur within area
<i>Calidris tenuirostris</i> Great Knot [862]	Critically Endangered	Roosting known to occur within area
<i>Catharacta skua</i> Great Skua [59472]		Species or species habitat may occur within area
<i>Charadrius bicinctus</i> Double-banded Plover [895]		Roosting known to occur within area
<i>Charadrius leschenaultii</i> Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Roosting known to occur within area
<i>Charadrius mongolus</i> Lesser Sand Plover, Mongolian Plover [879]	Endangered	Roosting known to occur within area
<i>Charadrius ruficapillus</i> Red-capped Plover [881]		Roosting known to occur within area
<i>Diomedea amsterdamensis</i> Amsterdam Albatross [64405]	Endangered	Species or species habitat may occur within area
<i>Diomedea epomophora</i> Southern Royal Albatross [89221]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
<i>Diomedea exulans</i> Wandering Albatross [89223]	Vulnerable	Foraging, feeding or related behaviour likely to occur within area
<i>Diomedea sanfordi</i> Northern Royal Albatross [64456]	Endangered	Foraging, feeding or related behaviour likely to occur within area
<i>Gallinago megala</i> Swinhoe's Snipe [864]		Roosting likely to occur within area
<i>Gallinago stenura</i> Pin-tailed Snipe [841]		Roosting likely to occur within area
<i>Haliaeetus leucogaster</i> White-bellied Sea-Eagle [943]		Species or species habitat known to occur within area
<i>Halobaena caerulea</i> Blue Petrel [1059]	Vulnerable	Species or species habitat may occur within area
<i>Heteroscelus brevipes</i> Grey-tailed Tattler [59311]		Roosting known to occur within area
<i>Himantopus himantopus</i> Pied Stilt, Black-winged Stilt [870]		Roosting known to occur within area
<i>Larus pacificus</i> Pacific Gull [811]		Foraging, feeding or related behaviour may occur within area
<i>Limosa lapponica</i> Bar-tailed Godwit [844]		Species or species habitat known to occur within area
<i>Limosa limosa</i> Black-tailed Godwit [845]		Roosting known to occur within area
<i>Macronectes giganteus</i> Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area

Name	Threatened	Type of Presence
<i>Macronectes halli</i> Northern Giant Petrel [1061]	Vulnerable	Species or species habitat may occur within area
<i>Merops ornatus</i> Rainbow Bee-eater [670]		Species or species habitat may occur within area
<i>Motacilla cinerea</i> Grey Wagtail [642]		Species or species habitat may occur within area
<i>Numenius madagascariensis</i> Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area
<i>Numenius minutus</i> Little Curlew, Little Whimbrel [848]		Roosting likely to occur within area
<i>Numenius phaeopus</i> Whimbrel [849]		Roosting known to occur within area
<i>Pachyptila turtur</i> Fairy Prion [1066]		Species or species habitat known to occur within area
<i>Pandion haliaetus</i> Osprey [952]		Breeding known to occur within area
<i>Phalaropus lobatus</i> Red-necked Phalarope [838]		Roosting known to occur within area
<i>Phoebetria fusca</i> Sooty Albatross [1075]	Vulnerable	Species or species habitat may occur within area
<i>Pluvialis fulva</i> Pacific Golden Plover [25545]		Roosting known to occur within area
<i>Pluvialis squatarola</i> Grey Plover [865]		Roosting known to occur within area
<i>Pterodroma mollis</i> Soft-plumaged Petrel [1036]	Vulnerable	Species or species habitat may occur within area
<i>Puffinus assimilis</i> Little Shearwater [59363]		Foraging, feeding or related behaviour known to occur within area
<i>Puffinus carneipes</i> Flesh-footed Shearwater, Fleshy-footed Shearwater [1043]		Foraging, feeding or related behaviour likely to occur within area
<i>Recurvirostra novaehollandiae</i> Red-necked Avocet [871]		Roosting known to occur within area
<i>Rostratula benghalensis (sensu lato)</i> Painted Snipe [889]	Endangered*	Species or species habitat likely to occur within area
<i>Sterna anaethetus</i> Bridled Tern [814]		Foraging, feeding or related behaviour likely to occur within area
<i>Sterna caspia</i> Caspian Tern [59467]		Foraging, feeding or related behaviour known to occur within area
<i>Sterna dougallii</i> Roseate Tern [817]		Foraging, feeding or related behaviour likely to occur within area

