

CIBCM-CIAT, financed by the Rockefeller Foundation and the Fundación para la Cooperación Costa Rica–United States of America (CR.USA), January 2001 to December 2004.

PI of the project “Development of strategies to produce rice varieties resistant to the fungus *Pryricularia grisea* in Costa Rica” financed by the Ministerio de Ciencia y Tecnología (MICIT), January 2001 to December 2002.

Collaborator of the project “Development of new tools for the control weedy rice in commercial rice plantations of Costa Rica” financed by the Ministerio de Ciencia y Tecnología (MICIT). January 2001 to December 2002.

Confirmation and Agreement

I hereby confirm that the above information is correct and agree to its inclusion in the Roster of Experts on Access and Benefit-sharing of the Convention on Biological Diversity. I have no objection to this information being made publicly available.