Name	Threatened	Type of Presence
<u><i>Thalassarche carteri</i></u> Indian Yellow-nosed Albatross [64464]	Vulnerable	Foraging, feeding or related behaviour may occur within area
<u><i>Thalassarche cauta</i></u> Tasmanian Shy Albatross [89224]	Vulnerable*	Foraging, feeding or related behaviour likely to occur within area
<u><i>Thalassarche impavida</i></u> Campbell Albatross, Campbell Black-browed Albatross [64459]	Vulnerable	Species or species habitat may occur within area
<u><i>Thalassarche melanophris</i></u> Black-browed Albatross [66472]	Vulnerable	Species or species habitat may occur within area
<u><i>Thalassarche steadi</i></u> White-capped Albatross [64462]	Vulnerable*	Foraging, feeding or related behaviour likely to occur within area
<u><i>Thinornis rubricollis</i></u> Hooded Plover [59510]		Species or species habitat known to occur within area
<u><i>Tringa glareola</i></u> Wood Sandpiper [829]		Species or species habitat known to occur within area
<u><i>Tringa nebularia</i></u> Common Greenshank, Greenshank [832]		Species or species habitat known to occur within area
<u><i>Tringa stagnatilis</i></u> Marsh Sandpiper, Little Greenshank [833]		Roosting known to occur within area
<u><i>Tringa totanus</i></u> Common Redshank, Redshank [835]		Roosting known to occur within area
<u><i>Xenus cinereus</i></u> Terek Sandpiper [59300]		Roosting known to occur within area
Fish		
<u><i>Acentronura australis</i></u> Southern Pygmy Pipehorse [66185]		Species or species habitat may occur within area
<u><i>Campichthys galei</i></u> Gale's Pipefish [66191]		Species or species habitat may occur within area
<u><i>Choeroichthys suillus</i></u> Pig-snouted Pipefish [66198]		Species or species habitat may occur within area
<u><i>Halicampus brocki</i></u> Brock's Pipefish [66219]		Species or species habitat may occur within area
<u><i>Heraldia nocturna</i></u> Upside-down Pipefish, Eastern Upside-down Pipefish, Eastern Upside-down Pipefish [66227]		Species or species habitat may occur within area
<u><i>Hippocampus angustus</i></u> Western Spiny Seahorse, Narrow-bellied Seahorse [66234]		Species or species habitat may occur within area
<u><i>Hippocampus breviceps</i></u> Short-head Seahorse, Short-snouted Seahorse [66235]		Species or species habitat may occur within area
<u><i>Hippocampus subelongatus</i></u> West Australian Seahorse [66722]		Species or species habitat may occur within

Name	Threatened	Type of Presence area
<u>Histiogamphelus cristatus</u> Rhino Pipefish, Macleay's Crested Pipefish, Ring-back Pipefish [66243]		Species or species habitat may occur within area
<u>Lissocampus caudalis</u> Australian Smooth Pipefish, Smooth Pipefish [66249]		Species or species habitat may occur within area
<u>Lissocampus fatiloquus</u> Prophet's Pipefish [66250]		Species or species habitat may occur within area
<u>Lissocampus runa</u> Javelin Pipefish [66251]		Species or species habitat may occur within area
<u>Maroubra perserrata</u> Sawtooth Pipefish [66252]		Species or species habitat may occur within area
<u>Mitotichthys meraculus</u> Western Crested Pipefish [66259]		Species or species habitat may occur within area
<u>Nannocampus subosseus</u> Bonyhead Pipefish, Bony-headed Pipefish [66264]		Species or species habitat may occur within area
<u>Phycodurus eques</u> Leafy Seadragon [66267]		Species or species habitat may occur within area
<u>Phyllopteryx taeniolatus</u> Common Seadragon, Weedy Seadragon [66268]		Species or species habitat may occur within area
<u>Pugnaso curtirostris</u> Pugnose Pipefish, Pug-nosed Pipefish [66269]		Species or species habitat may occur within area
<u>Solegnathus lettiiensis</u> Gunther's Pipehorse, Indonesian Pipefish [66273]		Species or species habitat may occur within area
<u>Stigmatopora argus</u> Spotted Pipefish, Gulf Pipefish, Peacock Pipefish [66276]		Species or species habitat may occur within area
<u>Stigmatopora nigra</u> Widebody Pipefish, Wide-bodied Pipefish, Black Pipefish [66277]		Species or species habitat may occur within area
<u>Syngnathoides biaculeatus</u> Double-end Pipehorse, Double-ended Pipehorse, Alligator Pipefish [66279]		Species or species habitat may occur within area
<u>Urocampus carinirostris</u> Hairy Pipefish [66282]		Species or species habitat may occur within area
<u>Vanacampus margaritifer</u> Mother-of-pearl Pipefish [66283]		Species or species habitat may occur within area
<u>Vanacampus phillipi</u> Port Phillip Pipefish [66284]		Species or species habitat may occur within area
<u>Vanacampus poecilolaemus</u> Longsnout Pipefish, Australian Long-snout Pipefish, Long-snouted Pipefish [66285]		Species or species habitat may occur within area

Name	Status	Type of Presence
Mammals		
Arctocephalus forsteri		
Long-nosed Fur-seal, New Zealand Fur-seal [20]		Species or species habitat may occur within area
Neophoca cinerea		
Australian Sea-lion, Australian Sea Lion [22]	Vulnerable	Species or species habitat known to occur within area
Reptiles		
Aipysurus pooleorum		
Shark Bay Seasnake [66061]		Species or species habitat may occur within area
Caretta caretta		
Loggerhead Turtle [1763]	Endangered	Foraging, feeding or related behaviour known to occur within area
Chelonia mydas		
Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Dermochelys coriacea		
Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour known to occur within area
Disteira kingii		
Spectacled Seasnake [1123]		Species or species habitat may occur within area
Natator depressus		
Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area
Pelamis platurus		
Yellow-bellied Seasnake [1091]		Species or species habitat may occur within area
Whales and other Cetaceans		[Resource Information]
Name	Status	Type of Presence
Mammals		
Balaenoptera acutorostrata		
Minke Whale [33]		Species or species habitat may occur within area
Balaenoptera edeni		
Bryde's Whale [35]		Species or species habitat may occur within area
Balaenoptera musculus		
Blue Whale [36]	Endangered	Species or species habitat likely to occur within area
Caperea marginata		
Pygmy Right Whale [39]		Species or species habitat may occur within area
Delphinus delphis		
Common Dophin, Short-beaked Common Dolphin [60]		Species or species habitat may occur within area
Eubalaena australis		
Southern Right Whale [40]	Endangered	Breeding known to occur within area
Grampus griseus		
Risso's Dolphin, Grampus [64]		Species or species habitat may occur within area
Megaptera novaeangliae		
Humpback Whale [38]	Vulnerable	Species or species habitat known to occur within area

Name	Status	Type of Presence
<u>Orcinus orca</u> Killer Whale, Orca [46]		Species or species habitat may occur within area
<u>Stenella attenuata</u> Spotted Dolphin, Pantropical Spotted Dolphin [51]		Species or species habitat may occur within area
<u>Tursiops aduncus</u> Indian Ocean Bottlenose Dolphin, Spotted Bottlenose Dolphin [68418]		Species or species habitat likely to occur within area
<u>Tursiops truncatus s. str.</u> Bottlenose Dolphin [68417]		Species or species habitat may occur within area

Invasive Species		[Resource Information]
Weeds reported here are the 20 species of national significance (WoNS), along with other introduced plants that are considered by the States and Territories to pose a particularly significant threat to biodiversity. The following feral animals are reported: Goat, Red Fox, Cat, Rabbit, Pig, Water Buffalo and Cane Toad. Maps from Landscape Health Project, National Land and Water Resources Audit, 2001.		

Name	Status	Type of Presence
Birds		
Acridotheres tristis Common Myna, Indian Myna [387]		Species or species habitat likely to occur within area
Anas platyrhynchos Mallard [974]		Species or species habitat likely to occur within area
Carduelis carduelis European Goldfinch [403]		Species or species habitat likely to occur within area
Columba livia Rock Pigeon, Rock Dove, Domestic Pigeon [803]		Species or species habitat likely to occur within area
Passer domesticus House Sparrow [405]		Species or species habitat likely to occur within area
Passer montanus Eurasian Tree Sparrow [406]		Species or species habitat likely to occur within area

Name	Status	Type of Presence
<i>Streptopelia chinensis</i> Spotted Turtle-Dove [780]		Species or species habitat likely to occur within area
<i>Streptopelia senegalensis</i> Laughing Turtle-dove, Laughing Dove [781]		Species or species habitat likely to occur within area
<i>Sturnus vulgaris</i> Common Starling [389]		Species or species habitat likely to occur within area
<i>Turdus merula</i> Common Blackbird, Eurasian Blackbird [596]		Species or species habitat likely to occur within area
Mammals		
<i>Bos taurus</i> Domestic Cattle [16]		Species or species habitat likely to occur within area
<i>Canis lupus familiaris</i> Domestic Dog [82654]		Species or species habitat likely to occur within area
<i>Felis catus</i> Cat, House Cat, Domestic Cat [19]		Species or species habitat likely to occur within area
<i>Funambulus pennantii</i> Northern Palm Squirrel, Five-striped Palm Squirrel [129]		Species or species habitat likely to occur within area
<i>Mus musculus</i> House Mouse [120]		Species or species habitat likely to occur within area
<i>Oryctolagus cuniculus</i> Rabbit, European Rabbit [128]		Species or species habitat likely to occur within area
<i>Rattus norvegicus</i> Brown Rat, Norway Rat [83]		Species or species habitat likely to occur within area
<i>Rattus rattus</i> Black Rat, Ship Rat [84]		Species or species habitat likely to occur within area
<i>Vulpes vulpes</i> Red Fox, Fox [18]		Species or species habitat likely to occur within area
Plants		
<i>Anredera cordifolia</i> Madeira Vine, Jalap, Lamb's-tail, Mignonette Vine, Anredera, Gulf Madeiravine, Heartleaf Madeiravine, Potato Vine [2643]		Species or species habitat likely to occur within area
<i>Asparagus aethiopicus</i> Asparagus Fern, Ground Asparagus, Basket Fern, Sprengi's Fern, Bushy Asparagus, Emerald Asparagus [62425]		Species or species habitat likely to occur within area
<i>Asparagus asparagoides</i> Bridal Creeper, Bridal Veil Creeper, Smilax, Florist's Smilax, Smilax Asparagus [22473]		Species or species habitat likely to occur within area
<i>Asparagus declinatus</i> Bridal Veil, Bridal Veil Creeper, Pale Berry Asparagus Fern, Asparagus Fern, South African Creeper [66908]		Species or species habitat likely to occur within area
<i>Asparagus plumosus</i> Climbing Asparagus-fern [48993]		Species or species habitat likely to occur

Name	Status	Type of Presence within area
Brachiaria mutica Para Grass [5879]		Species or species habitat may occur within area
Cenchrus ciliaris Buffel-grass, Black Buffel-grass [20213]		Species or species habitat may occur within area
Chrysanthemoides monilifera Bitou Bush, Boneseed [18983]		Species or species habitat may occur within area
Chrysanthemoides monilifera subsp. monilifera Boneseed [16905]		Species or species habitat likely to occur within area
Genista sp. X Genista monspessulana Broom [67538]		Species or species habitat may occur within area
Lantana camara Lantana, Common Lantana, Kamara Lantana, Large-leaf Lantana, Pink Flowered Lantana, Red Flowered Lantana, Red-Flowered Sage, White Sage, Wild Sage [10892]		Species or species habitat likely to occur within area
Lycium ferocissimum African Boxthorn, Boxthorn [19235]		Species or species habitat likely to occur within area
Olea europaea Olive, Common Olive [9160]		Species or species habitat may occur within area
Opuntia spp. Prickly Pears [82753]		Species or species habitat likely to occur within area
Pinus radiata Radiata Pine Monterey Pine, Insignis Pine, Wilding Pine [20780]		Species or species habitat may occur within area
Rubus fruticosus aggregate Blackberry, European Blackberry [68406]		Species or species habitat likely to occur within area
Sagittaria platyphylla Delta Arrowhead, Arrowhead, Slender Arrowhead [68483]		Species or species habitat likely to occur within area
Salix spp. except S.babylonica, S.x calodendron & S.x reichardtii Willows except Weeping Willow, Pussy Willow and Sterile Pussy Willow [68497]		Species or species habitat likely to occur within area
Salvinia molesta Salvinia, Giant Salvinia, Aquarium Watermoss, Kariba Weed [13665]		Species or species habitat likely to occur within area
Tamarix aphylla Athel Pine, Athel Tree, Tamarisk, Athel Tamarisk, Athel Tamarix, Desert Tamarisk, Flowering Cypress, Salt Cedar [16018]		Species or species habitat likely to occur within area
Reptiles		
Hemidactylus frenatus Asian House Gecko [1708]		Species or species habitat likely to occur within area

Nationally Important Wetlands	[Resource Information]
Name	State
Herdsman Lake	WA
Palmer Barracks, Guildford	WA

Name	State
<u>Swan-Canning Estuary</u>	WA

Caveat

The information presented in this report has been provided by a range of data sources as acknowledged at the end of the report.

This report is designed to assist in identifying the locations of places which may be relevant in determining obligations under the Environment Protection and Biodiversity Conservation Act 1999. It holds mapped locations of World and National Heritage properties, Wetlands of International and National Importance, Commonwealth and State/Territory reserves, listed threatened, migratory and marine species and listed threatened ecological communities. Mapping of Commonwealth land is not complete at this stage. Maps have been collated from a range of sources at various resolutions.

Not all species listed under the EPBC Act have been mapped (see below) and therefore a report is a general guide only. Where available data supports mapping, the type of presence that can be determined from the data is indicated in general terms. People using this information in making a referral may need to consider the qualifications below and may need to seek and consider other information sources.

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species distributions have been derived through a variety of methods. Where distributions are well known and if time permits, maps are derived using either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc) together with point locations and described habitat; or environmental modelling (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where very little information is available for species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc). In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More reliable distribution mapping methods are used to update these distributions as time permits.

Only selected species covered by the following provisions of the EPBC Act have been mapped:

- migratory and
- marine

The following species and ecological communities have not been mapped and do not appear in reports produced from this database:

- threatened species listed as extinct or considered as vagrants
- some species and ecological communities that have only recently been listed
- some terrestrial species that overfly the Commonwealth marine area
- migratory species that are very widespread, vagrant, or only occur in small numbers

The following groups have been mapped, but may not cover the complete distribution of the species:

- non-threatened seabirds which have only been mapped for recorded breeding sites
- seals which have only been mapped for breeding sites near the Australian continent

Such breeding sites may be important for the protection of the Commonwealth Marine environment.

Name ID	Species Name	Naturalised	Conservation Code	¹ Endemic To Query Area
2706.	25765 <i>Zosterops lateralis</i> (Grey-breasted White-eye, Silvereye)			
2707.	36218 <i>Zygodon menziesii</i>			
2708.	4390 <i>Zygophyllum fruticosum</i> (Shrubby Twinleaf)			

Conservation Codes

T - Rare or likely to become extinct
 X - Presumed extinct
 IA - Protected under international agreement
 S - Other specially protected fauna
 1 - Priority 1
 2 - Priority 2
 3 - Priority 3
 4 - Priority 4
 5 - Priority 5

¹ For NatureMap's purposes, species flagged as endemic are those whose records are wholly contained within the search area. Note that only those records complying with the search criterion are included in the calculation. For example, if you limit records to those from a specific datasource, only records from that datasource are used to determine if a species is restricted to the query area.

Appendix B

Species List

Flora Species List - Lot 2 The Boulevard, Wembley Downs

Note: *=introduced weed species, Pl=planted

Family	Species
Aizoaceae	* <i>Carpobrotus edulis</i>
Anacardiaceae	* <i>Schinus terebinthifolius</i>
Apiaceae	* <i>Foeniculum vulgare</i>
Arecaceae	* <i>Washingtonia filifera</i>
Asparagaceae	* <i>Asparagus asparagoides</i>
Asteraceae	* <i>Conyza bonariensis</i> * <i>Osteospermum ecklonis</i> * <i>Hypochaeris glabra</i> * <i>Sonchus oleraceas</i> * <i>Ursinia anthemoides</i>
Casurinaceae	<i>Allocasuarina humilis</i>
Colchicaceae	<i>Burchardia congesta</i>
Chenopodiaceae	<i>Rhagodia baccata</i> subsp. <i>baccata</i>
Cyperaceae	* <i>Carex divisa</i> <i>Schoenus ?pedicellatus</i>
Euphorbiaceae	* <i>Euphorbia terracina</i> * <i>Ricinus communis</i>
Fabaceae	* <i>Acacia longifolia</i> <i>Acacia pulchella</i> var. <i>pulchella</i> <i>Acacia saligna</i> <i>Hardenbergia comptoniana</i> <i>Jacksonia furcellata</i>

	<i>Jacksonia sternbergiana</i> <i>Kennedia prostrata</i> * <i>Lupinus</i> sp. * <i>Trifolium</i> sp. * <i>Vicia</i> sp.
Geraniaceae	* <i>Pelargonium capitatum</i>
Haemodoraceae	<i>Haemodorum laxum</i>
Hemerocallidaceae	<div style="border: 1px solid black; padding: 2px;"> <i>Corynotheca micrantha</i> var. <i>micrantha</i> <i>Dianella revoluta</i> var. <i>divaricata</i> </div>
Iridaceae	* <i>Gladiolus caryophyllaceus</i> * <i>Watsonia</i> sp.
Juncaceae	<div style="border: 1px solid black; padding: 2px;"> <i>Juncus pallidus</i> </div>
Moraceae	* <i>Ficus carica</i>
Myrtaceae	Pl <i>Agonis flexuosa</i> * <i>Chamelaucium uncinatum</i> <i>Corymbia calophylla</i> <i>Eucalyptus gomphocephala</i> var. <i>gomphocephala</i> <i>Eucalyptus marginata</i> subsp. <i>marginata</i> <i>Eucalyptus rudis</i>
Oleaceae	* <i>Olea europaea</i> subsp. <i>europaea</i>
Papaveraceae	* <i>Fumaria capreolata</i>
Poaceae	* <i>Avena barbata</i> * <i>Briza maxima</i> * <i>Bromus diandrus</i> * <i>Cortaderia selloana</i> * <i>Cynodon dactylon</i> * <i>Ehrharta calycina</i> * <i>Ehrharta longiflora</i> * <i>Eragrostis curvula</i> * <i>Lagurus ovatus</i> <div style="border: 1px solid black; padding: 2px;"> <i>Microlaena stipoides</i> </div>

- * *Penesetum clandestinum*
- * *Sporobolus africanus*
- * *Vulpia* sp.

Proteaceae

- Banksia attenuata*
- Banksia grandis*
- Banksia prionotes*
- PI *Bankisa sessilis*
- PI *Hakea prostrata*
- PI *Hakea ruscifolia*
- PI *Hakea trifurcata*

Santalaceae

- Exocarpos sparteus*

Solanaceae

- * *Nicotiana glauca*
- * *Solanum nigrum*

Santalaceae

- Exocarpos sparteus*

Xanthorrhoeaceae

- Xanthorrhoea brunonis*
- Xanthorrhoea preissii*

Zamiaceae

- Macrozamia fraseri*

Sample type: photopoint

Size: other

NW corner easting: 385298.3

NW corner northing: 6467051

Altitude (m): 0

Geographic datum/zone: GDA94/Zone 50

Soil water content: dry

Landform: flat

Time since fire: > 5 yrs

Disturbance: high - weeds surrounding

Soil type/texture sand

Bare ground (%): 0

Rocks (%) and type: No rocks

Soil colour: grey/yellow

Litter: 5% (leaves,logs,)

Vegetation condition: degraded-completely degraded

Strata	Cover (%)	Height (m)
Upper:	70 to 100	10 to 30
Mid:	<10	1 to 2
Ground layer 1:	70 to 100	<0.5
Ground layer 2:	<10	<0.5

Vegetation description

Forest of *Eucalyptus rudis* over sparse shrubland *Acacia saligna* and *Jacksonia furcellata* over low closed non-native grassland and herland

Sample Name: PP8

Project no.: EP18-127(01)

Date: 16/11/2018

Author: > 5 yrs

Status Non-permanent

PP8: Page 2 of 2

Species Data

* denotes non-native species

Status	Confirmed name	Cover (%)
*	<i>Acacia longifolia</i>	
	<i>Acacia saligna</i>	
*	<i>Asparagus asparagoides</i>	
*	<i>Avena barbata</i>	
*	<i>Briza maximia</i>	
*	<i>Bromus diandrus</i>
